The following Sub-Funds have been prepared on a non going concern basis; PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund, which terminated on 6 September 2022 and PineBridge Emerging Europe Equity Fund, which terminated on 7 December 2022.

*Trade receipt deadline 4.00pm GMT on Valuation Day, 31 December 2022 for the Annual Accounts.

**Trade receipt deadline 9.00am GMT on Valuation Day, 31 December 2022 for the Annual Accounts.

***Trade receipt deadline 11.30am GMT on Valuation Day, 31 December 2022 for the Annual Accounts.

†Sub-Funds registered with the Securities and Futures Commission in Hong Kong.

‡Sub-Funds not authorised in Hong Kong and not available to the public in Hong Kong.

‡Sub-Funds available for sale in Germany. Fund documentation (Key Information Document ("KID"), Prospectus, Trust Deed, Semi-Annual and Annual Accounts) and information on issue and redemption of prices are available from the office of the German Paying/Information Agent.

Each of the Sub-Funds which are registered with the Securities and Futures Commission (the "SFC") in Hong Kong are regulated under an equivalent jurisdiction in the form of the UCITS Regulations. While the SFC recognises that annual reports of recognised jurisdiction schemes will vary in content, annual reports are expected to offer investors comparable disclosure.

Background to the Fund (continued)

PineBridge Investments Ireland Limited (the "Manager") may create additional Sub-Funds, with the prior approval of the Central Bank and the Trustee. Each Sub-Fund will bear its own liabilities and shall not bear the liabilities of any other Sub-Funds.

The Prospectus, Key Investor Information Documents ("KIIDs") / KIDs, the unaudited semi-annual report and the annual report and audited financial statements as well as a listing of the schedule of portfolio changes during the financial year under review can be obtained free of charge from the Manager at the address shown on page 2.

Investment Objectives

The assets of each Sub-Fund will be invested separately in accordance with the investment objectives and policies of the relevant Sub-Fund as set out in the Prospectus and outlined in each Investment Manager's Report. Material changes to the investment objectives of each Sub-Fund will not be made without unitholder approval and in the event of any such change, notice will be given to unitholders to enable them to redeem their units before the changes take effect.

Calculation of Net Asset Value

The Net Asset Value (the "NAV") per unit is calculated for each Dealing Day by dividing the value of the assets of the relevant Sub-Fund less its liabilities to include a provision for duties and charges, by the number of units then outstanding. The value of the underlying assets is adjusted for accrued income and liabilities excluding management fees, unitholder servicing and maintenance fees (as appropriate) and other Class specific charges, where applicable. It is then allocated between the various Classes based on their pro rata closing NAVs as of the previous Dealing Day. Where applicable, Class currency hedging impact is applied to the relevant unit Class. The management fee, the unitholder servicing and maintenance fee (as appropriate) and other Class specific charges are then applied to each Class.

The NAV of each Sub-Fund is calculated in the Functional Currency of that Sub-Fund. For Sub-Funds with Classes denominated in a currency other than the Functional Currency, the NAV of such Classes is translated to the relevant Sub-Fund currency. The NAV per unit for each class is available on www.pinebridge.com.

Irish Funds Corporate Governance Code

The Irish Funds ("IF"), in association with the Central Bank has published a corporate governance code (the "Code") to be adopted by Irish authorised collective investment schemes. The Board of Directors of the Manager voluntarily adopted the code effective from 31 December 2012 and the Fund operates in full compliance with the Code.

Significant Events During the Financial Year

Matheson was appointed as the Legal Advisor for the Fund with effect from 1 January 2022.

On the 24 February 2022, the Directors of the Manager passed a resolution to terminate PineBridge Global Emerging Markets Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund.

Central Securities Depositories Regulation (CSDR)

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards. CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Fund when it enters into in-scope transactions may result in increased operational and compliance costs being borne directly or indirectly by the Fund. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

The continued Russian engagement in military actions across Ukraine may still affect the sub-funds over the coming period as it will continue to cause instability on the global and European markets. The Investment Manager is leveraging established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

Background to the Fund (continued)

Significant Events During the Financial Year (continued)

Suspension: PineBridge Emerging Europe Equity Fund

Considering the exceptional and adverse market conditions relating to the current situation in Russia and Ukraine, effective from 2 March 2022, the Manager suspended until further notice the calculation of the Net Asset Value per Unit of PineBridge Emerging Europe Equity Fund (the "Fund") and the right of Unitholders to purchase, redeem or exchange Units in the Fund (the "Suspension"). This decision was made following the recommendation of the Manager and the Investment Manager and with the approval of the Trustee, and was considered to be in the best interests of unitholders as a whole in light of current circumstances. The decision to implement the Suspension was taken as a result of the situation in Russia and Ukraine which adversely affected the orderly disposal and valuation of Russian assets of the Fund. The Manager was unable to determine how long the Suspension would last, however, the Manager took all reasonable steps to bring the Suspension to an end as soon as possible and in the best interests of Unitholders as a whole. PineBridge Emerging Europe Equity Fund terminated on 7 December 2022.

The main prospectus was last updated on 31 December 2021. The following prospectus supplements were updated during the reporting period to allow for the launch of new share classes:

- PineBridge Asia Pacific Investment Grade Bond Fund – 7 July 2022 and 29 July 2022,
- PineBridge Global Dynamic Asset Allocation Fund – 12 January 2022,
- PineBridge Global Emerging Markets SDG Corporate Bond Fund – 23 June 2022,
- PineBridge Global Focus Equity Fund – 29 July 2022.

PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund terminated on 6 September, 2022.

Board approvals and changes approved by the Central Bank of Ireland during the financial period under review include the following:

- PineBridge USD High Yield Bond Fund, reclassification of sub-fund from Article 6 to 8, effective date 15 September 2022.
- PineBridge Global Dynamic Asset Allocation Fund, removal of benchmark, effective date 15 September 2022.
- PineBridge Asia Pacific Investment Grade Bond Fund, changes to distribution frequency, effective date 15 September 2022.
- PineBridge Asia ex Japan Equity Fund, changes to sub-fund investment manager.

The following changes were applied for PineBridge Global Emerging Markets SDG Corporate Bond Fund with effective date of 29 November 2022: name change, change from Article 8 to Article 9, investment policy change, Benchmark and management fee change.

On October 25, 2022, notice of an extraordinary general meeting (EGM) was issued to Unitholders in relation to PineBridge Global Emerging Markets SDG Corporate Bond Fund. The purpose of the meeting was to seek approval of the Unitholders to proposed changes to the Sub-Fund, including amendments to the Sub-Fund's investment objective and investment policy. The EGM took place on 14 November 2022 and the resolution was approved by the unitholders.

Klaus Schuster resigned as a Director of the Manager on 31 October 2022.

The following prospectus supplements were updated on 29 November, 2022 in order to incorporate the annexes for the Article 8 and 9 Sub-Funds: PineBridge Asia ex Japan Equity Fund, PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Asia Pacific Investment Grade Bond Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Global Emerging Markets Focus Equity Fund, PineBridge Global Focus Equity Fund, PineBridge India Equity Fund, PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund, PineBridge Latin America Equity Fund, PineBridge USD High Yield Bond Fund and PineBridge USD Investment Grade Credit Fund.

PineBridge Emerging Europe Equity Fund terminated on 7 December 2022.

Please see Note 11 for details of share class launches and terminations during the financial year.

Background to the Fund (continued)

Significant Events During the Financial Year (continued)

There have been no other significant events affecting the Fund during the financial year.

Significant Events Since the Financial Year End

Since the financial year-end, PineBridge Japan Small Cap Equity Fund has had redemptions amounting to 21% of the Net Asset Value.

Prospectus supplement for PineBridge Asia ex Japan Small Cap Equity Fund was updated with effective date of 16 January 2023.

The Investment Manager will continue to leverage its established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

SVB, Signature Bank and Credit Suisse Exposure

PineBridge has rigorous risk management protocols in place across our global business, and we are leveraging our established risk framework as the situation evolves to maintain the protection and security of client assets. We are closely monitoring developments for any emerging risks that could impact portfolios, including asset flows, potential disruptions in market operations, liquidity risks, and potential risks related to indirect exposure. We will continue to monitor the situation and take appropriate actions as needed.

The exposure to the UCITS Sub-Funds is minimal and only a few of the Sub-Funds are impacted:

- PineBridge USD Investment Grade Credit Fund
- PineBridge US Research Enhanced Fund
- PineBridge Global Dynamic Asset Allocation Fund

There have been no other significant events affecting the Fund since the financial year end.

Investment Manager's Report

PINEBRIDGE ASIA DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Asia Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing economic and investment trends and investing primarily in the Asia Pacific Region by taking a forward view of fundamental economic and market conditions across the region.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Asia Dynamic Asset Allocation Fund Class "L" returned (15.04%). Over the same period, the Fund's benchmark index, a blended index of 60% of the MSCI All Country Asia ex-Japan Daily Total Return Index and 40% of the JACI Composite Total Return Index returned (16.04%).

Portfolio Overview

The APAC ex Japan market's weak performance over the year can be attributed to the underperformance of Taiwan, South Korea and China Equities. APAC ex Japan's performance remained under pressure from Q1 to Q3 2022, as the market priced in increasing concerns of a recession and a more hawkish Federal reserve (Fed) due to rising inflation. Asia ex-Japan performance only improved from November onwards due to headlines regarding an ease in China's Covid zero policy and China's definitive reopening. Moreover, investor sentiment strengthened in December 2022 on the back of potential slowdown in Fed rate hikes. USD strength weighed on Asian markets over the year, except for the SGD and marginally the HKD. The broader Asian Fixed Income market also declined over 2022; performance was dragged down by Pakistan, Sri Lankan and Maldives bonds based on the JP Morgan Asia Credit Index (JACI) Composite Total Return. Rising inflation continues to catch up with the region.

The fund delivered (13.74%) and (15.04%) performance on a gross and net basis respectively, outperforming its 60/40 risk budget [Source: 60% MSCI AC Asia ex Japan (Net) + 40% JACI Composite Total Return]. Within equities, the main contributor was our overweight allocation to China. Within our Fixed Income holdings, the main contributors were our underweight allocations to China and Malaysia, and overweight allocation to India. The main detractor to equities were our overweight allocation to South Korea, and our underweight allocations to India and Taiwan. The main detractors within fixed income were our overweight positions in Thailand and Vietnam.

Portfolio Outlook

While China's re-opening will undoubtedly be bumpy, it should ultimately serve as a partial offset to the depth of the rest of the world's recession. Meanwhile risk assets remain challenged by (1) the impending profit decline, from levels spiked by prior rapid inflation that are now at risk of being harmed by falling pricing power teamed by sticky labor costs, and (2) ongoing tightening of liquidity (through QT long after rate hikes end). This leaves the team cautious. Our Risk Dial Score remains at 3.75 at the end of December 2022.

PineBridge Investments Asia Ltd.

January 2023

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Equity Fund seeks long-term capital appreciation by investing in equity and equity related securities of companies whose assets, product or operations are in the Asian Region. The Sub-Fund may also, to a lesser extent, invest in equity-related securities of companies whose assets, products or operations are in Australia and New Zealand.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Asia ex-Japan Equity Fund Class "A", "A5H", "C", "L" and "Y" returned (28.74%), (29.54%), (29.03%), (28.32%) and (28.14%) respectively. Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (USD) and (SGD) returned (19.67%) and (20.08%) respectively. For the period 1st December to December 31st 2022, the PineBridge Asia ex-Japan Equity Fund Class "Z" returned (3.01%). Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (USD) returned (1.30%).

Portfolio Overview

Following a two-year tussle with the COVID-19 pandemic, Asia Ex-Japan equity markets in 2022 were tested by an unprecedented investment environment dominated by global macro concerns from all corners: geopolitical stress, record high inflation, commodity rally, central banks' monetary tightening, recession fears and rising COVID-19 cases in China which led to draconian lockdown measures. The investors remained cautious for most of the year. However, the markets managed to recover some losses in the last quarter with a sharp rebound on the back of easing dollar and US bonds yields and signs of recovery in China supported by COVID-policy relaxation, relief measures for the real estate sector, government's focus on growth and improving US-China relations. Investors' confidence towards Asia Ex-Japan markets also improved by signs of inflation in US tapering off and overall indication that the Fed might switch to smaller rate hikes going ahead.

India was one of the most resilient Asia Ex-Japan equity markets aided by robust credit growth, improving asset quality, supportive monetary policy decisions by the central bank and a number of new company listings. On the other hand, Taiwan and Korea which are net exporters of technology saw some of the worst drawdowns in the year due to global demand slowdown and heavy tech sell-offs. However, they ended the year with a strong outperformance buoyed by semiconductor chips and electronic vehicles market optimism, strong macroeconomic fundamentals and attractive valuations. ASEAN markets managed to stay afloat for most of 2022 supported by reopening measures and ended the year in positive territory, except Indonesia.

In the full year, the fund underperformed its benchmark. By geographic location, our overweight position in Korea and underweight position in Taiwan were the key detractors to the fund performance, while our overweight position in China contributed to the fund performance as China relaxed its zero-COVID policy. By sector, financials and materials dragged the fund performance, while consumer discretionary contributed to the performance of the fund.

Portfolio Outlook

Asia Ex-Japan equity market had faced many hurdles in 2022 weighed down by the risk-off sentiment globally amid inflation and rate hikes but had started to show signs of recovery in the fourth quarter. After facing sharp drawdowns in 2022, the Asia Ex-Japan equity markets are now well positioned with attractive valuation going in 2023 as many concerns are priced in. Decelerating inflation, weakening dollar, less aggressive policy tightening and bottoming out earnings are putting back investors on track to re-focus on companies' fundamentals rather than driven by sentiment.

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN EQUITY FUND (continued)

Portfolio Outlook (continued)

We are constructive on the Asia Ex-Japan equities; we favored China despite the recent rebound as the valuation is still attractive and we see further upside in the earnings growth expectations. Additionally, we remain underweight in Taiwan but have started to narrow the underweight as we see value emerging in the country. Most of our holdings in general are seeing improving business outlook on the back of pent-up demand and secular growth drivers, such as digitalization, consumption, sustainability, and urbanization, over the long term.

PineBridge Investments Asia Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Small Cap Equity Fund seeks long-term capital appreciation by investing in smaller to medium-sized companies in the Asian Region, i.e. companies whose assets, products or operations are in the Asian Region. In practice, at least 50% of the Sub-Fund's investment will be in companies whose free float adjusted market capitalisation at the time of purchase is less than USD\$1.5 billion.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Asia ex Japan Small Cap Equity Fund Class "A", "A5CP", "A12", "A5", "C", "R", "R1", "R1H", "R2", "R2D", "R2HD", "SR", "SR1", "SR1H", "SR2D", "SR2DH", "Y", "Y1H", "Y2", "Y2HD" and "YD" returned (23.93%), (24.11%), (12.35%), (24.34%), (23.93%), (23.24%), (18.52%), (25.66%), (14.07%), (14.07%), (24.82%), (23.13%), (18.40%), (25.50%), (13.95%), (24.67%), (23.32%), (25.67%), (14.16%), (24.86%) and (23.32%), respectively. Over the same period, the benchmark index, MSCI All Country Asia Pacific ex Japan Small Cap Daily Total Return Net Index (EUR), (GBP), (SEK), (SGD) and (USD), returned (14.48%), (9.63%), (7.63%), (20.15%), and (19.74%) respectively.

Portfolio Overview

As Covid-19 is gradually under control in various regions helped by the rising vaccination rates, economies were preparing to open in various stages. Countries that were earlier in planning for a reopening, saw gradual economic recovery, whilst others taking on a cautionary note, like China, had challenges particularly in the closure of cities massively affected by the spread of Covid-19. This, together with the Russia-Ukraine war took a toll on equity markets. With rising inflation and high commodity prices, the Fed took on an aggressive stance in raising interest rates. These concerns intensified as we progressed towards the third quarter of the year, when rise in bond yields along with global recessionary fears kept the investors cautious.

China & Hong Kong (HK) stock markets underperformed the most in 2022 as the draconian measures of the Chinese government and HK continued quarantine rules, social distancing requirements led to a standstill in tourist arrivals and a lull in the business conditions. Logistical constraints, China's strict Zero-Covid policy, real estate sector woes and leadership changes, all added to the pressure and led to indiscriminate sell-off in the Chinese markets.

However, the market rounded off a difficult year ending with gains in the last quarter. Almost all markets in the index ended up reporting gains in the quarter. China and Hong Kong especially served as the key drivers of this rebound, bringing back some of the investor confidence. China announced a 20-step relaxation plan in November 2022 to ease its Zero-Covid restrictions which came as a huge relief for the citizens as well as the economy. Furthermore, the central bank came up with relief measures to pump extra liquidity into the ailing real estate sector. Additionally, improving relations between US and China by the end of the year buoyed investor sentiments. Investors' confidence towards Asian markets also improved by signs of the US inflation tapering off and the overall indication that the Fed might switch to smaller rate hikes going ahead.

India was one of the most resilient Asian equity markets aided by robust credit growth, improving asset quality, supportive monetary policy decisions by the central bank and a number of new company listings. Similarly, ASEAN managed to report more resilient returns for most of 2022 on the back of reopening measures. Taiwan and Korea, which are net exporters of information and communications technology goods, witnessed some of the worst drawdowns in 2022, as global demand slowdown and sell-offs in the technology sector led to worse returns. These markets showed signs of improvement by the end of the year led by optimism towards semiconductor business, potential recovery in macro fundamentals and attractive valuations.

On a year-to-date basis, as of end December 2022, the fund underperformed the index. By geographic location, underweight position in India and Australia and overweight position in Vietnam detracted the performance. While our overweight position in Hong Kong contributed to the performance. By sector, energy and information technology detracted the fund's performance.

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND (continued)

Portfolio Overview (continued)

By stock, a Singapore utilities company outperformed due to stronger conventional electricity spreads, as well as valuation re-rating from its renewable energy investments. Another holding, a China online travel agent outperformed in 2022 due to the relaxation of lockdown measures in China, and the rising market expectations of local travel recovery in 2023. On the other hand, a Vietnamese steelmaker underperformed in 2022 due to the decline in steel prices, increase in input costs, and softening property demand in Vietnam. Another holding, a power tool and outdoor power equipment manufacturer, underperformed due to the weakening power tool demand in US.

In terms of asset allocation, the overweight in HK/China in 2022 had hurt the fund's performance as the market was being sold down by investors who were cautious on China's strict stance to achieving Zero-Covid thereby hurting foreign investments and capital expenditure plans. Nevertheless, the last quarter of 2022 there was significant rally in the Chinese stock markets when China announced major relaxations around the Zero-Covid policy along with real estate related supportive policies. Over the last two years, we had taken the opportunity to invest in stocks that were very oversold particularly those hurt by social distancing measures but are of high quality names. Hence, in the last two months of 2022, the fund rallied along with the China rebound from an undervalued position.

Portfolio Outlook

Throughout 2022, Asia ex-Japan equity markets have been driven by politics, policies and the management of Covid by various governments. Recent lifting of Covid restrictions in China has been taken positively but the team expects short-term volatilities as earnings recovery will take time to suffice. While we acknowledge that the uncertainties over the next few months in the political and policy space might keep investors cautious, we remain focused on our investment process. The portfolio remains invested in high-conviction names supported by sustainable business models and companies that have executed well throughout cycles.

The fund maintains its overweight position in China as some of the investment opportunities are still trading at very attractive valuations from the long-term perspective. With the relaxation in Covid policies in China, our positioning in undervalued travel related companies, fast food retailers etc. and so forth that were very hurt by the Covid situation rallied. Some of our holdings will benefit from the long-term structural trend of technology innovation and localization in China. Additionally, as the government continues to deleverage the property sector and redirect resources to other parts of the economy, more opportunities are emerging in areas where China is seeking technological self-sufficiency.

We remain constructive on equities going ahead in 2023. Despite recession fears and multiple global macro concerns, we believe the region offers attractive valuations for long term investors.

PineBridge Investments Asia Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND

Portfolio Objective

The investment objective of PineBridge Asia Pacific Investment Grade Bond Fund is to provide investors with stable return and long-term capital growth through investment in a wide range of investment grade debt securities within the Asia Pacific Region.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Asia Pacific Investment Grade Bond Fund Class "A", "A5HD", "R", "SR", "X", "Y", "Y1H" and "YD" returned (11.92%), (12.19%), (11.34%), (11.07%), (10.98%), (11.34%), (13.37%) and (11.34%) respectively. Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD), (SGD) and (EUR) returned (10.01%), (10.27%) and (4.11%). For the period 23rd March to 31st December 2022, the PineBridge Asia Pacific Investment Grade Bond Fund Class "SRD" returned (5.54%). Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD) returned (4.30%). For the period 18th August to 31st December 2022, the PineBridge Asia Pacific Investment Grade Bond Fund Class "ADC" returned (2.57%). Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD) returned (1.62%). For the period 2nd September to 31st December 2022, the PineBridge Asia Pacific Investment Grade Bond Fund Class "Z5H" returned (1.40%). Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (SGD) returned (0.90%).

Portfolio Overview

Fixed Income markets had one of the weakest starts of the year since the 1980s. This was reflecting the major monetary policy U-turn the Federal reserve (Fed) engaged in. Spreads widened during the first quarter but retraced most of the widening towards the end of March, ending the quarter only marginally wider from year end. Fixed income markets continued their weak performance into the second quarter as most global central banks adopted an increasingly hawkish narrative. Within Asia, China managed to curb the number of Covid-19 infections through lockdowns which came at a significant economic cost. Driven by weak sentiment, Asian investment grade credit spreads widened over the course of the quarter.

After a constructive start to the third quarter, central bankers noticeably hardened their rhetoric which focused almost singularly on tightening financial conditions to decisively dent inflation. Within Asia, we continued to receive further evidence of China slowing down. China's zero-Covid policies led to a series of lockdowns across the country, further eroding growth prospects. The fourth quarter ended the year on a distinctly better note. A perceived inflection point on inflationary trends as well as better priced monetary policy hikes anchored the strong performance for markets broadly. Within Asia, a slew of supportive policy announcements out of China played a decisive role in supporting the market and economic growth projections going into 2023.

Portfolio Outlook

We believe that the bulk of monetary policy tightening is behind us. Some major central banks will continue to hike their policy rates, but we expect those hikes to be largely priced and more moderate in both pace and size than what we saw in 2022. This stabilization in rates will be broadly positive for high quality credit markets. More specifically for Asia, the market is benefiting from two drivers occurring at the same time. First, the re-opening theme will spur economic growth in this region, unlike a slowing economic growth in much of the rest of the world. Second, China's re-opening and policy support measures have significantly reduced some of the tail risks in terms of economic growth and credit stresses. This has still to be fully priced in the market. We have turned more constructive over the past two months and we think the credit spread rally has legs.

Investment Manager's Report (continued)

PINEBRIDGE CHINA A-SHARES QUANTITATIVE FUND

Portfolio Objective

PineBridge China-A Shares Quantitative Fund seeks to provide long-term capital growth by primarily investing mainly in equity and equity-related securities of companies listed on stock exchanges in the People's Republic of China (PRC) or related to the economic development and growth of PRC.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge China-A Shares Quantitative Fund Class "X", "Y11D" and "Z" returned (24.65%), (18.05%) and (24.46%) respectively. Over the same period, the benchmark index, the MSCI China A International Total Return Net Index (USD) and (CNH) returned (25.92%) and (19.40%) respectively.

Portfolio Overview

The China A shares market continued to be weak in the first 10 months of 2022, before the rebound in the last 2 months of the year. The market was concerned about the economic slowdown resulted from the Covid lockdown measures, together with the debt crisis of the property sector in China. It also coincided with a sharp rise in the 10-year US Treasury yield and the export demand slowdown caused by the escalating inflation in the western economies. Nevertheless, starting from November the Chinese government announced substantial relaxation of the lockdown policies and property policies, which relieved a lot of concerns on the economic outlook of China. In CNY terms, the CSI 300 index returned (21.6%) in 2022. The smaller cap indices CSI 500 and CSI 1000 returned (20.3%) and (21.6%), respectively. Energy continued to be the best performing sector in 2022, while all the other sectors were down with the market. Real estate also outperformed whereas information technology and materials were the worst performing sectors. In particular, electronics and semiconductor companies remained weak because of softening end demand of electronic products due to the weak macro economy. In 2022, the fund outperformed (gross and net of fees) its benchmark, the MSCI China A International Total Return Net Index. The alpha model contributed positively. Factors including growth, value and quality delivered a strong performance during the period.

Portfolio Outlook

Overall, the China A-Shares market was driven by significant events in 2022. In the first quarter, the Russia-Ukraine conflict roiled global equity markets and led to an energy crunch. In the second quarter, the main driver of the market was the status of the citywide lockdown in Shanghai under the "dynamic zero policy", followed by US-China tension in the third quarter. Lastly, the China re-opening became the dominating theme in the fourth quarter. Market sentiment shifted quite quickly with the evolution of those events.

From a beta perspective, we expect that the worst should be over. The economy will recover after the re-opening, although there might be some uncertainty with the speed and pace. Offline consumption has shown some positive signs of recovery in some cities after Covid cases peaked. The trend will likely last with the restoration of the labor market, household income and people's confidence. Meanwhile, the government's policies will be more stable and provide further support to the economy. In addition to traditional fiscal and monetary tools, the policymakers may also introduce a series of industrial policies to cultivate innovation and boost the development of the industries, such as technologies and new energy. In terms of fund flows, both domestic and foreign investors have been increasing their allocation to the A-Shares market after the re-opening, and we expect the inflows may continue given the attractive valuation of A-Shares and the improving outlook of the economy.

In 2022, our alpha factors generated positive returns due to the good performance of the growth, value and quality groups, although a large part of the alpha model contribution was offset by negative specific return. Notably, the value group recovered from the drawdown since 2020 and delivered a decent positive return. Looking forward, we believe the China A-Shares market will be back to normal with more consistent government policies, and the market will reverse back to fundamentals, and our fundamental based alpha model should deliver better active returns.

Investment Manager's Report (continued)

PINEBRIDGE EMERGING EUROPE EQUITY FUND

Portfolio Objective

PineBridge Emerging Europe Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments with superior growth potential primarily in the emerging European markets. The Sub-Fund is designed to enable investors to participate in the high rates of growth generated by these events.

Portfolio Performance

For the period 1st January to 28th February 2022, the PineBridge Emerging Europe Equity Fund Class "A" and "Y" returned (44.17%) and (44.11%) respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Europe 10/40 Equity Daily Total Return Net Index (USD) returned (39.66%).

Portfolio Overview

During 2022 Emerging Europe equities were impacted by Putin's ongoing war in Ukraine which upended the markets and caused severe dislocations. This is especially true of Russian equities, which were suspended from trading, as well as Emerging Europe stocks with exposure to the Russian economy. Investors are reassessing company fundamentals and how the ongoing conflict, as well as the accompanying unprecedented sanctions, transmit into individual company outlooks. The result of such rapidly evolving and adverse events has heightened market volatility. The above drivers caused wide dispersion in sector and country returns.

The MSCI Emerging Europe Index fell (70.97%) in 2022, lagging the (19.87%) decline of the MSCI GEM Index. Emerging market Europe sectors exhibited large dispersion of returns with energy and materials lagging, and industrials and information technology in the lead. Emerging Europe companies are contending with an adverse economic environment where Russia sanctions, war and high commodity prices create potent headwinds. Trading in Russian equities remains suspended for the foreseeable future.

Portfolio Outlook

The Sub-Fund closed on December 7th 2022.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND

Portfolio Objective

PineBridge Europe Research Enhanced Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European recognised Stock Exchange.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Europe Research Enhanced Equity Fund Class "A", "L" and "Y" returned (18.80%), (18.60%) and (18.03%) respectively. Over the same period, the benchmark index, the MSCI Europe Daily Total Return Net Index (USD) returned (15.06%).

Portfolio Overview

European equities fell sharply in the January opening month of the year, coinciding with global equity weakness primarily centered around ending of quantitative easing across developed economies. European equities again fell sharply during February, due to geopolitical tensions stoked by Russia's invasion of Ukraine towards the end of the month. Geopolitical uncertainty and concerns over rising inflation have dominated market sentiment in March. European shares fell as the war in Ukraine entered its second month and Western countries bolstered Ukraine aid and expanded sanctions on Russia at a special NATO summit. Eurozone inflation accelerated in March to a fresh record high of 7.5%. Inflation hit a record high for the sixth consecutive month in April, while heightened tensions over the Russia-Ukraine war persist. Economic data from the Eurozone was relatively upbeat but not good enough to offset concerns over supply chain disruption. The ongoing war in Ukraine and China's introduction of new COVID-19 restrictions added to the market angst. Prices in the Eurozone continued their march higher in May, hitting a record high for the seventh month in a row. Rising prices were exacerbated by the war in Ukraine, particularly food and energy costs, as exports were blocked and countries across the West scrambled to reduce their reliance on Russian gas. In June, European stocks continued to retreat amid fears that central banks will be forced into aggressive monetary policy tightening with inflation remaining high. Investors are reacting to the potential for more aggressive rate hikes by central banks in Europe and the United States after the latest inflation report. Eurozone shares gained in July, along with other major stock markets. The European Central Bank raised interest rates by a larger-than-expected 50 bps, ending the era of negative rates. A flash report put Eurozone annual inflation at 8.9% in July, with energy prices again contributing the largest proportion of the rise. Eurozone shares fell in August amid ongoing worries over inflation, particularly in the form of high gas and electricity prices. The European Central Bank raised interest rates by a further 75 basis points in September and acknowledged that the Eurozone economy may be heading for recession. Markets took that statement as a sign that the pace of rate rises could soon ease, which supported appetite for shares. Preliminary data in October showed that the Eurozone economy continued to grow in Q3, with an expansion of 0.2% quarter-on-quarter after 0.8% growth in Q2. Eurozone shares rose amidst the news that Eurozone inflation dropped by more than expected in November, signaling a slowdown in rate hikes. Eurozone shares declined in December amidst news that the European Central Bank will continue to raise rates throughout 2023, with expectations aligned towards a short recession.

During the period, the fund underperformed the MSCI Europe Daily Total Return Net Index. During the period, the strongest contributors to relative performance were in the communication services and real estate. The largest detracting sector from relative performance was the utilities sector. The Mature Cyclical categorization was the top performing growth category exhibiting strong stock selection while the Exceptional Growth categorization was the worst performing.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND (continued)

Portfolio Outlook

Eurozone inflation is showing signs of slowing down going into 2023. A slowdown in rate hikes is expected in 2023, given that Eurozone is expected to show signs of growing positive momentum. Energy price declines are positively affecting the European economy. The last few weeks of 2022 have shown a rebound in Eurozone equities amongst positive fiscal stimuli and better than expected economic indicators.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Europe Small Cap Equity Fund seeks to achieve a high rate of return by making equity and equity-related investments in small companies, whose assets, products or operations are in Europe.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Europe Small Cap Equity Fund Class "A1", "Y" and "Y1" returned respectively (30.62%), (34.38%) and (30.06%). Over the same period, the benchmark index, the EMIX Smaller European Companies Total Return Net Index (EUR) and (USD) returned (23.31%) and (28.03%) respectively.

Portfolio Overview

Companies continue to feel good about their near-term visibility, including end market demand, order books, and the ability to meet demand. Supply chains and labor are an ongoing headwind, but manageable. It is becoming the consensus that rate hikes will inevitably cause slower growth in 2023, along with lower earnings. Company surveys, which have held up relatively well throughout 2022, are starting to moderate a little further. Inflation will moderate next year, but it will stay above Federal Reserve (Fed) targets. Market volatility related to perceived potential changes in Fed policy continues to present us with opportunities to upgrade the portfolio and invest in advantaged companies at valuations below typically high levels. As always, portfolio style balance remains a key component of our risk management.

During 2022, the PineBridge Europe Small Cap Equity Fund underperformed its benchmark, the EMIX Smaller European Countries Index. Underperformance was largely the result of near-term weakness among select holdings. Adverse allocation was an incremental drag to performance. Overall, consumer discretionary, information technology, and real estate were the top contributors to excess returns. By contrast, industrials, financials, and energy were the main sector laggards. The fund remains overweight healthcare, communication services, consumer discretionary, consumer staples, industrials, information technology, underweight materials, utilities, real estate, energy and financials.

Portfolio Outlook

Short-term market disruptions (China lockdowns, Ukraine conflict, high headline inflation in the US) are masking several underlying secular trends. These include the massive investments needed to achieve the Paris Agreement's net-zero carbon emissions targets, the diversification of global supply chains, and increasing digitalization across all industries. The disconnect between these short-term and long-term forces may create attractive buying opportunities in companies set to benefit from longer-term secular trends but whose valuations have dropped amid the generalized equity declines. The fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include corporate transformation, global capex investment, technology enablers and global affluence.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL BOND FUND

Portfolio Objective

PineBridge Global Bond Fund seeks a high level of return from a combination of current income and capital appreciation by investing in a portfolio of debt securities denominated in US Dollars and a range of other currencies including, Euro, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swiss Franc, Danish Krone, Swedish Krona, Norwegian Krone, British Sterling, Japanese Yen, Polish Zloty, Hungarian Forint, South African Rand, Singapore Dollar, Slovak Koruna and Mexican Peso.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Global Bond Fund Class "A", "X7H" and "Y" returned (14.22%), (15.32%) and (13.36%) respectively. Over the same period, the benchmark index, the Bloomberg Barclays Global Aggregate Total Return Index (USD) and (CHF) returned (11.22%) and (13.71%) respectively.

Portfolio Overview

2022 was a tough year for financial markets, with the S&P 500 seeing its worst annual performance since 2008, just as global bonds fell into a bear market for the first time in 70 years. All major fixed income indices posted negative returns and in many cases with double digit negative returns as rates moved higher and credit spreads wider. The biggest driver of this was much stronger-than-expected inflation, which hit multi-decade highs and led central banks to embark on their most aggressive tightening cycle in a generation. Investors are concerned that the cumulative and rapid pace of hikes will be enough to knock the global economy into recession in 2023. In addition, we had China's economy being impacted by the zero-covid policy forcing cities and industries to shut down for days and weeks. Finally, we had the war in Ukraine that has carried on much longer than anyone expected and unfortunately there is no end in sight. The move higher in rates has been massive with the 10-year US Treasury going from 1.51% to 3.87% during the year and the curve inverting, with the 2-10s curve going from positive 78bps to negative 55bps; in other rate markets the moves have been similar. The only winners this year have been the US dollar, energy and commodity prices.

The fund underperformed (gross and net of fees) its benchmark, the Bloomberg Barclays Global Aggregate Total Return Index (USD Hedged), during the annual reporting period ending December 31, 2022. The fund's relative underperformance was driven mainly by duration and yield curve positioning, while asset allocation was a small positive.

Portfolio Outlook

Within fixed income, we expect continued volatility, with the path being anything but one-directional, to continue into 2023. Central banks will continue to be a strong driver of markets. This is especially true as they reach the peak in rates and have to decide how long they can keep rates at these high levels before starting to cut them, all while the economies continue to lose steam and begin moving into recessions. In addition, China is starting to move back to normality, re-opening its economy, and (unfortunately) we have no end in sight for the conflict in Ukraine.

In terms of rates, we believe we have seen the highs in the US Treasury market, although we could see the 10-year US rate move back towards 4% one more time. In general, we expect rates to be range bound before they start moving lower during the second half of 2023 as economies slow down. We continue to be cautious on credit in the short term but expect to slowly start adding exposure to the asset class during the first half of the year as we expect spreads to move tighter on the second half of 2023.

January 2023

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Global Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing worldwide economic and investment trends and investing in assets globally to benefit therefrom.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Global Dynamic Asset Allocation Fund Class "A", "AA", "ADC", "ADCT", "C", "Y", "Y1H", "Y2H", "Y5H" and "YD" returned (17.59%), (17.55%), (17.59%), (17.59%), (17.62%), (16.72%), (18.92%), (17.90%), (17.15%) and (16.72%) respectively. For the period 23rd March to 31st December 2022, the PineBridge Global Dynamic Asset Allocation Fund Class "A5H" returned (9.78%).

Portfolio Overview

While the fund did manage to outperform broader liquid markets (i.e. our risk budget of Global 60/40) on a year-to-date basis with about half of the volatility of equities, the fund performance has been disappointing in total return terms. As a liquid long-only total return strategy there were very few betas which finished the period in the green. The team protected the fund from similar levels of drawdown experienced by global equities, global treasuries, and global credit by dynamically shifting total portfolio risk and fixed income duration based on the team's forward-looking view of markets.

Toward the end of the first quarter, the team reduced exposure to economically sensitive asset classes in favor of idiosyncratic asset classes with low market beta and a low correlation to the rising real rates as the team's expectation was the rise in correlations between stocks and bonds would remain elevated throughout the intermediate term, creating a less attractive environment for traditional financial assets. EU carbon credits, commodity carry and the new energy-focused thematic equity strategies are examples of these asset classes that demonstrated uncorrelated fundamental drivers of return compared to the broad building blocks of asset allocation. All three finished the year with positive returns and was a strong driver of relative outperformance of the fund compared to the broader traditional financial asset indices.

Portfolio Outlook

While China's reopening will undoubtedly be bumpy early on, it should ultimately help offset the depth of 2023's recession in the rest of the world. Meanwhile, most risk assets remain challenged by 1) an impending decline in inflation-spiked profits, which are suddenly contending with falling pricing power and sticky labor costs; and 2) an intensifying liquidity squeeze via quantitative tightening (QT) long after rate hikes end. This leaves the team cautious, and our Risk Dial Score remains at 3.75 as at year-end.

A key component to next year's market dynamics, in our view, is the extent of the profit recession, which can be hard even if the economic landing is soft. Profits spiked early into this recovery, aided and abetted by massive fiscal stimulus, which pushed up demand – while the Federal reserve (Fed) assisted through equally massive quantitative easing (QE), so that the demand surge would not be undermined by rising interest rates (at least through 2021). The surge in demand collided with supply bottlenecks, ushering in a period of supercharged pricing power. With all these forces now reversing, won't profits follow as quickly and meaningfully as they spiked? We prefer China's outlook for one last weak quarter before growth resumes, to expectations elsewhere for one last "less-bad-than-feared" quarter before cash flows, liquidity, and then growth drop for the remainder of 2023 – all while markets wait for Godot-like developed market central banks to ease falls into a painful recession. We believe this to be a moot issue for now; the Fed is on course to tighten until something breaks.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets Bond Fund seeks to achieve long-term, capital appreciation through investment in bond issues primarily by governments, their agencies, local authorities and municipalities and corporate entities located in Emerging Markets. Such securities may be denominated in the local currency of any of the OECD member countries or the local currency of the emerging countries in which the Sub-Fund is permitted to invest as per investment guidelines.

Portfolio Performance

For the year 1st January to 31st August 2022, the PineBridge Global Emerging Markets Bond Fund Class "A", "A6HD", "AD" and "Y" returned (15.09%), (15.69%), (15.09%) and (14.50%) respectively. Over the same period, the benchmark index, a blended index of 1/3 of the JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return), 1/3 of the JP Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified (Total Return) and 1/3 of the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified (Total Return) returned (15.35%) and (10.23%) USD and AUD respectively.

Portfolio Overview

Emerging market corporate debt delivered negative returns in 2022 as macro-economic concern and geopolitical risks challenged market sentiment throughout the year. With US inflation entrenched at historically high levels, markets slumped early in the year under the weight of expectations for Federal Reserve rate hikes. Russia's invasion of Ukraine in February forced asset prices to adjust to potential risks of escalation beyond Ukraine and the impact that Russia sanctions would have on financial and energy markets. The Federal Reserve's decision to raise rates by 25 basis points in March and pledge to pursue a steep trajectory of rate hikes to combat inflation further added to negative performance in March.

In May, covid lockdowns in China dramatically constrained economic activity, depressing demand in China and further disrupting global supply chains. Slower growth in China adds to the risks that global inflationary pressure and tightening of central bank policies could tip the global economy into recession. The Federal Reserve's decision to raise interest rates 50 basis points did little to settle the matter and as such, markets remained volatile, pressured by uncertainty regarding the macro-economic outlook and central bank liquidity. It was against that backdrop, with US inflation at its highest level in 40 years, the Federal Reserve announced a 75 basis point rate hike in June. As the Federal Reserve maintained guidance that it was fully committed to taming inflation, market pricing reflected a greater likelihood of US recession in 2023.

June pricing data provided a relief to markets in July, and the Fed, for its part, acknowledged the possibility of peak inflation and a potential easing to the pace of policy tightening as it announced another 75-basis point rate hike in late July. Although pricing data leveled off in July and August, strong employment numbers emboldened hawkish Federal Reserve rhetoric, tightening financial conditions and weighing on markets. After two months of relatively stable inflation, August data released in September reflected an unexpectedly high increase in core consumer prices. The Federal Reserve, for its part, responded with yet another rate hike of 75 basis points and increased its forecasts for future rate hikes. The European Central Bank (ECB) and Bank of England also announced substantial rate hikes of 75 and 50 basis points, respectively.

The fourth quarter began with more of the same, as concern regarding the impact of policy tightening by the world's major central banks outweighed a more benign outlook across most Emerging Market (EM) economies. Consumer prices in the US registered a lower-than-expected increase in October, providing a welcome indication that inflation may have peaked and that a slower pace of rate hikes may soon be appropriate. Market sentiment within EM was further supported by an easing of Covid restrictions in China and announcement of supportive policy measures. The Federal Reserve reduced the pace of its rate hikes from 75 basis points to 50 basis points, in December but also maintained guidance that persistent inflation would warrant ongoing policy tightening into 2023, guidance that was shared by the ECB, Bank of England and Bank of Japan. Despite the coordinated tightening of monetary policy across the four major Develop Markets (DM) central banks, the outlook for EM growth remained resilient, highlighted by positive policy developments in China.

PineBridge Global Funds

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS BOND FUND (continued)

Portfolio Overview (continued)

The fund closed in September 2022, up through that time the fund outperformed (gross and net of fees) its custom benchmark (gross of fees), the 1/3 blend of J.P. Morgan EMBI Global Diversified Index, J.P. Morgan CEMBI Broad Diversified Index and J.P. Morgan GBI-EM Global Diversified Index due in large part to underweight positions in Russia and Ukraine during the first quarter of 2022.

Portfolio Outlook

The sub-fund closed on September 6th 2022.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS SDG CORPORATE BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets SDG Corporate Bond Fund has a sustainable investment objective through which it seeks to advance certain United Nations Sustainable Development Goals ("SDGs"). The Sub-Fund seeks to achieve long-term, capital appreciation through investment in bonds issued primarily by corporate entities and financial institutions located in Emerging Markets. Such securities may be denominated in the local currency of any of the OECD member countries or the local currency of the emerging countries in which the Sub-Fund is permitted to invest as per investment guidelines.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Global Emerging Markets SDG Corporate Bond Fund Class "A", "Y" and "Y2H" returned (13.30%), (12.60%) and (13.30%) respectively. Over the same period, the benchmark index, the JP Morgan JESG CEMBI Broad Diversified benchmark (the "Index") (USD) and (GBP) returned (12.15%) and (12.91%) respectively. For the period 26th July to 31st December 2022, the PineBridge Global Emerging Markets SDG Corporate Bond Fund Class "Y2H", returned 2.03%. Over the same period, the benchmark index, the JP Morgan JESG CEMBI Broad Diversified benchmark (the "Index") returned 2.19% GBP.

Portfolio Overview

Emerging market corporate debt delivered negative returns in 2022 as macro-economic concern and geopolitical risks challenged market sentiment throughout the year. With US inflation entrenched at historically high levels, markets slumped early in the year under the weight of expectations for Federal Reserve rate hikes. Russia's invasion of Ukraine in February forced asset prices to adjust to potential risks of escalation beyond Ukraine and the impact that Russia sanctions would have on financial and energy markets. Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS SDG CORPORATE BOND FUND (continued)

Portfolio Overview (continued)

The fourth quarter began with more of the same, as concern regarding the impact of policy tightening by the world's major central banks outweighed a more benign outlook across most Emerging Market economies. Consumer prices in the US registered a lower-than-expected increase in October, providing a welcome indication that inflation may have peaked and that a slower pace of rate hikes may soon be appropriate. Market sentiment within Emerging Markets was further supported by an easing of Covid restrictions in China and announcement of supportive policy measures. The Federal Reserve reduced the pace of its rate hikes from 75 basis points to 50 basis points, in December but also maintained guidance that persistent inflation would warrant ongoing policy tightening into 2023, guidance that was shared by the ECB, Bank of England and Bank of Japan. Despite the coordinated tightening of monetary policy across the four major Developed Market (DM) central banks, the outlook for Emerging Market (EM) growth remained resilient, highlighted by positive policy developments in China.

The fund changed its benchmark from the J.P. Morgan CEMBI Broad Diversified Index to the J.P. Morgan JESG CEMBI Broad Diversified Index in late November 2022, and outperformed (gross) its benchmark during the reporting period. Country selection was positive, led by contributions from underweight positions in Russia and Ukraine in February and March. Elsewhere, contributions from overweight positions in Peru, Brazil and Colombia were offset by negative contributions from underweight positions in Argentina, Israel and Macau. Security selection was negative as detractors within China and Brazil overshadowed positive contributors within Chile, Colombia and Mexico. The fund also benefited from a short duration position relative to the benchmark.

Portfolio Outlook

Monetary policy tightening by the world's major developed market central banks and its impact on their respective economies remains a central focus of financial markets. In the US, signs that inflation may have peaked allowed the Federal Reserve to reduce to a 25 basis point rate hike and supported market expectations that the current hike cycle might soon run its course. However, the persistently strong US labor market could delay the market's long awaited Federal Reserve pivot. In Europe and England, both the ECB and Bank of England maintained their pace of rate hikes as inflation risks remain a focus of policymakers. Despite the macro-economic headwinds blowing from the world's advanced economies, emerging market fundamentals remain supportive, and China's economic re-opening and potential fiscal stimulus should help many EM economies manage the impact of slower DM growth in 2023. However, we expect price volatility to remain elevated as long as macro-economic uncertainty and treasury yield volatility persists.

Across EM debt markets, the recent rally of risk has brought valuations more in line with near-term, fair value expectations. While idiosyncratic risks have challenged the perception of EM debt among some market participants, contagion across the broader market has been relatively limited and is indicative of a more mature asset class. As such, while EM carry is attractive the evaluation of opportunities and selectivity of risk within those market segments that come under pressure will be critical over the near-term. Looking past macro-economic volatility the longer-term fundamental backdrop casts current valuations as attractive across regions and ratings categories. Despite the rate hiking cycle undertaken by many of the world's central banks, the flattening of yield curves suggest that bond yields will remain relatively contained, which should continue to drive a global search for yield and provide EM debt markets with a strong underpinning of technical support over the longer-term. We also note that unlike most rate hike cycles through history, many emerging market central banks have already undertaken rate hikes over the past year and could be in a position to ease policy as inflation is forecast to decline across most EM economies later in the year. Ultimately, while EM debt may experience short-lived periods of volatility stemming from macro-economic risk, we believe investors should take advantage of potential market weakness as an opportunity to make longer-term allocations to emerging market debt.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Emerging Markets Focus Equity Fund seeks to achieve a relatively high rate of growth, on a long-term basis, through careful selection of equity and equity-related securities in global Emerging Markets whilst seeking to protect the Sub-Fund from downside risk.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Global Emerging Markets Focus Equity Fund Class "A", "Y" and "Z" returned (27.92%), (27.35%) and (26.61%) respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Daily Total Return Net Index (USD) returned (20.09%).

Portfolio Overview

Global Emerging Markets began 2022 with several key drivers at work. First, global equity markets began pricing in potential US interest rate rises. Second, there were growing concerns about an armed conflict in Ukraine. Third, Chinese government's ongoing regulatory pressure on the internet platforms created growth outlook uncertainty for this large and important segment. Finally, as anti-Covid vaccines and quarantine measures began to pay off across many countries, economies began to reopen with less need for goods and services that became seen as remote enablers, especially in the technology segment. All this led to pronounced sector and style rotation out of previously outperforming growth tech sectors and into the previously lagging value segments of the market. Some of these developments were seen late in 2021, but in 2022 they became especially strong.

In February 2022 investors' worst fears came true and Russia invaded Ukraine. Financial, physical trade and economic dislocations that followed were far more severe than most observers predicted. Some of this was due to the much more swift and unified response by Ukraine's allies to Russia's invasion than anticipated, and some – due to the derivative effects of the sanctions, Black Sea blockade and general global trade disruption. This exacerbated worldwide inflationary pressures and further heightened interest rate increase concerns. The US Federal Reserve rate hikes in March 2022 and such worries persisted throughout most of the year.

Towards the end of quarter 2, many countries removed or meaningfully reduced Covid restrictions, the war's impact on global economy was becoming clear, as was the effect of global trade disruptions. All this was being reflected in earnings estimates which were generally coming down. Notable exceptions were commodity and consumer and financial sectors in commodity-driven economies. Investor rotation into value segments continued, while traditional growth/tech names continued to underperform. It was also around that time that it became clear that the war, which many thought would last 1-3 months, would likely persist until 2023.

In the second half of the year, corporates and investors increasingly shifted their focus from revenue generation to defend against cost pressured either through cost cutting or price increases. Companies that were able to defend margins and cash flows through price hikes typically performed well as it showed evidence of a product/service appeal that persisted through the economic cycle. As quarter 3 was ending and quarter 4 approached, the market's attention was drawn to the Congress of China's Communist Party. Despite a contentious speech by President Xi, subsequent economic directives were positive and was followed by relaxation of regulatory pressures on the internet platforms, end to Covid lockdowns and support for the real estate sector. Preceding these positive announcements, MSCI GEM Index was down (29.68%) YTD and MSCI China was down (41.36%). Share prices reflected a very negative outcome and many investors were underexposed both to Global Emerging Markets and to China within it.

As the shift in Chinese policies was underway, it became apparent that many of the trade disruptions seen throughout 2022 due to the war were diminishing or were being removed entirely. After 7 interest rate increases, the US was probably nearing the end of its hikes and the feared recession, was not likely to be a deep one. All this caused investors to reassess their view of GEM equities, especially in the light of highly appealing valuations and improving ESG in GEM Equity universe. The result is that in late October 2022, after the positive developments in China mentioned earlier, MSCI GEM began to rally and returned +23.4% since its lowest point of the year. The total return for 2022 became (19.94%), lagging the (17.96%) of MSCI ACWI.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND (continued)

Portfolio Overview (continued)

2022 saw the continuation of adoption of ESG principles by an increasing number of corporates. In addition to dividends and independent board directors, more companies are gradually engaging in environmentally and socially conscious behavior and are becoming more consistent in communicating their ESG attributes to the shareholders. Investors, in turn, are adding greater weight to ESG considerations in their decision-making.

The fund lagged (gross and net of fees) its benchmark, the MSCI Emerging Markets Index, during the annual reporting period ending December 31, 2022 due to underperformance in stock selection and allocation. The strongest contributors to the relative performance were in the energy and consumer discretionary sectors, while the largest detractors were industrials and financials.

Portfolio Outlook

Looking ahead to 2023, the outlook for Global Emerging Markets is cautiously positive. Many of the top-down concerns seen in 2022 remain in place, but they are of lesser magnitude and investors have had the time to reflect them in share prices and portfolio positioning. Market weakness of 2022 has brought valuations to very attractive levels, even considering that some rebound occurred late in 2022. Company earnings are beginning to improve and if China stays its course of prioritizing economic growth, there will be a potent fundamental underpinning to many sectors globally and countries in the region. The big known unknown remains the war in Ukraine. Should it come to a resolution, the world economy will accelerate, and Global Emerging Markets will disproportionately benefit. However, even the status quo is already priced into assets, leaving upside potential to current stock prices, even if the conflict goes on for a while. Overall, we see promising opportunities in several sectors and geographies and have positioned the fund accordingly.

The portfolio is invested in 46 companies with strong management, governance and business models mainly in consumer, technology, automation, clean energy, China localization, industrials and pharma sectors. Since many share prices have declined, we see new investment opportunities that were not as compelling a few months ago, even after the recent rally. The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes, who have strong ESG characteristics and that are not government-owned. Sectorally, our largest current overweights are in the industrials and consumer discretionary, while we are most underweight materials and communication services.

PineBridge Investments LLC
January 2023

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS LOCAL CURRENCY BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets Local Currency Bond Fund seeks to achieve a high level of total return and income consistent with conservation of capital through investment of not less than two thirds of the Sub-Fund's total net assets in local currency fixed income instruments issued by sovereign, quasi-sovereign, or corporate entities located in Emerging Markets.

Portfolio Performance

For the year 1st January to 31st August 2022, the PineBridge Global Emerging Markets Local Currency Bond Fund Class "A", "A6HD", "A9HD", "AD", and "Y" returned (11.40%), (12.21%), (9.58%), (11.41%), and (10.81%) respectively. Over the same period, the benchmark index, the JP Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified (Total Return) Index (USD), (AUD) and (ZAR) returned (14.40%), (9.22%) and (8.58%) respectively.

Portfolio Overview

Emerging market corporate debt delivered negative returns in 2022 as macro-economic concern and geopolitical risks challenged market sentiment throughout the year. With US inflation entrenched at historically high levels, markets slumped early in the year under the weight of expectations for Federal Reserve rate hikes. Russia's invasion of Ukraine in February forced asset prices to adjust to potential risks of escalation beyond Ukraine and the impact that Russia sanctions would have on financial and energy markets. The Federal Reserve's decision to raise rates by 25 basis points in March and pledge to pursue a steep trajectory of rate hikes to combat inflation further added to negative performance in March.

In May, covid lockdowns in China dramatically constrained economic activity, depressing demand in China and further disrupting global supply chains. Slower growth in China adds to the risks that global inflationary pressure and tightening of central bank policies could tip the global economy into recession. The Federal Reserve's decision to raise interest rates 50 basis points did little to settle the matter and as such, markets remained volatile, pressured by uncertainty regarding the macro-economic outlook and central bank liquidity. It was against that backdrop, with US inflation at its highest level in 40 years, the Federal Reserve announced a 75 basis point rate hike in June. As the Federal Reserve maintained guidance that it was fully committed to taming inflation, market pricing reflected a greater likelihood of US recession in 2023.

June pricing data provided a relief to markets in July, and the Fed, for its part, acknowledged the possibility of peak inflation and a potential easing to the pace of policy tightening as it announced another 75-basis point rate hike in late July. Although pricing data leveled off in July and August, strong employment numbers emboldened hawkish Federal Reserve rhetoric, tightening financial conditions and weighing on markets. After two months of relatively stable inflation, August data released in September reflected an unexpectedly high increase in core consumer prices. The Federal Reserve, for its part, responded with yet another rate hike of 75 basis points and increased its forecasts for future rate hikes. The European Central Bank (ECB) and Bank of England also announced substantial rate hikes of 75 and 50 basis points, respectively.

The fourth quarter began with more of the same, as concern regarding the impact of policy tightening by the world's major central banks outweighed a more benign outlook across most Emerging Market (EM) economies. Consumer prices in the US registered a lower-than-expected increase in October, providing a welcome indication that inflation may have peaked and that a slower pace of rate hikes may soon be appropriate. Market sentiment within EM was further supported by an easing of Covid restrictions in China and announcement of supportive policy measures. The Federal Reserve reduced the pace of its rate hikes from 75 basis points to 50 basis points, in December but also maintained guidance that persistent inflation would warrant ongoing policy tightening into 2023, guidance that was shared by the ECB, Bank of England and Bank of Japan. Despite the coordinated tightening of monetary policy across the four major Developed Market (DM) central banks, the outlook for EM growth remained resilient, highlighted by positive policy developments in China.

January 2023

PineBridge Global Funds

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Focus Equity Fund seeks to achieve growth at a reasonable price (meaning securities that have a growth potential and are reasonably priced as determined by conventional measures, such as priced earnings or by comparison to other securities in the same market and the same industry) by making equity and equity-related investments in global markets with a focus on superior and sustainable earnings performance.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Global Focus Equity Fund Class "A", "C", "L", "Y" and "ZD" returned (17.92%), (18.23%), (17.47%), (17.26%) and (16.43%) respectively. Over the same period, the benchmark index, MSCI All Country World Index (ACWI) Daily Total Return Net Index (USD) returned (18.36%). For the period 5th January to 31st December 2022, the PineBridge Global Focus Equity Fund Class "Z5H" returned 2.65%. Over the same period, the benchmark index, MSCI All Country World Index (ACWI) Daily Total Return Net Index (SGD) returned (4.36%).

Portfolio Overview

Companies continue to feel good about their near-term visibility, including end market demand, order books, and the ability to meet demand. Supply chains and labor are an ongoing headwind, but manageable. It is becoming the consensus that rate hikes will inevitably cause slower growth in 2023, along with lower earnings. Company surveys, which have held up relatively well throughout 2022, are starting to moderate a little further. Inflation will moderate next year, but it will stay above Federal Reserve (Fed) targets. Market volatility related to perceived potential changes in Fed policy continues to present us with opportunities to upgrade the portfolio and invest in advantaged companies at valuations below typically high levels. As always, portfolio style balance remains a key component of our risk management.

During 2022, the PineBridge Global Focus Equity Fund outperformed its benchmark, the MSCI All Country World Net Index. Outperformance was the result of strong security selection, which more than offset the impact of adverse allocation. Overall, industrials, consumer discretionary, and financials were the top contributing sectors to excess returns. By contrast, health care, energy, and utilities were the main detractors. The fund remains overweight industrials, information technology, and consumer discretionary and underweight energy, materials, financials, utilities, real estate, healthcare, consumer staples, and communication services. The fund seeks to outperform its benchmark through bottom-up stock selection, rather than from top-down allocation, and has benefited by owning select companies globally that are improving their market positions and exercising stronger-than-peer pricing power through new technologies and operating processes.

Portfolio Outlook

Short-term market disruptions (China lockdowns, Ukraine conflict, high headline inflation in the US) are masking several underlying secular trends. These include the massive investments needed to achieve the Paris Agreement's net-zero carbon emissions targets, the diversification of global supply chains, and increasing digitalization across all industries. The disconnect between these short-term and long-term forces may create attractive buying opportunities in companies set to benefit from longer-term secular trends but whose valuations have dropped amid the generalized equity declines. The fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include corporate transformation, global capex investment, technology enablers, and global affluence.

PineBridge Investments LLC
January 2023

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL STRATEGIC INCOME FUND

Portfolio Objective

PineBridge Strategic Bond Fund seeks to achieve a high level of total return and income consistent with conservation of capital through investment in a diversified portfolio of income producing debt securities.

Portfolio Performance

For the year 1st January to 31st August 2022, the PineBridge Strategic Bond Fund Class "A", "A5HD" and "AD" returned (11.84%), (11.92%) and (11.83) respectively. Over the same period, the Index, 10% FTSE Non-USD World Government Bond Index (Unhedged)(Total Return)/ 35% Bloomberg Barclays Capital US Corporate High Yield 2% Issuer Capped Index (Total Return)/ 20% JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return)/ 35% Bloomberg Barclays Capital US Aggregate Bond Index (Total Return) (USD) returned (13.65%).

Portfolio Overview

During the first quarter, credit markets faced pressure due to geopolitical tensions, central bank hawkishness, and inflationary pressures. Credit spreads recovered in the latter half of March due to strong demand, but oil and interest rate volatility remained elevated. The Federal Reserve raised interest rates by a quarter percentage point and signaled hikes at all six remaining meetings this year, launching a campaign to tackle the fastest inflation in four decades. Credit markets showed weakness in the second quarter due to rising rates, a hawkish Federal Reserve, and recession fears, leading to wider credit spreads and higher bond yields. Oil prices remained high due to supply chain disruptions but declined in June due to weaker demand and economic slowdown concerns. The Federal Reserve raised interest rates in May and June to control inflation.

Second half of the year kicked off with a strong rally in July. Credit markets had their best month in July due to a reversal of recession fears, but the rally reversed course in August due to hawkish comments from the Federal Reserve chair. In September, credit markets were pressured by higher inflation data and a rate hike by the Federal Reserve. The Federal Reserve's aggressive stance against inflation impacted the economy and all risk asset classes. By the end of the year, the market showed relative stability due to a cooler-than-expected inflation print and a slowdown in primary market activity. The Federal Reserve raised the benchmark interest rate by 50 bps in December, showing a slower pace after four consecutive 75 bps hikes.

Portfolio Outlook

The sub-fund closed on September 6th 2022.

PineBridge Investments LLC/PineBridge Investments Europe Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE GREATER CHINA EQUITY FUND

Portfolio Objective

PineBridge Greater China Equity Fund seeks to provide long-term capital growth by investing in equity and equity related securities of companies whose assets, products or operations are in the Greater China Region.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Greater China Equity Fund Class "A" and "Y" returned (16.06%) and (6.33%) respectively. Over the same period, the benchmark index, the MSCI Golden Dragon 10/40 Index Net Return (Net) (USD) returned (21.86%).

Portfolio Overview

Greater China equities declined significantly in 2022. External headwind such as Russia-Ukraine war, Federal Reserve's rate hikes, global inflationary pressure, coupled with internal concerns such as COVID-related lockdowns, downcycle of property sector, regulatory pressure on internet sectors, weighed on market sentiment. Except for energy sector which benefitted from rising energy prices globally, all the other sectors recorded negative return, with information technology being the worst-performing sector due to global tech and semi down cycle. In the last two months of the year, however, market saw strong rebound mainly driven by China's relaxation of Covid policy, which pared some losses for the year.

The fund outperformed its benchmark in 2022. During the year, the fund's exposure in energy sector and the positionings in information technology and communication service sectors contributed positively to performance, while the overweight position in utility sector and the exposure in consumer discretionary sector detracted.

Portfolio Outlook

Covid infection cases are rising rapidly across mainland China, with some of the northern cities starting to peak off. While economic activities remain weak in near term, signs of bottoming out are starting to show as the country gradually build herd immunity. Meanwhile, policy supports on property, internet, infrastructure continue to be rolled out. In view of the strong rebound in recent months, market may take a breather in the short term. Longer-term, valuations of Greater China equities and the economic recovery from re-opening will still serve as important market supports.

PineBridge Investments Asia Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE INDIA EQUITY FUND

Portfolio Objective

PineBridge India Equity Fund seeks to provide long-term capital appreciation by investing in equity and equity-related securities of companies listed on stock exchanges in India or closely related to the economic development and growth of India.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge India Equity Fund Class "A", "A5", "A5CP", "C", "R", "R1", "R2D", "RD", "Y", "Y3", "YD" and "Z" returned (14.90%), (15.51%), (15.25%), (15.09%), (14.00%), (8.83%), (3.74%), (14.00%), (14.22%), (1.82%), (14.22%) and (13.35%) respectively. Over the same period, the benchmark index, the MSCI India Daily Total Return Net (USD), (SGD), (EUR), (GBP) and (JPY) returned (7.95%), (8.43%), (1.92%), 3.65% and 5.35% respectively.

Portfolio Overview

The fund underperformed the benchmark index. An overweight position in financials helped the performance while an overweight position in healthcare negatively affected it.

The index gave negative returns in USD while the returns were positive in INR. The year was marked by many global upheavals in the geopolitical arena and pandemic related developments. India stood out as a stable market when compared to most other countries even as its currency depreciated due to rising imports on the back of rising energy prices. While the market average may not reveal much, sector performance was quite varied. Sectors that benefitted due to the pandemic saw slowdown and margin pressures as inflation rose. Sectors such as materials benefitted from rising prices. The surprise was that the financial sector which initially was assumed to be a big casualty of the pandemic came out unscathed. In fact, the pandemic has accelerated adoption of digital techniques in the sector which is having a salutary impact on expense control of companies as well as opening up avenues of growth which hitherto were not available. Given that India has a low M3/GDP ratio, this trend in increased financialization should continue especially given the strong balance sheets of banks.

Portfolio Outlook

We expect profits for Indian companies to grow, led by financials. Financial companies share of profits is significant in the index while the price-earning (p-e) multiples they get are very low given some of their past financial performance. On the other hand, companies which have demonstrated a good return on capital have high p-e multiples but are seeing growth not keeping pace with high market expectations. The average p-e multiple is high because of the latter set of companies. We expect a trend towards normalization where the companies which show good growth will see their earnings multiple expand, while the other set will see their multiple contract. It is going to be a test of bottom-up stock picking as we go forward.

PineBridge Investments Asia Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE JAPAN EQUITY FUND

Portfolio Objective

PineBridge Japan Equity Fund seeks to achieve long term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1st January to 31st December 2022 the PineBridge Japan Equity Fund Class "A", "Y" and "Z" returned (16.98%), (16.31%) and (15.46%) respectively. Over the same period, the benchmark index, the TOPIX Total Return Net Index (USD) returned (15.22%).

Portfolio Overview

The Japanese equity market, the broad market index of Topix, fell by (2.45%) in the local currency. Valuations contracted globally amid fears of US and European countries ramping up monetary tightening due to persistently high inflation. Russia's invasion to Ukraine in February and Bank of Japan's monetary tightening in December increased uncertainty, adding volatility to the markets. Top performing sectors were financials and commodity reflecting the rising interest rates and commodity prices, and bottom performing sectors were global and domestic cyclicals reflecting the rising concerns of stagflation.

As for corporate fundamentals, earning revisions had been neutral or slightly declining since the beginning of the year till mid-year with relatively positive trend of global corporates and negative trend of domestic corporates. The revisions once turned positive reflecting depreciation in Yen against US dollar afterwards, but they ended up with slight negative at the end of the year reflecting the Bank of Japans (BOJ) tightening monetary policy. As for the supply/demand situation of equities, there were no major buy/sell by either domestic or foreign investors in 1st half, but there was a tendency in 2nd half that individuals bought and foreign investors sold. By style, value outperformed growth amid the rising interest rates in the first half. Large growth particularly underperformed due to the rising concerns on stagflation. There was no major performance gap between styles in 2nd half.

The fund underperformed (gross and net of fees) its benchmark, the TOPIX Total Return Net Index. Sector allocation was negative as the negative impact of an underweight to commodity was larger than the positive impact of an overweight to defensives. Stock selection was beneficial since positive contribution from the stocks in consumption and financials sectors was larger than the negative contribution from the stocks in global cyclicals sector.

Portfolio Outlook

While starting to hear good news on supply chain problems, we are still facing some concerns, such as the Russia-Ukraine situation, a surge in Covid-19 cases in China, and the central banks' stance on interest rate hikes. We also need to keep a careful eye on the potential frictions in other regions, such as US-China relations, Middle East tensions, North Korea, etc. The Japan equity market may be volatile due to the above-mentioned concerns in the short term. The recent changes in the BOJ's monetary policies towards the more hawkish stance need to be closely monitored since the governor of the BOJ is scheduled to change in April. However, in the medium term, some of the concerns, such as Covid-19, supply chain issues, etc., will be mitigated, which will help support the equity market. The team believes that the cheap valuations also help support the market. The estimated P/E for fiscal year Mar/24 has recently fallen to approximately 11.5x, which is the bottom range over the past 10 years.

The team has maintained the fund's slight overweight position in global cyclicals to take advantage of the market and cyclical recovery while carefully balancing the portfolio weights not to take too much risk on sector allocation.

PineBridge Investments Japan Co., Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Japan Small Cap Equity Fund seeks to achieve long-term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in small Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Japan Small Cap Equity Fund Class "A", "A12", "A3", "C", "M", "R1D", "RD", "R2D", "Y", "Y1H" and "Y3" returned (17.63%), (4.80%), (5.45%), (17.73%), (17.75%), (11.48%), (16.88%), (7.16%), (16.96%), (5.30%) and (4.69%) respectively. Over the same period, the benchmark index, the MSCI Japan Small Cap Daily Total Return Net Index (USD), (EUR), (SEK), (JPY) and (GBP) returned (12.20%), (6.63%), 1.19%, 0.77% and (1.32%) respectively.

Portfolio Overview

The Japan small cap market declined by (0.3%) in the local currency terms and (11.2%) the US dollar terms in 2022. The market started weak due to the global monetary tightening, particularly in the US and Europe. The market concern gradually shifted to the recession and its negative impact on the corporate earnings. Over the year, growth underperformed value significantly as a rise in capital cost hit growth more. Exceptional growth declined more than (20%). By sector, a high growth sectors such as software and commercial services were most severely sold, followed by electronics and healthcare. Inflation beneficiaries, such as regional banks and commodity were bought. Domestic reopening sectors such as retail also gained.

In such market environment, the fund underperformed (net and gross of fees) its benchmark, the MSCI Japan Small Cap Daily Total Return Net Index, mainly due to our growth bias. Our overweight position in growth and underweight position in value caused the significant underperformance. From the sector perspective, the worst contributor was our electronics holdings due to the demand softening, especially in the first quarter. Domestic reopening holdings contributed positively, in the domestic consumer and commercial service sectors.

Portfolio Outlook

Stagflation concern will likely stay due to moderating but sticky inflation and a tight monetary policy in the US to fight inflation, which is easing, but remains a short-term risk to the market. The new governor nomination of the Bank of Japan and likely policy changes might add some market volatility. On the other hand, the domestic business condition remains relatively sound, especially among non-manufacturing sectors, while the valuation of these sectors is attractive, because of the growth selloff over the past year.

In the long term, investments related to digitalization and the zero-carbon transition are irreversible, which could turn the market around over several years. As for the portfolio's positioning, the team overweights attractively priced growth companies which could benefit from the pandemic recovery and long-term structural industry and social dynamics, such as digital transformation and demography. In terms of market valuations, Price to Book is below 1x, and 12-month forward-looking Price to Earnings is 11.5x, which is the low end of the 10 years valuation range and attractive given the relatively sound domestic fundamentals and recovery from prolonged supply chain constraint.

PineBridge Investments Japan Co., Ltd.
January 2023

Investment Manager's Report (continued)

PINEBRIDGE LATIN AMERICA EQUITY FUND

Portfolio Objective

PineBridge Latin America Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies operating in the economies of Latin America.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge Latin America Equity Fund Class "A" and "Y" returned 9.48% and 10.35% respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Latin America Daily Total Return Net Index (USD) returned 10.18%.

Portfolio Overview

In 2022, the MSCI EM Latin America DTR Net Index rose 9.57%, outperforming the MSCI Emerging Market Index, which was down (19.94%) and the S&P 500, which fell (18.13%), in a year marked by the post-Covid reopening, the first large war in Europe since World War II, rising inflation, global rate hikes as well as political and regulatory uncertainty in Latin America (LatAm). Argentina and Chile were the strongest performers in the region. Both countries were the beneficiaries of higher commodity prices which helped drive equity returns. Mexico and Colombia were the weakest, in large part because their markets list many companies that do not benefit from commodity prices. However, even in those countries, attractive investment opportunities could be found, especially in Mexico. At a sector level, energy and utilities led the Index, while consumer discretionary and health care lagged.

LatAm markets rallied strongly in the first half of 2022 as rising interest rates across the globe caused investors to rotate out of high multiple growth names as well as securities affected by Russia's invasion of Ukraine into more value-oriented sectors, which likely favored LatAm indices, as the region is a net commodity exporter. Despite some political uncertainty, the region was viewed as a relative safe haven for global-oriented investors in 2022 amid China's Zero-COVID Policy and geopolitical concerns in Eastern Europe. At the same time a large presence of well-run and companies with strong ESG attributes in financial, consumer staples, consumer discretionary, industrials and other sectors allowed for proper portfolio diversification to reduce systematic risks. As we approached the second half of 2022, some political risks in LatAm became more evident and coupled with concerns about us interest rate rises, the markets sold off. However, the weakness was short-lived and LatAm equities began to recover in the second half of the year, finishing the year +9.57%. This is despite the concerns about Brazil's newly elected President Lula and his unpredictable fiscal agenda and protests in Peru.

The fund outperformed (gross and net of fees) its benchmark, the MSCI Emerging Markets Latin America Daily Total Return Net Index, during the year 2022. The fund's outperformance was mainly due to stock selection in Brazil and Chile, while biggest detriment came from allocation in Uruguay and Chile. At a sector level, the largest positive contributors to the Fund's outperformance were stock selection in consumer discretionary and financials, while main headwinds came from selection in health care and allocation effect in consumer discretionary.

Investment Manager's Report (continued)

PINEBRIDGE LATIN AMERICA EQUITY FUND (continued)

Portfolio Outlook

Looking ahead, Latin America may enter a monetary policy expansion phase led by Brazil, in contrast to developed markets, and probably more aggressively than other emerging markets. The main source of LatAm returns in 2023 should be through re-rating, considering that valuations are at multi-year lows. Consensus earnings at this point are positive mostly for Mexico, but upward revisions could be expected, especially in the commodity space. Mexico has been viewed as a very stable country in the region offering many high-quality companies along with a clearly defined growth catalyst from "nearshoring"; however, an expected US recession would affect growth expectations in Mexico given the country's strong economic ties to the US. In Colombia, higher oil prices have helped support the fiscal and current account, but policy uncertainty will be a drag on market performance. Peru has one of the highest expected growth rates in the region coupled with a strong fiscal position, but policy uncertainty and public unrest has hampered the investment outlook. China's reopening and pivot away from their Zero COVID Policy could provide sustainability for commodity prices even within a US recession, and this would bode well for LatAm countries, which are net commodity exporters. Fiscal policy remains a significant concern for LatAm, as social spending ramps up amid public unrest and slowing growth as most countries are governed by leftist administrations.

The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes, who have strong ESG characteristics..

Investment Manager's Report (continued)

PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND

Portfolio Objective

The investment objective of the Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing. The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge US Large Cap Research Enhanced Fund Class "A", "A5CP", "A5H", "Y" and "YYD" returned (16.14%), (16.56%), (16.86%), (15.69%) and (14.95%) respectively. Over the same period, the benchmark index, the Standard & Poor's 500 Total Return Net Index (USD) and (SGD) returned (18.51%) and (18.93%) respectively.

Portfolio Overview

January closed a volatile month for US equities as the Federal Reserve's (Fed) liftoff scenario begins to take shape with inflation running high and stability in the economy that further lends itself to rate normalisation. Equities hit monthly lows as there was more expectation that Jerome Powell and the Fed could raise rates at a faster than expected rate. US equities fell in the month of February, with volatility elevated as geopolitical tensions gripped the world with Russia's invasion of neighboring Ukraine. While equities hit correction territory in February, March saw a mild rebound as the market clawed back some oversold conditions. In April, the Russia-Ukraine conflict, severe China lockdowns, rising inflation, rising interest rates, continued labor shortages, and continued supply chain issues led to the worst monthly returns since 2020. In May, the Russia-Ukraine conflict, severe China lockdowns, rising inflation, rising interest rates, continued labor shortages, and continued supply chain issues led to the market underperforming initially. But as weaker data started coming from big-retail and housing market, and looking at rising inventory levels, the inflation fears decreased marginally, leading to expectation of less aggressive Federal Reserve. The equity market continued to slide down in June on the backdrop of higher inflation, weaker growth and tightening financial conditions, with S&P 500 the worst first half total return since 1962. U.S. stock markets had stabilized in July after a brutal selloff in the first half against the backdrop of a surge in inflation, the Ukraine conflict and the Fed's pivot away from easy-money policy. Risky assets reversed course in August after a positive July as worries over rising rates and economic recession deepened. We saw some early signs of recession sensitive factor positioning with defensive styles outperforming in September. Global equity markets bounced back strongly in October, reversing almost 50% of the losses racked up since mid-August, with a 7.1% gain for MSCI World and 8% for S&P 500. The early rally faded through December (S&P 500 -5.9%), as a combination of higher US treasury yields, mixed macro data and lackluster flows (Dec. -US\$19bn) undermined sentiment. All sectors ended December in the red, while energy was the standout for the year.

During the period, the fund outperformed the S&P 500 Total Return Net Index. During the period, the strongest contributors to relative performance were in consumer discretionary and information technology sectors. The largest detracting sector from relative performance was the utilities sector. The Mature Defensive categorization was the top performing growth category exhibiting strong stock selection while the Mature Cyclical categorization were the worst performing.

Investment Manager's Report (continued)

PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND (continued)

Portfolio Outlook

Going into 2023, there is cautiousness regarding recession-fears and Fed policy. Exacerbated by China re-opening and other momentum plays, 2023 could be a volatile year headed for recession. The focus will be on quality stocks or more defensive picks that can withstand market drawbacks, especially as equity valuations are expected to further diminish. With inflation expected to slow down throughout the year, the equity market is expected to stabilize more and become less reactive to Federal Reserve policy.

PINEBRIDGE US RESEARCH ENHANCED CORE EQUITY FUND

Portfolio Objective

The investment objective of PineBridge US Research Enhanced Core Equity Fund is to seek to attain long-term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing.

The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge US Research Enhanced Core Equity Fund Class "A" and "Y" returned (18.14%) and (17.36%) respectively. Over the same period, the benchmark index, the Standard and Poor's 500 Total Return Net Index returned (18.51%).

Portfolio Overview

January closed a volatile month for US equities as the Federal Reserve's liftoff scenario begins to take shape with inflation running high and stability in the economy that further lends itself to rate normalisation. Equities hit monthly lows as there was more expectation that Jerome Powell and the Federal Reserve (Fed) could raise rates at a faster than expected rate. Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND

Portfolio Objective

The investment objective of PineBridge USD High Yield Bond Fund is to aim to maximize total return consisting of current income and capital appreciation by primarily investing in USD-denominated high yield debt securities.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge USD High Yield Bond Fund Class "A5HD", "X", "X1", "X2", "X2D", "X2H", "X2HD" and "X7" returned (12.51%), (11.41%), (5.61%), (0.25%), (0.25%), (12.33%), (12.38%) and (10.05%) respectively. Over the same period, the benchmark index, the Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index (the "Index") (USD), (EUR), (GBP Hedged), (GBP Unhedged), (SGD) and (CHF) returned (11.18%), (5.36%), (12.47%), 0.01%, (11.64%) and (9.81%) respectively.

Portfolio Overview

After a relatively steady year in 2021, 2022 marked a year of heightened volatility in the high yield market as high inflation, tightening monetary policy, geopolitical concerns and recession fears resulted in a tumultuous environment for asset markets. As measured by the Consumer Price Index, inflation reached levels last seen in the 1980s and has persisted at these high levels for longer than many originally anticipated. To combat rampant inflation the Fed increased rates seven times over the course of the year, bringing the target range to 4.25%-4.50%, up from 0%-0.25% to start the year, and remains committed to reining it in, even at the risk of a softer economy or recession. Treasury rates traded sharply higher, and the yield curve inverted during the year, with 5- and 10-year Treasury yields trading 274 bps and 236 bps higher, respectively, with the 5--year Treasury yield ending the year above 4%. Starting in February investors also had to contend with the Russian invasion of Ukraine resulting in additional volatility, spiking commodity prices and increasing risks to the European economy. Additionally, the Chinese government's zero-Covid policies shackled its economy and were a big drag on both domestic consumption and global growth.

According to Bloomberg data, Ba-rated bonds returned (10.80%), while single-B rated bonds returned (10.26%) and Caa-rated bonds returned (16.29%). The move in Treasury rates ultimately accounted for a majority of the negative total return in the high yield asset class. The option-adjusted spread (OAS) on the Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index traded 186 bps wider during the year to end at 470 bps. 2022 gross issuance totaled \$106.5bn, compared to \$483bn in 2021. Overall, 2022 posted a record \$47bn in outflows compared to outflows of \$13.2bn in 2021. The par weighted US high yield default rate including distressed exchanges ended December at 1.65%, increasing 129bps over the course of the year.

The fund outperformed gross of fees and underperformed net of fees its benchmark, Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index, in 2022. Sector selection contributed to performance for the year, while security selection detracted. From a sector selection standpoint, an overweight allocation to the energy sector, underweight allocations to the communications and consumer non-cyclical sectors and the cash position contributed to fund performance during the year. These contributions more than offset deductions from an underweight allocation to the capital goods sector. From a security selection standpoint, holdings among consumer cyclical, finance company, capital goods and REITs names detracted from fund performance. Meanwhile, selection among communications, consumer non-cyclical and energy credit contributed to performance. From a ratings perspective, an underweight allocation to CCC-rated credits also contributed as CCC's materially underperformed Ba and single-B rated bonds during the year.

Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND (continued)

Portfolio Outlook

Risk markets tried to end the year on a positive note, but the Fed and ECB quickly warned markets they aren't finished tightening financial conditions. The team remains of the view that credit is entering a slowdown from a point of strength. Fundamentals are starting from a strong position, but the macroeconomic environment indicates we're heading into a flattening of fundamentals at best and likely some deterioration. From a technical perspective, the supply/demand outlook looks favorable heading into the new year. We expect higher interest rates will encourage corporate de-leveraging and new issuance will remain light. Liquidity also continues to be below average, although it has improved at the margin, and we're finding non-traditional outlets like portfolio trading. Overall index level spreads remain near the tighter end of our forecasted range, and we expect spreads to remain range bound in an environment devoid of positive catalysts. However, with the new year comes one of the most anticipated recessions in history. As a result, the team is maintaining a more defensive posture in portfolios, keeping beta below 1. We continue to look for signs to add risk from here, but do not believe now is the time.

PineBridge Investments LLC
January 2023

Investment Manager's Report (continued)

PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND

Portfolio Objective

The investment objective of PineBridge USD Investment Grade Credit Fund is to aim to maximise total return and provide capital preservation through investment in the US Investment Grade credit universe.

Portfolio Performance

For the year 1st January to 31st December 2022, the PineBridge USD Investment Grade Credit Fund Class "A", "C", "X" and "Y" returned (16.97%), (17.89%), (16.10%) and (16.39%) respectively. Over the same period, the benchmark index, the Bloomberg Barclays US Credit Total Return Index returned (15.26%).

Portfolio Overview

During the first quarter, credit markets faced pressure due to geopolitical tensions, central bank hawkishness, and inflationary pressures. Credit spreads recovered in the latter half of March due to strong demand, but oil and interest rate volatility remained elevated. The Federal Reserve raised interest rates by a quarter percentage point and signaled hikes at all six remaining meetings this year, launching a campaign to tackle the fastest inflation in four decades. Credit markets showed weakness in the second quarter due to rising rates, a hawkish Federal Reserve, and recession fears, leading to wider credit spreads and higher bond yields. Oil prices remained high due to supply chain disruptions but declined in June due to weaker demand and economic slowdown concerns. The Federal Reserve raised interest rates in May and June to control inflation.

Second half of the year kicked off with a strong rally in July. Credit markets had their best month in July due to a reversal of recession fears, but the rally reversed course in August due to hawkish comments from the Federal Reserve chair. In September, credit markets were pressured by higher inflation data and a rate hike by the Federal Reserve. The Federal Reserve's aggressive stance against inflation impacted the economy and all risk asset classes. By the end of the year, the market showed relative stability due to a cooler-than-expected inflation print and a slowdown in primary market activity. The Federal Reserve raised the benchmark interest rate by 50 bps in December, showing a slower pace after four consecutive 75 bps hikes.

The portfolio underperformed its benchmark, the Bloomberg Barclays US Credit Total Return Index, during the year due to negative contributions from security selection, primarily in the Financials, Communications and Consumer Cyclical sectors. Asset allocation was also negative driven by underweight in government sector and overweight in financials. The portfolio was mostly in line with the benchmark during the period. However, curve positioning detracted from performance during the period.

Portfolio Outlook

While the Federal Reserve's aggressive rate increases threaten to overshoot and engineer a recession, market prices still reflect expectations for a soft landing. Against this backdrop, we believe fixed income investors should maintain a more defensive portfolio stance and be prepared to add risk should valuations present attractive investment opportunities. With an inverted yield curve and yields at or near a cyclical peak, the team currently doesn't think it makes sense to take more significant risks.

Investment Manager's Report (continued)

PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND (continued)

Portfolio Outlook (continued)

Even though a stronger dollar has raised hedging costs for foreign investors, US investment grade credit remains attractive due to elevated all-in yields and demand for higher-quality dollar-denominated assets. However, with the Federal Reserve still on a rate hiking path, the team expects continued volatility with the path being anything but one-directional; periods of relief rallies are expected. A moderate slowdown in the economy or a mild recession would likely prompt the Federal Reserve to halt its plan to raise rates and slow the pace of balance sheet reduction. We anticipate such a pivot around mid-year, which would likely drive a longer-lasting rally and signal an opportune time to add risk.

PineBridge Investments LLC
January 2023

Statement of Manager's Responsibilities

The Manager is responsible for preparing the Annual Report and the Financial Statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law). In preparing these Financial Statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards and identify the standards in question subject to any material departure from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that each Sub-Fund will continue in operation.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Fund and to enable it to ensure that the Financial Statements are prepared in accordance with FRS 102 and comply with the provisions of the Prospectus, Trust Deed and the UCITS Regulations. The Manager has appointed State Street Fund Services (Ireland) Limited (the "Administrator") to maintain the accounting records of the Fund at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud, error and other irregularities.

Under the UCITS Regulations, the assets of the Fund are entrusted to the Depositary for safe-keeping.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on PineBridge's website (www.pinebridge.com). Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

During the course of the year, regulation around sustainability-related disclosures continued to evolve, through the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) (the "SFDR") and the EU Taxonomy Regulation (Regulation (EU) 2020/852, and amending SFDR) (the "Taxonomy Regulation") and their associated regulatory technical standards and available guidance. Additional disclosure requirements under SFDR Level 2 are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the Sub-Funds can be found in Appendix I of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in Appendix I should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Managers, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Connected Persons

Regulation 43 of the Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations") "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

Statement of Manager's Responsibilities (continued)

Connected Persons (continued)

As required under UCITS Regulation 81 (4), the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by UCITS Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

ON BEHALF OF THE BOARD OF THE MANAGER:

Director

Director

Date: 18 April 2023

Depository's Report to the Unitholders of PineBridge Global Funds

We have enquired into the conduct of the Manager in respect of PineBridge Global Funds (the "Trust") for the financial year ended 31 December 2022, in our capacity as Depository to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed.

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and;

(ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depository by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 [Section 48(1)] (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

Notes to the Financial Statements for the financial year ended 31 December 2022

1. ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these Financial Statements are set out below. The accounting policies applied are consistent with all the periods presented unless otherwise stated.

BASIS OF PREPARATION AND PRESENTATION

a) Statement of compliance

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 102, the financial reporting standard applicable in the UK and Republic of Ireland and the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). The financial statements have been prepared on a going concern basis, with the exception of PineBridge Global Emerging Markets Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund (all the "Sub-Funds") whose financial statements were prepared on a basis other than going concern as the Board of Directors of the Manager resolved to terminate these Sub-Funds during the financial year. The Directors of the Manager approved the termination of these funds for strategic and commercial reasons.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The Fund has continued to avail of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

All references to net assets throughout the document refer to Net Assets Attributable to Holders of Redeemable Participating Units unless otherwise stated, with the exception of the PineBridge Asia Dynamic Asset Allocation Fund which is prepared under Equity presentation and use the reference Net Assets.

b) Consolidation

FRS 102 sets out the conditions relating to parent undertakings and the preparation of consolidated financial statements for subsidiaries. FRS 102 typically defines controlling interest as ownership, directly or indirectly of over 50% of the outstanding voting shares of another entity. The results of the subsidiary undertakings are consolidated into the group Statement of Comprehensive Income from the date on which control over the operating and financial decision making is obtained. PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Accordingly, the Financial Statements of PineBridge Investments GF Mauritius Limited are consolidated in the PineBridge India Equity Fund, and therefore include the assets and liabilities and the profit/loss of PineBridge Investments GF Mauritius Limited for the financial year ended 31 December 2022 and financial year ended 31 December 2021.

All significant inter-fund accounts and transactions have been eliminated in the Consolidated Financial Statements of PineBridge India Equity Fund.

c) New accounting pronouncements

In March 2020, the FASB issued an Accounting Standards Update ("ASU") 2020-04 which provides guidance to account for certain contract modifications prospectively to ease the potential accounting burden associated with transitioning away from the London Interbank Offered Rate ("LIBOR") and other reference rates that are expected to be discontinued. The ASU is effective immediately upon release of the update on 12 March 2020 through 31 December 2022. There is no impact of this ASU on the financial statements for the year ended 31 December 2022 (31 December 2021: None).

There are no other new standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the Fund.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss

i) Classification

This category has two sub-categories: financial assets and liabilities held for trading and those designated by Directors at fair value through profit or loss at inception. Financial assets and financial liabilities are designated by the Manager at fair value through profit or loss at inception with the exception of financial derivative instruments which are held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

ii) Recognition and Derecognition

Purchases and sales of investments are recognised on trade receipt basis as disclosed on page 4. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets or financial liabilities are measured at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial period in which they arise.

iv) Fair Value

Transferable Securities

Equity securities listed on a recognised stock exchange or traded on any other regulated market are valued at the last traded price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price does not, in the opinion of the Directors of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. Fixed income securities listed on a recognised stock exchange or traded on any other regulated market are valued at evaluated bid price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities.

In the case of any security not listed, quoted or dealt in on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Directors of the Manager or other competent person appointed by the Directors of the Manager and approved for the purpose by the Trustee, using valuation techniques.

Loan Participations and Assignments ("Bank Loans")

Certain Sub-Funds may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Sub-Fund's investments in Bank Loans may be in the form of participations in Bank Loans or assignments of all or a portion of loans from third parties. A Bank Loan is often administered by a bank or other financial institution (the "Lender") that acts as agent for all holders.

The Lender administers the terms of the Bank Loan, as specified in the Bank Loan agreement. When investing in a loan participation, a Sub-Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt by the Lender of payments from the borrower. A Sub-Fund generally has no right to enforce compliance with the terms of the Bank Loan agreement with the borrower. As a result, a Sub-Fund may be subject to the credit risk of both the borrower and the Lender. However when a

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

Loan Participations and Assignments (“Bank Loans”) (continued)

Sub-Fund purchases assignments from Lenders it acquires direct rights against the borrower of the Bank Loan. The fair value of investments in Bank Loans are based on evaluated bid price from broker quotes received from IHS Markit Limited. The Sub-Funds did not hold any Bank Loans as at 31 December 2022 and 31 December 2021.

Collateralised Mortgage Obligations (“CMOs”)

Some Sub-Funds may invest in securities with contractual cash flows, such as collateralised mortgage obligations. CMOs, a type of mortgage-backed security, are bonds that represent claims to specific cash flows from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests, known as tranches, according to a complicated deal structure. Each tranche may have different principal balances, coupon rates, prepayment risks, and maturity dates (ranging from a few months to twenty years).

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

The fair value of CMOs are based on quoted market prices and are valued at the evaluated bid price.

Forward Foreign Currency Exchange Contracts and Non-Deliverable Forwards (“NDF’s”)

The fair value of open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Changes in the value of open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are recognised as unrealised gains or losses on forward foreign currency exchange contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund.

Investment Funds

Investments in open-ended investment funds are estimated at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the net asset value of these units is recognised as net gain/(loss) on investment activities at fair value through profit or loss. The fair value of investments in exchange traded investment funds are based on quoted market prices and are valued at the last traded price.

Futures Contracts

The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as at the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open futures contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund. Initial margin deposits are made upon entering into futures contracts and are generally included in cash or cash equivalents.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

Total Return Swaps

A swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loan, or bond. The fair value of the swaps is determined based on the mark to market valuation, which makes assumptions that are based on market conditions existing on each Statement of Financial Position date. The difference between the stated terms of the swap contract and the prevailing market conditions are recorded as movement in net unrealised gains or losses on investments in the Statement of Comprehensive Income. Unrealised gains and losses on total return swaps are included in the unrealised gain or loss on financial derivative instruments in the Statement of Financial Position.

To-Be-Announced ("TBA") Purchase/Sale Commitments

The Sub-Funds may enter into TBA commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price and par amount have been established, the actual securities have not been specified. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The Sub-Funds hold, and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Sub-Funds may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date.

The Sub-Funds may also enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction, or other liquid assets in an amount equal to the notional value of the TBA sale commitment are segregated. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the Sub-Funds realise a gain or loss. If the Sub-Funds deliver securities under the commitment, the Sub-Funds realise a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

TBA commitments, which are accounted for as purchase and sale transactions, may be considered securities themselves, and involve a risk of loss due to changes in the value of the security prior to the settlement date as well as the risk that the counterparty to the transaction will not perform. Counterparty risk is mitigated by having a master agreement between the Sub-Funds and the counterparty. Unsettled TBA commitments are valued at their fair value. The contract is marked to market daily and the change in fair value is recorded by the Sub-Funds as an unrealised gain or loss. Based on market circumstances, the Manager will determine whether to take delivery of the underlying securities or to dispose of the TBA commitments prior to settlement. The Sub-Funds did not hold any TBA commitments as at 31 December 2022 and 31 December 2021.

Investment Gains/(Losses)

Unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss are included in the Statement of Comprehensive Income in the financial period in which they arise.

Realised gains and losses on investment transactions, excluding debt instruments, are calculated using the average cost method. Realised gains and losses on investments transactions in debt instruments are calculated as the difference between sales proceeds and the average cost of the instrument. Gains and losses realised on the sale of all financial assets and financial liabilities carried at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

v) Critical Accounting Estimates and Assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities predominantly relate to the fair value of financial instruments.

Fair-value of financial instruments

The Sub-Funds may, from time to time, hold financial instruments that are not quoted in active markets, such as over-the-counter derivatives. Fair values of such instruments may be determined by using valuation techniques. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis and other valuation techniques commonly used by market participants. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by experienced personnel at the Administrator, independent of the party that determined them and validated with the Investment Manager.

Capital gains tax

The Sub-Funds currently incur taxes imposed by certain countries on capital gains. Such gains are recorded gross of capital gains tax in the Statement of Comprehensive Income. Capital gains tax, where it occurs, is shown as a separate item in the Statement of Comprehensive Income.

vi) Cash at Broker/Amounts due to Broker/Cash held with Broker as Collateral

Cash at broker may comprise of margin cash held with brokers for futures contracts traded by the Sub-Funds, a portion of which may be restricted to cover initial margin requirements, and Cash held with broker as collateral may comprise of cash held by counterparties for collateral purposes for open over-the-counter ("OTC") financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant Sub-Fund and is recorded as an asset on the Statement of Financial Position.

Amounts due to broker may comprise of margin cash and cash collateral pledged by counterparties for OTC financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant counterparty and a related liability to repay the cash is recognised as "Amounts due to broker" on the relevant Sub-Fund's Statement of Financial Position.

vii) Cash at bank

Cash at bank comprises of cash balances held at State Street Bank & Trust Company or by the relevant appointed Sub-Custodian. Cash held in the functional currency of the relevant Sub-Fund is valued at cost, which approximates fair value. Cash held in currencies other than the functional currency of the Sub-Fund is initially recognised at cost using the relevant currency exchange rates on date of purchase and subsequently recognised at fair value using the relevant currency exchange rates as at the Statement of Financial Position date.

viii) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Sub-Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the Sub-Fund shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, loans, investment funds, forwards, futures contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

viii) Transaction Costs (continued)

Transaction costs on purchases and sales of equities are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each Sub-Fund. Depository transactions costs are included in trustee and sub-custodian fees in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs. The total costs incurred by each Sub-Fund during the financial year are disclosed in Note 8.

e) Income from Investments

i) Bond and Bank Loan Income

Interest income is recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

ii) Dividend Income

Dividend income arising on the underlying investments of a Sub-Fund is recognised as income in the Statement of Comprehensive Income of the relevant Sub-Fund on the dates on which the relevant securities are listed as "ex-dividend". In accordance with FRS 102, dividend income is reported gross of any irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

iii) Other Income

Other income is recognised in the Statement of Comprehensive Income on an accruals basis.

f) Expenses

Each Sub-Fund pays all of its expenses and such proportion of the Fund's expenses as is allocated to that Sub-Fund, other than those expressly assumed by the Manager. The costs and gains/(losses) of any hedging transactions will be attributable to the relevant unit Class. To the extent that expenses are attributable to a specific unit Class of a Sub-Fund, that unit Class bears such expenses. All expenses, as disclosed in the Statement of Comprehensive Income, are accrued on a daily basis.

Capital Gains Taxation

The Sub-Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Capital gains taxes are shown as a separate item under taxation in the Statement of Comprehensive Income.

g) Foreign Exchange

The functional currency of the Sub-Funds is US Dollar, the currency of the primary economic environment in which each Sub-Fund operates. US Dollar is also the presentational currency of the Sub-Funds.

The cost of investments and other transactions in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling at the time of the transaction. The fair value of the investments, other assets and other liabilities in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling as at financial year end. The resulting profits or losses are accounted for in the Statement of Comprehensive Income.

h) Distribution Policy

The Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by a Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses (capital). The Manager may also declare interim distributions on the

Unitholders may elect in an application for units either to receive distributions in cash or to reinvest the distribution amount in further units. For Sub-Funds whose units are classified as liability, the distributions to Unitholders are recognised as Finance Costs in the Statement of Comprehensive Income. Distributions reinvested are disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders.

i) Income Equalisation

Income equalisation arrangements are applied in the case of subscriptions to and redemptions from certain Sub-Funds. The NAV per redeemable participating unit as calculated on each Dealing Day has an income element and a capital element. In relation to any subscription or redemption, the monies received or paid are allocated proportionately to or from income and capital in a Sub-Fund. These arrangements are intended to ensure that the income per redeemable participating unit, which is distributed in respect of any distribution period for which a distribution is made, is not affected by changes in the number of redeemable participating units in issue during that period. The calculation of equalisation is based on net income. Income equalisation is in operation in PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Asia Pacific Investment Grade Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Europe Research Enhanced Equity Fund and PineBridge USD High Yield Bond Fund.

j) Unit Classes

i) Redeemable Participating Units

Redeemable participating units are redeemable at the unitholder's option and are classified as financial liabilities. The redeemable units can be repurchased by the Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV. The redeemable unit is carried at the redemption amount that is payable at the Statement of Financial Position date if a unitholder exercised his or her right to have the Fund repurchase his or her unit. In accordance with the Prospectus, for the relevant Sub-Funds, the Fund is contractually obliged to redeem units at dealing prices and the liability to redeemable participating unitholders reflects this. Monetary value unit transactions during the financial year are recognised in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders of the relevant Sub-Fund. The units of all Sub-Funds are classified as financial liabilities with the exception of PineBridge Asia Dynamic Asset Allocation Fund at 31 December 2022 and at 31 December 2021, which units are classified as equity. See details in (ii) below.

ii) Equity Units

Equity units are also redeemable at the Unitholder's option. Each equity unit can be repurchased by the Sub-Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV.

Reconciliation of Net Asset Value per Financial Statements to Net Asset Value per dealing NAV

The NAV at which unitholders may subscribe or redeem (i.e. the "dealing NAV") may differ from the NAV disclosed in the financial statements due to a difference in the Valuation Date as per the prospectus and the financial year end date.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

2. DEALING NET ASSET VALUE (continued)

Reconciliation of Net Asset Value per Financial Statements to Net Asset Value per dealing NAV (continued)

In line with the Prospectus, the final 2022 Valuation Date for PineBridge Latin America Equity Fund was 29 December 2022. As these financial statements were prepared to 31 December 2022, all transactions which occurred on the Sub-Fund between the respective final 2022 Valuation Date and 31 December 2022 have been accounted for in these Financial Statements and the Sub-Fund's investments have been fair valued using the last traded market prices available as at 31 December 2022. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2022 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2022 Valuation Date for the Sub-Fund.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for the Sub-Fund as at 31 December 2022.

	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	74,410,435
Total transactions adjustment	<u>764,810</u>
Net Asset Value per dealing NAV	<u><u>75,175,244</u></u>

In line with the Prospectus, the final 2021 Valuation Date for PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund and PineBridge Latin America Equity Fund was 30 December 2021. As these financial statements were prepared to 31 December 2021, all transactions which occurred on these Sub-Funds between their respective final 2021 Valuation Date and 31 December 2021 have been accounted for in these financial statements and the Sub-Funds' investments have been fair valued using the last traded market prices available as at 31 December 2021. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2021 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2021 Valuation Date for these Sub-Funds.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for these Sub-Funds as at 31 December 2021.

	PineBridge Emerging Europe Equity Fund USD	PineBridge Japan Equity Fund USD	PineBridge Japan Small Cap Equity Fund USD
Net Asset Value per Financial Statements	8,940,102	99,638,422	331,483,946
Total transactions adjustment	<u>(3,365)</u>	<u>(2,533,712)</u>	<u>77,975</u>
Net Asset Value per dealing NAV	<u><u>8,936,737</u></u>	<u><u>97,104,710</u></u>	<u><u>331,561,921</u></u>

4. CASH AND COLLATERAL

(i) Cash at Bank

All cash holdings and bank overdrafts as at 31 December 2022 and 31 December 2021 are held at State Street Bank & Trust Company ("State Street"), the relevant appointed Sub-Custodian or Bank of America, with the exception of cash at broker and cash held with brokers as collateral, which are held with the relevant counterparties for the financial derivative instruments. See the note below for further details of cash at broker and cash held with brokers as collateral.

(ii) Cash at Broker, Amounts due to Broker and Cash held with Broker as collateral

The following table outlines the Sub-Funds margin cash position for Futures Contracts as at 31 December 2022 and 31 December 2021:

Fund Name	Counterparty	Margin Cash	
		31 December 2022	31 December 2021
PineBridge Asia Pacific Investment Grade Bond Fund	Goldman Sachs	USD 4,970,264	USD 2,885,414
PineBridge Global Bond Fund	Morgan Stanley	USD 142,750	USD 61,602
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD 18,098,946	USD 17,071,139
PineBridge Asia Dynamic Asset Allocation Fund	Morgan Stanley	USD 1,712,989	USD 1,708,403

As at 31 December 2022 and 31 December 2021, all of this margin cash is restricted due to initial margin requirements by the relevant brokers.

The following table outlines the Sub-Funds cash collateral held for forward foreign currency exchange contracts as at 31 December 2022 and 31 December 2021:

Fund Name	Counterparty	Cash Collateral	
		31 December 2022	31 December 2021
PineBridge Global Dynamic Asset Allocation Fund	JP Morgan Chase Bank	USD -	USD 3,794,110
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD 1,940,000	USD -
PineBridge Global Bond Fund	Standard Chartered Bank	USD 290,000	USD -

Cash may be set aside as collateral by the Trustee and held by the counterparties for OTC financial derivative instruments ("FDI") in accordance with the terms of the relevant counterparty agreements, which are based on the International Swaps and Derivatives Association ("ISDA") Master Agreement.

(iii) Collateral

When entering into an OTC derivative instrument and during the term of that transaction, the Sub-Funds and/or the counterparty may post or receive securities as collateral and/or margin related to changes in the market value of the derivative. Additionally, the counterparty may require additional collateral and/or margin that is unrelated to changes in the market value of the derivative. If the counterparty enters into insolvency proceedings or otherwise defaults on its obligations, the ability of the Sub-Funds to recover collateral posted to the counterparty may be delayed or limited. Investments pledged by the Sub-Funds as collateral are recognised at fair value in the relevant Sub-Fund's Schedule of Investments. The nominal value and market value of the underlying securities pledged as collateral and/or margin to the counterparties as at 31 December 2022 were: USD155,232 (nominal value of 200,000) as held on PineBridge Global Bond Fund, as at 31 December 2021: USD230,338 (nominal value of 200,000) as held on PineBridge Global Bond Fund. See the Sub-Fund's Schedule of Investments for the securities pledged as collateral.

5. EFFICIENT PORTFOLIO MANAGEMENT

A Sub-Fund may employ FDI for the purposes of hedging and efficient portfolio management purposes and shall be understood to fulfil the following criteria as set out in the UCITS Regulations:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
 - (i) reduction of risk;
 - (ii) reduction of cost;

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

5. EFFICIENT PORTFOLIO MANAGEMENT (continued)

- (iii) generation of additional capital or income for the Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund and the risk diversification rules set out in the UCITS Regulations;
- (c) their risks are adequately captured by the risk management process of the Sub-Fund; and
- (d) they cannot result in a change to the Sub-Fund's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

For efficient portfolio management purposes, the Sub-Funds may enter into repurchase agreements, reverse repurchase agreements and/or stock lending agreements, subject to the conditions and limits set out in the UCITS Regulations, to generate additional income for the Fund. During the financial year the following Sub-Funds used derivatives for efficient portfolio management techniques; PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund, PineBridge Global Dynamic Preservation Plus Fund and PineBridge Asia ex Japan Small Cap Fund. The remaining Sub-Funds did not utilise these efficient portfolio management techniques.

6. FINANCIAL RISK MANAGEMENT

(a) General Risk Management Process

Each Sub-Fund is exposed to market price risk, interest rate risk, credit risk, liquidity risk and currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the volatility of financial markets and seeks to minimise potential adverse effects on financial performance.

The risk management policies (which have not changed in 2022) employed to manage these risks for the financial years ending 31 December 2022 and 31 December 2021 are outlined below.

PineBridge Investments (the "Firm") is a group of international companies that provides investment advice and markets asset management products and services to clients around the world. The Firm's approach to risk management and controls is a bottom-up led process with top-down controls imposed by the boards of directors of the Firm and the Manager as appropriate, for the establishment of firm-wide risk management and controls.

The Manager has established and maintains its own permanent risk management function in discharge of its obligations under the UCITS Regulations. The Manager has also established a risk committee which meets regularly to focus specifically on risk attached to the activities of the Fund (the "Risk Committee").

The board of directors of each individual company within the Firm has risk management responsibilities as defined by best practices and guidelines, and applicable laws and regulations. In this regard the Firm has established the Risk Management Department, the Global Risk Committee ("GRC") and Business Management to assist and report to the board of directors of the Firm.

The Risk Management Department is hierarchically and functionally independent from operating units of the Firm which allows for the independent performance of the risk management activities, having taken into account the nature, scale and complexity of its business and the funds it manages.

The GRC is tasked with assisting the board of directors of the Firm in evaluating and assessing the different types of risk to which the organization is exposed. The members of the GRC have direct access to, and receive regular reports from management. The GRC is comprised of representatives from Executive Management, Compliance, Investment Management, Risk Management, Operations, Finance and Legal. The GRC consists of a number of risk sub-committees, with roles and responsibilities defined in the Committee Charters.

Business Management is responsible for executing the organisation's risk management process.

The Firm has a comprehensive risk management process to monitor, evaluate and manage the principal risks it assumes in conducting its activities.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(a) General Risk Management Process (continued)

The Sub-Funds are also required to adhere to investment and borrowing restrictions laid down by the UCITS Regulations.

Among other restrictions, the Sub-Funds are restricted to holding a maximum of 10% of the total NAV of the Sub-Fund in any one particular security, with certain exceptions allowed. Compliance with these restrictions is monitored by the Manager's Compliance Team as well as the relevant Investment Manager and the Trustee. In addition to the investment and borrowing restrictions, the investment objective and policy of each Sub-Fund contains specific investment parameters and these are set out in detail in the Prospectus.

(b) Market Risk

This is the risk where the fair value or future cash flows of a financial instrument can fluctuate because of changes in market prices relating to: changes in actual market prices, interest rate and currency movements.

i) Global Exposure

Per the UCITS Regulations, and as part of the risk management and reporting requirements, the Fund must be monitored and measured in accordance with the regulatory requirements. In accordance with the regulatory requirements, global exposure can be calculated in two ways, either:

- (i) the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Sub-Funds.
- (ii) Value at Risk ("VaR"), where complex investment strategies are used. VaR measure estimates the potential loss of the portfolio over a pre-defined period of time given a specified confidence level. VaR methodology is a statistical measurement that produces a single aggregate result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets.

The Commitment approach is used to calculate global exposure for all Sub-Funds. The Commitment approach converts any Sub-Fund's derivative financial positions into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed on the Statement of Financial Position for the applicable Sub-Funds.

ii) Market Price Risk

Market price risk arises from uncertainty about future prices of financial instruments held. It represents the potential loss the portfolios might suffer through price movements.

The Investment Managers consider the asset allocation of the Sub-Funds in order to manage the risk associated with exposure to currencies which are not in the base (or functional) currency of the Sub-Fund, countries, industry sectors and individual securities, whilst continuing to follow the Sub-Funds' investment objectives.

The Investment Managers are engaged in substantial research activity and engage in a wide variety of meetings to identify, communicate, analyse and mitigate market risks. These range from daily economics and Investment Manager conference calls to discuss macroeconomic trends and fixed income market risk, weekly and bi-weekly fixed income and equity market reviews, bi-weekly currency meetings and monthly global asset allocation meetings which cross investment teams, and ensure that Investment Managers have a current, well vetted view of the global financial markets.

Management of risk relative to benchmarks as discussed above is ultimately the responsibility of the Investment Manager of each Sub-Fund.

Senior Investment Managers provide oversight for the Sub-Funds and are accountable for ensuring application of the Firm's investment process. This is achieved through monthly reviews of both performance and application

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

ii) Market Price Risk (continued)

of investment strategy. In addition, the Compliance Department in the Firm provides real time monitoring of the consistency of application of the UCITS investment restrictions for all Sub-Funds.

Holdings in the equity and balanced Sub-Funds are constantly monitored to determine whether any of the evaluated factors have changed or if a stock has hit valuation targets. If valuation targets are achieved, the holdings are sold.

For fixed income Sub-Funds, the Investment Manager's focus on a pro-active risk control process. Risk measurement and monitoring is focused on the ex-ante investment decision process resulting from the manager's investment process as implemented in the Sub-Fund. Sub-Funds are well diversified without overly replicating the benchmark.

The table below sets out the beta for the Equity and Balanced Sub-Funds as at 31 December 2022 and 31 December 2021. Beta is being used in the below analysis as a proxy for VaR analysis.

Sub-Fund	Benchmark (BM)	Beta 31/12/22	Beta 31/12/21

PineBridge US Research Enhanced Core Equity Fund	Standard & Poor's 500 Total Return Net Index	0.98	1.00

*PineBridge Emerging Europe Equity Fund terminated on 7 December 2022.

The Sub-Funds' exposure to market price risk at 31 December 2022 and 31 December 2021 is equivalent to the fair values of investments held, as detailed on the Statement of Financial Position.

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2022 and 31 December 2021;
- the market price risk information is a relative estimate of risk rather than a precise number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

iii) Interest Rate Risk

This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Sub-Funds which hold fixed interest rate debt securities are exposed to fair value interest rate risk where the value of these securities may fluctuate as a result of a change in market interest rates. Sub-Funds which also hold a number of floating/adjustable interest rate debt securities, which are re-priced periodically in line with market interest rate movements prior to maturity date are exposed to cash flow interest rate risks.

Floating rate bonds are structured with a floating rate payment structure, whereby a fixed basis point spread is paid over the prevailing reference rate, typically 3 month LIBOR or EURIBOR, and reset on a quarterly or semi-annual basis. However, the total interest earned on investments will vary from time to time with changes in the underlying reference rate.

Certain securities and instruments in which the Sub-Fund may invest, rely in some fashion upon the LIBOR. LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. On March 5, 2021, the United Kingdom's Financial Conduct Authority ("FCA"), which regulates LIBOR, confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative following the Feedback Statements published by ICE Benchmark Administration Limited, the administrator of LIBOR on its intention of ceasing publication of all Sterling, Euro, Swiss Franc, Japanese Yen settings, the one-week and two-month U.S. dollar settings immediately after 31 December 2021 and ceasing publication of the remaining U.S. dollar settings immediately after 30 June 2023. There remains uncertainty regarding the future utilisation of LIBOR and the nature of any replacement rate. Any potential effects of the transition away from LIBOR on a Sub-Fund or on certain securities and instruments in which a Sub-Fund invests can be difficult to ascertain, and they may vary depending on factors that include, but are not limited to: (i) existing fallback or termination provisions in individual contracts and (ii) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. For example, certain of a Sub-Fund's securities and investments may involve

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iii) Interest Rate Risk (continued)

individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or reduced liquidity as a result of the transition process. In addition, interest rate provisions included in such contracts may need to be renegotiated in contemplation of the transition away from LIBOR. The transition may also result in a reduction in the value of certain investments held by a Sub-Fund or a reduction in the effectiveness of related Sub-Fund transactions such as hedges. Furthermore, the transition process may also require changes to be made to a Sub-Fund's investment objectives and policies. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Sub-Fund or in additional costs being borne by the Sub-Fund.

The Sub-Funds' exposure to interest rate risk is detailed in the relevant Schedule of Investments.

All other financial assets and financial liabilities, with the exception of equities, cash at bank balances and bank overdrafts, held by the Sub-Funds are not directly exposed to interest rate risk. The Sub-Funds are exposed to interest rate risk on the interest earned on its cash and bank balances and bank overdrafts. This exposure is not considered to be significant.

Interest rate (duration) risks are managed by the Investment Managers whose management of duration risk is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning held with senior managers. Individual managers are authorised to initiate fixed income trades within pre-set limits.

Interest Rate Risk Sensitivity

Duration is a measure of the sensitivity of a bond price to interest rates. The percentage change in the price is equal to the change in interest rates multiplied by the modified duration. The monetary impact detailed in the following table shows the possible change in NAV resulting from a 1% change in interest rates.

Sub-Fund	Average Duration 31/12/22	Monetary impact on NAV (100bps) 31/12/22	Average Duration 31/12/21	Monetary impact on NAV (100bps) 31/12/21
PineBridge Asia Pacific Investment Grade Bond Fund	4.48	14,181,192	4.53	12,422,154
PineBridge Global Bond Fund	7.71	2,756,780	7.19	3,652,518

PineBridge Asia Dynamic Asset Allocation Fund	4.22	1,749,111	4.73	2,692,019

*Sub-Fund terminated on 6 September 2022.

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns; and
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2022 and 31 December 2021.

iv) Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Currency risks are managed by the individual Investment Managers. Their performance is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning and compliance that are held with senior managers and the Compliance Department. Individual managers must be authorised to initiate FX trades within pre-set trade limits for individual transactions.

PineBridge US Research Enhanced Core Equity Fund and PineBridge USD Investment Grade Credit Fund were not exposed to any significant foreign currency risk at 31 December 2022 or at 31 December 2021, as all of their assets and liabilities were denominated in their functional currency.

In certain cases, the Sub-Funds hold assets and liabilities denominated in currencies other than the functional currency and are therefore exposed to currency risk as the value of securities denominated in other currencies will fluctuate due to change in exchange rates. Certain Sub-Funds use derivatives to hedge currency risk.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

All Sub-Funds have been authorised by the Central Bank to use certain FDI for hedging purposes. The Sub-Funds listed below have been authorised by the Central Bank to use FDI for investment purposes.

PineBridge Asia ex Japan Equity Fund
 PineBridge Asia ex Japan Small Cap Equity Fund
 PineBridge Asia Dynamic Asset Allocation Fund
 PineBridge Asia Pacific Investment Grade Bond Fund
 PineBridge Global Bond Fund
 PineBridge Global Dynamic Asset Allocation Fund
 PineBridge Global Emerging Markets Bond Fund
 PineBridge Global Emerging Markets SDG Corporate Bond Fund
 PineBridge Global Emerging Markets Local Currency Bond Fund
 PineBridge Global Strategic Income Fund
 PineBridge Japan Small Cap Equity Fund
 PineBridge Latin America Equity Fund
 PineBridge US Large Cap Research Enhanced Fund

As an authorised UCITS legal manager, the Manager is required to file a Risk Management Process document with the Central Bank. This document provides an overview of the Firm's policy on derivatives risk management including, but not limited to: an overview of FDI used, counterparty risk exposure, calculation of global exposure, leverage and cover requirements, expertise required and in place to invest in FDI, valuation rules, legal risk and reporting requirements. The Sub-Funds use only a limited number of simple FDI solely for non-complex investment, hedging and replication purposes.

The Sub-Funds hold both non-monetary assets, such as equities and investment funds and monetary assets and liabilities, such as debt instruments, futures contracts, forward foreign exchange contracts, swap contracts, cash at bank, cash at broker, debtors and creditors in currencies other than USD. FRS 102 considers the foreign exchange exposure relating to non-monetary assets and liabilities are a component of market price risk not foreign currency risk. However, management monitors the exposure on all foreign currency denominated assets and liabilities.

The following tables detail Sub-Funds with material currency exposures as at 31 December 2022 and 31 December 2021. Sub-Funds not listed below do not have material currency exposures as at the Statement of Financial Position date. Material currency exposure is where the total monetary amount is greater than 5% of the NAV of the Sub-Fund.

Forward Foreign Exchange Contracts

The Sub-Funds listed on page 214 may engage in forward foreign exchange contracts, including non deliverable forwards (NDFs), for investment purposes or for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by the Central Bank. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction. Forward foreign exchange contracts are OTC traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires and a new forward to replace the expired one cannot be put into place at the same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

In relation to hedged classes listed below, it is the intention of the Manager or its delegate to hedge the currency exposure between the denominated currency of the hedged class and the base currency of the Sub-Fund. The Manager or its delegate will seek to achieve this hedging by using FDI, including but not limited to forward foreign exchange contracts as set out, and within the conditions and limits imposed, by the Central Bank. The details of hedged classes used by Sub-Funds as at 31 December 2022 and 31 December 2021 are outlined below:

31 December 2022 Sub-Fund	Class	Currency	Counterparty	Unrealised Gains/Losses on Forwards

c) Credit Risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk. In relation to the Sub-Funds, it can arise from receivables from another party, placing deposits with other entities, transacting in debt securities and entering into OTC FDI. For Sub-Funds investing in debt securities, the investment objectives and investment policies detailed in the supplements to the Prospectus provide details of the credit rating restrictions imposed on that Sub-Fund.

Leveraged loan obligations, if any, are subject to unique risks, including the possible invalidation of an investment as a fraudulent conveyance under relevant creditors' rights laws. In analysing each leveraged loan, the Manager compares the relative significance of the risks against the expected benefits of the investment.

Substantial research tools are available to the Investment Managers for use in the management of credit risk. These include extensive internally produced company and industry research, issue or industry specific 'brainpools', rating agency reports, purchased research databases, the Firm's online research library, internal R&D reports and other advanced credit risk management tools.

The Firm has a robust counterparty approval process. There are Regional Approval Committees (RACs) that are tasked with adding and removing counterparties as appropriate. The RACs approve and maintain lists of approved brokers. No transaction can take place with a broker until it has been approved and formally added to the Approved Broker List for the particular region. The lists are updated on a regular basis. The majority of the trades are executed on a Delivery Versus Payment basis. This ensures that the buyer's payment for securities is due at the time of delivery.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

c) Credit Risk (continued)

For OTC FDI such as total return swap contracts, the Investment Managers generally follow the standards set by the International Securities Dealers Association (ISDA) in its derivatives master agreements. ISDA swap confirmations are tracked and checked manually to confirm the terms of the trades are fully and correctly documented.

Collateral may be received from counterparties, as per the agreement with the counterparty to reduce counterparty risk.

Where the Sub-Fund provides collateral as a result of entering into total return swaps, it is exposed to the risk that the counterparty will be unable or unwilling to honour its obligations to return the collateral provided. The Sub-Fund may provide certain assets as collateral to counterparties in connection with total return swaps. If the Sub-Fund has over-collateralised (i.e., provided excess collateral to the counterparty) in respect of such transactions, it may be an unsecured creditor in respect of such excess collateral in the event of the counterparty's insolvency. If the Trustee or its subcustodian or a third party holds collateral on behalf of the Sub-Fund, the Sub-Fund may be an unsecured creditor in the event of the insolvency of such entity.

Listed below are the counterparties and banks used by the Sub-Funds and their respective long term credit ratings, as issued by Moody's rating agency, as at 31 December 2022 and 31 December 2021:

Counterparty	31 December 2022	31 December 2021
JPMorgan Chase	A1	A2
State Street Bank and Trust Company	Aa2	Aa2
Morgan Stanley	A1	A1
UBS	Aa2	Aa2

c) Credit Risk (continued)

Trustee and Depository

The Fund's trustee is State Street Custodial Services (Ireland) Limited (the "Trustee" and "Depository"). All transferable securities (with the exception of Bank Loans, if any and investment fund investments), cash and bank balances and bank overdrafts are held by the Trustee and Depository through its affiliate, State Street Bank and Trust Company ("State Street") or through a sub-custodian within the State Street custodial network.

All OTC FDI, investment funds, margin or other similar investments/monies deposited by or entered into on behalf of the Fund with a counterparty, clearing broker or other parties are not held within the State Street custodial network. The Trustee and Depository is therefore not liable in any way for the default of any counterparty.

In accordance with the requirements of the Prospectus and the UCITS Regulations, the Sub-Funds' securities are maintained within the Trustee and Depository's custodial network in segregated accounts. The Trustee and Depository will ensure that any agents and sub-custodians it appoints to assist in safekeeping the assets of the Sub-Funds will segregate the assets of the Sub-Funds. Bankruptcy or insolvency of the Trustee and Depository, a State Street affiliate company or sub-custodian may cause rights with respect to cash and securities held by State Street to be delayed or limited and the Sub-Funds will be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual credit review are performed on the Trustee and Depository by the Manager. This review may include as appropriate an assessment of the Trustee and Depository's liquidity position, income streams, asset quality and credit ratings. The long term credit rating of State Street as at 31 December 2022 was Aa2 (31 December 2021: Aa2), as rated by Moody's rating agency.

The Fund has granted a continuing security interest by way of a charge over its assets to the Trustee and Depository and its affiliates, pursuant to the Trustee Agreement between the Fund, the Trustee, Depository and State Street, as continuing security for the payment, discharge and performance of its obligations.

Credit risk can arise from receivables such as subscription and investment sale transactions awaiting settlement. Risk relating to these unsettled receivables is considered small due to the short settlement period involved and in relation to subscription transactions, the due diligence performed on the portfolio clients. All transactions in securities are settled and paid for on delivery using approved brokers. The maximum exposure related to unsettled transactions equals the receivable amounts shown on the Statement of Financial Position.

There were no past due or impaired assets as at 31 December 2022 or at 31 December 2021.

Credit risk relating to fixed income securities has been analysed for the below listed Sub-Funds with the industry acceptable classification basis:

d) Liquidity Risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

d) Liquidity Risk (continued)

For the financial year ended 31 December 2022 and 31 December 2021, each Sub-Fund's assets comprise of mainly readily realisable securities. However, not all securities purchased by a Sub-Fund will be listed or rated and consequently liquidity may be lower. Liquidity risk is a factor that the Investment Managers must consider when investing in any financial instrument in order to remain compliant with the portfolio liquidity requirement to the extent required by Regulation 104 (1) of the UCITS Regulations. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. Each Sub-Fund may also encounter difficulties in disposing of assets at their 'fair' market price due to adverse market conditions leading to limited liquidity.

Sub-Funds may invest in investments such as sovereign or corporate bond issues of fixed and/or floating rate which may be below investment grade, which as a result carry greater liquidity risk than investment grade sovereign or corporate bonds.

Some Sub-Funds may invest in securities with contractual cash flows, such as CMOs. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate values, delinquencies and/or defaults, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

Due to the unique and customised nature of loan agreements evidencing private debt assets and the private syndication thereof, these assets are not as easily purchased or sold as publicly traded securities. Although the range of investors in private debt has broadened, there can be no assurance that future levels of supply and demand in loan trading will provide the degree of liquidity in loan trading which currently exists in the market. In addition, the terms of these assets may restrict their transferability without borrower consent. The Manager will consider any restriction, along with all other factors, in determining whether or not to advise the Sub-Fund to acquire participation in each asset.

The main financial liabilities of each Sub-Fund are the redemption of units awaiting settlement, purchases of investments awaiting settlement, withholding tax, capital gains tax, amounts due to broker, bank overdraft and expenses payable. As an open-ended Fund, each Sub-Fund is required to sell units back to unitholders at a price equivalent to the NAV per unit, subject to settlement and dealing restrictions laid down in the Fund's Trust Deed and Prospectus.

In certain situations the Manager may, with the consent of the Trustee, temporarily suspend the determination of the Net Asset Value of any Sub-Fund. Any such suspension would result in the suspension of the issuing and redemption of the relevant Sub-Fund's Units to and from its Unitholders during such period of suspension.

The Investment Managers manage each Sub-Fund's liquidity position on a daily basis. Also the Manager is able, through the provisions in the Prospectus, to defer the processing of redemptions of significant size to facilitate an orderly disposition of securities in order to protect the interests of the remaining unitholders. The maximum value of redeemable participating units available for redemption on any given day can be restricted by the Fund to 10% of the total net asset value of that Sub-Fund in issue.

There are no financial liabilities as at 31 December 2022 and 31 December 2021 that fall due over 1 month except for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund USD 98,766 (1-3 months) (31 December 2021: USD 75,405 (1-3 months)).

PineBridge Global Dynamic Asset Allocation Fund USD 2,314,541 (1-3 months) (31 December 2021: USD 1,191,985 (1-3 months)).

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

d) Liquidity Risk (continued)

PineBridge Global Bond Fund USD 255,564 (1-3 months) (31 December 2021: USD 362,268 (1-3 months)).

PineBridge Global Strategic Income Fund Nil (1-3 months) (31 December 2021: USD 1,485 (1-3 months)).

PineBridge Global Dynamic Preservation Plus Fund USD 1,076,387 (1-3 months) (31 December 2021: 2,253,038 (1-3 months)).

PineBridge Asia Pacific Investment Grade Bond Fund Nil (1-3 months) (31 December 2021: 619,110 (1-3 months)).

The Sub-Funds' financial liabilities due for payment within 1 month relate, in the most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, withholding tax, bank overdraft interest and other open forward foreign currency exchange contracts that were not mentioned above. Details of these amounts, where relevant, can be found in the Statement of Financial Position.

The financial liabilities due for payment over 1 month relate to forward foreign exchange contracts on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Dynamic Preservation Plus Fund, futures contracts held on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Bond Fund, PineBridge Global Dynamic Preservation Plus Fund and PineBridge Asia Pacific Investment Grade Bond Fund, cash at broker and capital gains tax payable which is considered an open ended liability.

e) Fair Value Hierarchy

The Fund is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Fund is required to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager, who considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The Global Valuation Committee meets quarterly, and additionally on an as needed basis to confirm and vote on all current fair valuations held within the portfolios at PineBridge. Valuation procedures, controls, and documentation are also presented and verified, and any changes to methodologies are presented to the committee for discussion and approval.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

All of the Sub-Funds' holdings are classified as Level 1 except for the Sub-Funds' holdings to the values noted in the table below:

Sub-Fund	Level	31 December 2022 USD	31 December 2021 USD
PineBridge Asia ex Japan Equity Fund	2	517	414

PineBridge USD High Yield Bond Fund	3	120,900	-
PineBridge USD Investment Grade Credit Fund	2	184,528,400	204,719,091
PineBridge Asia Dynamic Asset Allocation Fund	2	24,556,751	29,465,008

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, futures contracts and investment funds, which are daily trading in an active market. The Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include, investment-grade corporate bonds, US and non-US sovereign obligations and OTC FDI.

Fixed Income securities held in the Sub-Funds listed on the previous table are classified under Level 2 as they were valued based on evaluated prices.

As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include suspended or liquidated equity investments and corporate bonds. As at 31 December 2022 all Level 3 securities were carried at zero value except for 7 securities; four China Development Bank securities held on PineBridge Global Bond Fund, Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund, OAS Restructuring and OAS (Warrants) held on PineBridge Global Emerging Markets SDG Corporate Bond Fund. As at 31 December 2021 all Level 3 securities were carried at zero value except for 15 securities; RRE 8 Loan Management and Capital Four CLO I, held on PineBridge Global Dynamic Asset Allocation, OAS Restructuring and OAS held on PineBridge Global Emerging Markets SDG Corporate Bond Fund, three Egyptian Government Bonds and a Ghana Government Bond held on PineBridge Global Emerging Markets Bond Fund, an Egyptian Government Bond held on

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

PineBridge Global Emerging Markets Local Currency Bond Fund, Fannie Mae or Freddie Mac, Freddie Mac REMICS, three Lehman Brothers Holdings, Hi-Crush, held on PineBridge Global Strategic Income Fund.

During the financial year ended 31 December 2022, Yandex held on PineBridge Global Emerging Markets Focus Equity Fund and PineBridge Global Dynamic Asset Allocation Fund transferred from Level 1 to Level 3. Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund transferred from Level 2 to Level 3. During the financial year ended 31 December 2021 Ameriforge Group held on PineBridge Global Dynamic Asset Allocation Fund transferred from Level 1 to Level 3. OAS held on PineBridge Global Emerging Markets SDG Corporate Bond Fund transferred from Level 2 to Level 3. RRE 8 Loan Management and Capital Four CLO I held on PineBridge Global Dynamic Asset Allocation transferred from Level 2 to Level 3. Three Egyptian Government Bonds and a Ghana Government Bond held on PineBridge Global Emerging Markets Bond Fund transferred from Level 2 to Level 3. An Egyptian Government Bond held on PineBridge Global Emerging Markets Local Currency Bond Fund transferred from Level 2 to Level 3. No Level 3 reconciliation and no sensitivity analysis of assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Fund at the financial year ended 31 December 2022 and the financial year ended 31 December 2021.

The Level 3 positions noted on the Schedule of Investments for PineBridge Emerging Europe Equity Funds relate to 21 Russian securities which were written down to nil during the financial year from a value of US\$ 628,465 as at 4 March 2022.

7. TAXATION

Under current law and practice the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On this basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to unitholder or any encashment, redemption, cancellation or transfer of units and the holding of units at end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- (i) a unitholder who is neither Irish resident nor ordinary resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Fund or the Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) certain exempted Irish tax resident unitholders who have provided the Fund with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its unitholders.

Positive capital gains tax amounts reflected in the Statement of Comprehensive Income are not amounts due to the Sub-Funds, these are amounts resulting from the difference in accruals between this financial year and the prior financial year.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

8. SOFT COMMISSION ARRANGEMENTS

a) Direct brokerage

There was no direct brokerage services utilised for the financial year ended 31 December 2022 (31 December 2021: USD Nil).

b) Soft Commission Arrangements

The Manager and the Investment Managers may utilise brokers with whom soft commission arrangements are in place. Any such arrangements will provide for best execution and any goods or services received will be of a type which assists in the provision of investment services to the Fund. Neither the Manager, the Investment Managers nor any of their connected persons retain cash rebates.

During the financial years ended 31 December 2022 and 31 December 2021, PineBridge Investments Asia Limited and PineBridge Investments LLC have entered into soft commission arrangements with brokers and details are given below. PineBridge Investments Japan Co., Limited and PineBridge Investments Europe Limited did not engage in soft commission arrangements during the financial years.

PineBridge Investments Asia Limited (the “Investment Manager”)

The Investment Manager has entered into soft commission arrangements with selected brokers where it obtains services from third parties. These services relate essentially to research and price information, performance measurement and portfolio valuation, and analysis all of which are believed to be helpful in the overall discharge of the Investment Manager’s duties to clients. As such services generally benefit all of the Investment Manager’s clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. Under such arrangements, no direct payment is made for these services or benefits. The trades were executed by the Investment Manager on the best available terms and there was no churning of trades. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

- PineBridge Asia Dynamic Asset Allocation Fund
- PineBridge Asia ex Japan Equity Fund
- PineBridge Asia ex Japan Small Cap Equity Fund
- PineBridge Greater China Equity Fund
- PineBridge India Equity Fund
- PineBridge China A-Shares Quantitative Fund

PineBridge Investments LLC (the “Investment Manager”)

The Investment Manager has entered into soft dollar commission arrangements with selected brokers where it obtains services from third parties. These services relate to research and are eligible under the safe harbor of Section 28(e) of the Securities and Exchange Act of 1934. These services generally benefit all of Investment Manager’s clients in terms of input into the investment decision making process. The soft dollar credits utilised are not allocated on a specific client basis. Under these arrangements direct payments can be made for these services and benefits. The Investment Manager seeks to obtain best execution on all transactions. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

- PineBridge US Research Enhanced Core Equity Fund
- PineBridge Europe Research Enhanced Equity Fund
- PineBridge Emerging Europe Equity Fund
- PineBridge Global Dynamic Asset Allocation Fund
- PineBridge Global Emerging Markets Focus Equity Fund
- PineBridge Global Focus Equity Fund
- PineBridge Latin America Equity Fund
- PineBridge US Large Cap Research Enhanced Fund

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

8. SOFT COMMISSION ARRANGEMENTS (continued)

PineBridge Investments LLC (the “Investment Manager”) (continued)

c) Transaction Costs

For the financial years ended 31 December 2022 and 31 December 2021, the Sub-Funds incurred transaction costs, as defined in Note 1 (d)(viii) as follows:

	Financial year ended 31 December 2022	Financial year ended 31 December 2021
	Total USD	Total USD
Sub-Fund		
PineBridge Asia ex Japan Equity Fund	1,301,411	1,947,201

PineBridge Asia Dynamic Asset Allocation Fund	90,284	124,107

* Sub-Fund terminated on 7 December 2022.

** Sub-Fund terminated on 6 September 2022.

9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES

(a) Significant Agreements

The Manager is entitled to receive an annual management fee and unitholder servicing and maintenance fee (as appropriate) accrued at each dealing day and payable monthly in arrears based on the average daily NAV of the Sub-Funds, as detailed in tables in the next pages. Certain unit classes have fee caps in place whereby the total expenses charged to the unit class may not exceed certain annual thresholds. Where these thresholds are exceeded the management fee is reduced accordingly. The fee cap thresholds are noted in tables in the next pages where applicable.

(b) Administration and Transfer Agent Fees

The Administrative Agent receives a fee from each Sub-Fund based on the relevant Sub-Fund's NAV subject to a maximum fee of 0.3% per annum and subject to an annual minimum fee to be agreed between the Manager and the Administrative Agent (plus value added tax, if any, in each case). The fee is accrued on each Dealing Day and is paid monthly in arrears.

All such fees, disbursements and out-of-pocket expenses will be paid by the Manager on behalf of the Fund or the relevant Sub-Fund. The Administrative Agent is also entitled to be reimbursed for all its disbursements and out-of-pocket expenses.

Transfer agent fees are disclosed within administration fees on the face of the Statement of Comprehensive Income for each Sub-Fund. Transfer agent fees amount to USD 10 per transaction.

(c) Trustee Fees

The annual remuneration of the Trustee, which is payable out of each Sub-Fund is based on the NAV of the relevant Sub-Fund and shall be subject to a maximum fee of 0.3% per annum, and an annual minimum fee to be agreed between the Manager and the Trustee (plus value added tax, if any), and will be retained by the Trustee out of the assets of the Sub-Fund. The fee is accrued on each Dealing Day and payable monthly in arrears.

In addition to such remuneration, the Trustee is entitled to be repaid all of its disbursements, including the fees and expenses of any sub-custodian (which shall be at normal commercial rates) and which will be retained by the Trustee out of the relevant Sub-Fund and transaction charges (which shall also be at normal commercial rates) levied by the Trustee. The amounts charged are shown in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES (continued)

(d) Related Party Transactions

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

Transactions with parties who have significant influence

The Manager is a related party under FRS 102 "Related Party Disclosures". Please refer to the Statement of Comprehensive Income for details of management fees (net of fee cap as applicable) and unitholder servicing fees earned by the Manager during the financial year under review and prior financial year and to the Statement of Financial Position for the amounts payable to the Manager as at the respective financial year end dates in respect of these fees.

The Directors of the Manager are not aware of any transactions with other connected persons during the year, other than those disclosed in these Financial Statements. All transactions were entered into in the normal course of business.

Transactions with key management personnel

PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Michael Karpik and Michael Sweeney are also Directors of PineBridge Investments GF Mauritius Limited. Prior to his resignation on 31 October 2022, Klaus Schuster was also a Director of PineBridge Investments GF Mauritius Limited.

During the financial year ended 31 December 2022, in respect of Directors fees for PineBridge Investments GF Mauritius Limited, there was USD 3,285 (financial year ended 31 December 2021: USD 3,226) expensed to the Directors of the Company, of which USD 459 (31 December 2021: USD 279) was payable at financial year end.

PineBridge Asia Pacific Investment Grade Bond Fund Class Z terminated on 22 December 2022.

Matheson was appointed as the Legal Advisor for the Fund with effect from 1 January 2022.

On the 24 February 2022, the Directors of the Manager passed a resolution to terminate PineBridge Global Emerging Markets Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund.

Central Securities Depositories Regulation ("CSDR")

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards ("CSDR"). CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Fund when it enters into in-scope transactions may result in increased operational and compliance costs being borne directly or indirectly by the Fund. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

The continued Russian engagement in military actions across Ukraine may still affect the sub-funds over the coming period as it will continue to cause instability on the global and European markets. The Investment Manager is leveraging established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

Suspension: PineBridge Emerging Europe Equity Fund

Considering the exceptional and adverse market conditions relating to the current situation in Russia and Ukraine, effective from 2 March 2022, the Manager suspended until further notice the calculation of the Net Asset Value per Unit of PineBridge Emerging Europe Equity Fund (the "Fund") and the right of Unitholders to purchase, redeem or

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

11. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR (continued)

exchange Units in the Fund (the “Suspension”). This decision was made following the recommendation of the Manager and the Investment Manager and with the approval of the Trustee, and was considered to be in the best interests of unitholders as a whole in light of current circumstances. The decision to implement the Suspension was taken as a result of the situation in Russia and Ukraine which adversely affected the orderly disposal and valuation of Russian assets of the Fund. The Manager was unable to determine how long the Suspension would last, however, the Manager took all reasonable steps to bring the Suspension to an end as soon as possible and in the best interests of Unitholders as a whole. PineBridge Emerging Europe Equity Fund terminated on 7 December 2022.

The main prospectus was last updated on 31 December 2021. The following prospectus supplements were updated during the reporting period to allow for the launch of new share classes:

- PineBridge Asia Pacific Investment Grade Bond Fund – 7 July 2022 and 29 July 2022,
- PineBridge Global Dynamic Asset Allocation Fund – 12 January 2022,
- PineBridge Global Emerging Markets SDG Corporate Bond Fund – 23 June 2022,
- PineBridge Global Focus Equity Fund – 29 July 2022.

PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund terminated on 6 September, 2022.

Board approvals and changes approved by the Central Bank of Ireland during the financial year under review include the following:

- PineBridge USD High Yield Bond Fund, reclassification of sub-fund from Article 6 to 8, effective date 15 September 2022.
- PineBridge Global Dynamic Asset Allocation Fund, removal of benchmark, effective date 15 September 2022.
- PineBridge Asia Pacific Investment Grade Bond Fund, changes to distribution frequency, effective date 15 September 2022.
- PineBridge Asia ex Japan Equity Fund, changes to sub-fund investment manager.
- PineBridge Global Emerging Markets SDG Corporate Bond Fund: Name change, change from Article 8 to 9, investment policy change, Benchmark change, management fee change, effective date 29 November 2022.

On October 25, 2022, notice of an extraordinary general meeting (EGM) was issued to Unitholders in relation to PineBridge Global Emerging Markets SDG Corporate Bond Fund. The purpose of the meeting was to seek approval of the Unitholders to proposed changes to the Sub-Fund, including amendments to the Sub-Fund’s investment objective and investment policy. The EGM took place on 14 November 2022 and the resolution was approved by the unitholders.

Klaus Schuster resigned as a Director of the Manager on 31 October 2022.

The following prospectus supplements were updated on 29 November, 2022 in order to incorporate the annexes for the Article 8 and 9 Sub-Funds: PineBridge Asia ex Japan Equity Fund, PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Asia Pacific Investment Grade Bond Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Emerging Markets Focus Equity Fund, PineBridge Global Focus Equity Fund, PineBridge India Equity Fund, PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund, PineBridge Latin America Equity Fund, PineBridge USD High Yield Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund and PineBridge USD Investment Grade Credit Fund.

PineBridge Emerging Europe Equity Fund terminated on 7 December 2022.

There have been no other significant events affecting the Fund during the financial year.

12. SIGNIFICANT EVENTS SINCE THE FINANCIAL YEAR END

Since the financial year-end, PineBridge Japan Small Cap Equity Fund has had redemptions amounting to 21% of the Net Asset Value.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

12. SIGNIFICANT EVENTS SINCE THE FINANCIAL YEAR END (continued)

Prospectus supplement for PineBridge Asia ex Japan Small Cap Equity Fund was updated with effective date of 16 January 2023.

The Investment Manager will continue to leverage its established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

SVB, Signature Bank and Credit Suisse Exposure

PineBridge has rigorous risk management protocols in place across our global business, and we are leveraging our established risk framework as the situation evolves to maintain the protection and security of client assets. We are closely monitoring developments for any emerging risks that could impact portfolios, including asset flows, potential disruptions in market operations, liquidity risks, and potential risks related to indirect exposure. We will continue to monitor the situation and take appropriate actions as needed.

The exposure to the UCITS Sub-Funds is minimal and only a few of the Sub-Funds are impacted:

- PineBridge USD Investment Grade Credit Fund
- PineBridge US Research Enhanced Fund
- PineBridge Global Dynamic Asset Allocation Fund

There have been no other significant events affecting the Fund since the financial year end.

13. APPROVAL OF THE FINANCIAL STATEMENTS

The Financial Statements were approved by the Board of Directors of the Manager on 18 April 2023.

Methodology advised in the Guidance Note

The TER (Total Expense Ratio) has been calculated on an ex-post basis (i.e. based on the actual costs charged), by reference to the preceding 12 month period ended 31 December 2021. Separate TER's have been produced for each Sub-Fund and for any unit class with different fee structures.

The TER is equal to the ratio of the Sub-Funds total operating costs to the average net asset value. Total operating costs are expenses deducted from the assets for the relevant fiscal period. The average net asset value is calculated using the net asset value as at each valuation point.

PineBridge Global Funds

Schedule of Portfolio Changes for the financial year ended 31 December 2022 (Unaudited)

Listed below and overleaf are cumulative investment purchases and cumulative investment sales in excess of 1% of the total investment purchases or sales respectively during the financial year ended 31 December 2022. If there were fewer than 20 purchases that exceeded 1%, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there were fewer than 20 sales that exceeded 1%, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Remuneration Disclosure (Unaudited)

The Directors of PineBridge Investments Ireland Limited (the "Company") have put in place a remuneration policy and a remuneration committee. The Directors introduced and approved the remuneration policy on 28 December 2016 and the remuneration policy became effective as of 30 December 2016.

The remuneration policy is designed to be consistent with the requirements of regulation 5 of the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 and the ESMA Remuneration Guidelines ESMA/2016/411 (the "Remuneration Rules"). The remuneration policy is reviewed by the Directors at least once per year. In reviewing the remuneration policy, the Directors will consider whether the overall remuneration system:

- Operates as intended (in particular, that all agreed plans/programmes are being covered),
- That the remuneration pay-outs are appropriate relative to the complexities of the operation of the Company, and
- That the risk profile, long-term objectives and goals of the Company are adequately reflected.

Details of the up-to-date remuneration policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, are available at www.pinebridge.com.

The remuneration committee applies the remuneration policy with the aim of protecting the interests of Fund investors by ensuring that the remuneration of risk takers working for the Fund are subject to appropriate remuneration structures and the interests of these risk takers are aligned with those of the Company and the Fund.

Identified Staff of Delegated Investment Managers

The Company has delegated certain investment management activities to group companies. These group companies are also subject to the requirements on remuneration under the Remuneration Rules. The aggregate fixed remuneration of identified staff of the delegates, this being the investment managers and risk takers during 2022 was USD 2,103,738 and the variable component of their remuneration was USD 2,922,947. This remuneration disclosure is provided on a prorated basis for the part of the Funds' assets which were managed by the identified staff within the delegates and covers 30 recipients of remuneration.

Identified Staff of the Company

In accordance with the Company's Remuneration Policy, the following persons are considered to be the "Identified Staff" of the Company for remuneration committee review purposes: (a) any member of the Board and (b) the Designated Persons (PCF 39). The board of directors of the Company includes 2 Independent, Non-Executive Directors.

These 2 Non-Executive Directors, each of whom is independent, receive a fixed fee only and do not receive variable remuneration.

Where applicable, these fees are considered to be consistent with the powers, tasks, expertise and responsibility of each Director. The remuneration figures for the 11 Designated Persons disclosed here are prorated to the time they spent working on Company activities. The fixed remuneration for the Designated Persons was USD 1,534,916 and the variable remuneration component was USD 502,873.

Appendix I - Sustainable Finance Disclosure Regulation

SFDR Article 6 Disclosures for Annual Report

With respect to the below-listed Sub-Funds managed in line with Article 6 of SFDR (together the “Article 6 Sub-Funds”), each Sub-Fund does not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, each Sub-Fund managed in line with Article 6 of SFDR shall not be expected to pursue an investment approach that explicitly promotes environmental or social characteristics or to have sustainable investment as its objective. Notwithstanding this classification, the Investment Managers still consider that the Sub-Funds managed in line with Article 6 of SFDR are managed responsibly:

PineBridge Asia Dynamic Asset Allocation Fund
PineBridge China A Shares Quantitative Fund
PineBridge Emerging Europe Equity Fund
PineBridge Europe Research Enhanced Equity Fund
PineBridge Europe Small Cap Equity Fund
PineBridge Global Bond Fund
PineBridge Global Emerging Markets Bond Fund
PineBridge Global Emerging Markets Local Currency Bond Fund
PineBridge Global Strategic Income Fund
PineBridge Greater China Equity Fund
PineBridge US Large Cap Research Enhanced Fund
PineBridge US Research Enhanced Core Equity Fund

SFDR does not require the Investment Managers to provide any ongoing disclosures in the annual report for the Sub-Funds managed in line with Article 6 of SFDR. For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying each Sub-Fund managed in line with Article 6 of SFDR did not take into account the EU criteria for environmentally sustainable economic activities.

SFDR Article 8 Disclosures for Annual Report

The following sub-funds of the Unit Trust promoted environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) (“SFDR”) during the financial period by virtue of the incorporation of environmental, social or governance (“ESG”) and sustainability risk-related factors into their respective investment processes:

Equity Funds

PineBridge Asia ex Japan Equity Fund
PineBridge Asia ex Japan Small Cap Equity Fund
PineBridge Global Emerging Markets Focus Equity Fund
PineBridge Global Focus Equity Fund
PineBridge India Equity Fund
PineBridge Japan Equity Fund
PineBridge Japan Small Cap Equity Fund
PineBridge Latin America Equity Fund

Fixed Income Funds

PineBridge Asia Pacific Investment Grade Bond Fund
PineBridge USD High Yield Bond Fund
PineBridge USD Investment Grade Credit Fund

Multi-Asset Funds

PineBridge Global Dynamic Asset Allocation Fund

(together the “Article 8 Sub-Funds”)

The board of the management company has approved the re-designation of the sub-fund PineBridge USD High Yield Bond Fund from an Article 6 sub-fund to an Article 8 sub-fund on 22 August 2022.

Appendix I - Sustainable Finance Disclosure Regulation (continued)

SFDR Article 9 Disclosures for Annual Report

The following sub-fund of the Unit Trust promoted environmental and social characteristics pursuant to Article 9 of the Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) ("SFDR") during the financial period by virtue of the incorporation of environmental, social or governance ("ESG") and sustainability risk-related factors into their respective investment processes:

Fixed Income Funds

PineBridge Global Emerging Markets SDG Corporate Bond Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
PineBridge Asia ex Japan Equity Fund

Legal entity identifier:
549300SQHJZD245Y5351

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
Yes	No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”)

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **82.5**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

Source: MSCI ESG Research LLC, as at 31 December 2022

Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient's internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

Not applicable

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Information Technology	26.7
Consumer Discretionary	20.9
Industrials	15.0
Financials	12.2
Consumer Staples	8.6
Real Estate	5.6

Cash	2.4

The table above details the sector breakdown of the Sub-Fund as at 31 December 2022. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes: In fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2022.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period..

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **782.0**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions").

In seeking to attain characteristic “a”, the Sub-Fund monitored issuers’ carbon emission policies and engaged with them on the issue if needed. Characteristics “b” and “c” were met through maintaining the Sub-Fund’s portfolio without any exposure to the Exclusions.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- a) The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2022 was **249.2**.

Weighted Average Carbon Intensity measures a portfolio’s exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions scope 1&2
- GHG Intensity
- Carbon Footprint
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact sector
- Exposure to controversial weapons
- UNGC violators.

For each issuer under coverage, analysts denote within our internal research platform the relevant PAIs that inform their ESG recommendations.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to PAIs that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party sources. An issuer’s performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months. The Sub-Fund incorporates these proprietary metrics (ESG Score and ESG Trend) along with other investment considerations to form a basis of issuer eligibility and position sizing.

In the course of our due diligence on sustainability risks, analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. Engagement is formally tracked, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

For the following two PAIs - exposure to controversial weapons and UNGC violators – the Sub-Fund excludes UNGC violators and issuers with an industry tie to controversial weapons.

<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is the ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

The Sub-Fund endeavours to meet this characteristic through the selection of active and passive strategies committed to emissions reduction and engagement with active managers and investee companies to drive improvement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **108.6**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions (Scope 1&2) – An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Emissions data also is used to identify companies with improving emissions characteristics in managing passive strategies and to identify investee companies to drive actionable change through engagement.
- Carbon Footprint - An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. The impact on the product’s Carbon Footprint is considered when asset allocation decisions are made. The product’s Carbon Footprint is measured quarterly.
- GHG Intensity of investee companies - An external vendor provides company level GHG Intensity data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Intensity and GHG Intensity momentum factors also are used to identify companies with improving emissions characteristics in managing passive strategies and to identify investee companies to drive actionable change through engagement.
- Violations of UN Global Compact principles and OECD Guidelines for Multi-National Enterprises - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Violations data also is used to identify investee companies to drive actionable change through engagement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Board Gender Diversity - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Board Gender Diversity data also is used to identify investee companies to drive actionable change through engagement.
- GHG Intensity of investee countries - An external vendor provides country level data, which is included in the product’s Carbon Footprint. GHG Intensity data sourced from public data is in our proprietary Sovereign Scorecard, which informs country level research and investment decisions.

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund’s Net Asset Value

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

Sector	Fund %
Treasury	28.9%
Technology	15.9%

The table above details the sector breakdown of the Sub-Fund as at 31 December 2022. The percentages stated are relative to the Sub-Fund's Net Asset Value.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes: In fossil gas in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Team engaged directly with the top investee companies contributing to the Sub-Fund's GHG Intensity to assess Management's commitment to environmental improvement, drive improved GHG disclosures consistent with global best practice, review Net Zero alignment and drive continued progress towards GHG Emissions and GHG Intensity reduction. Several engagements were follow-ons from prior years, and escalated so that proxy votes reflected the engagement assessment. The Investment Team also engaged with Active Managers regarding their underlying holdings identified for GHG Emissions reduction and GHG Intensity improvement, to confirm the Active Manager is following their stated engagement process.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:

**PineBridge Global Emerging Markets
SDG Corporate Bond Fund**

Legal entity identifier:

54930054WQ6LMSROG182

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 45.85%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 45.85%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The fund seeks to advance certain United Nations Sustainable Development Goals (“SDGs”), specifically:

- SDG 8, Decent Work and Economic Growth
- SDG 9, Industry, Innovation and Infrastructure
- SDG 12, Responsible Consumption and Production
- SDG 13, Climate Action.

As at the end of 2022, 100% of the fund's invested assets – excluding cash and cash equivalents – were invested in securities that we identify as sustainable investments on the basis of their contribution to the four SDGs in focus.

● **How did the sustainability indicators perform?**

The following table provides a breakdown of fund market value by SDG contribution as at year end 2022. Please note that as some issuers are deemed to make positive contributions to more than one SDG, these numbers will not sum to 100%.

SDG Contribution	% Assets
SDG 8, Decent Work and Economic Growth	59.9%
SDG 9, Industry, Innovation and Infrastructure	56.5%
SDG 12, Responsible Consumption and Production	46.7%
SDG 13, Climate Action	61.9%

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

Not applicable

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Sub-Fund's sustainable investments avoid causing significant harm to environmental or social sustainable investment objectives through taking into account principal adverse impact indicators.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account as appropriate through the following methods:

- in accordance with the Sub-Fund's policies and procedures, through engagement with entities to advocate for change
- assessing available data to track improvement;
- specific metrics relative to the Sub-Fund's Benchmark
- excluding investments in certain sectors

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes – the Sub-Fund maintains an exclusion such that if any sustainable investment held by the Sub-Fund was deemed to be a violator of the UN Global Compact (UNG), it would be divested.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors

The Fund considered the following principal adverse impacts on sustainability factors: GHG Emissions, Carbon Footprint, GHG intensity of investee companies, Exposure to companies active in the fossil fuels sector, Share of non-renewable energy consumption and production, Energy consumption intensity per applicable high impact climate sector, Investments in companies without carbon emission reduction initiatives, Activities negatively affecting biodiversity sensitive areas, Emissions to water, Hazardous waste ratio, Violation of UNGC and OECD guidelines, Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD guidelines, Operations and suppliers at significant risk of incidents of child labour, Board gender diversity, and Exposure to controversial weapons.

For each issuer under coverage, analysts denote within our internal research platform the PAIs that inform their ESG recommendations. Those risk factors and the company's exposure to and dealing with each are reflected in our independent ESG metrics and are also detailed in comments directly related to the PAIs within our internal research database.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to principal adverse impacts that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party data vendors. An issuer's performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months.

The fund relies on these proprietary metrics – ESG Score and ESG Trend – to determine issuer eligibility and position sizing, to ensure that investments do no significant harm with respect to the principal adverse impacts.

In the course of our due diligence on sustainability risks analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. We formally track our engagement, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

With respect to UNGC violations and controversial weapons, issuers that are deemed UNGC violators and those involved in controversial weapons have been excluded from investment.

What were the top investments of this financial product?

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

As noted above, the allocation across each of the four focus SDGs may sum to over 100%, as issuers often contribute to more than one goal. For the purposes of classifying a sustainable investment as either environmental or social, issuers that contribute to both have been classified based on the materiality of their respective contributions.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Financial	25.8
Utilities	19.2
Consumer	13.4
TMT	11.4
Energy	6.6
Industrial	5.5
Real Estate	4.1
Transport	2.5
Other	3.0
Cash	8.6

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The table above details the sector breakdown in the Sub-Fund as at 31 December 2022. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

Yes: **In fossil gas** **in nuclear energy**

No

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

45.85%

What was the share of socially sustainable investments?

45.85%

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Not sustainable” may consist of cash & cash equivalent holdings and derivatives used for efficient portfolio management purposes. The Sub-Fund has minimum environmental or social safeguards in place for these holdings, such that they are in line with, and do not affect, the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

All Fund investments were deemed to have made a positive contribution to any of the following four SDGs – 8. decent work and economic growth, 9. industry innovation and infrastructure, 12. responsible consumption and production, 13. climate action. Positive contributions were defined as activities that advance the objective of each SDG. In order to determine whether a security meets this SDG standard and is therefore an eligible investment for the Fund, the impact of each issuer to each of the four SDGs was assessed by our team of analysts, who assign a score of +1 (Positive), 0 (Neutral), or -1 (Negative) to all issuers under coverage. Only investments assigned a Positive score were eligible for investment by the Fund.

The assessment of an issuer's contribution to each of these SDGs is an ongoing component of our analysis of sustainability risk and we consistently monitor this and all ESG metrics to ensure the Fund's portfolio remains in compliance with the investment objective.

In addition, the fund excluded from investment any issuer that: is not in compliance with United Nations Global Compact principles; has any ties to cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments; derives 10% or more of total revenues from thermal coal; derives any revenue from oil sands, shale oil, shale gas, coal seam gas or coal bed methane; manufactures tobacco products or grows or processes raw tobacco leaves; for which the production of alcoholic beverages represents the single largest source of revenue; and for which the operation of gambling establishments, manufacture of gambling equipment or servicing of such operations represents the single largest source of revenue.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Sub-Fund has in place the JP Morgan JESG CEMBI Broad Diversified Index as its benchmark, but the benchmark is not a specific designated index used for reference to meet the Sub-Fund's sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **62.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Consumer Discretionary	24.0
Financials	21.2
Information Technology	20.9
Industrials	9.1
Consumer Staples	7.6
Health Care	5.1
Communication Services	5.0
Energy	4.8
Other	0.0
Cash	2.2

The table above details the sector breakdown of the Sub-Fund as at 31 December 2022. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes: In fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2022.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **36.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

Product name:
PineBridge India Equity Fund

Legal entity identifier:
549300RBDHENEORX2S72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___% <input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund sought to engage with companies where it saw potential to improve a company's environmental impact if it is deemed material. The Sub-Fund computes portfolio company emissions on a quarterly basis and has seen emissions per unit revenue and per unit AUM declining in the past year. The Investment Manager will continue to seek to engage with investee companies to maintain the momentum of reducing carbon emissions in line with reaching net zero.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund's portfolio with no holdings in UNGC violators throughout the period to 31 December 2022. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **414.7**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, by reviewing recent trends, prospective plans, and performance versus peers. The Sub-Fund seeks to engage with companies to communicate the importance of reducing emissions.
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund maintained a portfolio throughout the period to 31 December 2022 with no holdings in UNGC violators.
- Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
- Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

In addition to taking into consideration the PAIs detailed above, the Investment Manager has been engaging with investee companies to encourage them to publish data on all PAIs. The Sub-Fund takes into consideration the disclosed PAI data and engages with companies to ensure that their score on each parameter improves over time. The Sub-Fund encourages companies to disclose more PAI data so that they can be monitored. The Sub-Fund monitors PAI data on a regular, at least every quarter end, basis.

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2022, including giving detailed presentations to high GHG emitting companies on the impact they are having on total emissions and the steps they need to take to get the emissions down. These would include switching to renewable sources of energy, use of electrified transport, invest in carbon capture and storage, etc. The Sub-Fund encourages companies to keep reducing pollutant discharge below the limits set by the local environmental laws.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund’s portfolio with no holdings in UNGC violators throughout the period to 31 December 2022. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

The Sub-Fund uses shareholder meetings to sensitise the boards of the companies on SFDR requirements and conducting business sustainably.

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **48.3**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process

What were the top investments of this financial product?

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2022.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

Yes: **In fossil gas** **in nuclear energy**

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2022.

The social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is 'Impact of the issuer on the Environment' with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

The promotion of this environmental characteristic is active and in progress. The Investment Manager utilized its own internal research as well as data from third party vendors to gain insight into portfolio companies ESG characteristics; this includes carbon intensity via scope 1 & 2 emissions. While this data set remains incomplete, most issuers in the investment universe have some level of coverage allowing significant visibility into ESG themes of the portfolio relative to the

investment universe. During 2022 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes including carbon intensity & issuers plans to reduce emissions in the future. Continuation of the engagement process will shape the progress of the portfolio in meeting the promoted environmental characteristic.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **504.4**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

1. GHG Emissions (scope 1&2)
2. Carbon Footprint
3. GHG Intensity
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Exposure to controversial weapons
7. UNGC Violators

In consideration of points 1 to 5 above, the Sub-Fund conducted issuer specific due diligence and compared issuers relative to their industry peers. This environmental risk analysis is an important part of evaluating an issuer’s potential credit risks and highlighting opportunities to engage with management teams.

In consideration of points 6 and 7 above, the Sub-Fund utilized third party data to highlight exposure to controversial weapons & UNGC Violators. During the period covered by the report there has been no exposure in the Sub-Fund to issuers with exposure to controversial weapons and no exposure to UNGC violators.

What were the top investments of this financial product?

The table above details the largest Investments in the Sub-Fund as at 31 December 2022. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

All issuers purchased in the Sub-Fund must be approved by the Investment Manager’s Investment Committee, and because ESG factors are a key part of the assessment of issuer credit risk, the Investment Manager believes that its investment process aligns with the environmental characteristic promoted by the Sub-Fund, with issuers not selected for the Sub-Fund’s portfolio for ESG reasons. During 2022 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes. Continuation of this process will help shape the progress of the portfolio in meeting the promoted environmental characteristic. Issuers that do not make progress on specific engagement issues over time may be removed from the issuer approved list which would require them to be divested from the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

During the period covered by the report, the Sub-Fund looked to promote the environmental characteristic through detailed analysis and active engagement with the management of underlying issuers. The Investment Manager continued to engage with the issuers with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **314.7**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI	Consideration
GHG Emissions	Analysts monitored Scope 1 & Scope 2 GHG issuer emissions
Carbon Footprint	Analysts monitored Carbon Footprint reduction commitments as well as an issuer’s strategy and progress toward achieving those commitments
GHG Intensity	GHG Intensity is a factor in consideration when assessing credit risks and data is deemed comparable. In many cases companies’ state of disclosure and reporting methodologies continue to vary considerably.
Energy Consumption Intensity	This metric is monitored. However, it is acknowledged that continued disclosure inconsistencies make intra-sector comparisons difficult.
Board Gender Diversity	Board, management, and employee diversity are considered as part of our analysis of governance. Our evaluation of diversity is not limited to gender, but includes ethnicity, age and experience as well.
Exposure to controversial weapons	It is addressed through review of relevant controversies at the sector and issuer level, not necessarily through a % revenue indicator of exposure.
Energy Performance (Share of non-renewable energy sources)	Issuer's plans to transition energy supply toward renewable sources over time are evaluated.
Lack of Human Rights Policy	The public disclosure of human rights policies, including criteria for remediation, are monitored.

The Investment Manager monitored the output of these PAIs in comparison with the peers/industry and engaged with the issuer, where deemed appropriate. The Investment Manager may choose to encourage improved disclosure, strategy or targets where appropriate.
