BNP Paribas Easy ICAV

Unaudited Notes to the Financial Statements for the financial period from 1 January 2024 to 30 June 2024 (continued)

1 General information (continued)

(a) Basis of Preparation (continued)

Going Concern

The Directors have made an assessment of the ICAV's ability to continue as a going concern and are satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, the Directors are not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

Adoption of new and revised standards

(i) New standards and interpretations effective 1 January 2024

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the International Accounting Standards Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which became effective 1 January 2024 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

This amendment did not have a material impact on the ICAV.

There are no other standards, interpretations or amendments to existing standards that are effective that would be expected to have a material impact on the ICAV.

(ii) New standards, amendments and interpretations issued but not effective for the financial period beginning 1 January 2024 and not early adopted

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a material impact on the ICAV.

3 Fair value of financial instruments

The following tables show financial instruments recognised at fair value, analysed between those whose fair value is based on:

- Quoted prices in active markets for identical assets or liabilities (Level 1);
- Those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2); and
- Those with inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

The determination of what constitutes ‘observable’ requires significant judgement by the Sub-Funds. The Sub-Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Sub-Fund’s financial assets and financial liabilities measured at fair value as at 30 June 2024:

There were no transfers between levels during the financial period.

There were no Level 3 securities held by the Sub-Funds during the financial periods ended 30 June 2024 and 31 December 2023.

The fair values of financial assets traded in active markets are based on quoted market prices at the close of trading at the period end date. The quoted market price used for financial assets held by the Sub-Funds is the last closing bid price for financial assets.

The assets and liabilities not included in the above tables are carried at amortised cost; their carrying values are a reasonable approximation of fair value and would be classified as Level 1. Cash and cash equivalents include cash in hand and deposits held with banks. Dividends receivable and prepayments include the contractual amounts for settlement of trades and other obligations due to the Sub-Funds. Accruals represent the contractual amounts and obligations due by the Sub-Funds for settlement of trades and expenses.

4 Fees and expenses

Unless otherwise disclosed in the relevant Sub-Fund's supplement, the ICAV employs an "all in one" fee structure for its Sub-Funds pursuant to which it pays to the Investment Manager out of each Sub-Fund's assets a total expense ratio ("TER") of a percentage of each Sub-Fund's NAV at the Valuation Point.

The Investment Manager is responsible for discharging all operational expenses out of the TER, including audit fees and fees and expenses relating to the Administrator, the Depositary, audit, documentation (including the preparation, printing, translation and distribution of this Prospectus, Supplements, key investor information documents and financial statements), ESG certification and related services, index licencing and related data, legal, listing and all services related to the secondary market (if applicable), market making, marketing operations, publication of fund performance data, registrations and tax services.

The ICAV will pay, out of the assets of each Sub-Fund and in addition to the TER, interest, taxes, brokerage commissions and other expenses connected with the execution of portfolio transactions, including any periodic fee payable to a counterparty under the terms of a swap and extraordinary expenses such as extraordinary legal costs and Director's fees.

4 Fees and expenses (continued)

In the event that the costs and expenses of a Sub-Fund that are intended to be covered within the TER exceed the maximum TER of the Sub-Fund, the Investment Manager will discharge any excess amounts out of its own assets. Any amount remaining from the TER paid to the Investment Manager after payment of the relevant costs and expenses will be retained by the Investment Manager in return for the provision of its services to the ICAV.

The cost of establishing the ICAV and each Sub-Fund, and of registering each Sub-Fund in other jurisdictions or with any stock exchange shall also be borne by the Investment Manager.

All of the fees shall be calculated daily and shall accrue daily by reference to the NAV of each Sub-Fund and shall be payable monthly in arrears.

The following table presents the maximum TER for each Sub-Fund:

There are no rights of pre-emption upon the issue of Shares in the ICAV. The Subscriber Shares do not participate in the assets of any Sub-Fund. The ICAV reserves the right to redeem some or all of the Subscriber Shares.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of a Sub-Fund attributable to the relevant Class in respect of which they are issued, save in the case of dividends declared prior to becoming a Shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used in the acquisition on behalf of the relevant Sub-Fund of assets in which the Sub-Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to redesignate any Class from time to time, provided that Shareholders in that Class shall first have been notified by the ICAV that the Shares will be redesignated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors redesignate Shares in issue in order to facilitate the creation of an additional Class.

Each of the Shares entitles the Shareholder to attend and vote at meetings of the ICAV and of the relevant Class of a Sub-Fund represented by those Shares. No Class confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other Class or any voting rights in relation to matters relating solely to any other Class.

Any resolution to alter the Class rights of the Shares requires the approval of three quarters of the Shareholders of the Shares represented or present and voting at a general meeting duly convened in accordance with the Instrument of Incorporation.

The Instrument of Incorporation of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares may be issued and shall not carry any voting rights at general meetings of the ICAV or of any Fund or Class and the Net Asset Value of any fractional Share shall be the Net Asset Value per Share adjusted in proportion to the fraction.

It is intended that all but two of the Subscriber Shares will be redeemed by the ICAV at their Net Asset Value on the Dealing Day on which the first issue of Shares is effected after the Initial Offer Period. The Subscriber Shares entitle the Shareholders holding them to attend and vote at all meetings of the ICAV but do not entitle the holders to participate in the dividends or net assets of any Sub-Fund or of the ICAV.

11 Efficient portfolio management (continued)

Such transactions may achieve a reduction in risk, a reduction in costs or an increase in capital or income returns to a Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund. The techniques and instruments which may be used are investments in futures (which may be used to manage cash flows on a short-term basis by holding the future to gain exposure to an asset class pending direct investment), options (which may be used to achieve cost efficiencies or to manage currency risk or interest rate risk), swaps, forward currency exchange contracts (both of which may be used to manage currency risk, interest rate risk or to achieve cost efficiencies) and total return swaps. In circumstances where a Sub-Fund may use further techniques and instruments, these will be disclosed in the relevant Sub-Fund's supplement. Any financial derivative instruments not included in the risk management process will not be used until such time as a revised risk management process has been provided to the Central Bank. Where such techniques and instruments are used, they will be utilised in accordance with the requirements of the Central Bank, the UCITS Directive and the Eligible Assets Directive 2007/16/EC.

Index Tracking and Performance

"Tracking error" can be defined as the volatility of the difference between the return of a Sub-Fund which tracks/replicates an Index versus the return of the relevant Index which it tracks or replicates, whereas "tracking difference" can be defined as the total return difference between such a Sub-Fund and the relevant Index which it tracks or replicates over a certain period of time. Unless otherwise stated, an Index tracking/replicating Sub-Fund is not expected to track the performance of its Index at all times with perfect accuracy and there can be no assurance that any Sub-Fund will achieve any particular level of accuracy in tracking or replicating an Index. Each Sub-Fund that seeks to track or replicate an Index is, however, expected to provide investment results that, before fees and expenses are applied, generally correspond to the price and yield performance of its Index.

The aim is to keep the tracking error of the Sub-Funds below 1% under normal market conditions. However, exceptional circumstances may arise which cause the tracking error to exceed 1%.

The table below shows the index-tracking Sub-Funds' performance with the benchmarked index performance as of 30 June 2024. The annual tracking errors are all due to our investment strategy which aims to provide a small alpha after all fees. Therefore, each Sub-Fund has outperformed the index.

Sub-Fund	Index	Sub-Fund Currency	Perf 1 year	BM 1 year	Tracking Error 1 year
BNP Paribas Easy S&P 500 ESG UCITS ETF	S&P 500 ESG Index NTR Index	USD	24.62%	24.53%	0.07%

¹ The Sub-Fund commenced trading during the financial period. Returns are shown from launch date to the end of the financial period.

² The tracking history is too short to provide a statistically significant tracking error.

The realised tracking errors were driven by the difference in the tax rate applied to dividends received in the Sub-Funds versus the tax rate assumed in the total return calculation of the index.

The tracking errors were also due to the effects from trading for the quarterly index review of the benchmark.
