Dodge & Cox Worldwide Funds plc - U.S. Stock Fund

GBP Distributing Class
A sub-fund of Dodge & Cox Worldwide Funds plc

ISIN: IE00B51BJD26
SEDOL: B51BJD2

Objectives and Investment Policy

The fund seeks long-term growth of principal and income.

The Fund invests primarily in a diversified portfolio of U.S. equity securities. Under normal circumstances, the Fund will invest at least 80% of its total assets in common stocks, preferred stocks, securities convertible into common stocks and securities that carry the right to buy common stocks, including depositary receipts evidencing ownership of common stocks. The Fund may also purchase other types of securities, for example, preferred stocks, and debt securities which are convertible into common stock. The Fund may invest up to 10% of its total assets in U.S. dollar-denominated securities of non-U.S. issuers traded in the United States that are not in the S&P 500.

In selecting investments, the Fund invests primarily in companies that, in Dodge & Cox's opinion, appear to be temporarily undervalued by the stock market but have a favourable outlook for long-term growth. The Fund focuses on the underlying financial condition and prospects of individual companies, including future earnings, cash flow, and dividends. Various other factors, including financial strength, economic condition, competitive advantage, quality of the business franchise, and the reputation, experience, and competence of a company's management are weighed against valuation in selecting individual securities. The Fund typically invests in medium-to-large well established companies based on standards of the applicable market. The fund may use derivatives to manage risk and help meet the fund's objective. A derivative is a financial instrument whose value is based on the performance of another financial asset, index, or investment. The fund may invest in other types of eligible investments which are disclosed in the fund's prospectus.

The fund is actively managed and uses the S&P 500 Index benchmark for performance comparison purposes only. The fund's portfolio of investments is built through a process of individual security selection, and the investment manager is not constrained by the benchmark in the selection of investments for the fund. The fund's investment strategy does not restrict the extent to which the fund's portfolio may deviate from the benchmark.

The base currency of the fund is U.S. dollars; your shares are denominated in pound sterling.

You may sell your shares on each day when banks in Ireland are open for normal business and the New York Stock Exchange is open for trading.

This share class is a distributing share class. Dividends may include income, realised capital gains, and/or be paid out of capital.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

◀ **Lower Risk** — **Higher Risk** ▶
◀ **Typically Lower Rewards** — **Typically Higher Rewards** ▶

1	2	3	4	5	**6**	7

This risk and reward indicator is designed to provide you with a measure of the price movement of this share class based on historical data over the past five years.

The indicator may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

This share class of the fund is in category 6 because the fund invests mainly in equity and equity-related securities of companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the fund can fluctuate significantly over relatively short time periods.

The fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- Currency risk: the risk of loss arising from exchange-rate fluctuations;
- Liquidity risk: the risk that the fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security; and
- Derivatives risk: investment in derivatives may create leverage and may cause the fund to lose as much as or more than the amount invested.

More information on the risks of investing in this fund can be found in the fund's prospectus in the sections titled "Investment Risks and Special Considerations" and "Characteristics and Risks of Securities and Investment Techniques".

Charges

One-off charges taken before or after you invest
