## What is this product?

### Type:

This product is a type of collective investment scheme, specifically, a sub-fund of an Irish authorised undertaking for collective investment in transferable securities (or "UCITS") constituted as an investment company under Irish company law. Your investment will take the form of shares in the Fund.

### Term:

The Fund, unless dissolved pursuant to any specific cause set forth in a mandatory law or in accordance with the prospectus of the Fund, is established for an unlimited duration.

### Objectives:

The objective of the Fund is to achieve capital appreciation.

The Fund aims to achieve its objective by investing primarily (at least 70%) of its assets in the equities of U.S. companies. The Fund will also seek to achieve its investment objective by investing in financial derivative instruments (as described further below) that have exposure to such equities. This involves the use of mathematical formulae and computer-based models.

The Fund may gain market exposure indirectly through the use of specialist financial techniques (known as derivatives). Derivatives may also be used to reduce the Fund's exposures to currency, market and / or interest rate risk, or to manage the Fund more efficiently.

The Fund is broadly diversified across different U.S. companies and industry sectors.

The Fund may also hold such securities listed or traded on Regulated Markets worldwide of companies that are not incorporated, listed or traded in the U.S. but which receive the majority of their total revenue from the U.S.

At least two-thirds of the Fund's net assets are invested in U.S. companies or companies that carry out a majority of their business in the U.S.

Russell Investments may employ a variety of management styles. This may include delegating investment management to money managers or managing strategies in-house. Russell Investments may also trade a portion of the Fund's assets based on model portfolios provided by the investment advisers. By employing this emulated portfolio approach, the Fund leverages the

implementation capabilities of Russell Investments in order to manage the funds in an efficient manner.

The Fund is actively managed with reference to the Russell 1000 Index Net Returns of Withholding Tax 30% (the "Index").

The Fund's performance will be measured against the Index which it seeks to outperform by 1.15% over the medium to long term. Russell Investments has full discretion to select investments for the Fund and in doing so will take into consideration the Index, but it is not constrained by it.

Income of the Fund will be declared as a dividend and then re-invested to increase the value of your investment.

You may sell your shares in the Fund on any day on which banks are normally open for business in Ireland. For further information please refer to the "Repurchases of Shares" section of the prospectus.

The Fund may be terminated at the discretion of the directors of the Company, provided that a minimum of twenty-one days' written notice has been provided to Shareholders. The Fund may also be terminated by the Shareholders in the Fund, if voted for by at least 75% of the Shareholders in the Fund.

The Fund's depositary is State Street Custodial Services (Ireland) Limited (the "Depositary").

The share price is published on each business day and is available online at [www.bloomberg.com](http://www.bloomberg.com).

Further information about the Fund, copies of the English, German, French and Italian prospectus and the latest annual and semi-annual reports in English may be obtained free of charge by writing to Russell Investments, Rex House, 10 Regent Street, London SW1Y 4PE, England. They are also available online at <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

### Intended retail investor:

The Fund is designed primarily for investors seeking capital growth. It should form part of a broader portfolio of investments but may also be suitable as a significant component of an investor's overall portfolio. The Fund is intended for investors with a long term investment horizon, who are prepared to take on a relatively high level of risk of loss to their original capital. For a basic investor, the Fund should be purchased with advice or on an execution only basis.

## What are the risks and what could I get in return?

### Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from a medium-high level and poor market conditions will likely impact the value of your investment.

The summary risk indicator only takes market and credit risk into account. For a full list of the risks materially relevant to the Fund, please see the Prospectus at: <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

This product does not include any protection from future market performance so you could lose some or all of your investment, however, your liability will be limited to the amount invested and you will not be liable for any additional financial commitments beyond the amount you have invested.

## Performance scenarios

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 12 years.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 7 years			
Investment: USD 10,000			
Scenarios Minimum: There is no minimum guaranteed return if you exit before 7 years		If you exit after 1 year	If you exit after 7 years (recommended holding period)

<sup>1</sup> This type of scenario occurred for an investment between December 2021 and June 2023.

<sup>2</sup> This type of scenario occurred for an investment between January 2016 and January 2023.

<sup>3</sup> This type of scenario occurred for an investment between September 2011 and September 2018.

## What happens if Russell Investments Limited is unable to pay out?

The Depositary has been appointed as the Fund's depositary and ensures the safekeeping of the Fund's assets, as required by regulation. In the event of the insolvency of Carne, the Fund's assets in the safekeeping of the Depositary, will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss and there is no compensation or guarantee scheme in place to aid in the recovery of this loss. This risk of loss is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment: USD 10,000	If you exit after 1 year	If you exit after 7 years
Total costs	120 USD	1,637 USD
Annual cost impact (*)	1.2%	1.3%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.6% before costs and 11.4% after costs.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee for this product.	0 USD
Exit costs	We do not charge an exit fee for this product.	0 USD

Transaction costs	0.1% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	9 USD
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	None	0 USD

## How long should I hold it and can I take money out early?

### Recommended holding period: 7 years

The Fund is designed to be held over the long term.

You can request to take out some or all of your money at any time.

If you sell your shares at an early stage, this will increase the risk of lower investment returns or a loss.

You may exchange shares of one sub-fund for shares in another sub-fund by selling the shares of the first sub-fund and purchasing shares of the other sub-fund as further described in the Prospectus.
