## What is this product?

### Type

Janus Henderson Flexible Income Fund is a sub-fund of Janus Henderson Capital Funds plc, an investment company with variable capital organised under the laws of Ireland. Janus Henderson Capital Funds plc qualifies as an undertaking for collective investment in transferable securities (UCITS).

### Term

This investment has no maturity date. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

### Objectives

The Fund aims to provide a return, from a combination of income and capital growth, while seeking to limit losses to capital (although not guaranteed) over the long term. Performance target: To outperform the Bloomberg US Aggregate Bond Index by 1.25% per annum, before the deduction of charges, over any 5 year period. The Fund invests at least 67% (but typically more than 80%) of its assets in US bonds of any quality, including high yield (non-investment grade) bonds and asset-backed and mortgage-backed securities, issued by governments, companies or any other type of issuer. The Fund may also hold other assets including bonds of other types from any issuer, preference shares, cash and

money market instruments. The investment manager may use derivatives (complex financial instruments) to reduce risk, to manage the Fund more efficiently, or to generate additional capital or income for the Fund. The Fund is actively managed with reference to the Bloomberg US Aggregate Bond Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index. This share class distributes all income, charges will be deducted from capital. You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund's Prospectus. The Fund's Depositary is J.P. Morgan SE, Dublin Branch.

### Intended Retail Investor

Investors who understand the Fund's risks, would like an investment that combines both growth and an income over time from investing in bonds with a focus on the US, and intend to invest their money for at least five years. This Fund is designed to be used only as a component in a diversified investment portfolio and is not designed for investors who are unable to accept more than a minimal loss of their investment.

## What are the risks and what could I get in return?

### Risk Indicator

Lower Risk 1 2 3 4 5 6 7 Higher Risk

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low

level, and poor market conditions are very unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

**If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at [www.janushenderson.com](http://www.janushenderson.com)

## Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

**Recommended holding period: 5 years**

**Example Investment: HKD 100,000**

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
Stress	<b>What you might get back after costs</b>	60,360 HKD	62,760 HKD
	Average return each year	-39.64%	-8.90%
Unfavourable	<b>What you might get back after costs</b>	80,030 HKD	78,770 HKD
	Average return each year	-19.97%	-4.66%
Moderate	<b>What you might get back after costs</b>	95,600 HKD	101,810 HKD
	Average return each year	-4.40%	0.36%
Favourable	<b>What you might get back after costs</b>	104,050 HKD	112,730 HKD
	Average return each year	4.05%	2.43%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between December 2020 and September 2022.

The moderate scenario occurred for an investment in the benchmark between July 2014 and July 2019.

The favourable scenario occurred for an investment in the benchmark between December 2015 and December 2020.

## What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depository, J.P. Morgan SE, Dublin Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- HKD 100,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	7,311 HKD	18,328 HKD
Annual cost impact (*)	7.3%	3.4% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.7% before costs and 0.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% is the maximum amount you pay when entering this investment and you could pay less. If you invest through a third-party the person selling you the product will inform you of the actual charge.	Up to 5,000 HKD
