Introduction

The sub-funds of MGI Funds plc (the "Sub-Funds") (the "Company") are managed using a proprietary multi-manager or manager of managers investment strategy. This strategy involves allocating portions of the Sub-Funds to specialist third party managers or sub-advisors ("Sub-Investment Managers") or investing in pooled funds, which are selected by Mercer Global Investments Europe Limited (the "Investment Manager"), under authority from the Manager Mercer Global Investments Limited (the "Manager"), based on criteria for producing consistent superior returns and which, in aggregate, are considered most likely to achieve the overall objectives of the given Sub-Fund.

Q3 2023

Developed market central bank actions were mixed over the quarter, with some deciding to pause hiking interest rates, and others continuing to increase. Headline inflation continued to slow and core inflation fell in most regions. Inflation expectations also continued to decline over the quarter.

Equity returns were broadly negative over Q3 and came under pressure amid some hawkish central bank announcements especially by the US Federal Reserve, which pushed out market expectations for 2024 rate cuts. The rally in the magnificent seven slowed. Emerging markets equities outperformed developed markets but still generated negative returns. China equity underperformed due to declining sentiment and stresses in the property sector. Government bond yields rose, and credit spreads tightened over Q3 as the "higher for longer" theme took hold. Commodity prices increased over the quarter, mainly contributed by energy commodities. Dollar performance was strong over Q3.

Q4 2023

Q4 2023 started off with low expectations due to high long-term interest rates and renewed geopolitical tensions in the Middle East. Equity markets reached lows near the end of October due to risk-off sentiment. However, in November, slowing inflation in the US and other regions raised hopes that interest rates may have peaked. Over the quarter, the US Federal Reserve kept rates unchanged, shifting towards a dovish tone. Inflation expectations also continued to decline.

Financial markets reacted positively to central banks turning more dovish. Global equities rose significantly, driven by US large cap stocks. Developed equity markets outperformed emerging markets. Chinese equities performed very poorly, and Chinese policy makers announced numerous stimulus measures aimed at supporting ailing sectors of the economy, in particular the housing sector. Bond yields fell sharply in Q4, with US 10-year yields falling from over 5% in October to under 4%. Corporate bonds outperformed government bonds. The US dollar weakened.

Q1 2024

The first quarter of 2024 was characterized by a repricing of interest rate expectations, especially for developed market central banks. The timing of potential rate cuts by the US Federal Reserve, European Central Bank and Bank of England were pushed back to the second half of 2024 as growth and inflation data surprised to the upside. Despite rising bond yields, equity markets continued to rally driven by AI enthusiasm, strong corporate earnings and resilient earnings activity.

Within equities, developed markets continued to outperform emerging markets. Japanese equities outperformed its peers on the back of solid earnings growth and a weaker yen. Emerging Market equities were held back by weakness in China, although Chinese equities did rally in the second half of the quarter. Government bond yields rose over the quarter as the sell-off in bonds was driven by repricing of rate cut expectations. The Bank of Japan however moved in contrast, hiking interest rates for the first time in 17 years. Commodity prices increased over the quarter, with energy and livestock leading the gains. Sterling remained weak against the dollar over Q1 as the dollar appreciated after better than expected economic data reduced expectations of a March rate cut.

Q2 2024

The second quarter of 2024 saw inflation rates largely soften towards central banks' targets for most developed market economies. This set the stage for a shift towards monetary policy easing. The ECB cut interest rates in June. Cooling inflation and a gradual loosening of the labour markets in the US prompted markets to price in two cuts by the Federal Reserve by the end of 2024. The timing of potential rate cuts by the BoE was pushed to August.

Q2 2024 was another positive quarter for equity markets. Equity markets, especially in the developed market, continued to be narrowly led, with a small number of stocks driving returns. Corporate earnings remained resilient while subsiding inflationary pressures created a more positive macroeconomic environment for equities. Emerging market equities outperformed developed markets. Government bond yields rose over the quarter, with the sell-off in bonds attributed to prospects of delayed rate cuts. Commodity prices increased slightly and the US dollar strengthened slightly overall over the quarter.

Overall:

In terms of the main asset classes, performance over the last year was as follows:

- Developed market equities provided strong positive returns over the year as economic data proved resilient, inflation continued to ease, and corporate earnings continued their positive momentum. US equities in particular continued to be narrowly led, with a small number of stocks driving returns.
- Emerging market equities delivered positive returns, although returns from China were negative as the property sector in particular remained weak.
- While fixed Income markets continued to be impacted by inflation and interest rates, corporate and government bond returns were generally positive over the year. Emerging market debt posted positive returns.
- LDI funds are key building blocks of pension fund risk management. By using derivatives, LDI funds provide leveraged exposure to liability matching assets (primarily bonds or gilts) for pension scheme investors. These derivatives allow investors to hedge high proportions of their funded liabilities efficiently whilst still retaining a meaningful allocation to growth assets. Returns from LDI funds varied depending on the exposure provided.
- Multi-asset fund returns were positive over the period, driven mainly by strong equity performance, although returns from fixed income and alternatives also boosted returns.

MGI Funds plc Overview

All performance figures shown below are calculated by the Investment Manager using pricing from State Street Fund Services (Ireland) Limited (the "Administrator"). Figures shown are gross of the Management Fee, net of Sub-Investment Managers' fees and of all other expenses including custody and administration costs depending on the structure of the Sub-Fund.

There are three different scenarios where Sub-Fund performance may be driven by or compared to an index or benchmark:

- Passive index-tracking Sub-Funds will aim to track the performance of a specific market index ("Benchmark").
- Actively managed Sub-Funds may aim to outperform a specific index.
- A Sub-Fund may choose to use a certain index for performance comparison purposes only.

Market Outlook

The overarching narrative that permeates through our outlook is that of normalization. In certain regions, that is economic growth declining from higher-than-normal rates, and in other regions, economic growth increasing from below-normal rates, back to the so-called trend level of growth.

After a strong 2023 and early 2024, US economic activity is finally moderating. The latest growth data has come short of expectations and we see signs that the US labour market is cooling as well. While we expect this weakening to continue, we do not think a recession is likely and view the latest consensus estimates of approximately 1.5-2% growth, over the coming 18 months, as reasonable.

Inflation rates have fallen globally. US inflation is showing signs of moving towards 2%, with 2% possible next year. In the Eurozone, the pace of disinflation has slowed but the central bank target is within a line of sight. Inflation in Japan is above 2%, but underlying price pressures remain given tight labour market and rising wages, strong exports from the weak yen and the potential for strong investment.

We continue to remain wary about equity valuations and corporate earnings forecasts, particularly given higher bond yields. However, we continue to believe further equity upside is likely and that favourable macroeconomic conditions balances stretched valuations.

Economic growth has proven to be more resilient in emerging markets. Policy stimulus in China coupled with ex-China emerging markets central banks easing policy should bolster real household income and boost consumption growth, in turn supporting corporate earnings growth. Manufacturers in Korea, Taiwan and other Asian regions also offer exposure to the ongoing tech and AI upcycle. We expect emerging markets earnings to outpace developed market counterparts over the coming years.

Frontier Market Debt is attractively priced. We retain a favorable view on Emerging Market Debt Local Currency from a tactical perspective. We expect emerging markets currencies to strengthen as central banks cut rates to support growth with inflation back towards target.

Benchmark Tracking Error Appendix

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
MGI Euro Bond Fund	3.55%	3.63%	(0.07%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.20%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer US Treasury 1-3 Year Bond Fund	4.52%	4.51%	0.00%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.04%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer US Treasury 3-7 Year Bond Fund	3.19%	3.20%	(0.01%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.04%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Global Equity Fund	20.60%	20.65%	(0.05%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.07%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Emerging Markets Equity Fund	11.63%	12.42%	(0.79%)	The Sub-Fund underperformed the Index before costs (TER) primarily due CGT on unrealised gains on Indian holdings. This is reflected as a negative accrual to the fund NAV, which is a standard market practice. As the benchmark index does not reflect the same, this results in a performance drag.	0.50%	0.53%	The Sub-Fund has exceeded its anticipated tracking error over the year. This is due to a combination of accounting differences as well as CGT on unrealised gains on Indian assets. Due to accounting differences, there are relative differences, which reversed over subsequent days. The index doesn't account for CGT on unrealised gains, which leads to performance deviation given that this is reflected in the fund.

Benchmark Tracking Error Appendix (continued)

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
Mercer Short Dated UK Gilt Fund	6.15%	6.26%	(0.11%)	The Sub-Fund performance over the year was in line with expectations and close to the index performance before costs (TER)	0.50%	0.05%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Euro Corporate Bond Fund	6.34%	6.45%	(0.11%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.17%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.

Benchmark Tracking Error Appendix (continued)

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
Mercer Passive Euro Over 5 Year Bond UCITS Fund**	1.60%	1.71%	(0.11%)	The Sub-Fund performance over the year was in line with expectations and close to the index performance before costs (TER)	0.50%	0.31%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Global Small Cap equity Feeder Fund*	9.47%	9.75%	(0.28%)	The Sub-Fund performance was in line with expectations. The sub-fund performance slightly deviated from both the master fund and the Index before costs (TER) due to the feeder fund reflecting the swung NAV of the master fund.	0.50%	0.36%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Fundamental Indexation Global Equity Feeder Fund	21.36%	21.61%	(0.26%)	The Sub-Fund performance was in line with expectations. The sub-fund performance slightly deviated from both the master fund and the Index before costs (TER) due to the feeder fund reflecting the swung NAV of the master fund.	0.50%	0.22%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.

The figures reported are based on the base currency of the Sub-Fund where available, if unavailable, a hedged Share Class with the longest history will be used. For any Sub-Funds launched during the period under review, figures are reported from the first month end following the launch date of the Sub-Fund.

Tracking difference measures the extent to which a product's return differs from that of its benchmark index. Tracking error indicates how much variability exists among the individual data points that make up the Sub-Fund's average tracking difference to the benchmark.

The above realised tracking error is calculated daily over one year or since inception if the Sub-Fund launched within the period under review.

The Directors have the pleasure in submitting their report to the Shareholders together with the audited financial statements for the financial year ended 30 June 2024.

Principal Activities

MGI Funds plc (the “Company”) is an open-ended umbrella fund investment company with variable capital with segregated liability between Sub-Funds. The share capital of the Company is divided into different series of shares with each series of shares representing a portfolio of assets which comprises a separate fund (each a “Sub-Fund”). The Company is authorised and regulated by the Central Bank of Ireland (the “Central Bank”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank’s (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “CBI UCITS Regulations”).

As at 30 June 2024, the Company consisted of sixty-eight (30 June 2023: sixty-three) Sub-Funds of which fifty-seven are active (30 June 2023: fifty-four), seven are authorised but not launched (30 June 2023: seven), four are terminated but not de-authorised at the financial year end (30 June 2023: two).

Statement of Directors’ Responsibilities

The Directors are responsible for preparing the Report of the Directors and financial statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law, they have elected to prepare the financial statements in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”) and applicable law.

Under Company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, ensuring that the financial statements and the Report of the Directors comply with the Companies Act 2014 and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Compliance on Corporate Governance Code

The Company has adopted in full the voluntary Code of Corporate Governance (the “Corporate Governance Code”) for Collective Investment Schemes (“CIS”) and Management Companies issued by the Irish Funds (“IF”), the text of which is available from the IF website, www.irishfunds.ie.

The Company has been in compliance with the Corporate Governance Code during the financial year ended 30 June 2024.

Directors

The Directors, who held office on 30 June 2024 as stated below, are not required to retire by rotation under the Memorandum and Articles of Association.

Directors

The Directors are:

Name	Director Status	Nationality	Date of Appointment
Gráinne Alexander	Independent Non-Executive	Irish	1 Jan 2019
Helen O'Beirne	Non-Executive	Irish	13 Jan 2020
Liam Miley	Independent Non-Executive	Irish	13 May 2020
Carmel Jordan	Non-Executive	Irish	31 May 2020
Susan Dargan	Independent Non-Executive	Irish	1 Nov 2023
Jimmy Furlong	Non-Executive	Irish	15 May 2024

Directors' fees (including expenses) for the financial year are stated in Note 4 to the financial statements.

Changes in Directorships

Gráinne Alexander, Helen O'Beirne, Liam Miley and Carmel Jordan served for the entire financial year. Susan Dargan was appointed to the Board of Directors (the "Board") on 1 November 2023. Tom Finlay resigned from the Board on 31 December 2023. Hooman Kaveh resigned from the Board on 15 May 2024. Jimmy Furlong was appointed to the Board on 15 May 2024.

Transactions involving Directors:

The Board are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014, at any time during the financial year ended 30 June 2024 (30 June 2023: Nil), other than those disclosed in Note 4 to the financial statements.

Directors' & Secretary's Interests

None of the Directors nor the Secretary, who held office at 30 June 2024, or their families, held any interest in the shares of the Company at any time during the financial year ended 30 June 2024 (30 June 2023: Nil).

Audit Committee

The Company has established an audit committee under Section 167 of the Companies Act 2014.

Employees

For details of identified staff of the Manager, as defined by regulations, the MGIM Remuneration Policy is available via the following link <https://investment-solutions.mercer.com/global/all/en/investment-solutions-home/corporate-policies.html> as well as pages 343-344.

Transactions with connected persons

Regulation 43 of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length, and b) in the best interest of the unit-holders of the UCITS".

As required under UCITS Regulation 81.4, the Directors are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates, complied with the obligations that are prescribed by Regulation 43(1).

UK Reporting Status

The Company has received confirmation from HM Revenue & Customs ("HMRC") in the United Kingdom ("UK") that the Sub-Funds listed in the table below, have been granted reporting fund status for UK tax purposes from the effective dates listed below.

Sub-Fund	Share Class	Reporting Fund Regime Effective Date
MGI Emerging Markets Equity Fund	Class I-1 £	1 Jul 2017
	Class M-1 £	1 Jul 2020
	Class I-1 €	1 Jul 2023

Business Review, Results and Future Developments

The business of the Company is reviewed in detail in the Investment Manager's Report. The results for the financial year are stated in the Statement of Comprehensive Income. The Company will continue to act as an investment vehicle as set out in its Memorandum and Articles of Association. The analysis of the Company's key performance indicators ("KPI's") are contained in the Investment Manager's Report. The Board does not anticipate any significant change in the structure or investment objectives of the Sub-Funds.

Going Concern

The financial statements of the Company have been prepared on a going concern basis as it has been determined that the Company can continue in operational existence for at least twelve months from the date of approval of these financial statements (the period of assessment). The assessment is completed at Company level by the Directors and takes multiple factors into account including Sub-Fund size, Net Asset Value ("NAV") movements and new Sub-Fund launches and terminations.

Principal Risks and Uncertainties

The principal risks and uncertainties faced by the Company are market price risk, credit risk, currency risk, interest rate risk and liquidity risk which are outlined in Note 9 to the financial statements.

Share Capital

The net assets under management are disclosed in the Statement of Financial Position.

Full details of the Company's share capital, including changes during the financial year under review and significant Shareholders are disclosed in Note 14 to the financial statements.

Distributions

Details of distributions declared and paid during the financial year ended 30 June 2024 and 30 June 2023 are disclosed in Note 15 to the financial statements.

Responsible Investment

Over the past few years, the EU has been building a sustainable finance framework, to better support the financing of sustainable economic activities, and to support the transition to a carbon neutral economy by 2050. Regulation surrounding financial products and market participants has developed with the aim to improve transparency and availability of environmental, social and governance ("ESG") related information for investors.

The Sustainable Finance Disclosure Regulation ("SFDR") is a fundamental pillar of the EU Sustainable Finance agenda, along with other regulations such as the EU Taxonomy Regulation and the Corporate Sustainability Reporting Directive ("CSRD").

Periodic reporting for products that disclose under Article 8 and additional information for products disclosing under Article 6 that consider Principal Adverse Impact ("PAI") are included in these financial statements.

A number of Mercer Sub-Funds make disclosures under Article 8 of the SFDR. The attributes of the Sub-Funds relating to promotion of environmental and/or social characteristics vary. However, some of the sustainability features and measures incorporated across the range of Sub-Funds include; expanded set of exclusions focused on reducing the environmental impact of the solutions, sustainable investment commitments based on the Investment Manager's sustainable investments framework, specific engagement and escalation policies on any UN Global Compact breaches, and actively managed solutions making a defined binding commitment to reduce carbon emissions intensity over time. Details on the precise environmental and social characteristics of the Sub-Funds are set out in the relevant Supplement. Information on the environmental or social characteristics of each relevant Sub-Fund are set out in the Unaudited Supplemental Information on pages 322-323,378-747. Information on Sub-Funds that do not promote environmental or social characteristics but consider PAI are set out on pages 748-759.

Sustainability related data

In evaluating a security, issuer or index based on sustainability-related characteristics, the Investment Manager (or its delegate) is dependent on information and data which may be incomplete, inaccurate or unavailable. The Investment Manager (or its delegate) may rely upon data sourced from third-party ESG research and market data providers who may similarly rely on information which is incomplete, inaccurate or unavailable. The wide variety of types, sources and uses of ESG data can produce very different results and the models used by third-party ESG research providers can result in conflicting and subjective assessments. Third-party ESG research and market data providers typically limit or exclude any responsibility or liability with respect to the accuracy, reasonableness or completeness of any sustainability related assessments.

Data quality and coverage in relation to investee companies has various challenges across different countries and regions (especially for smaller companies and less developed markets). Some data may be modelled rather than reported data and data from some companies may be delayed. In addition, not all self-reported data is independently verified. Since the regulation and standards of non-financial reporting is developing, data quality, coverage, consistency and accessibility remains challenging over the near term.

Significant events during the financial year

See Note 16 to the financial statements for significant events affecting the Company during the financial year that require amendment to or disclosure in the financial statements.

Subsequent events

See Note 17 to the financial statements for significant events affecting the Company since the financial year end date.

Adequate accounting records

The Board ensures compliance with the Company's obligation to maintain adequate accounting records by appointing competent persons to be responsible for them. The adequate accounting records are kept by State Street Fund Services (Ireland) Limited (the "Administrator"), at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

Relevant audit information

The Board believes that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the Company's statutory auditor is aware of that information. In so far as they are aware, there is no relevant audit information of which the Company's statutory auditor is unaware.

Independent Auditor

Deloitte Ireland LLP, Chartered Accountants & Statutory Audit Firm, (the "Auditor") indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

Statement of Directors' Compliance

We acknowledge that we are responsible for securing the Company's compliance with its relevant obligations. We confirm that:

- a compliance policy statement has been drawn up setting out the Company's policies;
- appropriate arrangements and structures that are, in our opinion, designed to secure material compliance with the Company's relevant obligations, have been put in place; and
- a review analysis has been conducted, during the financial year, of the arrangements and structures that have been put in place to secure the Company's compliance with its relevant obligations.

On behalf of the Board of Directors**Susan Dargan****Liam Miley****Director****Director****24 October 2024**

We have enquired into the conduct of MGI Funds plc (the "Company") for the financial year ended 30 June 2024, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial year in accordance with the provisions of the Company's constitutional documentation and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the constitutional documentation and the UCITS regulations; and
- (ii) otherwise in accordance with the constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the constitutional documentation, the UCITS Regulations and Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited

78 Sir John Rogerson's Quay
Dublin 2
Ireland

24 October 2024

Report on the audit of the financial statements***Opinion on the financial statements of MGI Funds plc (the "Company")***

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 30 June 2024 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows;
- the related notes 1 to 18, including material accounting policy information as set out in note 2; and
- Portfolio Statements.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1))(Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Report on the audit of the financial statements (continued)***Other information***

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>.

This description forms part of our auditor's report.

Report on other legal and regulatory requirements***Opinion on other matters prescribed by the Companies Act 2014***

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Report on other legal and regulatory requirements (continued)***Matters on which we are required to report by exception***

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

*Sub-Fund terminated during the financial year ended 30 June 2024.

**Sub-Fund launched during the financial year ended 30 June 2024 therefore there is no comparative information.

***For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The method of translation has no effect on the NAV per Redeemable Participating Share attributable to the individual Sub-Funds. The resulting Euro gain is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. This is a notional gain, which has no impact on the NAV of the Sub-Funds.

*For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The method of translation has no effect on the NAV per Redeemable Participating Share attributable to the individual Sub-Funds. The resulting Euro gain is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. This is a notional gain, which has no impact on the NAV of the Sub-Funds.

* Sub-Fund terminated during the financial year ended 30 June 2024.

** Sub-Fund launched during the financial year ended 30 June 2024 therefore there is no comparative information.

*** For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The resulting gain of Euro is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Cash Flows. This is a notional gain, which has no impact on the NAV of the Sub-Funds.

¹ These amounts exclude non-cash transactions of US\$ 11,130,498. Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

² These amounts exclude non-cash transactions of US\$ 131,828,938. Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

³ These amounts exclude non-cash transactions of US\$ (338,361). Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

1. Reporting entity

MGI Funds plc (the “Company”) is an open-ended investment company with variable capital organised under the laws of Ireland. The Company is organised in the form of an umbrella fund insofar as the share capital of the Company will be divided into different series of shares with each series of shares representing a portfolio of assets which will comprise a separate fund (each a “Sub-Fund”) and each Sub-Fund has segregated liability under Irish law.

MGI Funds plc is the reporting entity.

2. Material accounting policies

The material accounting policies adopted by the Company are as follows:

a) Basis of preparation

The financial statements have been prepared in accordance with IFRS as adopted by the EU, and Irish statute comprising the Companies Act 2014, the European Communities UCITS Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

The financial statements of the Company have been prepared on a going concern basis as it has been determined that the Company can continue in operational existence for at least twelve months from the date of approval of these financial statements (the period of assessment). The assessment is completed at Company level by the Directors and takes multiple factors into account including Sub-Fund size, NAV movements and new Sub-Fund launches and terminations.

Subsequent to the financial year end, a decision was made to terminate Mercer Passive Global Small Cap Equity Feeder Fund and Mercer Sustainable Listed Infrastructure Feeder Fund. Please refer to Note 17 to the financial statements for further details.

b) Functional and presentation currency

(i) Functional and presentation currency of the Company

The functional and presentation currency of the Company is the Euro (“€”) as it is the currency of the primary economic environment in which the Company operates.

(ii) Functional and presentation currency of the Sub-Funds

Items included in the Company’s financial statements are measured using the currency of the primary economic environment in which the respective Sub-Funds operate (the “functional currency”). If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The functional currency, which is either €, United States Dollar (“US\$”) or British Pound (“GBP”), is shown in the Statement of Financial Position for each of the Sub-Funds. The Sub-Funds have also adopted these functional currencies as their presentation currency.

(iii) Translation of Sub-Funds for the purposes of calculating the Company values

For the purposes of presenting the financial statements of the Company, the Statement of Financial Position of the Sub-Funds with functional and presentation currencies other than € were translated to € at the exchange rate prevailing as at 30 June 2024. The Statement of Comprehensive Income, proceeds from redeemable participating shares issued, redemptions of redeemable participating shares and Statement of Cash Flows of the Sub-Funds with functional currencies other than the € were translated at the average rates during the year where those rates represent a reasonable approximation of actual rates.

(iv) Translation and balances

Monetary assets and liabilities denominated in currencies other than the functional currency of a particular Sub-Fund are translated to the functional currency at the closing rates of exchange at financial year end. Transactions during the financial year are translated at the rate of exchange prevailing on the date of the transaction. Foreign currency gains and losses are included in Net gain/(loss) from financial instruments at fair value through profit or loss (“FVTPL”) in the Statement of Comprehensive Income.

Average rates of exchange were used to translate transfers of shares between share classes of the Sub-Funds (each a “Share Class”) with functional currencies other than the functional currency of the Sub-Fund, where those rates represent a reasonable approximation of actual rates.

c) Use of judgements and estimates

The preparation of financial statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions which affects the application of accounting policies and the reported amounts of

2. Material accounting policies (continued)**c) Use of judgements and estimates (continued)**

assets and liabilities, income and expenses and the disclosure of contingent assets and liabilities as at the date of the financial statements. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the financial year in which the estimates are revised and in any future years affected.

(i) Judgements

Information about judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements of the Company and the Sub-Funds is included in Note 2b and in Note 7 to the financial statements.

(ii) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the financial year ending 30 June 2024 and 30 June 2023 is included in Note 10 to the financial statements and relates to the determination of fair value of certain financial instruments with significant unobservable inputs.

d) New standards, amendments or interpretations issued and effective for the financial year beginning 1 July 2023

The following new standards, amendments to standards or interpretations are effective for annual periods beginning 1 July 2023. These have been applied in preparing the Company's financial statements and have not had a significant impact on the Company's financial position, performance or disclosures in its financial statements.

- IFRS 17 Insurance Contracts.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction (Amendments to IAS 12).
- International tax reform, Pillar II Model rules (Amendments to IAS 12).

e) New standards, amendments or interpretations issued but not effective for the financial year beginning 1 July 2023 and not early adopted

The following new standards, amendments to standards or interpretations are effective for annual periods beginning after 1 July 2023, and have not been early adopted in preparing these financial statements. Of those standards that are not yet effective, none are expected to have a material impact on the Company's financial statements in the period of initial application.

- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1, effective for annual reporting periods beginning on or after 1 January 2024).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16, effective for reporting periods beginning on or after 1 January 2024).
- Disclosure of Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7, effective for reporting periods beginning on or after 1 January 2024).
- IFRS S1 – General Requirements for Disclosure of Sustainability-related Financial Information (effective for reporting periods beginning on or after 1 January 2024).
- Lack of Exchangeability (Amendments to IAS 21, effective for reporting periods beginning on or after 1 January 2025).
- IFRS 18 – Presentation and Disclosure in Financial Statements (effective for reporting periods beginning on or after 1 January 2027).
- IFRS 19 – Subsidiaries without Public Accountability: Disclosures (effective for reporting periods beginning on or after 1 January 2027).

f) Financial instruments*(i) Recognition and initial measurement*

Financial assets and financial liabilities are initially recognised at FVTPL on the trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities

2. Material accounting policies (continued)**f) Financial instruments (continued)***(i) Recognition and initial measurement (continued)*

are recognised on the date on which they originated. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded in the Statement of Comprehensive Income.

Financial assets and liabilities are measured initially at fair value. For an item not classified at FVTPL, it is measured initially at fair value plus or minus transaction costs that are directly attributable to its acquisition or issue. Transaction costs on financial assets and financial liabilities at FVTPL are expensed immediately, while on other financial instruments they are amortised.

(ii) Classification and subsequent measurement

On initial recognition, the Company classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding

Business model assessment

In making an assessment of the objectives of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how Mercer Global Investments Europe Limited ("MGIE", the "Investment Manager", the "Distributor") is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for de-recognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets. The Company has determined that there are two business models.

- Held to collect business model: this includes cash and cash equivalents, due from broker, subscriptions receivable, deposits, receivable for securities sold, reverse repurchase agreements and other assets. These financial assets are held to collect contractual cash flows.
- Other business model: this includes debt securities, equity investments, money market instruments, loans, investments in unlisted open-ended CIS and financial derivative instruments ("FDIs"). These financial assets are managed and their performance is evaluated on a fair value basis, typically with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- leverage features;
- prepayments and extension features;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

A financial liability is classified as FVTPL if it is classified as held-for-trading, if it is an FDI or, if it is designated as such on initial recognition.

2. Material accounting policies (continued)**f) Financial instruments (continued)***(ii) Classification and subsequent measurement (continued)**Assessment whether contractual cash flows are SPPI (continued)*

The Company has classified its financial assets and financial liabilities into the following categories:

- Financial assets at FVTPL - investments in transferable securities, money market instruments, loans, investment funds and FDIs with positive fair values.
- Financial assets at amortised cost - cash and cash equivalents, due from broker, receivable for securities sold, subscriptions receivable, other assets, deposits and reverse repurchase agreements.
- Financial liabilities at amortised cost - bank overdraft, due to broker, payable for securities purchased, unfunded loan, interest payable, redemptions payable, expenses payable, repurchase agreements and net assets attributable to holders of redeemable participating shares.
- Financial liabilities at FVTPL - securities sold short, FDIs with negative fair values.

Financial assets and financial liabilities at FVTPL are subsequently measured at fair value. Net gains and losses arising from changes in the fair value of financial assets and financial liabilities at FVTPL are included in the Statement of Comprehensive Income in the year in which they arise.

Financial assets and financial liabilities at amortised cost are subsequently measured at amortised cost using the effective interest rate method ("EIR"). Interest income from the financial assets measured at amortised cost are recognised in interest income calculated using EIR in the Statement of Comprehensive Income. Interest expense from the financial liabilities measured at amortised cost is recognised in the Statement of Comprehensive Income.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

(iii) Fair value measurement

"Fair Value" is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Sub-Funds have access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments traded in active markets (such as equities) or any other regulated market (such as corporate bonds, government bonds, municipal bonds, asset backed securities ("ABS"), mortgage backed securities ("MBS"), convertible securities and credit linked notes) is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. Financial assets are priced at current last traded market prices, while financial liabilities are priced at current ask prices.

A market is regarded as "active" if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The Sub-Funds measure instruments quoted in an active market at current last traded market price, because this price provides a reasonable approximation of the exit price. If there is no quoted price in an active market, then the Sub-Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

This includes, but is not limited to, reviewing information on stale and static prices, suspended securities and securities in liquidation and securities valued at cost. If the Investment Manager has reasonable belief that the valuation of a particular security may not reflect fair market value, the Investment Manager's Valuation Committee ("VC") will meet to consider the appropriate valuation of the security in question. The VC meets on a regular basis and formally reviews all new fair value assessments and other pricing issues. Ad-hoc fair value approvals may be received via email to the committee members or by means of extraordinary meetings of the VC should the need arise.

The Company recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

(iv) Amortised cost measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the EIR of any difference between the initial amount recognised and the maturity amount, minus any adjustment for any loss allowances for financial assets.

(v) Impairment of financial assets

IFRS 9 requires an impairment assessment to be carried out on its financial assets held at amortised cost. Mercer Global Investments Management Limited ("MGIM", the "Manager") has reviewed the impairment assessment of financial assets

2. Material accounting policies (continued)**f) Financial instruments (continued)***(v) Impairment of financial assets (continued)*

held at amortised cost. The Manager considers the probability of default to be close to zero, as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised in the financial statements based on 12-month expected credit losses ("ECLs") as any such impairment would be wholly insignificant to the Company.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. The Company considers a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of "investment grade". The Company considers this to be Baa3 or higher per Moody's or BBB- or higher per Standard and Poor's.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from the default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the EIR of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is "credit-impaired" when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisations.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off

The gross carrying amount of financial assets is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

(vi) Derecognition

The Company derecognises a financial asset when the contractual right to the cash flows from the financial asset expires or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired. The Company uses the average cost method to determine realised gains and losses on derecognition.

(vii) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the Statement of Financial Position when and only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

2. Material accounting policies (continued)**g) Dividend and interest income/expense**

Dividend income is recognised in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income on the date that the right to receive payment is established. Dividend income from unquoted equities is recognised when the dividend is declared and Shareholders' approval has been obtained.

Bank interest income and bank interest expense are recognised in Interest income calculated using the EIR respectively in the Statement of Comprehensive Income.

Interest income and interest expense generated from assets classified as FVTPL is disclosed in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

h) Net gain/(loss) from financial instruments at FVTPL

Net gain/(loss) from financial instruments at FVTPL includes all realised gains and losses, unrealised gains and losses from fair value changes, foreign exchange differences, dividend and interest income/(expense) on financial instruments at FVTPL. The Company records its investment transactions on trade date basis. Realised gains and losses are calculated based on the average cost method.

The change in unrealised gain or loss represents a movement in fair value to cost of the investment between reporting periods. Where a security's fair value over cost increases over the period, this is recorded as a change in unrealised gain on investments. Where a security's fair value over cost decreases over the period, this is recorded as a change in unrealised loss on investments. For investments and FDIs held at the end of the prior financial year and sold in their entirety during the current financial year, the unrealised gain or loss represents the difference between the carrying amount of a financial instrument at the beginning of the period, or the transaction price if it was purchased in the current reporting period, and its carrying amount at the end of the period, being € Nil.

i) Rebate income

Rebate income is received by a Sub-Fund by virtue of its investment in the units of another investment fund where the Manager has negotiated a discounted management fee (the "Management Fee") on its investment in the units of the underlying Investment Fund. Rebate income is accounted for on an accrual basis in the Statement of Comprehensive Income.

j) Operating expenses

Operating expenses recognised in the Statement of Comprehensive Income on an accrual basis.

k) Cash and cash equivalents and bank overdraft

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of short-term commitments, other than cash collateral provided in respect of derivatives and securities borrowing transactions. Bank overdrafts are shown within liabilities in the Statement of Financial Position.

l) Unfunded loans

Unfunded loans occur when the Company commits to purchase a loan asset and has purchased less than 100% of the commitment as at year end. The percentage outstanding as at year end is the unfunded loan. The full 100% of the commitment is reflected in the Statement of Financial Position. The percentage outstanding is reflected in the Statement of Financial Position as a financial liability.

m) Redeemable participating shares

Redeemable participating shares are redeemable at the Shareholder's option and are classified as financial liabilities.

The redeemable participating shares can be put back to the Sub-Funds at any dealing day for cash equal to a proportionate share of the relevant Sub-Fund's NAV. The redeemable participating shares are carried at the redemption amount that is payable at the reporting date if the Shareholders exercised their right to put the share back to the Sub-Fund.

Swing Pricing

The Directors may determine, at their discretion, to "swing" the NAV to counter the possible negative effects of dilution. Swing pricing is applied to a Sub-Fund once net subscriptions or redemptions for a Sub-Fund for a given dealing day exceeds a predetermined amount.

2. Material accounting policies (continued)**m) Redeemable participating shares (continued)***Anti-Dilution levy*

The Directors may determine to add or deduct, as appropriate, an anti-dilution levy, to or from the subscription or redemption amount on that dealing day in order to cover dealing costs and to preserve the value of the underlying assets of the Sub-Fund for existing Shareholders.

Please see Note 14 to the financial statements for further details.

n) Financial derivative instruments*(i) Forward foreign currency contracts*

The fair value of open forward foreign currency contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the valuation date. Gains or losses arising on the settlement of forward foreign currency contracts are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. The unrealised gain/(loss) on open forward foreign currency contracts is calculated by reference to the forward price. Realised gains or losses include net gains and losses on contracts which have been settled or offset by other contracts.

(ii) Futures contracts on securities

The fair value of futures contracts is based upon daily quoted settlement prices. Changes in the value of the contract are recognised as unrealised gains or losses in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income by "marking to market" the value of the contract at the reporting date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a realised gain/(loss) in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. Futures contracts are treated as settled to market and are recorded as a due from/to broker in the Statement of Financial Position. Futures contracts are presented in the Portfolio Statements on a gross basis.

(iii) Interest rate swaps, credit default swaps, total return swaps and cross currency interest rate swaps

Interest rate swaps ("IRS"), credit default swaps ("CDS"), total return swaps ("TRS") and cross currency interest rate swaps ("CCIRS") may be purchased or sold to enhance return, to hedge against fluctuations in security prices, market conditions or currency exchange rates, or as a substitute for the purchase or sale of securities or currencies, either for efficient portfolio management ("EPM") or investment purposes.

Derivatives such as IRS are used for trading purposes while CDS are used for hedging purposes.

IRS are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate. IRS are included in assets when the fair value is positive and in liabilities when the fair value is negative, unless there is the legal ability and intention to settle the asset and liability on a net basis. Revenues/payments arising on IRS are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. Swap contracts are carried at fair value based upon the fair value of the underlying assets, the risk associated with the underlying assets, and any additional provisions of the derivative contract. The centrally cleared IRS held on MGI Global Bond Fund, MGI Emerging Markets Debt Fund, Mercer Short Duration Global Bond Fund 2, Mercer Global Credit Fund, Mercer Absolute Return Fixed Income Fund, Mercer Short Duration Bond Fund 3, PIMCO Global Aggregate Bond Fund and Mercer Emerging Market Debt - Hard Currency Fund are treated as settled to market and are presented in the Portfolio Statements of the respective Sub-Funds on a gross basis.

CDS contracts are valued at fair value based on a pricing methodology utilising certain factors which include the credit risk of the reference obligations of the underlying issuers, as well as the specific terms of the contract. Certain CDS contracts entered into may include upfront fees that are paid by the buyer to the seller of the CDS contracts at the date of transaction. Such fees are reported as unrealised gains or losses in the Statement of Financial Position and as net gains and losses in the Statement of Comprehensive Income. These upfront payments represent the amounts paid or received when initially entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and the prevailing market conditions and are included as realised gains or losses in the Statement of Comprehensive Income upon termination or maturity of the swap.

TRS is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In TRS, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. TRS allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. Contracts are marked-to-market daily based upon calculations using a valuation model and the change, if any, is recorded as unrealised gain or loss in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

2. Material accounting policies (continued)**n) Financial derivative instruments (continued)**

(iii) *Interest rate swaps, credit default swaps, total return swaps and cross currency interest rate swaps (continued)*
CCIRS are contracts between the Sub-Fund and a counterparty to exchange cash flows based on interest rate markets in two different currencies (fixed or floating), calculated on a notional principal value for a fixed period. For non-deliverable CCIRS the payments for one of the currencies is settled through an alternate major currency. CCIRS are entered into to gain exposure to long and short positions in a range of international interest rates. Contracts are marked to market daily based upon calculations using a valuation model and the change, if any, is recorded as unrealised gain or loss. Payments received or paid on maturity or termination of the contract are recognised as realised gains or losses in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

TRS and CCIRS are used for EPM purposes which includes hedging against market movements, currency exchange or interest rate risks or otherwise, and for investment purposes.

(iv) *Swaptions*

When a Sub-Fund writes a swaption, a premium is received by the Sub-Fund and the swaption is initially recognised at the amount of the premium. The difference between the premium received and the fair value reported in the Statement of Financial Position gives rise to an unrealised gain/(loss). When a swaption which the Sub-Fund has written is exercised, the amount of the premium originally received will offset the cost of the swap upon exercise of the option in arriving at the movement in unrealised gain/(loss) to be included in the Statement of Comprehensive Income. Premiums received on swaptions written which expire unexercised are treated as realised gains in the Statement of Comprehensive Income.

When a Sub-Fund purchases a swaption, a premium is paid by the Sub-Fund and the swaption is initially recognised at the amount of the premium. The swaption is subsequently marked-to-market to reflect the fair value of the swaption purchased, which is reported within financial assets at FVTPL in the Statement of Financial Position. When a swaption which the Sub-Fund holds is exercised, the amount of the premium originally paid will offset the cost of the swap upon exercise of the option in arriving at the movement in unrealised gain/(loss) to be included in the Statement of Comprehensive Income. Premiums paid from the purchase of swaptions which expire unexercised are treated as realised losses in the Statement of Comprehensive Income.

(v) *Warrants*

Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal.

The valuation of the warrants depends on the level of trading. If the warrants are actively traded in the market, then the market price is used. If the warrants are not actively traded in the market, the intrinsic value of the warrant based on underlying equity price and warrant strike price is used. Warrants by their nature are covered investments.

(vi) *Options*

A Sub-Fund may purchase and sell (write) call and put options on securities, securities indices and foreign currencies traded on a national securities exchange or in an over the counter ("OTC") market.

When a Sub-Fund purchases a call or a put option, a premium is paid by the Sub-Fund. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses. The option is subsequently marked-to-market to reflect the fair value of the option purchased, which is reported within financial assets at FVTPL in the Statement of Financial Position for each relevant Sub-Fund.

If an option which a Sub-Fund has written either expires on its stipulated expiration date or a Sub-Fund enters into a closing purchase transaction, a Sub-Fund realises a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealised gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which a Sub-Fund has written is exercised, a Sub-Fund realises a capital gain or loss from the sale of the underlying security, and the proceeds from such sales are increased by the premium originally received. When a put option which a Sub-Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Sub-Fund purchases upon exercise of the option.

The OTC options are valued at close of business on the dealing day at the settlement price as provided by the counterparty/broker and the values are independently valued, at a minimum, weekly. The fair values of exchange traded options are based upon their quoted daily settlement prices on the relevant exchange. In the event of it being impossible or incorrect to carry out a valuation of a specific investment in accordance with the valuation rules, or if such valuation is not representative of a security's fair market value, the Directors are entitled to use other generally recognised valuation methods in order to reach a proper valuation of that specific instrument, provided that such method of valuation has been approved by State Street Custodial Services (Ireland) Limited (the "Depositary").

2. Material accounting policies (continued)**o) Repurchase agreements and reverse repurchase agreements***(i) Repurchase agreements*

When the Sub-Fund sells a financial asset and simultaneously enters into an agreement to repurchase the same or a similar asset at a fixed price on a future date, the arrangement is accounted for as a borrowing and is recognised in the Statement of Financial Position as a payable under a repurchase agreement.

(ii) Reverse repurchase agreements

When the Sub-Fund purchases a financial asset and simultaneously enters into an agreement to resell the same or a substantially similar asset at a fixed price on a future date, the arrangement is accounted for as a loan and receivable, and recognised in the Statement of Financial Position as a receivable from a reverse repurchase agreement, and the underlying asset is not recognised in the Company's financial statements.

Receivable for reverse repurchase agreements and payable for repurchase agreements are subsequently measured at amortised cost.

Securities borrowed by the Sub-Funds are not recognised in the Statement of Financial Position. If the Sub-Fund subsequently sells the borrowed securities, then the arrangement is accounted for as a short sold position, recognised in the Statement of Financial Position as a financial liability at FVTPL. Cash collateral for borrowed securities is included within due from broker in the Statement of Financial Position.

p) Due from/to broker

Due from/to broker is margin cash and cash collateral which is held by or due to brokers. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is as such restricted and is reported separately to the unrestricted cash in the Statement of Financial Position.

Upon entering into a centrally cleared derivative contract, the Sub-Funds are required to pledge cash or securities as collateral to a central clearing house, through a broker, in accordance with the initial margin requirements of the central clearing house. At year end, the balances of the initial margin requirements at each broker, excluding the value of any securities pledged as collateral, are recorded as due from/to broker in the Statement of Financial Position. Any security that has been pledged as collateral is identified as an asset in the Statement of Financial Position at FVTPL.

q) Cross Investments within the Company

For the purposes of producing the combined Company total financial statements, investments by Sub-Funds within the Company in the units of other Sub-Funds within the Company, also known as "Cross Investments" must be eliminated in order to prevent double counting.

r) Collateral

A Sub-Fund's assets may be deposited for collateral purposes with counterparties in respect of OTC FDIs, reverse repurchase agreements and repurchase agreements held by a Sub-Fund. Investments pledged by a Sub-Fund as collateral are recognised at fair value in the relevant Sub-Fund's Portfolio Statements and such investments are referenced accordingly at the base of the Portfolio Statement. These assets remain in the ownership of the relevant Sub-Fund and are recorded as an asset in the Statement of Financial Position.

A Sub-Fund may also receive assets as collateral from counterparties. Securities received by the Sub-Funds as collateral from counterparties do not form part of the NAV of the Sub-Funds and are disclosed at the end of the relevant Portfolio Statement.

Cash collateral received is disclosed in the Statement of Financial Position as an asset and a related liability to repay the collateral is recorded, both of which are valued at amortised cost.

Cash pledged by the Sub-Funds as collateral is disclosed in the Statement of Financial Position within due from broker.

s) Taxation

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

2. Material accounting policies (continued)**t) Other assets**

Other assets do not carry any interest and are short-term in nature and are accordingly stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts.

u) Expenses payable

Accrued expenses are recognised initially at fair value and subsequently stated at amortised cost using the EIR method.

v) Receivable for securities sold/payable for securities purchased

Receivable for securities sold and payable for securities purchased represent sales and purchases that have been contracted for but not yet delivered by the end of the financial year. They are disclosed as assets and liabilities, respectively, in the Statement of Financial Position.

w) Subscriptions receivable/redemptions payable

The subscriptions receivable/redemptions payable represent amounts receivable and payable from/to investors for Sub-Fund shares issued/redeemed for which settlement has not occurred at the end of the financial year and are included as assets/liabilities in the Statement of Financial Position.

x) Distributions

Distributions on distributing share classes with an ex-date during the financial year are included as a finance cost in the Statement of Comprehensive Income. The reinvestment of distributions if applicable, being the portion of the total distribution reinvested, are included as a share transaction in the Statement of Changes in net assets attributable to holders of redeemable participating shares. None of the distributions are paid out of the capital.

y) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forwards and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities, futures and options are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income for each Sub-Fund. Depository transaction costs are included in Depository/sub-custodian fees in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs and the total of these costs incurred by each Sub-Fund during the financial year are disclosed in Note 3 to the financial statements.

z) Securities lending income

Income earned from securities lending activities is accounted for on an accruals basis. Securities lending income is recognised in the Statement of Comprehensive Income. Investments lent under securities lending agreement continue to be recognised in the Statement of Financial Position, as the Company continues to be exposed to all gains and losses arising from the ownership of these securities and are measured in accordance with the accounting policy for financial instruments.

aa) Interest payable

Interest payable is stated at its accrued value.

2. Material accounting policies (continued)**ab) Securities sold short**

The Company may enter into short sales transactions. A short sale is a transaction in which a Sub-Fund sells securities it may not own in anticipation of a decline in the fair value of the securities. Securities sold in short sale transactions and the interest payable on such securities, if any, is reflected as a liability on the Statement of Financial Position. A Sub-Fund is obligated to deliver securities at the trade price at the time the short position is covered. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested. Cash collateral for borrowed securities is included within due from broker in the Statement of Financial Position.

ac) Money market instruments

Certain Sub-Funds may invest in money market instruments including commercial paper, floating rate notes and freely transferable promissory notes for ancillary liquidity purposes.

Money market instruments are recognised at FVTPL and included in the Statement of Financial Position.

ad) To Be Announced (“TBA”) commitments

The Sub-Funds may enter into TBA purchase commitments, with payment and delivery at a scheduled future date beyond the customary settlement period for that security. With TBA transactions, the particular securities to be delivered are not identified at trade date. The Sub-Funds maintain cash reserves and liquid assets sufficient to settle their TBAs. TBA securities are purchased and sold on a forward commitment basis with an approximate principal amount and maturity date. The actual principal amount and maturity date will be determined upon settlement when the specific mortgage pools are assigned. TBA commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to settlement date.

Unsettled TBA commitments are valued at FVTPL and included in transferable securities in the Statement of Financial Position.

3. Fees and expenses**Management Fee, Maximum Aggregate Fees and Voluntary Cap**

The Manager has appointed MGIE as Investment Manager for the Company. The Investment Manager has responsibility for the on-going monitoring of investments within each of the Sub-Funds of the Company. The Manager is paid a management fee (the “Management Fee”). The Investment Manager’s fee and the Distributor’s fee (including reasonable out of pocket expenses) are paid by the Manager out of the Management Fee. See Note 4 to the financial statements for details of the Management Fee incurred and payable for the financial year ended 30 June 2024 and 30 June 2023.

The Sub-Investment Manager, Administrator and Depositary fees (including reasonable out of pocket expenses) are paid by the Company out of the assets of the relevant Sub-Fund.

The aggregate fees and expenses of the Manager, Investment Manager, Distributor, any Sub-Investment Manager, Administrator and Depositary (“Maximum Aggregate Fee”) will not exceed 3% per annum of the NAV of the relevant Sub-Fund except where indicated below.

Sub-Fund	Maximum Aggregate Fee
Mercer Passive Sustainable Global Equity Feeder Fund	Excluding Sub-Investment Manager fees will not exceed 1.25% per annum of the NAV
MGI Euro Bond Fund	Includes Manager, Depositary, Distributor and Investment Manager Fees capped at 1.25% per annum of the NAV plus Sub-Investment Manager fees capped at 1.25% per annum of the NAV
MGI UK Inflation Linked Bond Fund	
MGI UK Long Gilt Fund	
Mercer Passive Global Equity Fund	
Mercer Passive Euro Over 5 Year Bond UCITS Fund	
Mercer Passive Emerging Markets Equity Fund	
Mercer US Treasury 1-3 Year Bond Fund	
Mercer US Treasury 3-7 Year Bond Fund	
Mercer Short Dated UK Gilt Fund	

3. Fees and expenses (continued)

Management Fee, Maximum Aggregate Fees and Voluntary Cap (continued)

Sub-Fund	Maximum Aggregate Fee
Acadian Sustainable China A Equity	Includes Manager, Administrator and Depositary fees capped at 0.15% plus Sub-Investment Manager fees capped at the individual percentage for the relevant Share Class indicated in the individual Share Class name and the relevant Sub-Fund Supplement
Acadian Sustainable European Equity	
Acadian Sustainable Global Managed Volatility Equity	
Acadian Sustainable Global Managed Volatility Equity II	
Acadian European Small Cap Equity	
Acadian Global High Yield Bond Fund	

Fees incurred by the Company during the financial year are recognised in the Statement of Comprehensive Income.

Investments by Sub-Funds of the Company into share classes of funds also managed by the Manager (Z Share Classes) are not charged a Management Fee at the level of the underlying fund, therefore ensuring there is no double charging of Management Fees by the Manager. However, a hedging fee may be applied where the investment is into a hedged share class (Z Hedged Share Classes).

The following table details the Management Fee per Share Class as a percentage of net assets and the Maximum Aggregate Fee of each Sub-Fund for the financial year ended 30 June 2024 and 30 June 2023.

Sub-Fund	Share Class Description	30 Jun 2024		30 Jun 2023

Sub-Investment Managers' fees

The table below outlines the Sub-Investment Managers' fees incurred by the Company during the financial year ended 30 June 2024 and 30 June 2023 and the amounts payable at the financial year end:

MGI Funds plc	30 Jun 2024 €	30 Jun 2023 €
Sub-Investment Managers' fees	(66,634,140)	(54,388,420)
Sub-Investment Managers' fees payable	(23,195,446)	(21,368,267)

Performance fee**Sub-Investment Manager Performance fee****Acadian Sustainable China A Equity**

The Sub-Investment Manager may be entitled to receive a performance fee (the "Performance Fee") which shall be measured over a 3-year period or based on a rolling 5-year measurement period and accrued daily for each applicable Share Class at each Valuation Point for the period starting at the end of the Initial Offer Period of that Share Class (except with respect to a Share Class that has been seeded pursuant to a merger transaction) and ending on 30 June of the year following a period of at least 12 months from the end of that Initial Offer Period and thereafter on 30 June of each successive year (the "Performance Period") and shall be payable in arrears at the end of each such Performance Period (except in the case of a redemption or transfer of Shares (a "Transfer")). In the case of redemptions or Transfers by Shareholders, the Performance Fee for the relevant Share Class in respect of the current Performance Period for that Share Class will be calculated in respect of the redeemed or transferred Shares and paid as though the date of the redemption or Transfer were the end of a Performance Period for that Share Class.

3. Fees and expenses (continued)

Performance fee (continued)

Sub-Investment Manager Performance fee (continued)

Acadian Sustainable China A Equity (continued)

The first calculation period in such circumstances is the period commencing on the Business Day immediately following the end of the Initial Offer Period and ending on the last Dealing Day in the Performance Period and the initial price of the relevant Share Class will be taken as the starting price of the first such Performance Period.

Where an applicable Share Class of a Sub-Fund is seeded pursuant to a merger transaction (a "Merger") approved by the Central Bank with a fund (a "Merging Fund") with a substantially similar investment policy to that Sub-Fund, any Performance Fee payable by that Merging Fund will continue to be calculated and accrued on a daily basis within the Sub-Fund following the Merger as though the portfolio had always been managed within the Sub-Fund and shall be payable in arrears after the period ending on 30 June of the year following the effective date of the Merger and thereafter on 30 June of each successive year.

Any Performance Fee shall normally be paid within 90 calendar days after the end of the relevant Performance Period.

The Performance Fee is payable to the Sub-Investment Manager only with respect to the outperformance for the relevant Share Class. Outperformance is measured as the performance of the relevant Share Class above the relevant performance index (the "Benchmark") during a Performance Period. The Benchmarks are set out below. A Benchmark must at all times be consistent with the investment policy of the relevant Sub-Fund.

Any negative performance must be clawed back before the Sub-Investment Manager may receive a Performance Fee in subsequent Performance Periods.

In no event will a Performance Fee calculated and accrued in respect of a Share Class exceed 15% of the outperformance when compared to the relevant Benchmark, during a Performance Period for relevant Share Classes of Acadian Sustainable China A Equity.

It is possible that Performance Fees may be payable by the Manager to the Sub-Investment Manager even though the overall NAV of the Sub-Fund, may not have increased, i.e. the Sub-Fund has negative performance. This can happen if the performance of the Performance Benchmark is negative and the Sub-Fund is also in negative performance, but it has outperformed the Performance Benchmark.

Benchmarks

The Benchmark of the Sub-Fund will be the MSCI China A Onshore Index (USD) – Net Returns (the "Index") for performance measurement purposes.

With the exception of any relevant GBP and EUR Share Classes of Acadian Sustainable China A Equity, where the Class Currency of the relevant Share Class differs from the currency of the relevant Benchmark, the performance of the Share Class will be calculated by reference to the equivalent currency version of the Benchmark. In the case of any relevant GBP and EUR Share Classes of Acadian Sustainable China A Equity, the performance of any such Share Class will be calculated in Euro using World Markets/Reuters 4 pm exchange rates. All Benchmarks used for such calculations have been determined by Sub-Investment Manager to be consistent with the Sub-Fund's investment policy.

There were no Performance Fees earned or payable for the financial year ended 30 June 2024 or 30 June 2023.

Administration and Depositary fees

The fees and expenses of the Administrator and the Depositary, (including reasonable out of pocket expenses) shall be paid by the Company out of the assets of the relevant Sub-Fund.

The Sub-Funds are charged Administration fees, which includes fund accounting, Share Class fees, transfer agency, financial and tax reporting fees, at fee rates ranging between 0.36125 basis points ("bps") and 1.5 bps of the NAV based on the daily Assets under Administration ("AUA"). The Sub-Funds are charged Depositary fees, at fee rates ranging between 0.153 bps and 0.625 bps of the NAV based on the daily AUA.

The Company shall also reimburse the Depositary out of the assets of the relevant Sub-Fund for the reasonable fees and customary agents' charges paid by the Depositary to any sub-custodian (which shall be charged at normal commercial rates) together with value added tax ("VAT"), if any, thereon. These fees accrue and are calculated on each dealing date and are payable monthly in arrears.

3. Fees and expenses (continued)

Administration and Depositary fees (continued)

The table below outlines the Administration and Depositary fees incurred during the financial year ended 30 June 2024 and 30 June 2023 and the amounts payable at the financial year end:

MGI Funds plc	30 Jun 2024 €	30 Jun 2023 €
Administration fees	(4,749,101)	(4,648,229)

Voluntary Cap

As detailed in Note 3 to the financial statements, the Manager or Sub-Investment Manager has undertaken to limit the annual expenses for certain classes through the use of a Voluntary Cap. The application of the Voluntary Cap has resulted in a total reimbursement of € 106,732 (30 June 2023: € 61,997) which is detailed in the table below. The Management Fee, which is included within expenses in the Statement of Comprehensive Income, is net of the reimbursement.

Significant Shareholders of the Company

Significant Shareholders in the Company are disclosed in Note 14 to the financial statements.

Class Z Shares

Class Z Shares are offered primarily to clients of the Investment Manager or its affiliates pursuant to an investment management agreement. The Sub-Funds and any other fund for which the Manager or any of its affiliates may serve as manager or investment manager may also invest in Class Z Shares. Those investors in the Z Share Class are charged a 0% Management Fee. The Z Hedged Share Classes may be subject to hedging fees.

5. Cross Investments

For the purposes of producing the combined Company financial statements, investments by Sub-Funds within the Company in the shares of other Sub-Funds within the Company, also known as "Cross Investments" must be eliminated in order to prevent double counting.

5. Cross Investments (continued)

In preparing the combined Company Statement of Financial Position, the value of financial assets at FVTPL of the Company is reduced by the value of all Cross Investments as at 30 June 2024 and 30 June 2023. In preparing the combined Company Statement of Comprehensive Income, the Net gain/(loss) from financial instruments at FVTPL, is reduced by the amount of realised and unrealised gains and losses earned during the financial year on such Cross Investments.

The following table details the Cross Investments within the Sub-Funds of the Company at 30 June 2024 and 30 June 2023:

30 June 2024

6. In-specie transfers

30 June 2024

MGI UK Inflation Linked Bond Fund actioned an in-specie transfer of assets during the financial year ended 30 June 2024 amounting to GBP 201,228,154, which included cash of GBP 919,507.

MGI UK Long Gilt Fund actioned an in-specie transfer of assets during the financial year ended 30 June 2024 amounting to GBP 182,402,893, which included cash of GBP 1,024,838.

Mercer Sustainable Global Equity Fund actioned an in-specie transfer of assets during the financial year ended 30 June 2024 amounting to US\$ 586,832,677, which included cash of US\$ 31,224,366.

Acadian Multi-Asset Absolute Return accepted an in-specie transfer of assets during the financial year ended 30 June 2024 amounting to US\$ 145,808,676, which included cash of US\$ 3,078,816, due from/to broker of US\$ 11,130,498, financial derivative instruments of US\$ (338,361) and other assets of US\$ 108,785.

30 June 2023

MGI Eurozone Equity Fund accepted an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to € 90,516,219, which included cash of € 7,913,556 and actioned an in-specie transfer of assets amounting to € 90,516,219.

Mercer Short Duration Global Bond Fund 2 accepted an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to US\$ 47,685,103, which included cash of US\$ 8,700,000.

Arrowstreet Global Equity Fund actioned an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to US\$ 181,499,898, which included cash of US\$ 21,150,383.

6. In-specie transfers (continued)**30 June 2023 (continued)**

Acadian Sustainable European Equity accepted an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to € 219,939,961, which included cash of € 2,333,862 and other assets of € 1,342,348.

Acadian Sustainable Global Managed Volatility Equity accepted an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to € 1,198,748,271, which included cash of € 6,033,673, FDIs of € (1,355,471) and other assets of € 3,654,530.

Acadian Sustainable Global Managed Volatility Equity II accepted an in-specie transfer of assets during the financial year ended 30 June 2023 amounting to US\$ 41,341,362, which included cash of US\$ 105,984 and other assets of US\$ 99,325.

7. Interests in unconsolidated structured entities

The Company meets the definition of an Investment Entity under IFRS 10 and therefore does not consolidate any investments. IFRS 12 requires disclosures around “Unconsolidated Structured Entities”.

IFRS 12 defines a structured entity as an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual agreements. Disclosures are required where an interest is held in a structured entity and where, for example, the investor has been involved in the setting up of the structured entity and the investor would have exposure to potential losses or costs over and above the amount actually invested.

Where it is within their investment objectives, at 30 June 2024 and 30 June 2023 the Sub-Funds held various investments in ABS, MBS and investment funds. The fair value of the ABS and MBS is recorded in the Transferable securities line and the investment funds are recorded in the Investment funds line in the Statement of Financial Position. All gains and losses are recognised as part of Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. The carrying value of these investments is equivalent to fair value, and the Sub-Fund's maximum exposure to loss from these investments is equal to their total fair value. Once a Sub-Fund has disposed of its holding in any of these investments, the Sub-Fund ceases to be exposed to any risk from that investment.

At 30 June 2024 and 30 June 2023, there were no significant restrictions on the ability of the structured entity to transfer funds to the Company in the form of redemption of the shares held by the Company. The Company has no commitments or intentions to provide financial support or other support to the structured entity.

The Sub-Funds have concluded that ABS, MBS and CIS in which they invest, but that they do not consolidate, meet the definition of structured entities because:

- the voting rights in these entities are not the dominant rights in deciding who controls them, as they relate to administrative tasks only;
- each entity's activities are restricted by its Prospectus; and
- the entities have narrow and well-defined objectives to provide investment opportunities to investors.

The table below describes the type of unconsolidated structured entities, nature, purpose and interest held by the Sub-Funds.

Type of structured entity	Nature and purpose	Interests held by the Sub-Fund
ABS	Allow issuers to generate cash, which can be used for more lending, while giving investors in the ABS the opportunity to participate in a wide variety of income-generating assets.	Investment in ABS
MBS	An investment similar to a bond that is made up of a bundle of home loans bought from the banks that issued them. Investors in MBS receive periodic payments similar to bond coupon payments.	Investment in MBS
CIS	To manage assets on behalf of third party investors. These vehicles are financed through the issue of units to investors.	Investment in units issued by the funds

7. Interests in unconsolidated structured entities (continued)

The table below sets out the interests held by the Sub-Funds in ABS at 30 June 2024:

30 June 2024

8. Taxation

The Company is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption or transfer of shares or the ending period for which the investment was held.

8. Taxation (continued)

Generally, a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event may not arise in respect of:

- (i) a Shareholder who is not an Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company;
- (ii) certain exempted Irish tax resident Investors who have provided the Company with the necessary signed statutory declarations;
- (iii) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another fund;
- (iv) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland;
- (v) certain exchanges of shares between spouses and former spouses on the occasion of judicial separation and/or divorce;
- (vi) an exchange by a Shareholder, effected by way of an arm's length bargain where no payment is made to the Shareholder of Shares in the Company for other Shares in the Company.

There were no chargeable events during the financial year ended 30 June 2024 and 30 June 2023.

Capital gains, dividends and interest (if any) received on investment made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

In the absence of an appropriate declaration, the Company will be liable for Irish tax on the occurrence of a chargeable event, and the Company reserves its right to withhold such taxes from the relevant Shareholders.

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

Withholding tax expense incurred by the Company during the financial year amounted to € 62,861,313 (30 June 2023: € 60,842,716). Capital gains tax incurred by the Company during the financial year amounted to € 29,760,766 (30 June 2023: € 14,616,117). Stamp duty incurred by the Company during the financial year amounted to € 69,393 (30 June 2023: € 97,382).

9. Financial instruments and associated risks**Introduction and overview**

The investments of a Sub-Fund in securities and derivatives is subject to normal market fluctuations and other risks inherent in investing in securities and derivatives. In pursuing its investment objectives, the Company holds a number of investments, including:

- Equities;
- Investment funds;
- Bonds, MBS, ABS and other debt instruments;
- TBAs;
- Loans;
- Cash and liquid resources;
- Swaps, futures, warrants, options, swaptions and forward foreign currency contracts;
- Money market instruments;
- Deposits; and
- Repurchase agreements and reverse repurchase agreements.

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and equity price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance. The Company has maintained its aim of spreading investment risk during the financial year.

The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and relevant Supplement for a more detailed discussion of the risks inherent in investing in the Company.

9. Financial instruments and associated risks (continued)

Introduction and overview (continued)

The Directors review reports received from the relevant Designated Persons of the Manager in relation to the Sub-Funds' performance and risk profile on a quarterly basis or more frequently as required. The Company delegates to the Manager, who in turn delegates to the Investment Manager responsibility for ensuring that the Sub-Funds of the Company are managed in accordance with the terms of each Sub-Fund's investment objective, policy, guidelines and limits as set out in the Prospectus and relevant Supplement, as well as the Investment Manager's own internal investment guidelines and limits.

Risk management framework

The Company's Depositary is responsible for independent day to day monitoring of compliance of each Sub-Fund's investment guidelines and limits, reporting any breaches to the Manager, Investment Manager or Company, as appropriate. These guidelines and limits are set to ensure that the risk borne by each Sub-Fund is appropriate. In addition, the Investment Manager reviews and monitors risk, exposure and performance from internally generated analysis using data fed directly from the Depositary, and this is supplemented with data received directly from the Sub-Investment Managers.

Role of the Investment Manager

The Investment Manager has responsibility for the on-going monitoring of investments within each of the Sub-Funds of the Company. This includes, but is not limited to, reviewing information on stale and static prices, suspended securities and securities in liquidation and securities valued at cost. If the Investment Manager has reasonable belief that the valuation of a particular security may not reflect fair market value, the VC will meet to consider the appropriate valuation of the security in question. The VC meets on a regular basis and formally reviews all new fair value assessments and other pricing issues. Ad-hoc fair value approvals may be received via email to the VC members or by means of extraordinary meetings of the VC should the need arise. This VC may then make recommendations to the Directors, who in turn can then review fair value pricing.

Further to this, the Investment Manager has responsibility for the selection and monitoring of the Sub-Investment Managers. To that end, the Investment Manager follows a well defined and rigorous due diligence review of each Sub-Investment Manager. As part of this process the Investment Manager will review the proposed use of FDIs and the Sub-Investment Managers' risk management processes ("RMP"). Additionally, Sub-Investment Managers will agree with the Investment Manager that their use of FDIs will comply with the provisions of the Sub-Fund's/Company's RMP. Any material deviations to a Sub-Investment Manager's use of FDI and RMP require the prior notification of and approval of the Investment Manager. This is a condition of the investment or currency management agreements with the Sub-Investment Managers. Each Sub-Investment Manager must complete annual compliance questionnaires and are subject to periodic compliance reviews by the Compliance Group of the Investment Manager.

The portfolio managers within the Investment Manager monitor the Sub-Funds on an ongoing basis. Any inappropriate use of FDIs (such as a non-approved FDI) or excessive exposures will typically be picked up as part of their ongoing review. Apart from ongoing review of the portfolios, the Investment Manager will receive a detailed FDI report monthly from each Sub-Investment Manager. The report will list out the FDI positions and give details of the various exposure levels. This is reviewed in detail by the Investment Manager and any issues arising are followed up with the relevant Sub-Investment Manager.

Role of the Administrator

The Administrator provides fund administration services and valuation of all assets and liabilities including FDIs used by the Sub-Funds at each valuation point. Any issues identified by the Administrator are immediately brought to the attention of the Investment Manager for further investigation.

Role of the Depositary

The Company's Depositary carries out a separate and independent compliance monitoring role to those carried out by the Investment Manager, the Administrator and other investment service providers. As part of its fiduciary role to a regulated fund, the Depositary reviews all of the investment objectives and limits (including FDI limits) on an ongoing basis. While not appointed by the Investment Manager (the Depositary is appointed by the Company), any breaches identified by the Depositary are immediately brought to the attention of the Investment Manager for investigation and resolution.

Role of Sub-Investment Managers

As mentioned above, discretionary investment management has been outsourced to the Sub-Investment Managers. In addition to the oversight and independent monitoring being carried out by the Investment Manager, Administrator and

9. Financial instruments and associated risks (continued)**Role of Sub-Investment Managers (continued)**

Depository, each Sub-Investment Manager must have adequate controls and procedures in place to manage their respective portfolios within the limits prescribed under the UCITS Regulations and the Central Bank guidance in respect of FDIs.

Each Sub-Investment Manager must have a robust RMP in place which is UCITS V compliant. As outlined in the various Sub-Investment Managers' RMP documents, each Sub-Investment Manager must manage its portfolio in accordance with the UCITS Regulations and the Central Bank's guidance on FDIs. Furthermore, the Sub-Investment Managers will only use the FDIs outlined in their respective RMPs. If a Sub-Investment Manager wishes to use a FDI not covered by the existing RMP, this change will necessitate an amendment to their RMP document and, by implication, the Sub-Fund's RMP. This will require the approval of the Central Bank before the FDI can be used.

Permanent Risk Management Function

The Manager has appointed a Head of Risk Management and Designated Persons (the "Designated Persons") for the Managerial Functions* of Operational Risk Management and Fund Risk Management. Together these Designated Persons and Head of Risk constitute the Company's Permanent Risk Management Function ("PRMF") and are responsible for the implementation of their respective obligations under the risk management policy, framework and procedures.

The Investment Manager is responsible for day to day monitoring of compliance with the UCITS risk limits, including statutory limits concerning global exposure and counterparty risk.

The Investment Manager provides the relevant Designated Person(s) with updates and reports such as:

- Relevant information impacting on the risk profile of each managed Sub-Fund;
- Reports on breaches of compliance with UCITS risk limits and investment and borrowing restrictions of each managed Sub-Fund;
- Reports, where applicable, on the adequacy and effectiveness of the risk management process; and
- Relevant information on the arrangements and procedures for the valuation of OTC derivatives.

*Managerial Functions refers to the six mandatory Pre-Approval Controlled Functions ("PCF") set out in the Central Bank's Fund Management Company Guidance (commonly referred to as "CP86").

Market risk*(i) Market price risk*

Market price risk results mainly from the uncertainty about the future prices of financial instruments held. It represents the potential loss a Sub-Fund may suffer through holding market positions in the face of market movements and changes in exchange rates.

All Sub-Funds' investments present a risk of loss of capital. The Investment Manager and Sub-Investment Managers moderate this risk by ensuring careful selection of securities and other financial instruments within the specified limits as detailed in the Prospectus and approved by the Directors.

Market risk is controlled and monitored through the application of pre-agreed portfolio control ranges which cover attributes such as asset allocation, duration, yield curve and liquidity. The Investment Manager uses historic data to measure market risk, which is controlled relative to the benchmark.

The following tables highlight the market price risk associated with the various financial instruments held by the Company. The market price risk of futures, options, TRS & warrants is shown separately. Other FDIs are not exposed to market price risk.

If the price of each of the Sub-Fund's underlying investments to which the relevant Sub-Fund had exposure at 30 June 2024 and at 30 June 2023 had increased by 5%, (1% for cash funds), with all other variables held constant, the impact is as shown in the tables above. Conversely, if the price of each of the Sub-Fund's underlying investments to which the relevant Sub-Fund has exposure had decreased by 5%, (1% for cash funds), this would have an equal but opposite effect on net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund.

(ii) Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency i.e. in a currency other than the functional currency in which they are measured. The value of the Company's investments can be affected by currency translation movements as some of the assets and income may be denominated in currencies other than the base or functional currency of the Company. Shares are issued and redeemed in Australian Dollar, British Pound, Canadian Dollar, Euro, Japanese Yen, Norwegian Krone, Singapore Dollar, Swedish Krona, Swiss Franc and United States Dollar. A portion of the financial assets/net assets of the Sub-Funds are denominated in currencies other than base currency with the effect that the Statement of Financial Position and total returns can be significantly affected by currency movements. The Company is therefore exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates.

The Investment Manager has identified three principal areas where foreign currency risk could impact the Company:

- movements in exchange rates affecting the value of investments;
- movements in exchange rates affecting the income received; and
- movements in exchange rates affecting the holders of redeemable participating shares in currencies other than the operational currency of the relevant Sub-Fund.

Currency exposure is monitored closely and is considered to be part of the overall investment process. Currency forwards may be used to ensure that the currency exposure of a Sub-Fund is in line with its investment objectives. The Sub-Funds may receive income in currencies other than its base currency and the base value can be affected by movements in exchange rates. Sub-Funds with hedged Share Classes may receive subscriptions or pay redemptions in currencies other than its base currency.

The Investment Manager, or a Sub-Investment Manager, may hedge the foreign currency exposure of classes denominated in a currency other than the base currency of a Sub-Fund in order that investors in that class receive a return in the currency of that class substantially in line with the investment objective of the Sub-Fund. As foreign exchange

9. Financial instruments and associated risks (continued)

Market risk (continued)

(ii) Foreign currency risk (continued)

hedging may be utilised for the benefit of a particular class, transactions will be clearly attributable to that class and the cost and related liabilities and/or benefits shall be for the account of that class only. Accordingly, such costs and related liabilities and/or benefits will be reflected in the NAV per share for shares of any such class.

Per IFRS 7, currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. However, it is the Company's policy that foreign exchange risk is monitored and managed by the Sub-Investment Managers for both monetary and non-monetary assets and liabilities and that the overall exposure is reviewed by the Board of Directors.

In line with the Prospectus, in some cases the Company manages the Sub-Funds' exposure to foreign exchange movements by entering into foreign exchange hedging transactions, while in others the Company elects not to hedge the foreign currency risk but take the effect of the exposure.

The table below summarises the foreign currency risk exposure of the Sub-Funds' assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The sensitivity illustrates the impact of a 5% exchange rate increase or decrease between the functional currency and the monetary assets and monetary liabilities denominated in foreign currency relevant to the Sub-Funds. Sensitivity is based on the assumption that all other variables remain constant. The impact on the Sub-Funds is the change in the NAV of the Sub-Funds in terms of the functional currency of the Sub-Funds. The tables show only the Sub-Funds and currencies with a significant foreign currency risk sensitivity greater than +/- 1% of the Sub-Funds' NAV.

Hedge forward foreign currency contracts represent forward foreign currency contracts used to hedge exposure on a Share Class. Non-hedge forward foreign currency contracts are used for investment purposes.

Share Class hedging

In respect of the Share Classes, it is the Sub-Funds' intention, where practicable, to hedge the currency exposure of holders of such classes. The adoption of this strategy may substantially limit holders of these classes from benefiting if the class currencies fall against the base currency of the Sub-Fund and/or against the other currencies in which the assets of the Sub-Funds are denominated. All costs, gains and losses of such hedging transactions will accrue solely to the holders of the hedged Share Classes. The strategy is undertaken and managed on behalf of the Sub-Funds by the Investment Manager/Sub-Investment Managers.

The exchange rate used for the purpose of converting the proceeds of trades in the Australian Dollar hedged classes, Euro hedged classes, British Pound hedged classes, Japanese Yen hedged classes, Norwegian Krone hedged classes, Swedish Krona hedged classes, Singapore Dollar hedged classes and United States Dollar hedged classes to or from the base currency of the Sub-Fund is likely to be the rate prevailing at the time the necessary currency hedging contracts are put in place which means that this exchange rate risk is borne by those transacting investors rather than by the other investor in the Sub-Funds.

(iii) Interest rate risk

Interest rate risk profile and sensitivity analysis

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's interest-bearing financial assets and liabilities expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The Company invests some of its

9. Financial instruments and associated risks (continued)**Market risk (continued)***(iii) Interest rate risk (continued)***Interest rate risk profile and sensitivity analysis (continued)**

assets in equities, investee funds and open forward foreign currency contracts, none of which pay interest. As a result, the Company is subject to limited risk due to fluctuations in the prevailing levels of market interest rates on these investments.

To the extent any of the underlying funds into which the Sub-Funds invest themselves invest in other collective investment schemes, the underlying investment funds may be exposed to interest rate fluctuations arising from portfolios of such collective investment schemes.

The Sub-Funds may invest in inflation-linked bonds. Inflation-linked bonds are fixed income securities whose principal value is adjusted periodically according to the rate of inflation. Index-linked gilts differ from conventional gilts in that both the semi-annual coupon payments and the principal payment are adjusted in line with movements in a specified index. They are designed to cut out the inflation risk of a bond.

The inflation-linked bonds held by the Sub-Funds are linked to movements in the below indices:

Australia Government	Australia Consumer Price Index
Brazil	Extended National Consumer Price Index (IPCA)
Canada	Canada Consumer Price Index
Chile	Chile Consumer Price Index
France	France Consumer Price Index
Germany	Germany Consumer Price Index
Japan Government	Japan Consumer Price Index
Mexico	Mexico Consumer Price Index
New Zealand Government	New Zealand Consumer Price Index
Sweden	Sweden Consumer Price Index
Turkey	Turkey Consumer Price Index
UK Government	General Index of Retail Prices in UK
Ukraine	Ukraine Consumer Price Index
United States of America	United States Consumer Price Index

The Sub-Funds hold interest bearing securities, the majority of which earn a fixed interest rate. The Sub-Funds listed in the table below hold interest bearing securities that earn both fixed and floating interest rates.

*Sub-Fund launched during the financial year ended 30 June 2024 therefore there is no comparative information.

The following tables summarises the interest rate sensitivity of each relevant Sub-Fund's exposure to interest rate risks. It includes each relevant Sub-Fund's assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity dates.

The Sub-Funds not mentioned below are mainly investing in non-interest bearing assets or its investments have a very short time to maturity. As a result, those Sub-Funds are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

The sensitivity analysis reflects how net assets attributable to holders of redeemable participating shares would have been affected by changes in the relevant risk variable that were reasonably possible at the reporting date.

The Company has determined that a fluctuation in yield of 25 bps is reasonably possible, considering the economic environment in which the Sub-Funds operate. The table below sets out the effect on the Sub-Funds' net assets attributable to holders of redeemable participating shares of a reasonably possible reduction of 25 bps in yield at 30 June 2024. An increase in yield of the same amount would have resulted in a roughly equal but opposite effect to the amounts shown. The impact of such an increase or reduction has been estimated by calculating the fair value changes of the fixed-interest debt securities and other fixed-interest bearing assets less liabilities and FDIs. This impact is primarily from the change in the fair value of fixed income securities. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

Liquidity risk

The Company's assets comprise mainly of realisable securities and investments in investment funds. The Company's main liability and exposure is to daily cash redemptions of redeemable shares. Assets from a Sub-Fund may need to be sold if insufficient cash is available to finance such redemptions. It therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of.

The Sub-Funds may, from time to time, invest in derivative contracts traded OTC, which are not traded in an organised market and may be less liquid. As a result, the Sub-Funds may not be able to liquidate these as quickly as its cash investments at an amount which represent their fair value. However, this will be managed as mentioned below and would always be a small proportion of a portfolio.

9. Financial instruments and associated risks (continued)**Liquidity risk (continued)**

The majority of assets held by the Sub-Funds are negotiable securities. The ability to sell on demand ensures that the Investment Manager can efficiently alter the investment strategy as required. The ability to sell also permits the financing of any unexpected withdrawals from a portfolio. It is important that these assets are readily tradeable and the Investment Manager will ensure that assets are only held where an efficient secondary market is operating. From time to time the secondary market in any particular issue or market may become less liquid, so to minimise this risk the Manager will also ensure that a portfolio is well diversified. In some circumstances the markets in which the Sub-Funds trade can be illiquid, thereby making it difficult to acquire or dispose of investments at prices quoted on the relevant exchanges. In addition, suspension by an exchange of trading in a particular security could make it impossible for positions to be realised and thereby expose the Company to losses.

Investors in the Company may redeem daily or weekly in the case of Mercer UCITS Alternatives Strategies. The Company may, if it receives a request for the repurchase of shares in respect of 10% or more of the outstanding shares of any Sub-Fund, elect to restrict the total number of shares repurchased to 10% or more of the outstanding shares, in which case, redemption requests will be scaled down pro rata and the balance of outstanding redemption requests shall be treated as if they were received on each subsequent dealing day until all the shares to which the original request related have been redeemed. Redemption requests can also be met, following approval by the Directors and agreement with the relevant Shareholder, through a transfer of assets of the Sub-Fund in-specie to the relevant Shareholder.

The Investment Manager carries out a liquidity analysis at least on a quarterly basis. Additional analyses are completed as required, particularly during times of market stress. The liquidity analysis is then reviewed by the Investment Risk Management Committee and Fund Risk Committee. This liquidity analysis incorporates specific liability stress scenarios, which assess the ability of the asset liquidity profile to meet stressed investor redemptions, taking investor concentration into consideration. In the event that these stress tests indicate that investors' stressed liquidity requirements may exceed the asset liquidity capacity, this will be escalated and brought to the attention of the Manager and Board of Directors as a Key Risk Indicator, alongside analysis and commentary as well as any remedial action proposed. The liquidity of pooled Sub-Funds has been derived with consideration of redemption notification, dealing and settlement terms, in line with the European Securities and Markets Authority ("ESMA"). For segregated accounts, a liquidity scoring methodology is used based on trading volume data. The Manager and Board of Directors has also approved a procedure document with respect to the application of Liquidity Management Procedures in exceptional circumstances. The procedure document sets out the Liquidity Management Tools ("LMTs") used both in the ordinary course of business and exceptional circumstances. The procedure document also outlines the course of action the Manager and Board of Directors will take in the instance of an exceptional liquidity event. The Manager and Board of Directors have also approved a Liquidity Stress Testing Policy. This procedure document outlines the mechanisms by which Fund Liquidity Stress Testing is undertaken, in compliance with the ESMA Guidelines on Liquidity Stress Testing in UCITS and AIFs (the "Liquidity Guidelines").

All liabilities of the Sub-Funds at 30 June 2024 and 30 June 2023 including the net assets attributable to redeemable participating Shareholders are due within one month with the exception of the following:

The liquidity buckets shown are in line with the dealing cycles of the Sub-Funds. As all Sub-Funds are daily traded, the buckets are grouped to show the liquidity profile of each Sub-Fund from 1 day onwards. There is no guarantee that this level of liquidity will be maintained.

The liquidity profile has been calculated on a maximum liquidity basis. Maximum liquidity is an approach to liquidity where securities are sold based on maximum available amount of assets that can be sold on each business day by Sub-Fund.

Credit risk

The Company takes on exposure to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Company has counterparty risk in relation to transactions it enters into with brokers, banks and other third parties if the counterparty was to fail to complete any transaction to which the Company is a party.

The Company delegates counterparty selection and management to the Sub-Investment Managers. The Company delegates all derivative trading to the Sub-Investment Managers, who are responsible for trading within agreed investment guidelines and ensuring pre-trade compliance with applicable regulations. During the negotiation of these investment guidelines, the use of derivatives will be discussed, and if deemed appropriate, then the exact derivatives to be permitted in the Sub-Funds will be outlined. Derivative use outside of these limits is not permitted, which is monitored by daily compliance reports reviewed by the Company.

As part of the operational risk assessment (“ORA”), a due diligence is performed on each Sub-Investment Manager prior to their appointment. Counterparty controls are reviewed as part of this ORA. Each Sub-Investment Manager must achieve an acceptable ORA rating before being appointed.

(i) Credit quality analysis

The Company has a credit risk exposure to the Depositary and sub-custodian in relation to cash.

9. Financial instruments and associated risks (continued)**Credit risk (continued)***(i) Credit quality analysis (continued)*

Cash balances and bank overdrafts are held by State Street Bank, London which had a credit rating of AA- at the financial year ended 30 June 2024 (30 June 2023: AA-).

Cash balances held in US Dollar bank accounts with State Street Bank, London automatically transfer into overnight deposit accounts held by State Street Cayman Trust Company Ltd., Cayman Islands, which had a credit rating of A- at the financial year ended 30 June 2024 (30 June 2023: A-).

State Street Bank International GmbH, the Collateral Manager/Secured Party, had a credit rating of AA- at the financial year ended 30 June 2024 (30 June 2023: AA-).

Due from broker/Due to broker represents margin accounts balances held by the Sub-Funds at the financial year end.

Margin cash

Margin cash balances at 30 June 2024 and 30 June 2023 were as follows:

Credit rating	30 Jun 2024 €	30 Jun 2023 €
AA-	1,028,296	328,302

A-	(7,064,574)	(15,029,742)
	<hr/>	<hr/>
	7,321,674	73,461,828

Repurchase and reverse repurchase agreements

The Company held repurchase agreements at the financial year end 30 June 2024. For repurchase agreements, the Sub-Fund can use the cash proceeds received to make additional investments, which can cause the Sub-Fund's portfolio to behave as if it was leveraged. If the buyer in a repurchase agreement files for bankruptcy or becomes insolvent, the Sub-Fund may be unable to recover the securities it sold or pledged as collateral and as a result would realise a loss equal to the difference between the value of those securities and the cost. In the event of a buyer's bankruptcy or insolvency, the Sub-Fund's use of proceeds from the sale of its securities may be restricted while the other party or its trustee or receiver determines whether to honour the Sub-Fund's right to repurchase the securities.

The Company is exposed to credit risk on reverse repurchase agreements. Reverse repurchase agreements are collateralised by an individual security. Securities purchased under agreements to resell are valued at fair value and adjusted for any movements in foreign exchange rates. Interest rates vary for each reverse repurchase agreement and are set at the initiation of the agreement. The Company will generally obtain additional collateral if the market value of the underlying securities is less than the face value of the reverse repurchase agreements plus any accrued interest. In the event of default on the obligation to repurchase, the Company has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event of default or bankruptcy by the counterparty to the agreement, realisation and/or retention of the collateral or proceeds may be subject to legal proceedings. Collateral received in respect of reverse repurchase agreements is comprised of government issued fixed income securities.

9. Financial instruments and associated risks (continued)**Credit risk (continued)**(i) *Credit quality analysis (continued)***Repurchase and reverse repurchase agreements (continued)**

The amounts payable under the repurchase agreements and receivable under reverse repurchase agreements and the market value of net collateral in respect of these agreements held at the financial year ended 30 June 2024 and 30 June 2023 are as follows:

	30 Jun 2024	30 Jun 2023
	€	€
Receivable from reverse repurchase agreements	92,744,187	124,799,102
Payable for repurchase agreements	(106,988,330)	(136,617,825)
Fair value of net collateral in respect of repurchase and reverse repurchase agreements*	12,748,303	3,391,334

*Further information on repurchase and reverse repurchase agreements can be found in the Unaudited Supplemental Information section of the financial statements and for each Sub-Fund in the relevant Portfolio Statement.

Loans

The Company may invest in investments such as loans or participations which typically would result in the Sub-Fund having a contractual relationship only with the lender, not with the borrower. In purchasing participations, the Sub-Fund generally will not have the right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and a Sub-Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, a Sub-Fund would assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Sub-Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. There were no participations held by the Sub-Funds as at 30 June 2024 and 30 June 2023.

At 30 June 2024, the Company held investments in loans with a fair value € 16,931,999 (30 June 2023: € 15,178,800). The following table details the credit ratings attaching to the loans held at 30 June 2024 and 30 June 2023:

	30 Jun 2024	30 Jun 2023
	€	€
Credit rating		
AA-	2,722,471	179,754
A+	7,665,266	8,965,260
A	1,447,804	-
A-	2,036,318	3,341,080
BBB+	1,635,513	-
Not rated	1,424,627	2,692,706
	<u>16,931,999</u>	<u>15,178,800</u>

FDIs

The Company is exposed to counterparty risk on its derivative positions, being the risk that a counterparty will default or be unable to pay in full its financial obligations. Controlling credit risk is paramount in the Sub-Investment Manager's choice of counterparties. Credit risk arises from receivables from investee funds relating to redemptions or transactions awaiting settlement. Risk relating to unsettled receivables is considered small due to short settlement period involved and the due diligence permitted on the investee funds. The maximum exposure related to unsettled trades equals the amount shown in the Statement of Financial Position. There are no past due or impaired assets as at 30 June 2024 or at 30 June 2023.

Swaps are subject to the counterparty's credit risk: the chance that the other party in the contract will default on its responsibility. Derivative transactions are transacted on exchanges, with central clearing counterparties ("CCPs") or entered into under International Swaps and Derivatives Association ("ISDA") master agreements. In general, under these agreements, in certain circumstances e.g. when a credit event such as a default occurs, all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty. Further analysis of the Sub-Funds' master netting arrangements is disclosed under "Offsetting financial assets and financial liabilities" section of this note. The Company also mitigates the credit risk of FDIs by holding collateral in the form of cash and marketable securities.

State Street Bank and Trust Company, London Branch, the Securities Lending Agent, had a credit rating of AA- as at 30 June 2024 (30 June 2023: AA-).

Debt securities

The Company invests in debt securities such as ABS, convertible securities, corporate bonds, government bonds, MBS, municipal bonds and TBA. A Sub-Fund will have a credit risk on the issuer of debt securities in which it invests which will vary depending on the issuer's ability to make principal and interest payments on the obligation. Not all of the securities in which a Sub-Fund may invest that are issued by sovereign governments or political subdivisions, agencies or instrumentalities thereof, will have the explicit full faith and credit support of the relevant government. Any failure by any such government to meet the obligations of any such political subdivisions, agencies or instrumentalities will have adverse consequences for a Sub-Fund and will adversely affect the NAV per share in a Sub-Fund.

9. Financial instruments and associated risks (continued)**Credit risk (continued)***(ii) Concentration of credit risk*

The following table outlines the fair value credit exposures of the Company in debt securities based on Standard and Poor's ratings as at 30 June 2024 and 30 June 2023:

(iii) Amounts arising from ECL

Impairment on cash and cash equivalents, balances due from brokers and receivables from reverse sale and repurchase agreements has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that these exposures have low credit risk based on the external credit ratings of the counterparties.

The Investment Manager monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published ratings, the Company supplements this by reviewing changes in bond yields, where available, CDS prices together with available press and regulatory information about counterparties.

Loss given default parameters generally reflect an assumed recovery rate of 40%. However, if the asset were credit impaired, then the estimate of loss would be based on a specific assessment of expected cash shortfalls and on the original effective interest rate.

No amounts have been recognised in terms of ECL for the financial year ended 30 June 2024 and 30 June 2023.

Offsetting financial assets and financial liabilities**Offsetting and amounts subject to master netting arrangement and similar agreements**

Each Sub-Fund is a party to various master netting agreements. While the terms and conditions of these agreements may vary, all transactions under any such agreement constitute a single contractual relationship. Each party's obligation to make any payments, deliveries or other transfers in respect of any transaction under such an agreement may be netted against the other party's obligations under such agreement. A default by a party in performance with respect to one transaction under such an agreement would give the other party the right to terminate all transactions under such agreement and calculate one net amount owed from one party to the other.

9. Financial instruments and associated risks (continued)

Offsetting financial assets and financial liabilities (continued)

Offsetting and amounts subject to master netting arrangement and similar agreements (continued)

At 30 June 2024 the amount that is due to be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a due from broker or due to broker, as applicable, in the Statement of Financial Position. The movement of variation margin between the Sub-Funds and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account may be greater or less than the initial margin requirement by an amount equal to the current day's net change in unrealised gain or loss of the FDIs respective trading account to move either above or below the initial margin requirement. On a daily basis the Sub-Funds will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments of cash are known as variation margin.

Upon entering into a centrally cleared derivative contract the Sub-Fund may pledge cash and/or securities to a trading account as collateral to a central clearing house, through a broker, in accordance with the initial margin requirements of the central clearing house. Exchange-traded and centrally cleared derivatives contracts are valued at least daily, and as such, the net appreciation or depreciation of the derivative contracts causes the value of the respective trading account to move either above or below the initial margin requirement. On a daily basis the Sub-Funds will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments of cash are known as variation margin. The movement of variation margin between the Sub-Funds and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account may be greater or less than the initial margin requirement by an amount equal to the current day's net change in unrealised appreciation or depreciation of the derivative contracts. At reporting year end, the amount that is due to be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a variation margin receivable or variation margin payable, as applicable, in the Statement of Financial Position.

IRS and CDS settle on a net basis and the net inflows/(outflows) are represented by the unrealised gain/(loss).

For certain Sub-Funds the legal right to offset may be at the Sub-Fund level as opposed to the Sub-Investment Manager level. The tables are prepared on a Sub-Investment Manager level to be prudent for financial reporting purposes. The Sub-Fund level in the tables represents offsetting in relation to forward foreign currency contracts with the counterparty of State Street Bank and Trust.

The following tables present the Sub-Funds' derivatives, repurchase agreements and reverse repurchase agreements by net exposure to each counterparty at Sub-Investment Manager level and any related collateral pledged/received and margin cash as at 30 June 2024:

Concentration risk

The Investment Manager reviews the concentration of securities held based on industries and geographical location.

The Company's exposure to industries above 5% of the NAV at 30 June 2024 and 30 June 2023 is set out in the table below:

	30 Jun 2024 % of NAV	30 Jun 2023 % of NAV
Communications	5.92	5.74
Cyclical Services	5.28	5.66
Financials	11.07	10.51
Non-Cyclical Services	8.63	8.75
Sovereign Debt	14.39	16.27
Technology	8.16	6.10

Emerging markets risk

The Company invests in equities and bonds in emerging markets* and also in investment funds investing in emerging markets. It should be appreciated that liquidity and settlement risks may not provide the same degree of Shareholder protection or information to investors as would generally apply internationally.

*those countries set out in the Morgan Stanley Capital International or other reputable global index provider, Emerging Markets indices and/or such other markets as the Directors may from time to time determine.

Leverage risk

Any leverage resulting from the use of FDIs and EPM techniques are in accordance with the requirements of the Central Bank and will not exceed 100% of the NAV of the Sub-Fund, with the exception of those Sub-Funds detailed on pages 251- 253.

The Investment Manager monitors the assets of each Sub-Fund to ensure that global exposure and leverage, at all times, remains within the limits set by the Central Bank. The commitment approach is used to calculate global exposure on all Sub-Funds which use derivatives, with the exception of Mercer Short Duration Global Bond Fund 1, Mercer Short Duration Global Bond Fund 2, Mercer Global Credit Fund, Mercer Absolute Return Fixed Income Fund, Mercer Investment Fund 6,

9. Financial instruments and associated risks (continued)**Leverage risk (continued)**

Mercer Short Duration Bond Fund 3, PIMCO Global Aggregate Bond Fund, Acadian Systematic Macro, Acadian Global High Yield Bond Fund and Acadian Multi-Asset Absolute Return which use the Value at Risk ("VaR") method.

In accordance with the Commitment Approach, global exposure is broadly defined as the total market value of the equivalent underlying to all of the FDIs entered into by a Sub-Fund. VaR represents an estimate of the potential loss which might arise from unfavourable market movements if the current positions were to be held unchanged for 1 month, measured at a confidence level of 99%. VaR is a representation of the minimum expected loss, under normal market conditions at a given confidence level (99% in this case).

A VaR model has certain inherent limitations and it cannot be relied upon to predict or guarantee that the size or frequency of losses incurred by a Sub-Fund will be limited to any extent. As the VaR model relies on historical market data as one of its key inputs, if current market conditions differ from those during the historical observation period, the effectiveness of the VaR model in predicting the VaR of a Sub-Fund may be materially impaired.

The Company has employed a historical VaR. The methodology is based on full re-valuation across all asset classes. VaR is calculated in accordance with UCITS requirements, with the following parameters:

- (i) one-tailed confidence interval of 99%;
- (ii) holding period equivalent to 1 month (20 business days);
- (iii) effective observation period (history) of risk factors of at least 1 year (250 business days). This is a rolling one year window looking back from the VaR calculation date such that the relevant historical data set is updated daily;
- (iv) calculated daily and monitored daily versus VaR limit.

VaR utilisation measures the Sub-Funds' VaR relative to the Sub-Funds' VaR limit. The below table details the approach for each Sub-Fund, the minimum, maximum and median daily VaR utilisation that occurred during one year period ending 30 June 2024 and 30 June 2023 expressed as a percentage of the VaR limit.

Mercer Short Duration Global Bond Fund 1

**Sub-Fund launched and terminated during the financial year ended 30 June 2024.

***Sub-Fund launched during the financial year ended 30 June 2024.

In accordance with the UCITS regulations, a Sub-Fund using VaR must disclose the level of leverage employed by the Sub-Fund during the financial year under review, calculated as the sum of the absolute value of notionals of the derivatives used. The leverage is calculated on a gross basis and does not take into account any netting and hedging arrangements that the Sub-Funds may have in place at any time, even though these arrangements may be used for risk reduction purposes. Therefore this calculation may not provide an accurate measure of the Sub-Funds' actual investment exposures. Below is the median daily level of leverage for each of the above Sub-Funds during the financial year ending 30 June 2024 and 30 June 2023.

Median leverage employed during the financial year as % of NAV

	30 June 2024	30 June 2023
Mercer Short Duration Global Bond Fund 1	109.07%	113.26%
Mercer Short Duration Global Bond Fund 2	241.29%*	196.70%*

Legal, tax and regulatory risk

Legal, tax and regulatory changes could occur at any time, during the existence of the Company which may adversely affect the Company. See Note 8 to the financial statements for details of taxation.

Taxation in the People's Republic of China ("PRC")*

The Company and the Investment Manager may be subject to PRC tax, directly or indirectly, in respect of the assets held through Stock Connect, Bond Connect and/or QFIs. The tax law and regulations of the PRC are constantly changing, and they may be changed with retrospective effect. Given the uncertainty surrounding the Company's potential PRC tax liabilities or reimbursement obligations, the NAV of a Sub-Fund on any Dealing Day may not accurately reflect such liabilities. However as at 30 June 2024 the risk of any changes to the current status in PRC is low.

*Tax Risk Disclaimer for MGI Funds plc on MGI Emerging Markets Equity Fund, MGI Euro Bond Fund, MGI Global Bond Fund, MGI Global Equity Fund, MGI Emerging Markets Debt Fund, Mercer Global Small Cap Equity Fund, Mercer Low Volatility Equity Fund, Mercer Short Duration Global Bond Fund 2, Mercer Passive Global Equity Fund, Mercer Passive Emerging Markets Equity Fund, Mercer Investment Fund 6, Mercer Sustainable Global Equity Fund, Mercer USD Cash Fund, Mercer Global Listed Infrastructure Fund, Arrowstreet Global Equity Fund, Mercer Emerging Market Debt – Hard Currency Fund, Mercer Passive Euro Corporate Bond Fund, Acadian Sustainable China A Equity, Acadian Sustainable Global Managed Volatility Equity, Acadian Sustainable Global Managed Volatility Equity II.

10. Fair values of financial instruments

Securities, CIS and FDIs are held at FVTPL. All other assets and financial liabilities are stated at amortised cost, which approximates fair value with the exception of redeemable participating shares which are stated at their redemption amount.

The fair value of the instruments that are not traded in an active market (for example, OTC derivatives) are estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value or another investment that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provide a reliable estimate.

Where the discounted cash flow techniques are used, estimated future cash flows are based on management's best estimate and the discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the reporting date. Fair values for unquoted equity instruments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange traded are estimated at the amount that the Company would receive or pay to terminate the contract at the reporting date taking into account current market conditions and the creditworthiness of the counterparties.

Financial assets include investments in CIS. The fair value of such assets is based on the underlying fund administrator's calculation of the NAV per share (market value of the fund's assets less liabilities divided by the number of shares) which will be the latest bid price published by the CIS, taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value. The fair value of any investments in closed-ended investment funds is based on the bid prices available on the principal market for such security at the valuation date taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value. There were no adjustments or discounts applied in the valuation of any of the underlying investments in such CIS.

Under IFRS 13, the Company are required to classify assets and liabilities based on the fair value hierarchy, which reflects the significance of the inputs used in measuring their values. IFRS 13 establishes a fair value hierarchy that prioritises the inputs used in valuation techniques for measuring fair value. This hierarchy assigns the highest priority to unadjusted

10. Fair values of financial instruments (continued)

quoted prices in active markets for identical assets or liabilities (Level 1 measurements), and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy under IFRS 13 consists of three levels:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (that is, as prices) or indirectly (that is, derived from prices);

Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level within the fair value hierarchy in which the fair value measurement is categorised is determined based on the lowest level input that is significant to the measurement as a whole. In assessing the significance of an input, judgement is applied considering factors specific to the asset or liability. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, it is classified as a Level 3 measurement.

The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

For each class of assets and liabilities not measured at FVTPL in the Statement of Financial Position, but for which fair value is disclosed, IFRS 13 requires the Company to disclose the level within the fair value hierarchy to which the fair value measurement would be categorised along with a description of the valuation technique and inputs used in the technique. These financial instruments typically include short-term financial assets and financial liabilities, whose carrying amounts approximate fair value due to their short-term nature and the high credit quality of counterparties.

Cash and cash equivalents include deposits held with banks, cash due from broker, bank overdraft and other short-term investments in an active market and they are categorised as Level 1.

Reverse repurchase agreements and repurchase agreements are categorised as Level 2.

Receivables for investments sold, subscriptions receivable and other assets include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for investments sold, redemptions payable and other expenses payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

The puttable value of redeemable shares is calculated based on the net difference between total assets and all other liabilities of each Sub-Fund within the Company in accordance with the Sub-Funds' offering memorandum. A demand feature is attached to these shares, as they are redeemable at the holders' option and can be put back to the Sub-Funds at any dealing date for cash equal to a proportionate share of the Sub-Fund's NAV attributable to the Share Class. The fair value is based on the amount payable on demand. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

Fair value hierarchy

The financial instruments at 30 June 2024 and 30 June 2023 are classified as follows:

	Level
ABS	2
Convertible securities	2
Corporate bonds	2
Government bonds*	1
MBS	2
Municipal bonds	2
Money market instruments	2
TBA	2
Rights	2
Equities	1
Loans	2
Investment funds (NAV priced)	2
Investment funds (Exchange Traded Funds "ETFs")	1
Warrants	2
Forward foreign currency contracts	2
CDS	2

Acadian Sustainable Global Managed Volatility Equity II	Equity	2	US\$ 11,510

Transfers between levels of the fair value hierarchy occur when the pricing source or methodology used to price an investment changes which triggers a change in level as defined under IFRS 13. For the financial reporting purposes transfers are deemed to have occurred at the end of the financial year.

Transfers occurred from Level 1 to Level 2 during the financial year ended 30 June 2024. This change was due to using the last traded price in a market that has been inactive for a significant period of time.

Transfers occurred from Level 2 to Level 1 during the financial year ended 30 June 2024. Government bonds were transferred from Level 2 to Level 1 following a review by Management.

Transfers occurred from Level 1 to Level 2 during the financial year ended 30 June 2023. This change was due to using the last traded price in a market that has been inactive for a significant period of time.

Transfers occurred from Level 2 and Level 1 during the financial year ended 30 June 2023. This change was due to using quoted prices in active markets for securities previously classified as Level 2 (due to suspension from trading).

In the prior year as per the accounting policy, where the cumulative Level 3 investments on a Sub-Fund level were immaterial, these securities were classified as Level 2. During the current year as per the changes in the accounting policy, for the year ended 30 June 2024, securities which are level 3 held as at year end are classified as Level 3 investments in the financial statements. Transfers in and out of Level 3 are discussed after the Level 3 reconciliation tables below, where relevant.

Sub-Fund	Transfer	30 Jun 2024 Fair value	30 Jun 2023 Fair value

Investments in Equities classified as Level 3

Financial assets include investments in equities.

Certain equities held by MGI Emerging Markets Equity Fund, MGI Eurozone Equity Fund, MGI Global Equity Fund, Mercer Global Small Cap Equity Fund, Mercer Global High Yield Bond Fund, Mercer Passive Global Equity Fund, Mercer Passive Emerging Markets Equity Fund, Arrowstreet Global Equity Fund, Mercer Investment Fund 21 - Global High Yield Bond,

10. Fair values of financial instruments (continued)**Fair value hierarchy (continued)****Investments in Equities classified as Level 3 (continued)**

Acadian Sustainable Global Managed Volatility Equity and Acadian Sustainable Global Managed Volatility Equity II as at 30 June 2024 were classified as Level 3 due to the inherent nature of these investments (i.e. private equity investments which are valued based on a number of valuation techniques). Furthermore, there are equities classified as Level 3 due to significant unobservable inputs, which is a result of being suspended or unlisted.

As observable prices were not available for these securities, valuation techniques have been used to derive the fair value and is reviewed by the Investment Manager.

Fixed income securities classified as Level 3

Financial assets include investments in fixed income securities: corporate bonds, MBS and loans.

Corporate bonds and loans have been categorised as Level 2. The fair values of such securities classified under Level 2 are determined by quoted prices and latest prices executed for a similar asset. If the number of broker quotes is two or less, the Company deems the assets to be Level 3 due to less liquidity in the market.

Certain fixed income securities held by MGI Global Bond Fund, MGI Emerging Markets Debt Fund, Mercer Diversified Growth Fund, Mercer Global High Yield Bond Fund, Mercer Short Duration Global Bond Fund 2, Mercer Multi Asset Growth Fund, PIMCO Global Aggregate Bond Fund and Mercer Emerging Market Debt – Hard Currency Fund are classified as Level 3 as at 30 June 2024. The Level 3 classification was given to these fixed income securities as a result of decreased liquidity in the market and wider spreads that are consequently reflected in a broader spectrum of indicative broker quotes, which are factors that indicate that the broker quotes are not based on observable prices.

The fair value of such assets were based on the prices provided by third party vendors. There were no adjustments or discounts applied in the valuation of any of the investments in fixed income securities.

Investments in Warrants classified as Level 3

As at 30 June 2024 a warrants held by MGI Global Equity Fund, Mercer Passive Global Equity Fund and Arrowstreet Global Equity Fund are classified as Level 3 due to significant unobservable inputs, as a result of being delisted.

As observable prices were not available for this security, valuation techniques have been used to derive the fair value and is reviewed by the Investment Manager.

Significant unobservable inputs used in measuring fair value

The determination of what constitutes “observable” requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. Securities that have been classified as Level 3 have been valued using either the last traded price in a market that has been inactive for a significant period of time or fair valued in accordance with the fair value policy.

Effect of change in significant assumptions of Level 3 financial instruments

The results of using reasonably possible alternative assumptions for valuing the Level 3 assets may result in the fair value estimate and recoverability of the assets being subject to uncertainty and a range of possible outcomes are likely. Such differences, if any, may have a material effect on the overall portfolio as at 30 June 2024 or as at 30 June 2023. If the value of Level 3 investments held by the Sub-Funds' increased/(decreased) by 3%, assuming everything remained equal, the effect on the NAV would be:

	Price Change	30 Jun 2024	30 Jun 2023
MGI Emerging Markets Equity Fund	3.00%	US\$ Nil	-
MGI Eurozone Equity Fund	3.00%	€ Nil	-
MGI Global Bond Fund	3.00%	US\$ 10,388	-
MGI Emerging Markets Debt Fund	3.00%	US\$ 13,912	-
Mercer Diversified Growth Fund	3.00%	US\$ 6	-
Mercer Global High Yield Bond Fund	3.00%	US\$ 226,957	US\$ 283,190
Mercer Short Duration Global Bond Fund 2	3.00%	US\$ 20,848	-
Mercer Passive Emerging Markets Equity Fund	3.00%	US\$ 15,628	-
Mercer Multi Asset Growth Fund	3.00%	GB£ 7	-

10. Fair values of financial instruments (continued)**Fair value hierarchy (continued)****Effect of change in significant assumptions of Level 3 financial instruments (continued)**

	Price Change	30 Jun 2024	30 Jun 2023
PIMCO Global Aggregate Bond Fund	3.00%	€ 840	-
Arrowstreet Global Equity Fund	3.00%	US\$ Nil	-
Mercer Emerging Market Debt – Hard Currency Fund	3.00%	US\$ Nil	-
Mercer Investment Fund 21 - Global High Yield Bond	3.00%	GB£ 32,221	-
Acadian Sustainable Global Managed Volatility Equity	3.00%	€ 422	-
Acadian Sustainable Global Managed Volatility Equity II	3.00%	US\$ 389	-

If the fair value of the Sub-Funds Level 3 investments was discounted by 10% at 30 June 2024 and 30 June 2023 this would have resulted in a decrease in the net assets attributable to holders of redeemable participating shares by:

	Price Change	30 Jun 2024	30 Jun 2023
MGI Emerging Markets Equity Fund	10.00%	US\$ Nil	-
MGI Eurozone Equity Fund	10.00%	€ Nil	-

13. Debtors and creditors

All debtors and creditors amounts fall due within one financial year.

14. Share capital**Authorised share capital**

The authorised share capital of the Company is 500,000,000,002 shares of no par value divided into 2 subscriber shares of no par value and 500,000,000,000 unclassified shares of no par value.

Subscriber share capital

The subscriber share capital does not form part of Shareholders' funds, and is disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund. Subscriber shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on winding up. Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of the Company on the terms and conditions set out in the relevant Supplement. Matsack Trust Limited and Matsack Nominees Limited hold the 2 subscriber shares at 30 June 2024 and 30 June 2023.

Redeemable share capital

The redeemable shares issued by the Sub-Fund provide an investor with the right to require redemption for cash at a value proportionate to the investor's share in the Sub-Fund's net assets at each redemption date and are classified as liabilities. The amounts relating to proceeds from redeemable participating shares issued and payment for redeemable participating shares redeemed are reflected in the functional currency of the Sub-Fund and are inclusive of the anti-dilution charges.

The rights attaching to the redeemable shares are as follows:

- Investors in the Company may redeem daily or weekly in the case of Mercer UCITS Alternatives Strategies.
- All shares carry a right to receive notice of, attend and vote at general meetings.

Note 3 to the financial statements details the different expenses and fee rates charged to each Share Class. In the instance where a suitable Management Fee for a given investor is not available from the Share Classes listed below, a new Share Class may be created in the Sub-Fund in accordance with the requirements of the Central Bank and using the following Share Class naming convention for Acadian Sustainable China A Equity, Acadian Sustainable European Equity, Acadian Sustainable Global Managed Volatility Equity, Acadian Sustainable Global Managed Volatility Equity II and Acadian European Small Cap Equity:

Share Class type - sub-designation - hedged/unhedged - Sub-Investment Management Fee - accumulating/distributing - currency - performance fee (if applicable).

The following details the Share Class naming convention for all other Sub-Funds:

Share Class type – hedged/unhedged - Management Fee – accumulating/distributing – currency.

Any such new Share Class will be added to the Supplement in accordance with the requirements of the Central Bank.

The rights attached to each series or class of share may, whether or not the Company is being wound up, be varied with the consent in writing of the holders of three-fourths of the issued shares of that series or class or with the sanction of a

14. Share capital (continued)**Redeemable share capital (continued)**

special resolution passed at a separate general meeting of the holders of shares of that series or class. The rights attaching to any series or class of shares shall not be deemed to be varied by the creation or issue of further shares ranking pari passu with shares already in issue, unless otherwise expressly provided by the terms of issue of those shares.

Capital Management

The Company's capital includes issued ordinary shares. The capital of the Company is managed in accordance with the Company's investment objectives, policies and restrictions as outlined in the Company's Prospectus, while maintaining sufficient liquidity to meet Shareholder redemptions.

The Company does not have any externally imposed capital requirements.

Swing pricing and anti-dilution levy

To enable a Sub-Fund to recover the cost of investing Sub-Fund assets upon an investor's subscription for shares and the cost of liquidating Sub-Fund assets upon a Shareholder's redemption of shares and to preserve the value of the assets of the relevant Sub-Fund, each Shareholder may be subject to swing pricing or an anti-dilution levy of up to 3% of the subscription proceeds or redemption proceeds. In calculating the swing pricing, the NAV of a Sub-Fund is swung by a "swing factor", the Directors may, in respect of net redemptions, adjust downward the NAV per share and may also, in respect of net subscriptions, adjust upward the NAV per share. The Administrator will calculate the NAV for the relevant Sub-Fund and then adjust ("swing") the NAV by a pre-determined amount. The direction of the swing will depend on whether there are net subscriptions or redemptions in the relevant Sub-Fund on the relevant Dealing Day, while the magnitude of the swing will be based on pre-determined estimates of the average trading costs in the relevant asset class(es) in which the Sub-Fund is invested. The Net assets attributable to holders of redeemable participating shares in the Statement of Financial Position is inclusive of any swing adjustments applied to the Sub-Funds.

The following table details the Sub-Funds that applied swing pricing as at the financial year ended 30 June 2024:

Sub-Funds

Mercer Diversified Growth Fund
Mercer Global High Yield Bond Fund
Mercer Diversified Retirement Fund

The following table details the Sub-Funds that applied swing pricing as at the financial year ended 30 June 2023:

Sub-Funds

Mercer Low Volatility Equity Fund
Mercer Diversified Growth Fund
Mercer Euro Nominal Bond Long Duration Fund
Mercer Diversified Retirement Fund
Mercer Global Listed Infrastructure Fund
Mercer Short Dated UK Gilt Fund

An anti-dilution levy, if applicable, is paid to the Sub-Fund for the benefit of all Shareholders and is not to be paid to the Manager or the Investment Manager. The anti-dilution levy is deducted from subscription proceeds and will correspondingly reduce the number of shares purchased by the investor or will be deducted from redemption proceeds and will correspondingly reduce the amounts received by a Shareholder upon redeeming its shares from the Sub-Fund. Proceeds from redeemable participating shares are inclusive of anti-dilution charges.

During the financial year ended 30 June 2024 none of the Sub-Funds received an anti-dilution levy. During the financial year ended 30 June 2023 Arrowstreet Global Equity Fund received an anti-dilution levy.

Share movement

All proceeds from redeemable participating shares issued and payments for redeemable participating shares redeemed are shown in the base currency of the Sub-Fund.

Changes in composition of the Board of Directors

Susan Dargan was appointed as an Independent Non-executive Director of the Company on 1 November 2023.

Tom Finlay resigned as an Independent Non-executive Director of the Company on 31 December 2023.

Jimmy Furlong was appointed as a Non-executive Director of the Company and Hooman Kaveh resigned as a Non-executive Director of the Company on 15 May 2024.

Other significant events

The temporary close for new investors of Arrowstreet Global Equity Fund was lifted on 15 August 2023 following the resolution of capacity limitations for the strategy.

Mercer Global Buy & Maintain Credit Fund changed its name to Mercer Global Credit Fund on 23 October 2023.

Matsack Trust Limited resigned as secretary of the Company and Wilton Secretarial Limited was appointed as secretary of the Company. On that date, the registered office of the Company and the Manager changed from 70 Sir John Rogerson's Quay, Dublin 2, Ireland to 6th Floor, 2 Grand Canal Square, Dublin 2, Ireland on 28 May 2024.

The Manager and Investment Manager are closely monitoring the geopolitical situation in the Middle East. As of 30 June 2024, the Sub-Funds' exposure remains low. The countries considered part of the Middle East include Israel, Egypt, Kuwait, Qatar, Saudi Arabia, Turkey, UAE, Bahrain, Jordan, Oman, Lebanon, and Palestine.

Additionally, the Manager and Investment Manager are tracking the evolving situation in Russia and its potential implications for the Sub-Funds, with exposures also remaining low as of 30 June 2024.

There were no other significant events affecting the Company during the financial year that require amendment to or disclosure in the financial statements.

Other subsequent events

Michael Aherne was appointed a Non-executive Director of the Company on 1 July 2024.

The functional currency of Mercer Diversified Growth Fund was changed from US\$ to € on 26 July 2024.

The holding of 2 subscriber shares was transferred from Matsack Trust Limited and Matsack Nominees Limited to Mercer Global Investments Management Limited on 22 August 2024.

Following a decision of the Board, the Manager issued a termination notice on 23 August 2024 (“Termination Notice”) to Shareholders in respect of the Mercer Sustainable Listed Infrastructure Feeder Fund and on the 27 August 2024 in respect of Mercer Passive Global Small Cap Equity Feeder Fund. As referenced in the Termination Notice, the Directors’ decision was made in the best interest of all Shareholders after a review of the current circumstances of the Sub-Fund and its future viability, noting its reducing size and resulting challenges on cost effective implementation of the strategy. The Mercer Sustainable Listed Infrastructure Feeder Fund terminated on 20 September 2024.

There have been no other significant events affecting the Company since the financial year end date.

18. Approval of financial statements

These financial statements were approved by the Board of the Directors on 24 October 2024.

General

MGI Funds plc (the “Company”) is an open-ended umbrella fund investment company with variable capital and with segregated liability between Sub-Funds. The share capital of the Company is divided into different series of shares with each series of shares representing a portfolio of assets which comprises a separate fund (each a “Sub-Fund”). The Company is authorised and regulated by the Central Bank of Ireland (the “Central Bank”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank’s (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “CBI UCITS Regulations”).

The investment objective of the Company is the collective investment of its Sub-Funds in financial assets with the aim of spreading its investment risk and giving the Shareholders of the Company the benefit of the results of the management of Sub-Funds. The Company’s objective to spread investment risk has been maintained during the financial year.

The Company consists of sixty-eight (30 June 2023: sixty-three) Sub-Funds, fifty-seven of which are active as at 30 June 2024 (30 June 2023: fifty-four). The following tables outlines the functional currency, launch date and SFDR classification of each Sub-Fund.

Cash and cash equivalents held by terminated but not de-authorised Sub-Funds as at 30 June 2024 amounted to € 1,377,536.

*No notification for distribution in Germany has been made, therefore no shares of the Sub-Fund may be publicly distributed to investors within the scope of the German Investment Act.

General (continued)

SFDR Level 2 Sub-Fund disclosures and related Responsible Investment documents and policies can be found on the Mercer Funds Website (Fund Information (mercer.com)) and the Responsible Investment Website (responsible-investment (mercer.com)).

Where it is appropriate to its investment objective and policies a Sub-Fund may also invest in other Sub-Funds of this Company. A Sub-Fund may only invest in another Sub-Fund of this Company if the Sub-Fund in which it is investing does not itself hold Shares in any other Sub-Fund of this Company. Any commission received by the Manager or Investment Manager in respect of such investment will be paid into the assets of the Sub-Fund. Any Sub-Fund that is invested in another Sub-Fund of this Company or any other fund to which the Manager or the Investment Manager has been appointed will be invested in a Share Class for which no Management or Investment Management Fee is charged. No subscription, conversion or redemption fees will be charged on any such cross investments by a Sub-Fund.

The Prospectus, the Key Information Document (the "KID"), the Key Investor Information Document (the "KIID"), the Articles, the annual and semi-annual reports, a list of changes in the composition of the portfolios as well as the issue and redemption prices are available free of charge pursuant to Sec. 297(1) of the German Capital Investment Code at the office of the German information agent (Mercer Global Investments Europe Limited - Niederlassung Deutschland, Platz der Einheit 1,60327 Frankfurt am Main, Hessen, Germany).

The Company may only be offered in Switzerland to qualified investors within the meaning of Article. 10 para 3 and 3ter CISA including high net worth retail clients and private investment structures set up for them if they have opted out of investor protection pursuant to art. 5 para. 1 FinSA (so called opting-out). The Prospectus, the KIID, the Articles of the Company as well as the annual and semi-annual reports can be obtained free of charge from the representative agent in Switzerland, Mercer Alternatives AG, Kasernenstrasse 77b, 8004 Zurich, Switzerland. The paying agent of the Company in Switzerland is NPB Neue Privat Bank AG, Limmatquai 1 / am Bellevue, P.O. Box, CH-8024 Zürich, Switzerland.

Data protection notice

The General Data Protection Regulation (Regulation (EU) 2016/679) ("GDPR") came into effect on 25 May 2018. Information on how the Shareholders' personal data is processed in accordance with GDPR can be found here:

Details of Share Class launches and terminations have been outlined in the Note 16 to financial statement.

Remuneration policy

As part of its authorisation as a UCITS Management Company to MGI Funds plc (the "UCITS") Mercer Global Investments Management Limited ("MGIM", the "ManCo") has implemented a Remuneration Policy (the "Policy") consistent with the provisions of Article 14a and 14b of Directive 2014/91/EU amending Directive 2009/65/EC (the "UCITS V Directive") which has been transposed into Irish law via the European Communities (Undertakings for Collective Investment in Transferable Securities)(Amendment) Regulations 2016 – S.I. No. 143 of 2016 - the Irish UCITS V Regulations.

The Policy has been devised in line with the business strategy, objectives, values and interests of MGIM and MGI Funds plc, and includes measures to avoid conflicts of interest, promote sound and effective risk management, including in respect of sustainability risks, and discourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS that MGIM manages.

The Policy extends to MGIM in its capacity as Management Company of the UCITS. None of the Non-Executive Directors of MGIM are currently in receipt of variable remuneration in respect of their services as Director of MGIM or in respect of the UCITS. Accordingly, the detailed provisions of Article 14(b) of the UCITS V Directive as implemented into Irish law pursuant to the UCITS V Regulations are not applicable with regard to the Directors of MGIM.

Given the nature of MGIM's business, and the range of services and activities that it undertakes, a delegation model has been employed whereby MGIM does not have any direct employees. Resources are engaged by MGIM pursuant to a Secondment Arrangement of employees from Mercer Global Investments Europe Limited ('MGIE' or 'the Investment Manager') and to a lesser extent Mercer Ireland Limited with some supplementary services which continue to be provided under the existing Resource Sharing Agreement with MGIE dated 13 May 2014 (the "RSA"), as amended from time to time, pursuant to which the Investment Manager makes available to MGIM sufficient appropriately qualified employees to discharge certain functions for MGIM thus enabling MGIM to leverage off the skills, experience and knowledge of specialised staff employed by MGIE. Separately, MGIM has delegated discretionary portfolio management to MGIE. The MGIE Remuneration Policy is aligned with the remuneration requirements under the Investment Firms Directive (Directive (EU) 2019/2034), which are deemed equally as effective as the remuneration rules applicable to UCITS. Given that MGIM does not have any direct employees, the Board does not regard it as proportionate to establish a remuneration committee specifically for MGIM. Instead, the MGIE Remuneration Committee will oversee the remuneration process.

Furthermore, MGIE in its capacity as Investment Manager has sub delegated portfolio management to Sub-Investment Managers. Sub-Investment Managers are not incentivised or rewarded for taking excessive risk. The discretion of the Sub-Investment Manager, and thus its risk taking is strictly controlled within certain predetermined narrow parameters and/or its investment decisions are rules based. The parameters take the form of detailed investment restrictions/investment guidelines in the Prospectus and/or the investment management agreement. The Sub-Investment Manager is not permitted to manage outside of these parameters and as such cannot materially affect the risk profile of the UCITS. These parameters are monitored by the

Remuneration policy (continued)

State Street Compliance Monitoring team, who is appointed by MGIE to conduct daily post trade monitoring of the UCITS. It is MGIE's policy that all delegates appointed (EU & Non-EU) will be subject to contractual delegation arrangements with detailed investment restrictions and guidelines for managing risk and are remunerated on the basis of providing a service to MGIM and the UCITS under such delegation agreements.

Quantitative remuneration disclosure

MGIM is required under UCITS V to make quantitative disclosures of remuneration. These disclosures are made in line with interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops MGIM may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other Mercer range fund disclosures in that same year.

Disclosures are provided in relation to (a) the staff of MGIM and MGIE; (b) staff who are senior management; and (c) staff who have the ability to materially affect the risk profile of the UCITS.

All individuals included in the aggregated figures disclosed are rewarded in line with MGIM and MGIE's remuneration policy for their responsibilities across the relevant Mercer business area. As all individuals have a number of areas of responsibilities, only the portion of remuneration for those individuals' services attributable to the UCITS included in the aggregate figures disclosed.

Members of staff and senior management of MGIE typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of MGIM, MGIE and across the broader Mercer group. Therefore, the figures disclosed are a sum of each individual's portion of remuneration attributable to the UCITS according to an objective apportionment methodology which acknowledges the multiple-service nature of MGIE. Accordingly, the figures are not representative of any individual's actual remuneration or their remuneration structure.

Total amount of remuneration awarded by MGIM and MGIE to its staff for the financial year end

	30 Jun 2024	30 Jun 2023
Fixed remuneration	€ 10,170,358	€ 9,064,177
Variable remuneration	€ 2,655,475	€ 2,593,442
Total remuneration	€ 12,825,833	€ 11,657,619
Number of beneficiaries	215	232

Aggregate amount of remuneration for the financial year end

	30 Jun 2024	30 Jun 2023
Senior Management of Fund	€ 5,406,206	€ 5,635,359
Identified Staff of the Investment Managers	€ 1,661,368	€ 2,026,120

Net gain/(loss) from financial instruments at FVTPL

All realised gains and losses on securities and derivatives sold during the financial year are included in realised gain/(loss) on investments and other FDIs. Unrealised gains and losses on the securities and other FDIs are included in change in unrealised gain/(loss) on investments and other FDIs.

Soft commissions and directed brokerage arrangements

Sub-Investment Managers appointed by the Investment Manager are not permitted to enter into soft commission arrangements which would result in them receiving research for free, with the exception of minor non-monetary benefits as defined in Markets in Financial Instruments Directive (“MiFID”). Managers can accept research if they pay for it themselves or if they pay for it via a Research Payment Account (“RPA”) which is funded by the assets of the Sub-Fund or similar means which result in the same level of protection as the RPA method.

EPM techniques

The Company may employ investment techniques and instruments for EPM of the assets of the Company or of any Sub-Fund and for short-term investment purposes under the conditions and limits set out by the Central Bank under the UCITS Regulations and in the Prospectus. The Company may, for the purposes of hedging, enter into put and call options, spot and forward contracts, IRS, CDS, financial futures, stock and bond index futures contracts, repurchase and reverse repurchase agreements and securities lending agreements. In particular, a Sub-Fund may seek to hedge its investments against currency fluctuations which are adverse to its base currency by utilising currency options, futures contracts and forward foreign currency contracts. For FDIs that were entered into during the financial year which remained open at year end and the resulting amount of commitments/exposures, please refer to the Portfolio Statements. FDIs and EPM techniques and instruments were used during the financial year.

A Sub-Fund may also from time to time make use of exchange traded stock index and other futures contracts for the purpose of EPM to enable it to maintain the appropriate exposure to stock markets in accordance with the relevant Investment Manager’s recommended overall asset allocation. The use of exchange traded stock index and other futures contracts by the Company will be subject to the conditions and limits laid down by the Central Bank under the UCITS Regulations.

Certain Sub-Funds utilise FDIs for investment purposes and/or for EPM purposes. In addition to investment in FDIs set down in the Prospectus, and subject to the conditions and within the limits laid down by the Central Bank, certain Sub-Funds may employ techniques and instruments for EPM of the assets of the Sub-Fund relating to transferable securities and money market instruments. Transactions for the purposes of EPM may be undertaken with a view to achieving a reduction in risk and/ or a reduction in costs and may not be speculative in nature. These techniques and instruments may include investment in FDIs. New techniques and instruments may be developed which may be suitable for use by a Sub-Fund and the Manager may employ such techniques and instruments. Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

Realised and unrealised gains or losses arising from FDIs or EPM techniques and instruments are disclosed in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

The Company enters into repurchase agreements and reverse repurchase agreements for the purpose of EPM. There are no material revenues arising from the use of repurchase agreements or reverse repurchase agreements.

EPM techniques (continued)

Interest income and interest expense in relation to reverse repurchase and repurchase agreements are disclosed separately in section Repurchase agreements and Reverse repurchase agreements of the supplemental information of the annual report.

Transaction costs relating to the reverse repurchase and repurchase agreements transactions are embedded in the interest rate applied to each contract, therefore they are not separately identifiable for disclosure within the financial statements.

Details of the value of collateral and the exposure to the counterparty is detailed in Note 9 to the financial statements.

Securities lending

During the financial year the Sub-Funds entered into securities lending agreements for EPM purposes. Under a securities lending transaction, a Sub-Fund makes a loan of securities which it holds to a borrower upon terms that require the borrower to return equivalent securities to the Sub-Fund within a specified period and to pay the Sub-Fund a fee for the use of the securities during the period that they are on loan. The Manager will ensure that it is able, at any time, to recall any security that has been lent out or terminate any securities lending agreement into which it has entered.

A Sub-Fund may lend its portfolio securities via a securities lending program through an appointed securities lending agent to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. Pursuant to the terms of the relevant securities lending agreement, the appointed lending agent will be entitled to retain a portion of the securities lending revenue to cover the fees and costs associated with the securities lending activity, including the delivery of loans, the management of collateral and the provision of any securities lending indemnity and such fees paid will be at normal commercial rates.

Revenue from securities lending arrangements is disclosed in Securities lending income in the Statement of Comprehensive Income.

Transaction costs relating to the securities lending transactions in relation to third parties to the agreement are embedded in the income received, therefore they are not separately identifiable for disclosure within the financial statements.

Repurchase and reverse repurchase agreements

Under a repurchase agreement a Sub-Fund sells portfolio assets subject to an agreement by the Sub-Fund to repurchase the same assets at an agreed upon price and date.

The Sub-Fund can use the proceeds received from entering into a repurchase agreement to make additional investments, which generally causes the Sub-Fund's portfolio to behave as if it were leveraged. If the buyer in a repurchase agreement files for bankruptcy or becomes insolvent, the Sub-Fund may be unable to recover the securities it sold and as a result may realise a loss on the transaction if the securities it sold are worth more than the purchase price it originally received from the buyer.

Under a reverse repurchase agreement the Sub-Fund purchases a financial asset and simultaneously enters into an agreement to resell the same or a substantially similar asset at a fixed price on a future date.

The following table details the repurchase and reverse repurchase agreements as at 30 June 2024:

Sub-Fund	Collateral Credit rating	Interest charged	Accrued interest	Interest received	Interest receivable	Value of net collateral	Payable for repurchase agreements	Receivable from reverse repurchase agreements

Portfolio Turnover Rate ("PTR")

This report has been prepared in accordance with the Shareholder Rights Directive II disclosure requirements to institutional investors. PTR has been calculated in accordance with the below methodology. The PTR of equities within a portfolio will vary in relation to the investment strategy. For your relevant Sub-Fund investments, the PTR of all securities within the Sub-Fund can be found within the summary table below.

$$\text{PTR} = \frac{\text{Lesser of (Purchases \& Sales)}}{\text{Average Total Net Assets over 12 months} \times 100}$$

Sub-Fund	Financial year ended	Financial year ended
	30 Jun 2024	30 Jun 2023
	%	%
MGI Emerging Markets Equity Fund	43.55	85.62
MGI Eurozone Equity Fund	66.94	102.69

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (“SFTs”) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs and total return swaps (“TRSs”). As outlined in the offering documents, only repurchase agreements, reverse repurchase agreements, securities lending, TRSs and short sales are considered SFTs for the purpose of this disclosure.

1. Listed below is the market value of all SFTs and TRSs at 30 June 2024, grouped by SFT type and the ten largest counterparties (if fewer than ten counterparties are used then all counterparties are detailed)

MGI Emerging Markets Equity Fund

Securities Financing Transactions (continued)**8. Safe-keeping of collateral received in respect of SFTs**

State Street Custodial Services (Ireland) Limited (or its delegate) are responsible for the safe-keeping of all collateral received in relation to the SFTs held on the Sub-Funds. Cash collateral received as at 30 June 2024 was held with the following counterparties:

Sub-Fund	SFT Type	Counterparty	Value of collateral received
Mercer Absolute Return Fixed Income Fund	Repurchase and Reverse Repurchase	Toronto Dominion Bank	€ 17,448

9. Re-investment of collateral received

There was no re-hypothecation of collateral received in respect of SFTs held during the financial year ended 30 June 2024.

10. Safe-keeping of collateral pledged

Included in the table below are details of the safe-keeping of the collateral pledged from the Sub-Funds to the relevant counterparties in relation to TRSs/SFTs held on the Sub-Funds. Collateral is held in pooled accounts.

Sub-Fund	SFT Type	Counterparty	Value of collateral pledged
Mercer Absolute Return Fixed Income Fund	Repurchase Transactions	Barclays Bank	€ 431,245
		Toronto Dominion Bank	€ 6,507,384
		Westpac	€ 99,390,697
Mercer Global Credit Fund	TRSs	Goldman Sachs	US\$ 1,405,800
Mercer Investment Fund 21 - Global High Yield Bond	TRSs	BNP Paribas	GB£ 57,932
		Morgan Stanley	GB£ 159,916

11. Returns and costs of the SFTs & TRSs

Sub-Fund	SFT Type	Income received/ (losses) incurred	Gains/Losses†	Costs incurred*	Net returns
Mercer Short Duration Global Bond Fund 2	Reverse Repurchase Transactions	US\$ 2,895,630	-	-	US\$ 2,895,630
Mercer Global Credit Fund	TRSs	-	US\$ 22,266	-	US\$ 22,266
Mercer Absolute Return Fixed Income Fund	Repurchase and Reverse Repurchase Transactions	€ (3,857,418)	-	-	€ (3,857,418)
PIMCO Global Aggregate Bond Fund	Reverse Repurchase Transactions	€ 336,104	-	-	€ 336,104
Mercer Investment Fund 21 - Global High Yield Bond	TRSs	-	GB£ (171,287)	-	GB£ (171,287)

†Amount includes only unrealised gains/losses since the swaps were entered into as at 30 June 2024.

*Transactions costs relating to the repurchase and reverse repurchase transactions and TRSs transactions are embedded in the interest rate applied to each contract, therefore they are not separately identifiable for disclosure within the financial statements.

*Transaction costs relating to the securities lending transactions in relation to third parties to the agreement are embedded in the income received, therefore they are not separately identifiable for disclosure within the financial statements.

Repurchase and reverse repurchase transactions details disclosed in the tables above have been netted.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
MGI Emerging Markets Equity Fund

Legal entity identifier:
549300XM3RJF48NEAL10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.40% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI Emerging Markets Equity Fund	MSCI Emerging Markets
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	122	346

Level of Sustainable Investment
42.40%

● *...and compared to previous periods?*

	MGI Emerging Markets Equity Fund	MSCI Emerging Markets
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	94	325

Level of Sustainable Investment
39.55%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	46399.1	tCO2	82
Scope 2 GHG emissions	25993.4	tCO2	82
Scope 3 GHG emissions	460459.3	tCO2	82
Total GHG emissions	532851.8	tCO2	82
Carbon footprint	560.8	tCO2 per M invested	82
GHG intensity of investee companies	927.2	tCO2	82
Exposure to companies active in the fossil fuel sector	7.0	Percentage	84
Share of non-renewable energy consumption and production	86.0	Percentage	73
Energy consumption intensity per high impact climate sector	13.0	GwH per million EUR invested	73
Activities negatively affecting biodiversity-sensitive areas	1.6	Percentage	82
Emissions to water	0.0	Tonnes per million EUR invested	82
Hazardous waste and radioactive waste ratio	1.0	Tonnes per million EUR invested	46
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.7	Percentage	84
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	47.6	Percentage	83
Unadjusted gender pay gap	10.6	Percentage	20
Board gender diversity	19.1	Percentage	83
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	83
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	52.9	Percentage	82
Lack of a human rights policy	17.0	Percentage	83
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

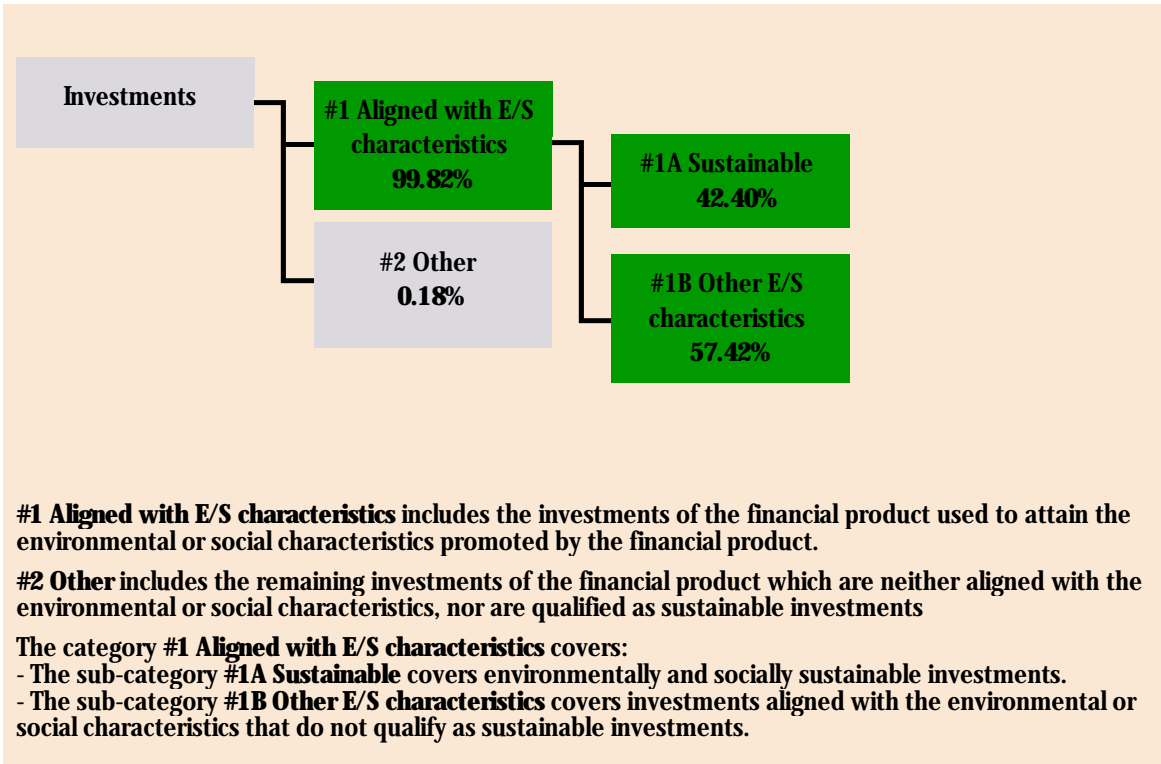

Please see the information below in this respect.

● **What was the asset allocation?**

99.82% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 42.40% in sustainable investments.

The remaining 0.18% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	15.78%
Information Technology	Semiconductors & Semiconductor	13.35%
Industrials	Capital Goods	8.29%
Information Technology	Technology Hardware & Equipmen	8.24%

Real Estate	Equity Real Estate Investment	0.25%
Other	Private	0.12%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

 In fossil gas In nuclear energy

 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 42.40% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 42.40% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.18% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
MGI Eurozone Equity Fund

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.44% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI Eurozone Equity Fund	MSCIEMU
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	55	90

Level of Sustainable Investment
64.44%

● *...and compared to previous periods?*

	MGI Eurozone Equity Fund	MSCIEMU
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	101	125

Level of Sustainable Investment
61.96%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	17771.0	tCO2	93
Scope 2 GHG emissions	4941.2	tCO2	93
Scope 3 GHG emissions	213116.7	tCO2	93
Total GHG emissions	235827.9	tCO2	93
Carbon footprint	523.8	tCO2 per M invested	93
GHG intensity of investee companies	744.3	tCO2	93
Exposure to companies active in the fossil fuel sector	7.9	Percentage	94
Share of non-renewable energy consumption and production	56.2	Percentage	84
Energy consumption intensity per high impact climate sector	9.8	GwH per million EUR invested	84
Activities negatively affecting biodiversity-sensitive areas	6.0	Percentage	93
Emissions to water	0.0	Tonnes per million EUR invested	93
Hazardous waste and radioactive waste ratio	1.5	Tonnes per million EUR invested	59
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	94
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	14.0	Percentage	93
Unadjusted gender pay gap	13.1	Percentage	41
Board gender diversity	41.9	Percentage	93
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	93
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	23.3	Percentage	91
Lack of a human rights policy	1.4	Percentage	93
Average income inequality score		Ratio	0

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

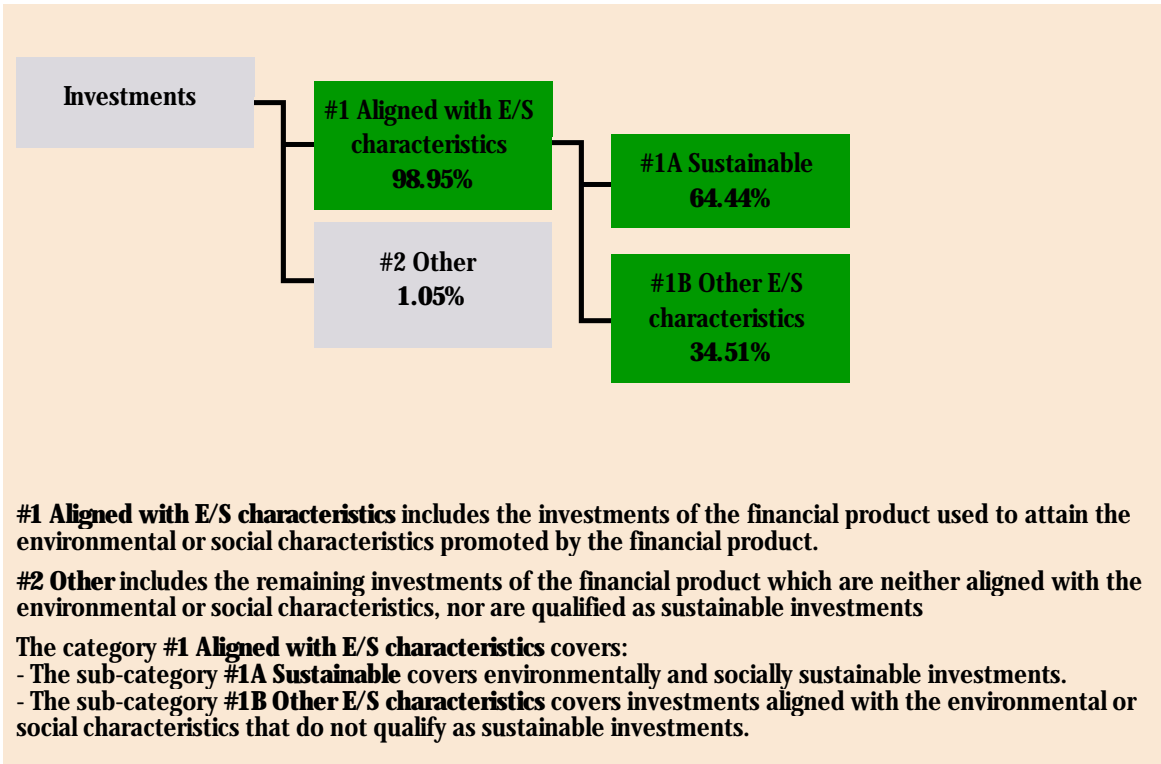

Please see the information below in this respect.

● **What was the asset allocation?**

98.95% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 64.44% in sustainable investments.

The remaining 1.05% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	12.45%
Financials	Banks	10.25%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 64.44% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 64.44% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 1.05% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
MGI Global Equity Fund

Legal entity identifier:
549300FNBM37M76SVO33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.81% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	50	94

Level of Sustainable Investment
61.81%

● *...and compared to previous periods?*

	MGI Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	58	117

Level of Sustainable Investment
60.94%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	104162.6	tCO2	94

The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 61.81% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 61.81% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
MGI UK Equity Fund

Legal entity identifier:
549300DGNNV8Z51QTZ82

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.01% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI UK Equity Fund	FTSE All Share
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	52	82

Level of Sustainable Investment
68.01%

● *...and compared to previous periods?*

	MGI UK Equity Fund	FTSE All Share
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	54	100

Level of Sustainable Investment
69.23%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	8874.5	tCO2	93
Scope 2 GHG emissions	1817.6	tCO2	93
Scope 3 GHG emissions	128709.4	tCO2	93
Total GHG emissions	139386.1	tCO2	93
Carbon footprint	632.8	tCO2 per M invested	93
GHG intensity of investee companies	872.9	tCO2	93
Exposure to companies active in the fossil fuel sector	14.1	Percentage	94
Share of non-renewable energy consumption and production	71.1	Percentage	76
Energy consumption intensity per high impact climate sector	3.0	GwH per million EUR invested	76
Activities negatively affecting biodiversity-sensitive areas	7.1	Percentage	93
Emissions to water	0.0	Tonnes per million EUR invested	93
Hazardous waste and radioactive waste ratio	0.7	Tonnes per million EUR invested	36
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	94
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.8	Percentage	93
Unadjusted gender pay gap	16.4	Percentage	81
Board gender diversity	41.9	Percentage	93
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	93
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	25.7	Percentage	91
Lack of a human rights policy	2.8	Percentage	93
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

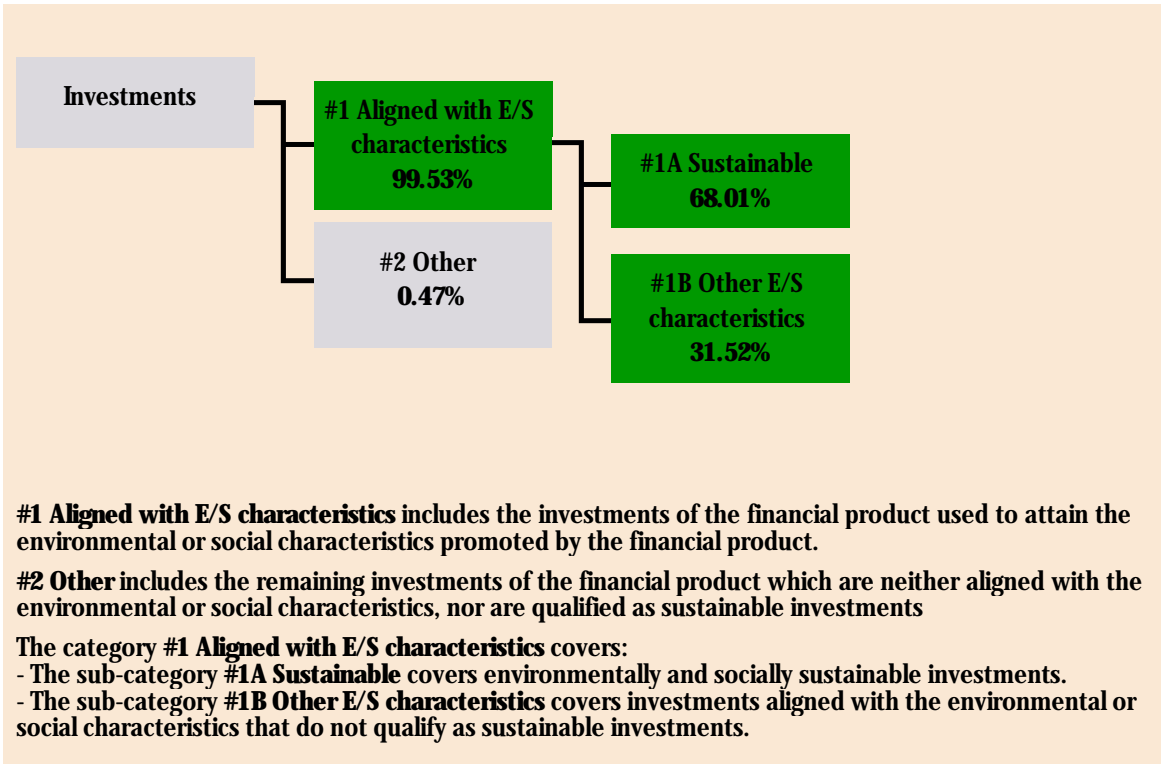

Please see the information below in this respect.

● **What was the asset allocation?**

99.53% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 68.01% in sustainable investments.

The remaining 0.47% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Financial Services	10.73%
Industrials	Capital Goods	10.60%
Health Care	Pharmaceuticals Biotechnology	9.85%
Industrials	Commercial & Professional Serv	8.43%
Financials	Banks	7.51%
Energy	Energy	7.49%
Communication Services	Media & Entertainment	6.26%
Financials	Insurance	6.10%
Consumer Staples	Food Beverage & Tobacco	5.34%
Materials	Materials	4.65%
Consumer Staples	Consumer Staples Distribution	4.45%
Consumer Discretionary	Consumer Durables & Apparel	4.33%
Consumer Staples	Household & Personal Products	3.11%
Consumer Discretionary	Consumer Discretionary Distrib	2.36%
Real Estate	Equity Real Estate Investment	1.87%
Industrials	Transportation	1.16%
Information Technology	Technology Hardware & Equipmen	1.05%
Consumer Discretionary	Consumer Services	0.93%
Utilities	Utilities	0.87%
Information Technology	Software & Services	0.24%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

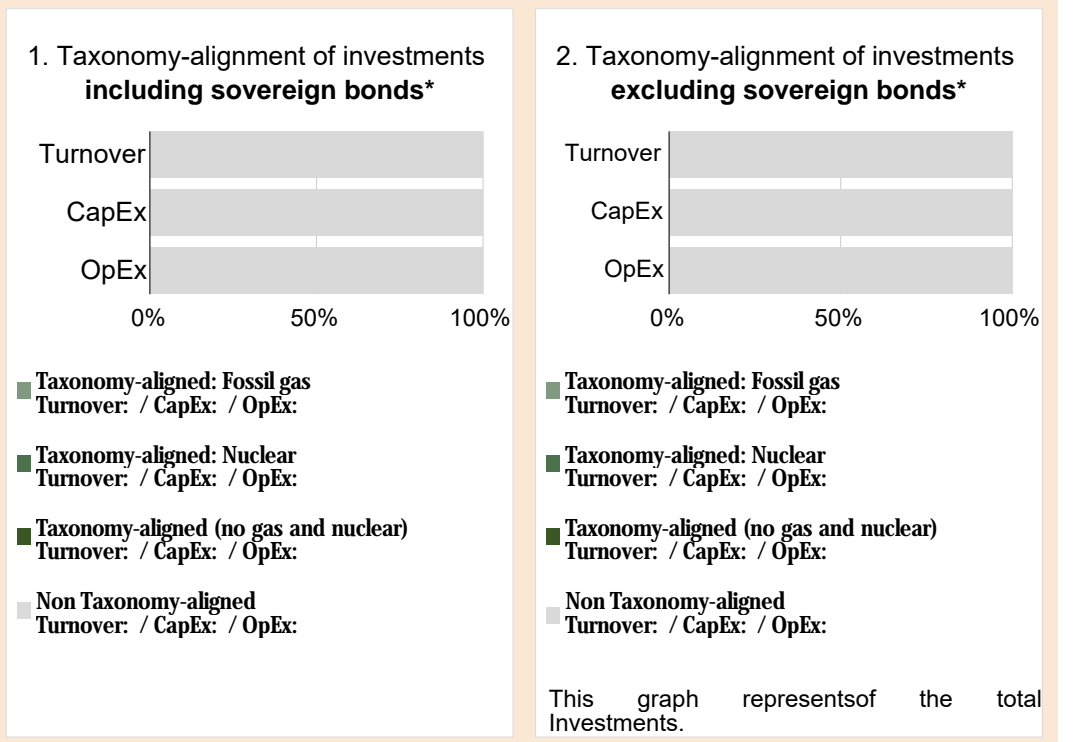

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 68.01% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 68.01% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.47% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Global Small Cap Equity Fund

Legal entity identifier:
549300EZIVU1VNHRC40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.01% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNG") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.

- The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
 - assessing the extent to which the screening criteria described above were applied
 - assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Mercer Global Small Cap Equity Fund	MSCI World Small Cap
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	102	129

Level of Sustainable Investment
42.01%

● **...and compared to previous periods?**

	Mercer Global Small Cap Equity Fund	MSCI World Small Cap
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	83	154

Level of Sustainable Investment
38.20%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	42088.0	tCO2	87
Scope 2 GHG emissions	13934.1	tCO2	87
Scope 3 GHG emissions	571872.8	tCO2	86
Total GHG emissions	627870.6	tCO2	86
Carbon footprint	926.4	tCO2 per M invested	87
GHG intensity of investee companies	816.6	tCO2	87
Exposure to companies active in the fossil fuel sector	4.8	Percentage	91
Share of non-renewable energy consumption and production	93.7	Percentage	64
Energy consumption intensity per high impact climate sector	11.9	GwH per million EUR invested	39
Activities negatively affecting biodiversity-sensitive areas	2.4	Percentage	86
Emissions to water	0.0	Tonnes per million EUR invested	87
Hazardous waste and radioactive waste ratio	5.1	Tonnes per million EUR invested	33
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	90
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	56.5	Percentage	87
Unadjusted gender pay gap	14.7	Percentage	25
Board gender diversity	30.4	Percentage	87
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	87
GHG intensity of investee countries	299.8	tCO2	0
Investee countries subject to social violations (absolute)	0.0	Percentage	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

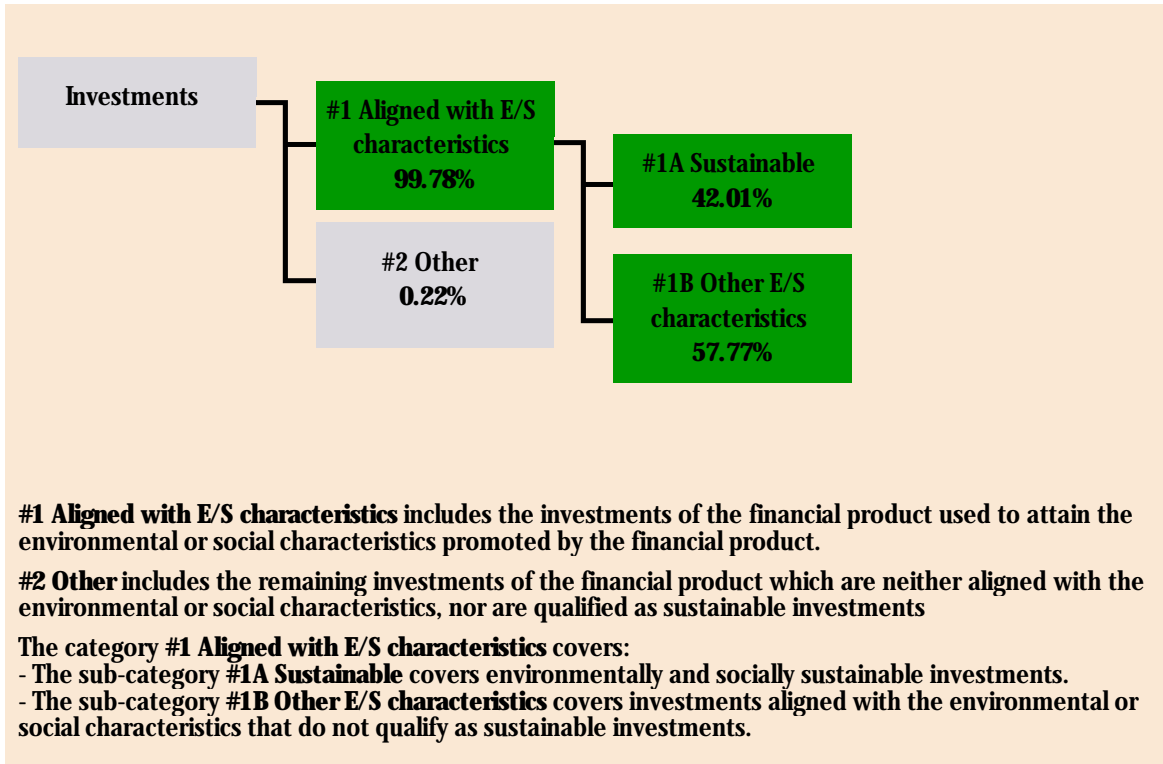

Please see the information below in this respect.

● **What was the asset allocation?**

99.78% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 42.01% in sustainable investments.

The remaining 0.22% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	15.98%
Information Technology	Technology Hardware & Equipmen	8.07%
Materials	Materials	6.61%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 42.01% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 42.01% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.22% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Low Volatility Equity Fund

Legal entity identifier:
549300AT66QYIQMXDX16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67.72% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Mercer Low Volatility Equity Fund	MSCI World
WACI (scope 1 and 2 emissions tCO2 per M Revenue)	49	98

Level of Sustainable Investment
67.72%

● *...and compared to previous periods?*

	Mercer Low Volatility Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	58	134

Level of Sustainable Investment
66.83%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	10451.6	tCO2	91
Scope 2 GHG emissions	5046.5	tCO2	91

Real Estate	Real Estate Management & Devel	0.17%
Consumer Discretionary	Automobiles & Components	0.09%
Government	Sovereign	0.05%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 67.72% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 67.72% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.18% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Diversified Growth Fund

Legal entity identifier:
635400C72M37GX5EBX95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.22% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M revenue) and Carbon Footprint (scope 1 and 2 emissions tCo2/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint (tCo2/\$ M AUM)
31/12/2019	n/a
30/06/2023	81
30/06/2024	80

Date	WACI (tCO2/\$ M Revenue)
31/12/2019	344
30/06/2023	214
30/06/2024	207

Level of Sustainable Investment
38.22%

● **...and compared to previous periods?**

Date	Carbon Footprint (tCo2/\$ M AUM)
31/12/2019	n/a
30/06/2023	81

Date	WACI (tCO2/\$ M Revenue)
31/12/2019	344
30/06/2023	214

Level of Sustainable Investment
31.1%

The Sub-Funds WACI and Carbon Footprint is set out above, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	403360.2	tCO2	54
Scope 2 GHG emissions	82399.1	tCO2	54
Scope 3 GHG emissions	2024559.4	tCO2	54
Total GHG emissions	2510302.4	tCO2	54
Carbon footprint	481.3	tCO2 per M invested	54
GHG intensity of investee companies	948.8	tCO2	54
Exposure to companies active in the fossil fuel sector	14.1	Percentage	57
Share of non-renewable energy consumption and production	76.7	Percentage	45
Energy consumption intensity per high impact climate sector	20.9	Gwh per million EUR invested	31
Activities negatively affecting biodiversity-sensitive areas	3.6	Percentage	55
Emissions to water	0.0	Tonnes per million EUR invested	54
Hazardous waste and radioactive waste ratio	7.3	Tonnes per million EUR invested	26
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	57
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	46.0	Percentage	56
Unadjusted gender pay gap	14.6	Percentage	21
Board gender diversity	30.8	Percentage	56
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	56
GHG intensity of investee countries	557.7	tCO2	17
Investee countries subject to social violations (absolute)	4.5	Percentage	17
Investee countries subject to social violations (relative)	5.0	Percentage	17
Investments in companies without carbon emission reduction initiatives	36.2	Percentage	54
Lack of a human rights policy	12.2	Percentage	56
Average income inequality score	39.6	Ratio	16

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

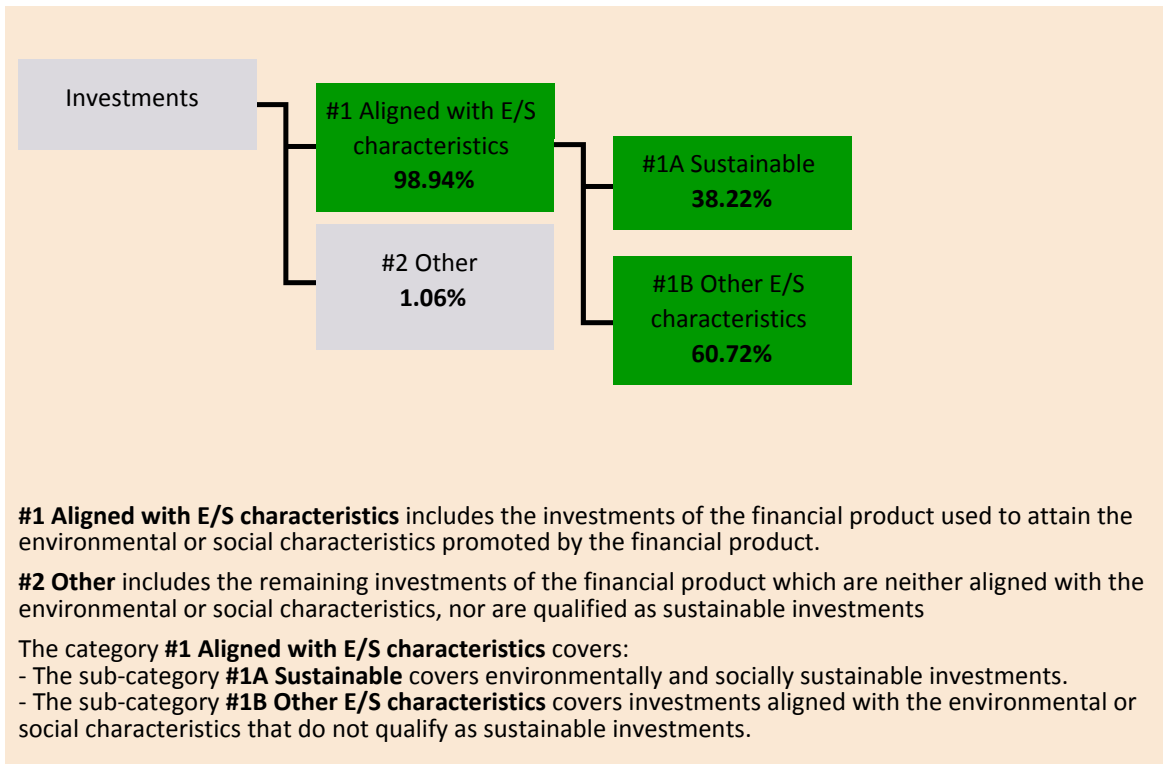

Please see the information below in this respect.

● **What was the asset allocation?**

98.94% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 38.22% in sustainable investments.

The remaining 1.06% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 38.22% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 38.22% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 1.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Global High Yield Bond Fund

Legal entity identifier:
XTPS7DZ2GZKC1PRMXW30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.61% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund. The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes/ m\$USD revenue, being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

Sub-Fund commits to making a minimum allocation to sustainable investments of 5%. The

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
24.61%

● **...and compared to previous periods?**

Level of Sustainable Investment
22.3%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	64109.8	tCO2	51
Scope 2 GHG emissions	12951.4	tCO2	51
Scope 3 GHG emissions	527811.2	tCO2	51
Total GHG emissions	604872.4	tCO2	51
Carbon footprint	852.3	tCO2 per M invested	51
GHG intensity of investee companies	1372.6	tCO2	51
Exposure to companies active in the fossil fuel sector	13.2	Percentage	58
Share of non-renewable energy consumption and production	78.7	Percentage	22
Energy consumption intensity per high impact climate sector	15.9	GwH per million EUR invested	16
Activities negatively affecting biodiversity-sensitive areas	4.2	Percentage	55
Emissions to water	0.0	Tonnes per million EUR invested	51
Hazardous waste and radioactive waste ratio	1.8	Tonnes per million EUR invested	17
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	58
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	52.7	Percentage	56
Unadjusted gender pay gap	15.0	Percentage	17
Board gender diversity	27.8	Percentage	56
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	56
GHG intensity of investee countries	275.7	tCO2	3
Investee countries subject to social violations (absolute)	0.0	Percentage	3
Investee countries subject to social violations (relative)	0.0	Percentage	3
Investments in companies without carbon emission reduction initiatives	46.7	Percentage	53
Lack of a human rights policy	19.8	Percentage	56
Average income inequality score	40.7	Ratio	3

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

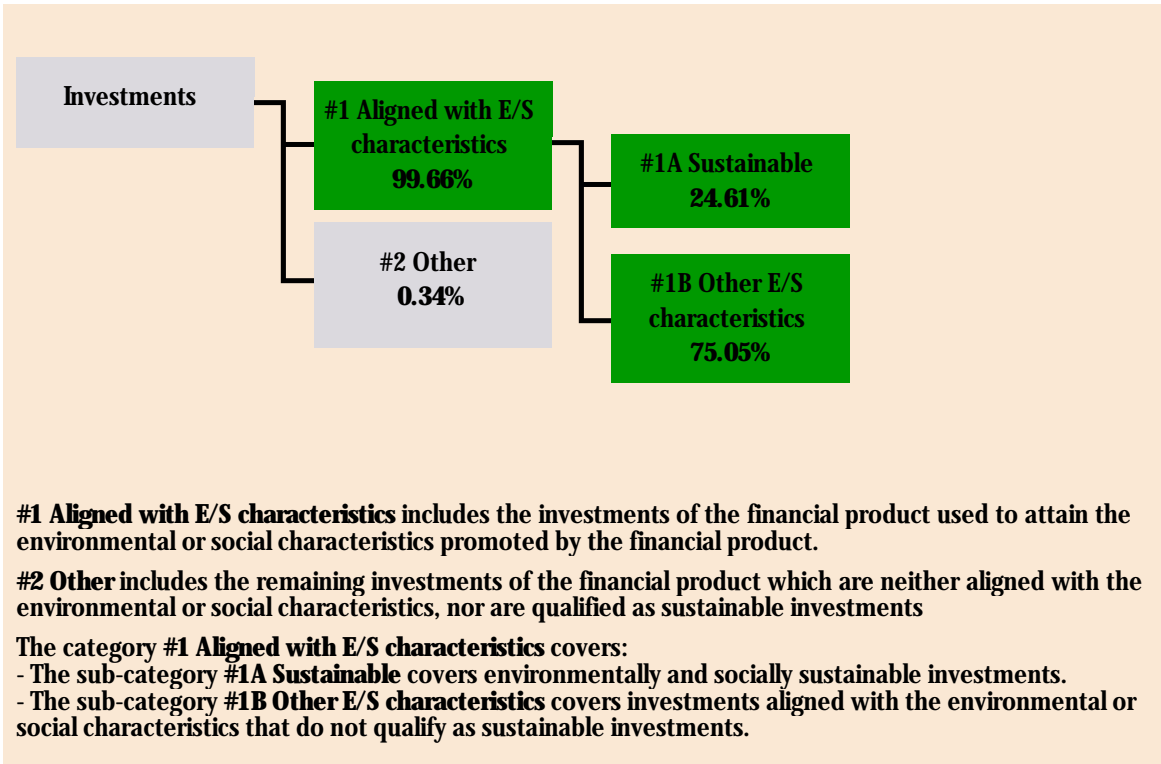

Please see the information below in this respect.

● **What was the asset allocation?**

99.66% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 24.61% in sustainable investments.

The remaining 0.34% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 24.61% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 24.61% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.34% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo₂), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Short Duration Global Bond Fund 1

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.63% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund looks to achieve exposure to companies which have been evaluated and scored based on their alignment with UN Sustainable Development Goals ("SDGs") using a proprietary measurement framework. The Sub-Fund applies a screening process to select issuers that contribute to realising the SDGs, and companies that contribute negatively to these goals are excluded from the investable universe.

The Sub-Fund will use responsible investment criteria to include or exclude certain investments, which will include taking into account commitment to principles which contribute to sustainable development. The Sub-Fund will implement a responsible investment policy by restricting investment in businesses that are, in its opinion, involved in activities that are in breach of responsible investment criteria. The Sub-Fund commits to making a minimum allocation to sustainable investments of 25%.

The Sub-Fund also seeks to avoid investing in companies with material exposure to the following:

- Negative environmental impact
- Violation of international law/human rights
- Corruption and economic crime
- Recreational cannabis
- A low sustainability rating within a high-risk industry
- Production of coal or coal-related products
- Controversial Weapons
- Tobacco

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

All investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolios as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
62.63%

● **...and compared to previous periods?**

Level of Sustainable Investment
59.50%

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	22838.5	tCO2	48
Scope 2 GHG emissions	10558.8	tCO2	48
Scope 3 GHG emissions	262086.4	tCO2	48
Total GHG emissions	295483.7	tCO2	48
Carbon footprint	284.9	tCO2 per M invested	48
GHG intensity of investee companies	1637.6	tCO2	48
Exposure to companies active in the fossil fuel sector	7.3	Percentage	56
Share of non-renewable energy consumption and production	66.2	Percentage	29
Energy consumption intensity per high impact climate sector	5.9	GwH per million EUR invested	12
Activities negatively affecting biodiversity-sensitive areas	2.1	Percentage	52
Emissions to water	0.0	Tonnes per million EUR invested	47
Hazardous waste and radioactive waste ratio	0.9	Tonnes per million EUR invested	12
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.5	Percentage	56
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	25.6	Percentage	55
Unadjusted gender pay gap	18.8	Percentage	27
Board gender diversity	36.5	Percentage	55
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	55

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

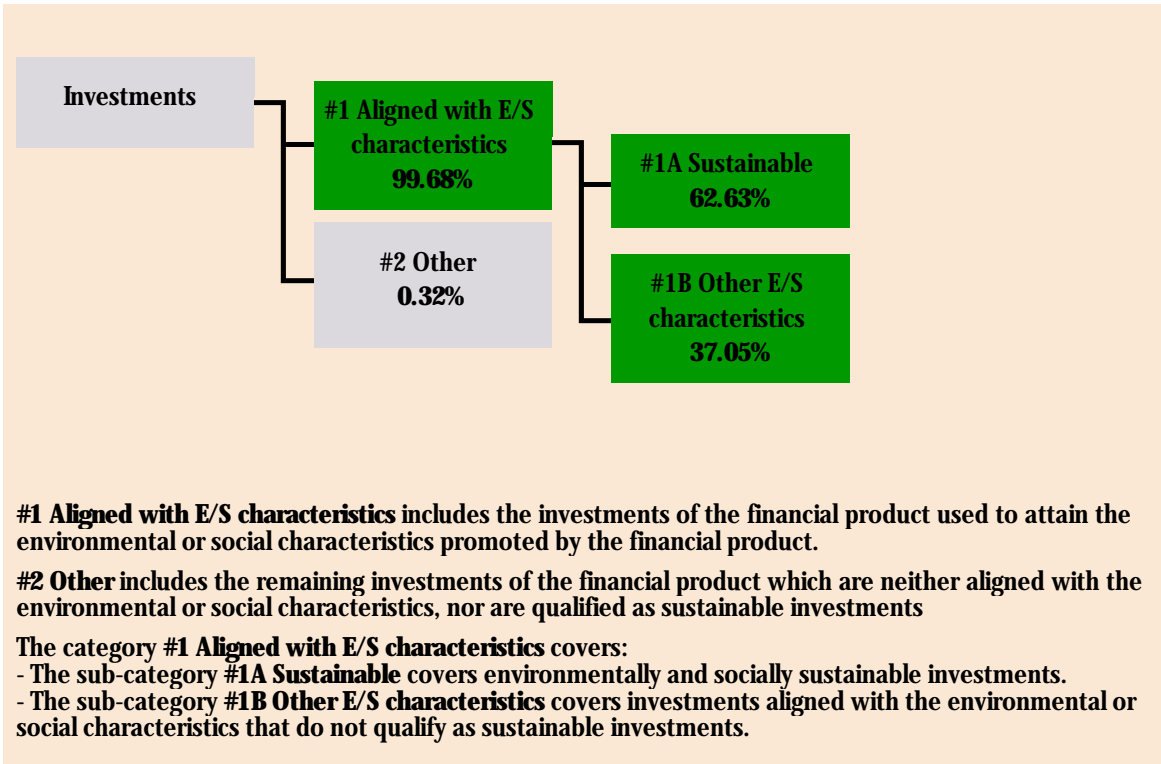

Please see the information below in this respect.

● **What was the asset allocation?**

99.68% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 62.63% in sustainable investments.

The remaining 0.32% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	36.44%
Utilities	Utilities	7.45%
Financials	Insurance	5.69%
Financials	Diversified Financials	4.55%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 62.63% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 62.63% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.32% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities by the Sub-Investment Manager were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by the appointed sub-investment manager to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid issuers as described in the exclusionary screens above and to invest in line with the Sub-Funds stated strategy as described in section "To what extent were the environmental and/or social characteristics promoted by this financial product met?".

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Short Duration Global Bond Fund 2

Legal entity identifier:
UZ0PUFV2ZBSMG2H1BI40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund. The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes/ m\$USD revenue, being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above. The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

● **...and compared to previous periods?**

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	2209.3	tCO2	6
Scope 2 GHG emissions	756.8	tCO2	6

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

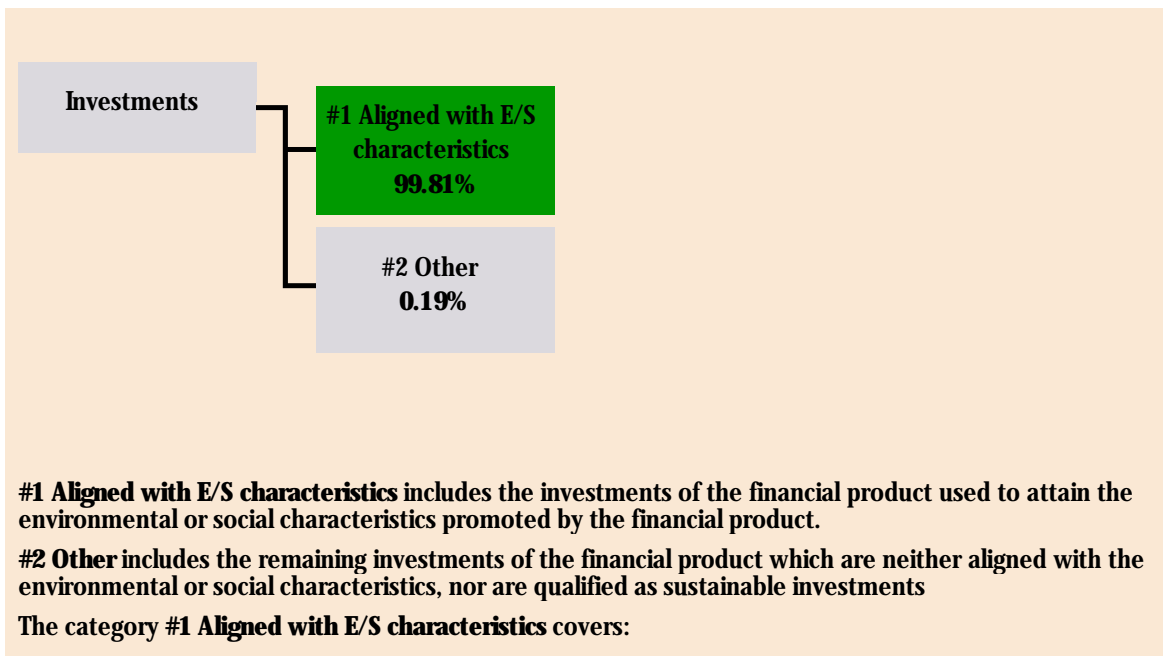

Please see the information below in this respect.

● **What was the asset allocation?**

99.81% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund.

The remaining 0.19% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.19% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo₂), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Global Credit Fund

Legal entity identifier:
549300VHJQTAIY11LU59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.3% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund. The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes/ m\$USD revenue, being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 25%.

- The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the screening criteria described above were applied
 - assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
56.30%

● **...and compared to previous periods?**

Level of Sustainable Investment
55.40%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above.

There is no quarterly average as the Sub-Fund reclassified during the reporting period. Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	57057.0	tCO2	64
Scope 2 GHG emissions	14914.1	tCO2	64
Scope 3 GHG emissions	536975.8	tCO2	64
Total GHG emissions	608946.9	tCO2	64
Carbon footprint	767.6	tCO2 per M invested	68
GHG intensity of investee companies	719.8	tCO2	68
Exposure to companies active in the fossil fuel sector	17.9	Percentage	72
Share of non-renewable energy consumption and production	73.0	Percentage	36
Energy consumption intensity per high impact climate sector	11.1	GwH per million EUR invested	22
Activities negatively affecting biodiversity-sensitive areas	6.0	Percentage	67
Emissions to water	0.0	Tonnes per million EUR invested	61
Hazardous waste and radioactive waste ratio	0.8	Tonnes per million EUR invested	26
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	72
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	32.4	Percentage	70
Unadjusted gender pay gap	14.7	Percentage	34
Board gender diversity	35.5	Percentage	70
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	70
GHG intensity of investee countries		tCO2	2
Investee countries subject to social violations (absolute)	0.0	Percentage	2
Investee countries subject to social violations (relative)	0.0	Percentage	2
Investments in companies without carbon emission reduction initiatives	34.7	Percentage	68
Lack of a human rights policy	7.6	Percentage	72
Average income inequality score	39.2	Ratio	2

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

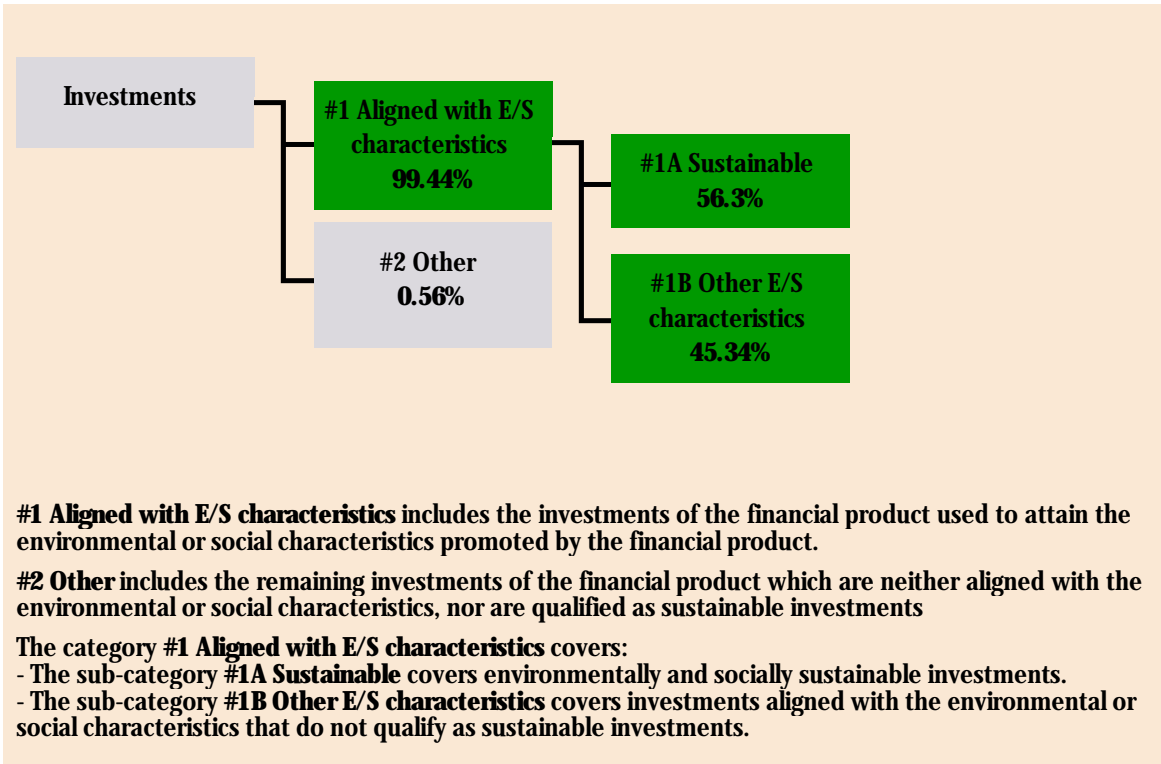

Please see the information below in this respect.

● **What was the asset allocation?**

99.44% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 56.3% in sustainable investments.

The remaining 0.56% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 56.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 56.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.56% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo₂), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Passive Global Equity Fund

Legal entity identifier:

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.18% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe. The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI World ex Selected Securities Index, (the "Benchmark Index") which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Sub-Fund tracked the benchmark
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics

● How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.09%.

The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
68.18%

● **...and compared to previous periods?**

Level of Sustainable Investment
68.26%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. The tracking error of the Fund over the previous reference period was 0.08%.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	124778.2	tCO2	95
Scope 2 GHG emissions	29498.2	tCO2	95
Scope 3 GHG emissions	1073970.5	tCO2	95
Total GHG emissions	1228246.4	tCO2	95
Carbon footprint	317.5	tCO2 per M invested	95
GHG intensity of investee companies	701.9	tCO2	95
Exposure to companies active in the fossil fuel sector	8.3	Percentage	95
Share of non-renewable energy consumption and production	60.7	Percentage	85
Energy consumption intensity per high impact climate sector	11.1	GwH per million EUR invested	53
Activities negatively affecting biodiversity-sensitive areas	5.0	Percentage	95
Emissions to water	0.0	Tonnes per million EUR invested	95
Hazardous waste and radioactive waste ratio	0.4	Tonnes per million EUR invested	48
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	95
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	39.5	Percentage	95
Unadjusted gender pay gap	11.5	Percentage	42
Board gender diversity	35.2	Percentage	95

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

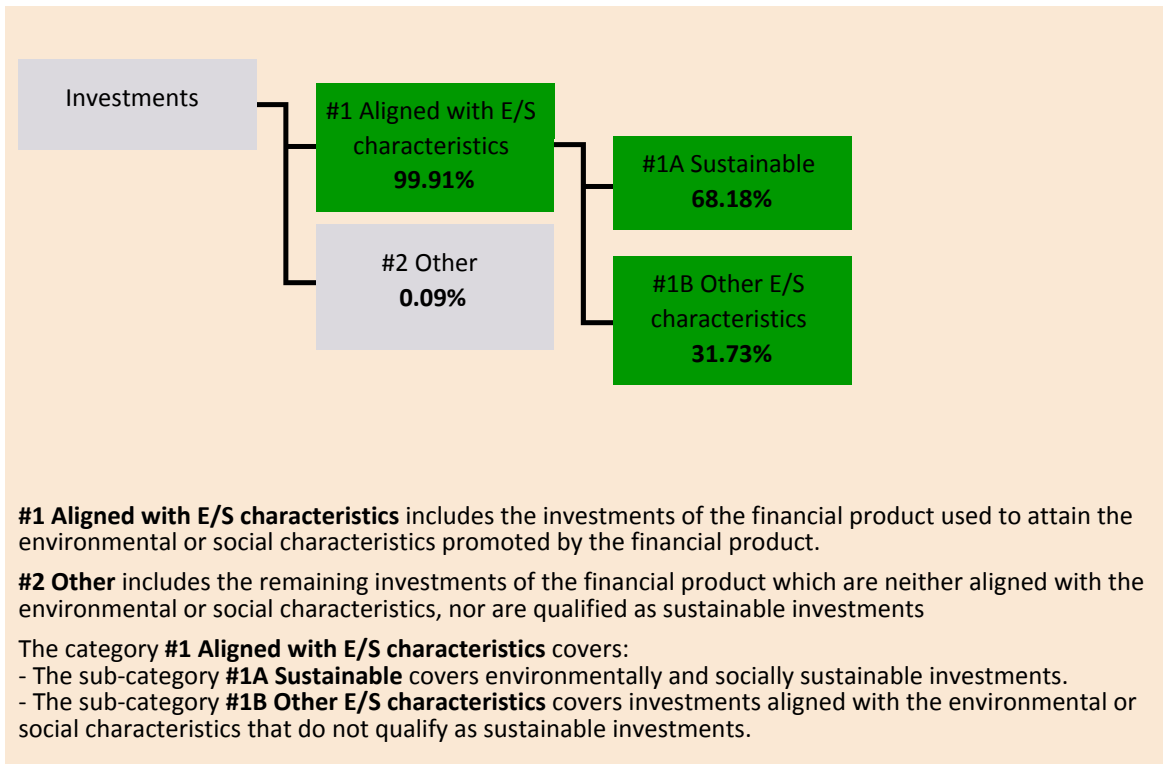

Please see the information below in this respect.

● **What was the asset allocation?**

99.91% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 68.18% in sustainable investments.

The remaining 0.09% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	9.95%
Information Technology	Software & Services	9.93%
Health Care	Pharmaceuticals Biotechnology	8.00%
Information Technology	Technology Hardware & Equipmen	6.68%
Communication Services	Media & Entertainment	6.67%
Financials	Financial Services	6.22%

Communication Services	Telecommunication Services	1.34%
Consumer Staples	Consumer Staples Distribution	1.31%
Real Estate	Real Estate Management & Devel	0.38%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 68.18% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 68.18% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.09% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI World Index or "Parent Index", to exclude those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at: <https://www.msci.com/>.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Sub-Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.54%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Diversified Retirement Fund

Legal entity identifier:
635400NFMIGIPUCPRG22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.93% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M revenue) and Carbon Footprint (scope 1 and 2 emissions tCo2/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint (tCo2/ \$ M AUM)
31/12/2019	n/a
30/06/2023	58
30/06/2024	66

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	274
30/06/2023	154
30/06/2024	144

Level of Sustainable Investment
36.90%

● **...and compared to previous periods?**

Date	Carbon Footprint (tCo2/ \$ M AUM)
31/12/2019	n/a
30/06/2023	58

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	274
30/06/2023	154

Level of Sustainable Investment
27.20%

The Sub-Funds WACI and Carbon Footprint is set out below, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table below. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	51313.8	tCO2	18
Scope 2 GHG emissions	10892.4	tCO2	18

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.82% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 36.93% in sustainable investments.

The remaining 0.18% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 36.93% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 36.93% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.18% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Absolute Return Fixed Income Fund

Legal entity identifier:
549300EQ90Z2OIZDGK60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund. The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes/ m\$USD revenue, being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

In addition to the above exclusions, the Sub-Fund seeks to avoid investing in companies with material exposure to the following:

- Serious environmental damage (to be determined with reference to internationally accepted standards including, without limitation, the UN Convention on Biological Diversity and the UN Framework Convention on Climate Change)
- Violation of international law/human rights
- Corruption and economic crime
- Recreational cannabis
- A low sustainability rating within a high-risk industry

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above. The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

● **...and compared to previous periods?**

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	14371.0	tCO2	4
Scope 2 GHG emissions	3607.5	tCO2	4
Scope 3 GHG emissions	92823.6	tCO2	4
Total GHG emissions	110802.1	tCO2	4
Carbon footprint	344.0	tCO2 per M invested	4
GHG intensity of investee companies	659.9	tCO2	4
Exposure to companies active in the fossil fuel sector	8.2	Percentage	5
Share of non-renewable energy consumption and production	65.6	Percentage	2
Energy consumption intensity per high impact climate sector	5.8	GwH per million EUR invested	1
Activities negatively affecting biodiversity-sensitive areas	2.1	Percentage	4
Emissions to water	0.0	Tonnes per million EUR invested	4
Hazardous waste and radioactive waste ratio	0.4	Tonnes per million EUR invested	1
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.5	Percentage	5
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.7	Percentage	5
Unadjusted gender pay gap	18.5	Percentage	2
Board gender diversity	34.2	Percentage	5
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	5
GHG intensity of investee countries	396.8	tCO2	9
Investee countries subject to social violations (absolute)	0.0	Percentage	9
Investee countries subject to social violations (relative)	0.0	Percentage	9
Investments in companies without carbon emission reduction initiatives	29.6	Percentage	4
Lack of a human rights policy	8.7	Percentage	5
Average income inequality score	37.6	Ratio	9

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.34% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Emerging Markets Equity Fund

Legal entity identifier:
549300G3M7HA84YPTC87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.62% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe. The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI Emerging Markets ex Selected Securities Index, (the "Benchmark Index") which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Sub-Fund tracked the benchmark
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics

● How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.66%.

The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index versus the MSCI Emerging Markets Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period is found below.

Level of Sustainable Investment
36.62%

● **...and compared to previous periods?**

Level of Sustainable Investment
33.81%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. The tracking error of the Fund over the previous reference period was 0.24%.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	464373.4	tCO2	89
Scope 2 GHG emissions	110080.8	tCO2	89
Scope 3 GHG emissions	1561029.8	tCO2	89
Total GHG emissions	2135484.0	tCO2	89
Carbon footprint	573.1	tCO2 per M invested	89
GHG intensity of investee companies	1083.3	tCO2	89
Exposure to companies active in the fossil fuel sector	7.2	Percentage	90
Share of non-renewable energy consumption and production	87.5	Percentage	78
Energy consumption intensity per high impact climate sector	28.4	GwH per million EUR invested	48
Activities negatively affecting biodiversity-sensitive areas	2.0	Percentage	88
Emissions to water	0.0	Tonnes per million EUR invested	89
Hazardous waste and radioactive waste ratio	1.9	Tonnes per million EUR invested	53
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.6	Percentage	90
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	51.7	Percentage	89
Unadjusted gender pay gap	14.9	Percentage	21
Board gender diversity	17.7	Percentage	89
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	89
GHG intensity of investee countries	275.7	tCO2	4
Investee countries subject to social violations (absolute)	0.0	Percentage	4
Investee countries subject to social violations (relative)	0.0	Percentage	4
Investments in companies without carbon emission reduction initiatives	51.1	Percentage	88
Lack of a human rights policy	17.4	Percentage	89
Average income inequality score	40.7	Ratio	4

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.91% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 36.62% in sustainable investments.

The remaining 0.09% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	15.63%
Information Technology	Semiconductors & Semiconductor	13.27%
Information Technology	Technology Hardware & Equipmen	9.16%
Communication Services	Media & Entertainment	6.14%
Materials	Materials	5.99%

Industrials	Commercial & Professional Serv	0.05%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 36.62% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 36.62% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.09% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.

Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI Emerging Markets Index or "Parent Index", to exclude those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at: <https://www.msci.com/>.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Sub-Fund and Broad Market Index (MSCI Emerging Markets Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	2.29%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Sustainable Global Equity Fund

Legal entity identifier:
549300QVG3ZL5MLNSG41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.93% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental and social characteristics are to allocate to securities that have environmental and social considerations. In order to assist with the promotion of environmental and social characteristics by the Sub-Fund, in selecting Sub-Investment Managers for the Sub-Fund, the Investment Manager will limit the available universe to those strategies that have received the highest (ESG1) or second highest (ESG2) ESG rating by Mercer's global manager research team i.e. strategies considered best-in-class, which are responsive to ESG risks as well as opportunities, and those with strong stewardship processes.

In selecting the Sub-Investment Managers for the Sub-Fund, the Investment Manager seeks to combine strategies that in turn embed various environmental and/or social considerations in their investment processes while also adhering to good governance standards. Environmental considerations may include greenhouse gas reduction, renewable energy, waste reduction, clean water provision, biodiversity or the circular economy and social considerations include the reduction of inequality, encouraging social cohesion, fair labour practices, investments in human capital or investments in socially disadvantaged communities.

The Sub-Fund applies a negative screen to the overall constituents of the investment universe to exclude companies with material involvement in the following:

- Adult Entertainment.
- Alcohol
- Fossil Fuels
- Coal
- Oil Sands
- Gambling

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund commits to making a minimum allocation to sustainable investments of 35%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the ESG Ratings of the Sub-Investment Managers
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to Sub-Investment Managers that were rated ESG 3 or ESG 4.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

	Mercer Sustainable Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	76	94

Level of Sustainable Investment
69.93%

● **...and compared to previous periods?**

	Mercer Sustainable Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	83	117

Level of Sustainable Investment
70.01%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above.

There is no quarterly average as the Sub-Fund reclassified during the reporting period. Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	18319.3	tCO2	92
Scope 2 GHG emissions	11734.4	tCO2	92
Scope 3 GHG emissions	262114.0	tCO2	92
Total GHG emissions	292167.7	tCO2	92
Carbon footprint	220.1	tCO2 per M invested	92
GHG intensity of investee companies	554.1	tCO2	92
Exposure to companies active in the fossil fuel sector	2.4	Percentage	93
Share of non-renewable energy consumption and production	63.7	Percentage	80
Energy consumption intensity per high impact climate sector	8.4	GwH per million EUR invested	80
Activities negatively affecting biodiversity-sensitive areas	5.2	Percentage	90
Emissions to water	0.0	Tonnes per million EUR invested	92
Hazardous waste and radioactive waste ratio	0.3	Tonnes per million EUR invested	45
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	93
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	38.1	Percentage	92
Unadjusted gender pay gap	10.6	Percentage	37
Board gender diversity	35.3	Percentage	92
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	92
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	24.8	Percentage	90
Lack of a human rights policy	5.3	Percentage	92

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

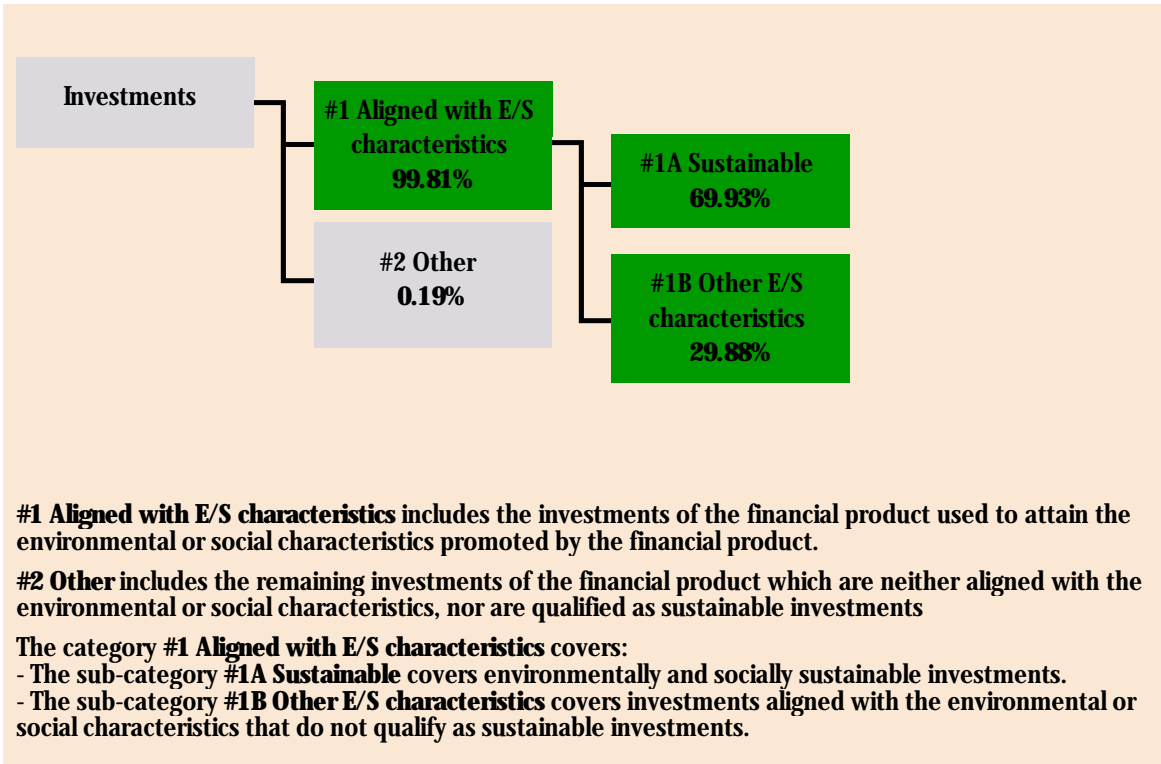

Please see the information below in this respect.

● **What was the asset allocation?**

99.81% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 69.93% in sustainable investments.

The remaining 0.19% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	12.18%
Industrials	Capital Goods	11.47%
Information Technology	Semiconductors & Semiconductor	9.60%
Health Care	Pharmaceuticals Biotechnology	9.17%
Health Care	Health Care Equipment & Servic	5.78%

Industrials	Transportation	0.35%
Real Estate	Real Estate Management & Devel	0.22%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 69.93% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 69.93% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.19% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. The Investment Manager also assessed the Sub-Investment Managers ESG ratings as part of the selection process.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Short Duration Bond Fund 3

Legal entity identifier:
549300INXDODUBEO6082

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.86% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund. The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes/ m\$USD revenue, being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

Sub-Fund commits to making a minimum allocation to sustainable investments of 15%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
65.86%

● **...and compared to previous periods?**

Level of Sustainable Investment
62.40%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above.

There is no quarterly average as the Sub-Fund reclassified during the reporting period. Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	4376.6	tCO2	45
Scope 2 GHG emissions	2462.3	tCO2	45

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 65.86% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 65.86% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.27% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo₂), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Multi Asset Defensive Fund

Legal entity identifier:
549300DKVQRAEEUK5Y14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

 No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.37% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 5%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M revenue) and and Carbon Footprint (scope 1 and 2 emissions tCo2/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint (tCo2/ \$ M AUM)
31/12/2019	n/a
30/06/2023	62
30/06/2024	62

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	202
30/06/2023	148
30/06/2024	148

Level of Sustainable Investment
22.40%

● **...and compared to previous periods?**

Date	Carbon Footprint (tCo2/ \$ M AUM)
31/12/2019	n/a
30/06/2023	62

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	202
30/06/2023	148

Level of Sustainable Investment
15.1%

The Sub-Funds WACI and Carbon Footprint is set out above, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	632.6	tCO2	12
Scope 2 GHG emissions	133.2	tCO2	12
Scope 3 GHG emissions	3587.9	tCO2	12
Total GHG emissions	4353.7	tCO2	12
Carbon footprint	447.8	tCO2 per M invested	12
GHG intensity of investee companies	998.7	tCO2	12
Exposure to companies active in the fossil fuel sector	11.8	Percentage	13
Share of non-renewable energy consumption and production	73.9	Percentage	8
Energy consumption intensity per high impact climate sector	12.0	Gwh per million EUR invested	5
Activities negatively affecting biodiversity-sensitive areas	3.4	Percentage	12
Emissions to water	0.0	Tonnes per million EUR invested	11
Hazardous waste and radioactive waste ratio	1.5	Tonnes per million EUR invested	3
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	13
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	41.4	Percentage	13
Unadjusted gender pay gap	17.3	Percentage	5
Board gender diversity	32.3	Percentage	13
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	13
GHG intensity of investee countries	371.5	tCO2	11
Investee countries subject to social violations (absolute)	4.5	Percentage	25
Investee countries subject to social violations (relative)	5.0	Percentage	25
Investments in companies without carbon emission reduction initiatives	34.4	Percentage	12
Lack of a human rights policy	9.7	Percentage	13
Average income inequality score	37.5	Ratio	11

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.66% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 22.37% in sustainable investments.

The remaining 0.34% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 22.37% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 22.37% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.34% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Multi Asset High Growth Fund

Legal entity identifier:
549300FC6DZB61B1L534

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.5% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	--

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M revenue) and Carbon Footprint (scope 1 and 2 emissions tCo2/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint (tCO2/ \$ m AUM)
31/12/2019	n/a
30/06/2023	76
30/06/2024	78

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	313
30/06/2023	183
30/06/2024	186

Level of Sustainable Investment
46.50%

● **...and compared to previous periods?**

Date	Carbon Footprint (tCO2/ \$ m AUM)
31/12/2019	n/a
30/06/2023	76

Date	WACI (tCO2/ \$ M Revenue)
31/12/2019	313
30/06/2023	183

Level of Sustainable Investment
39.9%

The Sub-Funds WACI and Carbon Footprint is set out above, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	26404.2	tCO2	33
Scope 2 GHG emissions	5798.3	tCO2	33
Scope 3 GHG emissions	146867.4	tCO2	33
Total GHG emissions	179068.4	tCO2	33
Carbon footprint	495.8	tCO2 per M invested	33
GHG intensity of investee companies	910.1	tCO2	33
Exposure to companies active in the fossil fuel sector	11.3	Percentage	34
Share of non-renewable energy consumption and production	76.2	Percentage	26
Energy consumption intensity per high impact climate sector	24.7	Gwh per million EUR invested	18
Activities negatively affecting biodiversity-sensitive areas	3.5	Percentage	30
Emissions to water	0.0	Tonnes per million EUR invested	33
Hazardous waste and radioactive waste ratio	6.3	Tonnes per million EUR invested	10
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	34
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	45.7	Percentage	33
Unadjusted gender pay gap	14.0	Percentage	11
Board gender diversity	30.2	Percentage	33
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	33
GHG intensity of investee countries	735.1	tCO2	5
Investee countries subject to social violations (absolute)	4.3	Percentage	16
Investee countries subject to social violations (relative)	6.7	Percentage	16
Investments in companies without carbon emission reduction initiatives	35.6	Percentage	31
Lack of a human rights policy	12.8	Percentage	33
Average income inequality score	40.8	Ratio	5

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.85% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 46.5% in sustainable investments.

The remaining 0.15% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 46.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 46.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.15% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M Revenue) and Carbon Footprint (scope 1 and 2 emissions/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

The Sub-Funds WACI and Carbon Footprint is set out above, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6674.8	tCO2	23
Scope 2 GHG emissions	1406.0	tCO2	23
Scope 3 GHG emissions	35148.8	tCO2	23
Total GHG emissions	43229.3	tCO2	23
Carbon footprint	481.0	tCO2 per M invested	23
GHG intensity of investee companies	975.0	tCO2	23
Exposure to companies active in the fossil fuel sector	12.9	Percentage	24
Share of non-renewable energy consumption and production	76.3	Percentage	18
Energy consumption intensity per high impact climate sector	19.5	Gwh per million EUR invested	12
Activities negatively affecting biodiversity-sensitive areas	3.8	Percentage	22
Emissions to water	0.0	Tonnes per million EUR invested	23
Hazardous waste and radioactive waste ratio	8.4	Tonnes per million EUR invested	6
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.4	Percentage	24
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	43.6	Percentage	24
Unadjusted gender pay gap	15.4	Percentage	9
Board gender diversity	31.1	Percentage	24
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	24
GHG intensity of investee countries	537.5	tCO2	8
Investee countries subject to social violations (absolute)	4.5	Percentage	22
Investee countries subject to social violations (relative)	5.0	Percentage	22
Investments in companies without carbon emission reduction initiatives	35.8	Percentage	22
Lack of a human rights policy	11.3	Percentage	24
Average income inequality score	39.3	Ratio	8

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

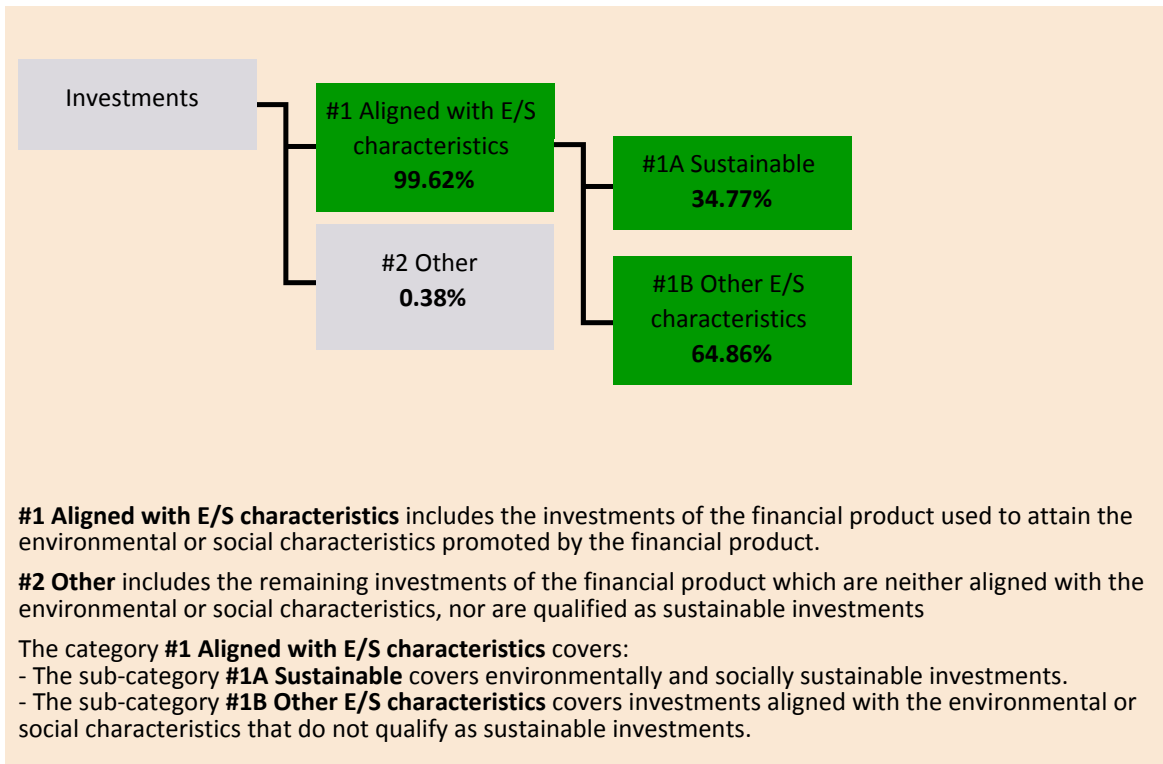

Please see the information below in this respect.

● **What was the asset allocation?**

99.62% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 34.77% in sustainable investments.

The remaining 0.38% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 34.77% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 34.77% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.38% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Multi Asset Growth Fund

Legal entity identifier:
5493001MO4IPX7PWS070

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.23% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI") of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	n/a
30/06/2023	78
30/06/2024	58

Date	WACI
31/12/2019	330
30/06/2023	206
30/06/2024	133

Level of Sustainable Investment
44.20%

● **...and compared to previous periods?**

Date	Carbon Footprint
31/12/2019	n/a
30/06/2023	78

Date	WACI
31/12/2019	330
30/06/2023	206

Level of Sustainable Investment
34.7%

The Sub-Funds WACI and Carbon Footprint is set out above, as at end of June 2023 and end of June 2024.

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 44.23% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 44.23% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.18% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Arrowstreet Global Equity Fund

Legal entity identifier:
549300TCUHIDV15HL197

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.45% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the Benchmark Index, as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Arrowstreet Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	68	94

Level of Sustainable Investment
65.45%

● *...and compared to previous periods?*

	Arrowstreet Global Equity Fund	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	82	117

Level of Sustainable Investment
60.90%

The Sub-Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	17832.8	tCO2	95
Scope 2 GHG emissions	2672.5	tCO2	95
Scope 3 GHG emissions	149116.0	tCO2	95
Total GHG emissions	169621.3	tCO2	95
Carbon footprint	654.6	tCO2 per M invested	95
GHG intensity of investee companies	786.1	tCO2	95
Exposure to companies active in the fossil fuel sector	12.0	Percentage	95
Share of non-renewable energy consumption and production	59.5	Percentage	76
Energy consumption intensity per high impact climate sector	12.3	GwH per million EUR invested	40
Activities negatively affecting biodiversity-sensitive areas	4.0	Percentage	94
Emissions to water	0.0	Tonnes per million EUR invested	95
Hazardous waste and radioactive waste ratio	1.8	Tonnes per million EUR invested	44
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.8	Percentage	95
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	35.4	Percentage	95
Unadjusted gender pay gap	14.4	Percentage	39
Board gender diversity	34.6	Percentage	95
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	95
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	28.2	Percentage	94
Lack of a human rights policy	6.8	Percentage	95
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

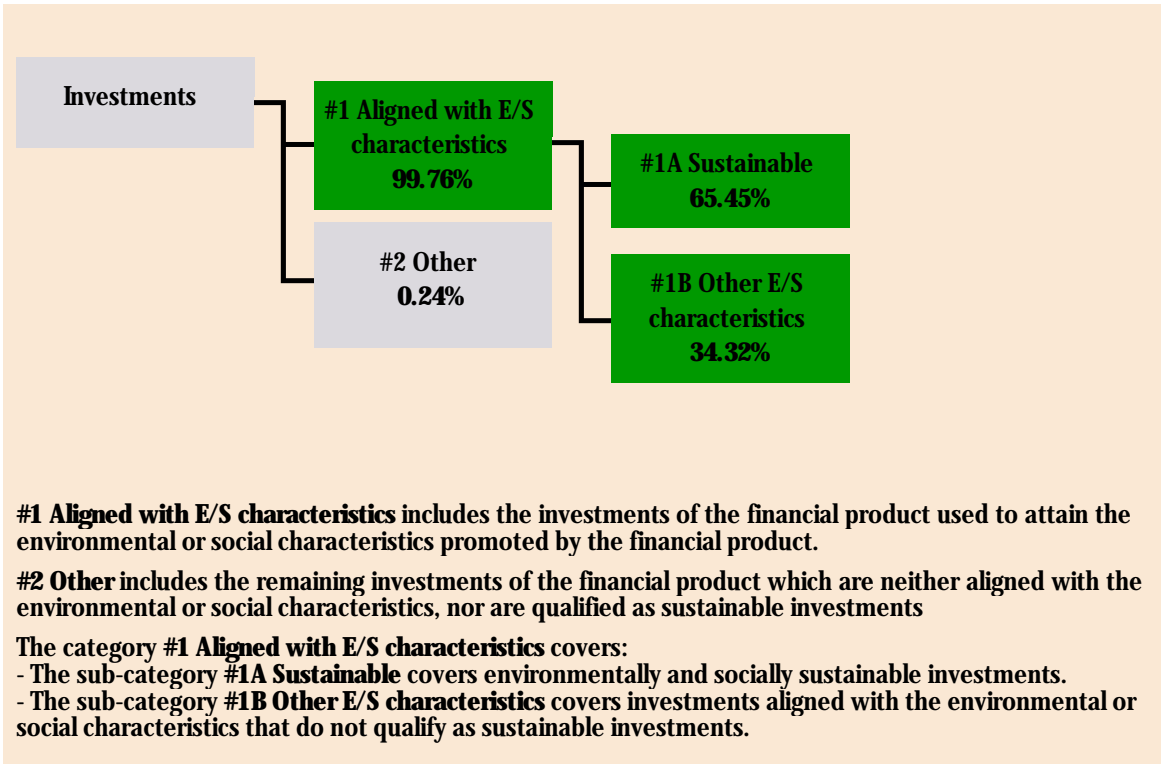

Please see the information below in this respect.

● **What was the asset allocation?**

99.76% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 65.45% in sustainable investments.

The remaining 0.24% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	11.71%
Information Technology	Technology Hardware & Equipmen	10.07%
Information Technology	Semiconductors & Semiconductor	9.50%

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 65.45% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 65.45% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.24% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental and social characteristics will be achieved through tracking the performance of the Solactive Sustainable Global Developed Equity EU Paris-Aligned Index ("Benchmark Index"). The Benchmark Index methodology incorporates the following environmental and social characteristics which are promoted by the Sub-Fund:

- a reduction in carbon emissions with a view to achieving net zero carbon emissions by 2050;
- The Benchmark Index is designed to enhance exposure to positive environmental, social and governance ("ESG") factors and stay compliant with EU Paris-Aligned benchmark regulatory requirements set out in the EU Climate Benchmarks Regulation and provide low carbon emission exposure with a view to achieving the long-term global warming objectives of the Paris Agreement. The Benchmark Index, based on the methodology and assessment of the index provider, also applies a negative screen to the overall constituents of the Investable Universe, to exclude companies with certain levels of exposure in the following:
 - Adult Entertainment
 - Alcohol
 - Controversial Weapons
 - Civilian Firearms
 - Fossil Fuels
 - Gambling
 - Tobacco Companies
 - Norm-based (UNGC and OECD Guidelines) - Companies with verified failure to respect established norms as well as severe or very severe controversies.
 - Environmental – Significant negative impact on Sustainable Development Goals such as: SDG 12 -

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life below Water, SDG 15 - Life on Land.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 35%.

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Sustainable Global Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

The Underlying Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.13%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the Solactive GBS Developed Large & Mid Cap Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
81.97%

● **...and compared to previous periods?**

Level of Sustainable Investment
81.42%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1797.3	tCO2	95
Scope 2 GHG emissions	1291.1	tCO2	95
Scope 3 GHG emissions	35959.9	tCO2	95
Total GHG emissions	39048.0	tCO2	95
Carbon footprint	119.9	tCO2 per M invested	95
GHG intensity of investee companies	409.9	tCO2	95
Exposure to companies active in the fossil fuel sector	0.2	Percentage	96
Share of non-renewable energy consumption and production	54.9	Percentage	87
Energy consumption intensity per high impact climate sector	7.3	GwH per million EUR invested	54
Activities negatively affecting biodiversity-sensitive areas	2.2	Percentage	95
Emissions to water	0.0	Tonnes per million EUR invested	95
Hazardous waste and radioactive waste ratio	0.2	Tonnes per million EUR invested	50
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	35.3	Percentage	95

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

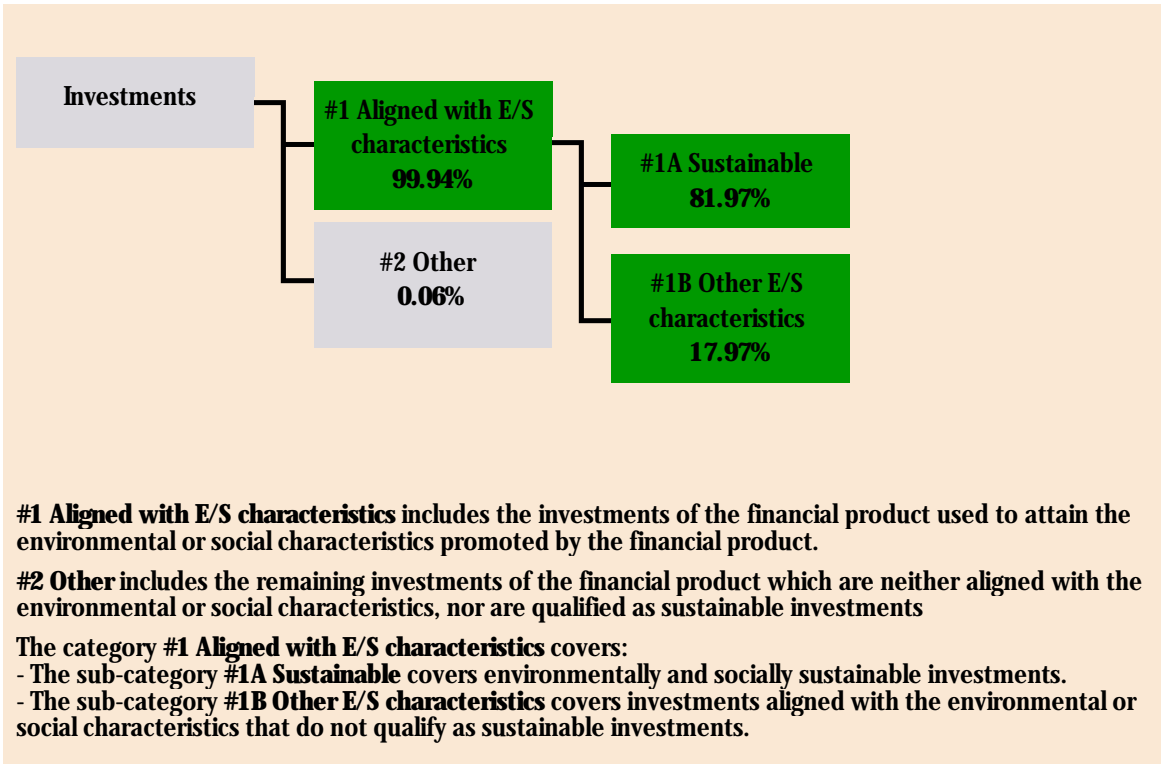

Please see the information below in this respect.

● **What was the asset allocation?**

99.94% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 81.97% in sustainable investments.

The remaining 0.06% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	14.48%
Information Technology	Software & Services	12.78%
Health Care	Pharmaceuticals Biotechnology	12.59%
Information Technology	Technology Hardware & Equipmen	8.05%
Real Estate	Equity Real Estate Investment	7.63%
Financials	Financial Services	7.36%
Communication Services	Media & Entertainment	6.60%

Consumer Discretionary	Automobiles & Components	0.61%
Utilities	Utilities	0.32%
Consumer Staples	Consumer Staples Distribution	0.10%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

 In fossil gas In nuclear energy

 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 81.97% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 81.97% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index of the Underlying Fund is designed to enhance exposure to positive ESG factors and stay compliant with EU Paris-Aligned benchmark regulatory requirements set out in the EU Climate Benchmarks Regulation and provide low carbon emission exposure with a view to achieving the longterm global warming objectives of the Paris Agreement. The Benchmark Index tends to overweight companies with higher ESG ratings and underweight companies with lower ratings and intends to have lower carbon emissions than a broad-based global equity index such as the Solactive GBS Developed Large & Mid Cap Index.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at www.solactive.com.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Underlying Fund and Broad Market Index (Solactive GBS Developed Large & Mid Cap Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	22.83%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Euro Corporate Bond Fund

Legal entity identifier:
549300MWIVDOI87MZP07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63.56% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to promote environmental and social characteristics by excluding investment in companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 25%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
63.56%

● ***...and compared to previous periods?***

Level of Sustainable Investment
60.2%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.28%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	69965.8	tCO2	81
Scope 2 GHG emissions	13202.3	tCO2	81
Scope 3 GHG emissions	528720.9	tCO2	81
Total GHG emissions	611888.9	tCO2	81
Carbon footprint	517.5	tCO2 per M invested	81
GHG intensity of investee companies	960.6	tCO2	81
Exposure to companies active in the fossil fuel sector	11.2	Percentage	92

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.85% of the Sub-Fund’s assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 63.56% in sustainable investments.

The remaining 0.15% of the Sub-Fund’s assets are in other investments (“#2 Other”), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 63.56% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 63.56% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.15% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards. The minus figure is due to unsettled transactions as at the time of reporting.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Passive Low Volatility Equity Feeder Fund

Legal entity identifier:
549300QHD1JXVXKDK359

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.99% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Low Volatility Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Underlying Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.17%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Underlying Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the Morningstar Developed Markets Large-Mid Cap Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found below.

Level of Sustainable Investment
71.99%

● ***...and compared to previous periods?***

Level of Sustainable Investment
74.93%

The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.20%. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1594.2	tCO2	93
Scope 2 GHG emissions	636.7	tCO2	93
Scope 3 GHG emissions	15211.4	tCO2	93
Total GHG emissions	17442.3	tCO2	93
Carbon footprint	189.6	tCO2 per M invested	93
GHG intensity of investee companies	542.3	tCO2	93
Exposure to companies active in the fossil fuel sector	9.8	Percentage	94
Share of non-renewable energy consumption and production	69.6	Percentage	82
Energy consumption intensity per high impact climate sector	5.6	GwH per million EUR invested	47
Activities negatively affecting biodiversity-sensitive areas	6.8	Percentage	93
Emissions to water	0.0	Tonnes per million EUR invested	93
Hazardous waste and radioactive waste ratio	0.2	Tonnes per million EUR invested	46
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.4	Percentage	94
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	39.4	Percentage	93
Unadjusted gender pay gap	12.3	Percentage	34
Board gender diversity	34.2	Percentage	93
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	93

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 71.99% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 71.99% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.07% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the Morningstar Developed Markets Large-Mid Cap Index or "Parent Index", to exclude those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at: <https://indexes.morningstar.com>.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Underlying Fund and Broad Market Index (Morningstar Developed Markets Large-Mid Cap Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.51%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Mercer Passive Global High Yield Bond Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective : __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.81% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the J.P. Morgan ESG Global High Yield BB-B Rated Liquid Corporate Index, (the "Benchmark Index"). The Benchmark Index applies an ESG scoring and screening methodology to tilt exposure towards issuers ranked higher on ESG criteria and green bonds, which raise finance for climate and environmental projects that are sustainable and socially responsible (as categorised by the Climate Bonds Initiative, a not-for-profit organisation which provides a certification program for bonds that contribute to addressing climate change). In addition, the Benchmark Index will underweight or exclude issuers that rank lower, including issuers with direct revenue from thermal coal, tobacco or weapons and issuers that are not in compliance with the UN Global Compact ("UNGC") principles.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 5%. The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Sub-Fund invested in issuers that comply with the index providers requirements
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.23%.

The Sub-Fund had no exposure to any issuers that did not comply with the index providers methodology. The Investment Manager assessed the Benchmark Index versus the J.P. Morgan Global Developed Market High Yield BB-B Rated Liquid Corporate Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
31.81%

● **...and compared to previous periods?**

Level of Sustainable Investment
30.40%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	135349.0	tCO2	65
Scope 2 GHG emissions	27336.7	tCO2	65
Scope 3 GHG emissions	935415.7	tCO2	65
Total GHG emissions	1098101.4	tCO2	65
Carbon footprint	870.2	tCO2 per M invested	65
GHG intensity of investee companies	1321.6	tCO2	65
Exposure to companies active in the fossil fuel sector	11.6	Percentage	73
Share of non-renewable energy consumption and production	77.7	Percentage	29
Energy consumption intensity per high impact climate sector	15.8	GwH per million EUR invested	23
Activities negatively affecting biodiversity-sensitive areas	4.3	Percentage	70
Emissions to water	0.0	Tonnes per million EUR invested	65
Hazardous waste and radioactive waste ratio	3.3	Tonnes per million EUR invested	23
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	74
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	48.7	Percentage	71
Unadjusted gender pay gap	12.8	Percentage	22
Board gender diversity	29.8	Percentage	71
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	71
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	46.2	Percentage	69
Lack of a human rights policy	15.2	Percentage	71
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

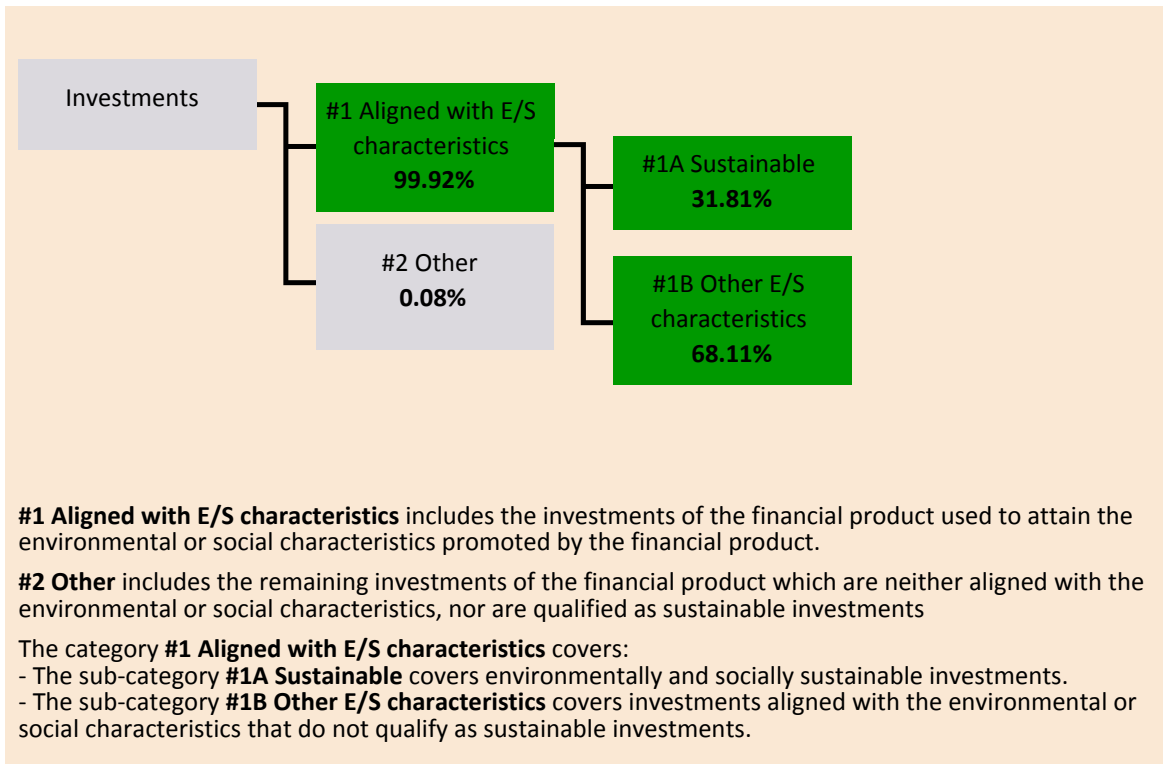

Please see the information below in this respect.

● **What was the asset allocation?**

99.92% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 31.81% in sustainable investments.

The remaining 0.08% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 31.81% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 31.81% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.08% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index tracks the performance of corporate fixed and floating-rate debt instruments across Developed Market high yield issuers. The Benchmark Index applies an ESG scoring and screening methodology to tilt exposure towards issuers ranked higher on ESG criteria and green bonds, which raise finance for climate and environmental projects that are sustainable and socially responsible (as categorised by the Climate Bonds Initiative, a not for profit organisation which provides a certification program for bonds that contribute to addressing climate change). In addition the Benchmark Index will underweight or exclude issuers that rank lower, including issuers with direct revenue from thermal coal, tobacco or weapons and issuers that are not in compliance with the UN Global Compact principles

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Sub-Fund and Broad Market Index (J.P. Morgan Global Developed Market High Yield BB-B Rated Liquid Corporate Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.57%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Global Small Cap UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Underlying Fund makes a minimum commitment to sustainable investments of 10%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied to the Underlying Fund
- assessing if the Underlying Fund met the minimum commitment to sustainable investments

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Throughout the reporting period, the Underlying Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Underlying Fund met its minimum commitment to sustainable investments throughout the year. The level of sustainable investments in the portfolio can be found in the table below. While the Underlying Fund did not rely exclusively on the Benchmark Index for attainment of its overall promoted environmental and social characteristics, the Underlying Fund did invest in its constituents to track the performance of the Benchmark Index, subject to application of certain additional exclusions above outside of tracking the Benchmark Index. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.42%. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found below.

Level of Sustainable Investment
46.57%

● ***...and compared to previous periods?***

Level of Sustainable Investment
40.70%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.41%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1025.5	tCO2	91
Scope 2 GHG emissions	279.2	tCO2	91
Scope 3 GHG emissions	8138.2	tCO2	91
Total GHG emissions	9442.4	tCO2	91
Carbon footprint	618.3	tCO2 per M invested	91
GHG intensity of investee companies	915.4	tCO2	91
Exposure to companies active in the fossil fuel sector	6.8	Percentage	94
Share of non-renewable energy consumption and production	114.4	Percentage	63
Energy consumption intensity per high impact climate sector	81.1	GwH per million EUR invested	41
Activities negatively affecting biodiversity-sensitive areas	2.8	Percentage	92
Emissions to water	0.0	Tonnes per million EUR invested	92
Hazardous waste and radioactive waste ratio	15.5	Tonnes per million EUR invested	34
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	94
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	60.5	Percentage	92
Unadjusted gender pay gap	15.8	Percentage	24
Board gender diversity	30.4	Percentage	92
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	92
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	44.4	Percentage	89
Lack of a human rights policy	29.2	Percentage	92

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

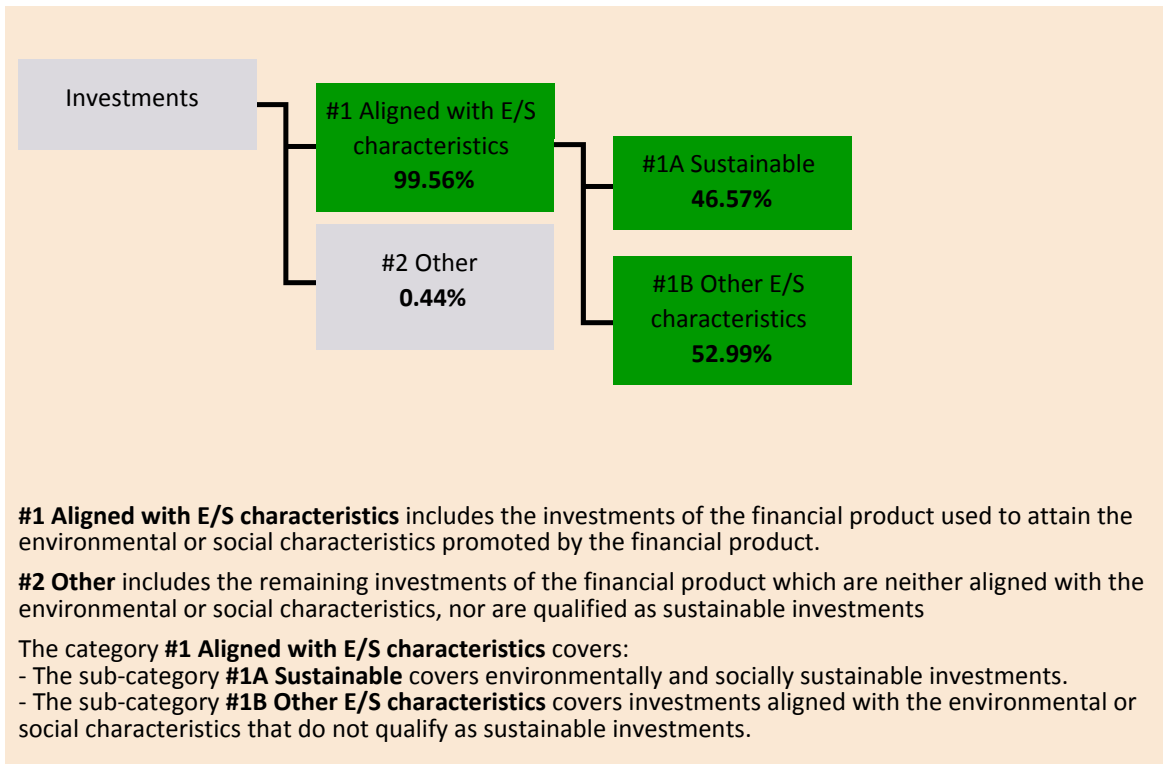

Please see the information below in this respect.

● **What was the asset allocation?**

99.56% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 46.57% in sustainable investments.

The remaining 0.44% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	12.46%
Materials	Materials	6.99%
Financials	Financial Services	5.90%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 46.57% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 46.57% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.44% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by the Underlying Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds. The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Underlying Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy of the Underlying Fund through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Underlying Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Underlying Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Manager of the Underlying Fund.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Acadian Sustainable China A Equity

Legal entity identifier:
5493002CH6YC0TDHCN17

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that the Carbon Intensity of the Sub-Fund will be no more than 90% of the Carbon Intensity of the MSCI China A Onshore Index (USD) – Net Returns ("the Index") at 31 December 2020 (the "Base Date").

Certain companies in the energy sector are excluded as follows:

- a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- b) in the conventional oil and gas industry, companies that have: (i) more than 60% of their fossil fuel reserves in oil; and (ii) more than 10% of their revenue from conventional oil and gas extraction; and (iii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons. The Sub-Fund will also avoid investing in companies that violate the UN Global Compact ("UNGC") principles.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the carbon intensity target relative to the Index as at the Base Date

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- assessing the extent to which the screening criteria described above were applied
- assessing the Sub-Fund's progress towards its net zero carbon emissions target

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index as of the base date is shown below.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Sustainable China A Equity	MSCI China A Onshore Index (USD) – Net Returns
WACI (scope 1 and 2 emissions tCO2 per M Revenue)	140	215

● **...and compared to previous periods?**

	Acadian Sustainable China A Equity	MSCI China A Onshore Index (USD) – Net Returns
WACI (scope 1 and 2 emissions tCO2 per M Revenue)	90	215

The WACI of the Sub-Fund as at June 2023 and the WACI of the Benchmark as of the Base Date is shown above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	2389.4	tCO2	71
Scope 2 GHG emissions	1111.6	tCO2	71
Scope 3 GHG emissions	26077.7	tCO2	71
Total GHG emissions	29578.7	tCO2	71
Carbon footprint	984.1	tCO2 per M invested	71
GHG intensity of investee companies	1194.7	tCO2	71
Exposure to companies active in the fossil fuel sector	2.8	Percentage	83
Share of non-renewable energy consumption and production	93.3	Percentage	50
Energy consumption intensity per high impact climate sector	6.3	GwH per million EUR invested	26
Activities negatively affecting biodiversity-sensitive areas	0.4	Percentage	70
Emissions to water	0.0	Tonnes per million EUR invested	70
Hazardous waste and radioactive waste ratio	0.7	Tonnes per million EUR invested	47
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	3.6	Percentage	74

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

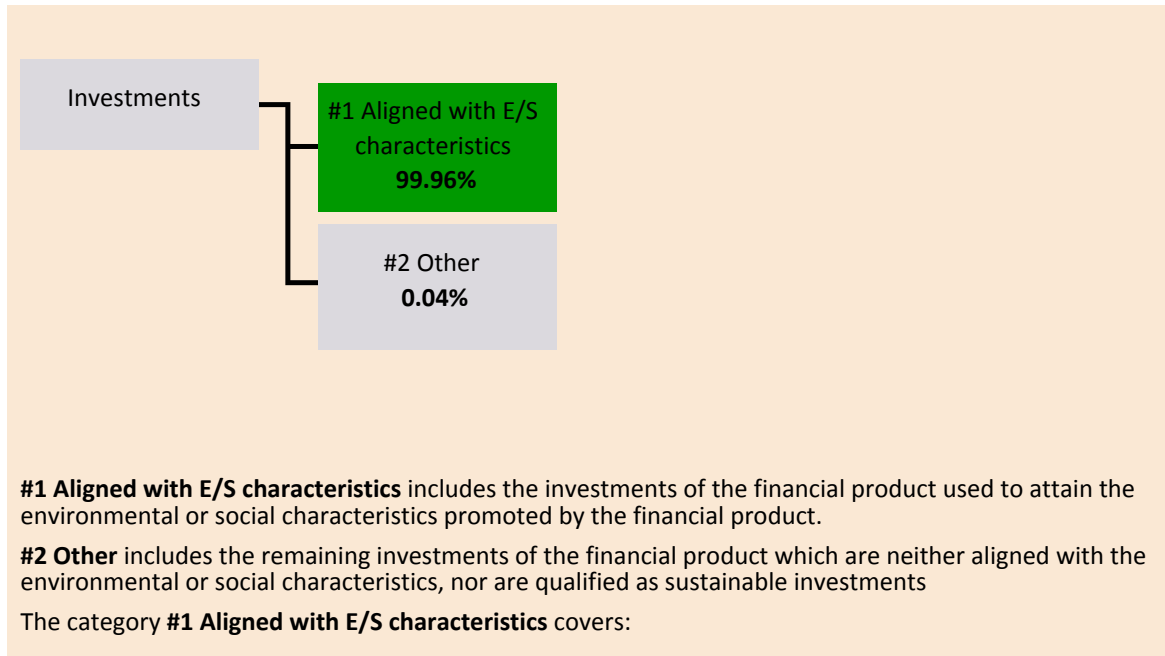

Please see the information below in this respect.

● **What was the asset allocation?**

99.96% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested XX% in sustainable investments.

The remaining 0.04% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	18.65%
Industrials	Capital Goods	13.69%
Information Technology	Technology Hardware & Equipmen	13.18%
Consumer Discretionary	Consumer Durables & Apparel	10.73%
Materials	Materials	6.65%
Financials	Insurance	6.58%
Consumer Staples	Food Beverage & Tobacco	5.37%
Communication Services	Media & Entertainment	4.32%
Consumer Discretionary	Automobiles & Components	3.86%
Information Technology	Software & Services	3.41%
Information Technology	Semiconductors & Semiconductor	3.28%
Energy	Energy	2.96%
Industrials	Transportation	2.52%
Health Care	Pharmaceuticals Biotechnology	1.93%
Health Care	Health Care Equipment & Servic	0.91%
Real Estate	Real Estate Management & Devel	0.83%
Consumer Discretionary	Consumer Services	0.60%
Financials	Financial Services	0.02%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.04% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action —Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture —Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Acadian Sustainable European Equity

Legal entity identifier:
549300KMZ7HC6017G403

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that the Carbon Intensity of the Sub-Fund will be no more than 80% of the Carbon Intensity of the MSCI Europe Index (EUR) – Net Returns ("the Index") at 31 December 2020 (the "Base Date"). "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD). "Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. This calculation is based on the latest available data i.e. the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

Certain companies in the energy sector are excluded as follows:

- (a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- (b) in the conventional oil and gas industry, companies that have: (i) more than 60% of their fossil fuel reserves in oil; and (ii) more than 10% of their revenue from conventional oil and gas extraction; and (iii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- (c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

When considering if a company is "worst in class" Carbon Emission scores based on the Sub-Investment

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Manager's rating of each company are used. The rating is provided by the Sub-Investment Manager based on analysis of its own data and that of third parties. The analysis will consider a company's carbon emissions performance as well as forward looking measures such as emission reduction targets and actions taken to meet these targets.

Companies identified in (a)-(c) that are considered to be making efforts towards a climate transition using ratings from providers such as the Transition Pathway Initiative are allowed into the investment universe.

Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons. The Sub-Fund will also avoid investing in companies that violate the UN Global Compact ("UNGC") principles.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains Carbon Intensity relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Please see below the carbon intensity of the Sub-fund as at 30 June 2024 and the Index as at the Base Date.

	Acadian Sustainable European Equity	MSCI Europe
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	53	100

● **...and compared to previous periods?**

	Acadian Sustainable European Equity	MSCI Europe
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	58	101

Please see above the carbon intensity of the Sub-fund as at 30 June 2023 and the Index as at the Base Date.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	8724.1	tCO2	91
Scope 2 GHG emissions	1478.8	tCO2	91
Scope 3 GHG emissions	113478.6	tCO2	91
Total GHG emissions	123680.8	tCO2	91
Carbon footprint	684.6	tCO2 per M invested	91
GHG intensity of investee companies	759.3	tCO2	91
Exposure to companies active in the fossil fuel sector	12.5	Percentage	92
Share of non-renewable energy consumption and production	57.0	Percentage	80
Energy consumption intensity per high impact climate sector	4.2	GwH per million EUR invested	57
Activities negatively affecting biodiversity-sensitive areas	4.4	Percentage	91
Emissions to water	0.0	Tonnes per million EUR invested	91
Hazardous waste and radioactive waste ratio	0.9	Tonnes per million EUR invested	66
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	92
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	15.0	Percentage	91
Unadjusted gender pay gap	14.5	Percentage	44
Board gender diversity	41.0	Percentage	91
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	91
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	21.8	Percentage	90
Lack of a human rights policy	2.8	Percentage	91
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

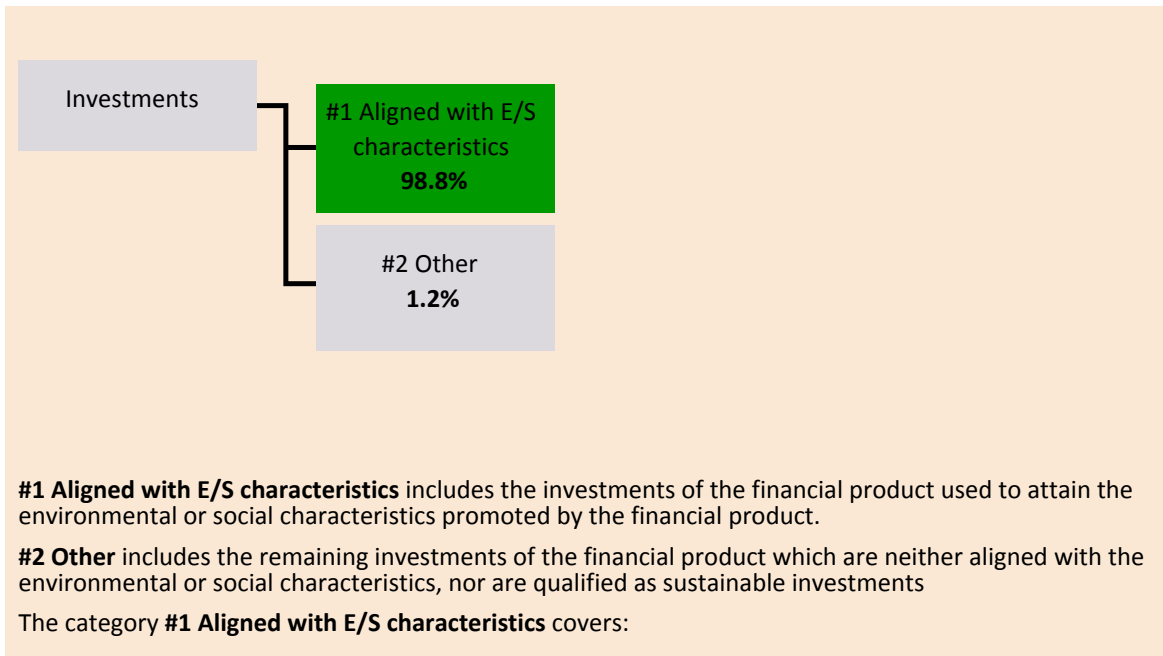

Please see the information below in this respect.

● **What was the asset allocation?**

98.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund.

The remaining 1.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	14.24%
Health Care	Pharmaceuticals Biotechnology	13.73%
Financials	Banks	9.25%

--	--

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that the Carbon Intensity of the Sub-Fund will be no more than 80% of the Carbon Intensity of the MSCI World Index (EUR) – Net Returns ("the Index") at 31 December 2020 (the "Base Date").

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. This calculation is based on the latest available data i.e. the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

Certain companies in the energy sector are excluded as follows:

- a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- b) in the conventional oil and gas industry, companies that have: (i) more than 60% of their fossil fuel reserves in oil; and (ii) more than 10% of their revenue from conventional oil and gas extraction; and (iii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

When considering if a company is "worst in class" Carbon Emission scores based on the Sub Investment Manager's rating of each company are used. The rating is provided by the Sub-Investment Manager based on analysis of its own data and that of third parties. The analysis will consider a company's carbon emissions performance as well as forward looking measures such as emission reduction targets and actions taken to meet these targets.

Companies identified in (a)-(c) that are considered to be making efforts towards a climate transition using ratings from providers such as the Transition Pathway Initiative are allowed into the investment universe. Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons. The Sub-Fund will also avoid investing in companies that violate the UN Global Compact ("UNGC") principles.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its Carbon Intensity target relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Please see below the carbon intensity of the Sub-fund as at 30 June 2024 and the Index as at the Base Date.

	Acadian Sustainable Global Managed Volatility Equity	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	73	139

● **...and compared to previous periods?**

	Acadian Sustainable Global Managed Volatility Equity	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	91	139

Please see above the carbon intensity of the Sub-fund as at 30 June 2023 and the Index as at the Base Date.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	27250.3	tCO2	96
Scope 2 GHG emissions	11214.5	tCO2	96
Scope 3 GHG emissions	291122.7	tCO2	96
Total GHG emissions	329587.5	tCO2	96
Carbon footprint	307.9	tCO2 per M invested	96
GHG intensity of investee companies	490.3	tCO2	96
Exposure to companies active in the fossil fuel sector	9.4	Percentage	98
Share of non-renewable energy consumption and production	69.1	Percentage	78
Energy consumption intensity per high impact climate sector	11.9	GwH per million EUR invested	52
Activities negatively affecting biodiversity-sensitive areas	8.6	Percentage	96
Emissions to water	0.0	Tonnes per million EUR invested	96
Hazardous waste and radioactive waste ratio	0.3	Tonnes per million EUR invested	57
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.5	Percentage	96
Unadjusted gender pay gap	9.3	Percentage	37
Board gender diversity	34.4	Percentage	96
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	96
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	25.4	Percentage	96
Lack of a human rights policy	11.2	Percentage	96
Average income inequality score		Ratio	0

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

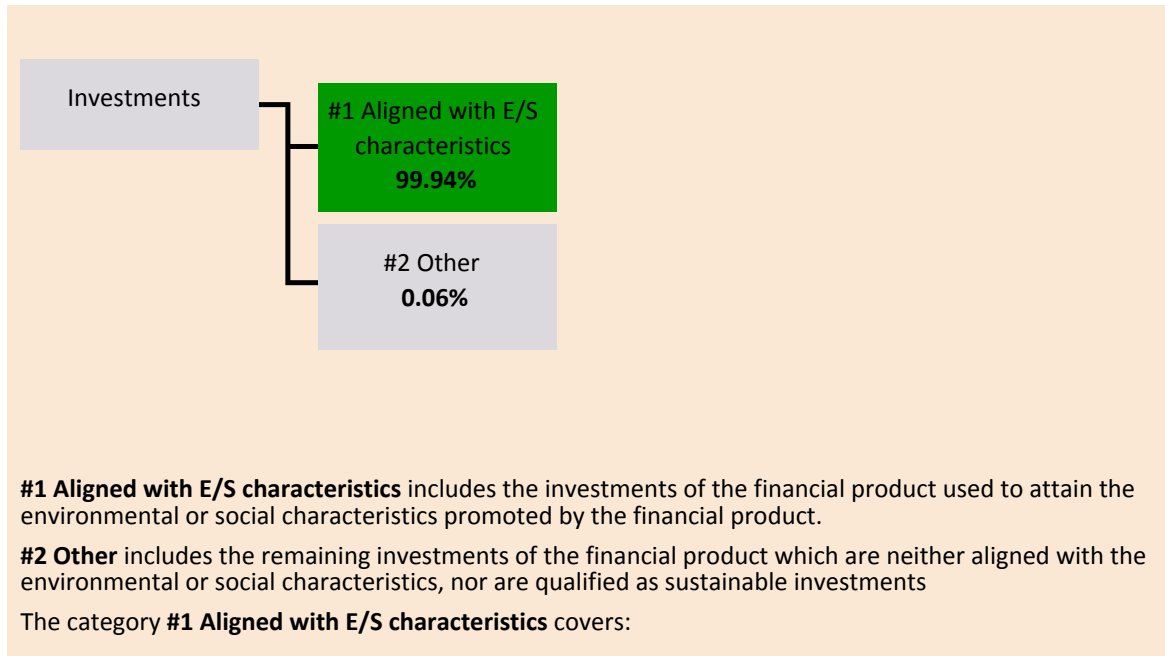

Please see the information below in this respect.

● **What was the asset allocation?**

99.94% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund.

The remaining 0.06% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	10.80%
Information Technology	Technology Hardware & Equipmen	10.43%
Consumer Staples	Food Beverage & Tobacco	9.08%
Consumer Staples	Household & Personal Products	9.00%

Consumer Discretionary	Consumer Durables & Apparel	0.07%
Real Estate	Real Estate Management & Devel	0.07%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action —Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture —Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Acadian Sustainable Global Managed Volatility Equity II

Legal entity identifier:
54930057KQ8DRC8JVB46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies that own fossil fuel reserves. This is being monitored by screening out companies flagged as having evidence of owning fossil fuel reserves in MSCI's Carbon Metrics data feed as well as through the Sub-Investment Manager's own research on companies that are not covered by MSCI. Additionally, issuers with large carbon emissions, measured by the Carbon Underground 200 index, will be excluded. The Carbon Underground 200 index identifies the top 100 public coal companies globally and the top 100 public oil and gas companies globally, ranked by the potential carbon emissions content of their proven reserves.

The Sub-Fund portfolio will also be managed with the aim that:

- a) The weighted average Carbon Emissions of the Fund will be at least 25% lower than the weighted average Carbon Emissions of the Index.
- b) The Carbon Intensity of the Sub-Fund will be no more than 80% of the Carbon Intensity of the Index at the 31 December 2020 (the "Base Date"). This calculation is based on the latest available data i.e. the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Certain companies in the energy sector are excluded as follows:

- a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- b) in the conventional oil and gas industry, companies that have: (i) more than 10% of their revenue from conventional oil and gas extraction; and (ii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

When considering if a company is "worst in class" Carbon Emission scores based on the Sub Investment Manager's rating of each company are used. The rating is provided by the Sub Investment Manager based on analysis of its own data and that of third parties. The analysis will consider a company's carbon emissions performance as well as forward looking measures such as emission reduction targets and actions taken to meet these targets. Companies identified in (a)-(c) that are considered to be making efforts towards a climate transition using ratings from providers such as the Transition Pathway Initiative are allowed into the investment universe.

Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems).

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions target relative to the Index.
- The Sub-Fund maintains its Carbon Intensity target relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Please see below the carbon emissions of the Sub-Fund and Index as at 30 June 2024 and carbon intensity of the Sub-fund as at 30 June 2024 and the Index as at the Base Date.

Weighted Average Carbon Emissions of Sub-Fund in metric tonnes of Co2	Weighted Average Carbon Emissions of Index in metric tonnes of Co2
1,800,126	5,365,989

	Acadian Sustainable Global Managed Volatility Equity II	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	64	139

...and compared to previous periods?

Weighted Average Carbon Emissions of Sub-Fund in metric tonnes of Co2	Weighted Average Carbon Emissions of Index in metric tonnes of Co2
1,213,988	5,323,678

	Acadian Sustainable Global Managed Volatility Equity II	MSCI World
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	58	139

Please see above the carbon emissions of the Sub-Fund and Index as at 30 June 2023 and carbon intensity of the Sub-fund as at 30 June 2023 and the Index as at the Base Date.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	599.4	tCO2	90
Scope 2 GHG emissions	335.4	tCO2	90
Scope 3 GHG emissions	8466.7	tCO2	90

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

 In fossil gas In nuclear energy

 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Mercer Passive Fundamental Indexation Global Equity Feeder Fund

Legal entity identifier:

---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Fundamental Index Global Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Underlying Fund invests in the component securities of the Benchmark Index which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Underlying Fund makes a minimum commitment to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Underlying Fund was invested in line with the MSCI World Diversified Multiple 3-Factor Select Index (the "Benchmark Index"), which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.20%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Underlying Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?" The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found below.

Level of Sustainable Investment
67.78%

● ***...and compared to previous periods?***

Level of Sustainable Investment
66.20%

The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period. The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.13%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1276.2	tCO2	96
Scope 2 GHG emissions	284.7	tCO2	96
Scope 3 GHG emissions	12752.6	tCO2	96
Total GHG emissions	14313.5	tCO2	96
Carbon footprint	550.0	tCO2 per M invested	96
GHG intensity of investee companies	849.9	tCO2	96
Exposure to companies active in the fossil fuel sector	10.8	Percentage	96
Share of non-renewable energy consumption and production	62.4	Percentage	85
Energy consumption intensity per high impact climate sector	14.9	GwH per million EUR invested	50
Activities negatively affecting biodiversity-sensitive areas	3.2	Percentage	96
Emissions to water	0.0	Tonnes per million EUR invested	96
Hazardous waste and radioactive waste ratio	0.2	Tonnes per million EUR invested	64
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	37.2	Percentage	96
Unadjusted gender pay gap	15.1	Percentage	36
Board gender diversity	34.3	Percentage	96
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	96
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	25.7	Percentage	96
Lack of a human rights policy	8.1	Percentage	96
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

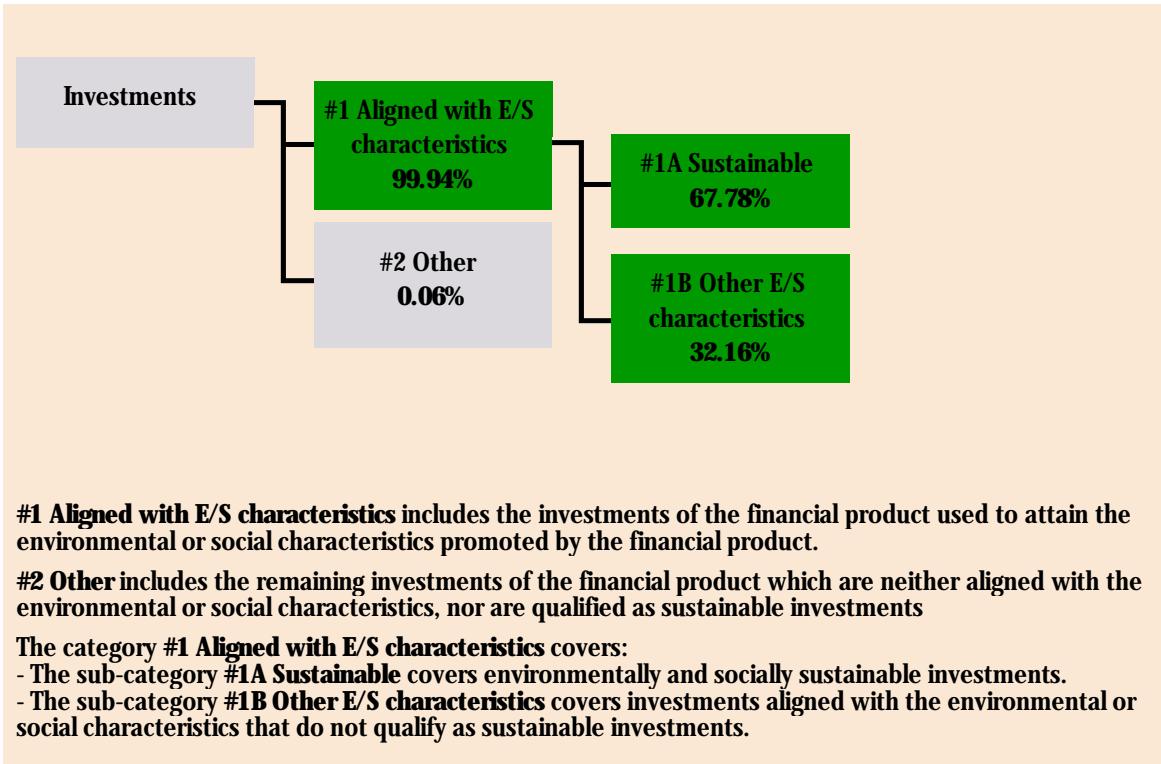

Please see the information below in this respect.

● **What was the asset allocation?**

99.94% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 67.78% in sustainable investments.

The remaining 0.06% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 67.78% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 67.78% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI World Index or "Parent Index", to exclude at each rebalancing date those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at <https://www.msci.com/index-methodology>.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Underlying Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.54%

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.02 % of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to mitigate the impact of climate change through decarbonisation on a relative basis. The Sub-Fund will seek to reduce carbon emissions with a view to achieving a portfolio with net zero carbon emissions by 2050 and with a view to achieving, by 2030, at least a 45% reduction in the carbon emissions of its portfolio relative to the overall carbon emissions of the Index as at the end of 2019. The Investment Manager (or its delegate) manages the assets such that the weighted average carbon intensity ("WACI") of the Sub-Fund is 20% lower than the WACI of the FTSE Global Core Infrastructure 50/50 Net Tax TR Index (USD), unhedged (the "Index"), as measured over a rolling three-year period.

The Sub-Fund will avoid investing in companies that generate more than 1% of their revenue from (i) arctic drilling, or (ii) oil tar sand mining.

The Sub-Fund's social characteristics are to exclude companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Sustainable Listed Infrastructure Fund UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

How did the sustainability indicators perform?

The Underlying Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Screening has been applied during the reference period to the Underlying Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Underlying Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Underlying Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Underlying fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Sustainable Listed Infrastructure Fund	FTSE Global Core Infrastructure 50/50 Index
WACI (scope 1 and 2 emissions tCO2 per M revenue)	591	977

Level of Sustainable Investment
--

64.02%

...and compared to previous periods?

Level of Sustainable Investment
--

63.87%

	Sustainable Listed Infrastructure Fund	FTSE Global Core Infrastructure 50/50 Index
WACI (scope 1 and 2 emissions tCO2 per M revenue)	679	1121

The Underlying Funds WACI as at June 2023, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2023 can be found in the table above. There is no quarterly average as the Sub-Fund reclassified during the reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team. The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 2 GHG emissions	55.0	tCO2	51
Scope 3 GHG emissions	656.6	tCO2	51
Total GHG emissions	1295.4	tCO2	51
Carbon footprint	302.1	tCO2 per M invested	51
GHG intensity of investee companies	883.5	tCO2	51
Exposure to companies active in the fossil fuel sector	51.7	Percentage	51
Share of non-renewable energy consumption and production	75.7	Percentage	46
Energy consumption intensity per high impact climate sector	6.0	GwH per million EUR invested	46
Activities negatively affecting biodiversity-sensitive areas	6.2	Percentage	43
Emissions to water	0.0	Tonnes per million EUR invested	51
Hazardous waste and radioactive waste ratio	0.3	Tonnes per million EUR invested	34
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	51
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.3	Percentage	51
Unadjusted gender pay gap	1.2	Percentage	22
Board gender diversity	39.5	Percentage	51
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	51
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)	0.0	Percentage	0
Investee countries subject to social violations (relative)	0.0	Percentage	0
Investments in companies without carbon emission reduction initiatives	38.8	Percentage	43
Lack of a human rights policy	8.6	Percentage	51
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

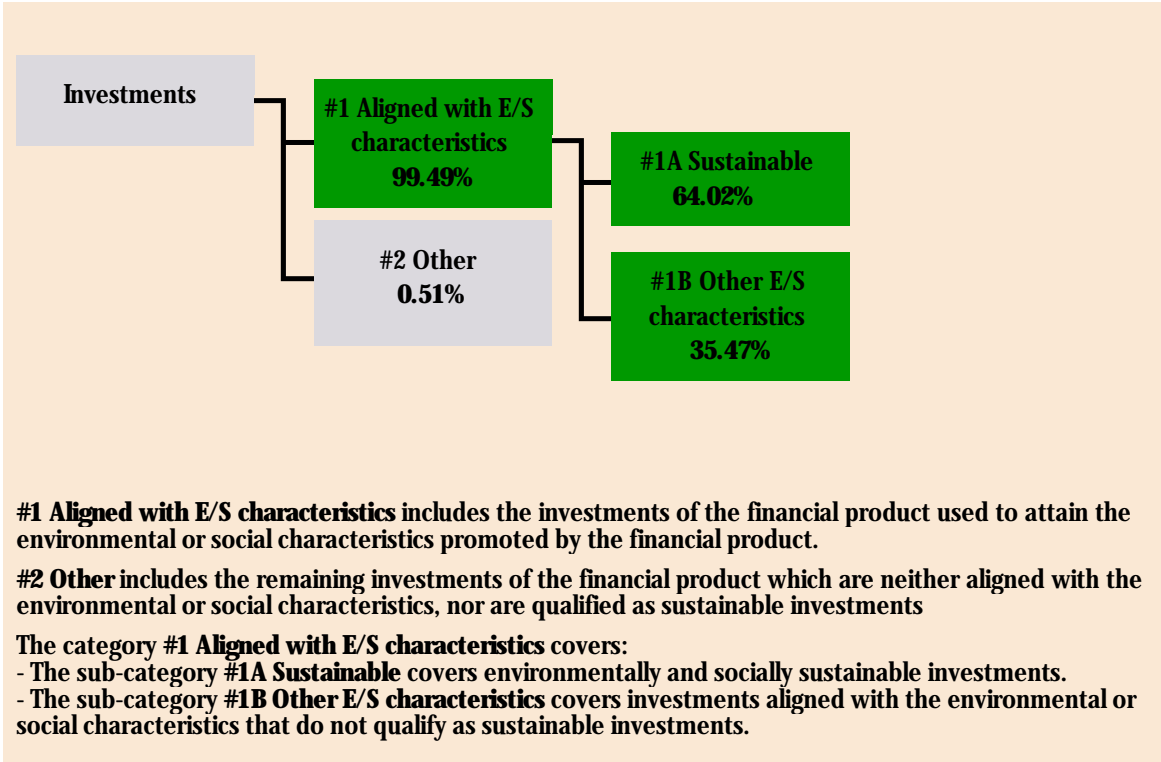

Please see the information below in this respect.

● **What was the asset allocation?**

99.49% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 64.02% in sustainable investments.

The remaining 0.51% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Utilities	Utilities	61.62%
Industrials	Transportation	20.79%
Real Estate	Equity Real Estate Investment	5.17%
Industrials	Capital Goods	3.58%
Industrials	Commercial & Professional Serv	2.19%
Communication Services	Media & Entertainment	1.85%
Communication Services	Telecommunication Services	1.23%
Information Technology	Technology Hardware & Equipmen	0.32%
Information Technology	Semiconductors & Semiconductor	0.27%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 64.02% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 64.02% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.51% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Underlying Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by the Underlying Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Underlying Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Underlying Fund's binding commitments and monitored the Underlying Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Acadian European Small Cap Equity

Legal entity identifier:
254900GRFH07YIHNG930

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that the Carbon Intensity of the Sub-Fund will be no more than 80% of the Carbon Intensity of the MSCI Europe Small Cap Index (EUR) – Net Return ("the Index") at 31 December 2020 (the "Base Date"). "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD). "Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

Certain companies in the energy sector are excluded as follows:

- (a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- (b) in the conventional oil and gas industry, companies that have: (i) more than 60% of their fossil fuel reserves in oil; and (ii) more than 10% of their revenue from conventional oil and gas extraction; and (iii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- (c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

When considering if a company is "worst in class" Carbon Emission scores based on the Sub Investment Manager's rating of each company are used. The rating is provided by the Sub Investment Manager based on analysis of its own data and that of third parties. The analysis will consider a company's carbon emissions performance as well as forward looking measures such as emission reduction targets and actions taken to

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

meet these targets. Companies identified in (a)-(c) that are considered to be making efforts towards a climate transition using ratings from providers such as the Transition Pathway Initiative are allowed into the investment universe.

Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons. The Sub-Fund will also avoid investing in companies that violate the UNGC principles.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains Carbon Intensity relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

Please see below the carbon intensity of the Sub-fund as at 30 June 2024 and the Index as at the Base Date.

	Acadian European Small Cap Equity	MSCI Europe
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	81	116

● **...and compared to previous periods?**

Not Applicable. This is the first reporting period for this Sub-Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 2 GHG emissions	391.2	tCO2	91
Scope 3 GHG emissions	20360.1	tCO2	91
Total GHG emissions	23246.3	tCO2	91
Carbon footprint	634.2	tCO2 per M invested	91
GHG intensity of investee companies	563.1	tCO2	91
Exposure to companies active in the fossil fuel sector	4.1	Percentage	93
Share of non-renewable energy consumption and production	74.6	Percentage	88
Energy consumption intensity per high impact climate sector	7.7	GwH per million EUR invested	53
Activities negatively affecting biodiversity-sensitive areas	4.6	Percentage	89
Emissions to water	0.0	Tonnes per million EUR invested	91
Hazardous waste and radioactive waste ratio	1.6	Tonnes per million EUR invested	89
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	93
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	3.2	Percentage	92
Unadjusted gender pay gap	14.2	Percentage	70
Board gender diversity	38.2	Percentage	92
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	92
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	46.7	Percentage	91
Lack of a human rights policy	9.1	Percentage	92
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

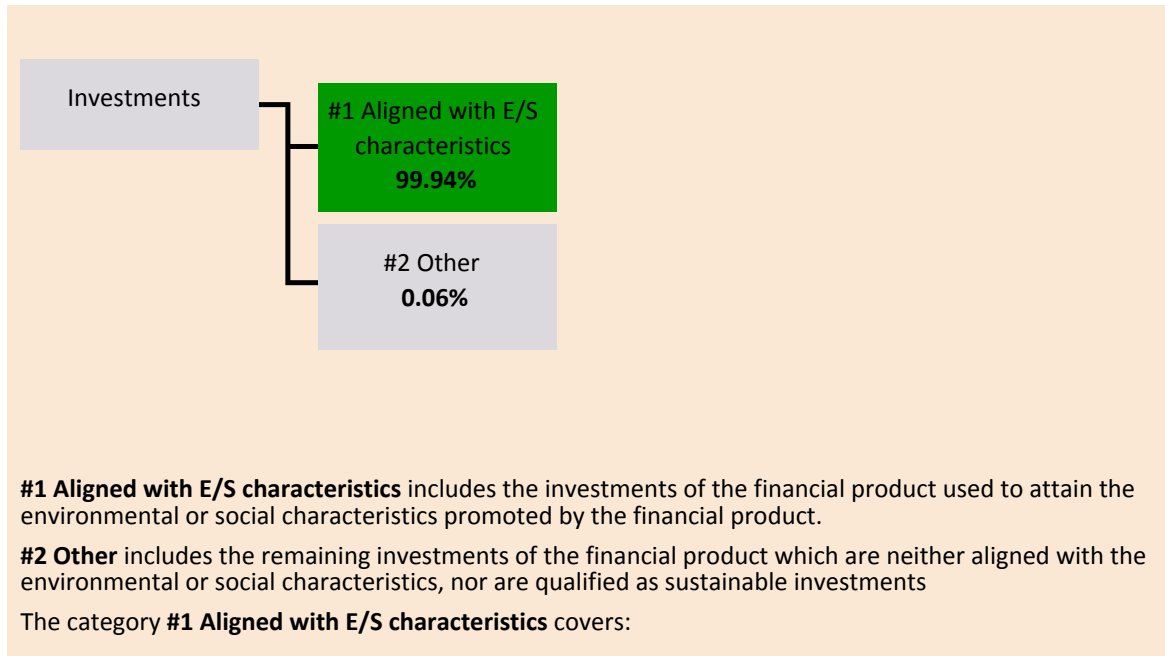

Please see the information below in this respect.

● **What was the asset allocation?**

99.94% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund.

The remaining 0.06% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	20.50%
Financials	Financial Services	12.76%
Information Technology	Software & Services	7.18%
Financials	Banks	6.19%
Communication Services	Media & Entertainment	5.72%
Industrials	Commercial & Professional Serv	5.71%
Energy	Energy	5.14%
Information Technology	Technology Hardware & Equipmen	5.12%
Materials	Materials	4.44%

Financials	Insurance	0.54%
Consumer Staples	Consumer Staples Distribution	0.22%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:
- Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:
- Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable. This is the first reporting period for this Sub-Fund.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

● **What was the share of socially sustainable investments?**

Not Applicable

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action —Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture —Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Acadian Global High Yield Bond Fund

Legal entity identifier:
254900TSCSPKT01BS261

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that (a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the ICE BofA Developed Markets High Yield Index Hedged (USD) ("the Index"); and (b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data Fossil Fuel Laggards.

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainalytics.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Please see below the carbon emissions of the Sub-fund as at 30 June 2024 and the Index as at the Base Date, and the WACI of the Sub-Fund as at 30 June 2024 and the Index as at the Base Date.

Weighted Average Carbon Emissions of Sub-Fund in metric tonnes of Co2	Weighted Average Carbon Emissions of Index in metric tonnes of Co2
1,055,304	2,698,278

	Acadian Global High High Yield Bond Fund	ICE BofA Developed Markets High Yield Index
WACI (scope 1 and 2 emissions tCo2 per M revenue	162	227

...and compared to previous periods?

- Not Applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

- Not Applicable

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 2 GHG emissions	210.2	tCO2	61
Scope 3 GHG emissions	6849.8	tCO2	61
Total GHG emissions	7991.3	tCO2	61
Carbon footprint	723.6	tCO2 per M invested	61
GHG intensity of investee companies	1135.1	tCO2	61
Exposure to companies active in the fossil fuel sector	11.6	Percentage	65
Share of non-renewable energy consumption and production	86.3	Percentage	33
Energy consumption intensity per high impact climate sector	10.6	GwH per million EUR invested	31
Activities negatively affecting biodiversity-sensitive areas	6.3	Percentage	53
Emissions to water	0.0	Tonnes per million EUR invested	61
Hazardous waste and radioactive waste ratio	1.8	Tonnes per million EUR invested	61
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	64
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	2.3	Percentage	63
Unadjusted gender pay gap	13.8	Percentage	54
Board gender diversity	30.2	Percentage	63
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	63
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	67.7	Percentage	53
Lack of a human rights policy	22.9	Percentage	63
Average income inequality score		Ratio	0

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable. This is the first reporting period for this Sub-Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.06% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.
