For the year ended 31 December 2022**

As required by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the Regulations") and solely within the context of our oversight duties as depositary, we are pleased to present our report as follows.

In our opinion, Mediolanum Best Brands has been managed for the year ended 31 December 2022:

- (i) In accordance with the limitations imposed on the investment and borrowing powers of the Manager by the Trust Deed and the Regulations; and
- (ii) Otherwise in accordance with the provisions of the Trust Deed and the Regulations.

## STATEMENT OF MANAGER’S RESPONSIBILITIES

---

The Manager is required to prepare financial statements for each financial year which give a true and fair view of the state of affairs of Mediolanum Best Brands (the “Fund”) and of the profit or loss of each sub-fund (the “Sub-Funds”) for that financial year. In preparing those financial statements, the Manager is required to:

- select suitable accounting policies and apply them consistently;
- make judgments and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to assume that the Fund will continue in operation.

The financial statements may be available on the website of the Manager and/ or any regulatory website as may be required by law and/or regulations. The Manager is responsible for the maintenance and integrity of the corporate and financial information included on the Manager’s website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Manager is responsible for maintaining proper books of account, which disclose with reasonable accuracy at any time the financial position of the Fund and which enables it to ensure that the financial statements are prepared in accordance with FRS 102 “The Financial Reporting Standard applicable in the UK and Republic of Ireland” issued by the Financial Reporting Council (“FRS 102”). The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (“the UCITS Regulations”) the Unit Trusts Act, 1990 (“the applicable Regulations”) and the Trust Deed. The Manager is also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements are prepared using the going concern basis of accounting which is deemed appropriate by the Manager.

The Directors of the Manager are satisfied that transactions with connected parties entered into during the financial year complied with the obligations set out in Regulation 43(1) of the CBI UCITS Regulations 2019, namely any such transaction must be conducted at arm’s length and in the best interests of the Unitholders (as defined in the Prospectus).

The Directors of the Manager have adopted and are adhering to the Irish Funds (“IF”) Code of Corporate Governance.

Signed on behalf of the Manager on April 25, 2023:

Director:    
DFA6624ABB8741E...

Director:

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022

## 2022 - Market Review

The last few years have been particularly challenging for investors and 2022 was no exception. Last year was expected to be the year in which the global economy finally got back on its feet following the COVID-19 pandemic. However, any positive momentum was quickly cut short by Russia's invasion of Ukraine in February and while inflation was already the main concern pre-invasion it quickly became the most pressing issue for central banks.

The immediate impact was a surge in oil, gas, wheat and other commodity prices which exacerbated the problem and, as a result, helped propel inflation to levels not seen since the 1970s. Consequently, central banks very quickly found themselves on the back foot and were forced to raise interest rates aggressively to combat high inflation, thus adding volatility to financial markets, triggering a bear market in equities and the worst bond bear market in the last 80 years.

## 2022 Performance in Euro Terms

Source: Bloomberg, MSCI, MIFL

### *Virtually all assets were severely affected*

The rest, as they say, is history. The impact of rising inflation on financial markets was profound as virtually all assets outside of commodities fell. Global equities entered a bear market during the second quarter - falling more than 20% - but other markets were much weaker still, with the likes of the technology dominated Nasdaq down as much as a third at its lowest point.

However, the real pain was felt in the bond markets which suffered the worst drawdown in living memory. Even safe haven assets such as the US 10-year Treasuries were down 18% at their lowest point, with riskier Emerging Markets bonds down over 30%. To put this into context, in the case of the US Treasury market this was more than double the drawdown of the early 1980s which followed the 'Volker' rate hikes that helped defeat inflation after the 1970s, and three times as large as the 1994 'bond massacre'.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

US treasury bond drawdowns since 1975

1

Source: MIFL, Bloomberg

### US Collection

**Performance\*** **31/12/21 – 31/12/22** **-16.63%**

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of North American equities and equity-related securities. Investments are made through funds, including exchange traded funds (ETFs), and through delegate managers and internally managed portfolios.

2022 was a volatile and negative year for equity markets. War in Ukraine, sharp rises in energy prices and inflation and subsequent increases in interest rates by central banks were some of the headwinds.

US equities returned -12.7% for the year, represented by the S&P 500 Index in Euro terms. US dollar return for local investors was considerably weaker with the almost 8% appreciation of the USD against the Euro benefitting (unhedged) European investors. Share price falls were led by high growth companies in the information technology and consumer discretionary sectors. These were the ones most affected by higher interest rates, which may make continued growth more difficult, and by their more expensive starting valuations.

After 2021's very strong gains the investment return was poor for the period, driven by losses in growth company investments and disappointing initial outcomes from new fund investments from Polen Capital and Eagle Capital.

Stocks such as Meta and Amazon were large detractors as their share prices corrected sharply during the year. Reduced demand and rising costs in the higher inflation environment and the de-rating of previously expensive valuations impacted the shares further. Technology stocks Advanced Micro Devices (semiconductors) and Western Digital (data storage) were other poor performers. Energy was a rare gaining sector, aided by higher oil and gas prices, and Exxon, Chevron and ConocoPhillips were positive contributors helping to limit losses.

The year's 'style rotation' was a major feature, with relatively inexpensive value stocks significantly outperforming their growth counterparts, and other defensive shares holding up better. Delegate manager JP Morgan's stock selection benefitted from consumer staple holdings Coca-Cola and Kraft Heinz, and the iShares Edge MSCI USA Value Factor UCITS ETF was an outperformer.

A number of portfolio changes were made. Polen Capital Focus US Growth Fund (5% position) and Eagle Capital US Equity Value Fund (also 5%) were introduced as new specialist boutique managers. Polen's expertise is in stock selection across emerging to mature growth opportunities, while Eagle takes high conviction positions in businesses with significant growth potential and which are undervalued by investors. These specialist investments were funded by selling Threadneedle US Contrarian Core Equities and T. Rowe Price US Large Cap Growth Equity Funds.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### US Collection (continued)

Later on in the period, an internally managed quantitative equity portfolio (5% allocation) was introduced, emphasising attractive company fundamentals. Delegate manager JP Morgan's allocation was reduced (but remains the largest investment at 34%) and the Russell 2000 Index futures position (3%) was closed to reduce exposure to smaller companies for what may be a difficult economic environment ahead.

### US Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-24.24%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged share class performance due to the depreciation of the Euro against the USD.

### European Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-13.26%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum LA Class.

The European Collection Sub-Fund invests in a diversified portfolio of Pan-European equities and equity-related securities. Investments are made mainly through funds and internally managed portfolios.

2022 was a poor year for global equities. The war in Ukraine, rapid rises in energy prices, higher interest rates in response to inflation and continued effects from COVID-19, particularly in China, were headwinds. Global equities, represented by the MSCI World Index, returned -12.8% in Euro terms. European markets (MSCI Europe Index -9.5%) experienced a smaller correction due to their higher exposure to sectors such as energy (a strong and rare gainer) and financials (bank profits boosted by rising interest rates). In terms of style, it was a particularly poor period for growth stocks, such as those in information technology where expensive starting valuations and the macroeconomic environment resulted in sharp corrections. Within Europe, UK was the strongest performing market, aided by its larger exposure to commodity producers and lower exposure to technology companies.

After 2021's strong gains, investment return for this period was thus negative, exacerbated by European investment managers generally struggling in the volatile environment.

Blackrock Continental European Flexible Fund was the weakest performer as its growth stocks suffered large losses. Acadian European Equity UCITS Fund was also a detractor with its large exposure to small and medium-sized companies which underperformed on rising concerns of economic recession. On the positive front, Memnon European Fund was the strongest performer with good stock selection, such as Thales (defence) and Saab (automobiles).

At a sector and stock level, information technology companies were major detractors with semiconductor names, such as ASML and STMicroelectronics, struggling in particular with their challenging demand outlook. Positive contributions came from energy companies, such as Shell, Total Energies and BP, and banks, such as Commerzbank, Bank of Ireland and ING.

Within portfolio activity, the Majedie UK Focus and Oddo Avenir Europe Funds were sold mid-year due to weakened conviction in these investments. The former was replaced with a position in the iShares Core FTSE 100 ETF for its high exposure to energy and financials, while the proceeds from the sale of the latter were added to the investment in Acadian European Equity Fund to broadly maintain medium-sized and smaller companies exposure.

An internally managed European quantitative equity portfolio, which emphasises companies with attractive fundamental characteristics, was introduced late in the period at a 5% allocation. This was funded by selling the Lyxor STOXX Europe 600 Banks ETF and reducing the iShares Edge MSCI Europe Value Factor ETF.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

## European Collection Hedged Class

**Performance\*** 31/12/21 – 31/12/22 **-12.79%**

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum LHA Class.

Currency hedging, implemented using currency forward contracts, added from the Sub-Fund's hedged share class performance due to the depreciation of the Euro, particularly against the GBP.

## Pacific Collection

**Performance\*** 31/12/21 – 31/12/22 **-16.51%**

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of both developed and emerging market equities and equity-related securities in the Asia Pacific region. Investments are made mainly through funds, including exchange-traded funds.

2022 was a poor year for global equities. Affected by higher inflation and higher interest rates globally, Asia Pacific equities were also particularly impacted by China's economic struggles arising from its Zero COVID policy and property sector concerns. The representative MSCI All Countries Asia Pacific Index returned -11.8% in Euro terms. Among its larger components, the Japanese market return was broadly in line whilst the Chinese market (MSCI China Index -16.8%) underperformed. Smaller South Korean and Taiwanese markets, with around -25% returns, were particularly affected by their large information technology weightings. Indian and Australian markets held up relatively better with losses of less than 10%, the former due to its more domestic nature and the latter aided by commodities producers.

Investment return for the period was thus negative. A particular feature of the year was the sharp correction in growth company share prices, and these stocks were among the major detractors.

The sole delegate mandate, and the largest allocation at 27.5% of the portfolio, is with JP Morgan, which was affected by falls in the technology stocks Taiwan Semiconductor Manufacturing Company and Tokyo Electron, with their semiconductor divisions affected by global demand concerns. Stock selection within and allocation to banks helped limit losses - Bank Rakyat Indonesia and Bank Central Asia were positive contributors.

The Cadence Strategic Asia Fund was also poor due to its growth exposure - e-commerce companies Sea (Singapore) and Coupang (South Korea) were key detractors.

The Robeco Asia-Pacific Equities Fund was the strongest performer, aided by its value-oriented approach and preference for less expensive shares which suffered smaller corrections. Investments in Singapore were positive contributors, notably DBS Group Bank, which benefitted from strong real estate and credit demand as the island increased its status as a regional hub.

Portfolio activity during the year focused on adjustments to fund and ETF allocations.

Early in the period, the remaining small 1.5% position in Ninety One All China Equity Fund was sold, with Chinese exposure taken now through broad regional investments. Index-tracking Japanese exposure was also switched to actively managed investments as research conviction increased - the iShares MSCI Japan IMI ETF (a 2.5% position) was sold and TOPIX futures (2%) closed, with the proceeds added to Alma Eikoh Japan Large Cap Equity Fund (ending in 10.5% weight from 9%). Cadence Strategic Asia Fund was also increased (from 6% to 9%).

Later in the period, the iShares Core MSCI Pacific ex-Japan UCITS ETF (3%) was sold and the 1% position in Hong Kong Hang Seng futures closed. The proceeds were used to increase exposure to Australia and commodities through investing in the iShares MSCI Australia UCITS ETF (4%).

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Pacific Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-16.23%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, added from the Sub-Fund's hedged share class performance due to the depreciation of the Euro against key currencies, such as HKD, CNH and SGP, in the Asia Pacific.

### Emerging Markets Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-18.78%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of Emerging Market equities and related securities. Investments are made mainly through funds and exchange-traded funds, and through a delegate manager.

In a poor year for global equities marked by risk aversion, higher inflation and higher interest rates, Emerging Market equities were the segment that was mostly affected by Russia's invasion of Ukraine, a stronger US dollar and China's Zero COVID policy and property sector concerns. The MSCI Emerging Markets Index return of -14.9% in Euro terms was poorer than the developed markets index returns (MSCI World Index -12.8%), despite both being boosted by the USD strength versus the Euro.

Regionally, the Emerging Europe segment with its Russia component fell the most (-23.6%). Emerging Asia (-15.9%) was also weaker due to the Chinese, South Korean and Taiwanese markets, the latter's dominant semiconductor companies affected by a weaker global economic outlook. Latin America helped limit losses (MSCI Latin America 10/40 Index return +16.1%) with 15-30% gains in Chile, Brazil and Peru, driven by higher commodity prices.

Investment return was negative in a difficult period for active managers and large corrections in growth company shares were a major detractor.

Underperformance of growth shares was a key feature of 2022. The JP Morgan Emerging Markets Equity Fund was the worst affected, with key holdings Taiwan Semiconductor Manufacturing Company and Samsung Electronics' shares correcting sharply on global demand concerns. Other growth-oriented investments in the consumer discretionary sector also detracted from performance with globally higher interest rates affecting financing costs and limiting growth prospects.

The Federated Hermes Global Emerging Markets Fund was also a poor performer, where Hapvida Participações, a Brazilian healthcare company, was a major detractor with weaker than expected earnings due to higher costs. The Redwheel Global Emerging Markets Fund had poor stock selection in financials, notably with Ping An Insurance Group of China and Saudi National Bank, but with commodity and frontier markets exposures helping to limit losses.

Portfolio activity during the period consisted of two investment fund disposals, consolidating to higher conviction investments.

Early in the period, the RBC Emerging Markets Equity Fund (an 8% holding) was sold, with the Redwheel Emerging Markets Equity Fund having been increased in particular (to 13.5% from 7.5%). Later on, the Macquarie Emerging Markets Fund (a 10% investment) was also sold, and this position was switched into the iShares Core MSCI EM IMI UCITS ETF. The RBC and Macquarie Fund exits followed an ongoing research review and weakened conviction.

Other adjustments included selling the Amundi MSCI Emerging Markets Latin America UCITS ETF in September (1% tactical position, relative outperformer), and reducing and closing the Hang Seng China Enterprises Index futures position (2% at the beginning of the period) to reduce the portfolio's growth exposure.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Euro Fixed Income

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-5.35%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests predominantly in short-term (typically 1 to 3-year maturity) Euro denominated fixed income securities issued by Euro area member states, government-related entities, such as agencies, local authorities and supranational institutions, and other non-government issues such as corporate bonds. This investment is currently made through a delegate manager (Neuberger Berman). Derivatives may be utilised for hedging and investment purposes.

2022 was a very poor year for fixed income assets with the worst investment returns in decades. Rising inflation in the beginning of the year accelerated further due to the Russia-Ukraine war which led to surging energy prices and disrupted supply chains. Central banks raised interest rates aggressively in their attempts to control inflation, leading to sharply higher bond yields (lower prices). Return for the year from the broad Bloomberg Global Aggregate Euro-hedged Index of developed markets investment grade bonds was -12.8%. Shorter-dated bonds, including those in the Euro area, fared better due to their lower sensitivity to interest rate rises and credit risks, with the Bloomberg Euro Aggregate 1-3 Year Index returning -5.0%.

Investment return was negative for the year, and broadly in line with falls in the sub-asset class, affected by the general rise in bond yields and with corporate bonds falling more on rising risk aversion.

Exposure to corporate bonds was taken in selected bank and real estate companies on the basis of relatively attractive yields. Despite the income earned, prices fell particularly in the latter on fears of economic recession due to higher inflation and interest rates.

Against broad falls, positive contributions came from an early period short position in government bond futures, which benefitted from sharp rise in yields, and investments in inflation-linked bonds particularly in Italy, which were among the few gainers during the period.

The profitable inflation-linked securities and short government bond futures positions were in place at the beginning of the period, anticipating some monetary policy normalisation through a gradual increase in interest rates. The Russian invasion of Ukraine and the subsequent jump in inflation led to sharper interest rate and bond yield increases. Following the falls in bond prices, government and corporate bonds were increased to take advantage of more attractive prices and yields.

A partial summer rally in bond prices was used as an opportunity to reduce corporate bond exposure and interest rate sensitivity. This risk reduction was increased into the year-end through use of derivatives. There was a notable reduction to Italian government bonds where the country's high debt burden may prove a challenge in what may be an era of slower growth and higher interest rates.

### Global High Yield

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-7.97%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund is structured to have a strategic exposure to global high yield fixed income investments, and the investments are made predominantly through delegate managers.

The year was challenging for global high yield markets as they struggled with the impact of higher inflation which led to central banks increasing interest rates globally at a pace and magnitude that was not expected by the markets. This in turn led to a higher level of market volatility exacerbated by the conflict in Ukraine which began in February and extended for the remainder of 2022.

Despite the macro-induced correction in bond prices - the ICE BofA Global High Yield Constrained Index return for the year was -7.5% in Euro terms - bond issuers generally reported strong corporate fundamentals and default rates remained at low levels amidst the twin challenges of rising input costs and continued supply chain disruptions. New debt issuance was understandably low compared to recent history due to volatile market conditions and the higher cost of debt in the increasing interest rate environment. USD-denominated assets were again boosted by currency strength, particularly relative to the Euro, by almost 8%.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Global High Yield (continued)

The Sub-Fund delivered a negative return broadly in line with global high yield markets in what was a difficult period for managers to navigate. Delegate manager portfolios in US, Europe and Emerging Markets all suffered losses in 2022, generally in line with market falls. Investment manager Brigade's return was relatively poor, suffering due to its higher exposure to lower-rated corporate bonds, despite some offsetting gains from their holdings in loan investments. Losses for the second US High Yield manager Aegon were smaller due to higher quality bond investments. European high yield exposure, through delegate manager DWS, also had a challenging year due to the conflict in Ukraine and ECB interest rate increases in the second half of the year, but the manager's rigorous credit selection process limited losses. Delegate manager PGIM's portfolio suffered losses in line with Emerging Market corporate debt returns.

Portfolio activity was at a reduced level, given the high levels of market volatility.

In July, Muzinich Dynamic Credit Income Fund was introduced at a small initial 1% position. Managed by an established credit team, the investment adds portfolio diversification with this newly launched investment fund aiming to deliver a high level of income by flexibly investing in dislocated credit (high yield) opportunities globally. In Q4 the sensitivity of the portfolio to further bond price falls was reduced a little through derivatives positions. With currency exposure, a positive view on the US dollar was maintained throughout the year.

Monitoring focused on the delegate manager PGIM, where the investment mandate had been altered in late 2021 from Emerging Markets government debt to corporate bonds. The latter asset class fared a little better during the year helping to limit losses on overall portfolio level.

## Global High Yield Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.99%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, contributed negatively overall to the Sub-Fund's hedged share class due to the appreciation of the USD against the Euro.

## Premium Coupon Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.75%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The Sub-Fund's investment objective is to generate income for periodic distribution while also aiming for medium to long-term capital appreciation. It is structured to have a relatively low exposure to equities with the majority of assets being invested in fixed income instruments through funds, internally managed portfolios and direct securities investments. Asset allocation is used to tactically adjust risk exposures to different asset classes.

Fixed income returns were very poor in 2022 due to inflation concerns and subsequent interest rate increases by central banks which drove bond yields up, and lowered bond prices. The Bloomberg Global Aggregate Euro-hedged Index for broad market government and corporate bonds (developed markets, investment grade) returned -13.3% for the year, this being its worst return since its inception over 20 years ago. Within this index, corporate bonds were weaker due to increased investor risk aversion. Global equities performed equally poorly in this environment, with the MSCI World Index returning -12.8% in Euro terms despite the US dollar strength.

The poor investment return for the period was driven by losses in the fixed income portion of the portfolio.

The Vontobel Euro Corporate Bond Fund was the biggest detractor. Corporate bond prices fell on rising economic recession risk, with European company debt further underperforming their US counterparts due to higher potential impact from the war in Ukraine. Flossbach Von Storch Bond Opportunities Fund was also a detractor, but held up well in relative terms due to its lower exposure to higher interest rates.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Premium Coupon Collection (continued)

Within equity investments, which also delivered negative returns, Blackrock Continental Europe Flexible Fund was the worst performing strategy with its information technology stock selection in particular suffering large share price corrections. A rare positive contributor was the small tactical investment in the Xtrackers S&P Global Infrastructure Swap UCITS ETF which was a beneficiary of higher inflation.

Fixed income exposures were managed actively during the year. Notably, longer dated bonds were switched into those with a shorter maturity. Shorter duration bonds reduced interest rate risk whilst also providing a more attractive yield than a year ago. For example, the yield on a 1-year Italian government bond increased from -0.5% at the end of December 2021 to 3% by the end of 2022.

Equity exposure was reduced from around 26% to 18% during the period, reflecting a cautious outlook. Blackrock Continental European Flexible Fund, Kempen Global High Dividend Fund and Lyxor MSCI World UCITS ETF were sold. An internal, actively managed global quantitative equity portfolio was introduced. It seeks to add value through favouring companies with more attractive fundamental characteristics, such as stronger balance sheets and higher profit margins.

Elsewhere, the SPDR Refinitiv Global Convertible Bond UCITS ETF was also sold, switching to more defensive, traditional short-term government bond securities.

### Premium Coupon Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-16.26%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged share class performance due to depreciation of the Euro against the USD.

### Dynamic Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.57%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The Sub-Fund's investment objective is to generate capital appreciation over the medium to long term through a multi-asset portfolio invested primarily in global equities with a relatively low exposure to fixed income assets. Investments are made primarily through funds and tactical allocation is used to adjust risk exposures across different asset classes.

Returns from financial assets were poor in 2022 with unexpectedly high inflation resulting in hawkish central banks raising interest rates in response, the onset of the Russia/Ukraine conflict, China's Zero COVID policy and consequent global recession concerns all weighing on investor sentiment.

Global equities, represented by the MSCI World Index, returned -12.8% in Euro terms, even with the USD strength benefitting (unhedged) European investors. Fixed income returns were similarly poor - Bloomberg Global Aggregate Euro-hedged Index return of -13.3% was the worst in many years - as government bond prices fell with the increase in interest rates and yields, and lower rated corporate bond prices fell even further on rising risk aversion.

The negative return for the year was driven by losses in both equities and fixed income investments, with a larger allocation in the former having the bigger impact.

Within equities, all investments detracted from performance with the exception of the iShares S&P500 Energy Sector UCITS ETF which gained due to higher oil and gas prices. The BlackRock Continental European Flexible Fund was the biggest detractor, impacted by losses from information technology investments the sector being among the worst performing during the year. Additionally, stock selection within industrials, such as Kingspan Group (UK building materials) and DSV (Danish logistics company), had a poor year with construction and transport struggling in the higher inflation environment.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Dynamic Collection (continued)

All fixed income investments delivered losses with Bluebay Investment Grade Euro Aggregate Bond Fund being the largest detractor. Invested predominantly in European government bonds, an area that fared worse than European corporate bonds and US government bonds, it was particularly impacted by high inflation in the Eurozone and the resulting interest rate rises by the hawkish ECB leading into rising bond yields, coupled with geopolitical risks from the Ukraine conflict.

Over the year the equity exposure was reduced (from 80% to 74%), reflecting the manager's cautious outlook on rising economic recession risk. A key change was the sale of the T Rowe Price US Large Cap Growth Equity Fund (8% beginning position), switching into the iShares Edge MSCI World Quality Factor UCITS ETF for a more defensive exposure. Wellington Global Research Equity Fund (7.5% holding) was also sold and other holdings were reduced. An internally managed global quantitative equity portfolio (15% allocation) and the Artisan Global Value Fund (5% position) were introduced.

Within fixed income, early in the period iShares China CNY Bond UCITS ETF (3% tactical investment) was sold on fears of China's Zero COVID policy impacting growth. Over the year, fixed income exposure was increased modestly from 13% to 16%. The Muzinich Dynamic Credit Income Fund (7% ending position) was a new investment to provide a flexibly managed corporate bond portfolio for improving portfolio diversification.

Elsewhere, the Lazard Global Convertible Bond Fund (starting 5% holding) was sold, again to reduce risk. A small investment in iShares Physical Gold ETF was made to provide alternative commodity exposure.

### Dynamic Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-18.32%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum LHA Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged share class performance due to the depreciation of the Euro against the USD.

### Equity Power Coupon Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-8.64%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of equities and equity-related securities globally. Investments are made through allocations to delegate managers, funds and internally managed portfolios, with chosen strategies oriented towards dividends as a component of medium to long term returns.

2022 was a poor year for global capital markets. The war in Ukraine, rapid rises in energy prices and central banks' interest rate increases to control inflation were all headwinds. Global equities, represented by the MSCI World Index, returned -12.8% in Euro terms. Regionally, European markets experienced the smallest correction benefitting from higher exposure to sectors such as energy and financials. The US and Emerging Markets were weaker with the former impacted by its higher proportion of growth stocks, such as those in the information technology sector. Emerging Markets struggled due to China's continued Zero COVID policy and related restrictions. From a sector perspective, energy was the stand-out (MSCI World/Energy Index gained +55.6%) and a rare gainer with oil and gas companies benefitting from the sharp increase in energy prices.

Investment return was negative for the period, but less so than for the broad global equities, aided by 2022's major style rotation whereby value and dividend stocks - those on relatively inexpensive valuations - significantly outperformed growth and quality shares (with higher expected earnings and typically more expensive valuations).

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Equity Power Coupon Collection (continued)

The portfolio's higher dividend strategies, particularly Kempen Global High Dividend Fund and Redwheel Global Equity Income Fund, delivered robust returns. Trojan Global Income and Intermede Global Equity Funds were detractors due to their higher exposures to quality and growth stocks. At stock and sector level, energy companies such as Shell, Total Energies and Exxon Mobil were positive contributors with their profits being boosted by higher oil and gas prices. Stocks in information technology detracted from performance, notably semiconductor companies such as Qualcomm, Samsung and Taiwan Semiconductor, with their share prices correcting on the back of slowing demand and increased US-China trade issues.

A number of changes were made during the year to consolidate and adjust the portfolio.

Early in the year, a number of investments were reduced or sold. Fidelity Global Dividend Fund (13%) with its more balanced approach was sold, increasing allocations to higher dividend Redwheel Global Income Fund and internally managed global income strategies. The Schroders Global Equity Alpha Fund was another exit, replaced by Artisan Global Value Fund and its style exposure.

During the second half of the year regional funds, such as Eleva European Selection, Memnon European and Redwheel Global Emerging Markets Funds, were sold and investments in existing dividend strategies were increased. iShares Global Infrastructure UCITS ETF was introduced for its perceived inflation hedge properties.

### Equity Power Coupon Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-11.79%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged share class performance due to the depreciation of the Euro, particularly against the USD.

### Mediolanum Morgan Stanley Global Selection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-21.18%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The Sub-Fund is delegated to Morgan Stanley Investment Management and aims to deliver long-term capital appreciation through a portfolio invested primarily in equities, with smaller allocations to fixed income securities and cash. The strategy is implemented through a combination of direct security investments and funds and utilises the full range of Morgan Stanley's global investment capabilities, with a flexible approach to tactically manage risk exposures.

It was a challenging year for global capital markets as a combination of geopolitical concerns (Ukraine war), lingering COVID-19 issues (China lockdown) as well as unanticipatedly high inflation and consequent interest rate increases led to concerns of a global recession taking hold. This impacted stock and bond prices and led to material weakness in specific areas of the market. Among the weakest were growth equities, which materially underperformed broader equity markets. Sectors such as the previously leading information technology struggled in this environment with share prices experiencing sharp corrections in some cases. Unhedged Euro investors investing globally benefitted from US dollar strength which helped to limit losses.

The Sub-Fund delivered a poor return for the year, impacted heavily by the portfolio's exposure to growth equity stocks particularly during the first half. Funds which hindered performance during the period were Morgan Stanley Global Opportunity, Morgan Stanley Global Insight and Morgan Stanley US Advantage, having an orientation to long-term growth companies which act as disruptors within their industries. Companies such as Shopify and Uber were heavily penalised by the market after previous strong returns. On the positive front, holding equities at a reduced and conservative level of 70-75% for much of the year helped to limit volatility, and switching capital to more defensive investments early in the period helped to reduce losses.

The portfolio was actively managed over the course of the year during the increased volatility. Equity exposure was reduced in the early months of 2022 as the economic backdrop became more uncertain. The equity risk level was around 10% lower and maintained at a cautious 70-75%. Cash was also held at above average levels consistent with this reduced risk stance.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Mediolanum Morgan Stanley Global Selection (continued)

With the underlying investments, the biggest changes occurred early in the year. Morgan Stanley Global Brands, Morgan Stanley Global Franchise and Morgan Stanley Global Sustain Funds were introduced in February. These strategies focus on quality companies and franchises with sustained profitability. This more defensive allocation represented circa 25-30% of the portfolio over the rest of the year, and was funded by reducing exposure to growth and core global equity strategies thus providing helpful style diversification.

Portfolio improvement and diversification was increased in the second half of the year through the addition of the Eaton Vance Focused Value Opportunities strategy.

### Mediolanum Morgan Stanley Global Selection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-24.03%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged share class performance due to the depreciation of the Euro against the USD.

### Emerging Markets Multi Asset Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-17.36%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The Sub-Fund's objective is to generate capital appreciation over the medium to long term, and it is structured to have a relatively balanced split between equities and fixed income in Emerging Markets. Investments are primarily in funds, including exchange-traded funds, and tactical asset allocation is undertaken to adjust risk exposure across asset classes.

In what was a poor year for global equities and bonds with a reduced investor risk appetite, Emerging Market returns fared even worse. Equities, represented by the MSCI Emerging Markets Index, returned -14.9% in Euro terms, even with the benefit of the US dollar strength. China accounts for around 30% of this index, and the continued Zero COVID policy negatively affected growth and corporate earnings both regionally and globally. The Russian invasion of Ukraine and higher global interest rates resulted in poor returns from fixed income also - the JPM EMBI Global Diversified Euro-hedge Index return was -20.1% over the period.

Investment return for the year was poor, with losses across both equity and bond investments.

The Barings Emerging Markets Sovereign Debt Fund was a large detractor due to its exposures to Russia, Ukraine and Belarus, which were heavily impacted by the Russian invasion of Ukraine. The investment partially recovered some of its losses later in the period with positions in Egypt and Ecuador contributing to recovery.

Within equities, underperformance of growth equities was a key feature of 2022, whereby share prices of expected higher growth companies corrected sharply in many cases. Value equities with typically less expensive valuations outperformed. The JPMorgan Emerging Markets Equity Fund performed poorly due to its tilt towards growth companies. The iShares Edge MSCI EM Value Factor UCITS ETF, held to moderate exposure to growth stocks, outperformed and helped limit losses.

There was considerable portfolio activity and re-positioning around market volatility.

Equity exposure was reduced during the year from 60% to 48% reflecting the manager's cautious outlook. The JP Morgan holding was reduced (from 13% to 8%) and the Macquarie Emerging Markets Fund sold (10%). High conviction Redwheel Global Emerging Markets (11% ending weight) and specialist Bin Yuan Greater China (2%) Funds were introduced.

Within fixed income, the iShares JP Morgan \$ EM Bond UCITS ETF (11% position when sold) was switched to the iShares JP Morgan EM Local Government Bond UCITS ETF (5% ending weight) as the latter asset class was less exposed to further interest rate rises in the US and the developed markets. A 10% investment in the iShares JP Morgan \$ EM Corporate Bond UCITS ETF was made for its more attractive return-risk profile.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Coupon Strategy Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.86%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund's investment objective is to generate income for periodic distribution while also aiming for medium to long-term capital appreciation. It is structured to have a relatively balanced split between global equities and fixed income, and investments are made through funds, delegate managers, internally managed portfolios and direct securities investments. Asset allocation is managed tactically to adjust risk exposures across asset classes.

Returns from financial assets were poor in 2022 with unexpectedly high inflation, rising interest rates by hawkish central banks, the onset of the Russia/Ukraine conflict, China's Zero COVID policy and consequent global recession concerns all weighing on investor sentiment.

Global equities, represented by the MSCI World Index, returned -12.8% in Euro terms, even with the USD strength benefitting (unhedged) European investors. Fixed income returns were similarly poor - Bloomberg Global Aggregate Euro-hedged Index return was 13.3%, the worst in many years - as government bond prices fell with the increases in interest rates and yields. Lower rated corporate bond prices fell further on rising risk aversion.

The negative return for the period was driven by losses in both equities and fixed income investments.

All equity investments, bar one, suffered losses. BNY Mellon Dynamic US Equity Fund was particularly poor and the biggest detractor with its large cap focus being a major headwind in a difficult year for the biggest US companies. Blackrock Continental European Flexible Fund (sold mid-year) was another key detractor with its information technology stock selection suffering sharp corrections early in the year. The sole positive contributor was the iShares Global Infrastructure UCITS ETF benefitting from its inflation hedge characteristics.

Fixed income investments also suffered losses. The internally managed fixed income securities portfolio was the biggest detractor and suffered from its exposure to Russian bonds in the first quarter. The remainder of the year was negative for US and European bonds in the sharply rising interest rate environment.

Equity exposure was reduced during the year from 60% to 48% with a number of investments trimmed or sold, reflecting the manager's cautious outlook on rising recession risks. A key change was the sale of the Lyxor MSCI World UCITS ETF (7% holding), introducing an actively managed internal global quantitative equity portfolio (7.5% ending allocation) that seeks to add value through emphasising companies with more attractive fundamental characteristics in its place.

Fixed income exposure was actively managed during the year. Notably, longer dated bonds were switched into those with a shorter maturity within the internally managed securities portfolio. Shorter duration bonds reduced interest rate risk whilst also providing a more attractive yield than a year ago.

Elsewhere, the Lazard Convertible Global Fund was sold, switching to more defensive, traditional short-term government bond securities.

## Coupon Strategy Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-17.81%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### New Opportunities Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.72%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund's investment objective is to generate capital appreciation over the medium to long term through a relatively balanced split between global equities and fixed income, and investing primarily in funds. Tactical asset allocation is used to adjust risk exposure across asset classes and the portfolio also takes a thematic approach to equity investments.

Returns from financial assets were poor in 2022 with unexpectedly high inflation, rising interest rates by hawkish central banks, the onset of the Russia/Ukraine conflict, China's Zero COVID policy and consequent global recession concerns all weighing on investor sentiment.

Global equities, represented by the MSCI World Index, returned -12.8% in Euro terms, even with the USD strength benefitting (unhedged) European investors. Fixed income returns were similarly poor - Bloomberg Global Aggregate Euro-hedged Index return -13.3%, was the worst in many years - as government bond prices fell with the increase in interest rates and yields, and lower rated corporate bond prices fell even further on the basis of rising risk aversion.

The negative return for the year was driven by losses in both equities and fixed income investments.

Within equities, all investments detracted from performance, with the exception of the iShares S&P500 Energy Sector UCITS ETF which gained due to higher oil and gas prices. The BlackRock Continental European Flexible Fund was the biggest detractor impacted by losses in information technology investments, the sector being among the worst performing during the year. Additionally, stock selection in industrials, such as Kingspan Group (UK building materials) and DSV (Danish logistics company), had a poor year with construction and transport struggling in the higher inflation environment.

All fixed income investments delivered losses with the Bluebay Investment Grade Euro Aggregate Bond Fund being the largest detractor. Invested predominantly in European government bonds, an area that fared worse than European corporate bonds and US government bonds, it was particularly impacted by high Eurozone inflation which resulted in hawkish ECB and interest rate and bond yield rises, coupled with geopolitical risks from the Ukraine conflict.

Equity exposure was actively managed and reduced during the year (from 55% to 47%), reflecting the manager's cautious outlook on the basis of rising recession risk. A key change was the sale of the T Rowe Price US Large Cap Growth Equity Fund (6% beginning position), switching into the Xtrackers MSCI World Quality UCITS ETF for a more defensive exposure. Thematic calls through iShares & Robotics UCITS ETF and iShares Healthcare Innovation UCITS ETF were closed to further reduce exposure to high growth companies. A number of other holdings were reduced or sold, notably Wellington Global Research Equity Fund (5% holding sold), introducing an internally managed global quantitative equity portfolio (10% allocation) and the Artisan Global Value Fund (5% ending position) in its place.

Fixed income exposure was increased from 36% to 40%. A notable change was the switch from the PIMCO Euro Bond Fund into the Jupiter Dynamic Bond Fund to improve portfolio diversification, reducing interest rate exposure for a more flexible strategy across different fixed income sectors.

### New Opportunities Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-17.10%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the EUR against the USD in particular.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Infrastructure Opportunity Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-2.37%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of global listed infrastructure equities. Infrastructure companies include those that own or operate energy pipelines, utilities, airports, railways and toll roads. Investments are made through a delegate manager and funds.

Broad global equity markets had a difficult year with rising inflation and interest rate increases as a key feature. Investor risk aversion due to the Russian invasion of Ukraine and continued effects from COVID-19, particularly in China, were further headwinds. The MSCI World Index of large companies in developed markets delivered a negative return of -12.8% in Euro terms, despite around 8% US dollar strength. Infrastructure assets and listed equities fared considerably better due to their defensive and inflation-hedge credentials, with the representative FTSE Global Core Infrastructure Index return of -0.4% being considerably better. Within infrastructure, the oil and gas pipelines sector was a beneficiary of sharply higher energy prices and a notable gainer at over 20%.

Investment return for the period was relatively robust, with mixed returns from underlying investments.

The First Sentier Global Listed Infrastructure Fund was the best performer, benefitting from its allocation to and selection within energy-related stocks. A major contributor was Cheniere Energy, a US liquefied natural gas company, that gained strongly on increased demand for liquefied natural gas following the sanctions on Russian oil. The Atlas Global Infrastructure Fund was also an outperformer driven by European utility stocks, an example being Italian energy company Enel which increased its alternative energy operations.

The Wellington Enduring Assets Fund was, however, a detractor, affected by its China exposure in stocks such as China Gas and China Longyuan Power which fell on reduced demand due to continued COVID lockdowns.

Over the period, investments were increased in the Atlas and First Sentier Funds by 2-3% each to holdings of 18% and 19% respectively. The Atlas investment has a climate change risk focus, and First Sentier's fundamental research on a narrow set of monopolistic core infrastructure assets provide differentiated exposures. The Wellington fund was also increased on prospects of a recovery (from 10% to 14%). Allocation to delegate manager Morgan Stanley was reduced from 46% to 36%.

Sector allocation remained stable through the year with utilities and transport being the largest allocations at circa 55% and 30% respectively. Regional allocations also remained stable with North America and Europe being the largest allocations at circa 50% and 35%.

## Infrastructure Opportunity Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-6.40%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the EUR against the USD in particular.

---

## Convertible Strategy Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-15.33%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of convertible bonds globally. Investments are currently made through specialist funds in the asset class.

2022 was a poor year for fixed income markets with some of the largest losses in a generation. Higher inflation and rapidly raised central bank interest rates caused bond yields to rise, and prices to fall, with the conflict in Ukraine exacerbating volatility. Significant correction in the equity markets meant that convertibles, which have bond and equity-like features, found no respite. Furthermore, the asset class has a higher representation of growth companies, such as those in information technology, and these growth stocks were more affected due to their higher sensitivity to economic growth and interest rates. The representative Refinitiv Global Convertibles Index return for the year was poor at -13.6%.

Investment return for the Sub-Fund was also poor, affected particularly by losses in growth-biased investments.

Lazard Convertible Global and Aviva Global Convertibles Funds were the largest detractors due to their higher exposure to information technology companies. Schroder Global Convertible Fund's stock selection performance was negated by allocations to other growth sectors, such as consumer discretionary and health care, and UBS Convert Global Fund was poor due to higher exposure to lower-rated corporate bonds which underperformed in the risk-averse period.

Jupiter Global Convertibles and Lazard Global Convertibles Recovery Funds outperformed due to their focus on less expensive, value investments.

Portfolio activity was modest due to high levels of volatility, and was focused on reducing risk at different points. In April, the Lazard Global Convertibles Recovery Fund holding was increased a little (from 6% to 7.5%), reducing the Aviva Fund investment, switching some growth exposure to value. In October, the UBS Fund and more of the Aviva holding were reduced, introducing the SPDR Refinitiv Global Convertible Bond ETF at a small 1% allocation. The ETF provides less style-biased exposure and should enable better tactical management. Cash increased from 2% to 5%.

## Convertible Strategy Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-19.22%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, contributed negatively overall to the Sub-Fund's hedged class due to the depreciation of the EUR against the USD.

## Mediolanum Carmignac Strategic Selection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-9.92%</b>
---------------------	----------------------------	---------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

Investment management is sub-delegated to Carmignac Gestion and the Sub-Fund aims to deliver long-term capital appreciation through a global multi-asset portfolio invested across equities, bonds and short-term securities. A flexible approach is utilised to tactically manage risk exposures, with financial futures used primarily to adjust the portfolio depending on the market environment. With its Article 8 designation, the Sub-Fund also seeks to promote social and environmental characteristics.

2022 was a challenging year for global capital markets as a combination of geopolitical concerns (Ukraine war), lingering COVID-19 issues (China lockdown), higher inflation and consequent interest rate increases all led to concerns of a global recession taking hold. This impacted stock and bond prices and led to material weakness in specific areas of the market. Among the weakest were growth equities, which materially underperformed broader equity markets. Sectors such as previously leading information technology struggled in this environment with share prices correcting sharply in some cases. Government bonds endured one of their worst years on record with interest rates and bond yields rising significantly. US dollar strength was a feature and (unhedged) Euro investors benefitted.

Investment return for the period was negative but a defensive asset allocation position for much of the year helped limit losses and cushion against the worst of market volatility. The lower than typical equity weight until the fourth quarter was thus a positive. Currency management was also effective as a higher USD exposure in the first half of the year was additive to the return and acted as a defensive anchor in the portfolio. Core holding Carmignac Patrimoine (a multi-asset fund) was a further positive contributor, aided by increasing its equity weight into the year end.

Detractors included Emerging Market exposure particularly in the first quarter of the year (impacted by the Russian invasion of Ukraine) with investment funds Carmignac Emergents and Carmignac Emerging Discovery negatively affected.

Equity exposure was reduced early in the year to less than 10% in March due to concerns around the impact of the Ukraine war. It was maintained at these low levels as inflationary pressures and weaker corporate earnings developed throughout the year. The exposure was increased in the final quarter to around 30% as inflation began to taper and positive catalysts arose in Asia with moves to re-open the Chinese economy.

Bond duration was also tactically managed with lower than typical interest rate exposure in the first half of the year of around 1.5 years with some tactical movements around this particularly in the second half. Similarly, active currency management meant that the USD exposure peaked at around 50% mid-year, and was reduced to circa 20% towards the year-end with prospects for the Euro and the Yen improving in response to more hawkish rhetoric from their respective central banks.

The change to Article 8 designation of the Sub-Fund resulted in all underlying investment funds being now either Article 8 or Article 9 strategies.

### Mediolanum Invesco Balanced Risk Coupon Selection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-17.51%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

Management of the Sub-Fund moved from an advisory position to delegation with Invesco during the period. The portfolio aims to deliver periodic income and medium to long-term capital appreciation through a global multi-asset mandate invested mainly across equities, bonds and short-term securities. The Sub-Fund was classified as an Article 8 strategy during the review period and now has the added goal of promoting environmental and social characteristics. The strategy may utilize the full range of Invesco's global capabilities investing also in eligible investment funds and ETFs.

2022 was a poor year for global capital markets due to a combination of geopolitical concerns (Ukraine war), lingering COVID issues (China lockdown) and unanticipatedly high inflation and higher interest rates. These negatively impacted stock and bond prices and led to material weakness in specific areas of the market. The MSCI World Index for developed market equities returned -12.8% in Euro terms even with the benefit of the USD strength, and bond returns were one of the worst on record - the Bloomberg Global Aggregate Euro-hedged Index of developed market investment grade bonds returned -13.3%. Emerging Markets returns were even poorer in the risk-averse environment and growth equities, with higher expected growth and on more expensive valuations, corrected sharply.

Both equity and bond components suffered losses and diversification across these asset classes proved insufficient. Investment return for the period was thus poor with asset allocation being a further detractor in the early part of the year.

Fixed income allocation at around 35% in the beginning of the year was relatively low but the holding was invested in government bonds and these suffered large losses following sharper than anticipated interest rate rises by central banks as inflation rates spiked. Equity exposure was tactically higher at around 55% compared to the long-term strategic weight of 50% entering the second quarter and this was also a detractor as concerns about economic growth increased with the continued war in Ukraine.

Against the broad losses from equities and bonds, Invesco Total Return Bond Fund held up relatively well due to its lower interest rate sensitivity and Invesco Global Equity Income was also robust with its focus on relatively inexpensive shares in defensive sectors of the market.

Asset allocation was adjusted during the second half of the year, reducing risk as market volatility continued. Equities were reduced to a more cautious 45% weight by August. Later in the year in December, this level was moved back up to around 60% as inflation began to subside, particularly in the US, and economic indicators were less negative.

There was significant portfolio activity in the second half of the year around the new Article 8 classification objectives. The portfolio moved from investing predominantly in Invesco's range of investment funds and ETFs to a more optimal hybrid mix with direct security investments added at around 30%. This securities component now includes stock and bond selections from Invesco's Environmental Climate Opportunities teams. Elsewhere, traditional ETFs were switched to their ESG counterparts and fund holdings consolidated around Article 8 or 9 designated strategies.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

## Socially Responsible Collection

**Performance\*** **31/12/21 – 31/12/22** **-16.39%**

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of primarily global equities, and in some fixed income instruments from companies that promote environmental and/or social characteristics or have a sustainable investment objective. Investments are currently made through delegate managers, ETFs and UCITS investment funds. Each of these underlying strategies have specific social or environmental objectives consistent with SFDR Article 8.

2022 was a poor year for global capital markets due to a combination of geopolitical concerns (Ukraine war), lingering COVID issues (China lockdown), unanticipatedly high inflation and sharply higher interest rates. The MSCI World Index for developed market equities returned -12.8% in Euro terms even with the benefit of the USD strength. The MSCI World SRI (socially responsible investing) Index was even poorer with a -17.4% return, impacted by the larger correction in growth industries. Bond returns were one of the worst on record: the Bloomberg Global Aggregate Euro-hedged Index of developed market, investment grade bonds returned -13.3%.

Investment return for the period was thus negative, with both equity and bond component components seeing losses, and the usual diversification between these asset classes proving insufficient.

Within equities, the Mirova Euro Sustainable Equity Fund was the weakest performer (sold during the year). Stock selection results were poor with Orpea, a French nursing home operator, being a major detractor. Robeco Emerging Markets Fund was weak along with the asset class in the risk-averse environment. Fixed income investments in the Bluebay Investment Grade Euro Government Bond and Aggregate Bond Funds were impacted by the Eurozone's underperformance versus broad bond markets.

Memnon European Fund's good stock selection was a positive contributor with investments in Siemens (electricity division within the industrial conglomerate) and Rockwool (Danish mineral wools for insulation and fire protection) outperforming. The delegate equity mandate with Robeco (25% allocation) performed broadly in line with its objective.

The Memon Fund was increased during the year (8% ending weight from 4%, introduced in late-2021) and this proved beneficial. The Mirova Fund was sold mid-year (11% holding at exit) following a research review and weaker conviction. Allocations to existing investments were topped up, particularly Wellington Global Research Equity and Bluebay Investment Grade Euro Government Bond Funds after their earlier falls.

Late in the period, as the economic growth outlook appeared more uncertain amidst tighter monetary policy, cash was increased (from 1% to 5%) by reducing the iShares MSCI Europe SRI UCITS ETF.

## Socially Responsible Collection Hedged Class

**Performance\*** **31/12/21 – 31/12/22** **-18.87%**

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Financial Income Strategy

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-10.03%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The management of the Sub-Fund is currently delegated to a specialist investment manager Algebris, and it invests primarily in fixed income instruments issued by banks and financials (including senior bonds, tier 2 and additional tier 1 capital), and in equity and equity-related securities issued by entities operating in the global financial sector.

The year was challenging for fixed income markets as they struggled in an environment of rapidly raised interest rates as central banks acted to control high inflation. Developed markets investment grade bonds, represented by the Bloomberg Global Aggregate Euro-hedged Index, delivered a return of -13.3%, its worst in many years. Financials bonds performed better than the broad market as higher interest rates typically led to increased profitability for banks, and lower rated bonds rallied a little in the final quarter with some investor risk appetite returning on hopes of a pivot in central bank monetary policies. Despite the challenging market backdrop, new issuance in European financial debt was one of the most active in recent years.

Investment return was negative for the year with both the credit and equity components detracting from performance. Within credit, large allocation to Italian bank bonds from Intesa Sanpaolo and UniCredit was the top detractor due to a combination of Russian exposure, energy supply concerns and political uncertainty at the beginning of the year. Société Générale shares in the equity portion was another key detractor as it was affected by sale of its Russian bank subsidiary at a loss. On the positive front, Spanish CaixaBank and German Commerzbank were successful stock selections, both benefitting from higher interest rates, with perceived stronger franchises and better management.

The split between bonds and equities was held largely stable over the year.

Notable new issuance purchases were Citizens Financial bonds (a US bank offering attractive coupons relative to existing debt) and French bank Credit Agricole's longer-dated bonds (short-dated bonds were sold to take advantage of higher yields and premiums).

Equity exposure averaged 16% over the year, a little lower than the 18% at the beginning of the year, and is mainly in European and US bank shares, with some alternative asset managers and insurers. A new purchase was of Monte Dei Paschi di Siena shares when the Italian bank issued additional stock to restructure, raise capital levels and develop its commercial banking business.

---

## **Equilibrium**

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-18.44%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.*

The fund's investment objective is to generate capital appreciation over the medium to long term through fixed income investments, with some exposure to equities. Investments are made through delegate managers, internally managed portfolios and funds.

Fixed income returns were very poor in 2022 due to inflation concerns and subsequent interest rate increases by central banks which drove bond yields higher, and bond prices lower. The Bloomberg Global Aggregate Euro-hedged Index for broad market government and corporate bonds (developed markets, investment grade) returned -13.3% for the year, this being its worst return since inception over 20 years ago. Emerging market debt and lower-rated bond returns were even poorer suffering further from risk aversion after the Russian invasion of Ukraine and the rising risk of economic recession. Global equities were similarly poor in this environment, with the MSCI World Index returning -12.8% in Euro terms, despite benefitting from the US dollar strength.

Investment return was poor for the period, impacted particularly by losses in the internally managed fixed income securities portfolio. This suffered from its exposure to Russian bonds in the first quarter with the remainder of the year being negative for US and European bonds in sharply rising interest rate environments. Delegate manager Axa performed better in relative terms due to holding more short duration bonds, with less (negative) sensitivity to rising interest rates and yields. The equity allocation of the fund was also a detractor as global equities were 12.8% lower for the year.

Fixed income exposure was reduced from around 80% to 70% during the course of the year, by reducing allocations to existing investments and increasing cash and short-dated government bonds. The yield in short dated bonds increased over the year from below zero to a range of 2.5% to 3%, allowing for the fund to reduce risk whilst maintaining a good return from investment.

Equity exposure was also reduced over the year from 27% to 18%, reflecting a more cautious economic outlook. In late 2022, the holding was switched from index futures contracts to an internal, actively managed global quantitative equity portfolio. This newly introduced strategy seeks to add value through favouring companies with more attractive fundamental characteristics, such as stronger balance sheets and higher profit margins.

## **Equilibrium Hedged Class**

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-20.15%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to depreciation of the Euro against the USD in particular.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Mediolanum Fidelity Asian Coupon Selection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-13.34%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund is advised by Fidelity Investments and aims to deliver long-term capital appreciation through an active multi-asset portfolio approach focused on Asian markets. The strategy is implemented primarily through funds and utilises the full range of Fidelity's Asian investment capabilities.

Global equities ended lower in 2022 as major central banks aggressively raised interest rates to curb elevated inflation, with some weakening in global growth as a result. Russia's invasion of Ukraine, the resultant energy crisis in Europe and a resurgence in COVID-19 infections in several regions further weighed on markets. Given this global backdrop, Asian markets were volatile and impacted further by China's Zero COVID policy which continued to restrict movement and curb economic activity for much of 2022. Asian equities, represented by the MSCI AC Asia ex Japan Index, returned -14.4% in Euro terms, faring worse than developed markets (MSCI World Index -12.8%). Credit markets were also weak with Asian High Yield hampered by ongoing challenges in the Chinese real estate sector.

The Sub-Fund generated a negative return for the period, broadly in line with Asian capital markets. Both the strategy's fixed income and equity exposures affected performance. Asian and Chinese high yield bonds posted sharply negative returns as investors worried about poor liquidity conditions and defaults and rating downgrades for Chinese property developers. As a result, Fidelity Asian High Yield and Fidelity China High Yield strategies were particularly impacted. Within equities, the Fidelity Asian Special Situations and Fidelity Asia Pacific Dividend strategies were poor, impacted by losses in information technology companies. Fidelity China Consumer Fund and Xtracker CSI 300 Swap UCITS ETF also hampered returns as a resurgence in COVID-19 cases and economic challenges weighed on the Chinese market. There was, however, a recovery in performance particularly from these and other China-specific investments towards the end of the year as authorities unexpectedly relaxed their Zero COVID policy.

During the year, the overall equity exposure was maintained broadly at a neutral weight of circa 60%. Key portfolio changes focused mainly on reducing Asian and Chinese high yield bonds to manage risk over the year and increasing the allocation to Asian investment grade bonds to enhance defensiveness. The exposure to Asia Pacific dividend equities, which have shown a more defensive quality relative to the broad market, was increased to around 12% over the year from the 8% level. The allocation to ASEAN (South-East Asian region) equities was increased from about 4% to 7% due to improved economic activity and earnings outlooks for the region, and a general positive outlook in countries such as Thailand and Vietnam where long-term fundamentals are positive.

Towards the end of the year, allocation to the Fidelity China Consumer Fund was trimmed down following a strong rebound in the Chinese market.

### Mediolanum Fidelity Asian Coupon Selection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-17.92%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum LHA Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## European Coupon Strategy Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.65%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund's investment objective is to generate income for periodic distribution whilst also aiming for medium to long-term capital appreciation. It is structured to have a relatively balanced split between European equities and European bonds, with investments made primarily through funds. Allocations are managed tactically to adjust risk exposures across asset classes.

European equities had a poor year with the MSCI Europe Index returning -9.5% as the war in Ukraine and interest rate rises by the ECB and other central banks in response to high inflation weighed on investor sentiment. Rate-sensitive sectors, such as real estate and information technology, fared the worst losing 30-40%. The energy sector was the only positive performer, gaining around 30%, driven up by higher oil and gas prices due to increased demand after the pandemic and supply shortages resulting from the war in Ukraine. Fixed income assets also posted losses and the Bloomberg Euro Aggregate Bond Index (-17.2% return) had its worst year since its inception in 1999.

The return for the year was thus poor driven by losses in both equity and fixed income investments.

Within equities, the BlackRock Continental European Flexible Fund was the biggest detractor, impacted by losses in information technology investments. Additionally, stock selection within industrials, such as Kingspan Group (UK building materials) and DSV (Danish logistics company), had a poor year with construction and transport struggling in the higher inflation environment. While still producing a negative return, the iShares Core FTSE 100 UCITS ETF detracted the least from performance, as UK equities fared better than continental European shares.

Among fixed income investments, the Bluebay Investment Grade Euro Aggregate Fund was the largest detractor due to its exposure to European government bonds which was the worst performing segment.

The only positive contributor to performance was the position in the iShares Diversified Commodity Swap UCITS ETF, which benefitted from the broad-based commodity inflation of 2022.

Equity exposure was reduced during the year from 62% to 48% reflecting the portfolio manager's cautious outlook. A key change was the sale of the Majedie UK Focus Fund. This was replaced with the iShares Core FTSE 100 UCITS ETF to maintain UK exposure. Another sale was that of the Oddo Avenir Europe Fund, tactically switching to the more defensive iShares Edge MSCI Europe Minimum Volatility ETF.

Fixed income exposure was increased from 34% to 42%. German and French government bonds were increased to rise downside protection, given perceived rising recession risks. The investment in DWS Euro High Yield Corporates Fund was reduced, and the Blackrock Euro Corporate Bond Fund was introduced, with this move positioning the corporate bond allocation more defensively from high yield into investment grade.

## European Coupon Strategy Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.98%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD in particular.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### US Coupon Strategy Collection

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-11.89%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund's investment objective is to generate income for periodic distribution while also aiming for medium to long-term capital appreciation. It is structured to have a broadly balanced split between US equities and US fixed income. Investments are made primarily through funds, with allocations managed tactically to adjust risk exposure across asset classes.

US equities had a poor year with the S&P500 Index down over 18% in USD terms, with a return of -12.7% for Euro (unhedged) investors due to the US dollar strength. Unexpectedly high inflation, resulting interest rate increases by the US Federal Reserve and consequent economic recession concerns weighed on investor sentiment. Rate sensitive sectors, such as real estate, fared considerably worse whereas energy companies were notable gainers benefitting from higher oil and gas prices, driven up by higher demand after the pandemic and supply issues created by Russia's invasion of Ukraine. Fixed income assets also had a poor year in the increasing interest rate environment with the Bloomberg US Aggregate Bond Index returning -7.3% in Euro terms (down around 13% in USD).

The negative return for the period was thus driven by losses in both the equity and fixed income portions of the portfolio.

Within equities, the BlackRock World Technology Fund was the biggest detractor. Information technology companies typically trade at higher valuations and are hence more sensitive to interest rate increases and risk aversion, sharply underperforming the broader market. Additionally, weak stock selection was a feature with Tesla's share price correction impacting the most. The only positively contributing equity strategy was the SPDR US Dividend Aristocrats UCITS ETF, which was a gainer due to its focus on dividend paying and other defensive stocks.

In the fixed income investments, all of which suffered losses, the JP Morgan US Aggregate Bond Fund was particularly affected by the rapid US Federal Reserve interest rate increases, with consequent falls in government bond prices.

Equity exposure was reduced during the year from 58% to 48% with a subsequent increase in cash reflecting the portfolio manager's cautious outlook. A key change was the sale of the T Rowe Price US Large Cap Growth Equity Fund, introducing the iShares Edge MSCI USA Quality Factor UCITS ETF in its place. This reduced exposure to technology and growth stocks whilst increasing the allocation to more defensive companies with more stable earnings and stronger balance sheets.

Fixed income exposure was increased slightly from 37% to 39% over the course of the year. A defensive change here - moving from high yield to investment grade bonds - was carried out through reducing investments in the Nordea North American High Yield Bond and PGIM Broad Market US High Yield Bond Funds and increasing the allocation to the iShares USD Corporate Bond UCITS ETF.

### US Coupon Strategy Collection Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-19.38%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

### Dynamic International Value Opportunity

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-8.38%</b>
---------------------	----------------------------	---------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a global equity portfolio of mainly large and medium-sized companies, with a value orientation and diversification across regions and sectors. Investments are made through delegate managers, funds and other instruments.

Global equity markets had a poor year with geopolitical conflicts, spike in energy prices, high inflation and sharply higher interest rates being some of the headwinds. The MSCI World Index of developed market shares delivered a -12.8% return for the year in Euro terms, with the US dollar strength helping to limit losses. Value stocks - those on relatively cheap valuations versus growth stocks with higher valuations and expected profit growth - were relatively robust, with the MSCI World Value Index returning -0.4%, aided by energy company shares which were rare but large gainers.

Investment return for the period was negative with higher quality stocks - those with proven higher rates of return and stronger balance sheets - suffering large corrections in the risk-averse market environment.

Delegate manager AQR's return was poor due to Apple, Microsoft and Amazon whose share price corrections detracted. The Mondrian mandate had weak stock selection results - social media giant Meta Platforms (formerly Facebook) struggled with its Reality Labs (Metaverse) division recording large losses and computer games producer Ubisoft was affected by delays in the release of new games in its flagship franchises.

The Pzena mandate was the best performing strategy driven by its stock selection in energy and related sectors. Halliburton (US oil services) was a major contributor due to increased demand for its hydraulic fracturing equipment.

Portfolio development continued during the period, and the portfolio is now fully diversified versus its single delegate structure two years ago. A fourth delegate was added to the portfolio - a global value strategy - through Metropolis Capital which offers a differentiated approach, seeking combined value and quality attributes in its stock selection. The 15% allocation was funded by trimming other delegate allocations and selling the Nordea Global Stable Equity Fund (this was a 6% position offering mainly quality exposure).

The iShares Edge MSCI US Value Factor UCITS ETF was another new investment (6.5%), this targeted exposure replacing previous broad market global and European exposures through financial futures.

### Dynamic International Value Opportunity Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-11.85%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from to the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Mediolanum Innovative Thematic Opportunities

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-29.12%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Mediolanum Best Brands Innovative Thematic Opportunities Sub-Fund is a specialist global equity fund designed to get exposure to long-term growth themes by investing in securities that may benefit from structural and/or secular changes in economic and social factors, such as disruptive technologies and climate change. Investments are currently made through delegate managers and UCITS funds. Each of these underlying strategies have set specific ESG performance targets consistent with SFDR Article 8.

Global equity markets had a difficult year with the MSCI World Index returning -12.8% over the year. Value stocks, on relatively cheap valuations represented by the MSCI World Value Index, were broadly flat (-0.4% return). On the other hand, growth stocks - with superior expected profit growth that the fund emphasises - corrected significantly delivering a -24.6% return (MSCI World Growth Index), driven largely by increasing inflation and interest rate rises, with consequent reduction in growth and profit expectations and de-rating/fall in share prices for growth companies.

After 2021's gains fund return for this period was poor, given the environment for growth stocks, with losses in all funds and delegate manager portfolios.

Delegate manager Robeco's Megatrends mandate (a dominant 80% allocation for the majority of the period) saw particularly sharp falls in information technology and healthcare investments. Within IT, holdings in payments companies PayPal, Mastercard and Block were among the worst performers, with rising inflation and concerns over a global recession impacting payment volume expectations. Within healthcare, emerging growth companies in the life science and biotechnology sub-sector detracted most with gene sequencing company Illumina being the worst performer due to a near US \$4 billion impairment write-down.

The Wellington Global Innovation Fund also detracted with large falls in communication services and consumer discretionary investments. Social media firm Snap was among the worst performers as its revenue growth decelerated on reduced spending by advertisers attempting to reduce their costs in the year's higher inflation environment. E-commerce giant Amazon was another key detractor as its core online retail sales declined.

In Q3, Axiom Investors were appointed as a second delegate manager to improve portfolio diversification, with a 25% allocation funded by reducing the Robeco mandate to 55%. The Axiom Concentrated Global Growth Equity strategy deploys Axiom's investment philosophy focused on 'dynamic growth' investing, whereby the team seeks to identify positive changes, accelerations and inflection points in key operational metrics that could lead to improvements in a company's financial results or impact earnings projections over the medium-term. Some of the themes currently at play in the Axiom portfolio are 'cloud transition of enterprise IT systems' and 'penetration of biologics in therapeutic healthcare'.

From a regional perspective, the portfolio increased its US exposure a little, with a corresponding decrease in Emerging Markets, led by concerns for the latter due to the Zero-COVID lockdown policy in China. At sector level, exposure to information technology was reduced in favour of financials.

## Mediolanum Innovative Thematic Opportunities Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-33.54%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the EUR against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## European Small Cap Equity

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-29.78%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of Pan European medium and small sized companies equities and equity-related securities. Investments are made through delegate managers and funds.

2022 was a poor year for global equities. The war in Ukraine, rapid rises in energy prices and higher interest rates in response to inflation and continued effects from COVID-19 still affecting supply chains and demand, particularly in China, were all headwinds. Broad market equities fell in this poor environment (MSCI Europe Index returned -9.5%). Mid and small cap stocks, being more sensitive to economic slowdowns and investor risk aversion, fell much more with the MSCI Europe Mid Cap and Small Cap Index returns being considerably worse at -19.3% and -22.5% respectively. In this environment, growth sectors, such as consumer discretionary and information technology, were the poorest with the expensive starting valuations being a further factor, energy being the only gaining sector benefitting from surging commodity prices.

Investment return for the period was poor driven by large losses in delegate manager JP Morgan's mandate, which was the majority allocation for much of the year. Their stock-picking portfolio suffered from a number of disappointments - Kion Group (German truck manufacturer) shares fell on losses due to cost increases, Grafton Group (Irish building materials) was affected by demand concerns on fears of economic slowdown, Nemetschek (German software) shares corrected sharply during the year and consumer discretionary stocks Watches of Switzerland and Pets at Home similarly fell following higher inflation and expectations of reduced demand.

The smaller fund allocations also underperformed, affected by their growth stock selections.

Changes were made during the year to improve portfolio diversification.

Early on, the Lazard Pan-European Small Cap Fund (9% investment) was sold due to reduced research conviction and to reduce growth exposure, with the proceeds having been invested into the Xtrackers MSCI Europe Small Cap Index UCITS ETF. In the final quarter, a second delegate manager Quoniam was introduced (20% ending allocation). The portfolio with this Frankfurt-based quantitative manager emphasises stocks with favourable value, quality and sentiment characteristics, and should complement the approach in other investments. The new manager allocation was funded by selling the Xtrackers ETF and reducing JP Morgan's allocation, now 45% down from 60% in the beginning of the period.

# REPORT OF THE INVESTMENT MANAGER

---

### Global Leaders

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-21.77%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of global large-cap 'blue-chip' equities, focusing on the shares of 'quality' companies that have long-established records and good levels of recurring profitability. Investments are made through allocations to delegate managers, internally managed portfolios and through UCITS funds.

Global equity markets had a difficult year with the MSCI World Index producing a -12.8% return over the year. Value stocks on relatively cheap valuations, represented by the MSCI World Value Index, were broadly flat (-0.4% return). On the other hand, growth stocks - those with superior expected profits growth - corrected significantly with a -24.6% return (MSCI World Growth Index). Quality stocks, represented by MSCI World Quality Index, also delivered a poor return (-17.1%) as these were affected by relatively expensive starting valuations and faced profit concerns due to rapidly rising inflation.

After a strong 2021, this year's return was poor with losses suffered by all underlying investments.

Delegate manager Intermede's portfolio suffered the most with disappointing stock selection in healthcare and communication services companies. US animal health company Zoetis, a beneficiary of increased pet adoption during the onset of COVID-19, was a key detractor during this period as its share price corrected sharply. Within communication services, Walt Disney underperformed after profit guidance disappointed market expectations.

In the Walter Scott mandate, stock selection in the healthcare sector was again the largest detractor. US company Edwards Lifesciences, a global leader in medical innovation for heart disease, suffered as sales were impacted by slowing surgery volumes as US hospitals struggling with staffing challenges. Gene sequencing company Illumina was another disappointment following a near US\$4 billion impairment write-down of its GRAIL acquisition.

Within the portfolio, allocation to the in-house Global Quality portfolio was increased from 18% to 30%, funded by reductions in the Intermede and Walter Scott investments. This increased quality exposure - investments in companies with proven returns and stronger balance sheets - at the expense of growth companies with expected but more uncertain future earnings growth. Given the likely recession in economic growth, the move should prove more defensive in continued volatile and weaker markets.

From a regional perspective, the allocations remained stable over the year with the US and Europe being the largest at 65% and 20% respectively. At a sector level, information technology exposure was reduced and utilities increased.

### Global Leaders Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-26.57%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

### Chinese Road Opportunity

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-19.69%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of Chinese equities and related securities. Investments are currently made through delegate managers, funds and other instruments.

In a poor year for global Emerging Markets equities, China suffered even larger falls. The MSCI World Index of developed markets returned -12.8% (in Euro terms), and the broad MSCI Emerging Markets Index was weaker with a -14.9% return. China had its particular struggles with the economy and company profits affected by the government's Zero COVID policy and continued property sector concerns. After a substantial correction of nearly 40%, Chinese equities rallied in the fourth quarter due to relaxation of the COVID policy, with the MSCI China Index returning -16.8% for the full year. At a sector level, consistent with global patterns of growth shares underperforming others, information technology shares were the weakest falling almost 35% while energy stocks gained over 30%.

Investment return for the year was negative with the portfolio being affected by growth investments in particular.

Delegate manager Goldman Sachs' portfolio suffered losses in various consumer discretionary companies, impacted by COVID lockdown restrictions. Restaurant operators were an example, with the investment in Jiumaojiu being a key detractor, although the year-end saw a partial recovery in the shares. The Bin Yuan Greater China Fund underperformed due to stock selection in information technology and other growth companies. Sunny Optical shares fell on global demand concerns for optics such as those used in smartphones.

The delegate mandate with Schroders performed better in relative terms. Stock selection within and allocation to financials contributed. AIA Group, a Hong Kong-based insurance company, was a major positive contributor with its China business delivering sustained growth with new licenses expected across all provinces.

Continuing the process of portfolio diversification, allocation to Goldman Sachs was increased (from 20% to 30%) during the fourth quarter, with maintained conviction in the strategy and following its earlier losses. The increase was funded by reducing the Schroders mandate from 60% to 50%.

Other adjustments included increasing the investment in Bin Yuan Greater China Fund from 5% to 8% during the year. The strategy focuses on identifying socially and environmentally aware companies in China and should be a long-term winner. Holding in the KraneShares CSI China Internet ETF (starting 4% position) was reduced in stages and sold, and the Hang Seng China Enterprises Index futures position of 2% was also removed early in the period.

---

## Emerging Markets Fixed Income

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-14.73%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund is structured to have strategic exposure to emerging market debt (EMD) securities. Investments are made through a delegate manager Neuberger Berman, along with investments managed by MIFL and via funds and exchange traded funds (ETFs).

It was a challenging year for capital markets and especially so for the emerging markets fixed income asset class. Interest rate increases by central banks in order to control inflation caused general weakness in financial assets. Government bond prices suffered the largest losses in a generation as, for example, US Government 10-year bond yields rose sharply by around 250bps to near 4% by year-end.

For emerging market debt, a further major negative impact arose from the Russian invasion of Ukraine. The losses in Russian, Ukrainian and Belarusian bonds were severe with these being ultimately marked down to zero and excluded from EMD indices. Hard currency (USD) bonds corrected more than emerging markets due to increased risk aversion and USD strength, with yields rising from around 4% to over 7%. Local currency bonds were impacted less, partly due to already higher interest rates in emerging economies.

The negative return for the period was also affected by poor outcomes in underlying investments.

The Barings Emerging Markets Sovereign Debt Fund was severely affected by its exposures to Russia, Belarus, Ukraine as well as Serbia, with bonds from these nations contributing to significant losses for the fund, with a partial recovery in the second half of the year. Delegate manager Neuberger Berman's relatively low exposure to Russia and Belarus was beneficial but investments in high yield sovereigns, such as Sri Lanka, Ecuador, Ghana and Argentina, impacted returns later on in the period.

A positive for the performance was the relatively robust return from the new MIFL-managed portfolio, which avoided the initial fall-out from the Russia/Ukraine conflict and which added timely local currency debt exposure.

The introduction of the MIFL-managed EMD portfolio was a major change. Initially introduced in May 2022 at a 19% weight and increased to 30% by year-end, this change was funded by reducing the Neuberger Berman allocation (from 80% to 55%) and the Baring Fund (from 18% to 14%). This change, made to improve diversification and reduce risk, proved beneficial.

Within the Neuberger Berman and Baring investments, Russian bonds were sold. The former increased their Euro-denominated holdings given the yield pick-up versus USD debt, and the latter reduced Brazil exposure following the elections at year-end.

## Emerging Markets Fixed Income Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-22.24%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Global Demographic Opportunities

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-19.56%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of global equities and equity-related securities prices of which are likely to be driven by demographic changes such as population growth, aging populations and emerging middle classes. Investments are made through delegate managers and UCITS funds.

Global equity markets had a difficult year with the MSCI World Index producing a -12.8% return in Euro terms despite the US dollar strength aiding returns for (unhedged) European investors. High inflation, higher interest rates and geo-political tensions were all headwinds. In this poor environment, value stocks on relatively cheap multiples to profits, represented by the MSCI World Value Index, were broadly flat (-0.4% return). On the other hand, growth stocks - those with superior expected profits growth and typically on more expensive valuations - fared considerably worse correcting significantly in many cases, with a -24.6% return for the MSCI World Growth Index.

Given the Sub-Fund's investment objective and policy, the portfolio has a greater number of growth stocks, linked to population growth and emerging markets. Investment return for the period was thus poor and affected by sharp losses in such investments.

Delegate manager Schroders had the dominant allocation (80%) for much of the year, with losses across growth investments in biotechnology and life science companies. US company Edwards Lifesciences, a global leader in medical innovation for heart disease, suffered as sales were impacted by slowing surgery volumes as US hospitals struggled with staffing challenges. Thermo Fisher Scientific (US medical equipment supplier) was another major detractor on concerns about reduced demand for bio-processing solutions needed for COVID vaccines as orders declined during the year.

The Fidelity Global Demographics Fund was also a detractor, impacted particularly by its Chinese emerging middle class related investments. Midea Group (electrical appliances manufacturer) shares were poor due to a combination of continued COVID lockdowns reducing domestic sales and the slowdown in construction projects curbing demand for new air-conditioning units.

Portfolio composition was altered and the diversification was improved in the final quarter. The Fidelity Global Demographics strategy allocation was increased to 34%, through a new 20% delegate mandate alongside the retained 14% holding in the UCITS fund. Allocation to delegate manager Schroders was reduced from 80% to 58% with cash increased a little, from 1% to 3%.

From a regional perspective, US exposure decreased and Europe increased through the year. At sector level, allocations remained stable with health care and consumer discretionary being the largest at around 20% each.

## Global Demographic Opportunities Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-23.92%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from to the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

### Global Impact

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-24.38%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Class.

The Global Impact Sub-Fund invests in a diversified portfolio of global equities and equity-related securities of companies which aim to create a positive and measurable environmental and/or social impact. Investments are made through allocations to SFDR Article 9 delegate managers and UCITS funds. Each of the underlying strategies have set specific impact engagement performance targets. The portfolio manager is satisfied that these are being met through engagement and ongoing reporting from the relevant investment managers. Targets are also monitored with reference to third party providers' ratings, scores and indicators.

Global equity markets had a difficult year with the MSCI World Index producing a -12.8% return over the year. Growth stocks - those with superior expected profits growth, that the fund has a bias towards - fared significantly worse delivering a -24.6% return (MSCI World Growth sub-index), affected by higher inflation and interest rate rises which led to consequent reduction in growth and profit expectations and de-rating/fall in share prices. From a regional perspective, Asia was the worst performing region led by China which had strict COVID lockdowns in place for much of the year. Energy was the strongest performing sector, up by 55.6% (MSCI World Energy Index) over the year, driven by oil and gas price increases mostly due to the Russian invasion of Ukraine. Consumer discretionary and information technology, the growth sectors of the market, were among the worst performers with the MSCI indices for these sectors down 29.0% and 26.3% respectively.

After 2021's gains, fund return for this period was poor, given the environment for growth stocks, with losses in all delegate manager portfolios and funds.

Portfolio with Baillie Gifford, the largest allocation for much of the year, suffered from sharp corrections in some of the high growth investments in health care and consumer discretionary companies. A key investment M3 (a US medical services company) was affected by a slowdown in growth due to reduced spending by customers concerned about a potential economic recession. Within consumer discretionary sector, US exercise equipment company Peloton was another major detractor with slowing revenue growth as excitement for its products waned post COVID.

Newer delegate manager Blackrock's portfolio fared somewhat better but was negatively impacted by specific materials and renewable energy investments. US metal packaging company Ball Corporation was among the poorest performers, suffering from reduced demand in the higher inflation environment, exacerbated by the closure of the firm's plant in Russia following the invasion of Ukraine. Within renewable energy, Danish off-shore wind turbine company Orsted was another detractor, affected by delays in the construction of one of its largest sites 'Hornsea 2'.

The diversification and improvement of the portfolio continued, and the previously dominant delegate Baillie Gifford's allocation was reduced to 38% (from around 60% in the beginning of the year). Exposure to the Blackrock Global Impact mandate, which was introduced in late-2021, was increased. Another significant change took place in Q4 when the Federated Hermes SDG Engagement Equity Fund was sold following its re-designation from an SFDR Article 9 fund to an SFDR Article 8 fund. The proceeds from the sale (around 18% of the fund) were mostly allocated to the Blackrock mandate increasing its exposure to 55%, now being the majority capital allocation.

From a regional perspective, allocations remained stable over the year with the US and Europe being the largest at 55% and 30% respectively. At the sector level, consumer discretionary was reduced while utilities, and renewable energy in particular, increased through the year.

### Global Impact Hedged Class

<b>Performance*</b>	<b>31/12/21 – 31/12/22</b>	<b>-27.67%</b>
---------------------	----------------------------	----------------

\* Performance is stated in EUR, net of management fees, performance fees and costs, and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund's hedged class performance due to the depreciation of the Euro against the USD.

# **REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)**

---

## **Circular Economy Opportunities**

<b>Performance*</b>	<b>07/01/22 – 31/12/22</b>	<b>-14.36%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Class.*

Launched during the review period, the Sub-Fund invests in a diversified portfolio of equity and equity-related securities of companies which, in the manager’s opinion, contribute to positive social and/or environmental change by aiding in the transition to or advancement of ‘circular economy’. Investments are made through delegate managers and funds, with each having set specific social or environmental performance targets consistent with SFDR Article 9.

Global equity markets had a poor year with rising inflation and interest rate increases being a key feature. Investors risk aversion due to the Russian invasion of Ukraine and continued COVID-19 effects particularly in China were further headwinds. The broad MSCI World Index of developed market companies returned -12.8% in Euro terms for the year, while the MSCI World Socially Responsible Investing Index fared worse with a return of -17.4% for the full year. This poorer return was due to the socially responsible index having exposures to information technology and companies that have growth characteristics which sold off more than the broad index.

Initial investment return was thus poor from the specialist strategy, affected by sharp corrections in growth shares.

Delegate manager Pictet’s semiconductor investments, such as Infineon Technologies (Germany) and Applied Materials (US), were among the worst performers affected further by supply chain disruptions. The Blackrock Circular Economy Fund was a further detractor, with US sustainable packaging companies Ball Corporation and Ranpak reducing their profit outlooks for the year.

Portfolio with the second delegate manager KBI Global Investors held up relatively well, partly due to its more balanced sector exposure, and helped limit losses.

Portfolio structure at launch was largely maintained over the Sub-Fund’s first year. The two bespoke delegate mandates remained at 40% allocation each with the Blackrock fund being 19% initially, providing diversified exposure through specialist investment teams.

KBI have a long track record in responsible investment strategies and have been awarded the highest A+ UNPRI rating. Pictet are leaders and pioneers in thematic investing with environmental strategies for more than 20 years. The Blackrock fund is among the most well established and largest in its specialist area.

Towards the end of the year, with economic recessions looking more likely, investment to the Blackrock fund was reduced a little, raising cash in the portfolio from 1% to 4%.

## **Circular Economy Opportunities Hedged Class**

<b>Performance*</b>	<b>07/01/22 – 31/12/22</b>	<b>-17.94%</b>
---------------------	----------------------------	----------------

*\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund’s hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Energy Transition

<b>Performance*</b>	<b>08/07/22 – 31/12/22</b>	<b>2.46%</b>
---------------------	----------------------------	--------------

\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Class.

The Sub-Fund invests in a diversified portfolio of equity and equity-related securities, in ‘sustainable investments’ which in the manager’s opinion contribute to the transition to clean energy. Investments are made through delegate managers and their specialist teams, each of which has set specific environmental or social performance targets consistent with SFDR Article 9.

Global equity markets had a poor year with rising inflation and interest rate increases as a key feature. Investor risk aversion due to the Russian invasion of Ukraine and continued effects from COVID-19 particularly in China were further headwinds. The broad MSCI World Index of developed market companies returned -12.8% in Euro terms for the year. Clean energy stocks were among the few gainers during the year benefitting from sharply higher oil and gas prices and more urgent government energy and environmental initiatives. The MSCI Global Alternative Energy Index fared considerably better with a return of -0.4% for the full year.

Return for the short period since inception was positive, with all delegate portfolios benefitting from market drivers. The Inflation Reduction Act in the US was of major benefit as one of its goals is promoting clean energy.

Delegate manager Schroders delivered strong returns from successful stock selection, US solar panel manufacturer First Solar being a major gainer of the US IRA. Delegate manager KBI was similarly positive, with Samsung SDI (lithium-ion battery specialist) being a top contributor. Gains in the Pictet mandate were more muted, affected by its higher allocation to information technology and the poor year for growth stocks in that sector.

The portfolio structure at July’s launch was largely maintained over the Sub-Fund’s first year - allocations to delegate managers Schroders and KBI were 40% each, with Pictet at 19% providing diversified exposure through specialist investment teams.

The Schroders mandate focuses on renewable energy production, energy storage and electric vehicles, with a preference for mid-sized and smaller companies. KBI invests across the full range of renewable energy sources including wind, solar, biomass and hydro as well as investing in energy-efficiency technologies, often favouring medium-sized companies. Pictet’s theme-driven investing around the net zero carbon goal includes e-mobility and green buildings, tilting the portfolio towards more established, larger companies.

Towards the end of the year, with economic recession looking more likely, each allocation was reduced by 1%, raising cash in the portfolio from 1% to 4% and adopting a mildly cautious stance.

## Energy Transition Hedged Class

<b>Performance*</b>	<b>08/07/22 – 31/12/22</b>	<b>2.06%</b>
---------------------	----------------------------	--------------

\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Hedged Class.

Currency hedging, implemented using currency forward contracts, detracted from the Sub-Fund’s hedged class performance due to the depreciation of the Euro against the USD.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

---

## Multi Asset ESG Selection

**Performance\*** **08/07/22 – 31/12/22** **-7.22%**

*\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Class.*

The Sub-Fund was launched during the period with an objective to achieve capital appreciation over a long-term investment horizon through a relatively balanced portfolio of global equities and fixed income. Investments are made primarily through a delegate manager (Schroders Investment Management) funds with selected investments promoting environmental and social characteristics consistent with SFDR Article 8. Investment exposures are tactically managed.

Global equities had a poor 2022 in a period marked with unexpectedly high inflation, subsequent sharp interest rate increases by central banks and concerns around global economic recession. The broad MSCI World Index of developed market equities delivered a return of -12.8% for the full year, even with the benefit of the US dollar strength for Euro-denominated investors. Fixed income returns were also negative, and the worst in decades. The Bloomberg Global Aggregate Euro-hedged Index, a broad index for developed market government and corporate bonds, returned -13.3%. Riskier assets, such as those in Emerging Markets, lower-rated corporate bonds, and growth shares on expensive starting valuations, fared considerably worse.

The Sub-Fund was launched in July 2022 during a volatile period for markets. Investment return for the partial period was negative, driven by broad market losses and, primarily, by the correction in government bond prices.

The Schroder Sustainable US Dollar Short Duration Bond Fund was a major detractor. Interest rate and bond yield rises (bond prices fell) were most severe in the US, and the investment incurred losses despite its relatively low sensitivity. This was compounded by US dollar weakness against the Euro in the final months, giving back some of its exceptional strength of earlier.

Equity strategies contributed to returns broadly in line with markets over the partial period but with equity futures overlay strategies detracting modestly. These derivatives positions included short futures positions on the MSCI World and the German DAX indices, held for protection against further market falls.

Over the partial period, equity exposure was actively managed in the volatile market environment. The 55% level at launch was shortly after reduced to around 40% for protection which was carried out through futures contracts on the DAX, MSCI World and Russell 2000 indices. These short derivatives positions were closed later in the year as equities offered more attractive valuations following earlier corrections, particularly with the prospect of inflation having peaked, and the equity exposure was increased to around 45%.

In the underlying investments, a small specialist thematic holding in L&G Gold Mining UCITS ETF and the Schroder Digital Infrastructure, Global Disruption and Sustainable Multi-Factor Equity Funds were sold, introducing a core, global equity Schroder QEP (quantitative equity products) Global ESG Fund (8.5% holding at year-end). Emerging market debt offered much more attractive yields, and was invested in through the Schroder Emerging Markets Local Currency Bond Fund, which was another addition (4% investment).

## Multi Asset ESG Selection Hedged Class

**Performance\*** **08/07/22 – 31/12/22** **-5.78%**

*\* Performance is stated in EUR, net of management fees, performance fees and costs and is based on the NAV of the Mediolanum L Hedged Class.*

Currency hedging, implemented using currency forward contracts, added from the Sub-Fund's hedged class performance due to the appreciation of the Euro against the USD since launch.

# REPORT OF THE INVESTMENT MANAGER

## FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

### What to expect in 2023?

The two main areas of focus for investors in 2023 will be 1) The rate at which inflation decelerates, and 2) To what extent will the global economy slow down as a result of higher interest rates and inflation.

Of course, as the last few years have demonstrated, we should also expect the unexpected. The war in Ukraine continues to threaten the geopolitical backdrop, and there is always the chance that any escalation could once again pose a threat to energy supply and lead to another spike in commodity prices, as we saw last year.

### Inflation is expected to fall

In terms of inflation, the good news is that as we look ahead to next year, inflation has peaked and is set to fall throughout the year. Central banks will remain vigilant, but rates are expected to peak this year.

The reality is that slowing economic growth is exactly what central banks have been trying to achieve through tighter monetary policy. Inflation is expected to fall slowly as the year progresses, which will be welcome, but unemployment is set to rise as companies adjust to lower growth and higher financing costs. Consumer confidence remains weak as central banks remain vigilant.

In the US, consumer price inflation has turned in recent months. It reached a peak in June at 9.1% but has since fallen to 7.1%. Europe has been hit harder with inflation at 10.7%, but even here the expectation is that inflation will fall, with economists forecasting inflation of 4% in the US, and about 6% in Europe by the end of 2023.

### Growth to remain scarce

The general consensus among economists is that the global economy will enter a 'mild recession' in early 2023. Understandably, the combination of high inflation and rising interest rates presents major challenges to growth and economists are forecasting a just 2.2% global GDP growth for the year. Typically, global GDP growth below 3% is associated with a global recession due to the structurally higher growth rates in emerging economies.

The developed world will largely stagnate in both Europe and the US, with the former expected to be impacted more due to the energy crisis emanating from the Ukraine war and the reliance on Russian oil and gas, particularly in large member states like Germany and Italy. At a regional level US economic growth is expected to be just 0.3%, while the Eurozone at 0.1% and the UK at 1.0% are particularly vulnerable to economic instability due to their reliance on Russian oil and gas. Markets have therefore priced in a higher probability of a hard landing in Europe and the UK than in the US.

# **REPORT OF THE INVESTMENT MANAGER**

## **FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)**

---

### **Central Banks will remain vigilant about inflation**

The slowdown in the economy is exactly what central banks are trying to engineer through tighter monetary policy and any slowdown will ultimately lead to lower inflation in prices which is the end goal. This in turn should lead to a more stable interest rate environment in the second half of 2023 and open up the possibility for a recovery and rising markets.

The pace at which inflation decelerates will ultimately determine the rate at which central banks will have to increase interest rates further, even after the significant tightening already taken place. Having been woefully behind inflation due to their 'transitory' belief, central banks (like the ECB and the Federal Reserve) have been raising rates aggressively to cool down inflation.

We are already beginning to see the impact for example in house prices, which have begun to fall because of the higher interest rates and mortgage rates. In many parts of the world consumer confidence has plummeted because of high inflation and falling asset prices. The hope is that central banks will begin to ease up on the rate hikes in the coming months if inflation falls.

### **Asset Class Outlook**

#### ***Equities – year of two halves***

Equity investors will face the challenge of navigating several turning points for inflation, interest rates, earnings, and economic growth in 2023. Equity markets have been pricing in this economic outlook for most of 2022 and are currently in the process of adjusting to the more challenging economic backdrop ahead.

We have already seen sizable declines of more than 20% in many of the world's major stock markets at their lowest point. The Nasdaq has been hit particularly hard due to the collapse of the technology sector and was down over 30% in the year. We have seen large selloffs in the sector, with large losses in the mega cap space with Microsoft, Meta, Google (Alphabet) all faring significantly worse.

#### ***Equities provide better value but are not discounting a recession***

We have seen a significant lowering in valuations across the world markets. This is particularly true outside the US stock market. In Europe, UK and Emerging Markets stocks are trading at valuation levels typically associated with a mild recession, which suggests that a lot of the bad news is already reflected in the price. In the US, while valuations have fallen, they are not particularly cheap which is the main area of concern.

However, though equity valuations are cheaper today, they are not fully discounting a recession, with global valuations in line with long term historical averages. We anticipate that equity markets will continue to experience volatility in the early part of 2023 as companies cut earnings and the full impact of an economic slowdown becomes more apparent.

As is typical after that scenario, we can expect a better outlook to unfold as the global economy stabilises, inflation becomes lower, and central banks stop raising rates. Lower equity valuations could lead to a recovery in the second half of 2023.

### **Earnings to fall 10-15% but not collapse**

The main concern for markets will be how much earnings will fall based on the 'mild' recessionary scenario expected by economists. We have already seen technology companies lay off employees as they adjust to the lower growth environment and the impact on their share prices. Our estimates indicate that a 10-15% fall in earnings should be expected, on average, in the first half of 2023.

Against this backdrop, we expect the volatility we have seen in 2022 to remain for the first part of 2023. Markets will remain volatile while earnings forecasts are reduced in the first and second quarter of next year, but once we get through that, and if economic growth has not fallen off a cliff, the combination of more realistic earnings growth, stabilising economy and inflation and lower valuations could lead to a sizeable equity market rally in the second half of 2023 in our opinion.

#### ***Fixed Income -attractive yields now available***

Bond investors will be glad to see the back of 2022, but higher yields are now attracting investors back into the asset class. The key issue facing bond markets in recent years was the volume of negative and low yielding bonds. Today that picture has changed.

# REPORT OF THE INVESTMENT MANAGER FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)

## *Negative yielding debt has been eliminated*

Source: MIFL, Bloomberg

The primary reason of course is the level at which central banks have had to raise interest rates to control accelerating inflation. Looking ahead to 2023, slowing growth and falling inflation should ease the pressure on fixed income markets, at least in the safer parts of the market, such as developed sovereign bonds.

Credit, like equity, will have to deal with the slowing growth environment and while we do not see a major default cycle due to better capitalised companies, we think credit and high yield bonds in particular could remain under pressure against that backdrop. We retain a preference for longer duration sovereign bonds.

Overall, however, the general backdrop for bond investors is much better than it has been at any time in the last ten years as the adjustment in bond prices have pushed yields to levels that now offer investors an attractive level of yield - often in excess of 3% in developed sovereign bonds and as much as 8% in emerging market bonds.

Although inflation is expected to be more moderate in 2023, real yields (bond yields adjusted for inflation) will likely remain negative. However, the investment opportunity is still interesting over the long term.

## *Bonds are offering attractive yields*

Source: MIFL, Bloomberg

# **PROFILE OF THE DELEGATE INVESTMENT MANAGERS FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022**

---

## **Aegon USA Investment Management, LLC**

Aegon USA Investment Management is part of Aegon Asset Management's network of active global investors whose 390 investment professionals manage and advise on assets of USD 299 billion, as of 30 September 2022. The asset management entities are wholly or partially owned subsidiaries of Aegon N.V., one of the world's leading financial services businesses. The global client base is made up of pension plans, public funds, insurance companies, banks, wealth managers, family offices and foundations. The group's nearly 1,200 employees in total work across Europe, the Americas and Asia.

## **Algebris (UK) Limited**

Founded in 2006, Algebris is an independent, global asset management company offering long-only and alternative investment strategies. It began by investing in the global financial sector, covering the capital structure of financial institutions across both equity and credit. Algebris has since broadened its expertise to global credit, Italian equity, and private strategies in non-performing loans, predominantly secured by high-end, residential real estate assets in Italy. Algebris maintains offices in London, Milan, Rome, Dublin, Luxembourg, Boston, Singapore and Tokyo. The firm's total assets under management were over EUR 17 billion as of December 2022.

## **AQR Capital Management LLC**

AQR is a pioneer in quantitative investing through applied research. As of 31 December 2022, it had around USD 95 billion in assets under management, and over 550 employees. AQR is based in Greenwich, Connecticut, and has offices in seven locations globally. The firm takes a systematic, research-driven approach, applying quantitative tools to process fundamental information and to manage risk. Clients include institutional investors as well as private banks and financial advisors. Research produced by AQR's investment teams is internationally recognised and has resulted in numerous papers being published in a variety of professional journals.

## **AXA Investment Managers UK Limited**

AXA Investment Managers UK ('AXA') is part of AXA Investment Managers, which is in turn is part of the AXA Group. As of 30 September 2022, the company managed around EUR 817 billion in assets and employed 815 investment professionals in 18 investment centres. AXA is an active, responsible long-term investor applying a conviction-based approach to uncover what it believes to be the best global investment opportunities across equities, fixed income, multi-asset and alternative asset classes.

## **Axiom Investors**

Axiom Investors ('Axiom') was founded on September 1998 as an independent investment advisor by Andrew Jacobson. From its origins as an investment advisor specialising in international equity portfolios, Axiom has evolved into a global investment management firm. It currently manages international, global, small cap, and emerging market equities on behalf of their approximately 400 global institutional clients. Assets under management were over USD 16 billion at the end of 2022.

## **Baillie Gifford Investment Management (Europe) Limited**

Baillie Gifford was founded in Edinburgh in 1908 and is one of the UK's largest independent investment management firms. Being wholly owned by its partners - the partnership structure being unusual among large investment companies - helps to attract and retain talented staff and underpins the organisation's stability and culture. The structure also aids in the firm's long-term investment horizon and growth focus. In addition to 51 working partners, the firm has 177 investment professionals and 1800 staff in total with most employees based in the Edinburgh headquarters, with additional ten offices globally. Baillie Gifford manages and advises on approximately EUR 255 billion as of 31 December 2022 in equity, fixed income and multi-asset portfolios for a global client base.

## **BlackRock Financial Management, Inc.**

BlackRock is an independent investment management firm, headquartered in New York City and listed on the New York Stock Exchange since 1999. Founded in 1988 as a fixed income institutional manager, it is today the largest asset manager in the world. As of 30 September 2022, the firm had almost USD 8 trillion in assets under management and almost 20,000 employees in 77 locations worldwide. BlackRock provides diversified investment management services to institutional clients and to intermediary and individual investors in equity, fixed income, multi-asset, alternative and cash products.

# **PROFILE OF THE DELEGATE INVESTMENT MANAGERS FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)**

---

## **Brigade Capital Management, LP**

Brigade is a global investment management firm specialising in credit investment strategies. Founded in 2006, it is headquartered in New York City with affiliated offices in London and Colorado. The firm employs a multi-strategy, multi-asset investment approach focusing on companies with leveraged balance sheets. The firm follows a fundamentally driven process and manages investment strategies across the credit spectrum, including long/short credit, opportunistic credit, structured credit, distressed debt and high yield investment bonds. It manages around USD 26 billion in assets, as of 30 September 2022.

## **Carmignac Gestion Luxembourg**

Carmignac is an independent asset management firm established in 1989 in Paris. From its French investment advice business, the firm has developed investment and distribution capabilities in 16 countries worldwide while retaining its entrepreneurial culture. It has over 300 employees, 57 of which are fund managers and analysts. As of 30 November 2022, it managed over EUR 34 billion in assets. Its investment teams implement a conviction-based approach across a limited number of strategies.

## **DWS Group**

Operating as the DWS Group since 2018, and tracing its roots back to 1956, the majority stake in this global asset management firm is owned by Germany's Deutsche Bank. Assets managed are over EUR 830 billion as of 31 December 2022 across active, passive and alternative strategies. The firm employs over 3,900 people worldwide, with over 900 investment professionals conducting proprietary research and investment management. The research staff are arranged across regional groups and brought together under a consistent global CIO view.

## **FIL (Luxembourg) S.A.**

FIL (Luxembourg) S.A is part of Fidelity International which was formed in 1969 to serve non-US markets within the Fidelity group. The entity was spun-off from the US organisation in 1980, and became independent, being privately owned by management and the Johnson family. FIL operates globally in 25 countries. With over 7,000 employees and more than 400 investment professionals, FIL managed over USD 668 billion in assets as of 30 September 2022 for a wide range of institutional, professional and individual clients. The firm's investment approach is based on active bottom-up stock research, leveraging its large, global research capabilities with the aim of providing exclusive analysis to its portfolio managers.

## **Goldman Sachs Asset Management International**

Goldman Sachs Asset Management ('GSAM') is the asset management arm of the Goldman Sachs Group. As a leading investor, it supervised more than USD 2 trillion in assets as of 30 September 2022, having provided investment advisory and discretionary services since 1988. With more than 31 offices worldwide, GSAM manages a range of equity, fixed income, private equity and hedge fund strategies on behalf of institutions, advisors and individual investors worldwide, with over 750 investment professionals and over 2,000 total employees.

## **Intermede Investment Partners Limited**

Founded in London in 2014, Intermede is a global equity boutique with a fundamental investment approach. The investment team focuses on long-term positions in high-quality growth businesses. Valuation discipline is applied to ensure these businesses are acquired at prices that reflect significant discounts to the investment team's estimates of intrinsic value. Portfolios are relatively concentrated, with low turnover and average holding period of five years. With offices in London, San Francisco and New York, the business is controlled, and majority owned by its employees. Assets under management stood at around USD 10 billion as of 31 December 2022.

## **Invesco Asset Management Deutschland GmbH**

Invesco is one of the world's leading independent investment firms. As of 30 September 2022, it had over 8,000 employees based in 25 countries managing more than USD 1.3 trillion in assets. The firm offers a wide variety of strategies within equity, fixed income, asset allocation and alternative asset classes. These strategies are managed across various worldwide investment centres, each of which focuses on distinct asset classes, investment styles and regional expertise, adhering to clearly defined investment philosophies.

# **PROFILE OF THE DELEGATE INVESTMENT MANAGERS FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)**

---

## **JP Morgan Asset Management (UK) Limited**

J.P. Morgan Asset Management ('JPMAM') is a global leader in investment management. The firm had around USD 2.4 trillion of assets under management as of 30 September 2022. With more than 150 years of investment experience and over 1,000 investment professionals across its global network, JPMAM's clients include institutions, retail investors and high net worth individuals in every major market throughout the world. JPMAM offers global investment management products within equities, fixed income, real estate, hedge funds, private equity and liquidity strategies. It has offices in more than 20 countries worldwide, including investment centres in London, Hong Kong, Tokyo, New York and Columbus, Ohio.

## **KBI Global Investors**

Established in 1980 as the investment management division of Ulster Bank, KBI Global Investors ('KBI') has been managing assets for institutional clients for over 40 years. Since 2016, KBI has been owned by Amundi Asset Management, one of the largest European and global asset managers. The firm is headquartered in Dublin, Ireland, with a sales office in Boston. KBI has a global client base with mandates in the UK, Europe, North America and Asia, and serves public and corporate pension schemes, endowments, wealth managers, private banks and intermediaries. As of the end of 2022, assets under management were around EUR 15 billion.

## **Metropolis Capital Ltd**

Metropolis Capital Ltd ('Metropolis') offers investors a single global equity investment strategy, either through its pooled vehicles or via segregated mandates. The focus is on developed markets, taking a long-term and high conviction approach with a concentrated portfolio of 15-25 investments. The strategy is benchmark-agnostic and targets annual real returns of inflation plus 10% over a 5-year time frame. Located in Amersham, UK, the company is privately owned and employs a staff of 13 of which 6 are investment team members with an average experience of over 20 years. Assets under management were near USD 3 billion as at 30 September 2022.

## **Mondrian Investment Partners**

Mondrian is an independent, employee-owned, global value-oriented manager with over 30 years of experience managing a range of equity and fixed income products for a variety of clients around the world. As of 31 December 2022, Mondrian managed and advised on EUR 44 billion in assets. The company employs 59 investment professionals with average tenures of 14 years with the firm and 19 years in the industry. Mondrian's principal office is in London.

## **Morgan Stanley Investment Management Limited**

Morgan Stanley Investment Management ('MSIM') is part of the Morgan Stanley Group, a US multinational investment bank and financial services company. MSIM was established in 1975 and is a leading global asset manager, focusing on high conviction active management. As of 30 September 2022, it had over 1,300 investment professionals in 25 countries managing over USD 1.3 trillion in assets. The firm provides investment and risk-management solutions to individual investors and institutions including corporations, pension plans, sovereign wealth funds, governments and central banks.

## **Neuberger Berman Europe Limited**

Founded in 1939, Neuberger Berman is a private, independent, employee-owned investment manager. With offices in 39 cities worldwide, it manages a range of equity, fixed income, private equity and alternative strategies on behalf of institutions, advisors and individual investors globally. Employing over 700 investment professionals and more than 2,600 employees in total, the firm managed USD 408 billion of assets as of 30 September 2022.

## **PGIM Limited**

PGIM Limited ('PGIM') is the asset management arm of American life insurance company Prudential Financial. It is among the world's largest asset managers with over USD 1.2 trillion in assets as of 30 September 2022. The firm offers a wide range of actively managed solutions across a broad spectrum of asset classes and investment styles. Headquartered in Newark, New Jersey, it employs 1,400 investment professionals in 44 offices across 18 countries. Specialist investment teams include: PGIM Fixed Income (public fixed income), PGIM Real Estate (real estate equity, debt and real estate securities), Jennison Associates (fundamental equity), and PGIM Quantitative Solutions (systematic equities and liquid alternatives).

# **PROFILE OF THE DELEGATE INVESTMENT MANAGERS FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2022 (continued)**

---

## **Pictet Asset Management**

Pictet Asset Management is an independent asset manager, overseeing over EUR 213 billion as of 30 September 2022, across a range of equity, fixed income, alternative and multi-asset products through segregated accounts and investment funds. Clients include pension funds, financial institutions, sovereign wealth funds and intermediaries and individuals. Founded and headquartered in Geneva, Switzerland, Pictet employs more than 1000 employees in 18 offices, including over 400 investment professionals.

## **Pzena Investment Management**

Pzena Investment Management, LLC ('Pzena') is an institutional investment manager based in New York City with a strict focus on long-term traditional value investing. The firm was founded in 1995. As of 30 September 2022, the firm managed approximately USD 42 billion in assets invested across the market capitalization spectrum, in both domestic and global equities. The firm has over 140 employees, primarily based in New York, with other offices in Melbourne, London and Dublin.

## **Quoniam Asset Management**

Quoniam aims to add value for institutional clients worldwide through innovation and a science-driven, sustainable investment approach across the equity, fixed income and multi-asset asset classes. Over 50,000 financial instruments are covered with proprietary methods for quantitative analysis and interpretation of high quality data examining return and risk factors. Diversified portfolios are created with active positions across sectors, countries and factors. Quoniam was founded in 1999, and has assets under management of over EUR 21 billion as of 30 September 2022.

## **Robeco Institutional Asset Management B.V**

Tracing its roots back to 1929, Robeco Institutional Asset Management B.V. ('Robeco') is headquartered in Rotterdam, the Netherlands. Now fully owned by ORIX Corporation, the Japanese business conglomerate, it offers an extensive range of active investments to institutional and private investors worldwide. As of 30 September 2022, Robeco had around EUR 173 billion in assets under management, including EUR 164 billion in ESG-integrated strategies. The company has offices in 13 countries worldwide and over 1000 employees.

## **Redwheel Asset Management LLP**

Previously known as RWC Partners, the firm rebranded to Redwheel Asset management LLP ('Redwheel') in 2022. Founded in 2000, it specialises in developed and emerging market equities, convertible bonds and income solutions managed by experienced, specialist teams. With investment offices in London, Miami and Singapore and over 170 employees in total, the over 60 investment professionals are organised into seven independent teams. Total assets under management were almost USD 20 billion as of 31 December 2022.

## **Schroders Investment Management Limited**

With roots in 1804, Schroders is a global investment manager with its headquarters in London. As of 30 September 2022, the firm managed over EUR 857 billion in assets for institutions, intermediaries and individuals, employing around 5,700 people in 38 cities worldwide. Schroders focuses on offering distinctive and relevant solutions to each client across equity, fixed income, multi-asset, private and alternative asset classes.

## **Walter Scott & Partners Limited**

Walter Scott, a wholly owned subsidiary of BNY Mellon since 2007, was founded in 1983 to offer global equity portfolios to institutional investors around the world. Based in Edinburgh, Scotland, the firm's long-term investment focus aims to invest in highly profitable companies with strong balance sheets and the ability to deliver exceptional rates of internal wealth generation over the long-term. As of 31 December 2022, the firm had over 170 employees including 41 investment professionals, and assets under management of around USD 74 billion.

# ***Independent auditors' report to the unitholders of the Sub-Funds of Mediolanum Best Brands***

## **Report on the audit of the financial statements**

---

### **Opinion**

In our opinion, Mediolanum Best Brands' financial statements:

- give a true and fair view of the Sub-Funds' assets, liabilities and financial position as at 31 December 2022 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 December 2022;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units for the year then ended;
- the Schedule of Investments for each of the Sub-Funds as at 31 December 2022; and
- the notes to the financial statements for each of the Sub-Funds, which include a description of the significant accounting policies.

---

### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Independence**

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

---

### **Conclusions relating to going concern**

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Sub-Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

---

## Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

---

## Responsibilities for the financial statements and the audit

### *Responsibilities of the manager for the financial statements*

As explained more fully in the Statement of Manager's Responsibilities set out on page 9, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Sub-Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

### *Auditors' responsibilities for the audit of the financial statements*

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

[https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description\\_of\\_auditors\\_responsibilities\\_for\\_audit.pdf](https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf).

This description forms part of our auditors' report.

### *Use of this report*

This report, including the opinion, has been prepared for and only for the unitholders of each of the Sub-Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

# NOTES TO THE FINANCIAL STATEMENTS

---

## Note 1 – Establishment and Organisation

---

The Fund is an open-ended umbrella unit trust established in Ireland as a UCITS pursuant to the UCITS Regulations. The Fund was constituted on October 27, 1998 and commenced trading on November 23, 1998. These financial statements cover the financial year January 1, 2022 to December 31, 2022.

"Manager" means Mediolanum International Funds Limited or any other company approved by the Central Bank as manager of the Fund.

"Delegate Investment Manager" means any one or more persons or companies or any successor person or company appointed by the Manager in accordance with the requirements of the Central Bank of Ireland to act as delegate investment manager of some or all of the assets of a Sub-Fund. The Delegate Investment Managers for each Sub-Fund are listed in the 'General Information' section of these financial statements.

As at December 31, 2022, the Fund has thirty-four active Sub-Funds denominated in Euro – US Collection, European Collection, Pacific Collection, Emerging Markets Collection, Euro Fixed Income, Global High Yield, Premium Coupon Collection, Dynamic Collection, Equity Power Coupon Collection, Mediolanum Morgan Stanley Global Selection, Emerging Markets Multi Asset Collection, Coupon Strategy Collection, New Opportunities Collection, Infrastructure Opportunity Collection, Convertible Strategy Collection, Mediolanum Carmignac Strategic Selection, Mediolanum Invesco Balanced Risk Coupon Selection, Socially Responsible Collection, Financial Income Strategy, Equilibrium, Mediolanum Fidelity Asian Coupon Selection, European Coupon Strategy Collection, US Coupon Strategy Collection, Dynamic International Value Opportunity, Mediolanum Innovative Thematic Opportunities, European Small Cap Equity, Chinese Road Opportunity, Global Leaders, Emerging Markets Fixed Income, Mediolanum Global Demographic Opportunities, Mediolanum Global Impact, Mediolanum Circular Economy Opportunities, Mediolanum Multi Asset ESG Selection and Mediolanum Energy Transition.

On July 23, 2021, Long Short Strategy Collection ceased trading and merged via an assets and liabilities merger into Premium Coupon Collection.

On January 10, 2022, Mediolanum Circular Economy Opportunities was launched.

On July 8, 2022, Mediolanum Multi Asset ESG Selection and Mediolanum Energy Transition were launched.

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of the Sub-Fund as set out in the Sub-Fund Information Card attached to the Prospectus.

## Note 2 – Significant Accounting Policies

---

### (a) Basis of Accounting

The financial statements are prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" issued by the Financial Reporting Council ("FRS 102"). The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) ("the UCITS Regulations") the Unit Trusts Act, 1990 ("the applicable Regulations"). The financial statements are prepared under the historical cost convention, adjusted to take account of the revaluation of investments.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires the Board of Directors of the Manager to exercise its judgement in the process of applying the Fund's accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and these differences may be material. Areas where assumptions and estimates have a significant risk to cause a material adjustment to the carrying amounts of assets and liabilities include: (i) valuation of OTC derivatives as described in note 2 (e); (ii) valuation of securities that are unlisted or not normally dealt on the regulated markets as described in note 2 (e) and note 17; and (iii) uncertainty with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax and capital gains tax as disclosed in note 2(n). Differences arising between the actual investment income and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded. All accounting policies have been applied consistently in the financial statements. There are no significant estimates as at December 31, 2022.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 2 – Significant Accounting Policies (continued)

---

(a) **Basis of Accounting (continued)**

Quantitative and qualitative information has been evaluated about relevant conditions and events known and reasonably knowable at the date that the financial statements are issued. There were no events or conditions identified that, in the opinion of the Board when considered in the aggregate, indicate lack of the ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue. As such, the financial statements are prepared on a going concern basis.

(b) **Financial Instruments**

*(i) Measurement and Recognition*

The Fund has elected to apply the recognition and measurement provisions of IAS 39 - Financial Instruments: Recognition and Measurement (“IAS 39”) and the disclosures of Section 11 and 12 of FRS 102.

The Fund recognises financial assets held-for-trading on the trade date, being the date it commits to purchase or sell short the instruments. From this date any gains and losses arising from changes in fair value of the assets or liabilities are recognised in the relevant Sub-Fund and Statement of Comprehensive Income, where relevant. Other financial assets and liabilities are recognised on the date they are originated.

Financial instruments categorised at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being expensed immediately in the Statement of Comprehensive Income, where relevant.

*(ii) Classification*

Financial assets and liabilities at fair value through profit or loss, in accordance with IAS 39, comprises:

- Financial instruments held-for-trading are those that the Fund principally holds for the purpose of short-term profit taking. These include equities, investments in bonds and warrants, investment funds, money market instruments, futures, forward foreign exchange contracts, options and swaps.
- There are no financial instruments designated at fair value through profit or loss upon initial recognition.

*(iii) Subsequent measurement*

After initial measurement, the Fund measures financial instruments, which are classified as at fair value through profit or loss, at their fair values.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm’s length transaction. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at their last traded value.

If a quoted market price is not available on a recognised stock exchange or from a reputable broker/counterparty, the fair value of the financial instruments may be estimated by a competent person using valuation techniques, including use of recent arm’s length market transactions and reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the Statement of Comprehensive Income, where relevant.

All investments in the Fund’s portfolios as at December 31, 2022 were recorded at the fair value.

*(iv) Derecognition*

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or the Fund has transferred substantially all the risk and rewards of ownership and the transfer qualifies for derecognition in accordance with IAS 39. The Fund derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

(c) **Income Recognition**

Income arising on interest bearing securities is accounted for on an accrual basis and is shown gross of withholding tax if deducted. Deposit interest is accounted for on an accrual basis. Dividend income is recognised in the financial statements on the date the related security is listed “ex dividend” and is stated gross of any withholding tax.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 2 – Significant Accounting Policies (continued)

---

**(d) Operating Expenses**

The Fund is responsible for all normal operating expenses including administration fees, fees or expenses of the Manager and the Trustee, audit fees, stamp and other duties and charges incurred on the acquisition and realisation of investments. Such costs are expensed in the financial year to which they relate.

**(e) Valuation of Investments**

The valuation point for these annual financial statements was December 30, 2022. The assets of a Sub-Fund are valued on each dealing day as follows:

- i)** Any asset listed and regularly traded on a recognised exchange and for which market quotations are readily available shall be valued at the last traded price at the relevant valuation point. Any asset listed but not regularly traded on a recognised exchange and for which market quotations are readily available shall be valued at the latest available price at the relevant valuation point, provided that the value of any investment listed on a recognised exchange but acquired or traded at a premium or at a discount outside or off the relevant recognised exchange or on an over-the-counter market, shall be valued taking into account the level of premium or discount as of the date of valuation of the investment and subject to approval of the Trustee.
- ii)** If an asset is listed on several recognised exchanges, then the stock exchange or market, which constitutes the main market for such assets, will be used.
- iii)** The assets of a Sub-Fund which are not listed or which are listed but in respect of which prices are not available or in respect of which the closing price does not represent fair market value shall be valued at their probable realisation value estimated with care and in good faith by (i) the Manager or (ii) a competent person, firm or corporation selected by the Manager and approved for such purpose by the Trustee or (iii) any other means provided that such value is approved by the Trustee.
- iv)** Derivative contracts traded on a regulated market including without limitation futures and options contracts and index futures shall be valued at the settlement price as determined by the market. If the settlement price is not available, the value shall be the probable realisation value estimated with care and in good faith by (i) the Manager or (ii) a competent person, firm or corporation selected by the Manager and approved for the purpose by the Trustee or (iii) any other means provided that the value is approved by the Trustee. Over-the-counter derivative contracts will be valued daily either (i) on the basis of a quotation provided by the relevant counterparty and such valuation shall be approved or verified at least weekly by a party who is approved for the purpose by the Trustee and who is independent of the counterparty (the “Counterparty Valuation”); or (ii) using an alternative valuation provided by a competent person appointed by the Manager and approved for the purpose by the Trustee or a valuation by any other means provided that the value is approved by the Trustee (the “Alternative Valuation”). Where the Alternative Valuation method is used the Manager will follow international best practice and adhere to the principles on valuation of over-the-counter instruments established by bodies such as IOSCO (the International Organisation of Securities Commissions) and AIMA (the Alternative Investment Management Association) and will be reconciled to the Counterparty Valuation on a monthly basis. Where significant differences arise these will be promptly investigated and explained.
- v)** Forward foreign exchange and interest rate swap contracts shall be valued in the same manner as over-the-counter derivatives contracts or by reference to freely available market quotations.
- vi)** Units in other investment funds not valued pursuant to paragraph i) above are valued by reference to the latest available Net Asset Value of the units of the relevant investment fund.
- vii)** The Manager, with the approval of the Trustee, may adjust the value of any investment if, having regard to its currency, marketability, applicable interest rates, anticipated rates of dividend, maturity, liquidity or any other relevant consideration, they consider that such adjustment is required to reflect the fair value thereof.
- viii)** Assets denominated in a currency other than in the base currency of the relevant Sub-Fund are converted into the base currency at the official rate, which the Manager, after consulting or in accordance with a method approved by the Trustee, deems appropriate in the circumstances.
- ix)** Cash and other liquid assets are valued at their nominal value plus accrued interest.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 2 – Significant Accounting Policies (continued)

---

**(f) Investment Gains and Losses**

Realised gains and losses and unrealised gains and losses arising on the valuation of investments are recognised in the Statement of Comprehensive Income, where relevant. The cost of investments sold is recognised on a weighted average basis.

**(g) Cash and Cash Equivalents**

Cash comprises current deposits and bank overdraft facilities with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

**(h) Cash Collateral Held/Due to Brokers and Margin Cash Receivable/Payable**

Cash held as collateral and collateral cash due from brokers is in relation to swaps, forwards and futures contracts. These amounts are held by the Sub-Funds for investment transactions that have not settled at the financial statements date and are required by the brokers to be held as collateral for trading. Cash held as collateral is maintained in separate accounts and disclosed separately on the Statement of Financial Position. Cash received as collateral is recorded as an asset on the Statement of Financial Position.

Collateral cash due to brokers is held in relation to swaps and futures contracts for investment transactions that have not settled and the cash required by the brokers to hold as collateral for trading. Collateral cash due to brokers are disclosed on the Statement of Financial Position.

These balances are inclusive of margin cash deposits receivable and payable from/to brokers. Details of cash collateral and margin cash are outlined in Note 10.

**(i) Foreign Currencies**

The reporting currency of the Fund and of each Sub-Fund is Euro. Foreign currency assets and liabilities are translated into Euro at the exchange rate ruling at the financial year end. The cost of investment securities expressed in currencies other than the Euro are translated into Euro at the exchange rate prevailing at the purchase date. Transactions in foreign currencies are translated into Euro at the exchange rate at the date of the transaction. The portion of realised gains and losses on sale of investments that result from changes in the foreign exchange rates between the date of purchases and sales are included in net realised appreciation on sale of investments in the Statement of Comprehensive Income, where relevant.

**(j) Net Asset Value**

The Net Asset Value per unit of each class of units is calculated by dividing the net assets of the Sub-Fund attributable to that class by the total number of units outstanding in that class.

**(k) Cash Flow Statement**

Under FRS 102 Section 7.1A ‘Statement of Cash Flows’, the Fund has availed of the exemption available to open-ended investment funds and not prepared a cash flow statement as it meets the following criteria;

- (i) substantially all of the Fund’s investments are highly liquid;
- (ii) substantially all of the Fund’s investments are carried at fair value; and
- (iii) the Fund provides a Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units.

In the opinion of the Directors of the Manager, this information also satisfies the requirement of FRS 102 Section 10.4 ‘Reporting Financial Performance’ in relation to a reconciliation of movements in unitholders’ equity.

**(l) Transaction Fees**

Transaction fees include fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and security exchanges, and transfer taxes and duties. Transaction fees do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction fees relate to the purchase and sale of investments.

**(m) Classification of Redeemable Participating Units**

The Fund provides its Unitholders with the right to redeem their interest in the Fund at any dealing date for cash equal to their proportionate share of the Net Asset Value of the Fund. Under FRS 102, this right represents in substance a liability of the Fund to Unitholders and accordingly redeemable participating units are classified as financial liabilities in these financial statements. The liability to Unitholders is prescribed as “Net assets attributable to holders of redeemable participating units” in the Statement of Financial Position. Distributions to Unitholders are shown as a financial cost in the Statement of Comprehensive Income, where relevant.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 2 – Significant Accounting Policies (continued)

---

**(m) Classification of Redeemable Participating Units (continued)**

In accordance with FRS 102 Section 22, financial instruments issued by the Fund are treated as equity only to the extent that they meet the following two conditions:

- a. they include no contractual obligations upon the Fund to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Fund; and
- b. where the instrument will or may be settled in the Fund's own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Fund's own equity instruments or is a derivative that will be settled by the Fund's exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability.

**(n) Investment in Transferable Securities**

Investment in transferable securities are financial instruments that can be readily exchanged between two parties.

### Note 3 – Units

---

Units of each Sub-Fund are all freely transferable and, subject to the differences between units of different Classes as outlined below, are all entitled to participate equally in the profits and distributions (if any) of that Sub-Fund and in its assets in the event of termination. The units, which are of no par value and which must be fully paid for upon issue other than in certain circumstances which are at the discretion of the Manager, carry no preferential or pre-emptive rights. Fractions of units may be issued up to three decimal places.

A unit in a Sub-Fund represents the beneficial ownership of one undivided share in the assets of the relevant Sub-Fund attributable to the relevant Class.

The Fund is made up of the Sub-Funds, each Sub-Fund being a single pool of assets. The Manager may, whether on the establishment of a Sub-Fund or from time to time, create more than one Class of units in a Sub-Fund to which different levels of subscription fees and expenses (including the management fee), minimum subscription, minimum holding, designated currency, hedging strategy (if any) applied to the designated currency of the Class, distribution policy and such other features as the Manager may determine may be applicable. Units shall be issued to investors as units in a Class.

“A” units are accumulating Classes and are not entitled to receive distributions whereas “B” units are distributing Classes and shall receive distributions.

The net assets attributable to holders of redeemable participating units are at all times equal to the Net Asset Value of the Fund. The participating units are in substance a liability of the Fund to Unitholders under FRS 102 as they can be redeemed at the option of the Unitholder.

### Note 4 – Taxation

---

The Fund qualifies as an investment undertaking as defined in Section 739B (1) of the Taxes Act. Under current Irish law and practice, it is not chargeable to Irish tax on its income and capital gains. Tax may arise on the happening of a chargeable event. A chargeable event includes any distribution payments to Unitholders or any encashment, redemption or transfer of units. No tax will arise on the Fund in respect of chargeable events in respect of:

- (i) a Unitholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event; or
- (ii) certain exempted Irish resident investors who have provided the Fund with the necessary signed statutory declarations; or
- (iii) units held in a recognised clearing system as designated by the order of the Irish Revenue Commissioners.

## **NOTES TO THE FINANCIAL STATEMENTS (continued)**

---

### **Note 4 – Taxation (continued)**

---

Distributions and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries. The Fund may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreement in operation between Ireland and other countries. The Fund may not, therefore, be able to reclaim withholding tax suffered by it in particular countries.

To the extent that a chargeable event arises in respect of an Irish Unitholder, the Fund may be required to deduct tax in connection with that chargeable event and pay the tax to the Irish Revenue Commissioners. A chargeable event can include dividend payments to Unitholders, appropriation, cancellation, redemption, repurchase or transfer of units, or a deemed disposal of units every 8 years beginning from the date of acquisition of those units. Certain exemptions can apply to tax exempt Irish investors to the extent that these Unitholders have appropriate tax declarations in place with the Fund, in which case there may be no requirement to deduct tax.

### **Note 5 – Contingent Liabilities**

---

There were no contingent liabilities at the financial year end (there were no contingent liabilities as at December 31, 2021).

### **Note 6 – Soft Commission Arrangements**

---

For the financial year ended December 31, 2022, investment research fees were paid directly by the Sub-Funds (these fees were paid directly by the Sub-Funds as at December 31, 2021).

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 7 – Fee Schedule

For the financial year ended December 31, 2022 and December 31, 2021 Mediolanum International Funds Limited, the Manager, receives an annual management fee, accrued daily and payable monthly in arrears, based on the percentage of the Net Asset Value attributable to each Class of each Sub-Fund as follows:

Sub-Fund Name	Mediolanum	Mediolanum	Mediolanum	Mediolanum

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 7 – Fee Schedule (continued)

For the financial year ended December 31, 2022 and December 31, 2021 Mediolanum International Funds Limited, shall be entitled to receive out of the assets of each Sub-Fund, where it is appointed as Cash Manager, an annual fee accrued daily and payable monthly in arrears of 0.01% of the Net Asset Value of the relevant Sub-Fund (plus VAT, if any). The Cash Manager has waived its right to the annual fee for the following Sub-Funds: Euro Fixed Income and Global High Yield.

For the financial year ended December 31, 2022 and December 31, 2021 Mediolanum International Funds Limited, the Manager, receives an annual investment management fee, accrued daily and payable monthly in arrears, based on the percentage of the Net Asset Value attributable to each Class of each Sub-Fund as set out below. The Manager shall not be entitled to be repaid for any out-of-pocket expenses out of the assets of a Sub-Fund.

<sup>1</sup>This Sub-Fund was merged into Premium Coupon Collection on July 23, 2021.

<sup>2</sup>This Sub-Fund was launched on January 10, 2022 and therefore no comparatives are available.

<sup>3</sup>These Sub-Funds were launched on July 8, 2022 and therefore no comparatives are available.

The Manager is entitled to an annual fee, payable monthly in arrears of 0.045% (December 31, 2021: 0.045%) of the Net Asset Value of each relevant Sub-Fund for which services are provided (plus VAT, if any) in relation to the provision of performance attribution, performance measurement and risk analysis to each relevant Sub-Fund. Performance and risk services fees of Euro 11,953,481 were incurred for the financial year ended December 31, 2022 (December 31, 2021: Euro 11,846,750).

The Manager shall also be entitled to be repaid all of its administration expenses out of the assets of the Fund.

RBC Investor Services Bank S.A., Dublin Branch, the Trustee, receives a fee equal to 0.005% (December 31, 2021: 0.005%) per annum of the Net Asset Value of each Sub-Fund (plus VAT, if any). The Trustee is entitled to a depositary cash flow monitoring and reconciliation flat fee of Euro 2,000 per Sub-Fund per annum and also depositary oversight fees charged at 0.002% (December 31, 2021: 0.002%) per annum of the Net Asset Value of each Sub-Fund (plus VAT, if any). The Trustee received fees of Euro 1,902,307 for the financial year ended December 31, 2022 (December 31, 2021: Euro 1,906,066).

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 7 – Fee Schedule (continued)

---

The Trustee is also entitled to a safekeeping fee which is charged at a rate of 0.0125% (December 31, 2021: 0.0125%) per annum of the Net Asset Value of each Sub-Fund (plus VAT, if any). The Trustee received safekeeping fees of Euro 3,527,491 for the financial year ended December 31, 2022 (December 31, 2021: Euro 3,542,191).

Each Sub-Fund will also be responsible for transaction charges and sub-custody transaction charges (which will be charged at normal commercial rates).

The Trustee shall also be entitled to be repaid all of its disbursements out of the assets of each Sub-Fund. The Trustee shall pay out of its own fee, the fees of any sub-custodian appointed by it.

RBC Investor Services Ireland Limited, the Administrator, will be entitled to receive out of the assets of the Fund, an annual administration fee, accrued daily and payable monthly in arrears, of Euro 24,000 (plus VAT, if any) (2021: Euro 24,000 (plus VAT, if any)) multiplied by the number of Sub-Funds of the Fund. The annual administration fee will be allocated between all Sub-Funds so that each Sub-Fund will be charged a proportionate share of the administration fee based on the Net Asset Value of each Sub-Fund. Each Sub-Fund will also be responsible for transaction charges (which will be charged at normal commercial rates).

The Administrator received fees of Euro 909,947 for the financial year ended December 31, 2022 (December 31, 2021: Euro 1,051,010).

RBC Investor Services Ireland Limited, the Transfer Agent, receives out of the assets of the Fund an annual fee, accrued daily and payable monthly in arrears at a rate of Euro 62,000 for the Fund and Euro 1,600 per Class of units (plus VAT, if any) (2021: Euro 62,000 for the Fund and Euro 1,600 per Class of units (plus VAT, if any)).

The Transfer Agent received fees of Euro 300,563 for the financial year ended December 31, 2022 (December 31, 2021: Euro 563,160).

The fees for all Mediolanum Best Brands may be paid out of the capital of the Sub-Funds. During the financial year ended December 31, 2022 and December 31, 2021, no fees were paid out of the capital of the Sub-Funds.

### Note 8 – Performance Fee

---

The Manager shall be entitled to a performance fee in respect of each Class of Units in issue at the Valuation Day prior to the Calculation Date equal to a percentage of the amount by which the Net Asset Value per Unit of each Class of Units (before the deduction of the applicable performance fee and adjustment for any distributions) exceeds the Performance Target Value as at the Valuation Day prior to the Calculation Date. Any such performance fee, where payable, will be subject to a cap of 1% of the Net Asset Value of the relevant Class of Units at the end of the relevant Calculation Period. In any given Calculation Period, the **Performance Target Value** for each Class of Units is defined as being equal to the high-water mark (the “**HWM**”) increased by the relevant hurdle rate (“**Hurdle Rate**”) for that Calculation Period only. In calculating the Performance Target Value, adjustments may also be made for subscriptions and redemptions. The adjustments are required so that the performance fee rewards the Manager for the profits earned by the Sub-Fund, as attributable to the relevant Class(es) of Units (i.e. actual absolute value) in the relevant Calculation Period as opposed to artificial increases in the performance fee simply due to a higher NAV resulting from new subscriptions (i.e. such increases should not be taken into account). Such artificial increases in the performance fee most notably happen shortly after a new Sub-Fund launch where the size of inflows are material relative to the value of the assets of the Sub-Fund, attributable to the relevant Class(es) of Units. Any required adjustments would be made to the accrued performance fee at the time of the relevant subscriptions. Investors should be aware that the performance fee is calculated at the level of the Class of Units and not at individual investor level (on a per Unit basis). The HWM is described below and the relevant percentages and Hurdle Rates applicable to each type of Sub-Fund are as indicated in the table below.

The HWM of a Class of Units will initially be set at the initial offer price of a Class of Units on the creation of that Class of Units. The initial HWM will remain unchanged until such time as a performance fee crystallises and becomes payable at the end of a subsequent Calculation Period. Upon such crystallisation and payment of a performance fee, the HWM will be adjusted upwards (i.e. on the outperformance of the Performance Target Value). The adjusted HWM will be equal to the Net Asset Value per Unit of the Class of Units at the end of that Calculation Period for which a performance fee crystallised and became payable. Where the Net Asset Value per Unit does not outperform the Performance Target Value as at the Valuation Day prior to the Calculation Date, no performance fee is payable (even where the Net Asset Value per Unit exceeded the Performance Target Value during the Calculation Period) and the HWM remains unchanged from the end of the previous Calculation Period.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 8 – Performance Fee (continued)

The performance fee is calculated on the first Dealing Day of January of each year (the “**Calculation Date**”). The Calculation Period is the 12 month period immediately preceding the Calculation Date (the “**Calculation Period**”). The initial offer price of a Class of Units on the creation of that Class of Units shall be used as the HWM for the purposes of the calculation of the performance fee in the first Calculation Period for a Class of Units. For a new Class of Units, the first Calculation Period will commence on the final day of the initial offer period for that Class of Units and will conclude at the end of the first Calculation Period. The performance fee shall accrue daily and will crystallise, be payable and credited to the Manager annually in arrears at the end of each Calculation Period. For the calculation of the performance fee, the total Net Asset Value of each Class of Units in issue for the relevant Sub-Fund is taken into consideration.

The Net Asset Value per Unit for a Class of Units used for subscription or redemption purposes may include an allowance for performance fee accrual, where applicable. For determination of accruals, where applicable, the Calculation Period is defined as the period to the Valuation Date from the previous Calculation Date.

In the event that a Unitholder redeems during a Calculation Period, any performance fee accrued up until the time of their redemption will be payable on a pro rata basis. For purpose of the calculation of such performance fee, the Hurdle Rate set out in the table below will be applied on a pro rata basis up until the time of redemption during the Calculation Period.

Sub-Fund Type	Hurdle Rate*	Percentage to be applied on the amount by which the Net Asset Value per unit exceeds the Performance Target Value
Equity	5%	20%
Multi-Asset	3%	20%
Fixed Income	1%	20%

\*Where a performance fee is not payable at the end of a Calculation Period the Hurdle Rate for the following Calculation Period will be applicable for that Calculation Period only at the rates set out in the table above and will not be a cumulative rate including the previous Calculation Period in which a performance fee was not payable. For example, if no performance fee is payable at the end of the first Calculation Period for an Equity Sub-Fund, the Hurdle Rate for the following Calculation Period will remain at 5% for that Calculation Period on a pro rata basis and will not be cumulative of both the first and second Calculation Periods (i.e. 10%).

The Net Asset Value of a Class of Units used in the performance fee calculation is net of all costs and charges incurred by the relevant Sub-Fund, as attributable to that Class, but will be calculated without deducting the accrued performance fee itself, provided that in doing so it is in the best interests of Unitholders.

The performance fee shall be calculated by the Administrator (subject to verification by the Trustee) and shall be due and payable 10 Business Days following the Calculation Date.

The Manager is only entitled to and shall only be paid a performance fee if the percentage difference between the Net Asset Value per unit and the performance target value is a positive figure as at the relevant valuation day at the end of the relevant Calculation Period.

Included in that calculation shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the relevant Dealing Day at the end of the relevant Calculation Period. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised.

Reference to "Fixed Income" Sub-Funds in the above table is to Euro Fixed Income, Convertible Strategy Collection, Equilibrium and Financial Income Strategy.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 8 – Performance Fee (continued)

Performance fees crystallised on redemption amounted to Euro 588,126 (December 31, 2021: Euro 20,312,579). The amount payable to the Manager as at December 31, 2022 is Euro 207,619 (December 31, 2021: Euro 1,240,647).

Performance fees accrued as at December 31, 2022 amounted to Euro 40,010 (December 31, 2021: Euro 143,598,645). The amount crystallised at calculation period end and hence to be paid as at December 31, 2022 is Nil (December 31, 2021: Euro 122,821,747). See Note 17 liquidity risk for details of split of performance fees payable at year end.

The Performance Fees are not calculated using an equalisation or series accounting methodology. As a result, the impact of the Performance Fee on a Unitholder will be different than if performance fees were individually calculated for each Unitholder based on the performance of that Unitholder's investment. Whether a Unitholder is disadvantaged or advantaged by this will depend on the timing of investments by that Unitholder and on the performance of the relevant Class.

### Note 9 – Foreign Exchange Translation

The exchange rates as at December 31, 2022, which were used to convert assets and liabilities denominated in foreign currencies were as follows:

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 11 – Derivative Contracts

UCITS Regulations permits Funds to invest in financial derivative instruments both for investment purposes and for efficient portfolio management/hedging purposes, in each case subject to the conditions and within the limits laid down by the Central Bank of Ireland and the Fund's investment policies. The Sub-Fund Information Card outlines the permitted techniques and instruments for each Sub-Fund. During the financial year the instruments used by the Sub-Funds were for investment purposes and for efficient portfolio management/hedging purposes. These instruments consisted of options, futures and swaps. The Sub-Funds also entered into forward currency contracts to purchase or sell a specific currency at a future date at a price set at the time of the contract.

The Sub-Funds entered into these contracts to hedge against changes in currency exchange rates. The Sub-Funds can use one currency (or a basket of currencies) to hedge against adverse changes in the value of another currency (or a basket of currencies) when exchange rates between the two currencies are positively correlated.

Please see Note 10 for details of cash and cash equivalents, cash collateral held/due to brokers and margin cash receivable/payable and Notes 12 to 16 for details of forwards, options, futures, swaps and swaptions.

### Note 12 – Forward Foreign Exchange Contracts

As at December 31, 2022, the Fund had entered into the following outstanding forward foreign exchange contracts. These contracts were valued on December 31, 2022.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 15 – Swaps

The Fund may enter into various swap contracts including, but not limited to, credit default swaps (including credit default swap on indices such as CDX), inflation link swaps, equity swaps, total return swaps and interest rate swaps. The purpose is to create, manage or reduce the Fund's exposure to interest rate movements, defaults of corporate and sovereign debts, or other markets, as appropriate.

Credit default swap contracts involve an arrangement between the Fund and a counterparty which allow the Fund to protect against losses incurred as a result of default on certain designated bonds by a specified reference entity. A credit default swap index is a credit derivative used to hedge credit risk or to take a position on a basket of credit entities. Unlike a credit default swap, which is an OTC credit derivative, a credit default swap index is a completely standardised credit security and may therefore be more liquid and trade at a smaller bid-offer spread.

A Sub-Fund may utilise total return swap contracts where the Sub-Fund may exchange interest rate cash flows for cash flows based on the return of, for example, an equity or fixed income instrument or a securities index. These contracts allow a Sub-Fund to manage its exposures to certain securities or securities indexes. For these instruments, the Sub-Fund's return is based on the movement of interest rates relative to the return on the relevant security or index.

As at December 31, 2022, the Fund had entered into the following swaps contracts:

#### CREDIT DEFAULT SWAPS

### Note 16 – Swaptions

A swaption is an option to enter into an credit default swap. In exchange for an option premium, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date.

As at December 31, 2022, the Fund had entered into the following swaptions contracts:

Buy/Sell	Description/Underlying Index	Maturity Date	Quantity	Currency	Issuer	Fair Value EUR
<b>GLOBAL HIGH YIELD</b>						
SELL	CXPEM538	March 15, 2023	6,700,000	USD	Morgan Stanley	(65,527)
<b>Total as at December 31, 2022</b>						<b>(65,527)</b>
<b>Total as at December 31, 2021</b>						<b>-</b>

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments

---

The Fund is exposed to risk, which includes market risk, currency risk, liquidity risk, credit risk and interest rate risk arising from the financial instruments it holds. The Fund may use derivatives and other instruments in connection with its risk management activities.

The Fund has in place guidelines that set out its overall business strategies and its general risk management philosophy and has established processes to monitor and control economic hedging transactions in a timely and accurate manner. The Manager employs a risk management process to monitor and control position risk in a timely and accurate manner.

The Fund's accounting policies in relation to derivatives are set out in Note 2 to the financial statements.

The Sub-Funds utilise various methods to value investments measured at fair value on a recurring and non-recurring basis.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement (lowest being level 3).

Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Manager's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The determination of what constitutes "observable" requires significant judgment by the Manager. The Manager considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Manager's perceived risk of that instrument.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, The Manager's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Manager uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The three levels of inputs are defined as follows:

Level 1 - The unadjusted quoted price in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 - Inputs other than quoted prices included within level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly; and

Level 3 - Inputs that are unobservable (i.e. for which market data is unavailable) for the asset or liability.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

The following tables summarise the inputs used to value the Sub-Funds' financial instruments measured at fair value on a recurring and non-recurring basis as at December 31, 2022:

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

#### Valuation Techniques

When fair values of listed equity, as well as publicly traded derivatives at the reporting date, are based on quoted market prices or binding dealer price quotations, without any deduction for transaction costs, the instruments are included within level 1 of the hierarchy. Fair values of debt securities are included within level 2 of the hierarchy.

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

The Fund uses widely recognised valuation models for determining fair values of over-the-counter derivatives. For these financial instruments, inputs into models are market observable and are therefore included within level 2.

The fair values of currency exchange contracts are calculated by reference to current exchange rates for contracts with similar maturity and risk profiles.

The fair values of any investments in any open ended investment funds are based on the Net Asset Value (market value of the Sub-Fund's assets less liabilities / number of units) calculated by the administrator of the underlying investment funds. The Net Asset Value of the underlying investment funds is adjusted for any factors that indicate that the Net Asset Value per share, as calculated by the administrator of the underlying investment funds, may not be the fair value. Investments in investment funds are categorised in level 2, except for any exchange traded funds which may be classified as level 1.

Level 3 securities are valued by a competent person selected by the Directors of the Manager and approved for such purpose by the Trustee with care and in good faith in accordance with the Fund's valuation policies.

The investment objective of each Sub-Fund is as follows:

#### US Collection

The investment objective of US Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) to a diversified portfolio of North American equities and equity related securities and currencies, listed or traded on North American recognised exchanges.

#### European Collection

The investment objective of European Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) to a diversified portfolio of Pan European equities and equity related securities and currencies, listed or traded on Pan European recognised exchanges.

#### Pacific Collection

The investment objective of Pacific Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) to a diversified portfolio of Asia/Pacific equities and equity related securities and currencies, listed or traded on recognised exchanges in the Asia/Pacific region.

#### Emerging Markets Collection

The investment objective of Emerging Markets Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) on a global basis to a diversified portfolio of emerging markets equities and equity related securities and currencies, listed or traded on recognised exchanges in the emerging markets.

#### Euro Fixed Income

The investment objective of the Euro Fixed Income is to provide short-medium term capital appreciation from a diversified portfolio of world-wide high quality fixed income securities denominated in Euro listed and/or traded on recognised exchanges while limiting fluctuations in principal value.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

#### **Global High Yield**

The investment objective of the Global High Yield is medium-long term capital appreciation by investing primarily in a diversified portfolio of higher yielding, lower rated fixed income securities primarily listed or traded on recognised exchanges in the US, Europe and emerging markets.

#### **Premium Coupon Collection**

The investment objective of Premium Coupon Collection is to achieve medium term capital appreciation by primarily investing in or taking exposures (both long and short) on a global basis to a diversified portfolio of fixed income securities, equities and equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Dynamic Collection**

The investment objective of Dynamic Collection is to achieve medium-long term capital appreciation by primarily investing in or taking exposures (both long and short) on a global basis to a diversified portfolio of equities and equity related securities, fixed income securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Equity Power Coupon Collection**

The investment objective of Equity Power Coupon Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) on a global basis to a diversified portfolio of equities and equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Mediolanum Morgan Stanley Global Selection**

The investment objective of Mediolanum Morgan Stanley Global Selection is to achieve long-term capital appreciation by primarily investing in or taking exposures (both long and short) on a global basis to a diversified portfolio of equities and equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Emerging Markets Multi Asset Collection**

The investment objective of Emerging Markets Multi Asset Collection is to achieve long-term capital appreciation by investing in or taking exposures on a global basis to a diversified portfolio of equities and equity related securities, fixed income securities and to a lesser degree, currencies, listed or traded on recognised exchanges worldwide with a particular focus on emerging markets.

#### **Coupon Strategy Collection**

The investment objective of Coupon Strategy Collection is to distribute dividends periodically and achieve long-term capital appreciation by investing in or taking exposures, on a global basis (including in emerging markets), to a diversified portfolio of assets which include equities, equity related securities, fixed income securities, real estate, money market instruments, commodities and currencies, listed or traded on any recognised exchanges worldwide.

#### **New Opportunities Collection**

The investment objective of New Opportunities Collection is to achieve long-term capital appreciation by investing in or taking exposures, on a global basis (including in emerging markets), to a diversified portfolio of assets which include equities, equity related securities, fixed income securities, real estate, money market instruments, commodities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Infrastructure Opportunity Collection**

The investment objective of Infrastructure Opportunity Collection is to achieve long-term capital appreciation by primarily investing in or taking exposures, on a global basis (including in emerging markets), to a diversified portfolio of equities and equity related securities in the infrastructure sector, including but not limited to the energy, transport, telecommunications and water sectors and currencies, listed or traded on any recognised exchanges worldwide.

#### **Convertible Strategy Collection**

The investment objective of Convertible Strategy Collection is to achieve medium-term capital appreciation by primarily investing in or taking exposures, on a global basis (including in emerging markets), to a diversified portfolio of convertible bonds, and to a lesser degree, fixed income securities, equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

#### **Mediolanum Carmignac Strategic Selection**

The investment objective of Mediolanum Carmignac Strategic Selection is to achieve medium-long-term capital appreciation by primarily investing in or taking exposures on a global basis (including emerging markets), to a diversified portfolio of equities, equity related securities, fixed income securities, real estate, money market instruments, commodities and currencies, listed or traded on any recognised exchanges worldwide. It is intended to maintain a medium level of volatility for the Sub-Fund.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Mediolanum Invesco Balanced Risk Coupon Selection**

The investment objective of Mediolanum Invesco Balanced Risk Coupon Selection is to distribute dividends periodically and to achieve medium-long term capital appreciation by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of assets which include fixed income securities, equities, equity related securities, commodities and currencies, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Socially Responsible Collection**

The investment objective of Socially Responsible Collection is to achieve capital appreciation over a long-term investment horizon by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and fixed income securities, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Financial Income Strategy**

The investment objective of Financial Income Strategy is to maximise income and achieve capital appreciation over a medium-long term investment horizon by primarily investing in or taking exposures on a global basis to a diversified portfolio of fixed income, equity, equity related and hybrid securities (with a focus on contingent convertible bonds) issued by entities operating primarily in the financial sector, listed or traded on any recognised exchanges worldwide.

#### **Equilibrium**

The investment objective of Equilibrium is to achieve capital appreciation over a medium-long term investment horizon by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of fixed income securities, equities and equity related securities, listed or traded on any recognised exchanges worldwide.

#### **Mediolanum Fidelity Asian Coupon Selection**

The investment objective of Mediolanum Fidelity Asian Coupon Selection is to generate income for periodic dividend distribution and achieve appreciation over a medium-long-term investment horizon by primarily investing in or taking exposures to a diversified portfolio of Asia-Pacific (including emerging markets) fixed income securities, equities and equity related securities, listed or traded on any recognised exchanges worldwide.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

#### **European Coupon Strategy Collection**

The investment objective of European Coupon Strategy Collection is to generate income for periodic dividend distribution and achieve appreciation over a medium-long-term investment horizon by primarily investing in or taking exposures to a diversified portfolio of Pan European (including emerging markets) fixed income securities, equities and equity related securities, listed or traded on any recognised exchanges worldwide.

#### **US Coupon Strategy Collection**

The investment objective of US Coupon Strategy Collection is to generate income for periodic dividend distribution and achieve appreciation over a medium-long-term investment horizon by primarily investing in or taking exposures to a diversified portfolio of North American fixed income securities, equities and equity related securities, listed or traded on any recognised exchanges worldwide.

#### **Dynamic International Value Opportunity**

The investment objective of Dynamic International Value Opportunity is to achieve appreciation over a long-term investment horizon by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities and equity related securities, fixed income and hybrid securities, listed or traded on any recognised exchanges worldwide.

#### **Mediolanum Innovative Thematic Opportunities**

The investment objective of Mediolanum Innovative Thematic Opportunities is to achieve capital appreciation over a long-term investment horizon by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities and equity related securities, fixed income securities and currencies listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **European Small Cap Equity**

The investment objective of European Small Cap Equity is to achieve appreciation over a long-term investment horizon by primarily investing in or taking exposures to a diversified portfolio of European equities, equity related securities and currencies, listed or traded on recognised exchanges worldwide.

#### **Chinese Road Opportunity**

The investment objective of Chinese Road Opportunity is to appreciation over a long-term investment horizon by primarily investing in or taking exposures to a diversified portfolio of Chinese equities, equity related securities and currencies, listed or traded on recognised exchanges worldwide.

#### **Global Leaders**

The investment objective of Global Leaders is to achieve appreciation over a long-term investment horizon by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Emerging Markets Fixed Income**

The investment objective of Emerging Markets Fixed Income is to achieve appreciation over a medium/long-term investment horizon by primarily investing in or taking exposures on a global basis to a diversified portfolio of emerging markets fixed income securities, hybrid securities and currencies listed or traded on any recognised exchanges worldwide.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

#### **Mediolanum Global Demographic Opportunities**

The investment objective of Mediolanum Global Demographic Opportunities is to achieve capital appreciation over a long-term investment horizon. This will be achieved by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

#### **Mediolanum Global Impact**

The investment objective of Mediolanum Global Impact is to achieve capital appreciation over a long-term investment horizon. This will be achieved by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Mediolanum Circular Economy Opportunities\***

The investment objective of Mediolanum Circular Economy Opportunities is to achieve capital appreciation over a long-term investment horizon. This will be achieved by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Mediolanum Multi Asset ESG Selection\*\***

The investment objective of Mediolanum Multi Asset ESG Selection is to achieve capital appreciation over a long-term investment horizon. This will be achieved by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities, fixed income securities, money market instruments, commodities and currencies, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

#### **Mediolanum Energy Transition\*\***

The investment objective of Mediolanum Energy Transition is to achieve capital appreciation over a long-term investment horizon. This will be achieved by primarily investing in or taking exposures to “sustainable investments” which are defined as those investments which contribute to an environmental or social objective (provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices). This will be achieved by primarily investing in or taking exposures on a global basis (including emerging markets) to a diversified portfolio of equities, equity related securities and currencies, listed or traded on any recognised exchanges worldwide.

The Sub-Fund considers Environmental, Social, and Governance (ESG) criteria as part of its investment strategy. The use of ESG factors in the selection of assets may limit the investment universe, affecting the diversification of the portfolio relative to a portfolio which does not use such factors. The Sub-Fund may use discretionary strategies relying on ESG tools and related ESG data to identify financial opportunities, which may result in more variable performance.

\*This Sub-Fund was launched on January 10, 2022.

\*\*These Sub-Funds were launched on July 8, 2022.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

The Schedules of Investments on pages 347 to 635 are representative of the type of investments held during the financial year.

The Fund has investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy and has established processes to monitor and control economic hedging transactions in a timely and accurate manner. The Fund has a Risk Management Process in place for the use of financial derivative investments which has been approved by the Directors of the Manager and the Central Bank of Ireland.

Set out below is a description of some of the more important types of risk and an outline of the processes the Manager has implemented to assess, monitor and control these specific risks.

The main risks arising from the Sub-Funds financial instruments are market price, foreign currency, liquidity, credit and interest rate risks.

**(a) Market Price Risk**

Market price risk arises mainly from uncertainty about future prices of financial instruments held. It represents the potential loss the Sub-Funds might suffer through holding market positions in the face of price movements. Certain Sub-Funds may invest in emerging markets. Such securities may involve a high degree of risk and may be considered speculative. Risks include (i) greater risk of expropriation, confiscatory taxation, nationalisation, and social, political and economic instability; (ii) the small current size of the markets for securities of emerging markets issuers and the currently low or non-existent volume of trading, resulting in lack of liquidity and in price volatility; (iii) certain national policies which may restrict a Sub-Fund's investment opportunities including restrictions on investing in issuers or industries deemed sensitive to relevant national interests; and (iv) the absence of developed legal structures governing private or foreign investment and private property.

The Manager considers the asset allocation of the portfolios of the Sub-Funds to minimise the risk associated with particular market sectors whilst continuing to follow the investment objectives.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (a) Market Price Risk (continued)

##### Sensitivity Analysis

As at December 31, 2022, if the underlying assets (excluding financial derivative instruments) held by the Sub-Funds had increased and decreased by 5% (December 31, 2021: 5%), whilst the foreign currency rates held constant, there would have been the following approximate increases and decreases in net assets attributable to holders of redeemable participating units:

Sub-Fund Name	Dec 2022	Dec 2022	Dec 2021	Dec 2021
	5% gain (EUR)	5% loss (EUR)	5% gain (EUR)	5% loss (EUR)

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (a) Market Price Risk (continued)

##### Global Exposure to Financial Derivative Instruments

The Manager's risk management department has assessed the risk profile of the Fund and the related Sub-Funds on the basis of the investment policy, strategy and the use of financial derivative instruments. Based on the risk profile and where the Sub-Fund holds financial derivative instruments, risk management has determined that the method for the calculation of the global exposure to financial derivative instruments for all Sub-Funds will be the commitment approach. The exceptions to using the commitment approach is Equilibrium and Mediolanum Multi Asset ESG Selection where the absolute VaR approach would have been used. The global exposure for the Sub-Funds as at December 31, 2022 is as follows:

Sub-Fund Name	Global Exposure		
	Min	Max	Average
US Collection	0%	3%	1%
European Collection	0%	2%	1%
Pacific Collection	0%	3%	2%
Emerging Markets Collection	0%	5%	3%

Sub-Fund Name	20 day 99% VaR (% of NAV)			Model
	Min	Max	Average	
Equilibrium	1.84%	12.76%	4.33%	Historical

The leverage (as sum of notionals) for the Equilibrium Sub-Fund, as at December 31, 2021 is as follows:

Sub-Fund Name	Leverage (as sum of notionals)
	Average
Equilibrium	84%

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (b) Currency Risk

The value of the assets of the Sub-Fund will be affected by fluctuations in the value of the currencies in which the Sub-Fund's portfolio securities are quoted or denominated relative to the base currency. Currency exchange rates may fluctuate significantly over short periods of time, causing together with other factors the Sub-Fund's Net Asset Value to fluctuate. Sub-Funds that invest in investment funds have indirect exposure to the currencies of the underlying investments within those investment funds.

As disclosed in Note 11, Sub-Funds may invest in financial derivative instruments, including currency derivatives, for investment and efficient portfolio management purposes which will increase or decrease the relevant Sub-Fund's exposure to individual currencies relative to the portfolio of investments held.

The Manager or the Delegate Investment Manager, as appropriate, may try to mitigate currency risk for hedged unit Classes by using financial instruments such as currency forwards. If the Manager or the Delegate Investment Manager, as appropriate, enters into such transactions, then the gains/losses on and the resultant costs of the relevant transactions will be solely attributable to the relevant Class of units and may not be combined or offset against the exposures of other Classes or specific assets.

As at December 31, 2022 the following Sub-Funds have hedged unit Classes:

US Collection	Equilibrium
European Collection	Mediolanum Fidelity Asian Coupon Selection
Pacific Collection	European Coupon Strategy Collection
Global High Yield	US Coupon Strategy Collection
Premium Coupon Collection	Dynamic International Value Opportunity
Dynamic Collection	Mediolanum Innovative Thematic Opportunities
Equity Power Coupon Collection	Global Leaders
Mediolanum Morgan Stanley Global Selection	Emerging Markets Fixed Income
Coupon Strategy Collection	Mediolanum Global Demographic Opportunities
New Opportunities Selection	Mediolanum Global Impact
Infrastructure Opportunity Collection	Mediolanum Circular Economy Opportunities*
Convertible Strategy Collection	Mediolanum Multi Asset ESG Selection**
Socially Responsible Collection	Mediolanum Energy Transition**

\*This Sub-Fund was launched on January 10, 2022.

\*\*These Sub-Funds were launched on July 8, 2022.

In executing Class hedging, the Manager employs a look through approach in respect of currency exposure of investment funds.

Where the Manager or the Delegate Investment Manager, as appropriate, seeks to hedge against currency fluctuations, while not intended, this could result in over-hedged or under-hedged positions due to external factors outside the control of the Manager or the Delegate Investment Manager. However over-hedged positions will not exceed 105% of the Net Asset Value and hedged positions will be under review by the Manager or the Delegate Investment Manager to ensure that positions in excess of 100% of Net Asset Value will not be carried forward from month to month.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (b) Currency Risk (continued)

The following is an analysis of the net assets and liabilities held by each Sub-Fund at the Statement of Financial Position date denominated in currencies at December 31, 2022. This analysis is not representative of the actual exposure a Unitholder may be subject to due to the impact of Class hedging and the exposure to underlying currency risk in investment funds held by a Sub-Fund. The currency exposure on the forward currency contracts is inclusive of hedging and portfolio contracts. Each amount is shown in the base currency of Euro.

#### (b) Currency Risk (continued)

##### Sensitivity Analysis

As at December 31, 2022, had the Euro strengthened by 5% in relation to all currencies, with all other variables held constant, net assets attributable to holders of redeemable participating units and the change in net assets attributable to holders of redeemable participating units per the Statement of Comprehensive Income would have decreased by the amount shown below. The analysis is performed on the same basis for December 31, 2021.

Sub-Fund Name	Dec 2022	Dec 2021
	5% movement (EUR)	5% movement (EUR)

\* This Sub-Fund was launched on January 10, 2022 and therefore there are no comparatives available.

\*\*These Sub-Funds were launched on July 8, 2022 and therefore there are no comparatives available.

A 5% weakening of the Euro would have resulted in an equal but opposite effect on the above financial statement amounts to the amounts shown above on the basis that all other variables remain constant.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (c) Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in realising assets or otherwise raising funds to meet commitments associated with financial instruments.

Generally the Sub-Funds' assets are composed of actively traded and highly liquid securities. The liquidity risks associated with the need to satisfy Unitholders' requests for redemptions are mitigated by maintaining a constant pool of cash to satisfy usual levels of demand.

The Sub-Funds avoid entering into derivative contractual arrangements that produce an exposure not covered by sufficient liquid assets or a total investment exposure in excess of total Unitholders' funds. The risk management guidelines adopted by the Manager require coverage to be composed of cash reserves or physical securities.

The following tables analyses for each Sub-Fund the liabilities into relevant maturity groupings based on the remaining period at December 31, 2022 to the contractual maturity date, based on normal market conditions.

	Less than 1 month EUR	1-3 months EUR	3-12 months EUR	More than 1 year EUR	Total Dec 2022 EUR

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (c) Liquidity Risk (continued)

##### Concentration Risk

Certain Sub-Funds may have a concentrated Unitholder base where large institutional type Unitholders hold a significant portion of the net assets of a Sub-Fund. This exposes other Unitholders in the Sub-Fund to certain risks. These risks include the risk that a large portion of the assets of a Sub-Fund may be redeemed on any day which could impact the overall viability of the Sub-Fund or could impact the ability of other Unitholders, who have not submitted redemption requests on that day, to redeem from the Sub-Fund. The below Sub-Funds are exposed to significant concentration risk as they have Unitholders who own more than 20% of the Net Assets of the Sub-Fund. Such concentration of Unitholders interests could have a material effect on the Sub-Fund in the event this Unitholder requests the withdrawal of substantial amounts of capital.

Sub-Fund Name	Name of Unitholders	Dec 2022	Dec 2021

\* Lower than 20%

\*\* This Sub-Fund was launched on January 10, 2022 and therefore there are no comparatives available.

\*\*\* These Sub-Funds were launched on July 8, 2022 and therefore there are no comparatives available.

Mediolanum Vita S.p.A is a related party as disclosed in Note 23.

#### (d) Credit Risk

Credit risk arises where there exists a possibility that a loss may occur from the failure of another party to perform according to the terms of a contract. Each Sub-Fund will have credit exposure to counterparties by virtue of investment positions in bonds, swaps, options, repurchase transactions and forward exchange rate and other contracts held by the Sub-Fund.

To the extent that a counterparty defaults on its obligation and the Sub-Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, lose income and incur costs associated with asserting its rights. A Sub-Fund's exposure to any one counterparty in respect of any of the techniques or instruments employed by the Sub-Fund for the purpose of efficient portfolio management or for protection against exchange risks may not exceed 5% of the Net Asset Value of the Sub-Fund. This limit is raised to 10% of the Net Asset Value of the Sub-Fund where the counterparty is a credit institution that falls into certain categories as outlined in the UCITS Regulations. Please see the categories below:

- i) a credit institution authorised in the European Economic Area (EEA) (European Union Member States, Norway, Iceland, Liechtenstein);
- ii) a credit institution authorised within a signatory state, other than a Member State of the EEA, to the Basel Capital Convergence Agreement of July 1988 (Switzerland, Canada, Japan, United States);
- iii) a credit institution authorised in United Kingdom, Jersey, Guernsey, the Isle of Man, Australia or New Zealand.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (d) Credit Risk (continued)

Credit risk also arises when the Sub-Fund holds cash or deposits with a credit institution or the Trustee; credit risk crystallises when the counterparty fails to repay the amount as required. According to UCITS Regulations, a Sub-Fund may not invest more than 20% of its net assets in deposits made with the same credit institution. Deposits made with any one credit institution that is not included in the above mentioned categories must not exceed 10% of net assets.

Where necessary, a Sub-Fund will accept collateral from its counterparties in order to reduce counterparty risk exposure generated through the use of over the counter FDIs and efficient portfolio management techniques. Any collateral received by a Sub-Fund shall comprise of cash collateral and/or government backed securities of varying maturity which satisfy the requirements of the Central Bank of Ireland relating to non-cash collateral which may be received by a UCITS.

Any cash collateral received will not be reinvested and all collateral received by a Sub-Fund on a title transfer basis shall be held by the Trustee. For other types of collateral arrangements, the collateral may be held with a third party custodian which is subject to prudential supervision and which is unrelated to the collateral provider.

Collateral received, other than cash, will be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. Collateral received will be issued by an entity that is independent from the counterparty and is not expected to display a high correlation with the performance of the counterparty. Collateral will be sufficiently diversified in terms of country, markets and issuers with a maximum exposure to a given issuer of 20% of the relevant Sub-Fund's Net Asset Value. If a Sub-Fund is exposed to different counterparties, the different baskets of collateral will be aggregated to calculate the 20% limit of exposure to a single issuer. Furthermore, a Sub-Fund may be fully collateralised in different transferable securities and Money Market Instruments issued or guaranteed by a Member State, one or more of its local authorities, a third country, or a public international body to which one or more Member State belongs. In this instance, the relevant Sub-Fund will receive securities from at least 6 different issues, but securities from any single issue will not account for more than 30% of the relevant Sub-Fund's Net Asset Value.

The level of collateral required to be posted may vary by counterparty with which a Sub-Fund trades and shall be in accordance with the requirements of the Central Bank of Ireland. The haircut policy applied to posted collateral will be negotiated on a counterparty basis and will vary depending on the class of asset received by the Sub-Fund, taking into account the characteristics of the assets received as collateral such as the credit standing or the price volatility and the outcome of any liquidity stress testing policy.

As at December 31, 2022 and December 31, 2021 financial assets exposed to credit risk included financial derivative instruments as disclosed in Notes 12 to 16, as well as cash and cash equivalents, cash collateral held/due to brokers and margin cash receivable/payable as disclosed in Note 10. Details on the valuation of financial derivative instruments are disclosed in Note 17. The carrying amounts of these financial assets represent the maximum credit risk exposure at the reporting date. Details of collateral accepted in respect of securities lending are outlined in Note 20. The credit ratings for counterparties that Sub-Funds had holdings with at December 31, 2022 or December 31, 2021 are outlined below, as rated by the well-known rating agencies, S&P and Fitch:

#### (e) Custody and Title Risk

The duties of the Trustee are to provide safekeeping, oversight and asset verification services in respect of the assets of the Fund and each Sub-Fund in accordance with the provisions of the UCITS Regulations. The Trustee will also provide cash monitoring services in respect of each Sub-Funds' cash flows and subscriptions.

The Trustee will be liable to the relevant Sub-Fund and its Unitholders for loss of a financial instrument held in custody (i.e. those assets which are required to be held in custody pursuant to the UCITS Regulations) or in the custody of any sub-custodian appointed by the Trustee. However the Trustee shall not be liable for the loss of a financial instrument held in custody by the Trustee or any sub-custodian if it can prove that loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. The Trustee shall also be liable to the relevant Sub-Fund and its Unitholders for all other losses suffered by them as a result of the Trustee's negligent or intentional failure to properly fulfil its obligations under the UCITS Regulations.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 17 – Risks Associated with Financial Instruments (continued)

#### (e) Custody and Title Risk (continued)

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Sub-Fund. Therefore, in such jurisdictions, there is a risk that, if a sub-custodian becomes bankrupt or insolvent, the Sub-Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Sub-Fund.

In those jurisdictions where the Sub-Fund's beneficial ownership of its assets is ultimately recognised, the Sub-Fund may suffer delay and cost in recovering those assets. The Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, such as Russia and Argentina, the assets of a Sub-Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. When the Trustee employs a sub-custodian, the Trustee retains responsibility for the assets of the Sub-Funds.

#### (f) Interest Rate Risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Sub-Funds may invest in interest bearing securities, which may in particular be exposed to interest rate risk.

The interest rate profile of financial assets (other than cash and short-term debtors) held by the Sub-Funds as at December 31, 2022 (expressed in Euro) is shown below. The sensitivity analysis is based on 5% movement on interest rates against floating financial assets only with all other variables held constant. The interest rate sensitivity provided above represents a hypothetical outcome and is not intended to be predictive. Market conditions, and therefore future interest rates, could vary significantly from that suggested.

\*These Sub-Funds were launched on July 8, 2022.

The interest rate profile of financial assets (other than cash and short-term debtors) held by the Sub-Funds as at December 31, 2021 (expressed in Euro) is shown below. The sensitivity analysis is based on 5% movement on interest rates against floating financial assets only with all other variables held constant. The interest rate sensitivity provided above represents a hypothetical outcome and is not intended to be predictive. Market conditions, and therefore future interest rates, could vary significantly from that suggested.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

**(g) Fair Value of Financial Assets and Financial Liabilities**

All of the financial assets and financial liabilities of the Sub-Funds are stated at fair value in the financial statements.

**(h) Emerging Markets Risk**

Due to the developing nature of the countries in which the Sub-Funds may invest, their markets are similarly of a developing nature. Accordingly, these markets may be insufficiently liquid and levels of volatility in price movements may be greater than those experienced in more developed economies and markets. In addition, reporting standards and market practices may not provide the same degree of information as would generally apply internationally and therefore may increase risk. In addition, an issuer may default on payments and such circumstances could mean that investors may not receive back on redemption or otherwise the amount originally invested.

As the Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, the assets of the Sub-Funds which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. When the Trustee employs a sub-custodian, the Trustee retains responsibility for the assets of the Sub-Funds.

**(i) Default Risk**

Certain Sub-Funds may invest in securities which have low credit status (be they rated or unrated) and may therefore be exposed to a higher credit risk than Sub-Funds which do not invest in such securities. The lower ratings of certain securities held by a Sub-Fund and the unrated nature of others reflect a greater possibility that adverse changes in the financial condition of the issuer, or in general economic conditions, or both, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. Such securities carry a higher degree of default risk which may affect the capital value of an investment.

**(j) Securities Lending Risk**

Certain Sub-Funds may engage in securities lending activities. As with any extensions of credit, there are risks of delay and recovery. Should the borrower of securities fail financially or default in any of its obligations under any securities lending transaction, the collateral will be called upon. The value of the collateral will be maintained to exceed the value of the securities transferred. In the event of a sudden market movement, there is a risk that the value of the collateral may fall below the value of the securities transferred. For details on securities lending please see Note 20.

**(k) Performance Fee Risk**

Where a performance fee is payable by a Sub-Fund this will be based on net realised and net unrealised gains and losses as at the end of each performance year. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised.

In addition, the payment of the performance fee to the Manager based on the performance of the Sub-Fund may provide the Manager with an incentive to cause the Sub-Fund to make more speculative investments than might otherwise be the case. The Manager will have discretion as to the timing and the terms of the Sub-Fund's transactions in investments and may therefore have an incentive to arrange such transactions to maximise its fees. Please see Note 8 for details on performance fees.

**(l) Futures and Options Risk**

The Manager may engage in various portfolio strategies on behalf of the Sub-Funds through the use of futures and options. Due to the nature of futures, cash to meet margin monies will be held by a broker with whom each Sub-Fund has an open position. In the event of the insolvency or bankruptcy of the broker, there can be no guarantee that such monies will be returned to each Sub-Fund. On execution of an option, the Sub-Funds may pay a premium to a counterparty. In the event of the insolvency or bankruptcy of the counterparty, the option premium may be lost in addition to any unrealised gains where the contract is in the money.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 17 – Risks Associated with Financial Instruments (continued)

---

**(m) Counterparty Risk**

Each Sub-Fund will have credit exposure to counterparties by virtue of investment positions in swaps, swaptions, options, repurchase transactions and forward exchange rate and other contracts held by the Sub-Fund. To the extent that a counterparty defaults on its obligation and the Sub-Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, lose income and incur costs associated with asserting its rights. Details of counterparty credit ratings are disclosed under Credit Risk section.

**(n) Pandemic Risk**

With globalisation, urbanisation and environmental change, infectious disease outbreaks and epidemics have become global threats requiring a collective response.

In addition to the substantial burden on healthcare systems, a pandemic has major economic consequences for the affected countries. Pandemics are currently a risk factor for all industries. They cause material risks with the potential to affect all lines of investments through impacts on financial markets and business disruption. The impacts may be both direct and indirect, for example supply chain disruption, new ways of working and changes in customer behaviours. Additionally, market risk and heightened volatility arise due to the macroeconomic impact of rolling lockdowns.

**(o) Country Risk**

The risk that economic, social, and political conditions and events in a foreign country will affect the current or projected value of a Sub-Fund. Country risk can reduce the expected return of financial instruments being issued within such countries, or by companies doing business or holding exposure in such countries.

While protection against some country risks like hedging is available, others risks stemming from political instability such as the recent Russian invasion of Ukraine (including harsh economic sanctions, freezing of assets, sovereign default risk and exclusion of major financial institutions from swift) has the potential to have catastrophic risks on the relevant Sub-Fund.

It is important to note that the Sub-Funds are susceptible to a variety of additional risks in addition to those described above. For further information and a non-exhaustive description of risk factors refer to the Prospectus of the Fund in the section entitled 'Risk Factors'.

The Fund has employed the use of income equalisation. This is an accounting practice which is used to apportion income on a per-unit-basis which consequently seeks to mitigate the impact of Unitholder activity (in the form of subscriptions and redemptions) on the level of income yield and therefore on income distributions.

### Note 23 – Related Party Transactions

FRS 102 Section 33 'Related Party Disclosures' requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

Mediolanum International Funds Limited is considered to be a related party. Details of fees paid by the Fund to this entity are detailed separately under Note 7 and performance fees are detailed separately under Note 8. Details of income earned from securities lending activities operated by Mediolanum International Funds Limited are detailed separately in Note 20.

Details of investments in related parties are referenced in the Schedule of Investments. Significant transactions with related parties are referenced in the Significant Portfolio Changes.

Management fees charged by funds which the Fund invests into that are related parties are referenced in Note 21.

The following Mediolanum Group entities are invested in the Fund: Mediolanum Vita S.p.A., Banca Mediolanum – GPF and Mediolanum International Life Designated Activity Company. Together these entities held 25.37% of the Fund's assets as at December 31, 2022 (December 31, 2021: 22.69%). The breakdown of each entity's holding as at December 31, 2022 and December 31, 2021 is as follows:

Mediolanum Group Entities	Percentage of Fund's Assets	
	Dec 2022	Dec 2021
Mediolanum Vita S.p.A.	22.08	19.30
Banca Mediolanum – GPF	0.65	0.45
Mediolanum International Life Designated Activity Company	2.64	2.94
<b>Total</b>	<b>25.37</b>	<b>22.69</b>

Key management officers and their close family members held units to the value of 0.12% of the Fund's assets as at December 31, 2022 (December 31, 2021: 0.33%).

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 23 – Related Party Transactions (continued)

---

The following Distributors appointed by Mediolanum International Funds Limited are related parties: Banca Mediolanum S.p.A. and Banco Mediolanum S.A.. As Distributors they are appointed to distribute the Fund to clients in Italy and Spain respectively.

Certain transactions were carried out by the Manager on behalf of the Fund where the broker or the issuer was a related party.

The following parties also fall within the definition of related parties:

- i. Directors of Mediolanum International Funds Limited and Banca Mediolanum S.p.A.;
- ii. Banca Mediolanum S.p.A., as cash is held with Banca Mediolanum S.p.A.; and
- iii. Mediolanum International Funds Limited and Banca Mediolanum S.p.A. key management officers.

### Note 24 – Changes to the Prospectus/Trust Deed

---

Copies of the most recent Prospectus and Trust Deed are available at [www.mifl.ie](http://www.mifl.ie).

On June 16, 2022, the Prospectus was updated with the addition of three new Sub-Funds, Mediolanum Energy Transition, Mediolanum Multi Asset ESG Selection and Mediolanum Future Sustainable Nutrition.

On July 27, 2022, the Prospectus was updated with the addition of one new Sub-Fund: Mediolanum India Opportunities. As at December 31, 2022 this Sub-Fund has not yet launched but is expected to launch in March 2023.

On November 9, 2022, the Prospectus was updated with several non-material changes including for Mediolanum Carmignac Strategic Selection and Mediolanum Invesco Balanced Risk Coupon Selection Sub-Funds reclassification as SFDR Article 8 disclosing funds; for Mediolanum Multi Asset ESG Selection Sub-Fund use of VAR methodology to calculate global exposure of derivatives; for Mediolanum Morgan Stanley Global Selection Sub-Fund addition of Exchange Traded Commodities (up to 10%) as eligible securities and removal of restrictions to principally invest in schemes managed by Morgan Stanley Investment Management Limited and/or related entities; clarification of ability to invest in STAR Market for applicable Sub-Funds and update of “Taxonomy Regulation” section for applicable Sub-Funds.

The other non-material changes included update of “Closure of classes to further subscriptions”, “Risks associated with the ChiNext Board of the SZSE (“ChiNext Board”) and/or SSE STAR Market (“STAR Market”)”, “Political and Economic Risk: Russia”, “Investment Research Costs”, “Performance and Risk Services Fee” clarifying this fee can be waived; Correspondent Bank/Paying Agent fee clarifying this fee can be waived; update of Directors section, update of “Taxonomy Regulation”; and addition of a section titled “Risks related to investments in India”.

On December 1, 2022, the Prospectus was updated with several non-material changes to reflect SFDR Level 2 requirements. These include addition of “integration of sustainability risk” section to each of the Sub-Fund Information Cards and for the Sub-Funds within the scope of SFDR Article 8 and SFDR Article 9 the addition of SFDR annexes for sustainability related disclosures. In addition, an Addendum to the prospectus was created noting the addition of “Principal Adverse Impact reporting” section, update of “Integration of Sustainability Risks” and “Taxonomy Regulations” sections.

Effective December 9, 2022, Metropolis Capital Limited was appointed as Delegate Investment Manager for Dynamic International Value Opportunity.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

---

### Note 25 – Significant Events that Took Place during the Financial Year (continued)

---

#### COVID-19 & Ukraine War Impact

The effects of COVID-19 and the Russia Ukraine war have weighed heavily on the global economy in recent years. The sudden shutdown of the world because of the pandemic as well as the irregular nature of the recovery, coupled with the war hugely impacted global growth and inflation.

The re-opening of the global economy, supply chain bottlenecks and the surge in commodity price inflation due to the war in Ukraine triggered a subsequent rise in inflation to levels not seen since the 1970s and caused central banks to raise rates aggressively. These events together triggered high volatility levels in both equity and bond markets as they made the global economy more susceptible to an economic downturn.

While the war in Ukraine continues, geopolitical tensions will remain high and there is always a possibility of further escalation. Encouragingly, there are signs that while both COVID and the war are still affecting global growth, the impacts are starting to dissipate.

Commodity prices have started to stabilise and are returning to pre-invasion levels. As a result, inflation is also falling, albeit from very high levels. At the start of the year, China also re-opened its economy bringing an end to its zero-Covid policy. As the world's second largest economy reopens, there are signs of a recovery and easing supply chain pressures which again is helping global growth and easing inflation pressure.

The direction of post Covid recovery is largely dependent on the ability to control inflation. If another inflation surge occurs, it could lead to a contraction of the global economy and further market losses. As such, it is important for policymakers to closely monitor the situation and take action to ensure stability and prevent another economic downturn. They must take steps to support the recovery, while also addressing the long-term challenges facing the global economy. This may include measures to improve the stability of the financial system, support businesses and workers, and promote sustainable growth.

The Board of Directors of the Manager regards these events for the Fund and its Sub-Funds as non-adjusting events after the reporting period. Although neither the Fund's nor its Sub-Funds' going concern status, nor operations, at the date of this report, have been significantly impacted by the above, the Board of Directors of the Manager continues to monitor the evolving situation and its impact on the financial position of the Fund and of their Sub-Funds.

In this environment there could potentially be an adverse impact on the value of the Fund's investments and the ability of the Manager to access markets or implement the Fund's investment policy in the manner originally contemplated. Government interventions or other limitations or bans introduced by regulatory authorities or exchanges and trading venues as temporary measures in light of significant market volatility, may also negatively impact on the Manager's ability to implement the Fund's investment policy. Russian securities under sanction which have been marked down by the Manager are identified within the "Schedule of Investments" section related to each Sub-Fund. The Fund's access to liquidity could also be impaired in circumstances where the need for liquidity to meet redemption requests may rise significantly.

#### Net Asset Value Adjustment

The NAV of the Sub-Fund in the financial statements Mediolanum Carmignac Strategic Selection as of December 31, 2022 differs from the originally published NAV. Performance fee rebate had been incorrectly accounted for resulting in an NAV understatement of EUR 1,473,430.

The NAV of the Sub-Fund in the financial statements European Collection as of December 31, 2022 differs from the originally published NAV. The fair value in collective investment scheme had been incorrectly accounted for resulting in an NAV overstatement of EUR 2,790,266.

## NOTES TO THE FINANCIAL STATEMENTS (continued)

### Note 26 – Subsequent Events

It is with much regret that we must inform you of the untimely passing of our Non Executive director Mr John Corrigan on March 30, 2023. Mr Corrigan was a valued member of our Board having serving from February 24, 2020. His contribution, skill and expertise will be greatly missed by our Board of Directors.

#### Appointment of Delegate Investment Managers

Effective March 31, 2023, PGIM Limited was appointed as Delegate Investment Manager for Emerging Markets Fixed Income.

Effective April 14, 2023, Sands Capital Management LLC was appointed as Delegate Investment Manager for Mediolanum Innovative Thematic Opportunities.

Effective April 21, 2023, FountainCap Research & Investment (Hong Kong) Co. was appointed as Delegate Investment Manager for Chinese Road Opportunity.

There were no other subsequent events which require disclosure in the financial statements.

## APPENDIX – Additional Information (Unaudited)

---

### 1) UCITS V Remuneration Policy

In line with the requirements of the UCITS Regulations, the Manager of the Fund adopted a remuneration policy (the “Remuneration Policy”) which is consistent with the principles outlined in the European Securities and Markets Authority (“ESMA”) Guidelines on sound remuneration policies under the UCITS Directive.

The Directors of the Manager not affiliated with the Investment Manager (the “Independent Directors”) receive a fixed annual fee which is competitive and based on the individual Director’s powers, tasks, expertise and responsibilities. Directors that are employees of the Investment Manager or an affiliate are not paid any fees for their services as Director.

The Manager has designed and implemented a remuneration policy which is consistent with and promotes sound and effective risk management by having a business model which by its nature does not promote excessive risk taking that is inconsistent with the risk profile of the Manager or the Trust Deed nor impair compliance with the Manager’s duty to act in the best interests of the Fund. The Manager’s remuneration policy is consistent with the Fund’s business strategy, objectives, values and interests of the Manager, the Fund and the Unitholders of the Fund and includes measures to avoid conflicts of interest.

The Manager has policies in place in respect of the remuneration of senior members of staff, staff who are involved in any control functions, staff who receive remuneration equivalent to senior management or risk takers where their activities have a material impact on the risk profiles of the Manager or the Fund.

In line with the provisions of Directive 2014/91/EU and as may be amended from time to time, the Manager applies its remuneration policy and practices in a manner which is proportionate to its size and that of the Fund, its internal organisation and the nature, scope and complexity of its activities.

Where the Manager delegates investment management functions in respect of the Fund or any Sub-Fund of the Fund, it will, in accordance with the requirements of the ESMA Guidelines on Sound Remuneration Policies under the UCITS Directive (ESMA/2016/575), ensure that with effect from 1 January 2017:

- a. the entities to which investment management activities have been delegated are subject to regulatory requirements on remuneration that are equally as effective as those applicable under the ESMA Remuneration Guidelines; or
- b. appropriate contractual arrangements are put in place to ensure that there is no circumvention of the remuneration rules set out in the ESMA Remuneration Guidelines.

Details of the remuneration policy of the Manager including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits will be available at [www.mifl.ie](http://www.mifl.ie) and a paper copy will be made available free of charge upon request.

Total remuneration paid to the staff of the Manager of the Fund fully or partly involved in the activities of the Fund that have a material impact on the Fund’s risk profile during the financial year to December 31, 2022:

<b><u>Fixed remuneration</u></b>	<b>2022</b>
Senior Management	€1,840,296
Directors	€235,000
<b><u>Variable remuneration</u></b>	
Senior Management	€617,500
Directors	-
Total remuneration paid	€2,457,796
No of Identified staff	9
No of Directors of the Manager	9

## APPENDIX – Additional Information (Unaudited) (continued)

### 2) Securities Financing Transactions Regulation Disclosures

#### i) Securities Lending

A Sub-Fund may utilise stocklending agreements. In such transaction the Sub-Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Sub-Fund at pre-agreed time. In entering into such transactions the Sub-Fund will endeavour to increase the returns on its portfolio of securities by receiving a fee for making its securities available to the borrower.

In the context of stocklending arrangements, after deduction of such other relevant amounts as may be payable under the relevant securities lending authorisation agreement, all proceeds collected on fee income arising off the securities lending programme shall be allocated between the relevant Sub-Fund and the Securities Lending Agent in such proportions (plus VAT, if any) as may be agreed in writing from time to time and disclosed in the annual report of the Fund. All costs or expenses arising in connection with the securities lending programme, including the fees of the Trustee, should be borne by the relevant Sub-Fund, the Securities Lending Agent and any sub-agent appointed by the Securities Lending Agent in such proportions as may be agreed in writing from time to time and disclosed in the annual report of the Fund.

There are securities lending agreements in place for US Collection, European Collection, Emerging Markets Collection, Euro Fixed Income, Global High Yield, Premium Coupon Collection, Dynamic Collection, Equity Power Coupon Collection, Mediolanum Morgan Stanley Global Selection, Emerging Markets Multi Asset Collection, Coupon Strategy Collection, New Opportunities Collection, Infrastructure Opportunity Collection, Mediolanum Invesco Balanced Risk Coupon Selection, Socially Responsible Collection, Financial Income Strategy, Equilibrium, Mediolanum Fidelity Asian Coupon Selection, European Coupon Strategy Collection, US Coupon Strategy Collection, Dynamic International Value Opportunity, Mediolanum Innovative Thematic Opportunities, European Small Cap Equity, Chinese Road Opportunity, Global Leaders, Mediolanum Global Demographic Opportunities and Mediolanum Global Impact.

As at December 31, 2022 only the Sub-Funds in the following table had securities on loan.

Sub-Fund	Market Value of Loans (EUR)	Collateral (EUR)	Total net assets (EUR)	(%) of net assets
Global High Yield	13,160,004	13,820,245	2,053,789,084	0.67
Mediolanum Morgan Stanley Global Selection	56,915,584	59,774,747	4,718,885,474	1.27
Infrastructure Opportunity Collection	3,207,359	3,368,088	518,601,895	0.65
Dynamic International Value Opportunity	9,275,213	9,741,505	1,256,168,858	0.78
Mediolanum Innovative Thematic Opportunities	593,443	623,133	1,400,374,852	0.04
European Small Cap Equity	5,403,598	5,674,610	348,964,800	1.63
Chinese Road Opportunity	7,170,165	7,548,517	1,568,873,272	0.48

#### Safekeeping of Collateral Granted

Collateral held in segregated accounts (%)	Collateral held in pooled accounts (%)	Collateral held in other accounts (%)
100.00	-	-

#### ii) Total Return Swaps

In respect of securities and securities indices a Sub-Fund may utilise total return swap contracts where the Sub-Fund may exchange floating interest rate cash flows for fixed cash flows based on the total return of an equity or fixed income instrument or a securities index or fixed cash flow based on total return of an equity or fixed income instrument or a securities index for floating interest rate cash flows. These contracts allow a Sub-Fund to manage its exposures to certain securities or securities indexes. For these instruments the Sub-Fund's return is based on the movement of interest rates relative to the return on the relevant security of index.

As at December 31, 2022, the Sub-Fund Global High Yield had entered into the following total return swap contract:

Sub-Fund	Collateral Amount EUR	Collateral Currency	Notional	Sub-Fund Currency	Underlying/ issuer	Pay/Receive	Maturity date	Counterparty	Net unrealised appreciation/ (depreciation) EUR
Global High Yield	-	-	64,000,000	EUR	IBOXHY	Pay	June 20, 2023	BNP Paribas	(839,487)

The total return swap agreements foresee the exchange of collateral with the counterparties based on contracts fair value; the collateral can be in form of cash, shares or bonds.

## **APPENDIX – Additional Information (Unaudited) (continued)**

---

### **3) Cybersecurity Risk**

Cybersecurity breaches may occur allowing an unauthorised party to gain access to assets of the Sub-Funds, Unitholder data, or proprietary information, or may cause the Fund, the Manager, the Delegate Investment Managers, the Distributors, the Paying Agents, the Administrator or the Trustee to suffer data corruption or lose operational functionality.

The Fund may be affected by intentional cybersecurity breaches which include unauthorised access to systems, networks, or devices (such as through “hacking” activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws). A cybersecurity breach could result in the loss or theft of Unitholder data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs. Such incidents could cause the Fund, the Manager, the Distributors, the Administrator, the Trustee, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Unitholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which a Sub-Fund invests, and thereby cause a Sub-Fund’s investments to lose value, as a result of which investors, including the relevant Sub-Fund and its Unitholders, could potentially lose all or a portion of their investment with that issuer.

Comprehensive enterprise technology solutions are in place to protect from multiple different types of cyber threat, external or internal. We leverage next generation firewalls with IPS/IDS, Layer 7 Web application firewalls, Intelligent Antivirus and Antimalware with proactive threat response. All our security metrics are ingested into our SIEM (Security Information and Event Management) solution, which is constantly monitored by dedicated security professionals. Mediolanum International Funds Limited also have independent certification validating our security posture with ISO 27001, the international standard on information security management.

### **4) Fund Distributions**

The Prospectus of the Fund states: “Where the amount of any distribution payable to an individual “B” Unitholder is between Euro 0.05 and Euro 5, that amount shall not be distributed but shall be automatically reinvested in the relevant Class of Units. Where the distribution payable is below Euro 0.05, that amount shall not be distributed but shall be retained and reinvested within and for the benefit of the relevant Sub-Fund”.

During 2020 the Manager reinvested for the benefit of individual “B” Unitholders distribution amounts between Euro 0.05 and Euro 5. Distributions below Euro 0.05 were not be reinvested on behalf of individual “B” Unitholders but were retained and reinvested within and for the benefit of the relevant Sub-Fund.

### **5) Mediolanum International Funds Ltd - CRS Data Protection Information Notice**

The Fund hereby provides the following data protection information notice to all Unitholders in the Fund either as at 31 December 2015 or at any point of time since this date.

For the avoidance of doubt, this notice applies equally to any Unitholders that have ceased to hold units in the Fund since January 1, 2016. Furthermore, it should be noted that this notice may be applicable to Controlling Persons of certain Unitholders.

The Fund hereby confirms that they intend to take such steps as may be required to satisfy any obligations imposed by (i) the OECD’s Standard for Automatic Exchange of Financial Account Information in Tax Matters (“the Standard”), which therein contains the Common Reporting Standard (“CRS”), as applied in Ireland by means of the relevant international legal framework and Irish tax legislation and (ii) EU Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange information in the field of taxation (“DAC2”), as applied in Ireland by means of the relevant Irish tax legislation, so as to ensure compliance or deemed compliance (as the case may be) with the Standard/CRS and the DAC2 from 1 January 2016.

In this regard, the Manager on behalf of the Fund is obliged under Section 891F and Section 891G of the Irish Taxes Consolidation Act, 1997 (as amended) and regulations made pursuant to those sections to collect certain information about each Unitholder’s tax arrangements (and also collect information in relation to relevant Controlling Persons of specific Unitholders).

## APPENDIX – Additional Information (Unaudited) (continued)

### 5) Mediolanum International Funds Ltd - CRS Data Protection Information Notice (continued)

In certain circumstances, the Manager on behalf of the Fund may be legally obliged to share this information and other financial information with respect to a Unitholder's interests in the Fund with the Irish Revenue Commissioners (and, in particular situations, also share information in relation to relevant Controlling Persons of specific Unitholders). In turn, and to the extent the account has been identified as a Reportable Account, the Irish Revenue Commissioners will exchange this information with the country of residence of the Reportable Person(s) in respect of that Reportable Account.

In particular, information that may be reported in respect of a Unitholder (and relevant Controlling Persons, if applicable) includes name, address, date of birth, place of birth, account number, account balance or value at year end (or, if the account was closed during such year, the balance or value at the date of closure of the account), any payments (including redemption and dividend/interest payments) made with respect to the account during the calendar year, tax residency(ies) and tax identification number(s).

Unitholders (and relevant Controlling Persons) can obtain more information on the Fund's tax reporting obligations on the website of the Irish Revenue Commissioners (which is available at <http://www.revenue.ie/en/business/aeoi/index.html>) or the following link in the case of CRS only: <http://www.oecd.org/tax/automatic-exchange/>.

All capitalised terms above, unless otherwise defined above, shall have the same meaning as they have in the Standard or DAC2 (as applicable).

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures

Unless a Sub-Fund promotes environmental or social characteristics, or have as its objective sustainable investment, the underlying investments do not take into account the EU criteria for environmentally sustainable economic activities.

If a Sub-Fund promotes environmental or social characteristics, or have as its objective sustainable investment, it may invest/gain exposure to issuers who engage in economic activities which contribute to climate change mitigation/climate change adaptation under the Taxonomy Regulation. In such cases, additional information in relation to Taxonomy Regulations can be found in the Sub-Funds' Periodic Annex disclosures.

As at December 31, 2022, the following Sub-Funds consider Environment, Social and Governance (ESG) criteria as part of their investment strategy:

Sub-Fund	ESG classification
Socially Responsible Collection	Article 8
Mediolanum Carmignac Strategic Selection	Article 8
Mediolanum Invesco Balanced Risk Coupon Selection	Article 8
Mediolanum Innovative Thematic Opportunities	Article 8
Mediolanum Multi Asset ESG Selection	Article 8
Mediolanum Global Impact	Article 9
Mediolanum Circular Economy Opportunities	Article 9
Mediolanum Energy Transition	Article 9

# APPENDIX – Additional Information (Unaudited) (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands  
 Legal entity identifier: 6354003ZAAEMN5JPEJ22

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Manager held 100% of the Sub-Fund's Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The Sub-Fund promoted 100%, excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes, of environmental and social characteristics as monitored by the sustainability indicators as set out below in this Annex. For this Annex, while 16% of the portfolio was also invested in ETFs (with Article 8 and Article 9 classifications), the realised percentages of environmental and social characteristics promoted and realised values of sustainable investment percentages achieved, for the reference period, are not available for these ETFs, at time of preparation of this annex. They have therefore been excluded from all calculations in this Annex. The Manager aggregated the portfolio scores, taking each third-party asset manager's calculations into consideration.

The ESG promotion of the fund has been achieved by each of the third-party asset managers using a variety of approaches including:

- an Exclusion Policy to exclude investments in companies exposed to controversial behaviour or products; application of an enhanced engagement program for any security found in breach of any of the International Labour Organisation standards, UN Guiding Principles, UN Global Compact or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; limiting exposure to securities in the portfolio with an elevated sustainability risk based on proprietary rating tools, monitoring of the weighted carbon, water and waste footprint, and ESG score;
- maintaining a weighted average carbon intensity level to achieve long term net zero carbon intensity by 2050 through restriction of investment in companies with threshold percentages of investment in fossil fuels related activity.
- a proprietary ESG rating framework defined by the four pillars: Environment, Social, Governance and Controversies and a commitment to maintaining at least 50% of the portfolio at a specific internal rating aligned with the four pillars.
- seeking to invest in sustainable investments by investing in companies whose economic activity contributes positively to or does not significantly harm the achievement of one or more of the UN Sustainable Development Goals (SDGs) and/or reduces the risk of not achieving one or more of the UN SDGs.
- A proprietary ESG framework based on ESG risk rating methodology, ESG engagement and ESG screening.

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining the characteristics being promoted.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the average of the quarterly scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset managers, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager(s) seeking to reverse any negative trend over time.

PAI	Q1	Q2	Q3	Q4	Reference Period Average
<b>GHG emissions</b> tCO <sub>2</sub> e (Table 1, PAI 1)	83,896	74,312	76,136	77,165	77,877
<b>Carbon footprint</b> tCO <sub>2</sub> e/ EUR million EVIC (Table 1, PAI 2)	297	275	277	265	279
<b>GHG intensity of investee companies</b> tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	965	879	807	785	859
<b>Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises</b> (Table 1, PAI 10)	1	1	0	0	0
<b>Lack of a human rights policy</b> (Table 3, PAI 9)	6	6	6	6	6

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

#### ● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

During the reporting period 1 January 2022 to 31 December 2022, the Sub-Fund was partially invested in sustainable investments. The aggregate number of sustainable investments invested by the Sub-Fund calculated by the Manager taking into consideration each third-party asset manager's calculation was 86% of Sub-Fund assets which exceeded the minimum commitment to sustainable investments as set out in the Sub-Fund's pre-contractual supplement as 20% of Sub-Fund assets.

The approach taken by the third-party asset managers to achieve the sustainable investment objectives of their respective strategies was to:

- Utilise a proprietary UN SDG framework tool used to assess individual companies on key SDG targets to construct a sustainable investment portfolio that pursues positive impact and avoids negative impact. The sustainable investments contributed to one or more of the UN SDGs which include both social and environmental objectives as referred to in art 2(17) SFDR.
- Invest in sustainable investments by investing in companies whose economic activity contributes positively to or does not significantly harm the achievement of one or more of the UN SDGs and/or reduces the risk of not achieving one or more of the UN SDGs.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to five third-party asset managers during the period, it reviewed how each third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

This Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities for EU Taxonomy (Regulation (EU) 2020/852). See below for details regarding the extent to which the Sub-Fund's investments were nevertheless in economic activities, which aligned with EU Taxonomy during the period.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset managers appointed by the Manager considered the fourteen indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset managers appointed by the Manager to manage the Sub-Fund during the period considered the fourteen mandatory indicators on greenhouse emissions, biodiversity, water, waste and social indicators with reference to the companies in which the Sub-Fund invests in order to show that they sustainable investments did no significant harm to any of these indicators.

The third-party asset managers provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

Accordingly, the Manager noting the availability of data points for the PAI indicators that they third-party asset managers demonstrated that the sustainable investments of the companies did not significantly harm (“DNSH”) any of these environmental or social objectives. The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the Sub-Fund using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1<sup>st</sup> January 2022 to 31<sup>st</sup> December 2022.

Largest investments	Sector	% Assets	Country
Republique Francaise	Government bond	1.7	France
ELI LILLY AND COMPANY	Health Care	1.6	United States of America
UNITEDHEALTH GROUP INCORPORATED	Health Care	1.6	United States of America
CHENIERE ENERGY, INC.	Energy	1.4	United States of America
BANK OF AMERICA CORPORATION	Financials	1.3	United States of America
European Union	Government bond	1.2	Supranational
Deutsche Boerse Aktiengesellschaft	Financials	1.2	Germany
RELX PLC	Technology	1.2	UK
ELI LILLY AND COMPANY	Health Care	1.6	United States of America
UNITEDHEALTH GROUP INCORPORATED	Health Care	1.6	United States of America
CHENIERE ENERGY, INC.	Energy	1.4	United States of America
BANK OF AMERICA CORPORATION	Financials	1.3	United States of America
European Union	Government	1.2	Supranational
Deutsche Boerse Aktiengesellschaft	Financials	1.2	Germany
RELX PLC	Technology	1.2	UK

#### What was the proportion of sustainability-related investments?

The Sub-Fund's proportion of sustainability-related investments amounted to 86% of its assets.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

Based on the data as of 31 December 2022, 100% (excluding cash, ETFs, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were aligned with E/S characteristics and 86% of those investments were classified as sustainable investments, 11% with an environmental objective and 75% with a social objective.

## APPENDIX – Additional Information (Unaudited) (continued)

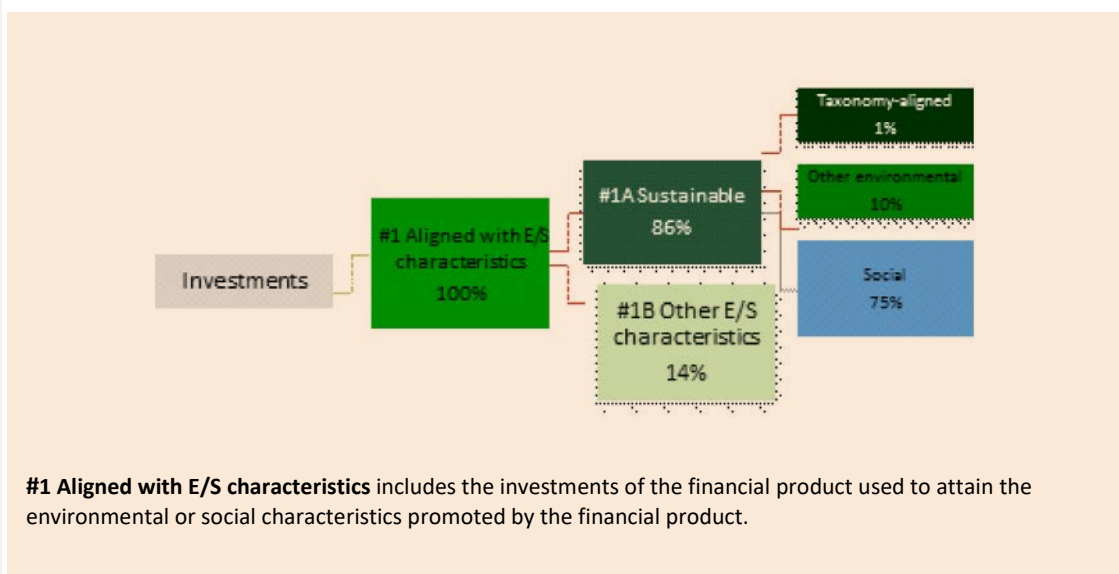

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### ● *In which economic sectors were the investments made?*

The following tables consist of the Sub-Fund's exposure to sub-sectors during the period, using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

	Average exposure in % over the reporting period
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	
	3.7
<b>Other Sectors</b>	
Consumer, Non-cyclical	17.9
Financial	16.3
Technology	12.7

Consumer, Cyclical	7.2
Communications	6.9
Energy	3.6
Basic Materials	2.9
Utilities	2.0

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with EU Taxonomy was 1%.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

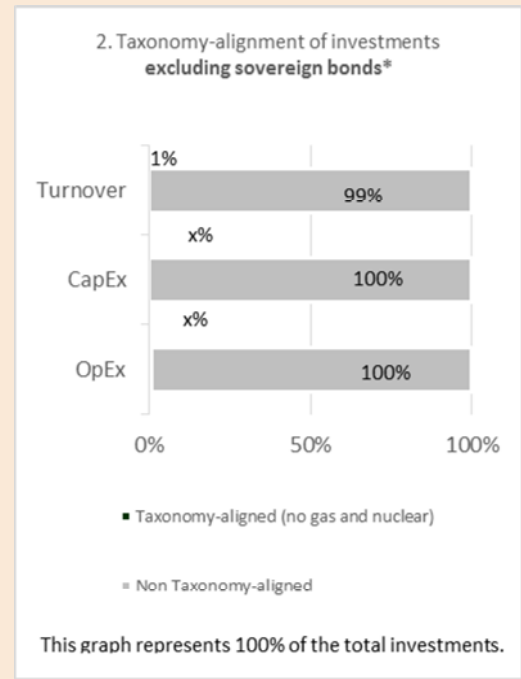

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 10%. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Socially Responsible Collection, a sub-fund of Mediolanum Best Brands (continued)

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 75% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” investments include the remaining investments which are neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They are investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They are excluded from the Sub-Fund’s ESG exposure calculation.

There are no minimum environmental or social safeguards for such investments.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken by the third-party asset managers in the Sub-Fund to meet the environmental and social characteristics during the reference period, include:

- Improving the overall sustainability profile by focusing on material ESG factors. In addition, the third-party asset manager is in active engagement with over half of the holdings regarding topics related to ESG issues.
- The third-party asset-manager uses proprietary compliance screening processes to monitor the binding environmental and social characteristics elements of its investment objective. The third-party asset manager actively engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the third-party asset manager engaged with 154 companies.
- The third-party asset manager engaged both on an individual and collaborative level during the reference period seeking to improve companies’ products and practices from an ESG perspective.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands

Legal entity identifier: 635400RNV7YAAQOZM763

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

**No**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35%** of sustainable investments\*

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

\*indirectly through investment in eligible collective investment scheme(CIS) that include the third party asset manager's own range of CIS and less frequently externally managed CIS ("Eligible CIS"). See section "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Manager held 100% of the Sub-Fund's Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The Sub-Fund promoted 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of environmental and social characteristics as monitored by the sustainability indicators as set out below in this Annex.

The third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets ensured that investments made had exposure to companies, issuers and/or collective investment schemes which, in addition to economic and financial objectives, promote environmental, social and/or governance ("ESG") factors through the integration of extra-financial risk assessment using the third-party asset manager's proprietary ESG scoring and research system. The third-party asset manager also sought to promote the mitigation of and adaptation to climate change.

To achieve this, the third-party asset manager applied an exclusion policy which provides for company exclusions and threshold tolerances for activities in areas such as controversial weapons, tobacco, adult entertainment, thermal coal producers and power generating companies. This exclusion policy provided for further norms-based screening, i.e., the exclusion of companies that breached international global standards, such as the United Nations Global Compact (UNGC) principles, and the International Labour Organisations (ILO) Declaration on Fundamental Principles. The third-party asset manager also promoted environmental and social characteristics of the Sub-Fund through company dialogue and voting, to influence companies' best practices of environmental and social related policies and themes. No breach of environmental and social characteristics promoted have been identified during the year.

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

The reference period for this Sub-Fund is 9 November 2022 (reclassification to Article 8) to 31st December 2022.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining the characteristics being promoted.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

**Sustainability indicators**  
measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the quarter-end scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager, seeking to reverse any negative trend over time.

PAI	Q4 (Reference Period)
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	105,313
GHG intensity of investee companies tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	1,170
Exposure to companies active in the fossil fuel sector (Table 1 PAI 4)	8
Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Table 1, PAI 10)	2

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

#### ● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

During the reporting period 9 November 2022 (Sub-Fund classified as Article 8) to 31 December 2022, the Sub-Fund was partially invested in sustainable investments. The Sub-Fund's proportion of sustainable investments during the reference period was 35% which exceeded the minimum commitment to sustainable investments as set out in the Sub-Fund's pre-contractual supplement as 1%.

The approach taken by the third-party asset manager to achieve the sustainable investment objectives included indirect investing in companies displaying a threshold revenue aligned percentage from goods and services related to business activities which align positively with a selection of the UN Sustainable Development Goals (SDGs), indirect investment in corporate and sovereign debt investments that are classified as green, social, sustainable or sustainability-linked bonds and adhere to recognised EU sustainable bond standards and other sustainable investments may have included indirect investments in companies whose activities are eligible to the EU Taxonomy, i.e., environmentally sustainable investments, which may contribute to climate change mitigation and adaptation in addition to specific carbon emissions target. The Sub-Fund does not however commit to a minimum Taxonomy alignment objective.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset manager's definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to a third-party asset manager during the period, it reviewed how the third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SDFR.

This Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities for EU Taxonomy (Regulation (EU) 2020/852).

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset manager appointed by the Manager considered the fourteen indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset manager also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and exclude companies which are in violation or severe material breach of these principles.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset manager appointed by the Manager to manage the Sub-Fund during the period considered the sixteen mandatory indicators (including 2 PAIs applicable specifically to sovereigns) as listed in Annex I to Delegated Regulation 2022/1288, as well as two voluntary PAIs: unadjusted gender pay gap, as well as water usage and recycling, in accordance with Article 7(1)(a) of SFDR.

The third-party asset manager provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional mandatory PAI indicators for real estate did not apply to the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the Sub-Fund using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on the value of investments traded and held at quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 9th November 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
United States of America	Government	3.6	United States of America
Repubblica Italiana	Government	2.8	Italy
Bundesrepublik Deutschland	Government	2.4	Germany
Canada	Government	1.7	Canada
HERMES INTERNATIONAL S.C.A.	Consumer Discretionary	1.3	France
MICROSOFT CORPORATION	Technology	1.3	United States of America
Petroleos Mexicanos	Energy	1.3	Mexico
Reino de Espana.	Government	1.2	Spain
NOVO NORDISK A/S	Health Care	1.2	Denmark
Schlumberger N.V.	Energy	1.1	United States of America
ELEVANCE HEALTH, INC.	Health Care	1.1	United States of America
JD.COM, INC.	Consumer Discretionary	1.0	China
AMAZON.COM, INC.	Consumer Discretionary	0.9	United States of America
Airbus SE	Industrials	0.9	France
ELI LILLY AND COMPANY	Health Care	0.9	United States of America

#### What was the proportion of sustainability-related investments?

The Sub-Fund’s proportion of sustainability-related investments amounted to 35% of its assets.

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

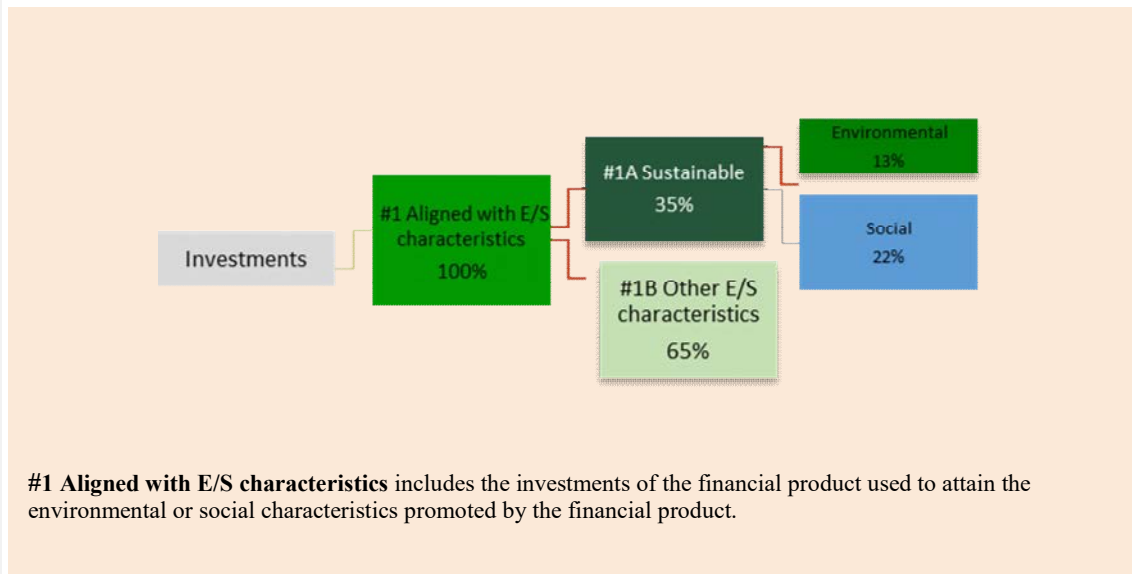

Based on the data as of 31 December 2022, 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were aligned with E/S characteristics and 35% of those investments were classified as sustainable investments, 13% with an environmental objective and 22% with a social objective.

This calculation excluded other investments comprised of cash, cash equivalents held for ancillary liquidity, derivatives used for hedging purposes, which did not contribute to the attainment of E/S characteristics and were not subject to any minimum environmental or social safeguards.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

The following tables consist of the Sub-Fund’s exposure to sub-sectors during the period, using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented has been calculated by the Manager based on the value of investments traded and held at the quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

	Average exposure in % over the reporting period
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	
Government	26.0
Financial	16.7
Consumer, Non-cyclical	14.3
Industrial	7.3
Communications	7.0
Technology	6.1
Consumer, Cyclical	5.7
Energy	3.7
Basic Materials	2.4

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with EU Taxonomy was 0%.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>2</sup>?

- Yes:
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Carmignac Strategic Selection, a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

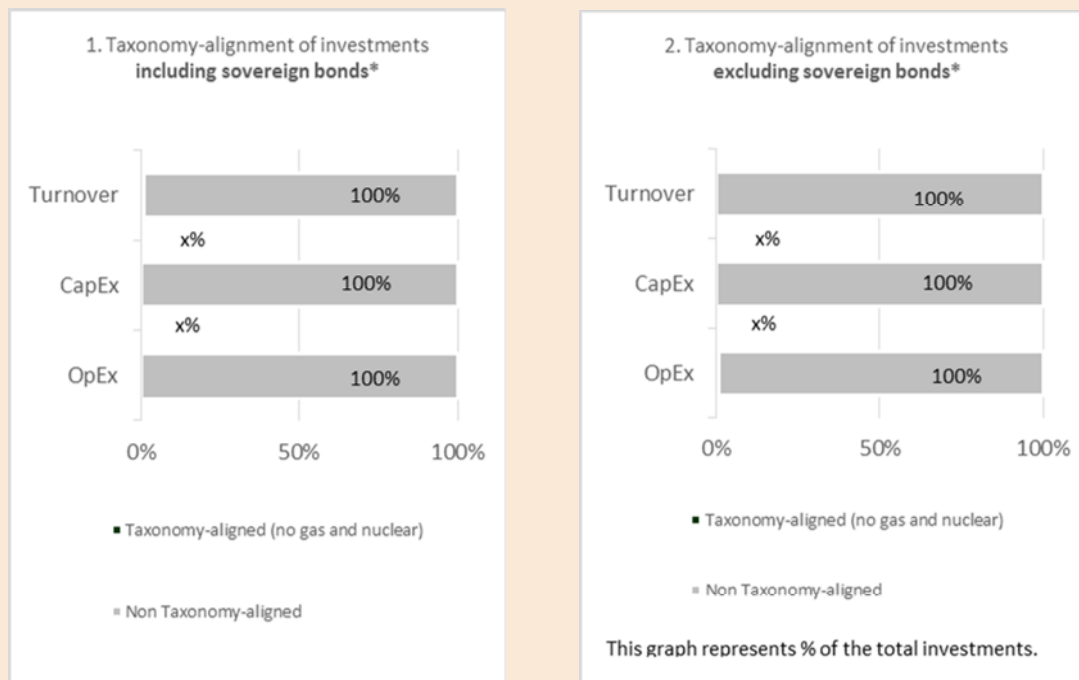

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 13%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: **Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)**

#### **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Manager held 100% of the Sub-Fund's Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The Sub-Fund promoted 100% (excluding cash, cash equivalents and certain derivatives for hedging and efficient portfolio management purposes) of environmental and social characteristics as monitored by the sustainability indicators as set out below in this Annex.

The third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets sought to ensure that investments made had exposure to companies, issuers and/or collective investment schemes which in addition to economic and financial objectives, promote environmental, social and/or governance ("ESG") factors, using the third-party asset manager's proprietary ESG framework, engagement and exclusion policies.

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

The reference period for this Sub-Fund is 9 November 2022 (reclassification to Article 8) to 31st December 2022.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining the characteristics being promoted.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: **Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the quarter-end scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager, seeking to reverse any negative trend over time.

PAI	Q4 (Reference Period)
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	177,716
Carbon footprint tCO <sub>2</sub> e/ EUR million EVIC (Table 1, PAI 2)	267
GHG intensity of investee companies tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	798
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	177,716
Exposure to companies active in the fossil fuel sector (Table 1 PAI 4)	7
Share of non-renewable energy consumption and production (Table 1 PAI 5)	69
Energy consumption intensity per high impact climate sector GWh/ EUR million (sum of NACE Codes) (Table 1 PAI 6)	12

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

#### ● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

During the reporting period 9 November 2022 (Sub-Fund classified as Article 8) to 31 December 2022, the Sub-Fund was partially invested in sustainable investments. The Sub-Fund's proportion of sustainable investments during the reference period was 21%, which exceeded the minimum commitment to sustainable investments as set out in the Sub-Fund's pre-contractual supplement as 1%.

The approach taken by the third-party asset manager to achieve the sustainable investment objectives included following a "Best in Class Approach" to identify issuer who meet or exceed the third-party asset manager's proprietary climate threshold for inclusion, the use of third-party data providers to assist in identifying issuers that generate at least 25% of the revenue from operations aligned to the UN Sustainable Development Goals (SDGs) and following an exclusion policy to exclude for any security not meeting the do no significant harm principle.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to a third-party asset manager during the period, it reviewed how the third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

This Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities for EU Taxonomy (Regulation (EU) 2020/852). See below for details regarding the extent to which the Sub-Fund's investments were nevertheless in economic activities, which aligned with EU Taxonomy during the period.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset manager appointed by the Manager considered the fourteen indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset manager also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and exclude companies which are in violation or severe material breach of these principles.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset managers appointed by the Manager to manage the Sub-Fund during the period considered the fourteen mandatory indicators as listed in Annex I to Delegated Regulation 2022/1288, as well as two voluntary PAI indicators.

The third-party asset manager provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the Sub-Fund using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on the value of investments traded and held at quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 9th November 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
United States of America	Government	17.2	United States of America
APPLE INC.	Technology	2.5	United States of America
MICROSOFT CORPORATION	Technology	2.3	United States of America

UNITEDHEALTH GROUP INCORPORATED	Health Care	0.6	Taiwan, Province of China
TESLA, INC.	Consumer Discretionary	0.5	United States of America
THE COCA-COLA COMPANY	Consumer Staples	0.5	United States of America
JPMORGAN CHASE & CO.	Financials	0.4	United States of America
PepsiCo, Inc.	Consumer Staples	0.4	United States of America
THE PROCTER & GAMBLE COMPANY	Consumer Staples	0.4	France
THE HOME DEPOT, INC.	Consumer Discretionary	0.4	United States of America

#### What was the proportion of sustainability-related investments?

The Sub-Fund’s proportion of sustainability-related investments amounted to 21% of its assets.

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: **Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)**

### Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

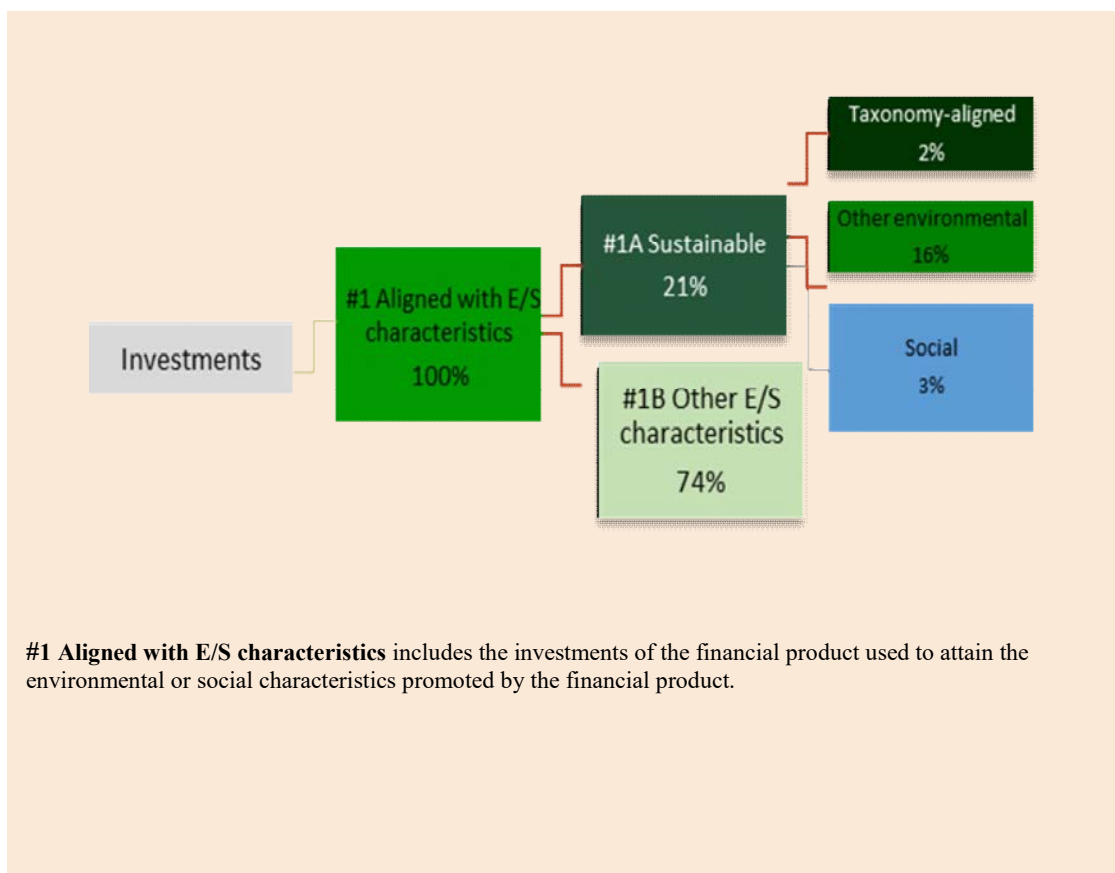

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What was the asset allocation?

Based on the data as of 31 December 2022, 100% (excluding cash, cash equivalents and certain derivatives for hedging and efficient portfolio management purposes) of the investments of the Sub-Fund were aligned with E/S characteristics and 21% of those investments were classified as sustainable investments, 18% with an environmental objective and 3% with a social objective.

This calculation excluded other investments comprised of cash, cash equivalents held for ancillary liquidity, ETFs, derivatives used for hedging purposes, which did not contribute to the attainment of E/S characteristics and were not subject to any minimum environmental or social safeguards.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: **Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)**

#### ● *In which economic sectors were the investments made?*

The following tables consist of the Sub-Fund's exposure to sub-sectors during the period, using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented has been calculated by the Manager based on the value of investments traded and held at the quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

	Average exposure in % over the reporting period
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	
Oil & Gas Equipment & Services	0.2
Integrated Oil & Gas	0.7
Oil & Gas Exploration & Production	0.5
Oil & Gas Refining & Marketing	0.5
Oil & Gas Storage & Transportation	0.1
Coal & Consumable Fuels	0.2
<b>Other Sectors</b>	
Financial	17.8
Consumer, Non-cyclical	15.1
Government	12.5
Technology	11.3
Industrial	8.7
Consumer, Cyclical	8.6
Communications	7.0
Utilities	6.0
Basic Materials	3.2
Energy	2.5

#### **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with EU Taxonomy as calculated by the third-party asset manager was 2%. Using third-party taxonomy-alignment data, this percentage was calculated by multiplying percentage of EU Taxonomy alignment of each issuer by the percent of holdings that the issuer has. Data as of 31 December 2022. This figure does not constitute a minimum commitment.

#### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas     In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

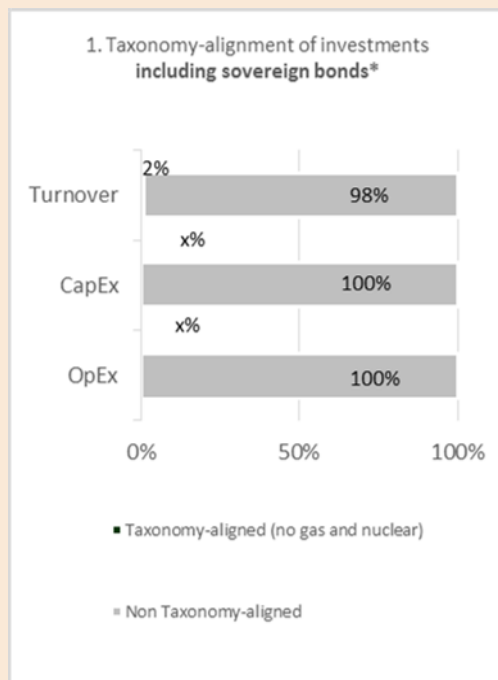

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 16%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Invesco Balanced Risk Coupon Selection, a sub-fund of Mediolanum Best Brands (continued)

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 3% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” investments include the remaining investments which are neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They are investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They are excluded from the Sub-Fund’s ESG exposure calculation.

There are no minimum environmental or social safeguards for such investments.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets, ensured through adherence to their exclusion policy, engagement and monitoring and assessment using their proprietary framework that the Sub-Fund was invested in companies, issuers and/or collective investment schemes which in addition to economic and financial objectives, promoted environmental, social and/or governance ("ESG") factors.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

 Legal entity identifier: 635400LQ5JBNL6SNQK45

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ___%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>70%</b> of sustainable investments</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

#### **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Manager held 100% of the Sub-Fund’s Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund’s assets managed by its selected third-party asset managers and collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The Sub-Fund promoted 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of environmental and social characteristics as monitored by the sustainability indicators as set out below in this Annex. The Manager aggregated the portfolio score taking each third-party asset manager’s calculation into consideration.

The ESG promotion by the Sub-Fund has been achieved by the third-party asset managers using a variety of approaches including:

- an Exclusions Policy to exclude investments in companies exposed to controversial behaviour or products; application of an enhanced engagement program for any security found in breach of any of the International Labour Organisation standards (ILO), UN Guiding Principles (UNGPs), UN Global Compact (UNGC) or Organisation for Economic Co-operation (OECD) Guidelines for Multinational Enterprises.
- limiting exposure to securities in the portfolio with an elevated sustainability risk based on proprietary rating tools.
- analysis of company fundamentals that also consideration of ESG criteria; engagement policies for the promotion of transitioning to a low carbon economy; exposure to securities that promote ESG characteristics including climate change and board gender diversity.

In respect of such portion of the Sub-Fund’s portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund’s assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining the characteristics being promoted.

#### ***How did the sustainability indicators perform?***

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the quarter-end scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager, seeking to reverse any negative trend over time.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

PAI	Q1	Q2	Q3	Q4	Reference Period Average
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	148,531	143,408	173,749	187,430	163,279
Carbon footprint tCO <sub>2</sub> e/ EUR million EVIC (Table 1, PAI 2)	111	115	134	133	123
GHG intensity of investee companies tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	521	534	541	631	557
Hazardous waste and radioactive waste ratio (Table 1, PAI 9)	2	0	0	183	46

Board Gender Diversity (Table 1, PAI 13)	32	32	33	34	33

● **...and compared to previous periods?**

Not applicable for this first reporting period

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period 1 January 2022 to 31 December 2022, the Sub-Fund was partially invested in sustainable investments. The aggregate percentage of sustainable investments invested by the Sub-Fund calculated by the Manager taking into consideration each third-party asset manager’s calculation was 70% of Sub-Fund’s assets which exceeded the 20% minimum commitment to sustainable investments as set out in the Sub-Fund’s pre-contractual supplement.

The approach taken by the third-party asset managers to achieve the sustainable investment objectives of their respective strategies was to follow:

- A proprietary UN Sustainable Development Goals (SDG) Framework used to assess individual companies on key SDG targets to construct a sustainable investment portfolio that pursues positive impact and avoids negative impact. The sustainable investments contributed to one or more of the UN SDGs which include both social and environmental objectives as referred to in article 2(17) SFDR.
- A sustainable investment proprietary framework for contribution to environmental and/ or social objectives based on SDGs as well as the EU Taxonomy objectives. The assessment combined a quantitative breakdown of the investee company into its business activities, followed by a qualitative framework to assess if business activities contributed positively to an environmental or social objective. This positive contribution at the Sub-Fund level was calculated by the third-party asset manager by considering the revenue share of each issuer attributable to business activities which contributed to environmental and/or social objectives, provided the issuer satisfied the Do No Significant Harm (“DNSH”) and Good Governance principles. In the second step, asset-weighted aggregation was performed by the third-party asset manager.
- A sustainable investment objective of gaining exposure to companies that are either exhibiting positive change in their environmental and/or social characteristics or that are currently aligned with a positive environmental and/or social profile. The sustainable investments contributed to the objectives in the investment period, by primarily focusing on social factors such as gender equality and decent work/economic growth, and environmental factors such as affordable and clean energy, climate action, and responsible consumption and production.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to four third-party asset managers during the period, it reviewed how each third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

This Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities for EU Taxonomy (Regulation (EU) 2020/852). See below for details regarding the extent to which the Sub-Fund’s investments were nevertheless in economic activities, which aligned with EU Taxonomy during the period.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset managers appointed by the Manager considered the fourteen indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset managers appointed by the Manager to manage the Sub-Fund during the period considered the fourteen mandatory indicators on greenhouse emissions, biodiversity, water, waste, and social indicators with reference to the companies in which the Sub-Fund invests in order to show that the sustainable investments did no significant harm to any of these indicators.

The third-party asset managers provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises were excluded.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

a

and the UN Guiding Principles on Business and Human Rights were excluded.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the financial product using the Global Industry Classification Standard (GICS), calculated using MSCI ESG Manager. GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1st January 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
MICROSOFT CORPORATION	Information Technology	3.6	United States of America
ALPHABET INC.	Communication Services	2.7	United States of America
AMAZON.COM, INC.	Consumer Discretionary	2.5	United States of America

Real Estate	2.03
Utilities	0.78

#### **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with EU Taxonomy as provided by a third-party asset manager was 1%. The Taxonomy-aligned investments included debt and/or equity investments in environmentally sustainable economic activities aligned with the EU-Taxonomy. Taxonomy-aligned data is provided by an external data provider. Taxonomy-aligned data was, only in rare cases, data reported by companies in accordance with the EU Taxonomy. The data provider derived Taxonomy-aligned data from other available equivalent company data.

The data were not subject to an assurance provided by auditors or a review by third parties

The data does not reflect any data in government bonds. As of today, there is no recognized methodology available to determine the proportion of Taxonomy-aligned activities when investing in government bonds.

The share of investments in sovereigns was 0% (calculated based on the look-through approach). As of the reporting date the reliable data on Taxonomy-alignment was available only for the degree to which the aggregated investments were in environmentally sustainable economic activities based on turnover. Therefore, the corresponding values for operational and capital expenditures are displayed as zero.

#### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas     In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

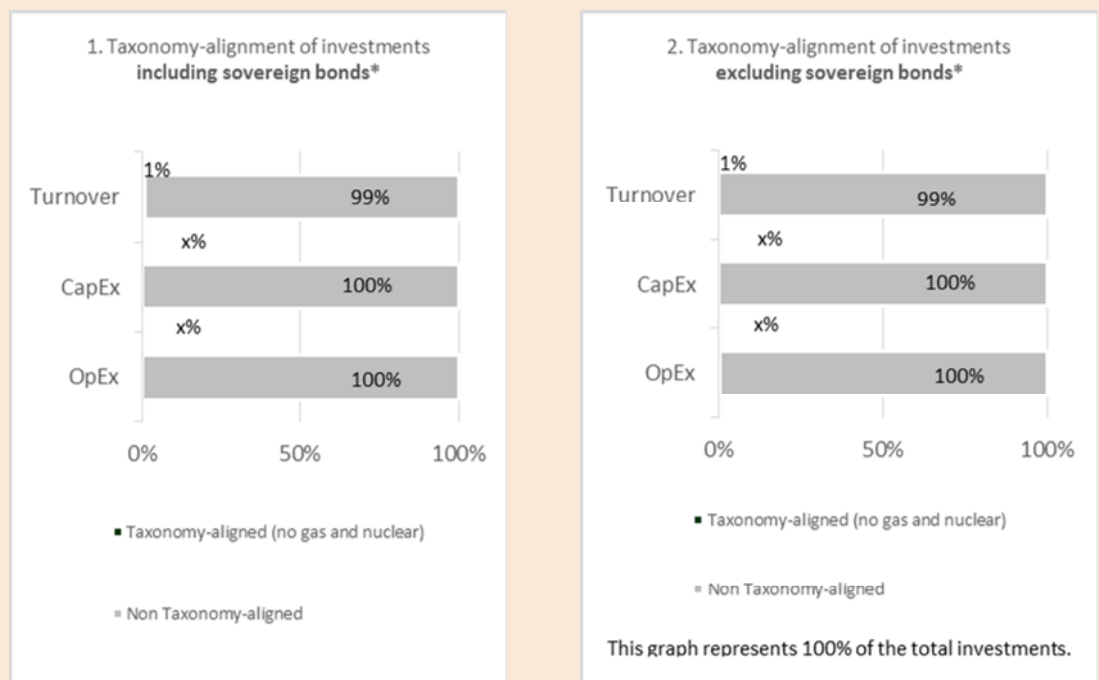

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 7%. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Innovation Thematic Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 62% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” investments include the remaining investments which are neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They are investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They are excluded from the Sub-Fund’s ESG exposure calculation.

The are no minimum environmental or social safeguards for such investments.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken by the third-party asset managers in the Sub-Fund to meet the environmental and social characteristics during the reference period, include the improvement of the ESG profile of the Sub-Fund by focusing on material ESG factors such as those listed in the question, through voting and engaging with investee companies and by adherence to binding elements as measured with the help of sustainability indicators, and exclusion policies.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p>

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Manager held 100% of the Sub-Fund's Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The Sub-Fund promoted 85% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of environmental and social characteristics as monitored by the sustainability indicators as set out below in this Annex.

The third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets ensured that investments made had exposure to companies, issuers and/or collective investment schemes which, in addition to economic and financial objectives, promote environmental, social and/or governance ("ESG") factors by:

- Monitoring and maintaining a sustainability score based on the third-party asset manager's proprietary rating system that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits." It does this by using certain indicators with respect to that issuer and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.
- The third-party asset manager also considered carbon intensity metrics as part of the investment strategy for this Sub-Fund. Carbon intensity is defined as the exposure to carbon intensive companies using Scope 1 and 2 Tons CO<sub>2</sub>e/€m revenue.

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

The reference period for this Sub-Fund is 8 July 2022 (inception date) to 31st December 2022.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining the characteristics being promoted.

#### *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the average of the quarterly scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager, seeking to reverse any negative trend over time.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

#### Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

PAI	Q3	Q4	Reference Period Average
GHG emissions (Table 1, PAI 1)	5,985	7,520	6,753
Carbon footprint (Table 1, PAI 2)	392	336	364
GHG intensity of investee companies (Table 1, PAI 3)	928	953	941
Exposure to companies active in the fossil fuel sector (Table 1 PAI 4)	4	4	4
Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Table 1, PAI 10)	0	0	0
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons (Table 1 PAI 14)	0	0	0

- ***...and compared to previous periods?***

Not applicable for this first reporting period

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

In respect of such portion of the Sub-Fund's portfolio that is invested in sustainable investments, the third-party asset manager appointed by the Manager to directly manage the Sub-Fund's assets during the period invested in companies that in their opinion, sought to invest in the sustainable investments as monitored by the sustainability indicators as set out in the pre-disclosure annex. The Manager used the PAI indicators to assess how each sustainable investment contributes to its objectives.

During the reporting period 8 July 2022 (inception date) to 31 December 2022, the Sub-Fund was partially invested in sustainable investments. The Sub-Fund's average proportion of sustainable investments during the reference period was 63% which exceeded the minimum commitment to sustainable investments as set out in the Sub-Fund's pre-contractual supplement as 20%.

The approach taken by the third-party asset managers to achieve the sustainable investment objectives included an assessment of the proportion of the Sub-Fund that was invested in sustainable investments, with each demonstrating a net positive effect on one or more environmental or social objectives, as scored by the third-party asset manager's proprietary tool. The environmental and social objectives of the sustainable investments that the Sub-Fund made included for example, increasing social benefits by investing in companies that enable or support the connection of communities through telecommunication services or investing in companies with involvement in the healthcare value chain and increasing environmental by investing in that enable system-or economy-wide reductions in carbon emissions.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to a third-party asset manager during the period, it reviewed how the third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SDFR.

This Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities for EU Taxonomy (Regulation (EU) 2020/852).

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset managers appointed by the Manager considered the indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset manager also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and exclude companies which are in violation or severe material breach of these principles. The third-party asset manager also followed an Exclusion Policy.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset manager appointed by the Manager to manage the Sub-Fund during the period considered the sixteen mandatory indicators (including 2 PAIs applicable specifically to sovereigns) as listed in Annex I to Delegated Regulation 2022/1288, as well as two voluntary PAI indicators.

The third-party asset manager provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the Sub-Fund using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1st January 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
Bundesrepublik Deutschland	Government	14.9	Germany
United States of America	Government	3.6	United States of America
United Kingdom of Great Britain and Northern Ireland	Government	2.3	UK
Royaume de Belgique	Government	1.1	Belgium
Reino de Espana	Government	0.8	Spain
MICROSOFT CORPORATION	Technology	0.8	United States of America
ALPHABET INC.	Communications	0.8	United States of America
Taiwan Semiconductor Manufacturing Co., Ltd.	Technology	0.7	Taiwan, Province of China
Bayer Aktiengesellschaft	Health Care	0.6	Germany
INTESA SANPAOLO SPA	Financials	0.6	Italy
MORGAN STANLEY	Financials	0.5	United States of America
SOCIETE GENERALE SA	Financials	0.5	France
COMPAGNIE FINANCIERE RICHEMONT SA	Consumer Discretionary	0.5	Switzerland
AMAZON.COM, INC.	Consumer Discretionary	0.4	United States of America
SAMSUNG SDI CO., LTD.	Technology	0.4	Korea (Republic of)

#### What was the proportion of sustainability-related investments?

The Sub-Fund’s proportion of sustainability-related investments amounted to 63% of its assets.

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

### ● What was the asset allocation?

#### Asset allocation

describes the share of investments in specific assets.

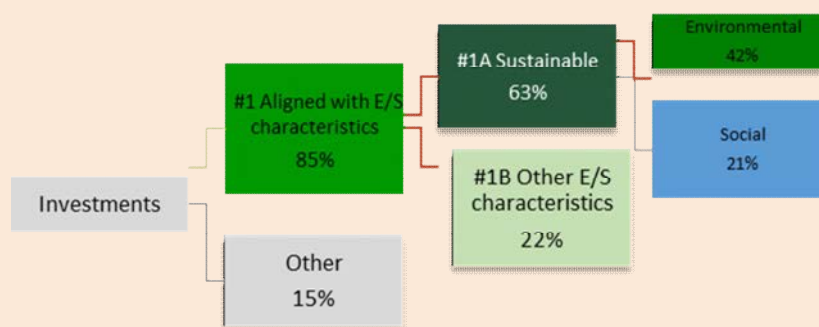

Based on the data as of 31 December 2022, 85% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were aligned with E/S characteristics and 63% of those investments were classified as sustainable investments, 42% with an environmental objective and 21% with a social objective.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

This calculation excluded other investments comprised of cash, cash equivalents held for ancillary liquidity, derivatives used for hedging purposes, which did not contribute to the attainment of E/S characteristics and were not subject to any minimum environmental or social safeguards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

## APPENDIX – Additional Information (Unaudited) (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

● **In which economic sectors were the investments made?**

The following tables consist of the Sub-Fund's exposure to sub-sectors during the period, using the Bloomberg Industry Classification Standard (BICS), calculated using MSCI ESG Manager. BICS provides data broken down by asset class and it includes equities, corporates, governments, and loans. It is a commonly used industry framework to determine sector exposure.

The data presented has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

	Average exposure in % over the reporting period
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	
Not applicable	0
<b>Other Sectors</b>	
Energy	17.2
Financial	14.3
Consumer, Cyclical	13.8
Basic Materials	7.2
Industrial	6.2
Communications	5.6
Technology	1.8

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with EU Taxonomy was 0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

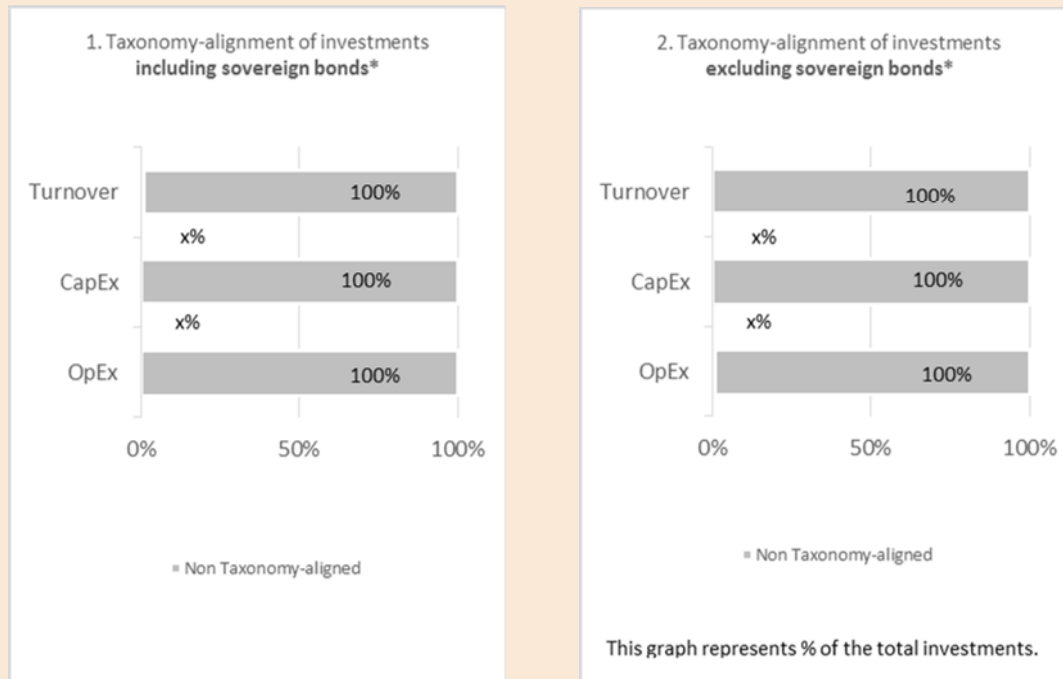

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 42%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Multi Asset ESG Selection, a sub-fund of Mediolanum Best Brands (continued)

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 21% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” investments include the 15% remaining investments which are neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They are investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They are excluded from the Sub-Fund’s ESG exposure calculation. #2 Other includes investments that were not scored by the third-party asset manager’s proprietary sustainability tool and so did not contribute towards the Sub-Fund’s sustainability score.

There are no minimum environmental or social safeguards for such investments.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager held 100% of the Sub-Fund’s Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates third-party asset manager collective investment schemes, which promote environmental and social characteristics in accordance with Article 8 of SFDR or have sustainable investments as their objective in accordance with Article 9 of SFDR.

The actions taken by the third-party asset managers in the Sub-Fund to meet the environmental and social characteristics during the reference period, include the application of sustainability criteria when selecting the investments for the Sub-Fund, the consideration of the sustainability score of the Sub-Fund and, where relevant, of individual investments when selecting the assets held by the Sub-Fund, the third-party asset manager utilised their proprietary tool to assess good governance practices of the investee companies and the third-party asset manager undertook engagements with investee companies.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands  
 Legal entity identifier: 635400NGI7TQMVXD1S75

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

40%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 60%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Manager held 100% of the Sub-Fund’s Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which have sustainable investments as their objective in accordance with Article 9 of the SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets primarily invested in or took exposures to companies that follow a "do good, do well" approach generating positive social and/or environmental change while delivering positive returns on capital growth. Positive social and/or environmental change includes good health and wellbeing, sustainable cities and communities, nutrition, clean water and sanitation, affordable and sustainable energy, improved education/training, responsible consumption and production or other social and environmental goals such as those detailed in the UN Sustainable Development Goals (SDGs) or other similar frameworks.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### To what extent were the environmental and/or social characteristics promoted by this financial product met? (continued)

The Manager aggregated the portfolio score, taking each third-party asset manager's calculation into consideration. The Sub-Fund had exposure to sustainable investments of 40% environmental and 60% social during the period.

The approaches taken by the third-party asset managers to achieve their sustainable investment objectives include:

- The third-party asset manager's mandate contributed towards a more sustainable and inclusive world by investing primarily in the equities of companies whose products and/or services made a positive social and/or environmental impact in the mandate's four impact themes, each of which represent key global challenges: (i) social inclusion and education, (ii) environment and resource needs, (iii) healthcare and quality of life and (iv) base of the pyramid (i.e. addressing the needs of the poorest four billion people in the world). The impact analysis was carried out using a framework that is based upon assessing three factors: (i) intent, (ii) product impact and (iii) business practices.

Through the product impact analysis, all companies in the mandate's portfolio met the sustainable investment objective of the Sub-Fund, because their products and/or services address a global environmental and/or social challenge. As part of the assessment of product impact, the contribution that the companies' products and/or services made to the United Nations Sustainable Development Goals (SDGs) was mapped using the 169 targets that underpin the SDGs. The SDGs are made up of 17 goals, some of which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy. The mandate did not invest in line with a predetermined environmental theme, and there was no commitment as to which specific environmental objectives in the EU Taxonomy the Sub-Fund would contribute to.

- The third-party asset manager invested in sustainable investments, defined by the third-party asset manager as investments in issuers or securities that contribute to an environmental or social objective, do no significantly harm to any of those objectives and in investee companies that follow good governance practices. These sustainable investments contributed to a range of environmental and / or social objectives including alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).
- The third-party asset manager's fund invested in sustainable investments contributed via:
  - o providing products or services that have a goal of solving environmental or social challenges we face as a society.

**AND/OR**

  - o investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g., investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.
  - o Investment in companies where environmental or social aligned (e.g., SDG-aligned) engagement opportunities are identified as part of the investment thesis that addresses societal needs

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to three third-party asset managers during the period, it reviewed how each third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining its sustainable investment objective.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the average of the quarterly scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager(s), on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager(s) seeking to reverse any negative trend over time.

PAI	Q1	Q2	Q3	Q4	Reference Period Average
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	116,220	109,103	128,566	101,751	113,910
Carbon footprint tCO <sub>2</sub> e/ EUR million EVIC (Table 1, PAI 2)	184	182	192	136	173
GHG intensity of investee companies tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	782	789	739	708	755
Share of non-renewable energy consumption and production % (Table 1, PAI 5)	82	87	83	69	80
Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Table 1 PAI 10)	0	0	0	0	0
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Table 1 PAI 11)	62	61	65	54	60

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

#### ● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Regarding the portion of the Sub-Fund allocated to the sustainable investments, the third-party asset managers appointed by the Manager considered the indicators from Table 1 of Annex 1 of SFDR Level 2 and certain voluntary indicators from Tables 2 and 3 of SFDR Level 2 for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset manager also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and exclude companies which are in violation or severe material breach of these principles. The third-party asset manager also followed an Exclusion Policy.

#### *How were the indicators for adverse impacts on sustainability factors taken into account?*

Regarding the portion of the Sub-Fund allocated to sustainable investments, the third-party asset manager appointed by the Manager to manage the Sub-Fund during the period considered the sixteen mandatory indicators (including 2 PAIs applicable specifically to sovereigns) as listed in Annex I to Delegated Regulation 2022/1288, as well as two voluntary PAI indicators.

The third-party asset manager provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

#### *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Produ Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the financial product using the Global Industry Classification Standard (GICS), calculated using MSCI ESG Manager. GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1st January 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
ASML Holding N.V.	Information Technology	3.9	Netherlands
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	3.6	Taiwan, Province of China
PT Bank Rakyat Indonesia (Persero) Tbk	Financials	3.5	Indonesia
Orsted A/S	Utilities	3.2	Denmark
MERCADOLIBRE, INC.	Consumer Discretionary	3.1	Argentina
DEERE & COMPANY	Industrials	2.9	United States of America
DEXCOM, INC.	Health Care	2.7	United States of America
MODERNA, INC.	Health Care	2.7	United States of America
ALNYLAM PHARMACEUTICALS, INC.	Health Care	2.1	United States of America
TESLA, INC.	Consumer Discretionary	1.9	United States of America
XYLEM INC.	Industrials	1.9	United States of America
ILLUMINA, INC.	Health Care	1.9	United States of America
UMICORE SA	Materials	1.8	Belgium
ABIOMED, INC.	Health Care	1.7	United States of America
NOVOZYMES A/S	Materials	1.6	Denmark

#### What was the proportion of sustainability-related investments?

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

### ● What was the asset allocation?

#### Asset allocation

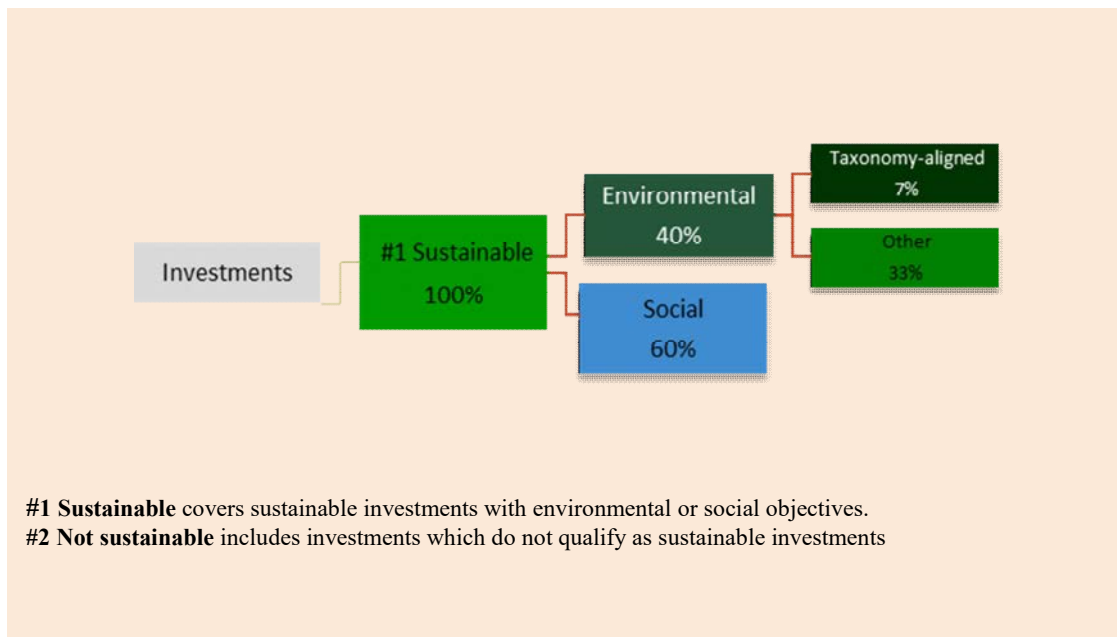

describes the share of investments in specific assets.

Based on the data as of 31 December 2022, 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were classified as sustainable investments, 40% with an environmental objective and 60% with a social objective. This included 7% invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### ● In which economic sectors were the investments made?

The following table consists of the Sub-Fund’s exposure to sub- industries. The table below uses the Global Industry Classification Standard (GICS). GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure. The table below shows the composition of the investments held by the Sub-Fund, by GICS sub-industries during the period.

The data presented has been calculated by the Manager using MSCI ESG Manager, based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.	4.0
<b>Other Sectors</b>	
Health Care	26.3
Information Technology	16.5
Industrials	13.6
Consumer Discretionary	12.1
Materials	9.6
Utilities	8.0
Financials	7.6
Real Estate	2.2
Communication Services	2.2
Consumer Staples	2.0

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments calculated by the third-party asset manager that was aligned with EU Taxonomy was 7%. These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 33%. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Global Impact (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 60% of the investments. As such, the Fund has exceeded the minimum commitment in investments with a social objective as outlined in the precontractual document of 5%. share of socially sustainable investments during the period was 21% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“Not sustainable” investments include investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes and as such does not affect the delivery of the sustainable investment objective and the do no significant harm principle of Article 2(17) of SFDR on a continuous basis. There are no minimum environmental or social safeguards for such investments. Such instruments may be excluded from the Sub-Fund’s sustainable investment exposure calculation.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken by the third-party asset managers in the Sub-Fund to meet the environmental and social characteristics during the reference period, include:

- The employment of an impact strategy by the third-party asset manager to contribute towards a more sustainable and inclusive world alongside capital growth over the long term. This was achieved through norms-based evaluation, business activity-based exclusions and active ownership to attain the sustainable investment objective on a continuous basis through ongoing compliance with and monitoring of the binding elements of the investment strategy.
- The third-party asset manager ensured adherence to the binding elements of the strategy including the assessment of all investments as sustainable investments, maintaining its ESG policy and an ESG assessment of all securities.
- The third-party asset manager invested in companies aligned to at least one or more of the UN SDGs and engaged with 98% of company management held in the portfolio, to set specific targets and timelines in relation to an engagement objective. Progress was seen across 40% of engagement objectives. Where a company made insufficient progress against the engagement objectives, it would have resulted in divestment from that company. The fund did not invest in any company that violated or was in breach of the UNGC.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: **Mediolanum Circular Economy Opportunities (the “Sub-Fund”)**, a sub-fund of **Mediolanum Best Brands**  
 Legal entity identifier: **635400KMRFIUCJLMEW18**

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b></p> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 80%</b></p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 20%</b></p>	<p><input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u>% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

#### **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Manager held 100% of the Sub-Fund's Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which have sustainable investments as their objective in accordance with Article 9 of the SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets primarily invested in companies that in the third-party asset manager's opinion contribute to the transition to or advancement of a "circular economy".

The circular economy aims to minimise waste by considering the full life cycle of materials, products and services and redesigning products and operations to encourage any or all the following: increased repair, re-use, recycling, redesign and/or product life extension. The third-party asset managers may also invest in companies that are active in the process of transforming their business models into circular ones through facilitating more responsible consumption including companies involved in repair or resale of goods or companies producing or using recyclable materials.

The Manager aggregated the portfolio score, taking each third-party asset manager's calculation into consideration. The Sub-Fund had exposure to sustainable investments of 80% environmental and 20% social during the period.

The approaches taken by the third-party asset managers to achieve the sustainable investment objectives of their respective strategies include:

- The third-party asset manager sought to invest in sustainable investments that delivered positive impact in companies that, in the third-party asset manager's opinion contributed to the transition to or advancement of a “circular economy.” Eligible securities included equities issued by companies with a considerable proportion of activities (as measured by revenue, EBIT, enterprise value or similar metrics) derived from such economic activities. The third-party asset manager employed norms and values-based exclusions to exclude issuers in severe breach of international norms or those with significant activities with adverse impacts on society or the environment. Finally, the third-party asset manager engaged with management of companies on material ESG issues.
- Using a range of proprietary sustainability indicators, exclusions and engagement, the third-party asset manager ensured that the environmental and social objectives were achieved.
- The third-party asset manager met its objective by investing in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and in investee companies that follow good governance practices. The third-party asset manager invested in sustainable investments that contributed to a range of environmental and/ or social objectives including alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals. Their proprietary framework considers key environmental and social issues deemed relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity in which the issuer is involved by weighting the issues differently in the scoring methodology.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to three third-party asset managers during the period, it reviewed how each third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining its sustainable investment objective.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the average of the quarterly scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager(s) seeking to reverse any negative trend over time.

PAI	Q1	Q2	Q3	Q4	Reference Period Average
GHG intensity of investee companies (CO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3))	1,004	1,013	935	916	967
Exposure to companies active in the fossil fuel sector (Table 1 PAI 4)	5	5	4	5	5
Activities negatively affecting biodiversity sensitive areas (Table 1 PAI 7)	0	0	0	0	0
Emissions to water Metric Tons (Table 2 PAI 8)	299	414	45	10	192
Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Table 1 PAI 10)	0	0	0	0	0

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

#### ● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The third-party asset managers appointed by the Manager considered the indicators for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset managers also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and exclude companies which are in violation or severe material breach of these principles or other internal exclusion policies.

#### *How were the indicators for adverse impacts on sustainability factors taken into account?*

The third-party asset managers appointed by the Manager to manage the Sub-Fund during the period considered the fourteen mandatory indicators on greenhouse emissions, biodiversity, water, waste, and social indicators with reference to the companies in which the Sub-Fund invests to show that they sustainable investments did no significant harm to any of these indicators.

The third-party asset managers provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

#### *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the financial product using the Global Industry Classification Standard (GICS), calculated using MSCI ESG Manager. GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top fifteen investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1st January 2022 to 31st December 2022

Largest investments	Sector	% Assets	Country
WASTE CONNECTIONS, INC.	Industrials	3.2	United States of America
WASTE MANAGEMENT, INC.	Industrials	2.9	United States of America
ASML Holding N.V.	Information Technology	2.5	Netherlands
EQUINIX, INC.	Real Estate	2.3	United States of America
VEOLIA ENVIRONNEMENT SA	Utilities	2.1	France
ECOLAB INC.	Materials	2.1	United States of America
SOLAREEDGE TECHNOLOGIES, INC.	Information Technology	1.9	United States of America
DANAHER CORPORATION	Health Care	1.9	United States of America
XYLEM INC.	Industrials	1.9	United States of America
AMERICAN WATER WORKS COMPANY, INC.	Utilities	1.8	United States of America
Iberdrola, S.A.	Utilities	1.8	Spain
SCHNEIDER ELECTRIC SE	Industrials	1.8	United States of America
REPUBLIC SERVICES, INC.	Industrials	1.7	United States of America
GRAPHIC PACKAGING HOLDING COMPANY	Materials	1.6	United States of America
SYNOPSYS, INC.	Information Technology	1.6	United States of America

#### What was the proportion of sustainability-related investments?

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

**Asset allocation** describes the share of investments in specific assets.

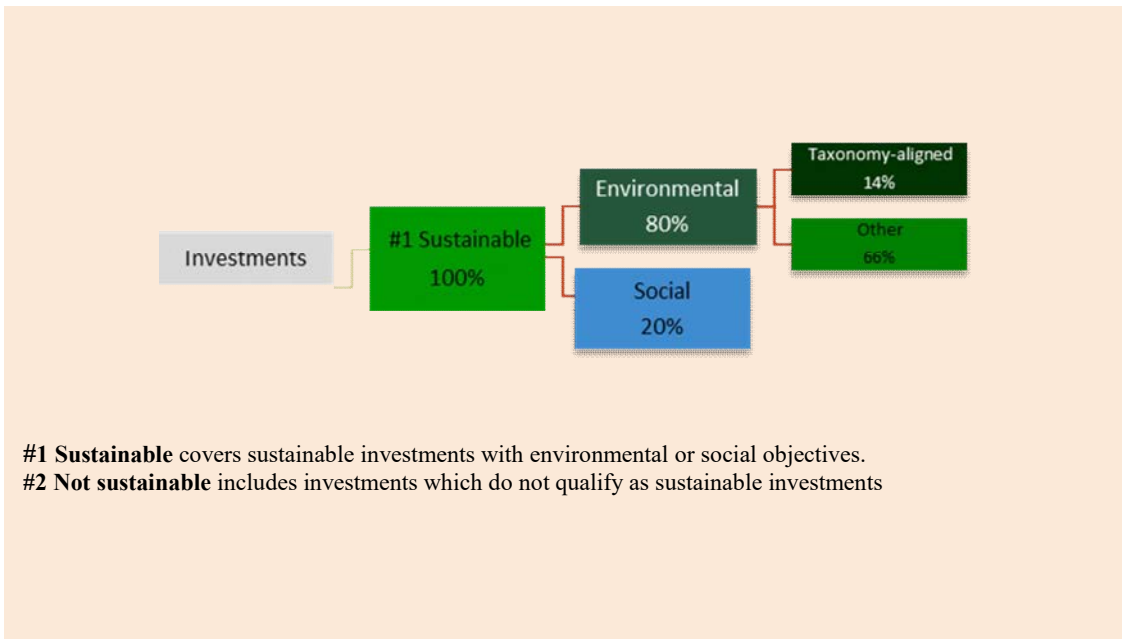

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the asset allocation?**

Based on the data as of 31 December 2022, 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were classified as sustainable investments, 80% with an environmental objective and 20% with a social objective.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

● ***In which economic sectors were the investments made?***

The following table consists of the Sub-Fund’s exposure to sub- industries. The table below uses the Global Industry Classification Standard (GICS). GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure. The table below shows the composition of the investments held by the Sub-Fund, by GICS sub-industries during the period.

The data presented has been calculated by the Manager using MSCI ESG Manager, based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

	Average exposure in % over the reporting period
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	
	7.6
<b>Other Sectors</b>	
Industrials	31.2
Information technology	24.7
Materials	17.8
Utilities	12.3
Consumer Discretionary	4.5
Health Care	4.0
Real Estate	3.0
Consumer Staples	2.6

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with EU Taxonomy was 14%. EU green taxonomy-aligned investments were calculated by the third-party asset manager on a revenue-weighted basis (i.e., security weights are multiplied by the proportion of revenues from economic activities that contribute to environmental objectives). Screening criteria were applied on a best effort basis to mitigate significant harm and uphold minimum social safeguards.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

reflecting the share of revenue from green activities of investee companies.

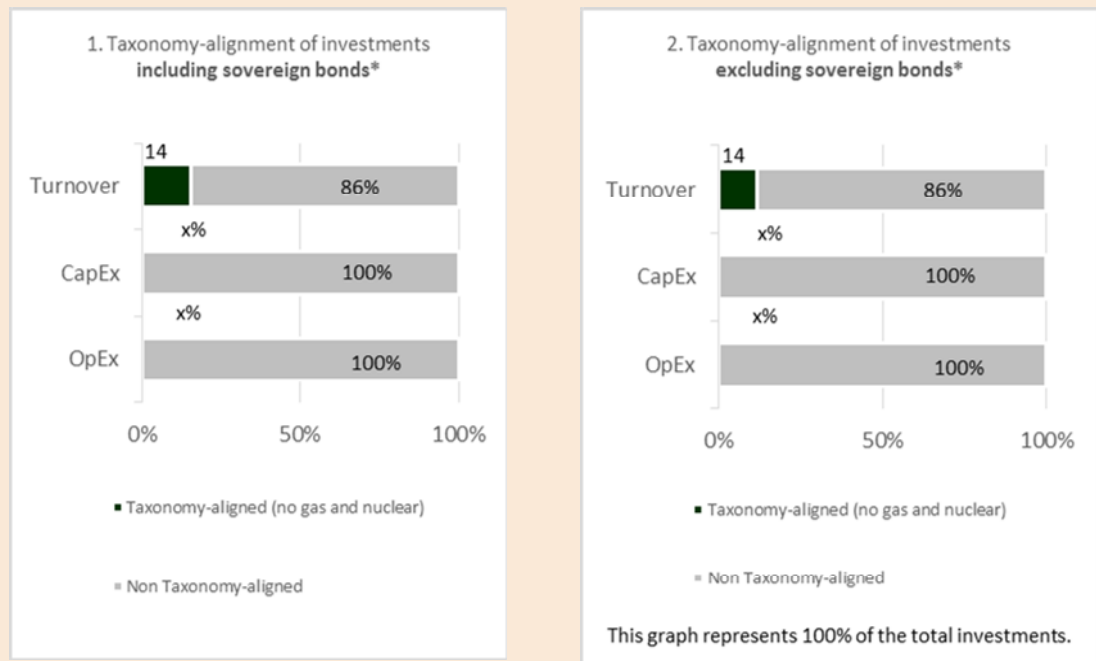

**-capital expenditure**

(CapEx) showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure**

(OpEx) reflecting green operational activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 66%. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Circular Economy Opportunities (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 20% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“Not sustainable” investments include investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes and as such does not affect the delivery of the sustainable investment objective and the do no significant harm principle of Article 2(17) of SFDR on a continuous basis. There are no minimum environmental or social safeguards for such investments. Such instruments may be excluded from the Sub-Fund’s sustainable investment exposure calculation.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken by the third-party asset managers in the Sub-Fund to meet the environmental and social characteristics during the reference period, include:

- The third-party asset manager following the investment strategy and adhering to the binding elements, which was monitored on an ongoing basis by the Compliance department.
- The third-party managers’ proprietary assessment of the environmental performance of investee companies, exclusion policy and engagement. The third-party asset manager engaged with eleven companies in which it invested on a range of issues, including engagement with companies which had a high adverse impact (as measured by the PAI Indicators and by other factors), with a view to influencing the company to change its activities in a manner which will reduce the adverse impact.
- The third-party asset manager adherence to the binding elements of the strategy and ESG rating analysis.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

 Legal entity identifier: 635400GGBUWONXZZME19

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b></p> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 99%</b></p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 1%</b></p>	<p><input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u>% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Manager held 100% of the Sub-Fund’s Net Asset Value (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) in mandates in relation to part of the Sub-Fund's assets managed by its selected third-party asset managers and collective investment schemes, which have sustainable investments as their objective in accordance with Article 9 of the SFDR. The Manager conducted the periodic assessments and due diligence checks as outlined in the pre-disclosure document for this Sub-Fund.

The third-party asset managers appointed by the Manager to directly manage the Sub-Fund's assets primarily invested in companies that in the third-party asset manager's opinion contribute to the objective to transition to clean energy generated from low carbon emissions sources.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The third-party asset managers also invested in companies that are active in the process of energy use efficiency and reduction through facilitating more responsible consumption including companies involved in building insulation, smart metering, and battery storage solutions. The investment approach to the selection of investments mainly focused on investments that benefit or contribute to the transition to or advancement of a clean energy system globally and are not subject to any specific regions, sectors, or market cap restrictions.

The Manager aggregated the portfolio score taking each third-party asset manager's calculation into consideration. The Sub-Fund had exposure to sustainable investments of 99% environmental and 1% social during the period (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes, from the calculation).

The approaches taken by each of the third-party asset managers to achieve the sustainable investment objectives of their respective strategies included:

- The sustainable investment objective of the third-party asset manager's underlying mandate was met. The Sub-Fund invested at least 75% of its assets in companies worldwide that generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies. It also included investments in other companies worldwide that generated a lower percentage of their revenue from these activities where the third-party asset manager considered they are playing critical roles in the energy transition. All companies held were deemed to be sustainable investments by the third-party asset manager.
- The environmental objectives promoted by the underlying mandate was to seek reductions in harm to the environment and climate arising from the emissions of greenhouse gases. Using sustainability indicators, the third-party asset manager was able to measure how the environmental objectives of the product were met.
- The underlying fund achieved its sustainable objectives through a combination of:
  - o Positive impact: This underlying fund achieved a positive environmental impact by investing in companies that in the third-party asset manager's opinion supported the structural change towards a sustainable, low-carbon economy, and/or helped to reduce greenhouse gas emissions and air pollution. The underlying fund invested mainly in companies whose significant proportion of their activities are related to, but not limited to, renewable energy, technologies that reduce CO<sub>2</sub> emissions or energy consumption in areas such as industry, buildings or transportation, and enabling technologies and infrastructure that are critical preconditions for the transition to a low carbon economy, such as energy storage, power semiconductors, investments into the power grid and other relevant economic activities. Eligible securities included equities issued by companies with a significant proportion of activities (as measured by revenue, EBIT, enterprise value or similar metrics) derived from such economic activities.
  - o Norms- and values-based exclusions: The underlying fund excluded issuers that are in severe breach of international norms or those which had significant activities with adverse impacts on society or the environment.
  - o Active ownership: The underlying fund engaged with the management of companies on material ESG issues.

The sustainable investments invested in by the Sub-Fund during the period were in accordance with the third-party asset managers' definition of sustainable investments as required by section 2(17) of SFDR. As the Manager has delegated the management of the Sub-Fund to three third-party asset managers during the period, it reviewed how each third-party asset manager met their own definition of sustainable investments where such investments were made during the period in accordance with section 2(17) of SFDR.

The Sub-Fund did not use a specific index designated as a reference benchmark for the purpose of attaining its sustainable investment objective.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### *How did the sustainability indicators perform?*

Using MSCI ESG Manager, the Manager calculated the sustainability indicators, the PAI scores, as the average of the quarterly scores of the relevant PAI listed below for the reference period. The Manager monitors the trend in the PAI over each quarter and engages with the third-party asset manager, on those PAI, which are not performing as expected. The Manager seeks to understand the drivers of this negative performance and will engage with the third-party asset manager(s) seeking to reverse any negative trend over time.

PAI	Q3	Q4	Reference Period Average
GHG emissions tCO <sub>2</sub> e (Table 1, PAI 1)	24,187	34,574	29,380
GHG intensity of investee companies tCO <sub>2</sub> e/ EUR million sales (Table 1, PAI 3)	1,224	1,109	1,166
Exposure to companies active in the fossil fuel sector (Table 1 PAI 4)	14	14	14
Share of non-renewable energy consumption and production % (Table 1, PAI 5)	77	74	76
Investments in companies without carbon emission reduction initiatives (Table 2 PAI 4)	59	55	57

#### ● *...and compared to previous periods?*

Not applicable for this first reporting period

#### ● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The third-party asset managers appointed by the Manager considered the indicators for adverse impacts on sustainability factors and ensured that the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The third-party asset managers also considered alignment with other principles, such as the United Nations Global Compact Principles on human rights, labour standards, environmental protection and anti-bribery/corruption and excluded companies which are in violation or severe material breach of these principles or other internal exclusion policies.

#### *How were the indicators for adverse impacts on sustainability factors taken into account?*

The third-party asset managers appointed by the Manager to manage the Sub-Fund during the period considered the fourteen mandatory indicators on greenhouse emissions, biodiversity, water, waste, and social indicators with reference to the companies in which the Sub-Fund invests to show that the sustainable investments did no significant harm to any of these indicators.

The third-party asset managers provided confirmation to the Manager that the minimum standards were reached for each applicable PAI and/ or that certain exclusion strategies ensured alignment to the PAI indicators.

The additional four mandatory PAI indicators for sovereigns and real estate did not apply to the Sub-Fund.

#### *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The third-party asset managers appointed by the Manager during the reporting period ensured, using screening tools, that companies not in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager monitored and measured the PAI as set out in the question above “*How did the sustainability indicators perform?*” during the reference period.

The third-party asset managers considered the adverse impacts on sustainability indicators as outlined in the question above “*How were the indicators for adverse impacts on sustainability factors taken into account?*” for the sustainable investment portion of the Sub-Fund.

#### What were the top investments of this financial product?

The following sets out a list of the top investments (and relevant sector) of the financial product using the Global Industry Classification Standard (GICS) using MSCI ESG Manager. GICS is a four-tiered industry classification system consisting of 11 sectors. It is a commonly used industry framework to determine sector exposure.

The data presented in this Section shows the top 15 investments (i.e., the greatest proportion of investments of the Sub-Fund) during the reference period and has been calculated by the Manager based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 8<sup>th</sup> July 2022 to 31<sup>st</sup> December 2022.

Company	Sector	% Assets	Country
VESTAS WIND SYSTEMS A/S	Industrials	3.5	Denmark
SOLAREEDGE TECHNOLOGIES, INC.	Information Technology	3.3	United States of America
SAMSUNG SDI CO., LTD.	Information Technology	3.1	Korea (Republic of)
FIRST SOLAR, INC.	Information Technology	2.6	United States of America
RWE Aktiengesellschaft	Utilities	2.3	Germany
ORMAT TECHNOLOGIES, INC.	Utilities	2.1	United States of America
NXP Semiconductors N.V.	Information Technology	2.1	China
ENEL - SPA	Utilities	2.1	Italy
Iberdrola, S.A.	Utilities	2.1	Spain
ITRON, INC.	Information Technology	1.9	United States of America
JOHNSON CONTROLS INTERNATIONAL PLC	Industrials	1.9	United States of America
SUNNOVA ENERGY INTERNATIONAL INC.	Utilities	1.9	United States of America
ON SEMICONDUCTOR CORPORATION	Information Technology	1.8	United States of America
ASML Holding N.V.	Information Technology	1.8	Netherlands
JOHNSON MATTHEY PLC	Materials	1.7	UK

#### What was the proportion of sustainability-related investments?

# APPENDIX – Additional Information (Unaudited) (continued)

## 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

**Asset allocation** describes the share of investments in specific assets.

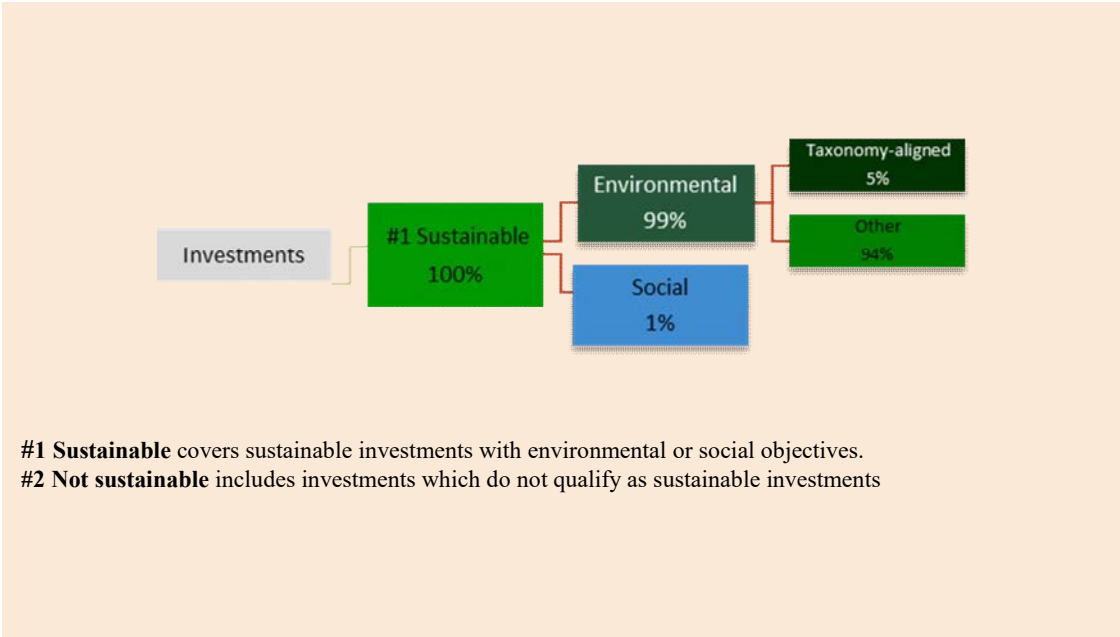

● **What was the asset allocation?**

Based on the data as of 31 December 2022, 100% (excluding cash, cash equivalents and certain derivatives for liquidity and hedging purposes) of the investments of the Sub-Fund were classified as sustainable investments, 99% with an environmental objective and 1% with a social objective.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objectives.  
 #2 Not sustainable includes investments which do not qualify as sustainable investments

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

**Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)**

● ***In which economic sectors were the investments made?***

The following table consists of the Sub-Fund’s exposure to sub- industries. The table below uses the Global Industry Classification Standard (GICS). GICS is a four-tiered industry classification system consisting of eleven sectors. It is a commonly used industry framework to determine sector exposure. The table below shows the composition of the investments held by the Sub-Fund, by GICS sub-industries during the period.

The data presented has been calculated by the Manager using MSCI ESG Manager, based on an average of the value of investments traded and held at each quarter-end date within the reference period. Cash and ancillary liquidity instruments are not included in the table below.

	<b>Average exposure in % over the reporting period</b>
<b>Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage, and trade, of fossil fuels.</b>	<b>12.00</b>
<b>Other Sectors</b>	
Information Technology	34.5
Utilities	25.7
Industrials	24.2
Materials	8.0
Consumer Discretionary	5.3
Financials	1.0
Real Estate	0.5

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with EU Taxonomy was 5%. EU green taxonomy-aligned investments were calculated on a revenue-weighted basis (i.e., security weights are multiplied by the proportion of revenues from economic activities that contribute to environmental objectives). Screening criteria were applied by the third-party asset manager on a best effort basis to mitigate significant harm and uphold minimum social safeguards.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## APPENDIX – Additional Information (Unaudited) (continued)

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

Taxonomy-aligned activities are expressed as a share of:

**-turnover**

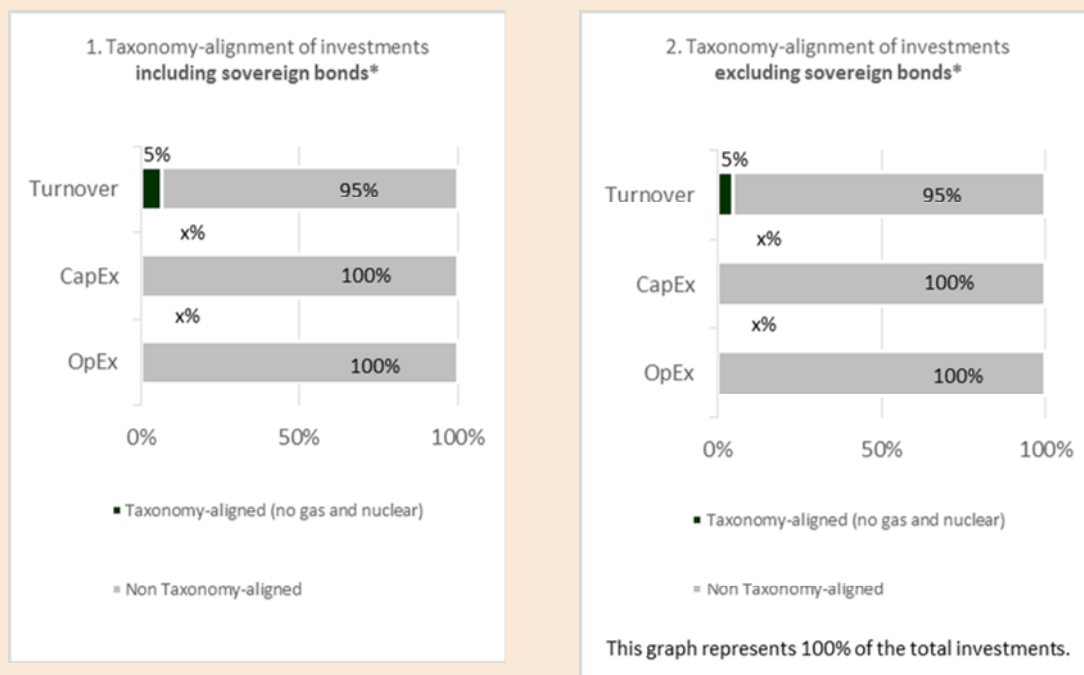

reflecting the share of revenue from green activities of investee companies.

**-capital expenditure (CapEx)** showing the green investments made by the investee companies, e.g., for a transition to a green economy.

**-operational expenditure (OpEx)**

reflecting green operational activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, as this is the first reference period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with EU Taxonomy was 94%. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## APPENDIX – Additional Information (Unaudited) (continued)

---

### 6) Sustainable Finance Disclosure Regulation and Taxonomy disclosures (continued)

Product name: Mediolanum Energy Transition (the “Sub-Fund”), a sub-fund of Mediolanum Best Brands (continued)

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments during the period was 1% of the investments.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“Not sustainable” investments include investments that are treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes and as such does not affect the delivery of the sustainable investment objective and the do no significant harm principle of Article 2(17) of SFDR on a continuous basis. There are no minimum environmental or social safeguards for such investments. Such instruments may be excluded from the Sub-Fund’s sustainable investment exposure calculation.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken by each of the third-party asset managers in the Sub-Fund to meet the sustainable investment objectives during the reference period, include:

- the use of the third-party asset manager’s proprietary sustainable investment framework for assessment of securities involving revenue weighted alignment, exclusion of any company deemed to fail the DNSH assessment and assessment based on good governance; the third-party asset manager sought to speak with or meet with all company management once every six months. The third-party asset manager conducted 22 dedicated sustainability engagements across the investible universe on several different topics, including but not limited to climate change, human rights and corporate governance. In addition, the third-party asset manager worked on a mass engagement project during the reference period which encouraged companies within the portfolio and the wider investible universe to set net zero emissions transition plans. This project will continue into the next reference period.
- The third-party asset manager’s proprietary assessment of the environmental performance of investee companies, exclusion policy and engagement. The third-party asset manager engaged with three companies in which it invested on a range of issues, including engagement with companies which had a high adverse impact (as measured by the PAI Indicators and by other factors), with a view to influencing the company to change its activities in a manner which will reduce the adverse impact.
- The third-party asset manager ensured adherence to the binding elements of the investment strategy which was monitored on an ongoing basis by its Compliance department.

#### **How did this financial product perform compared to the reference benchmark?**

Not applicable.
