PineBridge Global Funds

Background to the Fund

The following information is derived from and should be read in conjunction with the full text and interpretation section of the most recent prospectus (the "Prospectus") for PineBridge Global Funds (the "Fund").

The Fund is an Irish open-ended umbrella Unit Trust established as an undertaking for collective investment in transferable securities pursuant to Irish Statute comprising the Unit Trusts Act, 1990 (the "Act") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations"), and under The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1) (Undertakings For Collective Investment In Transferable Securities)) Regulations 2019 (the "Central Bank's UCITS Regulations"), and authorised on 4 March 2005 by the Central Bank of Ireland (the "Central Bank").

The Fund is composed of the following active Sub-Funds (each a "Sub-Fund" and together the "Sub-Funds") at 31 December 2021.

- PineBridge Asia Dynamic Asset Allocation Fund**†
- PineBridge Asia ex Japan Equity Fund***†‡

**Trade receipt deadline 9.00am GMT on Valuation Day, 31 December 2021 for the Annual Accounts.

***Trade receipt deadline 11.30am GMT on Valuation Day, 31 December 2021 for the Annual Accounts.

†Sub-Funds registered with the Securities and Futures Commission in Hong Kong.

‡Sub-Funds not authorised in Hong Kong and not available to Hong Kong residents.

‡Sub-Funds available for sale in Germany. Fund documentation (Key Investor Information Documents ("KIIDs"), Prospectus, Trust Deed, Semi-Annual and Annual Accounts) and information on issue and redemption of prices are available from the office of the German Paying/Information Agent.

Each of the Sub-Funds which are registered with the Securities and Futures Commission (the "SFC") in Hong Kong are regulated under an equivalent jurisdiction in the form of the UCITS Regulations. While the SFC recognises that annual reports of recognised jurisdiction schemes will vary in content, annual reports are expected to offer investors comparable disclosure.

PineBridge Investments Ireland Limited (the "Manager") may create additional Sub-Funds, with the prior approval of the Central Bank and the Trustee. Each Sub-Fund will bear its own liabilities and shall not bear the liabilities of any other Sub-Funds.

PineBridge Global Funds

Background to the Fund (continued)

The Prospectus, KIIDs, the unaudited semi-annual report and the annual report and audited financial statements as well as a listing of the schedule of portfolio changes during the financial year under review can be obtained free of charge from the Manager at the address shown on page 2 and from the Swiss Representative at the address shown on page 3. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred on the issues and redemptions of units.

Investment Objectives

The assets of each Sub-Fund will be invested separately in accordance with the investment objectives and policies of the relevant Sub-Fund as set out in the Prospectus and outlined in each Investment Manager's Report. Material changes to the investment objectives of each Sub-Fund will not be made without unitholder approval and in the event of any such change, notice will be given to unitholders to enable them to redeem their units before the changes take effect.

Calculation of Net Asset Value

The Net Asset Value (the NAV) per unit is calculated for each Dealing Day by dividing the value of the assets of the relevant Sub-Fund less its liabilities to include a provision for duties and charges, by the number of units then outstanding. The value of the underlying assets is adjusted for accrued income and liabilities excluding management fees, unitholder servicing and maintenance fees (as appropriate) and other Class specific charges, where applicable. It is then allocated between the various Classes based on their pro rata closing NAVs as of the previous Dealing Day. Where applicable, Class currency hedging impact is applied to the relevant unit Class. The management fee, the unitholder servicing and maintenance fee (as appropriate) and other Class specific charges are then applied to each Class.

The NAV of each Sub-Fund is calculated in the Functional Currency of that Sub-Fund. For Sub-Funds with Classes denominated in a currency other than the Functional Currency, the NAV of such Classes is translated to the relevant Sub-Fund currency. The NAV per unit for each class is available on www.pinebridge.com.

Irish Funds Corporate Governance Code

The Irish Funds (IF), in association with the Central Bank has published a corporate governance code (the Code) to be adopted by Irish authorised collective investment schemes. The Board of Directors of the Manager voluntarily adopted the code effective from 31 December 2012 and the Fund operates in full compliance with the Code.

Significant Events During the Financial Year

The effects of COVID-19 have and may continue to adversely affect the global economy, the economies of certain nations and individual issuers, all of which may negatively impact the PineBridge Global Funds' performance. The Board continues to monitor and receive regular updates on the situation. As at 31 December 2021, to our knowledge, the impact of COVID-19 has not affected the Investment Managers' ability to execute the investment strategy of the Sub-Funds, nor has there been interruption to key service providers engaged by the Fund.

A Prospectus of the Fund was issued on 4 March 2021.

Roman Hackelsberger resigned as a Director of the Manager on 18 June 2021.

The most recent Prospectus of the Fund was issued on 31 December 2021.

Please see Note 11 for details of Sub-Fund and share class launches and terminations during the financial year.

There have been no other significant events affecting the Fund during the financial year.

Significant Events Since the Financial Year End

PineBridge Asia Pacific Investment Grade Bond Fund Class Z5 Units SGD launched on 4 January 2022.

PineBridge Global Focus Equity Fund Class Z5 Units SGD launched on 4 January 2022.

PineBridge Asia ex Japan Equity Fund Class R Units USD launched on 27 January 2022.

Background to the Fund (continued)

Significant Events Since the Financial Year End (continued)

Central Securities Depositories Regulation (CSDR)

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards (“CSDR”). CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Fund when it enters into in-scope transactions may result in increased operational and compliance costs being borne directly or indirectly by the Fund. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

On February 24, 2022, Russia engaged in military actions in the sovereign territory of Ukraine. It has caused turmoil on the European and global markets and forced the Russian markets to be suspended in the first quarter of the year. This has and will affect the funds over the coming period and will continue to cause instability on the global and European markets. PineBridge has risk management protocols in place across our global business. The Manager is leveraging our established risk framework as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, PineBridge and the Board are closely monitoring for any emerging risks impacting portfolios. The Manager will continue to monitor this situation and take appropriate actions as needed.

Suspension: PineBridge Emerging Europe Equity Fund

Considering the exceptional and adverse market conditions relating to the current situation in Russia and Ukraine, effective from 2 March 2022, the Manager has suspended until further notice the calculation of the Net Asset Value per Unit of PineBridge Emerging Europe Equity Fund (the “Fund”) and the right of Unitholders to purchase, redeem or exchange Units in the Fund (the “Suspension”). This decision was made following the recommendation of the Manager and the Investment Manager and with the approval of the Trustee, and was considered to be in the best interests of unitholders as a whole in light of current circumstances. The decision to implement the Suspension was taken as a result of the situation in Russia and Ukraine which adversely affected the orderly disposal and valuation of Russian assets of the Fund. The Manager is unable to determine how long the Suspension will last, however, the Manager will take all reasonable steps to bring the Suspension to an end as soon as possible and in the best interests of Unitholders as a whole.

Since the financial year-end, PineBridge Europe Small Cap Equity Fund has had redemptions amounting to 39% of the Net Asset Value.

Since the financial year-end, PineBridge Global Emerging Markets Corporate Bond Fund has had redemptions amounting to 58% of the Net Asset Value.

There have been no other significant events affecting the Fund since the financial year end.

PineBridge Global Funds

Investment Manager's Report

PINEBRIDGE ASIA DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Asia Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing economic and investment trends and investing primarily in the Asia Pacific Region by taking a forward view of fundamental economic and market conditions across the region.

Portfolio Performance

For the year 01st January to 31st December 2021, the PineBridge Asia Dynamic Asset Allocation Fund Class "L" returned (7.16%). Over the same period, the Fund's benchmark index, a blended index of 60% of the MSCI All Country Asia ex-Japan Daily Total Return Index and 40% of the JACI Composite Total Return Index returned (3.67%).

Portfolio Overview

The Fund underperformed (both gross and net of fees) 60/40 (60% MSCI AC Asia ex Japan Index (Total Return) + 40% JACI Composite Index (Total Return)) in 2021, yet continues to outperform over annualized 3-year, 5-year, 10-year and since inception periods. On a total return basis, the largest detractor from performance came from our equity exposures (particularly China) in the portfolio. Our allocation to bonds (particularly China) also detracted from performance. On a relative return basis, the largest contributor to performance was our underweight to equities, although this was offset by the negative contribution from security selection within equities.

We entered the year with a bullish Risk Dial Score (RDS) of 2.3 on the basis that a unified US government and a strong vaccine rollout would lead to improving global fundamentals. We benefitted from our risk-on positioning in the first half of 2021 amid investor optimism of a return to normal economic conditions. Toward the end of Q2, we acknowledged three major headwinds, COVID-19 delta variant, longer-lasting supply chain bottlenecks and China policy concerns which gave us reason to bring the RDS to a marginally above neutral level of 2.75.

Asia ex-Japan equity markets sold off in the second half of 2021 largely due to the policy changes announced by China, which impacted a wide range of private sector industries. We continued to nudge risk down throughout the third quarter due to more persistent inflation and the likelihood for policy normalisation, ending the quarter with a below neutral RDS of 3.15. The portfolio was negatively impacted by security selection within China but the drawdown was mitigated by the positive security selection contribution from India and Singapore.

Portfolio Outlook

Several unprecedented events led to massive challenges in 2021, including Covid resurgences, semiconductor shortages, and freight cost inflation, along with power shortages and regulatory changes in China. We expect some of these issues to abate in the short term, while others, such as the semiconductor shortage, may be more difficult to resolve. The global recovery from Covid, rising inflation, and China's ability to maneuver a soft landing for its property sector bear close watching.

China is finally close to policy stimulus, which now appears geared to exceed 2021's dampening. Meanwhile, markets need to digest an increasingly hawkish Federal Reserve (Fed) that is just beginning to articulate its quantitative tightening intentions. Teamed with last month's pulling forward of the end of quantitative easing (QE), as well as signals of rate hikes to come, we think the Fed could still be careful and deliberate on its policy decision. We thus keep our Risk Dial Score at a marginally bearish 3.15.

Beyond policy normalization, we see the post-pandemic cycle as quite different from the post-financial-crisis cycle. As a result of a healthier private sector, the disappearance of fiscal drags, and climate urgency, the "end of fragility" will set a firmer tone for growth and inflation. We continue to view today's overheating as unfavorable for risk assets.

PineBridge Investments Asia Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Equity Fund seeks long-term capital appreciation by investing in equity and equity related securities of companies whose assets, product or operations are in the Asian Region. The Sub-Fund may also, to a lesser extent, invest in equity-related securities of companies whose assets, products or operations are in Australia and New Zealand.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Asia ex-Japan Equity Fund Class "A", "C", "L" and "Y" returned (11.40%), (11.74%), (10.89%) and (10.67%) respectively. Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (USD) returned (4.72%). For the period 11th March to 31st December 2021, the PineBridge Asia ex-Japan Equity Fund Class "A5H" returned (15.41%). Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (SGD) returned (9.76%).

Portfolio Overview

We started 2021 with a broad base market rally before Chinese New Year then it was derailed by the onslaught of credit and regulatory tightening in China across sectors. Technology exporters Taiwan and Korea benefitted from the outsized export beat. However Korea was weighed down by Korean Won depreciation and the big tech regulation in September. India was one of the best performing equity markets on the back of unequivocally accommodative stance by RBI and heavy weighted software sector benefited from increase digitalization globally. ASEAN continued to lag in 2021 given low vaccination rate in some countries and still partially under lockdown.

Portfolio Outlook

The year 2021 was a rollercoaster year in Asian, led by China. Reopening and normalization were the focus, countries that succeeded in controlling the rise of COVID cases in conjunction with vaccination progress managed to reopen. In 2021, earnings downgrade in China had been severe and we expect earnings downgrade momentum to slowdown in 2022. We overweight HK/China as we find valuation has bottomed, the risk and reward profile is turning more attractive. Additionally, we also overweight in Indonesia and Philippines as valuations for both are compelling, coupled with improving earnings visibility. We are cautious on Taiwan, India and Singapore as valuations are not attractive.

PineBridge Investments Asia Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Small Cap Equity Fund seeks long-term capital appreciation by investing in smaller to medium-sized companies in the Asian Region, i.e. companies whose assets, products or operations are in the Asian Region. In practice, at least 50% of the Sub-Fund's investment will be in companies whose free float adjusted market capitalisation at the time of purchase is less than USD\$1.5 billion.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Asia ex Japan Small Cap Equity Fund Class "A", "A5CP", "A12", "A5", "C", "R", "R1", "R1H", "R2", "R2D", "R2HD", "SR", "SR1", "SR1H", "SR2D", "SR2DH", "Y", "Y1D", "Y1H", "Y2", "Y2HD" and "YD" returned 6.94%, 9.63%, 18.35%, 9.31%, 6.73%, 7.91%, 17.36%, 6.71%, 9.06%, 9.11%, 7.28%, 8.07%, 17.54%, 6.91%, 9.22%, 7.42%, 7.80%, 17.25%, 6.60%, 8.95%, 7.22% and 7.80% respectively. Over the same period, the benchmark index, MSCI All Country Asia Pacific ex Japan Small Cap Daily Total Return Net Index (USD), (SGD), (SEK), (EUR) and (GBP) returned 18.79%, 21.17%, 30.96%, 27.81% and 19.88% respectively. For the period 15th July to 31st December 2021, the PineBridge Asia ex Japan Small Cap Equity Fund Class "Z6D" returned 0.00%. Over the same period, the benchmark index, MSCI All Country Asia Pacific ex Japan Small Cap Daily Total Return Net Index (AUD) returned 3.65%.

Portfolio Overview

For equities, regional market started the year with rotation away from growth sectors towards cyclical sectors with recovering industrial activity and infrastructure spending. Markets turned volatile in mid-year led by multiple regulatory changes announced in a short period of time from the Chinese government with wide implications to sectors like education and internet sectors. This, coupled with the financial woes of one of China's largest property companies, dampened investor confidence especially on China. The year also saw episodic and frequent rotations between quality and non-quality names. Further, due to the low cost of capital, excess liquidity in the market, and recovery expectations, many momentum stocks ended up doing well last year. A case in point is the IPO market across the region. Given ample liquidity and changing consumer behavior, we saw many companies joining the bandwagon and raising equity capital primarily in the "contactless economy" space such as e-commerce, online infotainment, fintech, health tech, etc. All this at very high valuations well-funded by retail investors. We also saw "unprofitable high beta" names doing better than the quality names, indicating excess market liquidity. The year closed with concerns on Omicron variant of covid-19 and potential lockdown returning.

The Fund has underperformed the benchmark in the year ending 2021. Overweighting in HK/China and underweighting India on asset allocation and India stock selection were key detractors from performance. At the same time, Hong Kong stock selection aided the performance. Vietnam, a non-benchmark country, supported the performance. At sector level, underweight in healthcare and overweight in industrials contributed to performance, whereas overweight in information technology and underweight in materials and utilities detracted the performance. By stock, a regional container shipping company, was the largest contributor to the performance. The company benefitted from the supply chains disruptions and thus rising freight rates. Another holding, a leading electronic component manufacturer, also helped the performance due to the rising demand for electronic components, new product launches, and a robust industry growth trend. On the other hand, our holding in an Australian company, a provider of data solutions and services for machine learnings and A.I., detracted from performance. The company guided down earnings due to Covid related postponement and delays in projects. We also saw a decreasing level of transparency from the management. Another holding, a China-based data center company listed in the U.S. (ADR), also dragged the performance.

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND (continued)

Portfolio Outlook

We remain constructive on equities in 2022. Despite high valuations in some market segments, there is a strong likelihood of earnings upgrades in the midst of US rising interest rates. Capital expenditures for many companies are on the rise. We may be entering a period of greater certainty on many fronts in 2022 – and this means that barring a major exogenous event, companies may be on an expansion mode. Climate initiatives open a new capex category with enormous investments in renewables, automation, and equipment upgrades amid the push for sustainability and net-zero carbon commitments. China's recent raft of policy reforms puts the country in a better position for the next decade. The reform announcements affecting fintech, education, property, etc. have driven up risk premia in China's equity market as investors' fear its implications to profits and margins – this, we believe is short term concerns for longer term structural growth. We believe that we are now at the peak of the regulatory clampdown for the time being. Chinese PBOC is on the easing mode. The policy relaxation might take some time to seep into the system, but some early signs are already visible. More economies will pick up steam despite the latest variant, especially ASEAN, as vaccination rates rise. Further we expect the opening up of economies to overseas travelers to help economic growth and consumption spending to rise. In the midst of US rate rise, we are cautious on its impact on Asia equity markets. We believe economic growth will be reasonably strong globally however, return expectations for high multiple stocks is expected to taper off as risk appetite wanes. We remain focused on identifying companies with sustainable business models for long term investment.

PineBridge Investments Asia Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND

Portfolio Objective

The investment objective of PineBridge Asia Pacific Investment Grade Bond Fund is to provide investors with stable return and long-term capital growth through investment in a wide range of investment grade debt securities within the Asia Pacific Region.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Asia Pacific Investment Grade Bond Fund Class "A", "A5HD", "R", "X", "Y" and "YD" returned (0.29%), (0.29%), 0.36%, 0.76%, 0.35% and 0.35%. Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD) and (SGD) returned (0.01%) and 0.08% respectively. For the period 23rd July to 31st December 2021, the PineBridge Asia Pacific Investment Grade Bond Fund Class "Y1H" returned (0.60%). Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (EUR) returned 3.27%. For the period 2nd September to 31st December 2021, the PineBridge Asia Pacific Investment Grade Bond Fund Class "Z" returned (0.51%). Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD) returned (0.88%). For the period 26th October to 31st December 2021, the PineBridge Asia Pacific Investment Grade Bond Fund Class "SR" returned 0.61%. Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (USD) returned 0.52%.

Portfolio Overview

The main fixed income theme in the first quarter was the abrupt sell-off in the safe haven bond markets, including US Treasuries. This reflected better economic prospects, a smaller-than-expected economic impact of the fall and winter lockdowns and the vaccine deployment promising some return to normalcy in 2021. Asian corporate earnings continue to hold up better than what was initially expected, undoubtedly boosted by a relatively better track record in containing the pandemic. The market had a strong performance in the second quarter, driven to a large extent by the rally in the US treasury market. Spreads however generally moved sideways, with a tightening bias coming towards the end of the quarter. During the third quarter, the more infectious and virulent delta variant of SARS-CoV-2 took hold in many countries, including the US, adding downside risks to the economic growth outlook. The vaccination efforts gathered pace globally, including Asia which had a relatively slower start. In Asia, investors were cautious as the regulatory announcements in China led to some economic growth concerns. More recently, the Chinese property sector weakened market sentiment in the high yield segment as fears grew of default risks. In contrast, the Asian investment grade space remained resilient, and spreads were tighter quarter-on-quarter, especially after the Chinese policy makers decided to shore up Huarong, a systematically important state-owned entity. During the fourth quarter, major central including the Federal Reserve turned more hawkish or signaled an end of ultra-accommodative monetary policy. This had a significant impact on safe haven bond market yields, including the US treasuries. This trend briefly reversed in November when a new more transmissible SARS-CoV-2 variant, dubbed Omicron, was discovered, leading to some concerns of renewed restrictions, and potentially dampening economic growth. Within the Asian credit market, the Chinese high yield segment, to which the Fund is not exposed to, witnessed significant volatility and stress. The impact on the Asian Investment Grade segment was negligible, if any. Spreads were generally sideways, with a tightening bias.

Investment Manager's Report (continued)

PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND (continued)

Portfolio Outlook

We expect the major themes from 2021 to carry forward in 2022, namely inflationary expectations, the pandemic related developments and Chinese growth prospects. On the latter, it is important to mention that the China Central Economic Work Conference ("CEWC") signaled a policy shift to more easing and stimulus in 2022. This is likely to be translated by front loaded fiscal measures, some targeting monetary policy easing, and potentially some additional credit creation. This is a significant change and is positive for China and the region. More broadly, we expect more Asian countries will exit the COVID elimination strategy and move to a mitigation stage, with positive consequences on economic growth. Within the credit segment, we are expecting greater dispersion of returns, especially within the Chinese space. On duration, we remain defensively positioned. Overall, the lower volatility that the Asian Investment Grade market has been exhibiting should continue.

**PineBridge Investments Asia Ltd./PineBridge Investments Singapore Ltd.
January 2022**

Investment Manager's Report (continued)

PINEBRIDGE CHINA A-SHARES QUANTITATIVE FUND

Portfolio Objective

PineBridge China-A Shares Quantitative Fund seeks to provide long-term capital growth by primarily investing mainly in equity and equity-related securities of companies listed on stock exchanges in the People's Republic of China (PRC) or related to the economic development and growth of PRC.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge China-A Shares Quantitative Fund Class "X", "Y11D" and "Z" returned 6.00%, 3.32% and 6.26% respectively. Over the same period, the benchmark index, the MSCI China A International Total Return Net Index (USD) and (CNH) returned 3.74% and 1.54% respectively.

Portfolio Overview

After a strong rally at the start of 2021, the China A shares market weakened after the Chinese New Year, which coincided with a sharp rise in the 10-year US Treasury yield. The market was further weighed by Evergrande's debt crisis and heightened policy uncertainty after new government policies on after-school tutoring services were announced in July. In CNY terms, the CSI 300 index returned (5.04%) in 2021. The smaller cap indices CSI 500 and CSI 1000 returned 15.24% and 19.35%, respectively.

Sector leadership changed as energy and utilities were the best performing sectors of 2021 and consumer-related and health care retreated. In particular, new energy and electric vehicle related industries remained strong, supported by accommodative government policies. In 2021, the Fund outperformed (gross and net of fees) its benchmark, the MSCI China A International Total Return Net Index. The alpha model contributed positively. Growth-related factors continued to deliver a strong performance during this period, whereas the contributions of value and quality were relatively flat.

Portfolio Outlook

In contrast to the previous couple of years when only a small number of sectors/stocks significantly outperformed others, 2021 witnessed a more balanced performance in the A-Shares market. The valuation of mid- and small caps recovered, while large caps with relatively higher valuation levels underperformed, leading to the narrowing valuation gap between large and mid/small caps. This was also true with sector performance. Most leading sectors in 2021 were within the "old economy" category with lower valuation levels, such as energy, metals & mining and utilities. On the contrary, most of the leaders last year, including health care, consumer services and beverage, returned flat or negatively this year.

From a policy perspective, the policymakers' stance has been fine-tuned several times, according to the evolving macro environment. In the first half of the year, the economic recovery went smoothly as expected and supportive measures gradually existed. However, the new wave of the Delta variant and extreme weather conditions casted new uncertainty from June. The target of dual control on energy consumption and energy intensity also set more constraints to China's manufacturing. Moreover, tightened policies on Internet platforms, real estate and after-school tutoring aroused additional challenges for the economy. But after the annual CEWC held in December, we think further policy tightening would be unlikely. We also expect a more active fiscal policy and more accommodative monetary policy in 2022, which should support both earnings growth and the performance of the A-Shares market.

Investment Manager's Report (continued)

PINEBRIDGE EMERGING EUROPE EQUITY FUND

Portfolio Objective

PineBridge Emerging Europe Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments with superior growth potential primarily in the emerging European markets. The Sub-Fund is designed to enable investors to participate in the high rates of growth generated by these events.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Emerging Europe Equity Fund Class "A" and "Y" returned 13.37% and 14.28% respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Europe 10/40 Equity Daily Total Return Net Index (USD) returned 13.26%.

Portfolio Overview

Emerging Europe Markets began 2021 with an improving economic outlook. Expectations of an economic reopening due to the vaccines' distribution, rising commodity prices and EU's economic stimulus all gave investors optimism. Select countries of emerging Europe, such as Turkey, were facing own set of challenges. This, however, was not enough to derail the generally positive forecasts. This was further helped by the negative returns seen in 2020 which moderated valuations. As the year progressed, Omicron's emergence, rising CPI and regional security concerns due to Russia's activity around Ukraine caused market volatility. However, strong corporate earnings and disciplined return of capital to shareholders through dividends helped the emerging Europe market deliver positive returns of +14.14% in 2021. The first nine months of 2021 saw strong performance from emerging Europe equities. Rising commodity prices, expectations of the economic reopening and higher interest rates caused earnings upgrades in a number of sectors that are well represented in the region. However, in the final quarter worries about CPI being above expectations, natural gas supply crisis and the risk of armed hostilities around Ukraine caused the market to decline (7.50%). As a result, the full-year return of the MSCI EM Europe Index was 14.41%. 2021 saw the continuation of the adoption of ESG principles by an increasing number of corporates. In addition to dividends and independent board directors, more companies are gradually engaging in environmentally and socially conscious behavior and are becoming more consistent in communicating their ESG attributes to the shareholders. Investors, in turn, are adding greater weight to ESG considerations in their decision-making.

The Fund exceeded its benchmark, the MSCI EM Europe 10-40 Index, gross and net of fees during the annual reporting period ending December 31, 2021. Relative performance was helped by positive stock selection and allocation effect. The strongest contributors to the relative performance were in energy and consumer discretionary. The largest detracting sectors from relative fund performance were financials and utilities.

Portfolio Outlook

Looking ahead to 2022, the outlook for emerging Europe is mixed. The risk of an armed conflict around Ukraine is high. Intense diplomatic activity is yet to produce results and the market impact may be very negative. Current high commodity prices may have a self-destructing effect on demand and commodity producer profits. Rising rates are positive for banks, but large increases in lending rates and the CPI may undermine borrowing demand. On the other hand, profit growth remains apace and valuations have become lower. The portfolio is invested in 38 companies with strong management, governance and business models mainly in energy, financials and materials sectors. The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes and who have strong ESG characteristics. Sectorally, our largest current overweights are in consumer staples and energy, while we are most underweight utilities and communication services.

Subsequent to the financial year-end, the board of the management company has decided to close the fund during 2022, subject to the relevant applications being made to the relevant regulatory authority(ies) and necessary regulatory approval(s) being obtained.

Investment Manager's Report (continued)

PINEBRIDGE EMERGING EUROPE EQUITY FUND (continued)

Portfolio Outlook (continued)

Considering the exceptional and adverse market conditions relating to the current situation in Russia and Ukraine, the Manager has suspended until further notice the calculation of the Net Asset Value per Unit of PineBridge Emerging Europe Equity Fund (the "Fund") and the right of unitholders to purchase, redeem or exchange Units in the Fund (the "Suspension"). This decision has been made following the recommendation of the Manager and the Investment Manager and with the approval of the Trustee, and is considered to be in the best interests of unitholders as a whole in light of current circumstances. The decision to implement the Suspension has been taken as a result of the current situation in Russia and Ukraine which has adversely affected the orderly disposal and valuation of Russian assets of the Fund. The manager are unable to determine how long the Suspension will last, however, the manager will take all reasonable steps to bring the Suspension to an end as soon as possible and in the best interests of unitholders as a whole.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND

Portfolio Objective

PineBridge Europe Research Enhanced Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European Recognised Stock Exchange.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Europe Research Enhanced Equity Fund Class "A", "L" and "Y" returned 14.20%, 14.50% and 15.28% respectively. Over the same period, the benchmark index, the MSCI Europe Daily Total Return Net Index (USD) returned 16.30%.

Portfolio Overview

European equities had a mixed start to the year, generally underperforming as the pandemic took center stage across various European countries. While vaccine rollouts and approvals have continued to roll on, lockdowns continued in a number of countries as new variants of the Covid-19 virus raised concerns that current vaccine efficacies would be lowered. European equities had a mixed start to the year, generally underperforming as the pandemic took center stage across various European countries. While vaccine rollouts and approvals have continued to roll on, lockdowns continued in a number of countries as new variants of the Covid-19 virus raised concerns that current vaccine efficacies would be lowered. European equities continued their upwards trend in April as Europe looked to turn the corner both on vaccine rollout and stimulus, though concerns about AstraZenaca's vaccine remained. Europe underperformed in June but there was some hope on the horizon with continued improvement in macro data, increasing vaccination rates, and the opening of borders. In July Europe had a strong month of performance as trading volumes somewhat thinned in the middle of the summer months. Strong manufacturing, retails sales, and labor data helped to boost equity market performance in Europe. The European Central Bank (ECB) continued to indicate that they will monitor what they deem as transitory inflation risk, with inflation expectations ran higher. European equities declined in the month of September as declines in travel and leisure limited gained as well as worries about a slowing global economy and higher inflation. The European economies experienced significant price increases across an array of commodities and input components. COVID-19 remained an issue with the Delta variant creating a lot of volatility in the individual countries. In November the discovery of the new Omicron coronavirus variant sent European equity markets tumbling. European investors were also rattled by inflation concerns with Euro zone inflation hitting a record high. Market players juggled concerns over coronavirus restrictions and tighter central bank policy with signs that the heavily mutated Omicron strain of the virus is milder than earlier variants. The variant is more contagious but far less deadly, which lessened its economic disruption and brings closer the goal of eventual herd immunity.

During the period, the Fund outperformed the MSCI Europe Daily Total Return Net Index (on a gross basis). During the period, the strongest contributors to relative performance were in the information technology and industrials sectors. The largest detracting sector from relative performance was the financials sector. The exceptional growth categorization was the top performing growth category exhibiting strong stock selection while the high stable growth categorization was the worst performing.

Portfolio Outlook

Traders are weighing the potential for tighter liquidity in 2022, with the Bank of England taking a hawkish approach, becoming the first major central bank to hike interest rates since the pandemic began, while the ECB is looking more cautious. From the current high base, inflation readings should dip in 2022 helped additionally by an easing in Covid related supply chain blockages and a moderation in economic growth as fiscal and monetary stimulus is withdrawn.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Europe Small Cap Equity Fund seeks to achieve a high rate of return by making equity and equity-related investments in small companies, whose assets, products or operations are in Europe.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Europe Small Cap Equity Fund Class "A1", "Y" and "Y1" returned 28.40%, 20.30% and 29.46% respectively. Over the same period, the benchmark index, EMIX Smaller European Companies Total Return Net Index (EUR) and (USD) returned 22.93% and 14.25% respectively.

Portfolio Overview

The global pandemic appears to be transitioning into the endemic phase, and re-openings should gain additional traction in the first half of 2022, although it could be a little choppy along the way due to covid flare ups and emerging variants of concern. The overall demand picture remains strong, and companies have largely been able to manage through supply chain problems, inflation, and ongoing covid-related disruptions. Companies sound confident on order books and pricing, while supply chain pressures should slowly ease. Company fundamentals remain on an improving trend, but largely reflected in valuations above historical levels. Nonetheless, we are still finding investment opportunities in attractive companies with expanding TAMs and/or exposure to increased digitization, capex spending, and Research and Development (R&D) spending. During 2021, the PineBridge Europe Small Cap Equity Fund outperformed its benchmark, the EMIX Smaller European Countries Index. Outperformance during the year was largely the result of strong security selection. Positive allocation effects provided a small but incremental lift to performance.

Overall, industrials, healthcare, and real estate were the top contributors to excess returns. By contrast, communication services, consumer discretionary, materials were the main sector laggards. The Fund remains overweight industrials, healthcare, communication services, and consumer staples, and real estate, and underweight materials, utilities, energy, information technology, financials, and consumer discretionary.

Portfolio Outlook

We continue to believe that risk-reward is attractive for fundamental investors over the medium-term. While absolute valuations remain elevated, earnings revisions are trending higher. In addition, pairwise correlations have fallen below long-term averages. Lower stock correlations and elevated return dispersion provide a supportive backdrop for active stock selection.

The Fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include digitalization, Asia consumer, mini-cycles (5G, semiconductors, machinery), and next-gen management.

PineBridge Investments Europe Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL BOND FUND

Portfolio Objective

PineBridge Global Bond Fund seeks a high level of return from a combination of current income and capital appreciation by investing in a portfolio of debt securities denominated in US Dollars and a range of other currencies including, Euro, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swiss Franc, Danish Krone, Swedish Krona, Norwegian Krone, British Sterling, Japanese Yen, Polish Zloty, Hungarian Forint, South African Rand, Singapore Dollar, Slovak Koruna and Mexican Peso.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Global Bond Fund Class "A", "X7H" and "Y" returned (0.92%), (0.61%) and 0.09% respectively. Over the same period, the benchmark index, the Bloomberg Barclays Global Aggregate Total Return Index (USD) and (CHF) returned (1.39%) and (2.49%) respectively.

Portfolio Overview

2021 proved to be a recovery year for most developed economies in which strong growth and higher inflation were seen across geographies while central banks started or hinted tightening their monetary policies. In fact, we saw some central banks hiking rates and/or tapering their Quantitative Easing programs. Market participants however struggled with the notion of transitory inflation as bottlenecks and supply chain shortages pushed inflation much higher than any central bank would have expected, yet policymakers insisted inflation will converge back toward the medium-term target by the middle or end of 2022.

The year started with a massive rates selloff during the first quarter as the market started to price an additional fiscal stimulus in the US when the Democrats won the control of both houses in Congress, as well as higher inflation and a more hawkish Federal Reserve (Fed), which could signal the start of tapering. However, the selloff in sovereign bonds was not confined to the US, with their European counterparts also losing ground as investors increasingly bet on a stronger economic recovery once the vaccine was rolled out. Quarter 2 and 3 saw a partial reversal of the move higher in rates as new Covid cases started to rise due to the new Delta variant reminding the market that new restrictions were possible, and the Fed's dot-plot shift also took some life out of the reflation trade. In addition, investors were concerned over the Chinese authorities' heavy-handed clamp down on the property sector in China and worries about the impact on China's growth outlook. Quarter 4 saw rates moving up again, mainly in the front end, as economies continued to show strong numbers allowing central banks to provide hawkish messages, such as the start of tapering by the Fed. The period however ended on a negative note as Covid cases started to rise again despite the high percentage of people vaccinated and Europe started to announce some type of restrictions.

The Fund outperformed (gross and net of fees) its benchmark, the Bloomberg Barclays Global Aggregate Total Return Index (USD Hedged), during the annual reporting period ending December 31, 2021. The Fund's relative outperformance was driven mainly by security selection and yield curve positioning, while asset allocation was a small positive.

Portfolio Outlook

We expect continued, relatively strong economic growth over the near term, negatively impacted to a degree by ongoing COVID complications and inflationary pressures. The recent pivot by the Fed to a more aggressive tapering timetable and the prospect of rate hikes coming in the first half of 2022, are likely to result in higher rate volatility and wider credit spreads over the near-term. Longer-term, our view is that the Fed will have difficulty raising rates to the degree they and some market participants expect given the economy's sensitivity to interest rates hikes. Similarly, we expect the European Central Bank to struggle ending the current QE. Going forward, we will continue to manage risk, but still leave the portfolio positively tilted to risk and sectors that we expect to outperform in the new year. In this environment, we expect security selection and yield curve positioning to be the key in generating alpha in these volatile markets.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Global Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing worldwide economic and investment trends and investing in assets globally to benefit therefrom.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Global Dynamic Asset Allocation Fund Class "A", "AA", "ADC", "ADCT", "C", "Y", "Y1H", "Y2H", "Y2HD", "Y5H" and "YD" returned 5.88%, 5.93%, 5.90%, 5.89%, 5.48%, 7.00%, 5.54%, 6.37%, 6.34%, 6.74% and 7.00% respectively. Over the same period, the benchmark index, 60% of the MSCI All Country World Index (ACWI) Daily Total Return Net and 40% of the FTSE World Government Bond Index (Total Return) returned 7.76%.

Portfolio Overview

The Fund outperformed (gross of fees) and underperformed (net of fees) the 60/40 risk budget: 60% MSCI All Country World Index (ACWI) Daily Total Return Net/40% FTSE World Government Bond Index (Total Return) (60/40) during 2021 and outperformed the 3-month LIBOR+5% over rolling 5-year periods. On a total return basis, the top contributors to fund performance were US cyclicals, productivity basket, and US financial equity, while the detractors were JPY, EUR and gold. Relative to the 60/40, the top relative return contributors were global government bond, US cyclicals and US financial equity while the largest detractors were an underweight to US large cap equity, which was largely offset by the Fund's complementing US centric strategies, cash and gold.

We entered the year with a Risk Dial Score (RDS) of 2.3 on the basis that a unified US government and a strong vaccine rollout would lead to improving global fundamentals. We benefitted from both our risk-on positioning and a low duration posture in the first quarter as equities rallied and rates soared due to policy shifts in the US. Our tilt towards cyclicity within equity was the largest contributor to return as we saw early cycle dynamics play out to begin the year. The upward trend continued into the second quarter as markets were driven higher by reflation, rates and gradual reopening. We once again benefitted from risk-on positioning but began gradually nudging risk closer to neutral by trimming our Emerging Market (EM) equity exposure. The combination of supply chain bottlenecks leading to a longer period of inflation and policy risk in China were reason to bring the RDS level to 2.75.

We shielded the portfolio from losses and protected year-to-date gains as equities sold off due to fears of more persistent inflation in the third quarter. Reducing EM equity worked in our favor as emerging markets underperformed developed markets significantly in this period. Our allocation to US TIPS also helped to protect against drawdown brought on by inflationary pressures. We continued to nudge risk down in the face of less generous monetary policy and concerns of China's impact on global growth resulting from regulatory changes. We ended the third quarter at an RDS of 3.15. Risk assets were boosted in the fourth quarter by a particularly strong earnings season. Markets experienced a temporary shock due to Omicron but rebounded as concerns over the severity of the variant eased. We continued to shift the equity exposure in our portfolio towards more of a balance between cyclicity and growth. While we had a cyclicity bias during the early phases of the cycle, it's become increasingly clear that the early phase of the cycle is morphing into mid-cycle. Quality and growth tend to offer higher risk adjusted returns as we move into the later stages of the cycle.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND (continued)

Portfolio Outlook

China is finally close to a stimulus policy, which now appears geared to exceed 2021s. Meanwhile, markets need to digest an increasingly hawkish Federal Reserve (Fed) that is just beginning to articulate its quantitative tightening intentions. Teamed with last month's pulling forward of the end of quantitative easing (QE), as well as signals of rate hikes to come, we think the Fed could still be careful and deliberate on its policy decision. We thus keep our Risk Dial Score at a marginally bearish 3.15. All told, and unlike the last decade, loan demand is beginning to inflect higher, greeted by an ocean of excess reserves. The Fed can either pay the banks as an incentive to keep these reserves idle (politically risky) or begin to shrink the excess. The next few quarters could be tricky for risk assets. In advance of this moment, we have been gliding our RDS from a more bullish 2.2 to a modestly bearish 3.15 over the last handful of months. Beyond policy normalization, we see the post-pandemic cycle as quite different from the post-financial-crisis cycle. As a result of a healthier private sector, the disappearance of fiscal drags, and climate urgency, the "end of fragility" will set a firmer tone for growth and inflation. We continue to view today's overheating as unfavorable for risk assets.

PineBridge Investments Europe Ltd./PineBridge Investments LLC
January 2022

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets Bond Fund seeks to achieve long-term, capital appreciation through investment in bond issues primarily by governments, their agencies, local authorities and municipalities and corporate entities located in Emerging Markets. Such securities may be denominated in the local currency of any of the OECD member countries or the local currency of the emerging countries in which the Sub-Fund is permitted to invest as per investment guidelines.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Global Emerging Markets Bond Fund Class "A", "A6HD", "AD" and "Y" returned (6.72%), (7.16%), (6.73%) and (5.73%) respectively. Over the same period, the benchmark index, a blended USD index of 1/3 of the JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return), 1/3 of the JP Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified (Total Return) and 1/3 of the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified (Total Return) returned (3.62%) and a blended AUD index of 1/3 of the JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return), 1/3 of the JP Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified (Total Return) and 1/3 of the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified (Total Return) returned 2.67%.

Portfolio Overview

Emerging market (EM) debt delivered negative returns in 2021 due to concerns regarding inflation and its impact on monetary policy and pressure within China's credit market. During the first quarter, expectations for global growth and inflation were given a boost by the passing of a major fiscal stimulus package in the US, which caused markets to price the potential for a tightening of monetary policy by the Federal Reserve and challenged risk sentiment. Statements by the Federal Reserve (Fed) soothed investor concerns about an imminent tightening of US monetary policy and markets turned their focus to the positive fundamental trends supporting EM debt markets during the second quarter and first half of the third quarter. A higher-than-expected July inflation print in the US once again raised concerns regarding an imminent reduction of liquidity from the Federal Reserve. Markets were also dealt a negative surprise by a wave of regulation in China focused on several sectors. Among the sectors targeted by China's regulators was the property sector, where liquidity among some of the more indebted issuers within the sector had already been an area of market concern. The tightening of liquidity to the sector would eventually lead to a number of credit events and cause a repricing of risk for much of China's high yield bond market. The impact of tighter monetary policy by the Fed and weakness within China's property market continued to weight on EM debt during much of the fourth quarter. Markets finally stabilized in December as guidance of a gradual rate hike cycle by the Fed helped preserve positive returns for the year. Among external debt markets, corporate debt outperformed given the shorter duration profile and a higher resilience in the face of credit volatility. Local currency debt was negatively impacted by a depreciation of currencies throughout the year as well as an increase of bond yields.

The Fund underperformed (gross and net of fees) its custom benchmark (gross of fees), the 1/3 blend of J.P. Morgan EMBI Global Diversified Index, J.P. Morgan CEMBI Broad Diversified Index and J.P. Morgan GBI-EM Global Diversified Index, during the annual reporting period ending December 31, 2021. Underperformance was driven primarily by negative selections within corporate debt – most notably an overweight position and security selection within China.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS BOND FUND (continued)

Portfolio Outlook

The acceleration of global mobility and economic activity has contributed to better-than-expected global growth and a greater than expected increase in consumer prices during the year. Disruptions in global supply chains and shipping channels has further added inflationary pressure to consumer prices. As such, concern has focused on inflation and its impact on global growth and central bank policy. For its part, the US Federal Reserve addressed inflation concern at its December meeting, setting expectations for three rate hikes in 2022 after completing the taper of its asset purchase program early next year. While the announcement did mark a hawkish shift for Fed policy, it also addressed market concern regarding inflation. Markets also responded well to Fed projections that the upcoming rate hike cycle would be a gradual increase toward a terminal rate of 2.5% in 2025. We therefore focus on the strong fundamental back drop for EM, where above-trend growth rates and improved account balances should support debt levels and allow fiscal balances to return to pre-Covid levels.

Across EM debt markets, the underperformance of high yield market segments in the second half of 2021 has improved relative value considerations. However, contagion across the broader market has been relatively limited and therefore the evaluation of opportunities and selectivity of risk within those market segments that have been under pressure will be critical over the near-term. While new Covid variants, geo-political risks and global reflation may contribute to market volatility over the near-term, from a fundamental perspective, we view current valuations as attractive across regions and ratings categories, particularly given the historically low yields found across global bond markets. For their part, EM corporate earnings remain on a positive trend, which along with a reduction in debt levels, will likely see corporate leverage decline to 10-year lows by year-end. Despite the shift among central banks to tighten monetary policy in 2022, we still note that global policy rates will still remain historically low which should continue to drive a global search for yield and provide EM debt markets with a strong underpinning of technical support. Ultimately, while EM debt may experience short-lived periods of volatility stemming from macro-economic risk, we believe investors should take advantage of potential market weakness as an opportunity to make longer-term allocations to EM debt.

Subsequent to the financial year-end, the board of the management company has decided to close the fund during 2022, subject to the relevant applications being made to the relevant regulatory authority(ies) and necessary regulatory approval(s) being obtained.

PineBridge Investments Europe Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS CORPORATE BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets Corporate Bond Fund seeks to achieve long-term, capital appreciation through investment in bonds issued primarily by corporate entities and financial institutions located in Emerging Markets. Such securities may be denominated in the local currency of any of the OECD member countries or the local currency of the emerging countries in which the Sub-Fund is permitted to invest as per investment guidelines.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Global Emerging Markets Corporate Bond Fund Class "A", "Y", "Y2H" and "Z" returned (3.58%), (2.79%), (3.05%) and (1.81%) respectively. Over the same period, the benchmark index, the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified (Total Return) (USD) and (GBP) returned 0.91% and 0.61% respectively.

Portfolio Overview

Emerging market (EM) corporate debt delivered modest positive returns in 2021 despite concerns regarding inflation and its impact on monetary policy and pressure within China's credit market. During the first quarter, expectations for global growth and inflation were given a boost by the passing of a major fiscal stimulus package in the US, which caused markets to price the potential for a tightening of monetary policy by the Federal Reserve (Fed) and challenged risk sentiment. Statements by the Fed soothed investor concerns about an imminent tightening of US monetary policy and markets turned their focus to the positive fundamental trends supporting EM debt markets during the second quarter and first half of the third quarter. A higher-than-expected July inflation print in the US once again raised concerns regarding an imminent reduction of liquidity from the Federal Reserve. Markets were also dealt a negative surprise by a wave of regulation in China focused on several sectors. Among the sectors targeted by China's regulators was the property sector, where liquidity among some of the more indebted issuers within the sector had already been an area of market concern. The tightening of liquidity to the sector would eventually lead to a number of credit events and cause a repricing of risk for much of China's high yield bond market. The impact of tighter monetary policy by the Fed and weakness within China's property market continued to weight on EM debt during much of the fourth quarter. Markets finally stabilized in December as guidance of a gradual rate hike cycle by the Fed helped preserve positive returns for the year. Primary issuance was robust throughout the year, as 2021 closed as the busiest year of EM corporate primary issuance on record, with \$530 billion priced during the year. For all the relative volatility in both rates and credit markets during the year, corporate spreads ended the year just two basis points wider, at +272 basis points as measured by the J.P. Morgan CEMBI Broad Diversified Index.

The Fund underperformed (gross and net of fees) the J.P. Morgan CEMBI Broad Diversified Index during the annual reporting period ending December 31, 2021. Underperformance was driven in large part by negative security selection within China and an overweight position in China. Elsewhere, positive security selection in Mexico was offset by negative selection in Turkey, while positive contributions from an overweight position in Ghana and underweight position in Macau were offset by negative contributions from an overweight position in Colombia and underweight positions in Jamaica and Argentina.

Portfolio Outlook

The acceleration of global mobility and economic activity has contributed to better-than-expected global growth and a greater than expected increase in consumer prices during the year. Disruptions in global supply chains and shipping channels has further added inflationary pressure to consumer prices. As such, concern has focused on inflation and its impact on global growth and central bank policy. For its part, the US Federal Reserve addressed inflation concern at its December meeting, setting expectations for three rate hikes in 2022 after completing the taper of its asset purchase program early next year. While the announcement did mark a hawkish shift for Fed policy, it also addressed market concern regarding inflation. Markets also responded well to Fed projections that the upcoming rate hike cycle would be a gradual increase toward a terminal rate of 2.5% in 2025. We therefore focus on the strong fundamental backdrop for EM, where above-trend growth rates and improved account balances should support debt levels and allow fiscal balances to return to pre-Covid levels.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Emerging Markets Focus Equity Fund seeks to achieve a relatively high rate of growth, on a long-term basis, through careful selection of equity and equity-related securities in global Emerging Markets whilst seeking to protect the Sub-Fund from downside risk.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Global Emerging Markets Focus Equity Fund Class "A", "Y" and "Z" returned (2.21%), (1.42%) and (0.43%) respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Daily Total Return Net Index (USD) returned (2.54%).

Portfolio Overview

Global Emerging Markets began 2021 with an improving outlook. Helped by the vaccines' launch, the global economy was beginning to recover from the pandemic's impact. High levels of economic stimulus by many states, low interest rates, pent-up capex demand by corporates and improved management adaptation to Covid conditions all were coming together deliver to improving economic and company-specific forecasts.

As the year progressed, several stressors emerged that caused the initially bullish outlook to become less positive. Early in the year, rising levels of subscribers in China's e-commerce platforms gave rise to fears about market saturation. There were regulatory actions directed the breadth of activities by the platforms and at their competitive practices. Global supply chain disruptions were becoming more of a hindrance than previously anticipated, especially through higher commodity and component prices. Although several emerging market countries are the beneficiaries of such processes, the market as a whole became concerned about CPI and interest rates around the world. In the second half of 2021 China Evergrande debt problems and the country's broader property sector concerns added to the investors' fears. Finally, in the fourth quarter it became evident that Russia is place large military assets near Ukraine giving rise to the fears of a large-scale war. Throughout the year, the Omicron variant of Covid emerged as yet another 'known unknown', although its impact did not seem as severe as that of the previous strains.

Investors gradually began to price in interest rate increases and to take on portfolio de-risking to reflect the multitude of uncertainties. In the first quarter, the MSCI EM Index returned +2.24%, as strong company earnings overrode broader market concerns which at the time seemed moderate. However, as the extent of geopolitical and economic stressors became more evident, stock prices began to adjust. From quarter two to quarter four in 2021 the MSCI EM index retreated -4.61%, which caused the full year return to be -2.47%. During 2021 EM Equities exceeded MSCI All Country Index by over 21%. Such a large difference in performance is explained by the Emerging Market's vulnerabilities in multiple segments of economic activity.

2021 saw the continuation of adoption of ESG principles by an increasing number of corporates. In addition to dividends and independent board directors, more companies are gradually engaging in environmentally and socially conscious behavior and are becoming more consistent in communicating their ESG attributes to the shareholders. Investors, in turn, are adding greater weight to ESG considerations in their decision-making.

The Fund exceeded (gross and net of fees) its benchmark, the MSCI Emerging Markets Index, during the annual reporting period ending December 31, 2021 due to the outperformance in stock selection. The strongest contributors to the relative performance were in the information technology and consumer discretionary sectors. The largest detracting sectors from relative fund performance were financials and communication services.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND (continued)

Portfolio Outlook

Looking ahead to 2022, the outlook for global emerging markets is cautiously positive. Many of the top-down concerns seen in 2021 remain in place. However, investors have had the time to reflect them in share prices and portfolio positioning. Current market weakness is bringing valuations to more attractive levels, especially in the context of growth. Company earnings remain strong and corporate balance sheets are generally under leveraged. In the banking sector, capital buffers are high and loan to deposit ratios are low, giving banks ample ability to manage NPL formation. Although inflation fears are concern, strong demand for labor will ensure that consumer spending is supported by higher wages. Therefore, we are inclined to see current market volatility as setting up a base for opportunities in 2022 and 2023.

The portfolio is invested in 43 companies with strong management, governance and business models mainly in consumer, technology, automation, clean energy, China localization and 5G, digitalization, industrials and pharma sectors. Since many share prices have declined, we see new investment opportunities that were not as compelling a few months ago. Even after the rally we can find suitable investment candidates. The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes, who have strong ESG characteristics and that are not government-owned. Sector wise, our largest current over-weights are in the industrials and consumer discretionary, while we are most underweight materials and communication services.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS LOCAL CURRENCY BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets Local Currency Bond Fund seeks to achieve a high level of total return and income consistent with conservation of capital through investment of not less than two thirds of the Sub-Fund's total net assets in local currency fixed income instruments issued by sovereign, quasi-sovereign, or corporate entities located in Emerging Markets.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Global Emerging Markets Local Currency Bond Fund Class "A", "A6HD", "A9HD", "AD", and "Y" returned (9.30%), (9.90%), (5.46%), (9.31%), and (8.39%) respectively. Over the same period, the benchmark index, the JP Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified (Total Return) Index (USD), (AUD) and (ZAR) returned (8.75%), (3.15%) and (0.85%) respectively.

Portfolio Overview

Emerging market (EM) debt delivered negative returns in 2021 due to concerns regarding inflation and its impact on monetary policy and pressure within China's credit market. During the first quarter, expectations for global growth and inflation were given a boost by the passing of a major fiscal stimulus package in the US, which caused markets to price the potential for a tightening of monetary policy by the Federal Reserve (Fed) and challenged risk sentiment. Statements by the Fed soothed investor concerns about an imminent tightening of US monetary policy and markets turned their focus to the positive fundamental trends supporting EM debt markets during the second quarter and first half of the third quarter. A higher-than-expected July inflation print in the US once again raised concerns regarding an imminent reduction of liquidity from the Federal Reserve. Markets were also dealt a negative surprise by a wave of regulation in China focused on several sectors. Among the sectors targeted by China's regulators was the property sector, where liquidity among some of the more indebted issuers within the sector had already been an area of market concern. The tightening of liquidity to the sector would eventually lead to a number of credit events and cause a repricing of risk for much of China's high yield bond market. The impact of tighter monetary policy by the Fed and weakness within China's property market continued to weight on EM debt during much of the fourth quarter. Markets finally stabilized in December as guidance of a gradual rate hike cycle by the Fed helped preserve positive returns for the year. Local currency debt was negatively impacted by a depreciation of currencies throughout the year as well as an increase of bond yields.

The Fund outperformed (gross and net of fees) the J.P. Morgan GBI-EM Global Diversified Index, during the annual reporting period ending December 31, 2021. Outperformance was driven by positive contributions from overweight positions in Ghana and Egypt and from foreign exchange, specifically an overweight position in Egyptian pound and underweight positions in Thai baht and Peruvian sol.

Portfolio Outlook

The acceleration of global mobility and economic activity has contributed to better-than-expected global growth and a greater than expected increase in consumer prices during the year. Disruptions in global supply chains and shipping channels has further added inflationary pressure to consumer prices. As such, concern has focused on inflation and its impact on global growth and central bank policy. For its part, the US Federal Reserve addressed inflation concern at its December meeting, setting expectations for three rate hikes in 2022 after completing the taper of its asset purchase program early next year. While the announcement did mark a hawkish shift for Fed policy, it also addressed market concern regarding inflation. Markets also responded well to Fed projections that the upcoming rate hike cycle would be a gradual increase toward a terminal rate of 2.5% in 2025. We therefore focus on the strong fundamental backdrop for EM, where above-trend growth rates and improved account balances should support debt levels and allow fiscal balances to return to pre-Covid levels.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS LOCAL CURRENCY BOND FUND (continued)

Portfolio Outlook (continued)

Across EM debt markets, the underperformance of high yield market segments in the second half of 2021 has improved relative value considerations. However, contagion across the broader market has been relatively limited and therefore the evaluation of opportunities and selectivity of risk within those market segments that have been under pressure will be critical over the near-term. While new Covid variants, geo-political risks and global deflation may contribute to market volatility over the near-term, from a fundamental perspective, we view current valuations as attractive across regions and ratings categories, particularly given the historically low yields found across global bond markets. Despite the shift among central banks to tighten monetary policy in 2022, we still note that global policy rates will still remain historically low which should continue to drive a global search for yield and provide EM debt markets with a strong underpinning of technical support. Ultimately, while EM debt may experience short-lived periods of volatility stemming from macro-economic risk, we believe investors should take advantage of potential market weakness as an opportunity to make longer-term allocations to EM debt.

Subsequent to the financial year-end, the board of the management company has decided to close the fund during 2022, subject to the relevant applications being made to the relevant regulatory authority(ies) and necessary regulatory approval(s) being obtained.

PineBridge Investments Europe Ltd./PineBridge Investments LLC

PineBridge Global Funds

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Focus Equity Fund seeks to achieve growth at a reasonable price (meaning securities that have a growth potential and are reasonably priced as determined by conventional measures, such as priced earnings or by comparison to other securities in the same market and the same industry) by making equity and equity-related investments in global markets with a focus on superior and sustainable earnings performance.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Global Focus Equity Fund Class "A", "C", "L", "Y" and "ZD" returned 24.45%, 24.02%, 25.13%, 25.45% and 26.71% respectively. Over the same period, the benchmark index, MSCI All Country World Index (ACWI) Daily Total Return Net Index (USD) returned 18.54%.

Portfolio Overview

The global pandemic appears to be transitioning into the endemic phase, and re-openings should gain additional traction in the first half of 2022, although it could be a little choppy along the way due to covid flare ups and emerging variants of concern. The overall demand picture remains strong, and companies have largely been able to manage through supply chain problems, inflation, and ongoing covid-related disruptions. Companies sound confident on order books and pricing, while supply chain pressures should slowly ease. Company fundamentals remain on an improving trend, but largely reflected in valuations above historical levels. Nonetheless, we are still finding investment opportunities in attractive companies with expanding TAMs and/or exposure to increased digitization, capex spending, and research and development (R&D) spending.

During 2021, the PineBridge Global Focus Equity Fund outperformed its benchmark, the MSCI All Country World Net Index. Outperformance was largely the result of strong security selection. Positive allocation effects provided a small but incremental lift to excess performance. Overall, financials, information technology, and communication services were the top contributing sectors to excess returns. By contrast, energy, real estate, and consumer staples were the main laggards. The Fund remains overweight industrials, information technology, healthcare, and communication services, and underweight financials, materials, consumer staples, utilities, energy, real estate, and consumer discretionary. The Fund seeks to outperform its benchmark through bottom-up stock selection, rather than from top-down allocation, and has benefited by owning select companies globally that are improving their market positions and exercising stronger-than-peer pricing power through new technologies and operating processes.

Portfolio Outlook

We continue to believe that risk-reward is attractive for fundamental investors over the medium-term. While absolute valuations remain elevated, earnings revisions are trending higher. In addition, pairwise correlations have fallen below long-term averages. Lower stock correlations and elevated return dispersion provide a supportive backdrop for active stock selection.

The Fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include digitalization, Asia consumer, mini-cycles (5G, semiconductors, machinery), and next-gen management.

PineBridge Investments LLC
January 2022

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL STRATEGIC INCOME FUND

Portfolio Objective

PineBridge Strategic Bond Fund seeks to achieve a high level of total return and income consistent with conservation of capital through investment in a diversified portfolio of income producing debt securities.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge Strategic Bond Fund Class "A", "A5HD", "AD", "M" and "YD" returned (0.64%), (0.70%), (0.64%), (0.59%) and (0.04%) respectively. Over the same period, the Index, 10% FTSE Non-USD World Government Bond Index (Unhedged)(Total Return)/ 35% Bloomberg Barclays Capital US Corporate High Yield 2% Issuer Capped Index (Total Return)/ 20% JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return)/ 35% Bloomberg Barclays Capital US Aggregate Bond Index (Total Return) (USD) returned (0.09%).

Portfolio Overview

Credit markets were mixed to start the year as most fixed income asset classes traded lower during the first quarter before recovering in the second quarter. Early in the year, investors weighed improving recovery prospects from the rollout of the Covid vaccine and a higher likelihood of fiscal stimulus for both Covid-response as well as longer term infrastructure spending and other initiatives against the continued spread of the virus and resulting shutdowns and the rapid rise in Treasury rates. As we moved into the second quarter, credit assets mostly began to recover as Treasury rates traded lower, the fundamental backdrop continued to trend in a positive direction, demand for risk assets stayed strong and investors became more comfortable in the belief that the spike in inflation would be transitory. Fixed income markets were still skewed towards risk taking to start the second half of the year with investors continuing to buy on weakness as they remained comfortable with monetary and fiscal accommodative measures and looked beyond a tempered growth outlook from an acceleration in Delta variant Covid cases, continued high inflation from supply chain disruptions and prospects of Federal Reserve (Fed) tapering. In addition, emerging markets began to experience additional turbulence as the Chinese regulatory reset and Evergrande's troubles resulted in stress in the Chinese property sector and shook investors causing the asset class to lag other credit markets. As we continued to move towards the end of the year, credit markets remained mixed as investors balanced continued strong demand, an improving fundamental backdrop, albeit at a slower pace, and reduced concerns about the severity of the Omicron Covid variant against sustained high inflation, rising Treasury rates, upcoming central bank tapering efforts and rate hikes, and increased geopolitical uncertainty in Europe and Asia. Overall, in 2021 5- and 10-year Treasury rates traded 90 bps and 60 bps higher, respectively. The US dollar strengthened during the year, increasing 6.37% as measured by the DXY index.

The Fund outperformed (gross of fees) its blended benchmark, 10% FTSE Non-USD World Government Bond Index (Unhedged) (Total Return)/ 35% Bloomberg Barclays Capital US Corporate High Yield 2% Issuer Capped Index (Total Return)/ 20% JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified (Total Return)/ 35% Bloomberg Barclays Capital US Aggregate Bond Index (Total Return), during 2021. Asset allocation and security selection contributed to fund performance for the year. From an asset allocation standpoint, underweight allocations to non-USD assets and Treasuries and an overweight allocation to high yield over the course of the year were significant contributors to fund performance. These contributions more than offset the detracting impact from an overweight allocation to securitized products and the cash position. Regarding specific sectors, an overweight allocation to the energy sector was also a major contributor due to the sharp rally in oil prices over the course of the year. From a security selection standpoint, holdings within the high yield and investment grade credit portfolios were the most notable contributors for the year, more than offsetting marginal detractions from holdings in the securitized products portfolio. Yield curve positioning also contributed to performance during the year as the Fund maintained a lower average duration relative to the benchmark when Treasury rates traded sharply higher. Hedging non-USD exposure was also a contributor to performance as the dollar strengthened during the year.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL STRATEGIC INCOME FUND (continued)

Portfolio Outlook

While monetary policy normalization is imminent as the Fed and other central banks move to fight near-term inflation risks, the timing of the shift between tapering and tightening, as well as the number and pace of eventual rate hikes, remains highly uncertain. The market expects 3 to 4 rate hikes over the course of 2022; however, with the current risks to the economic outlook, we believe we may ultimately see more moderate policy changes. In addition, while the spread of the Omicron variant threatens additional shutdown measures, thereby dampening growth expectations, particularly in Europe, it appears this variant may be milder than other strains of the virus and therefore present less of a risk to the long-term outlook. Also on the positive side are relatively strong fundamentals and a technical backdrop that is expected to stay supportive into 2022 as issuance moderates and demand remains robust.

From a total return perspective, the team continues to believe that emerging markets debt offers the most attractive opportunities, despite the ongoing struggles in the Chinese property sector. That said, we believe a more selective approach to be prudent and continue to buy on weakness as negative headlines could result in increased volatility and present attractive opportunities for quality names. Within developed markets, given very tight valuations across asset classes, the team expects yield to drive total returns and security selection to serve as the primary source of alpha generation in 2022.

Subsequent to the financial year-end, the board of the management company has decided to close the fund during 2022, subject to the relevant applications being made to the relevant regulatory authority(ies) and necessary regulatory approval(s) being obtained.

**PineBridge Investments LLC/PineBridge Investments Europe Ltd.
January 2022**

Investment Manager's Report (continued)

PINEBRIDGE GREATER CHINA EQUITY FUND

Portfolio Objective

For the year 1st January to 31st December 2021, the PineBridge Greater China Equity Fund Class "A" and "Y" returned (5.65%) and (4.89%) respectively. Over the same period, the benchmark index, the MSCI Golden Dragon 10/40 Index Net Return (Net) (USD) returned (9.74%).

Portfolio Performance

Greater China equity market started the year of 2021 with remarkable rally, driven by continued economic recovery in China and buoyant sentiment especially towards mega internet companies. Following the Chinese New Year holiday, however, market entered into risk-off mode, partly driven by US bond yield spike which undermined risk appetite. In the second quarter, the market regained strength on solid first quarter 2021 corporate earnings and the run in commodity prices which supported the material and energy sectors. In the second half of the year, Hong Kong equity market declined significantly as tightened regulation on internet and education sectors hit the earnings outlook of these industries and spurred concerns about policy risks in new-economy sectors in general. Power shortage in China, which led to suspension or slowdown of production in certain industries, concern on Evergrande incident and its spillover effect to broader economy, and some new local COVID cases were also attributable to the weaker sentiment.

The Fund outperformed its benchmark in 2021. The overall conservative positions especially in expensive and crowded sectors contributed notably. During the year, the Fund's exposure in utility and industrial sector, the underweight position in consumer discretionary sector contributed positively to performance, while the positionings in information technology, financial and consumer staple sectors detracted.

Portfolio Outlook

With property sector continuing to slowdown, retail sales moderating due to resurgence of Covid cases in both mainland and Hong Kong, economic growth in the coming year will likely be under pressure. That said, order book growth as suggested by the latest PMI, industrial production and infrastructure investment may provide support to the economy. Policy in China will also turn more accommodative in the new year. With valuation of China equities now being more attractive as compared to peer markets and its own historical range, we expect market to find some support while staying highly volatile in 2022.

PineBridge Investments Asia Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE INDIA EQUITY FUND

Portfolio Objective

PineBridge India Equity Fund seeks to provide long-term capital appreciation by investing in equity and equity-related securities of companies listed on stock exchanges in India or closely related to the economic development and growth of India.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge India Equity Fund Class "A", "A5", "A5CP", "C", "R", "R1", "R2D", "RD", "Y", "Y3", "YD" and "Z" returned 19.14%, 21.73%, 22.06%, 18.86%, 20.40%, 30.56%, 21.93%, 20.40%, 20.09%, 34.15%, 20.10% and 21.30% respectively. Over the same period, the benchmark index, the MSCI India Daily Total Return Net (USD), (SGD), (EUR), (GBP) and (JPY) returned 26.23%, 28.76%, 35.82%, 27.40% and 40.99% respectively.

Portfolio Overview

Despite a brutal COVID-19 second wave in the second quarter of the year and heavy selling from foreign investors towards the end, the equity investors made healthy returns in 2021. A significant increase in retail participation helped divert substantial domestic savings into the equity market and anchored the heavy selling from foreign investors. During the year, India also witnessed one of the highest IPO fundraisings. The September quarter GDP data showed that the Indian economy had achieved the same output level as the pre-COVID level. That means a loss of almost two years of output and attendant impact on individual income levels, given the constant rise in population. India is witnessing a faster increase in Wholesale Price Index (WPI) than Consumer Price Index (CPI), causing pressure on companies' gross margins, which is the exact opposite of the situation as it prevailed in 2020. Rising energy and commodity prices, disruptions in global supply chains, inflationary pressures, speculation around the US Fed Taper, and the eventual normalization of the interest rate environment sometime in 2022 could keep the markets volatile, in our view. While the above factors will influence the short-term outlook, the long-term has never been better, with India becoming a focus nation that can provide supply chain resiliency to global trade.

The Fund outperformed the benchmark until July 2021; however, it started to lag post that as it adopted a cautious stance due to soaring valuations, uneven domestic recovery, and other headwinds mentioned above. For the year, the Fund ended up underperforming the benchmark. From a sector perspective, underweight in financials and overweight information technology contributed to the performance while overweight in materials dragged the performance. At the stock level, eClerx Services Limited contributed positively while Hero Motocorp Limited detracted the performance.

Portfolio Outlook

India and its markets have been consistently underrated. Over the past 5, 10, and 20 years, the MSCI India Total Return Index has given 15%, 11%, and 13% per annum compounded returns in USD (as of 31 Dec 2021). The Indian economy has had many problems over these years and is still not as mature and robust as most developed countries. However, the country's size and low per capita income ensure that opportunities for capital to be deployed are plentiful. With the cost of technology going down and its ubiquity increasing, a country like India is no longer 'years behind' other nations. In fact, in some cases, India is leading the technological revolution, as evidenced by its payment systems.

Investment Manager's Report (continued)

PINEBRIDGE INDIA EQUITY FUND (continued)

Portfolio Outlook (continued)

There are some near-term headwinds such as rising interest rates, low-capacity utilization, high commodity prices, and steep valuations of at least a group of stocks. And these factors may make Indian markets look less attractive than other markets. Investors should be wary of considering such ephemeral and short-lived factors when deciding long-term allocation to India. Over the long term, India's per capita income, which is a fraction of most other countries, will rise. Indian labor will be employed globally/virtually in higher numbers, Indian exports will provide supply chain resiliency, Indian startups, and technological innovation will become global. And these structural aspects will overcome the short-term economic headwinds. Focus on ESG related factors is a boon to India as it would mean India will become less dependent on fossil fuel imports while an emphasis on social equality and inclusivity will ensure that most Indians get opportunities to earn a dignified livelihood.

PineBridge Investments Asia Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE JAPAN EQUITY FUND

Portfolio Objective

PineBridge Japan Equity Fund seeks to achieve long term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1 January to 31 December 2021 the PineBridge Japan Equity Fund Class "A", "Y" and "Z" returned (0.66%), 0.14% and 1.14% respectively. Over the same period, the benchmark index, the TOPIX Total Return Net Index (USD) returned 0.76%.

Portfolio Overview

The Japanese equity market, the broad market index of Topix, gained 12.74% in the local currency. Election of "triple-blue" US administration sparked gains, but upside limited by rising US long-term rates, and global rise in Covid-19 infections. Foreign investors led resurgence in the Japan market in response to LDP leadership race news, but credit concerns regarding Evergrande, US/Europe monetary tightening, and Omicron fears weighed heavily. As for corporate fundamentals, earnings revisions were positive till 3rd quarter in most of the sectors due to upward revisions by the re-opening effect of COVID-19. However, the positive momentum has got slower in 4th quarter. As for the supply/demand situation of equities, there were no major buyers/sellers by investor category through year 2021. By style, value outperformed growth in the first quarter of 2021. Although there was no trend in the second quarter, large growth outperformed in the second half of 2021. The Fund outperformed the Fund's benchmark on gross of fee basis and underperformed on net of fee basis. Sector allocation was negative as negative contribution from an overweight in retail and underweight in commercial services was larger than the positive contribution from an overweight in electronics and underweight in consumer services. Stock selection was beneficial since positive contribution from the stocks in other defensives and telecommunications sectors were larger than the negative contribution from the stocks in commercial software and automobiles sectors.

Portfolio Outlook

It will take a while for the coronavirus situation to be settled even after vaccines have been distributed. In the post-coronavirus era, it should be noted that US-China friction, Middle East tension and North Korea relations, will continue to concern the market. The Japanese prime minister changed to Mr. Kishida in October 2021, and the team is carefully monitoring his policies. The estimated Price Earnings Ratio for fiscal year to March 2023 is approximately 14-15x, which has become reasonable over the past several months. In the short term, the Japan equity market will be volatile as we have more risk of the Omicron variant to spread. The recent global supply-chain disruption will also add unclear factors to the global economies. In the medium term, the proceeding vaccine/oral treatment developments and distributions will help support the equity market. A recovery of the supply chain would also lift the equity market. The team has maintained the Fund's overweight position in global cyclicals to take advantage of the market and cyclical recovery. Technology-related sectors, which benefit from EV/5G/IoT/automation, etc., are priced at relatively high valuations, and the team believes that it will be important to judge which companies will be able to actually generate profits from the technology-themed related businesses.

PineBridge Investments Japan Co., Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Japan Small Cap Equity Fund seeks to achieve long-term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in small Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Japan Small Cap Equity Fund Class "A", "A12", "A3", "C", "M", "R1D", "RD", "R2D", "Y", "Y1H" and "Y3" returned (2.38%), 7.82%, 8.75%, (2.59%), (2.57%), 6.81%, (1.50%), (1.07%), (1.61%), 8.61% and 9.63% respectively. Over the same period, the benchmark index, the MSCI Japan Small Cap Daily Total Return Net Index (USD), (EUR), (SEK), (JPY) and (GBP) returned (2.18%), 6.09%, 7.98%, 9.00% and (1.45%) respectively.

Portfolio Overview

The Japan small cap market extended by 9.0% in local currency terms in the year 2021 renewing the record high, due to the progress of the COVID-19 vaccination worldwide and continued fundamental recovery in most regions triggering the strong recovery of value and cyclicals. However, most of the gain was in the first quarter and the market moved sideways toward the end of the year. Initial weakness was caused by the delayed vaccination in Japan and an extended soft lockdown until the Tokyo Olympic game finished. Then, Evergrande issue in China and the start of the US and European tapering increased the shareholders' concern.

During this period, the Fund outperformed (gross and net of fees) its benchmark, the MSCI Japan Small Cap Daily Total Return Net Index mainly thanks to the positive contribution from the holdings in electronics for the continued positive quarter-on-quarter fundamentals progress, and business and consumer services as a beneficiary of the post-pandemic recovery in Japan. By style, the tilt in growth attributed negatively, especially among domestic high and stable growth companies; however cyclical growth companies offset the negatives.

Portfolio Outlook

While uncertainty related to Covid-19 would continue to lessen as oral therapeutic becomes available, reducing the risk of hospitalization and death. At the same time, the global supply chain disruption and related inflation would moderate, that would accelerate the post-pandemic recovery. The market has been digesting the normalization from the global easy monetary policies, resulting in a rise of the capital cost and profit taking of high valuation stocks. As a result, the estimated price to earnings fell to around 12x in FY2022 and below 11x in FY2023 that is the lowest level of its historical range after the GFC, and the rise of the capital cost seems already in price. The team also believe the cyclical recovery would be also supported by the long-term structural demand of digitalization and carbon free transition, which would support the market from the earnings side.

As for the portfolio's positioning, the team continues to overweight electronics and commercial services, which are attractively priced and benefit from the COVID-19 recovery and longer-term structural industry and social dynamics, such as digital transformation and demography.

PineBridge Investments Japan Co., Ltd.
January 2022

Investment Manager's Report (continued)

PINEBRIDGE LATIN AMERICA EQUITY FUND

Portfolio Objective

PineBridge Latin America Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies operating in the economies of Latin America.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge Latin America Equity Fund Class "A" and "Y" returned (15.02%) and (14.34%) respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Latin America Daily Total Return Net Index (USD) returned (8.63%).

Portfolio Overview

In 2021, the MSCI Emerging Market (EM) Latin America DTR Net Index declined 8.63%, underperforming the MSCI Emerging Market Index, which was down 2.54% and the S&P 500, which was up 28.68%, in a year marked by the continuing impact of COVID-19, rising inflation, rate hikes as well as political and regulatory uncertainty in Latin America. The upcoming removal of Federal Reserve (Fed) liquidity and the pick-up of Omicron cases globally have also weighed on markets.

Argentina and Peru were the weakest performers in the region, underperforming the Index due to two key constituents in each region. The positive highlight of the year was Mexico, which had a strong positive performance explained by a resilient economic recovery leveraged on US growth, supported by lower monetary tightening relative to other Latin America nations and less political noise. Brazil, Chile, and Colombia posted negative returns for the year and underperformed the Index. The Latin America currencies (LACI) depreciated by 8.9% in 2021, dragged by the ARS, CLP, COP, and PEN. On the other hand, the MXN and BRL were the only two currencies that outperformed LACI.

At a sector level, the Index was most significantly pressured by consumer discretionary, health care, and financials, while communication services, information technology (due to the need for rapid digitalization in all sectors) and energy (due to rising oil prices) were the leaders of the Index.

The Fund underperformed (gross and net of fees) its benchmark, the MSCI Emerging Markets Latin America Daily Total Return Net Index, during the year 2021. The Fund's underperformance was mainly due to stock selection in Brazil, Chile, and Mexico, partially offset by an overweight allocation in Mexico and underweight allocation in Brazil. At a sector level, the largest contributors to the Fund's underperformance were stock selection in industrials and consumer staples, and an overweight allocation to consumer discretionary, mitigated by stock selection in consumer discretionary and materials as well as an underweight allocation to financials.

Investment Manager's Report (continued)

PINEBRIDGE LATIN AMERICA EQUITY FUND (continued)

Portfolio Outlook

Despite posting negative returns for the year, Latin America markets rallied in December as investors appeared less worried about the risks from Omicron, more confident of ongoing recovery due to positive earnings per share revisions, and a continuation of economic expansion. The anticipation that the Federal Reserve will accelerate its taper timeline in 2022 led to choppy trading. For Latin America, higher inflation and rates, as well as political and fiscal tensions, continue as important risks to monitor in the region. In Latin America, monetary policy has become the most restrictive among all regions. Growth deceleration and social issues remain a concern as fiscal stimulus is exhausted. Political activity will dominate the narrative in Colombia and Brazil in 2022. The main themes in the region are: (1) Brazil: Inflation has jeopardized the easy monetary policy stance as the country is currently undergoing a rate hiking cycle that is one of the steepest in the world even though economic data in the fourth quarter revealed a deceleration. The upcoming presidential elections are also a key factor to be monitored. (2) Mexico: Weaker than expected economic data as well as suboptimal changes to labor regulation may delay the recovery in the first half of 2022; however, these headwinds are expected to be transitory, and growth is expected to pick up. (3) Chile: Markets were driven mainly by the political noise of presidential elections, which a candidate with unorthodox economic initiatives ended up winning as well as the ongoing creation of a new constitution. The country should continue to lift mobility restrictions as the spread of COVID-19 cases becomes less of a risk factor. (4) Colombia: Upcoming elections in 2022 will become a source of further volatility; however, the country benefits disproportionately from higher oil prices. High consensus growth estimates along with expected moderate rate hikes and reasonable valuations paint a more optimistic scenario. (5) Peru: Policy uncertainty remains the norm, which has hindered investment flows into the region. (6) Argentina: challenging economic conditions, high inflation and policy uncertainty are major headwinds for the investment outlook. At the end of December, the Fund was overweight Argentina and Mexico and underweight Brazil, Chile, Colombia, and Peru. At the end of November 2021, MSCI reclassified Argentina to the "Standalone" category, leaving the EM Index.

Investment Manager's Report (continued)

PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND

Portfolio Objective

The investment objective of the Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing. The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge US Large Cap Research Enhanced Fund Class "A", "A5CP", "A5H", "Y" and "YYD" returned 27.77%, 30.33%, 27.53%, 28.41% and 29.47% respectively. Over the same period, the benchmark index, the Standard & Poor's 500 Total Return Net Index (USD) and (SGD) returned 28.16% and 30.73% respectively.

Portfolio Overview

For the month of January, US equities underperformed overall with underlying volatility whipsawing markets more than the month end number would suggest. Political turmoil and vaccine rollouts contributed to the intra-month market volatility. US equities were generally positive for the month of February as positive sentiment around vaccine rollout and the corresponding economic recovery helped to drive markets to all-time highs intra-month. The hopes of economic recovery in the US spurred equity markets forward to further outperformance in April, with the S&P 500 making new highs numerous times throughout the month. Overall macro data in April trended positive, continuing to lend support to the US reopening trade, and further helped by the announcement that New York would be ready to fully reopen in about a month's time. With the US economy having operated in a low inflation, low interest rate environment for so long, there may be an adjustment period should both begin to rise at a steadier rate. Equity markets continued to perform well in June despite hawkish signals from the Federal Reserve (Fed) and the potential impact of the new delta variant of Coronavirus. US equity markets continued their upward positive trend in August as indexes made new highs in a month that is typically thin in terms of trading volumes. Inflation fears that were fueled by continued supply-chain disruptions as well as the risk of Delta variant spread remained a focus. In October, US equities reached new all-time highs as the Federal Reserve laid out a plan for policy normalization in the face of elevated inflation. After reaching new highs earlier in the month of November, markets stumbled entering the holiday season as concerns surrounding inflation and the new Omicron variant of Covid-19 rattled markets to end the month. Chair Powell's comments surrounding the use of the word transitory signaled a potential change in their view on inflation as it continues to trend up. US equities closed the year on a strong rally in December, bringing the total return for the S&P 500 over 25% on the year as equities bounced back substantially from the lows of the Covid-19 pandemic. Supporting December returns was a higher market breadth across the broader market. Support from the Federal Reserve continued throughout the year, though the tone has shifted expectations for a faster paced rate normalization with higher inflation looming.

During the period, the Fund outperformed the S&P 500 Total Return Net Index. During the period, the strongest contributors to relative performance were in information technology and communication services sectors. The largest detracting sector from relative performance was the health care sector. The high stable growth categorization was the top performing growth category exhibiting strong stock selection while the mature defensive categorization were the worst performing.

Investment Manager's Report (continued)

PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND (continued)

Portfolio Outlook

Going into 2022, there is less optimism for the strong double-digit year-on-year equity outperformance that's characterized the last two years. Inflation continues to be a key concern for 2022 and along with it, the Federal Reserve's response to rising inflation. Regardless of whether inflation proves transitory with easing of supply chain pressures, the Fed's path of rate normalization could mean some uncertainty to navigate for US equities moving forward, though growth conditions for equities are still positive on the whole.

PINEBRIDGE US RESEARCH ENHANCED CORE EQUITY FUND

Portfolio Objective

The investment objective of PineBridge US Research Enhanced Core Equity Fund is to seek to attain long-term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing.

The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2021, the PineBridge US Research Enhanced Core Equity Fund Class "A" and "Y" returned 27.58% and 28.72% respectively. Over the same period, the benchmark index, the Standard and Poor's 500 Total Return Net Index returned 28.16%.

Portfolio Overview

For the month of January, US equities underperformed overall with underlying volatility whipsawing markets more than the month end number would suggest. Political turmoil and vaccine rollouts contributed to the intra-month market volatility. US equities were generally positive for the month of February as positive sentiment around vaccine rollout and the corresponding economic recovery helped to drive markets to all-time highs intra-month. Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND

Portfolio Objective

The investment objective of PineBridge USD High Yield Bond Fund is to aim to maximize total return consisting of current income and capital appreciation by primarily investing in USD-denominated high yield debt securities.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge USD High Yield Bond Fund Class "X", "X1", "X2" and "X2D" returned 4.66%, 12.60%, 5.62% and 5.62% respectively. Over the same period, the benchmark index, the Bloomberg Barclays High Yield Total Return Index (USD), (EUR) and (GBP) returned 5.26%, 13.25% and 6.23% respectively. For the period 18th March to 31st December 2021, the PineBridge USD High Yield Bond Fund Class "X7" returned 3.09%. Over the same period, the benchmark index, the Bloomberg Barclays High Yield Total Return Index (CHF) returned 3.32%. For the period 3rd August to 31st December 2021, the PineBridge USD High Yield Bond Fund Class "X2H" and "X2HD" returned 1.53% and 1.53%. Over the same period, the benchmark index, the Bloomberg Barclays High Yield Total Return Index (GBP) returned 1.13%. For the period 12th November to 31st December 2021, the PineBridge USD High Yield Bond Fund Class "A5HD" returned 0.42%. Over the same period, the benchmark index, the Bloomberg Barclays High Yield Total Return Index (SGD) returned 0.20%.

Portfolio Overview

High yield bonds generated positive total returns in 2021 as strong corporate earnings, a benign default backdrop and the global economic recovery outweighed concerns from the spread of new Covid variants, rising Treasury rates, persistent high inflation, and a move toward less accommodative monetary policies from the Federal Reserve (Fed) and other central banks. The Bloomberg US High Yield Index returned 5.26% during the year, as Ba-rated bonds returned 4.61%, single-B rated bonds returned 4.85% and Caa-rated bonds returned 8.59%. The energy sector was the top performing sector in 2021, returning 13.48%, due to the sharp rally in oil prices over the course of the year. The option-adjusted spread (OAS) for the Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index traded 77 bps tighter to end the year at 284 bps. Gross new issue activity totaled \$483bn during the year, the highest volume on record and c.7% higher than 2020 levels. High yield mutual funds and ETFs reported outflows of \$13.6bn in 2021 compared to inflows of \$44.3bn in 2020. The par weighted US high yield default rate including distressed exchanges ended December at a record low 0.29%, down 647bps during the year and well below the historical average of 3.80%. 5- and 10-year Treasury rates traded 90 bps and 60 bps higher, respectively.

The Fund underperformed (gross and net of fees) its benchmark, Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index, in 2021. Security selection detracted from performance for the year, while sector selection contributed. From a security selection standpoint, holdings among energy and consumer cyclical names were the most notable detractors during the year, more than offsetting contributions from credits in the capital goods and communications sectors. Within energy, while our holdings generated an attractive double digit total return during the year, they did not fully maintain pace with the energy sector overall as we did not own as many lower quality and higher beta credits. From a sector selection standpoint, overweight allocations to the energy and transportation sectors and an underweight allocation to the communications sector contributed to performance, while a cash position and an overweight allocation to the electric sector detracted.

Portfolio Outlook

While our outlook is not certain, we expect that the downside risks related to the most recent variant will fade in the early part of 2022 and the economic impact will be limited and temporary. Beyond that, investors will look to balance strong corporate earnings, positive ratings migrations including significant rising star activity and very low default rates against the backdrop of tighter monetary conditions, still high inflation driven by supply chain constraints and geopolitical tensions in Europe and Asia.

Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND (continued)

Portfolio Outlook (continued)

Given that context and looking at current valuations, we are finding attractive opportunities at the issuer and security level. However, at the index level, we view aggregate valuations as fair given historically tight spreads but also a historically benign default backdrop and the potential for upward ratings migrations.

PineBridge Investments LLC
January 2022

Investment Manager's Report (continued)

PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND

Portfolio Objective

The investment objective of PineBridge USD Investment Grade Credit Fund is to aim to maximise total return and provide capital preservation through investment in the US Investment Grade credit universe.

Portfolio Performance

For the year 1 January to 31 December 2021, the PineBridge USD Investment Grade Credit Fund Class "A", "C", "X" and "Y" returned (1.14%), (2.22%), (0.10%) and (0.44%) respectively. Over the same period, the benchmark index, the Bloomberg Barclays US Credit Total Return Index returned (1.08%).

Portfolio Overview

Market optimism surrounding the US economic outlook improved in the first quarter as the new Democratic majority in the Senate drove expectations of a bigger spending package. The vaccine rollout plan and a sharp decline in COVID-19 cases in the US also helped market sentiment. The credit markets continued their strong performance into the second quarter despite the increased rate volatility, as investment grade credit spreads tightened to new post-financial crisis tightness and treasury yields declined. The Federal Reserve (Fed) meeting in June delivered a hawkish surprise by moving the 2023 median federal funds rate forecast to two hikes from nothing three months ago.

The credit markets traded with a weaker tone in third quarter as strong earnings were offset by concerns over downside revisions to economic growth in the second half of the year, driven primarily by a rise in Covid cases tied to the Delta variant. The credit markets came under further pressure in the fourth quarter as volatility picked up due to fears around the new COVID variant Omicron and a hawkish pivot from Fed Chair Powell. Interest rate volatility jumped to the highest levels since 2020 on uncertainties around inflation and signals of faster tapering. Risk assets reversed some of the weakness in December on lower than anticipated Omicron risks and reduction in interest rate volatility, as the December Fed meeting was largely in line with market expectations.

The portfolio outperformed its benchmark, gross of fees, the Bloomberg Barclays US Credit Index, during the year due to positive contributions from security selection, primarily in the energy, financials and consumer non-cyclical sectors. Asset allocation was also positive driven by underweight in government sector and overweight in energy. The portfolio's slight underweight 5yr key rate duration versus the index contributed to performance during the period.

Portfolio Outlook

While monetary policy normalization is imminent as the Fed and other central banks move to fight near-term inflation risks, the timing of the shift between tapering and tightening, as well as the number and pace of eventual rate hikes, remain highly uncertain. The market expects two to three rate hikes throughout 2022, though with the current risks to the economic outlook, we believe more moderate policy changes could be likely. In addition, while the spread of the Omicron variant threatens additional shutdown measures and thereby dampens growth expectations, particularly in Europe, the variant may be milder than other strains and, therefore, present less of a risk to the long-term outlook. Also on the positive side are relatively strong fundamentals and a technical backdrop that is expected to stay supportive into the year as issuance moderates and demand remains robust. Given tight valuations, the team expects the yield to drive total returns and security selection to serve as the primary source of alpha generation in 2022.

PineBridge Investments LLC
January 2022

Statement of Manager's Responsibilities

The Manager is responsible for preparing the Annual Report and the Financial Statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law). In preparing these Financial Statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards and identify the standards in question subject to any material departure from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that each Sub-Fund will continue in operation.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Fund and to enable it to ensure that the Financial Statements are prepared in accordance with FRS 102 and comply with the provisions of the Prospectus, Trust Deed and the UCITS Regulations. The Manager has appointed the Administrator to maintain the accounting records of the Fund at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud, error and other irregularities.

Under the UCITS Regulations, the assets of the Fund are entrusted to the Depositary for safe-keeping.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on PineBridge's website (www.pinebridge.com/funds/emea/professional-investor/). Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Connected Persons

Regulation 43 of the Central Bank (Supervision And Enforcement) Act 2013(Section 48(1)) (Undertakings For Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations") "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

As required under UCITS Regulation 81 (4), the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by UCITS Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

ON BEHALF OF THE BOARD OF THE MANAGER:

Director

Director

Date: 21 April 2022

Depository's Report to the Unitholders of PineBridge Global Funds

We have enquired into the conduct of the Manager in respect of PineBridge Global Funds (the "Trust") for the financial year ended 31 December 2021, in our capacity as Depository to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Trust in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed.

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and;

(ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depository by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 [Section 48(1)] (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

Notes to the Financial Statements for the financial year ended 31 December 2021

1. ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these Financial Statements are set out below. The accounting policies applied are consistent with all the periods presented unless otherwise stated.

BASIS OF PREPARATION AND PRESENTATION

a) Statement of compliance

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 102, the financial reporting standard applicable in the UK and Republic of Ireland and the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). The financial statements have been prepared on a going concern basis, with the exception of PineBridge Global Emerging Markets Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund (all the "Sub-Funds") whose financial statements were prepared on a basis other than going concern as the Board of Directors of the Manager have resolved to terminate these Sub-Funds after the financial year end. These Sub-Funds may be terminated after the financial year end, subject to the relevant applications being made to the relevant regulatory authority(ies) and necessary regulatory approval(s) being obtained. The Directors of the Manager approved the termination of these funds for strategic and commercial reasons.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The Fund has continued to avail of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

All references to net assets throughout the document refer to Net Assets Attributable to Holders of Redeemable Participating Units unless otherwise stated, with the exception of the PineBridge Asia Dynamic Asset Allocation Fund which is prepared under Equity presentation and use the reference Net Assets.

b) Consolidation

FRS 102 sets out the conditions relating to parent undertakings and the preparation of consolidated financial statements for subsidiaries. FRS 102 typically defines controlling interest as ownership, directly or indirectly of over 50% of the outstanding voting shares of another entity. The results of the subsidiary undertakings are consolidated into the group Statement of Comprehensive Income from the date on which control over the operating and financial decision making is obtained. PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Accordingly, the Financial Statements of PineBridge Investments GF Mauritius Limited are consolidated in the PineBridge India Equity Fund, and therefore include the assets and liabilities and the profit/loss of PineBridge Investments GF Mauritius Limited for the financial year ended 31 December 2021 and financial year ended 31 December 2020.

All significant inter-fund accounts and transactions have been eliminated in the Consolidated Financial Statements of PineBridge India Equity Fund.

c) New accounting pronouncements

In March 2020, the FASB issued an Accounting Standards Update ("ASU") 2020-04 which provides guidance to account for certain contract modifications prospectively to ease the potential accounting burden associated with transitioning away from the London Interbank Offered Rate ("LIBOR") and other reference rates that are expected to be discontinued. The ASU is effective immediately upon release of the update on March 12, 2020 through December 31, 2022. There is no impact of this ASU on the financial statements for the year ended December 31, 2021 (31 December 2020: None) and management is currently assessing the impact of this ASU on the financial statements in future periods.

There are no other new standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the Fund.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss

i) Classification

This category has two sub-categories: financial assets and liabilities held for trading and those designated by Directors at fair value through profit or loss at inception. Financial assets and financial liabilities are designated by the Manager at fair value through profit or loss at inception with the exception of financial derivative instruments which are held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

ii) Recognition and Derecognition

Purchases and sales of investments are recognised on trade receipt basis as disclosed on page 4. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets or financial liabilities are measured at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial period in which they arise.

iv) Fair Value

Transferable Securities

Equity securities listed on a recognised stock exchange or traded on any other regulated market are valued at the last traded price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price does not, in the opinion of the Directors of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. Fixed income securities listed on a recognised stock exchange or traded on any other regulated market are valued at evaluated bid price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities.

In the case of any security not listed, quoted or dealt in on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Directors of the Manager or other competent person appointed by the Directors of the Manager and approved for the purpose by the Trustee, using valuation techniques.

Loan Participations and Assignments ("Bank Loans")

Certain Sub-Funds may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Sub-Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties ("Bank Loan"). A Bank Loan is often administered by a bank or other financial institution (the "Lender") that acts as agent for all holders.

The Lender administers the terms of the Bank Loan, as specified in the Bank Loan agreement. When investing in a loan participation, a Sub-Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt by the Lender of payments from the borrower. A Sub-Fund generally has no right to enforce compliance with the terms of the Bank Loan agreement with the borrower. As a result, a Sub-Fund may be subject to the credit risk of both the borrower and the Lender. However when a

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

Loan Participations and Assignments (“Bank Loans”) (continued)

Sub-Fund purchases assignments from Lenders it acquires direct rights against the borrower of the Bank Loan. The Sub-Funds did not hold any Bank Loans as at 31 December 2021. PineBridge Global Dynamic Asset Allocation Fund was the only Sub-Fund which held Bank Loans as at 31 December 2020. The fair value of investments in bank loans are based on evaluated bid price from broker quotes received from IHS Markit Limited.

Collateralised Mortgage Obligations (“CMOs”)

Some Sub-Funds may invest in securities with contractual cash flows, such as collateralised mortgage obligations. Collateralised mortgage obligations (CMOs), a type of mortgage-backed security, are bonds that represent claims to specific cash flows from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests, known as tranches, according to a complicated deal structure. Each tranche may have different principal balances, coupon rates, prepayment risks, and maturity dates (ranging from a few months to twenty years).

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

The fair value of CMOs are based on quoted market prices and are valued at the last traded price.

Forward Foreign Currency Exchange Contracts and Non-Deliverable Forwards (“NDF’s”)

The fair value of open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Changes in the value of open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are recognised as unrealised gains or losses on forward foreign currency exchange contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open forward foreign currency exchange contracts, open foreign currency exchange spot contracts and NDF’s are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund.

Investment Funds

Investments in open-ended investment funds are estimated at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the net asset value of these units is recognised as net gain/(loss) on investment activities at fair value through profit or loss. The fair value of investments in exchange traded investment funds are based on quoted market prices and are valued at the last traded price.

Futures Contracts

The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as at the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open futures contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund. Initial margin deposits are made upon entering into futures contracts and are generally included in cash or cash equivalents.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

Total Return Swaps

A swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loan, or bond. The fair value of the swaps is determined based on the mark to market valuation, which makes assumptions that are based on market conditions existing on each Statement of Financial Position date. The difference between the stated terms of the swap contract and the prevailing market conditions are recorded as movement in net unrealised gains or loss on investments in the Statement of Comprehensive Income. Unrealised gains and losses on total return swaps are included in the unrealised gain or loss on financial derivative instruments in the Statement of Financial Position.

To-Be-Announced ("TBA") Purchase Commitments

The Funds may enter into TBA commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price and par amount have been established, the actual securities have not been specified. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The Funds hold, and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date.

The Funds may also enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction, or other liquid assets in an amount equal to the notional value of the TBA sale commitment are segregated. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the Funds realise a gain or loss. If the Funds deliver securities under the commitment, the Funds realise a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

TBA commitments, which are accounted for as purchase and sale transactions, may be considered securities themselves, and involve a risk of loss due to changes in the value of the security prior to the settlement date as well as the risk that the counterparty to the transaction will not perform. Counterparty risk is mitigated by having a master agreement between the Funds and the counterparty. Unsettled TBA commitments are valued at their fair value. The contract is marked to market daily and the change in fair value is recorded by the Funds as an unrealised gain or loss. Based on market circumstances, the Manager will determine whether to take delivery of the underlying securities or to dispose of the TBA commitments prior to settlement.

Investment Gains/(Losses)

Unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss are included in the Statement of Comprehensive Income in the financial period in which they arise.

Realised gains and losses on investment transactions, excluding debt instruments, are calculated using the average cost method. Realised gains and losses on investments transactions in debt instruments are calculated as the difference between sales proceeds and the average cost of the instrument. Gains and losses realised on the sale of all financial assets and financial liabilities carried at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

v) Critical Accounting Estimates and Assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities predominantly relate to the fair value of financial instruments.

Fair-value of financial instruments

The Sub-Funds may, from time to time, hold financial instruments that are not quoted in active markets, such as over-the-counter derivatives. Fair values of such instruments may be determined by using valuation techniques. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis and other valuation techniques commonly used by market participants. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by experienced personnel at State Street Fund Services (Ireland) Limited (the "Administrator"), independent of the party that determined them and validated with the Investment Manager.

Capital gains tax

The Sub-Funds currently incurs taxes imposed by certain countries on capital gains. Such gains are recorded gross of capital gains tax in the Statement of Comprehensive Income. Capital gains tax, where it occurs, is shown as a separate item in the Statement of Comprehensive Income.

vi) Cash at Broker/Amounts due to Broker/Cash held with Broker as Collateral

Cash at broker may comprise of margin cash held with brokers for futures contracts traded by the Sub-Funds, a portion of which may be restricted to cover initial margin requirements, and Cash held with broker as collateral may comprise of cash held by counterparties for collateral purposes for open over-the-counter ("OTC") financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant Sub-Fund and is recorded as an asset on the Statement of Financial Position.

Amounts due to broker may comprise of margin cash and cash collateral pledged by counterparties for OTC financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant counterparty and a related liability to repay the cash is recognised as "Amounts due to broker" on the relevant Sub-Fund's Statement of Financial Position.

vii) Cash at bank

Cash at bank comprises of cash balances held at State Street Bank & Trust Company or by the relevant appointed Sub-Custodian. Cash held in the functional currency of the relevant Sub-Fund is valued at cost, which approximates fair value. Cash held in currencies other than the functional currency of the Sub-Fund is initially recognised at cost using the relevant currency exchange rates on date of purchase and subsequently recognised at fair value using the relevant currency exchange rates as at the Statement of Financial Position date.

viii) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Sub-Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the Sub-Fund shall measure it at its fair value through profit or loss plus, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, loans, investment funds, forwards, futures contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

viii) Transaction Costs (continued)

Transaction costs on purchases and sales of equities are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each Sub-Fund. Depositary transactions costs are included in trustee and sub-custodian fees in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs. The total costs incurred by each Sub-Fund during the financial year are disclosed in Note 8.

e) Income from Investments

i) Bond and Bank Loan Income

Interest income is recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

ii) Dividend Income

Dividend income arising on the underlying investments of a Sub-Fund is recognised as income in the Statement of Comprehensive Income of the relevant Sub-Fund on the dates on which the relevant securities are listed as "ex-dividend". In accordance with FRS 102, dividend income is reported gross of any irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

iii) Other Income

Other income is recognised in the Statement of Comprehensive Income on an accruals basis. During the financial year ended 31 December 2020, other income of the PineBridge US Research Enhanced Core Equity Fund included receipt of class action settlements.

f) Expenses

Each Sub-Fund pays all of its expenses and such proportion of the Fund's expenses as is allocated to that Sub-Fund, other than those expressly assumed by the Manager. The costs and gains/(losses) of any hedging transactions will be attributable to the relevant unit Class. To the extent that expenses are attributable to a specific unit Class of a Sub-Fund, that unit Class bears such expenses. All expenses, as disclosed in the Statement of Comprehensive Income, are accrued on a daily basis.

Capital Gains Taxation

The Sub-Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Capital gains taxes are shown as a separate item under taxation in the Statement of Comprehensive Income.

g) Foreign Exchange

The functional currency of the Sub-Funds is US Dollar, the currency of the primary economic environment in which each Sub-Fund operates. US Dollar is also the presentational currency of the Sub-Funds.

The cost of investments and other transactions in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling at the time of the transaction. The fair value of the investments, other assets and other liabilities in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling as at financial year end. The resulting profits or losses are accounted for in the Statement of Comprehensive Income.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

1. ACCOUNTING POLICIES (continued)

h) Distribution Policy

The Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by a Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses (capital). The Manager may also declare interim distributions on the same basis. Distribution frequency varies between share classes and is outlined in the Prospectus. Some Sub-Funds may distribute on a more frequent basis, see details below.

Unitholders may elect in an application for units either to receive distributions in cash or to reinvest the distribution amount in further units. For Sub-Funds whose units are classified as liability, the distributions to Unitholders are recognised as Finance Costs in the Statement of Comprehensive Income. Distributions reinvested are disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders.

i) Income Equalisation

Income equalisation arrangements are applied in the case of subscriptions to and redemptions from certain Sub-Funds. The NAV per redeemable participating unit as calculated on each Dealing Day has an income element and a capital element. In relation to any subscription or redemption, the monies received or paid are allocated proportionately to or from income and capital in a Sub-Fund. These arrangements are intended to ensure that the income per redeemable participating unit, which is distributed in respect of any distribution period for which a distribution is made, is not affected by changes in the number of redeemable participating units in issue during that period. The calculation of equalisation is based on net income. Income equalisation is in operation in PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Corporate Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund, PineBridge Global Strategic Income Fund and PineBridge USD High Yield Bond Fund.

j) Unit Classes

i) Redeemable Participating Units

Redeemable participating units are redeemable at the unitholder's option and are classified as financial liabilities. The redeemable units can be repurchased by the Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV. The redeemable unit is carried at the redemption amount that is payable at the Statement of Financial Position date if a unitholder exercised his or her right to have the Fund repurchase his or her unit. In accordance with the Prospectus, for the relevant Sub-Funds, the Fund is contractually obliged to redeem units at dealing prices and the liability to redeemable participating unitholders reflects this. Monetary value unit transactions during the financial year are recognised in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders of the relevant Sub-Fund. The units of all Sub-Funds are classified as financial liabilities with the exception of PineBridge Asia Dynamic Asset Allocation Fund at 31 December 2021 and at 31 December 2020, which units are classified as equity. See details in (ii) below.

ii) Equity Units

Equity units are also redeemable at the Unitholder's option. Each equity unit can be repurchased by the Sub-Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

2. DEALING NET ASSET VALUE (continued)

Reconciliation of Net Asset Value per Financial Statements to Net Asset Value per dealing NAV

The NAV at which unitholders may subscribe or redeem (i.e. the "dealing NAV") may differ from the NAV disclosed in the financial statements due to a difference in the Valuation Date as per the prospectus and the financial year end date.

In line with the Prospectus, the final 2021 Valuation Date for PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund and PineBridge Latin America Equity Fund was 30 December 2021. As these financial Statements were prepared to 31 December 2021, all transactions which occurred on these Sub-Funds between their respective final 2021 Valuation Date and 31 December 2021 have been accounted for in these Financial Statements and the Sub-Funds' investments have been fair valued using the last traded market prices available as at 31 December 2021. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2021 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2021 Valuation Date for these Sub-Funds.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for these Sub-Funds as at 31 December 2021.

	PineBridge Japan Equity Fund USD	PineBridge Japan Small Cap Equity Fund USD	PineBridge Emerging Europe Equity Fund USD
Net Asset Value per Financial Statements	99,638,422	331,483,946	8,940,102
Total transactions adjustment	(2,533,712)	77,975	(3,365)
Net Asset Value per dealing NAV	<u>97,104,710</u>	<u>331,561,921</u>	<u>8,936,737</u>

In line with the Prospectus, the final 2020 Valuation Date for PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund and PineBridge Latin America Equity Fund was 31 December 2020. As these Financial Statements were prepared to 31 December 2020, all transactions which occurred on these Sub-Funds between their respective final 2020 Valuation Date and 31 December 2020 have been accounted for in these Financial Statements and the Sub-Funds' investments have been fair valued using the last traded market prices available as at 31 December 2020. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2020 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2020 Valuation Date for these Sub-Funds.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for these Sub-Funds as at 31 December 2020.

	PineBridge Japan Equity Fund USD	PineBridge Japan Small Cap Equity Fund USD	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	57,359,593	420,764,666	91,427,350
Total transactions adjustment	(123,649)	(4,407,951)	665,300
Net Asset Value per dealing NAV	<u>57,235,944</u>	<u>416,356,715</u>	<u>92,092,650</u>

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

4. CASH AND COLLATERAL

(i) Cash at Bank

All cash holdings and bank overdrafts as at 31 December 2021 and 31 December 2020 are held at State Street Bank & Trust Company ("State Street"), the relevant appointed Sub-Custodian or Bank of America, with the exception of cash at broker which is held with the relevant counterparty for the financial derivative instruments. See the note below for further details of cash at broker.

(ii) Cash at Broker, Amounts due to Broker and Cash held with Broker as collateral

The following table outlines the Funds margin cash position for Futures Contracts as at 31 December 2021 and 31 December 2020:

Fund Name	Counterparty	Margin Cash	
		31 December 2021	31 December 2020
PineBridge Asia Pacific Investment Grade Bond Fund	Goldman Sachs	USD 2,885,414	USD 614,350
PineBridge Global Bond Fund	Morgan Stanley	USD 61,602	USD 199,789
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD 17,071,139	USD 24,488,595
PineBridge Asia Dynamic Asset Allocation Fund	Morgan Stanley	USD 1,708,403	USD 1,717,317

As at 31 December 2021 and 31 December 2020, all of this margin cash is restricted due to initial margin requirements by the relevant brokers.

The following table outlines the Funds cash collateral held for forward foreign currency exchange contracts as at 31 December 2021 and 31 December 2020:

Fund Name	Counterparty	Cash Collateral	
		31 December 2021	31 December 2020
PineBridge Global Dynamic Asset Allocation Fund	JP Morgan Chase Bank	USD 3,794,110	USD 1,955,000
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	-	USD 1,030,000

Cash may be set aside as collateral by the Trustee and held by the counterparties for OTC financial derivative instruments ("FDI") in accordance with the terms of the relevant counterparty agreements, which are based on the International Swaps and Derivatives Association ("ISDA") Master Agreement.

(iii) Collateral

When entering into an OTC derivative instrument and during the term of that transaction, the Sub-Funds and/or the counterparty may post or receive securities as collateral and/or margin related to changes in the market value of the derivative. Additionally, the counterparty may require additional collateral and/or margin that is unrelated to changes in the market value of the derivative. If the counterparty enters into insolvency proceedings or otherwise defaults on its obligations, the ability of the Sub-Funds to recover collateral posted to the counterparty may be delayed or limited. Investments pledged by the Sub-Funds as collateral are recognised at fair value in the relevant Sub-Fund's Schedule of Investments. The nominal value and market value of the underlying securities pledged as collateral and/or margin to the counterparties as at 31 December 2021 were: USD230,338 (nominal value of 200,000), as at 31 December 2020: USD263,102 (nominal value of 200,000). See the Sub-Fund's Schedule of Investments for the securities pledged as collateral.

5. EFFICIENT PORTFOLIO MANAGEMENT

A Sub-Fund may employ FDI for the purposes of hedging and efficient portfolio management purposes and shall be understood to fulfil the following criteria as set out in the UCITS Regulations:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
 - (i) reduction of risk;
 - (ii) reduction of cost;
 - (iii) generation of additional capital or income for the Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund and the risk diversification rules set out in the UCITS Regulations;

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

5. EFFICIENT PORTFOLIO MANAGEMENT (continued)

- (c) their risks are adequately captured by the risk management process of the Sub-Fund; and
- (d) they cannot result in a change to the Sub-Fund's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

For efficient portfolio management purposes, the Sub-Funds may enter into repurchase agreements, reverse repurchase agreements and/or stock lending agreements, subject to the conditions and limits set out in the UCITS Regulations, to generate additional income for the Fund. During the financial year, the Sub Funds did not utilise these efficient portfolio management techniques.

6. FINANCIAL RISK MANAGEMENT

(a) General Risk Management Process

Each Sub-Fund is exposed to market price risk, interest rate risk, credit risk, liquidity risk and currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the volatility of financial markets and seeks to minimise potential adverse effects on financial performance.

The risk management policies (which have not changed in 2021) employed to manage these risks for the financial years ending 31 December 2021 and 31 December 2020 are outlined below.

PineBridge Investments (the "Firm") is a group of international companies that provides investment advice and markets asset management products and services to clients around the world. The Firm's approach to risk management and controls is a bottom-up led process with top-down controls imposed by the boards of directors of the Firm and the Manager as appropriate, for the establishment of firm-wide risk management and controls.

The Manager has established and maintains its own permanent risk management function in discharge of its obligations under the UCITS Regulations. The Manager has also established a risk committee which meets regularly to focus specifically on risk attached to the activities of the Fund (the "Risk Committee").

The board of directors of each individual company within the firm has risk management responsibilities as defined by best practices and guidelines, and applicable laws and regulations. In this regard the Firm has established the Risk Management Department, the Global Risk Committee ("GRC") and Business Management to assist and report to the board of directors of the Firm.

The Risk Management Department is hierarchically and functionally independent from operating units of the Firm which allows for the independent performance of the risk management activities, having taken into account the nature, scale and complexity of its business and the funds it manages.

The GRC is tasked with assisting the board of directors of the Firm in evaluating and assessing the different types of risk to which the organization is exposed. The members of the GRC have direct access to, and receive regular reports from management. The GRC is comprised of representatives from Executive Management, Compliance, Investment Management, Risk Management, Operations, Finance and Legal. The GRC consists of a number of risk sub-committees, with roles and responsibilities defined in the Committee Charters.

Business Management is responsible for executing the organisation's risk management process.

The Firm has a comprehensive risk management process to monitor, evaluate and manage the principal risks it assumes in conducting its activities.

The Sub-Funds are also required to adhere to investment and borrowing restrictions laid down by the UCITS Regulations.

Among other restrictions, the Sub-Funds are restricted to holding a maximum of 10% of the total NAV of the Sub-Fund in any one particular security, with certain exceptions allowed. Compliance with these restrictions is monitored by the Manager's Compliance Team as well as the relevant Investment Manager and the Trustee. In

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(a) General Risk Management Process (continued)

In addition to the investment and borrowing restrictions, the investment objective and policy of each Sub-Fund contains specific investment parameters and these are set out in detail in the Prospectus.

(b) Market Risk

This is the risk where the fair value or future cash flows of a financial instrument can fluctuate because of changes in market prices relating to: changes in actual market prices, interest rate and currency movements.

i) Global Exposure

Per the UCITS Regulations, and as part of the risk management and reporting requirements, the Fund must be monitored and measured in accordance with the regulatory requirements. In accordance with the regulatory requirements, global exposure can be calculated in two ways, either:

- (i) the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Sub-Funds.
- (ii) Value at Risk ("VaR"), where complex investment strategies are used. VaR measure estimates the potential loss of the portfolio over a pre-defined period of time given a specified confidence level. VaR methodology is a statistical measurement that produces a single aggregate result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets.

The Commitment approach is used to calculate global exposure for all Sub-Funds. The Commitment approach converts any Sub-Fund's derivative financial positions into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed on the Statement of Financial Position for the applicable Sub-Funds.

ii) Market Price Risk

Market price risk arises from uncertainty about future prices of financial instruments held. It represents the potential loss the portfolios might suffer through price movements.

The Investment Managers consider the asset allocation of the Sub-Funds in order to manage the risk associated with exposure to currencies which are not in the base (or functional) currency of the Sub-Fund, countries, industry sectors and individual securities, whilst continuing to follow the Sub-Funds' investment objectives.

The Investment Managers are engaged in substantial research activity and engage in a wide variety of meetings to identify, communicate, analyse and mitigate market risks. These range from daily economics and Investment Manager conference calls to discuss macroeconomic trends and fixed income market risk, weekly and bi-weekly fixed income and equity market reviews, bi-weekly currency meetings and monthly global asset allocation meetings which cross investment teams, and ensure that Investment Managers have a current, well vetted view of the global financial markets. Market price risk for the Sub Funds is managed relative to the stated benchmark of the Sub-Fund. Summary statistics such as tracking error and beta may also be taken into account in managing overall risk.

Management of risk relative to benchmarks as discussed above is ultimately the responsibility of the Investment Manager of each Sub-Fund.

Senior Investment Managers provide oversight for the Sub-Funds and are accountable for ensuring application of the Firm's investment process. This is achieved through monthly reviews of both performance and application of investment strategy. In addition, the Compliance Department in the Firm provides real time monitoring of the consistency of application of the UCITS investment restrictions for all Sub-Funds.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

ii) Market Price Risk (continued)

Holdings in the equity and balanced Sub-Funds are constantly monitored to determine whether any of the evaluated factors have changed or if a stock has hit valuation targets. If valuation targets are achieved, the holdings are sold.

For fixed income Sub-Funds, the Investment Manager's focus on a pro-active risk control process. Risk measurement and monitoring is focused on the ex-ante investment decision process resulting from the manager's investment process as implemented in the Sub-Fund. Sub-Funds are well diversified without overly replicating the benchmark.

The table below sets out the beta for the Equity and Balanced Sub-Funds as at 31 December 2021 and 31 December 2020. Beta is being used in the below analysis as a proxy for VaR analysis.

Sub-Fund	Benchmark (BM)	Beta 31/12/21	Beta 31/12/20

The Sub-Funds' exposure to market price risk at 31 December 2021 and 31 December 2020 is equivalent to the fair values of investments held, as detailed on the Statement of Financial Position.

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2021 and 31 December 2020;
- the market price risk information is a relative estimate of risk rather than a precise number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

iii) Interest Rate Risk

This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Sub-Funds which hold fixed interest rate debt securities are exposed to fair value interest rate risk where the value of these securities may fluctuate as a result of a change in market interest rates. Sub-Funds which also hold a number of floating/adjustable interest rate debt securities, which are re-priced periodically in line with market interest rate movements prior to maturity date are exposed to cash flow interest rate risks.

The leveraged loan and floating rate bonds are structured with a floating rate payment structure, whereby a fixed basis point spread is paid over the prevailing reference rate, typically 3 month LIBOR or EURIBOR, and reset on a quarterly or semi-annual basis. However, the total interest earned on investments will vary from time to time with changes in the underlying reference rate.

Certain securities and instruments in which the Sub-Fund may invest, rely in some fashion upon the LIBOR. LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. On March 5, 2021, the United Kingdom's Financial Conduct Authority ("FCA"), which regulates LIBOR, confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative following the Feedback Statements published by ICE Benchmark Administration Limited, the administrator of LIBOR on its intention of ceasing publication of all Sterling, Euro, Swiss Franc, Japanese Yen settings, the one-week and two-month U.S. dollar settings immediately after December 31, 2021 and ceasing publication of the remaining U.S. dollar settings immediately after June 30, 2023. There remains uncertainty regarding the future utilisation of LIBOR and the nature of any replacement rate. Any potential effects of the transition away from LIBOR on a Sub-Fund or on certain securities and instruments in which a Sub-Fund invests can be difficult to ascertain, and they may vary depending on factors that include, but are not limited to: (i) existing fallback or termination provisions in individual contracts and (ii) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. For example, certain of a Sub-Fund's securities and investments may involve individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or reduced liquidity as a result of the transition process. In addition, interest rate provisions included in such contracts may need to be renegotiated in contemplation of the transition away from LIBOR. The transition may also result in a reduction in

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iii) Interest Rate Risk (continued)

the value of certain investments held by a Sub-Fund or a reduction in the effectiveness of related Sub-Fund transactions such as hedges. Furthermore, the transition process may also require changes to be made to a Sub-Fund's investment objectives and policies. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Sub-Fund or in additional costs being borne by the Sub-Fund.

The Sub-Funds' exposure to interest rate risk is detailed in the relevant Schedule of Investments.

All other financial assets and financial liabilities, with the exception of equities, cash at bank balances and bank overdrafts, held by the Sub-Funds are not directly exposed to interest rate risk. The Sub-Funds are exposed to interest rate risk on the interest earned on its cash and bank balances and bank overdrafts. This exposure is not considered to be significant.

Interest rate (duration) risks are managed by the Investment Managers whose management of duration risk is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning held with senior managers. Individual managers are authorised to initiate fixed income trades within pre-set limits.

Interest Rate Risk Sensitivity

Duration is a measure of the sensitivity of a bond price to interest rates. The percentage change in the price is equal to the change in interest rates multiplied by the modified duration. The monetary impact detailed in the following table shows the possible change in NAV resulting from a 1% change in interest rates.

Sub-Fund	Average Duration 31/12/21	Monetary impact on NAV (100bps) 31/12/21	Average Duration 31/12/20	Monetary impact on NAV (100bps) 31/12/20
PineBridge Asia Dynamic Asset Allocation Fund	4.73	2,692,019	-	-
PineBridge Asia Pacific Investment Grade Bond Fund	4.53	12,422,154	4.26	8,405,546
PineBridge Global Bond Fund	7.19	3,652,518	6.44	3,398,042
PineBridge Global Dynamic Asset Allocation Fund	0.85	6,446,101	-	-

PineBridge USD Investment Grade Credit Fund	8.40	17,856,952	8.70	23,998,731

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iii) Interest Rate Risk (continued)

Interest Rate Risk Sensitivity (continued)

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns; and
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2021 and 31 December 2020.

iv) Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Currency risks are managed by the individual Investment Managers. Their performance is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning and compliance that are held with senior managers and the Compliance Department. Individual managers must be authorised to initiate FX trades within pre-set trade limits for individual transactions.

PineBridge US Research Enhanced Core Equity Fund and PineBridge USD Investment Grade Credit Fund were not exposed to any significant foreign currency risk at 31 December 2021 or at 31 December 2020, as all of their assets and liabilities were denominated in their functional currency.

In certain cases, the Sub-Funds hold assets and liabilities denominated in currencies other than the functional currency and are therefore exposed to currency risk as the value of securities denominated in other currencies will fluctuate due to change in exchange rates. Certain Sub-Funds use derivatives to hedge currency risk.

All Sub-Funds have been authorised by the Central Bank to use certain FDI for hedging purposes. The Sub-Funds listed below have been authorised by the Central Bank to use FDI for investment purposes.

PineBridge Asia ex Japan Equity Fund
PineBridge Asia ex Japan Small Cap Equity Fund
PineBridge Asia Dynamic Asset Allocation Fund
PineBridge Asia Pacific Investment Grade Bond Fund
PineBridge Global Bond Fund
PineBridge Global Dynamic Asset Allocation Fund
PineBridge Global Emerging Markets Bond Fund
PineBridge Global Emerging Markets Corporate Bond Fund
PineBridge Global Emerging Markets Local Currency Bond Fund
PineBridge Global Strategic Income Fund
PineBridge Japan Small Cap Equity Fund
PineBridge Latin America Equity Fund
PineBridge US Large Cap Research Enhanced Fund

As an authorised UCITS legal manager, the Manager is required to file a Risk Management Process document with the Central Bank. This document provides an overview of the Firm's policy on derivatives risk management including, but not limited to: an overview of FDI used, counterparty risk exposure, calculation of global exposure, leverage and cover requirements, expertise required and in place to invest in FDI, valuation rules, legal risk and reporting requirements. The Sub-Funds use only a limited number of simple FDI solely for non-complex investment, hedging and replication purposes.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

The Sub-Funds hold both non-monetary assets, such as equities and investment funds and monetary assets and liabilities, such as debt instruments, futures contracts, forward foreign exchange contracts, swap contracts, cash at bank, cash at broker, debtors and creditors in currencies other than USD. FRS 102 considers the foreign exchange exposure relating to non-monetary assets and liabilities are a component of market price risk not foreign currency risk. However, management monitors the exposure on all foreign currency denominated assets and liabilities.

The following tables detail Sub-Funds with material currency exposures as at 31 December 2021 and 31 December 2020. Sub-Funds not listed below do not have material currency exposures as at the Statement of Financial Position date. Material currency exposure is where the total monetary amount is greater than 5% of the NAV of the Sub-Fund.

As at 31 December 2020 Currency	Monetary Net Assets/(liabilities) USD	Non – Monetary Net assets USD	Net Financial Assets/(liabilities) USD	Currency sensitivity analysis* USD
	23,436,257	-	23,436,257	1,171,815

*As at 31 December 2020, had the exchange rate increased or decreased by 5% with all other variables held constant, the increase or decrease respectively in the value of the Sub-Fund's monetary assets and liabilities, denominated in currencies other than the base currency of the Sub-Fund.

Forward Foreign Exchange Contracts

The Sub-Funds listed on page 245 may engage in forward foreign exchange contracts, including non deliverable forwards (NDFs), for investment purposes or for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by the Central Bank. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction. Forward foreign exchange contracts are OTC traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires and a new forward to replace the expired one cannot be put into place at the same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

In relation to hedged classes listed below, it is the intention of the Manager or its delegate to hedge the currency exposure between the denominated currency of the hedged class and the base currency of the Sub-Fund. The Manager or its delegate will seek to achieve this hedging by using FDI, including but not limited to forward foreign exchange contracts as set out, and within the conditions and limits imposed, by the Central Bank. The details of hedged classes used by Sub-Funds as at 31 December 2021 and 31 December 2020 are outlined below:

31 December 2021 Sub-Fund	Class	Currency	Counterparty	Unrealised Gains/Losses on Forwards
PineBridge Asia Ex Japan Small Cap Equity Fund	Class R1H	EUR	State Street Bank & Trust Co.	EUR (32,752)

c) Credit Risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk. In relation to the Sub-Funds, it can arise from receivables from another party, placing deposits with other entities, transacting in debt securities and entering into OTC FDI. For Sub-Funds investing in debt securities, the investment objectives and investment policies detailed in the supplements to the Prospectus provide details of the credit rating restrictions imposed on that Sub-Fund.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

c) Credit Risk (continued)

Leveraged loan obligations, if any, are subject to unique risks, including the possible invalidation of an investment as a fraudulent conveyance under relevant creditors' rights laws. In analysing each leveraged loan, the Manager compared the relative significance of the risks against the expected benefits of the investment.

Substantial research tools are available to the Investment Managers for use in the management of credit risk. These include extensive internally produced company and industry research, issue or industry specific 'brainpools', rating agency reports, purchased research databases, the firm's online research library, internal R&D reports and other advanced credit risk management tools.

The Firm has a robust counterparty approval process. There are Regional Approval Committees (RACs) that are tasked with adding and removing counterparties as appropriate. The RACs approve and maintain lists of approved brokers. No transaction can take place with a broker until it has been approved and formally added to the Approved Broker List for the particular region. The lists are updated on a regular basis. The majority of the trades are executed on a Delivery Versus Payment basis. This ensures that the buyer's payment for securities is due at the time of delivery.

For OTC FDI such as total return swap contracts, the Investment Managers generally follow the standards set by the International Securities Dealers Association (ISDA) in its derivatives master agreements. ISDA swap confirmations are tracked and checked manually to confirm the terms of the trades are fully and correctly documented.

Collateral may be received from counterparties, as per the agreement with the counterparty to reduce counterparty risk.

Where the Sub-Fund provides collateral as a result of entering into total return swaps, it is exposed to the risk that the counterparty will be unable or unwilling to honour its obligations to return the collateral provided. The Sub-Fund may provide certain assets as collateral to counterparties in connection with total return swaps. If the Sub-Fund has over-collateralised (i.e., provided excess collateral to the counterparty) in respect of such transactions, it may be an unsecured creditor in respect of such excess collateral in the event of the counterparty's insolvency. If the Trustee or its subcustodian or a third party holds collateral on behalf of the Sub-Fund, the Sub-Fund may be an unsecured creditor in the event of the insolvency of such entity.

Listed below are the counterparties and banks used by the Sub-Funds and their respective long term credit ratings, as issued by Moody's rating agency, as at 31 December 2021 and 31 December 2020:

Counterparty	31 December 2021	31 December 2020
JPMorgan Chase	A2	A2
State Street Bank & Trust Co.	Aa2	Aa2
Morgan Stanley	A1	A2
UBS	Aa2	Aa2

Listed below are the agent banks used by the PineBridge Global Dynamic Asset Allocation Fund for the bank loans and their respective long term credit ratings, as issued by Moody's rating agency, as at 31 December 2021 and 31 December 2020, if any. The PineBridge Global Dynamic Asset Allocation Fund did not hold any bank loans as at 31 December 2021, and held one bank loan as at 31 December 2020:

Agent Bank	Moody's Rating 31 December 2021	Moody's Rating 31 December 2020
Bank of America	-	-
Barclays	-	-

Cortland Capital Market Services	-	100.00%
	-	100.00%

*The PineBridge Global Dynamic Asset Allocation Fund held one bank loan as at 31 December 2020.

Trustee and Depositary

The Fund's trustee is State Street Custodial Services (Ireland) Limited (the "Trustee" and "Depositary"). All transferable securities (with the exception of bank loans and investment fund investments), cash and bank balances and bank overdrafts are held by the Trustee and Depositary through its affiliate, State Street Bank and Trust Company ("State Street") or through a sub-custodian within the State Street custodial network.

All OTC FDI, investment funds, margin or other similar investments/monies deposited by or entered into on behalf of the Fund with a counterparty, clearing broker or other parties are not held within the State Street custodial network. The Trustee and Depositary is therefore not liable in any way for the default of any counterparty.

In accordance with the requirements of the Prospectus and the UCITS Regulations, the Sub-Funds' securities are maintained within the Trustee and Depositary's custodial network in segregated accounts. The Trustee and Depositary will ensure that any agents and sub-custodians it appoints to assist in safekeeping the assets of the Sub Funds will segregate the assets of the Sub-Funds. Bankruptcy or insolvency of the Trustee and Depositary, a State Street affiliate company or sub-custodian may cause rights with respect to cash and securities held by State Street to be delayed or limited and the Sub-Funds will be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual credit review are performed on the Trustee and Depositary by the Manager. This review may include as appropriate an assessment of the Trustee and Depositary's liquidity position, income streams, asset quality and credit ratings. The long term credit rating of State Street as at 31 December 2021 was Aa2 (31 December 2020: Aa2), as rated by Moody's rating agency.

The Fund has granted a continuing security interest by way of a charge over its assets to the Trustee and Depositary and its affiliates, pursuant to the Trustee Agreement between the Fund, the Trustee, Depositary and State Street, as continuing security for the payment, discharge and performance of its obligations.

Credit risk can arise from receivables such as subscription and investment sale transactions awaiting settlement. Risk relating to these unsettled receivables is considered small due to the short settlement period involved and in relation to subscription transactions, the due diligence performed on the portfolio clients. All transactions in securities are settled and paid for on delivery using approved brokers. The maximum exposure related to unsettled transactions equals the receivable amounts shown on the Statement of Financial Position.

There were no past due or impaired assets as at 31 December 2021 or at 31 December 2020.

d) Liquidity Risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

For the financial year ended 31 December 2021 and 31 December 2020, each Sub-Fund's assets comprise mainly readily realisable securities. As at 31 December 2020 the portfolio for the PineBridge Global Dynamic Asset Allocation Fund comprised of bank loans representing 0.02% of the Sub-Fund. However, not all securities purchased by a Sub-Fund will be listed or rated and consequently liquidity may be lower. Liquidity risk is a factor that the Investment Managers must consider when investing in any financial instrument in order to remain compliant with the portfolio liquidity requirement to the extent required by Regulation 104 (1) of the UCITS Regulations. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. Each Sub-Fund may also encounter difficulties in disposing of assets at their 'fair' market price due to adverse market conditions leading to limited liquidity.

Sub-Funds may invest in investments such as sovereign or corporate bond issues of fixed and/or floating rate which may be below investment grade, which as a result carry greater liquidity risk than investment grade sovereign or corporate bonds.

Some Sub-Funds may invest in securities with contractual cash flows, such as CMOs. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate values, delinquencies and/or defaults, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

Due to the unique and customised nature of loan agreements evidencing private debt assets and the private syndication thereof, these assets are not as easily purchased or sold as publicly traded securities. Although the range of investors in private debt has broadened, there can be no assurance that future levels of supply and demand in loan trading will provide the degree of liquidity in loan trading which currently exists in the market. In addition, the terms of these assets may restrict their transferability without borrower consent. The Manager will consider any restriction, along with all other factors, in determining whether or not to advise the Sub-Fund to acquire participation in each asset.

The main financial liabilities of each Sub-Fund are the redemption of units awaiting settlement, purchases of investments awaiting settlement, withholding tax, capital gains tax, amounts due to broker, bank overdraft and expenses payable. As an open-ended Fund, each Sub-Fund is required to sell units back to unitholders at a price equivalent to the NAV per unit, subject to settlement and dealing restrictions laid down in the Fund's Trust Deed and Prospectus.

In certain situations the Manager, may with the consent of the Trustee, temporarily suspend the determination of the Net Asset Value of any Sub-Fund. Any such suspension would result in the suspension of the issuing and redemption of the relevant Sub-Fund's Units to and from its Unitholders during such period of suspension.

The Investment Managers manage each Sub-Fund's liquidity position on a daily basis. Also the Manager is able, through the provisions in the Prospectus, to defer the processing of redemptions of significant size to facilitate an

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

d) Liquidity Risk (continued)

orderly disposition of securities in order to protect the interests of the remaining unitholders. The maximum value of redeemable participating units available for redemption on any given day can be restricted by the Fund to 10% of the total net asset value of that Sub-Fund in issue.

There are no financial liabilities as at 31 December 2021 and 31 December 2020 that fall due over 1 month except for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund USD 75,405 (1-3 months) (31 December 2020: USD 15,727 (1-3 months)).

PineBridge Global Dynamic Asset Allocation Fund USD 1,191,985 (1-3 months) (31 December 2020: USD 3,212,013 (1-3 months)).

PineBridge Global Bond Fund USD 362,268 (1-3 months) (31 December 2020: USD 645,704 (1-3 months)).

PineBridge Global Strategic Income Fund USD 1,485 (1-3 months) (31 December 2020: USD 13,605 (1-3 months)).

PineBridge Asia Pacific Investment Grade Bond Fund USD 619,110 (1-3 months) (31 December 2020: Nil (1-3 months)).

The Sub-Funds' financial liabilities due for payment within 1 month relate, in the most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, withholding tax, bank overdraft interest and other open forward foreign currency exchange contracts that were not mentioned above. Details of these amounts, where relevant, can be found in the Statement of Financial Position.

The financial liabilities due for payment over 1 month relate to forward foreign exchange contracts on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Strategic Income Fund, futures contracts held on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Asia Pacific Investment Grade Bond Fund, cash at broker and capital gains tax payable which is considered an open ended liability.

e) Fair Value Hierarchy

The Fund is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Fund is required to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager, who considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

Global Valuation Committee meets quarterly, and additionally on an as needed basis to confirm and vote on all current fair valuations held within the portfolios at PineBridge. Valuation procedures, controls, and documentation are also presented and verified, and any changes to methodologies are presented to the committee for discussion and approval.

All of the Sub-Funds' holdings are classified as Level 1 except for the Sub-Funds' holdings to the values noted in the table below:

Sub-Fund	Level	31 December 2021 USD	31 December 2020 USD
PineBridge Asia ex Japan Equity Fund	2	414	-
PineBridge Asia ex Japan Small Cap Equity Fund	2	(54,513)	1,058,579

PineBridge Japan Equity Fund	2	13	(125)
PineBridge Japan Small Cap Equity Fund	2	146,295	52,568
PineBridge US Large Cap Research Enhanced Fund	2	8,512	400
PineBridge USD High Yield Bond Fund	2	65,564,389	14,352,274
PineBridge USD Investment Grade Credit Fund	2	204,719,091	265,365,274
PineBridge Asia Dynamic Asset Allocation Fund	2	29,465,008	25,490,428

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, futures contracts and investment funds, which are daily trading in an active market. The Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include, investment-grade corporate bonds, bank loans, US and non-US sovereign obligations and OTC FDI.

Fixed Income securities held in the Sub-Funds listed on the previous table are classified under Level 2 as they were valued based on evaluated prices.

As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include suspended or liquidated equity investments, corporate bonds and bank loans. As at 31 December 2021 all Level 3 securities were carried at zero value except for 15 securities; RRE 8 Loan Management and Capital Four CLO I, held on PineBridge Global Dynamic Asset Allocation and Pinebridge Global Dynamic Preservation Plus Fund, OAS Restructuring and OAS held on PineBridge Global Emerging Markets Corporate Bond Fund, three Egyptian Government Bonds and a Ghana Government Bond held on PineBridge Global Emerging Markets Bond Fund, an Egyptian Government Bond held on PineBridge Global Emerging Markets Local Currency

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

Bond Fund, Fannie Mae or Freddie Mac, Freddie Mac REMICS, three Lehman Brothers Holdings, Hi-Crush, held on PineBridge Global Strategic Income Fund. As at 31 December 2020 all Level 3 securities were carried at zero value except for 10 securities; OAS Restructuring, held on PineBridge Global Emerging Markets Corporate Bond Fund, two Api Heat Transfer Thermasys, Masmovil Ibercom and one bank loan: Api Heat Transfer Thermasys, held on PineBridge Global Dynamic Asset Allocation Fund, Waterford Gaming and four Lehman Brothers Holdings, held on PineBridge Global Strategic Income Fund.

During the financial year ended 31 December 2021, Ameriforge Group held on PineBridge Global Dynamic Asset Allocation Fund transferred from Level 1 to Level 3. OAS held on PineBridge Global Emerging Markets Corporate Bond Fund transferred from Level 2 to Level 3. RRE 8 Loan Management and Capital Four CLO I held on PineBridge Global Dynamic Asset Allocation transferred from Level 2 to Level 3. Three Egyptian Government Bonds and a Ghana Government Bond held on PineBridge Global Emerging Markets Bond Fund transferred from Level 2 to Level 3. An Egyptian Government Bond held on PineBridge Global Emerging Markets Local Currency Bond Fund transferred from Level 2 to Level 3. During the financial year ended 31 December 2020 Daelim Industrial, LPL Holdings held on PineBridge Global Dynamic Asset Allocation Fund and PineBridge Asia Dynamic Asset Allocation Fund transferred from Level 1 to Level 2. Masmovil Ibercom held on PineBridge Global Dynamic Asset Allocation Fund transferred from Level 1 to Level 3. Fannie Mae or Freddie Mac, Freddie Mac REMICS and one of the Lehman Brothers Holdings held on PineBridge Global Strategic Income Fund transferred from Level 2 to Level 3. No Level 3 reconciliation and no sensitivity analysis of assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Fund at the financial year ended 31 December 2021 and the financial year ended 31 December 2020.

7. TAXATION

Under current law and practice the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On this basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to unitholder or any encashment, redemption, cancellation or transfer of units and the holding of units at end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- (i) a unitholder who is neither Irish resident nor ordinary resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Fund or the Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) certain exempted Irish tax resident unitholders who have provided the Fund with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its unitholders.

8. SOFT COMMISSION ARRANGEMENTS

a) Direct brokerage

There was no direct brokerage services utilised for the financial year ended 31 December 2021 (2020: USD Nil).

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

8. SOFT COMMISSION ARRANGEMENTS (continued)

b) Soft Commission Arrangements

The Manager and the Investment Managers may utilise brokers with whom soft commission arrangements are in place. Any such arrangements will provide for best execution and any goods or services received will be of a type which assists in the provision of investment services to the Fund. Neither the Manager, the Investment Managers nor any of their connected persons retain cash rebates.

During the financial years ended 31 December 2021 and 31 December 2020, PineBridge Investments Asia Limited and PineBridge Investments LLC have entered into soft commission arrangements with brokers and details are given below. PineBridge Investments Japan Co., Limited and PineBridge Investments Europe Limited did not engage in soft commission arrangements during the period.

PineBridge Investments Asia Limited (the “Investment Manager”)

The Investment Manager has entered into soft commission arrangements with selected brokers where it obtains services from third parties. These services relate essentially to research and price information, performance measurement and portfolio valuation, and analysis all of which are believed to be helpful in the overall discharge of the Investment Manager’s duties to clients. As such services generally benefit all of the Investment Manager’s clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. Under such arrangements, no direct payment is made for these services or benefits. The trades were executed by the Investment Manager on the best available terms and there was no churning of trades. During the period and prior period, the Investment Manager used soft commissions for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund
PineBridge Asia ex Japan Equity Fund
PineBridge Asia ex Japan Small Cap Equity Fund
PineBridge Greater China Equity Fund
PineBridge India Equity Fund
PineBridge China A-Shares Quantitative Fund

PineBridge Investments LLC (the “Investment Manager”)

The Investment Manager has entered into soft dollar commission arrangements with selected brokers where it obtains services from third parties. These services relate to research and are eligible under the safe harbor of Section 28(e) of the Securities and Exchange Act of 1934. These services generally benefit all of Investment Manager’s clients in terms of input into the investment decision making process. The soft dollar credits utilised are not allocated on a specific client basis. Under these arrangements direct payments can be made for these services and benefits. The Investment Manager seeks to obtain best execution on all transactions. During the period and prior period, the Investment Manager used soft commissions for the following Funds:

PineBridge US Research Enhanced Core Equity Fund
PineBridge Europe Research Enhanced Equity Fund
PineBridge Emerging Europe Equities Fund
PineBridge Global Dynamic Asset Allocation Fund
PineBridge Global Emerging Markets Focus Equity Fund
PineBridge Global Focus Equity Fund
PineBridge Latin America Equity Fund
PineBridge US Large Cap Research Enhanced Fund

c) Transaction Costs

For the financial year ended 31 December 2021 and 31 December 2020, the Sub-Funds incurred transaction costs, as defined in Note 1 (d)(viii) as follows:

9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES

(a) Significant Agreements

The Manager is entitled to receive an annual management fee and unitholder servicing and maintenance fee (as appropriate) accrued at each dealing day and payable monthly in arrears based on the average daily NAV of the Sub-Funds, as detailed in tables in the next pages. Certain unit classes have fee caps in place whereby the total expenses charged to the unit class may not exceed certain annual thresholds. Where these thresholds are exceeded the management fee is reduced accordingly. The fee cap thresholds are noted in tables in the next pages where applicable.

(b) Administration and Transfer Agent Fees

The Administrative Agent receives a fee from each Sub-Fund based on the relevant Sub-Fund's NAV subject to a maximum fee of 0.3% per annum and subject to an annual minimum fee to be agreed between the Manager and the Administrative Agent (plus value added tax, if any, in each case). The fee is accrued on each Dealing Day and is paid monthly in arrears.

All such fees, disbursements and out-of-pocket expenses will be paid by the Manager on behalf of the Fund or the relevant Sub-Fund. The Administrative Agent is also entitled to be reimbursed for all its disbursements and out-of-pocket expenses.

Transfer agent fees are disclosed within administration fees on the face of the Statement of Comprehensive Income for each Sub-Fund. Transfer agent fees amount to USD 10 per transaction.

(c) Trustee Fees

The annual remuneration of the Trustee, which is payable out of each Sub-Fund is based on the NAV of the relevant Sub-Fund and shall be subject to a maximum fee of 0.3% per annum, and an annual minimum fee to be agreed between the Manager and the Trustee (plus value added tax, if any), and will be retained by the Trustee out of the assets of the Sub-Fund. The fee is accrued on each Dealing Day and payable monthly in arrears.

In addition to such remuneration, the Trustee is entitled to be repaid all of its disbursements, including the fees and expenses of any sub-custodian (which shall be at normal commercial rates) and which will be retained by the Trustee out of the relevant Sub-Fund and transaction charges (which shall also be at normal commercial rates) levied by the Trustee. The amounts charged are shown in the Statement of Comprehensive Income.

(d) Related Party Transactions

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

Transactions with parties who have significant influence

The Manager is a related party under FRS 102 "Related Party Disclosures". Please refer to the Statement of Comprehensive Income for details of management fees (net of fee cap as applicable) and unitholder servicing fees

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

11. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR

The effects of COVID-19 have and may continue to adversely affect the global economy, the economies of certain nations and individual issuers, all of which may negatively impact the PineBridge Global Funds' performance. The Board continues to monitor and receive regular updates on the situation. As at 31 December 2021, to our knowledge, the impact of COVID-19 has not affected the Investment Managers ability to execute the investment strategy of the Sub-Funds, nor has there been interruption to key service providers engaged by the Fund.

A Prospectus of the Fund was issued on 4 March 2021.

Roman Hackelsberger resigned as a Director of the Manager on 18 June 2021.

PineBridge Asia ex Japan Equity Fund Class A5H Units SGD launched on 11 March 2021.

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

11. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR (continued)

PineBridge USD High Yield Bond Fund Class A5HD Units SGD launched on 12 November 2021.

The most recent Prospectus of the Fund was issued on 31 December 2021.

There have been no other significant events affecting the Fund during the financial year.

12. SIGNIFICANT EVENTS SINCE THE FINANCIAL YEAR END

PineBridge Asia Pacific Investment Grade Bond Fund Class Z5 Units SGD launched on 4 January 2022.

PineBridge Global Focus Equity Fund Class Z5 Units SGD launched on 4 January 2022.

PineBridge Asia ex Japan Equity Fund Class R Units USD launched on 27 January 2022.

On the 24 February 2022, the Directors of the Manager passed a resolution to terminate PineBridge Global Emerging Markets Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund.

Central Securities Depositories Regulation ("CSDR")

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards ("CSDR"). CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Fund when it enters into in-scope transactions may result in increased operational and compliance costs being borne directly or indirectly by the Fund. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

On February 24, 2022, Russia engaged in military actions in the sovereign territory of Ukraine. It has caused turmoil on the European and global markets and forced the Russian markets to be suspended in the first quarter of the year. This may and will affect certain funds over the coming period and will continue to cause instability on the global and

Notes to the Financial Statements for the financial year ended 31 December 2021 (continued)

12. SIGNIFICANT EVENTS SINCE THE FINANCIAL YEAR END (continued)

European markets. PineBridge has risk management protocols in place across our global business. The Manager is leveraging our established risk framework as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, PineBridge and the Board are closely monitoring for any emerging risks impacting portfolios. The Manager will continue to monitor this situation and take appropriate actions as needed.

Suspension: PineBridge Emerging Europe Equity Fund

Considering the exceptional and adverse market conditions relating to the current situation in Russia and Ukraine, effective from 2 March 2022, the Manager suspended until further notice the calculation of the Net Asset Value per Unit of PineBridge Emerging Europe Equity Fund (the "Fund") and the right of Unitholders to purchase, redeem or exchange Units in the Fund (the "Suspension"). This decision was made following the recommendation of the Manager and the Investment Manager and with the approval of the Trustee, and was considered to be in the best interests of unitholders as a whole in light of current circumstances. The decision to implement the Suspension was taken as a result of the situation in Russia and Ukraine which adversely affected the orderly disposal and valuation of Russian assets of the Fund. The Manager is unable to determine how long the Suspension will last, however, the Manager will take all reasonable steps to bring the Suspension to an end as soon as possible and in the best interests of Unitholders as a whole.

Since the financial year-end, PineBridge Europe Small Cap Equity Fund has had redemptions amounting to 39% of the Net Asset Value.

Since the financial year-end, PineBridge Global Emerging Markets Corporate Bond Fund has had redemptions amounting to 58% of the Net Asset Value.

There have been no other significant events affecting the Fund since the financial year end.

13. APPROVAL OF THE FINANCIAL STATEMENTS

The Financial Statements were approved by the Board of Directors of the Manager on 21 April 2022.

PineBridge Global Funds (For Sub – Funds registered in Switzerland)

Total Expense Ratios (Unaudited)

The total expense ratio for each share class of each Sub-Fund is calculated in accordance with the “Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes” of the Asset Management Association (AMAS), for the period from 01.01.2021 to 31.12.2021:

*This Fund/Share Class launched/terminated during the financial year, see Note 2 for further details.

Methodology advised in the Guidance Note

The TER (Total Expense Ratio) has been calculated on an ex-post basis (i.e. based on the actual costs charged), by reference to the preceding 12 month period ended 31 December 2021. Separate TER's have been produced for each Sub-Fund and for any unit class with different fee structures.

The TER is equal to the ratio of the Sub-Funds total operating costs to the average net asset value. Total operating costs are expenses deducted from the assets for the relevant fiscal period. The average net asset value is calculated using the net asset value as at each valuation point.

PineBridge Global Funds

Schedule of Portfolio Changes for the financial year ended 31 December 2021 (Unaudited)

Listed below and overleaf are cumulative investment purchases and cumulative investment sales in excess of 1% of the total investment purchases or sales respectively during the financial year ended 31 December 2021. If there were fewer than 20 purchases that exceeded 1%, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Remuneration Disclosure (Unaudited)

The Directors of PineBridge Investments Ireland Limited (the "Company") have put in place a remuneration policy and a remuneration committee. The Directors introduced and approved the remuneration policy on 28 December 2016 and the remuneration policy became effective as of 30 December 2016.

The remuneration policy is designed to be consistent with the requirements of regulation 5 of the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 and the ESMA Remuneration Guidelines ESMA/2016/411 (the "Remuneration Rules"). The remuneration policy is reviewed by the Directors at least once per year. In reviewing the remuneration policy, the Directors will consider whether the overall remuneration system:

- Operates as intended (in particular, that all agreed plans/programmes are being covered),
- That the remuneration pay-outs are appropriate relative to the complexities of the operation of the Company, and
- That the risk profile, long-term objectives and goals of the Company are adequately reflected.

Details of the up-to-date remuneration policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, are available at www.pinebridge.com.

The remuneration committee applies the remuneration policy with the aim of protecting the interests of Fund investors by ensuring that the remuneration of risk takers working for the Fund are subject to appropriate remuneration structures and the interests of these risk takers are aligned with those of the Company and the Fund.

Identified Staff of Delegated Investment Managers

The Company has delegated certain investment management activities to group companies. These group companies are also subject to the requirements on remuneration under the Remuneration Rules. The aggregate fixed remuneration of identified staff of the delegates, this being the investment managers and risk takers during 2021 was USD 2,853,028 and the variable component of their remuneration was USD 3,889,978. This remuneration disclosure is provided on a prorated basis for the part of the Funds' assets which were managed by the identified staff within the delegates and covers 27 recipients of remuneration.

Identified Staff of the Company

In accordance with the Company's Remuneration Policy, the following persons are considered to be the "Identified Staff" of the Company for remuneration committee review purposes: (a) any member of the Board and (b) the Designated Persons (PCF 39). The board of directors of the Company includes 2 Independent, Non-Executive Directors.

These two Non-Executive Directors, each of whom is independent, receive a fixed fee only and do not receive variable remuneration.

Where applicable, these fees are considered to be consistent with the powers, tasks, expertise and responsibility of each Director. The remuneration figures for the 11 Designated Persons disclosed here are prorated to the time they spent working on Company activities. The fixed remuneration for the Designated Persons was USD 771,749 and the variable remuneration component was USD 315,349.
