What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less than your initial investment. You may not be able to cash in early. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class.

Other materially relevant risks include: Credit Risk, Liquidity Risk, Currency Risk, Derivative Risk and Operational Risk. Please refer to the Prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000 is invested.

Investment: 10 000 CHF	If you exit after 1 Year	If you exit after 5 Years
Total Costs	431 CHF	883 CHF
Annual Cost Impact (*)	4.31 %	1.79 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be .51% before costs and -1.28% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 Year
Entry costs	1.00% maximum of the amount you pay in when entering this investment. These costs are already included in the price you pay.	100 CHF
Exit costs	2.00% of your investment before it is paid out to you.	204 CHF
Ongoing costs		
Management fees and other administrative or operating costs	0.91% of the value of your investment per year. This is an estimate based on actual costs over the last year.	98 CHF
Transaction costs	0.28% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	29 CHF
Incidental costs taken under specific conditions		
Performance fees	The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0 CHF
