#### Accounting standards effective for periods beginning on 1 November 2021

#### Amendments to FRS 104 Interim Financial Reporting - Going concern

The amendments to FRS 104, clarify the requirement to assess the going concern basis of accounting and require the disclosure of any related material uncertainties when preparing interim financial statements in accordance with FRS 104. These amendments address an unintentional difference between FRS 104 and related IFRS requirements. IFRS Standards require management to assess an entity's ability to continue as a going concern and disclose any related material uncertainties when preparing interim financial statements. An entity has to include a statement that the same accounting policies are applied in the interim financial statement about the going concern basis of accounting.

The amendments are effective for interim periods beginning on or after 1 January 2021, with earlier application permitted.

#### Accounting Standards not yet effective and not early adopted

### Classification of Liabilities as Current or Non-current - Amendments to IAS 1

To promote consistency in application and clarify the requirements on determining if a liability is current or non-current, the International Accounting Standards Board (the Board) has amended IAS 1.

Under existing IAS 1 requirements, companies classify a liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the Board has removed the requirement for a right to be unconditional and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

A company classifies a liability as non-current if it has a right to defer settlement for at least twelve months after the reporting period. The Board has now clarified that a right to defer exists only if the company complies with conditions specified in the loan agreement at the end of the reporting period, even if the lender does not test compliance until a later date. This new requirement may change how companies classify rollover facilities, with some becoming non-current.

The amendments state that settlement of a liability includes transferring a company's own equity instruments to the counterparty. In light of this, the amendments clarify how a company classifies a liability that includes a counterparty conversion option, which could be recognised as either equity or a liability separately from the liability component under IAS 322. Generally, if a liability has any conversion options that involve a transfer of the company's own equity instruments, these would affect its classification as current or non-current.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2023. Earlier application is permitted. The standard is not expected to have a significant impact on the Company's financial statements.

### 4. Financial Assets and Liabilities at Fair Value through Profit or Loss (continued)

#### Investments

Investments whose values are based on quoted market prices in active markets are classified within Level 1. These include active listed equities. The Directors do not adjust the quoted price for such instruments, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. At the period end, the Company held forward currency contracts categorised as Level 2 securities.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. At the period end, the Company did not hold any Level 3 securities (31 October 2022: Nil). There were no transfers between Level 1 and Level 2 during the period.

The Sub-Funds did not disclose the fair value for cash balances, other receivables and, other payables and accrued expenses, because their carrying amounts were in a reasonable approximation of fair value. Cash balances have been classified within Level 1 and the rest of the assets and liabilities have been classified within Level 2.

### **Offsetting Financial Assets and Financial Liabilities**

As at 30 April 2023, the Sub-Funds are subject to an enforceable master netting arrangement in the form of an ISDA agreement with their derivative counterparties. Under the terms of this agreement, offsetting of derivative contracts is permitted only in the event of bankruptcy or default of either party to the agreement. No financial assets or liabilities, subject to enforceable master netting arrangements or similar arrangements, are presented on a net basis in the Statement of Financial Position of the Sub-Funds as at 30 April 2023. The gross amounts of unrealised gains and losses on forwards, by contract, are disclosed in the Schedule of Investments of the Sub-Funds. As at 30 April 2023, the amount of unrealised gains on open forwards offset against unrealised losses was JPY 116,378,374 (31 October 2022: JPY 149,778,395).
