Statutory auditors' report on the financial statements

For the year ended December 29, 2023

This is a translation into English of the statutory auditors' report on the financial statements of the Company issued in French and it is provided solely for the convenience of English speaking users. This statutory auditors' report includes information required by French law, such as information about the appointment of the statutory auditors or verification of the management report and other documents provided to shareholders. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

Statutory auditors' report on the financial statements

For the year ended December 29, 2023

To the holders of HUGAU OBLI 1-3 mutual fund units

Opinion

In compliance with the engagement entrusted to us by your Board of Directors of the management company, we have audited the accompanying financial statements of the UCITS Hugau Obli 1-3 collective investment under a mutual bond form for the year ended December 29, 2023, as attached to this report.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the Fund and of the results of its operations for the year then ended in accordance with French accounting principles.

Basis for Opinion

Audit Framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "Statutory Auditors' Responsibilities for the Audit of the Financial Statements" section of our report.

Independence

HUGAU OBLI 1-3

We conducted our audit in accordance with the rules of independence set out in the French Commercial Code and in the Code of Ethics for Statutory Auditors, for the period from December 31, 2022 to the date of issue of our report.

Justification of Assessments

In accordance with the requirements of articles L.821-53 and R.821-180 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the following assessments which, in our professional judgment, were the most significant for the audit of the financial statements for the year.

These assessments were made as part of our audit of the financial statements as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not express an opinion on any components of the financial statements taken individually.

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report established by the Management Company.

Responsibilities of Management for the Financial Statements

The Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with French accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Fund or to cease operations.

The financial statements were approved by the management company.

Statutory Auditors' Responsibilities for the Audit of the Financial Statements

Our role is to issue a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L. 821-55 of the French Commercial Code (code de commerce), our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Fund.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- Identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements.
- Assesses the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein.
- Evaluates the overall presentation of the financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

Paris La Défense, March 8th, 2024

ACCOUNTING RULES AND METHODS

The annual accounts are presented in the format laid out in modified Regulation ANC 2014-01.

Accounting items are presented in euros, the accounting currency of the UCITS.

Revenue accounting

Financial accounts are recorded for their amount, plus, if necessary, accrued interest attached to them.

The UCITS records its income using the redeemed coupon method.

Accounting of cash inflows and outflows in the portfolio

The accounting of securities inflows and outflows in the UCI's portfolio is made excluding costs.

Allocation of distributable sums

Unit I:

For revenue: total capitalisation

For capital gains or losses: total capitalisation

Unit R:

For revenue: total capitalisation

For capital gains or losses: total capitalisation

Unit D:

For revenue: distribution and/or capitalisation

For capital gains or losses: distribution and/or capitalisation

Management and operating fees

Management fees are provided for in the information note or full prospectus of the UCITS.

Fixed management fees (maximum rate)

		Fixed management fees	Base

Retrocessions

The accounting policy for retrocessions of management fees on target UCITs held is decided upon by the management company.

These retrocessions are recognised as a deduction from management fees. Expenses actually incurred by the fund are shown in the table "Management fees incurred by the UCITS". Management fees are calculated on the average net asset at each net asset value and cover financial, administrative, valuation costs, custodian's cost, auditors' fees etc... They do not include transaction fees.

Transaction fees

Brokerage fees, commissions and fees related to the sale of securities included in the collective portfolio as well as the acquisition of securities through income from either the sale or redemption of securities or income from assets included in the UCITS are deducted from said assets and from liquid assets.

Transaction fees	Distribution key (in %)		
	Management Company	Custodian	Other service providers
- Custodian: 10% of the movement commission. - Management Company: balance after deduction of the share attributable to the Custodian either: Minimum 35€ Maximum 60€ incl VAT. 0,48% maximum incl VAT Deduction from each transaction			

Valuation method

At each valuation, the assets of UCITS, FIA are valued according to the following principles:

Shares and similar securities listed (French and foreign securities):

Valuation is at the stock market price.

The stock market price applied is based on the trading place:

European trading places: First market price of the day.

Asian trading places: Last market price of the day.

Australian trading places: Last market price of the day.

North American trading places: Last market price of the previous day.

South American trading places: Last market price of the previous day.

If a security is not listed, the last market price of the previous day is used.

Bonds and similar debt securities (French and foreign securities) and EMTN:

The bonds are valued on the opening BID prices provided by the different participants present on the market.

Financial instruments, the price of which has not been recorded on the valuation date or the price of which has been corrected, are valued at their probable trading value, under the responsibility of the Management Company, using a method such as:

These valuations and their justification are communicated to the Auditor during his audits.

In the case of major market events affecting the liquidity of the markets, there could be a significant difference between the values retained in the balance sheet, valued as above, and the prices at which the disposals would actually be made if part or all of the assets in the portfolio had to be liquidated.

In the case of a non-realistic quotation, the portfolio manager must conduct an estimation which is as much as possible in line with the actual market parameters. Depending on the available resources, the evaluation may be carried out by different methods such as:

- The quotation of a contributor

-An average quotation of several contributors

-A price calculated by an actuarial method using a credit or other spread and/or one or several yield curves...etc

Securities of UCITS, FIA or investment funds in the portfolio:

Valuation on the basis of the last known net asset value.

Shares of Securitisation bodies:

Valuation at the first market price of the day for securitisation bodies listed on European markets.

Temporary acquisition of securities:

- Sale of repurchase agreements: Contractual valuation. No repurchase agreements for more than 3 months.
- Repurchase agreement: Contractual valuation, as the redemption of securities by the seller is envisaged with sufficient certainty.
- Securities borrowings: Valuation of borrowed securities and repayment debt corresponding to the market value of the securities concerned.

Temporary disposals of securities:

- Securities sold on reverse repo: Securities sold under repurchase agreements are valued at the market price, debts representing securities sold under repurchase agreements are maintained at the value fixed in the contract.
- Securities lending: Valuation of securities lent at the stock market price of the underlying value. The securities are recovered by UCITS, FIA following the loan agreement.

Unlisted transferable securities:

Valuation using methods based on asset value and yield, taking into account the prices retained during recent significant transactions.

Negotiable debt securities:

- TCNs which, at the time of acquisition, have a residual maturity of less than three months are valued on a straight-line basis.
- TCNs acquired with a residual maturity of more than three months are valued:
 - at their market value for up to 3 months and one day before maturity.
 - the difference between the market value observed 3 months and 1 day before maturity and the redemption value is linearised over the last 3 months.
 - exceptions: BTFs and BTANs are valued at market prices until maturity.
- Market value retained:
 - BTF/BTAN:
Actuarial yield rate or price of the day published by Banque de France.

- Other TCNs:

a) Securities with a lifespan of between 3 months and 1 year:

- if the TCN is traded in large volumes: application of an actuarial method, the rate of return used will be that observed daily on the market.
- Other TCNs: application of a proportional method, the rate of return used will be the EURIBOR rate of equivalent duration, possibly adjusted by a margin representative of the intrinsic characteristics of the issuer.

b) Securities with a lifespan of more than one year:

Application of the actuarial method.

If the TCN is traded in large volumes, the rate of return used is that observed daily on the market.

Other TCNs: the rate of return used is the BTAN rate of equivalent maturity, possibly adjusted by a margin representative of the intrinsic characteristics of the issuer.

Forward contracts:

The market prices used for the valuation of forward contracts are in line with those of underlying securities. They vary according to the stock market on which the contract is listed:

- Futures contracts quoted on European markets: Opening price of the day or the settlement price of the previous day.
- Futures contracts listed on North American stock markets: Last price of the previous day or the settlement price of the previous day.

Options:

Market prices used follow the same principle as those governing contracts or underlying securities:

- Options listed on European stock markets: First price of the day or settlement price of the previous day.
- Options listed on North American stock markets: Last price of the previous day or settlement price of the previous day.

Swap transactions (swaps):

- Swaps with a life of less than 3 months are not valued.
- Swaps with a lifespan of more than 3 months are valued at the market price.
- Index swaps are valued at the price given by the counterparty; the management company independently controls this valuation.
- When the swap contract is backed by clearly identified securities (quality and duration), these two elements are valued globally.

Forward exchange contracts

These are hedging transferable transactions for securities in a portfolio denominated in a currency other than that of the accounting of UCITS, FIA by a currency loan in the same currency for the same amount. Forward currency transactions are valued according to the currency lender/borrower yield curve.

Valuation method of off-balance sheet commitments

- Commitments on forward contracts are determined at the market value. It is equal to the valuation price multiplied by the number of contracts and the nominal value. Commitments on over-the-counter swap contracts are presented at their nominal value or in the absence of nominal value, an equivalent amount.
- Commitments on conditional transactions are determined on the basis of the underlying equivalent of the option. This translation consists of multiplying the number of options by a delta. The delta results from a mathematical model (Black-Scholes type) whose parameters are: the price of the underlying, term to maturity, short-term interest rate, the option exercise price and the volatility of the underlying. Off-balance sheet presentation corresponds to the economic meaning of the transaction and not as per the contract.
- Dividend swaps versus change of performance are shown at nominal value off-balance sheet.
- Back-to-back or non-back-to-back swaps are recorded at nominal value off-balance sheet.

Description of guarantees received or given

Warranty received:

Nil

Guaranteed given:

In the context of transactions in over-the-counter derivative financial instruments and transactions for the temporary acquisition / sale of securities, the fund may receive financial assets that are considered as collateral and whose purpose is to reduce its exposure to counterparty risk.

The financial guarantees received will mainly consist of cash for over-the-counter (OTC) financial derivative transactions, and in cash and government bonds eligible for securities acquisition / temporary divestiture transactions.

This guarantee is given in the form of cash or bonds issued or guaranteed by OECD Member States or their local public authorities or by supranational institutions and bodies of a Community, regional or global nature;

Any financial guarantee received will respect the following principles:

- Liquidity: any financial security guarantee must be liquid and able to trade quickly on a regulated market at a transparent price.
- Transferability: Financial guarantees are transferable at any time.
- Evaluation: received financial guaranties are evaluated daily. A conservative haircut policy will be applied to securities that may have significant volatility or credit quality.
- Credit quality of issuers: Financial guarantees are of high credit quality.

Placement of collateral received in cash: they are either placed in deposits with eligible entities or invested in government bonds of a high credit quality (rated according to the criteria of "short-term money market" UCITS /FIAs) or invested "short-term money market" UCITS /FIAs, used for reverse repurchase transactions with a credit institution,

- Correlation: the guarantees are issued by an entity independent of the counterparty.
- Diversification: the counterparty risk in over-the-counter transactions may not exceed 10% of the net assets when the counterparty is one of the credit institutions as defined in the regulations in force, or 5% of its assets in other cases.

Exposure to a particular issuer does not exceed 20% of the net assets.

- Retention: the financial guarantees received are placed with the Custodian or by one of its agents or third parties under its control or any third party custodian subject to prudential supervision and which has no connection with the provider of financial guarantees.
- Prohibition of reuse: non-cash financial guarantees can't be sold, reinvested or given as collateral.

INFORMATION FOR INVESTORS IN GERMANY

Acting as Information Agent in Germany is:

ZEIDLER LEGAL SERVICES RECHTSANWALTSGESELLSCHAFT MBH
Bettinastrasse 48, 60325 Frankfurt
GERMANY

(hereafter: Information Agent)

Requests for redemption or conversion of shares may be submitted to the Information Agent. All payments (redemption proceeds, distributions and other payments) can be conducted through the Information Agent. The current version of the Prospectus, the Key Investor Information Documents, the Company's Articles and annual and semi-annual reports can be obtained free of charge from the Information Agent in Germany. Information regarding the issue, redemption and conversion prices of Shares as well as all other information intended for Shareholders can also be obtained from the Information Agent in Germany.

The issue and redemption prices of Shares shall be published each Calculation Day on www.hugau-gestion.com. Notices to Shareholders are available free of charge from the Information Agent in Germany, and Shareholders registered in the Company's register of Shareholders will receive such notices by mail. Notices will also be published in the Bundesanzeiger if such publication is prescribed by law, such as in the case of a merger, switch or suspension of the redemption of Shares, and any contractual changes with an impact on Shareholders' rights.
