- Jupiter Systematic Physical World Fund

As at 31 December 2024, there were no sub-funds that are not authorised in Sweden and not available to Swedish residents.

The offering of the shares of Jupiter UK Dynamic Long Short Equity Fund have not been notified to the Bundesanstalt für Finanzdienstleistungsaufsicht (Federal Agency for Financial Services Supervision) in accordance with § 310 of the German Investment Code (Kapitalanlagegesetzbuch – KAGB).

General Information

Structure

Jupiter Asset Management Series Plc (the “Company”) is an umbrella fund with segregated liability between Sub-Funds established as an open-ended investment company with variable capital, incorporated on 2 September 1997, organised under the laws of Ireland as a public limited company pursuant to the Companies Act 2014, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended (the “Regulations”) and has been authorised by the Central Bank of Ireland (“Central Bank”) as a UCITS within the meaning of the Regulations.

The share capital of the Company shall at all times equal the Net Asset Value (“NAV”). The authorised share capital of the Company is EUR 38,082 represented by 30,000 Subscriber Shares of no par value and 500,000,000,000 redeemable participating shares of no par value. The Company has repurchased all but one of the Subscriber Shares. The Subscriber Shares entitled the Shareholders holding them to attend and vote at all meetings of the Company.

Additional information

- On 1 February 2024, Jupiter Merian Global Dynamic Bond Fund was renamed to Jupiter Global Fixed Income Fund and Jupiter Strategic Absolute Return Bond Fund transitioned from an Article 6 to an Article 8 Sub-Fund under SFDR.
- Jupiter Merian US Equity Income Fund and Merian European Equity Fund, which both ceased operations in December 2022, were revoked by the Central Bank on 12 March 2024 and 15 April 2024 respectively.
- Jupiter Europe (ex UK) Smaller Companies Fund ceased operation on 14 June 2023 and was revoked by the Central Bank on 8 November 2024.
- Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024.
- On 1 October 2024, Jupiter UK Dynamic Equity Fund was renamed to Jupiter UK Dynamic Long Short Equity Fund.

Investment Objectives of the Active Sub-Funds

Jupiter China Equity Fund

The investment objective of the Jupiter China Equity Fund is to seek to achieve long-term capital appreciation by investing in a well-diversified portfolio of equity securities issued by companies with either the predominant part of their assets in, or the predominant part of their revenues derived from, the People’s Republic of China, Hong Kong and/or Taiwan that are listed, traded or dealt in on Regulated Markets in the People’s Republic of China, Hong Kong, Taiwan, the United States of America (“US”), Singapore, Korea, Thailand and Malaysia or in a member state of the Organisation for Economic Co-Operation and Development (“OECD”). The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Merian World Equity Fund

The investment objective of the Jupiter Merian World Equity Fund is to seek to achieve asset growth through investment in a well-diversified portfolio of securities of issuers worldwide. It is not proposed to concentrate investments in any one geographical region, industry or sector. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics selected for the Sub-Fund include (i) the promotion of portfolio carbon efficiency; and (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

General Information (continued)

Investment Objectives of the Active Sub-Funds (continued)

Jupiter Asia Pacific Income Fund (IRL)

The objective of the Jupiter Asia Pacific Income Fund (IRL) is to seek to achieve long term capital growth and income. Investors should be aware that there is no guarantee that the Fund will achieve its investment objective. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Merian North American Equity Fund (IRL)

The investment objective of the Jupiter Merian North American Equity Fund (IRL) is to seek to achieve long term capital growth through the active management of a diversified portfolio invested primarily in North American stock markets. It is not proposed to concentrate investments in any one industry or sector. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics selected for the Sub-Fund include (i) the promotion of portfolio carbon efficiency; and (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Global Fixed Income Fund (formerly Merian Global Dynamic Bond Fund)

The investment objective of the Jupiter Global Fixed Income Fund is to seek to maximise total return consistent with preservation of capital and prudent investment management. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Emerging Market Debt Fund

The investment objective of the Jupiter Emerging Market Debt Fund is to seek to achieve asset growth through investment in a well-diversified portfolio of fixed and variable rate debt securities issued in emerging markets. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Global Emerging Markets Focus Fund

The investment objective of the Jupiter Global Emerging Markets Focus Fund is to seek to achieve asset growth through investment in a well-diversified portfolio of equity securities of issuers in the emerging markets or of issuers established outside of the emerging markets, which have a predominant proportion of their assets or business operations in the emerging markets and which are listed, traded or dealt in on a Regulated Market worldwide. It is not proposed to concentrate investments in any one industry or sector. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics selected for the Sub-Fund include (i) the promotion of the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse emissions by 2050 or sooner, and (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

General Information (continued)

Investment Objectives of the Active Sub-Funds (continued)

Jupiter Emerging Market Debt Income Fund

The investment objective of the Jupiter Emerging Market Debt Income Fund is to seek to achieve total return through investment in a well-diversified portfolio of fixed and variable rate debt securities issued in the emerging markets worldwide. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter UK Alpha Fund (IRL)

The investment objective of the Jupiter UK Alpha Fund (IRL) is to seek to achieve capital appreciation through investment in a well-diversified portfolio of equities of predominantly UK issuers or of issuers established outside the UK which have a predominant proportion of their assets and/or business operations in the UK or securities listed on a UK exchange. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter UK Dynamic Long Short Equity Fund (formerly Jupiter UK Dynamic Equity Fund)

The investment objective of the Jupiter UK Dynamic Long Short Equity Fund is to achieve capital appreciation by taking long and short positions principally in UK equities outside of the FTSE 100 Index. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Merian Global Equity Absolute Return Fund

The investment objective of the Jupiter Merian Global Equity Absolute Return Fund is capital appreciation while closely controlling risk. In addition, the Sub-Fund intends to deliver absolute returns that have a low correlation with equity and bond markets. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics selected for the Sub-Fund include (i) the promotion of portfolio carbon efficiency; and (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Strategic Absolute Return Bond Fund

The investment objective of the Jupiter Strategic Absolute Return Bond Fund is to seek to deliver positive total returns on a rolling twelve month basis with stable levels of volatility uncorrelated to bond and equity market conditions. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics promoted by the Sub-Fund are: (i) the transition to a low carbon economy; and (ii) the upholding responsibilities to human rights. Such environmental and social characteristics may develop over time. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

General Information (continued)

Investment Objectives of the Active Sub-Funds (continued)

Jupiter Merian Global Equity Income Fund (IRL)

The investment objective of the Jupiter Merian Global Equity Income Fund (IRL) is to seek to achieve a total return through a combination of income and capital growth. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Gold & Silver Fund

The investment objective of the Jupiter Gold & Silver Fund is to seek to achieve a total return by investing predominantly in listed equities. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter UK Specialist Equity Fund

The investment objective of the Jupiter UK Specialist Equity Fund is to seek to achieve capital appreciation by taking long and short positions mainly in UK equities outside the FTSE 100 Index, whilst seeking to deliver absolute returns in all market conditions. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Financials Contingent Capital Fund

The investment objective of the Jupiter Financials Contingent Capital Fund is to seek to achieve a total return through a combination of income and capital growth from a portfolio of primarily fixed and variable rate debt securities issued by financial institutions with minimum capital requirements, such as insurers and banks. The Sub-Fund does not fall within the scope of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. Further to this, the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Jupiter Global Emerging Markets Focus ex China Fund

The investment objective of the Jupiter Global Emerging Markets Focus ex China Fund is to seek to achieve long-term capital growth through investment in a well-diversified portfolio of equity securities of issuers in the Emerging Markets excluding China, or of issuers established outside of the Emerging Markets excluding China, which have a predominant proportion of their assets or business operations in the Emerging Markets excluding China. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. The environmental and social characteristics selected for the Sub-Fund include (i) the promotion of the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse emissions by 2050 or sooner, and (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Systematic Consumer Trends Fund

The investment objective of the Jupiter Systematic Consumer Trends Fund is to achieve long-term capital growth by primarily investing in securities issued by companies which seek to benefit from opportunities in consumer trends. The Sub-Fund promotes social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. Material sustainability risks are integrated into the investment decision making process.

General Information (continued)

Investment Objectives of the Active Sub-Funds (continued)

Jupiter Systematic Consumer Trends Fund (continued)

The active ownership approach considers material ESG factors and principal adverse impacts on sustainability factors which strengthen the assessment of the risks and opportunities that drive long-term value. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Systematic Demographic Opportunities Fund

The investment objective of the Jupiter Systematic Demographic Opportunities Fund is to achieve long-term capital growth by primarily investing in securities of companies associated with the development of products or services to meet the preference or needs presented by various demographic groups. The Sub-Fund promotes social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. Material sustainability risks are integrated into the investment decision making process. The active ownership approach considers material ESG factors and principal adverse impacts on sustainability factors which strengthen the assessment of the risks and opportunities that drive long-term value. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Systematic Disruptive Technology Fund

The investment objective of the Jupiter Systematic Disruptive Technology Fund is to achieve long-term capital growth by primarily investing in securities issued by companies which have a high exposure to technologies deemed disruptive to their relevant area. The Sub-Fund promotes social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. Material sustainability risks are integrated into the investment decision making process. The active ownership approach considers material ESG factors and principal adverse impacts on sustainability factors which strengthen the assessment of the risks and opportunities that drive long-term value. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Systematic Healthcare Innovation Fund

The investment objective of the Jupiter Systematic Healthcare Innovation Fund is to achieve long-term capital growth by primarily investing in securities issued by companies which are within (i) the health care sector (as per the Global Industry Classification Standard ("GICS®")); (ii) or a thematic index of the MSCI health and health care megatrend category. The Sub-Fund promotes social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. Material sustainability risks are integrated into the investment decision making process. The active ownership approach considers material ESG factors and principal adverse impacts on sustainability factors which strengthen the assessment of the risks and opportunities that drive long-term value. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

Jupiter Systematic Physical World Fund

The investment objective of the Jupiter Systematic Physical World Fund is to achieve long-term capital growth by primarily investing in securities issued by companies which are involved with tangible products or services in the economy. The Sub-Fund promotes environmental and social characteristics on an on-going basis within the scope of Article 8 of SFDR but does not have a sustainable investment objective. Material sustainability risks are integrated into the investment decision making process. The active ownership approach considers material ESG factors and principal adverse impacts on sustainability factors which strengthen the assessment of the risks and opportunities that drive long-term value. For further sustainability information please refer to the Sub-Fund's Supplement to the Prospectus, the pre-contractual disclosures relating to the Sub-Fund and the Jupiter Group website, <https://www.jupiteram.com>.

General Information (continued)

Distribution Policy

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as finance costs. Distributions paid and proposed during the financial years ended 31 December 2024 and 31 December 2023 with respect to certain Share Classes are outlined in Note 10. All of the other Sub-Funds' income and capital gains were reinvested in accordance with the investment objectives and policies of the Sub-Funds.

The Company will declare a dividend in respect of the Classes of Shares of the Sub-Funds as set out in the Prospectus of the Company. For all Classes of Shares that are not distributing, the Sub-Fund's income and capital gains will be reinvested in accordance with the investment objectives and investment policies of the Sub-Fund.

Fixed Distribution Share Classes

The Directors at their absolute discretion, have the power to issue Classes of Shares that offer a fixed distribution ("Fixed Distribution Share Classes"). Where the Directors have determined that a Share Class in any Sub-Fund is to constitute a Fixed Distribution Share Class it will have the "(F)" designation after its name.

Where such Share Classes are offered in the Supplement for the relevant Sub-Fund, the Directors intend to pay a fixed distribution of income or gains.

The Directors will periodically review the Fixed Distribution Share Classes and reserve the right to make changes, for example if the investment income after expenses is higher than the target fixed distribution the Directors may declare the higher amount to be distributed. Equally the Directors may deem it is appropriate to declare a dividend lower than the target fixed distribution.

Where in the interest of the Shareholders, especially where the generation of income has a higher priority than capital growth or the generation of income and capital growth have equal priority, a portion or all of the fees and expenses attributable to the Fixed Distribution Share Classes may be charged against the capital of such Shares instead of against income where necessary in order to ensure there is sufficient income to meet the fixed distribution payments.

Dilution Adjustment

On any Dealing Day the Directors may determine when there are net inflows into a Sub-Fund or net outflows from a Sub-Fund to apply a dilution adjustment to the dealing Net Asset Value per Share so that the price of a Share in the Sub-Fund is above or below that which would have resulted from a latest available market valuation. This adjustment is intended to pass the estimated costs of underlying investment activity of the Sub-Fund to the active Shareholders by adjusting the Net Asset Value of the relevant classes of Shares and thus to protect the Sub-Fund's long-term Shareholders from costs associated with ongoing subscription and redemption activity. These costs may include dealing charges, commissions and the effects of dealing at prices other than the middle market price. The price of each Class of Share in a Sub-Fund will be calculated separately but any dilution adjustment will affect the price of Shares of each Class in a Sub-Fund in an identical manner.

Investment Risks

An investment in any Sub-Fund involves investment risks, including possible loss of the amount invested. Moreover, there can be no assurance that a Sub-Fund will achieve its investment objective.

Taxation

As an investment undertaking within the meaning of Section 739(B) of the Taxes Consolidation Act 1997, as amended, the Company is generally exempt from Irish tax on its income and gains and the Company will not be required to account for any tax in respect of Shareholders who are not Irish residents or exempt Irish residents provided that the signed necessary declarations are in place. The Company may be required to account for tax in respect of Shareholders who are Irish residents. Shareholders who are not Irish residents and have made the required declaration of non-residence will not be liable to Irish tax on income from their Shares or gains made on the disposal of their Shares, provided the Shares are not attributable to an Irish branch or agency of such shareholder. No stamp duty or other tax is generally payable in Ireland on the subscription, issue, holding, redemption, conversion or transfer of Shares.

General Information (continued)

Selling Restrictions

The Shares may not be purchased or held by US persons unless pursuant to an exemption under applicable US law and may not be offered or sold in any jurisdiction in which such offer or sale is not lawful or in which the person making such offer or sale is not qualified to do so or to anyone to whom it is unlawful to make such an offer or sale.

Dealing Days

A Dealing Day in respect of all of the Sub-Funds means every Business Day (as defined for each Sub-Fund in the Prospectus) or such other days as the Directors may determine provided that there shall be at least one Dealing Day each fortnight.

Subscriptions and Repurchases

Certain Share Classes have minimum initial investment, minimum subsequent investment and minimum holding requirements which are disclosed in the Prospectus.

An initial charge may be payable to the Company on subscriptions for certain Share Classes. A contingent deferred sales charge may be payable to the Company on the subscription price for certain Shares, with the amount of the contingent deferred sales charge payable dependent on the length of time between the date the Shares were purchased and their repurchase. The following table outlines these charges:

Class of Shares:	Initial Charge:	Contingent deferred sales charge as a percentage of the subscription price paid				
		Years since purchase				
		0 – 1 Years	1 – 2 Years	2 – 3 Years	3 – 4 Years	4+ Years
Class B Shares	Nil	4.00%	3.00%	2.00%	1.00%	Nil
Class C Shares	Up to 1.00% of the Net Asset Value per Share	1.00%	Nil	Nil	Nil	Nil
Class C2 Shares	Up to 0.50% of the Net Asset Value per Share	2.00%	1.00%	Nil	Nil	Nil
Class L Shares	Up to 5.00% of the Net Asset Value per Share for certain Sub-Funds	Nil	Nil	Nil	Nil	Nil
Class L1 Shares	Up to 0.50% of the Net Asset Value per Share	Nil	Nil	Nil	Nil	Nil
Class LA Shares	Up to 0.50% of the Net Asset Value per Share	Nil	Nil	Nil	Nil	Nil
Class LZ Shares	Up to 0.50% of the Net Asset Value per Share	Nil	Nil	Nil	Nil	Nil
Class N Shares	Up to 3.00% of the Net Asset Value per Share	Nil	Nil	Nil	Nil	Nil

The other Share Classes are not in scope for these charges.

Directors' Report

The Directors submit their annual report together with the audited financial statements of Jupiter Asset Management Series Plc (the "Company") for the financial year ended 31 December 2024.

Principal Activities

The principal activity of the Company is the collective investment in transferable securities and/or other liquid financial assets. As at 31 December 2024, the Company consisted of 22 Sub-Funds (the "Sub-Funds") which are in operation at financial year end (2023: 23).

Business Review, Results and Future Development

A more comprehensive overview of the Company's investment activities and the analysis of the Company's key performance indicator ('KPIs'), such as the performance of the relevant Sub-Funds is detailed in the Investment Manager's and Investment Adviser's Reports.

The results for the financial year are set out in the Statement of Comprehensive Income and the assets and liabilities are set out in the Statement of Financial Position. Details of the Company's share capital and changes during the financial year under review are disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Significant shareholders are disclosed in Note 5.

The Company intends to continue promoting and generating interest in its business in the future.

Jupiter Asset Management (Europe) Limited ("JAMEL") ("the Manager") is authorised by the Central Bank to act as a UCITS management company pursuant to the Regulations and an Alternative Investment Fund Manager ("AIFM") pursuant to the European Communities (Alternative Investment Fund Managers) Regulations, 2013, as amended.

There is a risk with any political developments that occur, and the Manager and Investment Manager continuously monitors all political situations and specifically any financial instrument holdings in affected countries. Political developments affecting market confidence may result in outflows of assets from investment portfolios, which could include asset portfolios held by the Sub-Funds of the Company. Russian hostilities in the Ukraine are being monitored closely to understand the possible impacts of the actions taken by Russia and the likely effects on portfolios. The Company has minimal exposure to Russia and the Ukraine and therefore has no material concerns but continues to closely monitor the situation and any resulting market impacts. Political unrest brings uncertainty and unpredictability in the financial services market, and therefore brings risk of significant currency fluctuations and otherwise adverse effects on consumer confidence for the foreseeable future.

Dividends

Distributions paid and proposed during the financial years ended 31 December 2024 and 31 December 2023 are detailed in Note 10.

Principal Risks, Risk Management Objectives and Policies

The main risks arising from the Company's financial instruments are market risk (including market price risk, interest rate risk and currency risk), liquidity risk and credit risk. In order to manage such risks the Company shall comply with the investment restrictions and diversification limits provided for in the Prospectus and the UCITS Regulations. Details of the principal risks, risk management objectives and policies associated with investment in the Company are listed in Note 11.

Securities Financing Transactions Regulation

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") disclosures have been included in the Supplemental Information (unaudited) to the annual financial statements.

Directors' Report (continued)

Principal Material Changes

On 1 February 2024, Jupiter Merian Global Dynamic Bond Fund was renamed to Jupiter Global Fixed Income Fund and Jupiter Strategic Absolute Return Bond Fund transitioned from an Article 6 to an Article 8 Sub-Fund under SFDR.

Jupiter Merian US Equity Income Fund and European Equity Fund, which both ceased operations in December 2022, were revoked by the Central Bank on 12 March 2024 and 15 April 2024 respectively.

Jupiter Europe (ex UK) Smaller Companies Fund ceased operation on 14 June 2023 and was revoked by the Central Bank on 8 November 2024.

On 1 October 2024, Jupiter UK Dynamic Equity Fund was renamed to Jupiter UK Dynamic Long Short Equity Fund.

The Company's Prospectus and related Supplements were updated with the CBI with effective date 28 November 2024. With the exception of the amendments noted below, all other updates to the Prospectus and Supplements are not considered a material change:

- Amendment to the performance fee calculation for Jupiter Gold & Silver Fund

The following addition was added to the performance fee section of the Supplement: Where a fair value adjustment has been made to the Net Asset Value per Share of the Sub-Fund then this will be excluded for the purposes of the calculation of the performance fees.

- Amendment to the definition of 'Business Days' in relation to Jupiter Asia Pacific Income Fund (IRL)

To better accommodate the days on which the stock market in Australia is open, the 'Business Day' definition was amended to: In respect of the Sub-Fund, means a day (excluding Saturdays, Sundays and public holidays) on which (i) retail banks are open for business in Dublin and London; and (ii) the Australian Securities Exchange is open for business in Sydney.

Events During the Financial Year

The significant events during the financial year are detailed on pages 409 to 410.

Subsequent Events

Effective 1 March 2025, the appointed Investment Manager of the Company changed from Jupiter Investment Management Limited to Jupiter Asset Management Limited. It is noted that there was no change to the features of any of the sub-funds, the operation or management of the sub-funds, their risk profile or the people involved in the management of the sub-funds or the fee level in managing the funds as a result of the transfer of the investment manager role from Jupiter Investment Management Limited to Jupiter Asset Management Limited.

Post year end, constantly changing and conflicting communications around US trade policy triggered volatility in the market. On 2 April 2025, US President Donald Trump imposed large tariffs on several countries. The imposition of these tariffs has led to a volatile atmosphere in the stock markets, with investors cautiously navigating the potential repercussions. Furthermore, the unpredictability of retaliatory tariffs imposed by other nations could further exacerbate market instability. Political and regulatory developments affect market views, confidence and capabilities, and may result in both outflows of assets or change in performance of assets under management.

The Company, the Manager and the Investment Manager remain vigilant and continue to closely monitor and navigate the current market landscape and the related risk exposures and provide effective management of the funds under management.

On 23 April, the Directors approved that the sub-fund, Jupiter Global Emerging Markets Focus ex China Fund, be terminated and all outstanding shares be compulsorily redeemed on 28 May 2025.

There have been no other material events affecting the Sub-Funds subsequent to 31 December 2024, which require amendment to or disclosure in, these financial statements.

Directors' Report (continued)

Employees

There were no employees of the Company during the financial year under review or during the prior financial year.

Segregated Liability of Sub-Funds

The Company is an umbrella fund with segregated liability between Sub-Funds.

Directors

The Directors of the Company during the year ended 31 December 2024 were:

	Nationality
Bronwyn Wright	Irish
Tom Murray	Irish
Jasveer Singh	British

The Articles of Association do not stipulate a retirement age for Directors and do not provide for retirement of Directors by rotation.

All of the Directors have served for the entire financial year. Directors' remuneration paid and payable during the financial years ended 31 December 2024 and 31 December 2023 are detailed in Note 5. All expenses paid to Directors were non-taxable in line with Section 305 of the Companies Act 2014. Jasveer Singh, as employee of Jupiter Asset Management Limited, was not entitled to receive a Director's fee or other compensation in connection with his role as a Director of the Company.

Directors' and Company Secretary's Interests in Shares and Contracts

All Directors and the Company Secretary who held office at 31 December 2024 and at 31 December 2023 had no interest in the share capital of the Company or group undertakings of the Company at any time during the year.

Transactions Involving Directors

The Board of Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in Section 329 of the Companies Act 2014 at any time during the financial year ended 31 December 2024 (2023: Nil).

As at 31 December 2024, Jasveer Singh is an employee of Jupiter Asset Management Limited (2023: Jasveer Singh).

Corporate Governance Code

The Company has adopted in full the voluntary Code of Corporate Governance ("the Corporate Governance Code") for Collective Investment Schemes and Management Companies issued by the Irish Funds ("IF"), the text of which is available from the IF website, www.irishfunds.ie. The Company has been in compliance with the Corporate Governance Code during the financial year ended 31 December 2024.

Connected Person Transactions

In accordance with the requirements of the Central Bank UCITS Regulations, any transaction carried out with the Company by its Manager, Depositary, Investment Adviser, Investment Manager and/or associated or group companies of these entities ("connected person") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out these transactions do carry them out on a similar basis.

The Board of Directors are satisfied that: (i) there are arrangements in place to ensure that the obligations set out in Central Bank of Ireland's UCITS Regulations are applied to all transactions with connected parties; and (ii) transactions with connected parties entered into during the financial year complied with the obligations set out in the UCITS Regulations.

Directors' Report (continued)

Connected Person Transactions (continued)

Although not deemed to be related parties under FRS 102 as they do not exercise significant influence over the activities of the Company, UCITS Regulations also deems a “Depositary” and its “associated or group companies” to be related parties to the Company. As such, Citi Depositary Services Ireland Designated Activity Company, the Depositary, and Citibank Europe plc (the “Administrator”), are related parties to the Company. During the financial year, Citi Depositary Services Ireland Designated Activity Company and Citibank Europe plc earned fees for provision of depositary and administration services to the Company as disclosed in Note 9. Citi Depositary Services Ireland Designated Activity Company was selected by the Company to execute certain transactions on behalf of the Sub-Funds, the terms of such transactions were negotiated by the Company and were at normal commercial terms.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and financial statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with Irish law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its increase in net assets attributable to redeemable participating shareholders for that year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that the financial statements comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to a trustee for safe-keeping.

They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Directors' Compliance Statement

The Directors are responsible for securing the Company's compliance with its “relevant obligations” under section 225 of the Companies Act 2014 (as defined in section 225(1) thereof).

Directors' Report (continued)

Directors' Compliance Statement (continued)

As required under section 225(3), the Directors confirm that:

- a) a compliance policy statement has been drawn up setting out the Company's compliance policies (that, in the Directors' opinion, are appropriate to the Company) with respect to compliance by the Company with its relevant obligations;
- b) appropriate arrangements or structures are in place that, in Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
- c) a review has been conducted during the financial year ended 31 December 2024 of the arrangements or structures referred to in paragraph b) above.

Going concern

The Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Therefore the Company continues to adapt the going concern basis of accounting in preparing its financial statements.

Accounting Records

The Directors are responsible for ensuring that adequate accounting records, as outlined in Sections 281 to 285 of the Companies Act 2014, are maintained by the Company. To achieve this, the Directors have appointed the Administrator, which reports to the Board of Directors (the "Board") to ensure that the requirements of Sections 281 to 285 of the Companies Act 2014 are complied with. The adequate accounting records are located at 1 North Wall Quay, Dublin 1.

Audit Information Statement

In accordance with Section 330 of the Companies Act 2014, the Directors hereby confirm that:

- a) so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditor is unaware; and
- b) the Directors have taken all the steps that ought to have taken as a Director in order to make aware of any relevant audit information and to establish that the Company's statutory auditor is aware of that information.

Audit Committee

The Directors do not consider it necessary for the Company to have an audit committee on the basis of the following:

- a) the nature, scale and complexity of the Company's business range of services and activities undertaken in the course of that business;
- b) the resources available to the Company and the resources and expertise of the various third parties engaged to support the Company and carry out certain functions on its behalf; and
- c) the procedures in place for review, approval and circulation of the audited financial accounts and statements which are appropriate for the Company pursuant to the UCITS Regulations.

Directors' Report (continued)

Auditor

Ernst & Young, Chartered Accountants, indicated their willingness to act as independent auditor in accordance with section 383 (2) of the Companies Act 2014.

Jupiter Asset Management Series Plc

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

We have enquired into the conduct of Jupiter Asset Management Series Plc (the “Company”), for the financial year ended 31 December 2024 in our capacity as Depositary of the Company.

This report including the opinion has been prepared for, and solely for, the shareholders in the Company in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the UCITS Regulations, as amended. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company’s memorandum and articles of association (the “Memorandum and Articles of Association”) and the UCITS Regulations, as amended, (the “Regulations”). It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps that we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the UCITS Regulations, as amended, and to ensure that, in all material respects, the Company has been managed: (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations, and (ii) otherwise in accordance with the Company’s constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association and the Regulations.

Investment Advisers' Reports

Investment Adviser – Ping An of China Asset Management (Hong Kong) Company Limited

Jupiter China Equity Fund

Market Review

In 2024, China and Hong Kong stock markets experienced significant fluctuations due to various domestic and international factors. However, driven by positive national policies and attractive valuations, China and Hong Kong stocks were sought after by investors, recording an increase over the year. In April, the State Council released new "Nine Guidelines" policies for capital market, coupled with the return of overseas capital, which improved market sentiment and led to a rebound of over 20% from the low point. However, the market later experienced a correction due to a lack of further positive news. By the end of September, the government introduced a series of favourable policies, including lowering reserve requirement ratio and policy interest rates, reducing existing home loan rates, unifying the minimum down payment ratio for home loans, and creating new monetary policy tools to support stable development of the stock market, triggering a policy-driven rally in the stock market. Subsequently, the Chinese Ministry of Finance promised to intensify policies to address risks related to real estate and local debt, but did not immediately provide details on the scale of additional stimulus or a timeline for implementation, leading the market into fluctuations. Although the stock market saw a slight correction towards the end of the year, China and Hong Kong stock markets still managed to achieve an overall annual growth rate in the high teens. The future trend of the stock market will depend on domestic macroeconomic fundamentals and whether there will be further incremental policies.

In terms of economic data, GDP growth slowed in the third quarter. Anticipating possible tariff increases in 2025, factories ramped up shipments early to avoid tariff impacts, keeping export growth high in the fourth quarter of 2024. However, CPI growth remained sluggish, and the economy still faced deflationary challenges. While manufacturing activity continued to expand in the fourth quarter, profits of industrial enterprises continued to decline, and sales of top real estate companies also remained weak.

Portfolio Review

The fund outperformed its benchmark in 2024. The largest positive contributions to the fund's performance came from an overweight position in consumer discretionary and information technology sectors, as well as an underweight position in industrials sector. The largest detractors were our overweight positions in communication services, consumer staples and health care sectors, as well as our underweight position in the utilities, financials, materials, real estate and energy sectors.

In terms of individual stock performance, our overweight positions in Beijing Fourth Paradigm Technology, Pop Mart International Group, Xiaomi Corp were the most beneficial for the fund's overall results. Beijing Fourth Paradigm Technology has significantly benefited from its AI platform, achieving substantial year-over-year growth in revenue and gross profit, and holding a significant market share in China's AI market. Pop Mart has benefited from its rapid overseas growth and increased revenue across channels by diversifying its IPs and product types and differentiating channel positioning. Xiaomi benefited from improvements in the fundamentals of all its business sectors, particularly the automotive sector, where the gross margin greatly exceeded expectations.

The fund's performance was negatively affected by overweight positions in NetEase and China Resources Land. NetEase's stock declined due to weak earnings and weakness in its gaming business pipeline, which raised concerns about its profitability. China Resources Land's stock price has declined as the Chinese real estate market has not yet bottomed out and begun to recover, with housing prices and sales volumes continuing to fall.

Investment Advisers' Reports (continued)

Investment Adviser – Ping An of China Asset Management (Hong Kong) Company Limited

Jupiter China Equity Fund (continued)

Investment Outlook

Stock markets in China and Hong Kong experienced a surge following the pivot in policy on 24 September 2024. It is anticipated that the market will continue to monitor specific numerical targets of policies to be announced at the National "Two Sessions" in March over the short term. Before these policies are explicitly introduced, the market might experience minor fluctuations.

Donald Trump's re-election could lead to increased tariffs (taxes on imported/exported goods aimed at protecting domestic industries from foreign competition) on China, which is expected to slow China's export growth in 2025. It is anticipated that China will implement stronger fiscal policies to stimulate domestic demand and offset the decline in exports in 2025.

The Central Economic Work Conference in December 2024, along with press conferences by the Ministry of Finance, repeatedly emphasised that there is ample policy space and tools available. In 2025, more proactive policy support will be adopted to ensure stable economic growth. Policymakers have prioritized boosting domestic demand, including supporting consumer spending, expanding the implementation of trade-in programs for consumer goods, and making investments more effective. The "Two Sessions" in March are expected to finalize funding arrangements and scale for this year's consumer stimulus plan, with consumer spending likely to continue its recovery, and companies are likely to see an improvement in profits from a low base this year. However, the long-term sustainability of the stock market's rebound will depend on details of policies announced at the "Two Sessions," subsequent policy implementation intensity, and the effectiveness of policy transmission to the real economy.

Given the Chinese government's readiness to introduce policies to stimulate the market, when necessary, downside risks for China and Hong Kong stock markets are believed to be manageable. Additionally, the People's Bank of China and the "National Team" have provided support to the stock market. In 2024, the People's Bank of China provided several hundred billion yuan in swap arrangements and stock repurchase re-loans to the stock market. Central Huijin Investment continued to increase holdings in exchange traded funds (ETFs), and the potential establishment of a national stabilisation fund is expected to support the market, making downside risks controllable.

In 2024, Chinese listed companies returned a substantial amount of cash to shareholders through dividends and repurchases, reaching a high for the year and resulting in attractive returns for high-dividend stocks. Based on the announced stock repurchase plans and the government's support for high-dividend policies, the performance of high-yield stocks in 2025 is anticipated with interest.

Investment Managers' Reports

Investment Manager – Jupiter Investment Management Limited

Jupiter Merian World Equity Fund

Market Review

Global equity markets moved higher in 2024 in what was another strong year for risk assets. Developed market central banks began the journey to normalise interest rate levels, although this was not as smooth as anticipated, with inflation stickier than expected. In light of rising yields, global investment grade bonds delivered a negative return in 2024.

US equities led markets higher as US mega cap tech stocks dominated for the second year in a row. Returns in the US were skewed towards the 'Magnificent 7' artificial intelligence stocks, although there was some broadening out in market returns. Despite some wavering over the summer, US growth continued, pushed higher by the election of Donald Trump, who investors anticipate will deregulate the market and further support growth.

Japan also performed strongly in local currency terms, although returns were dragged down by the strong US dollar in USD terms. The region saw ongoing corporate reforms, coupled with continued optimism around the end of deflation and higher interest rates. This, combined with a weak yen, led to a strong year for Japanese equities.

Sentiment in Europe was not positive, and this was reflected in returns in the region. Weak economic data, especially within the manufacturing sector, was compounded by political instability, especially in France and Germany, leading the region to underperform other developed markets. Meanwhile, UK equities marginally outperformed Europe as the economy recovered from 2023 lows. However, the Labour party's Autumn budget dampened business sentiment, with news of larger-than-expected tax increases and national insurance contributions.

Broadly speaking, emerging markets delivered a single-digit return, helped by strength in India and Taiwan. Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy by means of a whole host of stimulus measures pushed equities higher in the second half of the year.

Portfolio Review

The fund delivered a strong return in 2024, outperforming the MSCI World benchmark. Within the alpha model, four out of five of the stock selection criteria added to positive relative performance. The Company Management stock selection criterion contributed most significantly to returns over the period, as investors opted to invest in companies with high-quality management teams in times of uncertainty. The other fundamentally aligned stock selection criteria – Dynamic Valuation and Sustainable Growth – also added to returns. Market Dynamics, which focuses on shorter-term price action signals, also contributed a small positive to relative returns. The Sentiment criterion was the only detractor within the alpha model. At a regional level, positive relative returns were generated in Asia Pacific, Europe, and North America. Japan was the only region that detracted overall.

Both stock selection and sector allocation added to returns, though stock picking dominated. In particular, stock picking within Industrials and Consumer Discretionary proved very positive for returns. Sector allocation also added a small positive.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Merian World Equity Fund (continued)

Investment Outlook

As part of our investment process, the impact of varying market conditions on investor behaviour is captured by our market environment analysis. It includes measures of market sentiment as well as of the risk environment.

Generally speaking, regions became slightly more optimistic over the period, while the risk environment was less optimistic over the period. North America remained in the optimistic, high risk space for the whole year. Japan began and ended the period in the medium risk, optimistic space, with not much movement throughout. The environments for Asia Pacific, Europe, and Emerging Markets diverged throughout the year. The three regions began the period close together in neutral sentiment and a medium/high risk environment. Europe changed the least, becoming slightly less risky, but remaining in the neutral sentiment space. Meanwhile, Asia Pacific moved to a higher risk environment, yet optimism for the region improved. Finally, the risk environment for Emerging Markets decreased substantially from medium to low risk, with sentiment remaining neutral.

Along with our assessment of the market environment, we also estimate investors' risk appetite. This indicator evaluates investors' willingness to hold cheaper assets with riskier cashflows (value), versus more certain cashflows from more expensive assets (quality). Throughout the year, risk appetite shifted. It started the year at medium levels and peaked in May 2024, before falling close to 12 month lows in August. By the end of the period, global risk appetite had increased once again, reflecting the preference of market participants for riskier value stocks versus safer quality names.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Asia Pacific Income Fund (IRL)

Market Review

The first three months of the year saw the technology sector perform particularly strongly, supported by excitement over the prospects of monetising Artificial Intelligence (AI) following Nvidia's earnings beat and positive outlook. Whilst the technology sector did see some profit-taking in late July, over the course of the year it was a helpful sector for us.

There were numerous regional elections over the 12 months. In Taiwan, the incumbent party, DPP secured the most seats. In Indonesia, Prabowo won 55% of the vote in the first round; we expect continuity with outgoing President Jokowi's key policy agendas. Meanwhile, Indian equities performed well in the first half of the period as Modi's BJP won the most seats for the third consecutive election, though by a smaller margin than anticipated, meaning the party is now reliant on two other parties in the National Democratic Alliance for a majority in parliament.

Nevertheless, sentiment on India generally remained positive in the aftermath of the elections, partly supported by the policy continuity that was confirmed in July's budget. India's strong equity performance softened over the final six months of the period, however.

Chinese equities were generally soft until a rally in late September, as Beijing announced a raft of stimulus policies, with further policy announcements continuing into year end. In December, South Korea's president shocked the nation by declaring martial law; he was then impeached and replaced by an acting president who also was impeached.

Portfolio Review

The Jupiter Asia Pacific Income Fund (IRL) delivered strong returns in the period under review. The fund's exposure to the technology sector helped considerably, with significant outperformance over the year seen by Hon Hai Precision, MediaTek, TSMC and HCL Technologies. We maintain that our technology companies' valuations are attractive on both an absolute and a relative basis. They have net cash balance sheets, and we expect to see them deliver strong earnings and dividend growth over the next few years. We believe we are in the early stages of a tech up-cycle that will be driven by artificial intelligence (AI).

Avoiding investing in mainland Chinese companies continued to benefit the fund in relative terms in the first half of the period under review but hurt somewhat thereafter. We remain comfortable with our positioning given ongoing issues with China's political system, debt and demographic headwinds, as well as growing geopolitical tensions.

We continue to view India as the most attractive emerging market in Asia, and probably the world. It is very different from China in several ways: it is a democracy; its economy and stock market are dominated by private sector companies; it has a young and growing population; and historically there has been high correlation between its GDP growth and equity market returns. While India trades at a premium to the rest of Asia and other emerging markets, we believe that is deserved, though we are mindful that it is important to be selective about the companies we hold there. For example, we like Power Grid, which was a notable highlight for the fund for much of the period under review, before giving up some performance late on. The company benefits from an increase in electricity demand in urban states, as well as enabling connectivity in rural areas that are being connected for the first time. We view it as an attractive play on India's development.

Elsewhere, while ITC (an Indian consumer conglomerate) detracted from the fund's performance in the first two quarters of the year, it bounced back strongly in the second half of the period. ITC offers an attractive dividend yield, it has a strong balance sheet and a professional management team, and its shares are very liquid.

The fund ended 2024 with a higher weighting in Taiwan than at the beginning of the year and it is now the largest country weighting, ahead of Australia. Singapore remains the largest relative overweight, while India is the third-largest weighting.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Asia Pacific Income Fund (IRL) (continued)

Investment Outlook

Our outlook doesn't change with the calendar because we take a long-term view on investments. In 2025, it is likely that geopolitical tensions will remain elevated. However, we see the tech sector as a bright spot due to the AI led upturn. There will be negative pulls from the recent increase in the US dollar, bond yields impinging on credit costs and higher tariffs but, we are feeling reasonably positive and would expect to see earnings and dividend growth this year in the Asia Pacific region.

We think that the Australian, Indian and Singaporean domestic economies are likely to continue to see growth in 2025 and to outperform their peers. We retain a high degree of confidence in the technology sector and in the tech companies that we own, which are primarily Taiwan-listed, and are supported by the AI roll-out. We believe these companies are trading at attractive valuations, on an absolute basis and when compared to many US large-cap tech stocks.

We have a diversified portfolio which we think can do relatively well in a broad range of scenarios, such as whichever investment style is in vogue or whatever the interest rate or economic outlook may be. We will continue to avoid investing in mainland China because we think the political system, geopolitical risks and the state of the economy make the market unattractive. We think that geopolitical tensions between China and the US, Europe and some Asian nations are likely to worsen. We believe that investing in quality, growing, income producing companies in the Asia Pacific region is the best way to generate attractive total returns over the longer term. That's not going to change with the calendar.

Market Review

Global equity markets moved higher in 2024 in what was another strong year for risk assets. Developed market central banks began the journey to normalise interest rate levels, although this was not as smooth as anticipated, with inflation stickier than expected. In light of rising yields, global investment grade bonds delivered a negative return in 2024.

US equities led markets higher as US mega cap tech dominated for the second year in a row. Returns in the US were skewed towards the 'Magnificent 7' artificial intelligence stocks, although there was some broadening out in market returns. Despite some wavering over the summer, US growth continued, pushed higher by the election of Donald Trump, who investors anticipate will deregulate the market and further support growth.

Japan also performed strongly in local currency terms, although returns were dragged down by the strong US dollar in USD terms. The region saw ongoing corporate reforms, coupled with continued optimism around the end of deflation and higher interest rates. This, combined with a weak yen, led to a strong year for Japanese equities.

Sentiment in Europe was not positive, and this was reflected in returns in the region. Weak economic data, especially within the manufacturing sector, was compounded by political instability, especially in France and Germany, leading the region to underperform other developed markets. Meanwhile, UK equities marginally outperformed Europe as the economy recovered from 2023 lows. However, the Labour party's Autumn budget dampened business sentiment, with news of larger-than-expected tax increases and national insurance contributions.

Broadly speaking, emerging markets delivered a single-digit return, helped by strength in India and Taiwan. Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund delivered a strong return in 2024, outperforming the MSCI North America benchmark. Within the alpha model, two out of five of the stock selection criteria added to positive relative performance, highlighting the merits of our multi-pronged approach. The Company Management stock selection criterion contributed most significantly to returns over the period, as investors opted to invest in companies with high-quality management teams in times of uncertainty. Sustainable Growth, another 'fundamentally aligned' stock selection criterion, also added to returns, while Dynamic Valuation was flat. Sentiment and Market Dynamics detracted over the year as momentum in the US market was generally due to the large US mega cap names, which are very highly valued, and which the fund was generally underweight in.

Both stock selection and sector allocation added equally to returns. In particular, stock picking within Industrials was very positive although it was somewhat offset by negative returns from stock picking within financials. Meanwhile, sector allocation was notably positive within Healthcare and Energy.

Jupiter Merian North American Equity Fund (IRL) (continued)

Investment Outlook

As part of our investment process, the impact of varying market conditions on investor behaviour is captured by our market environment analysis. It includes measures of market sentiment as well as of the risk environment.

Generally speaking, regions became slightly more optimistic over the period, while the risk environment was less optimistic over the period. North America remained in the optimistic, high risk space for the entirety of the year.

Along with our assessment of the market environment, we also estimate investors' risk appetite. This indicator evaluates investors' willingness to hold cheaper assets with riskier cashflows (value), versus more certain cashflows from more expensive assets (quality). Throughout the year, risk appetite shifted. It started the year at medium levels and peaked in May 2024, before falling close to 12 month lows in August. By the end of the period, global risk appetite had increased once again, reflecting the preference of market participants for riskier value stocks versus safer quality names.

Jupiter Global Fixed Income Fund

Market Review

The 12-month period saw a shift from heightening inflationary pressures and tighter monetary policy to wholesale developed market interest rate cuts.

The Swiss National Bank became the first G10 central bank to cut interest rates in this cycle in March 2024, and the European Central Bank (ECB) followed suit in June, September, October and December. The US Federal Reserve (Fed) also proceeded to its first cut in September, after the Bank of England (BoE) had followed its European neighbour by cutting rates in August.

The Fed cut interest rates by 0.50% in September. This was the Fed's first rate cut in more than four years and brought it into rate-cutting line with its European and UK peers. It then went again in November and December, cutting by 0.25% each time, to take the rate to between 4.25% and 4.5% by year end. Fed Chair Jay Powell reiterated that the bank was not on a preset path and that policy restraint, or otherwise, will be led by the prevailing economic data. Inflation sat at an annual rate of 2.7% in November. The final months of the review period saw investors digest the prospect of potentially inflationary looser US fiscal policy, lower regulation and tighter immigration as Donald Trump was victorious in the US Presidential election, with the Republican Party taking control of Congress.

In the UK, with its last rate hike 12 months earlier, August saw the BoE cut rates from their 16-year high to 5%, a reduction of 0.25%. The bank then cut interest rates for the second time this cycle at its November meeting, by 0.25% to 4.75%. Towards the middle of the period a General Election heralded a new government. A Labour Party victory, by a historic margin, confirmed the end of the Conservative Party's 14 years in office, with Sir Keir Starmer sworn in as the country's prime minister. The new government's first Budget prompted a jump higher in Gilt yield amid fears of weaker growth prospects for the UK.

Having cut interest rates by 0.25% in June and September, the European Central Bank (ECB) went again at its October and December meetings, cutting by a further combined 0.50% to 3.0% amid falling inflation and a slowing Eurozone economy. Meanwhile, political developments stole the headlines in Europe late in the period with the collapse of the German coalition government – prompting an election to be called for February 2025 – and question marks over the future of the French government after it failed to get approval for its 2025 budget.

Looking at major market movements over the year, government bond yields saw an increase in most major developed markets economies from the five-year maturity segment onwards and especially in the long-end, with a clear steepening trend. UK rates were the key underperformer, posting the largest increase, but the movement was meaningful in the US as well, while interest rates in the Eurozone outperformed. Excluding a few circumscribed moments of higher volatility, credit spreads were generally well behaved, with both investment-grade and high yield corporate credit spreads closing the year tighter. High yield credit spreads in Europe, in particular, saw a major tightening when compared to the US. Spreads on CoCos also saw a major tightening. The major strengthening of the US dollar was instead the key topic across currency markets, as market participants repriced the overall path of interest rate cuts in the US.

Portfolio Review

The fund underperformed its benchmark over the 12-month period.

On the positive front, the fund benefited from its exposure to developed market investment-grade corporate bonds and, in particular, exposure to the financials, real estate and energy sectors. Meanwhile, exposure to developed market high yield corporate bonds and emerging market corporates was also beneficial.

However, on the negative front, performance was negatively impacted by the fund's exposure to developed market government bonds (via cash bonds and futures) and, in particular, exposure to the US and UK. Exposure to emerging market rates, especially in South Korea and Brazil was also detrimental to performance, as was the fund's currency exposure – notably to the Brazilian real, Mexican peso and Indonesian rupiah.

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Fixed Income Fund (continued)

Investment Outlook

Moving forward, we continue to expect a slowdown in the US. We would not underestimate the recent increase in the unemployment rate as a historically accurate predictor of recessions. At this stage in the cycle, the only piece missing is a more material increase in layoffs. We believe jobs in the housing sector is a place to monitor closely since activity here has slowed significantly. The rest of the world continues to look in a precarious position, in our view. The recovery in the Eurozone has pretty much faded, and while the UK economy surprised to the upside in the first half of 2024, but the second half showed some deterioration. The budget from the Labour Party appears to have damaged business confidence as additional fiscal spending comes at the expense of higher taxes on labour. Elsewhere, Australia and New Zealand have seen weak GDP numbers by their historical standards.

Inflation across the globe increasingly seems relatively under control, although still above target, but we believe that the widely discussed lags in service inflation still leave very meaningful room for disinflation in the coming quarters. Additionally, while a lot of uncertainty on future policies remains, we do not think that the new Republican administration in the US is going to be particularly inflationary. In fact, a case can be made that the combined effect of new policies might prove disinflationary over the medium to long term as lower energy prices and deregulation are key parts of the agenda. The key consequence of all of this is that rates remain way too high as of today and more easing is needed.

Investment implications continue to see exposure to rates and government bonds as the most compelling area of fixed income markets, especially given the most recent backup in rates. Credit continues to price in a goldilocks scenario – not too hot and not too cold. At this stage we prefer to keep historically low exposure to credit with high selectivity. Broadly speaking, risk assets pretty much across the board are elevated with very little in the way of risk premium to compensate investors.

Market Review

The 12-month period saw a shift from heightening inflationary pressures and tighter monetary policy to wholesale developed market interest rate cuts.

The US Federal Reserve (Fed) cut interest rates by 0.50% in September. This was the Fed's first interest rate cut in more than four years and brought it into interest rate-cutting line with its European and UK peers. It then went again in November and December, cutting by 0.25% each time, to take the rate to between 4.25% and 4.5% by year end. Fed Chair Jay Powell reiterated that the bank was not on a preset path and that policy restraint, or otherwise, will be led by the prevailing economic data. Inflation sat at an annual rate of 2.7% in November. The final months of the review period saw investors digest the prospect of potentially inflationary looser US fiscal policy, lower regulation and tighter immigration as Donald Trump was victorious in the US Presidential election, with the Republican Party taking control of Congress.

Looking at major market movements over the year, government bond yields saw an increase in most major developed markets economies from the five-year maturity segment onwards and especially in the long end, with a clear steepening trend. UK rates were the key underperformer, posting the largest increase, but the movement was meaningful in the US as well, while rates in the Eurozone outperformed.

Excluding a few circumscribed moments of higher volatility, credit spreads were generally well behaved, with both investment-grade and high yield corporate credit spreads closing the year tighter. High yield credit spreads in Europe, in particular, saw a major tightening when compared to the US. Spreads on CoCos also saw a major tightening.

Emerging markets hard currency spreads also recorded some sizeable tightening both across sovereigns and corporates towards the end of the 12 months. In the sovereign space, high yield credit spreads saw a meaningful tightening, while investment-grade spreads were more stable. Africa and Europe saw, in particular, major tightening, driven by high yield names and distressed stories. Latin America was instead the key underperforming region, with sizeable widening, especially in the likes of Brazil and Colombia. In the corporate space, both investment-grade and high yield names recorded sizeable tightening, with Africa the best performing region.

The major strengthening of the US dollar was instead the key topic across currency markets, as market participants repriced the overall path of interest rate cuts in the US.

Portfolio Review

The fund closed the 12-month period with performance in line with benchmark but above the category average. Performance differential versus the benchmark came from the following key contributors and detractors:

Key contributors

- Overweight exposure to Ukraine.
- Overweight exposure to Pakistan.
- Security selection in Mexico.
- Security selection in Indonesia.
- Security selection in South Africa.

Key detractors

- Overweight exposure to interest rates (especially in the fourth quarter).
- Security selection in Argentina.
- Off-benchmark exposure to corporates in Hong Kong.
- Credit risk hedging via index credit default swaps (CDS).
- Overweight exposure to Gabon.

Investment Managers' Reports (continued)

Jupiter Emerging Market Debt Fund (continued)

Investment Outlook

We enter 2025 with hard-currency emerging market (EM) valuations appearing expensive. Simultaneously, we acknowledge that given the pro-market proclivities of the new US administration, we are unlikely to observe a broader 'risky'-asset sell-off in the first half of 2025. We highlight that whilst the asset class looks expensive, given the elevated levels of US Treasury yields, all-in yields for EM hard-currency bonds still offer attractive income.

Within our universe, we maintain a bias in the fund towards high-yield-rated securities, especially those in the lower-rated-buckets, such as B and CCC. Within this bucket, we hold overweight positions in a number of issuers which are situation-driven and either entering or recently exited restructurings.

Thematically, we believe that geopolitical volatility will continue to be imperative for EM markets in 2025, as it was in 2024: in particular, we are positioned in the fund for a diffusion of several regional conflicts. We also observe that credit curves in many high-yield EM sovereigns look steep versus fair value and we are positioned for this to correct.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Emerging Markets Focus Fund

Market Review

Emerging markets (EM) underperformed their developed market (DM) peers during 2024, with the MSCI Emerging Markets Index returning +8.0% compared with the +19.2% return for the DM-heavy MSCI All Countries World index (all USD returns).

Emerging markets tend to perform poorly in periods of USD strength, as was the case for large swathes of 2024. The first half of the year saw markets driven by the trajectory of US interest rate policy, with the higher-for-longer narrative of the US Federal Reserve (Fed) leading to a resilient USD. Generally positive results in the many EM government elections (such as India and Taiwan) supported the performance of the asset class in the face of these headwinds.

The latter part of the year saw two significant market events that cemented the EM/DM performance differential. Firstly, the announcement of a coordinated package of Chinese government stimulus measures at the end of September drove strong performance for Chinese equities (the MSCI China index rose +32% over a two-week period). This resulted in outflows away from other large EM countries (including India and Korea) as investors rebalanced towards China. But the rally was relatively short-lived. Chinese equities gradually gave back much of these gains as it became clear that the Chinese government had not reached the “whatever it takes” point necessary to jump-start Chinese consumption. Secondly, the re-election of Donald Trump caused US markets to rally strongly in anticipation of a reintroduction of Trump’s America-first agenda. This led to a strong rally in the USD, with the USD index up +7.1% in the final quarter of the year.

Portfolio Review

The relative underperformance was due to the fund’s quality-growth investment approach being out of favour.

Several positions contributed to performance over the period under review. Chief among these were TSMC, JNBY Design, and Trip.com.

TSMC is one of the largest holdings in the fund and is the leading contract manufacturer of silicon chips. The company likes to call itself “everybody’s foundry” as it does not compete with any customer. TSMC epitomises what we look for in a business. Its barrier to entry is the incredible technological lead it commands in mass manufacturing chips for demanding customers, a barrier defended by huge capital and R&D expenditure. There are now just two leading-edge outsourced logic chip makers, TSMC and Samsung Electronics, with TSMC clearly ahead. The company currently has a near 90% market share of the latest generation N3 chips, which are crucial to the growth of AI. So, no TSMC, no AI. The company continues to move from strength to strength, reporting strong sales numbers and benefitting from improved forward guidance due to the significant performance improvement in NVIDIA’s leading-edge Blackwell chip.

JNBY is China’s leading home-grown clothes designer and was founded by a husband-and-wife team. JNBY offers a very differentiated clothing style to its loyal core fan base, with premium pricing and limited releases. The business continues to perform strongly, despite low Chinese consumer confidence, reporting strong earnings.

Trip.com is China’s leading travel agency, handling 90% of China’s domestic flight bookings. Trip.com has a higher share of affluent users than its nearest competitor, making it well positioned to benefit from increased spending on experiences by China’s middle classes. China’s extended lockdowns strengthened the company’s moat of domestic bookings by increasing the demand for travel and experiences. It also has significant runway to grow through outbound international bookings. The business reported strong results and benefitted from a surge of optimism towards domestically aligned businesses as the market looked to further consumption stimulus from the Chinese government.

The main detractors from performance were Localiza, Topsports, and Raia Drogasil.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Emerging Markets Focus Fund (continued)

Portfolio Review (continued)

Localiza is Brazil's largest car rental company. The affordability of car rental has improved dramatically in recent years as Localiza has reduced prices. The company is also benefiting from the rise in ride-sharing services, such as Uber, providing an opportunity for drivers to rent their vehicle rather than own it outright. In 2022, the business completed its merger with the number two market player, Unidas, giving the combined business more than 50% of the market. We are excited by the growth opportunity ahead. The company reported good results, but the shares fell, in line with the wider market, following a jumbo rate hike by the Brazilian central bank. As China's largest sportswear retailer, TopSports commands a share of ~16% of the sportswear market, the fastest growing consumer category in China, and operates Nike and Adidas-branded stores in-country. China's sports participation rate has been growing rapidly over the past decade. For example, the number of marathons held in China increased from 51 in 2014 to more than 1800 in 2019. This increase in participation has driven Chinese consumers towards premium sportswear offerings. We exited our position as the outlook for Nike's dominance in innovation, which is part of TopSports' competitive moat, now looks challenged.

Raia Drogasil, a Brazilian pharmacy operator, is the largest drug and cosmetic retailer in Brazil, with almost 3,000 stores across all 27 states. As a trusted supplier, Raia has been able to take share from the informal "mom and pop" pharmacy operators, which still make up more than two-thirds of the market, as well as benefitting from significant industry growth as new pharmacies open in underserved areas. Similar to our other Brazilian holdings, the shares fell following the Brazilian central bank's jumbo rate hike.

Investment Outlook

For much of 2024, we wrote about how emerging markets are 'waiting for Godot', namely Fed Chair Jay Powell, and specifically his decision to cut US interest rates. As investors in non-USD assets (emerging markets equities) and longer duration assets (due to the quality growth style we invest with), we have faced a double headwind. September's rate cut by the Fed is the first step in what we think is the most exciting coalescence of factors to support EM equity performance since the early 2000s. These factors comprise: (1) the US avoids a recession; (2) it continues to print relatively low growth expectations in an environment where (3) global interest rates remain steady or begin to fall; and we see (4) a weakening USD. Against this backdrop, the relatively higher growth available to investors in EM becomes more obvious, leading to increased allocations to the asset class and greater support for asset prices.

However, there is one small, orange fly in the ointment: Donald Trump. The Trump presidency will result in further support for America-first policies by means of tariffs, the promotion of locally sourced goods, and a nationalistic mindset. This environment is generally bad for exporting nations and should be negative for emerging markets in aggregate. However, like most things related to Trump, the devil is in the detail. For instance, China and Mexico are likely to be notably negatively impacted, while India and Taiwan are likely to fare relatively better. We believe active investment management is crucial for navigating these choppy waters. Relative to the benchmark, our fund is significantly underweight China and has no exposure to Mexico but is overweight Taiwan and has a neutral weight in India. Our high-quality, active approach should stand the fund in good stead for any potential Trump-related volatility in early 2025.

Looking further into the future, we think the world could be on the edge of an epochal shift in economic growth. Over recent decades, growth has come from two sources: China's export-fuelled growth and US growth fuelled by access to cheap shale energy and cheap money. Integration and globalisation have meant that all investors have benefitted from these tailwinds, but investors have also been subject to their downsides. Over the past three years, however, we have seen a paradigm shift. We no longer live in the same globalised world that we did. In particular, the West's sanctions against Russia have made many non-Western companies and individuals wary of being caught out by the Western system. This has driven a splintering of global spheres of influence, which Trump 2.0 will only reinforce. Direct trade, bypassing the US dollar (USD), is becoming increasingly common, with regular reports of direct commodity transactions in Chinese Reminbi and Indian Rupees.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Emerging Markets Focus Fund (continued)

Investment Outlook (continued)

In our view, this means that global trade and growth may be less dependent on these two nations going forward, and more dependent on cross-border investment between countries. Over the longer term, this could be very positive for EM. Already the share of trade between EM countries is more than 40% of total EM exports. Emerging markets constitute the world's last great engines of growth. They have vast, young populations that are well educated and entrepreneurial. These countries are rapidly growing their wealth. They benefit from in-bound and domestic capital investment. And they are increasingly run by fiscally conservative, stable governments. Greater integration of EM economies helps support this growth and reduces reliance on the slower growing developed world. Investing in emerging markets should be a significant long-term allocation for any investor. Nevertheless, we think right now may be the best confluence of factors for investing that we have seen in a decade.

Market Review

The 12-month period saw a shift from heightening inflationary pressures and tighter monetary policy to wholesale developed market interest rate cuts.

The US Federal Reserve (Fed) cut interest rates by 0.50% in September. This was the Fed's first interest rate cut in more than four years and brought it into rate-cutting line with its European and UK peers. It then went again in November and December, cutting by 0.25% each time, to take the interest rate to between 4.25% and 4.5% by year end. Fed Chair Jay Powell reiterated that the bank was not on a preset path and that policy restraint, or otherwise, will be led by the prevailing economic data. Inflation sat at an annual rate of 2.7% in November. The final months of the review period saw investors digest the prospect of potentially inflationary looser US fiscal policy, lower regulation and tighter immigration as Donald Trump was victorious in the US Presidential election, with the Republican Party taking control of Congress.

Looking at major market movements over the year, government bond yields saw an increase in most major developed markets economies from the five-year maturity segment onwards and especially in the long end, with a clear steepening trend. UK rates were the key underperformer, posting the largest increase, but the movement was meaningful in the US as well, while rates in the Eurozone outperformed.

Excluding a few circumscribed moments of higher volatility, credit spreads were generally well behaved, with both investment-grade and high yield corporate credit spreads closing the year tighter. High yield credit spreads in Europe, in particular, saw a major tightening when compared to the US.

Emerging markets hard currency spreads also recorded some sizeable tightening both across sovereigns and corporates towards the end of the 12 months. In the sovereign space, high yield credit spreads saw a meaningful tightening, while investment-grade spreads were more stable. Africa and Europe saw, in particular, major tightening, driven by high yield names and distressed stories. Latin America was instead the key underperforming region, with sizeable widening, especially in the likes of Brazil and Colombia. In the corporate space, both investment-grade and high yield names recorded sizeable tightening with Africa the best performing region.

The major strengthening of the US dollar was instead the key topic across currency markets, as market participants repriced the overall path of interest rate cuts in the US.

Portfolio Review

The fund outperformed its benchmark over the 12-month period. Performance differential versus the benchmark came especially from the following key contributors and detractors:

Key contributors

- Security selection in Mexico.
- Overweight and security selection in India.
- Overweight and security selection in Ukraine.
- Overweight exposure to Argentina.
- Security selection in Indonesia.

Jupiter UK Alpha Fund (IRL)

Market Review

2024 began with the economic strength of the US outpacing Europe and the UK. In general, stickier services inflation, helped by labour strength, led the market to push anticipated interest rate cuts to the right.

Elections played a major role during the year, with the UK's Labour party winning a widely expected majority in July. Early stock market enthusiasm for the resulting political clarity was soon tempered by Chancellor Rachel Reeves identifying a £22 billion "black hole" in the public finances – requiring tax rises and spending cuts to accommodate.

In the third quarter, as global economic data showed signs of weakness, central banks, led by the US Federal Reserve (Fed), reacted by reducing interest rates. Markets were volatile, with a notable bout of volatility after Japan raised its interest rates – creating a violent but brief unwind of the so-called carry-trade.

As leaked beforehand, the main tax-raising measures in the UK budget were an increase in national insurance tax for employers along with upward tweaks to capital gains and inheritance tax. The surprise for investors was the extent of the rise in borrowing to fund an increase in public investment. With the outlook for short-term growth, inflation, and government borrowing all higher – and the scope for interest rate cuts reduced – gilt yields rose.

In the US, as Donald Trump claimed a convincing presidential victory, markets rose strongly. Bond yields and the US dollar also moved higher. Trump's policies are generally considered pro-growth and pro-business.

As the year drew to a close, interest rates were cut during the final quarter, by 0.50% in the US and Europe and by 0.25% in the UK. In the statement accompanying the cut in December, the Fed raised its growth and inflation outlook and reduced expectations for further cuts in 2025 to 0.50%, down from 1.00% in September. Equity markets fell sharply following the announcement. US, UK, and European government bond yields all moved higher over the quarter.

Uncertainty over the impact of the UK budget saw domestically exposed sectors, such as housebuilders, property firms, and retailers underperform. However, the banks moved higher on expectations of rising interest rates that supported the outlook for profits and capital returns.

Portfolio Review

The fund had a disappointing performance relative to the benchmark. The primary detractor over the year was HSBC, which the fund does not own. The bank performed very strongly, largely due to US interest rates. Nonetheless, this detractor was outweighed by the fund's positions in Barclays and Lloyds (contributing 1.65% and 0.5% respectively).

Other stock-specific detractors included Pets at Home, SSP Group, and Entain. Pets is subject to a CMA enquiry. We believe the company will ultimately remain somewhat shielded from this. But it has also disappointed the market with poor execution on a distribution centre transfer and generally poor trading. Entain is very much in recovery mode now, with the UK again showing positive growth, Brazil up 50%, and the US joint venture stabilised. SSP is also refocussing on underlying returns on capital after a period of overextended capex. We believe all these stocks should perform well from their current valuation levels but the detraction in 2024 performance was marked.

Other positive contributors include Darktrace, which was our favourite technology stock. It was bid for during the period. Drax and St James's Place performed strongly, delivering on expectations from cheap valuations.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter UK Alpha Fund (IRL) (continued)

Portfolio Review (continued)

During the year, we completed our disposal of Next and sold Darktrace following the bid. New stocks introduced to the portfolio included utility company Centrica, recruitment business Hays, and hybrid office operator International Workplace Group.

Investment Outlook

Global equity markets face significant uncertainty going into 2025. The Trump administration's policies around tariffs, immigration, and climate change risk downward pressure on economic growth outside of the US and upward pressure on inflation. China is in the early stages of stimulating its economy, but the measures announced so far are unlikely to improve medium-term prospects. The wars in Ukraine and the Middle East rumble on. In the UK, the budget increased national insurance contributions for employers, potentially leading to higher prices and job cuts as companies seek to mitigate the impact on profits.

The UK equity market is exposed to all these factors to some degree, given the geographic diversity of its companies. However, there are some factors working in the UK's favour. While the budget disappointed, the government has an agenda to reduce planning constraints which, along with its spending plans, should underpin growth. The UK consumer is in reasonable health, with real wages growing and a high level of savings. Importantly, the UK stock market is cheap, trading at a discount to other developed markets and its own history. This provides scope for progress should the growth and inflation environment prove benign.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter UK Smaller Companies Focus Fund

Market Review

The first half of the year was characterised by moderating inflation and increasing investor confidence that interest rates would fall and economic growth would accelerate. The FTSE All-Share index gained 7.4% in the year to June. Through the balance of the year, inflation remained broadly stable, as expected. In August, the bank base rate was cut for the first time this cycle. However, market interest rates rose following the cut, with the yield on two-year government gilts reaching around 4.1% at the end of August – well above lows of about 3.6%. Higher interest rates generally suppress economic activity, which impacts the value of equities.

Meanwhile, the newly elected Labour government spent much of the second half of the year strenuously attempting to lower expectations, with much talk of fiscal 'black holes' and 'painful decisions'. As a result, the UK equity market was less buoyant during the second half and traded broadly sideways.

Portfolio Review

The fund modestly underperformed its benchmark from the start of the year until it was closed on 30th September. Key positive contributors included Gamma Communications, JTC, and Morgan Sindall. Detractors included YouGov, Tullow Oil, and Vesuvius.

Investment Outlook

The Fund closed on 30th September 2024.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter UK Dynamic Long Short Equity Fund

Market Review

UK equity markets had a strong start to 2024 but tracked roughly sideways during the second half of the year as investors digested domestic tax rises and uncertainty about the direction of interest rates. The UK economy skirted around recession at one point earlier in the year. However, the impact on quoted company earnings was limited to certain businesses and sectors. Inflation continued to moderate over the year, albeit not as rapidly as some had hoped. Political change was a significant factor in many of the world's largest democracies.

Portfolio Review

The fund delivered a return close to that of its reference benchmark over the period. The main positive contributors were Intermediate Capital Group (an alternative asset manager), Jet2 (a tour operator), and Marks and Spencer (a retailer). Against that was Computacenter (an IT reseller), Pagegroup (a recruiter), and OSB Group (a buy-to-let lender). The fund's short positions in a biotech firm, an online grocer, and a silicon IP business were all helpful.

Investment Outlook

UK small and mid-cap equities look attractively valued to us. The headwinds from politics, investor flows, and a perceived Brexit hangover are well known, but in general these are not worsening. Despite the recent budget tax rises, the UK economy continues to experience a disinflationary trend overall, and disposable consumer cash has improved over the last year. Personal and corporate balance sheets are reasonably healthy, with only isolated pockets of stress. Government borrowing is high, which puts some constraints on what the new government can achieve. The bottom-up opportunity set is attractive: growth stocks have de-rated since 2021; some cyclical sectors are likely closer to trough than peak earnings; and some small cap pockets are anomalously cheap absent a severe recession. The fund is relatively balanced versus history - overweight cyclicals versus defensives, and overweight growth versus value, though less than in recent years.

Jupiter Merian Global Equity Absolute Return Fund

Market Review

Global equity markets moved higher in 2024 in what was another strong year for risk assets. Developed market central banks began the journey to normalise interest rate levels, although this was not as smooth as anticipated, with inflation stickier than expected. In light of rising yields, global investment grade bonds delivered a negative return in 2024.

US equities led markets higher as US mega cap tech dominated for the second year in a row. Returns in the US were skewed towards the 'Magnificent 7' artificial intelligence stocks, although there was some broadening out in market returns. Despite some wavering over the summer, US growth continued, pushed higher by the election of Donald Trump, who investors anticipate will deregulate the market and further support growth.

Japan also performed strongly in local currency terms, although returns were dragged down by the strong US dollar in USD terms. The region saw ongoing corporate reforms, coupled with continued optimism around the end of deflation and higher interest rates. This, combined with a weak yen, led to a strong year for Japanese equities.

Sentiment in Europe was not positive, and this was reflected in returns in the region. Weak economic data, especially within the manufacturing sector, was compounded by political instability, especially in France and Germany, leading the region to underperform other developed markets. Meanwhile, UK equities marginally outperformed Europe as the economy recovered from 2023 lows. However, the Labour party's Autumn budget dampened business sentiment, with news of larger-than-expected tax increases and national insurance contributions.

Broadly speaking, emerging markets delivered a single-digit return, helped by strength in India and Taiwan. Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund delivered a strong absolute return in 2024. Within the alpha model, all five of the stock selection criteria added to positive performance. The Company Management stock selection criterion contributed most significantly to returns over the period, as investors opted to invest in companies with high quality management teams in times of uncertainty. The other fundamentally aligned stock selection criteria – Dynamic Valuation and Sustainable Growth – also added to returns. Market Dynamics, which focuses on shorter-term price action signals, was another strong contributor to returns in what was largely a momentum-driven market. At a regional level, Asia Pacific and Europe provided the bulk of returns, and Japan added a positive gain too. North America was flat over the period.

Both stock selection and sector allocation added to returns, though stock picking dominated. In particular, stock picking within Consumer Discretionary, Industrials, and Materials proved very positive for returns, though this was somewhat offset by negative stock picking within Healthcare. The fund's net short exposure to Energy also proved beneficial. In 2024, all of the positive returns came from the short book, while the long book detracted marginally.

Investment Outlook

As part of our investment process, the impact of varying market conditions on investor behaviour is captured by our market environment analysis. It includes measures of market sentiment as well as of the risk environment.

Generally speaking, regions became slightly more optimistic over the period, while the risk environment was less optimistic over the period. North America remained in the optimistic, high risk space for the whole year. Japan began and ended the period in the medium risk, optimistic space, with not much movement throughout. The environments for Asia Pacific, Europe, and Emerging Markets diverged throughout the year. The three regions began the period close together in neutral sentiment and a medium/high risk environment. Europe changed the least, becoming slightly less risky, but remaining in the neutral sentiment space. Meanwhile, Asia Pacific moved to a higher risk environment, yet optimism for the region improved. Finally, the risk environment for Emerging Markets decreased substantially from medium to low risk, with sentiment remaining neutral.

Along with our assessment of the market environment, we also estimate investors' risk appetite. This indicator evaluates investors' willingness to hold cheaper assets with riskier cashflows (value), versus more certain cashflows from more expensive assets (quality). Throughout the year, risk appetite shifted. It started the year at medium levels and peaked in May 2024, before falling close to 12 month lows in August. By the end of the period, global risk appetite had increased once again, reflecting the preference of market participants for riskier value stocks versus safer quality names.

Jupiter Strategic Absolute Return Bond Fund

Market Review

2024 was heralded as the year for bond markets. Market expectations were for significant falls in central bank policy rates, led by the US Federal Reserve (the Fed), as inflation continued to fall towards its target and the Fed allowed real rates to return to neutral policy levels - though that was an open question for debate, including within the Fed itself. However, the reality was that in 2024, growth levels, particularly in the US, continued to surpass expectations, labour markets remained tight, and, more worryingly, inflation in the service sector persisted at uncomfortably high levels.

These inflation concerns were not universal, with China experiencing significant deflationary conditions under the weight of bad assets (mainly property) sitting on corporate and household balance sheets. These deflationary impulses would have historically spread globally, but both the US and the European Union have become more protectionist over the last decade and are looking to save their domestic manufacturing industries with the use of tariffs. This has left excess Chinese manufacturing capacity with nowhere obvious to go.

Generally, inflation expectations, as priced by the market, were well contained over the course of the year and fell quite significantly in Europe as energy prices continued to drift lower. However, Japan saw a continued rise in break evens, highlighting how the Japanese economy continues to diverge from trends elsewhere.

Yield curves steepened on the back of the easing structure from central banks (ex-Japan), with some of the largest moves seen in Australia and New Zealand where the economic outlook was clouded by the weakness in China. The US dollar was in the ascendancy over the course of the year with the Brazilian real and the Mexican peso particularly weak, given concern about the possible impact of US President Trump's tariff policies in 2025. Additionally, in Brazil, the ineffectiveness of the government in dealing with the fiscal deficit added to concerns. Generally, the outlook for deficits was also a big factor in emerging market bonds, with Brazilian 10-year yields rising to above 15% over the country's fiscal problems. By contrast, the emergence of the coalition government in South Africa caused yields there to fall sharply. The bond vigilantes were also out in force in Europe where French bonds significantly underperformed as the political crisis in the country worsened over the course of the year. Late in the year, the UK Gilt market was also subject to fiscal scrutiny. Credit markets had another strong year, despite a widening in the middle of the year, ending with spreads close to 20-year lows.

Portfolio Review

While yields rose over the course of the year, the fund still delivered a small positive performance, slightly outperforming US Treasuries, while the broader Global Aggregate performed better as credit markets had a good year. However, all these exposures underperformed cash.

The fund was generally long of duration for the year while looking to play the range as the market veered between optimism about any economic slowdown and potential rate cuts on the one hand, and the reality that the US economy remained resilient, and inflation elevated on the other. With the Fed cutting rates by 1.00% over the course of the year, it turned out to be a very unusual year to see 10-year bond yields rise over that period, even if the move was generally range bound rather than trending. US dollar exposure for the fund similarly followed the ebb and flow of US rates. The correlation between the US dollar and US bond yields was very high. Without any significant and definable macro trends, the fund generally kept risk levels lower, though these were increased during the third quarter when the bond rally was a wider trend. The fund stayed long of emerging market (EM) bond exposure given the high real yields available in this area and, despite the strong US dollar on spread terms, EM markets overall traded well, with some exceptions, most notably Brazil.

Jupiter Strategic Absolute Return Bond Fund (continued)

Investment Outlook

The key for the beginning of 2025 is what the policy mix from the Trump administration looks like once the new president officially enters the White House following the 20 January inauguration. Crucially, it is also how risk markets react to that policy mix given that equities seem priced for perfection and how other governments (potentially using reprisal tariffs) and economies react. The danger is that Trump's more aggressive trade policies could trigger a global trade war, not just between the US and the rest of the world but potentially between China and other major trading areas concerned about the possible dumping of Chinese excess manufacturing capacity. At this stage, we just don't know whether Trump's initial rhetoric is a negotiating tactic, or he believes that tariffs are the best medicine for the US economy. The concerns about a reigniting of inflationary pressures and the potential for a global economic downturn are plainly very real given that risk markets have not traded well into the end of the year. The steepening of the US yield curve also points towards concerns about funding the burgeoning US deficit, as well as the possibility of the US finally entering a harder-landing scenario and thereby initiating a policy response from the Fed. The outlook for equity markets and the US dollar are all closely aligned to these themes and the first few weeks of the new year will be key to how markets trade and our positioning. Our current thinking is that risk markets look vulnerable, and we are entering a period of heightened volatility. For that reason, we retain our steepening bias and are looking for the sequencing around risk markets, Fed policy, and the US dollar as indicators for us to increase our risk levels to reflect these themes.

Market Review

Global equity markets moved higher in 2024 in what was another strong year for risk assets. Developed market central banks began the journey to normalise interest rate levels, although this was not as smooth as anticipated, with inflation stickier than expected. In light of rising yields, global investment grade bonds delivered a negative return in 2024.

US equities led markets higher as US mega cap tech dominated for the second year in a row. Returns in the US were skewed towards the 'Magnificent 7' artificial intelligence stocks, although there was some broadening out in market returns. Despite some wavering over the summer, US growth continued, pushed higher by the election of Donald Trump, who investors anticipate will deregulate the market and further support growth.

Japan also performed strongly in local currency terms, although returns were dragged down by the strong US dollar in USD terms. The region saw ongoing corporate reforms, coupled with continued optimism around the end of deflation and higher interest rates. This, combined with a weak yen, led to a strong year for Japanese equities.

Sentiment in Europe was not positive, and this was reflected in returns in the region. Weak economic data, especially within the manufacturing sector, was compounded by political instability, especially in France and Germany, leading the region to underperform other developed markets. Meanwhile, UK equities marginally outperformed Europe as the economy recovered from 2023 lows. However, the Labour party's Autumn budget dampened business sentiment, with news of larger-than-expected tax increases and national insurance contributions.

Broadly speaking, emerging markets delivered a single-digit return, helped by strength in India and Taiwan. Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund outperformed its benchmark in 2024. Within the model, two of the five stock selection criteria added positively to relative returns while the remaining three detracted. Company Management and Sustainable Growth, two of the fundamentally aligned criteria, added positively, with investors opting for companies with high quality management teams in times of uncertainty. Meanwhile, Sentiment and Market Dynamics detracted significantly from relative returns as the fund was not exposed to the big momentum players that drove market returns in 2024. Dynamic Valuation also detracted from relative returns. At a regional level, allocations within Europe were positive, while North America detracted significantly. Japan and Asia Pacific also detracted, albeit marginally.

Stock selection was responsible for the negative relative return, while sector allocation was flat. In particular, weak stock picking within Information Technology, Consumer Discretionary, and Healthcare detracted from overall performance.

Jupiter Gold & Silver Fund

Market Review

Systemic concerns relating to the banking sector have receded this year. Instead, political developments and their implications for the economy and markets have been the focus of attention for investors. Whilst the UK general election came and went with barely any market impact, in the days following Donald Trump's victory markets moved considerably, pricing in higher growth and inflation. Trump has announced plans to impose a 25% tariff on all imports from Canada and Mexico, and an additional 10% tariff on Chinese goods. He has also warned the BRICS nations that he will impose a 100% tariff on their goods, should they move to create a new currency to replace the US dollar. This threat highlights the importance that the US places on the US dollar's global reserve currency status, a privilege it has enjoyed since the middle of the last century. At the time of writing, the US debt ceiling has not been suspended and, according to US Treasury Secretary Janet Yellen, the country could hit the debt limit in mid-January 2025. The US national debt now exceeds \$36 trillion.

The US Federal Reserve (Fed) made a series of cuts to the Fed Funds rate, beginning with a 0.50% cut in September which was followed by two subsequent 0.25% cuts in November and December. The target range for the benchmark rate now stands at 4.25-4.50%. Gold rose 27.47% during the year whilst silver rose 22.14%, resulting in a rise in the gold/silver ratio of 4.36%. The year has seen a continuation of strong central bank gold demand, with central bank net demand totalling 694t in the first three quarters of 2024 (Fourth-quarter data has yet to be published). Save for an unprecedented amount of demand in the fourth quarter, it seems unlikely that central bank gold demand for the entirety of 2024 will eclipse that seen in 2022 or 2023. However, it does look as though 2024 will come to mark the third highest year for central bank gold demand on record. During the year, India's central bank revealed that it had repatriated 100 tonnes of gold (~15% of its reserves) from the Bank of England and it expressed its intention to repatriate more bullion going forward. The RBI's announcement follows that of other central banks (Germany, Netherlands, Poland, Austria, and Hungary), which have all moved significant portions of their gold reserves out of London/New York in recent years.

In contrast to central banks, investors continue to shun gold and the total known ETF holdings of gold are currently 25% lower than the 2020 peak. The total known ETF holdings of silver are currently 21% below the high of 2021, reflecting a lack of investor interest in the other monetary metal. There remains very little appetite for gold and silver mining stocks and companies at the smaller end of the market still have a tough time raising capital. We continue to take advantage of the favourable terms on offer and participated in a number of primary market financings during the year.

Portfolio Review

Gold and silver rallied 27.47% and 22.14% respectively during the year, resulting in a rise in the gold/silver ratio of 4.36%.

In September, Mithril Silver & Gold Limited announced the results of drilling at its Copalquin Project in Mexico. Drilling into a structure on the eastern side of a target called El Refugio yielded 1,180 g/t x m of gold equivalent. This was a remarkable result which not only made for the highest-grade intercept at the property to date but ranked as a globally significant drill hole. The company's shares rallied strongly on the back of the announcement, rising 205% by the end of the month. The company is looking to double the resource at El Refugio by Q1 2025 and further drilling is underway.

BHP Group Ltd and Lundin Mining Corp announced that they would jointly acquire Filo Corp for C\$4.5bn. Although the acquisition price at C\$33 per share was slightly lower than what we had been hoping for, it equates to a 39% return on our investment. Filo Corp's porphyry complex (Filo Del Sol) in the Vicuna district is the largest discovery of its type in decades and the billions of dollars required to make it a reality means that it could only ever have been acquired by just a few of the world's largest mining companies. We continue to have exposure to the Vicuna district through our investments in NGEx Minerals Ltd and Mirasol Resources Ltd, which have exploration projects close to Filo Del Sol. We believe that it is just a matter of time before NGEx's Lunahuasi project is also acquired but hopefully not before NGEx's shares are more fully valued.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Gold & Silver Fund (continued)

Portfolio Review (continued)

One of the best performing stocks in the fund was Spartan Resources Limited, which made a lot of progress with respect to its Dalgara Gold Project. As well as developing an underground drill-drive underway, the company received all regulatory approvals to commence underground mining and processing operations at this project. Spartan made a significant discovery too, identifying a high-grade deposit it has named “Freak” which sits adjacent to its two existing deposits at Dalgara. In December, the company published an updated mineral reserve estimate for the project of 15.90Mt at 5.61g/t gold for 2.869Moz. This is a remarkable upgrade and represents a 99% increase in gold ounces and a 35% increase in grade in less than six months.

Investment Outlook

Market participants are currently pricing in only one to two cuts in the Fed Funds rate in 2025. This is broadly in line with the Fed's dot plot, which shows two cuts of 0.25% in 2025. We expect the Fed will cut at a much faster pace than this and, all else being equal, lower nominal rates arising from these cuts will make for lower real interest rates and a higher gold price. Central banks are likely to continue their gold accumulation, regardless of monetary policy.

We expect the consolidation trend in the gold mining industry to continue, with a number of the small and mid cap names held by the fund representing attractive takeover targets for large cap companies facing dwindling reserves. At the same time, divestments by the largest gold miners are likely to create opportunities for some of our investee companies.

We expect 2025 will see silver in deficit again, to the tune of hundreds of million of ounces. The deficit is a structural phenomenon and, without a vast amount of new mine supply, the tightness of the silver market will remain for years to come, serving to amplify silver rallies driven by lower real interest rates.

There is little doubt that the Trump presidency will see drastic changes in US domestic and foreign policy, and it seems inevitable that his administration will undertake deficit spending on a par with the outgoing Biden administration. The US national debt currently stands at \$36 trillion, \$3 trillion of which needs to be refinanced in 2025. This is a tall order to say the least. Interest payments on the US national debt will total almost \$900 billion in 2025, exceeding defence spending and coming to represent more than 20% of federal revenues. The rate at which the US's debt is ballooning is clearly not sustainable and there is a growing understanding of this point.

Fraught US-China relations seem unlikely to improve in the near term, and China is resolute that China and Taiwan will be reunified. Whilst we don't anticipate a Chinese invasion of Taiwan, it is worth noting that Bloomberg Economics estimates that, were China to invade Taiwan and draw the US into a local conflict, the cost would be around \$10 trillion (about 10% of global GDP). With the Taiwan Strait one of the busiest shipping lanes in the world, even a Chinese maritime “quarantine of Taiwan” would significantly impact the global economy. We expect the BRICS to further explore the notion of a common currency, and to try to enhance trade within the bloc.

The tensions and conflict in the Middle East could become inflamed and this could jeopardize safe transit through the strait of Hormuz, through which 20% of global oil supply passes. As things stand, there is limited marginal supply of oil, particularly outside of the Middle East, and an oil price averaging more than \$100 per barrel would offset the disinflationary forces. In terms of positioning, as of 30 December, the fund had a bullish tilt, with a 17% allocation to bullion and an overall split of 41% gold and 39% silver.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter UK Specialist Equity Fund

Market Review

UK equity markets had a strong start to 2024 but tracked roughly sideways during the second half of the year as investors digested domestic tax rises and uncertainty about the direction of interest rates. The UK economy skirted around recession at one point earlier in the year. However, the impact on quoted company earnings was limited to certain businesses and sectors. Inflation continued to moderate over the year, albeit not as rapidly as some had hoped. Political change was a significant factor in many of the world's largest democracies.

Portfolio Review

The fund outperformed its reference benchmark over the period. The outperformance was driven by alpha generation on both the long and short books. Highlights on the long book included Intermediate Capital (an alternative asset manager), Games Workshop (a tabletop gaming company), and Jet2 (a tour operator). The main detractors were YouGov (a market researcher) and 4Imprint (a promotional products firm). On the short book, an online grocer, a chemicals company, and a building materials distributor were the main positives. Against that were holdings in an investment platform (which was bid for), a payments business, and a brick manufacturer.

Investment Outlook

The global outlook for inflation, growth, and interest rates remains uncertain. As a result, the portfolio is well-diversified thematically. With a clear election result in the UK, inflation trending down in most of the world, and some signs of stabilising economic activity, we have a moderate tilt to cyclical, notwithstanding the incremental turbulence caused by recent tax rises. The fund is very modestly net long, with typical gross exposure. Individual holdings span a range of themes and sectors. As usual, we expect stock selection to be the primary driver of alpha generation in the months ahead.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Financials Contingent Capital Fund

Market Review

Macro data was the main impetus behind market movements during the first quarter. January ended with a somewhat cautious tone from the US Federal Reserve (Fed), with Chair Jay Powell highlighting the low likelihood of a rate cut at the March meeting. February data reinforced this narrative. The US job market continued to print strong movements in nonfarm payrolls, and a low unemployment rate and inflation numbers beat expectations.

Political volatility was a key theme in the second quarter instead. After several fairly quiet years, the European Union returned to the spotlight. Good results for right-wing parties in European elections caused French President Emmanuel Macron to call a snap election.

The summer months saw a short-term spike in volatility driven by increasing concerns over the potential for a US recession given the unexpected increase in the US unemployment rate (which jumped from 4.1% to 4.3%) and a much weaker than expected change in nonfarm payrolls. Combined with a few additional weak data prints, this was enough to trigger an equity selloff, a spike in the VIX index and credit spreads, and a material decrease in government bond yields.

The key event in September was the Federal Open Market Committee (FOMC) meeting. As was widely anticipated by markets, the Fed delivered its first rate cut. However, the 0.50% reduction in reference interest rates was bigger than what had initially been priced by market participants.

The re-election of Donald Trump as US president in November saw fixed income markets experience strong movements. The initial reaction was an increase in government bond yields, supported by the narrative of a more inflationary administration. As the situation cleared, however, markets started to digest the result and the initial spike in yields reversed, with the following weeks seeing sudden changes in sentiment.

Looking at major market movements over the year, government bond yields saw an increase in most major developed markets economies from the five-year maturity segment onwards and especially in the long end, with a clear steepening trend. UK rates were the key underperformer, posting the largest increase, but the movement was meaningful in the US as well, while rates in the Eurozone outperformed.

Excluding a few circumscribed moments of higher volatility, credit spreads were generally well behaved, with both investment-grade and high yield corporate credit spreads closing the year tighter. High yield credit spreads in Europe, in particular, saw a major tightening when compared to the US. Spreads on CoCos also saw a major tightening. Looking at major segments of the CoCo market, GBP bonds posted a stronger tightening vs. other currencies. Country-wise, UK, Spain and Italy saw a major tightening. On the other hand, France and Ireland were characterized by less meaningful movements. Spreads on senior bonds and Tier 2 securities also saw a sizeable tightening.

The major strengthening of the US dollar was instead the key topic across currency markets, as market participants repriced the overall path of interest rate cuts in the US.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Financials Contingent Capital Fund (continued)

Portfolio Review

The fund delivered a positive performance over the period but underperformed its benchmark index. Below we summarize key drivers of relative performance vs. the index over the period.

Key contributors

- Strong performance from some of our key overweight positions like UK building societies, Spanish and Italian banks
- Overweight exposure to Restricted Tier 1 securities
- Overweight exposure and security selection in the Tier 2 segment of our allocation
- Off-benchmark exposure to Senior bonds and Legacy Tier 1 instruments

Key detractors

- Lower exposure vs. the index to Additional Tier 1 securities
- Security selection within the Additional Tier 1 bucket, in particular lower exposure to some highly represented names like Barclays, Rabobank and HSBC
- Security selection in the Restricted Tier 1 segment of our allocation

Investment Outlook

The outlook for European sub debt and CoCos in 2025 remains strong on the back of very solid fundamentals, higher yields compared to other parts of fixed income (including corporate HY), and the positive technicals of robust flow momentum in the context of a favourable supply outlook (led by strong pre-financing activity in 2024). Macroeconomic risks remain, especially in the US given the new Trump administration's growth agenda. This could lead to inflation surprises, considering the potential impact of tariffs. It could result in volatility in US rates and therefore pose some risks to the senior part of the capital structure (as senior bank bonds are usually longer in duration and are hence more rate sensitive). Subordinated debt, and particularly the CoCos of European banks, should be more insulated from these risks. They remain attractive when compared to the very expensive valuations of US banks, especially at the level of preferred shares. The main downside factors are the threat of trade wars (which could lead to stagflation) and the risk of lower-than-expected growth in certain European countries (for example, France and Germany). Aside from this, European bank valuations should continue to benefit from a clearer direction for rates in Europe. This dynamic should result in CoCo total returns during 2025 being driven by a decline in rates, rather than just by further spread compression. In case of a worse than expected economic deterioration, the rate component (of total return) should provide a cushion to performance by compensating unexpected spread widening. Overall, while careful bond selection will be even more important in 2025, we remain very comfortable with the European CoCo sector. In our view, it should continue to provide very attractive risk-adjusted returns with contained volatility.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Emerging Markets Focus ex China Fund

Market Review

Emerging markets (EM) underperformed their developed market (DM) peers during 2024, with the MSCI Emerging Markets Index returning +8.0% compared with the +19.2% return for the DM-heavy MSCI All Countries World index (all USD returns).

Emerging markets tend to perform poorly in periods of USD strength, as was the case for large swathes of 2024. The first half of the year saw markets driven by the trajectory of US interest rate policy, with the higher-for-longer narrative of the US Federal Reserve (Fed) leading to a resilient USD. Generally positive results in the many EM government elections (such as India and Taiwan) supported the performance of the asset class in the face of these headwinds.

The latter part of the year saw two significant market events that cemented the EM/DM performance differential. Firstly, the announcement of a coordinated package of Chinese government stimulus measures at the end of September drove strong performance for Chinese equities (the MSCI China index rose +32% over a two-week period). This resulted in outflows away from other large EM countries (including India and Korea) as investors rebalanced towards China. But the rally was relatively short-lived. Chinese equities gradually gave back much of these gains as it became clear that the Chinese government had not reached the “whatever it takes” point necessary to jump-start Chinese consumption. Secondly, the re-election of Donald Trump caused US markets to rally strongly in anticipation of a reintroduction of Trump’s America-first agenda. This led to a strong rally in the USD, with the USD index up +7.1% in the final quarter of the year.

Portfolio Review

The relative underperformance was due to the fund’s quality-growth investment approach being out of favour.

Several positions contributed to performance over the period under review. Chief among these were Sun Pharmaceuticals, Karooooo, and Cisarua Mountain Dairy.

Sun Pharmaceuticals is the world’s fourth largest generic pharmaceutical manufacturer. Headquartered in India, the company has global operations, with an approximately equal split of revenue generated in India, the US, and across the rest of the world. The company is making good progress in moving up the value chain from pure generics manufacture into higher-value specialty pharmaceuticals. The stock benefited from FDA approval of the company’s alopecia treatment and a series of influential analyst rating upgrades.

Karooooo is a leading global software-as-a-service provider of mobility solutions for small, medium and large fleets, and an insurance analytics, security and safety provider for both businesses and consumers. Its CarTrack software helps businesses improve safety, optimise routes and fuel usage, and reduce insurance and compliance costs. The company continues to report good results and has benefitted from the founder’s decision to delay the long-trailed sell-down of his holding.

Cisarua Mountain Dairy (Cimory) is an Indonesian dairy producer. Dairy consumption in Indonesia is low but growing rapidly. While a large proportion of the population is lactose intolerant, Indonesians have gravitated strongly towards yoghurt, which has a lower level of lactose. Cimory is the dominant producer of yoghurt in Indonesia. The company’s moat is its innovative product development. This helps it to maintain its premium positioning and pricing power as it broadens out its premium offering across other fresh and chilled food segments. The company reported decent results and benefitted from rating upgrades from a number of analysts.

The main detractors from performance were Localiza, Regional, and Raia Drogasil.

Investment Managers' Reports (continued)

Investment Manager – Jupiter Investment Management Limited

Jupiter Global Emerging Markets Focus ex China Fund (continued)

Portfolio Review (continued)

Localiza is Brazil's largest car rental company. The affordability of car rental has improved dramatically in recent years as Localiza has reduced prices. The company is also benefiting from the rise in ride-sharing services, such as Uber, providing an opportunity for drivers to rent their vehicle rather than own it outright. In 2022, the business completed its merger with the number two market player, Unidas, giving the combined business more than 50% of the market. We are excited by the growth opportunity ahead. The company reported good results, but the shares fell, in line with the wider market, following a jumbo rate hike by the Brazilian central bank.

Regional is a fast-growing Mexican regional bank. Focussed on the high-growth and high-margin SME segment, Regional continues to win share from incumbents due to its extensive branch network. The bank's conservative lending standards have allowed it to maintain low non-performing-loan numbers, while growing its book value-per share by +13% annually over the past decade. Like many Mexican names, the shares struggled after the landslide election of left-leaning Claudia Sheinbaum. The market is concerned the size of its majority may allow the new government to pass anti-market reforms.

Raia Drogasil, a Brazilian pharmacy operator, is the largest drug and cosmetic retailer in Brazil, with almost 3,000 stores across all 27 states. As a trusted supplier, Raia has been able to take share from the informal "mom and pop" pharmacy operators, which still make up more than two-thirds of the market, as well as benefitting from significant industry growth as new pharmacies open in underserved areas. Similar to our other Brazilian holdings, the shares fell following the Brazilian central bank's jumbo rate hike.

Investment Outlook

For much of 2024, we wrote about how emerging markets were 'waiting for Godot', namely Fed Chair Jay Powell, and specifically his decision to cut US interest rates. As investors in non-USD assets (emerging markets equities) and longer duration assets (due to the quality growth style we invest with), we have faced a double headwind. September's rate cut by the Fed is the first step in what we think is the most exciting coalescence of factors to support EM equity performance since the early 2000s. These factors comprise: (1) the US avoids a recession; (2) it continues to print relatively low growth expectations in an environment where (3) global interest rates remain steady or begin to fall; and we see (4) a weakening USD. Against this backdrop, the relatively higher growth available to investors in EM becomes more obvious, leading to increased allocations to the asset class and greater support for asset prices.

However, there is one small, orange fly in the ointment: Donald Trump. The Trump presidency will result in further support for America-first policies by means of tariffs, the promotion of locally sourced goods, and a nationalistic mindset. This environment is generally bad for exporting nations and should be negative for emerging markets in aggregate. However, like most things related to Trump, the devil is in the detail. For instance, China and Mexico are likely to be notably negatively impacted, while India and Taiwan are likely to fare relatively better. We believe active investment management is crucial for navigating these choppy waters. Relative to the benchmark, our fund is significantly underweight China and has no exposure to Mexico but is overweight Taiwan and has a neutral weight in India. Our high-quality, active approach should stand the fund in good stead for any potential Trump-related volatility in early 2025.

Looking further into the future, we think the world could be on the edge of an epochal shift in economic growth. Over recent decades, growth has come from two sources: China's export-fuelled growth and US growth fuelled by access to cheap shale energy and cheap money. Integration and globalisation have meant that all investors have benefitted from these tailwinds, but investors have also been subject to their downsides. Over the past three years, however, we have seen a paradigm shift. We no longer live in the same globalised world that we did. In particular, the West's sanctions against Russia have made many non-Western companies and individuals wary of being caught out by the Western system. This has driven a splintering of global spheres of influence, which Trump 2.0 will only reinforce. Direct trade, bypassing the US dollar (USD), is becoming increasingly common, with regular reports of direct commodity transactions in Chinese Reminbi and Indian Rupees.

Investment Outlook (continued)

In our view, this means that global trade and growth may be less dependent on these two nations going forward, and more dependent on cross-border investment between countries. Over the longer term, this could be very positive for EM. Already the share of trade between EM countries is more than 40% of total EM exports. Emerging markets constitute the world's last great engines of growth. They have vast, young populations that are well educated and entrepreneurial. These countries are rapidly growing their wealth. They benefit from in-bound and domestic capital investment. And they are increasingly run by fiscally conservative, stable governments. Greater integration of EM economies helps support this growth and reduces reliance on the slower growing developed world. Investing in emerging markets should be a significant long-term allocation for any investor. Nevertheless, we think right now may be the best confluence of factors for investing that we have seen in a decade.

Jupiter Systematic Consumer Trends Fund

Market Review

Global equity markets moved higher in 2024 in what was another strong year for risk assets. Developed market central banks began the journey to normalise interest rate levels, although this was not as smooth as anticipated, with inflation stickier than expected. In light of rising yields, global investment grade bonds delivered a negative return in 2024.

US equities led markets higher as US mega cap tech dominated for the second year in a row. Returns in the US were skewed towards the 'Magnificent 7' artificial intelligence stocks, although there was some broadening out in market returns. Despite some wavering over the summer, US growth continued, pushed higher by the election of Donald Trump, who investors anticipate will deregulate the market and further support growth.

Japan also performed strongly in local currency terms, although returns were dragged down by the strong US dollar in USD terms. The region saw ongoing corporate reforms, coupled with continued optimism around the end of deflation and higher interest rates. This, combined with a weak yen, led to a strong year for Japanese equities.

Sentiment in Europe was not positive, and this was reflected in returns in the region. Weak economic data, especially within the manufacturing sector, was compounded by political instability, especially in France and Germany, leading the region to underperform other developed markets. Meanwhile, UK equities marginally outperformed Europe as the economy recovered from 2023 lows. However, the Labour party's Autumn budget dampened business sentiment, with news of larger-than-expected tax increases and national insurance contributions.

Broadly speaking, emerging markets delivered a single-digit return, helped by strength in India and Taiwan. Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund delivered a strong return in 2024, outperforming its benchmark. All five of the stock selection criteria within the alpha model added to positive relative performance. Market Dynamics provided the largest return in what has been a very momentum-driven market. Company Management also contributed strongly, as investors seek high quality management teams in times of uncertainty. At a regional level, Europe, North America, and Asia Pacific all added to returns. Japan was the only notable detractor. Stock selection drove all of the positive relative returns in the year, with stock picking within Consumer Staples the largest contributor.

Investment Outlook

As part of our investment process, the impact of varying market conditions on investor behaviour is captured by our market environment analysis. It includes measures of market sentiment as well as of the risk environment.

Generally speaking, regions became slightly more optimistic over the period, while the risk environment was less optimistic over the period. North America remained in the optimistic, high risk space for the whole year. Japan began and ended the period in the medium risk, optimistic space, with not much movement throughout. The environments for Asia Pacific, Europe, and Emerging Markets diverged throughout the year. The three regions began the period close together in neutral sentiment and a medium/high risk environment. Europe changed the least, becoming slightly less risky, but remaining in the neutral sentiment space. Meanwhile, Asia Pacific moved to a higher risk environment, yet optimism for the region improved. Finally, the risk environment for Emerging Markets decreased substantially from medium to low risk, with sentiment remaining neutral.

Along with our assessment of the market environment, we also estimate investors' risk appetite. This indicator evaluates investors' willingness to hold cheaper assets with riskier cashflows (value), versus more certain cashflows from more expensive assets (quality). Throughout the year, risk appetite shifted. It started the year at medium levels and peaked in May 2024, before falling close to 12 month lows in August. By the end of the period, global risk appetite had increased once again, reflecting the preference of market participants for riskier value stocks versus safer quality names.

Chinese equities were negatively impacted by weak consumer confidence and the ongoing property crisis. However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund marginally underperformed its benchmark in 2024. Within the alpha model, two of the five stock selection criteria added positively to relative returns while the remaining three criteria detracted from relative performance. The Company Management stock selection criteria provided the largest contribution to returns, as investors rewarded companies with high quality management teams. Sustainable Growth also added a small positive to overall returns. Meanwhile, Sentiment and Market Dynamics detracted significantly. At a regional level, all of the negative return came from North America, while Asia Pacific, Europe and Japan added positively. While stock picking was negative, particularly within Healthcare and Financials, sector allocation was positive. The net effect was a small negative performance relative to the benchmark for 2024.

However, the Chinese government's attempt to support the economy, by means of a whole host of stimulus measures, pushed equities higher in the second half of the year.

Portfolio Review

The fund underperformed its benchmark in 2024. Within the alpha model, two of the five stock selection criteria added positively to relative returns while the remaining three criteria detracted from relative performance. The largest drivers of negative returns were the Sentiment and Market Dynamics stock selection criteria. This was largely due to the fund's underweight to many of the Magnificent 7 names which are very expensive, and which drove the majority of returns over the year. Dynamic Valuation also detracted from overall returns while Company Management and Sustainable Growth added positively. In line with the outperformance of the Magnificent 7, North America detracted significantly. Japan was the only region to provide a positive return. Stock picking was particularly weak within Healthcare, Financials, and Communication Services.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JUPITER ASSET MANAGEMENT SERIES PLC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Jupiter Asset Management Series Plc ('the Company') for the year ended 31 December 2024, which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 3. The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of its profit for the year then ended;
- have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JUPITER ASSET MANAGEMENT SERIES PLC

Other information

The directors are responsible for the other information. The other information comprises the information included in the Directory, General Information, Directors' Report, Report of the Depositary to the Shareholders, Investment Advisers' / Managers' Reports, Portfolio of Investments (unaudited), Significant Purchases and Sales (unaudited), Price Record (unaudited), Total Expense Ratios (unaudited), Sub-Fund Performance (unaudited), Events during the Financial Year (unaudited) and Supplementary Information (unaudited), other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JUPITER ASSET MANAGEMENT SERIES PLC

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 19, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

David Bennett
for and on behalf of
Ernst & Young Chartered Accountants and Statutory Audit Firm

Dublin

Notes to the Financial Statements for the financial year ended 31 December 2024

1. Reporting Entity

Jupiter Asset Management Series Plc (the “Company”) is an open-ended investment company with variable capital organised under the laws of Ireland. The Company is organised in the form of an umbrella fund insofar as the share capital of the Company will be divided into different series of Shares with each series of Shares representing a portfolio of assets which will comprise a separate fund (each a “Sub-Fund”). As at 31 December 2024, the Company has 22 Sub-Funds in operation (31 December 2023: 23 Sub-Funds).

2. Basis of Preparation

The Company is incorporated in Ireland and authorised by the Central Bank of Ireland (“Central Bank”). The financial statements are prepared in accordance with Financial Reporting Standard 102 applicable in the UK and Republic of Ireland (“FRS 102”) issued by the Financial Reporting Council (“FRC”) in September 2015 and promulgated by Chartered Accountants Ireland (“ICAI”), Irish statute comprising the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (“the UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

The format and certain wordings of the financial statements have been adapted from those contained in the FRS 102 and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company’s business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 “Statement of Cash Flows” of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

Measurement Convention

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss. The debt instruments are held in the financial statements at an amount that includes accrued interest.

Going Concern

The financial statements of the Company have been prepared on the going concern basis.

3. Significant Accounting Policies

The principal accounting policies and estimates applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

a. Estimates and Judgements

The preparation of financial statements in conformity with FRS 102 requires management to make judgements, estimates and assumptions that may affect the reported amounts of assets, liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from others. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgement in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in Note 11.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

b. Foreign Currency Translation

Functional and Presentation Currency of the Company

The Company has adopted United States Dollar ("USD") as its presentation currency as a substantial part of the Company's assets and liabilities are denominated in USD.

Functional and Presentation Currency of the Sub-Funds

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which the respective Sub-Fund operates (the "functional currency"). The functional currency of each Sub-Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors' base and conditions.

The functional and presentation currency of the Sub-Funds are USD, Euro ("EUR"), or Pound Sterling ("GBP") as noted in the Statement of Financial Position.

Transactions and Balances

Transactions in foreign currencies are translated to the Sub-Fund's functional currency at the foreign exchange rate at the date of the transaction. Assets and liabilities in foreign currencies are translated into the functional currency at the rates prevailing at the financial year end date.

Translation of Sub-Funds for the purposes of calculating the Company values

For the purposes of calculating the overall value of the Company, for all Sub-Funds where USD is not the functional currency, all assets and liabilities in the Statement of Financial Position are translated to USD at financial year end exchange rates and all income and expenses are translated to USD using an average rate of exchange for the financial year.

c. Financial Instruments

The Company has chosen to implement the recognition and measurement provisions of IFRS 9 and only the disclosure requirements of Sections 11 and 12 of FRS 102.

The majority of the Company's financial instruments are classified in categories that require measurement at fair value through profit or loss, with the basis for arriving at this position being set out below.

Classification

The Company classifies financial assets and financial liabilities into the following categories:

Financial assets at fair value through profit or loss:

- Held for trading: transferable securities, investment funds and financial derivative instruments.

Financial assets at amortised cost:

- Loans and receivables: cash and cash equivalents, due from broker, collateral cash, deposits with credit institutions and other assets.

Financial liabilities at fair value through profit or loss:

- Held for trading: financial derivative instruments.

Financial liabilities at amortised cost:

- Other liabilities: due to broker, bank overdraft and other liabilities and Net Assets Attributable to Redeemable Participating Shareholders.

A financial instrument is classified as held for trading if:

- it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- on initial recognition, it is part of a portfolio that is managed together and for which there is evidence of a recent pattern of short-term profit taking; or
- is a derivative, other than a designated and effective hedging instrument.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

c. Financial Instruments (continued)

Recognition and Measurement

Financial assets and financial liabilities at fair value through profit or loss are recognised as of the day the transaction takes place (trade date), the date on which the Sub-Fund commits to purchase or sell the asset. Investments are initially recognised at fair value, and costs for all financial assets and financial liabilities carried at fair value through profit or loss are expensed as incurred. Other financial assets and financial liabilities are recognised on the date in which they originated.

Financial assets and financial liabilities not at fair value through profit or loss are initially recognised at fair value.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets and liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate, with other assets being measured using effective interest rate and less impairment losses, if any. Financial liabilities arising from the redeemable shares issued by the Company are carried at the redemption amount representing the investors' right to a residual interest in the Company's assets.

Fair Value Measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Sub-Fund has access at that date. The fair value of a liability reflects its non-performance risk.

i) Transferable Securities

When available, the Sub-Funds measure the fair value of an investment using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. Sub-funds measure instruments quoted in an active market at a last traded price, without any deduction for estimated future selling cost. The last traded price provides a reasonable approximation of exit price.

If there is no quoted price in an active market, then the Sub-Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

ii) Investment Funds

The fair value of investment funds is based on the underlying fund administrator's calculation of the net asset value per share (market value of investment fund's assets less liabilities divided by the number of shares) which will be the latest bid price published by the investment funds taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value. The fair value of any investments in closed-ended investment funds is based on the bid prices available on the principal market for such security at the valuation date taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value.

iii) Financial Derivative Instruments

Currency Exchange Contracts

The Sub-Funds may employ currency exchange contracts to purchase or sell a specific currency at a future date at a price set at the time of the contract. The base currency of each Sub-Fund is either GBP, EUR or USD but securities in a Sub-Fund may be denominated in a large range of currencies. Consequently, a Sub-Fund may enter into currency exchange contracts to hedge against exchange rate risk. Performance may be significantly influenced by movements in foreign exchange rates because currency positions held by a Sub-Fund may not correspond with the currency of the securities invested in. The unrealized gain or loss on open currency exchange contracts is calculated as the difference between the contract price and the spot price as at financial year end. Any changes in fair value are recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

c. Financial Instruments (continued)

Fair Value Measurement (continued)

iii) Financial Derivative Instruments (continued)

Futures contracts

Futures contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Daily fluctuations in the value of a futures contract are recorded for financial reporting purposes as unrealised gains or losses by the Sub-Funds and are recorded as a realised gain or loss when the position is closed.

Options

A Sub-Fund may purchase and sell (write) call and put options on securities, securities indices and foreign currencies traded on a national securities exchange or in an over-the-counter market.

When a Sub-Fund purchases a call or a put option, a premium is paid by the Sub-Fund. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses. The option is subsequently marked-to-market to reflect the fair value of the option purchased, which is reported within financial assets at fair value through profit or loss on the Statement of Financial Position for each relevant Sub-Fund.

The over-the-counter options are valued at close of business on the dealing day at the settlement price as provided by the counterparty/broker and the values are independently valued, at a minimum, weekly. The fair value of exchange traded options are based upon their quoted daily settlement prices on the relevant exchange. In the event of it being impossible or incorrect to carry out a valuation of a specific investment in accordance with the valuation rules, or if such valuation is not representative of a security's fair market value, the Directors are entitled to use other generally recognised valuation methods in order to reach a proper valuation of that specific instrument, provided that such method of valuation has been approved by the Depositary.

Swap contracts

Swap contracts are carried at fair value based upon the fair value of the underlying assets, the risk associated with the underlying assets, and any additional provisions of the derivative contract.

Interest rate swaps ("IRSs") are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate. IRSs are included in assets when the fair value is positive, and in liabilities when the fair value is negative, unless there is the legal ability and intention to settle the asset and liability on a net basis. Revenues/payments arising on IRSs are included in the Net gain/loss on financial assets at fair value through profit or loss in the Statement of Comprehensive Income.

Credit default swap ("CDS") and Credit Default Index swap ("CDX") contracts are valued at fair value based on a pricing methodology utilising certain factors which include the credit risk of the reference obligations of the underlying issuers, as well as the specific terms of the contract. Certain CDS and CDX contracts entered into may include upfront fees that are paid by the buyer to the seller of the CDS and CDX contracts at the date of transaction.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

c. Financial Instruments (continued)

Fair Value Measurement (continued)

iii) Financial Derivative Instruments (continued)

Swap contracts (continued)

Such fees are reported as unrealised gains or losses in the Statement of Financial Position and as net gains and losses in the Statement of Comprehensive Income. These upfront payments represent the amounts paid or received when initially entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and the prevailing market conditions and are included as realised gains or losses on the Statement of Comprehensive Income upon termination or maturity of the swap.

Contracts for difference

Contracts for difference may be used either as a substitute for direct investment in the underlying equity or fixed income security or as an alternative to and for the same purposes as futures and options. Changes in the value of open contracts for difference are recognised as unrealised gains or losses on contracts for difference and are included in net gain/loss on financial assets and financial liabilities at fair value through profit and loss in the Statement of Comprehensive Income, until the contracts are terminated, at which time realised gains and losses are recognised as a realised gain or loss and included in net gain/loss on financial assets and financial liabilities at fair value through profit and loss in the Statement of Comprehensive Income. Unrealised gains or losses on contracts for difference are shown in the Statement of Financial Position.

Amortised cost measurement

Financial asset and liabilities other than those classified at fair value through profit or loss are held at amortised cost. The amortised cost of the financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the accumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

iv) Cash and Cash Equivalents/Due to/from Broker

Cash amounts held comprise of current deposits in banks which are readily available. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Due from Broker is an amount which is made up of margin cash, spot contracts and collateral pledged. The margin cash and cash collateral is held by or due to brokers for open futures contracts and represents the exchange traded futures contracts margin deposits. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is as such restricted and therefore reported separately to the unrestricted cash on the Sub-Fund's Statements of Financial Position.

Sub-Fund's assets may be deposited by or received by the Sub-Fund for collateral purposes with counterparties in respect of OTC financial derivative instruments held by the Sub-Fund. Such assets remain in the ownership of the relevant Sub-Fund and are recorded as an asset on the Statement of Financial Position. In relation to cash received as collateral this will be recorded as an asset and a related liability to repay the collateral will be recorded as a liability on the Statement of Financial Position.

Investments pledged by the Sub-Funds as collateral are recognised at fair value in the relevant Sub-Fund's Portfolio of Investments and are referenced accordingly at the base of the Portfolio of Investments. Securities received by the Sub-Funds as collateral from counterparties do not form part of the Net Asset Value of the Sub-Funds and are disclosed at the end of the relevant Portfolio of Investments.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

c. Financial Instruments (continued)

v) Other Assets and Other Liabilities

Other assets and liabilities represent amounts receivable and payable respectively, for transactions contracted for but not yet paid for by the end of the reporting period. These amounts held relate to subscription and redemption monies and dividend transactions. Other assets and liabilities are primarily non-interest bearing and short term in nature.

Fund asset cash balances, including an appropriate equal and opposing liability, are reflected at a Sub-Fund level on the Statement of Financial Position. The fund asset cash receivables are included in the Other Assets and fund asset cash payables are included in the Other Liabilities on the Statement of Financial Position respectively. They represent umbrella cash collection account balances attributable to the individual Sub-Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Sub-Fund, as Sub-Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the Statement of Financial Position when, and only when, the Sub-Fund has a legally enforceable right to offset the recognised amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The Company's financial assets and financial liabilities are not subject to offsetting, enforceable master netting arrangements and similar agreements. Income and expenses are presented on a net basis for gains and losses from financial instruments at fair value through profit or loss and foreign exchange gains and losses.

Derecognition

Each Sub-Fund derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the sub-fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the Statement of Comprehensive Income. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

d. Cross Investments

During the financial years ended 31 December 2024 and 31 December 2023 a number of the Sub-Funds invested in other Sub-Funds in the Company (the "Cross Investments"). The fair value of these investments as of 31 December 2024 is disclosed within each relevant Sub-Fund's Portfolio of Investments. For details on how these are eliminated at a Company level, please refer to the Related Parties note.

For the purposes of producing the combined Company total financial statements, investments by Sub-Funds within the Company in the units of other Sub-Funds within the Company, also known as "Cross Investments" must be eliminated in order to prevent double counting.

The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

e. Dividend income/expense

Dividend income arising on the underlying equity investments of the Company is recognised as income of the relevant Sub-Fund on the ex-dividend date. Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

The Sub-Funds incur expenses on contract for differences equal to the dividends due on these securities. Such dividend expense is recognised in the Statement of Comprehensive Income as dividend expense on contract for differences when the shareholders' right to receive payment is established.

f. Interest income/expense

Interest income and interest expense recognised in the Statement of Comprehensive Income comprise interest on financial assets and liabilities measured at amortised cost calculated using the effective interest rate method. When calculating the effective interest rate, the Sub-Funds estimate future cash flows considering all contractual terms but not future credit losses. Interest received or receivable and interest paid or payable are recognised in the Statement of Comprehensive Income and included in other income and operational expenses, respectively.

Interest income from bonds and swap contracts is recognised in the Statement of Comprehensive Income as part of net gain/loss on financial assets/liabilities at fair value through profit or loss.

g. Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis. Expenses arising on the disposal of investments are deducted from the disposal proceeds.

h. Transaction Costs

Transaction costs are incurred on the acquisition or disposal of financial assets or liabilities at fair value through profit or loss. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. They include fees and commissions paid to agents, advisers, brokers or dealers. Transaction costs, when incurred, are expensed immediately in the Statement of Comprehensive Income.

i. Realised Gains and Losses

Net realised gains and losses from financial instruments at fair value through profit or loss include all realised gains and losses and coupon interest earned from debt securities held by the Sub-Funds. Realised gains and losses on sales of investments are calculated based on the average cost of the investment in local currency and are included in net gain/loss on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

j. Unrealised Gains and Losses

Unrealised gains and losses on investments are the difference between the average cost of the investment and its value at the reporting period end and are included in net gain/loss on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

3. Significant Accounting Policies (continued)

k. Redeemable Participating Shares

In accordance with the Prospectus, the Company issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating Shares can be put back into the Sub-Fund at any time for cash equal to a proportionate share of the Sub-Fund's net asset value ("NAV"). The redeemable participating share is carried at the redemption amount that is payable at the year end date if the holder exercises the right to put the share back into the Sub-Fund.

Save as may be otherwise described in the Supplement for the relevant Sub-Fund the Net Asset Value per redeemable participating share is determined as at 12 noon GMT on each valuation day in accordance with the provisions set out in the Prospectus.

An anti-dilution levy ("ADL") is applied daily where the pending deals are over a fixed percentage of the NAV. The ADL is included within Other Income in the Statement of Comprehensive Income.

l. Taxation

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

m. Borrowing Costs

Borrowing costs are recognised as an expense in the financial year in which they are incurred.

4. Taxation

The Company qualifies as investment undertaking as defined in Section 739B of the Taxes Consolidated Act 1997.

On that basis, Irish tax is not chargeable to the Company on its income or capital gains.

Irish tax can arise on the happening of a "chargeable event" in the Company. A chargeable event includes any payments of distributions to Shareholders, any encashment, repurchase, redemption, cancellation or transfer of Shares and any deemed disposal of Shares for Irish tax purposes arising as a result of holding Shares in the Company for a period of eight years or more. Where a chargeable event occurs, the Company is required to account for the Irish tax thereon.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

4. Taxation (continued)

A gain on a chargeable event may not arise in respect of:

- (i) any transactions (which might otherwise be a chargeable event) in relation to Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) a transfer of Shares between spouses and any transfer of Shares between spouses or former spouses on the occasion of judicial separation and/or divorce; or
- (iii) an exchange by a Shareholder, effected by way of arm's length bargain where no payment is made to the Shareholder, of Shares in the Company for other Shares in the Company; or
- (iv) an exchange of Shares arising on a qualifying amalgamation or reconstruction of the Company with another Irish investment fund.
- (v) a Shareholder who is not an Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company; or
- (vi) a Shareholder who is an exempt Irish resident and it (or an intermediary acting on its behalf) has made the necessary declaration to that effect.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes or capital gains taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

The Company may be subject to taxes imposed on realised and unrealised gains on securities of certain foreign countries in which the Company invests. The foreign tax expense, if any, is recorded on an accrual basis and is included in capital gains taxes in the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in other liabilities in the Statement of Financial Position.

Under Brazilian, Indian and Pakistani income tax laws, capital gains tax is payable on the sale of assets, investments and capital accumulation. Included in the capital gains tax expense in the Statement of Comprehensive Income is USD 9,841 (2023: USD 140,702), included in other liabilities in the Statement of Financial Position is a payable of USD 69,325 (31 December 2023: USD 260,249).

5. Related Parties

Related Party Transactions

Jupiter Asset Management (Europe) Limited is the Manager and Distributor of the Company. Jupiter Investment Management Limited is the Investment Manager. The Manager, the Investment Manager and all Investment Advisers are listed in the Directory.

Please see Note 9 relating to the Management Fee paid by the Company for the financial year to the Manager. The Manager is responsible for the payment of the investment management fee to the Investment Manager out of the Management Fee.

Please see Note 9 relating to the Performance Fees paid by the Company to the Investment Manager.

The Directors are entitled to a fee by way of remuneration for their services. The aggregate amount of Directors' remuneration in any one financial year shall not exceed EUR 60,000 for each of the Directors, inclusive of sub-committee and chair fees. The Directors may also be reimbursed for reasonable reimbursements and out of pocket expenses properly incurred by them in attending and returning from meetings of the Board of Directors of the Company or in connection with the business of the Company. These are paid by the Company. Total Directors' fees were USD 113,338 for the financial year ended 31 December 2024 (2023: USD 113,665) and the amount payable at the financial year ended 31 December 2024 was USD Nil (31 December 2023: USD Nil). The Directors were reimbursed USD 1,336 for out of pocket expenses (2023: USD Nil) of which none was payable at year end (31 December 2023: Nil).

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

5. Related Parties (continued)

Related Party Transactions (continued)

Jasveer Singh, as an employee of Jupiter Asset Management Limited, was not entitled to receive a Director's fee or other compensation in connection with his role as a Director of the Company.

Distribution fees are also regarded as related party transactions, details of these transactions are disclosed in Note 9.

At the financial year end, related parties have Shareholdings in the Company with a value of USD 117,654,208 (at 31 December 2023: USD 92,317,352). Subscriptions during the financial year with related parties amounted to USD 52,267,895 (2023: USD 67,889,147). Redemptions during the financial year with related parties amounted to USD 32,784,959 (2023: USD 55,818,456).

Significant Shareholders

During the financial year, there were no investors holding greater than 20% of the net asset value of the Company (31 December 2023: Nil).

As at 31 December 2024, the following investors accounts held greater than 20% of the Shares of the specific Sub-Funds of the Company listed below:

Sub-Fund	Investor	% Shareholding
Jupiter Asia Pacific Income Fund (IRL)	Jupiter Asset Management Limited	36.70%
Jupiter Merian North American Equity Fund (IRL)	Clearstream Banking S.A.	20.22%
Jupiter Global Emerging Markets Focus Fund	Fundsettle EOC Nominees Ltd	20.24%

Dealings with Connected Persons

Regulation 43 of the Central Bank UCITS Regulations “restrictions of transactions with connected persons” states that “a responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm’s length; and b) in the best interest of the unit holders of the UCITS”.

As required under UCITS Regulations 81(4), the Directors as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by UCITS Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by UCITS Regulation 43(1).

6. Share Capital

Subscriber Shares

The authorised share capital of the Company is EUR 38,082 (31 December 2023: EUR 38,082) represented by 30,000 (31 December 2023: 30,000) Subscriber Shares of no par value and 500,000,000,000 (2023: 500,000,000,000) redeemable participating shares of no par value. The Company has repurchased all but one of the Subscriber Shares, held by Jupiter Asset Management (Europe) Limited, the Management Company. The Subscriber Shares entitle the Shareholders holding them to attend and vote at all meetings of the Company. The Subscriber Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the Company, this entitlement shall be limited to the amount subscribed and any accrued income thereon.

Redeemable Participating Shares

The creation of the various share classes is intended to offer greater flexibility to both retail and institutional clients. Each share class may also be distinguished by the Management Fee, initial charge, contingent deferred sales charge and redemption charges applicable and the minimum subscription requirements. Each share class in each Sub-Fund has equal voting, distribution and liquidation rights in proportion to the number of the Shares held in that Sub-Fund.

The net assets attributable to holders of redeemable participating shares are at all times equal to the Net Asset Value of the Company. The redeemable participating shares can be redeemed at the option of the Shareholder.

Redeemable participating shares may be redeemed on each dealing date or such other date or dates as the Board of Directors shall from time to time determine (Valuation Day) at the Net Asset Value per Share.

Capital Management

The Company is an externally managed UCITS. The Manager is subject to externally imposed minimum capital requirements by the CBI.

The Company considers redeemable participating shares as capital. Redeemable participating shares issued by each Sub-Fund provide a shareholder with the right to request redemption of their shares for cash, at a value proportionate to the total value of all redeemable participating shares, in a Sub-Fund at each redemption date and are classified as liabilities.

The Company’s objective in managing redeemable participating shares is to ensure a stable base to maximise returns to shareholders and to manage liquidity risk arising from redemptions.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

6. Share Capital (continued)

Share Movement

9. Fees and Expenses

Operating Expenses

The Company is responsible for all normal operating expenses other than those fees borne by the Manager as outlined in Note 7, including audit fees, stamp duties and charges incurred on the acquisition and realisation of investments. General operating expenses which are not allocable to a specific Sub-Fund are borne pro rata. The audit fees as shown in the Statement of Comprehensive Income include Value Added Tax.

Operating Fee

The five systematic funds, Jupiter Systematic Consumer Trends Fund, Jupiter Systematic Demographic Opportunities Fund, Jupiter Systematic Disruptive Technology Fund, Jupiter Systematic Healthcare Innovation Fund and Jupiter Systematic Physical World Fund (the "Systematic Sub-Funds") which launched in December 2023 agreed a fixed operating fee ("Operating Fee") with the Manager whereby the Manager has agreed to compensate all Annual Expenses (as defined below) charged to the Systematic Sub-Funds in exchange for an operating fee.

The Operating Fee will be set yearly as a percentage of the Net Asset Value of each Systematic Sub-Fund and is aligned with the level of the actual Annual Expenses of the Systematic Sub-Fund estimated for each year. The Operating Fee may, however, be adjusted in the case of a material change in the Net Asset Value of the Systematic Sub-Fund. The Operating Fee shall not exceed 0.20% per annum of each of the Systematic Sub-Fund's Net Asset Value. The Operating Fee shall be calculated and accrued at each Dealing Day in the Base Currency of each Systematic Sub-Fund and shall be payable monthly in arrears.

"Annual Expenses" means all fees, costs and expenses connected with the establishment, management and operation of the Sub-Fund. Such fees, costs and expenses include, but are not limited to (i) the fees and expenses (including out-of-pocket expenses) of the service providers to the sub-funds, including the Depositary and the Administrator; (ii) Directors fees and out-of-pocket expenses; and (iii) operational expenses, to the extent that such expenses are not excluded.

"Annual Expenses" shall not, however, include (i) the fees and expenses of the Manager and its out-of-pocket expenses; (ii) any taxation (including stamp duty) to which the sub-funds may be liable; (iii) exchange fees; (iv) commissions; (v) brokerage fees; (vi) settlement and clearing fees; (vii) other expenses incurred with respect to the sub-funds' investments and; (viii) any extraordinary or exceptional costs and expenses as may arise from time to time such as material litigation in relation to the Company or the Sub-Funds. The foregoing fees, costs and expenses, where arising will be borne by the Company or the Sub-Funds as applicable.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses

Management Fee

The Manager is entitled to receive a percentage fee (the “Management Fee”) in respect of each Class of Share. The Manager is responsible for the payment of the investment management fee to the Investment Manager out of the Management Fee.

The Company pays to the Manager, in arrears, a monthly Management Fee. The amount of the Management Fee for each of the Classes of Shares of each Sub-Fund is set out in the Supplement for the relevant Sub-Fund. The rates applicable on active share classes at the at the financial year end ended 31 December 2024 are detailed in the table below. The rates are expressed as a percentage per annum of the relevant Sub-Fund’s Net Asset Value. Management Fee charges are structured in such a way that there shall be no double charging of the Management Fee as a result of a Sub-Fund investing in other Sub-Funds of the Company.

Performance Fee

Jupiter Merian North American Equity Fund (IRL)

The Investment Manager may be entitled to a performance fee out of the Jupiter Merian North American Equity Fund (IRL)'s assets. With respect to the Jupiter Merian North American Equity Fund (IRL), the performance fee is only applicable to the following share classes: Class P1 (USD) Accumulation, Class P1 (GBP) Hedged Accumulation, Class P1 (SGD) Hedged Accumulation, Class P1 (CHF) Hedged Accumulation, Class P1 (EUR) Hedged Accumulation, Class P2 (USD) Accumulation, Class P2 (GBP) Hedged Accumulation, Class P2 (SGD) Hedged Accumulation Class P2 (EUR) Hedged Accumulation, Class P2 (GBP) Income, Class P2 (USD) Income and Class P2 (CHF) Hedged Accumulation.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period "Performance Period of the Jupiter Merian North American Equity Fund (IRL)". A Performance Period of Jupiter Merian North American Equity Fund (IRL) will comprise of each successive twelve-month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period. The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period.

³ Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Merian North American Equity Fund (IRL) (continued)

In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

“The Benchmark” is the MSCI North America Index (Ticker: MXNA).

“Valuation Point” shall be 12.00 noon. (Irish time) on each Dealing Day.

“The Benchmark Performance” in respect of a Performance Period of the Jupiter Merian North American Equity Fund (IRL), is the difference between the level of the Benchmark calculated at the Valuation Point on the last Business Day of the previous Performance Period of the Jupiter Merian North American Equity Fund (IRL) and the level of the Benchmark calculated at the Valuation Point on the last Business Day of the relevant Performance Period of the Jupiter Merian North American Equity Fund (IRL), expressed as a percentage.

The “Share Class Performance” in respect of the first Performance Period of the Jupiter Merian North American Equity Fund (IRL) is the difference between the opening Net Asset Value per Share and the Net Asset Value per Share at the Valuation Point on the last Business Day of the Performance Period of the Jupiter Merian North American Equity Fund (IRL), expressed as a percentage. For each Performance Period of the Jupiter Merian North American Equity Fund (IRL) thereafter, the Share Class Performance is the difference between the Net Asset Value per Share at the Valuation Point on the last Business Day of the previous Performance Period of the Jupiter Merian North American Equity Fund (IRL) and the Net Asset Value per Share at the Valuation Point on the last Business Day of the relevant Performance Period of the Jupiter Merian North American Equity Fund (IRL), expressed as a percentage.

Where a fair value adjustment has been made to the Net Asset Value per Share of the Jupiter Merian North American Equity Fund (IRL) then this will be excluded for the purposes of the calculation of the Performance Fee.

For hedged share classes the Benchmark will be the relevant hedged version of the Index. For all share classes, the Benchmark will be priced at the Benchmark valuation point according to the Benchmark provider’s pricing methodology. The exchange rates used in calculating the net asset values for all share classes will be the prevailing exchange rates at the Company’s Valuation Point.

The Benchmark is consistent with the Jupiter Merian North American Equity Fund (IRL)’s investment strategy. Information on the Jupiter Merian North American Equity Fund (IRL)’s past performance measured against the Benchmark is included in the relevant Key Investor Information Document (KIID).

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter Merian North American Equity Fund (IRL), provided that it is in the best interests of Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period of the Jupiter Merian North American Equity Fund (IRL) is added back.-

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Merian North American Equity Fund (IRL) (continued)

The “Percentage Outperformance” in respect of Performance Periods of the Jupiter Merian North American Equity Fund (IRL) where Share Class Performance is greater than Benchmark Performance is the arithmetical difference between Share Class Performance and Benchmark Performance, expressed as a percentage. In respect of Performance Periods of the Jupiter Merian North American Equity Fund (IRL) where Share Class Performance is less than Benchmark Performance, such underperformance, being the arithmetical difference between Share Class Performance and Benchmark Performance expressed in percentage points, will be carried forward and no Performance Fee will be payable in any subsequent Performance Period of the Jupiter Merian North American Equity Fund (IRL) unless Share Class Performance measured against Benchmark Performance has recovered any accumulated percentage underperformance for previous periods. In the Performance Period of the Jupiter Merian North American Equity Fund (IRL) in which any accumulated percentage underperformance is recovered, only that part of the Percentage Outperformance for such period as exceeds the accumulated percentage underperformance carried forward is taken into account for the purposes of calculating the performance fee payable for the Performance Period of the Jupiter Merian North American Equity Fund (IRL).

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The amount of Performance Fee payable in respect of each Share is a US Dollar amount equivalent to the opening Net Asset Value per Share on the first Business Day of the Performance Period of the Jupiter Merian North American Equity Fund (IRL) x Percentage Outperformance x 20% and is payable on the adjusted average number of Shares in issue during the Performance Period of the Jupiter Merian North American Equity Fund (IRL). The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period.

For the purposes of the first calculation of the Performance Fee, the initial offer price in respect of each Share Class was taken as the opening Net Asset Value. The first Performance Period will begin on the date on which the first shares of the relevant share classes are issued and will end on 31 December of the same year.

The Performance Fee accrues and is taken into account in the calculation of the Net Asset Value per Share on a daily basis.

The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depositary and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company. The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter Merian North American Equity Fund (IRL).

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter Merian North American Equity Fund (IRL) and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may also be payable during a Performance Period of the Jupiter Merian North American Equity Fund (IRL) where there is a decline in the Net Asset Value per Share.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

A Performance Fee may be charged even if the Class Performance is negative, so long as the Benchmark has decreased more than the Net Asset Value of the relevant Class.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Merian North American Equity Fund (IRL) (continued)

Performance Fees for Jupiter Merian North American Equity Fund (IRL) were USD 356 for the financial year ended 31 December 2024 (2023: USD 1,699) and the amount accrued at the financial year ended 31 December 2024 was USD 356 (31 December 2023: USD 1,699).

For further Performance Fee calculation breakdown and illustrative examples please refer to the Prospectus.

Jupiter UK Smaller Companies Focus Fund

Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024. The Sub-Fund was entitled to a performance fee as described below, however no performance fee was earned during 2024 up to the date of closure (2023: GBP Nil).

The Investment Manager may be entitled to a performance fee out of the Jupiter UK Smaller Companies Focus Fund's assets. With respect to the Jupiter UK Smaller Companies Focus Fund, the performance fee is only applicable to the following share classes: Class L (GBP) Income Shares, Class I (GBP) Income Shares and Class U1 (GBP) Income Shares.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period ("Performance Period of the Jupiter UK Smaller Companies Focus Fund"). A Performance Period of the Jupiter UK Smaller Companies Focus Fund will comprise of each successive twelve month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period. The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period. In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

"The Benchmark" is the Numis Smaller Companies Index excluding Investment Companies (TICKER: NSCXEITR).

"The Benchmark Performance" in respect of a Performance Period of the Jupiter UK Smaller Companies Focus Fund, the Benchmark Performance is the difference between the opening level of the Benchmark on the first Business Day and on the closing level of the Benchmark on the last Business Day of the Performance Period of the Jupiter UK Smaller Companies Focus Fund, expressed as a percentage.

The "Share Class Performance" in respect of a Performance Period of the Jupiter UK Smaller Companies Focus Fund is the difference between the opening Net Asset Value per Share on the first Business Day of the relevant Performance Period of the Jupiter UK Smaller Companies Focus Fund, which reflects the charging of a Performance Fee, if any, in respect of the previous Performance Period of the Jupiter UK Smaller Companies Focus Fund and the Net Asset Value per Share (before the deduction of any unrealised Performance Fee) on the last Business Day of the relevant Performance Period of the Jupiter UK Smaller Companies Focus Fund, expressed as a percentage.

The Benchmark is consistent with the Jupiter UK Smaller Companies Focus Fund's investment strategy. Information on the Jupiter UK Smaller Companies Focus Fund's past performance measured against the Benchmark is included in the relevant KIID.

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter UK Smaller Companies Focus Fund, provided that it is in the best interests of Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period of the Jupiter UK Smaller Companies Focus Fund is added back.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter UK Smaller Companies Focus Fund (continued)

The “Percentage Outperformance” in respect of Performance Periods of the Jupiter UK Smaller Companies Focus Fund where Share Class Performance is greater than Benchmark Performance is the arithmetical difference between Share Class Performance and Benchmark Performance, expressed as a percentage. In respect of Performance Periods of the Jupiter UK Smaller Companies Focus Fund where Share Class Performance is less than Benchmark Performance, such underperformance, being the arithmetical difference between Share Class Performance and Benchmark Performance expressed in percentage points, will be carried forward and no Performance Fee will be payable in any subsequent Performance Period of the Jupiter UK Smaller Companies Focus Fund unless Share Class Performance measured against Benchmark Performance has recovered any accumulated percentage underperformance for previous periods. In the Performance Period of the Jupiter UK Smaller Companies Focus Fund in which any accumulated percentage underperformance is recovered, only that part of the Percentage Outperformance for such period as exceeds the accumulated percentage underperformance carried forward is taken into account for the purposes of calculating the performance fee payable for the Performance Period of the Jupiter UK Smaller Companies Focus Fund.

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The amount of Performance Fee payable in respect of each Share is a Sterling amount equivalent to the opening Net Asset Value per Share on the first Business Day of the Performance Period of the Jupiter UK Smaller Companies Focus Fund x Percentage Outperformance x 10% and is payable on the adjusted average number of Shares in issue during the Performance Period of the Jupiter UK Smaller Companies Focus Fund. The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period.

For the purposes of the first calculation of the Performance Fee, the initial offer price in respect of each Share Class was taken as the opening Net Asset Value. The first Performance Period will begin on the date on which the first shares of the relevant share classes are issued and will end on 31 December of the same year.

Furthermore the amount of Performance Fee payable in respect of a Performance Period of the Jupiter UK Smaller Companies Focus Fund is subject to a maximum amount (the “Cap”). The Cap is a Sterling amount equivalent to the opening Net Asset Value per Share on the first Business Day of the Performance Period of the Jupiter UK Smaller Companies Focus Fund x opening number of Shares in issue on the first Business Day of the Performance Period of the Jupiter UK Smaller Companies Focus Fund x 1.50 per cent.

The Performance Fee accrues and is taken into account in the calculation of the Net Asset Value per Share on a daily basis. The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depository and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company. The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter UK Smaller Companies Focus Fund.

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter UK Smaller Companies Focus Fund and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may also be payable during a Performance Period of the Jupiter UK Smaller Companies Focus Fund where there is a decline in the Net Asset Value per Share.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

Jupiter Merian Global Equity Absolute Return Fund

The Investment Manager may be entitled to a performance fee out of the Jupiter Merian Global Equity Absolute Return Fund's assets. The Performance Fee is applicable to all Share Classes with the exception of: Class L (CHF) Hedged Accumulation Shares*, Class X (GBP) Hedged Accumulation Shares and the Class I2 Shares.

* Class L (CHF) Hedged Accumulation Shares are no longer available for new or additional subscription.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period ("Performance Period of the Jupiter Merian Global Equity Absolute Return Fund"). A Performance Period of the Jupiter Merian Global Equity Absolute Return Fund will comprise of each successive twelve month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period. The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period.

In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The Performance Fee as at the end of each Performance Period of the Jupiter Merian Global Equity Absolute Return Fund shall be equal in aggregate to 20% of the amount by which any increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund exceeds the "Hurdle Rate", subject to the Net Asset Value High Water Mark (as defined below), multiplied by the adjusted average number of total Shares in issue of each Class on each Dealing Day during the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund. The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period.

The Hurdle Rate will be the average (1) Bank of England Base Rate for the GBP Share Classes, (2) ECB Main Refinancing Operations Rate for the EUR Share Classes, (3) Federal Reserve Funds Target Rate for the USD Share Classes, (4) 3 month Swiss franc (CHF) LIBOR interest rate for the CHF Share Classes**, (5) Riksbank Repo rate for the SEK Share Classes, (6) Singapore Overnight Rate Average for the SGD Share Classes, and (7) People's Bank of China one-year loan prime rate for the RMB Share Classes during the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund.

** As from 1st January 2022: the CHF Share Classes will use Swiss Average Overnight Rate

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Merian Global Equity Absolute Return Fund (continued)

The relevant Hurdle Rate is also used as a cash benchmark for performance measurement purposes. Information on the Jupiter Merian Global Equity Absolute Return Fund's past performance measured against the cash Benchmark is included in the relevant KIID.

The initial issue price was the starting price for the calculation of the first performance fee payable of any share class to which a performance fee is applicable. The first Performance Period for each Class will begin on the date on which the first Shares of the relevant Class are issued and will end on 31 December of the same year.

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes, is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund, provided that it is in the best interests of Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund is added back. The Performance Fee is only payable when the increase in the Net Asset Value of each Class exceeds the Hurdle Rate accrued during the relevant Performance Period. If, during a performance fee period, the performance of the Shares does not exceed the Hurdle Rate, no Performance Fee is payable.

All Performance Fee payments shall be subject to the restriction that in paying a Performance Fee, the Net Asset Value per Share of each Class at the relevant Performance Period of the Jupiter Merian Global Equity Absolute Return Fund shall not be less than the Net Asset Value per Share Class on the last day that a Performance Fee was paid (the "Net Asset Value High Water Mark"). The Performance Fee is only payable on the increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund over the Net-Asset Value High Water Mark and the relevant Hurdle Rate during the Performance Period of the Jupiter Merian Global Equity Absolute Return Fund.

The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depositary and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company.

The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter Merian Global Equity Absolute Return Fund.

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter Merian Global Equity Absolute Return Fund and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may be payable on net realised and net unrealised gains and losses attributable to both the performance of the Investment Manager and market movements in general.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

Performance Fees for Jupiter Merian Global Equity Absolute Return Fund were USD 28,180,153 for the financial year ended 31 December 2024 (2023: USD 16,223,035) and the amount accrued at the financial year ended 31 December 2024 was USD 28,180,153 (31 December 2023: USD 16,223,035).

Performance Fee (continued)

Jupiter Strategic Absolute Return Bond Fund

The Investment Manager may be entitled to a performance fee out of the Jupiter Strategic Absolute Return Bond Fund's assets. The Performance Fee is applicable to all Share Classes with the exception of: Class X, Class F1, Class F2, Class L2 and Class LA.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period ("Performance Period of the Jupiter Strategic Absolute Return Bond Fund"). A Performance Period of the Jupiter Strategic Absolute Return Bond Fund will comprise of each successive twelve month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period. The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period. In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The Performance Fee as at the end of each Performance Period of the Jupiter Strategic Absolute Return Bond Fund shall be equal in aggregate to 10% of the amount by which any increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter Strategic Absolute Return Bond Fund exceeds the "Hurdle Rate", subject to the Net Asset Value High Water Mark (as defined below), multiplied by the adjusted average number of total Shares in issue of each Class on each Dealing Day during the Performance Period of the Jupiter Strategic Absolute Return Bond Fund. The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period.

The Hurdle Rate will be the average (1) Sterling Overnight Interbank Average Rate for the GBP Share Classes, (2) Euro Overnight Index Average Rate for the EUR Share Classes*, (3) Federal Funds Effective Overnight Rate for the USD Share Classes, (4) Swiss Average Overnight Rate for the CHF Share Classes, and (5) Riksbank Repo Rate for the SEK Share Classes for the relevant Class currency during the Performance Period of the Jupiter Strategic Absolute Return Bond Fund.

* As from 1st January 2022: the EUR Share Classes will use Euro Short-term Rate (€STR)

The relevant Hurdle Rate is also used as a cash benchmark for performance measurement purposes. Information on the Jupiter Strategic Absolute Return Bond Fund's past performance measured against the cash Benchmark is included in the relevant KIID.

The initial issue price was the starting price for the calculation of the first performance fee payable of any share class to which a performance fee is applicable. The first Performance Period for each new share class will begin on the date on which the first shares of the class are issued and will end on 31 December of the same year.

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter Strategic Absolute Return Bond Fund, provided that it is in the best interests of Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period for the Jupiter Strategic Absolute Return Bond Fund is added back.

The Performance Fee is only payable when the increase in the Net Asset Value of each Class exceeds the Hurdle Rate accrued during the relevant Performance Period. If, during a performance fee period, the performance of the Shares does not exceed the Hurdle Rate, no Performance Fee is payable.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Strategic Absolute Return Bond Fund (continued)

All Performance Fee payments shall be subject to the restriction that in paying/accruing a Performance Fee, the Net Asset Value per Share of each Class at the relevant Performance Period of the Jupiter Strategic Absolute Return Bond Fund shall not be less than the Net Asset Value per Share Class on the last day that a Performance Fee was paid (or the initial subscription price if higher) (the “Net Asset Value High Water Mark”). The Performance Fee is only payable on the increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter Strategic Absolute Return Bond Fund over the Net -Asset Value High Water Mark and the relevant Hurdle Rate during the Performance Period of the Jupiter Strategic Absolute Return Bond Fund.

The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depository and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company.

The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter Strategic Absolute Return Bond Fund.

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter Strategic Absolute Return Bond Fund and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may be payable on net realised and net unrealised gains and losses attributable to both the performance of the Investment Manager and market movements in general.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

Performance Fees for Jupiter Strategic Absolute Return Bond Fund were USD Nil for the financial year ended 31 December 2024 (2023: USD 6,791) and the amount accrued at the financial year ended 31 December 2024 was USD Nil (31 December 2023: USD 6,791).

For further Performance Fee calculation breakdown and illustrative examples please refer to the Prospectus.

Jupiter Gold & Silver Fund

The Investment Manager may be entitled to a performance fee out of the Jupiter Gold & Silver Fund’s assets. With respect to the Jupiter Gold & Silver Fund, the performance fee is only applicable to the following share classes: Class P2 (EUR) Accumulation Shares, Class P2 (GBP) Accumulation Shares and Class P2 (USD) Accumulation Shares.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period (“Performance Period of the Jupiter Gold & Silver Fund”). A Performance Period of the Jupiter Gold & Silver Fund will comprise of each successive twelve month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period. The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period. In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Gold & Silver Fund (continued)

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

“The Benchmark” is a composite, made up of (i) a 50:50 split between the FTSE Gold Mines Index (TICKER TFTMIGMI) expressed in GBP and the XAU:GBP gold price for the P2 (GBP) Accumulation Shares, (ii) a 50:50 split between the FTSE Gold Mines Index (TICKER TFTMIGMI) expressed in EUR and XAU:EUR for the P2 (EUR) Accumulation Shares and (iii) a 50:50 split between the FTSE Gold Mines Index (TICKER: TFTMIGMI) expressed in USD and the XAU: USD gold price for the P2 (USD) Accumulation Shares. Please note, as shown by each Ticker code, the FTSE Index component for the Performance Fee Composite benchmark is gross of withholding tax.

“The Benchmark Performance” in respect of a Performance Period of the Jupiter Gold & Silver Fund, the Benchmark Performance is the difference between the level of the Benchmark calculated at the Valuation Point on the last Business Day of the previous Performance Period of the Jupiter Gold & Silver Fund and the level of the Benchmark calculated at the Valuation Point on the last Business Day of the relevant Performance Period of the Jupiter Gold & Silver Fund, expressed as a percentage. The “Share Class Performance” in respect of the first Performance Period of the Jupiter Gold & Silver Fund is the difference between the opening Net Asset Value per Share and the Net Asset Value per Share at the Valuation Point on the last Business Day of the Performance Period of the Jupiter Gold & Silver Fund, expressed as a percentage. For each Performance Period of the Jupiter Gold & Silver Fund thereafter, the Share Class Performance is the difference between the Net Asset Value per Share at the Valuation Point on the last Business Day of the previous Performance Period of the Jupiter Gold & Silver Fund and the Net Asset Value per Share at the Valuation Point on the last Business Day of the relevant Performance Period of the Jupiter Gold & Silver Fund, expressed as a percentage.

The Benchmark is consistent with the Jupiter Gold & Silver Fund’s investment, strategy. Information on the Jupiter Gold & Silver Fund’s past performance measured against the Benchmark is included in the relevant KIID.

Where a fair value adjustment has been made to the Net Asset Value per Share of the Fund then this will be excluded for the purposes of the calculation of the Performance Fee.

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter Gold & Silver Fund, provided that it is in the best interests of the Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period of the Jupiter Gold & Silver Fund is added back.

The “Percentage Outperformance” in respect of Performance Periods of the Jupiter Gold & Silver Fund where Share Class Performance is greater than Benchmark Performance is the arithmetical difference between Share Class Performance and Benchmark Performance, expressed as a percentage. In respect of Performance Periods of the Jupiter Gold & Silver Fund where Share Class Performance is less than Benchmark Performance, such underperformance, being the arithmetical difference between Share Class Performance and Benchmark Performance expressed in percentage points, will be carried forward and no Performance Fee will be payable in any subsequent Performance Period of the Jupiter Gold & Silver Fund unless Share Class Performance measured against Benchmark Performance has recovered any accumulated percentage underperformance for previous periods. In the Performance Period of the Jupiter Gold & Silver Fund in which any accumulated percentage underperformance is recovered, only that part of the Percentage Outperformance for such period as exceeds the accumulated percentage underperformance carried forward is taken into account for the purposes of calculating the performance fee payable for the Performance Period of the Jupiter Gold & Silver Fund.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter Gold & Silver Fund (continued)

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The amount of Performance Fee payable in respect of each Share is a US Dollar amount equivalent to the opening Net Asset Value per Share on the first Business Day of the Performance Period of the Jupiter Gold & Silver Fund x Percentage Outperformance x 20% and is payable based on the adjusted average number of Shares in issue for the Class P2 (EUR) Accumulation Shares, Class P2 (GBP) Accumulation Shares and Class P2 (USD) Accumulation Shares during the Performance Period of the Jupiter Gold & Silver Fund. The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period.

For the purposes of the first calculation of the Performance Fee, the initial offer price in respect of each Share Class was taken as the opening Net Asset Value. The first Performance Period for each Class will begin on the date on which the first Shares of the relevant Class are issued and will end on 31 December in that year. The Performance Fee accrues and is taken into account in the calculation of the Net Asset Value per Share on a daily basis.

The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depositary and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company.

The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter Gold & Silver Fund.

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter Gold & Silver Fund and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may also be payable during a Performance Period of the Jupiter Gold & Silver Fund where there is a decline in the Net Asset Value per Share.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

A Performance Fee may be charged even if the Class Performance is negative, so long as the Benchmark has decreased more than the Net Asset Value of the relevant Class.

Performance Fees for Jupiter Gold & Silver Fund were USD Nil for the financial year ended 31 December 2024 (2023: USD Nil) and the amount accrued at the financial year ended 31 December 2024 was USD Nil (31 December 2023: USD Nil).

For further Performance Fee calculation breakdown and illustrative examples please refer to the Prospectus.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter UK Specialist Equity Fund

The Investment Manager may be entitled to a performance fee out of the Jupiter UK Specialist Equity Fund's assets. With respect to the Jupiter UK Specialist Equity Fund, the performance fee is applicable to all share classes with the exception of the Class X (GBP) Accumulation Shares.

The Performance Fee will be calculated and accrued daily and will be payable annually in arrears in respect of each Performance Period ("Performance Period of the Jupiter UK Specialist Equity Fund"). A Performance Period of the Jupiter UK Specialist Equity Fund will comprise of each successive twelve month period ending on 31 December. The Performance Fee (if any), will crystallise, become payable and will be credited to the Investment Manager at the end of each Performance Period.

The Performance Fee is normally payable to the Investment Manager annually in arrears within 15 calendar days of the end of each Performance Period. In addition, if a Shareholder repurchases or converts all or part of their Shares before the end of a Performance Period, any accrued Performance Fee with respect to such Shares will crystallise on that Dealing Day and will then become immediately payable.

If a Share is repurchased or converted at any time other than at the end of a Performance Period, the Performance Fee attributable to such Share could be different from the Performance Fee that would be payable if such Share was not repurchased or converted until the end of the relevant Performance Period.

The Performance Fees are calculated with reference to an adjusted average number of Shares in issue during the relevant Performance Period. The Performance Fee as at the end of each Performance Period of the Jupiter UK Specialist Equity Fund shall be equal in aggregate to 20% of the amount by which any increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter UK Specialist Equity Fund exceeds the "Hurdle Rate", subject to the Net Asset Value High Water Mark (as defined below), multiplied by the adjusted average number of total Shares in issue of each Class on each Dealing Day during the Performance Period of the Jupiter UK Specialist Equity Fund. The adjusted average number of Shares takes account of repurchases, conversions and subscriptions occurring during the relevant Performance Period. The Hurdle Rate will be the average of (1) Sterling Overnight Interbank Average Rate for the GBP Share Classes, (2) Euro Overnight Index Average Rate for the EUR Share Classes*, (3) Federal Funds Effective Overnight Rate for the USD Share Classes, (4) Swiss Average Overnight Rate for the CHF Share Classes, and (5) Riksbank Repo Rate for the SEK Share Classes for the relevant Class currency during the Performance Period of the Jupiter UK Specialist Equity Fund.

* As from 1st January 2022: the EUR Share Classes will use Euro Short-term Rate (€STR)

The relevant Hurdle Rate is also used as a cash benchmark for performance measurement purposes. Information on the Jupiter UK Specialist Equity Fund's past performance measured against the cash Benchmark is included in the relevant KIID.

The initial issue price was the starting price for the calculation of the first performance fee payable of any share class to which a performance fee is applicable. The first Performance Period for each Class will begin on the date on which the first Shares of the relevant Class are issued and will end on 31 December of the same year.

Calculation of the Net Asset Value per Share of each Class for Performance Fee purposes is net of all costs but no deduction will be made on account of Performance Fees accrued in the Performance Period of the Jupiter UK Specialist Equity Fund, provided that it is in the best interests of Shareholders to do so and any net income distributed to Shareholders in respect of the Performance Period of the Jupiter UK Specialist Equity Fund is added back.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Performance Fee (continued)

Jupiter UK Specialist Equity Fund (continued)

The Performance Fee is only payable when the increase in the Net Asset Value of each Class exceeds the Hurdle Rate accrued during the relevant Performance Period. If, during a performance fee period, the performance of the Shares does not exceed the Hurdle Rate, no Performance Fee is payable.

All Performance Fee payments shall be subject to the restriction that in paying a Performance Fee, the Net Asset Value per Share of each Class at the relevant Performance Period of the Jupiter UK Specialist Equity Fund shall not be less than the Net Asset Value per Share Class on the last day that a Performance Fee was paid (the "Net Asset Value High Water Mark"). The Performance Fee is only payable on the increase in the Net Asset Value per Share of each Class during the Performance Period of the Jupiter UK Specialist Equity Fund over the Net Asset Value High Water Mark and the relevant Hurdle Rate during the Performance Period of the Jupiter UK Specialist Equity Fund. The amount of the Performance Fee will be calculated by the Administrator. The calculation of the Performance Fee shall be verified by the Depositary and, as a result, it is not anticipated to be open to the possibility of manipulation.

The calculation of the Performance Fee shall also be reviewed by the Auditors as part of the annual audit of the Company.

The Investment Manager may, at its discretion, waive the Performance Fee payable in respect of a Performance Period of the Jupiter UK Specialist Equity Fund.

Performance Fees are payable on net realised and net unrealised gains and losses as at the end of each Performance Period of the Jupiter UK Specialist Equity Fund and as a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Performance Fees may be payable on net realised and net unrealised gains and losses attributable to both the performance of the Investment Manager and market movements in general.

The methodology used in calculating the Performance Fee will impact Shareholders differently in relation to the payment of Performance Fees (with some Shareholders paying disproportionately higher Performance Fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others (as no equalisation methodology is employed in respect of the Performance Fee calculation).

Performance Fees for Jupiter UK Specialist Equity Fund were GBP 306 for the financial year ended 31 December 2024 (2023: GBP Nil) and the amount accrued at the financial year ended 31 December 2024 was GBP 306 (31 December 2023: GBP Nil).

For further Performance Fee calculation breakdown and illustrative examples please refer to the Prospectus.

Jupiter Global Emerging Markets Focus ex China Fund

The Investment Manager may be entitled to a performance fee out of the Jupiter Global Emerging Markets Focus ex China Fund's assets, but only in respect of the following share classes: Class P2 (USD) Accumulation, Class P2 (GBP) Accumulation and Class P2 (EUR) Accumulation. For the year ended 31 December 2024, none of the share classes entitled to a performance fee were active. For more information on the performance fee on the applicable share classes please revert to the Sub-Fund's Supplement to the Prospectus.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Administration Fee, Registrar and Transfer Agency Fees

The Administrator fees are calculated at month end, based on the average net asset value per sub-fund:

Up to EUR 120 million	2 basis points per annum
From EUR 120 million to EUR 240 million	1.5 basis points per annum
From EUR 240 million to EUR 480 million	1 basis point per annum
Above EUR 480 million	0.45 basis points per annum

The Administrator fees are subject to a per sub-fund minimum fee of EUR 12,500 per annum. Additional annual fees shall be payable for the second and each subsequent Class of Shares in each Sub-Fund which shall be charged at normal commercial rates.

The Administrator is also entitled to transaction fees it incurs for the Sub-Funds and fees for the registrar and transfer agency functions and maintenance services it performs payable out of Jupiter Asset Management Series Plc's assets. These services are (i) maintaining the register of each Share Class of Jupiter Asset Management Series Plc and the annual shareholder account, (ii) servicing, and (iii) reporting, all of which shall be charged at normal commercial rates.

The Administrator will also be entitled to be reimbursed by the Company out of the assets of each Sub-Fund for all reasonable and vouched out-of-pocket expenses incurred by it and charged to it for the benefit of the Company in the performance of its duties to the Company. All fees will be invoiced and payable monthly.

The Administrator is entitled to the following fees for registrar and transfer agency functions it performs, payable out of the Company assets: annual share class maintenance fee of EUR 3,000 per share class per annum; investor account maintenance of EUR 24.50 per account per annum; STP transaction fee of EUR 4 per STP transaction, transaction fees of EUR 4 for each automatic transaction and EUR 11 for each manual transaction and commission handling fee of EUR 10 per payment. The Administrator will also receive fees in relation to AML on account opening and refreshes at normal commercial rates.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

9. Fees and Expenses (continued)

Administration Fee, Registrar and Transfer Agency Fees (continued)

All Sub-Funds are also subject to FATCA fees. The fees are included in the Transfer Agency fees and are recognised in the Statement of Comprehensive Income on an accruals basis.

The following are the Administrator expense and related payables for each of the Sub-Funds.

Depository Fee

The Depository is also entitled to sub-depository fees and transaction charges which shall be charged at normal commercial rates and paid monthly in arrears. The Depository is also entitled to be reimbursed by Jupiter Asset Management Series Plc for all reasonable disbursements and out-of-pocket expenses.

The Depository fees are structured at the sub-fund level and are charged based upon the average month end net asset value:

- Up to EUR 840 million 0.80 basis points per annum
- From EUR 840 million to EUR 4,202 million 0.50 basis points per annum
- Above EUR 4,202 million 0.25 basis points per annum

All reasonable out-of-pocket expenses shall be recoverable by the Depository and charged to the Company. All fees are exclusive of VAT and where applicable VAT shall be added to invoices and payable by the Company. Depository fees shall be calculated monthly and invoiced monthly in arrears.

Total Depository fees were USD 749,676 for the financial year ended 31 December 2024 (2023: USD 773,157) and the amount payable at the financial year ended 31 December 2024 was USD 196,718 (31 December 2023: USD 207,028).

Transaction Costs

Transaction costs are expenses incurred when buying or selling a security. Transaction costs represents the brokers' commissions and spreads, which are the differences between the price the dealer paid for a security and the price the buyer pays.

Transaction costs on the purchase and sale of bonds, currency exchange contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Distribution Fee

No distribution fee shall be payable in respect of the Class D1, Class D2, Class F, Class F2, Class I, Class L, Class S, Class U1, Class U2, Class U3, Class X Shares, Class Z1 Shares or Class Z2 Shares of any Sub-Fund. Each Sub-Fund shall pay a distribution fee of up to 1.50% per annum of the average Net Asset Value of that Sub-Fund attributable to the Class C Shares, and of up to 1.00% per annum of the average Net Asset Value of that Sub-Fund attributable to the Class B, Class C2 and Class N Shares. Following appointment of the Jupiter Asset Management (Europe) Limited as Manager and Distributor, the distribution fee was paid by the Sub-Funds to the Manager. The Manager is responsible for the payment of any sub-distributor fees to the Investment Manager.

Total distribution fees were USD 3,100,486 for the financial year ended 31 December 2024 (2023: USD 2,920,061) and the amount payable at the financial year ended 31 December 2024 was USD 289,171 (31 December 2023: USD 219,374).

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

10. Distributions

Shareholders should note that, where set out in the relevant Supplement, distributions may be payable out of the capital of each Sub-Fund. Fixed distribution classes are denoted by an "(F)" at the end of the Share Class name, as shown in Note 6. These Share Classes will distribute regardless of what income is available therefore any shortfall is paid out of capital.

It should also be noted that certain Sub-Funds and Share Classes including the fixed distribution Share Classes listed below may charge certain fees and expenses to capital rather than income, which may result in the erosion of capital and in an increased risk that Shareholders in these Share Classes may not receive back the full amount invested when redeeming their holding.

Distributions out of capital may have different tax implications from distributions of income and capital gains and if you propose to invest in one or more of the relevant Share Classes, you are recommended to seek advice in this regard.

The following tables detail the distributions per Share for the financial years ended 31 December 2024 and 31 December 2023.

For the financial year ended 31 December 2024

Jupiter Systematic Consumer Trends Fund

Jupiter Systematic Demographic Opportunities Fund

Jupiter Systematic Disruptive Technology Fund

Jupiter Systematic Healthcare Innovation Fund

Jupiter Systematic Physical World Fund

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks

In pursuing its investment objectives, the Company holds financial derivative instruments. The Company's financial derivative instruments held at 31 December 2024 and at 31 December 2023 are disclosed in the Portfolio of Investments.

Efficient Portfolio Management ("EPM")

The Company may employ investment techniques and instruments for efficient portfolio management purposes and for hedging purposes, subject to the conditions and within the limits from time to time laid down by the Central Bank under the UCITS Regulations and in the Prospectus. These techniques and instruments may be exchange-traded or over-the-counter derivatives and shall include futures (such as currency future contracts), options, options on futures, currency exchange contracts, contracts for difference, convertible securities, hybrid securities, structured notes, credit default swaps and swap agreements. For financial derivative instruments that were entered into during the financial year which remained open at period end and the resulting amount of commitments/exposures, please refer to the Portfolio of Investments.

The Manager oversees the efficient portfolio management operations carried out by the Investment Manager. Efficient portfolio management transactions relating to the assets of a Sub-Fund may be entered into by the Investment Manager with one of the following aims:

- a) a reduction of risk;
- b) a reduction of cost with no increase or a minimal increase in risk;
- c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return) and the diversification requirements in accordance with the Central Bank's Regulations.

In relation to efficient portfolio management operations the Investment Manager will look to ensure that the techniques and instruments used are economically appropriate in that they will be realised in a cost-effective way. The use of efficient portfolio management techniques will only be used in line with the best interests of a Sub-Fund. The use of FDI ("Financial Derivative Instruments") and efficient portfolio management techniques for the purposes outlined above will expose the Company to the risks including, but not limited to, market risk and counterparty risk. Please refer to the Portfolio of Investments for range of FDIs which the Sub-Fund may have used for efficient portfolio management purposes during the period under review.

Where necessary, the Company will accept collateral from its counterparties in order to reduce counterparty risk exposure generated through the use of over the counter derivative instruments and EPM techniques. The type and amount of collateral received is outlined in Note 7.

For UCITS which have engaged in EPM techniques disclosures are required under the Central Bank UCITS Regulations. A UCITS is required to disclose the revenues arising from EPM techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred, unless the costs associated with EPM techniques are embedded and not separately identifiable.

All revenues from EPM techniques, net of direct and indirect operational costs, will be returned to the relevant Sub-Fund. Any direct and indirect operational costs/fees arising from EPM techniques do not include hidden revenue. Any gains or losses arising from EPM techniques and investments are recognised in the Statement of Comprehensive Income.

Repurchase, reverse repurchase and stock lending arrangements are EPM techniques. The Sub-Funds did not engage in any repurchase, reverse repurchase and stock lending arrangements during the financial year.

Futures contracts will be used to hedge against market risk or gain exposure to an underlying market. Currency exchange contracts will be used to hedge or gain exposure to an increase in the value of an asset, currency, or deposit. Options will be used to hedge or achieve exposure to a particular market instead of using a physical security. Swaps (including swaptions) will be used to achieve profit as well as to hedge existing long positions. Currency exchange contracts will be used to reduce the risk of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure to foreign currency fluctuations from one country to another. Credit default swaps will be used to isolate and transfer the exposure to or transfer the credit risk associated with a reference asset or index of reference assets.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

Efficient Portfolio Management (“EPM”) (continued)

The Company may, for the purposes of efficient portfolio management, enter into futures contracts, currency exchange contracts, options, swaps, swaptions, convertible securities and structured notes, in order to hedge currency and market exposure and/or for investment purposes. Where applicable, any futures, swaps, options, swaptions and currency exchange contracts open as at 31 December 2024 are disclosed in the Portfolio of Investments.

Risk is inherent in the activities of each Sub-Fund but it is managed through a process of ongoing identification, measurement and monitoring, subject to risks limits and other controls. The main risks arising from the Company’s financial instruments are market risk, liquidity risk and credit risk.

(a) Market Price Risk

Market price risk results mainly from uncertainty about the future prices of financial instruments held. It represents the potential loss a Sub-Fund may suffer through holding market positions in the face of market movements and changes in exchange rates.

The Sub-Funds manage the risk by ensuring careful selection of securities and other financial instruments within the specified limits detailed in the Prospectus. In practice, the actual trading results may differ from the sensitivity analysis below and the difference could be material.

The following tables highlight the market price risk associated with the various financial instruments held by the Sub-Funds of the Company, the market price risk of futures is shown separately by Sub-Fund.

If the price of each of these investments to which the Sub-Funds had exposure at financial year end had increased or decreased by 5% with all other variables held constant, this would have increased or decreased net assets attributable to holders of redeemable shares as below.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(a) Market Price Risk (continued)

Conversely, if the price of each of the underlying investments to which the relevant Company has exposure had decreased by 5%, this would have an equal but opposite effect on net assets attributable to holders of redeemable participating shares.

The above analysis is strictly a mathematical exercise and has many improbable assumptions including, (i) stocks of financial services companies perform exactly in line with the broad equities market (ii) both long and short positions in the portfolio perform exactly in line with stocks of financial services companies and (iii) the Investment Manager does not change the composition of the portfolio intra-period (Investors and prospective investors should not place any reliance on this analysis, as the actual effect of a 5% change in equity prices will differ materially from the effect described in the above). The Investment Manager does not believe this analysis should be used to assess the risk or potential performance of its strategy.

Adherence to the investment guidelines and to investment and borrowing powers set out in the instrument of incorporation and the Prospectus mitigates the risk of excessive exposure per industry to any particular type of security or issuer.

Each Sub-Fund's market risk is monitored on a daily basis by the Manager and the policies and processes are detailed in the Company's risk management process. Each Sub-Fund's overall market positions are advised on a regular basis to the Board of Directors.

Emerging markets provide new investment opportunities, such as elevated economic growth rates, higher expected returns and diversification benefits. Accordingly, these markets may be insufficiently liquid and levels of volatility in price movements may be greater than those experienced in more developed economies and markets. The value of the assets of a Sub-Fund investing in developing markets may be adversely affected by uncertainties. There can be no assurance that the Sub-Funds will achieve their investment objectives.

(b) Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's constitutional documents provides for the creation and cancellation of Shares on each Dealing Day and it is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time. Assets from a Sub-Fund may need to be sold if insufficient cash is available to finance redemptions.

The Sub-Funds' listed securities are considered to be readily realisable as they are principally listed on major European, Asian and US stock exchanges.

In the case of transferable securities not traded on a Regulated Market liquidity is not automatically presumed. The Sub-Funds therefore assess the liquidity of such securities where this is necessary. If the security is assessed as insufficiently liquid to meet foreseeable redemption requests the security must only be bought or held if the other securities held in the portfolio are deemed sufficiently liquid so as to be able to ensure compliance with Regulation 104(1) of the UCITS Regulations.

Therefore before making an investment, the Investment Manager may consider in relation to liquidity risk:

1. The volume and turnover in the transferable security;
2. If price is determined by supply and demand in the market, the issue size and the portion of the issue that the Investment Manager plans to buy;
3. The opportunity and timeframe to buy or sell the transferable security; and
4. The quality of the secondary market in a transferable security and an analysis of the quality and number of intermediaries and market makers available for that security.

The risks associated with securities in which the Sub-Funds have invested are assessed on an ongoing basis.

The Company may temporarily suspend the repurchase of Shares in any Sub-Fund. No suspensions have taken place during the financial year. More information on this type of liquidity risk can be found in the Prospectus.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(b) Liquidity Risk (continued)

The Manager has adopted the European Securities and Markets Authority (ESMA) Guidelines on Liquidity stress testing in UCITs and AIFs issued July 2020 and produces liquidity stress testing on a regular basis and in line with the ESMA guidance.

Inflows and Outflows from currency exchange contracts and liabilities of other derivatives are detailed in the tables below. All other liabilities disclosed in the Statement of Financial Position on pages 184 to 187 are settled within 1 - 3 months.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(c) Credit Risk

Credit risk is the risk that the issuer of a loan/debt instrument/financial instrument fails to discharge an obligation or commitment it has entered into with the Sub Fund. Credit risk is monitored in accordance with the UCITS Regulations.

This risk exists in relation to the transactions the Company enters into with brokers, banks and other third parties. However investments in equities are not exposed to credit risk except for exposure to the Depositary which is periodically monitored by the Company.

Credit risk arises from receivables from investee funds relating to redemptions or transactions awaiting settlement. Risk relating to unsettled receivables is considered small due to the short settlement period involved and the due diligence permitted on the investee funds. The maximum exposure related to unsettled is included in other assets and other liabilities in the Statement of Financial Position.

The Manager monitors that the ratings and limits for counterparties are adhered to.

Risk exposure may be reduced where the counterparty will provide the Sub-Fund with collateral, subject to certain conditions. The Manager is responsible for ensuring this collateral meets the relevant criteria set out in UCITS Regulations. Details of collateral pledged and received as at 31 December 2024 is disclosed in Note 7. Cash due from/to broker balances held with counterparties at 31 December 2024 are disclosed in Note 7. This amount is the minimum required by the brokers and counterparties for collateral requirements.

Credit default swaps will be used to isolate and transfer the exposure to or transfer the credit risk associated with a reference asset or index of reference assets. Credit default swaps provide a measure of protection against defaults of debt issuers. The Sub-Funds' use of credit default swaps does not assure their use will be effective or will have the desired result. If a Sub-Fund is the buyer of a credit default swap, it would be entitled to receive the agreed-upon value (or par) of a referenced debt obligation from the counterparty to the swap on the occurrence of certain credit events in relation to the relevant reference entity. In circumstances in which a Sub-Fund does not own the debt securities that are deliverable under a credit default swap, the Sub-Fund is exposed to the risk that deliverable securities will not be available in the market. The Sub-Fund may not be able to realise the full value of the credit default swap upon a default by the reference entity. As a seller of credit default swaps, a Sub-Fund incurs exposure to the credit of the reference entity and is subject to many of the same risks it would incur if it were holding debt securities issued by the reference entity. The notional amounts and counterparties for purchased and sold protection are disclosed in the Portfolio of Statements.

The Company minimises concentration of credit risk by undertaking transactions with a large number of customers and counterparties on recognised and reputable exchanges.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the statement of financial position date.

The table below shows the S&P long term credit ratings of the derivative counterparties and the financial institutions with whom deposits are invested:

Counterparty Name	Rating	
	2024	2023
Australia and New Zealand Bank	AA-	AA-
Bank of America Merrill Lynch	A-	A-
Barclays	BBB+	BBB+
BNP Paribas	A+	A+
Canadian Imperial Bank of Commerce	A-	A-
Citibank	A+	A+
Credit Suisse	A+	A+
Danske Bank	A+	A+
Deutsche Bank	A	A
Goldman Sachs	BBB+	BBB+

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(c) Credit Risk (continued)

The table below shows the S&P long term credit ratings of the derivative counterparties and the financial institutions with whom deposits credit institutions are invested (continued):

Counterparty Name	Rating	
	2024	2023
HSBC	A-	A-
ING	A-	A-
JP Morgan	A	A-
Lloyds Bank	A+	A+

Jupiter Financials Contingent Capital Fund	USD	7.01%	47.69%	45.30%	100.00%

(d) Interest Rate Risk

Interest rate risk is the risk that the value of the Sub-Funds' investments will fluctuate as a result of changes in interest rates.

The Company's interest-bearing financial assets and liabilities expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Details of interest rates applicable at 31 December 2024 are outlined in the Portfolio of Investments. Interest receivable on bank deposits and payable on bank overdrafts will be affected by fluctuations in interest rates, as will Floating Rate Bonds. All other assets and liabilities of the Sub-Funds are non-interest bearing.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(e) Concentration Risk

The investments of certain Sub-Funds may be concentrated in a single market or country. A Sub-Fund which pursues a concentrated investment strategy may be subject to a greater degree of volatility and risk than a Sub-Fund following a more diversified strategy.

The applicable investment concentrations within the portfolio for each Sub-Fund at 31 December 2024 are disclosed in the Portfolio of Investments.

The following table shows the Sub-Funds having more than 10% concentration in the countries at 31 December 2024:

Fund Name	Country	% of Net Assets
Jupiter China Equity Fund	China	86.15%
Jupiter Merian World Equity Fund	United States	63.79%
Jupiter Asia Pacific Income Fund (IRL)	Australia	20.59%
Jupiter Asia Pacific Income Fund (IRL)	India	19.71%
Jupiter Asia Pacific Income Fund (IRL)	Singapore	15.00%
Jupiter Asia Pacific Income Fund (IRL)	Taiwan	28.39%

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(f) Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company invests in securities and other investments that are denominated in currencies other than the Sub-Funds functional currency. Accordingly, the value of the Sub-Funds' assets may be affected favourably or unfavourably by fluctuations in currency rates and therefore a Sub-Fund will necessarily be subject to foreign exchange risks. Equally movements in exchange rates can impact income received by the Sub-Funds and can impact shareholders whose shares are denominated in currencies other than the operating currency of the Sub-Fund.

The Sub-Funds may use foreign currency economic hedging activities to protect against the volatility described above. The Company primarily utilises currency exchange contracts to hedge foreign-currency-denominated financial instruments. Increases or decreases in the fair values of the Sub-Funds' foreign-currency-denominated financial assets and financial liabilities are partially offset by gains and losses on the economic hedging instruments. Foreign exchange hedging is utilised for the benefit of hedged share classes, transactions will be clearly attributable to that class and the cost and related liabilities and/or benefits shall be for the account of that class only. Accordingly, such costs and related liabilities and/or benefits will be reflected in the net asset value per share for shares of any such class.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

Jupiter Systematic Healthcare Innov Fund	(12,108)	13,386	(2,765)	3,056
Jupiter Systematic Physical World Fund	(16,265)	17,976	(4,560)	5,039

In practice, the actual trading results may differ from the above sensitivity analysis and the difference could be significant. The currency risk of other Sub-Funds is disclosed by way of VaR analysis on pages 347 to 349.

³ Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(g) Fair Value of Financial Assets and Financial Liabilities

Fair Value Estimation

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significant of the inputs used in making the measurements. The standard requires an entity to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3 – Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (Level 3), the amendment requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the period, purchases, sales issues and settlements. The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes ‘observable’ requires significant judgement by the Sub-Funds. The Sub-Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The table below provides a summary within the fair value hierarchy of the Sub-Funds’ financial assets and financial liabilities measured at last traded prices at 31 December 2024.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(g) Fair Value of Financial Assets and Financial Liabilities (continued)

Fair Value Estimation (continued)

The financial instruments at 31 December 2024 and 31 December 2023 are classified as follows:

Investment Type	Level
Transferable securities	
Equities	1
Rights	1
Government Bonds*	2
Corporate Bonds*	2
Convertible Securities	2
Municipal Bonds	2
Warrants	2
Asset Backed Securities	2
Investment Funds	
Investment Funds	2
Derivative Instruments	
Future Contracts	1
Contract for Difference	2
Credit Default Swaps	2
Interest Rate Swaps	2
Open Currency Exchange Contracts	2

* Please note included within government and corporate bonds are some bonds which meet the criteria to be classified as Level 1.

The following table details the exceptions to the above classification at 31 December 2024.

Sub-Fund	Security	Investment Type	Level	Currency	Fair Value USD
Jupiter Asia Pacific Income Fund (IRL)	Chennai Super Kings Cricket Ltd	Equity	3	INR	252,125
Merian Asian Equity Income Fund	Chennai Super Kings Cricket Ltd	Equity	3	INR	335,455
Jupiter Merian Global Equity Income Fund (IRL)	LUKOIL PJSC (DR)	Equity	3	RUB	-

The following table details the exceptions to the above classification at 31 December 2023.

Sub-Fund	Security	Investment Type	Level	Currency	Fair Value USD
Jupiter Asia Pacific Income Fund (IRL)	Chennai Super Kings Cricket Ltd	Equity	3	INR	-
Merian Asian Equity Income Fund	Chennai Super Kings Cricket Ltd	Equity	3	INR	-
Jupiter Merian Global Equity Income Fund (IRL)	LUKOIL PJSC (DR)	Equity	3	RUB	-

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(g) Fair Value of Financial Assets and Financial Liabilities (continued)

Fair Value Estimation (continued)

Reconciliation of Level 3 fair value measurements of financial assets for the year 2024.

	Jupiter Asia Pacific Income Fund (IRL)	Merian Asian Equity Income Fund	Jupiter Merian Global Equity Income Fund (IRL)*
	USD	USD	USD
Opening Balance	-	-	-
Transfer in to Level 3	-	-	-
Purchases	-	-	-
Sales	-	-	-
Transfers out of level 3	-	-	-
Net (loss)/gain on financial assets at fair value through profit or loss	252,125	335,455	-
Closing Balance	252,125	335,455	-

Reconciliation of Level 3 fair value measurements of financial assets for the year 2023.

	Jupiter UK Smaller Companies Focus Fund ³	Jupiter Merian Global Equity Income Fund (IRL)*	Jupiter Gold & Silver Fund
	GBP	USD	USD
Opening Balance	4,422,568	-	2,002,905
Transfer in to Level 3	-	-	-
Purchases	-	-	-
Sales	(3,561,174)	-	-
Transfers out of level 3	-	-	(781,358)
Net (loss)/gain on financial assets at fair value through profit or loss	(861,394)	-	(1,221,547)
Closing Balance	-	-	-

* There is only one level 3 investment held- 'LUKOIL PJSC (DR)' in Jupiter Merian Global Equity Income Fund (IRL) which is valued at nil at both year ends and therefore, has no impact on values.

Transfers between levels are deemed to have occurred when the pricing source for a particular security has changed, which triggers a change in levels. There were no transfers between levels of the fair value hierarchy during the financial year ended 31 December 2024. Assets and liabilities not carried at fair value are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

³ Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(g) Fair Value of Financial Assets and Financial Liabilities (continued)

Fair Value Estimation (continued)

Sensitivity to changes in inputs

Although the Investment Manager believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, in changing one or more of the assumptions used to reasonably possible alternative assumptions by decreasing or increasing by 5% with all other variables held constant, the impact on valuation is shown in the table below:

Fair value as at 31 December 2024	Sensitivity	Change in valuation
USD 587,580	5%	USD 29,379

Fair value as at 31 December 2023	Sensitivity	Change in valuation
USD -	5%	-

Level 3 Valuation Techniques

The following table shows the valuation techniques used for Level 3 fair values, as well as the significant unobservable inputs used for Level 3 items.

Valuation technique	Significant unobservable inputs	Inputs used
Comparable Company Multiples	EV/Revenue, Last 12 months revenue multiples, Discounts for illiquidity	Unaudited Accounts (Statement of Comprehensive Income / Statement of Financial Position), Comparable Company data (enterprise value, market cap, LTM revenue, LTM EBITDA, LTM EBITDA, LTM revenue growth), Recent market transactions, Relevant post IPO valuations for similar companies
Last transacted value	The fair value of the Company's last transaction is considered to be unobservable	Recently executed purchase price

Level 3 Valuation Methods

For the year ended 31 December 2024, the following valuation methods were applied to the level 3 securities held:

Sub-Fund	Security	Valuation Method
Jupiter Merian Global Equity Income Fund (IRL)	Lukoil PJSC (DR)	Valuation driven by sanctions and restrictions that prevent any trading of Russian equities, with the ongoing conflict giving rise to material uncertainty on any future recoverability
Jupiter Asia Pacific Income Fund (IRL)	Chennai Super Kings Cricket Ltd	Valuation based on trade completed post balance sheet date which was in negotiations as at year end
Merian Asian Equity Income Fund	Chennai Super Kings Cricket Ltd	Valuation based on trade completed post balance sheet date which was in negotiations as at year end

For the year ended 31 December 2023, the following valuation methods were applied to the level 3 securities held:

Sub-Fund	Security	Valuation Method
Jupiter Merian Global Equity Income Fund (IRL)	Lukoil PJSC (DR)	Valuation driven by sanctions and restrictions that prevent any trading of Russian equities, with the ongoing conflict giving rise to material uncertainty on any future recoverability

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(g) Fair Value of Financial Assets and Financial Liabilities (continued)

Sub-Fund	Security	Valuation Method
Jupiter Asia Pacific Income Fund (IRL)	Chennai Super Kings Cricket Ltd	Valuation based on uncertainty on transferability and realisable value
Merian Asian Equity Income Fund	Chennai Super Kings Cricket Ltd	Valuation based on uncertainty on transferability and realisable value

(h) Leverage

Many derivative instruments have a leverage component, adverse changes in the value or level of the underlying asset, rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivative instruments have the potential for unlimited loss regardless of the size of the initial investment.

(i) Global Derivative Exposure

Sensitivity Analysis for Sub-Funds through Commitment Approach

The risk is managed through the commitment approach to quantitatively measure the Sub-Funds' global exposure through the use of financial derivative instruments in line with UCITS Directives and Central Bank regulations for Sub-Funds listed in the tables below.

At the date of this Prospectus, derivatives or instruments and techniques for the purposes of efficient portfolio management are not currently used for the Jupiter UK Smaller Companies Focus Fund. If this policy changes, prior approval of the Shareholders and the Central Bank will be sought and a risk management process will be cleared in advance by the Central Bank in accordance with the requirements of the Central Bank.

The following Sub-Funds will not be leveraged in excess of 10% of their Net Asset Value:

Jupiter China Equity Fund
 Jupiter Asia Pacific Income Fund (IRL)
 Jupiter Global Emerging Markets Focus Fund
 Jupiter Global Emerging Markets Focus ex China Fund

The following Sub-Funds will not be leveraged in excess of 100% of their Net Asset Value:

Jupiter Merian World Equity Fund
 Jupiter Merian North American Equity Fund (IRL)
 Jupiter Emerging Market Debt Fund
 Merian Asian Equity Income Fund²
 Jupiter UK Alpha Fund (IRL)
 Jupiter UK Smaller Companies Focus Fund³
 Jupiter Merian Global Equity Income Fund (IRL)
 Jupiter Gold & Silver Fund
 Jupiter Systematic Consumer Trends Fund
 Jupiter Systematic Demographic Opportunities Fund
 Jupiter Systematic Disruptive Technology Fund
 Jupiter Systematic Healthcare Innovation Fund
 Jupiter Systematic Physical World Fund

² Merian Asian Equity Income Fund ceased operation on 8 December 2022.

³ Jupiter UK Smaller Companies Focus Fund ceased operation on 30 September 2024.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(j) Value at Risk (“VaR”) Method

In the case of the Sub-Funds listed below the Manager uses the VaR method, for all other funds the Commitment Approach is adopted. The relevant Sub-Funds use appropriate Relative and Absolute VaR analysis as outlined in the following table:

Jupiter Global Fixed Income Fund	Absolute	n/a
Jupiter Emerging Market Debt Fund	Relative	JP Morgan EMBI Global Index 65% JPM Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified and 35% JPM EMBI Global Diversified
Jupiter Emerging Market Debt Income Fund	Relative	FTSE 250 Index Excluding Investments Trusts
Jupiter UK Dynamic Long Short Equity Fund	Relative	FTSE 250 Index Excluding Investments Trusts
Jupiter Merian Global Equity Absolute Return Fund	Absolute	n/a
Jupiter Strategic Absolute Return Bond Fund	Absolute	n/a
Jupiter UK Specialist Equity Fund	Absolute	n/a
Jupiter Financials Contingent Capital Fund	Relative	Bloomberg Barclays Contingent Capital Western Europe Index

All Sub-Funds, with the exception of Jupiter Global Fixed Income Fund, that use Absolute VaR have a monthly VaR limit of 20%. The Jupiter Global Fixed Income Fund's monthly VaR limit is 10%.

VaR is a statistically based estimate of the potential loss on the current portfolio from adverse market movements. The VaR measure captures both “general” and “idiosyncratic” market risks. General market risk factors are variables which are driven by macroeconomic, geopolitical and other market-wide considerations, independent of any instrument or single name. They include movements in interest rates, widening or tightening of general spread levels and directional movements in equity market indices, exchange rates, and energy, metal and commodity prices. Changes in associated volatilities and correlations between these risk factors – some of which may be unobservable or only indirectly observable – are also general market risks. Idiosyncratic components are those that cannot be explained by general market movements – broadly, changes in the prices of debt and equity instruments and derivatives linked to them, resulting from factors and events specific to individual names.

VaR expresses potential loss, but only to a certain level of confidence and holding period of 1 and 20 days depending on the Sub-Fund, and there is therefore a specified statistical probability (1%) that actual loss could be greater than the VaR estimate.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(j) Value at Risk (“VaR”) Method (continued)

Global exposure is monitored by the Manager and the Investment Manager on a daily basis. In 2024, FDI global exposure was calculated under the commitment approach as described, while the market risk is calculated utilising the VaR methodology.

31 December 2024	Currency	Confidence Level	Holding Period	Maximum VaR	Minimum VaR	Average VaR	Average Leverage	VaR as at 31/12/24	Total VaR Market Value
Jupiter Global Fixed Income Fund	USD	99.00%	1 day	4.52%	0.00%	3.84%	175.95%	3.58%	11,397,361
Jupiter Emerging Market Debt Fund	USD	99.00%	1 day	5.84%	3.49%	4.40%	15.86%	4.39%	1,589,306
Jupiter Emerging Market Debt Income Fund	USD	99.00%	1 day	4.33%	2.28%	3.02%	8.87%	2.55%	998,318
Jupiter UK Dynamic Long Short Equity Fund	GBP	99.00%	1 day	13.34%	9.61%	11.23%	5.53%	9.69%	6,404,193
Jupiter Merian Global Equity Absolute Return Fund	USD	99.00%	1 day	5.09%	2.29%	3.19%	175.95%	2.78%	77,871,704
Jupiter Strategic Absolute Return Bond Fund	USD	99.00%	1 day	2.51%	0.83%	1.80%	273.84%	1.36%	9,284,281
Jupiter UK Specialist Equity Fund	GBP	99.00%	1 day	3.22%	2.42%	2.74%	137.97%	2.59%	370,925
Jupiter Financials Contingent Capital Fund	USD	99.00%	1 day	4.18%	2.27%	2.88%	82.35%	2.39%	2,915,482

The Sub-Funds do employ leverage, calculated as sum of notionals, to achieve the Sub-Funds objective and to reduce risk, and this has not exceeded the expected level as disclosed in the Sub-Fund’s Prospectus.

31 December 2023	Currency	Confidence Level	Holding Period	Maximum VaR	Minimum VaR	Average VaR	Average Leverage	VaR as at 31/12/23	Total VaR Market Value
Merian Global Dynamic Bond Fund	USD	99.00%	1 day	4.34%	1.21%	3.00%	211.94%	4.28%	13,845,628
Jupiter Emerging Market Debt Fund	USD	99.00%	1 day	5.57%	3.90%	5.03%	28.96%	5.22%	2,041,941
Jupiter Emerging Market Debt Income Fund	USD	99.00%	1 day	4.78%	3.33%	4.17%	28.53%	4.00%	1,691,804
Jupiter UK Dynamic Equity Fund	GBP	99.00%	1 day	15.86%	7.61%	14.31%	6.09%	13.07%	13,250,314
Jupiter Merian Global Equity Absolute Return Fund	USD	99.00%	1 day	4.32%	2.35%	3.32%	185.57%	3.71%	72,915,343
Jupiter Strategic Absolute Return Bond Fund	USD	99.00%	1 day	2.41%	0.64%	1.56%	266.65%	2.41%	22,478,509
Jupiter UK Specialist Equity Fund	GBP	99.00%	1 day	4.66%	2.62%	3.29%	117.09%	3.22%	919,947
Jupiter Financials Contingent Capital Fund	USD	99.00%	1 day	10.96%	3.65%	5.83%	90.90%	3.87%	3,946,353

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

11. Financial Instruments and Associated Risks (continued)

(j) Value at Risk (“VaR”) Method (continued)

A Sub-Fund must ensure that its global exposure relating to FDI does not exceed its total Net Asset Value. A Sub-Fund using the commitment approach to measure its positions in FDI may not therefore be exposed in excess of 100% of its Net Asset Value.

The Manager uses the BlackRock Solutions Aladdin system to calculate VaR. This is an external system, widely used within the financial services industry for the purposes of calculating VaR and associated risk analysis. There has been no examination undertaken of the Investment Manager’s risk system by a regulatory authority, although independent validation has been performed. Daily review of results is undertaken within the risk team to identify any results that would suggest incorrect calculations. Any results falling outside agreed tolerances are investigated. Backtesting of the model is also performed on no less than a monthly basis in line with regulatory requirements.

(k) Custody and Title Risk Statement

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary’s books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary’s books are registered in the depositary’s books within segregated accounts. For other assets, the Depositary shall verify the Company’s ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Company holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Sub-Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Sub-Fund. Therefore, in such jurisdictions, there is a risk that if a sub-custodian becomes bankrupt or insolvent, the Sub-Fund’s beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Sub-Fund. In those jurisdictions where the Sub-Fund’s beneficial ownership of its assets is ultimately recognised, the Sub-Fund may suffer delay and cost in recovering those assets. The Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, such as Russia and Argentina, therefore the assets of a Sub-Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. The Depositary shall maintain an appropriate level of supervision over the sub-custodian and make appropriate enquiries from time to time to confirm that the obligations of the agent continue to be competently discharged.

12. CRS Data Protection Information Notice

The Company hereby provides the following data protection information notice to all Shareholders in the Sub-Funds either as at 31 December 2015 or at any point of time since this date.

For the avoidance of doubt, this notice applies equally to any Shareholders that have ceased to hold shares in the Sub-Funds since January 1, 2016. Furthermore, it should be noted that this notice may be applicable to Controlling Persons of certain Shareholders.

The Company hereby confirms that it intends to take such steps as may be required to satisfy any obligations imposed by (i) the OECD’s Standard for Automatic Exchange of Financial Account Information in Tax Matters (“the Standard”), which therein contains the Common Reporting Standard (“CRS”), as applied in Ireland by means of the relevant international legal framework and Irish tax legislation and (ii) EU Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange information in the field of taxation (“DAC2”), as applied in Ireland by means of the relevant Irish tax legislation, so as to ensure compliance or deemed compliance (as the case may be) with the Standard/CRS and the DAC2 from 1 January 2016.

In this regard, the Company is obliged under Section 891F and Section 891G of the Irish Taxes Consolidation Act, 1997 (as amended) and regulations made pursuant to those sections to collect certain information about each Shareholder’s tax arrangements (and also collect information in relation to relevant Controlling Persons of specific Shareholders).

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

12. CRS Data Protection Information Notice (continued)

In certain circumstances, the Company may be legally obliged to share this information and other financial information with respect to a Shareholder's interests in the Sub-Funds with the Irish Revenue Commissioners (and, in particular situations, also share information in relation to relevant Controlling Persons of specific Shareholders). In turn, and to the extent the account has been identified as a Reportable Account, the Irish Revenue Commissioners will exchange this information with the country of residence of the Reportable Person(s) in respect of that Reportable Account.

In particular, information that may be reported in respect of a Shareholder (and relevant Controlling Persons, if applicable) includes name, address, date of birth, place of birth, account number, account balance or value at year end (or, if the account was closed during such year, the balance or value at the date of closure of the account), any payments (including redemption and dividend/interest payments) made with respect to the account during the calendar year, tax residency(ies) and tax identification number(s).

13. Charges Against the Assets of the Sub-Funds

A number of counterparties used by the Company can utilise charges granting first priority security interest in relation to collateral and principal broker securities relating to the relevant Sub-Fund's accounts. As at 31 December 2024 there are charges in place (31 December 2023: charges in place).

14. Post Statement of Financial Position Events

Effective 1 March 2025, the appointed Investment Manager of the Company changed from Jupiter Investment Management Limited to Jupiter Asset Management Limited. It is noted that there was no change to the features of any of the sub-funds, the operation or management of the sub-funds, their risk profile or the people involved in the management of the sub-funds or the fee level in managing the funds as a result of the transfer of the investment manager role from Jupiter Investment Management Limited to Jupiter Asset Management Limited.

Post year end, constantly changing and conflicting communications around US trade policy triggered volatility in the market. On 2 April 2025, US President Donald Trump imposed large tariffs on several countries. The imposition of these tariffs has led to a volatile atmosphere in the stock markets, with investors cautiously navigating the potential repercussions. Furthermore, the unpredictability of retaliatory tariffs imposed by other nations could further exacerbate market instability. Political and regulatory developments affect market views, confidence and capabilities, and may result in both outflows of assets or change in performance of assets under management.

The Company, the Manager and the Investment Manager remain vigilant and continue to closely monitor and navigate the current market landscape and the related risk exposures and provide effective management of the funds under management.

On 23 April, the Directors approved that the sub-fund, Jupiter Global Emerging Markets Focus ex China Fund, be terminated and all outstanding shares be compulsorily redeemed on 28 May 2025.

There have been no other material events affecting the Sub-Funds subsequent to 31 December 2024, which require amendment to or disclosure in, these financial statements.

15. Financial Statements

These financial statements were approved by the Board of Directors on 24 April 2025.

Significant Purchases and Sales

Under UCITS regulations, a statement of changes in the composition of the portfolio during the reference period is required, displaying all material changes that have occurred in the deposition of the assets of the UCITS. A material change is defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year or aggregate disposals greater than one per cent of the total value of sales. If there are fewer than 20 purchases that met the material changes definition, the UCITS shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the UCITS shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Total Expense Ratios

Swiss Investors Section

This Section is for Swiss Investors

The Total Expense Ratio measures the total costs associated with managing and operating each Sub-Fund. These costs consist primarily of Investment Management Fees and additional expenses such as legal fees, auditor fees and other operational expenses. This disclosure is a requirement for Sub-Funds approved for public distribution in Switzerland.

The total expense ratios of the Sub-Funds for the financial year from 1 January 2024 to 31 December 2024 are as follows:

Sub-Fund	Share Class	Excluding	Including
		Performance Fees TER	Performance Fees* TER
Jupiter China Equity Fund	Class B (USD)	2.89%	2.89%
	Class C (USD)	3.41%	3.41%

21 June 2024	Jupiter Emerging Market Debt Income Fund	Class B (USD) Income

On 1 February 2024, Jupiter Merian Global Dynamic Bond Fund was renamed to Jupiter Global Fixed Income Fund and Jupiter Strategic Absolute Return Bond Fund transitioned from an Article 6 to an Article 8 Sub-Fund under SFDR.

Events During the Financial Year (continued)

Jupiter Merian US Equity Income Fund and Merian European Equity Fund, which both ceased operations in December 2022, were revoked by the Central Bank on 12 March 2024 and 15 April 2024 respectively.

Jupiter Europe (ex UK) Smaller Companies Fund ceased operation on 14 June 2023 and was revoked by the Central Bank on 8 November 2024.

On 1 October 2024, Jupiter UK Dynamic Equity Fund was renamed to Jupiter UK Dynamic Long Short Equity Fund.

The Company's Prospectus and related Supplements were updated with the CBI with effective date 28 November 2024. With the exception of the amendments noted below, all other updates to the Prospectus and Supplements are not considered a material change:

- Amendment to the performance fee calculation for Jupiter Gold & Silver Fund

The following addition was added to the performance fee section of the Supplement: Where a fair value adjustment has been made to the Net Asset Value per Share of the Sub-Fund then this will be excluded for the purposes of the calculation of the performance fees.

- Amendment to the definition of 'Business Days' in relation to Jupiter Asia Pacific Income Fund (IRL)

To better accommodate the days on which the stock market in Australia is open, the 'Business Day' definition was amended to: In respect of the Sub-Fund, means a day (excluding Saturdays, Sundays and public holidays) on which (i) retail banks are open for business in Dublin and London; and (ii) the Australian Securities Exchange is open for business in Sydney.

Continued political unrest

The current global situation presents a tricky period to navigate for the industry, however the Company's Manager and Investment Manager continue to monitor the political unrest globally, and though markets are volatile they are focused on managing the assets under management in line with the products' styles, strategies and objectives with a focus on the longer term and the potential industry opportunities that may arise. There is risk with any political developments that occur, and the Manager and Investment Manager continuously monitor all political situations and specifically any financial instrument holdings that may be affected by situations that arise, while also focusing on the potential for escalations to impact sanctions, cybercrime and the wider economic environment that may impact on funds under management. Political developments affecting market confidence may result in outflows of assets from investment portfolios, which could include asset portfolios held by the Sub-Funds of the Company.

Supplementary Information

Cybersecurity Risk

Cybersecurity breaches may occur allowing an unauthorized party to gain access to assets of the Sub-Funds, Shareholder data, or proprietary information, or may cause the Company, the Manager, the Investment Manager, the Distributor, the Administrator or the Depositary to suffer data corruption or lose operational functionality.

The Sub-Funds may be affected by intentional cybersecurity breaches which include unauthorized access to systems, networks, or devices (such as through “hacking” activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws).

Notwithstanding the existence of policies and procedures designed to detect and prevent such breaches and ensure the security, integrity and confidentiality of such information as well as the existence of business continuity and disaster recovery measures designed to mitigate any such breach or disruption at the level of the Company and its delegates, such a cybersecurity breach could result in the loss or theft of Shareholder data or Sub-Funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs.

Such incidents could cause the Company, the Manager, the Investment Manager/the Distributor, the Administrator, the Depositary, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Shareholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which a Sub-Fund invests, and thereby cause a Sub-Fund’s investments to lose value, as a result of which investors, including the relevant Sub-Fund and its Shareholders, could potentially lose all or a portion of their investment with that issuer.

Soft Commission Arrangements

There were no soft commission arrangements (including commission-sharing arrangements) on behalf of the Company for the financial years ended 31 December 2024 and 31 December 2023.

Net Asset Value Reconciliation

Quoted financial assets at fair value through profit or loss are valued at bid price at close of business on the last trading date rather than mid-market price which is taken at 12pm for European markets and at previous day close for U.S. markets for the purposes of the dealing NAV. A reconciliation between the dealing NAV and reporting NAV is required for the Sub-Funds outlined below.

	Jupiter Asia Pacific Income Fund (IRL) USD	Jupiter Merian North American Equity Fund (IRL) USD	Jupiter Gold & Silver Fund USD
Dealing NAV	172,679,987	267,982,492	752,706,671
Last traded price adjustment	195,741	2,248,409	8,255,646
Reporting NAV	172,875,728	270,230,901	760,962,317

Net Asset Value per Share Reconciliation

The NAV per share impact of the dealing NAV and reporting NAV for the largest share class is outlined below:

	Jupiter Asia Pacific Income Fund (IRL) Class L (USD) Unhedged	Jupiter Merian North American Equity Fund (IRL) Class L (USD) Unhedged	Jupiter Gold & Silver Fund Class U1 (GBP) Unhedged
Dealing NAV per share for the largest share class	5.194	60.056	20.763
Last traded price adjustment	0.006	(0.325)	0.189
Reporting NAV per share for the largest share class	5.200	59.731	20.952

Remuneration Policy

Jupiter Asset Management (Europe) Limited (“JAMEL”)

Decision-making process to determine remuneration policies

Under the Jupiter’s Group’s framework ultimate responsibility in remuneration matters is held by the Board of Directors of Jupiter Fund Management Plc. The Board is supported in remunerated-related issues by the Remuneration Committee (“RemCo”).

The Board is responsible for establishing the Group Remuneration Policy, and with support of the RemCo regularly reviewing the Group Remuneration Policy to meet any important regulatory developments and the objectives of the Group.

The RemCo is delegated with the role of supporting the Board in setting remuneration guidelines, establishing share-based remuneration plans, and approving the aggregate variable remuneration expenditure of the Group. The RemCo ensures that the Remuneration Policy and practices across the Group operate in line with EU regulations that apply to its regulated entities and delegates.

The RemCo regularly reports to the Board on the status of its activities, the development of the remuneration architecture within the Group as well as on the operational implementation of this Policy. The RemCo consists of at least three members of the Board all of whom are Non-Executive Directors.

Jupiter’s remuneration philosophy is aligned with the Group’s tolerance for risk. The Group’s approach provides for remuneration that attracts and retains employees in each local market and motivates them to contribute to the development and growth of its business. The Policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

Link between pay and performance

As described above, Jupiter operates a Group-wide remuneration policy, which applies to all employees across the Group.

Jupiter ensures that any measurement of performance used to evaluate the quantum of variable remuneration elements or pools of variable remuneration elements:

- includes adjustments for current and future risks, taking into account the cost and quantity of the capital and the liquidity required;
- takes into account the need for consistency with the timing and likelihood of the firm receiving potential future revenues incorporated into current earnings;
- is based on the performance of the Group, the individual and the relevant function / business unit or in the case of a fund manager, the fund(s), where financial and non-financial criteria are considered when assessing individual performance; and
- is set within a multi-year framework to ensure that the assessment process is based on longer term performance and associated risks, and to ensure that payment is spread over an appropriate period.

Remuneration Policy (continued)

Identified Staff

The categories of staff for inclusion as Identified Staff for JAMEL include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

The Identified Staff are identified and reviewed on an annual basis by the relevant entities and the RemCo in line with the criteria set out under EU regulations, namely:

If, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as “Identified Staff”. For this purpose, the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance with internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines is considered equivalent in its objectives. The Group’s regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the ‘equivalence standard’ as described.

In line with ESMA Guidelines, proportionality is considered taking into account the following factors:

- The percentage of assets under management;
- Total assets under management; and
- The average ratio between its fixed and variable remuneration paid to staff.

It should be noted that despite use of proportionality, the Group’s compensation arrangements involve high levels of deferral, payment in shares and performance adjustment provisions on commercial and risk management grounds.

Further details in relation to the Qualitative disclosures are included Group Remuneration Policy.

Supplementary Information (continued)

Remuneration Policy (continued)

Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance year 2024 in relation to the funds managed by JAMEL.

JAMEL manages 22 funds / fund structures (22 sub-funds of Jupiter Asset Management Series Plc), with a combined AUM of US\$ 5.9 billion.

Total annual remuneration paid to all Management Company employees		€1,607k
Of which fixed		€1,258k
Of which variable		€349k
Number of Management Company employees remunerated during the year		9
Total remuneration paid to Identified Staff of the Management Company		€22,188k
Of which paid to Senior Management	fixed	€1,423k
	variable	€1,204k
Of which paid to Identified Staff	fixed	€6,214k
	variable	€13,347k
Number of Identified Staff		29
Total annual remuneration paid to Identified Staff in delegate(s):		€10,521k
Of which fixed		€1,498k
Of which variable		€9,023k
Number of beneficiaries		5

Notes

Remuneration for Identified Staff includes remuneration paid to:

- employees of other group companies performing senior management functions for the Management Company.
- senior employees of other group companies who perform fund management activities on behalf of the Management Company under the terms of a delegation agreement between the Management Company and their employer.

In the interests of transparency, the remuneration disclosed for these employees is the total remuneration for activities across all group companies.

Supplementary Information (continued)

Remuneration Policy (continued)

Notes (continued)

In the figures above, fixed remuneration relates to salary, pension and benefits and variable remuneration includes the annual bonus and any long-term incentive awards.

These disclosures are in line with Jupiter's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops Jupiter may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other Jupiter fund disclosures in that same year.

Due to the increasing complexity of the business, the information that is needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

Implementation of the remuneration policy for the Group is subject to an annual independent review. No material outcomes or irregularities were identified as a result of the most recent independent review, which took place in 2024.

Securities Financing Transactions Regulations

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation ("SFTR") which came into effect on 12 January 2016.

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

There were no securities and commodities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) as at 31 December 2024.

In addition, no SFTs were held as at 31 December 2023 or during the year ended 31 December 2024.

Securities Financing Disclosure Regulation ("SFDR")

The following Sub-Funds meet the definition for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and the Annex IV disclosures are included as noted below:

Jupiter Systematic Consumer Trends Fund	428
Jupiter Merian Global Equity Absolute Return Fund.....	435

Jupiter Merian North American Equity Fund (IRL).....	494

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Systematic Consumer Trends Fund**

Legal entity identifier: **213800ZJIU1NTRD32G68**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The social characteristic promoted by the Fund was met, which was to uphold the principles of the UN Global Compact through investment in securities which complied with the UN Global Compact Principles that also had a score higher than the relevant market rate across certain social indicators outlined below, (the "ESG Characteristic").

The Fund did not promote any environmental characteristics.

The Fund did not designate a reference benchmark for the purpose of attaining the social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 88.45% of investments were in compliance with the UN Global Compact Principles and had a score higher than the relevant market rate (determined based on the weighted average of intensity of the constituents of the Index, which is a broad market index), to at least one of the indicators outlined below and are therefore aligned with the promotion of the social characteristic.

The Fund measured the attainment of the social characteristic by investing in securities that:

i) were in compliance with the UN Global Compact Principles; and

ii) had a score higher than the relevant market rate to at least one of the following indicators:

- the promotion of labour management;

- the promotion of product safety and quality; and

- the promotion of research and development, (each an “Indicator”, and together, the “Indicators”).

Additionally, it has been assessed that the portfolio of securities (excluding cash) had a score higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index), across all three Indicators.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of social characteristics marginally decreased over the period. The performance of the social indicator is the main determinant of the overall alignment. As discussed above, the social indicator is linked to investor practice centred on the UN Global Compact Principles.

The social characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that comply with the UN Global Compact Principles and achieve a score surpassing the relevant market rate in at least one of the following three indicators: the promotion of labour management, the promotion of product safety and quality, and the promotion of research and development. In addition to the foregoing, the Fund also separately measures the attainment of the social characteristic at a portfolio level through seeking to invest in a portfolio of investments that has scores, in relation to all three indicators, that is higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index).

In the previous reference period, 91.72% of eligible securities were aligned with the social characteristic (compared to 88.45% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund’s portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
AMAZON COM INC	Broadline Retail	9.40	United States
TESLA INC	Automobiles	3.26	United States
BOOKING HOLDINGS INC	Hotels, Restaurants & Leisure	2.71	United States

CHIPOTLE MEXICAN GRILL INC	Hotels Restaurants & Leisure	1.38	United States
PDD HOLDINGS ADS INC	Broadline Retail	1.33	Ireland
FRONTDOOR INC	Diversified Consumer Services	1.32	United States
TESCO PLC	Consumer Staples Distribution & Retail	1.31	United Kingdom
AIRBNB INC CLASS A	Hotels, Restaurants & Leisure	1.28	United States

Asset allocation describes the share of investments in specific assets.

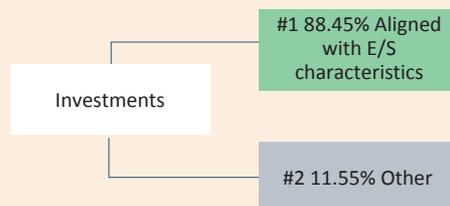

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

88.45% of investments (with a minimum threshold of 60%) were aligned with the social characteristic promoted by the Fund at the security level.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the social characteristic promoted by the Fund at the security level, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

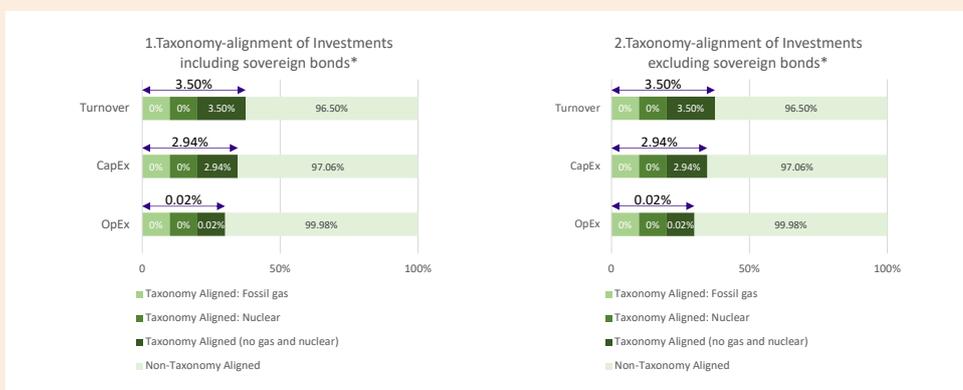

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 3.49%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The overall EU Taxonomy alignment for the Fund declined compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment declined from 4.63% to 3.50% and 3.98% to 2.94% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment declined from 4.73% to 3.50% and 4.07% to 2.94% respectively.

- In respect of OpEx (including sovereign bonds) and OpEx (excluding sovereign bonds), the EU Taxonomy alignment declined from 0.03% to 0.02% and 0.04% to 0.02% respectively.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable investments.

● **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable investments.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any which were not aligned with the social characteristics promoted by the Fund. The Fund’s holdings were assessed against minimum environmental and social safeguards (which include prohibition from investing in companies involved in certain activities). Full details are disclosed in the Fund’s Prospectus.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Merian Global Equity Absolute Return Fund**

Legal entity identifier: **5493004U5U0PV5FQL651**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Both the environmental and social characteristics promoted by the Fund were met. These were:

- (i) the promotion of portfolio carbon efficiency; and
- (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was measured through seeking to invest in a portfolio of investments that had on a net basis, a level of carbon emissions intensity lower than zero (determined based on the weighted average carbon emissions intensity of all the Fund's holdings).

The social characteristic promoted by the Fund was measured through the monitoring and evaluation of companies against the UN Global Compact Principles (particularly any involvement in violations of one or more of the 10 principles).

The Fund did not designate a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that the portfolio of securities achieved, on a net basis, a level of carbon emissions intensity lower than zero according to the stated methodology summarised above and is therefore aligned with the promotion of the E characteristic.

It has been assessed that during the year, 100.00% of eligible securities in the portfolio (excluding sovereigns) were in compliance with the UN Global Compact Principles (which applies solely to corporates), and is therefore aligned with the promotion of the social characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics was broadly stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the carbon efficiency.

The environmental characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that has on a net basis, a level of carbon emissions intensity that is lower than zero. The level of carbon emissions intensity of the Fund's portfolio is determined based on the weighted average carbon emissions intensity of all the Fund's holdings as opposed to on the basis of a minimum share of assets aligned with the environmental characteristic. Investments will be monitored, and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 43.92% of eligible securities were aligned with the E/S characteristics (compared to 43.37% this period). Refer to the asset allocation (page 438) for determining the share of investments aligned with the social characteristics promoted by the Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund's portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

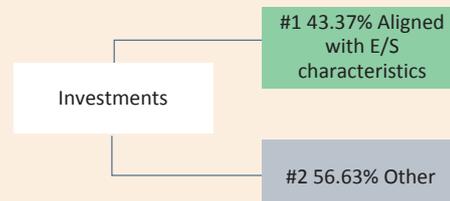

43.37% of the Fund's investment portfolio (with a minimum threshold of 35%) was aligned with the social characteristic promoted by the Fund.

When determining the share of investments aligned with the social characteristics promoted by the Fund:

- 1) relevant net long derivative and equity positions were considered to align with the social characteristic promoted by the Fund;
- 2) all net short positions were not considered irrespective of whether they aligned with the social characteristic promoted by the Fund; and
- 3) transactions entered into solely for currency hedging purposes were excluded (i.e., they were not factored into the minimum share of investments figure or into the value of the overall portfolio).

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the social characteristic promoted by the Fund, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

The environmental characteristic promoted by the Fund (portfolio carbon intensity) was measured through seeking to invest in a portfolio of investments that had, on a net basis, a level of carbon emissions intensity lower than zero. The level of carbon emissions intensity of the Fund's portfolio was determined based on the weighted average carbon emissions intensity of all of the Fund's holdings as opposed to on the basis on a share of assets aligned with the environmental characteristic.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

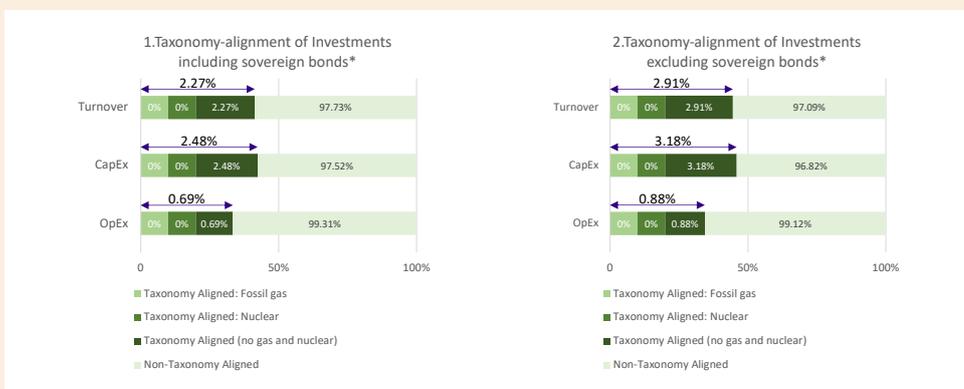

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.04%. The share of investments made in enabling activities was 0.90%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The overall EU Taxonomy alignment for the Fund was improved compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 0.85% to 2.27% and 0.81% to 2.48% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 1.40% to 2.91% and 1.37% to 3.18% respectively.

- In respect of OpEx (including sovereign bonds) and OpEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 0.26% to 0.69% and 0.43% to 0.88% respectively.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable Investments.

● **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable investments.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any which were not aligned with environmental and social characteristics promoted by the Fund. The Fund’s holdings were assessed against minimum environmental and social safeguards (which include prohibition from investing in companies involved in certain activities). Full details are disclosed in the Fund’s Prospectus.

The Fund used net long derivatives for the purposes of attaining the social characteristics it promoted. The underlying companies of these derivative positions aligned with the social characteristic promoted by the Fund. Net short positions were not considered, irrespective of whether they aligned with the social characteristic promoted by the Fund.

In relation to the promotion of the environmental characteristic, derivatives allowed the Fund to achieve short exposure to companies with the level of carbon emissions intensity of the Fund’s portfolio determined based on the net weighted average carbon emissions intensity of all of the Fund’s holdings. The weighted average carbon emissions intensity of the short investments was therefore higher than the weighted average carbon emissions intensity of the long positions at all times, resulting in a net weighted average carbon emissions intensity that is less than zero.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held cash and cash equivalents. No minimum environmental or social safeguards were applied in relation to such holdings. This category also includes net short positions and may have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Systematic Physical World Fund**

Legal entity identifier: **213800A8RA7SYO6E6T15**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Both the environmental and social characteristics promoted by the Fund were met. These were:

- (i) the promotion of portfolio carbon efficiency; and
- (ii) the upholding of responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was measured through seeking to invest in investments that had a level of carbon emissions intensity lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index).

The social characteristic promoted by the Fund was to uphold the principles of the UN Global Compact through investment in securities which comply with the UN Global Compact Principles and had a score higher than the relevant market rate across certain social indicators outlined below.

The Fund did not designate a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 75.59% of investments achieved, a level of carbon emissions intensity lower than the market rate according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

Additionally, it has been assessed that the portfolio of securities (excluding cash) achieved a level of carbon emission intensity that is lower than the relevant market rate.

It has been assessed that at the security level, 94.10% of investments were in compliance with the UN Global Compact Principles and had a score higher than the relevant market rate (determined based on the weighted average of intensity of the constituents of the Index, which is a broad market index), to at least one of the indicators outlined below and are therefore aligned with the promotion of the social characteristic.

The Fund measured the attainment of the social characteristic by investing in securities that:

- i) were in compliance with the UN Global Compact Principles; and
- ii) had a score higher than the relevant market rate to at least one of the following indicators:
 - the promotion of labour management; and
 - the promotion of health and safety, (each an “Indicator”, and together, the “Indicators”).

Additionally, it has been assessed that the portfolio of securities (excluding cash) had a score higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index), across both Indicators.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics declined over the period due to the performance of the underlying indicators.

As discussed above, the environmental indicator is linked to investor practice centred on the carbon efficiency. The environmental characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that has a level of carbon emissions intensity that is lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index and not a designed sustainability reference benchmark).

The social characteristic promoted by the Fund is to uphold the principles of the UN Global Compact and a score surpassing the relevant market rate in at least one of the following two indicators: the promotion of labour management and the promotion of health and safety. In addition to the foregoing, the Fund also separately measures the attainment of the social characteristic at a portfolio level through seeking to invest in a portfolio of investments that has scores, in relation to both indicators, that is higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index).

In the previous reference period, 80.85% of the portfolio was aligned with the environmental characteristic (compared to 75.59% this period) and 95.54% of eligible securities were aligned with the social characteristic (compared to 94.10% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund’s portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
CONOCOPHILLIPS	Oil, Gas & Consumable Fuels	2.11	United States
CATERPILLAR INC	Machinery	2.10	United States
WW GRAINGER INC	Trading Companies & Distributors	1.81	United States
RELX PLC	Professional Services	1.75	United Kingdom
WOLTERS KLUWER NV	Professional Services	1.72	Netherlands
EOG RESOURCES INC	Oil, Gas & Consumable Fuels	1.67	United States
TRANE TECHNOLOGIES PLC	Building Products	1.61	Ireland
TOTALENERGIES	Oil, Gas & Consumable Fuels	1.44	France
IBERDROLA SA	Electric Utilities	1.42	Spain
WOODWARD INC	Aerospace & Defense	1.36	United States
HNI CORP	Commercial Services & Supplies	1.26	United States
EDISON INTERNATIONAL	Electric Utilities	1.24	United States
ENERPAC TOOL GROUP CORP CLASS A	Machinery	1.22	United States
STAR MICRONICS LTD	Machinery	1.21	Japan
CENTRAL GLASS LTD	Building Products	1.21	Japan

Asset allocation describes the share of investments in specific assets.

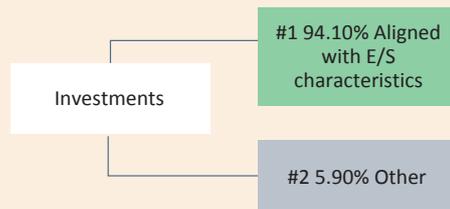

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

A minimum of 75.59% of investments were aligned with the environmental or social characteristics promoted by the Fund at the security level. 75.59% of investments were aligned with the environmental characteristic and 94.10% of investments were aligned with the social characteristic promoted by the Fund at the security level.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the environmental or social characteristics promoted by the Fund at the security level, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

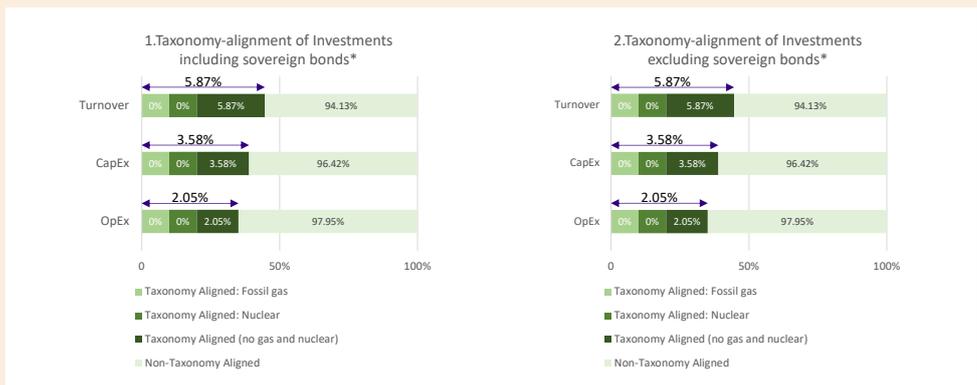

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.09%. The share of investments made in enabling activities was 4.00%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The overall EU Taxonomy alignment for the Fund improved compared to the previous period. However, it should be noted that there was a slight decline in OPEX alignment.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 3.57% to 5.87% and 3.14% to 3.58% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 3.57% to 5.87% and 3.14% to 3.58% respectively.

- In respect of OpEx (including sovereign bonds) and OpEx (excluding sovereign bonds), the EU Taxonomy alignment declined from 2.20% to 2.05% and 2.20% to 2.05% respectively.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any that were not aligned with either of the environmental and social characteristics promoted by the Fund.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Strategic Absolute Return Bond Fund**

Legal entity identifier: **549300EQB4ZUFBSHYE93**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Jupiter Strategic Absolute Return Bond Strategy promotes environmental and social characteristics on an ongoing basis.

i) Promotion of progress towards to a low carbon economy.

In respect of sovereign issuers, the Fund uses third-party data to assess the current carbon intensity and energy efficiency of a country's economy and how these factors have trended over recent years. Only investments issued by sovereigns that meet the required threshold will be considered aligned with this characteristic. In respect of corporate issuers, the Fund uses third-party data to assess the environmental risk of holdings within the portfolio and seeks to invest in securities issued by companies with an environmental risk score of 'negligible or low'.

ii) Upholding of responsibilities to human rights.

In respect of sovereign issuers, the Fund assesses investments against the social violations principal adverse impact indicators, using third-party data. In respect of corporate issuers, the Fund seeks to invest in securities issued by companies that comply with the UN Global Compact Principles. The UN Global Compact Principles are a voluntary initiative based on chief executive officer (CEO) commitments to implement universal sustainability principles and take steps to support UN goals. Where a corporate issuer has been determined by the Investment Manager as having breached the UN Global Compact Principles, investment in securities issued by that issuer will only be considered to be aligned with the social characteristic promoted by the Fund where the Investment Manager is satisfied that appropriate remedial actions have been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 77.35% of the portfolio is making progress towards a low carbon economy according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of the portfolio is in compliance with the UN Global Compact Principles and therefore is aligned with the promotion of the social characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics was 77.35% over the period. There is no comparison to previous periods because the Fund was launched as an Art 8 fund from 1st February 2024. Therefore values are given from 1st February to 31 December 2024.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
TNOTE 0.5 31-MAR-2025	Government	7.00	United States

Asset allocation describes the share of investments in specific assets.

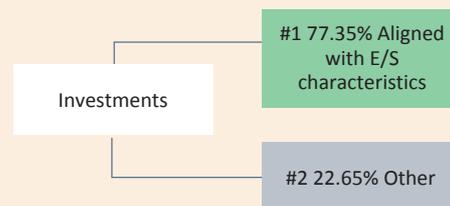

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

77.35% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the E/S characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

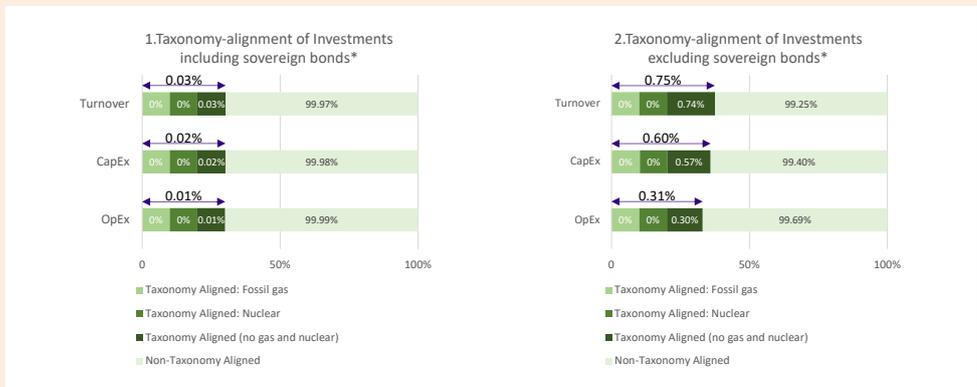

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.03%. The share of investments made in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

Prior year comparisons are not available as the Fund was not disclosing under SFDR Article 8 during the prior period.

The Fund went live as an Article 8 fund from 1st February 2024. Therefore values are given from 1st February to 31 December 2024.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable investments.

 **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any that were not aligned with the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted a detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the Net Zero Investment Framework (NZIF) guidance. The investment manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The investment manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the investment manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The investment manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Systematic Disruptive Technology Fund**

Legal entity identifier: **213800U5D60S78CS9758**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The social characteristic promoted by the Fund was met, which was to uphold the principles of the UN Global Compact through investment in securities which complied with the UN Global Compact Principles that also had a score higher than the relevant market rate across certain social indicators outlined below, (the “ESG Characteristic”).

The Fund did not promote any environmental characteristics.

The Fund did not designate a reference benchmark for the purpose of attaining the social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 85.81% of investments were in compliance with the UN Global Compact Principles and had a score higher than the relevant market rate (determined based on the weighted average of intensity of the constituents of the Index, which is a broad market index), to at least one of the indicators and are therefore aligned with the promotion of the social characteristic.

The Fund measured the attainment of the social characteristics by investing in securities that:

i) were in compliance with the UN Global Compact Principles; and

ii) had a score higher than the relevant market rate to at least one of the following indicators:

- the promotion of human capital development;

- the promotion of privacy and data security; and

- the promotion of research and development, (each an “Indicator”, and together, the “Indicators”).

Additionally, it has been assessed that the portfolio of securities (excluding cash) had a score higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index), across all three Indicators.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of social characteristics declined over the period due to the performance of the underlying indicators. The performance of the social indicator is the main determinant of the overall alignment. As discussed above, the social indicator is linked to investor practice centred on the UN Global Compact Principles.

The social characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that comply with the UN Global Compact Principles and achieve a score surpassing the relevant market rate in at least one of the following three indicators: the promotion of human capital development, the promotion of privacy and data security, and the promotion of research and development. In addition to the foregoing, the Fund also separately measures the attainment of the social characteristic at a portfolio level through seeking to invest in a portfolio of investments that has scores, in relation to all three indicators, that is higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index).

In the previous reference period, 89.50% of eligible securities were aligned with the social characteristic (compared to 85.81% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund’s portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

Largest Investments	Sector	% of Net Assets	Country
NVIDIA CORP	Semiconductors & Semiconductor Equipment	7.91	United States
ALPHABET INC CLASS A	Interactive Media & Services	6.73	United States
VISA INC CLASS A	Financial Services	5.47	United States

ALIBABA GROUP HOLDING LTD	Broadline Retail	1.63	China

Asset allocation describes the share of investments in specific assets.

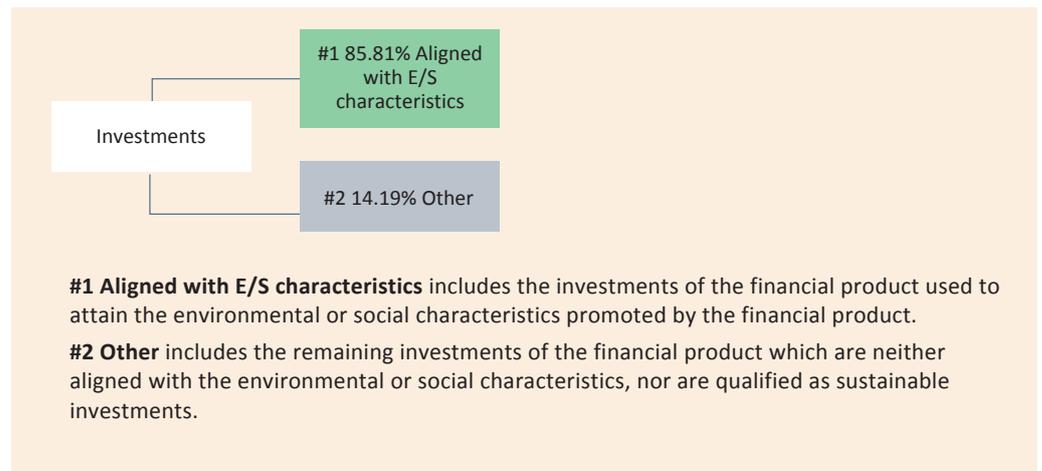

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

85.81% of investments were aligned with the social characteristic promoted by the Fund at the security level.

The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned with the social characteristic promoted by the Fund at the security level, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

● In which economic sectors were the investments made?

Refer to table above in top investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

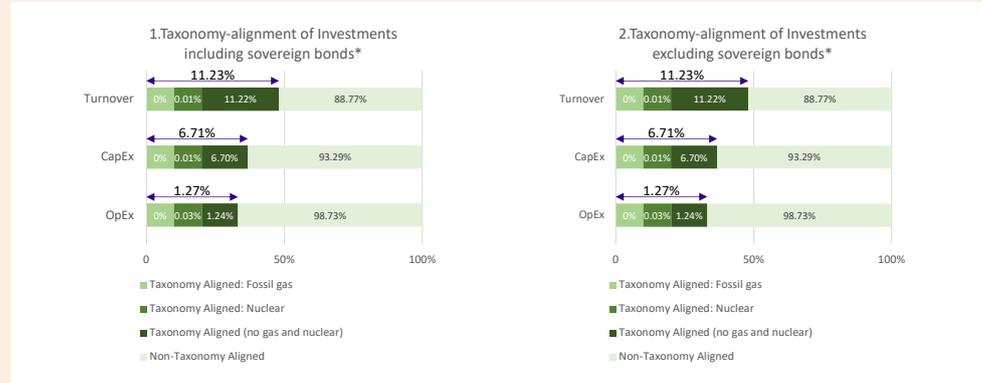

Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the share revenue of from green activities of investee companies

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 10.78%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The overall EU Taxonomy alignment for the Fund increased compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 8.70% to 11.23% and 5.29% to 6.71% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 8.73% to 11.23% and 5.31% to 6.71% respectively.

- In respect of OpEx (including sovereign bonds), the EU Taxonomy alignment did not change over the period. In respect of OpEx (excluding sovereign bonds), the EU Taxonomy alignment declined from 1.28% to 1.27%.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any which were not aligned with the social characteristics promoted by the Fund. The Fund’s holdings were assessed against minimum environmental and social safeguards (which include prohibition from investing in companies involved in certain activities). Full details are disclosed in the Fund’s Prospectus.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Systematic Healthcare Innovation Fund**

Legal entity identifier: **213800E9HGHVAGHYK125**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The social characteristic promoted by the Fund was met, which was to uphold the principles of the UN Global Compact through investment in securities which complied with the UN Global Compact Principles and had a score higher than the relevant market rate across certain social indicators outlined below, (the "ESG Characteristic").

The Fund did not promote any environmental characteristics.

The Fund did not designate a reference benchmark for the purpose of attaining the social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 90.41% of investments were in compliance with the UN Global Compact Principles and had a score higher than the relevant market rate (determined based on the weighted average of intensity of the constituents of the Index, which is a broad market index), to at least one of the indicators and are therefore aligned with the promotion of the social characteristic.

The Fund measured the attainment of the social characteristics by investing in securities that:

- i) were in compliance with the UN Global Compact Principles; and
- ii) had a score higher than the relevant market rate to at least one of the following indicators:
 - the promotion of human capital development;
 - the promotion of product safety and quality; and
 - the promotion of research and development, (each an “Indicator”, and together, the “Indicators”).

Additionally, it has been assessed that the portfolio of securities (excluding cash) had a score higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index), across all three Indicators.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of social characteristics declined modestly over the period due to the performance of the underlying indicators. The performance of the social indicator is the main determinant of the overall alignment. As discussed above, the social indicator is linked to investor practice centred on the UN Global Compact Principles.

The social characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that comply with the UN Global Compact Principles and achieve a score surpassing the relevant market rate in at least one of the following three indicators: the promotion of human capital development, the promotion of privacy and data security, and the promotion of research and development. In addition to the foregoing, the Fund also separately measures the attainment of the social characteristic at a portfolio level through seeking to invest in a portfolio of investments that has scores, in relation to all three indicators, that is higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index).

In the previous reference period, 94.54% of eligible securities were aligned with the social characteristic (compared to 90.41% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

Largest Investments	Sector	% of Net Assets	Country

Asset allocation describes the share of investments in specific assets.

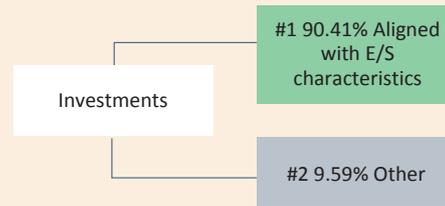

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

90.41% of investments were aligned with the social characteristic promoted by the Fund at the security level.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the social characteristic promoted by the Fund at the security level, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of social characteristics.

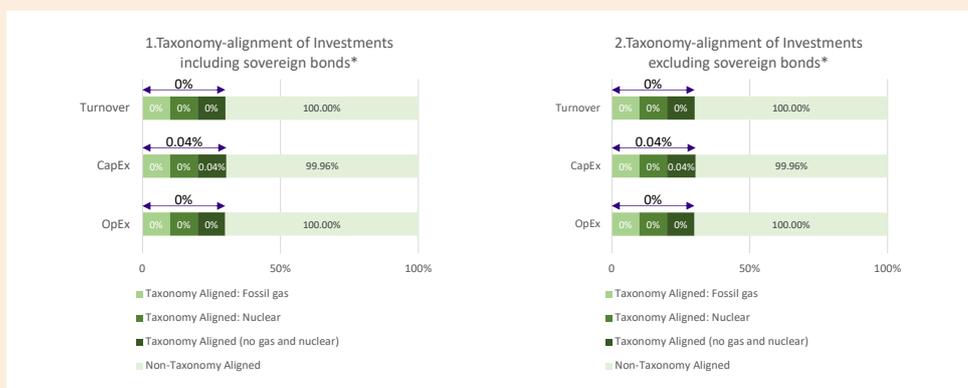

Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the share revenue of from green activities of investee companies

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The overall EU Taxonomy alignment for the Fund remained broadly stable compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment did not change over the period.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment did not change over the period.

- In respect of OpEx, the EU Taxonomy alignment did not change over the period.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable investments.

 **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any which were not aligned with the social characteristics promoted by the Fund.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Global Emerging Markets Focus Fund**

Legal entity identifier: **549300EMHZSS6I8U1682**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was pursued through the application of the Investment Manager's implementation of the Net Zero Investment Framework (NZIF) which includes prioritisation of engagement activities based on underlying assessments. Industry guidance through the NZIF was utilised to assess a company's status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the investment manager classifies as high impact based on the NZIF's material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager's investment due diligence process included an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 49.11% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of eligible securities (excluding cash) is in compliance with the UN Global Compact Principles therefore is aligned with the promotion of the social characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics has remained broadly in line with the performance over the previous period due to the performance of the underlying indicators. (48.84% E alignment and 100.00% S alignment in the previous reference period.)

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Semiconductors & Semiconductor Equipment	9.45	Taiwan (Republic of China)
MERCADOLIBRE INC	Broadline Retail	7.22	Argentina
BANK OF GEORGIA GROUP PLC	Banks	6.83	Georgia
HDFC BANK ADR REPRESENTING THREE L	Banks	4.99	India
BANK CENTRAL ASIA	Banks	4.89	Indonesia
BAJAJ FINANCE LTD	Consumer Finance	3.85	India
ASPEED TECHNOLOGY INC	Semiconductors & Semiconductor Equipment	3.40	Taiwan (Republic of China)
TECHTRONIC INDUSTRIES LTD	Machinery	3.24	Hong Kong
LEEJAM SPORTS	Hotels, Restaurants & Leisure	3.22	Saudi Arabia
MASTERCARD INC CLASS A	Financial Services	3.10	United States
LOCALIZA RENT A CAR SA	Ground Transportation	3.04	Brazil
KWEICHOW MOUTAI LTD A	Beverages	3.00	China

MEITUAN	Hotels, Restaurants & Leisure	2.88	China

Asset allocation describes the share of investments in specific assets.

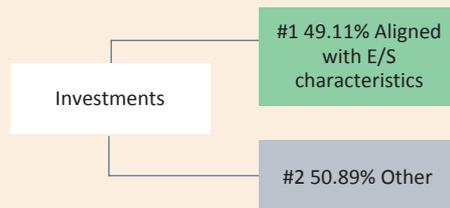

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

49.11% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

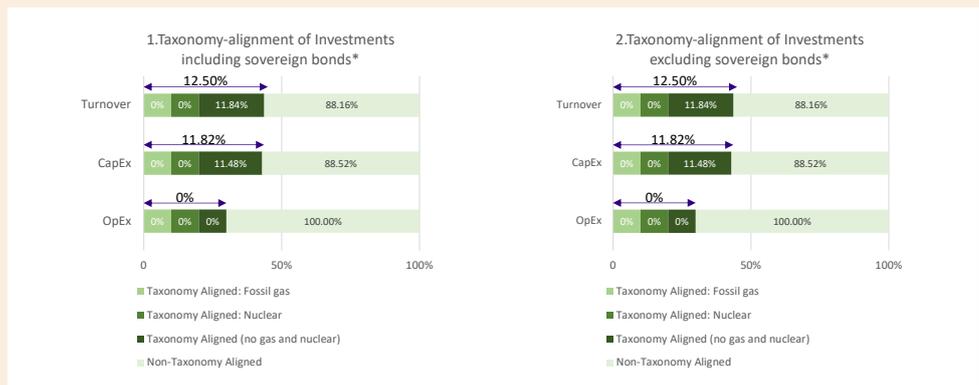

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 11.83%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment for the Fund improved compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 4.10% to 11.84% and 3.99% to 11.48% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 4.11% to 11.84% and 4.00% to 11.48% respectively.

- In respect of OpEx, the EU Taxonomy alignment did not change over the period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned with the ESG Characteristics promoted by the Fund. The Fund’s holdings were assessed against minimum environmental and social safeguards (which include prohibition from investing in companies involved in certain activities). Full details are disclosed in the Fund’s Prospectus.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Global Emerging Markets Focus ex China Fund**

Legal entity identifier: **5493000L4AJTXG27KI79**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

It has been assessed that 59.66% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of eligible securities are in compliance with the UN Global Compact principles therefore is aligned with the promotion of the social characteristic.

- **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has declined over the previous period due to the performance of the underlying indicators. (68.00% E alignment and 100.00% S alignment in the previous reference period.)

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF. NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 68.00% of eligible securities were aligned with the E/S characteristics (compared to 59.66% this period).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Semiconductors & Semiconductor Equipment	9.46	Taiwan (Republic of China)

What was the proportion of sustainability-related investments?

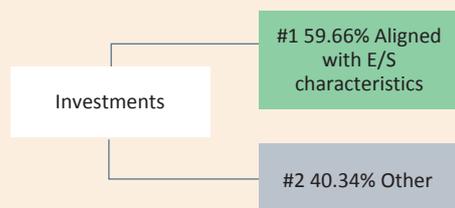

Not applicable as the Fund has not committed to make sustainable investments.

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

59.66% of the Fund’s investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned with the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

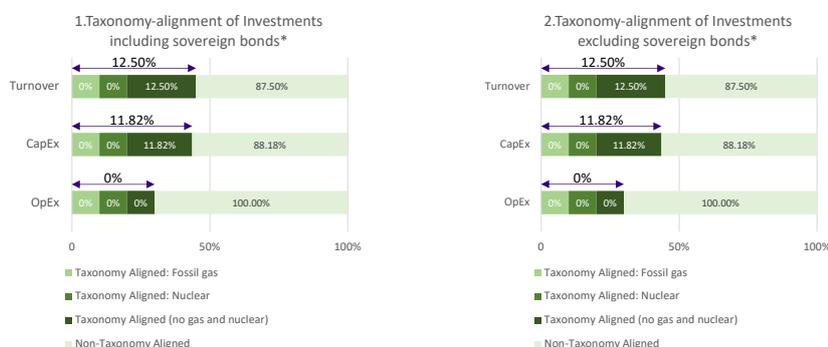

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 12.49%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The overall EU Taxonomy alignment for the Fund was improved compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 9.10% to 12.50% and 8.59% to 11.82% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 9.11% to 12.50% and 8.60% to 11.82% respectively.

- In respect of OpEx, the EU Taxonomy alignment did not change over the period.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned with the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted a detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Systematic Demographic Opportunities Fund**

Legal entity identifier: **213800K9XV9914FHB976**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The social characteristic promoted by the Fund was met, which was to uphold the principles of the UN Global Compact through investment in securities which comply with the UN Global Compact Principles and had a score higher than the relevant market rate across certain social indicators outlined below, (the "ESG Characteristic").

The Fund did not promote any environmental characteristics.

The Fund did not designate a reference benchmark for the purpose of attaining the social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 84.00% of investments were in compliance with the UN Global Compact Principles and had a score higher than the relevant market rate (determined based on the weighted average of intensity of the constituents of the Index, which is a broad market index), to at least one of the indicators and are therefore aligned with the promotion of the social characteristic.

The Fund measured the attainment of the social characteristic by investing in securities that:

- i) were in compliance with the UN Global Compact Principles and;
- ii) had a score higher than the relevant market rate to at least one of the following indicators:
 - the promotion of human capital development;
 - the promotion of privacy and data security; and
 - the promotion of research and development, (each an “Indicator”, and together, the “Indicators”).

Additionally, it has been assessed that the portfolio of securities (excluding cash) had a score higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index), across all three Indicators.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of social characteristics remained broadly stable over the period. The performance of the social indicator is the main determinant of the overall alignment. As discussed above, the social indicator is linked to investor practice centred on the UN Global Compact Principles.

The social characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that comply with the UN Global Compact Principles and achieve a score surpassing the relevant market rate in at least one of the following three indicators: the promotion of human capital development, the promotion of privacy and data security, and the promotion of research and development. In addition to the foregoing, the Fund also separately measures the attainment of the social characteristic at a portfolio level through seeking to invest in a portfolio of investments that has scores, in relation to all three indicators, that is higher than the relevant market rate (determined based on the weighted average of the constituents of the Index, which is a broad market index).

In the previous reference period, 84.55% of eligible securities were aligned with the social characteristic (compared to 84.00% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund’s portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

Largest Investments	Sector	% of Net Assets	Country

Asset allocation describes the share of investments in specific assets.

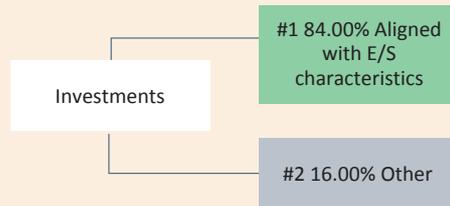

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

84.00% of investments were aligned with the social characteristic promoted by the Fund at the security level.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the social characteristic promoted by the Fund at the security level, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

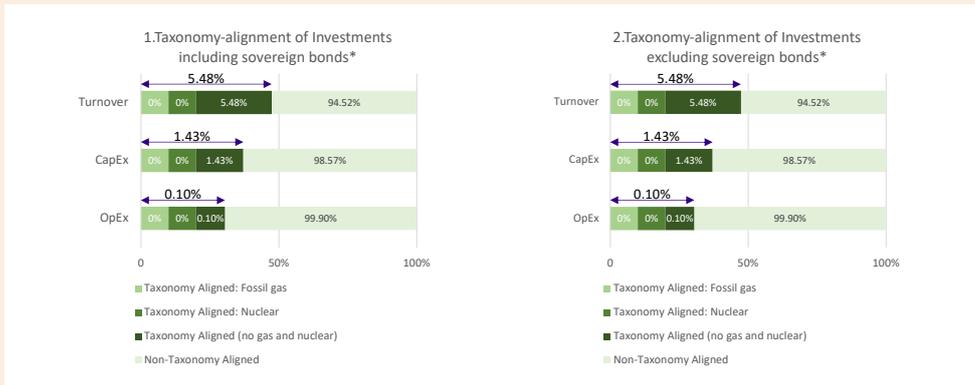

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 5.45%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The overall EU Taxonomy alignment for the Fund improved compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 3.38% to 5.48% and 0.03% to 1.43% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 3.43% to 5.48% and 0.03% to 1.43% respectively.

- In respect of OpEx (including sovereign bonds) and OpEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 0.01% to 0.10% and 0.01% to 0.10% respectively.

It should be noted that market participants continue to experience fundamental challenges due to the lack of data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any which were not aligned with the social characteristics promoted by the Fund. The Fund's holdings were assessed against minimum environmental and social safeguards (which include prohibition from investing in companies involved in certain activities). Full details are disclosed in the Fund's Prospectus.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Jupiter Merian World Equity Fund**

Legal entity identifier: **549300OPT1KILLME7RY70**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Both the environmental and social characteristics promoted by the Fund were met. These were:

- (i) the promotion of portfolio carbon efficiency; and
- (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was measured through seeking to invest in a portfolio of investments that had a level of carbon emissions intensity lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index).

The social characteristic promoted by the Fund was measured through the monitoring and evaluation of companies against the UN Global Compact Principles (particularly any involvement in violations of one or more of the 10 principles).

The Fund did not designate a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 87.95% of securities achieved a level of carbon emissions intensity lower than the market rate according to the stated methodology summarised above and is therefore aligned with the promotion of the E characteristic.

Additionally, it has been assessed that the portfolio of securities (excluding cash) achieved a level of carbon emission intensity that is lower than the relevant market rate.

It has been assessed that 100.00% of the portfolio of securities (excluding cash) is in compliance with the UN Global Compact Principles and is therefore aligned with the promotion of the social characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has remained stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the carbon efficiency. The environmental characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that has a level of carbon emissions intensity that is lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index and not a designed sustainability reference benchmark).

In the previous reference period, 87.72% of eligible securities were aligned with the E/S Characteristic (compared to 87.95% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund's portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
APPLE INC	Technology Hardware, Storage & Peripherals	4.24	United States
NVIDIA CORP	Semiconductors & Semiconductor Equipment	4.11	United States
MICROSOFT CORP	Software	3.73	United States
ALPHABET INC	Interactive Media & Services	2.78	United States
AMAZON COM INC	Broadline Retail	1.90	United States
META PLATFORMS INC CLASS A	Interactive Media & Services	1.54	United States
NETFLIX INC	Entertainment	0.90	United States
NOVO NORDISK CLASS B	Pharmaceuticals	0.90	Denmark
VISA INC CLASS A	Financial Services	0.79	United States
VERIZON COMMUNICATIONS INC	Diversified Telecommunication Services	0.71	United States
BOOKING HOLDINGS INC	Hotels, Restaurants & Leisure	0.67	United States

ASML HOLDING NV	Semiconductors & Semiconductor Equipment	0.63	Netherlands
GLAXOSMITHKLINE	Pharmaceuticals	0.61	United Kingdom
SPROUTS FARMERS MARKET INC	Consumer Staples Distribution & Retail	0.57	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What was the proportion of sustainability-related investments?

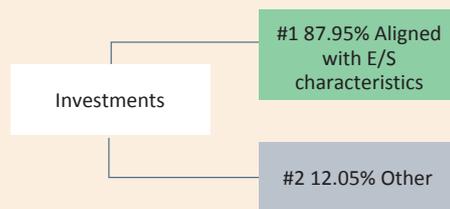

Not applicable as the Fund has not committed to make sustainable investments.

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

87.95% of the Fund's investment portfolio was aligned with the environmental or social characteristic promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the environmental or social characteristics promoted by the Fund, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

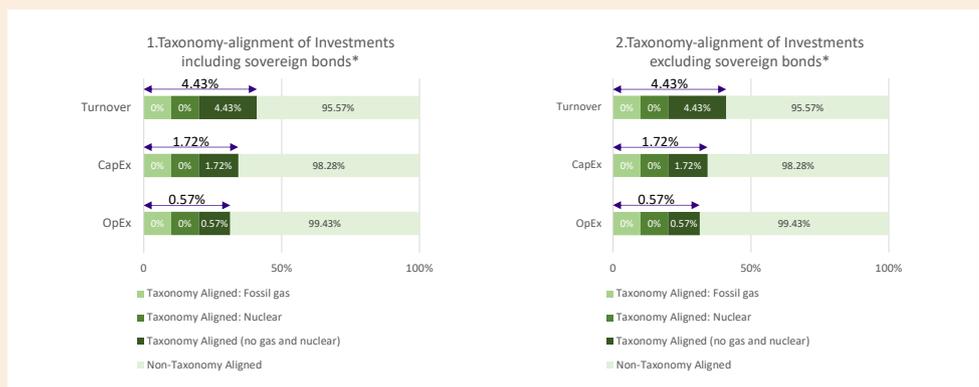

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.01%. The share of investments made in enabling activities was 3.50%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The overall EU Taxonomy alignment for the Fund improved compared to the previous period.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover and CapEx (including sovereign bonds), the EU Taxonomy alignment improved from 1.63% to 4.43% and 0.91% to 1.72% respectively.

- In respect of Turnover and CapEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 1.64% to 4.43% and 0.92% to 1.72% respectively.

- In respect of OpEx (including sovereign bonds) and OpEx (excluding sovereign bonds), the EU Taxonomy alignment improved from 0.33% to 0.57% and 0.33% to 0.57% respectively.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any which were not aligned with environmental and social characteristics promoted by the Fund.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Jupiter Merian North American Equity Fund (IRL)**

Legal entity identifier: **5493008UBVEF49FVZN55**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Both the environmental and social characteristics promoted by the Fund were met. These were:

- (i) the promotion of portfolio carbon efficiency; and
- (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was measured through seeking to invest in a portfolio of investments that had a level of carbon emissions intensity lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index).

The social characteristic promoted by the Fund was measured through the monitoring and evaluation of companies against the UN Global Compact Principles (particularly any involvement in violations of one or more of the 10 Principles).

The Fund did not designate a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that at the security level, 88.57% of securities achieved a level of carbon emissions intensity lower than the market rate according to the stated methodology summarised above and is therefore aligned with the promotion of the E characteristic.

Additionally, it has been assessed that the portfolio of securities (excluding cash) achieved a level of carbon emission intensity that is lower than the relevant market rate.

It has been assessed that during the year, 100.00% of the portfolio of securities (excluding cash) was in compliance with the UN Global Compact Principles and is therefore aligned with the promotion of the social characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has remained stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the carbon efficiency. The environmental characteristic promoted by the Fund involves seeking to invest in a portfolio of investments that has a level of carbon emissions intensity that is lower than the market rate (determined based on the weighted average carbon emissions intensity of the constituents of the Index, which is a broad market index and not a designed sustainability reference benchmark).

In the previous reference period, 89.02% of eligible securities were aligned with the E/S characteristics (compared to 88.57% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were factored into the Fund's portfolio construction and rebalancing processes. A list of the key principal adverse impact indicators considered by the Fund can be found on the website:

<https://www.jupiteram.com/global/en/corporate/sustainability-at-jupiter/sustainable-finance-disclosure-regulation/>

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29 December 2023 - 31 December 2024.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
APPLE INC	Technology Hardware, Storage & Peripherals	5.63	United States

Asset allocation describes the share of investments in specific assets.

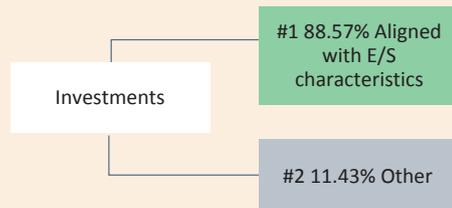

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

● What was the asset allocation?

88.57% of the Fund's investment portfolio was aligned with the environmental or social characteristic promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned with the environmental or social characteristics promoted by the Fund, investments for which relevant data was not available and/or cash and cash equivalents held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

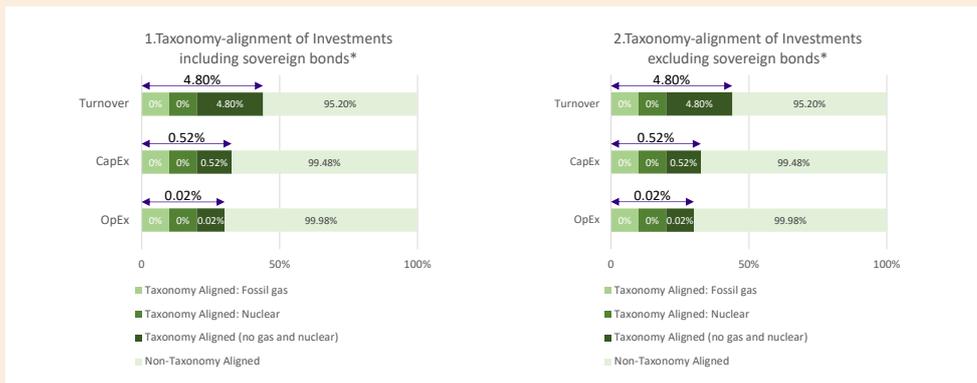

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 4.33%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

However, it should be noted that there was a slight decline in CAPEX alignment.

Over the previous reference period, the overall EU Taxonomy alignment of the Fund has changed as follows (combining Fossil gas, Nuclear and Other taxonomy aligned investments on an aggregated basis as shown on the preceding EU Taxonomy graph):

- In respect of Turnover (including sovereign bonds), the EU Taxonomy alignment improved from 4.80% to 3.10%. In respect of CapEx (including sovereign bonds), the EU Taxonomy alignment declined from 0.89% to 0.52%.

- In respect of Turnover (excluding sovereign bonds), the EU Taxonomy alignment improved from 3.11% to 4.80%. In respect of CapEx (excluding sovereign bonds), the EU Taxonomy alignment declined from 0.90% to 0.52% respectively.

- In respect of OpEx, the EU Taxonomy alignment did not change over the period.

It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any which were not aligned with environmental and social characteristics promoted by the Fund.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may have held short term securities.

No minimum environmental or social safeguards were applied in relation to such holdings. This category also included investments for which relevant data is not available.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager adopted a “systematic” investment process which uses sophisticated computer models to analyse large volumes of data to select investments. This is overlaid with an explicit ESG factor from third party data providers to conduct detailed analysis on the ranking of specific issuer and time series data on ESG scores and assess stock returns and forecasts, which were factored into the Fund’s portfolio construction and rebalancing process. This allowed the Investment Manager to tilt the portfolio in order to meet the ESG Characteristics promoted by the Fund.

Whilst data providers are chosen carefully, the information or data from such providers may be incomplete, inaccurate or inconsistent and data errors may occur.

Active ownership is centred on the Fund’s systematic investment process. The exercise of rights and responsibilities is applied by utilising independent third party proxy voting recommendations which captures local market best practice concerning corporate governance and reflects institutional investor guidance on social and environmental matters.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
