## What is this product?

### Type:

This product is a UCITS fund.

### Term:

This is an Open Ended Fund.

### Objectives:

The investment objective of the Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Global Uranium & Nuclear Components Total Return v2 Index (the "Index").

The Fund invests at least 80% of its total assets in securities of companies that are active in some aspect of the uranium industry such as mining, refining, exploration, manufacturing of equipment for the uranium industry, technologies related to the uranium industry or the production of nuclear components. The Fund may also invest in companies that do not derive a significant percentage of revenues from activities related to the uranium industry, but generate large absolute revenues from the uranium industry (in particular, uranium mining, exploration for uranium, physical uranium investments, technologies related to the uranium industry, or the production of nuclear components).

When not possible or practicable to continue to hold all of the component securities of the Index, the Fund may invest in depositary receipts relating either to components securities of the Index or to equity securities of the type referred to above; and financial derivative instruments ("FDIs"), namely, total return "unfunded" OTC swaps and exchange-traded equity futures for investment purposes.

The Fund may enter into securities lending transactions, investing in repurchase and reverse repurchase transactions and short term money market collective investment schemes, for the purposes of efficient portfolio management only.

For Distributing Shares, income will be paid in the form of a dividend.

Investors can buy and sell shares of the Fund on each business day. Business day means a day on which the New York Stock Exchange and London Stock Exchange are open for normal business.

For more information about the investment policy and strategy of the Fund, please refer to the sections entitled "Investment Objective" and "Investment Policy" in the Fund's supplement. Fund documents including the Prospectus, Supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and classes, on the Fund's website at [www.globalxetfs.eu](http://www.globalxetfs.eu).

The depositary is SEI Investments - Depositary and Custodial Services (Ireland) Limited.

This document describes a sub-fund of the UCITS. The Prospectus and periodic reports are prepared in respect of the entire UCITS. The assets and liabilities of each sub-fund of the UCITS are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund.

### Intended retail investor:

This Fund is intended for investors who want to take a long or short-term exposure to the market covered by the index of the Fund and would be prepared to take on a medium level of risk associated with an investment of this type, including potential volatility of such market. Such an investor must also be one that is able to assess the merits and risks of an investment in the Shares of the relevant Class of the Fund.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the ability for you to receive a positive return on your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are

not able to pay you what is owed, you could lose your entire investment. For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Prospectus and Supplement available at [www.globalxetfs.eu](http://www.globalxetfs.eu).

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of Global X Uranium UCITS ETF over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances. Markets could develop very differently in the future.

## What happens if Global X Management Company (Europe) Limited, part of the Global X group of companies is unable to pay out?

You may face a financial loss should the manufacturer or depository/custodian, SEI Investments – Depository and Custodial Services (Ireland) Limited, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	71 USD	600 USD
<b>Annual cost impact (*)</b>	0.7%	0.8%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.5% before costs and 12.7% after costs.
