1. Management report

a) Investment policy

■ Management policy

Over the period under review (**29 Sept. 2023 to 30 Sept. 2024**), the net of fees performance of the different active share classes of **H2O Moderato FCP** compared to their corresponding money market rates split as follows:

Share classes	Launching date	ISIN code	1-year performance
H2O MODERATO FCP I ESTER + 2.00%	01/10/2020	FR0010929836	5.85% 5.92%
H2O MODERATO FCP N ESTER + 1.90%	01/10/2020	FR0013185196	5.07% 5.82%
H2O MODERATO FCP R ESTER + 1.10%	01/10/2020	FR0013393295	4.11% 5.02%
H2O MODERATO FCP HUSD I(C) SOFR + 2.00%	01/10/2020	FR0013055217	7.94% 7.48%
H2O MODERATO FCP HUSD R SOFR + 1.10%	01/10/2020	FR0013393303	6.02% 6.58%
H2O MODERATO FCP HCHFI SARON + 2.00%	01/10/2020	FR0011973643	2.89% 3.52%
H2O MODERATO FCP HCHF R SARON + 1.10%	01/10/2020	FR0013393311	1.78% 2.62%

Source: H2O AM, data net of fees as of 30/09/24

Past performance is not a reliable indicator of future performance.

H2O Moderato FCP's active management approach seeks to generate performance on all international fixed income, currency, credit, and equity markets regardless of market environments. The management team implements directional strategies (linked to the general direction of the markets) as well as relative value positions and arbitrages (linked to the relative movements of the markets in relation to each other) on the bond, foreign exchange, credit, and equity markets.

The relative performance of **H2O Moderato FCP** over the period was generated on its four reference asset classes as follows:

- The allocation to global sovereign bonds exhibited positive returns. The long G4 (US, Japan, Germany, United Kingdom) duration strategy was attuned with the general direction of yields over the period. The US yield curve steepener arbitrage also proved quite profitable, especially during Q3 2024 as the Fed enacted its rate cutting cycle. The portfolio's G4 bond arbitrages and non-G4 sovereign debt allocation also yielded positive returns.

1. Management report

- The contribution from currency strategies was negative. The long JPY against the euro bloc was highly penalised due to the position's negative carry and constant depreciation of the Japanese currency during H1 2024. Intra-bloc strategies were also negative. The portfolio's allocation to a basket of EM FX added gains.
- Credit strategies came out negative, especially during Q4 2024 as Russian debt holdings were marked down.
- The equity segment was negative during the period under review. The primary driver of this outcome came from the short US stocks against European equities arbitrage. The long US blue chips against small & mid-caps arbitrage also suffered as the Russell 2000 outpaced the S&P 500. The sectoral arbitrage, favouring EU undervalued cyclical sectors, was marginally negative. However, the portfolio's directional strategy added slightly positive gains.

■ Material changes during the period and expected in future

On December 29, 2023, the regulatory documentation of **H2O Moderato FCP** was amended as follows:

Implementation of a redemption capping mechanism, known as "gates":

The French Financial Markets Authority (AMF) has updated its policy to facilitate the implementation of liquidity management tools, and gates in particular. The instruction DOC-2017-05 ([link to the AMF website](#)) specifies the procedures for implementing gates within Undertakings for Collective Investment ("UCIs").

In exceptional circumstances, this mechanism temporarily spreads redemption requests over several net asset values once they exceed a certain threshold defined in the UCITS' legal documentation. This mechanism is only triggered in situations of unusual liquidity and abnormally high redemption volumes on the liabilities side. This tool, which manages liquidity risk and ensures that orders placed by the unitholders concerned are treated equally, should be triggered only if it is in the sole interest of unitholders.

■ Index-tracking fund

This UCI is not an index-tracking fund.

1. Management report

■ Alternative fund of funds

This UCI is not an alternative fund of funds.

■ SFTR regulation in EUR

Over the course of the reporting period, the UCI was not involved in any transactions governed by the Securities Financing Transactions Regulation (SFTR).

■ Access to documentation

The UCI's legal documentation (PRIIPs KIDs, prospectus, periodic reports etc.) is available from the asset management company, from its head office or the following email address: info@h2o-am.com

1. Management report

c) Information about risks

■ Method for calculating total risk

The asset management company uses the VaR - absolute (VaR) method to calculate the fund's total risk. –

The UCI's average indicative leverage:

- The UCITS's average indicative leverage level is 23. However, the fund may have a higher leverage level than this. During the financial year, the average leverage was 22.1. The fund's indicative leverage level is calculated as the sum of nominal positions on the financial contracts used.

- The fund's VaR levels during the period:

The highest level to VaR - absolute reached was: 8.47%.

The lowest level to VaR - absolute reached was: 7.32%.

The average level to VaR - absolute was: 7.74%.

The VaR calculation method used is 20-days parametric with a 99% confidence interval. It is based on a data history of six years.

Exposure to securitisation

The UCI has no exposure to securitisation.

■ Risk management

As part of its risk management policy, the asset management company establishes a risk management policy and risk management procedures that are effective, appropriate and documented and that allow it to identify risks related to its activities, processes and systems.

For more information, please see the UCI's KIID and more specifically its "Risk and return profile" section, or its prospectus, which may be obtained on request from the asset management company.

■ Liquidity management

The portfolio management company has defined a liquidity management policy for its open-end UCIs, based on measurements and indicators that show illiquidity and the impact on portfolios in the event of forced sales following large-scale redemptions by investors. Measures are applied according to a frequency appropriate to the management type, according to various simulated redemption scenarios, and are compared with predefined alert thresholds. The liquidity of collateral is monitored weekly using identical parameters.

1. Management report

UCIs identified as sensitive because of the level of illiquidity identified or because of the impact of forced sales undergo additional analysis of their liabilities. The frequency of these tests changes according to the asset management techniques used and/or the markets in which the UCIs invest. As a minimum requirement, the results of these analyses are presented in governance committee meetings.

The asset management company therefore relies on a liquidity control and monitoring system that ensures that investors are treated fairly. Any change to this policy during an accounting period that affects the UCI's documentation will be indicated in the "material changes" section of this document.

■ Treatment of non-liquid assets

Positions held at Clearstream in Russian government bonds denominated in Rubles are valued at 0, as it is impossible to settle transactions in these instruments at this central depository.

1. Management report

d) Environmental, social and governance (ESG) criteria

The UCI does not take into account all three ESG criteria at the same time.

SFDR :

Within the framework of the "SFDR" regulation (Regulation (EU) 2019/2088 of the European Parliament of November 27th, 2019 on the publication of information on sustainability in the financial services sector), this UCITS/IAF does not come under the Article 8, nor Article 9 of SFDR and, therefore, belongs to the category of funds covered by Article 6.

The main criteria taken into account in investment decisions are macroeconomic analysis, capital flows, and relative market valuation.

Consideration of sustainability risk (as defined in SFDR as an environmental, social, or governance event or circumstance that, should it occurs, could have a material, adverse impact on the value of an investment) is performed through systematic exclusions based on the regulations in place and the sectors and countries subject to international sanctions.

In addition, the investment firm, in the management of this UCITS/IAF:

- Excludes all actors involved in the production, use, storage, marketing, and transfer of anti-personnel mines and cluster bombs, in line with the Oslo and Ottawa conventions;
- Imposes additional control and approval from the Company's "Compliance" department for any investment linked to issuers based in countries identified as "high risk" in terms of combat against money laundering and terrorism financing (including in particular, but not exclusively, countries considered by the Financial Action Task Force (FATF) as exhibiting strategic deficiencies in their method for combating money laundering and terrorism financing, the European Union lists of high risk countries and non-cooperative jurisdictions for tax purposes, etc.).

The UCITS is currently unable to take into account the principal adverse impacts (or "PAI") of investment decisions on sustainability factors due to:

- A lack of availability of reliable data;
- The use of derivative financial instruments for which PAI aspects are not yet accounted for, nor defined.

Taxonomy (Regulation [EU] 2020/852) :

This UCITS/IAF's underlying investments do not take into account EU criteria regarding environmentally sustainable economic activities.

2. Governance and compliance obligations

■ Procedure for selecting and assessing intermediaries and counterparties – Order execution

As part of the asset management company's compliance with its "best execution/best selection" obligation, the selection and monitoring of intermediaries are covered by a specific process.

The asset management company's policies regarding intermediary/counterparty selection and order execution are available on its website at <http://www.h2o-am.com> (*in the "Regulatory informations" section*).

■ Voting policy

Details of how the asset management company intends to exercise voting rights attached to shares held by UCIs in their portfolios can be viewed on its website at <http://www.h2o-am.com> (*in the "Regulatory informations" section*).

The voting policy is available in this same section and is described in the shareholder engagement and voting policy.

■ Remuneration policy

H2O AM applies a remuneration policy in line with the UCITS V and AIFM directives. These directives imply that asset management companies must establish and apply remuneration policies and practices that encourage healthy and effective risk management and do not encourage risk-taking that is inconsistent with the UCI's risk profile.

The remuneration policy is subject to supervision and approval by a remuneration committee consisting of members who do not have executive roles within H2O. The remuneration policy is validated once per year by the H2O remuneration committee. The committee was set up in 2012 to ensure that remuneration arrangements support both H2O's strategic targets as well as the recruitment, motivation and retention of staff members, while complying with rules established by regulatory and governance authorities.

Regarding the remuneration policy, employees are paid on the basis of a fixed salary in accordance with market practices plus an annual bonus, based on their individual performance and their contribution to the overall business. Employees who are also shareholders are entitled to dividends up to their stake in the capital of the group's holding company, based on the group's profitability.

The remuneration of the asset management company's staff, including "identified staff members" (i.e. material risk-takers who may affect the risk profile of the asset management company or the portfolios it manages) is based on the following principles and criteria:

- A risk management approach and a remuneration structure that are healthy, effective and consistent with the interests of the asset management company, portfolios and investors, including solid policies and procedures regarding valuations, risk management, liquidity and regulations;
- Employee wages that are in line with market levels in view of their roles.

2. Governance and compliance obligations

The asset management company only grants discretionary bonuses after it has added together and received performance and management fees for the period concerned. Variable remuneration, including the deferred portion, is discretionary, and so may fall to zero if negative returns occur.

Information about employees' remuneration

The asset management company has designated the following people as "identified staff members":

- a) management;
 - b) portfolio management, client relations and business development staff members;
 - c) persons responsible for the middle office, quantitative development, finance, legal and human resources;
 - d) staff members with control functions; and
 - e) any employee whose total remuneration places him/her in the same remuneration bracket as management and risktakers
- (b, c and d).

Apart from the identified staff members above, the asset management company does not have any material risk-takers.

Above defined thresholds, H₂O ensures that a substantial proportion of any component of variable remuneration received by identified staff members is deferred and consists of:

- a) units or shares in the UCITS where possible; or
- b) equivalent stakes in the portfolios concerned where possible; or
- c) share-based compensation relating to the portfolios concerned; or
- d) equivalent non-monetary instruments relating to the portfolios concerned by incentives, which are as effective as any of the instruments referred to in points a) to c).

Instruments are subject to an appropriate retention policy designed to align incentives for staff members with the long-term interests of:

- a) the portfolios they manage; and
- b) investors in those portfolios; and
- c) H₂O.

2. Governance and compliance obligations

The asset management company's staff members are remunerated solely by the asset management company itself and not by the portfolios they manage. H2O has ensured that all variable remuneration, including all deferred portions, is only paid or awarded if it is:

(1) Justified by the performance of:

- a) portfolios;
- b) the commercial unit; and
- c) the person concerned; and

(2) Sustainable given H2O's overall financial position. You will find below the figures relating to the remuneration:

€ equivalent

H2O AM EUROPE/H2O MONACO	2023	2022
Wages and salaries	12,719,374	10,479,552
<i>o/w Fixed wages</i>	5,888,378	5,573,634
<i>o/w Bonus</i>	6,830,996	4,905,918
headcounts	28	26

Of total remuneration (fixed and variable) paid during the 2023 financial year, 11 421 215 euros were related to staff whose activities have a significant impact over the risk profile of the company or the funds managed.

3. Fees and Tax

■ Brokerage fees

The asset management company pays research costs directly.

■ Withholding taxes

The UCI is not affected by withholding taxes.

4. Auditor's Certification

KPMG S.A.
Tour Eqho
2 avenue Gambetta
CS 60055
92066 Paris la Défense Cedex

This is a translation into English of the statutory auditors' report on the financial statements of the Fund issued in French and it is provided solely for the convenience of English speaking users.

This statutory auditors' report includes information required by European regulation and French law, such as information about the verification of the management report.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

**Fonds Commun de Placement
H2O MODERATO FCP**

39, Avenue Pierre 1er de Serbie - 75008 Paris

**Statutory auditor's report on the financial statements
Year ended 30 September 2024
(free translation of a French language original)**

To shareholders,

Opinion

In compliance with the engagement entrusted to us by the board of directors of the Fund's management company, we have audited the accompanying financial statements of the "organisme de placement collectif" H2O MODERATO FCP created as a "fonds commun de placement" for the year ended 30 September 2024.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the Fund as at 30 September 2024 and of the results of its operations for the year then ended in accordance with French accounting principles.

Basis for Opinion

Audit Framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the Statutory Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

Independence

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (code de commerce) and the French Code of Ethics (code de déontologie) for statutory auditors rules applicable to us, for the period from 30 september 2023 to the date of our report.

Emphasis of matter

We draw your attention to the consequences of the change in accounting method outlined in the notes to the annual financial statements. Our opinion is not modified in respect of this matter.

Justification of Assessments

In accordance with the requirements of Articles L.821-53 and R.821-180 of the French Commercial Code (code de commerce) relating to the justification of our assessments, we inform you that, in our professional judgment, the most significant assessments we have made pertain to the appropriateness of the accounting principles applied, in particular with respect to the financial instruments in the portfolio, and to the presentation of all the accounts, in accordance with the accounting plan of an open-end mutual fund.

These matters were addressed in the context of our audit of the financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on specific items of the financial statements.

Verification of the Management Report of the Fund's management company

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report of the Fund's management company.

Responsibilities of the Management Company for the Financial Statements

The management company is responsible for the preparation and fair presentation of the financial statements in accordance with French accounting principles and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Fund or to cease operations.

The financial statements were approved by the management company.

Statutory Auditor's Responsibilities for the Audit of the Financial Statements

Our role is to issue a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L.821-55 of the French Commercial Code (code de commerce), our statutory audit does not include assurance on the viability of the Fund or the quality of management of the affairs of the Fund.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- Identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management company in the financial statements.
- Assesses the appropriateness of the management company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Fund to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein.
- Evaluates the overall presentation of the financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

Paris la Défense, on the 3 february 2025

The statutory auditor

■ Annual financial statements – Notes

A. General information

A1. Characteristics and activity of the open-ended uci

A1a. Management strategy and profile

The Fund's objective is to outperform the daily compounded €STR index by 2% per year over its minimum recommended investment period for EUR-I units, by 1.90% per year over its minimum recommended investment period for the EUR-N unit, and by 1.10% per year over its minimum recommended investment period for the EUR-R unit after the deduction of management and operating fees.

The objective of the unit hedged against the currency risk (HCHF-R units) is to outperform the daily capitalised SARON (Swiss Average Rate Overnight) by 1.10% per year over its minimum recommended investment period, after the deduction of management and operating fees.

The objective of the unit hedged against the currency risk (HCHF-I units) is to outperform the daily capitalised SARON (Swiss Average Rate Overnight) by 2% per year over its minimum recommended investment period, after the deduction of management and operating fees.

The objective of the unit hedged against the currency risk (HUSD-R units) is to outperform the daily capitalised SOFR (Secured Overnight Financing Rate) by 1.10% per year over its minimum recommended investment period, after the deduction of management and operating fees.

The objective of the unit hedged against the currency risk (HUSD-I units) is to outperform the daily capitalised SOFR (Secured Overnight Financing Rate) by 2% per year over its minimum recommended investment period, after the deduction of management and operating fees.

Potential subscribers are reminded that the various performance objectives listed in this "Management objective" section are based on performance assumptions agreed by the Management Company and under no circumstances guarantee the Fund's return or performance.

The prospectus / management regulation of the UCITS describe these characteristics in a complete and precise manner.

5. Annual accounts

A2. Accounting policies

The annual accounts are presented for the first time in the form provided for by ANC Regulation No. 2020-07 amended by ANC Regulation 2022-03.

1 - Changes in accounting methods including presentation relative to the application of the new accounting regulation relating to the annual accounts of variable capital collective investment undertakings (ANC Regulation 2020-07 amended).

This new regulation imposes changes in accounting methods including changes in the presentation of the annual accounts. Comparability with the accounts of the previous financial year cannot therefore be achieved.

NB: the statements concerned are (in addition to the balance sheet and the income statement): B1. Changes in equity and financing liabilities; D5a. Allocation of distributable amounts relating to net income and D5b. Allocation of distributable amounts relating to net realised capital gains and losses.

Thus, in accordance with the 2nd paragraph of Article 3 of ANC Regulation 2020-07, the financial statements do not present the data for the previous financial year; the N-1 financial statements are included in the appendix.

These changes mainly concern:

- the structure of the balance sheet, which is now presented by type of eligible assets and liabilities, including loans and borrowings;
- the structure of the income statement, which is significantly modified; the income statement includes in particular: exchange rates differences on financial accounts, unrealised capital gains or losses, realised capital gains and losses, and transaction costs;
- the removal of the off-balance sheet table (part of the information on the items in this table now appears in the appendices);
- the removal of the option to record included expenses at cost price (without retroactive impact for funds previously applying the included expenses method);
- the distinction between convertible bonds and other bonds, as well as their respective accounting records;
- a new classification of target funds held in the portfolio according to the model: UCITS / AIF / Others;
- the accounting of forward foreign exchange commitments which is no longer performed at the balance sheet level but at the off-balance sheet level, with information on forward foreign exchange covering a specific part;
- the addition of information relating to direct and indirect exposures on the different markets;
- the presentation of the inventory which now distinguishes eligible assets and liabilities, and forward financial instruments;
- the adoption of a single presentation model for all types of UCITS;
- the elimination of the aggregation of accounts for umbrella funds.

5. Annual accounts

2- Accounting rules and methods applied during the financial year

The general principles of accounting apply (subject to the changes described above):

General accounting principles apply:

- fair picture, comparability, going concern,
- regularity, trustworthiness,
- prudence,
- consistency of methods employed from one accounting period to another.

The accounting method used to record income from fixed-income securities is that of interest received. Acquisitions and disposals of securities are recorded excluding costs.

The reference currency for portfolio accounting is euros.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recorded in financial statements according to the historical cost method and recorded in the balance sheet at their current value which is determined by the last known market value or, in the absence of existing market, by any external means or by using financial models.

The differences between the current values used when calculating the net asset value and the historical costs of the securities when they entered the portfolio are recorded in "estimation differences" accounts.

Securities that are not denominated in the currency of the portfolio are valued in accordance with the principle outlined below, then converted into the currency of the portfolio according to the exchange rate on the day of the valuation.

Deposits:

Deposits with a residual life of less than or equal to 3 months are valued according to the linear method.

Equities, bonds and other securities traded in a regulated market or equivalent:

For the computation of the Net Asset Value, shares and other securities traded on a regulated or similar market are valued on the basis of the last stock market price of the day.

Bonds and similar securities are valued at the closing price communicated by various financial service providers. These are the prices and market data relating to the processed transactions which make it possible to approximate as accurately as possible the fair value of the assets in the portfolio. The management company retains all the supporting documents for these prices used, in accordance with the management company's valuation policy. Accrued interest on bonds and similar securities is calculated up to the date of the Net Asset Value.

5. Annual accounts

Bonds are valued on the basis of a Bloomberg composite rating retrieved at 5:00 p.m. (Paris time) in accordance with the WMR rate for the currency on the valuation date.

Transferable securities for which the price has not been recorded on the valuation date or has been adjusted are valued by the Management Company at their probable trading value.

Russian Bonds Valuation

Following the invasion of Ukraine by Russia and the ensuing international sanctions, the prices displayed by the various financial service providers for Russian sovereign bonds are no longer representative of market conditions. Thus, as of September 30, 2024, the management company values government bonds that fall within the scope of EU sanctions vis-à-vis the NSD (National Settlement Depository) as follows:

- The valuation of ruble-denominated bonds held at Clearstream is 0, since this central depository does not allow transactions (even intra-Clearstream) on these assets.
- The valuation of bonds denominated in US dollars is determined on the basis of data received from the Bloomberg data provider.

Finally, all accrued coupons or coupons pending payment relating to Russian bonds have been offset by a provision of equivalent amount but opposite sign.

Equities, bonds and other securities not traded on a regulated or similar market

Transferable securities for which the price has not been recorded on the valuation date or has been adjusted are valued by the Management Company at their probable trading value.

In the case of transferable securities that are not listed or those for which a price is not listed on the valuation date, as well as other items on the balance sheet, the Management Company adjusts its valuation on the basis of variations that seem probable in view of current events. These valuations and their justification are communicated to the statutory auditor during his controls.

Foreign securities are converted into the equivalent value in euros in accordance with the WMR rate on the valuation date.

UCITS/AIFs/Investment funds

Units or shares of UCITS/AIFs or investment funds are valued at the last known net asset value. Foreign undertakings for collective investment that carry out valuations at times that are incompatible with the calculation of the Fund's net asset value are valued on the basis of estimates supplied by the administrators of the undertakings, under the supervision and responsibility of the Management Company.

Titres de créances négociables :

Les titres de créances négociables sont valorisés selon les règles suivantes :

- les BTAN et les BTF sont valorisés sur la base d'une moyenne de cours contribués récupérés auprès des teneurs de marchés,

5. Annual accounts

- les titres de créances à taux variables non cotés sont valorisés au prix de revient corrigé des variations éventuelles du « spread » de crédit.
- les autres titres de créances négociables à taux fixe (certificats de dépôts, billets de trésorerie, bons des institutions financières ...) sont évalués sur la base du prix de marché.

En l'absence de prix de marché incontestable, les TCN sont valorisés par application d'une courbe de taux éventuellement corrigé d'une marge calculée en fonction des caractéristiques du titre (de l'émetteur).

Toutefois les titres de créances négociables dont la durée de vie résiduelle est inférieure ou égale à 3 mois peuvent être évalués de façon linéaire.

Negotiable debt securities

Negotiable debt securities are valued in accordance with the following rules:

- French fixed-rate, annual interest treasury bills (Bons du Trésor à taux fixes et à intérêt annuel – BTANs) and fixed rate bills (Bons du Trésor à taux fixe – BTFs) are valued on the basis of an average of contributed prices obtained from market makers;
- unlisted variable-rate debt securities are valued at cost price, adjusted to take account of any potential variations in credit spread;
- other fixed-rate negotiable debt securities (certificates of deposit, commercial paper, warrants issued by financial institutions, etc.) are valued on the basis of their market price.

In the absence of an indisputable market price, negotiable debt securities are valued by applying a yield curve, adjusted, if necessary, by a margin calculated on the basis of the characteristics of the security (of the issuer):

However, negotiable debt securities with a residual maturity of three months or less could be valued using the straight-line method.

Temporary purchases and sales of securities

Contracts for temporary purchases and sales of transferable securities and equivalent transactions are valued at the contract rate, adjusted for any margin calls (valued in accordance with the conditions set out in the contract).

In the case of transferable securities that are unlisted or whose price has not been listed on the valuation date, as well as other items on the balance sheet, the Management Company's board of directors adjusts its valuation on the basis of variations that seem likely in view of current events.

Certain fixed-rate transactions with a maturity of over three months may be valued at the market price.

5. Annual accounts

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments negotiated on regulated markets are valued at the daily clearing price.

Forward exchange contracts:

These are valued at the currencies' exchange rate on the valuation date, allowing for the amortisation of the carry-forward/discount.

They may be valued at market price based on forward foreign exchange curves.

Forward financial instruments not traded on a regulated or similar market:

Swaps

Asset swaps are valued at the market price based on the issuer's credit spreads indicated by the market makers. In the absence of a market maker, the spreads will be obtained by any means from the available contributors.

Asset swaps with a maturity of less than or equal to three months may be valued using the straight-line method.

Other swaps are valued at market price based on yield curves.

CDS :

Complex instruments such as CDS, SES and complex options are valued according to their type using an appropriate method.

Off-balance sheet commitments:

Firm forward contracts are presented at their market value in off-balance sheet commitments at the rate used in the portfolio.

Conditional forward transactions are translated into their underlying equivalent.

Commitments on swap contracts are presented at their nominal value, or in the absence of nominal value, for an equivalent amount

5. Annual accounts

Swing pricing mechanism of net asset value with trigger threshold

From the inception of the Fund, the Management Company has implemented a method of adjusting the net asset value (NAV) with a trigger threshold.

Dealing costs are incurred relating to transactions carried out on the assets of the Fund as a result of the movements (subscriptions/redemptions) of the Fund's liabilities. The purpose of this mechanism, which is governed by a policy, is to protect the holders who remain in the Fund by making them bear the lowest possible cost. The result is an adjusted "swing" NAV.

If, on a NAV calculation date, the total net subscription/redemption orders of investors over all the Fund's share classes exceeds a predetermined threshold, on the basis of objective criteria by the Management Company as a percentage of net assets, the NAV may be adjusted upwards or downwards, to take into account readjustment costs attributable to net subscription/redemption orders, respectively. If the Fund issues more than one class of units, the NAV of each class of units is calculated separately, but any adjustment has the same impact on the total NAV of the unit classes of the Fund.

The readjustment and triggering cost parameters are determined by the Management Company and reviewed periodically. These costs are estimated by the Management Company on the basis of the transaction costs, the purchase and sale ranges, and any applicable taxes to the Fund.

The adjustment mechanism will be applied at some point in the future, however, it is not possible to predict accurately when or how often the Management Company will make such adjustments.

Investors are advised that the volatility of the Fund's NAV may not reflect only the volatility of the securities held in the portfolio due to the application of the adjustment mechanism.

The swing-out NAV is the only net asset value of the Fund and the only one communicated to unitholders of the Fund. However, in the event of an outperformance fee, it is calculated on the NAV before the adjustment mechanism is applied.

Direct exposure to credit markets: principles and rules used to break down the elements of the UCI portfolio (table C1f.):

The ratings used for this table are defined as follows:

- If the issue is rated simultaneously by the three rating agencies, then the security is classified as "Investment Grade" if the management company's rating and at least two of the three ratings carried out by the agencies are "Investment Grade".
- If the issue is rated by two rating agencies only, then the security is classified as "Investment Grade" if the management company's rating and at least one of the two ratings carried out by the agencies are "Investment Grade".
- If the issue is rated by one rating agency only, then the security is classified as "Investment Grade" if the management company's rating and the agency's rating are "Investment Grade".

5. Annual accounts

- In the event of an unrated issue, the issuer's rating will be taken into account.
- If the issue and issuer are not rated, then the security appears in the "Unrated" category.
- Rated issues and issuers that are not categorised as "Investment Grade" are referenced as "Non-Investment Grade".

Management fees

The management fees are calculated at each valuation on the net assets.

These costs are charged to the profit and loss account of the UCI.

Management fees are paid in full to the management company, which bears all the operating costs of the UCIs.

Management fees do not include transaction fees.

The maximum rate applied on the basis of net assets is:

- For all categories of R shares: 1,40% including tax.
- For all categories of N shares: 0,60% including tax.
- For all categories of I shares: 0,50% including tax.

Operating fee and other services

Operating costs and other services are calculated at each valuation on the net assets.

These costs are charged to the income statement of the UCI.

The rate applied on the basis of the net assets is 0.15% including tax maximum for all shares.

Performance Fees

Variable management fees are calculated using the following method:

25% including tax of the outperformance relative to the benchmark index.

HCHF-I, HCHF-N and HCHF-R units are hedged against the currency risk for the portion of assets affected by the euro/Swiss franc exchange rate. As such, slight structural differences in outperformance will be detected when comparing against I, N and R units in euros. These differences are mainly linked to imperfections in hedging against the currency risk and to the difference between Swiss interest rates (SARON) and the €STR.

HUSD-I and HUSD-R units are hedged against the currency risk for the portion of assets affected by the euro/US dollar exchange rate. As such, slight structural differences in outperformance will be detected when comparing against I and R units in euros. These differences are mainly linked to imperfections in hedging against the currency risk and to the difference between interest rates (SOFR) and the €STR.

5. Annual accounts

HGBP-I units are hedged against the currency risk for the portion of assets affected by the euro/GBP exchange rate. As such, slight structural differences in outperformance will be detected when comparing against I in euros. These differences are mainly linked to imperfections in hedging against the currency risk and to the difference between interest rates ((SONIA)) and the €STR.

The performance of each of the Fund's unit classes is calculated on the basis of changes in the net asset value (NAV) of this unit class.

The performance fee applicable to a particular unit class is based on a comparison of the valued assets with its reference assets for this unit class (a benchmark-based methodology). Any underperformance of the Fund in relation to the benchmark must be offset before performance fees become payable, regardless of the underperformance period concerned.

The valued asset, the reference asset and the High Water Mark are calculated for each share class and are understood as follows:

a) **The valued assets** are equal to the amount of the fund's assets, corresponding to the concerned share class, valued according to the rules applicable to assets and after accounting for the operating and management costs corresponding to the said share class.

b) **The High-Water Mark ("HWM")**, corresponds to the highest NAV of the fund, corresponding to the concerned share class, observed at the end of each observation period since the launch date of the share class and for which performance fees have been charged.

c) **The reference asset** is, during the observation period and each time the net asset value is calculated, restated for the subscription/redemption amounts corresponding to the share class, and valued based on the performance of the applicable benchmark index.

(i) if the valued assets at the end of the previous observation period are higher than the reference assets on that date, the reference assets are then equal to the HWM multiplied by the number of units in the unit class concerned on that same date;

(ii) if the valued assets at the end of the previous observation period are lower than or equal to the reference assets on that date, or during the observation period, the reference assets are adjusted for subscriptions/redemptions and valued in accordance with the performance of the reference index applicable to the unit class.

The reference rates are as follows:

The reference index is the capitalised €STR plus 2% per year for I units, plus 1.90% for EUR-N units and plus 1.10% for EUR-R. It is denominated in euros.

The reference index is the daily capitalised SARON plus 1.10% per year for HCHF-R units and plus 2% per year for HCHF-I units. It is denominated in Swiss francs.

The reference index is the daily capitalised SOFR plus 1.10% per year for HUSD-R units and plus 2% per year for HUSD-I units. It is denominated in US dollars.

5. Annual accounts

We would like to remind you that information relating to the benchmark's past performance can be found on the website www.h2o-am.com, as well as in the Fund's monthly reports and annual report, which can also be found on the same website.

The observation period is defined as follows:

- Initial observation period: from 1 October 2020 to the last trading day of September 2021;
- For the following observation periods: from the first trading day in October to the last trading day in September of the following year.

At the beginning of each observation period, the reference assets used will be the highest of the asset value recorded on 1 October 2020 and all valued assets observed on the last trading day of each observation period established since the launch of the Fund. Since the UCITS is the result of a demerger operation provided for in Article L.214-8-7 of the French Monetary and Financial Code, the assets recorded on 8 October 2020 will be the higher of the assets recorded on the day of the demerger and the reference assets of the demerged H2O MODERATO fund from which the assets retained by "H2O MODERATO SP" (ex H2O MODERATO) were proportionally deducted. If necessary, the reference assets will be adjusted to take into account the amounts of any subscriptions/redemptions occurring between the recording date for the reference assets and the start of the new observation period.

If, during the observation period and for a given unit class, the valued assets exceed the reference assets as defined above, the performance fee will represent up to 25% of the difference between these two asset values. A provision for performance fees is then taken into account when calculating the net asset value.

If, during the observation period and for a given unit class, the valued assets are lower than the reference assets, the performance fee will be zero. In this case, any previously approved provision will be readjusted by a reversal.

The final performance fee will not be calculated until the end of the relevant observation period. The fee is then "crystallised" and, as such, may be charged. In the event of redemption during the observation period, the portion of the provision corresponding to the number of units redeemed accrues permanently to the Management Company and may be charged before the end of the observation period in progress.

As performance fees are based on the performance of each unit class, they are calculated daily and taken into account when calculating the NAV of the unit class concerned. This method cannot therefore ensure that the actual performance of each investment is individually monitored, which may, in some cases, result in residual inequity between unitholders.

5. Annual accounts

In other words, and by way of example, any investors subscribing during a period of overperformance when a performance fee has been provisioned "lose less" if the net asset value falls, as they benefit from mitigation as a result of drawing on the provision, even though their investment did not contribute to establishing this provision. At the same time, investors who have already invested will not benefit from the full provision established since the beginning of the observation period in question (or from their subscription date, if this is after the beginning of this period).

Similarly, any investors subscribing during a period of underperformance when no performance fees have been provisioned "gain more" if the net asset value increases, as they benefit from their investment appreciating, without having contributed to establishing provisions as long as the valued assets of the unit class are lower than the reference assets. Nevertheless, for all unitholders, these investments reduce the returns required to make up the difference between the valued assets and the reference assets. Performance fees will therefore be provisioned sooner.

Furthermore, if the performance of a particular unit class over a given observation period is negative, performance fees may be charged under certain circumstances, if the performance of the reference index is worse than that of the unit class in question.

Allocation of distributable amounts

Definition of distributable amounts:

Distributable sums consist of:

Income:

Net income increased by retained earnings, plus or minus the balance of the income adjustment account.

Capital gains and losses:

Realised capital gains, net of fees, less realised capital losses, net of fees, recorded during the financial year, plus net capital gains of the same nature recorded in previous financial years that were not distributed or capitalised, plus or minus the balance of the capital gains adjustment account.

The amounts referred to as "income" and "capital gains and losses" may be distributed, in whole or in part, independently of each other.

The payment of distributable amounts is made within a maximum period of five months following the end of the financial year.

When the UCITS is approved under Regulation (EU) No 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, by way of derogation from the provisions of I, the distributable amounts may also include unrealised capital gains.

ANNEXES AUX COMPTES ANNUELS

1. Règles et méthodes comptables

Les comptes annuels sont présentés sous la forme prévue par le règlement ANC n° 2014-01, modifié.

Les principes généraux de la comptabilité s'appliquent :

- image fidèle, comparabilité, continuité de l'activité,
- régularité, sincérité,
- prudence,
- permanence des méthodes d'un exercice à l'autre.

Le mode de comptabilisation retenu pour l'enregistrement des produits des titres à revenu fixe est celui des intérêts encaissés.

Les entrées et les cessions de titres sont comptabilisées frais exclus.

La devise de référence de la comptabilité du portefeuille est en euro.

La durée de l'exercice est de 12 mois.

Règles d'évaluation des actifs

Les instruments financiers sont enregistrés en comptabilité selon la méthode des coûts historiques et inscrits au bilan à leur valeur actuelle qui est déterminée par la dernière valeur de marché connue ou à défaut d'existence de marché par tous moyens externes ou par recours à des modèles financiers.

Les différences entre les valeurs actuelles utilisées lors du calcul de la valeur liquidative et les coûts historiques des valeurs mobilières à leur entrée en portefeuille sont enregistrées dans des comptes « différences d'estimation ».

Les valeurs qui ne sont pas dans la devise du portefeuille sont évaluées conformément au principe énoncé ci-dessous, puis converties dans la devise du portefeuille suivant le cours des devises au jour de l'évaluation.

Dépôts :

Les dépôts d'une durée de vie résiduelle inférieure ou égale à 3 mois sont valorisés selon la méthode linéaire.

Actions, obligations et autres valeurs négociées sur un marché réglementé ou assimilé :

Pour le calcul de la valeur liquidative, les actions et autres valeurs négociées sur un marché réglementé ou assimilé sont évaluées sur la base du dernier cours de bourse du jour.

Les obligations et valeurs assimilées sont évaluées au cours de clôture communiqués par différents prestataires de services financiers. Il s'agit des prix et données de marché relatives aux transactions traitées qui permettent d'approcher au plus près la juste valeur des actifs en portefeuille. La société de gestion conserve l'ensemble des documents justificatifs à ces cours retenus, conformément à la politique de valorisation de la société de gestion. Les intérêts courus des obligations et valeurs assimilées sont calculés jusqu'à la date de la valeur liquidative.

Les obligations sont valorisées sur la base d'un composite de cours Bloomberg récupéré à 17 h (heure de Paris) suivant le cours WMR de la devise au jour de l'évaluation.

Les valeurs mobilières dont le cours n'a pas été constaté le jour de l'évaluation ou dont le cours a été corrigé sont évaluées, sous la responsabilité de la société de gestion à leur valeur probable de négociation.

Valorisation des obligations russes

Suite à l'invasion de l'Ukraine par la Russie et les sanctions internationales, les cours affichés par les différents prestataires de services financiers pour les obligations d'Etats russes ne sont plus représentatifs des conditions de marchés. Ainsi, au 29 Septembre 2023, conformément aux dispositions prévues dans le plan comptable OPCVM, et compte tenu des restrictions de marché sur ces actifs, la société de gestion a été conduite à retenir, pour valoriser les obligations d'Etat libellées en rouble ou devise étrangère (euro et dollar US), les principes suivants :

- l'offre (bid) est à 0 si le titre rentre dans le champ d'application des sanctions de l'UE vis-à-vis du NSD (National Settlement Depository). Sinon, elle est déterminée en fonction des cotations reçues de ses contreparties.

- la demande (ask) est déterminée en fonction des cotations reçues de ses contreparties.

Le prix retenu dans la valeur liquidative est alors défini comme la moyenne de l'offre et de la demande (mid) sauf en cas d'activation du swing : en cas de souscriptions supérieures au seuil de déclenchement du swing, le prix retenu est égal à la demande (ask) ; en cas de rachats supérieurs au seuil de déclenchement du swing, le prix retenu est égal à l'offre (bid).

Enfin, tous les coupons courus ou les coupons en attente de paiement liés aux obligations russes ont été compensés par une provision de montant équivalent mais de signe opposé.

Ce mode de valorisation a été retenu en lieu et place de leur valeur probable de négociation pour approximer une valeur actuelle de ces actifs : ce mode de valorisation, qui conduit à une forte dépréciation par rapport à la valeur des transactions observées sur le marché, a été retenu pour matérialiser les fortes restrictions auxquelles le fonds est soumis. La possibilité pour le fonds d'accéder au marché suite à une levée des restrictions des autorités françaises liées aux sanctions européennes vis-à-vis de la Russie permettrait de revenir à un mode de valorisation basé uniquement sur les transactions et d'établir avec certitude la valeur du portefeuille.

Compte tenu de cette incertitude, la valeur actuelle retenue en portefeuille pourrait ne pas refléter dans un sens ou dans l'autre la valeur de ces positions.

Actions, obligations et autres valeurs non négociées sur un marché réglementé ou assimilé :

Les valeurs mobilières dont le cours n'a pas été constaté le jour de l'évaluation ou dont le cours a été corrigé sont évaluées, sous la responsabilité de la société de gestion à leur valeur probable de négociation.

Pour les valeurs mobilières non cotées ou celles dont le cours n'a pas été coté le jour de l'évaluation, ainsi que pour les autres éléments du bilan, la société de gestion corrige leur évaluation en fonction des variations que les événements en cours rendent probables. Ces évaluations et leur justification sont communiquées au commissaire aux comptes à l'occasion de ses contrôles.

Les valeurs étrangères sont converties en contre-valeur en euros suivant le cours des devises WMR au jour de l'évaluation.

Titres de créances négociables :

Les Titres de Créances Négociables et assimilés qui ne font pas l'objet de transactions significatives sont évalués de façon actuarielle sur la base d'un taux de référence défini ci-dessous, majoré le cas échéant d'un écart représentatif des caractéristiques intrinsèques de l'émetteur :

TCN dont l'échéance est inférieure ou égale à 1 an : Taux interbancaire offert en euros (Euribor) ;

TCN dont l'échéance est supérieure à 1 an : Taux des Bons du Trésor à intérêts Annuels Normalisés (BTAN) ou taux de l'OAT (Obligations Assimilables du Trésor) de maturité proche pour les durées les plus longues.

Les Titres de Créances Négociables d'une durée de vie résiduelle inférieure ou égale à 3 mois pourront être évalués selon la méthode linéaire.

Les Bons du Trésor sont valorisés au taux du marché communiqué quotidiennement par la Banque de France.

OPC détenus :

Les parts ou actions d'OPC seront valorisées à la dernière valeur liquidative connue.

Opérations temporaires sur titres :

Les titres reçus en pension sont inscrits à l'actif dans la rubrique « créances représentatives des titres reçus en pension » pour le montant prévu dans le contrat, majoré des intérêts courus à recevoir.

Les titres donnés en pension sont inscrits en portefeuille acheteur pour leur valeur actuelle. La dette représentative des titres donnés en pension est inscrite en portefeuille vendeur à la valeur fixée au contrat majorée des intérêts courus à payer.

Les titres prêtés sont valorisés à leur valeur actuelle et sont inscrits à l'actif dans la rubrique « créances représentatives de titres prêtés » à la valeur actuelle majorée des intérêts courus à recevoir.

Les titres empruntés sont inscrits à l'actif dans la rubrique « titres empruntés » pour le montant prévu dans le contrat, et au passif dans la rubrique « dettes représentatives de titres empruntés » pour le montant prévu dans le contrat majoré des intérêts courus à payer.

Instruments financiers à terme :

Instruments financiers à terme négociés sur un marché réglementé ou assimilé :

Les instruments financiers à terme négociés sur les marchés réglementés sont valorisés au cours de compensation du jour.

Les changes à termes :

Ils sont valorisés au cours des devises au jour de l'évaluation en tenant compte de l'amortissement du report/déport.

Ils peuvent être valorisés au prix de marché à partir des courbes de change à terme observées.

Instruments financiers à terme non négociés sur un marché réglementé ou assimilé :

Les swaps :

Les contrats d'échange de taux d'intérêt et/ou de devises sont valorisés à leur valeur de marché en fonction du prix calculé par actualisation des flux d'intérêts futurs aux taux d'intérêts et/ou de devises de marché. Ce prix est corrigé du risque de signature.

Les swaps d'indice sont évalués de façon actuarielle sur la base d'un taux de référence fourni par la contrepartie.

Les autres swaps sont évalués à leur valeur de marché ou à une valeur estimée selon les modalités arrêtées par la société de gestion.

Les CDS :

Les instruments complexes comme les « CDS », les « SES » ou les options complexes sont valorisés en fonction de leur type selon une méthode appropriée.

Engagements Hors Bilan :

Les contrats à terme ferme sont portés pour leur valeur de marché en engagements hors bilan au cours utilisé dans le portefeuille.

Les opérations à terme conditionnelles sont traduites en équivalent sous-jacent.

Les engagements sur contrats d'échange sont présentés à leur valeur nominale, ou en l'absence de valeur nominale pour un montant équivalent.

Frais de gestion

Les frais de gestion sont calculés à chaque valorisation sur l'actif net.

Ces frais sont imputés au compte de résultat de l'OPC.

Les frais de gestion sont intégralement versés à la société de gestion qui prend en charge l'ensemble des frais de fonctionnement des OPC.

Les frais de gestion n'incluent pas les frais de transaction.

Le taux maximum appliqué sur la base de l'actif net est de :

- pour toutes les catégories de parts R : 1.40% TTC,
- pour toutes les catégories de parts N : 0.60% TTC,
- pour toutes les catégories de parts I : 0.50% TTC.

Frais de fonctionnement et autres services

Les frais de fonctionnement et autres services sont calculés à chaque valorisation sur l'actif net.

Ces frais sont imputés au compte de résultat de l'OPC.

Le taux appliqué sur la base de l'actif net est 0,15% TTC maximum pour toutes les parts.

Commission de surperformance :

Les frais de gestion variables sont calculés selon la méthode suivante :
25 % TTC de la surperformance par rapport à l'Indice de référence.

Les parts HCHF-I, HCHF-N et HCHF-R font l'objet d'une couverture de change pour la partie de l'actif relative à la parité de l'Euro contre le franc suisse. A ce titre, de légères différences structurelles de surperformance seront constatées par rapport à celles des parts EUR-I, EUR-N et EUR-R en Euro. Ces différences sont notamment liées aux imperfections de la couverture de change et au différentiel de taux d'intérêts suisse (SARON) par rapport à l'€STR.

Les parts HUSD-I et HUSD-R font l'objet d'une couverture de change pour la partie de l'actif relative à la parité de l'Euro contre le Dollar US. A ce titre, de légères différences structurelles de surperformance seront constatées par rapport à celles des parts EUR-I et EUR-R en Euro. Ces différences sont notamment liées aux imperfections de la couverture de change et au différentiel de taux d'intérêt (SOFR) par rapport à l'€STR.

Les parts HGBP-I font l'objet d'une couverture de change pour la partie de l'actif relative à la parité de l'Euro contre la Livre Sterling. A ce titre, de légères différences structurelles de surperformance seront constatées par rapport à celles des parts EUR-I en Euro. Ces différences sont notamment liées aux imperfections de la couverture de change et au différentiel de taux d'intérêts (SONIA) par rapport à l'€STR.

La performance de chaque catégorie de parts du Fonds est calculée en fonction de l'évolution de la valeur liquidative (VL) de ladite catégorie de part.

La commission de surperformance, applicable à une catégorie de part donnée, est basée sur la comparaison entre l'actif valorisé et l'actif de référence pour ladite catégorie de part (modèle fondé sur un indice de référence). Toute sous-performance du FCP par rapport à l'indice de référence doit être compensée avant que des commissions de surperformance ne deviennent exigibles, quelle que soit la durée de cette sous-performance.

L'actif valorisé, l'actif de référence et la High Water Mark sont calculés pour chaque catégorie de part et s'entendent de la manière suivante :

a) **L'actif valorisé** est égal au montant de l'actif du Fonds, correspondant à la catégorie de part concernée, évalué selon les règles applicables aux actifs et après prise en compte des frais de fonctionnement et de gestion réels correspondant à ladite catégorie de part.

b) **La High Water Mark** (« HWM »), correspond à la VL la plus élevée du Fonds, correspondant à la catégorie de part concernée, constatée à la fin de chaque période d'observation depuis la date de lancement de la catégorie de part concernée et pour laquelle des commissions de surperformance ont été prélevées.

c) **L'actif de référence** est, en cours de période d'observation et à chaque calcul de valeur liquidative, retraité des montants de souscriptions/rachats correspondant à la catégorie de part, et valorisé selon la performance de l'indice de référence applicable. En début de période d'observation :

(i) si l'actif valorisé à la fin de la précédente période d'observation est supérieur à l'actif de référence à cette même date, l'actif de référence est alors égal au produit de la HWM et du nombre de parts correspondant à la catégorie de part concernée à cette même date ;

(ii) si l'actif valorisé à la fin de la précédente période d'observation est inférieur ou égal à l'actif de référence à cette même date, comme en cours de période d'observation, l'actif de référence est retraité des souscriptions/rachats et valorisé selon la performance de l'indice de référence applicable à la catégorie de part.

Les taux de référence sont les suivants :

L'indice de référence est égal à l'€STR capitalisé majoré de 2% par an pour les parts I, de 1,10% par an pour les parts EUR-R et de 1,90% par an pour les parts N. Il est libellé en euro.

L'indice de référence est le SARON capitalisé quotidiennement majoré de 1,10% par an pour les parts HCHF-R, de 1,90% pour les parts HCHF-N et de 2% par an pour la part HCHF-I. Il est libellé en Franc suisse.

L'indice de référence est le SOFR capitalisé quotidiennement majoré de 1,10% par an pour les parts HUSD-R et de 2% par an pour la part HUSD-I. Il est libellé en Dollar US.

L'indice de référence est le SONIA capitalisé quotidiennement majoré de 2% par an pour les parts HGBP-I. Il est libellé en Livre Sterling.

Pour rappel, les données relatives à la performance passée de l'indice de référence sont disponibles sur le site internet www.h2o-am.com ainsi que dans les rapports mensuels et le rapport annuel du FCP consultables sur ce même site.

La période d'observation est définie comme suit :

- La première période d'observation : du 1er octobre 2020 au dernier jour de bourse de septembre 2021 - Pour les périodes d'observation suivantes : du premier jour de bourse d'octobre au dernier jour de bourse de septembre de l'année suivante.

Au début de chaque période d'observation, l'actif de référence retenu sera le plus élevé entre l'actif constaté le 1er octobre 2020 et tous les actifs valorisés constatés le dernier jour de chacune des périodes d'observation établies depuis le lancement du fonds. L'OPCVM étant issu d'une opération de scission prévue à l'article L.214-8-7 du Code monétaire et financier, l'actif constaté le 1er octobre 2020 sera l'actif le plus élevé entre l'actif constaté le jour de la scission et l'actif de référence du fonds scindé H2O MODERATO dont les actifs conservés par le fonds « H2O MODERATO SP » ex H2O MODERATO ont été retranchés à due proportion. L'actif de référence sera, le cas échéant, retraité des montants de souscriptions/rachats intervenus entre la date de constatation de cet actif de référence et le début de la nouvelle période d'observation.

Si, sur la période d'observation et pour une catégorie de part donnée, l'actif valorisé est supérieur à celui de l'actif de référence défini ci-dessus, la commission de surperformance représentera 25% maximum de l'écart entre ces deux actifs. Une provision au titre de la commission de surperformance est alors prise en compte pour le calcul de la valeur liquidative.

Si, sur la période d'observation et pour une catégorie de part donnée, l'actif valorisé est inférieur à l'actif de référence, la commission de surperformance sera nulle. Le cas échéant, toute provision passée précédemment sera réajustée par une reprise sur provision.

Le calcul de la commission de surperformance ne sera définitif qu'à la fin de la période d'observation concernée. La commission est alors dite « cristallisée » et peut à ce titre être perçue. En cas de rachat lors de la période d'observation, la quote-part de la provision constituée, correspondant au nombre de parts rachetées, est définitivement acquise à la société de gestion et peut être perçue avant la fin de la période d'observation en cours.

Les commissions de surperformance étant basées sur la performance de chaque catégorie de part concernée, elles sont donc calculées quotidiennement et prises en compte dans le calcul de la VL de cette même catégorie de part. Cette méthode ne peut donc assurer un suivi individualisé de la performance réelle de chaque souscription, ce qui peut conduire, dans certains cas, à une iniquité résiduelle entre les porteurs de parts.

Par exemple et de manière simplifiée, tout investisseur souscrivant dans une période de surperformance où une commission de performance est provisionnée "perd moins" en cas de baisse de la valeur liquidative car il bénéficie d'une atténuation du fait de la réduction de la provision, alors même que son investissement n'a pas contribué à la constitution de cette provision. En parallèle, les investisseurs déjà présents ne bénéficieront pas de la totalité de la provision constituée depuis le début de la période d'observation concernée (ou depuis leur date de souscription, si celle-ci est postérieure au début de ladite période).

De même, tout investisseur souscrivant dans une période de sous-performance où les commissions de performance ne sont pas provisionnées « gagne plus » en cas de hausse de la valeur liquidative car il bénéficie d'une appréciation de son investissement, sans contribuer à la constitution de provisions tant que l'actif valorisé de la catégorie de part est inférieur à l'actif de référence. Cependant, pour tous les porteurs, cette souscription réduit le rendement à réaliser pour combler l'écart entre l'actif valorisé et l'actif de référence. Ainsi, les commissions de performance seront provisionnées plus tôt.

Par ailleurs, lorsque la performance d'une catégorie de part sur une période d'observation donnée est négative, dans certaines circonstances, des commissions de surperformance pourront être prélevées si la performance de l'indice de référence est davantage négative que celle de ladite catégorie de part.

Affectation des sommes distribuables

Définition des sommes distribuables

Les sommes distribuables sont constituées par :

Le résultat :

Le résultat net augmenté du report à nouveau et majoré ou diminué du solde de régularisation des revenus. Le résultat net de l'exercice est égal au montant des intérêts, arrérages, dividendes, primes et lots, rémunération ainsi que tous produits relatifs aux titres constituant le portefeuille de l'OPC majoré du produit des sommes momentanément disponibles et diminué des frais de gestion et de la charge des emprunts.

Les Plus et Moins-values :

Les plus-values réalisées, nettes de frais, diminuées des moins-values réalisées, nettes de frais, constatées au cours de l'exercice, augmentées des plus-values nettes de même nature constatées au cours d'exercices antérieurs n'ayant pas fait l'objet d'une distribution ou d'une capitalisation et diminuées ou augmentées du solde du compte de régularisation des plus-values.

Modalités d'affectation des sommes distribuables :

Part(s)	Affectation du résultat net	Affectation des plus ou moins-values nettes réalisées
