## What is this product?

### Type

This product is a UCITS Investment Fund.

### Term

This product has no fixed end date. However the Fund, at its absolute discretion, can redeem all the shares of the Fund under the circumstances set out in the prospectus.

### Objectives

**Investment objective** The investment objective of the Fund is to seek long-term growth of capital and income.

**Investment policies** The Fund is an index tracking fund. It is passively managed and will seek to achieve its objective by investing predominantly in global equity and equity related securities that as far as possible and practicable reflect the component global equity securities of the MSCI World ex Selected Securities Index, unhedged as measured in USD (the "Index"). The Index is a broad global equity benchmark that represents large and mid-cap equity performance across a range of developed markets except for those companies which the index provider excludes based on negative environmental and social screens.

The Fund will seek to promote environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

The Fund's environmental characteristics are to avoid investment in companies that generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

The Fund's social characteristics are to avoid investment in companies which are involved in the manufacture, distribution or sales of controversial weapons, or which manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. Further, the Fund will invest at least 20% in sustainable investments, being investments which, according to the Investment Manager's framework: (a) contribute positively to UN Sustainable Development Goals ("SDGs"); (b) do no significant harm to any environmental or social objective; and (c) follow good governance practices.

The Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the Index which applies a negative environmental and social screen in line with the environmental and social characteristics of the Fund.

The Fund follows good governance standards in the selection of securities for investment and seeks to engage with any companies, identified as violating UN Global Compact Principles ("UNGC"), to remediate where possible. UNGC is a set of globally accepted standards on human rights, labour, the environment and anti-corruption.

The Fund may use optimisation techniques in order to achieve a similar return to the Index; this strategy seeks to build a representative portfolio that matches the risk and return characteristics of the Index (provided that any such investments are not, at the time of purchase, inconsistent with the negative screening criteria of the Index), without the expectation that the Fund will hold every underlying constituent of the Index. This

approach may result in the Fund investing in only a relatively small number of Index constituents where such instruments provide similar performance.

Equity securities in which the Fund will invest will generally be listed on recognised markets across developed markets and will include, without limitation, common stocks, new issues, convertible bonds, and warrants.

The Fund will invest at least 90% of its net assets in securities issued in markets which are listed as developed markets under the rules of the Index and/or constitute recognised markets. No more than 5% of the net assets of the Fund may be invested in aggregate in securities issued in markets other than those listed as developed markets by a global equity index provider such as, without limitation, MSCI or FTSE.

Investment by the Fund in REITs listed on recognised markets will not exceed 10% of the Fund's net asset value.

The Fund may only use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, "FDI") for the purposes of hedging and efficient portfolio management. FDI may enable the Fund to obtain market exposure in excess of the value of the Fund's assets. The Fund may not invest in FDI that would result in losses exceeding the net asset value of the Fund.

The Fund may, on an ancillary basis, invest in debt securities issued or guaranteed by EU Member States and non-EU Member States.

The Fund may invest in cash, money market instruments and/or liquid instruments such as bank deposits, certificates of deposit, fixed and floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes which may be listed on recognised markets for liquidity purposes and for paying expenses due by it.

**Redemption and Dealing** You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

**Distribution Policy** The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

### Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon
- seek a product which promotes environmental and/or social characteristics

### Practical information

**Depository** The Fund's assets are held through its depository, State Street Custodial Services (Ireland) Limited.

**Further information** This document describes a Share Class of the Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However,

MGI Funds plc is a single legal entity that may operate, have assets held on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The

prospectus, latest annual and semi-annual reports, which are prepared for the entire Umbrella, and information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on [www.bloomberg.com](http://www.bloomberg.com).

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level.

**Be aware of currency risk.** In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Fund's supplement available free of charge at <https://investment-solutions.mercer.com>.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment tracked against the Index between July 2021 and July 2022.

**Moderate:** this type of scenario occurred for an investment tracked against the Index between September 2016 and September 2021.

**Favourable:** this type of scenario occurred for an investment tracked against the Index between December 2012 and December 2017.

## What happens if Mercer Global Investments Management Limited is unable to pay out?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 GBP is invested.

Example Investment 10,000 GBP	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>11 GBP</b>	<b>55 GBP</b>
<b>Annual cost impact*</b>	<b>0.1%</b>	<b>0.1%</b>

(\* ) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.1% before costs and 12.9% after costs.
