Term

This investment has no fixed maturity date.

Objectives

The investment objective of the Fund is to achieve capital growth over the long-term by predominantly investing in a portfolio of European equities. The Investment Adviser will seek to achieve the investment objective of the Fund through investment of at least 80% of the Fund's Net Asset Value in companies which are incorporated, domiciled, listed or conduct significant business in Europe (the EEA, Switzerland and the UK). The Fund will not be restricted in its choice of investment by either size or sector.

The Fund is considered to be actively managed in reference to MSCI Europe Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes and for certain Performance Fee Share Classes, to calculate performance fees. The Benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

The Fund is not expected to have any exposure to financial derivative instruments in normal circumstances, but the Investment Adviser may on occasion, where it deems it appropriate in seeking to achieve the investment objective of the Fund, use financial derivative instruments listed on a recognised exchange or traded on an organised market or financial derivative instruments traded over-the-counter for investment purposes, efficient portfolio management, and hedging purposes.

In addition, the Fund may invest in exchange traded funds and other eligible open-ended collective investment schemes. No more than 10% of the net assets of the Fund will be invested in aggregate in open-ended collective investment schemes. The Fund may invest in closed-ended funds that qualify as transferable securities. Investment in closed-ended funds is not expected to comprise a significant portion of the Fund's net assets and will not typically exceed 10% of net assets.

For liquidity or cash management purposes, a proportion of the Fund may also be invested in debt securities including government and corporate bonds, Money Market Instruments, cash and near cash and deposits. Any investment in bonds will be in investment grade corporate and government fixed or floating rate instruments.

Intended retail investor

The Fund is considered to be suitable for investors seeking long-term capital growth over a medium to long term investment horizon (at least 5 years) and who understand and are prepared to accept the risks and a medium to medium/high level of volatility, particularly given the Fund's equity investment.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions will likely impact our capacity to pay you.

The risk indicator assumes you keep the product for a minimum of 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases. The summary risk indicator only reflects the market risk and credit risk of the product. Other risks materially relevant to the product which are not taken into account in the summary risk indicator are: leverage, derivatives, liquidity, Index, market cap, hedging, counterparty, currency, portfolio concentration and emerging markets risk, where applicable.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For full details of the Company's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.eu.

Performance Scenarios

The figures shown include all the costs of the product itself, but will not include all the costs you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Liontrust GF Pan-European Dynamic A1 EUR Accumulating share class over the last 5 years. Markets could develop very differently in the future.
