What is this product?

Type

This product is a UCITS Investment Fund.

Term

This product has no fixed end date. However the Fund, at its absolute discretion, can redeem all the shares of the Fund under the circumstances set out in the prospectus.

Objectives

Investment objective The investment objective of the Fund is to seek income and long-term growth of capital.

Investment policies The Fund will seek to achieve its objective by primarily investing in global investment grade debt securities which may be issued by governments, public bodies, supranationals and corporate entities.

The Fund is actively managed and will seek to outperform the Bloomberg Global Treasury Total Return Index (the "Index") by 0.5% - 1.0%, gross of the fees of the Manager, the Investment Manager and the Distributor, but net of all other fees and expenses of the Fund, on average per annum over the medium to long term. The Investment Manager may use its discretion to invest in, for example, securities, issuers, companies or sectors not included in the Index.

The Index is designed to capture the performance of fixed-rate, local currency government debt of investment grade countries, including both developed and emerging markets. There is no guarantee the Fund will outperform the Index.

The Fund is anticipated to have a tracking error within a range of 1.0% - 3.0%, on an ex-post basis, although this is not a target or a restriction and there is no guarantee the Fund will stay within this range. Tracking error is an indicator of the degree to which the Fund's performance may deviate from that of the Index. Certain indices (including the Index) may also be used in the management of the Fund, including for investment purposes, as detailed in the supplement.

The Fund will invest at least two-thirds of its net asset value in debt securities denominated in major world currencies. The Fund may invest in debt securities issued or guaranteed by EU Member States and non-EU countries, their sub-divisions, agencies or instrumentalities and corporate debt securities such as freely transferable promissory notes, debentures, fixed or floating rate bonds (including zero coupon bonds), convertible and non-convertible notes.

The Fund may invest more than 20% of its net asset value in emerging markets securities.

The Fund may invest in mortgage-backed and other asset-backed securities which are transferable securities that are collateralised by receivables or other assets, and up to 10% of its net asset value, in aggregate, in collateralised mortgage obligations and collateralised loan obligations. The Fund may invest in eligible bonds traded on the China Interbank Bond Market via Bond Connect and/or the QFI regime. The Fund can invest in these securities directly.

The Fund may invest up to 10% of its net asset value in debt securities which are rated below investment grade (i.e. debt securities which are rated lower than Baa3 by Moody's Investor Services or lower than BBB- by Standard & Poor's).

A top-down and/or bottom-up analysis may be conducted when determining whether to invest in a particular investment.

The Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, "FDI") for hedging, efficient portfolio management and/or investment purposes. FDI may enable the Fund to obtain market exposure up to 100% in excess of the value of the Fund's assets. The use of FDI may multiply the gains or losses made by the Fund on a given investment or on its investments generally. The Fund may not invest in FDI that would result in losses exceeding the net asset value of the Fund. The Fund may take both long and short positions.

Redemption and Dealing You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

Distribution Policy The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon

Practical information

Depository The Fund's assets are held through its depository, State Street Custodial Services (Ireland) Limited.

Further information This document describes a Share Class of the Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, MGI Funds plc is a single legal entity that may operate, have assets held on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The prospectus, latest annual and semi-annual reports, which are prepared for the entire Umbrella, and information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on www.bloomberg.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment managed in reference to the Index between March 2015 and March 2020.

Moderate: this type of scenario occurred for an investment managed in reference to the Index between March 2014 and March 2019.

Favourable: this type of scenario occurred for an investment managed in reference to the Index between September 2012 and September 2017.

What happens if Mercer Global Investments Management Limited is unable to pay out?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 JPY is invested.

Example Investment 10,000 JPY	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	23 JPY	113 JPY
Annual cost impact*	0.2%	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and 2.1% after costs.
