What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Sub-Fund is to achieve long term capital growth.

Investment policies The Sub-Fund will gain exposure to four asset classes, namely commodities, currencies, interest rates and equity indices (the "Asset Classes") globally. The Sub-Fund will take exposure to the Asset Classes through the application of the Investment Manager's systematic trading program, the Gemini Program. The systematic strategies in the Program are designed to target behavioural and structural market inefficiencies across more than 200 global futures markets across each of the Asset Classes.

The Sub-Fund will invest in structured financial instruments to gain commodity exposure. The Sub-Fund will gain exposure, which may be long or short, to the major categories of traded commodities, including but not limited to metals, energy and agriculture. The investment by the Sub-Fund in structured financial instruments shall not exceed 20% of the Net Asset Value of the Sub-Fund.

The Sub-Fund will mainly invest in the Asset Classes through futures and forward foreign exchange contracts. Derivatives may also be used for hedging purposes. A derivative is a contract between two or more parties whose value is based on an agreed-upon underlying financial asset, index or security.

The Sub-Fund may take short exposure to the Asset Classes as part of its investment strategy. This means the Sub-Fund will make a profit if the value of an Asset Class goes down, but it will lose money if the value of the Asset Class goes up. Unless the loss is capped or offset by another investment, such losses could theoretically be unlimited.

It is expected that by using derivatives, the Sub-Fund's long and short positions may each be up to 500% of the net asset value of the Sub-Fund, and in total, between 200% and 1,000% long or short at any given time.

The Sub-Fund may also invest in open-ended exchange traded funds and other open ended collective investment schemes which enable the Sub-Fund to achieve its investment objective. The Sub-Fund may also invest in cash and money market instruments for cash management purposes.

Benchmark The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund, and is not managed with reference to any benchmark.

Redemption and Dealing You may sell your shares in the Sub-Fund on any day that banks are open in Dublin, Ireland and New York, United States of America. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. one business day before the day on which you want to sell.

Distribution Policy Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

Launch date The Sub-Fund came into existence in 28/09/2017. This Share class was launched on 21/08/2018.

Fund Currency Reference currency of the Sub-Fund is USD.

Conversion of units/shares You may switch your shares to the shares of another sub-fund of MontLake UCITS Platform ICAV free of charge.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Sub-Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the ICAV as set forth in the ICAV prospectus, the Sub-Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The performance scenarios described in this document are hypothetical and illustrative examples based on certain assumptions and do not represent actual or guaranteed outcomes; particularly in the case of the favourable scenario, actual performance may differ significantly.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the ICAV prospectus, available free of charge at www.waystone.com.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 29 July 2022 and 30 April 2025.

Moderate: this type of scenario occurred for an investment between 31 January 2017 and 31 January 2022.

Favourable: this type of scenario occurred for an investment between 31 August 2017 and 31 August 2022.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Sub-Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Sub-Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 USD is invested.

	If you exit after 1 year	**If you exit after 5 years**
Total Costs	**148 USD**	**796 USD**
Annual cost impact*	**1.5%**	**1.6% each year**

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 3.4% after costs.
