What is this product?

Type

This is an open-ended investment company with variable capital segregated liability between sub-funds, incorporated with limited liability in Ireland.

Objectives

Investment objective The Fund seeks to achieve income and growth primarily through investment in investment grade debt securities, of issuers mostly based in Europe (both EU and non EU member states), the United States, Canada, Australia, New Zealand and Japan.

Investment policies Payden & Rygel Global Limited (the "Investment Manager") will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund.

The Fund will invest primarily in debt securities issued by governments, government agencies, supranationals (e.g. the World Bank) and corporations.

The Fund may also invest in money-market securities and mortgage-backed and asset-backed securities.

The Fund may use derivatives with the aim of managing interest rate and currency risk more efficiently.

The Fund may also use derivatives for both hedging purposes and for taking investment positions. These may include short positions where the Fund seeks to benefit from the sale of an asset that it does not physically own.

SFDR Classification The Fund has been classified as a financial product subject to Article 8 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088.

Benchmark The Fund is actively managed with reference to a Benchmark. The performance will be used against ICE BofA US 3-month Treasury Bill Index. The Index is used (i) as a universe from which to select or hold securities; and (ii) to measure performance of the Fund.

The investment manager has discretion over the composition of the portfolio of the Fund and may select securities not included in the Index. However, in normal market circumstances, whilst it is expected that a significant portion of the Fund's constituents will also be Index constituents, deviations from the Index may be material. Whilst the investment manager does not employ a defined strategy to align with a benchmark during periods of volatility, it will take account of market environment and perceived risks at any given time and

will employ its investment discretion as described in the investment policy accordingly.

Redemption and Dealing Shares can normally be bought and sold on any business day, being a day on which banks are open for business in Ireland, the UK and the US.

Distribution Policy Your shares are accumulating, meaning that income and gains of the Fund will be reinvested to increase the value of the Fund.

Launch date The Fund was launched on 01/07/2007 and the share class was launched on 11/03/2010.

Fund Currency The base currency of the Fund is USD and this share class currency is USD.

Switching Shareholders may switch some or all of their Shares in one Fund to Shares in another Fund.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 0.25 years and are prepared to take on a low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the Directors of the Company as set forth in the prospectus, the Fund cannot be automatically terminated. The Investment Manager is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the

exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the section entitled Risk Warnings of the prospectus, available free of charge at <https://www.payden.com/>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 December 2019 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 27 November 2020 and 26 February 2021.

Favourable: this type of scenario occurred for an investment between 31 March 2020 and 30 June 2020.

Recommended holding period		0.25 year

What happens if the Fund is unable to pay out?

You may face a financial loss if the Fund defaults on their obligations. If the Fund is unable to pay you out what the Fund owes you, you are not covered by any guarantee or national compensation scheme. The assets of the product are held in safekeeping by the Depositary and are separate assets to those of the Fund. Therefore, in the event of the insolvency of the Fund, the products and assets will not be affected. In the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence or intentional failure properly to fulfil its obligations (subject to certain limitations). In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 0.25 years (recommended holding period)
Total Costs	12 USD
Annual cost impact*	0.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.4% before costs and 0.2% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00%, we do not charge an entry fee.	0 USD
Exit costs	0.00%, we do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	0.16% of the value of your investment per year (Capped). This figure may vary from year to year but will not be more than the capped rate currently set at 0.16%. This is an estimate based on actual costs over the last year.	4 USD
Transaction costs	0.33% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	8 USD
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	There is no performance fee for this product.	0 USD

How long should I hold it and can I take money out early?
