Informations about the Fund

Classification

Eurozone equities.

Determination and allocation of distributable sums

Accumulation and/or distribution at the discretion of the Management Company.

Tax treatment

The Fund is eligible for the Plan d'Épargne en Actions ("PEA" reserved for French investors) and life insurance policies. The Fund may provide a support vehicle for life insurance policies denominated in units of account.

The UCITS, by its nature, is not subject to taxation. However, unitholders may be taxed on any income distributed by the Fund or when they sell Fund units. The tax treatment applicable to amounts distributed by the Fund or unrealised or realised capital gains or losses will depend on the individual unitholder's tax situation, residence for tax purposes and/or the investment jurisdiction of the Fund. If an investor is uncertain of his or her tax position, the investor should consult a financial advisor or a professional investment consultant to determine the tax rules applicable to his or her particular situation before any investment. Some income distributed by the UCITS to unitholders residing outside France may be subject to withholding tax in France.

Benchmark index

The Fund's benchmark index is the euro-denominated MSCI Spain Index with net dividends reinvested (net return).

The MSCI Spain Index is an "equities" index calculated and published by the international index supplier MSCI Inc. ("MSCI"). The equities in the MSCI Spain Index are leading securities traded in the Spanish markets.

The investment universe of the MSCI Spain Index aims at covering approximately 85% (+/-5%) of the Spanish market's float-adjusted market capitalisation.

Management fees & commissions

Administrative and management fees: 0.25% including tax.

Subscription fees received by the Fund: None.

In compliance with current regulations, this mutual fund has, during the financial period just ended, levied charges at rates which are in line with those stated in the Prospectus and set out in the paragraph "Management Fees" and use under the following headings:

- Notes to the annual accounts/Management fees.
- Further Details/Subscription and/or redemption fees/Management fees.

Investment objective

The Fund's investment objective is to track the performance of the MSCI Spain Index (see "Benchmark index" section), as closely as possible, whether the Index rises or falls.

The Fund is managed so as to achieve a gap between changes in its NAV and changes in the value of the MSCI Spain Index (referred to below as the "MSCI Spain Index") as small as possible. The target for maximum tracking error between the Fund's NAV and the value of the MSCI Spain Index is 2%.

If the "tracking error" exceeds 2%, the objective would nevertheless be to remain below 15% of the volatility of the MSCI Spain Index.

UCITS AMUNDI ETF MSCI SPAIN UCITS ETF

Investment strategy

The Fund is managed by "index tracking".

1. **Strategy employed:**

The Fund's management is index-linked and aims to replicate the performance of the MSCI Spain Index using a method that directly replicates the MSCI Spain Index.

To maintain the closest possible correlation with the performance of the MSCI Spain Index, the Fund will buy a diversified portfolio of stocks (the "Portfolio") and an over-the-counter (OTC) total return swap, a financial derivative instrument which turns the exposure to the securities in the Portfolio into exposure to the MSCI Spain Index.

The Fund shall observe the investment rules stipulated in Articles R214-21, R214-22 and R214-23 the French Monetary and Financial Code.

The Portfolio comprising directly held assets described in the "Assets used" section, complies with the provisions of Article R214-21 of the French Monetary and Financial Code (CMF).

The Fund's exposure to the Index achieved through the total return swap may be eligible for exemption ratios applicable to the index-tracking UCITS referred to in Article R214-22 of the French Monetary and Financial Code (CMF). That Article stipulates that an index may comprise up to 20% equities or debt securities issued by the same entity; this limit may be raised to 35% maximum for a single issuing entity, when such increase is justified by special market circumstances such as the regulated markets where some marketable securities or some money-market instruments are largely dominant.

The Portfolio comprising directly held assets described in the "Assets used" section, complies with the provisions of Article R214-21 of the French Monetary and Financial Code (CMF).

2. **Assets used (except embedded derivatives):**

The Fund's exposure to the Index is achieved through the total return swap.

The Portfolio consists of the Fund's directly held assets described below.

- Equities:

The Fund will be permanently 60% exposed at least to one or more markets for equities issued in one or more Eurozone countries. At least 60% of the Fund will be permanently exposed to the Spanish equities market.

Up to 100% of the Fund's net assets will be invested, subject to the legal and regulatory ratios, in international equities (any economic sector, traded on any market). However, in the event of adjustments associated with subscriptions/redemptions, investments may exceed this limit on a residual basis.

The stocks in the Fund's portfolio will consist of stocks included in the MSCI Spain Index and other international stocks, from all economic sectors, including small-cap markets. The equities in the Fund's assets will be chosen to limit costs associated with reproducing the MSCI Spain Index.

Over 75% of the portfolio's value will, at all times, consist of stocks of companies registered in a Member State of the European Union, or in another State which is part of the European Economic Area (EEA) and has signed a tax convention with France that provides for administrative assistance to prevent fraud and tax evasion. This minimum level of equity exposure makes the Plan d'Épargne en Actions (French Stock Savings Plan - PEA).

At least 90% of the Fund will be permanently invested in listed shares. For the purposes of interpreting this ratio, shares issued by REITs (as defined by the German Ministry of Finance) or UCIs are not considered as shares.

- Interest-rate instruments:

Up to 25% of the Fund's net assets may be invested in any kind of bond instruments.

Portfolio securities will be selected according to the best judgement of the management and in compliance with the Management Company's internal credit risk monitoring policy.

Overview of the procedure for choosing intermediaries / counterparties and comments

The Management Company generally issues a bid tender. In this case, a comprehensive Request For Proposal ("RFP") (total return swap and market making) was issued for a portion of the AMUNDI ETF Fund product line. For this reason, neither the Management Company nor the Delegated Fund Manager have undertaken or shall undertake, for this particular Fund, a formal competitive bidding procedure that can be tracked and monitored among counterparties for OTC derivative financial instruments, as the counterparty has already been selected during the comprehensive RFP. The Fund may carry out these transactions with BNP Paribas SA or any other Company of the BNP Paribas SA group as counterparties or intermediaries.
