For the attention of unitholders in the La Française Carbon Impact Global Government Bonds mutual fund,

Opinion

In the performance of the role entrusted to us by the management company, we have audited the annual accounts of the La Française Carbon Impact Global Government Bonds undertaking for collective investment, which takes the form of a mutual fund, for the financial year ending 30 December 2022, as attached to this report.

We hereby certify that the annual accounts give a true and fair view of the results of operations for the past year and of the financial situation and the assets of the mutual fund at the end of said financial year, in conformity with French accounting rules and principles.

Basis of the opinion on the annual accounts

Auditing standard

We have carried out our audit in accordance with the professional standards applicable in France. We deem the evidence gathered to be a sufficient and suitable basis for our opinion.

Our responsibilities in accordance with our obligations under these standards are defined in the section of this report entitled "Auditor's responsibilities for the audit of the annual accounts".

A simplified joint stock company with a capital of C2,188,160 Accountancy firm duly registered with the Regional Council of Paris/Ile-de-France Audit firm duly registered with the Compagnie Régionale de Versailles 572 028 041 RCS Nanterre VAT: FR 02 572 028 041

Independence

We carried out our audit in accordance with the independence rules stipulated by the Commercial Code and the professional Code of Ethics applicable to statutory auditors, from 1 January 2022 to the date of publication of our report.

Documents supporting our findings

Pursuant to the provisions of Articles L823-9 and R823-7 of the Commercial Code relating to the justification of our findings, we wish to inform you that the most important assessments that we have made, in our professional judgement, concern the appropriateness of the accounting principles used, specifically with regard to the financial instruments in the portfolio, and upon presentation of all accounts, in accordance with the accounting charts for open-ended collective investment undertakings.

The assessments that have accordingly been made form part of the process of auditing the annual accounts as a whole, and they contribute to the formulation of our opinion as expressed above. We will not express an opinion on items in these annual accounts that are viewed in isolation.

Specific checks

We also carried out the specific checks provided for by legal and regulatory requirements in accordance with the professional standards applicable in France.

We have no comments concerning the accuracy and consistency with the annual accounts of the information stated in the management report drafted by the management company.

Management company responsibilities with regard to the annual accounts

The management company must draw up annual accounts which are a true and faithful representation of the business in accordance with French accounting rules and principles, and implement any internal controls it deems necessary in order to prepare annual accounts that do not include any significant anomalies whether due to fraud or error.

When drafting the annual accounts, it is the responsibility of the management company to evaluate the mutual fund's ability to continue its operations, to present in these accounts, where appropriate, the necessary information relating to the continuity of operations and to apply the accounting policy on a going concern basis, unless it is intended to liquidate the mutual fund or to cease trading.

The management company prepared the annual accounts.

Auditor's responsibilities for the audit of the annual accounts

It is our responsibility to draft a report on the annual accounts. Our objective is to obtain reasonable assurance that the annual accounts as a whole do not contain any material misstatement. Reasonable assurance means a high level of assurance; however, it does not guarantee that an audit carried out in accordance with professional practice standards will systematically detect any material misstatement. Misstatements may arise from fraud or error and are considered significant when it can reasonably be expected that, whether taken individually or cumulatively, they may influence the financial decisions taken by users of the accounts on the basis of the information provided in them.

Deloitte.

As stated in Article L.823-10-1 of the Commercial Code, our role in terms of the certification of accounts is not to guarantee the viability or the quality of the management of your mutual fund.

Throughout the audit, carried out in accordance with the professional standards applicable in France, the statutory auditors shall exercise their professional judgement. Furthermore:

- they shall identify and assess the risks that the annual accounts may contain material
 misstatements, whether due to fraud or error, and they shall establish and implement
 audit procedures to manage these risks and gather information which they consider
 sufficient and appropriate for forming their opinion. The risk of material misstatement
 not being detected is higher when it results from fraud than in the case of one
 resulting from an error because fraud may involve collusion, forgery, voluntary
 omissions, misrepresentation or the bypassing of internal controls;
- they shall take note of the internal controls relevant to the audit in order to establish appropriate audit procedures, without expressing an opinion on the effectiveness of internal controls;
- they shall evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management company, as well as the information associated with them provided in the annual accounts;
- they shall evaluate the suitability of the application by the management company of the accounting policy on a going concern basis and, according to the elements collected, the existence or not of a significant uncertainty in terms of events or circumstances likely to call into question the mutual fund's ability to continue its business operations. This evaluation is based on the information collected up to the date of the report; however, please note that subsequent circumstances or events could jeopardise the ability of the SICAV to continue as a going concern. If the statutory auditor concludes that significant uncertainty exists, they shall draw the reader's attention to the information provided in the annual accounts in that regard or, if this information is not provided or is irrelevant, they shall issue a certificate with reservations or refuse to issue a certificate;

Deloitte.

• they shall evaluate the overall presentation of the annual accounts and assess whether the annual accounts reflect the underlying operations and events in order to provide a true and faithful representation.

Accounting principles and methods

The annual accounts are presented in the form provided for by ANC Regulation 2014-01 dated 14 January 2014, as amended.

The accounting currency is the euro.

All transferable securities in the portfolio are recorded at historical cost, excluding fees.

Fixed-term securities, options and financial futures held in the portfolio which are denominated in foreign currencies are converted into the accounting currency at the exchange rate quoted in Paris on the valuation date.

The portfolio is valued at each net asset value calculation and at the end of the accounting period, according to the following methods:

Transferable securities

Listed securities: at market value - including accrued coupons (day's closing price).

However, transferable securities without a recorded price on the valuation day, or transferable securities listed by contributors and for which the price has been adjusted, and securities not traded on a regulated market, will be valued under the responsibility of the Management Company (or the Board of Directors for a SICAV) at their probable trading value. Prices are adjusted by the Management Company based on its knowledge of issuers and/or markets.

UCIs: at the last known net asset value or at the last estimated value. The net asset values of the securities of foreign undertakings for collective investment that are valued on a monthly basis are confirmed by the Fund administrators. The valuations are updated on a weekly basis based on estimates notified by the administrators of these UCIs and are validated by the manager.

ETFs: at the last known net asset value or at the last estimated value.

Negotiable debt securities and other similar securities that are not traded in large volumes are valued by means of an actuarial method. The rate used is the same as that for the issue of equivalent securities which is adjusted, where applicable, by a differential according to the nature of the issuer. Unless there are grounds for caution, securities with a residual maturity of three months are valued at the last rate up to maturity, and for those purchased with less than three months' maturity, interest is calculated using a linear method.

EMTNs are valued at their market value, based on prices issued by counterparties. These valuations are monitored by the Management Company.

Temporary purchases and sales of securities:

- Securities lending: the debt representing the securities lent is valued at the market value for securities.
- Securities borrowing: the securities borrowed and the debt representing the securities borrowed is valued at the market value for securities.
- Collateral: consisting of securities pledged as part of lending transactions; the UCI has opted to present these securities in the balance sheet using the value of the debt corresponding to the repayment commitment.
- Repurchase agreements with a residual maturity of three months or less: individualisation of the debt on the basis of the contract price. In such cases, the linearisation method is applied.
- Long-term repurchase agreements: recorded and valued at their nominal value, even if they mature in more than three months. Accrued interest is added to this amount. However, some agreements include special conditions in the event of early redemption requests to take into account the impact of the rise in the counterparty's financing curve. The accrued interest can therefore be reduced by this effect, without a minimum value. The impact is proportional to the residual maturity of the repurchase and the variation between the contractual margin and the market margin for an identical maturity date.
- Reverse repurchase agreements with a residual maturity of three months or less: market value. The debt valued on the basis of contractual value is posted under liabilities. In such cases, the linearisation method is applied.

Financial futures and options

Futures: day's settlement price.

The off-balance sheet valuation is calculated on the basis of the nominal value, the settlement price and, where applicable, the exchange rate.

Options: day's closing price or, if not known, the last known price.

OTC options: these options are valued at their market value, based on the prices issued by the counterparties. These valuations are monitored by the Management Company.

The off-balance sheet valuation is calculated as the underlying equivalent on the basis of the delta and the price of the underlying and, where applicable, taking into account the exchange rate.

Forward exchange: revaluation of foreign currency commitments at the daily rate, taking into account the premium/discount calculated according to the term of the contract.

Term deposits: are recorded and valued at nominal value, even when they have a maturity of more than three months. Accrued interest is added to this amount. However, some agreements include special conditions in the event of early redemption requests to take into account the impact of the rise in the counterparty's financing curve. The accrued interest may therefore be reduced by this impact without any negative effect. Term deposits are then at least valued at their nominal value.

Rate swaps:

- for swaps maturing in less than three months, interest is calculated using a linear method
- swaps maturing after three months are revalued at market value

Synthetic products (combining a security and a swap) are accounted for overall. Interest received on swaps that form part of these products is valued using the linear method.

Asset swaps and synthetic products are valued on the basis of their market value. The valuation of asset swaps is based on the valuation of hedged securities minus the effect of variation of credit spreads. This effect is valued using the average spread reported by four counterparties on a monthly basis, adjusted by a margin based on the issuer's rating.

The off-balance sheet commitments for the swaps correspond to their nominal value.

Structured swaps (swaps with optional component): these swaps are valued at their market value, based on the prices issued by the counterparties. These valuations are monitored by the Management Company.

The off-balance sheet commitments for these swaps correspond to their nominal value.

The valuation price of Credit Default Swaps (CDS) comes from a contributor supplied to us by the Management Company. The CDS off-balance sheet commitments correspond to their nominal value.

CFDs are valued at their market value by the Management Company with reference to the counterparties' prices. The value of the corresponding lines takes account of the differential between the market value and the strike price of the underlying securities. The Appraiser creates a historical record of the prices of the CFDs and carries out consistency checks on any gaps in the net asset value each week when the technical net asset values are calculated. The Appraiser only examines the prices against other sources if major changes in prices are recorded between its valuation of the net asset value and the net asset value estimated by the Management Company.

The off-balance sheet valuation of the CFDs is calculated as the underlying equivalent on the basis of the price of the underlying and, where applicable, taking into account the exchange rate.

Financial management fees

- 0.47% (incl. tax) maximum for I units
- 0.27% (incl. tax) maximum for S units
- 0.82% (incl. tax) maximum for R units
- 0.47% (incl. tax) maximum for T units

The allocation is calculated on the basis of net assets. These costs (excluding transaction costs) will be directly charged to the Fund's profit and loss account.

These fees comprise all the costs billed to the UCI, with the exception of transaction fees. Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and any turnover fees charged in particular by the Depositary and the Management Company.

Administrative costs external to the management company

- 0.08% (incl. tax) maximum for I, R, S and T units on the basis of net assets

Research costs

None

Outperformance fee

None

Rebates on management fees

At each calculation of the net asset value, a fee is calculated based on a rate communicated by the management company.
