Article L. 422-1 of the Monetary and Financial Code	I. Any regulated market in an EC Member State or in another State party to the Agreement on the European Economic Area which operates without requiring individuals actually to be present may offer means of access to the market in France and the overseas departments and territories, including Saint-Barthélemy and Saint Martin. II. Where the AMF has clear and demonstrable grounds for considering that a regulated market in another EC Member State or another State party to the Agreement on the European Economic Area that offers access in France and in the overseas departments and territories, including Saint-Barthélemy and Saint Martin, is in breach of its obligations, it will inform the competent authority of that regulated market's home State. If, despite the measures taken by the competent authority of the home State, or because such measures have proved to be inadequate, the regulated market continues to operate in a manner clearly detrimental to the interests of investors or to the orderly operation of the markets in France, the French Financial Markets Authority will, after duly informing the competent authority of the home State, take all appropriate measures necessary to protect investors or to preserve orderly operation of the markets. It may, inter alia, prohibit the regulated market from making its means of access available to remote members in France and the overseas departments and territories, including Saint-Barthélemy and Saint Martin. The Financial Markets Authority will make its reasoned decision known to the regulated market concerned. It will notify the European Commission without delay.
