Veritas Asian Fund (the Fund) – Class A USD

The Fund is a sub-fund of Veritas Funds PLC
Management Company: KBA Consulting Management Limited

ISIN: IE00B02T6L79

Objectives and Investment Policy

The Fund is designed for long-term investors who wish to build capital over a number of years through investment in a focused portfolio of equities and equity related securities in companies located in Asia (excluding Japan). The Fund is actively managed and is not managed in reference to, or constrained by, any benchmark.

The Fund may gain exposure to the equities issued by companies whose business or the business of their parent company is located or conducted primarily in the People's Republic of China. Such exposure is gained by entering into arrangements with and acquiring notes or similar equity linked securities or instruments issued by institutions that have obtained Qualified Foreign Institutional Investor status through which the Fund can gain exposure indirectly to the China A Share market. Examples of the notes or similar equity linked securities or instruments are listed P-Notes and warrants. These will be fully financed positions and so have no leverage or finance elements. Exposure may also be gained through OTC derivatives such as swaps. The Fund may also gain exposure to certain equities listed on mainland China stock exchanges via Hong Kong through the market access programme through which foreign investors can deal in select China A Shares ("Stock Connect"). The transaction may be executed by entering into an agreement to acquire a participatory note or warrant issued by a counterparty or directly via the Special Segregated Account Model.

The Fund may invest in listed Indian P-Notes. Such exposure is gained by entering into arrangements with and acquiring notes or similar equity linked securities or instruments issued by institutions that have obtained Foreign Institutional Investor status through which the Fund can gain exposure indirectly to the Indian securities market. These will be fully financed positions and so have no leverage or finance elements. The Fund may also pursuant to a Foreign Portfolio Investor license under the Indian FPI regulations, invest directly in Indian securities issued by Indian issuers.

Investments in the Fund may include financial derivative instruments. Such instruments may be used to obtain, increase or reduce exposure to underlying assets and may create leverage; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund. The Investment Manager will ensure that the use of derivatives does not materially alter the risk profile of the Fund.

You can buy, sell and switch shares of the Fund on demand on any Business Day as defined in the "Definitions" section of the Fund's Prospectus.

The base currency of the Fund is USD.

It is intended that dividend income will be distributed as set out in the "Dividend Policy" section of the Supplement of the Fund.

Risk and Reward Profile

The Risk and Reward Indicator table shows where this share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money. It is based upon studies of how such investments have performed in the past and you should note that this share class may well perform differently in the future. The shaded area in the table above shows the share class's ranking on the Risk and Reward Indicator. The lowest category does not mean that a share class is risk free. The table uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

Historical data may not be a reliable indication for the future. The rating is not guaranteed to remain the same and the risk/reward category may change over time.

This share class is in a higher risk category because it invests primarily in shares. Shares may offer high long-term growth potential, but the prices of shares fluctuate and often go down as well as up. The Fund invests in Emerging Market equities which have historically experienced more price volatility than developed markets. In addition, the Fund has a currency risk given that it invests in shares which are priced in different currencies.

The Fund may also be exposed to counterparty risk which could lead to financial loss if a counterparty is unable to meet its contractual obligations. The Fund is also exposed to liquidity risk where there could be insufficient buyers or sellers to trade the underlying holdings.

Recommendation: The Fund is suitable for investors with a long-term time horizon – typically five years.

A more detailed description of risk factors that apply to this Fund is set out in the "Risk Warnings" section of the Supplement.
