- UCITS	0.00	0.00	0.00	0.00	
- Manager	0.00	0.00	0.00	0.00	
- Third parties	0.00	0.00	0.00	0.00	

e) Type and quality of collateral

Collateral received must be consistent with H2O's collateralisation policy, which aims to ensure a high level of quality and liquidity and the absence of direct correlation with the transaction counterparty. In addition, the policy defines appropriate overcollateralisation levels for each type of securities in order to deal with any change in their value. Finally, a daily margin call system is used to offset mark-to-market changes in the price of securities.

i) Reuse of collateral

UCITS must reinvest all collateral in the form of cash (i.e. maximum amount = maximum amount used = 100%) but cannot reuse collateral in the form of securities (i.e. maximum amount = amount used = 0%).

In the event that collateral is received in cash and in accordance with regulations, it can only be:

- placed on deposit;
- invested in high-quality government bonds;
- used in a reverse repurchase agreement;
- invested in short-term money-market undertakings for collective investment (UCIs).

For transactions carried out by H2O, cash sums received as collateral in relation to temporary sales of securities are invested in high-quality government bonds.

k) Custody of collateral provided by the UCI

All collateral provided by the UCI is transferred with full ownership rights.

l) Breakdown of revenue and expenses

All revenue resulting from temporary purchases and disposals of securities, net of operating costs, accrues to the UCITS. Temporary disposals of securities are carried out with market counterparties, with H2O as the intermediary.
