Agreements entered into, directly or through an intermediary, between, on the one hand, one of the corporate officers or one of the shareholders holding a fraction of the voting rights exceeding 10% of a company and, on the other hand, another company, the former of which directly or indirectly owns more than half the capital, with the exception of agreements relating to current transactions and concluded under normal conditions.

No agreements have been concluded in previous financial years which would have continued to be implemented during the previous financial year.

No agreements were concluded during the previous financial year.

Summary table of valid delegations granted by the General Shareholders' Meeting in the event of a capital increase pursuant to Articles L.225-129-1 and L.225-129-2 of the French Commercial Code.

Not applicable for SICAVs.

Procedures for exercising the General Management provided for in Article L.225-51-1 of the French Commercial Code.

The Board of Directors has opted to combine the functions of Chairman of the Board of Directors and Chief Executive Officer.

Draft resolutions

ORDINARY GENERAL MEETING OF 28 FEBRUARY 2024

FIRST RESOLUTION

The General Assembly, after hearing the following:

- the management report on the activities of the SICAV during its financial year ending at the end of October 2023 and on the accounts for that financial year,
- and the Report on the annual accounts of the External Auditor,

approve the accounts and balance sheet for the financial year as presented, and the transactions translated into these accounts and summarized in these reports.

SECOND RESOLUTION

The General Assembly, after having heard the Auditor's Special Report on the Conventions referred to in Article L225-38 of the Commercial Code, takes note of this report and approves its conclusions.

THIRD RESOLUTION

(AMUNDI BEL 20 TR UCITS ETF)

As a result, the remaining amount to be allocated for the year ended October 2023 is 811,455.47 Euros.

It decides that the distributable amounts shall be distributed as follows:

- Postponement again: 129 098,42 Euro
- Distribution: 682,357.05 Euros

On the basis of that distribution, to which is added the advance payment of an amount of EUR 0,06 paid in respect of the financial year, the overall net dividend per share is therefore fixed at EUR 0,91, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of those advance payments.

The dividends relating to the Profit and Loss put up for distribution for the previous three financial years were as follows (in Euros):

Closure	Net dividend	Net gains and losses	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
30/10/2020	0,34	0,24		-
31/10/2021	0,77			
31/10/2022	1,34			

For net realized gains, the remaining amount to be allocated for the year ended October 2023 is 7,144,685.50 Euros.

The General Assembly decided that the distributable amounts should be distributed as follows:

- Undistributed gains and losses: €7,144,685.50
- Distribution: None

FOURTH RESOLUTION

(AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF)

THIRTIETH RESOLUTION

(AMUNDI IBEX 35 UCITS ETF)

The General Assembly decides that the amounts to be distributed for the financial year ended October 2023 for the compartment shall be distributed as follows:

Under the Outcome, the sum of 17,006,227.05 Euros is distributed as follows:

ACC share : none.

DIST share, the sum of 17 006 227,05 Euros.

- Distributed to the tune of 6,423,742.92 Euros, or a unit dividend of 3.14 Euros.

- The sum of EUR 10 582 484.13 is allocated to the 'Carry-over from the financial year' account.

On the basis of that distribution, to which is added the advance payment made for the financial year, the overall net dividend per share is therefore fixed at EUR 3.14, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the advance payments.

The dividends relating to the Profit and Loss put up for distribution for the previous three financial years were as follows (in Euros):

Closure	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
30/10/2020	1,92	-	-
31/10/2021	2,48	-	-
31/10/2022	1,88	-	-

For the year's net capital gains, the amount of EUR 7 101 139,54 is broken down as follows:

ACC share, None

DIST share, the sum of 7 101 139,54 Euros is allocated to the account of "undistributed gains and losses"

In accordance with the regulations, the General Assembly notes that no dividends related to the net realized capital gains have been distributed for the preceding financial years.

THIRTY-FIRST RESOLUTION

Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of SICAV MULTI UNITS FRANCE, a UCITS constituted as a *société d'investissement à capital variable à compartiments*, for the year ended 31 October 2023.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the fund at 31 October 2023 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "*Statutory Auditor's responsibilities for the audit of the financial statements*" in this report.

Independence

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (*code de commerce*) and the French Code of Ethics (*code de déontologie*) for statutory auditors, from 01/11/2022 and up to the date of this report, and in particular we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014.

Justification of our assessments - Key audit matters

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the key matters as regards to the risk of material misstatement that, in our professional judgement, were the most significant for the audit of the financial statements, as well as how we addressed those risks.

These assessments were made as part of our audit of the financial statements, taken as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

Key audit matters	Audit response to cover these risks
<p>The main risks of the fund relate to the financial instruments in its portfolio.</p> <p>Any error in recording or valuing these financial instruments could lead to a misstatement in the calculation of the fund's net asset value and in the financial statements.</p> <p>We therefore focused our work on the existence and valuation of the financial instruments in the portfolio.</p> <p>Valuation of financial instruments traded on a regulated or equivalent market</p> <p>Valuation of the fund's financial instruments traded on a regulated or equivalent market is not complex as it is based primarily on listed prices provided by independent sources.</p> <p>However, the related amounts are significant and could lead to a material misstatement.</p> <p>The value of the financial instruments traded on a regulated or equivalent market is recorded in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We compared the year-end valuation of the fund's financial instruments traded on a regulated or equivalent market with observable prices obtained from market databases.</p>

SICAV MULTI UNITS FRANCE

Key audit matters	Audit response to cover these risks
<p>Valuation of financial contracts traded over the counter</p> <p>As part of its investment strategy, the fund uses over-the-counter swaps. The valuation of these swaps is not observable on a regulated or equivalent market. The valuation of over-the-counter swaps is therefore a key audit matter.</p> <p>The value of the swap is recorded under the line item "financial contracts" in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The commitment related to the swap is presented in the off-balance sheet statement. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We have checked the valuation swap recorded as of the balance sheet date matches the valuation calculated by the by the management company independently.</p> <p>The management company performs a control of this valuation with regards to the price given by the counterparty of the financial instrument</p> <p>We gained an understanding of the internal control procedure performed by the management company over swaps valuation. We verified that this procedure had been applied at year-end.</p>
<p>Existence of financial instruments</p> <p>The portfolio's financial instruments are held in custody or maintained by the fund's depository. The depository certifies the existence of financial instruments at year-end.</p> <p>There is nonetheless a risk that these financial instruments could be inaccurately or only partially recorded in the fund's accounting.</p> <p>The existence of these financial instruments is a key audit matter as the related amounts are material and could lead to a material misstatement.</p>	<p>We verified the existence of the portfolio's financial instruments by reviewing the fund's reconciliation between the fund's financial instruments held at year-end and these identified by the depository in an account opened in the fund's name. Any material differences were examined, if applicable using trade tickets or contracts.</p>

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by laws and regulations.

Information given in the management report and in the other documents with respect to the financial position and the financial statements provided to shareholders

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report, and in the other documents with respect to the financial position and the financial statements provided to shareholders.

Report on the corporate governance

We attest the report on corporate governance sets out the information required by Article L.225-37-4 of the French Commercial Code.

Disclosures arising from other legal and regulatory requirements

Appointment of the Statutory Auditors

We were appointed as Statutory Auditor of SICAV MULTI UNITS FRANCE, a UCITS constituted as *société d'investissement à capital variable à compartiments*, by the management company on 23 October 2013.

At 31 October 2023, our firm was in the tenth consecutive year of its engagement, i.e. the tenth year following the admission of the fund's securities for trading on a regulated market.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation of the fund's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the fund's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the fund or to cease operations.

Management is responsible to monitor the preparation of financial information and oversee the efficiency of the internal control and risk management system and the internal audit system relating to the preparation and processing of financial and accounting information.

These financial statements have been prepared by management.

Statutory auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As indicated in article L.823-10-1 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

SICAV MULTI UNITS FRANCE

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor uses professional judgement throughout the entire audit.
He also:

identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;

evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;

concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the fund's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;

evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

This is a free translation into English of the Statutory Auditor's special report on related party agreements issued in French and is provided solely for the convenience of English speaking readers. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In our capacity as Statutory Auditor of your Company, we hereby report to you on related party agreements.

It is our responsibility to report to shareholders, based on the information provided to us, on the main terms and conditions of agreements that have been disclosed to us or that we may have identified as part of our engagement, as well as the reasons given as to why they are beneficial for the SICAV, without commenting on their relevance or substance or identifying any undisclosed agreements. Under the provisions of Article R.225-31 of the French Commercial Code (*Code de commerce*), it is the responsibility of the shareholders to determine whether the agreements are appropriate and should be approved.

Where applicable, it is also our responsibility to provide shareholders with the information required by Article R.225-31 of the French Commercial Code in relation to the implementation during the year of agreements already approved by the Annual General Meeting.

We performed the procedures that we deemed necessary in accordance with professional standards applicable in France to such engagements.

**AGREEMENTS TO BE SUBMITTED FOR THE APPROVAL OF THE
ANNUAL GENERAL MEETING**

We were not informed of any agreements authorised during the year to be submitted for the approval of the Annual General Meeting pursuant to the provisions of Article L.225-38 of the French Commercial Code.

**AGREEMENTS ALREADY APPROVED BY THE ANNUAL GENERAL
MEETING**

We were not informed of any agreements already approved by the Annual General Meeting that remained in force during the year.

- Changes to be made:

- On 28 December 2023, the accounting firm DELOITTE & ASSOCIES will replace PRICEWATERHOUSECOOPERS AUDIT in charge of the audit of this Sicav. On the same date, Mr. RAULIN Yannic will be added to the list of directors and Ms. WAFKLAN Christine will no longer be a member of the administrators.

(*) Please refer to the information about each subfund.

AMUNDI BEL 20 UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

Subfund features

Calculation and allocation of distributable amounts:

The Board of Directors reserves the right to accumulate and/or distribute all or part of all distributable amounts.

Classification:

Eurozone country equities.

The Lyxor UCITS ETF BEL 20 TR (DR) UCITS ETF sub-fund (hereinafter the "Sub-fund") will constantly maintain at least 60% exposure to one or more of the equity markets of one or more eurozone countries, including the French equity market.

The Sub-fund is an exchange-traded index-tracking UCITS fund.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

Its investment objective is to replicate the performance, whether positive or negative, of the Bel 20 NR™ index (the "Benchmark Index"), denominated in euros, while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.20%.

Benchmark index:

The Benchmark Index is the BEL 20™ NR (Net Return) index with net dividends reinvested, which means that the Benchmark Index's performance includes the net dividends paid by its underlying equities.

The Benchmark Index is a basket index, disseminated in real-time, which monitors the continuous evolution of the prices of the 20 most liquid Belgian equities. The stocks of the Benchmark Index are weighted according to their free-float adjusted market capitalisation. The Benchmark Index is continuously disseminated in real-time, but the official closing index is only disseminated after 5.40 p.m.

The performance tracked is that of the Benchmark Index's closing price.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at <https://www.euronext.com>.

Benchmark Index composition and revision

The composition of the Benchmark Index is revised annually.

The exact composition of the Benchmark Index and Euronext Paris's rules for its revision are available on its website at <https://www.euronext.com>. The frequency with which the Benchmark Index is rebalanced does not affect the cost of implementing the Investment Strategy.

Benchmark Index publication

The Benchmark Index's closing price is available on the Internet at [www: https://indices.nyx.com/](https://indices.nyx.com/)

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Euronext, the administrator of the Benchmark Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Investment strategy:

1. Strategy employed

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will use a direct replication method, which means that it will invest mainly a basket of securities consisting of the components of the Benchmark Index and/or financial instruments that are representative of all or some of the securities that compose the Benchmark Index.

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

The sub-fund may also invest in derivative financial instruments (DFI). The DFI in which the Sub-fund may invest include, but are not limited to, futures on indices, futures on all or some of the Benchmark Index components, and hedging swaps, mainly to minimise the Sub-fund's tracking error.

In accordance with its investment strategy, the Sub-fund may hold cash (e.g. when using futures). In this case, the fund manager may, in the best interest of unit-holders, deposit this cash with a credit institution or invest it in balance-sheet assets and/or off-balance-sheet assets, as described below.

In order to optimise the direct replication method that is used to track the Benchmark Index, the Sub-fund, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Index constituents in order to reduce the costs of investing directly in all of the various Benchmark Index constituents. This sampling technique could cause the Sub-fund to invest in a selection of representative Benchmark Index securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Index, and even to invest in securities that are not constituents of the Benchmark Index.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-fund's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio is available on the page dedicated to the Sub-fund accessible on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions and in particular when certain securities are largely dominant and/or in the event of strong volatility that affects a financial instrument or securities linked to an economic sector represented in the Benchmark Index, particularly in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund will mainly be invested in the following types of securities:

• Equities

The Sub-fund will be invested mainly in the equities that make up the Benchmark Index.

• The shares or units of other CIU or investment funds.

The Sub-fund may invest up to 10% of its assets in the shares or units of the following collective investment undertakings (CIU) or investment funds:

- French and foreign UCITS that comply with Directive 2009/65/EC. The Sub-fund may invest in shares or units of UCITS that are managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

3. Off-balance-sheet assets (derivatives)

The Sub-fund may invest in the following DFI:

• Eligible markets:

- regulated
- organised
- over-the-counter

• Risks which the Sub-fund may seek to hedge or gain exposure to:

- equity
- **Purpose (all transactions must be consistent with the investment objective)**
 - hedging
 - exposure

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

• Types of instruments used:

- futures : on equities and indices
- forward exchange contracts

• Strategy for using derivatives to achieve the investment objective:

- overall hedging of the portfolio, or of certain risks, securities, etc. – up to 100% of net assets
- to achieve synthetic exposure to assets or risks (up to 100% of assets)

Counterparties to OTC derivatives traded by the Sub-fund will be selected in accordance with the Management Company's best-execution policies (including the "Order-execution by asset type" table referred to in the Appendix). The aforementioned policy is available at www.amundi.com.

Counterparties to derivative financial instruments will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments, in accordance with regulatory limits and requirements.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depository.

6. Cash borrowing

The sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

Pursuant to its investment strategy, the Sub-fund may use various efficient portfolio management techniques in compliance with Article R214-18 of the French monetary and financial code, including securities financing transactions.

- Maximum proportion of assets under management for which securities financing transactions may be entered into: up to 25% of the Sub-fund's assets.
- Expected proportion of assets under management for which securities financing transactions may be entered into: 0% of the Sub-fund's assets.

For this purpose, the Management Company has appointed Société Générale as its intermediary (hereinafter the "Agent"). If transactions involving the temporary disposal of securities are engaged in, the Agent may be authorised to (i) lend securities, on the Sub-fund's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Sub-fund's behalf, any liquid assets received as collateral for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

When Société Générale S.A. is appointed as an Agent, it is not authorised to act as a counterparty to securities lending transactions. If securities are lent:

- The Sub-fund shall be entitled to all income from securities financing transactions, net of any direct and indirect operating fees/expenses.
- The aforementioned operating fees/expenses, which are incurred to manage the portfolio more efficiently, will be those borne by The Sub-fund's Management Company, the Agent (if applicable) and/or other intermediaries that are involved in these transactions.
- The direct and indirect operating fees/expenses will be calculated as a percentage of the Sub-fund's gross income. Information on direct and indirect operating fees/expenses and on the entities to which these fees/expenses are paid will be provided in the Sub-fund's annual report.
- Income from the lending of securities will be paid to the Sub-fund after deduction of any direct and indirect operating fees/expenses that may be borne by the Agent and the Management Company. Since these direct and indirect operating expenses do not increase the Sub-fund's operating expenses they have been excluded from ongoing charges.

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

If necessary, the Sub-fund's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions
- the identity of the counterparty(ies) involved in these transactions
- the nature and amount of any collateral received to reduce the Sub-fund's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating fees/expenses or expenses.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund enters into securities financing transactions, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at the mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount is applied
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) The collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value.
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

(vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged. At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution;
- (ii) invested in high-quality government bonds;
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time;
- (iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website www.amundi.com.

Risk profile:

The Sub-fund will invest mainly in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shares in the sub-fund are mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of shares or units traded on a given exchange may be adversely affected by a suspension in trading for various reasons, for example:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Concentration risk

The Sub-fund replicates the performance of a Benchmark Index that has a relatively small number of components. Exposure to such a benchmark index that offers little diversity may result in greater volatility than exposure to a more diversified index and in a higher risk of illiquidity if market liquidity begins to deteriorate or if one or more of the components of the Benchmark Index is suspended from trading.

- Risk of using derivative financial instruments

The Sub-fund may invest in Derivative Financial Instruments ("DFI") traded over the counter or listed on an exchange, and in particular in futures and/or swaps for hedging purposes. These DFI involve various risks, such as counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk and liquidity risk. These risks may affect a derivative instrument directly and may result in a modification or even the premature termination of the DFI contract, which could adversely affect the Sub-fund's net asset value.

The risk of investing in DFI may be relatively high. Since the amount of money required to establish a position in a DFI may be much less than the exposure thus obtained, each transaction involves "leverage". A relatively small market movement may therefore have a very large potential positive or negative impact on the Sub-fund. The market value of DFI is highly volatile and they may therefore be subject to large variations.

The Sub-fund may invest in DFI traded over the counter. DFI traded over the counter may also be less liquid than transactions on an organised market, where the volumes traded are generally quite higher, and the prices of these DFI may therefore be more volatile.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative Contract and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly.

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

The Sub-fund manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents or in derivatives. The use of such optimisation techniques may increase the ex post tracking error and cause the Sub-fund to perform differently from the Benchmark Index.

- Risk that the investment objective may not be fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Risk of using efficient portfolio management techniques

If the Sub-fund's counterparty to an efficient portfolio management technique (hereinafter "EPMT") defaults, this may expose the Sub-fund to the risk that the value of the collateral it has received is less than the value of the assets the Sub-fund transferred to the counterparty to the EPMT. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as collateral and/or (iv) the illiquidity of the market in which the collateral received is listed. Investors should note that EPMT transactions may be entered into with same group as that of the Management Company/entities of the same group as that of the Management Company/entities of the same group as the Management Company.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares or units may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Currency risk associated with listing exchanges

The Sub-fund may be listed on an exchange or multilateral trading facility in a currency that is not the currency of the Benchmark Index. Investors who purchase shares in the Sub-fund in a currency that is not that of the Benchmark index are exposed to currency risk. As a result, due to changes in exchange rates the value of an investment that is made in a currency other than that of the Benchmark Index may decrease even though the value of the Benchmark Index increases.

Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is available to all investors.

Investors in this Sub-fund are seeking exposure to the Belgian equity market.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor BEL 20 TR (DR) UCITS ETF to Amundi BEL 20 UCITS ETF

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi BEL 20 UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the Brussels Stock Exchange BEL20 Private Return Index Closing benchmark index. The Brussels Stock Exchange BEL20 Private Return Index Closing is a regularly published index that tracks the price movements of the 20 most liquid Belgian shares. The shares in the index are weighted according to their market capitalisations adjusted by the free float using the FTSE free float system. The index methodology is available at www.euronext.com.

From October 2022 to October 2023, the subfund performance is -4.11%. That of the benchmark of -3.70% with a tracking error of 0.03%.

The performance achieved over the period does not prejudice the future results of the subfund.

Main movements in the portfolio during the year

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

The CIU will be able to use efficient portfolio management techniques in accordance with the provisions of Article R214-18 of the Monetary and Financial Code and in particular reverse transactions in financial securities.

- Maximum proportion of assets under management eligible for SFTs: up to 25% of the assets of the CIU.
- Expected share of assets under management eligible for SFTs: 10% of the assets of the CIU.

The total revenues generated by efficient portfolio management techniques shall be shared between the relevant compartment and the security lending agent. Each compartment receives 65% while the agent receives 35% of this income. All direct and indirect operational costs related to these operations are borne by the agent and have therefore been excluded from the financial management and administrative costs external to the management company.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details

- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

Income (I - II + III - IV +/- V - VI) :	684,248.17	45,773.99

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI BEL 20 UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes, etc.) and any account activity charge that may be charged, in general by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity charges, which are charged to the Sub-fund.
- direct and indirect operating fees/expenses of securities financing transactions.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administrative fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.50% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Incentive fee	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A
Direct and indirect operating fees/expenses of securities financing transactions	The income from these transactions	20% for the Management Company 15% for the Agent

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

AMUNDI BEL 20 UCITS ETF Subfund of the Sicav Multi Units France

Details of the type of errors that have been corrected during the period

None.

Details of the rights and conditions attached to each share category

The Board of Directors reserves the right to accumulate and/or distribute all or part of all distributable amounts.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Calculation and allocation of distributable amounts:

All distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to provide inverse exposure to the daily performance, whether positive or negative, of Italian sovereign bonds having a residual maturity of 8.5 to 11 years, with daily 2x inverse leverage, by replicating the performance of the Solactive BTP Daily (-2x) Leveraged Index (the 'Benchmark Index'), denominated in euros (EUR), while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.02%.

Benchmark index:

The Benchmark Index is a strategy index developed by Solactive AG using a proprietary methodology. The Benchmark Index is calculated and maintained by Solactive AG.

The Benchmark Index provides inverse exposure, with daily 2x leverage, to the performance, whether positive or negative, of Italian sovereign bonds having a residual maturity of 8.5 to 11 years, of which Long-Term Euro-BTP futures contracts are a representative indicator. Accordingly, if Long-Term Euro-BTP futures fall on a given trading day, the Sub-fund's net asset value should rise twice as much that day, and if Long-Term Euro-BTP futures rise on a given trading day, the Sub-fund's net asset value should fall by twice as much that day, and share-holders will not profit from the rise of Long-Term Euro-BTP futures.

Long-Term EUR-BTP futures are a representative indicator of Italian sovereign bonds having a residual maturity of 8.5 to 11 years and an initial maturity of less than 16 years. They are listed on Eurex and their methodology is available on www.eurexchange.com

The Benchmark Index's daily performance is the inverse of twice the performance of the Long-Term EUR-BTP futures, plus the daily interest (at the benchmark rate) paid on the fixing of the previous day's Benchmark Index.

The Benchmark Index therefore represents a short position on Long-Term EUR-BTP futures with 2x leverage and daily adjustment. The index may be further adjusted during a trading session if it falls by more than 40%, i.e. if the absolute daily increase in Long-Term EUR-BTP futures exceeds 20%.

The performance tracked is that of the Benchmark Index's closing fixing in euros.

Since the methodology used to calculate the Benchmark Index is not based on direct investment in Italian bonds but on indirect investment in futures, the Sub-fund's performance will be affected by the cost of 'rolling over' positions on these futures contracts every quarter.

Over time, this could significantly diminish the Sub-fund's performance in comparison with the gross performance of the short positions on the underlying of the aforementioned futures contracts, particularly in the case of a long-term investment in the Sub-fund's shares.

A full description of the Benchmark Index and its construction methodology and information on its composition are available on the Internet at www.solactive.com.

Benchmark Index composition and revision

The Benchmark Index is rebalanced daily.

The frequency of the aforementioned adjustment could have an impact on the Sub-fund's costs and could therefore diminish its performance.

Benchmark index publication

The Benchmark Index is calculated daily using the Long-Term EUR-BTP futures fixing at 5.15 pm. The Benchmark Index's fixing is available on the Internet at <https://www.solactive.com>.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive BTP Daily (-2x) Leveraged Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

Investors in this Sub-fund gain inverse exposure, with a daily 2x leverage, to increases and decreases in the daily performance of the Italian sovereign bond market, of which the Benchmark Index is representative.

The Sub-fund will mainly be invested in bonds issued by an OECD member country or by a non-governmental issuer in an OECD country.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralised.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund, is available on the page dedicated to the Sub-fund on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to debt issued by a given OECD country. This 20% limit can be increased to 35% for a single bond, when this is justified by exceptional market conditions and in particular when certain securities are largely dominant, or a debt issue is highly volatile, or a political and/or economic event has affected or may affect the estimated debt of an issuing country or its credit rating, or in any other event that is likely to affect the liquidity of a Benchmark Index security.

Notwithstanding the above, securities guaranteed or issued by a given issuer can account for up to 35% of assets and up to 100% if the Sub-fund holds at least six issues of which none exceeds 30% of assets, provided that these securities are financial instruments issued or guaranteed by an OECD Member State, the local authorities of a European Union Member State or a country that is a member of the European Economic Area.

The Sub-fund's interest-rate sensitivity will be between 10 and 22..

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund may invest, in compliance with regulatory ratios, international securities (equities and bonds) denominated in one of the currencies of the OECD countries.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

These securities will be bonds largely selected on the basis of the following eligibility criteria:

- senior debt
- fixed maturity
- maximum residual maturity
- minimum issuance size
- minimum S&P or equivalent credit rating
- diversification criteria, and in particular with respect to:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- geographic
- sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law. The Sub-fund may invest in the shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management and achieve its investment objective, the asset manager reserves the right to use other financial instruments, in compliance with regulations.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's securities (or the value of any other financial instruments in the Sub-fund) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps (TRS) may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps (TRS) may be entered into: up to 100%.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. securities with embedded derivatives

N/a.

5. cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with credit institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager shall not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at the mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance
- (d) This collateral must be sufficiently diversified by country, market and issuer, and no exposure to a single issuer may exceed 20 % of the Sub-fund's net asset value
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

(ii) invested in high-quality government bonds

(iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

(iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at <http://www.amundi.com>.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the asset manager. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Daily leverage adjustment risk

Investors are inversely exposed to two times the daily changes which affect the price or level of the BTP futures that underlie the Benchmark Index. Therefore, any gain in the underlying market will be inversely amplified and will result in a larger decrease in the Sub-fund's net asset value. Since the exposure in the underlying "double short" Benchmark Index formula is reset daily, over a period of more than one trading day the Sub-fund's return will not be twice that of the BTP futures that underlie the Benchmark Index. For example, if the BTP futures underlying the Benchmark Index gain 10% a trading day and then lose 5% the following trading day, the Sub-fund will lose a total 12% over these two days (before fees) over the two trading days, while the BTP futures underlying the Benchmark Index will have gained 4.5% over the same period.

If the BTP futures underlying the Benchmark Index lose 10% one trading day and then gain 6% the following trading day, the Sub-fund will have gained 5.6% over these two days (before fees), while the BTP futures underlying the Benchmark Index will have lost 4.6% over this period.

Scenario 1 - negative leverage: The negative leverage effect is greater than 2 and the Benchmark Index underlying rises

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10%	110	-20%	80	x-2
Day 2	-5%	104.5	10%	88	x-2
Total return	4.50%		-12.00%		x-2.67

Scenario 2 - negative leverage: The negative leverage effect is less than 2 and the Benchmark Index underlying falls

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2
Total return	-4.60%		5.60%		x-1.22

Furthermore, it is possible that if the Benchmark Index underlying is highly volatile over a period of more than one day the Sub-fund's net asset value may decline even though the Benchmark Index's underlying also declines over this period.

Scenario 3 - inverse leverage: The effective leverage is positive over the period

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	5%	105	-10%	90	x-2
Day 2	-5%	99.75	10%	99	x-2
Total return	-0.25%		-1.00%		x4

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to secure the performance of the Benchmark Index and achieve its investment objective, the Sub-fund may enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and may require an adjustment of the DFI transaction or even its premature termination, which could adversely affect the Sub-fund's net asset value.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of units or shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value. A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- (v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- (vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to wide bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares may deviate from the Sub-fund's indicative net asset value. The liquidity of the Sub-fund's shares traded on a given exchange may be adversely affected by a suspension in trading for various reasons, such as:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Low diversification risk:

The Benchmark Index to which investors are exposed represents only the Italian sovereign bond market, which may provide a smaller diversification of assets when compared to a broader index exposed to several regions, sectors or strategies. Exposure to such a less-diversified index may result in higher volatility than more diversified markets. Nevertheless, diversification rules of the UCITS Directive still apply to the Sub-fund's underlying assets at all times.

- Credit risk

This is the risk that a credit-rating agency could lower an issuer's credit rating, which would adversely affect the price of the issuer's bond and increase the issuer's default risk. The Sub-fund is exposed to Italy's sovereign credit risk.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is available to all investors.

Investors in this Sub-fund are seeking inverse exposure to the performance, whether positive or negative and with daily 2x leverage, of Italian sovereign bonds having a residual maturity of 8.5 to 11 years.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their current cash requirements and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

Given this Sub-fund's speculative nature it may not be suitable for investors with a medium to long-term investment horizon.

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2022 and to submit for your approval the accounts closed at October 31, 2022. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi Italy BTP Daily (-2x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark Solactive BTP Daily (-2x) Inverse Index. The Solactive BTP Daily (-2x) Inverse Index offers inverse exposure to the upward or downward movement of the Italian government bond market, of which long-term Euro-BTP futures are a representative indicator, with a leverage effect of 2.

From October 2022 to October 2023, the subfund performance is -3.37%. That of the benchmark of -2.86% with a tracking error of 0.01%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details

- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI ITALY BTP DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity charge that may be charged, generally by the depositary or the asset manager.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity charges, which are charged to the Sub-fund.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Incentive fee	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

AMUNDI US TREASURY 10Y DAILY (- 2X) INVERSE UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of income in one or more annual distributions. Realised net capital gains will be accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to provide inverse exposure, with 2x leverage, to the daily performance, whether positive or negative, of US Treasury bonds with residual maturities of 6.5 to 10 years, by tracking the Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index (the "Benchmark Index"), denominated in US dollars (USD), while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.07%.

Benchmark index:

The Benchmark Index is a strategy index developed by Solactive AG, using a proprietary methodology. It is calculated and maintained by Solactive AG.

The Benchmark Index provides inverse exposure with 2x daily leverage to increases and decreases in the prices of US Treasury bonds with residual maturities of 6.5 to 10 years, for which CBOT 10-Year T-Note futures are a representative indicator of performance. Therefore, if the price of CBOT 10-Year T-Note futures declines on a given trading day, the Sub-fund's net asset value may be expected to increase by twice as much that day, whereas if the price of CBOT 10-Year T-Note futures rises on a given trading day, the Sub-fund's net asset value may be expected to decrease by twice as much that day and shareholders will not profit from the increase in CBOT 10-Year T-Note prices.

CBOT 10-Year T-Note futures are a representative index of the market for US Treasury bonds with residual maturities of 6.5 to 10 years. The index methodology is available at: <https://www.cmegroup.com>.

The Benchmark Index's daily performance is equivalent to the inverse of twice the daily performance of CBOT 10Y T-Note futures plus the interest at the fed funds rate received daily on the value of the Benchmark Index's fixing the previous day.

The index is therefore representative of a shorting strategy on CBOT 10-Year T-Note futures with 2x leverage and daily adjustment. Further adjustment during a trading session is possible if the Benchmark Index falls by more than 40% on a trading day (i.e. if the absolute value of CBOT 10-Year T-Note futures increases by more than 20% on a given day).

The performance tracked is that of the Benchmark Index's closing fixing in USD.

Since the methodology used to calculate the Benchmark Index is not based on direct investment in US Treasury notes but on indirect investment in futures, the Sub-fund's performance will be affected by the cost of 'rolling over' positions on these futures contracts every quarter.

Over time, this could significantly diminish the Sub-fund's performance in comparison with the gross performance of the short positions on the underlying of the aforementioned futures contracts, particularly in the case of a long-term investment in the Sub-fund.

A full description of the Benchmark Index and its construction methodology and information on its composition are available on the Internet at <https://www.solactive.com>.

Benchmark Index composition and revision

The Benchmark Index is revised daily.

The frequency of this adjustment could have an impact on the Sub-fund's costs and could therefore diminish its performance.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Benchmark Index publication

The Benchmark Index is calculated daily on the value of the fixing of CBOT 10-Year T-Note futures at 3.00 pm Eastern Standard Time. The Benchmark Index's fixing is available on the Internet at: <https://www.solactive.com>.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

Investors in this Sub-fund are seeking inverse exposure with 2x leverage to the performance, whether positive or negative, of US Treasury bonds with residual maturities of 6.5 to 10 years, which are represented by the Benchmark Index.

The Sub-fund will mainly be invested in bonds issued by an OECD member country or by a non-governmental issuer in an OECD country.

Fund's targeted interest-rate sensitivity	From 8 to 20
Currencies in which the Sub-fund's securities are denominated	USD: from 0 to 100% of net assets
Foreign exchange risk to which the Sub-fund is exposed	0% maximum of net assets)
Geographic regions of the issuers of the securities to which the Sub-fund is exposed	US: from 0 to 100% of net assets

(1) share classes that are not denominated in USD may however be exposed to currency risk.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralised.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund, is available on the page dedicated to the Sub-fund on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund may invest in bonds issued by an OECD member country or by a non-governmental issuer in an OECD country within regulatory limits. These securities will be bonds selected on the basis of the following criteria:

- eligibility criteria and in particular:

- o senior debt
- o fixed maturity
- o maximum residual maturity
- o minimum issuance size
- o minimum S&P or equivalent credit rating

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- diversification criteria, and in particular with respect to:

o the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)

o geographic

o sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law. The Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management and achieve its investment objective, the asset manager reserves the right to use other financial instruments, in compliance with regulations.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or the value of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps (TRS) may be entered into: 100%.

- Expected proportion of assets under management for which total return swaps (TRS) may be entered into: up to 100%.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with credit institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager shall not engage in any securities financing transactions.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price;
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) This collateral must be sufficiently diversified by country, market and issuer, and no exposure to a single issuer may exceed 20 % of the Sub-fund's net asset value;
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity liquid assets, which include, for example, cash, short-term bank balances and money-market instruments;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- deposited with an authorised institution
- invested in high-quality government bonds
- used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time
- invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the asset manager. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative Contract and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

total assets per counterparty.

- Interest rate risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Daily leverage adjustment risk

Investors are inversely exposed to two times the daily changes which affect the price or level of the CBOT 10y US Treasury futures that underlie the Benchmark Index. Therefore, any gain in the underlying market will be inversely amplified and will result in a larger decrease in the Sub-fund's net asset value. Since the exposure in the underlying "double short" Benchmark Index formula is reset daily, over a period of more than one trading day the Sub-fund's return will not be twice that of the CBOT 10y US Treasury futures that underlie the Benchmark Index

For example, if the CBOT 10y US Treasury futures underlying the Benchmark Index gain 10% a trading day and then lose 5% the following trading day, the Sub-fund will lose a total 12% over these two days (before fees) over the two trading days, while the CBOT 10y US Treasury futures underlying the Benchmark Index will have gained 4.5% over this period.

If the CBOT 10y US Treasury futures underlying the Benchmark Index lose 10% one trading day and then gain 6% the following trading day, the Sub-fund will have gained 5.6% over these two days (before fees), while the CBOT 10y US Treasury futures underlying the Benchmark Index will have lost 4.6% over this period.

Scenario 1 - negative leverage: The negative leverage effect is greater than 2 and the Benchmark Index underlying rises

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10%	110	-20%	80	x-2
Day 2	-5%	104.5	10%	88	x-2
Total return	4.50%		-12.00%		x-2,67

Scenario 2 - negative leverage: The negative leverage effect is less than 2 and the Benchmark Index underlying falls

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2
Total return	-4.60%		5.60%		x-1,22

Furthermore, it is possible that if the Benchmark Index underlying is highly volatile over a period of more than one day the Sub-fund's net asset value may decline even though the Benchmark Index's underlying also declines over this period.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Scenario 3 - inverse leverage: The effective leverage is positive over the period

	Benchmark Index underlying		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	5%	105	-10%	90	x-2
Day 2	-5%	99.75	10%	99	x-2
Total return	-0.25%		-1.00%		x4

- Risk that the investment objective may not be fully achieved:

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to secure the performance of the Benchmark Index and achieve its investment objective, the Sub-fund may enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and may require an adjustment of the DFI transaction or even its premature termination, which could adversely affect the Sub-fund's net asset value.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares or units may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) : a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) : the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to wide bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares may deviate from the Sub-fund's indicative net asset value. The liquidity of shares or units traded on a given exchange may be adversely affected by a suspension in trading for various reasons, for example:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Low diversification risk

The Benchmark Index to which investors are exposed represents only the U.S. government bond market, which may provide a smaller diversification of assets when compared to a broader index exposed to several regions, sectors or strategies. Exposure to such a less-diversified index may result in higher volatility than more diversified markets. Nevertheless, diversification rules of the UCITS Directive still apply to the Sub-fund's underlying assets at all times.

- Credit risk

This is the risk that an issuer's credit-worthiness may improve and that a credit-rating agency could raise the issuer's credit rating, which would increase the price of the issuer's bonds and thus adversely affect the Sub-fund's net asset value. The Sub-fund is exposed to U.S. sovereign credit risk.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is available to all investors.

Investors in this Sub-fund will have inverse exposure with 2x daily leverage to increases and decreases in the prices of US Treasury bonds having residual maturities of 6.5 to 10 years.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their current cash requirements and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

Given this Sub-fund's speculative nature it may not be suitable for investors with a medium to long-term investment horizon. "U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi US Treasury 10Y Daily (-2x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index. The Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index offers inverse exposure to the upward or downward movement of the US treasury bill market, of which the long-term 10Y US Treasury Note futures are a representative indicator, with a leverage effect of 2.

From October 2022 to October 2023, the performance of the Acc share / FR0011607084 is 15.52%. That of the benchmark of 15.85% with a tracking error of 0.02%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Number of custodians	-

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI US TREASURY 10Y DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity charge that may be charged, in general by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity charges, which are charged to the Sub-fund.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.20% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Incentive fee	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in USD.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Eurozone country equities.

The AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF sub-fund (the "Sub-fund") continuously maintains at least 60% exposure to one or more of the equity markets of one or more eurozone countries, which may include France.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

All distributable amounts will be accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the FTSE Italia PMI Net Tax Index (the "Benchmark Index") denominated in euros (EUR), while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index, which is representative of the performance of mid-cap stocks listed on Borsa Italiana.

The maximum tracking error between the Sub-fund's net asset value and that of the Benchmark Index is 2%.

Benchmark index:

The Benchmark Index is the FTSE Italia PMI Net Tax Index.

The Benchmark Index is a free float-adjusted capitalisation-weighted index that is representative of the stock-market performance of the small-cap and mid-cap equities listed on the Borsa Italiana exchange.

The Benchmark Index is composed of the components of the FTSE Italia Mid Cap Index and of 20 components of the FTSE Italia Small Cap Index selected on the basis of their daily trading volume and market capitalisation.

The Benchmark Index components are eligible for investment under the "Piano Individuale di Risparmio a lungo termine" (PIR) regime in effect prior to 31 December 2018 or since 1 January 2020, pursuant to the 2017 Italian Budget Act (Act No. 232 of 11 December 2016) as amended or supplemented.

The FTSE Italia Mid Cap Index represents the 60 listed companies on the Borsa Italiana exchange that are rated most highly in terms of market capitalisation and liquidity (as measured by daily trading volume) and which are not components of the FTSE MIB index.

The FTSE Italia Small Cap Index represents the companies listed on the Borsa Italiana exchange that meet FTSE's liquidity and market capitalisation criteria and which are not components of the FTSE MIB Index or the FTSE Italia Mid Cap Index.

With each rebalancing, the weight of the Benchmark Index components that are also components of the FTSE Italia Small Cap Index is fixed at 5%.

Each Benchmark Index component is capped at 10% at each quarterly rebalancing. The weight of any component that exceeds 10% will be reduced to 10%. The sum of the weights of components with weights above 5% is capped at 40%.

The Benchmark Index is rebalanced quarterly, in March, June, September and December.

The Benchmark Index is a Net Dividends Reinvested index. A Net Dividends Reinvested index includes net dividends and all other types of income distribution in the calculation of the index's performance.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftserussell.com.

Benchmark Index composition and revision

The Benchmark Index is rebalanced quarterly.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

The exact composition of the Benchmark Index and FTSE's rules for index composition revision are available on the Internet at www.ftserussell.com. The frequency with which the Benchmark Index is rebalanced does not affect the cost of implementing the Investment Strategy.

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every stock exchange trading day.

The Benchmark Index's closing price is available on the Internet at www.ftserussell.com.

Pursuant to European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, FTSE International Limited, the administrator of the Benchmark Index, has until 31 December 2023 to apply to the competent authority for the necessary certification or registration.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will be exposed to the latter via a direct replication method that requires the Sub-fund to invest mainly in the securities that underlie the Benchmark Index and/or in financial instruments that are representative of all or some of the securities that underlie the Benchmark Index.

The sub-fund may also invest in derivative financial instruments (DFI). The DFI in which the Sub-fund may invest include, but are not limited to, futures on indices, futures on all or some of the Benchmark Index components, and hedging swaps, mainly to minimise the Sub-fund's tracking error.

In accordance with its investment strategy, the Sub-fund may hold cash (e.g. when using futures). In this case, the fund manager may, in the best interest of unit-holders, deposit this cash with a credit institution or invest it in balance-sheet assets and/or off-balance-sheet assets, as described below.

The equities in the Sub-fund's portfolio are on the list of investments that are eligible for investment under the "Piano Individuale di Risparmio a lungo termine" (PIR) regime in effect prior to 31 December 2018 or since 1 January 2020, pursuant to the 2017 Italian Budget Act (Act No. 232 of 11 December 2016) as amended or supplemented.

The Sub-fund must invest at least 70% of its assets in financial instruments traded on a regulated market or on a multilateral trading facility that are issued by or entered into with companies that are domiciled in Italy or in a country of the European Union or the European Economic Area (EEA) and which have a permanent establishment in Italy.

At least 25% of these financial instruments, representing 17.5% of the total value of the Sub-fund's assets, must be issued by companies that are not components of the FTSE MIB index or an equivalent index. At least 5% of these financial instruments, representing 3.5% of the total value of the Sub-fund's assets, must be issued by companies that are not components of the FTSE MIB index or the FTSE Italia Mid Cap Index or of an equivalent index.

The Sub-fund cannot invest more than 10% of the total value of its assets in financial instruments that are issued by or entered into with a single company, or by or with companies belonging to the same group, or in cash deposits.

The Sub-fund cannot invest in companies that are domiciled in a country that has not signed an appropriate information-sharing agreement with Italy.

For the Sub-fund to be entitled to benefit from the PIR law for a given calendar year, these investment constraints must be observed for at least two-thirds of each calendar year as of 1 January 2020.

In order to optimise the direct replication method that is used to track the Benchmark Index, the Sub-fund, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Index constituents in order to reduce the costs of investing directly in all of the various Benchmark Index constituents. This sampling technique could cause the Sub-fund to invest in a selection of representative Benchmark Index securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Index, and even to invest in securities that are not constituents of the Benchmark Index.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-fund's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio is available on the page dedicated to the Sub-fund on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit may be increased to 35% for a given issuing entity when this is justified by exceptional market conditions and in particular when certain securities are largely dominant and/or in the event of strong volatility that affects a financial instrument or securities linked to an economic sector represented in the Benchmark Index, particularly in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

The manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund will mainly be invested in the following types of securities:

• Equities

The Sub-fund will be invested mainly in the equities that make up the Benchmark Index.

• The shares or units of other CIU or investment funds

The Sub-fund may invest up to 10% of its assets in the shares or units of the following collective investment undertakings (CIU) or investment funds:

- French and foreign UCITS that comply with Directive 2009/65/EC. The Sub-fund may invest in shares or units of UCITS that are managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

3. Off-balance sheet assets (derivatives)

The Sub-fund may invest in the following DFI:

• Eligible markets:

- regulated
- organised
- over-the-counter

• Risks which the Sub-fund may seek to hedge or gain exposure to:

- equity

• Purpose (all transactions must be consistent with the investment objective)

- hedging
- exposure

• Types of instruments used:

- futures : on equities and indices
- forward exchange contracts

• Strategy for using derivatives to achieve the investment objective:

- overall hedging of the portfolio, or of certain risks, securities, etc. – up to 100% of net assets
- to achieve synthetic exposure to assets or risks (up to 100% of assets)

Counterparties to OTC derivatives traded by the Sub-fund will be selected in accordance with the Management Company's best-execution policies (including the "Order-execution by asset type" table referred to in the Appendix). The aforementioned policy is available at www.amundi.com.

Counterparties to derivative financial instruments will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments, in accordance with regulatory limits and requirements.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

To optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with credit institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10 % of its net assets.

7. Securities financing transactions

Pursuant to its investment strategy, the Sub-fund may use various efficient portfolio management techniques in compliance with Article R214-18 of the French monetary and financial code, including the temporary sale of securities.

- Maximum proportion of assets under management for which securities financing transactions may be entered into: 25% of the Sub-fund's assets.
- Expected proportion of assets under management for which securities financing transactions may be entered into: 0% of the Sub-fund's assets.

For this purpose, the Management Company has appointed Société Générale as its intermediary (hereinafter the "Agent"). If transactions involving the temporary disposal of securities are engaged in, the Agent may be authorised to (i) lend securities, on the Sub-fund's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Sub-fund's behalf, any liquid assets received as collateral for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

When Société Générale S.A. is appointed as an Agent, it is not authorised to act as a counterparty to securities lending transactions. If securities are lent:

- The Sub-fund shall be entitled to all income from securities financing transactions, net of any direct and indirect operating fees/expenses.
- These operating fees/expenses, which are incurred to manage the portfolio more efficiently, will be those borne by the Management Company, the Agent (if applicable) and/or any other intermediaries that are involved in these transactions.
- The direct and indirect operating fees/expenses will be calculated as a percentage of the Sub-fund's gross income. Information on direct and indirect operating fees/expenses and on the entities to which these fees/expenses are paid will be provided in the Sub-fund's annual report.
- Income from the lending of securities will be paid to the Sub-fund after deduction of any direct and indirect operating fees/expenses which may be borne by the Agent and the Management Company. Since these direct and indirect operating fees/expenses do not increase the Sub-fund's overall operating expenses they have been excluded from ongoing charges.

If necessary, the Sub-fund's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions
- the identity of the counterparty(ies) involved in these transactions
- the nature and amount of any collateral received to reduce the Sub-fund's counterparty risk, and; et
- the income obtained from efficient portfolio management transactions during the relevant period and the direct and indirect operating fees/expenses associated with these transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund enters into securities financing transactions, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price;
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) This collateral must be sufficiently diversified by country, market and issuer, and no exposure to a single issuer may exceed 20 % of the Sub-fund's net asset value;
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

A higher discount may be applied to collateral received in a currency other than the euro.

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time
- (iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of the Sub-fund's shares traded on a given exchange may be adversely affected by a suspension in trading for various reasons, such as:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-fund manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents or in derivatives. The use of such optimisation techniques may increase the ex post tracking error and cause the Sub-fund to perform differently from the Benchmark Index.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative Contract and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Risk of investing mid-cap companies

The Sub-fund is exposed to medium-capitalisation companies, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and more rapidly in response to market movements than do the prices of large-cap stocks. The Sub-fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalisation equities.

- Risk that the investment objective may not be fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

The Sub-fund may invest in Derivative Financial Instruments ("DFI") traded over the counter or listed on an exchange, and in particular in futures and/or swaps for hedging purposes. These DFI involve various risks, such as counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk and liquidity risk. These risks may affect a derivative instrument directly and may result in a modification or even the premature termination of the DFI contract, which could adversely affect the Sub-fund's net asset value.

The risk of investing in DFI may be relatively high. Since the amount of money required to establish a position in a DFI may be much less than the exposure thus obtained, each transaction involves "leverage". A relatively small market movement may therefore have a very large potential positive or negative impact on the Sub-fund.

The market value of DFI is highly volatile and they may therefore be subject to large variations.

The Sub-fund may invest in DFI traded over the counter. DFI traded over the counter may also be less liquid than transactions on an organised market, where the volumes traded are generally quite higher, and the prices of these DFI may therefore be more volatile.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

- Risk of using efficient portfolio management techniques

If the Sub-fund's counterparty to an efficient portfolio management technique (hereinafter "EPMT") defaults, this may expose the Sub-fund to the risk that the value of the collateral it has received is less than the value of the assets the Sub-fund transferred to the counterparty to the EPMT. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as collateral and/or (iv) the illiquidity of the market in which the collateral received is listed. Investors should note that EPMT transactions may be entered into with same group as that of the Management Company/entities of the same group as that of the Management Company/entities of the same group as the Management Company.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of units or shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost;
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- PIR Law risk

The Sub-fund will endeavour to comply with the requirements of the PIR individual long-term savings plan introduced in Italy under the 2017 Finance Act, by replicating the Benchmark Index. Some factors that may affect the Sub-fund's capacity to comply with the requirements of the PIR law are a change in the Benchmark Index provider's methodology, the delisting of the securities in the Sub-fund's portfolio or changes in their incorporation, or securities that cease to be compliant with the requirements of the PIR law. When securities are components of the Benchmark Index, they will remain in the Benchmark Index and may therefore remain in the Sub-fund's portfolio until they are removed from the Benchmark Index during the next scheduled rebalancing. The Sub-fund may also, if there are mitigating factors, hold other securities that are not components of the Benchmark Index. The Management Company may manage such situations at its discretion. Furthermore, the PIR law's regulatory framework may change, which may result in a modification of the Benchmark Index or of the investment strategy, subject to the CSSF's approval.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is This Sub-fund is available to all investors.

Investors in this Sub-fund seek exposure to mid-cap stocks listed on the Borsa Italiana exchange.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor FTSE Italia PMI PIR 2020 (DR) UCITS ETF to Amundi FTSE Italia PMI PIR 2020 UCITS ETF.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi FTSE Italia PMI PIR 2020 UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark FTSE Italia PIR PMI Net Tax Index. The FTSE Italia PIR PMI Net Tax Index is representative of the performance of small and mid-cap shares listed on Borsa Italiana. It is comprised of the 60 shares with the highest ratings in terms of market capitalisation and liquidity. It is constructed from the FTSE Italia Mid Cap index, itself comprised of the 60 shares with the highest market capitalisation after the 40 shares included in the FTSE MIB index.

From October 2022 to October 2023, the subfund performance is 4.28%. That of the benchmark of 3.73% with a tracking error of 0.46%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Subfund of the Sicav Multi Units France

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

The CIU will be able to use efficient portfolio management techniques in accordance with the provisions of Article R214-18 of the Monetary and Financial Code and in particular reverse transactions in financial securities.

- Maximum proportion of assets under management eligible for SFTs: up to 25% of the assets of the CIU.
- Expected share of assets under management eligible for SFTs: 10% of the assets of the CIU.

The total revenues generated by efficient portfolio management techniques shall be shared between the relevant compartment and the security lending agent. Each compartment receives 65% while the agent receives 35% of this income. All direct and indirect operational costs related to these operations are borne by the agent and have therefore been excluded from the financial management and administrative costs external to the management company.

7. Revenue

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;

- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;

- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

d) Income and operating expenses related to effective management techniques

As part of the effective portfolio management techniques, the management company selected Amundi Intermediation to act as an intermediary for the effective management techniques processed by the CIU. The total revenues generated by efficient portfolio management techniques shall be shared between the relevant compartment and the security lending agent. Each compartment receives 65% while the agent receives 35% of this income. All direct and indirect operational costs related to these operations shall be borne by the staff member.

Amundi Intermediation is an entity linked to the management company.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity charge that may be charged, in general by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity charges, which are charged to the Sub-fund
- direct and indirect operating fees/expenses of securities financing transactions.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Incentive fee	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A
Direct and indirect operating fees/expenses of securities financing transactions	The amount of income from these transactions	20% for the Management Company 15% for the Agent.

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

3.5. Receivables and Debts: breakdown by type

Details on elements comprising the "other receivables" and "other debts" items, particularly the breakdown of foreign exchange forward contracts by type of operation (purchase/sale).

Receivables	124,248.08
Foreign exchange forward contracts:	
Forward currency purchases	-
Total amount traded for forward currency sales	-
Other Receivables:	
Security deposits (paid)	87,208.97
Deferred Settlement Sales	37,039.11
-	-
-	-
-	-
Other transactions	-
Debts	11,532,215.58
Foreign exchange forward contracts:	
Forward currency sales	-
Total amount traded for forward currency purchases	-
Other Debts:	
Security deposits (receipts)	11,478,806.00
Charges accrued	46,938.58
Miscellaneous debtors and creditors	6,471.00
-	-
-	-
Other transactions	-

3.6. Equity

	Subscriptions		Redemptions	
	Number of shares	Amount	Number of shares	Amount
Number of shares issued / redeemed during the period:	13,956	2,059,494.03	255,040	39,859,320.22
Subscription / redemption fee:		4,182.90		27,461.97
Retrocessions		2,000.00		15,000.00
Commissions allocated to the UCIT:		2,182.90		12,461.97

AMUNDI FTSE ITALIA PMI PIR 2020 UCITS ETF

Subfund of the Sicav Multi Units France

3.7. Management fees

Operating and management fees (fixed charges) as a % of the average net assets	0.40
Outperformance fee (variable charges): amount of fees for the period	-
Retrocession of management fees:	
- Amount of fees retroceded to the UCIT	-
- Breakdown by "target" UCIT:	
- UCIT 1	-
- UCIT 2	-

3.8. Commitments received and granted

3.8.1. Description of the guarantees received by the UCIT with mention of capital guarantees	néant
3.8.2. Description of other commitments received and/or granted	néant

3.9. Other information

3.9.1. Current value of financial instruments pertaining to a temporary acquisition:	
- Financial instruments as repurchase agreements (delivered)	-
- Other temporary purchases and sales	-
3.9.2. Current value of financial instruments comprising guarantee deposits:	
Financial instruments received as a guarantee and not written to the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial instruments granted as a guarantee and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3. Financial instruments held as a portfolio issued by the entities related to the management company (funds) or financial managers (Mutual Funds) and UCITS managed by these entities:	
- UCITS	-
- other financial instruments	-

3.12. Table of results and other characteristic elements of the subfund over the last 5 periods

Currency					
EUR	10.31.2023	10.31.2022	10.29.2021	10.30.2020	10.31.2019
Net assets	133,108,271.06	160,511,764.02	330,458,415.56	160,091,185.87	218,460,094.83
Number of outstanding shares	936,262	1,177,346	1,887,487	1,501,795	1,689,030
Net asset value	142.1698	136.3335	175.0785	106.5998	129.3405
Unit distribution net capital gains and losses (including interim payments)	-	-	-	-	-
Unit distribution (including interim payments)	-	-	-	-	-
Unit tax credit transferred to share holders (individuals) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	4.67	6.53	12.41	-9.77	-3.16

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

⁽²⁾ The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

Subfund creation date: March 28, 2014.

AMUNDI MDAX UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

Subfund features

Classification:

Eurozone country equities.

The Lyxor German Mid-Cap MDAX UCITS ETF sub-fund (the "Sub-fund") continuously maintains at least 60% exposure to one or more of the equity markets of one or more eurozone countries, which may include France.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Dist share class: the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of the distributable amounts.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The investment objective is to replicate the performance, whether positive or negative, of the MDAX Index (the "Benchmark Index"), denominated in EUR, while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index. It is representative of mid-cap German companies.

The expected ex-post tracking error under normal market conditions is 0.08%.

Benchmark index:

The Benchmark Index is the MDAX Index.

The Benchmark Index is weighted by market capitalisation and adjusted for free-float. It is representative of the performance of equities that are classified as mid-cap stocks on the DAX exchange on the basis of their market capitalisation and liquidity.

The Benchmark Index is calculated by Deutsche Börse AG.

A Dividends Reinvested index includes dividends and all other types of income distribution in the calculation of the index's performance.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on Deutsche Börse AG's website at www.dax-indices.com

Benchmark Index composition and revision

The Benchmark Index's composition is revised quarterly and rebalanced quarterly.

Each index component is weighted by its float-adjusted market capitalisation, with the weight of each component being capped at 10% when the index is rebalanced. The float-adjusted market capitalisation is the market value of the shares issued and available for trading.

The frequency with which the Benchmark Index is rebalanced does not affect the cost of implementing the Investment Strategy.

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every stock exchange trading day.

The Benchmark Index's closing value is available on Deutsche Börse AG's website at www.dax-indices.com. The administrator of the Benchmark Index is STOXX Limited.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Sub-fund's equities will be mainly those that make up the Benchmark Index, and also other international equities, in all economic sectors and listed in all markets, including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralised.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund, is available on the page dedicated to the Sub-fund on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit will be checked on each rebalancing date for the Benchmark Index, by applying the method for calculating the Benchmark Index which limits exposure to the same issuing entity to 20% and where the calculation is carried out by the sponsor or agent for calculating the Benchmark Index. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index, particularly in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

For this Sub-fund, the asset manager mainly intends to use the following assets:

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund may invest in global equities in all economic sectors and listed on any exchange, including small-cap exchanges. The aforementioned equities will be selected on the basis of the following:

- eligibility criteria and in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, and in particular with respect to:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geographic
 - sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law. The Sub-fund may invest in the shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management and achieve its investment objective, the asset manager reserves the right to use other financial instruments, in compliance with regulations.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or the value of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps (TRS) may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps (TRS) may be entered into: up to 100%.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

These derivative instruments (including index-linked swaps) may be transacted with Société Générale without having to seek a competitive bid from another counterparty. The Management Company therefore makes no commitment to observe a formal, traceable and verifiable competitive tendering procedure.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

To optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with credit institutions that belong to the same group as the depository.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager shall not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price;
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) This collateral must be sufficiently diversified by country, market and issuer, and no exposure to a single issuer may exceed 20 % of the Sub-fund's net asset value;
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

(iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com see our website at www.amundi.com

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of the Sub-fund's shares traded on a given exchange may be adversely affected by a suspension in trading for various reasons, such as:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative Contract and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk of investing mid-cap companies:

The Sub-fund is exposed to medium-capitalisation companies and more specifically to the equity securities of medium and intermediate size enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalisation equities.

- Risk that the investment objective may not be fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks

- Risk of using derivative financial instruments

In order to achieve its investment objective, the Sub-fund can enter into transactions involving over-the-counter derivative financial instruments (DFI), such as a~~. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and may require an adjustment of the DFI transaction or even its premature termination, which could adversely affect the Sub-fund's net asset value.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of units or shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost;
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted.
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is available to all investors.

An investor in the Sub-fund is seeking exposure to the equities of German mid-cap companies.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor German Mid-Cap MDAX UCITS ETF to Amundi MDAX UCITS ETF.

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi MDAX UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark MDAX PERF INDEX. The MDAX PERF INDEX is a market capitalisation weighted index, measuring the performance of 50 mid-cap shares listed on the first segment of the German stock exchange, which, after excluding the 40 shares comprising the DAX index, have the largest adjusted market capitalisation.

From October 2022 to October 2023, the subfund performance is 1.34%. That of the benchmark of 1.53% with a tracking error of 0.009%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Number of custodians	-
1 Denomination	-
Amount	-

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI MDAX UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity charge that may be charged, in general by the depositary or the Management Company.

For the Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the asset management company when the Sub-fund exceeds its objectives;
- account activity charges, which are charged to the Sub-fund.

For more information on the fees charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.2% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Incentive fee	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Indication of accounting changes subject to special information to shareholders

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Global equities.

The AMUNDI MSCI CHINA A UCITS ETF fund (the “Sub-fund”) is continuously at least 60% exposed to a foreign equity market or to the equity markets of two or more countries, which may include the French market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: Accumulation.

Dist share class: If a distribution is decided, the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of these amounts. Realised net capital gains will be accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the MSCI China A Net Total Return Index (the “Benchmark Index”), denominated in US dollars (USD), while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 2%.

Benchmark index:

The Benchmark Index is a free float-adjusted capitalisation-weighted index that is representative of exposure to the performance mid-cap and large-cap A shares.

A shares are the shares of companies that are incorporated in the People's Republic of China, excluding Hong Kong and Macau (the PRC) and which are traded on the Shanghai and Shenzhen stock exchanges and quoted in Chinese yuan (CNY).

The Benchmark Index is representative of A shares that are traded on Shanghai Hong-Kong Stock Connect or Shenzhen Hong-Kong Stock Connect exchanges (the “Stock Connect Programmes”) and which are components of the MSCI China All Shares Index.

The MSCI China All Shares Index is representative of mid-cap and large-cap companies within the universe of companies incorporated in China, or outside of China but which MSCI considers to be Chinese. This universe includes shares listed on the Hong Kong, Shanghai and Shenzhen exchanges or on exchanges outside of China.

The Benchmark Index is a free float-adjusted capitalisation-weighted index, which means that the weight of each of its components is proportional to its free-float market capitalisation.

The Benchmark Index is a Net Dividends Reinvested index. A Net Dividends Reinvested index includes net dividends and all other types of income distribution in the calculation of the index's performance.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index constituents are available on the Internet at http://www.msci.com/products/indices/country_and_regional/domestic_equity_indices/china/

Benchmark Index composition and revision

The Benchmark Index is revised quarterly, in accordance with the methodology described in the Benchmark Index Rulebook, which is available MSCI's website at www.msci.com.

The frequency with which the Benchmark Index is rebalanced does not affect the cost of implementing the Investment Strategy.

Benchmark Index publication:

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index's daily fixing is available through Reuters and Bloomberg.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

The Benchmark Index's closing price is available on the Internet at <http://www.msci.com>.

Pursuant to European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, MSCI Limited, the administrator of the Benchmark Index, has until 31 December 2023 to apply to the competent authority for the necessary certification or registration.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will be exposed to the latter via a direct replication method that requires the Sub-fund to invest mainly in the securities that underlie the Benchmark Index and/or in financial instruments that are representative of all or some of the securities that underlie the Benchmark Index.

The sub-fund may also invest in derivative financial instruments (DFI). The DFI in which the Sub-fund may invest include, but are not limited to, futures on indices, futures on all or some of the Benchmark Index components, and hedging swaps, mainly to minimise the Sub-fund's tracking error.

In accordance with its investment strategy, the Sub-fund may hold cash (e.g. when using futures). In this case, the fund manager may, in the best interest of unit-holders, deposit this cash with a credit institution or invest it in balance-sheet assets and/or off-balance-sheet assets, as described below.

In order to optimise the direct replication method that is used to track the Benchmark Index, the Sub-fund, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Index constituents in order to reduce the costs of investing directly in all of the various Benchmark Index constituents and/or to reduce the operational constraints of investing in the various Benchmark Index constituents. This sampling technique could cause the Sub-fund to invest in a selection of representative Benchmark Index securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Index, and even to invest in securities that are not constituents of the Benchmark Index.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-fund's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio is available on the page dedicated to the Sub-fund accessible on Lyxor's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit may be increased to 35% for a given issuing entity when this is justified by exceptional market conditions and in particular when certain securities are largely dominant and/or in the event of strong volatility that affects a financial instrument or securities linked to an economic sector represented in the Benchmark Index, particularly in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

Investors should also note that the Sub-fund's sub-delegated asset manager is a Renminbi Qualified Foreign Institutional Investor (hereinafter "RQFII") and has a license as such (an "RFQII License") that is valid in the People's Republic of China ("PRC") and is allotted a RQFII quota specifically for the Sub-fund's investments (the "Quota") that will enable the sub-delegated asset manager, acting in the Sub-fund's name and on its behalf, to implement the aforementioned Invested Strategy. More specifically, and subject to the risks indicated in the Risk Profile section below, the aforementioned RQFII License and Quota will enable the sub-delegated asset manager to:

- Invest in A-shares, in the Sub-fund's name and on its behalf, subject to the terms and within the limits of the License and Quota, with no minimum holding period requirement
- Repatriate into and out of PRC the amount of funds the Sub-fund needs to buy or sell A-shares, every business day in PRC and effect any foreign exchange transactions that are required to convert funds in RMB into the currency of the relevant share class.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

In order to implement the investment strategy described above, the Sub-fund's sub-delegated asset manager may also invest in A-shares via the common trading platforms of the Stock Connect Programmes. The Stock Connect Programmes enable investors outside of the PRC to invest in A shares traded in RMB on the Shanghai and Shenzhen exchanges, without necessarily requiring a RQFII Licence and Quota.

Investors may obtain more information on the terms that govern the sub-delegated asset manager's transactions in Chinese A-shares, under the RQFII Licence and Quota, and/or under the rules of the Stock Connect Programmes, upon written request to the Management Company.

The manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund will mainly be invested in the following types of securities:

• Equities

The Sub-fund will be invested mainly in the equities that make up the Benchmark Index.

• The shares or units of other CIU or investment funds

The Sub-fund may invest up to 10% of its assets in the shares or units of the following collective investment undertakings (CIU) or investment funds:

- French and foreign UCITS that comply with Directive 2009/65/EC. The Sub-fund may invest in shares or units of UCITS that are managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

3. Off-balance sheet assets (derivatives)

The Sub-fund may invest in the following DFI:

• Eligible markets:

- regulated
- organised
- over-the-counter

• Risks which the Sub-fund may seek to hedge or gain exposure to:

- equity

• Purpose (all transactions must be consistent with the investment objective)

- hedging
- exposure

• Types of instruments used:

- futures : on equities and indices
- forward exchange contracts

• Strategy for using derivatives to achieve the investment objective:

- overall hedging of the portfolio, or of certain risks, securities, etc. – up to 100% of net assets
- to achieve synthetic exposure to assets or risks (up to 100% of assets)

Counterparties to OTC derivatives traded by the Sub-fund will be selected in accordance with the Management Company's best-execution policies (including the "Order-execution by asset type" table referred to in the Appendix). The aforementioned policy is available at www.amundi.com.

Counterparties to derivative financial instruments will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments, in accordance with regulatory limits and requirements.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

4. Securities with embedded derivatives

N/A.

5. Cash deposits

To optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with credit institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10 % of its net assets.

7. Securities financing transactions

The fund manager will not engage in securities financing transactions.

8. Collateral contracts

The Sub-fund will not give or receive any collateral for the purpose of its investment management.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the asset manager. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Specific risk of investing in the People's Republic of China:

Investors in the Sub-fund should be aware of the following risks inherent to investments in the People's Republic of China (PRC):

- RQFII risk

The Sub-fund's capacity to achieve its investment objective depends among other things on the RQFII quota it is allotted. If the Sub-fund's RQFII quota is too small this could adversely affect the Sub-fund's operation. PRC regulations governing RQFII status may also be amended at any time by the China Securities Regulatory Commission (CSRC) and/or, with respect to foreign exchange, by the State Administration of Foreign Exchange ("SAFE") bureau, which could adversely affect the Sub-fund's capacity to achieve its investment objective and result in its dissolution. In particular, RQFII status means that any increase in the investment quota is subject to SAFE's authorisation. If the Sub-fund wishes to increase its quota it may take quite a long time to obtain SAFE's approval. Any restriction on the quota that the Sub-fund has been granted may affect its investments. Such a restriction may therefore affect the trading of the Sub-fund's shares on an exchange, which could, in such circumstances and depending on the exchange's rules, trade at more than their Net Asset Value. Lastly, if the sub-delegated asset manager loses its RQFII licence, if the RQFII quota is reduced, or if RQFII requirements are significantly increased, the Board of Directors may decide to dissolve the Sub-fund, subject to the AMF's approval.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- Risks of the Stock Connect Programmes

The Sub-fund's capacity to achieve its investment objective depends among other things on whether or not A-shares can be traded via the Stock Connect Programmes. The Stock Connect Programmes are currently subject to a daily quota on the net total of buy orders executed. If this quota is exceeded on a given Stock Connect Programme, buy orders on that Programme will be automatically suspended (at least temporarily), which could impair the Sub-fund's capacity to achieve its investment objective.

- Economic, political and social risks

Any political change, social instability and/or unfavourable diplomatic, political, economic and/or social development which may occur in or in connection with PRC (hereinafter a "Policy Change") could result in the imposition by the Chinese government of additional restrictions and limits, such as expropriation, confiscatory taxes or the nationalisation of certain companies included in the Benchmark Index. Investors should also note that a Policy Change may have an adverse impact on PRC stock exchanges and on the Sub-fund's performance and could ultimately result in the Sub-fund's dissolution by decision of the Board of Directors.

- Economic risks in PRC

The PRC economy has grown very rapidly. It is, however, not certain that this growth will continue and it may be irregular across the different sectors of the PRC economy. The PRC government has from time to time put in place various measures to prevent an excessively sharp acceleration of the business cycle and the transition of the country's economy from a socialist economy to one that is more market-oriented has caused economic and social tensions that could stop this transition or compromise its success. Any of these risks could diminish the Sub-fund's performance.

- Capital repatriation risks

The system for repatriating capital is subject to the approval of the Chinese SAFE authorities and to the risk that the repatriation of capital may be restricted in terms of amount or frequency (as of the date of the Sub-fund's inception RQFII regulations do however allow capital to be repatriated daily without requiring approval).

Furthermore, the regulations and standard economic practices in PRC that govern the repatriation of funds from the domestic Chinese market to other markets and their conversion into a foreign currency could be modified in a way that adversely affects the Sub-fund.

The unfavourable regulatory developments and situations described above could suspend or restrict the conversion or transfer of foreign currencies and could possibly:

- (i) diminish the Sub-fund's capacity to fully achieve its investment objective
- (ii) diminish the Sub-fund's performance
- (iii) ultimately result in the Sub-fund's dissolution, by decision of the Board of Directors.

Capital gains and other capital increases are also subject to this risk.

- PRC legal system risk

The legal system in PRC is based on statutory law. However, some regulations have yet to be implemented and there is no assurance that they will actually ever be implemented in their entirety. In particular PRC regulations on the control of exchange rates are relatively recent and their application is still quite uncertain. Moreover, these regulations give the Chinese authorities (and in particular CSRC and SAFE) broad discretion in their respective interpretation of the regulations, which leaves uncertainty as to how they might be applied and used. Any of these risks could diminish the Sub-fund's performance.

- State control of exchange rates and of future exchange rate movements

Under the current RQFII system offshore RMB (CNH) can be converted into onshore RMB (CNY) and vice-versa on a one-for-one basis. The CNH also serves as a pivot currency between the share class currencies (USD and CNY). There is no guarantee that in the future an exchange rate will not be applied to the conversion of CNH into CNY or vice-versa.

- Dependence on the A-shares market

The existence of a liquid market for A-shares depends on the supply of and demand for A-shares. It should be noted that the Shanghai and Shenzhen stock exchanges, on which the A-shares are listed, are undergoing huge changes and that their market capitalisations and trading volume are less than those of developed country exchanges. The volatility of A-share markets and any difficulty in trading A-shares or in settling A-share trades could result in significant fluctuations in the price of the securities traded in these markets, and ultimately in the Sub-fund's Net Asset Value.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- Taxation in the PRC

Several tax reforms have been introduced by the PRC government in recent years. The current tax rules may be revised or amended in the future.

Furthermore, the PRC's tax authority (the "State Administration of Taxation") has confirmed the 10% withholding tax on dividends, premiums and interest paid to investors with RQFII status (subsequent to the "PRC Corporate Income Tax Law", which came into effect on 1 January 2008) or who invest via the Shanghai Hong- Kong Stock Connect (subsequent to Caishui circular [2014] No. 81).

This withholding tax may be reduced by virtue of a double taxation treaty with China, provided that certain conditions are met and subject to the approval of PRC tax authorities.

It should also be noted that any dividends paid to shareholders by the Sub-fund will be obtained from the receipt of corresponding amounts from the investment in the A-shares and that all amounts of this kind will be net of the withholding tax on dividends, premiums and interest applicable in the PRC.

Concerning the taxation of share sales, on 14 November 2014, the PRC Ministry of Finance and tax authority issued circulars, which among other things specified the tax treatment to be applied to capital gains from the sale of "A-Shares" purchased subject to an RQFII quota or via the Shanghai Hong-Kong Stock Connect, the following should in particular be noted:

- Capital gains on sales before 17 November 2014 are taxable
- Capital gains on sales as of 17 November 2014 are temporarily tax exempt.

Since the PRC tax authority has not made a definitive pronouncement on how the tax would be calculated or collected, nor on the duration of the exemption, investors should note that:

- a) the Sub-fund's Net Asset Value may be adversely affected by a change in PRC tax rules
- b) the adverse impact on the Sub-fund's performance resulting from a change in PRC tax rules will depend on the date the Sub-fund's shares are bought or sold
- c) the magnitude of this adverse impact on the Sub-fund's performance may not be proportional to the number of shares that an investor holds in the Sub-fund if tax obligations in PRC are amended retroactively and, in certain circumstances, could amount to 100% of the Net Asset Value of a share class.

The asset manager by delegation has made a 10% provision on the Sub-fund's capital gains up to 14 November 2014. Furthermore, it should be noted that although the PRC tax authority has confirmed the temporary exemption of withholding tax on capital gains on share sales as of 17/11/2014, there is no way of knowing with certainty what investor obligations will be with respect to PRC's taxation of capital gains on share sales before 17/11/2014. Until further information is provided on the taxation and calculation of withholding tax on capital gains before 17 November 2014, there can be no assurance as to whether the aforementioned provision is sufficient or not, since it cannot currently be known with certainty what obligations may be imposed on investors with RQFII status in respect of the PRC's taxation of capital gains. If the provision made proves to be insufficient, this could adversely affect the Sub-fund's Net Asset Value. However, and as is the case for any mutual fund that complies with Directive 2009/65/EC, the Sub-fund's shareholders can lose no more than the capital they invest and the expense of purchasing and selling shares.

Furthermore, since Chinese tax authorities have only confirmed a temporary exemption of the taxation of capital gains made as of 17 November, the asset manager by delegation may decide to make a provision if Chinese tax authorities specify the duration of the exemption or amend this temporary rule in part or in whole. In this event, such a provision would adversely affect all of the Sub-fund's net asset values calculated as of the date of the first provision. Such a provision would also reduce the Sub-fund's performance relative to that of the Benchmark Index.

In addition to the withholding tax on dividends, premiums, interest and capital gains referred to above, since 19 September 2008 the sellers of A-shares have been required to pay a stock market tax of 0.1% of the share price. PRC authorities may decide to modify this tax.

- Accounting and reporting standards:

The standards and practices for accounting, auditing and the reporting of financial information that apply to PRC companies may differ from those of countries with more developed financial markets. Such differences can adversely affect certain practices such as asset valuation methods and the reporting of information to investors.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- Order execution risk in PRC

Under RQFII regulations, the sub-delegated asset manager must select one or more intermediaries ("Brokers") in PRC to execute stock-market orders involving A- shares on the Shanghai Stock Exchange and the Shenzhen Stock Exchange. The sub-delegated asset manager may select the same broker for transactions on both of these exchanges. If a Broker defaults, the Sub-fund may have difficulty recovering its assets, which could adversely affect its valuation.

Société Générale and the sub-delegated asset manager have procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Custody risk in PRC

Under RQFII regulations, a sub-custodian in PRC must be selected. The sub-custodian selected is Bank of China Limited, which in this capacity holds the Sub-fund's onshore RMB and securities accounts in PRC. Under RQFII regulations, these accounts must be registered jointly in the names of the sub-delegated asset manager (which has the RQFII license) and the Sub-fund. There is therefore a risk that the assets held in PRC may not be as well protected as if they were registered in the Sub-fund's name only.

When, pursuant to the investment strategy, the sub-delegated asset manager purchases and/or sells A-shares via the Stock Connect Programmes, the sub-custody in relation to these transactions may be entrusted to a sub-custodian other than Bank of China Limited (the "Third Party Sub-custodian"). In this case, the Sub-fund's accounts with the Third-Party Sub-custodian will be opened in the joint name of the Depository and the Sub-fund.

- Risk that trading is suspended

Trading in the benchmark index constituents may be temporarily suspended, making it impossible for the Sub-fund to value these securities correctly and/or buy or sell them.

Other risks in investing in this Sub-fund:

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

- Risk of investing in small and mid-cap companies

The Sub-fund is exposed to small-cap and mid-cap companies, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and more rapidly in response to market movements than do the prices of large-cap stocks. The Sub-fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalisation equities.

- Low Benchmark Index diversification risk

Since the index to which investors are exposed represents a given region, sector and strategy it may provide less diversification of assets in comparison with a broader index that is exposed to several regions, sectors or strategies. Exposure to such a less-diversified index may result in higher volatility than more diversified markets. Nevertheless, diversification rules of the UCITS Directive still apply to the Sub-fund's underlying assets at all times.

- Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-fund manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents and in derivatives. The use of such optimisation techniques may increase the ex post tracking error and cause the Sub-fund to perform differently from that Benchmark Index.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- Emerging Market Risk

The Sub-fund's exposure to emerging markets carries a greater risk of potential loss than an investment in traditional developed markets. Specifically, market operating and supervision rules for an emerging market may differ from standards applicable in developed markets. In particular, exposure to emerging markets can entail: increased market volatility, lower trading volumes, a risk of economic and/or political instability, an uncertain or unstable tax regime and/or regulatory environment, market closure risks, government restrictions on foreign investments, an interruption or limitation of convertibility or transferability of one of the currencies included in the Benchmark Index.

- Currency risk associated with the Benchmark index

The Sub-fund is exposed to currency risk since the securities that underlie the Benchmark Index may be denominated in a different currency than the Benchmark Index, or be derivatives of securities that are denominated in a different currency than the Benchmark Index. Changes in exchange rates may therefore adversely impact the Sub-fund's Benchmark Index.

- Currency risk associated with listing exchanges

The Sub-fund may be listed on an exchange or multilateral trading facility in a currency that is not the currency of the Benchmark Index. Investors who purchase shares in the Sub-fund in a currency that is not that of the Benchmark index are exposed to currency risk. As a result, due to changes in exchange rates the value of an investment that is made in a currency other than that of the Benchmark Index may decrease even though the value of the Benchmark Index increases.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to wide bid/offer spreads. An inability, due to low trading volumes, to execute trades associated with the replication of the Benchmark Index may also affect the process of subscriptions, conversions and redemptions of shares.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of shares or units traded on a given exchange may be adversely affected by a suspension in trading for various reasons, for example:

- the calculation of the Benchmark Index is suspended or stopped
- trading in the market(s) in the Benchmark Index's underlying assets is suspended
- an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- a market maker fails to comply with an exchange's rules
- an exchange's IT, electronic or other system fails.

- Risk that the investment objective may not be fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

The Sub-fund may enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These DFI involve various risks, such as hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and may require an adjustment of the DFI transaction or even its premature termination, which could adversely affect the Sub-fund's net asset value.

- Risk due to a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the Sub-fund's estimated taxation and its actual taxation may adversely affect the Sub-fund's net asset value.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of units or shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying constituents or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index constituent becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted)
- vi) the Benchmark Index constituents are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a constituent of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is available to all investors.

Investors in this Sub-fund are seeking upside and downside exposure to performance of the large caps on the A-shares market, namely, shares issued by companies incorporated in the People's Republic of China, excluding Hong Kong. The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor MSCI China A (DR) UCITS ETF to Amundi MSCI China A UCITS ETF.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi MSCI China A UCITS ETF is an ETF compliant with the UCITS Directive. Its objective is to replicate the MSCI China A Net Total Return Index, both upwards and downwards. This index represents China's large- and mid-cap A-shares listed on the Shanghai and Shenzhen stock exchanges. It only covers securities accessible via 'Stock Connect'. This index was designed for international investors; the calculation base uses the listings of category A shares on Stock Connect, based on the offshore RMB (CNH) rate.

From October 2022 to October 2023, the performance of the Acc share / FR0011720911 is -0.30%. That of the benchmark of -0.03% with a tracking error of 0.09%.

The performance achieved over the period does not prejudice the future results of the subfund.

Main movements in the portfolio during the year

Securities	Movements ("Accounting currency")

Transparency of securities financing transactions and the reuse of financial instruments under the SFTR regulation (in the UCI's accounting currency)

Over the course of the reporting period, the UCI was not involved in any transactions governed by the Securities Financing Transactions Regulation (SFTR).

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI MSCI CHINA A UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities repurchase and reverse repurchase transactions are valued at the market price.
- Shares and units in investment funds subject to French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in Renminbi (RMB) is the WM Reuters fixing rate at 9:00 a.m. GMT published by Thomson Reuters on the day the Sub-fund's net asset value is determined.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI MSCI CHINA A UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity charge that may be charged, generally by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity charges, charged to the Sub-fund

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment management fees and administration fees that are external to the Management Company (auditor, depositary, fund distribution and legal fees) including tax ⁽¹⁾	Net asset value	0.35% annual
Account activity charge	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The accounting of the subfund is carried out in USD.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

Details of the type of errors that have been corrected during the period

None.

Details of the rights and conditions attached to each share category

Acc share class: Accumulation.

Dist share class: If a distribution is decided, the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of these amounts. Realised net capital gains will be accumulated.

Unit capitalisation*

-12.51 -7.81 11.61 4.31 1.04

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

Subfund features

Classification:

Global equities.

The AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF (the "Sub-fund") is continuously at least 60% exposed to a foreign equity market or to the equity markets of two or more countries, which may include the French market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all amounts available for distribution are reinvested.

Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of distributable income in one or more annual distributions. All net capital gains realised will be accumulated.

Monthly Hedged to EUR – Acc share class: all amounts available for distribution are accumulated

Monthly Hedged to EUR – Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of distributable income in one or more annual distributions. all net capital gains realised will be accumulated.

Monthly Hedged to GBP - Acc share class: all amounts available for distribution are accumulated.

Monthly Hedged to GBP - Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of distributable income in one or more annual distributions. all net capital gains realised will be accumulated.

Monthly Hedged to CHF - Acc share class: all amounts available for distribution are accumulated.

Monthly Hedged to CHF - Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of distributable income in one or more annual distributions. all net capital gains realised will be accumulated.

Investment objective:

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the MSCI World ex EMU Select ESG Rating and Trend Leaders Net Total Return Index (hereafter the "Benchmark Index") denominated in USD, which is representative of the equity market performance of large and mid capitalisation companies of the non-eurozone developed countries that have achieved a minimum ESG rating based on environmental, social and governance criteria, while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The Sub-fund promotes environmental and/or social characteristics, pursuant to Article 8 of the SFDR Regulation. The expected ex-post tracking error, under normal market conditions, is 0.50%.

Benchmark index:

The Benchmark Index is the MSCI World ex EMU Select ESG Rating and Trend Leaders Net Total Return Index (with net dividends reinvested, i.e. the index's return includes the net dividends of its underlying equities).

The Benchmark Index is an equity index that is calculated and published by the global index provider MSCI. It has the following characteristics:

a) The same "Investment Universe" as that of the MSCI World ex EMU Index (the "Parent Index").

The Parent Index measures the overall performance of equity markets in the non-eurozone developed countries. It consists of a combination of several MSCI indices that represent all of the countries which MSCI classifies as "developed", excluding those within the eurozone, and covers approximately 85% of the market capitalisation of each of these countries. The weight of each component of the Parent Index is adjusted on the basis of its free float market capitalisation. The number of the securities in the Parent Index can consequently change over time.

b) The ESG approach

a. Certain sectors are excluded on the basis of ESG criteria: alcohol, gambling, tobacco, civilian firearms, nuclear energy, adult entertainment, genetically modified organisms, conventional and controversial weapons;

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

b. Certain economic activities are excluded due to their impact on climate change: ownership of fossil fuel reserves; extraction and production of thermal coal, unconventional and conventional oil and gas, and uranium; thermal coal, nuclear or fossil fuel power generation, and downstream oil and gas activities;

c. Companies involved in a major ESG controversy (as determined by MSCI's ESG controversy score) are excluded. The exclusions described in the three above paragraphs result in the "Eligible Universe".

d. Within the Eligible Universe, companies are ranked according to their ESG score and their ESG trend, which is the improvement or deterioration of their ESG score over one year. The MSCI ESG rating methodology is designed to measure a company's resilience to significant and enduring ESG risks within its sector. It is based on key non-financial ESG issues and focuses specifically on potential conflicts between a company's core business and the challenges that are specific to its sector and which may represent significant risks or opportunities. Key ESG issues are weighted according to its assessed impact and time horizon of the risk or opportunity. Some examples of such issues are water stress, carbon emissions, labour management and business ethics.

The Benchmark Index is constructed using a "best-in-class" approach, which means that the components selected are the highest rated companies in each sector of the Global Industry Classification Standard (GICS). To reduce turnover when the Benchmark Index is rebalanced, less restrictive screening filters are used for the securities that are already in the index.

The best-in-class approach seeks to favour the best performing companies within a given investment universe, sector or class. This best-in-class filter enables the Sub-fund to observe an active SRI approach that reduces the number of issuers in the Investment Universe by at least 20%.

The ESG process covers over 90% of the securities in the Benchmark Index.

c) The Benchmark Index is a free float adjusted market capitalisation index. The aggregate free float adjusted market capitalisation of the GICS sector is broadly proportional to that of the Parent Index.

d) An iterative underweighting process ensures that the carbon intensity and weighted average board independence are respectively lower and higher in the Benchmark Index than in the Parent Index. It also ensures that the Benchmark Index's exposure to each company does not exceed 15%.

The environmental and/or social characteristics promoted by the Sub-fund are assessed using the MSCI ESG rating methodology described above. Given the MSCI index calculation method and methodology the number of companies in the Benchmark Index may vary.

The Benchmark Index is a net total return index. A net total return index measures the performance of its components after including any dividends and other distributions and deducting any withholding tax.

The Benchmark Index construction methodology (including the rules that govern its reweighting and the modification of its constituents) may be found on MSCI's website at www.msci.com.

Benchmark index composition and revision

The Benchmark Indicator is revised quarterly in February, May, August and November to coincide with the quarterly revisions of the Parent Index on the same dates. Modifications are made at the end of February, May, August and November.

The Investment Universe and the Eligible Universe are updated during the quarterly reviews of the Benchmark Index. The precise composition of the Benchmark Index and its review rules are available on MSCI's website at www.msci.com. The frequency with which the Benchmark Index is rebalanced does not affect the cost of implementing the Investment Strategy.

Benchmark index publication

The Benchmark Index is published in real time on MSCI's website at <https://www.msci.com/>. The Benchmark Index's closing price is available on MSCI's website at <https://www.msci.com>.

Pursuant to European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, the administrator of the Benchmark Index the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Sub-fund's securities may consist of those that make up the Benchmark Index, as well as other international equities from all economic sectors, listed on all exchanges including small-cap exchanges.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralised.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index, particularly in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund can hold in its portfolio global equities in all economic sectors and listed on any exchange, including "small-cap" exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, including:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, and in particular with respect to:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector.

Investors may find more information on the above eligibility and diversification criteria on Lyxor's website at www.amundi.com

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets. The Sub-fund may invest in the shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or the value of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in subsection 1 of this section).

- Maximum proportion of assets under management for which total return swaps (TRS) may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps (TRS) may be entered into: up to 100%.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio or over the underlying assets of the derivative instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit up to 20% of its assets in the form of cash with credit institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager shall not engage in any securities financing transactions.

8. Financial guarantees

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. More specifically, all collateral received must meet the following conditions:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price.
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount is applied.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

(c) The collateral must be issued by an entity that is independent from the counterparty and must not be highly correlated with the counterparty's financial performance.

(d) The collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value.

(e) The Sub-fund's Management Company must be able to fully enforce the collateral at all times without the prior consultation or approval of the counterparty.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

(i) cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments

(ii) bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with

(iii) shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating

(iv) the shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below

(v) bonds issued or guaranteed by top-rated issuers that offer sufficient liquidity

(vi) shares admitted for trading or traded on a regulated market of an EU Member State, on a securities exchange of an OECD Member State, or on a securities exchange of a non-OECD country provided that the conditions of points (a) to (e) above are fully met and that these shares are a component of a leading stock index.

Collateral discount policy

The Sub-fund's management company shall apply a discount to the collateral accepted by the Sub-fund. The amount of this discount will depend on the following criteria:

- the type of asset provided as collateral
- the maturity of the asset provided as collateral (if relevant)
- the credit rating of the issuer of the asset provided as collateral (if relevant).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) deposited with an authorised institution

(ii) invested in high-quality government bonds

(iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

(iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com see our website at www.amundi.com

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

- Capital risk

The capital invested is not guaranteed. As a consequence, investor's capital is at risk. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volumes, to execute trades associated with the replication of the Benchmark Index may also adversely affect share subscription, conversion and redemptions.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of the Sub-fund's shares traded on a given exchange may be adversely affected by a suspension in trading for various reasons, such as:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk of investing in small and mid-cap companies

The Sub-fund is exposed to small and medium capitalisation companies and more specifically to the equity securities of small, medium and "intermediate" size enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalisation equities.

- Risk that the investment objective is not fully achieved

There is no guarantee of achieving the investment objective. Indeed, no asset or financial instrument allows for a continuous and automatic replication of the benchmark index, particularly if one or more of the following risks occurs:

- Derivatives risk

In order to secure the Benchmark Index returns and achieve its investment objective, the Sub-fund can enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These derivatives involve various risks, such as counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the Sub-fund's taxation. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund (and/or of the Sub-fund's DFI counterparty) may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of the Sub-fund's shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to this Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted.
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Currency risk associated with the Benchmark index

The Sub-fund is exposed to currency risk since the securities that underlie the Benchmark Index may be denominated in a different currency than the Benchmark Index, or be derivatives of securities that are denominated in a different currency than the Benchmark Index. Changes in exchange rates may therefore adversely impact the Sub-fund's Benchmark Index.

- Currency hedging risk on the Monthly Hedged to EUR – Acc , Monthly Hedged to EUR – Dist, Monthly Hedged to GBP - Acc, Monthly Hedged to GBP - Dist, Monthly Hedged to CHF - Acc and Monthly Hedged to CHF - Dist share classes:

To hedge the EUR currency risk (and respectively the GBP and CHF currency risk) against the currency of each of the securities that make up the Benchmark Index for the relevant Monthly Hedged share class, the Sub-fund will employ a hedging strategy that enables it to reduce the impact of a change in the exchange rate between the currency of each of the securities that make up the Benchmark Index and the currency of that share class. However, given the monthly adjustment of the hedging and the hedging instruments employed this does not necessarily ensure zero exposure to adverse market movements that may decrease the net asset value of the share class. The cost of hedging currency risk will also decrease the net asset value of the Monthly Hedged share classes.

- Sustainability risks

To manage sustainability risks, the Management Company relies on the Benchmark Index, whose methodology integrates sustainability risks by screening out certain securities in accordance with MSCI's rating methodology. This integration of these risks has a direct impact on the Benchmark Index's investment universe. However, there is no guarantee that sustainability risks will be eliminated and their occurrence could adversely affect the value of the Benchmark Index components. For more information on the Benchmark Index methodology you may refer to <https://www.msci.com>. Additional information is also available in the "Sustainability Information" section of the Prospectus.

Eligible investors and typical investor profile:

The Sub-fund is This Sub-fund is available to all investors.

Investors in this Sub-fund seek exposure to the financial performance of mid-cap and large-cap companies listed on developed country exchanges, excluding those of the eurozone countries.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

The amount that should reasonably be invested in this Sub-fund depends on the personal situation of each investor. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

“U.S. Persons” (as defined below - see “COMMERCIAL INFORMATION”) are not allowed to invest in this Sub-fund.

Subfund life on the year under review

Until 09/12/2023 the Fund's Benchmark Indicator was MSCI World ex EMU Select ESG Rating and Trend Leaders Net Total Return Index, from 09/13/2023 the Benchmark Indicator is MSCI WORLD ex EMU SRI FILTERED PAB Net USD.

On 11 october 2023, the fund changed its name from Lyxor MSCI World Ex EMU Leaders Extra UCITS ETF to Amundi MSCI World Ex EMU SRI Climate Net Zero Ambition PAB UCITS ETF.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi MSCI World Ex EMU SRI Climate Net Zero Ambition PAB UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the benchmark MSCI WORLD ex EMU SRI FILTERED PAB Net USD. This index aims to represent the performance of mid- and large-cap securities in developed markets outside the eurozone, selected based on environmental, social and governance criteria. For more information on the index, please visit www.msci.com.

From October 2022 to October 2023, the performance of the Acc share / FR0013209921 is 10.04%. That of the benchmark of 10.69% with a tracking error of 0.08%.

The performance achieved over the period does not prejudice the future results of the subfund.

Transparency of securities financing transactions and the reuse of financial instruments under the SFTR regulation (in the UCI's accounting currency)

Over the course of the reporting period, the UCI was not involved in any transactions governed by the Securities Financing Transactions Regulation (SFTR).

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 8 – Passive Portfolio Management – under the Taxonomy

In accordance with its investment objective and policy, the Fund promotes environmental characteristics within the meaning of Article 6 of the Taxonomy Regulation. It may partially invest in economic activities that contribute to one or more of the environmental objective(s) set out in Article 9 of the Taxonomy Regulation. However, the Fund does not currently make any commitment in terms of a minimum proportion.

The Taxonomy aims to identify economic activities considered to be environmentally sustainable. The Taxonomy identifies such activities according to their contribution to six major environmental objectives: (i) climate change mitigation, (ii) climate change adaptation, (iii) the sustainable use and protection of water and marine resources, (iv) the transition to a circular economy (waste, prevention and recycling) (v) pollution prevention and control, and (vi) the protection and restoration of biodiversity and ecosystems.

In order to determine an investment's degree of environmental sustainability, an economic activity is considered to be environmentally sustainable where it contributes substantially to one or more of the environmental objectives set out in the Taxonomy Regulation, where it does no significant harm (the "DNSH" principle) to one or more of these environmental objectives, where it is carried out in accordance with the minimum safeguards provided for in Article 18 of the Taxonomy Regulation and where it complies with the technical screening criteria established by the European Commission in accordance with the Taxonomy Regulation.

In accordance with the current iteration of the Taxonomy Regulation, the Asset Manager ensures that investments do no significant harm to any other environmental objective by implementing exclusion policies covering issuers with controversial environmental and/or social and/or governance practices.

Notwithstanding the preceding, the Do No Significant Harm principle is applied solely to the underlying investments incorporating European Union criteria for environmentally sustainable economic activities.

The investments underlying the remaining portion of this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Although the Fund may already hold investments in economic activities qualified as sustainable activities without currently undertaking to observe a minimum proportion, the Asset Manager is making every effort to disclose the proportion invested in sustainable activities as soon as it is reasonably possible after the entry into force of the Regulatory Technical Standards governing the content and presentation of disclosures in accordance with Articles 8(4), 9(6) and 11(5) of the Disclosure Regulation, as amended by the Taxonomy Regulation.

This effort will be gradually and continuously rolled out, incorporating the requirements of the Taxonomy Regulation in the investment process as soon as it is reasonably possible. As a result, a minimum degree of portfolio alignment with sustainable activities will be disclosed to investors at that time.

Until then, the degree of alignment with sustainable activities will not be disclosed to investors.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Once the data are fully available and the appropriate calculation methodologies finalised, the description of the proportion of underlying investments in sustainable activities will be disclosed to investors. This information, along with information on the proportion of enabling and transitional activities, will be indicated in a subsequent version of the prospectus.

Article 8 – Passive Portfolio Management – under Article 11 of SFDR

The subfund is classified in accordance with Article 8 of Regulation EU 2019/2088 known as “Disclosure” and aims to promote environmental and/or social characteristics.

During the period, the Manager of Sicav continuously promoted the environmental and/or social characteristics:

- Via the methodology of the replicated index which aims to obtain an ESG score higher than the ESG score of its parent index or of the universe eligible for the index, and.
- In its investment process, excluding all issuers mentioned in the exclusion list of the Responsible Investment Policy (unless specifically specified in the subfund Prospectus).

The compartment promotes the environmental characteristics as described in Article 8 of the Disclosure Regulation and may, during the relevant period, have partially invested in economic activities that have contributed to an environmental objective within the meaning of the Disclosure Regulation.

As required by Article 50 (2 SFDR) of COMMISSION DELEGATED REGULATION, information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;

- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;

- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

a) Exposure obtained through effective management techniques of the portfolio and derivative financial instruments

• Exposure obtained through effective management techniques:	-
- Securities lending:	-
- Securities borrowing:	-

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities. Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. The Management Company nevertheless reserves the right to value these instruments at their market price if they are particularly sensitive to any market risks (interest rate risk, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. The Management Company nevertheless reserves the right to value these instruments at their market price if they are particularly sensitive to any market risks (interest rate risk, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been adjusted, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage fees, stock market taxes etc.) and any account activity charges that may be charged, generally by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below).

- Incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives.
- Account activity charges, which are charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Outperformance fee (variable charges): amount of fees for the period **Amount**

Share class:

Acc share / FR0013209921 -

Retrocession of management fees:

- Amount of fees retroceded to the UCIT -

- Breakdown by "target" UCIT:

- Opc 1 -

- Opc 2 -

- Opc 3 -

- Opc 4 -

3.8. Commitments received and granted

- 3.8.1. Description of the guarantees received by the UCIT with mention of capital guarantees**none**
 3.8.2. Description of other commitments received and/or granted**none**

3.9. Other information

3.9.1. Current value of financial instruments pertaining to a temporary acquisition:

- Financial instruments as repurchase agreements (delivered) -
- Other temporary purchases and sales -

3.9.2. Current value of financial instruments comprising guarantee deposits:

Financial instruments received as a guarantee and not written to the balance sheet:

- equities -
- bonds -
- debt securities -
- other financial instruments -

Financial instruments granted as a guarantee and maintained in their original item:

- equities -
- bonds -
- debt securities -
- other financial instruments -

3.9.3. Financial instruments held as a portfolio issued by the entities related to the management company (funds) or financial managers (Mutual Funds) and UCITS managed by these entities:

- UCITS -
- other financial instruments -

Appendix

SFDR information

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi MSCI World Ex EMU SRI PAB Net Zero Ambition UCITS ETF
Legal entity identifier: 969500PPTV9AJJ02NE72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
Yes	No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.73% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product promoted environmental characteristics by reproducing, among other things, an index meeting the minimum standards of the "Paris Aligned Benchmark" (PAB) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

The Sub-fund promoted environmental and/or social characteristics by reproducing, among other things, an MSCI World ex EMU Select ESG Rating index and a Trend Leaders Net Total Return index meeting the minimum standards for EU Paris-Aligned Benchmarks (PAB) in accordance with Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

As at the end of the period, the MSCI ESG score for the index is: 8.186

● **...and compared to previous periods?**

During the previous period, the benchmark index's MSCI ESG rating was 7.564

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in companies that met two criteria:

1. follow best environmental and social practices; and
2. do not generate products and services that harm the environment and society.

The definition of a "best performing" company is based on a proprietary Amundi ESG methodology that is designed to measure a company's ESG performance. To be considered as the "best performing", a company must obtain the best rating among the top three (A, B or C, on a rating scale ranging from A to G) in its sector on at least one important environmental or social factor. Significant environmental and social factors are identified at the sector level. The identification of these factors is based on Amundi's ESG analysis framework, which combines extra-financial data with a qualitative analysis of the related sector and sustainability themes. Factors identified as material have a contribution of more than 10% to the overall ESG score. For the energy sector, for example, material factors are: emissions and energy, biodiversity and pollution, health and safety, local communities and human rights.

In order to contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticides, single-use plastic production) that are not compatible with these criteria.

The sustainable nature of an investment is assessed at the level of the investee company. Concerning external UCIs, the criteria for determining the sustainable investments that these underlying UCIs may hold and their objectives depend on each company's own management approach.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure that sustainable investments do not cause significant harm, Amundi uses two tests:

- The first “DNSH” (“Do No Significant Harm”) test is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Annex 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available (for example, the GHG intensity or greenhouse gas intensity of beneficiary companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. The carbon intensity of beneficiary companies is not within the sector’s last decile). Amundi already considers specific indicators of the Main Negative Impacts in its exclusion policy as part of the Amundi Responsible Investment Policy (e.g. exposure to controversial weapons). These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the UN Global Compact, coal and tobacco.
- In addition to the specific sustainability factors covered by the first filter, Amundi has defined a second filter that does not consider the mandatory indicators of the Main Negative Impacts above, so as to verify that a company’s overall environmental or social performance is not worse than other companies in its sector, corresponding to an environmental or social score of E or higher according to Amundi’s ESG rating system.

Concerning external UCIs, the consideration of the “do no significant harm” principle and the impact of sustainable investments depends on each underlying UCI manager’s own methodologies.

How were the indicators for adverse impacts on sustainability factors taken into account?

As detailed above, the negative impact indicators were taken into account in the first DNSH filter (Do No Significant Harm):

This is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available via the combination of the following indicators and specific thresholds or rules:

- has a CO2 intensity that is not within the last decile of companies in the sector (only applicable to high-intensity sectors), and
- has board diversity that is not within the last decile of companies in its sector, and
- is free from any controversy regarding working conditions and human rights
- is free from any controversy regarding biodiversity and pollution.

Amundi already takes into account the specific Negative Main Impacts in its exclusion policy as part of its Responsible Investment Policy. These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the United Nations Global Compact, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Yes. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights have been incorporated into Amundi’s ESG rating methodology. The proprietary ESG rating tool evaluates issuers using data available from data providers. For example, the model includes a dedicated criterion called “Community inclusion and Human rights” that is applied to all sectors in addition to other Human rights criteria, including socially responsible supply chains, working conditions and professional relations. In addition, we monitor controversies at least on a quarterly basis, which includes companies identified for Human rights violations. When controversies arise, analysts assess the situation and apply a score to the controversy (using an exclusive, proprietary rating methodology) and determine the best steps to follow. Controversy scores are updated quarterly to track trends and remediation efforts.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory indicators of the Negative Main Impacts set out in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 were taken into account by implementing exclusion policies (normative and sectoral) and integrating ESG rating into the investment process, engagement and voting approaches:

- Exclusion: Amundi has defined normative exclusion rules, by activity and by sector, covering some of the main sustainability indicators listed in the “Disclosure” Regulation.
- Engagement: engagement is an ongoing and targeted process aimed at influencing companies’ activities or behaviour. The objective of the engagement can be divided into two categories: engaging an issuer to improve the way in which it integrates the environmental and social dimension and engaging an issuer to improve its impact on environmental, social and Human rights issues or other sustainability issues that are important to society and the global economy.
- Voting: Amundi’s voting policy relies on a holistic analysis of all long-term issues that may influence value creation, including material ESG issues (Amundi’s voting policy can be consulted on its website).
- Monitoring controversies: Amundi has developed a controversy monitoring system that relies on three external data providers to systematically monitor controversies and their level of severity. This quantitative approach is then enhanced by an in-depth assessment of each severe controversy conducted by ESG analysts and a periodic review of its developments. This approach applies to all Amundi funds.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **from 01/11/2022 to 31/10/2023**

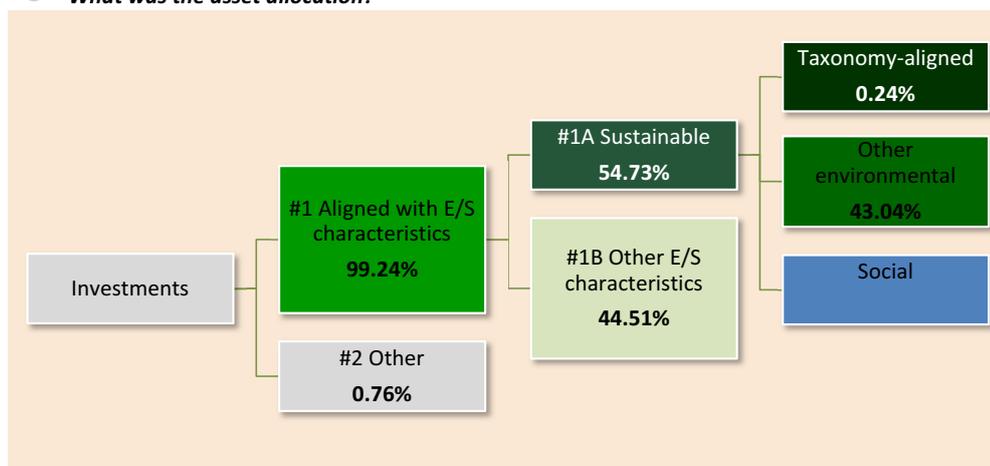

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information technologies	5.49%	USA
TESLA INC	Consumer discretionary	4.62%	USA

S&P GLOBAL INC	Finance	0.99%	USA
TORONTO-DOMINIO.BANK	Finance	0.97%	CAN

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sectors	% Assets
<i>Healthcare</i>	17.33%
<i>Finance</i>	15.71%
<i>Industry</i>	15.22%
<i>Information technologies</i>	13.99%
<i>Consumer discretionary</i>	13.90%
<i>Consumer staples</i>	6.17%
<i>Property</i>	5.30%
<i>Materials</i>	4.93%
<i>Communication services</i>	4.12%
<i>Utilities</i>	2.57%
<i>Forex</i>	0.00%
<i>Liquid capital</i>	0.76%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. Although the fund does not commit to making Taxonomy-aligned investments, it nevertheless invested 0.24% in Taxonomy-aligned sustainable investments during the period under review. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the aforementioned objectives of the EU taxonomy is measured using data on turnover (or revenue) and/or the use of green bond proceeds.

Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

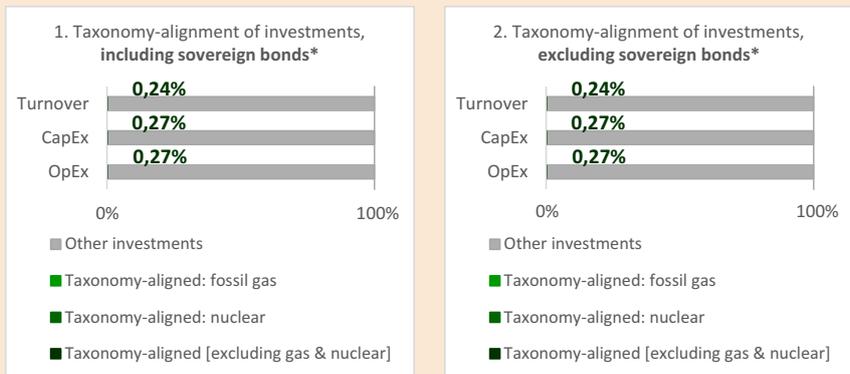

- Yes:
- In fossil gas
 - In nuclear energy
- No

Reliable data on alignment with the EU Taxonomy for fossil gas and nuclear energy was not available during the period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Using data relating to turnover and/or the use of green bond proceeds as an indicator, 0.00% of the fund's investments were in transitional activities and 0.23% of investments were in enabling activities as at 31/10/2023. Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Alignment with the EU taxonomy was not reported during the previous period because no reliable data was available at the time.

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the Taxonomy was **43.04%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR but some of their activities are not aligned with Taxonomy standards, or data is not yet available for them to perform such an assessment.

What was the share of socially sustainable investments?

The product does not commit to a minimum share of socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and/or other instruments held for liquidity and portfolio risk management purposes were included in category "#2 Other". For non-rated bonds and equities, minimum environmental and social guarantees are applied by filtering for controversial issues in relation to the principles of the United Nations Global Compact. Moreover, minimum environmental or social guarantees have not been defined.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimising the associated tracking error. The binding elements of the index methodology ensure that environmental and/or social characteristics are met at each rebalancing date. The product strategy is also based on systematic exclusion policies (normative and sectoral) as described in more detail in Amundi's responsible investment policy.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimising the associated tracking error.

How does the reference benchmark differ from a broad market index?

The MSCI World SRI Filtered PAB index is based on the MSCI World index representing the securities of large- and medium-cap companies in 23 developed market countries (the "parent index"). The index is designed to represent the performance of companies having high environmental, social, and governance (ESG) ratings compared those of their peers in the sector, so as to guarantee the inclusion of the best companies in their category from an ESG standpoint. In addition, the index aims to target sectoral weightings that reflect the relative situation of the sector. weightings of the underlying MSCI Global Investable Market indices to limit the systemic risk introduced by the ESG selection process. The index is designed to align with the minimum requirements of EU Paris Aligned Benchmarks (EU PABs).

AMUNDI MSCI WORLD EX EMU SRI CLIMATE NET ZERO AMBITION PAB UCITS ETF - Subfund of the Sicav Multi Units France

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimising the associated tracking error. The product's sustainability indicators are, consequently, generally aligned with those of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimising the associated tracking error. Consequently, the product's sustainability indicators showed an overall performance in line with that of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimising the associated tracking error. A comparison of the index replicated by the product with its parent index is detailed under "How did the sustainability indicators perform?".

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Global equities.

The Lyxor DJ Global Titans 50 UCITS ETF sub-fund (the “Sub-fund”) continuously maintains at least 60% exposure to one or more foreign equity markets, and possibly to the French equity market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Dist share classes: If a distribution is decided, the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of these amounts.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The investment objective of the Lyxor DJ Global Titans 50 UCITS ETF Sub-fund is to replicate the performance, whether positive or negative, of the Dow Jones Global Titans 50 Total Return index (the “Benchmark Index”) denominated in euros, while minimising the tracking error between the Sub-fund’s performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.05%.

Benchmark index:

The Benchmark Index is the Dow Jones Global Titans 50 Total Return index denominated in euros.

The Benchmark Index is a “Total Return” index, i.e. the dividends from the Benchmark Index constituents are reinvested.

The Benchmark Index is a capitalisation-weighted index of global multi-national companies that replicates the performance of the world’s 50 largest companies selected from 18 sectors. Nine countries are represented in the index.

The stocks are selected by Dow Jones on the basis of the following four criteria:

- relatively low risk and share price volatility
- global leadership in their sector
- earnings stability
- broad global diversification.

The Benchmark Index is published by Dow Jones from Monday to Friday and was the first global index on which futures were traded. The performance tracked is that of the closing prices of the equities that make up the Benchmark Index.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at <https://us.spindices.com>.

Benchmark Index publication

The Benchmark Index’s closing price is available on the Internet at <https://us.spindices.com>.

The administrator of the Benchmark Index is S&P DJI LLC.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA’s register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

Benchmark Index composition and revision

The Benchmark Index components are revised quarterly by DJI Opco, LLC.

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

The exact composition of the Benchmark Index and Dow Jones rules for index rebalancing are available on the internet at <https://us.spindices.com>.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The securities in which the Sub-fund may invest include those that make up the Benchmark Index, and also other international equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a single issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering affecting any of the securities that make up the Benchmark Index or in the event of a significant restriction of liquidity affecting one or more financial instruments in the Benchmark Index.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
- their inclusion in a major stock exchange index or in the Benchmark Index
- liquidity (must exceed a minimum daily trading volume and market capitalisation)
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
- the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
- geography
- sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law. To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

(c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;

(d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;

(e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

(i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments

(ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with

(iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating

(iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below

(v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity

(vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) deposited with an authorised institution

(ii) invested in high-quality government bonds

(iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

(iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the delegated asset manager. These instruments are subject to market trends and contingencies.

Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default.

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost

v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted

vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Benchmark Index currency risk

The Sub-fund is exposed to currency risk, as the underlying securities composing the Benchmark Index may be denominated in a currency that is different from that of the Benchmark Index, or be derived from securities denominated in a currency different to that of the Benchmark Index. Exchange rate fluctuations can therefore have a negative impact on the Benchmark Index tracked by the Sub-fund.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this sub-fund are seeking exposure to global equity markets.

The amount that you may reasonably invest in this sub-fund depends on your personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Lyxor DJ Global Titans 50 UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the Dow Jones Global Titans 50 EUR benchmark index. The Dow Jones Global Titans 50 EUR index is comprised of the top 50 global companies selected from 18 sectors. Shares are selected by Dow Jones based on four criteria: relatively low risk and price volatility, established global leadership in their sector, stable earnings power and broad global diversification. The index methodology is available at www.djindexes.com.

From October 2022 to October 2023, the performance of the Dist share / FR0007075494 is 12.29%. That of the benchmark of 12.85% with a tracking error of 0.02%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Number of custodians	-
1 Denomination	-
Amount	-

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

LYXOR DJ GLOBAL TITANS 50 UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- Incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Unit capitalisation*

- - - - -

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

The Lyxor SMI Daily (-2x) Inverse UCITS ETF sub-fund (the “Sub-fund”) is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

All distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to give inverse exposure with daily 2x leverage (positive or negative) to the Swiss equity market, by replicating the movement of the SMI Daily Short Leverage index (the “Benchmark Index”), while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The SMI Daily Short Leverage Benchmark Index replicates the inverse of the performance of the SMI® Swiss Market Index Total Return (the “Parent Index”) with a 2x daily leverage effect, which means that if underlying index increases 2% on a given day, the leveraged index will decrease 4%, less the borrowing costs for that day, and vice-versa.

The expected ex-post tracking error under normal market conditions is 0.15%.

Benchmark index:

The Benchmark Index is the SMI Daily Short Leverage strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying equities) denominated in Swiss francs (CHF).

The Benchmark Index is index defined and calculated by SIX Swiss Exchange SA.

The Benchmark Index provides daily inverse exposure to increases and decreases in the Parent Index with a daily double leverage effect. Therefore, if the Parent Index decreases on a given day, the Sub-fund's net asset value will increase by twice as much that day, and conversely, if the Parent Index increases on a given day, the Sub-fund's net asset value will decrease by twice as much that day and investors will not benefit from the increase in the Parent Index.

The Parent Index is capitalisation-weighted with free-float adjustment. It covers 20 of the largest and most liquid shares which represent about 85% of the total capitalisation of the Swiss equity market. The index is calculated in real time in Swiss francs and is available at www.six-swiss-exchange.com.

The performance of the Benchmark Index is equal to double the inverse daily performance of the Parent Index, together with total interest (SAR Swiss Average Rate On® paid daily on 3x the closing value of Parent Index. It is therefore constitutes a short position strategy against the Parent Index, with 2x leverage and daily rebalancing. Additional rebalancing will be performed during the session if the Parent Index rises by more than 25% during a trading day in relation to the previous closing price of the preceding trading day.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at http://www.six-swiss-exchange.com/indices/data_centre/strategy_indices/leveraged_indices_en.html and http://www.six-swiss-exchange.com/indices/data_centre/shares/smi_family_fr.html

The monitored performance is based on the closing prices of the index in Swiss francs.

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed.

The closing price of the Benchmark Index is available on the Internet at https://www.six-group.com/exchanges/indices/data_centre/index_overview.html.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The composition of the SMI Daily Short Leverage index is dependent on the revision of the Benchmark Index.

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The revision of the Benchmark Index's composition is dependent on the composition of the Parent Index. The Parent Index is revised daily.

The exact composition of the Parent Index and SIX Swiss Exchange's rules for revising its composition, and consequently that of the Benchmark Index are available on the Internet at https://www.six-group.com/exchanges/indices/data_centre/index_overview.html.

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Sub-fund's securities may include the securities that make up the Parent Index, as well as other international equities across all economic sectors, listed on any exchange, including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit will be checked on each Benchmark Index rebalancing date, using the Benchmark Index calculation method which limits exposure to a given issuer's equities to 20%, this calculation being performed by the Benchmark Index sponsor or calculation agent. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including "small-cap" exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
- their inclusion in a major stock exchange index or in the Benchmark Index
- liquidity (must exceed a minimum daily trading volume and market capitalisation)
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- diversification criteria, in particular regarding:
- the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
- geography
- sector

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.amundi.com.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets. In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

(iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are inversely exposed to two times the daily change in the price or level of the Parent Index. Most notably, any increase in the underlying market will be inversely amplified and will imply a larger decrease in the Sub-fund's net asset value. The daily readjustment in the underlying 'double short' index formula implies that the Sub-fund's performance will not be equivalent to two times the inverse performance of the Parent Index exposure for holding periods greater than one business day. For example, if the Parent Index increases 10% on a given business day and then decreases of 5% the following business day, the Sub-fund's net asset value will decline by 12% (before the deduction of relevant fees) over these two days, while the Parent Index will have risen 4.5% over the same period.

If the Parent Index falls 5% per day over two consecutive business days, it will have decreased a total of 9.75%, whereas the Sub-fund will have gained a total of 21% over this period (before the deduction of relevant fees).

Negative scenario 1

The Parent Index increases and the leverage effect is negative is greater than 2

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10 %	110	-20 %	80	x-2
Day 2	-5 %	104.5	10 %	88	x-2
Total return	4.50 %		-12.00 %		x-2.67

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 2

The Parent Index decreases and the leverage effect is negative is less than 2

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-10 %	90	20 %	120	x-2
Day 2	6 %	95.4	-12 %	105.6	x-2
Total return		-4.60 %		5.60 %	x-1.22

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may decline over this period even though the Parent Index has also declined.

Inverse leverage scenario

The leverage effect is positive over the period

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	5 %	105	-10 %	90	x-2
Day 2	-5 %	99.75	10 %	99	x-2
Total return		-0.25 %		-1.00 %	x4

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps, in order to achieve the performance of the Benchmark Index. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund seek exposure to the Swiss equity market, with a leverage effect of + or - 2.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks. Given the speculative nature of this Sub-fund it may not be suitable for investors with a medium to long-term investment horizon.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. "U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund life on the year under review

On 11 October 2023, the fund changed its name from LYXOR SMI DAILY (-2X) INVERSE UCITS ETF to AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi SMI Daily (-2x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the SMI Daily Short Leverage benchmark index. The SMI Daily Short Leverage strategy index offers inverse exposure, adjusted upward or downward on a daily basis, to the performance of the SMI index. As such, in the event of a decline in the SMI index on a trading day, the fund's net asset value will increase on the same trading day and, in the event of an increase in the SMI index on a trading day, the fund's net asset value will fall on the same trading day and unitholders will not benefit from the rise in the SMI index.

From October 2022 to October 2023, the performance of the Acc share / FR0010869438 is 1.46%. That of the benchmark of 1.64% with a tracking error of 0.04%.

The performance achieved over the period does not prejudice the future results of the subfund.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI SMI DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- Incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS or alternative investment funds

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Calculation and allocation of distributable amounts:

I- USD share class: the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of these amounts.

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to give inverse exposure (positive or negative), with double daily leverage, to the German equity market, by replicating the performance of the ShortDAX x2 benchmark index (the "Benchmark Index"), while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index. The Benchmark Index replicates the inverse performance of the DAX® index (the "Parent Index") with a daily double inverse leverage effect. This means that if underlying index increases 2% on a given day, the leveraged index will decrease 4%, less the borrowing costs for that day, and vice-versa.

The expected ex-post tracking error under normal market conditions is 0.15%.

Benchmark index:

The Benchmark Index is the ShortDAX x2 strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying equities) denominated in euros (EUR).

The Benchmark Index is constructed and calculated by Deutsche Börse AG.

The Benchmark Index provides daily inverse exposure to increases and decreases in the Parent Index with a daily double leverage effect. Therefore, if the Parent Index decreases on a given day, the Sub-fund's net asset value will increase by twice as much that day, and conversely, if the Parent Index increases on a given day, the Sub-fund's net asset value will decrease by twice as much that day and investors will not benefit from the increase in the Parent Index.

The Parent Index is composed of the 30 largest German stocks. These companies are the most actively traded stocks on the Frankfurt stock exchange. The Frankfurt stock exchange accounts for 85% of German stock trading volume and 35% of European trading volume. The index methodology is available at <http://www.dax-indices.com>.

The performance of the Benchmark Index is equal to double the inverse daily performance of the Parent Index, together with total interest paid daily on 3x the Parent Index's closing value.

It therefore constitutes a short position strategy against the Parent Index, with 2x leverage and daily rebalancing. Further rebalancing during a trading session is possible if the Benchmark Index loses more than 50% during a Trading Day.

The Parent Index is free-float market capitalisation-weighted and measures the performance of the 30 largest stocks on the Frankfurt stock exchange.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.russell.com. <https://www.dax-indices.com/indices>

The performance tracked is that of the index's closing price in euros.

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The closing price of the Benchmark Index is available on the internet at <http://www.dax-indices.com>

The administrator of the Benchmark Index is STOXX Limited.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Benchmark Index composition and revision

The revision of the Benchmark Index's composition is dependent on the composition of the Parent Index. The Parent Index is revised daily.

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The exact composition of the Parent Index and Deutsche Börse AG's rules for revising its composition, and consequently that of the Benchmark Index are available on the Internet at <https://www.dax-indices.com/indices>.

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The securities in which the Sub-fund may invest include those that make up the Benchmark Index, and also other international equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a single issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering affecting any of the securities that make up the Benchmark Index or in the event of a significant restriction of liquidity affecting one or more financial instruments in the Benchmark Index.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector

Investors may find more information on the above eligibility and diversification criteria on Lyxor's website at www.amundi.com.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Investment in undertakings for collective investment in transferrable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund’s net assets. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund’s management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund’s equity assets (or the value of any other financial instrument the Sub-fund may hold) for the value of the Benchmark Index (as described in section 1 above).

To optimise the Sub-fund’s management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.

- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

A counterparty to derivative financial instruments (the “Counterparty”) will have no discretion over the composition of the Sub-fund’s portfolio nor over the underlying assets of the derivative financial instruments.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company’s conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depository.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund’s counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund’s counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund’s account with the depository. This collateral will therefore be included in the Sub-fund’s assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

(a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or “haircut” is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty’s financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund’s net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund’s Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund’s assets. In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund’s Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral’s maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager’s discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time
- (iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are inversely exposed to two times the daily change in the price or level of the Parent Index. Most notably, any increase in the underlying market will be inversely amplified and will imply a larger decrease in the Sub-fund's net asset value. The daily readjustment in the underlying 'double short' index formula implies that the Sub-fund's performance will not be equivalent to two times the inverse performance of the Parent Index exposure for holding periods longer than one business day.

For example, if the Parent Index increases 10% on a given business day and then decreases of 5% the following business day, the Sub-fund's net asset value will decline by 12% (before the deduction of relevant fees) over these two days, while the Parent Index will have risen 4.5% over the same period.

If the Parent Index falls 5% per day over two consecutive business days, it will have decreased a total of 9.75%, whereas the Sub-fund will have gained a total of 21% over this period (before the deduction of relevant fees).

Negative scenario 1

The Parent Index increases and the leverage effect is negative and greater than 1

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10 %	110	-10 %	90	x-1
Day 2	-8 %	101.2	8 %	97.2	x-1
Total return	1.20 %		-2.80 %		x-2.33

Negative scenario 2

The Parent Index decreases and the leverage effect is negative and less than 1

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-10 %	90	10 %	110	x-1
Day 2	6 %	95.4	-6 %	103.4	x-1
Total return	-4.60 %		3.40 %		x-0.74

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may decline over this period even though the Parent Index has also declined.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Inverse leverage scenario

The leverage effect is positive over the period

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	5 %	105	-5 %	95	x-1
Day 2	-5 %	99.75	5 %	99.75	x-1
Total return	-0.25 %		-0.25 %		x1

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps, in order to achieve the performance of the Benchmark Index. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted

vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund will be inversely exposed (both positively and negatively) to the German equity market with 2x leverage.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

Given the speculative nature of this Sub-fund it may not be suitable for investors with a medium to long-term investment horizon. All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor Daily ShortDAX x2 UCITS ETF to Amundi ShortDAX Daily (-2x) Inverse UCITS ETF.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi ShortDAX Daily (-2x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the SHORTDAX X2 INDEX benchmark index. The objective of the SHORTDAX X2 INDEX is to deliver twice the inverse performance of the DAX[®] index on a daily basis and taking into account dividends. This strategy allows investors to take advantage of a bear market.

From October 2022 to October 2023, the performance of the Acc share / FR0010869495 is -18.49%. That of the benchmark of -18.37% with a tracking error of 0.02%.

The performance achieved over the period does not prejudice the future results of the subfund.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds. Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.

Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.

The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

AMUNDI SHORTDAX DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives . They are therefore charged to the Sub- fund
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS or alternative investment funds.

Accounting currency

The Sub-fund's accounts are kept in euros.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

Details of the type of errors that have been corrected during the period

None.

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Eurozone country equities.

The Lyxor Ibex 35 Doble Apalancado Diario UCITS ETF sub-fund (the "Sub-fund") continuously maintains at least 60% exposure to the equity markets of one or more eurozone countries, including the French equity market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to gain exposure with 2x daily leverage (positive or negative) to the Spanish equity market, by replicating the performance of the IBEX 35[®] DobleApalancadoNeto strategy index (see "Benchmark Index"), denominated in euros (EUR), while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.10%.

Benchmark index:

The Sub-fund's Benchmark Index is the IBEX 35[®] DobleApalancadoNeto strategy index including any dividends the Sub-fund may receive from holding stocks in the Benchmark Index.

The Benchmark Index is an equity strategy index that is calculated, maintained and published by Sociedad de Bolsas. The Benchmark Index provides exposure with daily 2x leverage to increases and decreases in the IBEX 35[®] index (hereinafter the "Parent Index"). This means that if the Parent Index rises on a day that the net asset value is calculated, the Sub-fund's net asset value will increase by twice the amount of the increase on that day, and conversely, if the Parent Index decreases on a day that the net asset value is calculated, the Sub-fund net asset value will decline by twice the amount of the decrease on that day.

The Parent Index is the main benchmark index of the Madrid stock exchange and is composed of the 35 most actively traded stocks in the Spanish market. The Parent Index is weighted by float-adjusted market capitalisation.

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed.

A full description and the complete methodology used to construct the Benchmark Index and the respective weightings of the Benchmark Index components are available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>.

The performance tracked is that of the Benchmark Index's closing price.

Benchmark Index publication

The closing price of the Benchmark Index is available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>. The administrator of the Benchmark Index is Sociedad de Bolsas.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The revision of the Benchmark Index's composition is dependent on the composition of the Parent Index. The Parent Index is revised every six months.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The exact composition of the Benchmark Index and the rules for its rebalancing are available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

The frequency of the aforementioned rebalancing does not affect the cost of implementing the Investment Strategy

The advantage of the "Leverage" strategy

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Index. By borrowing securities, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Index rises, the gain on a given day will be twice as much as with a "single" investment in the Parent Index. However, in a bear market the multiplier effect of the leverage also doubles losses on a daily basis. The daily multiplier effect also affects the risks of the overall investment strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

The Securities in the Sub-fund's portfolio may include those that make up the Parent Index, as well as other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The Sub-fund's equity assets will be chosen so as to limit the cost of replicating the Benchmark Index.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a single issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering affecting any of the securities that make up the Benchmark Index or in the event of a significant restriction of liquidity affecting one or more financial instruments in the Benchmark Index.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

- geography
- sector

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.amundi.com.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets (or of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10 % of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets. In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (i) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (ii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iii) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (iv) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (v) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

(iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

(iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

The Sub-fund has a high equity risk.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Daily leverage reset risk

Investors are exposed to twice the daily change in the price or level of the Parent Index. They should note in particular that a decline in the underlying market will be amplified and will result a larger decrease in the Sub-fund's net asset value. Since the leverage in the Benchmark Index formula is reset daily the Sub-fund will not return twice as much as the Parent Index over a period of more than one trading day.

For example, if the Parent Index gains 10% on a given trading day and then declines 5% the next trading day, the Sub-fund will have gained of 8% (before fees) over these two days, while the Parent Index will have gained a total of 4.5%.

If the Parent Index loses 5% a day over two consecutive trading days, the Sub-fund will have lost 19% (before fees) over this period while the Parent Index will have lost 9.75%.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 1

The leverage effect is greater than 2 and the Parent Index decreases

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10 %	110	20 %	120	x2
Day 2	-11 %	97.9	-22 %	93.6	x2
Total return	-2.10 %		-6.40 %		x3.05

Negative scenario 2

The leverage effect is less than 2 and the Parent Index increases

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-5 %	95	-10 %	90	x2
Day 2	6 %	100.7	12 %	100.8	x2
Total return	0.70 %		0.80 %		x1.14

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may even fall although the Parent Index increases over this period.

Inverse leverage scenario

The leverage effect is negative over the period

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	20 %	120	40 %	140	x2
Day 2	-16 %	100.8	-32 %	95.2	x2
Total return	0.80 %		-4.80 %		x-6

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective is not fully achieved

There is no guarantee of achieving the investment objective. There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective, the Sub-fund may enter into over-the-counter derivative financial instruments ("DFI"), such as swaps, in order to achieve the performance of the Benchmark Index. In order to achieve its investment objective, the Sub-fund may enter into over-the-counter derivative financial instruments ("DFI"), such as swaps, in order to achieve the performance of the Benchmark Index. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) the index provider makes a material change in the formula for or the method of calculating the Benchmark Index (other than a minor modification such as an adjustment to the Benchmark Index's underlying assets or the respective weightings among its components) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund are seeking exposure with 2x leverage to the performance of the Spanish equities market, whether positive or negative.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements at present and for the next five years, and their willingness to take on risk or adopt a more cautious approach. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor IBEX 35 Doble Apalancado Diario UCITS ETF to Amundi IBEX 35 Doble Apalancado Diario (2x) UCITS ETF.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi IBEX 35 Doble Apalancado Diario (2x) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the IBEX 35 Double Lev Net benchmark index. The IBEX 35 Double Lev Net strategy index offers exposure with x2 leverage, adjusted upward or downward on a daily basis, to the IBEX 35 index. As such, in the event of an increase in the IBEX 35 index on a trading day, the fund's net asset value will increase twice on the same trading day and, in the event of a decline in the IBEX 35 index on a trading day, the fund's net asset value will fall twice on the same trading day.

From October 2022 to October 2023, the subfund performance is 30.72%. That of the benchmark of 30.73% with a tracking error of 0.08%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

* In the year ended 10/31/2022, the composition of the portfolio was changed, the use of transactions which have been interrupted.

This restructuring leads to a significant variation in the difference in the estimate on financial contracts between the two financial years (-76,470,503.60 euros), thus justifying the negative balance of capital at 10/31/2022.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.

Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.

- Securities financing transactions are valued at the market price.

Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated. Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.

- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

AMUNDI IBEX 35 DOBLE APALANCADO DIARIO (2X) UCITS ETF

Subfund of the Sicav Multi Units France

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Subfund features

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to give inverse exposure with daily 2x leverage (positive or negative) to the Spanish equity market, by replicating the performance of the IBEX 35[®] DOBLE INVERSO strategy index (the "Benchmark Index"), denominated in euros (EUR), whether positive or negative, while minimising the tracking error between the Sub-fund's performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.15%.

Benchmark index:

The Benchmark Index is the IBEX 35[®] DOBLE INVERSO TOTAL RETURN strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying equities).

The Benchmark Index is an equity strategy index that is calculated, maintained and published by Sociedad de Bolsas. The Benchmark Index provides inverse exposure with daily 2x leverage to increases and decreases in the IBEX 35[®] index (the "Parent Index"). Accordingly, if the Parent Index rises by a given amount on a given trading day, the Sub-fund's net asset value will decrease by twice that amount that day, and shareholders will not profit from the increase in the Parent Index.

The Parent Index is the main benchmark index of the Madrid stock exchange and is composed of the 35 most actively traded stocks in the Spanish market. The Parent Index is weighted by float-adjusted market capitalisation.

A full description of the Benchmark Index and its construction methodology, and information on the composition and respective weightings of the Benchmark Index components, are available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>.

The performance tracked is that of the Benchmark Index's closing price in euros

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every day that the Benchmark Index is published.

The closing price of the Benchmark Index is available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/2011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The revision of the Benchmark Index's composition is dependent on the composition of the Parent Index. The Parent Index is revised every six months.

The double inverse leverage factor used in calculating the Benchmark Index is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

The exact composition of the Benchmark Index and the rules for its revision are available on the Internet at <http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Parent Index, as well as other international equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a single issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering affecting any of the securities that make up the Benchmark Index or in the event of a significant restriction of liquidity affecting one or more financial instruments in the Benchmark Index.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund's assets (or of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depository.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

(d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;

(e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets. In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

(i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments

(ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with

(iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating

(iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below

(v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity

(vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) deposited with an authorised institution

(i) invested in high-quality government bonds

(ii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time

(iii) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default.

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are inversely exposed to two times the daily change in the price or level of the Parent Index. Therefore, any appreciation of the underlying market will be inversely amplified and will result a sharper depreciation of the Sub-fund's net asset value. The daily leverage reset in the underlying "double short" strategy index formula means that the Sub-fund's performance will not be equivalent to two times the inverse performance of the Parent Index for holding periods greater than one business day.

For example, if the Parent Index gains 10% on a given business day and then loses 5% the following business day, the Sub-fund will decline a total of 12% (before deduction of relevant fees) over the two business days, while the Parent Index will have gained 4.5% over this period.

If the Parent Index decreases 5% per day over two consecutive business days, the Sub-fund will gain a total of 21% (before deduction of relevant fees), while the Parent Index will have lost 9.75% over this period.

Negative scenario 1

The Parent Index increases and the leverage effect is negative is greater than 2

	Parent Index		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	10%	110	20%	80	x-2
Day 2	-5%	104.5	-10%	88	x-2
Total return	4.50%		-12%		x-2.67

Negative scenario 2

The Parent Index decreases and the leverage effect is negative is less than 2

	Parent Index		Benchmark Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
		100		100	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

	Parent Index		Benchmark Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
Total return	-4.60%		5.60%		x-1.22

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may decline over this period even though the Parent Index has also declined.

Inverse leverage scenario

The leverage effect is positive over the period

	Parent Index		Benchmark Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	5%	105	-10%	90	x-2
Day 2	-5%	99.75	10%	99	x-2
Total return	-0.25%		-1.00%		x4

- Risk that the Sub-fund does not fully achieve its investment objective:

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares.

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the formula for or the method of calculating the Benchmark Index (other than a minor modification such as an adjustment to the Benchmark Index's underlying assets or the respective weightings among its components) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors .

Investors in this Sub-fund are seeking inverse exposure (positive or negative), with x2 leverage, to the Spanish equity market.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

Given the speculative nature of this Sub-fund it may not be suitable for investors with a medium to long-term investment horizon "U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi IBEX 35 Doble Inverso Diario (-2x) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the IBEX 35 Double Short benchmark index. The IBEX 35 is an index comprised of the 35 most liquid shares traded on the Spanish market. It is weighted by market capitalisation and adjusted according to the liquidity of each company included in the index. The index methodology is available at www.bolsamadrid.es.

From October 2022 to October 2023, the subfund performance is -27.56%. That of the benchmark of -27.13% with a tracking error of 0.04%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

* During the year ended 10/31/2022, the composition of the portfolio was modified, as the use of temporary operations was discontinued.

This restructuring led to a significant change in the difference in the estimate on financial contracts between the two financial years (-25,043,899.89 euro), thus justifying the negative balance of capital at 10/31/2022.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI IBEX 35 DOBLE INVERSO DIARIO (-2X) UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives. They are charged to the Sub-fund.
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are actually charged to the Sub-fund see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in EUR.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Global equities.

The Lyxor Nasdaq-100 Daily (2x) Leveraged UCITS ETF sub-fund (the “Sub-fund”) continuously maintains at least 60% exposure to one or more foreign equity markets, and possibly to the French equity market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund’s investment objective is to provide exposure to the performance of the US equity market, whether positive or negative, by replicating the movement of the NASDAQ-100 Leveraged Notional Net Return strategy index (the “Benchmark Index”) denominated in US dollars (USD) , while minimising the tracking error between the Sub-fund’s performance and that of the Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.15%.

Benchmark index:

The Benchmark Index is the NASDAQ-100 Leveraged Notional Net Return strategy index (i.e. with net dividends reinvested), which means that the Benchmark Index’s performance includes the net dividends paid by its underlying shares.

The Benchmark Index was created by NASDAQ OMX Group, Inc. and is calculated and maintained by S&P.

The Benchmark Index is a strategy index that tracks the performance of the NASDAQ-100 (NDX) index (the “Parent index”) with a daily 2x leverage effect, which means that if the Parent Index rises or falls by 2% on a given trading day, the Benchmark Index will respectively rise or fall by 4% on that same day, less the cost of borrowing securities. This double leverage effect is achieved by borrowing securities to double the investment in the stocks that make up the Parent Index. The cost of this borrowing is included in the calculation of the Benchmark Index.

The Benchmark Index is a subset of the Parent Index. The Parent Index is a U.S. technology index that provides a benchmark for the U.S. technology sector.

It is composed of 100 securities and includes the largest companies by market capitalisation in the following sectors: Internet software and services, IT services and consultancy, software, electronic hardware and instruments, office electronics and semi-conductors.

The NASDAQ-100 Leveraged Notional Net Return Benchmark Index was created on 18 November 2009.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at <https://indices.nasdaqomx.com/>

The performance tracked is that of the Benchmark Index’s closing price in USD.

Benchmark index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every day that the Benchmark Index is published.

The Benchmark Index’s closing price is available on the Internet at <https://indices.nasdaqomx.com/>

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, the benchmark index administrator is listed in ESMA’s register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Benchmark index composition and revision

The composition of the Benchmark Index is revised in conjunction with the revision of the Parent Index. The Parent Index is revised quarterly.

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The exact composition of the Parent Index and NASDAQ OMX Group Inc. rules for revising this index, and consequently the Benchmark Index, are available on the Internet at <https://indices.nasdaqomx.com/>

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

The advantage of the "leverage" strategy

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Index. By borrowing securities, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Index rises, the gain on a given day will be twice as much as with a "single" investment in the Parent Index. However, in a bear market the multiplier effect of the leverage also doubles losses on a daily basis. The daily multiplier effect also affects the risks of the overall investment strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Parent Index, as well as other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

The Sub-fund will at all times invest at least 75% of its assets in companies having their registered office in a Member State of the European Union or in another country that is a member of the European Economic Area and which have signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit will be checked on each Benchmark Index rebalancing date using the Benchmark Index calculation method which limits exposure to a given issuer's equities to 20%, this calculation being performed by the Benchmark Index sponsor or calculation agent. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
- geography
- sector

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets (or of any other financial instrument or asset the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

To optimise the Sub-fund's management and achieve its investment objective, the manager reserves the right to use other instruments in accordance with the applicable regulations, such as derivative instruments other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments.

When Société Générale is a counterparty to the aforementioned derivative instrument transactions involving, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depository.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;

such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets. In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- deposited with an authorised institution
- invested in high-quality government bonds
- used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time
- invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

The Sub-fund may be exposed to a legal risk arising from a total return swap (TRS) agreement as indicated in EU Regulation NO. 2015/2365. They should note in particular that a decline in the underlying market will be amplified and will result a larger decrease in the Sub-fund's net asset value. Since the leverage in the Benchmark Index formula is reset daily the Sub-fund will not return twice as much as the Parent Index over a period of more than one trading day.

For example, if the Parent Index gains 10% on a given trading day and then declines 5% the next trading day, the Sub-fund will have gained of 8% (before fees) over these two days, while the Parent Index will have gained a total of 4.5%. If the Parent Index loses 5% a day over two consecutive trading days, the Sub-fund will have decreased a 19% (before fees) over this period while the Parent Index will have lost 9.75%.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 1	The leverage effect is greater than 2 and the Parent Index decreases				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	10%	110	20%	120	x2
Day 2	-11%	97.9	-22%	93.6	x2
Total return	-2.10%		-6.40%		x3.05

Negative scenario 2	The leverage effect is less than 2 and the Parent Index increases				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	-5%	95	-10%	90	x2
Day 2	6%	100.7	12%	100.8	x2
Total return	0.70%		0.80%		x1.14

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may even fall although the Parent Index increases over this period.

Inverse leverage scenario	The leverage effect is negative over the period				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	20%	120	40%	140	x2
Day 2	-16%	100.8	-32%	95.2	x2
Total return	0.80%		-4.80%		x-6

- Risk that the investment objective is not fully achieved

There is no guarantee of achieving the investment objective. There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. This DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Index currency risk

The Sub-fund is exposed to currency risk, as the underlying securities composing the Benchmark Index may be denominated in a currency that is different from that of the Benchmark Index, or be derived from securities denominated in a currency different to that of the Benchmark Index. Exchange rate fluctuations can therefore have a negative impact on the benchmark index the Sub-fund tracks.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund are seeking exposure to the performance of the US equity market, whether positive or negative.

The amount that you may reasonably invest in this sub-fund depends on your personal situation.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF Subfund of the Sicav Multi Units France

To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements at present and for the next five years, and their willingness to take on risk or adopt a more cautious approach. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor Nasdaq-100 Daily (2x) Leveraged UCITS ETF to Amundi Nasdaq-100 Daily (2x) Leveraged UCITS ETF.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi Nasdaq-100 Daily (2x) Leveraged UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark Nasdaq 100 Leveraged Notional Net Total Return Index. The Nasdaq 100 Leveraged Notional Net Total Return Index is a strategy index that reflects the performance of the NASDAQ-100 Index (NDX) with a daily 2x leverage, i.e. if the underlying index increases by 2% on a trading day, the leveraged index increases by 4% on the same trading day, minus borrowing costs, and vice versa. The dual performance is obtained by doubling, on each trading day, the investment, via a loan, in the basket of equities of the index. The cost of borrowing is taken into account in the calculation of the Nasdaq 100 Leveraged Notional Net Total Return Index.

From October 2022 to October 2023, the subfund performance is 35.89%. That of the benchmark of 36.97% with a tracking error of 0.06%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Number of custodians	-
1 Denomination	-
Amount	-

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-und, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are actually charged to the Sub-fund see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Unit capitalisation ⁽²⁾	160.25	-358.79	378.56	195.86	50.47

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

⁽²⁾ The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

Subfund creation date: April 19, 2018.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

International equities.

The Sub-fund is a passively managed index-tracking fund.

The Lyxor Russell 1000 Growth UCITS ETF sub-fund (the "Sub-fund") continuously maintains at least 60% exposure to one or more foreign equity markets, and possibly to the French equity market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Dist share class: the Board of Directors reserves the right to accumulate and/or distribute all or part of distributable income in one or more annual distributions. Realised net capital gains will be accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the Russell 1000[®] Growth Net Total Return index (the "Benchmark Index"), denominated in US dollars (USD), while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.05%.

Benchmark index:

Description

The Benchmark Index is the Russell 1000[®] Growth Net Total Return index (i.e. with net dividends reinvested), which means that the Benchmark Index's performance includes the net dividends paid by its underlying shares.

The Benchmark Index reflects the performance of the 'growth style' segment of the US large-cap stock market. It is composed of the Russell 1000 companies that have the highest price-to-book ratios and offer the most growth potential.

The Benchmark Index is designed to be a reliable indicator of large-cap 'growth' stocks.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.russell.com

The performance tracked is that of the Benchmark Index's closing price in US Dollars.

Methodology

FTSE International Limited provides a family of US stock indices weighted by market capitalisation. All of the US indices are sub-sets of the Russell 3000E[™] Index, which represents approximately 99% of the US stock market.

The Benchmark Index is a sub-set of the Russell 1000[®] Index that represents the latter's 'growth' stocks. Each index component is selected on the basis of its price- to-book ratio, I/B/E/S medium-term growth forecast and historic revenue growth.

Each year, FTSE observes the following methodology to select the stocks that are to be included in the Russell 1000[®] Index:

- Classification by market capitalisation as at 31 May
- The largest 3,000 stocks comprise the Russell 3000[®] Index
- The largest 1,000 stocks comprise the Russell 1000[®] Index

The following are excluded:

- Stocks that trade at less than one dollar.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- Stocks that trade on the OTC Bulletin Board or on the Pink Quote market
- Closed funds, SCS, royalty trusts, etc.
- Non-US stocks and American Depositary Receipts (ADRs).

Dividends are reinvested at the ex-dividend date.

Benchmark Index publication

The closing price of the Benchmark Index is available on the Internet at www.ftserussell.com

Pursuant to European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, FTSE International Limited, the administrator of the Benchmark Index, has until 31 December 2023 to apply to the competent authority for the necessary certification or registration.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The Benchmark Index is revised annually.

The exact composition of the Benchmark Index and Russell's rules for index composition revision are available at www.ftserussell.com. The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Benchmark Index, as well as other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a single issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering affecting any of the securities that make up the Benchmark Index or in the event of a significant restriction of liquidity affecting one or more financial instruments in the Benchmark Index.

2. Balance sheet assets (excluding embedded derivatives)

In compliance with the ratios indicated in the applicable regulations, the Sub-fund may invest in global equities in all economic sectors and listed on all exchanges including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:

o their inclusion in a major stock exchange index or in the Benchmark Index

o liquidity (must exceed a minimum daily trading volume and market capitalisation)

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

o credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)

- diversification criteria, in particular regarding:

o the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)

o geography

o sector

The Sub-fund will at all times invest at least 75% of its assets in companies with head offices in a Member State of the European Union or in another country that is a member of the European Economic Area and which has signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

Investors may find more information on the above eligibility and diversification criteria on Lyxor's website at www.amundi.com.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets.

The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law. In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets (or the value of any other financial instruments or assets the Sub-fund may hold) for the value of the Benchmark Index.

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.

- Expected proportion of assets under management for which total return swaps may be entered into: up to 100% of assets under management.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

7. Securities financing transactions

N/A.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) The collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value.
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution;
- (ii) invested in high-quality government bonds;
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time
- (iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective is not fully achieved

There is no guarantee of achieving the investment objective. There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. This DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to provide the level or the value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted
- vi) The Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund are seeking exposure to the performance of large-cap US stocks with growth potential, which is achieved by replicating the performance of the Benchmark Index.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements at present and for the next five years, and their willingness to take on risk or adopt a more cautious approach. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor Russell 1000 Growth UCITS ETF to Amundi Russell 1000 Growth UCITS ETF.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi Russell 1000 Growth UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the Russell 1000 Growth Net benchmark index. The Russell 1000 Growth Net index measures the performance of growth shares among the largest US companies included in the Russell 1000 Index. Securities with the highest price-to-book ratio and growth forecasts are selected. The index is calculated by Russell Investments and its composition is reviewed in full every year.

From October 2022 to October 2023, the performance of the Acc share / FR0011119171 is 18.50%. That of the benchmark of 18.61% with a tracking error of 0.006%.

The performance achieved over the period does not prejudice the future results of the subfund.

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

French Energy Transition for Green Growth Act (Article 173 of Act No. 2015-992) and Fund Compliance with criteria relating to environmental, social, and governance quality (ESG) objectives

AMUNDI's ESG analysis generates ESG ratings for over 13,000 companies worldwide on a scale ranging from A (for issuers with the best ESG practices) to G (for the worst practices). This analysis is complemented by a policy of active commitment among issuers, in particular on major challenges regarding sustainable development within their sectors.

AMUNDI uses a targeted exclusion policy based on global agreements such as the United Nations Global Compact and other conventions on human rights, the International Labour Organisation, and the environment. In all of its active management strategies, AMUNDI therefore excludes companies that are non-compliant with its ESG principles or international agreements and their transposition into national law:

- anti-personnel mines,
- cluster bombs,
- chemical weapons,
- biological weapons,
- depleted uranium weapons.

These issuers receive a "G" rating on the AMUNDI scale.

In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal

Since coal is the largest single contributor to climate change caused by human activity, in 2016 AMUNDI implemented a sectoral policy specific to thermal coal, resulting in the exclusion of certain companies and issuers. AMUNDI has progressively reinforced this coal exclusion policy every year since 2016. These commitments stem from the Crédit Agricole Group's climate strategy. In line with the UN's Sustainable Development Goals and the 2015 Paris Agreement, this strategy is based on the research and recommendations of a Scientific Committee, which takes into account the IEA's (International Energy Agency) energy scenarios, Climate Analytics, and Science-Based Targets. In 2020, as part of the update of its policy on the thermal coal sector, AMUNDI extended its coal mining exclusion policy, which now includes all companies developing or planning to develop new thermal coal mining capacity.

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity along the entire value chain (producers, extractors, power plants, transport infrastructure),
- Companies generating more than 25% of their income from thermal coal mining,
- Companies extracting 100 MT or more of thermal coal with no intention of reducing these quantities,

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- All companies whose income from thermal coal mining and coal-fired power generation is over 50% of their total income before analysis, all coal-fired power generation and coal mining companies with a threshold between 25% and 50% and a deteriorated energy transition score.

Application in passive management:

• Passive ESG funds

- All ETF and ESG index funds (with the exception of highly-concentrated indices)
- implement AMUNDI's policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

- In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.
- Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.
- Consequently, AMUNDI's index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.
- At the same time, in the context of securities excluded from the "thermal coal policy" in AMUNDI's active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a "nay" vote on the management of the companies in question.

Tobacco

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to "E", on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates:

- Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).
- Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy.

For further information on how environmental (in particular climate change-related), social, and corporate governance (ESG) issues are taken into account in its investment policy, AMUNDI provides investors with the "Application of Article 173" report, available at <https://legroupe.amundi.com> (Legal Documentation section).

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 (“SFDR”), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives’ principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management’s headcount increased due to the integration of Lyxor’s employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some ‘carried interest’ was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the ‘executives and senior managers’ of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the ‘senior investment managers’ whose professional activities have a material impact on Amundi Asset Management’s risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its ‘Identified Staff’, that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee’s functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

a) Exposure obtained through effective management techniques of the portfolio and derivative financial instruments

• Exposure obtained through effective management techniques:	-
- Securities lending:	-
- Securities borrowing:	-
- Reverse repurchase transactions:	-
- Repurchase transactions:	-

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities with a residual term to maturity of less than three months on acquisition are valued at their purchase price. Any discount or premium to redemption value is amortised on a straight-line basis over the residual term of the instrument. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives;
- Account activity fees charged to the Sub-fund.

For more information on the fees that are actually charged to the Sub-fund, see the Statistics section of the Key Investor Information Document.

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.19% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Net asset value	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euro.

Unit tax credit transferred to share holders (individuals) ⁽¹⁾

- - - - -

Unit capitalisation*

26.66 -24.17 80.91 59.42 29.41

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

Energy Climate Act (ECA)

Amundi Russell 1000 Growth UCITS ETF Acc

Annual
reporting
31/10/2023

Fund reporting Article 29 of the Energy-Climate Act (LEC - Loi énergie-climat)

This document lists the required information from funds exceeding €500 M in net assets under management pursuant to Article 29 of the LEC

The implementing decree relating to Article 29 of the Energy-Climate Act of 8 November 2019, which clarifies and strengthens the non-financial transparency measures for market participants, was published in the Official Journal of 27 May 2021.

As of the reporting date for the period, the portfolio's strategy did not take into consideration either the alignment of its assets under management with the long-term goals of Articles 2 and 4 of the Paris Agreement, which aim to hold the increase in the global average temperature to below 2°C above pre-industrial levels, or the alignment of its assets with the long-term goals relating to biodiversity in the Convention on Biological Diversity (CBD) adopted on 5 June 1992. However, Amundi has included plans for continuous improvement in this report, including the identification of opportunities for improvement and information relating to corrective actions and strategic and operational changes it has made.

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Amundi Russell 1000 Growth UCITS ETF Acc

Annual
reporting
31/10/2023

This document meets the requirements of Article 29 of the Energy-Climate Act of 8 November 2019 (called the "LEC") on non-financial reporting for market participants.

The document presents:

1. The portfolio's climate strategy, if it has a strategy of alignment with the temperature objectives of the Paris Agreement;
2. The portfolio's strategy on alignment with long-term biodiversity objectives;
3. The process for taking into account environmental, social, and governance criteria in risk management.

More information is available in Amundi's responsible investment policy and in our climate report, available on our website: <https://legroupe.amundi.com/documentation-esg>.

1. The strategy on alignment with the international goals on limiting global warming, provided for in the Paris Agreement

The portfolio's strategy does not consider the alignment of its assets with the long-term goals of Articles 2 and 4 of the Paris Agreement on limiting global warming.

Exclusion policies

In passive management, the fiduciary duty is to replicate an index as faithfully as possible. The manager therefore has limited flexibility, and is required to meet its contractual objectives to achieve passive exposure that is in line with its benchmark index. Amundi's funds/ETFs replicating the standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions. However, for securities that are excluded due to the application of the thermal coal policy to Amundi's active investment universe, but that could be present in passive non-ESG funds, Amundi has strengthened its engagement process and its voting actions where they could result in a vote against the discharge of the Board or of Management, or the re-election of the Chairman and certain Directors.

Continuous improvement plan

Given the broad range of asset classes and world regions where Amundi invests on behalf of third parties, some of which do not yet have the analytical framework or data required to develop a strategy for alignment with the Paris Agreement, the implementation of such alignment strategies throughout all management activities remains a challenge.

In addition, Amundi is a third party asset management company. Its management activity is governed by contracts between Amundi and its clients, under which the investment objectives of the management portfolios delegated to Amundi by its clients are determined, particularly in terms of expected risk level, yield expectations, and requirements around diversification and sustainability preferences. We are required to obtain the agreement of our legal representatives before consenting to requirements linked to a trajectory of alignment with the Paris Agreement. That is why Amundi has launched a strategy of active dialogue with its clients, offering them the possibility of investing in products whose strategy incorporates characteristics for alignment with the goals of the Paris Agreement and counselling them in their decision-making.

1. Amundi's Climate Strategy in support of the carbon neutrality goals of the Paris Agreement

- Since the end of 2020, the Board of Directors of the management company's parent company has incorporated social and environmental issues in its governance and analysed progress on a quarterly basis via key indicators linked to climate and ESG;
- The Board members held a one-day dedicated strategic seminar to define the strategy to be deployed and the practical directions for implementing the new "Ambition 2025" societal plan;
- A monthly ESG and Climate committee meeting presided by the CEO defines and validates the ESG and climate policy applicable to investments and steers the major strategic projects;
- Commitments made in the framework of the Net Zero Asset Managers initiative, of which Amundi has been a signatory since July 2021:
 - A target of 18% of Amundi's assets under management Net Zero aligned by 2025 (i.e., this 18% will only be made up of funds and mandates with objectives compatible with a Net-Zero trajectory by 2050);
 - -30% carbon intensity (tCO₂e/€M of revenue) by 2025 and -60% by 2030 for all portfolios subject to the NZIF (Net Zero Investment Framework - Set of actions, metrics, and methodologies to help investors maximise their contribution to achieving the Net Zero alignment objective);
- By 2025, Amundi will also offer open transition funds towards the Net Zero 2050 objective across all major asset classes;
- Achieve €20 billion in assets on "impact" funds (including funds making a positive contribution to the objectives of the Paris Agreement);
- Strengthening of the targeted sectoral exclusion rules;
- Amundi invests significant resources to enable better consideration of climate issues in portfolio management:
 - Significant increase in the size of its ESG team;
 - Launch of ALTO* Sustainability, a technological analytics solution and decision-making support for investors on environmental and societal issues.

2. Actions taken and strategic and operational changes made in order to sustainably integrate climate into the strategy

- Progressive inclusion of ESG objectives in the performance evaluations of salespersons and portfolio managers to make this dimension part of their variable remuneration. A climate and ESG training programme developed with Amundi experts for all staff so that each employee receives the appropriate training;
- Implementation of a rating methodology using a "best-in-class" approach to evaluate issuers' transition efforts in relation to a Net Zero scenario. The stated objective of the portfolios concerned will be to have a better environmental transition profile than that of their reference investment universe by 2025;
- The transition to a low-carbon economy is one of the strategic directions of our engagement policy, and Amundi has committed to expanding the number of companies with which we engage in ongoing dialogue on the climate to 1,000 additional companies, with the objective that these companies will define credible strategies for reducing their carbon footprint, have them brought to a vote at their General Meetings, and have part of their managers' remuneration linked to these strategies.

Amundi will continue to develop its climate strategy in the years to come, using scientific reference scenarios and closely linked with the objectives of its clients, both by investing in solutions to accelerate the transition and by gradually aligning its portfolios with the 2050 neutrality objective.

2. The strategy on alignment with the long-term goals relating to biodiversity

The fund's strategy does not take into consideration the alignment of its assets under management with the long-term goals linked to biodiversity featured in the Convention on Biological Diversity adopted on 5 June 1992.

Continuous improvement plan

The subject of biodiversity, which is intrinsically linked to that of climate change, occupies an increasingly important place in our societies, not just in research, but also economic considerations. Biodiversity is one of the themes of Amundi's ESG analysis. It is reflected in the methodological grid via the "Biodiversity & Pollution" criterion, and thus plays a part in the construction of issuer ESG ratings. Amundi is also particularly attentive to controversies linked to biodiversity. In 2022, Amundi continued its initiatives for a better integration of biodiversity into its internal analysis and investment processes. In addition, the subject was among the ESG Research team's top priority analysis themes in 2022, which resulted in the production of a ten-part series of research papers entitled "Biodiversity: it's time to protect our only home". The first two parts were published in 2022, while the following will be put on-line in 2023.

The subject of biodiversity is a particular focal point of the dialogue with the companies in which Amundi is invested. Following the campaigns on plastics launched in 2019, on the circular economy in 2020, and on biodiversity in 2021, Amundi strengthened its active dialogue in 2022 with companies, continuing its engagement campaign dedicated to biodiversity strategy in eight different sectors. Due to the limitations related to the data available on the subject, the first objective of this commitment is to establish an inventory of the consideration of biodiversity by the companies, then ask them to assess the responsiveness of their activities to this loss of biodiversity, and to manage the impact of their activities and products on biodiversity. In 2022, 119 companies engaged on their biodiversity strategy. As part of this engagement, Amundi provides recommendations, with the aim of better integrating these issues into their strategy. Amundi has more broadly strengthened shareholder dialogue around the preservation of natural capital. In 2022, 344 companies (a company may engage on several topics) were engaged through different programmes (including the promotion of a circular economy and better plastics management, the prevention of deforestation, and various subjects linked to such topics as the reduction of pollution or the sustainable management of water resources).

In 2022, Amundi continued its commitment to market initiatives and working groups dedicated to biodiversity. In 2021, Amundi joined the collective "Finance for Biodiversity Pledge" investor initiative and committed to collaboration and knowledge-sharing, active dialogue with companies, and to evaluating its impacts, setting objectives around biodiversity, and communicating them publicly by 2024. In addition, Amundi will produce an annual report on these portfolios' contribution to biodiversity objectives. In 2022, following the publication of its preliminary Nature-related Risk & Opportunity Management and Disclosure Framework, the TNFD (Taskforce on Nature-related Financial Disclosures) launched pilot groups to test the feasibility of this framework on various aspects. Amundi joined a pilot group led by UNEP-FI and CDC Biodiversité, intended to test the TNFD approach, and particularly the application of the GBS (Global Biodiversity Score) to financial institutions.

Amundi also aims to develop its investment policy in terms of biodiversity around several major themes, such as water or plastics, in order to strengthen engagement where necessary and exclude companies that are harmful to natural capital. An update to this policy will be published by 2024.

In terms of data, data analysis relating to the biodiversity indicator is now in place and biodiversity impact metrics are proposed for certain funds. At this stage, Amundi is not consolidating this data at asset manager or group level.

3. The process for taking into account environmental, social, and governance criteria in risk management

3.1 Identification of environmental, social, and governance risks

Amundi's Responsible Investment department constitutes a hub of expertise dedicated to the identification and assessment of risks and opportunities relating to ESG issues. This department provides the various group entities with ESG assessments of listed issuers along with climate data, used by portfolio managers.

The table below presents an overview of the various ESG risks identified by Amundi, the approach used to make assessments, and the data providers used to assess and manage the identified risks. These risks can result in several types of consequences, including but not limited to reputational risks, depreciation of asset values, litigation, or even portfolio under-performance.

Risk identified	Description	Amundi's assessment	Data provider used
Environmental Risks	Result from the way in which a company controls its direct and indirect environmental impact: energy consumption, reduction of greenhouse gas emissions, fight against resource depletion and protection of biodiversity, etc.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Environment" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Social risks	Result from the way an issuer manages its human capital and its stakeholders (other than shareholders). This covers several notions: the social aspect linked to an issuer's human capital (accident prevention, employee training, respect for employee rights, etc.), those linked to human rights in general, and responsibilities towards stakeholders.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Social" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Governance risks	Result from the way the issuer manages its development or organises its operations and management bodies, which can potentially lead to unfair commercial practices, fraud or corruption, non-diverse management bodies, excessive remuneration, etc.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Governance" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Risks of controversy	Possibility that an issuer or investment may be involved in controversies, litigation, or events that could harm its reputation or ability to make a profit. May include questioned business practices, violations of law, financial scandals, environmental or social problems, or other difficulties that could compromise the issuer's credibility or sustainability.	Proprietary methodology combining a quantitative filter to define the universe, then a qualitative evaluation of that universe. The latter evaluation produces a rating on a scale of 0 to 5 (5 being the worst rating). Controversies with a rating of 3 or more are considered serious.	RepRisk, MSCI, Sustainalytics

3.2 Risk and opportunity assessment

The environmental, social, and governance risks and opportunities presented in the table above are assessed via a proprietary ESG rating assigned to issuers by Amundi's Responsible Investment teams.

Rating of private issuers

Our ESG analysts are specialised by sector of activity. To identify the ESG criteria representing the risks and opportunities within each sector of activity, they are tasked with:

- Monitoring emerging and established ESG topics and trends in each sector;
- Assessing sustainability risks and opportunities as well as negative exposure to sustainability factors;
- Selecting the relevant indicators (KPI) and assigning to them the associated weightings.

Our ESG analysis methodology is based on a set of 38 criteria used to establish the ESG profile of each sector of activity. Among these 38 criteria, 17 are generic, and can be applied to companies in any sector of activity, and 21 are specific to the challenges of certain sectors.

The weighting of ESG criteria is a key element of ESG analysis. The weight attribution model is based on a materiality assessment, which can influence the value of a company through 4 vectors: regulation, reputation, the company's development model, and operational efficiency.

To weight ESG criteria, the ESG analyst considers the probability and extent of each vector's impact on the following 2 materialities (detailed in the table at the end of the section):

- 1st materiality: Ability of the company to anticipate and manage sustainable development risks and opportunities inherent to its industry and its particular circumstances;
- 2nd materiality: The management team's ability to manage the potential negative impact of their activities on sustainability factors.

This analytical approach via both materialities lets analysts prioritise risks by taking into account the particularities and events specific to each sector.

The weightings integrate the intensity of the risk incurred as well as its emerging or established nature and its time horizon. Thus, issues that are considered the most material receive the highest weight.

ESG ratings are calculated based on ESG criteria and weightings determined by analysts, who combine them with the ESG scores obtained from our external data providers. At each step of the calculation process, the scores are normalised as Z-scores. Z-scores are used to compare results to a "normal" population (difference of the issuer's score with the average score for the sector, in numbers of standard deviations). To distinguish best practices from worst practices at the sector level, each issuer is evaluated with a score that is scaled around the average for its sector. At the end of the process, each company is assigned an ESG score (between -3 and +3) and its equivalent on a scale from A to G, where A is the best score and G the worst. Grade D represents average scores (from -0.5 to +0.5); each letter corresponds to a standard deviation.

Each issuer receives only one ESG score, regardless of the chosen reference universe. The ESG score is therefore "sector-neutral", meaning that no sector is given more or less preference than another.

For the implementation of the SFDR regulation, Amundi has established a map of the environmental and social factors it deems material for different sectors. This map is presented in Amundi Asset Management's LEC 29 report.

		Regulation	Reputation	Development model	Operational effectiveness
1 st materiality	Ability of the company to anticipate and manage the risks and opportunities inherent to its industry and its particular circumstances in the area of sustainable development	✓	✓	✓	✓
2 nd materiality	The management team's ability to manage the potential negative impact of their activities on sustainability factors	✓		✓	

AMUNDI RUSSELL 1000 GROWTH UCITS ETF

Subfund of the Sicav Multi Units France

Amundi Russell 1000 Growth UCITS ETF Acc

Annual reporting
31/10/2023

Rating of sovereign issuers

The objective of the sovereign rating methodology is to assess the ESG performance of sovereign issuers. E, S, and G factors can all have an impact on a governments' ability to repay its debts in the medium to long term. They can also reflect how the country tackles the major sustainability issues that affect global stability. Amundi's methodology is based on around fifty ESG indicators deemed relevant by Amundi's ESG research to address sustainability risks and sustainability factors. Each indicator can combine multiple data points from different sources, including open international databases (such as those of the World Bank Group, the United Nations, etc.) or proprietary databases. Amundi has defined the weightings of each ESG indicator contributing to the final ESG scores and their various components (E, S, and G). The indicators come from an independent service provider. The indicators have been grouped into 8 categories to ensure greater clarity, with each category falling into one of the E, S or G pillars. Like the company ESG rating scale, the ESG score of issuers results in an ESG rating ranging from A to G.

3.3 Sustainability risk management

Amundi's approach to sustainability risk management is based on the following three pillars:

- An exclusion policy, which addresses the most important ESG risks;
- The integration of ESG ratings into investment processes, which provides a holistic understanding of the company and helps identify its particular ESG risks;
- A voting and engagement policy that helps trigger positive changes in the way companies manage their impact on essential topics related to sustainability, thus mitigating the associated risks.

3.4 Integration of sustainability risks into the entity's regular risk management framework

Sustainability risks are integrated into Amundi's internal control and risk management system.

For sustainability risk management, responsibilities are divided between:

- The first level of control, carried out directly by the management teams, and
- The second level, carried out by the risk management teams, which can constantly check the compliance of funds with their ESG objectives and constraints.

The Risk Department participates in Amundi's "Responsible Investment" governance system. They monitor compliance with regulatory requirements and risk management related to such topics.

The ESG rules are monitored by risk management teams in the same way as other management requirements. They are based on the same tools and procedures and cover our exclusion policies as well as eligibility criteria and fund-specific rules. These rules are automatically monitored using a proprietary monitoring tool. This tool can trigger:

- Pre-negotiation alerts or blocking alerts, for instance on exclusion policies;
- Post-trade alerts: managers are notified of possible overruns so as to be able to quickly rectify them.

The table below details the internal control system implemented by Amundi.

Diagram of the internal control system

3.5 Frequency of risk management framework review

Our ESG analysts review the selection and weightings of Amundi's 38 criteria every 18 months for each sector of activity. This allows them to check whether the criteria and their weightings remain relevant. We continuously seek to improve our analysis by evaluating their materiality.

Amundi's Responsible Investment Policy is updated on a yearly basis.

3.6 Continuous improvement plan

Amundi strives to improve the assessment and integration of sustainability risks, including climate and environmental risks, in the management of its funds. The aim is to go from a qualitative approach to a more quantitative approach by identifying the key indicators that represent the most relevant impacts for portfolios, taking into account climate, environmental, social, and governance factors.

The project is structured in three stages:

- Define a list of sustainability risk indicators, focusing on material risks and their financial impacts on issuers;
- Gradually implement monitoring for these indicators, evaluating their results and defining limits on the basis of these indicators;
- Improve the ESG risk management framework, including the integration of indicators into risk strategies and investment restrictions.

Our current work consists of identifying the main sustainability risk factors and mapping them to issuers' financial variables. This work will end with the validation and approval of the new framework in line with Amundi's ESG governance.

The preliminary indicators considered include metrics to quantify the potential impacts of sustainability risks in terms of financial materiality and the use of "proxies" for reputational risk. The next step, planned for the second half of the current year, is to monitor the defined sustainability risk indicators and assess their impact on the managed portfolios. This monitoring will be used in discussions with the portfolio management teams and included in the various risk management reports. The final stage will focus on improving the ESG risk management framework and possibly setting internal risk alerts or limits based on the indicators. This stage is expected to be completed during the first half of 2025.

It should be noted that deadlines, indicators and implementation objectives may be subject to change throughout the project.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

Eurozone country equities.

The Lyxor CAC 40 Daily (2x) Leveraged UCITS ETF sub-fund (the "Sub-fund") continuously maintains at least 60% exposure to one or more eurozone equity markets, which may include the French equity market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the CAC 40[®] LEVERAGE GROSS RETURN strategy index (the "Benchmark Index"), while minimising the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The Benchmark Index reflects the performance of the CAC 40[®] Gross Return index (the "Parent Index"), with a daily x2 leverage effect. This means that if the underlying index rises/falls by 2% on a given day the leveraged index will rise/fall respectively by 4%, minus borrowing costs, on that day.

The expected ex-post tracking error under normal market conditions is 0.12%.

Benchmark index:

The Benchmark Index is the CAC 40[®] LEVERAGE GROSS RETURN strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying shares) denominated in EUR.

The Benchmark Index is a strategy index designed and calculated by the international index provider Euronext. It is calculated by Euronext.

The Benchmark Index is a strategy index which reflects the performance of the Parent Index, with a daily x2 leverage effect. This means that if the underlying index rises/falls by 2% on a given day, the leveraged index will rise/fall respectively by 4%, minus borrowing costs, on that day. The 2x leverage is obtained by doubling the investment by borrowing securities in the index's basket of equities. The cost of borrowing is taken into account when calculating the strategy index.

The Parent Index, which is weighted by float-adjusted market capitalisation, measures the performance of 40 of the largest stocks listed on the Euronext Paris exchange. The index constituents are selected for their large market capitalisation, sector representativeness and high trading volume.

A complete description of the Benchmark Index and its construction methodology, and information on the composition and respective weightings of the Benchmark Index components, are available on the Internet at <https://www.euronext.com/en>.

The performance tracked is that of the Benchmark Index's closing price in euros.

Publication de The Benchmark Index

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every day that the Benchmark Index is published.

The closing price of the Benchmark Index is available on the Internet at: <https://www.euronext.com/en>.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Euronext, the administrator of the Benchmark Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Benchmark Index composition and revision

The Benchmark Index's composition is revised in conjunction with the revision of the Parent Index. The Parent Index is revised quarterly.

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The exact composition of the Parent Index and Euronext's rules for revising this index and consequently the Benchmark Index, are available on the Internet at <https://www.euronext.com/en>

The advantage of the "Leverage" strategy

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Index. By borrowing securities, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Index rises, the gain on a given day will be twice as much as with a "single" investment in the Parent Index. However, in a bear market the multiplier effect of the leverage also doubles losses on a daily basis. The daily multiplier effect also affects the risks of the overall investment strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Benchmark Index and other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

The Sub-fund will at all times invest at least 75% of its assets in companies having their registered office in a Member State of the European Union or in another country that is a member of the European Economic Area and which have signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit will be checked on each Benchmark Index rebalancing date, using the Benchmark Index calculation method which limits exposure to a given issuer's equities to 20%, this calculation being performed by the Benchmark Index sponsor or calculation agent. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- their inclusion in a major stock exchange index or in the Benchmark Index
- liquidity (must exceed a minimum daily trading volume and market capitalisation)
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Amundi's website at www.amundi.com.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets. In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets (or the value of any other asset or financial instrument the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

All counterparties to a futures or forward contract that are selected by the Sub-fund must be leading financial institutions that are authorised to enter into such contracts for their own account.

The counterparty to the derivative financial instruments (the "Counterparty") shall have no discretion over the composition of the Sub-fund's portfolio nor over the assets that underlie the derivative financial instruments.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer beyond 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time.
- (iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are exposed to twice the daily change in the price or level of the Parent Index. They should note in particular that a decline in the underlying market will be amplified and will result a larger decrease in the Sub-fund's net asset value. Since the 'leverage' index formula is reset daily the Sub-fund will not return twice as much as the Parent Index over a period of more than one trading day.

For example, if the Parent Index gains 10% on a given trading day and then declines 5% the following trading day 2, the Sub-fund will have gained 8% (before fees) over these two days, while the Parent Index will have risen 4.5% over this period.

If the Parent Index loses 5% a day over two consecutive trading days, the Sub-fund will have lost a total of 19% (before fees), while the Parent Index will have lost 9.75% over this period.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 1	The leverage effect is greater than 2 and the Parent Index decreases				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	10%	110	20%	120	x2
Day 2	-11%	97.9	-22%	93.6	x2
Total return	-2.10%		-6.40%		x3.05

Negative scenario 2	The leverage effect is less than 2 and the Parent Index increases				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	-5%	95	-10%	90	x2
Day 2	6%	100.7	12%	100.8	x2
Total return	0.70%		0.80%		x1.14

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may even fall although the Parent Index increases over this period.

Inverse leverage scenario	The leverage effect is negative over the period				
	Parent Index		Strategy Index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	20%	120	40%	140	x2
Day 2	-16%	100.8	-32%	95.2	x2
Total return	0.80%		-4.80%		x-6

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- (v) : a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted;
- (vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this Sub-fund are seeking exposure to the equities of large eurozone companies.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements at present and for the next five years, and their willingness to take on risk or adopt a more cautious approach.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF Subfund of the Sicav Multi Units France

It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor CAC 40 Daily (2x) Leveraged UCITS ETF to Amundi CAC 40 Daily (2x) Leveraged UCITS ETF.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi CAC 40 Daily (2x) Leveraged UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark CAC 40 Leveraged GR Index. The CAC 40 Leveraged GR Index is based on the CAC40® (benchmark) index with a leverage effect of 2 both upwards and downwards. As such, when the CAC40® rises (or falls) by 2%, the CAC 40 Leveraged GR Index strategy index rises (or falls) by 4%, excluding financing costs and management fees. The index methodology is available at www.euronext.com.

From October 2022 to October 2023, the subfund performance is 21.09%. That of the benchmark of 21.80% with a tracking error of 0.05%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI CAC 40 DAILY (2X) LEVERAGED UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment management and administrative fees that are external to the Management Company, including tax ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

3.12. Table of results and other characteristic elements of the subfund over the last 5 periods

Currency					
EUR	10.31.2023	10.31.2022	10.29.2021	10.30.2020	10.31.2019
Net assets	267,037,931.18	223,244,728.99	167,784,120.11	208,252,408.30	101,813,027.79
Number of outstanding shares	8,537,400	8,642,525	5,481,510	15,344,965	4,520,317
Net asset value	31.2786	25.8309	30.6091	13.5713	22.5234
Unit distribution net capital gains and losses (including interim payments)	-	-	-	-	-
Unit distribution (including interim payments)	-	-	-	-	-
Unit tax credit transferred to share holders (individuals) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	5.21	0.22	15.49	-3.46	7.71

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

⁽²⁾ The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

Subfund creation date: April 19, 2018.

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

The Lyxor CAC 40 Daily (-2x) Inverse UCITS ETF sub-fund (the "Sub-fund") is a UCITS ETF index-tracker.

Calculation and allocation of amounts available for distribution:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to achieve inverse exposure, with daily 2x leverage, to the French equity market by replicating the movement of the CAC 40 Double Short GR strategy index denominated in euros (EUR) (the "Benchmark index"), whether positive or negative, while minimising the tracking error between the Sub-fund's performance and that of the CAC 40 Double Short GR index.

The expected ex-post tracking error under normal market conditions is 0.15%.

Benchmark index:

The Benchmark Index is the CAC40 Double Short GR strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying shares).

The CAC 40 Double Short GR index is a strategy index created and maintained by Euronext.

Therefore, if the Parent Index falls on a given trading day, the Sub-fund's net asset value will rise by double that amount on that day, and if the Parent Index rises on a given trading day, the Sub-fund's net asset value will fall by double that amount on that day and shareholders will not be able to profit from the rise in the Parent Index.

The short positions taken on the Benchmark Index entail borrowing costs which are included in the Benchmark Index calculation methodology.

Thus, the Benchmark Index performance calculated on one trading day is equal to 2x the inverse performance of the Parent Index on that day, plus the cumulative interest paid daily on three times the Benchmark Index's closing value, less the cost of short selling 2x the securities that underlie the Parent Index.

The Parent Index is free-float market capitalisation weighted and measures the performance of the 40 largest stocks on the Euronext Paris exchange.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at <http://indices.nyx.com/sites/indices.nyx.com>

The performance tracked is that of the closing prices of the equities that make up the Benchmark Index.

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Index is also calculated in real time every day that the Benchmark Index is published.

The closing price of the Benchmark Index is available on the Internet at <https://www.euronext.com/en>

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Euronext, the administrator of the Benchmark Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The Benchmark Index's composition is revised in conjunction with the revision of the Parent Index. The Parent Index is revised quarterly.

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

The leverage factor used in the Benchmark Index calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Index and Risk Profile sections of this prospectus.

The exact composition of the Parent Index and Euronext's rules for revising this index and consequently the Benchmark Index, are available on the Internet at <https://www.euronext.com/en>

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that make up the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Benchmark Index and other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

The Sub-fund will at all times invest at least 75% of its assets in companies having their registered office in a Member State of the European Union or in another country that is a member of the European Economic Area and which have signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit will be checked on each Benchmark Index rebalancing date, using the Benchmark Index calculation method which limits exposure to a given issuer's equities to 20%, this calculation being performed by the Benchmark Index sponsor or calculation agent. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets. In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets (or the value of any other asset or financial instrument the Sub-fund may hold) for the value of the Benchmark Index (as described in sub-section 1 of this section).

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective, such as derivatives other than index-linked swaps.

The counterparty to the derivative financial instruments (the "Counterparty") shall have no discretion over the composition of the Sub-fund's portfolio nor over the assets that underlie the derivative financial instruments.

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.

- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer beyond 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

(iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time.

(iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative Contract and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are inversely exposed to two times the daily change in the price or level of the Parent Index. Most notably, any increase in the underlying market will be inversely amplified and will imply a larger decrease in the Sub-fund's net asset value. The daily readjustment in the underlying 'double short' index formula implies that the Sub-fund's performance will not be equivalent to two times the inverse performance of the Parent Index exposure for holding periods greater than one business day.

For example, if the Parent Index gains 10% on a given business day and then loses 5% the following business day, the Sub-fund's net asset value will decline by 12% (before the deduction of relevant fees) over these two days, while the Parent Index will have gained 4.5% over the same period.

If the Parent Index loses 5% a day over two consecutive business days, it will have lost a total of 9.75%, while the Sub-fund will have gained a total of 21%, before the deduction of relevant fees.

Negative scenario 1	The leverage effect is negative and greater than 2 and the Parent Index increases				
	Parent Index		Strategy index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	10%	110	-20%	80	x-2
Day 2	-5%	104.5	10%	88	x-2
Total return	4.50%		-12.00%		x-2.67

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 2	The leverage effect is negative and less than 2 and the Parent Index decreases				
	Parent Index		Strategy index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2
Total return	-4.60%		5.60%		x-1.22

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may decline over this period even though the Parent Index has also declined.

Inverse leverage scenario	The leverage effect is positive over the period				
	Parent Index		Strategy index		
	Performance day i	Value day i	Performance day i	Value day i	Leverage effect
		100		100	
Day 1	5%	105	-10%	90	x-2
Day 2	-5%	99.75	10%	99	x-2
Total return	-0.25%		-1.00%		x4

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to secure the performance of the Benchmark Index and achieve its investment objective, the Sub-fund can enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of its shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of its shares may be adversely affected.

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted;
- vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors.

Investors in this fund are seeking inverse exposure with 2x leverage to the performance of the French equities market, whether positive or negative.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

Given the speculative nature of this Sub-fund it may not be suitable for investors with a medium to long-term investment horizon. "U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor CAC 40 Daily (-2x) Inverse UCITS ETF to Amundi CAC 40 Daily (-2x) Inverse UCITS ETF.

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi CAC 40 Daily (-2x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the CAC 40 Double Short Gross Return benchmark index. The CAC 40 Double Short Gross Return index offers inverse exposure, adjusted upward or downward on a daily basis, to the performance of the CAC40 Gross Total Return index, with a x2 leverage effect. As such, in the event of a decline in the CAC40 Gross Total Return index on a trading day, the fund's net asset value will increase twice on the same trading day and, in the event of an increase in the CAC40 Gross Total Return index on a trading day, the fund's net asset value will fall twice on the same trading day and unitholders will not benefit from the increase in the CAC40 Gross Total Return index.

From October 2022 to October 2023, the subfund performance is -21.49%. That of the benchmark of -20.91% with a tracking error of 0.06%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds. Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

AMUNDI CAC 40 DAILY (-2X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- Account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment management and administrative fees that are external to the Management Company, including tax ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euro.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

Details of the type of errors that have been corrected during the period

None.

Details of the rights and conditions attached to each share category

Acc share class: all distributable amounts are accumulated.

Unit capitalisation ⁽²⁾	-0.24	-0.10	-2.47	-0.01	-2.04

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

⁽²⁾ The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

Subfund creation date: April 19, 2018.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

The Lyxor CAC 40 Daily (-1x) Inverse UCITS ETF sub-fund (the "Sub-fund") is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to gain exposure to the performance of the French equities market, whether positive or negative, by replicating the behaviour of the CAC 40[®] Short benchmark index with gross dividends reinvested (the "Benchmark Index"), while minimising the tracking error between the Sub-fund's performance and that of the CAC 40[®] Short index.

The expected ex-post tracking error under normal market conditions is 0.08%.

Benchmark index:

The Benchmark Index is the CAC 40[®] Short Leverage strategy index with gross dividends reinvested (which means that the Benchmark Index's performance includes the gross dividends paid by its underlying shares) denominated in EUR.

The Benchmark Index provides daily inverse exposure to increases and decreases in the CAC 40[®] index with US dollars (the "Parent Index"). Therefore, if the Parent Index decreases on a given day, the Sub-fund's net asset value will increase that day, and conversely, if the Parent Index increases on a given day, the Sub-fund's net asset value will decrease that day and investors will not benefit from the increase in the Parent Index.

The Parent Index is the main benchmark for the Paris stock market. It measures changes in the prices of 40 stocks selected for their large market capitalisation, their representativeness of a given sector and the large volume of trading in their shares.

The performance of the Benchmark Index is equal to the inverted daily performance of the Parent Index, plus the interest (EONIA) received daily on 2x the closing value of the Benchmark Index (minus the cost of short positions on the Parent Index basket for one day).

The index therefore is representative of a short position strategy against the Parent Index, gross US dollars, with daily rebalancing. The Benchmark Index is an equity index that is calculated, maintained and published by Euronext.

The performance tracked is that of the Benchmark Index's closing price.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.russell.com. <https://www.euronext.com/en>

Benchmark Index publication

The Benchmark Index is calculated daily at the official closing price of the exchanges where the index constituents are listed. The closing price of the Benchmark Index is available on the Internet at <https://www.euronext.com/en>

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Euronext, the administrator of the Benchmark Index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The composition of the Benchmark Index is not revised since its composition is adjusted when the Parent Index is revised. The Parent Index is revised quarterly.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

The exact composition and Euronext's rules for rebalancing the Benchmark Index are available on the internet at <https://www.euronext.com/en>

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which involves entering into one or more OTC swap contracts to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for the value of the securities that make up the Benchmark Index.

The Securities in the Sub-fund's portfolio may include those that make up the Parent Index, as well as other global equities across all economic sectors and listed on all exchanges including small-cap exchanges.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to neutralise the counterparty risk arising from the aforementioned swap contract.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

The Sub-fund will at all times invest at least 75% of its assets in companies having their registered office in a Member State of the European Union or in another country that is a member of the European Economic Area and which have signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

The manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

In accordance with regulatory ratios, the Sub-fund's portfolio may include global equities across all economic sectors and listed on any exchange, including small-cap exchanges.

The aforementioned equities will be selected on the basis of the following:

- eligibility criteria, in particular:
 - their inclusion in a major stock exchange index or in the Benchmark Index
 - liquidity (must exceed a minimum daily trading volume and market capitalisation)
 - credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating)
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
 - geography
 - sector

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Amundi's website at www.amundi.com.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Investment in undertakings for collective investment in transferrable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund's net assets. In respect of these investments, the Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management, the fund manager reserves the right to use other instruments in accordance with the applicable regulations in order to achieve its investment objective.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of its equity assets for the value of the Benchmark Index (as described in sub-section 1 of this section).

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.

- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

A counterparty to derivative financial instruments (the "Counterparty") will have no discretion over the composition of the Sub-fund's portfolio nor over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned transactions involving derivative instruments, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager will not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or “haircut” is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty’s financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund’s net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund’s Management Company without informing the counterparty and without its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer beyond 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund’s assets.

In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund’s Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral’s maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager’s discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time.
- (iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter “OTC Derivative Contracts”) and/or efficient portfolio management techniques (hereafter “EPMT”). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Daily leverage reset risk

Investors are inversely exposed to the daily fluctuations affecting the price or level of the Parent Index. The daily reset in the exposure in the underlying “short” strategy index formula implies that the Sub-fund's performance will not be equivalent to the inverse performance of the Parent Index for holding periods greater than one trading day. This means that investors are underexposed to volatility.

For example, if the Parent Index appreciates by 10% on business day one, and then depreciates by 5% on business day two, the ETF will be subject to a total decrease of 5.5% (before deduction of relevant fees) over the two business days, while the Parent Index will be subject to an increase of 4.5% over the same period.

If the Parent Index depreciates by 5% per day over two consecutive business days, the ETF will see a total increase of 10.25% (before deduction of relevant fees), while the Parent Index will see a decrease of 9.75% over the same period.

Negative scenario 1

The Parent Index increases and the leverage effect is negative and greater than 1

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
Day 1	10%	100	-10%	90	x-1
Day 2	-8%	101.2	8%	97.2	x-1
Total return	1.20%		-2.80%		x-2.33

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Negative scenario 2

The Parent Index decreases and the leverage effect is negative and less than 1

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
Day 1	-10%	90	10%	110	x-1
Day 2	6%	95.4	-6%	103.4	x-1
Total return	-4.60%		3.40%		x-0.74

Furthermore, if the Parent Index is highly volatile over a period of more than one day, the Sub-fund's net asset value may decline over this period even though the Parent Index has also declined.

Inverse leverage scenario

The leverage effect is positive over the period

	Parent Index		Strategy Index		Leverage effect
	Performance day i	Value day i	Performance day i	Value day i	
Day 1	5%	105	-5%	95	x-1
Day 2	-5%	99.75	5%	99.75	x-1
Total return	-0.25%		-0.25%		x1

- Risk that the investment objective is not fully achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Risk of using derivative financial instruments

In order to achieve its investment objective and secure the performance of the Benchmark Index, the Sub-fund can enter into over-the-counter derivative financial instruments ("DFI"), such as swaps. This DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and could lead to an adjustment or even the early termination of the DFI transaction, which could affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the fund manager may be required, in accordance with the applicable laws and regulations, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- (v) : a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted;
- (vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors .

Investors in this fund are looking for inverse exposure to rising and falling eurozone equity prices.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

Given the speculative nature of this Sub-fund it may not be suitable for investors with a medium to long-term investment horizon. "U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 October 2023, the fund changed its name from Lyxor CAC 40 Daily (-1x) Inverse UCITS ETF to Amundi CAC 40 Daily (-1x) Inverse UCITS ETF.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi CAC 40 Daily (-1x) Inverse UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark CAC 40 Short GR Index. The CAC 40 Short GR Index is based on the CAC40® (benchmark) index, with a strategy of reversing the exposure to the underlying index. As such, when the CAC40® falls (or rises) by 2%, the CAC 40 Short GR Index strategy index rises (or falls) by 2%, excluding financing gains and management fees. The index methodology is available at www.euronext.com.

From October 2021 to October 2022, the subfund performance is -9.30%. That of the benchmark of -8.81% with a tracking error of 0.02%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

5. Retention of Guarantees Received by the Mutual Fund in Securities Financing Transactions and Global Return Swaps

Number of custodians	-
1 Denomination	-

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM Reuters fixing rates published on the day the Sub-fund's net asset value is calculated.

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI CAC 40 DAILY (-1X) INVERSE UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity fees charged to the Sub-fund.

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Asset management fees and administration fees that are external to the Management Company ⁽¹⁾	Net asset value	0.40% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euro.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

Details of the type of errors that have been corrected during the period

None.

Details of the rights and conditions attached to each share category

Acc share class: all distributable amounts are accumulated.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

Subfund features

Classification:

Equities of European Union countries.

The Lyxor CAC Mid 60 (DR) UCITS ETF sub-fund (the “Sub-fund”) continuously maintains at least 60% exposure to one or more of the equity markets of one or more European Union countries, which may include the eurozone countries.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

Dist share class: the Board of Directors reserves the right to distribute any distributable amounts one or more times a year and/or accumulate all or part of such amounts.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund’s investment objective is to replicate the performance, whether positive or negative, of the CAC Mid 60 Gross Total Return index with gross dividends reinvested (the “Benchmark Index”), denominated in euros, while minimising the tracking error between its performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 1%.

Benchmark index:

The Benchmark Index is a Gross Total Return index, which means that the Benchmark Index’s performance includes the reinvestment of the gross dividends paid by its underlying shares.

The Benchmark Index, which is weighted by free-floating market capitalisation, replicates the share price movements of 60 mid-cap companies listed on Euronext Paris regulated exchanges.

Eligible securities are rated by free-floating capitalisation and trading volume. The securities chosen for the Benchmark Index are the top-rated stocks that are not components of the CAC Large 60 index.

The Benchmark Index is an equities index that is calculated and published by the index provider Euronext.

The Benchmark Index measures the performance of the 60 top-rated stocks that are not part of the CAC Large 60 index. A ‘buffer zone’ is currently observed whereby current index components that are rated from 56th to 65th position have selection priority over eligible securities that are not currently components of the CAC Mid 60 or CAC Large 60 indices at the time of index revision.

The weight of each index constituent is adjusted to account for free float, which is rounded upward in 5% increments.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.russell.com. <https://www.euronext.com/en>

The performance tracked is that of the Benchmark Index's closing price.

Benchmark Index publication

The closing price of the Benchmark Index is available on the Internet at <https://www.euronext.com/en>

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Euronext, the administrator of the Benchmark Index, is registered in ESMA’s register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

The composition and number of equities in the Benchmark Index is revised quarterly, at the close of the 3rd Friday in March, June, September and December. The exact composition of the Benchmark Index and Euronext’s rules for its revision are available on the Internet at <https://www.euronext.com/en>.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

The frequency of this rebalancing does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will be exposed to the latter via a direct replication method that requires the Sub-fund to invest mainly in the securities that underlie the Benchmark Index and/or in financial instruments that are representative of all or some of the securities that underlie the Benchmark Index.

The sub-fund may also invest in derivative financial instruments (DFI). The DFI in which the Sub-fund may invest include, but are not limited to, futures on indices, futures on all or some of the Benchmark Index components, and hedging swaps, mainly to minimise the Sub-fund's tracking error.

In accordance with its investment strategy, the Sub-fund may hold cash (e.g. when using futures). In this case, the fund manager may, in the best interest of unit-holders, deposit this cash with a credit institution or invest it in balance-sheet assets and/or off-balance-sheet assets, as described below.

In order to optimise the direct replication method that is used to track the Benchmark Index, the Sub-fund, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Index constituents in order to reduce the costs of investing directly in all of the various Benchmark Index constituents. This sampling technique could cause the Sub-fund to invest in a selection of representative Benchmark Index securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Index, and even to invest in securities that are not constituents of the Benchmark Index.

The website at www.amundi.com features a page dedicated to the Sub-fund, which among other things explains the direct index replication method selected, i.e. either full replication of the Benchmark Index or sampling to limit replication costs. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, no more than 20% of the Sub-fund's assets may be exposed to the equities of a given issuer. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

The manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund will mainly be invested in the following types of securities:

• Equities

The Sub-fund will be invested mainly in the equities that make up the Benchmark Index.

• The shares or units of other CIU or investment funds

The Sub-fund may invest up to 10% of its assets in the shares or units of the following collective investment undertakings (CIU) or investment funds:

- French and foreign UCITS that comply with Directive 2009/65/EC. The Sub-fund may invest in shares or units of UCITS that are managed by the Management Company or by a company that is related to the Management Company.

The Sub-fund will at all times invest at least 75% of its assets in companies with head offices in a Member State of the European Union or in another country that is a member of the European Economic Area and which has signed a tax convention with France that includes an administrative assistance clause for the purpose of fighting tax fraud and evasion. This minimum investment requirement qualifies the Sub-fund for French 'PEA' equity savings plans.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

3. Off-balance sheet assets (derivatives)

The Sub-fund may invest in the following DFI:

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

• Eligible markets:

- regulated
- organised
- over-the-counter

• Risks which the Sub-fund may seek to hedge or gain exposure to:

- equity

• Purpose (all transactions must be consistent with the investment objective)

- hedging
- exposure

• Types of instruments used:

- futures : on equities and indices
- forward exchange contracts

• Strategy for using derivatives to achieve the investment objective:

- overall hedging of the portfolio, or of certain risks, securities, etc. – up to 100% of net assets
- to achieve synthetic exposure to assets or risks (up to 100% of assets)

Counterparties to OTC derivatives traded by the Sub-fund will be selected in accordance with the Management Company's best-execution policies (including the "Order-execution by asset type" table referred to in the Appendix). The aforementioned policy is available at www.amundi.com.

Counterparties to derivative financial instruments will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments, in accordance with regulatory limits and requirements.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

Pursuant to its investment strategy, the Sub-fund may use various efficient portfolio management techniques in compliance with Article R214-18 of the French monetary and financial code, including securities financing transactions.

• Possible types of transactions

- Securities borrowing and lending pursuant to the French monetary and financial code

• Purpose (all transactions must be consistent with the investment objective)

- optimisation of the Sub-fund's income
- Maximum proportion of assets under management for which securities financing transactions may be entered into: 25% of the Sub-fund's assets.
- Expected proportion of assets under management for which securities financing transactions may be entered into: 0% of the Sub-fund's assets.

For this purpose, the Management Company has appointed Société Générale as its intermediary (hereinafter the "Agent"). If transactions involving the temporary disposal of securities are engaged in, the Agent may be authorised to (i) lend securities, on the Sub-fund's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Sub-fund's behalf, any liquid assets received as collateral for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

When Société Générale S.A. is appointed as an Agent, it is not authorised to act as a counterparty to securities lending transactions. If securities are lent :

- The Sub-fund shall be entitled to all income from these transactions, net of any direct and indirect operating fees/expenses.
- These operating fees/expenses, which are incurred to manage the portfolio more efficiently, will be those borne by the Management Company, the Agent (if applicable) and/or any other intermediaries that are involved in these transactions.
- The direct and indirect operating fees/expenses will be calculated as a percentage of the Sub-fund's gross income. Information on direct and indirect operating fees/expenses and on the entities to which these expenses are paid will be provided in the Sub-fund's annual report.
- Income from the lending of securities will be paid to the Sub-fund after deduction of any direct and indirect operating fees/expenses which may be borne by the Agent and the Management Company. Since these direct and indirect operating fees/expenses do not increase the Sub-fund's overall operating expenses they have been excluded from ongoing charges.

The Multi Units France annual report will provide the following information when applicable:

- the exposure resulting from the use of efficient portfolio management techniques/transactions
- the identity of the counterparty(ies) involved in these transactions
- the nature and amount of any collateral received to reduce the Sub-fund's counterparty risk, and;
- the income obtained from efficient portfolio management transactions during the relevant period and the direct and indirect operating fees/expenses associated with these transactions.

When Société Générale is a counterparty to an efficient portfolio management transaction, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund enters into securities financing transactions, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these transactions. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets. If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

If a counterparty defaults on an obligation, the Sub-fund may dispose of the assets received from the counterparty in respect of the secured transaction to pay off the counterparty's debt to the Sub-fund.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to liquidity, valuation, the credit-worthiness of securities issuers, correlation, and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at its mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount or "haircut" is applied;
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) Collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value ;
- (e) Collateral must be immediately enforceable by The Sub-fund's Management Company without informing the counterparty and without its approval.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer beyond 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

In accordance with the above conditions the collateral the Sub-fund accepts may consist of:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral the Sub-fund accepts. The amount of these discounts will depend mainly on the following:

- the nature of the collateral asset
- the collateral's maturity (if applicable)
- the credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution
- (ii) invested in high-quality government bonds
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time.
- (iv) invested in short-term money-market funds as defined in the guidelines for a common definition of European money-market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will mainly invest in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Shareholders in the Sub-fund will be mainly exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed-income markets, where it is possible to estimate revenues for a certain period of time under the same macroeconomic conditions.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Capital risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-fund manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents or in derivatives. The use of such optimisation techniques may increase the ex post tracking error and cause the Sub-fund to perform differently from the Benchmark Index.

- Liquidity risk (secondary market)

The Sub-fund's on-exchange price may deviate from its indicative net asset value. The liquidity of the Sub-fund's shares on an exchange may be adversely affected by a suspension of or disruption in market operation, such as one of the following events:

- i) the calculation of the Benchmark Index is suspended or stopped and/or

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) a stock exchange cannot obtain or calculate the Sub-fund's indicative net asset value and/or
- iv) a market maker fails to comply with an exchange's rules and/or
- v) an exchange's IT, electronic or other system fails.

- Risk of using efficient portfolio management techniques

The default of a counterparty to an efficient portfolio management technique (hereafter "EPMT") used by the Sub-fund could expose it to the risk that the value of the collateral it has received may be less than the value of the assets it has transferred to the counterparty to the EPMT transaction. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as collateral and/or (iv) the illiquidity of the market in which the collateral received is listed. Investors should note that EPMT transactions may be entered into with entities of the same group as that of the Management Company.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective is only partially achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks:

- Derivatives risk

On an ancillary basis, the Sub-fund may invest in Derivative Financial Instruments ("DFI") traded over the counter or listed on an exchange, and in particular in futures and/or swaps for hedging purposes. These DFI involve various risks, such as counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk and liquidity risk. These risks may affect a derivative instrument directly and may result in a modification or even the premature termination of the DFI contract, which could adversely affect the Sub-fund's net asset value.

The risk of investing in DFI may be relatively high. Since the amount of money required to establish a position in a DFI may be much less than the exposure thus obtained, each transaction involves "leverage". A relatively small market movement may therefore have a very large potential positive or negative impact on the Sub-fund.

The market value of DFI is highly volatile and they may therefore be subject to large variations.

The Sub-fund may invest in DFI traded over the counter. DFI traded over the counter may also be less liquid than transactions on an organised market, where the volumes traded are generally quite higher, and the prices of these DFI may therefore be more volatile.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager will not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in a tax regime that applies to the Sub-fund's underlying assets could affect the tax treatment of the Sub-fund. As a result, in case of a discrepancy between the estimated and effective tax treatments applied to the Sub-fund and/or to the Sub-fund's counterparty to the DFI, the Sub-fund's net asset value may be affected.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the Benchmark Index disruption persists, the manager of the Sub-fund will determine the appropriate measures to be carried out, which could have an impact on the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) the index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted;
- (vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Risk of corporate action involving a Benchmark Index constituent

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument or transaction based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

Eligible investors and typical investor profile:

This Sub-fund is available to all investors seeking exposure to the performance of the 60 top-rated stocks that are not constituents of the CAC Large 60 index.

The amount that it is reasonable to invest in this Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements at present and for the next five years, and their willingness to take on risk or adopt a more cautious approach. It is also recommended that investors diversify their investments so that they are not exclusively exposed to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

AMUNDI CAC MID 60 UCITS ETF Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor CAC MID 60 (DR) UCITS ETF to Amundi CAC MID 60 UCITS ETF.

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi CAC MID 60 UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the CAC Mid 60 Gross Return Index. This index represents the 60 French mid-cap companies that are among the 61st and 120th most traded shares on Euronext Paris (the largest trades after the 60 shares on the CAC 40 and the CAC Next 20).

From October 2022 to October 2023, the performance of the Dist share / FR0011041334 is 0.49%. That of the benchmark of 1.08% with a tracking error of 0.09%.

The performance achieved over the period does not prejudice the future results of the subfund.

Main movements in the portfolio during the year

Securities	Movements ("Accounting currency")	
	Acquisitions	Transfers
SOITEC SA	453,250.70	886,641.88

Transparency of securities financing transactions and the reuse of financial instruments under the SFTR regulation (in the UCI's accounting currency)

Over the course of the reporting period, the UCI was not involved in any transactions governed by the Securities Financing Transactions Regulation (SFTR).

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Fund compliance with environmental, social, and governance quality (ESG) criteria

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions;

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons;

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a “G” rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure);

Companies whose income is over 25% the result of thermal coal mining;

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities;
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation;
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score

Application in passive management:

• Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI’s policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI’s index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the “thermal coal policy” in AMUNDI’s active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a “nay” vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to “E”, on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI’s policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).

Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at <https://legroupe.amundi.com>

* Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

a) Exposure obtained through effective management techniques of the portfolio and derivative financial instruments

• Exposure obtained through effective management techniques:	-
- Securities lending:	-

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation NO. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for UCITS investment funds.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc.). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Shares and units in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated..

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI CAC MID 60 UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs that are invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes etc.) and any account activity fee that may be charged by the depository or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives
- account activity fees charged to the Sub-fund.
- the direct and indirect operational fees/expenses of securities financing transactions

For more information on the fees or expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment and administrative fees that are external to the Management Company ⁽¹⁾	Net asset value	0.50% p.a.
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity fee	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A
Direct and indirect operating fees/expenses of securities financing transactions	The amount of income from these transactions	20% for the Management Company 15% for the Agent.

⁽¹⁾ Includes all fees and expenses except for transaction expenses, incentive fees and fees associated with investment in UCITS.

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Subfund features

Classification:

The Lyxor Euro Overnight Return UCITS ETF sub-fund (the "Sub-fund") is an exchange-traded index-tracking UCITS fund.

Calculation and allocation of distributable amounts:

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, which may be positive or negative, of the Solactive Euro Overnight Return Index with gross dividends reinvested (the "Benchmark Index"), denominated in euros (EUR), while minimising the tracking error between its performance and that of its Benchmark Index.

The expected ex-post tracking error under normal market conditions is 0.20%.

Benchmark index:

The Benchmark Index is the Solactive Euro Overnight Return Index (with gross dividends reinvested). It is a "Total Return" index, which means that interest is compounded.

The Benchmark Index is calculated and maintained by Solactive AG.

The Benchmark Index is the Euro Short-Term Rate (ESTER) plus 0.085%. The ESTER benchmark interest rate represents the average rate that eurozone banks charge on overnight loans. It is calculated and published by the European Central Bank (ECB).

ESTER uses transaction data from the daily reports prepared by the 52 largest eurozone banks. It represents the average interest rate charged on overnight loans.

ESTER is calculated daily on the basis of the previous business day's transactions. For example, the initial index rate on 2 October 2019 is based on the trading data of 1 October 2019.

The Benchmark Index is calculated using the following formula:

where $I(t)$ represents the index on date t

$I(t-1)$ is the index on the previous business day

$r(t-1)$ is the ESTER fixing published at $t-1 + 0.085\%$.

DCF ($t+1, t+2$) is the number of effective days between $t+1$ and $t+2$.

A full description of the Benchmark Index and of its construction methodology and information on the composition and respective weightings of the Benchmark Index components is available on the Internet at <https://www.solactive.com>. Additional information is also available on the Internet at www.euribor.ebf.eu.

The performance tracked is the Benchmark Index fixing determined by Solactive AG.

Benchmark Index publication

Solactive AG is responsible for collecting and disseminating the value of the Benchmark Index. The Benchmark Index's characteristics are available at <https://www.solactive.com>.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011, of 8 June 2016, Solactive AG, the administrator of the Solactive Euro Overnight Return Index, the benchmark index, is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

Benchmark Index composition and revision

Since the Benchmark Index is based exclusively on the ESTER rate + 0.085%, it will not be periodically revised.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange the value of the Sub-fund's assets, which will consist of balance sheet assets (excluding any securities received as collateral), for the value of the securities that underlie the Benchmark Index.

The securities in which the Sub-fund may invest may include those that make up the Benchmark Index, and also other European equities, across all economic sectors and listed on all exchanges, and other eurozone securities.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralised.

Information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio and the value of the swap contract concluded by the Sub-fund is available on the page dedicated to the Sub-fund accessible on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

Up to 20% of the Sub-fund's assets may be exposed to debt issued by (i) a non-OECD country and/or (ii) a non-sovereign issuer.

This 20% limit can be increased to 35% for a single bond, when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the case of strong volatility in a debt issue, or an event of a political and/or economic nature that has affected or may affect the estimated debt of an issuing country and/or the credit rating of an issuing country or any other event likely to affect the liquidity of a Benchmark Index security.

Notwithstanding the above, the securities guaranteed or issued by the same issuer may represent up to 35% of the assets, and 100% of the assets if the Sub-fund holds at least six issues none of which exceeds 30% of the assets. The securities concerned must be financial instruments issued or guaranteed by a Member State of the OECD, local authorities of a Member State of the European Union or a party to the agreement on the EEA.

The fund manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund may hold eurozone securities within the limits of the regulatory ratios. These securities will be bonds selected on the basis of the following criteria:

- eligibility criteria, in particular:
- senior debt
- fixed maturity
- maximum residual maturity
- minimum issuance size
- minimum S&P or equivalent credit rating
- diversification criteria, and in particular with respect to:
- the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to Art. R214-21 of the French monetary and financial code)
- geography
- sector.

Investors may find more information on the above eligibility and diversification criteria on Amundi's website at www.amundi.com. Balance sheet assets with a residual maturity of at least two years must account for at least 60% of the value of the Sub-fund's assets.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Investment in undertakings for collective investment in transferrable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the Sub-fund’s net assets. The Sub-fund may invest in the units or shares of UCITS managed by the Management Company or by a company that is related to the Management Company. The fund manager will not invest in the shares or units of alternative investment funds (AIF) or other investment funds that were formed under a foreign law.

Guaranteed securities issued by the same issuer can represent up to 35% of the assets, and 100% of the assets if the fund holds at least six issues for which none of them exceeds 30% of the assets. The securities are instruments issued or guaranteed by a Member State of the OECD, territorial governments of a Member State of the EC or part of the agreement on the EEA.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other instruments within the regulatory limits.

3. Off-balance sheet assets (derivatives)

The Sub-fund will use OTC index-linked swaps that swap the value of the Sub-fund’s assets for the value of the Benchmark Index (as described in sub-section 1 of this section).

To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other financial instruments in compliance with regulations, such as derivative instruments other than index-linked swaps.

- Maximum proportion of assets under management for which total return swaps may be entered into: 100%.
- Expected proportion of assets under management for which total return swaps may be entered into: up to 100%.

A counterparty to derivative financial instruments (the “Counterparty”) will have no discretion over the composition of the Sub-fund’s portfolio or over the underlying assets of the derivative financial instruments.

When Société Générale is a counterparty to the aforementioned transactions involving derivative instruments, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company’s conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

N/A.

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

N/A. The manager shall not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depositary. This collateral will therefore be included in the Sub-fund's assets.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at the mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount is applied
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) The collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value.
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund. The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution;
- (ii) invested in high-quality government bonds;
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time;

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

(iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- qualitative criteria, based on Standard and Poors' LT credit rating
- quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The Sub-fund will invest mainly in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies. Investors in the Sub-fund will mainly be exposed to the following risks:

- Interest rate risk

The Sub-fund is exposed to central bank decisions that may cause money-market interest rates to decline. If this causes interest rates to fall below management fees and other structural costs, the Sub-fund's net asset value could decline.

- Capital risk

The capital invested is not guaranteed. As a consequence, investor's capital is at risk. The Sub-fund is mainly exposed to counterparty risk resulting from the use of DFI traded over the counter with Société Générale or some other counterparty.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of shares or units traded on a given exchange may be adversely affected by a suspension in trading for various reasons, for example:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) the market(s) in the Benchmark Index's underlying assets is (are) suspended, and/or
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective may not be fully achieved

There is no guarantee that the investment objective will be achieved. Indeed, no asset or financial instrument allows for a continuous and automatic replication of the Benchmark Index, particularly if one or more of the following risks occurs:

- Risk of using derivative financial instruments

In order to secure the performance of the Benchmark Index and achieve its investment objective, the Sub-fund may enter into transactions involving over-the-counter derivative financial instruments (DFI), such as swaps. These DFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect a DFI and may require an adjustment of the DFI transaction or even its premature termination, which could adversely affect the Sub-fund's net asset value.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares or units may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index,
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost
- v) : a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted;
- vi) : the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Risk related to the modification of the Benchmark Index to comply with the reform and regulation of "benchmark indices", such as LIBOR, EURIBOR and including other types of benchmark indices on interest rates, equities, commodities and exchange rates

Interbank rates (including LIBOR, EURIBOR, exchange rates and other types of rates and indices that are considered "benchmarks") are subject to ongoing national and international regulatory reforms. As a result of these reforms, the benchmarks may perform differently than in the past or disappear altogether, or there may be other unforeseeable consequences. These changes may have a significant or limited effect on the achievement of the Sub-fund's investment objective. Some of the main regulatory proposals and initiatives in this area are the IOSCO Principles for Financial Benchmarks (the "IOSCO Benchmark Index Principles") and the European Union Regulation "on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds" (the "EU Benchmarks Regulation").

With specific regard to interbank rates, the competent authorities have identified 'risk-free rates' that will eventually serve as the primary benchmark, including (i) with regard to sterling LIBOR, a reformed version of the Sterling Overnight Index Average ('SONIA') that will make SONIA the primary benchmark for the sterling interest rate by the end of 2021, (ii) with regard to EONIA and Euribor, a new short-term euro rate (ESTER), which will be the new risk-free rate for the euro (to replace EONIA), and (iii) with regard to USD LIBOR, the Secured Overnight Financing Rate (SOFR), which will be the main benchmark for the US dollar interest rate. The risk-free rates have a different methodology and other important differences from the interbank rates they will replace and have little or no history. Ongoing international and/or domestic reform initiatives and increased regulatory oversight of benchmarks could generally increase the costs and risks associated with administering or participating in the establishment of a benchmark and complying with any applicable regulations or requirements. These factors may deter market participants from continuing to administer or contribute to benchmarks, trigger changes in the rules or methodologies used in relation to benchmarks and/or lead to the disappearance of benchmarks, including EURIBOR and LIBOR. This may result in a change of the benchmark or other consequences for the Sub-Fund, such as delisting or liquidation. Such a consequence could have an effect on the Sub-Fund's net asset value and/or the calculation of the Sub-Fund's incentive fees, which cannot be evaluated at this time.

- Sustainability risks

The Fund does not integrate sustainability factors in its investment decision-making process, and is exposed to sustainability risks. The occurrence of such risks could have an adverse impact on the value of the Fund's investments. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Eligible investors and typical investor profile:

The Sub-fund is open to all investors.

Investors in this Sub-fund are looking for exposure to the eurozone money market.

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor.

The recommended minimum investment period is at least one year. This minimum period may have to be adjusted in accordance with bid/ask spreads, brokerage fees and any stamp duty or other stock exchange tax that the investor may have to pay.

"U.S. Persons" (as defined below - see "COMMERCIAL INFORMATION") are not allowed to invest in this Sub-fund.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor Euro Overnight Return UCITS ETF to Amundi EUR Overnight Return UCITS ETF.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi EUR Overnight Return UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the performance of the benchmark Solactive Euro Overnight Return Index. The Solactive Euro Overnight Return Index reflects the change in a deposit paid at the eurozone short-term rate (Euro Short Term Rate or ESTER) plus 0.085%. ESTER uses transaction data from daily money trade reports prepared by the 52 largest banks in the eurozone. It is calculated and published by the European Central Bank (ECB).

From October 2022 to October 2023, the subfund performance is 2.76%. That of the benchmark of 2.96% with a tracking error of 0.01%.

The performance achieved over the period does not prejudice the future results of the subfund.

Main movements in the portfolio during the year

Securities	Movements ("Accounting currency")

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

7. Revenue and cost data for each type of securities financing transaction and total return swap

Securities lending and repurchase agreements:

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCITS, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCITS. Costs generated by these transactions are incurred by the UCITS. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

French Energy Transition for Green Growth Act (Article 173 of Act No. 2015-992) and Fund Compliance with criteria relating to environmental, social, and governance quality (ESG) objectives

AMUNDI's ESG analysis generates ESG ratings for over 13,000 companies worldwide on a scale ranging from A (for issuers with the best ESG practices) to G (for the worst practices). This analysis is complemented by a policy of active commitment among issuers, in particular on major challenges regarding sustainable development within their sectors.

AMUNDI uses a targeted exclusion policy based on global agreements such as the United Nations Global Compact and other conventions on human rights, the International Labour Organisation, and the environment. In all of its active management strategies, AMUNDI therefore excludes companies that are non-compliant with its ESG principles or international agreements and their transposition into national law:

- anti-personnel mines,
- cluster bombs,
- chemical weapons,
- biological weapons,
- depleted uranium weapons.

These issuers receive a "G" rating on the AMUNDI scale.

In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal

Since coal is the largest single contributor to climate change caused by human activity, in 2016 AMUNDI implemented a sectoral policy specific to thermal coal, resulting in the exclusion of certain companies and issuers. AMUNDI has progressively reinforced this coal exclusion policy every year since 2016. These commitments stem from the Crédit Agricole Group's climate strategy. In line with the UN's Sustainable Development Goals and the 2015 Paris Agreement, this strategy is based on the research and recommendations of a Scientific Committee, which takes into account the IEA's (International Energy Agency) energy scenarios, Climate Analytics, and Science-Based Targets. In 2020, as part of the update of its policy on the thermal coal sector, AMUNDI extended its coal mining exclusion policy, which now includes all companies developing or planning to develop new thermal coal mining capacity.

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity along the entire value chain (producers, extractors, power plants, transport infrastructure),
- Companies generating more than 25% of their income from thermal coal mining,
- Companies extracting 100 MT or more of thermal coal with no intention of reducing these quantities,

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

- All companies whose income from thermal coal mining and coal-fired power generation is over 50% of their total income before analysis, all coal-fired power generation and coal mining companies with a threshold between 25% and 50% and a deteriorated energy transition score.

Application in passive management:

• Passive ESG funds

- All ETF and ESG index funds (with the exception of highly-concentrated indices)
- implement AMUNDI's policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

- In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.
- Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.
- Consequently, AMUNDI's index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.
- At the same time, in the context of securities excluded from the "thermal coal policy" in AMUNDI's active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a "nay" vote on the management of the companies in question.

Tobacco

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to "E", on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates:

- Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).
- Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy.

For further information on how environmental (in particular climate change-related), social, and corporate governance (ESG) issues are taken into account in its investment policy, AMUNDI provides investors with the "Application of Article 173" report, available at <https://legroupe.amundi.com> (Legal Documentation section).

SFDR Regulations and Taxonomy:

Article 6

The fund does not promote sustainable investment in its portfolio management strategy.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its "Trading" subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The "Trading" subsidiary is responsible for researching a provider's accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the "Trading" subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 (“SFDR”), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives’ principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management’s headcount increased due to the integration of Lyxor’s employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some ‘carried interest’ was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the ‘executives and senior managers’ of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the ‘senior investment managers’ whose professional activities have a material impact on Amundi Asset Management’s risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its ‘Identified Staff’, that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee’s functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed

AMUNDI EUR OVERNIGHT RETURN UCITS ETF Subfund of the Sicav Multi Units France

on the performance of a representative basket of AIFs and/or UCITS funds.

- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Units and shares in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated. .

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI EUR OVERNIGHT RETURN UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes, etc.) and any account activity charges that may be charged, generally by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives;
- account activity charges, which are charged to the Sub-fund.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment management and administrative fees that are external to the Management Company, including tax ⁽¹⁾	Net asset value	0.15% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A

⁽¹⁾ Includes all fees and expenses, except for transaction expenses, incentive fees and fees relating to investments in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Indication of accounting changes subject to special information to shareholders

- Changes made: None.
- Changes to occur: None.

Details and justification of changes in valuation and implementation procedures

None.

Details of the type of errors that have been corrected during the period

None.

Details of the rights and conditions attached to each share category

Acc share class: all distributable amounts are accumulated.

Energy Climate Act (ECA)

Amundi EUR Overnight Return UCITS ETF Acc

Annual
reporting
31/10/2023

Fund reporting Article 29 of the Energy-Climate Act (LEC - Loi énergie-climat)

This document lists the required information from funds exceeding €500 M in net assets under management pursuant to Article 29 of the LEC

The implementing decree relating to Article 29 of the Energy-Climate Act of 8 November 2019, which clarifies and strengthens the non-financial transparency measures for market participants, was published in the Official Journal of 27 May 2021.

As of the reporting date for the period, the portfolio's strategy did not take into consideration either the alignment of its assets under management with the long-term goals of Articles 2 and 4 of the Paris Agreement, which aim to hold the increase in the global average temperature to below 2°C above pre-industrial levels, or the alignment of its assets with the long-term goals relating to biodiversity in the Convention on Biological Diversity (CBD) adopted on 5 June 1992. However, Amundi has included plans for continuous improvement in this report, including the identification of opportunities for improvement and information relating to corrective actions and strategic and operational changes it has made.

Amundi EUR Overnight Return UCITS ETF Acc

Annual
reporting
31/10/2023

This document meets the requirements of Article 29 of the Energy-Climate Act of 8 November 2019 (called the "LEC") on non-financial reporting for market participants.

The document presents:

1. The portfolio's climate strategy, if it has a strategy of alignment with the temperature objectives of the Paris Agreement;
2. The portfolio's strategy on alignment with long-term biodiversity objectives;
3. The process for taking into account environmental, social, and governance criteria in risk management.

More information is available in Amundi's responsible investment policy and in our climate report, available on our website: <https://legroupe.amundi.com/documentation-esg>.

1. The strategy on alignment with the international goals on limiting global warming, provided for in the Paris Agreement

The portfolio's strategy does not consider the alignment of its assets with the long-term goals of Articles 2 and 4 of the Paris Agreement on limiting global warming.

Exclusion policies

In passive management, the fiduciary duty is to replicate an index as faithfully as possible. The manager therefore has limited flexibility, and is required to meet its contractual objectives to achieve passive exposure that is in line with its benchmark index. Amundi's funds/ETFs replicating the standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions. However, for securities that are excluded due to the application of the thermal coal policy to Amundi's active investment universe, but that could be present in passive non-ESG funds, Amundi has strengthened its engagement process and its voting actions where they could result in a vote against the discharge of the Board or of Management, or the re-election of the Chairman and certain Directors.

Continuous improvement plan

Given the broad range of asset classes and world regions where Amundi invests on behalf of third parties, some of which do not yet have the analytical framework or data required to develop a strategy for alignment with the Paris Agreement, the implementation of such alignment strategies throughout all management activities remains a challenge.

In addition, Amundi is a third party asset management company. Its management activity is governed by contracts between Amundi and its clients, under which the investment objectives of the management portfolios delegated to Amundi by its clients are determined, particularly in terms of expected risk level, yield expectations, and requirements around diversification and sustainability preferences. We are required to obtain the agreement of our legal representatives before consenting to requirements linked to a trajectory of alignment with the Paris Agreement. That is why Amundi has launched a strategy of active dialogue with its clients, offering them the possibility of investing in products whose strategy incorporates characteristics for alignment with the goals of the Paris Agreement and counselling them in their decision-making.

1. Amundi's Climate Strategy in support of the carbon neutrality goals of the Paris Agreement

- Since the end of 2020, the Board of Directors of the management company's parent company has incorporated social and environmental issues in its governance and analysed progress on a quarterly basis via key indicators linked to climate and ESG;
- The Board members held a one-day dedicated strategic seminar to define the strategy to be deployed and the practical directions for implementing the new "Ambition 2025" societal plan;
- A monthly ESG and Climate committee meeting presided by the CEO defines and validates the ESG and climate policy applicable to investments and steers the major strategic projects;
- Commitments made in the framework of the Net Zero Asset Managers initiative, of which Amundi has been a signatory since July 2021:
 - A target of 18% of Amundi's assets under management Net Zero aligned by 2025 (i.e., this 18% will only be made up of funds and mandates with objectives compatible with a Net-Zero trajectory by 2050);
 - -30% carbon intensity (tCO₂e/€M of revenue) by 2025 and -60% by 2030 for all portfolios subject to the NZIF (Net Zero Investment Framework - Set of actions, metrics, and methodologies to help investors maximise their contribution to achieving the Net Zero alignment objective);
- By 2025, Amundi will also offer open transition funds towards the Net Zero 2050 objective across all major asset classes;
- Achieve €20 billion in assets on "impact" funds (including funds making a positive contribution to the objectives of the Paris Agreement);
- Strengthening of the targeted sectoral exclusion rules;
- Amundi invests significant resources to enable better consideration of climate issues in portfolio management:
 - Significant increase in the size of its ESG team;
 - Launch of ALTO* Sustainability, a technological analytics solution and decision-making support for investors on environmental and societal issues.

2. Actions taken and strategic and operational changes made in order to sustainably integrate climate into the strategy

- Progressive inclusion of ESG objectives in the performance evaluations of salespersons and portfolio managers to make this dimension part of their variable remuneration. A climate and ESG training programme developed with Amundi experts for all staff so that each employee receives the appropriate training;
- Implementation of a rating methodology using a "best-in-class" approach to evaluate issuers' transition efforts in relation to a Net Zero scenario. The stated objective of the portfolios concerned will be to have a better environmental transition profile than that of their reference investment universe by 2025;
- The transition to a low-carbon economy is one of the strategic directions of our engagement policy, and Amundi has committed to expanding the number of companies with which we engage in ongoing dialogue on the climate to 1,000 additional companies, with the objective that these companies will define credible strategies for reducing their carbon footprint, have them brought to a vote at their General Meetings, and have part of their managers' remuneration linked to these strategies.

Amundi will continue to develop its climate strategy in the years to come, using scientific reference scenarios and closely linked with the objectives of its clients, both by investing in solutions to accelerate the transition and by gradually aligning its portfolios with the 2050 neutrality objective.

2. The strategy on alignment with the long-term goals relating to biodiversity

The fund's strategy does not take into consideration the alignment of its assets under management with the long-term goals linked to biodiversity featured in the Convention on Biological Diversity adopted on 5 June 1992.

Continuous improvement plan

The subject of biodiversity, which is intrinsically linked to that of climate change, occupies an increasingly important place in our societies, not just in research, but also economic considerations. Biodiversity is one of the themes of Amundi's ESG analysis. It is reflected in the methodological grid via the "Biodiversity & Pollution" criterion, and thus plays a part in the construction of issuer ESG ratings. Amundi is also particularly attentive to controversies linked to biodiversity. In 2022, Amundi continued its initiatives for a better integration of biodiversity into its internal analysis and investment processes. In addition, the subject was among the ESG Research team's top priority analysis themes in 2022, which resulted in the production of a ten-part series of research papers entitled "Biodiversity: it's time to protect our only home". The first two parts were published in 2022, while the following will be put on-line in 2023.

The subject of biodiversity is a particular focal point of the dialogue with the companies in which Amundi is invested. Following the campaigns on plastics launched in 2019, on the circular economy in 2020, and on biodiversity in 2021, Amundi strengthened its active dialogue in 2022 with companies, continuing its engagement campaign dedicated to biodiversity strategy in eight different sectors. Due to the limitations related to the data available on the subject, the first objective of this commitment is to establish an inventory of the consideration of biodiversity by the companies, then ask them to assess the responsiveness of their activities to this loss of biodiversity, and to manage the impact of their activities and products on biodiversity. In 2022, 119 companies engaged on their biodiversity strategy. As part of this engagement, Amundi provides recommendations, with the aim of better integrating these issues into their strategy. Amundi has more broadly strengthened shareholder dialogue around the preservation of natural capital. In 2022, 344 companies (a company may engage on several topics) were engaged through different programmes (including the promotion of a circular economy and better plastics management, the prevention of deforestation, and various subjects linked to such topics as the reduction of pollution or the sustainable management of water resources).

In 2022, Amundi continued its commitment to market initiatives and working groups dedicated to biodiversity. In 2021, Amundi joined the collective "Finance for Biodiversity Pledge" investor initiative and committed to collaboration and knowledge-sharing, active dialogue with companies, and to evaluating its impacts, setting objectives around biodiversity, and communicating them publicly by 2024. In addition, Amundi will produce an annual report on these portfolios' contribution to biodiversity objectives. In 2022, following the publication of its preliminary Nature-related Risk & Opportunity Management and Disclosure Framework, the TNFD (Taskforce on Nature-related Financial Disclosures) launched pilot groups to test the feasibility of this framework on various aspects. Amundi joined a pilot group led by UNEP-FI and CDC Biodiversité, intended to test the TNFD approach, and particularly the application of the GBS (Global Biodiversity Score) to financial institutions.

Amundi also aims to develop its investment policy in terms of biodiversity around several major themes, such as water or plastics, in order to strengthen engagement where necessary and exclude companies that are harmful to natural capital. An update to this policy will be published by 2024.

In terms of data, data analysis relating to the biodiversity indicator is now in place and biodiversity impact metrics are proposed for certain funds. At this stage, Amundi is not consolidating this data at asset manager or group level.

3. The process for taking into account environmental, social, and governance criteria in risk management

3.1 Identification of environmental, social, and governance risks

Amundi's Responsible Investment department constitutes a hub of expertise dedicated to the identification and assessment of risks and opportunities relating to ESG issues. This department provides the various group entities with ESG assessments of listed issuers along with climate data, used by portfolio managers.

The table below presents an overview of the various ESG risks identified by Amundi, the approach used to make assessments, and the data providers used to assess and manage the identified risks. These risks can result in several types of consequences, including but not limited to reputational risks, depreciation of asset values, litigation, or even portfolio under-performance.

Risk identified	Description	Amundi's assessment	Data provider used
Environmental Risks	Result from the way in which a company controls its direct and indirect environmental impact: energy consumption, reduction of greenhouse gas emissions, fight against resource depletion and protection of biodiversity, etc.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Environment" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Social risks	Result from the way an issuer manages its human capital and its stakeholders (other than shareholders). This covers several notions: the social aspect linked to an issuer's human capital (accident prevention, employee training, respect for employee rights, etc.), those linked to human rights in general, and responsibilities towards stakeholders.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Social" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Governance risks	Result from the way the issuer manages its development or organises its operations and management bodies, which can potentially lead to unfair commercial practices, fraud or corruption, non-diverse management bodies, excessive remuneration, etc.	Proprietary rating from A to G, established on the basis of an analysis framework (criteria and weighting) of risks and opportunities linked to the "Governance" pillar, specific to each sector of activity. A G rating represents the highest risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Risks of controversy	Possibility that an issuer or investment may be involved in controversies, litigation, or events that could harm its reputation or ability to make a profit. May include questioned business practices, violations of law, financial scandals, environmental or social problems, or other difficulties that could compromise the issuer's credibility or sustainability.	Proprietary methodology combining a quantitative filter to define the universe, then a qualitative evaluation of that universe. The latter evaluation produces a rating on a scale of 0 to 5 (5 being the worst rating). Controversies with a rating of 3 or more are considered serious.	RepRisk, MSCI, Sustainalytics

3.2 Risk and opportunity assessment

The environmental, social, and governance risks and opportunities presented in the table above are assessed via a proprietary ESG rating assigned to issuers by Amundi's Responsible Investment teams.

Rating of private issuers

Our ESG analysts are specialised by sector of activity. To identify the ESG criteria representing the risks and opportunities within each sector of activity, they are tasked with:

- Monitoring emerging and established ESG topics and trends in each sector;
- Assessing sustainability risks and opportunities as well as negative exposure to sustainability factors;
- Selecting the relevant indicators (KPI) and assigning to them the associated weightings.

Our ESG analysis methodology is based on a set of 38 criteria used to establish the ESG profile of each sector of activity. Among these 38 criteria, 17 are generic, and can be applied to companies in any sector of activity, and 21 are specific to the challenges of certain sectors.

The weighting of ESG criteria is a key element of ESG analysis. The weight attribution model is based on a materiality assessment, which can influence the value of a company through 4 vectors: regulation, reputation, the company's development model, and operational efficiency.

To weight ESG criteria, the ESG analyst considers the probability and extent of each vector's impact on the following 2 materialities (detailed in the table at the end of the section):

- 1st materiality: Ability of the company to anticipate and manage sustainable development risks and opportunities inherent to its industry and its particular circumstances;
- 2nd materiality: The management team's ability to manage the potential negative impact of their activities on sustainability factors.

This analytical approach via both materialities lets analysts prioritise risks by taking into account the particularities and events specific to each sector.

The weightings integrate the intensity of the risk incurred as well as its emerging or established nature and its time horizon. Thus, issues that are considered the most material receive the highest weight.

ESG ratings are calculated based on ESG criteria and weightings determined by analysts, who combine them with the ESG scores obtained from our external data providers. At each step of the calculation process, the scores are normalised as Z-scores. Z-scores are used to compare results to a "normal" population (difference of the issuer's score with the average score for the sector, in numbers of standard deviations). To distinguish best practices from worst practices at the sector level, each issuer is evaluated with a score that is scaled around the average for its sector. At the end of the process, each company is assigned an ESG score (between -3 and +3) and its equivalent on a scale from A to G, where A is the best score and G the worst. Grade D represents average scores (from -0.5 to +0.5); each letter corresponds to a standard deviation.

Each issuer receives only one ESG score, regardless of the chosen reference universe. The ESG score is therefore "sector-neutral", meaning that no sector is given more or less preference than another.

For the implementation of the SFDR regulation, Amundi has established a map of the environmental and social factors it deems material for different sectors. This map is presented in Amundi Asset Management's LEC 29 report.

		Regulation	Reputation	Development model	Operational effectiveness
1 st materiality	Ability of the company to anticipate and manage the risks and opportunities inherent to its industry and its particular circumstances in the area of sustainable development	✓	✓	✓	✓
2 nd materiality	The management team's ability to manage the potential negative impact of their activities on sustainability factors	✓		✓

Annual reporting
31/10/2023

Rating of sovereign issuers

The objective of the sovereign rating methodology is to assess the ESG performance of sovereign issuers. E, S, and G factors can all have an impact on a governments' ability to repay its debts in the medium to long term. They can also reflect how the country tackles the major sustainability issues that affect global stability. Amundi's methodology is based on around fifty ESG indicators deemed relevant by Amundi's ESG research to address sustainability risks and sustainability factors. Each indicator can combine multiple data points from different sources, including open international databases (such as those of the World Bank Group, the United Nations, etc.) or proprietary databases. Amundi has defined the weightings of each ESG indicator contributing to the final ESG scores and their various components (E, S, and G). The indicators come from an independent service provider. The indicators have been grouped into 8 categories to ensure greater clarity, with each category falling into one of the E, S or G pillars. Like the company ESG rating scale, the ESG score of issuers results in an ESG rating ranging from A to G.

3.3 Sustainability risk management

Amundi's approach to sustainability risk management is based on the following three pillars:

- An exclusion policy, which addresses the most important ESG risks;
- The integration of ESG ratings into investment processes, which provides a holistic understanding of the company and helps identify its particular ESG risks;
- A voting and engagement policy that helps trigger positive changes in the way companies manage their impact on essential topics related to sustainability, thus mitigating the associated risks.

3.4 Integration of sustainability risks into the entity's regular risk management framework

Sustainability risks are integrated into Amundi's internal control and risk management system.

For sustainability risk management, responsibilities are divided between:

- The first level of control, carried out directly by the management teams, and
- The second level, carried out by the risk management teams, which can constantly check the compliance of funds with their ESG objectives and constraints.

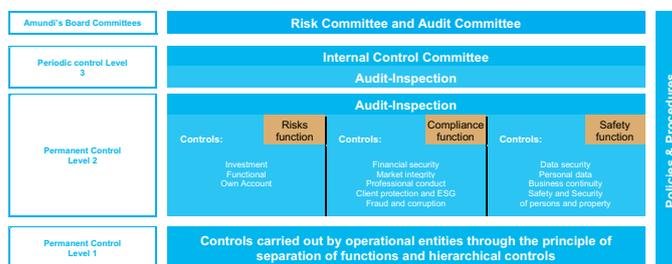

The Risk Department participates in Amundi's "Responsible Investment" governance system. They monitor compliance with regulatory requirements and risk management related to such topics.

The ESG rules are monitored by risk management teams in the same way as other management requirements. They are based on the same tools and procedures and cover our exclusion policies as well as eligibility criteria and fund-specific rules. These rules are automatically monitored using a proprietary monitoring tool. This tool can trigger:

- Pre-negotiation alerts or blocking alerts, for instance on exclusion policies;
- Post-trade alerts: managers are notified of possible overruns so as to be able to quickly rectify them.

The table below details the internal control system implemented by Amundi.

Diagram of the internal control system

3.5 Frequency of risk management framework review

Our ESG analysts review the selection and weightings of Amundi's 38 criteria every 18 months for each sector of activity. This allows them to check whether the criteria and their weightings remain relevant. We continuously seek to improve our analysis by evaluating their materiality.

Amundi's Responsible Investment Policy is updated on a yearly basis.

3.6 Continuous improvement plan

Amundi strives to improve the assessment and integration of sustainability risks, including climate and environmental risks, in the management of its funds. The aim is to go from a qualitative approach to a more quantitative approach by identifying the key indicators that represent the most relevant impacts for portfolios, taking into account climate, environmental, social, and governance factors.

The project is structured in three stages:

- Define a list of sustainability risk indicators, focusing on material risks and their financial impacts on issuers;
- Gradually implement monitoring for these indicators, evaluating their results and defining limits on the basis of these indicators;
- Improve the ESG risk management framework, including the integration of indicators into risk strategies and investment restrictions.

Our current work consists of identifying the main sustainability risk factors and mapping them to issuers' financial variables. This work will end with the validation and approval of the new framework in line with Amundi's ESG governance.

The preliminary indicators considered include metrics to quantify the potential impacts of sustainability risks in terms of financial materiality and the use of "proxies" for reputational risk. The next step, planned for the second half of the current year, is to monitor the defined sustainability risk indicators and assess their impact on the managed portfolios. This monitoring will be used in discussions with the portfolio management teams and included in the various risk management reports. The final stage will focus on improving the ESG risk management framework and possibly setting internal risk alerts or limits based on the indicators. This stage is expected to be completed during the first half of 2025.

It should be noted that deadlines, indicators and implementation objectives may be subject to change throughout the project.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the SICAV Multi Units France

Management company:

AMUNDI ASSET MANAGEMENT

Delegated management accounting title:

SOCIETE GENERALE

Custodian:

SOCIETE GENERALE

Statutory auditor:

PRICEWATERHOUSECOOPERS AUDIT

Subfund features

Classification:

Global equities.

The Lyxor MSCI Water ESG Filtered (DR) UCITS ETF sub-fund (the "Sub-fund") is continuously at least 60% exposed to a foreign equity market or to the equity markets of two or more countries, which may include the French market.

The Sub-fund is a UCITS ETF index-tracker.

Calculation and allocation of distributable amounts:

If a distribution is decided, the Board of Directors reserves the right to distribute distributable amounts one or more times a year and/or accumulate all or part of these amounts.

Acc share class: all distributable amounts are accumulated.

Investment objective:

The Sub-fund is a passively managed index-tracking fund.

The Sub-fund's investment objective is to replicate the performance, whether positive or negative, of the MSCI ACWI IMI Water ESG Filtered Net Total Return index (the "Benchmark Index"), denominated in euros (EUR), while minimising the tracking error between its performance and that of its Benchmark Index.

The Benchmark Index aims to represent the performance of companies with water-related business activities, such as water distribution, sewage services and the supplying of water-treatment and other water-related equipment. It excludes companies whose environmental, social and governance (ESG) performance, as determined by an ESG rating, lags that of their peers within the investment theme.

The Sub-fund promotes environmental and/or social characteristics, pursuant to Article 8 of the SFDR Regulation. The expected maximum ex-post tracking error under normal market conditions is 2%.

Benchmark index:

The Benchmark Index is the MSCI ACWI IMI Water ESG Filtered Net Total Return index (i.e. with net dividends reinvested), which means that the Benchmark Index's performance includes the net dividends paid by its underlying shares.

The Benchmark Index is an equity index that is calculated and published by the international index provider MSCI. It has the following characteristics:

a) An investment universe identical to that of the MSCI ACWI Investable Market Index (IMI) (the "Parent Index"), including large, mid and small cap stocks from developed and emerging countries.

b) The Benchmark Index selects companies from the Parent Index that are highly exposed to such activities as water distribution, water-related utilities, water treatment and/or the supplying of water-related equipment, and in particular:

- All companies in the "Water Utility" GICS sub-sector
- Companies whose water-related activities have a "relevance score" (as defined by MSCI) of over 25% (or 75%, depending on the company's sector of activity), and
- Companies whose revenue from sustainable water activities is over 15% of their total revenue. (the "Selected Universe")

c) The following is then applied to the companies of the Selected Universe:

- An ESG filter, which excludes:
 - Companies involved in controversial business activities, such as controversial weapons, conventional weapons, nuclear weapons, civilian firearms, tobacco, thermal coal or oil sands, or which do not comply with the UN Global Compact.
 - Companies involved in serious ESG controversies, as determined by MSCI's ESG Controversies Score.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

- Companies that are "misaligned" or "strongly misaligned" with the following UN Sustainable Development Goals (SDGs) in accordance with the MSCI Impact Solutions' SDG Alignment framework: SDG 6 (Clean Water and Sanitation), SDG 13 (Action on Climate Change) or SDG 14 (Aquatic Life).
- Companies without an MSCI ESG rating or controversy score.

- Geographical and sectoral filters.

d) A "Filtered Universe" is then determined by:

- observing a best-in-class approach that focuses on the companies with the highest ESG ratings within their industry and excludes those in the bottom quartile, as determined by MSCI's industry-specific ESG rating.

The MSCI ESG rating methodology uses a rules-based approach designed to measure a company's resilience to the long-term material ESG risks of its sector. It is based on the key ESG issues of a company's main business activity and the specific challenges of its sector, which may mean significant risks or opportunities for the company.. The key ESG issues are weighted on the basis of the impact and time horizon of the risk or opportunity. ESG criteria include, for example, water stress, carbon emissions, human resources management and corporate ethics.

The Sub-Fund thus observes an ESG approach that is underpinned by a strong commitment to eliminate at least 20% of the issuers from the initial investment universe. The limits of the ESG approach are indicated in the Risk Profile section below.

The ESG data covers more than 90% of the eligible equities of the Benchmark Index. Companies without ESG ratings are excluded from the index selection process.

- applying a liquidity filter, and

- excluding companies that have no revenue associated with the sustainable water theme.

e) The index weights the companies in the Filtered Universe using the MSCI Adaptive Capped Index methodology and then adjusts these weightings on the basis of the maximum exposure criteria.

f) Iterative downweighting ensures that the weighted average of the board independence scores and the carbon intensity of the index are respectively higher and lower than those of the MSCI ACWI IMI Water Index.

The environmental and/or social characteristics promoted by the Fund are implemented by the MSCI ESG rating methodology described above.

The Benchmark Index is a net total return index. A net total return index measures the performance of its components after including any dividends and other distributions and deducting any withholding tax.

The Benchmark Index construction methodology and the rules that govern its re-weighting and updating can be found on MSCI's website at www.msci.com

Benchmark Index composition and review

The Benchmark Index is reviewed semi-annually in May and November, when the Parent Index is reviewed. Modifications are made the end of May and November.

The Eligible Universe and the Selected Universe are updated during the semi-annual Benchmark Index reviews.

The precise composition of the Benchmark Index and its review rules are available on MSCI's website at www.msci.com.

The frequency of the aforementioned rebalancing does not affect the cost of implementing the Investment Strategy.

Benchmark Index publication

The Benchmark Index is calculated daily using the official closing price of the exchange where the underlying stocks are listed. The Benchmark Index is also calculated in real time every stock exchange trading day.

The Benchmark Index's closing price is available at <https://www.msci.com/>.

Pursuant to the provisions of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, the administrator of the Benchmark Index is registered in ESMA's register of benchmark index administrators.

Pursuant to European Parliament and Council Regulation 2016/1011 of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used that specifies the measures to be implemented if an index is substantially modified or is no longer provided.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Investment strategy:

1. Strategy employed

The Sub-fund will comply with the investment rules of the European Directive 2009/65/EC of 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Index, the Sub-fund will be exposed to the latter via a direct replication method that requires the Sub-fund to invest mainly in the securities that underlie the Benchmark Index and/or in financial instruments that are representative of all or some of the securities that underlie the Benchmark Index.

The sub-fund may also invest in derivative financial instruments (DFI). The DFI in which the Sub-fund may invest include, but are not limited to, futures on indices, futures on all or some of the Benchmark Index components, and hedging swaps, mainly to minimise the Sub-fund's tracking error.

In accordance with its investment strategy, the Sub-fund may hold cash (e.g. when using futures). In this case, the fund manager may, in the best interest of unit-holders, deposit this cash with a credit institution or invest it in balance-sheet assets and/or off-balance-sheet assets, as described below.

In order to optimise the direct replication method that is used to track the Benchmark Index, the Sub-fund, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Index constituents in order to reduce the costs of investing directly in all of the various Benchmark Index constituents. This sampling technique could cause the Sub-fund to invest in a selection of representative Benchmark Index securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Index, and even to invest in securities that are not constituents of the Benchmark Index.

The Sub-fund also reserves the right to invest in debt instruments or over-the-counter derivatives including swaps, futures and CFD, mainly for the purpose of gaining exposure to securities traded in emerging markets that are constituents of the Benchmark index and which could be particularly expensive and/or complex to invest in.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-fund's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Sub-fund's portfolio is available on the page dedicated to the Sub-fund accessible on Amundi's website at www.amundi.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

In managing its exposure, up to 20% of the Sub-fund's assets may be exposed to equities issued by the same entity. This 20% limit may be increased to 35% for a given issuing entity when this is shown to be justified by exceptional market conditions, in particular when certain securities are largely dominant and/or in the event of strong volatility affecting a financial instrument or securities linked to an economic sector represented in the Benchmark Index. This could be the case, for example, in the event of a public offering that substantially affects a Benchmark Index security or in the event of a significant drop in the liquidity of one or more of the Benchmark Index's financial instruments.

The manager currently intends to invest mainly in the assets indicated below.

2. Balance sheet assets (excluding embedded derivatives)

The Sub-fund will mainly be invested in the following types of securities:

• Equities

The Sub-fund will be invested mainly in the equities that make up the Benchmark Index.

• The shares or units of other CIU or investment funds

The Sub-fund may invest up to 10% of its assets in the shares or units of the following collective investment undertakings (CIU) or investment funds:

- French and foreign UCITS that comply with Directive 2009/65/EC. The Sub-fund may invest in shares or units of UCITS that are managed by the Management Company or by a company that is related to the Management Company.

When the Sub-fund receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title. To optimise the Sub-fund's management and achieve its investment objective, the fund manager reserves the right to use other instruments within the regulatory limits.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

3. Off-balance sheet assets (derivatives)

The Sub-fund may invest in the following DFI:

• Eligible markets:

- regulated
- organised
- over-the-counter

• Risks which the Sub-fund may seek to hedge or gain exposure to:

- equity

• Purpose (all transactions must be consistent with the investment objective)

- hedging
- exposure

• Types of instruments used:

- futures : on equities and indices
- forward exchange contracts

• Strategy for using derivatives to achieve the investment objective:

- overall hedging of the portfolio, or of certain risks, securities, etc. – up to 100% of net assets
- to achieve synthetic exposure to assets or risks (up to 100% of assets)

Counterparties to OTC derivatives traded by the Sub-fund will be selected in accordance with the Management Company's best-execution policies (including the "Order-execution by asset type" table referred to in the Appendix). The aforementioned policy is available at www.amundi.com.

- Maximum proportion of assets under management for which total return swaps may be entered into: 10%.

- Expected proportion of assets under management for which total return swaps may be entered into: up to 0%.

Counterparties to the aforementioned derivative financial instruments will have no discretion over the composition of the Sub-fund's investment portfolio, nor over the underlying assets of these derivative instruments, in accordance with regulatory limits and requirements.

When Crédit Agricole is a counterparty to DFI, conflict-of-interests situations may arise between the Management Company and Crédit Agricole. These situations will be dealt with in accordance with the Management Company's conflicts-of-interests policy.

In the event of the default of a counterparty to a total return swap (TRS) or of the premature termination of a TRS, the Sub-fund may be exposed to the performance of its balance sheet assets until it enters into a new TRS with another counterparty. In such an event, the Sub-fund could suffer losses and/or may have to bear fees/expenses that could adversely affect its capacity to achieve its investment objective. When the Sub-fund enters into two or more TRS with one or more counterparties, the aforementioned risks apply to the portion of assets that are committed under the swap that is prematurely terminated and/or to which the counterparty has defaulted.

4. Securities with embedded derivatives

• Risks that the fund manager seeks to mitigate:

- Equity

• Purpose (all transactions must be consistent with the investment objective)

- Exposure
- Other type (specify)

• Types of instruments used: EMTN.

• Strategies involving the use of embedded derivatives to achieve the investment objective: derivatives will be used on an ancillary basis (up to a maximum of 10% of net assets).

5. Cash deposits

In order to optimise its cash management, the Sub-fund may deposit funds representing up to 20% of its net assets with lending institutions that belong to the same group as the depositary.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

6. Cash borrowing

The Sub-fund may temporarily borrow up to 10% of its net assets.

7. Securities financing transactions

The manager shall not engage in any securities financing transactions.

8. Collateral

Whenever the investment strategy exposes the Sub-fund to counterparty risk, and in particular when the Sub-fund engages in securities financing transactions or uses over-the-counter swaps, the Sub-fund may accept eligible securities as collateral to reduce the counterparty risk associated with these swaps. The portfolio of collateral received may be adjusted daily to ensure that its value is at least sufficient to cover the Sub-fund's counterparty risk in most cases. The purpose of this adjustment is to neutralise the Sub-fund's counterparty risk.

The Sub-fund will have full title to all collateral received, which will be deposited in the Sub-fund's account with the depository. This collateral will therefore be included in the Sub-fund's assets.

All collateral the Sub-fund receives for this purpose must comply with the applicable laws and regulations, with respect in particular to the liquidity and valuation of the collateral, the credit-worthiness of securities issuers, risk exposure correlation and the risks of collateral management and enforceability. All collateral received must in particular meet the following criteria:

- (a) All collateral must be of high quality, be highly liquid and tradable on a regulated market or on a multilateral trading facility, with transparent pricing to enable the collateral to be rapidly sold near its estimated price
- (b) This collateral must be valued at the mark-to-market price at least daily and assets with highly volatile prices are not acceptable as collateral, unless a sufficiently prudent discount is applied
- (c) The issuer of this collateral must be independent of the counterparty and must not be closely correlated with the counterparty's financial performance;
- (d) The collateral must be sufficiently diversified in terms of country, market and issuer, with exposure to any single issuer not exceeding 20% of the Sub-fund's net asset value.
- (e) The Sub-fund's Management Company must be able to enforce this collateral in full and at any time, without having to consult with the counterparty or obtain its approval.

Notwithstanding the condition specified in (d) above, the Sub-fund may accept a basket of securities collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such securities collateral is issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organisation to which one or more Member States belong; and;
- such securities collateral consists of at least six different issues of securities of which no single issue exceeds 30% of the Sub-fund's assets.

Subject to the above conditions, the Sub-fund may take collateral in the following forms:

- (i) Cash and cash-equivalent assets, which for example include short-term bank deposits and balances and money-market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, or by its local government entities, or by an EU, regional or global supranational institution or organisation, or by any country provided that conditions (a) to (e) above are fully complied with;
- (iii) Shares or units issued by money-market funds that calculate a daily net asset value and have an AAA or equivalent credit rating;
- (iv) The shares or units of UCITS that invest mainly in the bonds and/or equities indicated in (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers offering sufficient liquidity;
- (vi) Equities admitted for trading or traded on a regulated exchange of an EU member country, on a stock exchange of an OECD member country or on a stock exchange of another country provided that conditions (a) to (e) above are fully complied with and that these equities are components of a major index.

Collateral discount policy

The Sub-fund's Management Company shall apply a discount to the collateral accepted by the Sub-fund.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

The amount of these discounts will depend mainly on the following:

- The nature of the collateral asset;
- The collateral's maturity (if applicable);
- The credit rating of the collateral issuer (if applicable).

Reinvestment of collateral

Non-cash collateral will not be sold, reinvested or pledged

At the manager's discretion, cash collateral may either be:

- (i) deposited with an authorised institution;
- (ii) invested in high-quality government bonds;
- (iii) used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the fund is able to withdraw the total amount of its cash collateral and the Accrued interest at any time;
- (iv) invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

All cash collateral that is reinvested must be invested in a diversified manner in compliance with the rules that apply to the Acceptance of non-cash collateral.

If the counterparty defaults on a securities financing transaction (i.e. an over-the-counter swap of securities and/or a repurchase agreement), the Sub-fund may be forced to sell the collateral received for this transaction under unfavourable market conditions and suffer a loss. If the Sub-fund is allowed to reinvest the cash collateral it has received, a loss could be suffered if the value of the securities purchased using this cash collateral declines.

Counterparty selection policy:

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when the intermediary may enter into financial contracts (DFI and securities financing transactions) on the Sub-fund's behalf. Counterparties to financial contracts and financial intermediaries are rigorously selected among well-known and reputable counterparties and intermediaries on the basis of various criteria.

The Risk Management function analyses the credit quality of these counterparties and also takes the following types of criteria into consideration when determining the initial universe of authorised counterparties:

- Qualitative criteria, based on Standard and Poors' LT credit rating
- Quantitative criteria, based on the LT CDS spread (e.g. absolute criteria, volatility and benchmark group comparison)

All subsequent counterparties must be validated by the Counterparties Committee, which is composed of the AM and Middle-Office managers, the CICO and the head of the Risk Management function. When a counterparty no longer meets any given criterion, the Counterparty Committee will meet to decide on the measures to be taken.

In addition to the above, the Management Company observes its best execution policy. For more information about this policy and on the relative importance of the execution criteria for each asset class, see our website at www.amundi.com.

Risk profile:

The shareholder's money will mainly be invested in the financial instruments selected by the Management Company. These instruments are subject to market trends and contingencies.

Investors in the Sub-fund will mainly be exposed to the following risks:

- Equity risk

The price of an equity security can increase or decrease in accordance with changes in the issuer's risk exposure or in the economic conditions of the market in which the security is traded. Equity markets are more volatile than fixed income markets, where under stable macroeconomic conditions income over a given period of time can be estimated with reasonable accuracy.

- Low Benchmark Index diversification risk

The Benchmark Index to which investors are exposed covers a specific region, sector or investment strategy and therefore does not enable assets to be as broadly diversified as those of an index that is exposed to several regions, sectors or investment strategies.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Exposure to such a less-diversified index may result in higher volatility than more diversified markets. Nevertheless, diversification rules of the UCITS Directive still apply to the Sub-fund's underlying assets at all times.

- Capital risk

The capital invested is not guaranteed. As a consequence, investor's capital is at risk. Investors therefore may not recover all or part of their initial investment, particularly in the event that the Benchmark Index posts a negative return over the investment period.

- Liquidity risk (primary market)

The Sub-fund's liquidity and/or value may be adversely affected if, when the Sub-fund or a counterparty to a derivative financial instrument (DFI) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to large bid/offer spreads. An inability, due to low trading volume, to execute the trades required to replicate the Benchmark Index may also adversely affect the subscription, conversion or redemption of shares or units.

- Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be extremely difficult or costly. The Sub-fund manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents or in derivatives. The use of such optimisation techniques may increase the ex post tracking error and cause the Sub-fund to perform differently from the Benchmark Index.

- Liquidity risk (secondary market)

The price of the Sub-fund's listed shares or units may deviate from the Sub-fund's indicative net asset value. The liquidity of shares or units traded on a given exchange may be adversely affected by a suspension in trading for various reasons, for example:

- i) the calculation of the Benchmark Index is suspended or stopped
- ii) trading in the market(s) in the Benchmark Index's underlying assets is suspended
- iii) an exchange cannot obtain or calculate the Sub-fund's indicative net asset value
- iv) a market maker fails to comply with an exchange's rules
- v) an exchange's IT, electronic or other system fails.

- Counterparty risk

The Sub-fund is exposed to counterparty risk in particular, as a result of its use of over-the-counter derivative contracts (hereafter "OTC Derivative Contracts") and/or efficient portfolio management techniques (hereafter "EPMT"). The Sub-fund is exposed to the risk that a counterparty with which it has entered into an OTC Derivative Contract and/or an EPMT may go bankrupt or default on a settlement or other obligation. If a counterparty defaults, the OTC Derivative Contract and/or the EPMT may be terminated and the Sub-fund may, if necessary, enter into another OTC Derivative and/or EPMT with another counterparty, at the market conditions at the time of this default. If this risk materializes it could result in a loss and have an impact on the Sub-fund's ability to achieve its investment objective. In compliance with the regulations that apply to UCITS funds, exposure to counterparty risk may not exceed 10% of the Sub-fund's total assets per counterparty.

- Risk of using efficient portfolio management techniques

If the Sub-fund's counterparty to an efficient portfolio management technique (hereinafter "EPMT") defaults, this may expose the Sub-fund to the risk that the value of the collateral it has received is less than the value of the assets the Sub-fund transferred to the counterparty to the EPMT. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as collateral and/or (iv) the illiquidity of the market in which the collateral received is listed. Investors should note that EPMT transactions may be entered into with same group as that of the Management Company/entities of the same group as that of the Management Company.

- Collateral management risks

Operational risk

The Sub-fund may be exposed to the risk of direct and indirect losses resulting from operational deficiencies in executing total return swaps (TRS) and/or securities financing transactions, as indicated in EU Regulation No. 2015/2365.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Operational risk is the risk of a direct or indirect loss resulting from various factors (e.g. human error, fraud, malice, IT system failure and/or an external event), which could adversely affect the Sub-fund and/or investors. The Management Company implements various controls and procedures to mitigate operational risk.

Legal risk

The Sub-fund may be exposed to a legal risk arising from a total return swap and/or a securities financing transaction, as indicated in EU Regulation No. 2015/2365.

- Risk that the investment objective may not be fully achieved

There is no guarantee of reaching the investment objective. Indeed, no asset or financial instrument allows for a continuous and automatic replication of the benchmark index, particularly if one or more of the following risks occurs:

- Risk of using derivative financial instruments

The Sub-fund may invest in Derivative Financial Instruments ("DFI") traded over the counter or listed on an exchange, and in particular in futures and/or swaps for hedging purposes. These DFI involve various risks, such as counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk and liquidity risk. These risks may affect a derivative instrument directly and may result in a modification or even the premature termination of the DFI contract, which could adversely affect the Sub-fund's net asset value.

The risk of investing in DFI may be relatively high. Since the amount of money required to establish a position in a DFI may be much less than the exposure thus obtained, each transaction involves "leverage". A relatively small market movement may therefore have a very large potential positive or negative impact on the Sub-fund. The market value of DFI is highly volatile and they may therefore be subject to large variations.

The Sub-fund may invest in DFI traded over the counter. DFI traded over the counter may also be less liquid than transactions on an organised market, where the volumes traded are generally quite higher, and the prices of these DFI may therefore be more volatile.

- Risk of a change in the tax regime

A change in the tax regime of a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed could adversely affect the taxation of investors. In such an event, the Sub-fund manager shall not be liable to any investor with respect to any payment that may have to be made to a competent tax authority.

- Risk of a change in the taxation of the Sub-fund's underlying assets

A change in the taxation of the Sub-fund's underlying assets could adversely affect the taxation of the Sub-fund. In such an event a discrepancy between the estimated taxation and the actual taxation of the Sub-fund and/or of the Sub-fund's DFI counterparty may adversely affect the Sub-fund's net asset value.

- Regulatory risk affecting the Sub-fund

In the event of a change in the regulatory regime in a jurisdiction where the Sub-fund is domiciled, authorised for sale or listed, the subscription, conversion or redemption of shares or units may be adversely affected.

- Regulatory risk affecting the Sub-fund's underlying assets

In the event of a change in the regulations that govern the Sub-fund's underlying assets, the Sub-fund's net asset value and the subscription, conversion or redemption of shares or units may be adversely affected.

- Benchmark Index disruption risk

If an event adversely affects the Benchmark Index, the Sub-fund manager may be required, as provided for by law, to suspend the subscription and redemption of the Sub-fund's shares or units. The calculation of the Sub-fund's net asset value could also be adversely affected.

If the disruption of the Benchmark Index persists, the Sub-fund manager will determine an appropriate course of action, which could decrease the Sub-fund's net asset value.

A 'Benchmark Index event' includes but is not limited to the following situations:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments
- ii) the Benchmark Index is permanently cancelled by the index provider
- iii) the index provider is unable to indicate the level or value of the Benchmark Index
- iv) The index provider makes a material change in the Benchmark Index calculation formula or method (other than a minor modification such as an adjustment to the Benchmark Index's underlying components or their respective weightings) which the Sub-fund cannot effectively replicate at a reasonable cost

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

v) a Benchmark Index component becomes illiquid because it is no longer traded on a regulated market or because its trading over-the-counter (e.g. bonds) is disrupted

vi) the Benchmark Index components are exposed to higher transaction costs for execution or settlement/delivery, or to specific tax constraints and these costs are not reflected in the Benchmark Index's performance.

- Corporate action risk

An unforeseen change, by the issuer of a security that is a component of the Benchmark Index, in a planned corporate action that is in contradiction with a previous official announcement on which the Sub-fund based its valuation of the corporate action (and/or on which the Sub-fund's counterparty to a derivative financial instrument based its valuation of the corporate action) can adversely affect the Sub-fund's net asset value, particularly if the Sub-fund's treatment of the corporate event differs from that of the Benchmark Index methodology.

- Currency risk associated with the Benchmark index

The Sub-fund is exposed to currency risk, as the underlying securities composing the Benchmark Index may be denominated in a currency different from the Benchmark Index, or be derived from securities denominated in a currency different to that of the Benchmark Index. Changes in exchange rates may therefore adversely affect the Sub-fund's Benchmark Index.

- Sustainability risks

In managing sustainability risks, the Management Company relies on the Benchmark Index administrator's methodology, with which sustainability risks are integrated by using an ESG rating to filter the investment universe. This integration of these risks has a direct impact on the Benchmark Index's investment universe. However, there is no absolute assurance that all sustainability risks will be eliminated, and the occurrence of such risks may have an adverse impact on the value of the Benchmark Index's underlying assets. More information on the Benchmark Index methodology can be found on the website at <https://www.msci.com>. Additional information may be found in the "Sustainability Disclosures" section of the Prospectus.

- ESG methodology risk

Benchmark indices that include ESG criteria generally use a best-in-class approach or a rating-improvement approach relative to the initial investment universe. Given this initial investment universe, it is possible that issuers with low ESG ratings may be included in the index, while still meeting the criteria of the index methodology approaches.

- Controversy market risk

Companies which have met a benchmark index's selection criteria may suddenly and unexpectedly be affected by a serious controversy that could adversely affect the Sub-fund's net asset value. When these securities are components of the benchmark index, they are likely to be held until the next index rebalancing.

- ESG score calculation risk

Most ESG scores and ratings are defined in relative terms, by comparing an issuer to a peer group. Therefore, issuers perceived by the market as having poor ESG practices could potentially be rated well if the other issuers in its peer group have even poorer ESG practices. ESG scores and ratings are calculated by an external provider which uses its own data, models and estimates and various sources of information that may vary with each issuer. The analysis is largely based on qualitative and quantitative data that are provided by the companies themselves and is therefore dependent on the quality of this information. Although constantly improving, corporate ESG reporting is still patchy and heterogeneous. The reliability, quality and accuracy of ESG data can sometimes limit the scope of ESG-based investment.

Eligible investors and typical investor profile:

The Sub-fund is open to all investors.

Investors subscribing to this sub-fund are seeking exposure to the equity markets of companies carrying out, for their main source of revenue, activities concerning the water sector (infrastructure, products and equipment for treating water, distribution and management of hydraulic water networks).

The amount that can be reasonably invested in the Sub-fund depends on each investor's personal situation. To determine this amount, investors must take into account their personal wealth and/or estate, their cash requirements currently and for the next five years, and their willingness to take on risk or their preference for more prudent investment. Investors are also advised to diversify their investments sufficiently so as not to be exposed solely to this Sub-fund's risks.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF Subfund of the Sicav Multi Units France

All investors are therefore asked to consider their specific situation with the help of their usual investment advisor. The recommended minimum investment period is at least five years.

“U.S. Persons” (as defined below - see “COMMERCIAL INFORMATION”) are not allowed to invest in this Sub-fund.

Subfund life on the year under review

On 11 october 2023, the fund changed its name from Lyxor MSCI Water ESG Filtered (DR) UCITS ETF to Amundi MSCI Water ESG Screened UCITS ETF.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Management report of the directors board

Ladies and gentlemen,

We have gathered you at a general meeting to report on the activity of your company during its fiscal year 2023 and to submit for your approval the accounts closed at October 31, 2023. Before the presentation of the accounts, a brief presentation will be made to you on the economic situation and the management policy of the subfund during this fiscal year.

The Amundi MSCI Water ESG Screened UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the benchmark MSCI ACWI IMI Water ESG Filtered Net USD Index. This index aims to represent the performance of the shares of companies operating in the water sector: distribution, infrastructure, utilities equipment or water treatment. The index is designed on a best-in-class ESG approach; companies in the lowest quartile by sector-adjusted ESG rating are excluded from the investment universe. Companies exposed to controversial activities and/or major ESG controversies and those that do not comply with the commitments of the United Nations Global Compact are also excluded from the index. For more information on the index, please visit www.msci.com.

From October 2022 to October 2023, the performance of the Acc share / FR0014002CH1 is 1.86%. That of the benchmark of 2.43% with a tracking error of 0.07%.

From October 2022 to October 2023, the performance of the Dist share / FR0010527275 is 1.86%. That of the benchmark of 2.43% with a tracking error of 0.06%.

The performance achieved over the period does not prejudice the future results of the subfund.

4. Data on the reuse of guarantees (collateral)

"The regulations governing UCITS forbid the reuse of collateral securities. Cash collateral received is:

- reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues');
- placed on deposit;
- reinvested in high-quality long-term government bonds;
- reinvested in high-quality short-term government bonds; or
- used for the purpose of reverse repurchase transactions.

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

6. Retention of Guarantees Provided by the Mutual Fund in SFT Transactions and Global Return Swaps

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

7. Revenue and cost data for each type of securities financing transaction and total return swap

The CIU will be able to use efficient portfolio management techniques in accordance with the provisions of Article R214-18 of the Monetary and Financial Code and in particular reverse transactions in financial securities.

- Maximum proportion of assets under management eligible for SFTs: up to 25% of the assets of the CIU.
- Expected share of assets under management eligible for SFTs: 10% of the assets of the CIU.

The total revenues generated by efficient portfolio management techniques shall be shared between the relevant compartment and the security lending agent. Each compartment receives 65% while the agent receives 35% of this income. All direct and indirect operational costs related to these operations are borne by the agent and have therefore been excluded from the financial management and administrative costs external to the management company.

Specific information

Group funds

Details of the financial instruments held by the Fund which are issued by the Fund Manager or its associates will be found in the Auditor's Report for the latest financial period (enclosed herein) under the following headings:

- 3. Further details
- 3.9.3. Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached below.

Calculation of overall risk

• Method for calculating the amount committed

Futures are recognised at their market value as off-balance sheet commitments, at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

French Energy Transition for Green Growth Act (Article 173 of Act No. 2015-992) and Fund Compliance with criteria relating to environmental, social, and governance quality (ESG) objectives

AMUNDI's ESG analysis generates ESG ratings for over 13,000 companies worldwide on a scale ranging from A (for issuers with the best ESG practices) to G (for the worst practices). This analysis is complemented by a policy of active commitment among issuers, in particular on major challenges regarding sustainable development within their sectors.

AMUNDI uses a targeted exclusion policy based on global agreements such as the United Nations Global Compact and other conventions on human rights, the International Labour Organisation, and the environment. In all of its active management strategies, AMUNDI therefore excludes companies that are non-compliant with its ESG principles or international agreements and their transposition into national law:

- anti-personnel mines,
- cluster bombs,
- chemical weapons,
- biological weapons,
- depleted uranium weapons.

These issuers receive a "G" rating on the AMUNDI scale.

In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal

Since coal is the largest single contributor to climate change caused by human activity, in 2016 AMUNDI implemented a sectoral policy specific to thermal coal, resulting in the exclusion of certain companies and issuers. AMUNDI has progressively reinforced this coal exclusion policy every year since 2016. These commitments stem from the Crédit Agricole Group's climate strategy. In line with the UN's Sustainable Development Goals and the 2015 Paris Agreement, this strategy is based on the research and recommendations of a Scientific Committee, which takes into account the IEA's (International Energy Agency) energy scenarios, Climate Analytics, and Science-Based Targets. In 2020, as part of the update of its policy on the thermal coal sector, AMUNDI extended its coal mining exclusion policy, which now includes all companies developing or planning to develop new thermal coal mining capacity.

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity along the entire value chain (producers, extractors, power plants, transport infrastructure),
- Companies generating more than 25% of their income from thermal coal mining,
- Companies extracting 100 MT or more of thermal coal with no intention of reducing these quantities,

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

- All companies whose income from thermal coal mining and coal-fired power generation is over 50% of their total income before analysis, all coal-fired power generation and coal mining companies with a threshold between 25% and 50% and a deteriorated energy transition score.

Application in passive management:

• Passive ESG funds

- All ETF and ESG index funds (with the exception of highly-concentrated indices)
- implement AMUNDI's policy of excluding the coal sector wherever possible.

• Passive non-ESG funds

- In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.
- Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.
- Consequently, AMUNDI's index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.
- At the same time, in the context of securities excluded from the "thermal coal policy" in AMUNDI's active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a "nay" vote on the management of the companies in question.

Tobacco

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to "E", on a scale of A to G (with G-rated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates:

- Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).
- Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy.

For further information on how environmental (in particular climate change-related), social, and corporate governance (ESG) issues are taken into account in its investment policy, AMUNDI provides investors with the "Application of Article 173" report, available at <https://legroupe.amundi.com> (Legal Documentation section).

SFDR Regulations and Taxonomy:

Article 8 – Passive Portfolio Management – under the Taxonomy

In accordance with its investment objective and policy, the Fund promotes environmental characteristics within the meaning of Article 6 of the Taxonomy Regulation. It may partially invest in economic activities that contribute to one or more of the environmental objective(s) set out in Article 9 of the Taxonomy Regulation. However, the Fund does not currently make any commitment in terms of a minimum proportion.

The Taxonomy aims to identify economic activities considered to be environmentally sustainable. The Taxonomy identifies such activities according to their contribution to six major environmental objectives: (i) climate change mitigation, (ii) climate change adaptation, (iii) the sustainable use and protection of water and marine resources, (iv) the transition to a circular economy (waste, prevention and recycling) (v) pollution prevention and control, and (vi) the protection and restoration of biodiversity and ecosystems.

In order to determine an investment's degree of environmental sustainability, an economic activity is considered to be environmentally sustainable where it contributes substantially to one or more of the environmental objectives set out in the Taxonomy Regulation, where it does no significant harm (the "DNSH" principle) to one or more of these environmental objectives, where it is carried out in accordance with the minimum safeguards provided for in Article 18 of the Taxonomy Regulation and where it complies with the technical screening criteria established by the European Commission in accordance with the Taxonomy Regulation.

In accordance with the current iteration of the Taxonomy Regulation, the Asset Manager ensures that investments do no significant harm to any other environmental objective by implementing exclusion policies covering issuers with controversial environmental and/or social and/or governance practices.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Notwithstanding the preceding, the Do No Significant Harm principle is applied solely to the underlying investments incorporating European Union criteria for environmentally sustainable economic activities.

The investments underlying the remaining portion of this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Although the Fund may already hold investments in economic activities qualified as sustainable activities without currently undertaking to observe a minimum proportion, the Asset Manager is making every effort to disclose the proportion invested in sustainable activities as soon as it is reasonably possible after the entry into force of the Regulatory Technical Standards governing the content and presentation of disclosures in accordance with Articles 8(4), 9(6) and 11(5) of the Disclosure Regulation, as amended by the Taxonomy Regulation.

This effort will be gradually and continuously rolled out, incorporating the requirements of the Taxonomy Regulation in the investment process as soon as it is reasonably possible. As a result, a minimum degree of portfolio alignment with sustainable activities will be disclosed to investors at that time.

Until then, the degree of alignment with sustainable activities will not be disclosed to investors.

Once the data are fully available and the appropriate calculation methodologies finalised, the description of the proportion of underlying investments in sustainable activities will be disclosed to investors. This information, along with information on the proportion of enabling and transitional activities, will be indicated in a subsequent version of the prospectus.

Article 8 – Passive Portfolio Management – under Article 11 of SFDR

The subfund is classified in accordance with Article 8 of Regulation EU 2019/2088 known as “Disclosure” and aims to promote environmental and/or social characteristics.

During the period, the Manager of Sicav continuously promoted the environmental and/or social characteristics:

- Via the methodology of the replicated index which aims to obtain an ESG score higher than the ESG score of its parent index or of the universe eligible for the index, and.
- In its investment process, excluding all issuers mentioned in the exclusion list of the Responsible Investment Policy (unless specifically specified in the subfund Prospectus).

The compartment promotes the environmental characteristics as described in Article 8 of the Disclosure Regulation and may, during the relevant period, have partially invested in economic activities that have contributed to an environmental objective within the meaning of the Disclosure Regulation.

As required by Article 50 (2 SFDR) of COMMISSION DELEGATED REGULATION, information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.

Regulatory information

Broker and counterparty selection procedure

Our Asset Manager and its “Trading” subsidiary attach great importance to the selection of our transaction service providers, both in terms of brokers and counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area, then by business line. Counterparties are selected by sector.
- Brokers and counterparties are given a quarterly internal rating. The divisions of our company involved in the rating process are directly concerned by the services provided by brokers and counterparties. Our company's "Trading" subsidiary organises and determines this rating on the basis of scores given by each team manager concerned according to the following criteria:

For teams of portfolio managers, financial analysts, and strategists:

- General business relationship, understanding of needs, relevance of contacts,
- Quality of market and opportunity advice, following of this advice,
- Quality of research and publications,
- Investment universes covered, on-site meetings with companies and their management teams.

For trader teams:

- Quality of staff, market knowledge, and information about companies, confidentiality,
- Price quote,
- Quality of execution, and
- Quality of transaction processing, connectivity, technical expertise, and responsiveness.

Our company's 'Compliance' and 'Middle Office' divisions have veto power.

Accreditation of a new transaction service provider (broker or counterparty)

The “Trading” subsidiary is responsible for researching a provider’s accreditation and obtaining approval from the Risk and Compliance divisions. Once the transaction service provider (broker or counterparty) has been approved, it is rated during the following quarter.

Oversight committees for transaction service providers (brokers and counterparties)

These oversight committees meet every quarter, under the aegis of the Head of the “Trading” subsidiary.

Their objectives are as follows:

- Approve the services provided during the period under review and the new providers selected for the following quarter,
- Decide which service providers will belong to a group that will be entrusted with a certain number of transactions,
- Define prospects for business.

With this in mind, the oversight committees review statistics and ratings assigned to each service provider and make the resulting decisions.

Brokerage Fee Report

A brokerage fee report is made available to unitholders, and can be consulted online at: www.amundi.com.

Remuneration policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the “AIFM Directive”), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the “UCITS V Directive”). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 (“SFDR”), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives’ principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management’s headcount increased due to the integration of Lyxor’s employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some ‘carried interest’ was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the ‘executives and senior managers’ of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the ‘senior investment managers’ whose professional activities have a material impact on Amundi Asset Management’s risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its ‘Identified Staff’, that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee’s functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...)

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed

AMUNDI MSCI WATER ESG SCREENED UCITS ETF Subfund of the Sicav Multi Units France

on the performance of a representative basket of AIFs and/or UCITS funds.

- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Effective portfolio management techniques and derivative financial instruments

1 Accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

Valuation rules

The Sub-fund's assets are valued in accordance with applicable laws and regulations and most notably Regulation No. 2014-01 of 14 January 2014 of the Comité de la Réglementation Comptable (the Accounting Regulations Committee), which applies to the chart of accounts for undertakings for collective investment in transferable securities.

Financial instruments traded on a regulated market are valued at the closing price recorded on the day prior to the calculation of the net asset value. If these financial instruments are traded on several regulated markets at the same time, the closing price used is that recorded on the regulated market on which they are principally traded.

However, in the absence of significant trading on a regulated market, the following financial instruments are valued using the following methods:

- Negotiable debt securities ("NDS") with a remaining life upon acquisition that is less than or equal to three months are valued by applying the difference between the acquisition value and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life of more than three months upon acquisition but less than or equal to three months at the net asset value calculation date are valued by applying the difference between the most recent valuation and the redemption value on a straight-line basis over the remaining life. However, the Management Company reserves the right to value these securities at their current value if it deems that they are particularly exposed to market risks (interest rates, etc). The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer;
- NDS with a remaining life at the net asset value calculation date that exceeds three months are valued at their current value. The rate applied is that of issues of equivalent securities adjusted by the risk margin relating to the issuer.
- Financial futures traded on organised markets are valued at the clearing price on the day prior to the calculation of the net asset value. Options traded on organised markets are valued at their market price on the day prior to the calculation of the net asset value. Forward contracts and over-the-counter options are valued at the price quoted by the counterparty. The Management Company monitors these prices independently.
- Bank deposits are valued at their nominal value plus accrued interest.
- Warrants, short and medium-term notes (bons de caisse), promissory notes and mortgage notes are valued under the Management Company's responsibility at their most likely trading value.
- Securities financing transactions are valued at the market price.
- Units and shares in UCITS under French law are valued at the last known net asset value on the day the Sub-fund's net asset value is calculated.
- Shares and units in foreign investment funds are valued at the last known unitary net asset value at the date the Sub-fund's net asset value is calculated.
- Financial instruments traded on a regulated market and for which no price has been quoted or whose price has been corrected, are valued under the Management Company's responsibility at their most likely trading value.
- The exchange rates used to value financial instruments denominated in a currency other than the Sub-fund's base currency are the WM / Reuters fixing rates on the day the Sub-fund's net asset value is calculated. .

Accounting method for trading expenses

Trading expenses are excluded from the initial cost of transactions.

AMUNDI MSCI WATER ESG SCREENED UCITS ETF

Subfund of the Sicav Multi Units France

Accounting method for income from fixed-income securities

Income from fixed-income securities is accounted for using the cash-basis method.

Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

Operating and management costs

These fees cover all the costs invoiced directly to the Sub-fund, except for transaction expenses, which include intermediary fees and expenses (brokerage, stock market taxes, etc.) and any account activity charges that may be charged, generally by the depositary or the Management Company.

For this Sub-fund the following fees may be charged in addition to the operating and management fees (see table below):

- incentive fees, which the Sub-fund pays to the Management Company when the Sub-fund exceeds its objectives;
- account activity charges, which are charged to the Sub-fund.
- the direct and indirect operational fees/expenses of securities financing transactions.

For more information on the fees and expenses that are charged to the Sub-fund, see the Statistics section of the Key Investor Information Document (KIID).

Fees charged to the Sub-fund	Base	Maximum charge
Investment management and administrative fees that are external to the Management Company, including tax ⁽¹⁾	Net asset value	0.60% annual
Maximum indirect expenses (management expenses and fees)	Net asset value	N/A
Account activity charge	Charged on each transaction	N/A
Incentive fee	Net asset value	N/A
The direct and indirect operational fees/expenses of securities financing transactions.	The income from these transactions	20% for the Management Company 15% for the Agent

⁽¹⁾ Includes all fees and expenses, except for transaction expenses, incentive fees and fees relating to investments in UCITS.

Accounting currency

The Sub-fund's accounts are kept in euros.

Unit distribution net capital gains and losses (including interim payments)	-	-	-	-	-
Unit distribution (including interim payments)*	-	-	-	-	-
Unit tax credit transferred to share holders (individuals) ⁽¹⁾	-	-	-	-	-
Unit capitalisation*	0.10	-0.04	0.45	-	-

* The amounts of the unit distribution, the unit capitalization and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalization is the sum of earnings and higher net capital losses and the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ In application of the Tax Instruction of 4 March 1993 of the General Tax Directorate, the unitary tax credit is determined on the day the dividend is clipped by dividing the total amount of the tax credits amongst the outstanding units on that date.
