The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from December 2019 levels by 2030, calculated relative to the size of the Sub-Fund. The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ('WACI') of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint") over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI (scope 1 and 2 emissions tCo2/\$M Revenue) and Carbon Footprint (scope 1 and 2 emissions tCo2/\$M AUM) is set out below, as at December 2019 (the baseline) and end of June 2024. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **...and compared to previous periods?**

Not Applicable. This is the first reporting period for this Sub-Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

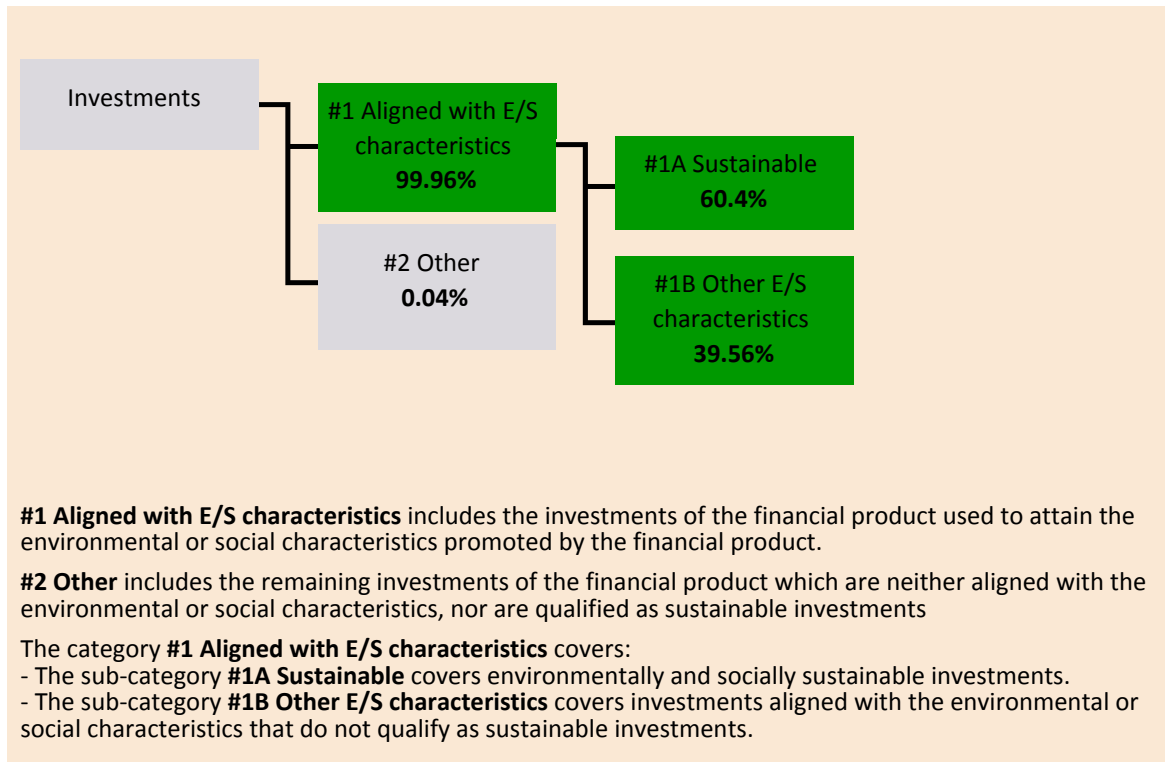

Please see the information below in this respect.

● **What was the asset allocation?**

99.96% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 60.4% in sustainable investments.

The remaining 0.04% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable. This is the first reporting period for this Sub-Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 60.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 60.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.04% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

PAIs for this Sub-Fund are reviewed at quarterly Investment Risk Management Committee meetings, taking into account data coverage and relevance. The Investment Manager has not, based on its monitoring in the period, set any specific targets on these metrics having regard to the nature and profile of the portfolios. As such, the Investment Manager over the period has no additional actions to report in relation to mitigating these PAIs at present for this Sub-Fund. PAI trends continue to be monitored, as applicable to the portfolio, for adverse developments. Should a PAI present or begin trending adversely such that it is then considered outside of its expected range, the Investment Manager will investigate and may action a mitigation plan if appropriate. This may also involve liaising with the relevant Sub-Investment Manager(s) where it is determined that there are practical actions to be taken in the investment process, including informing engagement priorities and strategies where this is considered an effective mitigating action.

PAIs for this Sub-Fund are reviewed at quarterly Investment Risk Management Committee meetings, taking into account data coverage and relevance. The Investment Manager has not, based on its monitoring in the period, set any specific targets on these metrics having regard to the nature and profile of the portfolios. As such, the Investment Manager over the period has no additional actions to report in relation to mitigating these PAIs at present for this Sub-Fund. PAI trends continue to be monitored, as applicable to the portfolio, for adverse developments. Should a PAI present or begin trending adversely such that it is then considered outside of its expected range, the Investment Manager will investigate and may action a mitigation plan if appropriate. This may also involve liaising with the relevant Sub-Investment Manager(s) where it is determined that there are practical actions to be taken in the investment process, including informing engagement priorities and strategies where this is considered an effective mitigating action.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period. If there are no corporate assets in the Sub-Fund or there is no data available for a particular metric of any of the corporate assets in the Sub-Fund, the metric may show as a blank.
