### Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest

## Objectives and Investment Policy

### Investment Objective

The Fund seeks to generate attractive returns and protect capital by investing in debt instruments that meet the Fund's environmental, social and governance ("ESG") criteria while seeking to meet its sustainable objective of assisting in the transition to a low carbon economy.

### Investment Policy

The Fund primarily invests in corporate bonds. Such bonds will generally be rated sub-investment grade (i.e. high yield), but may be rated investment grade and be issued by US and European issuers as well as emerging market issues (up to 20% of the Fund's Net Asset Value). Such bonds will also meet the Fund's ESG criteria. The Fund significantly reduces exposure to the most carbon intensive companies and implements specific screening criteria.

The Fund may use derivatives (financial instruments whose value is linked to the price of an underlying asset) for hedging and efficient portfolio management purposes.

The Fund is actively managed and run on an entirely discretionary basis. The Fund is not managed in reference to any benchmark.

### Fund Currency

The reference currency of the Fund is US Dollars.

**Currency Policy:** The Manager endeavours to reduce currency risk this unit class could face from assets held in currencies different from the unit class currency. For this purpose, the Manager may utilize derivatives such as currency forward contracts which lock in a future price for buying or selling currency.

### Income Policy

If you invest in Income Units, net income the Fund declares will be paid out to you. If you invest in Accumulation Units, net income will be reinvested in the Fund on behalf of investors.

### Buying and selling units

You can buy and sell units in the Fund on any business day in London and New York (a "Dealing Day"). Purchase and sale orders must be received by the Administrator no later than 4.00PM Irish time on the relevant Dealing Day.

**FOR FULL INVESTMENT OBJECTIVE AND POLICY DETAILS PLEASE REFER TO THE RELEVANT SUPPLEMENT TO THE PROSPECTUS**

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

### Why is this Fund in this category?

Your capital is at risk. The risk category shown above is a measure of how significant the rise and fall in the unit price (or that of a similar fund/benchmark) has been historically.

### Key Risks

**Credit Risk:** Issuers of bonds held in the Fund may default on their obligations or have their credit rating downgraded, possibly resulting in a temporary or permanent decrease in the value of those bonds. Bonds in this Fund may be sub-investment grade, meaning that they may produce a higher level of income but also carry greater risk.

**Liquidity Risk:** The Fund may face difficulties in purchasing or selling its assets, although it endeavors to invest in liquid securities.

**Interest Rate Risk:** Fixed-rate bonds held in the Fund may fall in price with an increase in the prevailing level of interest rates in the economy. This risk usually decreases for bonds of lower rating and shorter durations.

**Currency Risk:** Fluctuations in exchange rates may cause the value of your investment to rise or fall. This unit class may be exposed to currencies other than the one in which the unit class is denominated. Although the Manager endeavours to protect the Fund against currency risk, such hedging, achieved through derivatives (see "Derivative Risk" below), is at the Manager's discretion and it may not be possible or practical to protect against all currency risk.

**Derivative Risk:** The Fund may use derivative instruments for hedging and for efficient portfolio management. This may result in gains or losses that are greater than the original amount invested. The Fund may also use derivatives to protect against potential risks as described under the other headings in this section. Derivative instruments may rise or fall in price or may be subject to risk of non-payment or non-delivery by a counterparty. There is no guarantee that derivatives will provide the anticipated protection.

**Operational Risk:** Operational processes, including those relating to the safekeeping of assets, may fail, resulting in losses.

**Emerging Markets Risk:** Emerging Markets may be riskier than more developed markets for a variety of reasons, including – but not limited to – increased political, social, and economic instability; heightened pricing volatility and reduced market liquidity; potentially small issue sizes; less transparent information standards; heightened currency exposure; reduced legal protections and enforceability; and less developed systems for transaction settlement and custody.

Additional information about these and other risks may be found in the prospectus and supplement for the Fund, both of which are available at [www.muzinich.com](http://www.muzinich.com) and [www.fundinfo.com](http://www.fundinfo.com).
