## DIRECTORS' REPORT

The Directors of Sanlam Universal Funds plc (the "Company") present herewith the unaudited condensed interim financial statements for the period ended 30 June 2023.

### PRINCIPAL ACTIVITIES, REVIEW OF BUSINESS AND FUTURE DEVELOPMENTS

The Company is authorised as a UCITS under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The Company is an umbrella investment company with variable capital and segregated liability between sub-funds.

The principal activity of the Company is the formation of sub-funds ("Fund(s)"), each with their own investment objective and policies. The investment objective of the Funds is set out in the Reports of the Investment Managers.

During the period the Sanlam Global Property Fund and the Absa Africa Equity Fund terminated and all trading in the Funds ceased as it was determined that the continued existence and operation of the Funds was not economically viable and not in the best interests of the shareholders.

On 1 March 2023, with the approval of its shareholders, Rootstock Global Equity UCITS Fund merged with Stonehage Fleming Global Best Ideas Equity Fund, a sub-fund of Stonehage Fleming Pooled Investments (Ireland) PLC. The merger was carried out in accordance with Regulation 3(1)(c) of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 352 of 2011), as amended, meaning that the net assets of Rootstock Global Equity UCITS Fund transferred to Stonehage Fleming Global Best Ideas Equity Fund on 1 March 2023 and the Shareholders of the Fund became shareholders of Stonehage Fleming Global Best Ideas Equity Fund.

At 30 June 2023 the Company has twenty four active Funds.

The Company will continue to act as an investment vehicle as set out in its Prospectus and the Funds will continue to pursue their investment objectives.

The Directors also draw your attention to the significant events subsequent to the period end as disclosed in Note 18.

### RESULTS FOR THE PERIOD

The Company returned a Profit for the period in the amount of USD 213,159,446. During the period the Company received total subscriptions in the amount of USD 417,916,362 and paid total redemptions in the amount of USD 1,277,111,570.

The results of the Funds of the Company are set out in the Statement of Comprehensive Income.

Detailed investment reviews and commentary on the performance of each of the Funds within the Company, including key performance indicators, are included in the Reports of the Investment Managers.

The Directors also draw your attention to the significant events during the period explained in Note 17.

### PRINCIPAL RISKS AND UNCERTAINTIES

The Company is exposed to the risks associated with the financial instruments and markets in which the Funds invest. The main risks arising from the Company's financial instruments are market risk (including market price risk, currency risk and interest rate risk), credit risk and liquidity risk (including cash flow risk). There has been no significant change to the principal risks and uncertainties to which the Company is exposed since the most recent annual financial statements of the Company. The Directors are not aware of any existing or contingent liability of the Funds that may expose the assets of the Company as a whole. A further comprehensive summary of the risk factors that investors should consider is included in the prospectus of the Company and the offering supplement of each Fund.

**DIRECTORS' REPORT (CONTINUED)**

**DIVIDENDS**

The present intention of the Directors is to distribute surplus net income of specific share classes as set out Note 5. The applicable share classes at 30 June 2023 are as follows:

<b>Fund Name</b>	<b>Classes</b>	<b>Distribution Frequency</b>
Denker Global Equity Fund	A (GBP) / C (GBP)	Annual
Denker Global Financial Fund	A (GBP) / C (GBP)	Annual
Satrix World Equity Tracker Fund	I (GBP)	Annual
Satrix Emerging Markets Equity Tracker Fund	I (GBP)	Annual
Sanlam AI Global Managed Risk Fund	A2 (GBP) / I (GBP) / N (GBP) L2 (GBP) / N2 (GBP)	Annual
Sanlam Global High Quality Fund	C Income (GBP) / D Income (USD) / E Income (USD) / I Income (GBP) / G Income (USD)	Semi-Annual
Sanlam Sustainable Global Dividend Fund	R (GBP) Unhedged Inc	Quarterly
Sanlam Active UK Fund	C (GBP) I (GBP)	Annual Semi-Annual
Sanlam Multi-Strategy Fund	I2 GBP Base Inc / Z1 GBP Base Inc / I1 GBP Base Inc	Monthly
Sanlam Global Emerging Markets Fund	B1 (GBP) / B2 (GBP) / C1 (GBP) / C2 (GBP)	Annual
Sanlam Centre Global Listed Infrastructure Fund	C (USD) / C (GBP) / E (USD)	Quarterly
Sanlam Real Assets Fund	A Distribution (GBP) / D Distribution (GBP) / DH Distribution (GBP) / Class I1 EUR Hedged Inc / Class I2 CHF Hedged Inc / Class I2 EUR Hedged Inc	Monthly

For those Funds which distribute annually, dividends (if any) will be declared and paid following the completion of the annual audits for the year ended 31 December in each calendar period. Sanlam Multi-Strategy Fund, Fund and Sanlam Real Assets Fund will distribute on a monthly basis and for those Funds that distribute on a semi-annual or quarterly basis, the dates for the distributions will be as stated in the Fund supplement. All dividends will be subject to the discretion of the Directors.

Unless otherwise stated in the Fund Supplement, payment will be made in cash unless the payment is for an amount less than USD100, EUR100 or GBP100 (depending on the functional currency of each Fund) in which case such payment will be automatically reinvested in the purchase of shares of the relevant class, for the account of the relevant shareholder.

The Directors reserve the right to change the dividend policy of the Fund to reflect changes that may occur from time to time in the requirements for qualifying as a reporting Fund for the purposes of United Kingdom taxation.

With reference to the Statement of Comprehensive Income, Shareholders should note that surplus net income was distributed during the course of 2023 and 2022 as follows:

<b>Fund Name</b>	<b>30 June 2023</b>	<b>30 June 2022</b>
Denker Global Equity Fund	USD 219	USD 950
Denker Global Financial Fund	USD 13,186	USD 53,553
Satrix World Equity Tracker Fund	USD 12,783	USD 33,887
Satrix Emerging Market Equity Tracker Fund	USD 1,548	USD 164,010
Sanlam Global High Quality Fund	GBP 72,872	GBP 114,814
Sanlam Active UK Fund	USD 4,105	GBP 5,701
Sanlam Multi-strategy Fund	USD 1,563,663	GBP 2,296,343
ABSA Africa Equity Fund <sup>1</sup>	USD 132,308	USD 273,632
Sanlam Centre Global Listed Infrastructure Fund	USD 144,935	USD 160,859
Sanlam Real Assets Fund	GBP 539,563	GBP 473,555

<sup>1</sup> This Fund closed during the period ended 30 June 2023.

## DIRECTORS' REPORT (CONTINUED)

### DIRECTORS

The Directors of the Company who served during the period, and up to the date the financial statements were signed, were as follows:

Paul Dobbyn (Irish)  
 Thomas Murray (Irish)  
 Haydn Franckeiss (South African)  
 Richard Aslett (British)

Paul Dobbyn is a Director of Sanlam Global Funds Plc, Sanlam Qualifying Investors Funds Plc and MLC Global Multi Strategy UCITS Fund Plc.

Thomas Murray is a Director of Sanlam Global Funds Plc, Sanlam Qualifying Investors Funds Plc and MLC Global Multi Strategy UCITS Fund Plc. Thomas Murray is also a Director of Sanlam Asset Management (Ireland) Ltd. ("SAMI").

Haydn Franckeiss is a Director of Sanlam Global Funds Plc, Sanlam Qualifying Investors Funds Plc and MLC Global Multi Strategy UCITS Fund Plc.

Richard Aslett is the Chief Executive Officer of SAMI. Richard Aslett is also a Director of Sanlam Global Funds Plc, Sanlam Qualifying Investors Funds Plc, MLC Global Multi Strategy UCITS Fund Plc and SAMI.

Sanlam Qualifying Investors Funds, Sanlam Global Funds Plc and MLC Global Multi Strategy UCITS Fund Plc are three related collective investment schemes which share common management to the Company. Certain Funds of the Sanlam Qualifying Investors Funds and Sanlam Global Funds Plc also act as Feeder Funds to the Funds of the Company.

### DIRECTORS' AND SECRETARY'S INTEREST IN SHARES AND CONTRACTS

At 30 June 2023, Haydn Franckeiss had an interest of 14,684 (31 December 2022: 14,684) shares in Sanlam Sustainable Global Dividend Fund, 53,662 (31 December 2022: 45,308) shares in Sanlam Real Assets Fund and 6,735 (31 December 2022: 6,735) shares in Sanlam Multi-Strategy Fund.

The other Directors who held office on 30 June 2023 had no interest in the shares of the Company or Funds at that date or at any time during the financial period. None of the Directors has a service contract with the Company.

The Manager holds non-participating shares of the Company.

### RELATED PARTIES

Disclosures in respect of related parties are contained in Note 8 to the financial statements.

### CONNECTED PERSONS

Part 2, Chapter 10 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations") on transactions involving connected persons states that any transactions between a UCITS and a Connected Person must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

A 'Connected Person' is defined as the Management Company or Depositary to a UCITS; and the delegates or sub-delegates of such a Management Company or Depositary (excluding non-group company sub-custodians appointed by a Depositary); and any associated or group company of such a Management Company, Depositary, delegate or sub-delegate. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out above are applied to all transactions with Connected Persons entered into during the year and that all such transactions have complied with these obligations.

## DIRECTORS' REPORT (CONTINUED)

### SUBSEQUENT EVENTS

Other than as disclosed in Note 18, up to the date of the approval of these financial statements there were no events subsequent to the year end, which, in the opinion of the Directors of the Company, had an impact on the financial statements for the period ended 30 June 2023.

### ACCOUNTING RECORDS

The measures taken by the Directors to ensure compliance with the Company's obligation to keep proper accounting records are the use of appropriate systems and procedures which are carefully implemented by the Administrator. The accounting records of the Company are kept at 30 Herbert Street, Dublin 2, Ireland.

### AUDIT COMMITTEE

An audit committee has not been appointed because the Directors are satisfied that the established processes regarding internal control and risk management systems are sufficient to ensure effective oversight of the financial reporting and audit process. The established processes are disclosed in the Corporate Governance Code on pages 10 to 12.

### STATEMENT OF DIRECTORS' RESPONSIBILITIES

Irish company law requires the Directors to prepare financial statements for each financial period which give a true and fair view of the state of affairs of the Company and of the results of the Company for that period. In preparing those financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- Follow applicable accounting standards or disclose or explain material departures from them in the financial statements;
- Ensure that financial statements comply with the Memorandum and Articles of Association;
- Provide a fair review of the development and performance of the Company;
- Give a description of principal risks and uncertainties that they may face; and
- Prepare the financial statements on the going concern basis, unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper books of account which disclose with reasonable accuracy, at any time, the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and comply with the Irish Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"). They are also responsible for safeguarding the assets of the Company and in fulfilment of this responsibility, they have entrusted the assets of the Company to the Depository for safekeeping, in accordance with the Memorandum and Articles of Association of the Company. The Directors are responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

### CORPORATE GOVERNANCE CODE

The Companies Act 2014 requires the inclusion of a corporate governance statement in the Director's Report. Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes whose shares are admitted to trading on the Global Exchange Market of Euronext Dublin ("GEM"), the Irish Funds ("IF") has published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investments schemes. This code became effective from 1 January 2012, with a twelve month transitional period. It should be noted that the IF Code reflects existing corporate governance practises imposed on Irish authorised collective investment schemes, as noted above. On 19 December 2012, the Board of Directors voluntarily adopted the IF Code as the Company's corporate governance code.

## DIRECTORS' REPORT (CONTINUED)

### CORPORATE GOVERNANCE CODE (CONTINUED)

The Board considers that the Company has complied with the relevant provisions contained within the Code throughout this accounting period. The code is available at [www.sanlam.ie](http://www.sanlam.ie). In addition to the IF Code, the Company is subject to corporate governance practices imposed by:

- i) The Irish Companies Act 2014, which is available for inspection at the registered office of the Company. It may also be obtained at: <http://www.irishstatutebook.ie/eli/2014/act/38/enacted/en/html>
- ii) The Articles of Association of the Company which are available for inspection at the registered office of the Company at Beech House, Beech Hill Road, Dublin 4, Ireland and the Companies Registration Office in Ireland.
- iii) The CBI UCITS Regulations and related Guidance Notes of the Central Bank of Ireland which can be obtained from the Central Bank of Ireland website at: <https://www.centralbank.ie/regulation/industry-market-sectors/funds> and are available for inspection at the registered Office of the Company.
- iv) Euronext Dublin through the Global Exchange Market Rules for Investment Funds which can be obtained from Euronext Dublin's website at <https://www.ise.ie/Products-Services/Sponsors-and-Advisors/GEM-Rules-for-Investment-Funds.pdf>.
- v) SAMI's Programme of Activity, Business Plan and Code of Conduct, which are available for inspection at the registered office of SAMI at Beech House, Beech Hill Road, Dublin 4, Ireland.
- vi) SAMI is also subject to the Corporate Governance Code of the Sanlam Group.

The Board of Directors is responsible for establishing and maintaining internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement and loss. The Board of Directors has delegated this duty to SAMI.

SAMI is authorised and regulated by the Central Bank of Ireland and must comply with the rules imposed by the Central Bank of Ireland. SAMI also monitors and evaluates the external auditor's performance, qualifications and independence. Brown Brothers Harriman Fund Administration Services is appointed as administrator to maintain the books and records of the Company.

The Company has procedures in place to ensure all relevant books of accounts are properly maintained and are readily available, including production of annual and half-yearly financial statements. The annual financial statements of the Company are required to be approved by the Board of Directors of the Company and the annual and half yearly financial statements are required to be filed with the Central Bank of Ireland and Euronext Dublin.

The statutory financial statements are required to be audited by the independent auditors who report annually to the Board on their findings. The Board evaluates and discusses significant accounting and reporting issues as the need arises.

### Shareholders' meetings

The convening and conduct of shareholders' meetings are governed by the Articles of Association of the Company and the Companies Acts. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors of the Company are required to convene a general meeting within eighteen months of incorporation and fifteen months of the previous annual general meeting thereafter. Shareholders representing not less than one-tenth of the paid up share capital of the Company may also request to convene a shareholders meeting. Not less than twenty one days' notice of every annual general meeting and any meeting for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting unless the auditors of the Company and all the shareholders entitled to attend and vote agree to shorter notice.

Two members present either in person or by proxy constitutes a quorum at a general meeting provided that the quorum for a general meeting convened to consider any alteration to the class rights of shares is two shareholders holding or representing by proxy at least one third of the issued shares of the relevant Funds or class.

## DIRECTORS' REPORT (CONTINUED)

### Shareholders' meetings (continued)

Every holder of participating shares or non-participating shares present in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present in person or by proxy is entitled to one vote in respect of each share held by him and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company, or at least two members present in person or by proxy, or any holder or holders of participating shares present in person or by proxy representing at least one-tenth of the shares in issue having the right to vote at such meeting, may demand a poll.

Shareholders may decide to sanction an ordinary resolution or special resolution at a shareholder's meeting. An ordinary resolution of the Company (or of the shareholders of a particular Funds or class) requires a simple majority vote cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company (or of the shareholders of a particular Fund or class) requires a majority vote of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

### Composition and Operation of the Board

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors may not be less than two. Currently the Board of Directors of the Company is composed of four Non-Executive Directors, being those listed on page 3 of these financial statements with Paul Dobbyn, Thomas Murray and Richard Aslett being Irish residents. None of the Company's Directors hold directorships with the Depositary. The business of the Company is managed by the Directors, who exercise all such powers of the Company as are not required by the Companies Acts or the Articles of Association to be exercised by the Company in a general meeting. A Director may, and the company secretary of the Company on the requisition of a Director will, at any time summon a meeting of Directors. Questions arising at any meeting of Directors are determined by a majority of votes. In the case of quality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

All key management functions of the Company have been delegated to SAMI. SAMI will manage these in terms of their Programme of Activity and Business Plan. SAMI is approved by the Central Bank of Ireland, and is authorised as a UCITS Management Company and an Alternative Investment Fund Manager.

### VALUATION OF INVESTMENTS

As at 30 June 2023, the following delisted securities were held by the Company:

- Accident Exchange Group Plc – Fair value at 30 June 2023 – USD Nil (-%)  
(Denker Global Equity Fund; Denker Global Financial Fund)
- DBA Telecommunications – Fair value at 30 June 2023 – USD Nil (-%)  
(Denker Global Equity Fund; Denker Global Financial Fund)
- Hanergy Thin Film Power Group Limited – Special Purpose Vehicle – Fair value at 30 June 2023 – USD 27,884 (0.10%) (Satrix Emerging Markets Equity Tracker Fund)
- Signature Bank – Fair value at 30 June 2023 – USD Nil (-%)  
(Denker Global Equity Fund; Denker Global Financial Fund; Satrix World Equity Tracker Fund)
- SVB Financial Group – Fair value at 30 June 2023 – USD Nil (-%)  
(Satrix World Equity Tracker Fund)
- First Republic Bank – Fair value at 30 June 2023 – USD Nil (-%)  
(Satrix World Equity Tracker Fund)

The fair value of those securities listed above and used in preparing these financial statements may differ significantly from the values that would have been used had those securities had readily available market prices at 30 June 2023.

**DIRECTORS' REPORT (CONTINUED)****VALUATION OF INVESTMENTS (CONTINUED)**

In addition, as Russian securities and the Ruble became increasingly untradeable post the invasion of Ukraine, a valuation discount of 100% on all remaining Russian security and currency positions in the Funds was applied in March 2022. Given the sanctions in place and the likelihood of a Russian default, it was further resolved that any interest or dividend income receivable balances on holdings with Russian exposure be written off until further notice due to the unlikelihood that such amounts would be received by the Funds as they fall due. Subsequently, for one Fund of the Company, namely Perpetua Global Equity UCITS Fund, the 100% discount on the remaining Russian securities was revised by SAMI's Valuation Committee. The applicable discount for this Fund was reduced to 30% for the Magnit position and 15% for the other positions held. The reasons for the change in discount in the Fund was to enable a significant new shareholder to invest in the Fund without diluting the interests of the existing shareholders. The Valuation Committee considered a number of factors including the availability of observable prices as a result of the Moscow Exchange ("MOEX") permitting trading for non-resident clients from friendly jurisdictions (which includes South Africa) as well as non-residents controlled by Russian legal entities or individuals. The change in the applicable discount was agreed with the existing shareholders of the Fund.

The following details the Russian securities held by the Funds at 30 June 2023:

<b>Fund</b>	<b>Description</b>	<b>Security Type</b>	<b>Fair value</b>
Denker Global Financial Fund	TCS Group	Equity	USD Nil
Satrix Emerging Markets Equity Tracker Fund	Phosagro PJSC Mobile Telesystems	Equity Equity	USD Nil USD Nil
Anchor Global Stable Fund	Magnit	Equity	USD Nil
Sanlam Global Emerging Markets Fund	Magnit Sberbank of Russia	Equity Equity	USD Nil USD Nil
Perpetua Global Equity UCITS Fund	Yandex NV Magnit TCS Group	Equity Equity Equity	USD 479,281 USD 644,116 USD 1,555,300

## ECONOMIC & MARKET REVIEW

*for the year ended 31 December 2022*

With half of 2023 now behind us, many investors have been surprised by the strength and general risk-on tone of markets so far. Q1 began with a strong rally, as markets were buoyed by stronger than expected economic data in much of the developed world, as well as a milder winter for the USA and particularly Europe. February saw a retracement of this optimism, as central banks doubled down on their hawkish stance on inflation. In March, significant turbulence ensued, centred around the collapse of Silicon Valley Bank and several other US regional banks, as well as Credit Suisse's shotgun marriage to UBS in Europe. As some of the most notable casualties of the current monetary tightening regime, it brought about heavy losses for financial stocks. At the same time, the expectation that central banks may be forced to end their tightening cycles sooner led to a rally in the growthy end of the market.

In Q2 it became clear that the banking crisis from March was largely contained, at least in the short-term. There were also further signs of inflation starting to pull back, though much of this was anticipated given the rates experienced since Q2 2022, when prices, particularly energy, spiralled in the aftermath of Russia's invasion of Ukraine. Additionally, there is a clear divergence emerging across regions, with the UK still lagging the US and Europe in terms of the magnitude and speed of inflationary decline. The quarter also saw the increasing fever around artificial intelligence expand, and companies associated with this theme were substantial beneficiaries. However, this has meant equity markets have been very narrow in their market leadership, which has led some market participants to argue there is a likely bubble in such companies. From a geopolitical perspective, the failed Russian coup in June was perhaps the most notable event, as the Wagner Group conducted a near immediate U-turn. However, this is again a sign of Putin's gradual loss of power, and there remains a range of risks within the Russian regime.

Central banks have continued to push on with their rate hiking cycles during the first half of the year, even as inflation has started to abate. The US Federal Reserve implemented three 25bp hikes over the period, with interest rates rising from 4.5% to 5.25%. Inflation has materially dropped at the headline level, with May CPI down to 4.0%. However, core inflation is proving more stubborn, as it surprised to the upside for May at 5.3%. Talk of a soft landing in the US remains given the remarkable economic resilience still coming through, though central banks are faced with the balancing act of not choking off the economy too much, while also tackling what may prove to be the most stubborn part of the inflation cycle, getting back towards the traditional 2% target levels.

Markets have been remarkably resilient overall during H1 2023. This has been driven by the growth part of the market, which rebounded in Q1 from the pain of 2022, and compounded this performance in Q2 amid the fervour around artificial intelligence. This meant the MSCI World Index was up 7.73% in Q1, followed by 6.83% in Q2, leaving the H1 2023 return at 15.09%. Demonstrating the overwhelming favour of growth over value, the MSCI World Growth and Value indices returned 27.09% and 3.98% respectively.

Global bonds had a good start to the year alongside equities, up 3.01% in Q1. However, they then declined in Q2, down -1.53%, as concerns grew over the potential stubbornness of inflation from here. Government bonds were especially weak, with UK gilts leading the declines. Hence for H1 bonds gained 1.43%, up absolute but significantly behind the risk-on rally in equities.

## DENKER GLOBAL EQUITY FUND

### Investment Objective

The Denker Global Equity Fund (the “Fund”) aims to provide above average long-term capital growth by investing primarily in global equities which the Investment Manager has identified as being undervalued and as offering above average growth potential.

### Fund Performance

The Fund is benchmarked against the MSCI World Index for performance comparison purposes. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

It has been a year of two halves. The first quarter’s banking stress in the US resulted in a sharp repricing of the likely path for interest rates. The 2-year bond yield in the US rallied from a high of 5.07% on 8 March to a low of 3.78% a few weeks later. In Q2, global markets delivered very attractive returns. This performance was largely due to robust economic growth data, moderating inflation numbers, resolution on the US debt ceiling standoff and lower risk. The 2-year bond yield rose to 4.88% at the end of the quarter, the price of gold - which had a very strong run in March (coincident with US bank stress) - gave back some of these gains in the quarter. YTD global market performance has been notable for the very narrow returns – i.e. a large part of market returns have been driven by only a handful of shares.

The Fund underperformed its benchmark, the MSCI World Index, in the first half of 2023 delivering a return of 14.79% vs. the benchmark’s 15.1%.

The main contributors to relative performance YTD were Oracle, NVR and KLA Corporation.

Oracle continues to transition its legacy database to the cloud and has been successful in its new software-as-a-service offerings. The high growth part of the business now contributes almost 33% of revenue and we think it should soon be able to exceed 45%, driving an inflection in consolidated revenue growth rates. Capital allocation has also been excellent. We think the share remains attractively valued, despite the strong recent performance. Oracle’s valuation also remains attractive when compared to other technology companies with cloud growth prospects.

Homebuilder NVR’s share price came under pressure in 2022 because of the uncertain economic environment and the rapid increase in interest rates which hurt affordability. However, the company’s balance sheet is strong, housing in the US is in structural undersupply and the US consumer remains resilient. NVR’s asset-light model and leading return on equity will help the stock to outperform during a tougher housing market. The prospects of lower interest rates, as inflation pressure subside, provided support for all the homebuilding stocks during the first half of the year.

The Fund’s position in KLA, a best-in-class semiconductor equipment supplier with a dominant share in process control, contributed positively to performance in the first half of the year. The company has gained a share of wafer fab equipment (WFE) budgets over the past year and we are confident that this will continue as semiconductor manufacturing becomes more complex. Service revenue continues to increase, which holds up well when cyclical WFE spending is softer. Semiconductor companies are also a key AI beneficiary.

## DENKER GLOBAL EQUITY FUND (CONTINUED)

### Fund Performance *(continued)*

The main detractors from relative performance YTD were Nvidia, Apple and Tesla due to the Fund not holding these companies or being underweight.

Nvidia shares moved even higher after the company reported Q1 sales ahead of consensus estimates. But, more importantly, the company provided very strong guidance, driven by customer demand for its latest H100 GPU which is currently the leading semiconductor chip enabling generative AI applications. The Fund currently does not hold shares in Nvidia, but it is invested in, and has therefore benefited, from several other companies that are well positioned to thrive in an AI boom.

Apple's good YTD performance continues (+49%), and on the last day of Q2 it became the first company to close above US\$3tr in market cap. Although the Fund is invested in Apple, it is underweight relative to the MSCI World.

The Fund does not own any Tesla shares. Tesla soared by 112% during the period under review and therefore detracted from the Fund's relative performance. A key pillar of our investment philosophy is our focus on valuation, and we are unable to identify a margin of safety on Tesla's current valuation (and its valuation at the beginning of the year).

### Fund Outlook

Much has been written about the narrow nature of the stock market rally over the last six months, during which a handful of counters (including Nvidia, Tesla, Meta, Apple, Microsoft, Alphabet and Amazon) were responsible for an outsized portion of the overall gains. While the rest of the market has since started to catch up, we continue to find pockets of opportunity particularly outside of the better-known US mega caps.

It is starting to feel like expectations for a 'soft landing' are becoming entrenched. At Denker Capital we aim to identify investment opportunities on a bottom-up basis via the thorough analysis of company fundamentals like business economics and management quality. We therefore aim to avoid constructing investment portfolios that are predicated on any specific economic outcomes. We nevertheless think it is prudent to consider what could happen if consensus expectations don't play out. We think the Fund is well positioned to deal with a variety of market outcomes. Exposure is diversified across various market segments and geographies. Where we have trimmed holdings, it has primarily been as a result of a narrowing in the discount to intrinsic value or where we have identified superior alternatives, and not because of specific economic expectations. However, we will continue to employ a healthy degree of scepticism and aim to use market pullbacks to add to attractive opportunities.

We do not proclaim to be able to foretell what the near-term future may hold, and we think that is extremely challenging to time the market with any degree of consistency. However, our long-term patient approach to capital allocation has served us well in the past and enabled us to navigate through various market cycles. By sticking to our core pillars of investing in high quality companies with good business economics, enduring competitive advantages and strong management teams the Fund remains well positioned to continue to deliver robust returns for investors over time.

### Investment Manager

Denker Capital (Pty) Limited

## SANLAM GLOBAL BOND FUND

### Investment Objective

The Sanlam Global Bond Fund (the "Fund") aims to provide income with the possibility of long-term growth from capital appreciation.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the Bloomberg Global Aggregate Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund posted a positive absolute return of 1.24% in H1, 2023. This gave it a slight underperformance against its benchmark (Bloomberg Global Aggregate Index) of -0.19%. The two quarters saw differing fortunes, both from an absolute and relative perspective. In Q1, the Fund gained 3.32% in absolute terms, which was an outperformance of +0.31%. However, in Q2 the Fund declined by -2.01% as markets retraced, underperforming the benchmark by -0.48%. Looking at the two underlying managers, Western Asset Management (Western) and AllianceBernstein (AB), there was a slight contrast in fortunes. Western finished just ahead of the benchmark for the first half of the year, while AB underperformed to a greater extent, causing the overall underperformance of the Fund. Western outperformed in the Q1 rally, helped by their overweight positioning to US, core European, and UK duration. AB actually had a very strong Q1, with almost double the outperformance of Western. This came from underweight positioning to China, as well as positive selection within corporate bonds.

During Q2, both managers underperformed as markets reversed direction, though the magnitude of AB's underperformance was much greater than Western's. For Western, the steeper US yield curve cost them, as well as their overweight positioning to the UK and investment grade corporates. AB struggled with their currency allocations in the quarter, as their overweight Norwegian krone position hurt. They too saw UK and US positioning detract, as well as an underweight to Chinese government bonds which rallied strongly. The Fund now lags the benchmark by -0.53% on an annualised basis since inception, with an absolute annualised return of 1.73%.

### Fund Outlook

Looking forward the key aspect continues to be inflation, and the corresponding central bank policy responses. These will determine the path for the global economic outlook and in turn for markets. What is clear is that the path for inflation varies in different countries and so there will be deviations in how central banks react. US inflation releases in early July for end of June data show inflation materially undershooting expected levels for the first time in months. That said, inflation is unlikely to fall in a straight line, and risks of stickier inflation emerging remain. The UK, in contrast to the US, is an example of this and the service heavy UK economy is suffering from sustained services inflation, which is keeping inflation persistently high.

**SANLAM GLOBAL BOND FUND (CONTINUED)****Fund Outlook** *(continued)*

Given the uncertainty, interest rate cuts for the major developed central banks have been taken off the table for 2023 and are now not expected until 2024. However, the market is generally underestimating the likelihood of central bankers keeping interest rates on hold for longer and at a higher level. The longer that interest rates remain high the more liquidity will be withdrawn from the system, and the more likely there are risks to the downside for economies. Despite recent confidence of a soft-landing emerging, the rapid tightening of monetary policy seen over the last two years will almost certainly, at some point, end up with recession. That now looks like a 2024 event for the US economy, while it might emerge in late 2023 for the UK economy, and somewhere in between for other regions. In short, a slowdown to near zero growth levels or below seems almost inevitable. The risk is that the slowdown is more severe than that, and a deeper and more prolonged recession takes hold. Elsewhere geopolitical risks remain, not least the ongoing events in Ukraine, but also the increasing technological cold war between the West and China.

Given the economic backdrop the outlook for markets is mixed, with bonds, given current yield levels, offering a more defensive and certain outlook. If recession takes hold sovereign bonds offer an increasingly attractive profile, while corporate bonds would likely deliver a more muted return, driven lower primarily by the extent of the downturn. It seems likely that bonds will provide some defensive diversification compared to equities, which have rallied exceptionally strongly year to date, despite the recessionary overhang.

Overall, the wider outlook remains one of uncertainty and divergence, across inflation, interest rates, and recession. The Fund is positioned based on expectations of inflation coming down, without bringing about material economic weakness – the soft-landing scenario. Economic resilience has been remarkable over the last 18 months, and may well continue, though there are some signs of weakening. Inflation is certainly declining, pending any external upwards shock, but the traditional 2% target is still the end goal for central banks, at least for now, and this leg of the journey may take longer than anticipated.

**Investment Manager**

AllianceBernstein Limited

Sanlam Investments UK Limited

Western Asset Management Company Limited

## DENKER GLOBAL FINANCIAL FUND

### Investment Objective

The Denker Global Financial Fund (the "Fund") aims to achieve steady growth in the value of investments primarily through global investment in securities of companies of which the principal operations specifically focus on, and derive benefit from or pertain to, the provision of banking, insurance and other financial services.

### Fund Performance

The Fund is benchmarked against the MSCI World Financials Index for performance comparison purposes. Note: Performance figures longer than 12 months are annualised. Figures are quoted net fees.

It has been a year of two halves. The first quarter's banking stress in the US resulted in a sharp repricing of the likely path for interest rates. The 2-year bond yield in the US rallied from a high of 5.1% on 8 March to a low of 3.8% a few weeks later. But during Q2 robust economic growth data, moderating inflation numbers and resolution on the US debt ceiling standoff pushed the 2-year bond yield back to 4.9% at the end of the quarter and above 5% in July. Surprisingly, global markets delivered despite the interest rate volatility, but the market performance has been notable for the very narrow returns – i.e. a large part of market returns have been driven by only a handful of shares.

Central Banks globally marched to the drum of continued inflationary pressures and maintained their rate hiking stance - including the Fed, Bank of England, European Central Bank and central banks of New Zealand, Canada and South Africa (to name a few).

The MSCI World Financial Index (the Fund's benchmark) gained 5.0% in the second quarter, showing a very strong bounce back from the first quarter's -1.6%. The Fund outperformed its benchmark in the first half of 2023 delivering a return of 3.50% vs. the benchmark's 3.32%.

The lesson here for investors is to guard against emotion when negative events occur. When investing one does so with a view of the future, and the future is always uncertain. But two certainties that are important to remember to generate good investment returns are a) valuations and b) management quality. The valuations of the banks and insurers the Fund is invested in are currently at historic lows, which highlights the uncertainty in the market about the near-term future of the sector. But it also means a strong rebound when the outlook changes. In terms of quality, the track record of the management teams the Fund is invested in - in terms of underwriting, cost management and capital allocation whilst growing the business profitably - speaks for itself.

The main contributors to relative performance YTD were Shriram Finance, TBC Bank and SCOR. The main detractors from relative performance YTD were Signature Bank, Keycorp and US Bancorp (all US regional banks).

## DENKER GLOBAL FINANCIAL FUND (CONTINUED)

### Fund Performance *(continued)*

Signature Bank was shut down in March due to it experiencing large deposit outflows after Silicon Valley Bank was shut down. Signature Bank (SBNY) had a branchless business model and grew faster than its peer group through superior client service and quicker decision making. It had positioned itself as the main bank facilitating on-ramping and off-ramping into stablecoins via Signet (its platform). SBNY was solvent and reportedly had sufficient liquidity at the time. There are opinions that the Fed overreached in this case – but in a crisis, such as the one experienced, regulators are under immense pressure to make decisions quickly.

US Bancorp and Keycorp detracted from performance, as negative sentiment on US regional banks weighed down the share prices.

### Fund Outlook

On concerns of a possible recession, recent stress test results released by the Fed highlighted that US banks have sufficient capital to withstand a 40% fall in commercial real estate values. In addition, JP Morgan reported that their bad debt provisions will be sufficient for a 5.8% US unemployment rate environment (current rate of 3.6%). March 2023 results released by South African banks also showed +/- 50% increases in bad debt provisions, providing for potential bad debts in the event of a downturn. This highlights how conservative management teams are and overtly negative markets are.

We visited bank management teams in the US, UK and Europe in May and one of the executives said, “When I look inside our bank and I look at the market, there seems to be a total disconnect”. Our experience of many cycles and bank crises, research, observations and the meetings bring us to the same conclusion. The market is acting emotionally on one-sided incomplete information. This is presenting investors with a chance to invest at rock bottom valuations.

This is proven by the price gains of the 15 best performers, most of them gaining 20% to 50% over the year so far.

Besides Brazil, the US regional banks, UK banks and insurers and many of the EU banks and insurers remain grossly mispriced. In our view the sector is presenting an excellent investment opportunity. We think the reason for the low valuations is that investors are fearful and this emotion prevents them from looking through the bad news they see in the environment and seeing the good results the banks keep delivering. Interesting is that many of the smaller market cap holdings are attracting attention and have had good price gains. For the whole sector to re-rate from the current low valuations one probably needs patience. But the downside risk is very low, and, in the meantime, we strongly believe that now is a good time for investors to invest - whilst these attractive valuations last and to benefit from the high dividend yields and growth in shareholder value in the shorter term.

### Investment Manager

Denker Capital (Pty) Limited

## SANLAM WORLD EQUITY FUND

### Investment Objective

The Sanlam World Equity Fund (the "Fund") aims to provide above average long-term capital growth by investing primarily in global equities.

### Fund Performance

The Fund's benchmark for performance comparison purposes is the MSCI World Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund had a strong absolute return in the first half of 2023, gaining 11.99% as markets rallied strongly. However, compared to its benchmark, the MSCI World Index, this was a relative underperformance of -3.10% as the Fund failed to keep up. This underperformance came across Q1 and Q2, -0.79% and -2.11% respectively. The absolute returns for the two quarters were 6.94% and 4.72% respectively.

All of the underperformance for the half-year to 30 June 2023 came from negative stock selection, as allocation was mildly additive – the Energy sector underweight and Communication Services sector overweight added but these were offset by the Health Care sector overweight. Looking at the stock detractors, it was a theme of stocks not held. Apple, Nvidia, Meta, Tesla and Amazon formed five of the top 10 detractors, as the mega-cap stocks drove the incredibly narrow market for equities. General Dynamics was the most significant detractor of stocks held in the portfolio. Highlighting the market environment, the top two contributors for the Fund were Alphabet and Microsoft, both held, which complete the 'Magnificent Seven'. The Fund now lags the benchmark by -1.73% on an annualised basis since inception, with an absolute annualised return of 6.21%.

### Fund Outlook

Looking forward the key aspect continues to be inflation, and the corresponding central bank policy responses. These will determine the path for the global economic outlook and in turn for markets. What is clear is that the path for inflation varies in different countries and so there will be deviations in how central banks react. US inflation releases in early July for end of June data show inflation materially undershooting expected levels for the first time in months. That said, inflation is unlikely to fall in a straight line, and risks of stickier inflation emerging remain. The UK, in contrast to the US, is an example of this and the service heavy UK economy is suffering from sustained services inflation, which is keeping inflation persistently high.

## SANLAM WORLD EQUITY FUND (CONTINUED)

### Fund Outlook (continued)

Given the uncertainty, interest rate cuts for the major developed central banks have been taken off the table for 2023 and are now not expected until 2024. However, the market is generally underestimating the likelihood of central bankers keeping interest rates on hold for longer and at a higher level. The longer that interest rates remain high the more liquidity will be withdrawn from the system, and the more likely there are risks to the downside for economies. Despite recent confidence of a soft-landing emerging, the rapid tightening of monetary policy seen over the last two years will almost certainly, at some point, end up with recession. That now looks like a 2024 event for the US economy, while it might emerge in late 2023 for the UK economy, and somewhere in between for other regions. In short, a slowdown to near zero growth levels or below seems almost inevitable. The risk is that the slowdown is more severe than that, and a deeper and more prolonged recession takes hold. Elsewhere geopolitical risks remain, not least the ongoing events in Ukraine, but also the increasing technological cold war between the West and China.

Consequently, equity markets look to be facing headwinds on several fronts: firstly, equities have run hard in 2023 so far; secondly, equity markets have been very narrow; thirdly, earnings, while having been robust and surprisingly resilient, look unlikely to be sustainable at current levels; and fourthly, valuations, having expanded in 2023, look stretched for an economic downturn, and are more likely to come under pressure. Conversely, it seems difficult to present a bull case for equities in the absence of an upswing for global economic growth, which seems unlikely in the light of central bank tightening. Markets would need to see a broadening in the rally away from the 'Magnificent Seven' coupled with some strong earnings guidance to truly get behind any sustainable rally going into H2. Consequently, the risks to equities are skewed to the downside, the extent of this being governed by the nature and magnitude of any economic slowdown.

Overall, the wider outlook remains one of uncertainty and divergence, across inflation, interest rates and recession. The Fund has done okay on an absolute basis so far this year but has failed to keep up with the narrow market rally. Should an economic downturn start to materialise later in the year, the overweight positioning in more defensive sectors such as Consumer Staples and Health Care, which have hurt so far this year, could provide a tailwind to the Fund's relative performance.

### Investment Managers

Sanlam Investments UK Limited

## SATRIX WORLD EQUITY TRACKER FUND

### Investment Objective

The investment objective of the Satrix World Equity Tracker Fund (the "Fund") is to provide capital growth equivalent to that gained from investment in world equity markets.

### Fund Performance

The Fund's benchmark is the MSCI World Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund satisfactorily tracked its benchmark, the MSCI World Index, across the first six months of 2023. The absolute return for the Fund was 15.11%, while the benchmark returned 15.09%, giving a positive deviation of +0.02% over the period. The absolute returns across Q1 and Q2 closely tracked the benchmark, at 7.74% and 6.84% respectively. Since inception the Fund has now deviated from its benchmark by -0.61% on an annualised basis. As noted in the Economic and Market Review, markets have been remarkably resilient overall in H1, 2023. This has been driven by the growthy part of the market, which rebounded in Q1 from the pain of 2022, and was compounded in Q2 amid the fervour around artificial intelligence. However, this has meant equity markets have been very narrow in their market leadership during H1 2023 with the so-called "Magnificent Seven" (Apple Inc., Microsoft Corp., NVIDIA Corp., Amazon.com Inc., Meta Platforms Inc., Tesla Inc. and Alphabet Inc.) contributing more than 50% of index returns reflecting the concentration of outsized returns in mega caps.

### Fund Outlook

Looking forward the key aspect continues to be inflation, and the corresponding central bank policy responses. These will determine the path for the global economic outlook and in turn for markets. What is clear is that the path for inflation varies in different countries and so there will be deviations in how central banks react. US inflation releases in early July for end of June data show inflation materially undershooting expected levels for the first time in months. That said, inflation is unlikely to fall in a straight line, and risks of stickier inflation emerging remain. The UK, in contrast to the US, is an example of this and the service heavy UK economy is suffering from sustained services inflation, which is keeping inflation persistently high.

Given the uncertainty, interest rate cuts for the major developed central banks have been taken off the table for 2023 and are now not expected until 2024. However, the market is generally underestimating the likelihood of central bankers keeping interest rates on hold for longer and at a higher level. The longer that interest rates remain high the more liquidity will be withdrawn from the system, and the more likely there are risks to the downside for economies. Despite recent confidence of a soft-landing emerging, the rapid tightening of monetary policy seen over the last two years will almost certainly, at some point, end up with recession. That now looks like a 2024 event for the US economy, while it might emerge in late 2023 for the UK economy, and somewhere in between for other regions. In short, a slowdown to near zero growth levels or below seems almost inevitable. The risk is that the slowdown is more severe than that, and a deeper and more prolonged recession takes hold. Elsewhere geopolitical risks remain, not least the ongoing events in Ukraine, but also the increasing technological cold war between the West and China.

**SATRIX WORLD EQUITY TRACKER FUND (CONTINUED)****Fund Outlook** *(continued)*

Consequently, equity markets look to be facing headwinds on several fronts: firstly, equities have run hard in 2023 so far; secondly, equity markets have been very narrow; thirdly, earnings, while having been robust and surprisingly resilient, look unlikely to be sustainable at current levels; and fourthly, valuations, having expanded in 2023, look stretched for an economic downturn, and are more likely to come under pressure. Consequently, the risks to equities are skewed to the downside, the extent of this being governed by the nature and magnitude of any economic slowdown.

Overall, the wider outlook remains one of uncertainty and divergence, across inflation, interest rates and recession. Despite this unknown in absolute space, the Fund should continue to meet its objective and efficiently track the benchmark during H2, 2023.

**Investment Manager**

Sanlam Investment Management (Pty) Limited

## SIIP INDIA OPPORTUNITIES FUND

### Investment Objective

The investment objective of the SIIP India Opportunities Fund (the "Fund") is to provide long-term capital growth.

### Fund Performance

The Fund's benchmark for performance comparison purposes is the Bombay Stock Exchange 500 Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund had a strong first half of 2023, from both an absolute and relative perspective. It returned 9.95% in absolute terms, outperforming the Bombay Stock Exchange 500 Index by +3.07%. The outperformance came across Q1 and Q2, at +2.12% and +0.70% respectively. In absolute terms there was significant divergence across the two quarters however – Q1 saw a -3.13% decline for the Fund, versus a strong 13.50% gain in Q2, as Indian equity market fortunes reversed. The Fund is positioned with an underweight to large-cap stocks and an overweight to smaller-cap stocks, which has caused some of this outperformance as the market turned risk-on during the Q2 rally. The Fund now lags the benchmark by -0.53% on an annualised basis since inception, with an absolute annualised return of 5.37%.

### Fund Outlook

Looking forward the key aspect continues to be inflation, and the corresponding central bank policy responses. These will determine the path for the global economic outlook and in turn for markets. India, in contrast to the likes of the US, saw its June CPI increase compared to May, driven by a spike in food prices. Consensus expectation is for a further uptick to be seen in the July print.

Given the uncertainty, much like in many other countries, interest rate cuts for India would appear to have been taken off the table for 2023 and are now not expected until 2024. India, however, is at a different point in the economic cycle, to their benefit, with real GDP projections over the next year some of the highest globally.

Due to its strong economic outlook, concerns of recession, even a shallow one, are not on the radar for Indian equities, reflected in the very strong Q2 performance they have enjoyed, which has been led by mid and small-cap stocks. Given the stable macro side, there are unlikely to be any material headwinds going into the second half of the year, though the standout one is on the inflation front, should it materially pick up from here. Assuming this does not occur, stock specific surprises, such as earnings, positive or negative, will largely drive performance. Given the strong moves valuations have expanded, which is not in itself a major risk factor, but could mean some profit taking in the shorter-term.

Overall, the wider outlook remains one of relative optimism compared to other equity markets. The biggest positive differentiator for India is the underlying growth coming through, though an awareness is needed of the inflationary risks, which are synonymous with the rest of the world. If inflation does tick up further from here this could threaten some of the relative attractiveness of India over other markets, particularly if these markets do indeed see inflation decline into a soft-landing scenario.

### Investment Manager

Sanlam Investment Management (Pty) Limited

## SATRIX EMERGING MARKETS EQUITY TRACKER FUND

### Investment Objective

The investment objective of the Satrix Emerging Markets Equity Tracker Fund (the “Fund”) is to provide capital growth equivalent to that gained from investment in the emerging equity markets by tracking the performance of the MSCI Emerging Markets Index.

### Fund Performance

The Fund's benchmark is the MSCI Emerging Markets Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund satisfactorily tracked its benchmark, the MSCI Emerging Markets Index, over the first six months of 2023. The absolute return for the Fund was 4.73%, while the benchmark returned 4.89%, giving a negative deviation of -0.15% over the period. The absolute returns in Q1 and Q2 closely followed the benchmark, at 3.91% and 0.80% respectively. Since inception the Fund has now deviated from its benchmark by -0.45% on an annualised basis. Whilst developed markets outperformed during H1 2023, weak manufacturing and consumer-spending numbers in China reported in May weighed heavily on the performance of Emerging Markets, which otherwise was good, given strong contributions to performance from India and Brazil.

### Fund Outlook

Looking forward the key aspect continues to be inflation, and the corresponding central bank policy responses. These will determine the path for the global economic outlook and in turn for markets. What is clear is that the path for inflation varies in different countries and so there will be deviations in how central banks react. India, in contrast to the US, saw their June CPI increase compared to May, driven by a spike in food prices. Consensus expectation is for a further uptick to be seen in the July print. Meanwhile China is flirting with deflation at the other end of the spectrum.

Emerging markets such as India and China, however, generally seem to be at a different point in the economic cycle, to their benefit, with real GDP projections over the next year higher than developed regions. This aside, global geopolitical risks remain, not least the ongoing events in Ukraine, and the increasing technological cold war between the West and China.

One of the major things holding emerging markets back so far this year has been China. The post-covid reopening rally was short-lived and has been replaced by consistently disappointing economic data since. This has not yet shown signs of abating, and the added pressure from deflationary risks is compounding this. The property industry also remains precariously balanced and in need of management. In contrast, India is enjoying very strong growth prospects, which has seen equities there significantly outperform China in recent months. Hence it is clear that while developed markets are showing signs of deviation from emerging markets, within emerging markets too there is a wide range of potential outcomes and risks to be managed.

**SATRIX EMERGING MARKETS EQUITY TRACKER FUND (CONTINUED)****Fund Outlook** *(continued)*

Overall, the wider economic picture appears to be mixed for emerging markets and will depend on the respective paths for inflation and macroeconomic data across different countries. Despite the uncertainties for markets generally, the Fund should continue to efficiently track the benchmark, while any positive or negative deviations will depend on the Fund's ability to successfully track its benchmark.

Sanlam Investment Management (Pty) Limited

## SANLAM AI GLOBAL MANAGED RISK FUND

### Investment Objective

The investment objective of Sanlam AI Global Managed Risk Fund (the “Fund”) is to provide long-term capital growth through flexible exposure to world equity markets.

The Fund seeks to achieve its investment objective by investing in the shares of the Satrix World Equity Tracker Fund (the “Master Fund”) a sub-fund of the Company. The Fund will invest no less than 85% of its Net Asset Value in the shares of the Master Fund.

The Fund also utilises an Artificial Intelligence (“AI”) supported risk management strategy designed to minimise capital loss and time in loss. Time in loss is a measurement of risk and refers to the period of time from the start of a drawdown in the Fund’s Net Asset Value (“NAV”) to the point by which the NAV has recovered and exceeds the previous peak NAV. This AI supported risk overlay is implemented by the Investment Manager, through the use of financial derivative instruments to adjust the net equity exposure of the Fund to the global equities underlying the Master Fund depending on the prevailing market conditions. Although this strategy intends to minimise market risk it does mean that in rising markets the Fund will not rise to the same degree as the Master Fund as the Fund will always carry some degree of effective short exposure.

### Fund Performance

*The Fund’s comparative benchmark is the Morningstar EAA USD Flexible Allocation Category. Note: Performance figures longer than 12 months are annualized. Figures are quoted net of fees.*

For the first half of 2023, the Fund produced a return of 12.33%, whilst its comparative benchmark (the Morningstar EAA USD Flexible Allocation) had a return of 5.35%. Over the same period, the absolute return for the Master Fund was 15.11%.

Despite a tough global economic backdrop, persistently high core inflation and rising central bank policy rates across most of the developed world – global equities delivered strong positive returns over the first half of 2023 which is reflected in the performance of the Fund resulting from its investment in the Master Fund.

As an example of the Fund’s weekly flexible asset allocation decisions, please see below the net equity exposure since the inclusion of the AI investment engine as part of the investment strategy in June 2017 up to June 2023.

## SANLAM AI GLOBAL MANAGED RISK FUND (CONTINUED)

### Fund Performance (continued)

### Fund Outlook

As a feeder fund investing into the Master Fund, the Fund's outlook for the second half of 2023 is largely consistent with that of the Master Fund. Equity markets look to be facing headwinds on several fronts: firstly, equities have run hard in 2023 so far; secondly, equity markets have been very narrow; thirdly, earnings, while having been robust and surprisingly resilient, look unlikely to be sustainable at current levels; and fourthly, valuations, having expanded in 2023, look stretched for an economic downturn, and are more likely to come under pressure.

Conversely, it seems difficult to present a bull case for equities in the absence of an upswing for global economic growth, which seems unlikely in the light of central bank tightening. Markets would need to see a broadening in the rally away from the 'Magnificent Seven' coupled with some strong earnings guidance to truly get behind any sustainable rally going into H2. Consequently, the risks to equities are skewed to the downside, the extent of this being governed by the nature and magnitude of any economic slowdown.

Overall, the wider outlook remains one of uncertainty and divergence, across inflation, interest rates and recession.

It is anticipated that the Fund will continue to "smoothen" the investment journey for shareholders and provide better risk-adjusted returns over a market cycle when compared with an investment in the Master Fund.

### Investment Managers

Sanlam Investment Management (Pty) Ltd

## SANLAM GLOBAL HIGH QUALITY FUND

### Investment Objective

The Sanlam Global High Quality Fund (the “Fund”) aims to produce compounded total returns in excess of the MSCI World index over the medium to long term, through a concentrated portfolio of high quality stocks, using our proprietary quantitative screening process combined with rigorous fundamental research.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the MSCI World Total Return Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of investment management fees.

The Fund has outperformed the market since inception with the net asset value increasing by 11.64% annualised compared to a gain of 11.51% for the comparative benchmark, the MSCI World Total Return Index. For the 6 month period ended 30 June 2023, the Fund has underperformed the global equity market returning 5.74% versus 8.89% for the global equity market as measured by the benchmark.

During the first half of 2023, the Fund purchased positions in Kering and Intercontinental Exchange, and exited positions in Yum China, Edwards Lifesciences and Sabre.

A lot has been written about the leading economic indicators pointing towards a global recession in 2023. The futility of trying to predict short term stock market outcomes based on economic indicators is illustrated by very weak leading indicators, yet the stock market has roared ahead over the first six months of 2023.

What is noticeable this year has been the out performance of growth stocks. This year the MSCI World Growth Index returned, in US\$ terms, 27.1% vs 4.0% for MSCI World Value Index. Our largest contributors to returns this year included Microsoft, Alphabet, Fiserv, Samsung and NetEase. We don't believe in labelling the companies we own in a singular 'growth' or 'value' category. Valuation to us reflects a philosophy to own quality companies below intrinsic value, only when they make valuation sense. Our companies have the ability to grow free cash flow over time whilst maintaining a high return on capital due to a strong economic moat. They hold dominant positions as world leaders in secular growth industries. They have exemplary balance sheet strength, and sound capital management measured by a high return on equity.

**SANLAM GLOBAL HIGH QUALITY FUND (CONTINUED)****Fund Outlook**

Returns in the equity market to date have been particularly dominated this year by a select few mega-cap companies. On average, we believe mega-cap quality companies are expensive, and thus selectivity is key. Given the fact that the technology sector's fundamentals are getting more and more divorced from its relative strength against the wider market we are turning more cautious on some of our technology names. This is different to last year when we were actively buying into new technology names (Intuit) and adding to existing positions in late 2022 and early 2023 (noticeably SAP, Microsoft, Alphabet and Fiserv).

A bifurcation of returns between the select few names dominating the global equity market's returns this year, and those left trailing behind leaves us excited for the opportunity to invest in high quality companies at compelling valuations.

**Investment Manager**

Sanlam Investments UK Limited

## HIGH STREET GLOBAL BALANCED FUND

### Investment Objective

The High Street Global Balanced Fund ("the Fund") aims to provide a high level of income and the potential for capital growth. It aims to achieve this by combining growth investments that are undervalued relative to their prospects with mature, dividend-yielding securities.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against 1/3 Equity (MSCI ACWI Index), 1/3 Property (EPRA/NAREIT Developed Index), 1/3 Bonds (Barclays Global Index). Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

The first half of 2023 has been more favourable for balanced portfolios such as the Fund compared to the challenges faced in 2022. Equities have been the driving force behind the recovery, with the MSCI All Country World Total Return Index and the S&P 500 Index delivering returns of 13.9% and 16.9%, respectively. Critics of the current market rally have highlighted its limited breadth, especially evident in the S&P 500 where the performance has been largely fuelled by a select group of technology stocks. While equities have rebounded, bonds faced difficulties in the previous year and have yet to see substantial recovery, with the Bloomberg Barclays Global Bond Total Return Index showing a modest 1.4% increase for the year. Despite this, we see value in bonds given their attractive yields and have been gradually increasing the fixed income exposure over the course of the last 12 months. Overall, the Fund has performed well over the first half of the year, achieving a commendable return of 19.96%, significantly outperforming the benchmark return of 5.55%.

Over the 6 month period ended 30 June 2023, notable performers within the equity component included Nvidia and Meta Platforms. The property component of the Fund performed particularly well during April, propelled by UK multi-let industrial property company Industrials REIT. Industrials REIT's value surged by 40% following the announcement of Blackstone Inc.'s agreement to acquire it at a 42% premium over the current price. German property company LEG Immobilien also stood out as a strong performer, delivering a 12% return during April.

**HIGH STREET GLOBAL BALANCED FUND (CONTINUED)****Fund Outlook**

The U.S. economy has proven resilient in the face of the Federal Reserve's aggressive monetary policy, so far avoiding a recession many forecasters were predicting at the start of 2023. However, going into the second half of the year many of the same issues remain. Inflation still stands well above the 2% level the Fed would like before it begins pulling back on monetary policy tightening. Additionally, concerns about deteriorating corporate earnings in the coming two quarters continue to circulate. Other probing questions on investors' minds include:

- 1) Can the current market rally broaden to become more sustainable?
- 2) Given the expected decline in corporate profits and with yields on fixed income assets at their highest levels in decades, can equities compete with bonds for the remainder of the year?
- 3) Will Artificial Intelligence bear financial fruit?

As it has in recent years, the geopolitical landscape remains central to the narrative as the US & China trade tensions continue to escalate and the Russia-Ukraine conflict rages on.

We believe the Fund is well balanced going into the second half of the year. The fixed income component now makes up 25% of the Fund as a result of adding incrementally throughout the first half of the year and we are constructive on bonds with medium to long durations. The equity and property components are also well balanced across various sectors and geographies, although the Fund maintains a bias towards the US. As a result, the economic situation in the US remains the biggest risk.

**Investment Manager**

High Street Asset Management (Pty) Ltd

## SANLAM SUSTAINABLE GLOBAL DIVIDEND FUND

### Investment Objective

The Sanlam Sustainable Global Dividend Fund (the “Fund”) aims to achieve (after deduction of costs) growth in both income and capital over rolling five-year periods, whilst delivering a yield higher than that of the MSCI World Index (the “Benchmark Index”) and maintaining a MSCI ESG rating of AA or above. The Fund has been managed to this investment objective since 4<sup>th</sup> December 2020.

The Fund meets the classification of an Article 8 fund under the Sustainable Finance Disclosure Regulation (SFDR), through the promotion of environmental and social characteristics in the ESG pillars and through the application of the proprietary Sustainability Scorecard utilised by the Investment Manager.

### Fund Performance

*The Fund is benchmarked for performance comparison purposes against the MSCI World Index (in GBP). Performance figures longer than 12 months are annualised. Figures are quoted gross of fees.*

Equity markets started the year in a buoyant mood thanks to the belief in stronger global growth prospects than previously thought, also known as a soft-landing. Several factors drove this belief: China moving from a zero-COVID policy; strong labour markets in the US; and falling inflation expectations on lower energy prices and better functioning supply chains. Investors expected Central Banks to be less hawkish, and markets were pricing in interest rate cuts by the end of 2023 from the Federal Reserve.

Equity markets were less sanguine from February through May thanks, in part, to a potential banking crisis in the US and fears of what rising interest rates might mean for consumers and the more indebted parts of the corporate world. Later in the first half a more optimistic mood regained prominence as investors focussed on the powerful narrative of robust earnings, cooling inflation, the potential end of monetary tightening and firming economic growth. The result was a first half 15.09% increase in the MSCI World Index.

The market posted a 7.73% increase in Q1 with only three sectors outperforming. These were the technology related sectors of IT, Communication Services and Consumer Discretionary. Within these sectors the bigger stocks performed the best. Nvidia was the strongest IT stock with an increase of +90%, Meta the strongest Communication Services stock with an increase of +76% and Tesla the strongest Consumer Discretionary stock posting a rise of +68%. At the end of June 2023 all three of these stocks were in the top ten constituents of the MSCI World Index.

In Q2 the market increased by 6.83%. Again, only three sectors outperformed, and it was the same three as in Q1. The lack of breadth in the market was demonstrated by the strength of technology related stocks in the top ten constituents of the market. Nvidia rising by 52%, Meta by 35% and Amazon by 26%.

As a result, only these three sectors, out of the eleven sectors in the MSCI World Index, managed to outperform the index over the course of the first half of 2023. The impact of the performance of the mega-tech stocks is illustrated by comparing the MSCI World Index with the MSCI World Equal Weighted Index, the latter assigning an equal weighting to all constituents. In H1 2023 the MSCI World Index rose 15.09%, in contrast the MSCI World Equal Weighted Index rose 9.0%.

**SANLAM SUSTAINABLE GLOBAL DIVIDEND FUND (CONTINUED)****Fund Performance** *(continued)*

Throughout the year the portfolio has remained as balanced as possible. The key factor exposures, which are small, are being overweight Low Volatility and Dividend Yield and being underweight Growth and Small Cap. These exposures are spread across the sectors. The main driver of the underweight Growth comes from not owning the zero and near zero yield technology stocks such as Amazon, Alphabet, Tesla, Nvidia and Meta, all of which are amongst the largest in the MSCI World Index (~8% in total).

The Fund's -3.92% relative underperformance versus the benchmark in the first half was dominated by stocks not owned in the three sectors that outperformed. Nvidia, Meta, Tesla and Amazon all featured in our bottom ten attribution list costing the Fund nearly 2.8%. IFF, the flavour and fragrances company, fared poorly due to volume declines but we expect these to recover. Our strongest stocks included: Ecolab, the cleaning, hygiene, and water treatment company, which is recovering well post the pandemic; Schneider the digital automation and energy management firm benefiting from the energy transition; and Publicis, the advertising company, enjoying strong growth from its differentiated offering.

**Fund Outlook**

At the time of writing, global consensus earnings forecasts for 2023 have been stable over the last 6 months. Robust earnings seasons combined with cooling inflation data, which could presage the end of monetary tightening, have resulted in strong equity markets in 2023 so far. We estimate the MSCI World is discounting around 10% annualised earnings growth over 2023 to 2025. The market re-rating has taken it back to within a few % of its January 2022 highs.

The market continues to vacillate between the bull and bear thesis as it second guesses economic data and central bank policies. Central banks are also wavering between raising interest rates to control stubborn inflation and pausing / cutting rates to avoid recessions. The bull thesis of robust earnings, cooling inflation, the end of monetary tightening and a firming of economic growth appears to be winning. This thesis has been supported by the last few quarters' earnings seasons and recent US and UK inflation data.

Market valuations are now less palatable as investor sentiment has swung more positive. Key risks are known and anticipated but the overarching threats of lacklustre economic growth and high inflation as well as a retracement in equity market returns continue to be a real prospect. As a result, we believe we should remain as balanced as possible in terms of style given our dividend bias, favouring strong companies with rock solid balance sheets and resilient cashflow generation. We expect a continuation of inconsistent style leadership due to this delicate growth versus inflation backdrop.

**Investment Manager**

Sanlam Investments UK Limited

## SANLAM ACTIVE UK FUND

### Investment Objective

The Sanlam Active UK Fund ("the Fund") aims to target capital growth over the longer-term.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the MSCI UK. Performance figures longer than 12 months are annualised. Figures are quoted gross of investment management fees.

The Fund returned 1.47% for the 6 month period ended 30 June 2023, while the benchmark MSCI UK was up 2.60%, a relative underperformance of -1.13%. The Fund underperformed during Q1 but outperformed in Q2, but was unable to make up the deficit. However, on a 12 month basis, the Fund is pleasingly ahead of its benchmark.

During H1, we added two new positions to the Fund, London Stock Exchange Group, and Parker Hannifin (note, the Fund is permitted to invest up to 20% of its net asset value in securities listed outside of the UK). Taking a long-term view, and if our analysis of their value is correct, we look forward to the contribution these new positions could make over the coming years.

We sold completely out of two positions during H1, namely Thungela and OSB Group. These were smaller, non-core positions, and we had received Thungela as a spin off from Anglo American. We remain very reluctant to sell any positions if their investment case has not deteriorated and outright sales are somewhat rare. The portfolio is focused with 30 companies at present.

Disaggregating the relative performance, stock allocation helped, while stock selection hindered the relative performance. However, the difference in performance overall with the benchmark was not large during H1.

On stock selection, the most noteworthy stock in the Fund in the first half of 2023 was Rolls Royce. This company had long been a frustrating laggard but we remained loyal to the holding as we felt that the long term investment thesis was intact, in spite of the impact Covid had on the aircraft business. Of course, we had no idea that Covid would come, but Rolls retained their global market position in widebody engines and can now flourish as the world recovers. Its stock price was up almost 60% in H1. Conmed was another winner as their manufacturing plant issue waned. Detractors included Anglo American and Glencore as fears grew about the global economy.

The Fund remains well diversified, with holdings in nine of the eleven GICS sectors.

We remain intensely focused on the businesses we own for our investors in the Fund, rather than getting distracted by macro noise. We think the valuation of the companies in the Fund, on the whole, do not reflect the bright futures we think they have in store.

As always we remain focused on buying very good businesses, on attractive valuations, and then holding them for the long term. If we can do this well, the outcome for investors should be satisfactory.

### Investment Manager

Sanlam Investments UK Limited

**SANLAM MULTI-STRATEGY FUND**

**Investment Objective**

The investment objective of the Sanlam Multi-Strategy Fund (the “Fund”) is to seek to outperform the UK Consumer Price Index (“CPI”) over five-year periods with a target of generating a positive absolute return on a rolling three-year basis. There is no guarantee that this target will be achieved.

**Fund Performance**

*The Fund is benchmarked for performance comparison purposes against UK CPI. Performance figures longer than 12 months are annualised. Figures are quoted gross of fees.*

The first half of the year was a challenging period for fixed income and real assets as persistent inflation (particularly in the UK) put upwards pressure on interest rates and downward pressure on asset prices, even those assets with inflation linkage that benefit from the current environment. Hopes for a peaking of rates remain but the data-dependent decision-making by central banks requires actual evidence. The risk is that by the time the economic releases show the evidence they are looking for, the delayed impact of the aggressive tightening will have resulted in a slowdown/recession which may require a swift reversal of the tightening cycle.

At fund level, positive contributions came from Global Equity and Bonds, where in the latter our short-duration strategy produced a positive return against a more challenging market backdrop. Real Assets detracted from performance. At strategy level, the largest contributors were Synthetic Equity, Investment Grade Debt and Money Market, while the largest detractors were Renewable Energy, Specialist Property and Infrastructure. Short-term sentiment has continued to diverge from strengthening fundamentals, and the recent pressure on real asset share prices has been largely driven by selling from undiscerning and price-agnostic, index-based products. Labelled by one broker as “share price insanity”, this largely technical phenomenon has opened up highly attractive prices in businesses that stand to benefit from substantial uplifts in revenues as contractual reviews capture recent backward-looking inflation prints.

**Fund Outlook**

Global inflation remains the key economic indicator that will either relieve the pressure on central banks and asset markets or remain a burden for all. Early signs of inflation moderating have faded and for now central banks continue to tighten which, in turn, raises fears of recession. Heightened market sensitivity to near-term economic developments presents risks and opportunities for long-term investors. Softer equity pricing has created higher prospective returns, but investors must be more discerning of fundamentals. Energy security and the drive to net-zero will remain supportive of markets and we see continued opportunities in production, storage and efficiency solutions. In the real asset space, high-quality operational assets continue to offer investors the opportunity to take a long-term view and get paid along the way. These long-life, mission-critical assets offer a good degree of inflation linkage and continue to report strong operational performance.

**SANLAM MULTI-STRATEGY FUND (CONTINUED)****Fund Outlook** *(continued)*

Fixed income has started to offer attractive value for the first time in many years. The inflation surge in 2022 proved too much for central banks to ignore and led to an aggressive tightening cycle. The words “Overshoot” and “Pivot” will be heavily used in market commentary but the likely path for interest rates will be a moderation of rate increases followed by a pause (perhaps for an extended period) and then cuts.

The combination of short-duration bonds and long-life, operational, inflation-linked real assets provides a solid income-producing base. Equity upside optionality completes the convertible profile and provides a framework for our participate and defend philosophy. The natural yield of the Fund is 6.3 % and the Fund remains well-positioned to navigate the current challenges and continue to take advantage of the opportunities presented.

**Positioning**

As has been the case since 2015, we continue to position the portfolio with the profile of a diversified convertible. We favour option-based equity exposure (rather than pure directional investments) alongside income-producing real assets and short-duration bonds.

**Investment Manager**

Sanlam Investments UK Limited

## ANCHOR GLOBAL STABLE FUND

### Investment Objective

The Anchor Global Stable Fund (“the Fund”) aims to provide capital growth over the long term.

### Fund Performance

The Fund is bench marked against average CPI of G7 countries + 1.5% p.a. for performance comparison purposes. Performance figures longer than 12 months are annualised. Figures are quoted net of fees. Opening NAV is taken as USD1, based on the theoretical close on 27/2/2015.

The Fund had a positive first half of 2023 producing a return of 2.36%. It was a generally supportive market environment for global markets in 1H23, with most equity markets up in the mid teens, though the equity market performance was heavily skewed towards 11 megacap tech stocks and semi-conductor companies that are potential Artificial Intelligence (“AI”) beneficiaries. These 11 shares represent approximately a quarter of the S&P 500 but were responsible for 80% of performance in 1H23. The Fund tends to have a much more diversified and conservative equity portfolio, leaving it under-exposed to the AI beneficiaries and as such, the performance of the Fund’s equity allocation lagged that of the market during the period.

Despite this lack of exposure to the AI beneficiaries and an underweight positioning in equity exposure (c. 20% vs. the neutral allocation of 25%), the equity allocation was responsible for c. 45% of the Fund’s 1H23 performance. Long-term rates drifted moderately higher during 1H23, but despite this headwind, the Fund’s fixed income allocation performed relatively well benefiting from a slightly lower duration, above average coupon income and tightening credit spreads.

### Fund Outlook

The Fund remains conservatively positioned, with equity towards the bottom end of its typical long-term allocation range (20 – 30%). While valuations remain only marginally above average, we believe the risk of earnings disappointments remains elevated. We favour bonds at the moment where we believe elevated yields provide a low-risk source of return for the Fund’s investors and also offer the prospect of some capital gains should the much-anticipated economic slowdown eventually materialize. The Fund remains at the bottom of its allocation range (5-15%) for listed real estate investments, with the asset class facing multiple structural challenges and a strong cyclical headwind, particularly in the US where the mid-sized banks that are a key source of funding to the industry are experiencing severe strains and lending conditions have tightened meaningfully. We anticipate that as the shorter duration fixed income allocation rolls off, it will hopefully be an opportune time to deploy capital into equity markets at more reasonable valuations.

### Investment Manager

Anchor Capital (Pty) Ltd

## ANCHOR GLOBAL EQUITY FUND

### Investment Objective

The Anchor Global Equity Fund (the "Fund") aims to provide capital growth over the long term.

### Fund Performance

The Fund is benchmarked against MSCI World All Country Total Return Net USD Index for performance comparison purposes. Performance figures longer than 12 months are annualised. Figures are quoted net of fees. Opening NAV is taken as USD1, based on the theoretical close on 13/3/2015. Excess return is calculated on an arithmetic basis.

The Fund lagged the benchmark in 1H2023 for two main reasons:

- First, the Fund came into the year too defensively positioned. Recognising that the macro picture had improved, given falling inflation and an increased likelihood of a soft landing in the US, we subsequently shifted the portfolio into higher beta areas of the market (including mid-cap growth shares and China). In retrospect, the timing of this shift wasn't optimal, and hurt performance.
- Second, the Fund was underweight the mega cap growth names (e.g. Apple, Microsoft, Nvidia) relative to the benchmark in a period in which they performed exceptionally well (the Nasdaq had its best first half performance since 1983). Our view had been that the mid-cap growth names offered better expected returns on a 3-to-5-year horizon. That view still holds (even more so today as the mega caps have largely become expensive relative to their own histories in terms of PE ratios). The mega cap stocks tend to behave differently than other names, which over the short term has more to do with liquidity and less with fundamentals, in large part due to the impact of passive and quantitatively oriented investment strategies.

### Fund Outlook

We are somewhat cautious on the market at the index level, given that several of the mega-cap stocks are expensive. Nevertheless, we see opportunities in three main areas:

- 1) Mid-cap growth stocks which haven't participated in the rally to the same degree as the mega caps,
- 2) Chinese equities, which are extremely cheap relative to their own histories as well as international peers, and
- 3) High quality, low volatility stocks which have been discarded in the market's rush for popular themes such as AI.

We believe that the latter group has the potential to offer both defensiveness as well as potentially attractive absolute and relative returns.

### Investment Manager

Anchor Capital (Pty) Ltd

## SANLAM GLOBAL EMERGING MARKETS FUND

### Investment Objective

The Investment objective of Sanlam Global Emerging Markets Fund (the "Fund") is to seek to achieve long-term capital growth by outperforming the MSCI Emerging Markets TR Net Index (Bloomberg code: NDUEEGF) over a rolling three year period. Investors should note that the Fund does not track the Index

### Fund Performance

The Fund is bench marked against MSCI Emerging Markets Index. Note: Performance figures longer than 12 months are annualised. Figures are quoted gross of fees.

Emerging Markets, as measured by the MSCI Emerging Markets Index, rose +4.89% over 1H23 but significantly underperformed the MSCI Developed Markets. Returns in Developed Markets were boosted by Big Tech and AI, propelling Nasdaq to its best first half in 4 decades, even bigger than the '99 NASDAQ bubble.

The Fund itself increased by 5.50% during H1 2023, outperforming our benchmark by 0.61%. The performance of the Fund during the first half of 2023 was less impacted by regions and more so by individual stock picks. The main contributors to performance during Q1 were FEMSA, Aspen and Pindoudou. Other notable performers during the quarter were NetEase, Novatek and Lenovo. For Q2, the main contributors were Arcos Dorados, XP Inc and FEMSA. Other notable performers during the quarter were Netease, Odontoprev and LIC. Short term earnings concerns (All cyclical and not structural in nature) were the key driver of underperformance in shares like JD.Com, Samsung Electronics, LIC Housing and Vianet which detracted from performance during both Q1 and Q2. We however pay less attention to short term fluctuations in earnings and rather focus on the long term earnings power of the businesses. As a result, we have used the opportunity to increase our holdings in these businesses.

### Fund Outlook

The divergence in performance between developed markets relative to emerging markets, particularly the US for the last decade has created a significant opportunity for long term investors. As we always stress, markets move in cycles and in the long term, the starting valuation matters. Emerging Markets trade on decade low multiples relative to its developed world counterparts and have better growth potential in the long term. A recent bottom-up analysis of our portfolio highlighted a staggering 69% upside in local currency, a number we find extremely attractive post the sell-off. This upside combined with undervalued emerging market currencies, make us positive global emerging markets is an attractive asset class for long term investors.

### Investment Manager

Sanlam Investment Management (Pty) Ltd

## SANLAM CENTRE AMERICAN SELECT EQUITY FUND

### Investment Objective

The investment objective of the Sanlam Centre American Select Equity Fund (the “Fund”) is achieve long-term capital growth.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the MSCI North America Index. Note: Performance figures longer than 12 months are annualized. Figures are quoted gross of fees.

For the 6 month period ended 30 June 2023, the Fund gained 12.38%, underperforming its performance benchmark by -4.05%. Set out below is a summary of the performance attribution (Sectors and Notable Stocks):

#### What Helped

- Financials due to underweight allocation and stock selection (Berkshire Hathaway)
- Utilities due to underweight allocation
- Industrials due to underweight allocation and stock selection (Hexcel, Flowserve, Kirby)
- Consumer Discretionary due to stock selection (Amazon.com, Mercadolibre)
- Real Estate due to underweight allocation
- Communication Services due to stock selection (Meta Platforms) partially offset by underweight allocation
- Health Care due to stock selection (Medtronic, Zimmer Biomet, Eli Lilly) partially offset by overweight allocation

#### What Detracted

- Derivatives (S&P 500 Index protective put options)
- Information Technology due to underweight allocation
- Energy due to overweight allocation and stock selection (APA Corp.)
- Consumer Staples due to overweight allocation
- Materials due to overweight allocation and stock selection (Sibanye-Stillwater, FMC, Corteva)

**SANLAM CENTRE AMERICAN SELECT EQUITY FUND (CONTINUED)****Fund Outlook**

We believe that now is one of the more challenging market outlooks during our careers as we see limited upside from market participation driven by a valuation re-rating should interest rates moves lower, with the potential of a significant drawdown if an earnings recession takes hold. Despite the current challenges, we believe stock picking opportunities exist and, when deemed tactically advantageous, we will continue to complement underlying equity securities with hedges and other capital preservation strategies in order to further dampen the negative impact from downside beta. We continue to emphasize more idiosyncratic risk-oriented companies that are less influenced by a pervasive market effect in the Health Care and Consumer Staples sectors. Within cyclical segments, the Fund is focused on special situation stocks in the Industrials sector and Oil & Gas Transportation and Agricultural Chemicals industries. In sum, a portfolio designed to be relatively defensive thematically in an environment of a shallow but lingering economic slowdown with falling but persistently higher inflation (than the Federal Reserve's two percent target) in the U.S. We believe our disciplined high-conviction approach to stock selection, with a cognizance of risk management, seems positioned to perform well relative to less risk aware and less historically appreciative strategies.

**Investment Manager**

Centre Asset Management, LLC

## SANLAM GLOBAL CONVERTIBLE SECURITIES FUND

### Investment Objective

The investment objective of the Sanlam Global Convertible Securities Fund (the “Fund”) is to provide global equity-like returns with significantly less risk over a full market cycle. The objective is achieved by seeking to capture the majority of stock market advances while simultaneously providing downside protection when markets decline.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against 3 Month US SOFR +300 bps. Note: Performance figures longer than 12 months are annualised. Fund returns are quoted net of fees.

Global equity markets rallied substantially during the first half of 2023 primarily driven by three themes: benign inflation data raising hopes of a central bank pivot, resilient US macroeconomic data increasing the odds of a soft landing, and the potential earnings impact of regenerative AI. The risks associated with rising geopolitical tensions, March’s banking crises, and periods of uncertainty regarding the direction of monetary policy and resiliency of the global economy impacted the market at times but were ultimately shrugged off by investors.

Although the rally broadened toward the end of the second quarter, a narrow band of US mega cap growth/tech stocks, particularly those linked to AI, accounted for almost half of global equity index gains. Japan equities also posted strong returns, while Europe and Asia ex-Japan underperformed. The narrowness of the rally can be seen in the disparity of returns between the Technology dominated MSCI ACWI Growth Index (+24.5%) and the market cap weighted ACWI Index (+14.4%), compared to a return of just 6.6% for the ACWI Equal Weighted Index. Technology and Consumer Cyclical posted the largest returns, while Utilities and Energy were negative for the first half.

Fixed income returns were positive, led by high yield. Corporate spreads widened significantly in Q1 due to the banking crisis but fears rapidly diminished and spreads tightened to levels below year end 2022. Convertibles benefited from the strength in equities and fixed income but couldn’t keep pace with the narrow mega-cap tech rally driven by the AI narrative as the top global equity performers did not have associated convertible debt. Convertible issuance rebounded strongly during the 1st half with US\$39 bn issued globally, the majority out of the US. Terms were generally favorable with higher coupons and lower premiums. In addition, deals have been diversified across sectors and credit quality, with a noticeable increase in IG paper.

**SANLAM GLOBAL CONVERTIBLE SECURITIES FUND (CONTINUED)****Fund Performance** *(continued)*

The Sanlam Global Convertible Securities Fund returned +6.07% net for the first half of 2023. Upside capture versus the market cap weighted MSCI ACWI index was somewhat lower than normal due to the narrowness of the equity rally but exceeded expectations compared to the ACWI equal weighted index where the Fund captured virtually all the upside. The Fund also displayed solid downside protection during the short-lived periods of market stress. The Americas and Europe were the top contributors followed by Asia ex-Japan. Japan was a modest detractor as the Fund's balanced holdings underperformed the market. From a sector perspective, Technology was the largest contributor followed by Industrials and Consumer Cyclical. Healthcare and Basic Materials were the only detractors. The Fund outperformed the benchmark of US 3m SOFR +300BPS during the period to 30 June 2023.

Market movements, strong new issuance, and rising yields provided ample opportunities to improve diversification, credit quality, and further optimize the risk/reward properties of the Fund. Activity also focused on maintaining a balanced profile – locking in gains on names that had become too equity sensitive and exiting positions that had become more bond-like, limiting upside potential. Proceeds were redeployed into securities with attractive asymmetric return structures sourced from both the primary and secondary markets.

**Fund Outlook**

The opportunity set in convertibles is as attractive as we have seen in many years, supported by a strong new issuance calendar. Yields are higher, credit quality has improved, valuations are reasonable, elevated single stock volatility has enhanced the value of embedded options, and sector exposure is broadening. This backdrop bodes well for the application of our strategy. In addition, the outlook for new issuance remains favorable as a growing number of corporate issuers utilize convertibles to raise capital given the high cost of issuing straight debt. Finally, it is worth noting that the asymmetric risk/return properties of the Fund are a good fit for the current market. It is structured to provide strong upside capture should equity markets continue to advance, while proximity to bond floors and higher yields should cushion downside risk if markets reverse.

## AUTUS GLOBAL EQUITY FUND

### Investment Objective

The Autus Global Equity Fund (the "Fund") aims to provide capital growth over the long term.

### Fund Performance

The Fund is benchmarked against the MSCI All Country World Index USD Net Return for performance comparison purposes. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

Over the first 6 months of 2023, the Fund produced a return of 19.71%, comfortably ahead of its benchmark which returned 13.93%. H1 2023 saw the global economy avoid recession with the prices of industrial commodities, precious metal and oil falling because of weak global demand. Scares of the 2008 financial crisis hit markets in March as news arose that depositors had made large withdrawals from SVB (Silicon Valley Bank). The US Federal Reserve (Fed) stepped in to stabilise vulnerable banks and prevent a run on the banking system. Within days of the SVB debacle, 167-year-old Swiss banking giant Credit Suisse collapsed and was bought by rival UBS for US\$3.3bn to rescue the bank and protect depositors. Consequently, the liquidity and solvency ratios of banks around the world have fallen under the microscope. H1 also saw the increasing fever around artificial intelligence expand, and companies associated with this theme were substantial beneficiaries.

Economic contractions are however evident in many developed countries. The US Federal Reserve, unwavering in its aim to get inflation below 2%, has indicated that interest rates in the US could rise further and stay higher for longer. A similar situation exists in the UK and Europe. Post its COVID lockdown, China's economic acceleration has stuttered, with the world's second-largest economy unable to rescue global growth as it did in 2008. Market watchers will therefore monitor forthcoming economic data closely for clues of the lagged impact of higher interest rates and the resilience of economies and consumers. Let us not forget the ever-present geopolitical risks at play. Trading cautiously amid the investment market uncertainty remains our mantra.

### Fund Outlook

The second half of the year will bring further tests on the full impact of higher interest rates and tighter liquidity. The narrative of rising interest rates intended to combat stubbornly high worldwide inflation and crimping consumers' willingness to spend still dominates market sentiment. Numerous indicators suggest that the US economy could slide into a recession in the next 9-18 months. Markets remain divided on whether there will be a soft landing or a recession in some countries. Given the elevated levels of uncertainty and wide ranges of possible outcomes, caution should remain the stance of market participants.

### Investment Manager

Autus Fund Managers (Pty) Ltd.

## SANLAM CENTRE GLOBAL LISTED INFRASTRUCTURE FUND

### Investment Objective

Sanlam Centre Global Listed Infrastructure Fund (the "Fund") seeks long-term growth of capital and current income.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the MSCI World Infrastructure Index (M1W00INF). Note: Performance figures longer than 12 months are annualized. Figures are quoted gross of fees.

For the 6 month period ended 30 June 2023, the Fund gained 2.63%, outperforming its performance benchmark by 1.45%. Set out below is a summary of the performance attribution (Sectors and Notable Stocks):

#### What Helped

- Utilities due to underweight allocation and stock selection (Enel S.p.A., Tokyo Gas, Mercury NZ)
- Health Care due to overweight allocation and stock selection (Ramsay Health Care)
- Industrials due to overweight allocation and stock selection (Flowserve, Kirby)

#### What Detracted

- Energy due to overweight allocation and stock selection (Peabody Energy)
- Communication Services due to stock selection (AT&T)

#### Neutral

- Consumer Discretionary

#### Fund Outlook

We believe that now is one of the more challenging market outlooks during our careers as we see limited upside from market participation driven by a valuation re-rating should interest rates moves lower, with the potential of a significant drawdown if an earnings recession takes hold. Despite the current challenges, we believe stock picking opportunities exist. In sum, a portfolio designed to be relatively defensive thematically in an environment of a shallow but lingering economic slowdown with falling but persistently higher inflation (than the Federal Reserve's two percent target) in the U.S. Diversification across regions and developed countries as well as being balanced across the Telecommunication, Utilities, Energy, Transportation, and Social Infrastructure sectors should aid in returns and risk management. We believe our disciplined high-conviction approach to stock selection, with a cognizance of risk management, seems positioned to perform well relative to less risk aware and less historically appreciative strategies.

Centre Asset Management, LLC

## SANLAM REAL ASSETS FUND

### Investment Objective

The investment objective of Sanlam Real Assets Fund (the “Fund”) is to target capital growth over the long term and to outperform inflation through a portfolio of investments giving exposure to a range of real assets. As the portfolio and investor base is global in nature, the inflation target will be a composite of the Consumer Price Inflation rate in a basket of relevant countries (CPI of the G10 region).

### Fund Performance

*The Fund is benchmarked against a Composite benchmark rate of CPI of G10 countries (US, EuroZone, Japan, UK, Canada, Australia, New Zealand, Denmark, Norway and Sweden). Figures are quoted net of fees.*

In the first half of 2023, performance contribution was negative in all four strategies with the main detractors being Specialist Property and Renewable Energy. Short-term sentiment has continued to diverge from strengthening fundamentals, and the recent pressure on real asset share prices has been largely driven by selling from undiscerning and price-agnostic, index-based products. Labelled by one broker as “share price insanity”, this largely technical phenomenon has opened up highly attractive prices in businesses that stand to benefit from substantial uplifts in revenues as contractual reviews capture recent backward-looking inflation prints.

Perhaps the most notable recent development has been the insider buying activity from managers and directors of our businesses, which provides grounds for optimism at the same time as many of our companies are reporting record earnings. Acknowledging that higher risk-free rates have had the effect of moderating asset pricing, the market appears to be unduly overlooking defensive growth businesses generating long-term contractual cash flows from mission-critical assets. We take comfort from the knowledge that many of our companies have endured through multiple full economic cycles in the past and, although the share prices of many of our holdings do not reflect it, we are encouraged by the strong operational performance from our businesses and firmly believe this bodes well for future returns.

During the period, we participated in 19 one-to-one meetings with management teams, 41 group investor meetings, and 1 pre-IPO meeting. During the half, the real asset businesses in which the Fund invests made a total of 23 acquisitions. There were 5 equity capital raises during the quarter which in aggregate raised c.£1.19 billion of fresh capital. The proceeds raised have been used to restore credit facilities, acquire new pipeline projects and pursue organic follow-on opportunities. In total, we voted on 33 proxies.

**SANLAM REAL ASSETS FUND (CONTINUED)****Fund Outlook**

The first half of the year was a challenging period for real assets as persistent inflation (particularly in the UK) put upwards pressure on interest rates and downward pressure on asset prices (even those assets with inflation linkage that benefit from the current environment). However, importantly, the linkage is there and storing future capital value, offering investors an opportunity to take a long-term view and get paid along the way.

In stark contrast to the softer market pricing, a continued stream of positive results in first quarter trading updates, capital market days and management meeting has provided comfort over operational performance and outlooks from here. We continue to believe that companies with contractual inflation linkage and proven track records of self-funding and asset recycling are likely to be best placed to take advantage of the long-term structural tailwinds present in real assets and to advance through this economically challenging period.

Sanlam Investments UK Limited

## SATRIX GLOBAL FACTOR ENHANCED EQUITY FUND

### Investment Objective

The Satrix Global Factor Enhanced Equity Fund (“the Fund”) aims to target capital growth over the long term by delivering a return in excess of the MSCI World Index (in US Dollars).

### Fund Performance

The Fund is benchmarked against the MSCI World Index for performance comparison purposes. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

The Fund outperformed by +168 basis points during the first 6 months of 2023 with a return of +16.77% compared to a return of +15.09% for the MSCI World Index (performance is shown in USD). Positive performance in the portfolio was driven by the Dynamic Contextual Alpha Model, led by returns stemming from Competitiveness, Momentum, Sentiment, and Quality alpha factors. Valuation and ESG/Management alpha factor composites were negative for the period.

On a regional basis, the United States was the top contributor benefitting from positive performance within Competitiveness and Momentum factor composites. Competitive Edge and Fundamental Trends factors were the best performers within the Competitive alpha composite while Linkage Momentum and Textual PEAD signals drive Momentum composite outperformance. The top contributors in the region and total portfolio were overweight positions in DraftKings Inc., Broadcom Inc., and General Electric Co. The stock price of DraftKings, the American daily fantasy sports contest and sports betting company, rose nearly +100% in the first half of 2023. The company benefitted from a stronger than expected revenue in February and raised its outlook for all of 2023.

Broadcom, which designs, develops, and supplies various semiconductor devices witnessed its stock price increase at the end of May. Investors have become bullish on the stock due to increased artificial intelligence (AI) chip demand as well as a recently signed deal with Apple Inc. to make 5G radio frequency components.

General Electric, the high-tech industrial company had its share price increase nearly +68% during the first half of the year following news that fourth-quarter 2022 adjusted earnings beat estimates.

DraftKings remains overweight due to strong ESG/Management and Sentiment alpha scores. Broadcom remains overweight due to positive scores within Momentum, Quality, and ESG/Management factors while General Electric remains overweight due to the good scores across Valuation and Quality metrics.

## SATRIX GLOBAL FACTOR ENHANCED EQUITY FUND (CONTINUED)

### Fund Performance (continued)

The Pacific Rim was the largest detracting region for the period. The region was hindered by the performance of Quality and Momentum factors. Profitability and CRA Quality signals weighed down Quality returns while Price Momentum and Textual PEAD factors detracted from the Momentum composite's performance. The top detractor in the region was overweight position, Commonwealth Bank of Australia. The bank that provides integrated financial services in Australia, New Zealand, and internationally saw its share price decline sharply in the first quarter of 2023. In February the company delivered record profits, but shares dropped due to a cautious outlook. The company is facing headwinds in its mortgage business and investors have become concerned that its margins may have peaked. Commonwealth Bank of Australia remains overweight due to positive scores from ESG/Management, Quality, and Competitiveness composites.

The top performing sector for the period was Consumer Discretionary. Overweight positions in DraftKings Inc and Airbnb Inc. were the top performers for the period. Airbnb Inc., the company, together with its subsidiaries, operates a platform that enables hosts to offer stays and experiences to guests worldwide. In mid-February, the company's stock price soared after the vacation rental firm's fourth-quarter results beat market expectations. Investors cheered its bullish revenue forecast and at least 10 brokerages raised their price targets on the stock. Airbnb remains overweight in the portfolio due to positive scores across a majority of the factor composites.

Health Care was the top sector detractor for the first half of 2023. The top detractor within the sector and total portfolio was overweight position Agilent Technologies Inc. The life sciences, diagnostics, and applied chemical markets firm witnessed its stock price decline sharply at the end of the May. Agilent announced that it sees lower profits and sales for the year during its second-quarter fiscal 2023 earnings results. The company stated that continued macroeconomic uncertainty and banking system stress have caused their customers to be more conservative. Agilent remains overweight due to good scores from a majority of the factor composites.

### Fund Outlook

The Fund's Investment Manager utilises stock-level information to build a unique Alpha Model for each stock. Alpha scores in turn provide an indication as to the relative attractiveness of the stocks within the universe and therefore drive most of the stock selection in the portfolio.

By design, sector or country active exposures are dictated by bottom-up stock selection from the Dynamic Contextual Alpha Model. Hence, the strategy does not take large active exposures across sectors or markets. As of 30 June 2023, the largest overweight sector is Consumer Discretionary at +1.0% and the largest underweight is Consumer Staples at -1.6%. Regionally, the largest overweight is Europe at +2.7% and the largest underweight is the United States at -2.4%.

The portfolio has no style bias as exposures to any individual style risk factor, such as Barra Momentum or Value Risk Factors, are tightly controlled and managed. The strategy strives to deliver consistent outperformance generated from the Alpha Model, not from the risk factor exposures. The risk contribution thus originates from stock specific risk driven by the Alpha Model.

Uncertainty will remain the underlying theme in equity markets for the foreseeable future as the global economy continues to remain volatile following unprecedented inflation and the most rapid increase in interest rates in history. To assess the outlook for developed market large-cap equities, we need to consider the two most likely economic scenarios at present. Over the past year, the US Federal Reserve (the Fed) has raised interest rates nine times in a row, bringing the Fed Funds rate to 5%, which has put pressure on the economy via tighter financial conditions. With the Fed close to ending their monetary tightening program the US economy faces a crossroads. Either it will experience a hard landing due to the Fed needing to hike rates more than expected and keep them elevated for a longer period, or inflation will continue to cool, putting the economy in a better position for a soft landing.

In the case of a hard landing, we would anticipate a slowdown in economic activity, and we would expect defensive equities such as consumer staples, utilities, and lower margin technology companies to perform well. The rationale for favoring lower-margin growth stocks is that an economic slowdown could lead to a decrease in interest rates, thereby increasing the value of future cash flows. In contrast, in a soft-landing environment, we would expect equities with shorter durations to perform better as persistently high interest rates weigh on valuations. In such an economic backdrop, equities with favourable value and quality characteristics are likely to outperform.

Given that backdrop, we believe that we will continue to see volatile rotations between growth and value, and between cyclicals and defensive companies. We also believe the money losing, speculative growth companies that became public and rose tremendously in valuation post-pandemic will continue to lag the overall market.

**SATRIX GLOBAL FACTOR ENHANCED EQUITY FUND (CONTINUED)****Fund Outlook** *(continued)*

We believe that maintaining diversified exposures across multiple uncorrelated alpha factors will prove to be a prudent approach in the face of such uncertainty. The Dynamic Team's focus on bottom-up stock selection, based on proprietary alpha factors and contextual modelling, has been proven to generate returns that are uncorrelated to macro swings and market style trends. The team's continued focus on research has been fruitful, generating alpha signals that maintain diversified exposure across vary market environments. This unique investment philosophy is well suited to meet the challenges facing investors going forward.

PanAgora Asset Management, Inc (From 19 October 2022)

## PERPETUA GLOBAL EQUITY UCITS FUND

### Investment Objective

The Perpetua Global Equity UCITS Fund (“the Fund”) aims to target capital growth over the long term.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the MSCI ACWI. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

Despite a tough global economic backdrop, persistently high core inflation and rising central bank policy rates across most of the developed world – global equities delivered strong positive returns over the first half of 2023.

The MSCI All Country World Index (MSCI ACWI) gained 13.94% over the first half to 30 June 2023. The best performing global sectors year to date have been Information Technology (+36.9%), Communication Services (+25.4%) and Consumer Discretionary (+23.6%). Global equity returns have principally been driven by the extraordinary performance of the seven largest global companies by market capitalisation – Apple, Microsoft, Alphabet, Amazon, Nvidia, Tesla and Meta Platforms. These seven shares combined returned 61% year-to-date, adding \$4.2 trillion of market capitalization to the index. This amounted to nearly half of the \$8.6 trillion added by all publicly listed companies (c.50,000 stocks) over the first half of the year. These 7 mega-caps tech growth shares have a combined \$11.1 trillion market capitalisation, which represent c.10% of all global equities and c.25% of all U.S. equities by market capitalisation. The market's ability to make further gains from this point will increasingly be determined by the performance of these 7 mega-caps. Periods of extreme performance concentration and narrowing have often been followed by a broadening of performance. We are reminded that the stock market is a market of stocks, and as performance broadens, opportunities for active stock pickers will emerge.

Non-U.S. shares returned 10%, as measured by the MSCI ACWI ex-U.S. index while developed markets ex-U.S. returned 12%. Emerging market shares returned 5% over the quarter with China falling 6%. Brazil was a standout performer returning 18% in U.S. dollars.

Over the first half of 2023, the Fund produced a return of 13.32% vs 13.94% for the benchmark. The top contributors to the Fund's performance included Meta Platforms, Alphabet, Booking Holdings, Evolution AB, Fresenius Medical Care and Micron Technology. After falling nearly 80% between October 2021 and 2022, Meta has risen 230% over the last 8 months, now only 22% off its all-time high of \$378. We don't think the underlying business fundamentals have changed much, other than CEO Zuckerberg recognising that they have over-hired and accordingly right sizing the business for the current environment and outlook and cutting back on the metaverse spending.

Detractors from performance included British American Tobacco, Magnit, Alibaba, Melco International, A2 Milk, Yandex and AIA Group. We think the Hong Kong based shares have all suffered from the same issue – investors selling everything Hong Kong based on geopolitics, sentiment, and the slower-than-anticipated recovery of China. We think the share price movements are not reflective of the underlying business fundamentals, which show an improving trend and growth trajectory from sales, operating profit, cash flow to profit margins. We think the worst is behind these companies in terms of covid lockdowns and economic malaise.

**PERPETUA GLOBAL EQUITY UCITS FUND (CONTINUED)****Fund Outlook**

We have taken the opportunity to trim our holdings in Meta Platforms after it got to more than 8% of the Fund following its incredible rise this year. We have cut it back to a level that matches our conviction in the business and price today. We completely sold out of Evolution SE, Netflix and Amazon following exceptionally strong share price performance and as they reached our target prices. Finally, we sold our long-standing position in Wells Fargo as it became clear that management still have not satisfied the regulatory authorities that it has rectified its compliance and control issues that led to the opening of fake accounts some several years ago.

We have purchased several new positions, including Euronext, after selling London Stock Exchange. The latter became fully valued and we saw better long-term opportunity in Euronext at less than half of the valuation multiple. We purchased Julius Baer, the Swiss private bank and wealth manager, after it disappointed the market with higher costs and flat AuM. We think the management at Baer have used the opportunity to poach some staff from the failed Credit Suisse, which will stand it in good stead in the years to come. We also purchased Mohawk, a share we have owned before, and which performed well for the Fund. Mohawk is trading on a single digit P/E on depressed earnings. Finally, we purchased a small position in Glencore after the share fell sharply as commodity prices retreated from their highs in June last year.

**Investment Manager**

Perpetua Investment Managers (Pty) Limited

## SANLAM US DOLLAR ENHANCED YIELD FUND

### Investment Objective

The investment objective of Sanlam US Dollar Enhanced Yield Fund (the "Fund") is to achieve an annualised return in excess of 75 basis points over a US dollar overnight money market rate. There can be no assurance that the Fund will achieve its investment objective.

### Fund Performance

The Fund is benchmarked for performance comparison purposes against the US Secured Overnight Financing Rate (SOFR) Performance figures longer than 12 months are annualised. Figures are quoted gross of investment management fees.

The performance of the Fund in the first half of 2023 was primarily driven by earning credit spread from sub 5 year maturity USD denominated credit. Credit spreads have contracted in H1 further enhancing performance. During the period our exposure to interest rates has been fully hedged using a combination of bond and interest rate futures mitigating any performance impact on the Fund due to the upward shifts in the yield curve.

Two notable credit events happened during H1, both with negligible impact on overall performance of the Fund. Silicon Valley Bank had a bank run and went bust due to mismatching assets and liabilities post 2022's great duration shift. This elevated USD credit spreads, particularly those of regional US retail banks. Credit Suisse closed its doors after a century of business in response to significant asset deterioration. A series of errors over the last few years including Greensill and Archegos lead to its eventual purchase by competitor UBS. The controversial and hurried deal was brokered by the Swiss government, wiping out lower tier bond holders, while saving equity holders. This set a new precedent for AT1 bond holders globally.

Inflation has dropped considerably in the US with June CPI sitting at 3%. In turn the market is now pricing no further rate hikes from the FED. Real GDP is forecasted to remain positive at the end of this year at 1.6% despite headwinds with the jobs market remaining tight at 3.7%.

The Fund has been diversified with limited selection risk and no defaults and the tracking error versus SOFR has remained below the target of 1%.

We maintained a largely buy and hold trading strategy, minimising trading costs and managing interest rate hedging via bond futures.

Year-to-date, the Fund delivered a return of 3.36% while the SOFR return was 2.42%. This is above the objective of a 0.75% return before fees.

**SANLAM US DOLLAR ENHANCED YIELD FUND (CONTINUED)****Fund Outlook**

The strategy of the Fund is to hold a diversified portfolio of (USD denominated) credit and money market instruments to achieve its return and risk objectives. The main risk drivers of the portfolio are therefore interest rates, credit spreads and individual name selection. The portfolio is diversified across issuers, geographies, and sectors.

With the expectation of tactical curve exposures, the interest rate risk beyond 1 year is fully hedged out using bond and interest rate futures. The main source of returns of the Fund is therefore credit spread carry. The current levels of spread of the holdings in the portfolio are in line with achieving the return objectives of the Fund in 2023, however we note that an unexpected material widening of spreads or an idiosyncratic crisis might prevent the Fund from achieving this objective. Expected 2022 mark-to-market losses due to Russian exposures reversed at the beginning of H2 2023 as the holdings matured and repayed in full, contributing to the expected positive performance of the Fund.

**NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS***for the six months ended 30 June 2023***1 General – The Company**

Sanlam Universal Funds plc (the “Company”) is an investment company with variable capital and was incorporated on 9 June 1997 with registration number 267451 under the laws of Ireland and is authorised in Ireland as an undertaking for collective investment in transferable securities pursuant to the UCITS Regulations. The Company is domiciled in Ireland.

At 30 June 2023, the Company comprised twenty four separate active investment sub-funds (“Fund(s)”). The Articles of Association of the Company provide segregated liability between the various Funds. A list of Funds active at the end of the period is set out below:

Name	Status at 30 June 2023
Denker Global Equity Fund	Active
Sanlam Global Bond Fund	Active
Denker Global Financial Fund	Active
Sanlam World Equity Fund	Active
Satrix World Equity Tracker Fund	Active
SIIP India Opportunities Fund	Active
Satrix Emerging Markets Equity Tracker Fund	Active
Sanlam AI Global Managed Risk Fund	Active
Sanlam Global High Quality Fund	Active
High Street Global Balanced Fund	Active
Sanlam Sustainable Global Dividend Fund	Active
Sanlam Active UK Fund	Active
Sanlam Multi-Strategy Fund	Active
Anchor Global Stable Fund	Active
Anchor Global Equity Fund	Active
Sanlam Global Emerging Markets Fund	Active
Sanlam Centre American Select Equity Fund	Active
Sanlam Global Convertible Securities Fund	Active
Autus Global Equity Fund	Active
Sanlam Centre Global Listed Infrastructure Fund	Active
Sanlam Real Assets Fund	Active
Satrix Global Factor Enhanced Equity Fund	Active
Perpetua Global Equity UCITS Fund	Active
Sanlam US Dollar Enhanced Yield Fund	Active

During the period the Sanlam Global Property Fund and the Absa Africa Equity Fund terminated and all trading in the Funds ceased as it was determined that the continued existence and operation of the Funds was not economically viable and not in the best interests of the shareholders.

On 1 March 2023, with the approval of its shareholders, Rootstock Global Equity UCITS Fund merged with Stonehage Fleming Global Best Ideas Equity Fund, a sub-fund of Stonehage Fleming Pooled Investments (Ireland) PLC. The merger was carried out in accordance with Regulation 3(1)(c) of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 352 of 2011), as amended, meaning that the net assets of Rootstock Global Equity UCITS Fund transferred to Stonehage Fleming Global Best Ideas Equity Fund on 1 March 2023 and the Shareholders of the Fund became shareholders of Stonehage Fleming Global Best Ideas Equity Fund.

**Prices**

There is a single price for buying, selling and switching Share Classes in each Fund. This is represented by the Net Asset Value per share class of the relevant Fund. In the case of subscriptions, a preliminary charge of up to 5% may be added to the Net Asset Value per share of the classes of certain Funds, as set out in the relevant offering supplements. The Company may waive in whole or in part the preliminary charge. A conversion fee of up to 2% may be charged on applications to convert shares of any class to shares of another class. A repurchase fee of up to 3% may be deducted from the Net Asset Value per share of the classes of certain Funds, as set out in the relevant offering supplements. The Company may waive, in whole or in part, the repurchase fee.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 1 General – The Company (continued)

#### Dealing

The Dealing Day is, except where otherwise clarified in the Prospectus or Fund supplement, any day other than Saturday or Sunday on which banks are open for business in Dublin. The valuation point is, except where otherwise clarified in the Prospectus or Fund supplement, the close of business in each relevant market on the business day immediately preceding a dealing day.

#### Shares

Applications for shares, except where otherwise clarified in the Prospectus or Fund supplement, must be sent so as to arrive at the Registrar and Transfer Agent's office, no later than 4.00pm (Irish time) on the business day preceding the relevant dealing day, or such later time as the Directors may from time to time permit. Applications which are received late, or funds which are not cleared by the relevant time, will be held over and invested at the next dealing day. Requests for repurchases, except where otherwise clarified in the Prospectus or Fund supplement, should be sent so as to arrive at the Registrar and Transfer Agent's office by post, facsimile or telex by no later than 4.00pm on the business day preceding the relevant dealing day.

As at 30 June 2023, the below Share classes were admitted to the official list of the Global Exchange Market.

Minimum Subscription (continued)

Sanlam US Dollar Enhanced Yield Fund			
Share Class	Minimum Investment	Share Class	Minimum Investment
A (USD) *	USD1,000	B (USD) *	USD1,000

Minimum Additional Subscription

Minimum additional subscription amounts are the same as the minimum initial investment amounts as detailed above and on the previous pages for all share classes of Sanlam Sustainable Global Dividend Fund and Sanlam Active UK Fund.

There are no minimum additional subscription amounts for the remainder of the Funds with the exception of the following share classes:

Perpetua Global Equity UCITS Fund			
Share Class	Minimum Additional Investment	Share Class	Minimum Additional Investment
A	USD50,000	B	USD50,000

### 2 Significant accounting policies

#### (a) Basis of preparation

These financial statements have been prepared in accordance with the UCITS Regulations issued by the Central Bank of Ireland and IAS 34 Interim Financial Reporting (“IAS 34”) issued by the International Accounting Standards Board (“IASB”), and should be read in conjunction with the annual financial statements as at 31 December 2022 which have been prepared in accordance with IFRS.

There have been no changes to the significant accounting policies since the last audited financial statements for the year ended 31 December 2022. There are no new standards, amendments to published standards and interpretations which are effective for the first time in the current period and that have a material effect on the Company’s unaudited condensed interim financial statements.

#### New standards and interpretations

There are no new standards, amendments to published standards and interpretations which are effective for the first time in the current period and that will have a material effect on the Company’s unaudited condensed interim financial statements.

### 3 Cash and cash equivalents

The Company’s cash balances are held on deposit with the Company’s Depository, Brown Brothers Harriman Trustee Services (Ireland) Limited.

### 4 Margin accounts

The Funds use brokers to transact derivative transactions. Margin accounts includes margin deposits and cash collateral with Funds’ brokers held in respect of open derivative contracts. The Funds are exposed to variation margin requirements whereby the Funds will be required to increase the amount of margin on deposit with the brokers in cases of adverse price movements.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 6 Fair value of financial instruments

The following table shows financial instruments recognised at fair value. The fair value hierarchy shall have the following levels:

Quoted prices in active markets for identical assets or liabilities (Level 1);  
Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2); and  
Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

#### Assets measured at fair value at 30 June 2023 and 31 December 2022

The following tables analyse within the fair value hierarchy the Funds' financial assets measured at fair value through profit or loss at 30 June 2023 and 31 December 2022:

Sanlam Universal Funds plc	Level 1 USD	Level 2 USD	Level 3 USD	Total USD

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 6 Fair value of financial instruments (continued)

Investments, whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, exchange traded funds, government bonds, corporate bonds, warrants and exchange traded derivatives. The Fund does not adjust the quoted price for these instruments nor does it apply a discount to securities where the volume traded in the market is low in comparison to the Fund's holding.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include corporate bonds, structured products, to-be-announced securities, non-exchange traded investment collective investment schemes with no redemption restrictions, and over-the-counter derivatives. Over-the-counter derivatives such as interest rate swaps and forward currency contracts are classified within Level 2. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include illiquid equity securities.

#### Significant transfers between Levels

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the reporting period.

#### Transfer between Levels 1 and 2

The following transfers between Level 1 and 2 occurred with respect to the Funds during the period ended 30 June 2023:

Fund	Investment Type	Transfer into/out of Level 1	Transfer into/out of Level 2
Sanlam Global Bond Fund	Debt instruments	93,543,982	(93,543,982)
Sanlam Global Property Fund	Equity	522,100	(522,100)
Satrix World Equity Tracker Fund	Equity Warrants	981,691 (151,912)	(981,691) 151,912
Satrix Emerging Market Equity Tracker Fund	Equity	143,266	(143,266)
High Street Global Balanced Fund	Debt instruments Warrants Options – assets	(1,585,896) (811,049) 798,100	1,585,896 811,049 (798,100)
Sanlam Multi-Strategy Fund	Debt instruments Options – assets Options – liabilities	(1,999,860) 1,697,416 (13,970)	1,999,860 (1,697,416) 13,970
Anchor Global Stable Fund	Debt instruments	(550,778)	550,778
Sanlam Global Emerging Markets Fund	Rights	(1,392)	1,392
ABSA Africa Equity Fund	Equity	603,253	(603,253)
Sanlam Centre American Select Equity Fund	Options – assets	28,000	(28,000)
Sanlam US Dollar Enhanced Yield Fund	Debt instruments	(48,857,421)	(48,857,421)

A number of positions were transferred at the end of the year ended 31 December 2022 as a result of trading volumes on the positions. For the interim period ended 30 June 2023 this transfer of positions was reversed at the beginning of the period.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 6 Fair value of financial instruments (continued)

#### Significant transfers between Levels (continued)

##### Transfer into/out of Level 3

During the period ended 30 June 2023 the following positions were transferred from Level 1 to Level 3:

- Signature Bank  
(Denker Global Equity Fund; Denker Global Financial Fund; Satrix World Equity Tracker Fund)
- SVB Financial Group  
(Satrix World Equity Tracker Fund)
- First Republic Bank  
(Satrix World Equity Tracker Fund)

These positions were equity holdings in three United States domiciled banks. As a result of the difficult economic environment and US Fed increasing interest rates the three banks became insolvent and were taken over or placed into the receivership of the Federal Deposit Insurance Corporation (FDIC). As a result the Funds discounted the fair value of the positions by 100% and transferred to the position to Level 3 in the fair value hierarchy.

There were no other significant transfers between Levels during the period ended 30 June 2023.

#### Level 3 Assets measured at fair value reconciliation

The following sections analyse the movements in the fair value of financial instruments categorised within Level 3 between 1 January and 30 June 2023:

##### **Denker Global Equity Fund**

The Level 3 equity position held by the Denker Global Equity Fund at 30 June 2023 are as follows:

- Accident Exchange Group Plc
- DBA Telecommunications Asia
- Signature Bank

All the above positions had a fair value of USD Nil (2022: USD Nil) at 30 June 2023.

Accident Exchange Group Plc is a delisted security and classified as Level 3 due to its trading status.

Shares in DBA Telecommunications Asia have been suspended since June 2013. The position was written down by 50% on 17 December 2013 and subsequently written down to zero on 30 September 2014 pending further news and financial information from the company.

The Signature Bank was taken over by the Federal Deposit Insurance Corporation (FDIC) during the period. The Fund discounted the position by 100% and classified the position as Level 3 in the fair value hierarchy.

There has been no movement in the value of the positions during the period ended 30 June 2023 or the comparative period (note the Signature Bank was transferred into Level 3 at US\$ Nil fair value).

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

##### Denker Global Financial Fund

The Level 3 equity position held by the Denker Global Financial Fund at 30 June 2023 are as follows:

- Accident Exchange Group Plc
- DBA Telecommunications Asia
- Signature Bank

All the above positions had a fair value of USD Nil (2022: USD Nil) at 30 June 2023.

Accident Exchange Group Plc is a delisted security and classified as Level 3 due to its trading status.

Shares in DBA Telecommunications Asia have been suspended since June 2013. The position was written down by 50% on 17 December 2013 and subsequently written down to zero on 30 September 2014 pending further news and financial information from the company.

The Signature Bank was taken over by the Federal Deposit Insurance Corporation (FDIC) during the period. The Fund discounted the position by 100% and classified the position as Level 3 in the fair value hierarchy

There has been no movement in the value of the positions during the period ended 30 June 2023 or the comparative period (note the Signature Bank was transferred into Level 3 at US\$ Nil fair value).

In addition the Denker Global Financial Fund held a Russian related security that has had its fair valued discounted to USD Nil at the reporting date and the position transferred to Level 3 of the fair value hierarchy. Details of the position are as follows:

Description	Type	Cost USD	Fair Value USD
TCS Group	Equity	1,439,204	Nil

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

##### Satrix World Equity Tracker Fund

The Level 3 equity position held by the Satrix World Equity Tracker Fund at 30 June 2023 are as follows::

- Signature Bank
- SVB Financial Group
- First Republic Bank

These positions were equity holdings in three United States domiciled banks. As a result of the difficult economic environment and US Fed increasing interest rates the three banks became insolvent and were taken over or placed into the receivership of the Federal Deposit Insurance Corporation (FDIC). As a result the Fund discounted the fair value of the positions by 100% and transferred to the position to Level 3 in the fair value hierarchy.

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided. The unobservable input relevant for these securities is the liquidity.

#### Level 3 Assets measured at fair value reconciliation (continued)

Satrix Emerging Markets Equity Tracker Fund		
	2023 USD	2022 USD
Balance as at 1 January	27,997	28,028
Realised gains/(losses)		-
Change in unrealised fair value	(113)	(31)
Gross Purchases		-
Gross Sales		-
Transfers in and out of Level 3		-
Balance as at 30 June	27,884	27,997
Total unrealised gains and losses for the period/year included in profit or loss for Level 3 assets held at year end (the amounts are included within "Net gains/(losses) on financial assets and liabilities at fair value through profit or loss" on the Statement of Comprehensive Income)	(113)	(31)

The Level 3 positions held by the Satrix Emerging Markets Equity Tracker Fund at 30 June 2023 is a special purpose vehicle which was spun out from Hanergy Thin Film Power Group Limited and is valued at USD 27,884 (2022: USD 27,997).

Trading was suspended on Hanergy Thin Film Power Group Limited on 20 May 2015 and it was classified as Level 3 due to its trading status. Following approval by the Valuation Committee, in July 2015 a decision was taken to write down the value of the positions held in Hanergy Thin Film Power Group Limited by an amount of 44.5% from the last available reported price. In January 2016, the Valuation Committee approved that this position be written down to zero value with immediate effect. In June 2019 a proposal to delist the Company was agreed with shareholders. A special purpose vehicle was created and shareholders were issued with a proportionate interest in the new entity. It is the expectation that the special purpose vehicle will be listed at a future date. At 30 June 2023 the Fund's interest in the special purpose vehicle is fair valued based on the determined price at the date of restructuring.

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

In addition, the Satrix Emerging Markets Equity Tracker Fund held Russian related securities that have had their fair valued discounted to USD Nil at the reporting date and the positions transferred to Level 3 of the fair value hierarchy. Details of the positions are as follows:

Description	Type	Cost USD	Fair Value USD
Phosagro PJSC	Equity	12,864	Nil
Mobile Telesystems	Equity	29,281	Nil

#### Anchor Global Stable Fund

The Anchor Global Stable Fund held Russian related securities that have had their fair valued discounted to USD Nil at the reporting date and the positions transferred to Level 3 of the fair value hierarchy. Details of the positions are as follows:

Description	Type	Cost USD	Fair Value USD
Magnit	Equity	315,086	Nil

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

### 6 Fair value of financial instruments (continued)

#### Level 3 Assets measured at fair value reconciliation (continued)

##### Sanlam Global Emerging Markets Fund

The Sanlam Global Emerging Markets Fund held Russian related securities that have had their fair valued discounted to USD Nil and the positions transferred to Level 3 of the fair value hierarchy.

Details of the positions at 30 June 2023 are as follows:

Description	Type	Cost USD	Fair Value USD
Magnit	Equity	3,065,247	Nil
TCS Group	Equity	1,404,431	Nil
Sberbank of Russia	Equity	3,204,635	Nil
Magnit	Equity	2,102,432	Nil

During the period ended 30 June 2023 the Fund managed to dispose of two of the positions as follows:

Description	Type	Cost USD	Transaction Value USD
X5 Retail	Equity	3,080,411	649,386
TCS Group	Equity	1,404,431	567,704

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

##### Sanlam US Dollar Enhanced Yield Fund

The Sanlam US Dollar Enhanced Yield Fund held a Russian related security that has had its fair valued discounted to USD Nil at the reporting date and the position transferred to Level 3 of the fair value hierarchy. Details of the position are as follows:

Description	Type	Cost USD	Fair Value USD
MMC Norilsk	Corporate Bond	1,565,546	Nil

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

##### Perpetua Global Equity UCITS Fund

The Perpetua Global Equity UCITS Fund held Russian related securities that have had their fair value discounted initially by 100% and the positions transferred to Level 3 of the fair value hierarchy. Subsequently the 100% discount on the Russian securities was revised by SAMI's Valuation Committee. The applicable discount for this Fund was reduced to 30% for the Magnit position and 15% for the other positions held. The reasons for the change in discount in the Fund was to enable a significant new shareholder to invest in the Fund without diluting the interests of the existing shareholders. The Valuation Committee considered a number of factors including the availability of observable prices as a result of the Moscow Exchange ("MOEX") permitting trading for non-resident clients from friendly jurisdictions (which includes South Africa) as well as non-residents controlled by Russian legal entities or individuals.

for the six months ended 30 June 2023

### 6 Fair value of financial instruments (continued)

#### Level 3 Assets measured at fair value reconciliation (continued)

##### Perpetua Global Equity UCITS Fund (continued)

Details of the positions at 30 June 2023 are as follows:

Description	Type	Cost USD	Fair Value USD
Yandex NV	Equity	434,501	479,281
Magnit	Equity	946,302	644,116
TCS Group	Equity	1,432,751	1,555,300

The following table reconciles the fair value of the positions during the period ended 30 June 2023:

	2023 USD	2022 USD
Balance as at 1 January	2,638,529	-
Realised gains/(losses)	-	-
Change in unrealised fair value	40,168	-
Gross Purchases	-	-
Gross Sales	-	-
Transfers in and out of Level 3	-	2,638,529
Balance as at 30 June	<b>2,678,697</b>	<b>2,638,529</b>
Total unrealised gains and losses for the period/year included in profit or loss for Level 3 assets held at year end (the amounts are included within "Net gains/(losses) on financial assets and liabilities at fair value through profit or loss" on the Statement of Comprehensive Income)	40,168	(31)

IFRS 7 requires a sensitivity analysis showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a sensitivity analysis has not been provided.

The following table provides a level 3 reconciliation for the Company

##### Sanlam Universal Funds plc

	2023 USD	2022 USD
Balance as at 1 January	2,666,526	28,028
Realised gains/(losses)	1,217,090	-
Change in unrealised	40,055	(31)
Gross Purchases	-	-
Gross Sales	1,217,090	-
Transfers in and out of Level 3	-	2,638,529
Balance as at 31 December	<b>2,706,581</b>	<b>2,666,526</b>
Total unrealised gains/losses for the year included in profit or loss for Level 3 assets held at year end (the amounts are included within "Net gains/(losses) on financial assets and liabilities at fair value through profit or loss" on the Statement of Comprehensive Income)	40,055	(31)

#### Financial assets and liabilities not measured at fair value

For all financial assets and liabilities not measured at fair value through profit and loss, their carrying values are a reasonable approximation of fair value due to the immediate and short-term nature of these financial instruments.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 8 Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. The Company considers the Directors of the Company, Manager and Investment Managers as related parties due to the significant influence they maintain over the Company and the Funds.

All related party transactions have been entered into and conducted under normal market conditions.

#### Directors' remuneration

The Directors holding office as at 30 June 2023 are listed on page 1. Certain Directors are entitled to a fee as remuneration for their services to the Company at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one financial year shall not exceed €75,000 unless otherwise notified to Shareholders in advance. The Directors may also be paid all travelling, hotel and other expenses properly incurred by them in attending and returning from meetings of the Directors or any other meetings in connection with the business of the Company.

The total Directors fees charged during the period amounted to USD 27,421 (2022: 30 June 2022 USD 30,581).

#### Directors' interests

At 30 June 2023, Haydn Franckeiss had an interest of 14,684 (31 December 2022: 14,684) shares in Sanlam Sustainable Global Dividend Fund, 53,662 (31 December 2022: 45,308) shares in Sanlam Real Assets Fund and 6,735 (31 December 2022: 6,735) shares in Sanlam Multi-Strategy Fund.

The other Directors who held office on 30 June 2023 had no interest in the shares of the Company or Funds at that date or at any time during the financial period.

#### Manager

SAMI was appointed as Manager to the Company pursuant to an Amended and Restated Management agreement. SAMI is an ultimate subsidiary company of Sanlam Limited. Sanlam Life Insurance Limited, a fellow subsidiary, is a significant indirect shareholder of the Company. The Manager is entitled to receive a management fee (a percentage of the net assets per annum) from each of the Funds as set out in the tables below.

Denker Global Equity Fund <sup>1</sup>			
Share Class	Management		Management fee rate
	fee rate	Share Class

**Manager** (continued)

#### Performance Fee

The Manager is also entitled to a performance fee in respect of each performance period out of the assets of the following Funds.

Fund	Share Class
Denker Global Financial Fund	Class A (USD), Class B, Class C (GBP), Class C (USD), Class D (USD), Class F (GBP), Class F (EUR)
Sanlam Global Property Fund <sup>1</sup>	Class C (USD)
SIIP India Opportunities Fund	Class B (USD), Class C (USD)
Anchor Global Equity Fund	Class A, Class B
Sanlam Global Emerging Markets Fund	Class A1 (USD), Class B1 (USD), Class B1 (GBP), Class C1 (USD), Class C1 (GBP)
Sanlam Global Convertible Securities Fund	Class A, Class E
Autus Global Equity Fund	Class A, Class B

<sup>1</sup>This sub-fund closed on 2 March 2023

The performance periods for Denker Global Financial Fund, Sanlam Global Property Fund, SIIP India Opportunities Fund and Sanlam Global Convertible Securities Fund comprised each successive six month period from 1 January to 30 June and from 1 July to 31 December. The performance periods for Sanlam Global Emerging Markets Fund, Anchor Global Equity Fund, and Autus Global Equity Fund comprise each annual period from 1 January to 31 December.

- The performance fee shall be equal to 10% to 20% (depending on the fund) of the difference between the percentage movement in the Net Asset Value per Share (A) being the Initial Issue Price for the first performance period and the percentage movement in the relevant index as set out in the prospectus (the "Index") (B) during the performance period multiplied by the average of the Net Asset Value of the Fund as at each Valuation Point during the performance period prior to any accrual for performance fees but after accruing for all other fees and expenses.
- Where the Fund has underperformed the Index during a performance period (where A-B is a negative number), the Manager will not repay any amounts of performance fee paid by the Fund in respect of previous performance periods but no further performance fees will be charged until such time as any underperformance is recaptured by the Fund (until A-B measured since the end of the last performance period in respect of which a performance fee was paid becomes positive).
- For the performance period in which any underperformance is first recaptured, the performance fee will be calculated in accordance with paragraph (b) above, except that the performance fee will only take into account any subsequent outperformance (A-B will be measured since the end of the last performance period in respect of which a performance fee was paid). Performance fee calculations in subsequent performance periods will revert to being based on the performance over the relevant performance period as calculated in accordance with paragraph (a) above.
- The performance fee shall be calculated by the Administrator (subject to verification by the Depositary) and accrued in the Net Asset Value calculated in respect of each Dealing Day based on the performance to date of the Fund during that performance period.

Net realised and unrealised capital gains plus net realised and unrealised capital losses as of the relevant Valuation Point shall be taken into account in calculating the Net Asset Value per Share. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised. Benchmarks will take account of income and capital gains/losses.

The performance fees charged during the period amounted to USD Nil (30 June 2022: USD Nil).

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 8 Related party transactions (continued)

#### Performance Fee (continued)

In Sanlam Global Emerging Markets Fund, if Shares are subscribed for at a time when the Net Asset Value per Share is less than the High Water Mark of the Relevant Share Class at each relevant Valuation Point during the Performance Period, the investor will be required to pay a performance fee with respect to any subsequent outperformance of Shares relative to the High Water Mark. With respect to any outperformance of the Shares from the Net Asset Value per Share at the date of subscription up to the High Water Mark, the performance fee will be charged at the end of each Performance Period by redeeming such number of Shares of the Relevant Share Class as have an aggregate Net Asset Value (after accrual for any performance fee) equal to a percentage of any such outperformance of the Relevant Share Class (a "Performance Fee Redemption"). The aggregate Net Asset Value of the Shares so redeemed will be paid to the Manager as a performance fee. At year end there was performance fee redemptions of USD 154,567 (30 June 2022: USD Nil).

If Shares are subscribed for at a time when the Net Asset Value per Share is greater than the High Water Mark of the Relevant Share Class, the Shareholder will be required to pay an amount in excess of the then current Net Asset Value per Share of that Class equal to a percentage of the difference between the then current Net Asset Value per Share of that Class (before accrual for the performance fee) and the High Water Mark of the Relevant Share Class (an "Equalisation Credit"). The Equalisation Credit ensures that all holders of Shares of the same Class have the same amount of capital at risk per Share. At the end of each Performance Period, if the Net Asset Value per Share (before accrual for the performance fee) exceeds the High Water Mark of the Relevant Share Class, that portion of the Equalisation Credit equal to a percentage of the Relevant Share Class of the excess, multiplied by the number of Shares of that Class subscribed for by the Shareholder, will be applied to subscribe for additional Shares of that Class for the Shareholder. There was no equalisation credit at period end (30 June 2022: USD Nil).

#### Investment Managers, Investment Advisors and Investment Allocation Manager

The Investment Managers are appointed by the Manager. For certain Funds and certain share classes of Funds, the Manager will pay out of its fees, the fees of the Investment Managers, Investment Allocation Manager and Investment Advisors (as applicable) appointed to those Funds.

For the remaining Funds of the Company, the fees of the appointed Investment Managers, Investment Allocation Manager and Investment Advisors (as applicable) are paid directly by the Fund.

The table below sets out the rates for the annual Investment Management fees paid directly by these Funds to the Investment Managers (in respect of each share class of the relevant Fund). These fees are payable monthly in arrears and accrued by reference to the net assets of the relevant share class on each dealing day. There were no changes in the Investment Management fees during the period ended 30 June 2023.

#### Manager and investment management fees

The aggregate management fees and investment management fees charged during the period amounted to USD 10,835,898 (30 June 2021: USD 12,117,856) of which USD 1,938,054 (30 June 2022: USD 4,114,478) remains payable at the reporting date.

Five of the appointed Investment Managers, Sanlam Investments UK Limited, Sanlam Investment Management (Pty) Limited, Sanlam Private Investments (UK) Limited, Centre Asset Management LLC and Catalyst Fund Managers Global (Pty) Ltd are related parties to the Company and the Manager. Sanlam Investments UK Limited is also the appointed Investment Allocation Manager for a number of the Funds.

The Manager may rebate a portion of its fees to certain of the Funds of Sanlam Universal Funds plc, Sanlam Global Funds plc and Sanlam Qualifying Investors Funds plc where those Funds are themselves invested into Funds of the Company or enter into special fee arrangements and/or rebate agreements, in its sole discretion, with certain shareholders who may be affiliates of the Manager, including Botswana Insurance Fund Management, Sanlam Private Investments (Pty) Limited, Sanlam Life Insurance Limited, Sanlam Life & Pensions (UK) Limited and Sanlam Collective Investments Limited. Rebate income earned by each of the Funds of the Company was paid from the profits of the Manager and is included in other income in the Statement of Comprehensive Income.

#### Securities Lending

Pursuant to the Securities Lending Agency Agreement, SAMI was appointed as securities lending agent to the Company. Pursuant to the Securities Lending Sub-Agency Agreement, Brown Brothers Harriman & Co. was appointed by SAMI as securities lending sub-agent to the Company.

The securities lending agent and securities lending sub-agent receive remuneration for their services provided as part of the Company's securities lending arrangements, the terms of which are set out in the agreements referenced above. For the period ended 30 June 2023, SAMI received USD 3,717 (30 June 2022: USD 26,813) with respect to the securities lending activity. The amount is net of the amount paid to the securities lending sub-agent.

Further details on the Company's securities lending activity are disclosed in note 14.

##### Cross Investments

The following are the fair values of intercompany positions held by Funds within the Company at 30 June 2023:

Fund Name	Position Held	Fair Value at 30 June 2023
Denker Global Equity Fund	Denker Global Financial Fund	USD 1,391,763
Sanlam AI Global Managed Risk Fund	Satrix World Equity Tracker Fund	USD 38,936,553

The following are the fair values of intercompany positions held by Funds within the Company at 31 December 2022:

Fund Name	Position Held	Fair Value at 31 December 2022
Denker Global Equity Fund	Denker Global Financial Fund	USD 1,352,372
Sanlam AI Global Managed Risk Fund	Satrix World Equity Tracker Fund	USD 36,340,974

The Sanlam AI Global Managed Risk Fund's investment objective is achieved by investing in Satrix World Equity Tracker Fund. The Fund invests no less than 85% of its net asset value in the shares of the Satrix World Equity Tracker Fund. The Manager has put in place internal conduct of business rules in relation to the investment in the Satrix World Equity Tracker Fund.

Denker Global Equity Fund's investment objective is to invest primarily in global equities, however, the Fund is permitted to achieve this objective by investing indirectly in such securities through holdings in UCITS funds domiciled in a Member State. The Fund is restricted to investing a maximum of 20% of its net assets in such funds.

Details of the Managers policies with respect to cross investment are documented in the Prospectus of the Company and the offering supplements of applicable Funds.

Further details regarding the intercompany positions as disclosed above and the investment strategies of the relevant funds are disclosed in the portfolio of investments and the reports of the investments managers.

### 9 Other significant agreements

#### Administrator

In its role as the Administrator, Brown Brothers Harriman Fund Administration Services (Ireland) Limited is entitled to receive out of the assets of each Fund an annual fee ranging from 0.03% - 0.15% of the net assets of the Fund. Certain Funds are also subject to a minimum annual fee and/or additional annual fee ranging from USD 10,000 - 25,000 per annum. In addition, the Administrator is entitled to receive its reasonable costs and expenses incurred in the performance of its duties as Administrator of the Company. These fees shall accrue and be calculated on each dealing day and shall be payable monthly in arrears. The administration fees earned by the administrator during the period and outstanding at the year-end date are presented in the Statement of Comprehensive Income and Statement of Financial Position, respectively.

The administration fees earned by the Administrator during the period and outstanding accrued administration fees at 30 June 2023 and 30 June 2022 are presented in the Statement of Comprehensive Income and Statement of Financial Position respectively.

#### Registrar and Transfer Agent

Brown Brothers Harriman Fund Administration Services (Ireland) Limited is the appointed Registrar and Transfer Agent to the Company. Transfer agency fees are charged at normal commercial rates. The Registrar and Transfer Agent is not a related party to the Company.

#### Depository

Brown Brothers Harriman Trustee Services (Ireland) Limited is the appointed Depository to the Company. The Depository will be entitled to receive from the Company, out of the assets of the Fund, an annual fee which will not exceed 0.02% of the net assets of the Fund (plus VAT, if any) together with reasonable costs and expenses incurred by the Depository in the performance of its duties as Depository of the Fund. These fees shall accrue and be calculated on each Dealing Day and shall be payable monthly in arrears. The Depository shall also be entitled to be reimbursed out of the assets of the Fund all agreed transaction charges (which will be charged at normal commercial rates).

The fees earned by the Depository during the period ended 30 June 2023 and 30 June 2022 are presented in the Statement of Comprehensive Income as custody fees. The amounts outstanding at reporting date are included within accrued expenses in the Statement of Financial Position respectively.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 10 Transactions in Financial Derivative Instruments

The Funds may engage in transactions in Financial Derivative Instruments (FDI) for the purposes of efficient portfolio management, investment and/or to protect against risks within the conditions and limits laid down by the Central Bank from time to time.

Hedging is used by the Funds to limit or control risks, such as adverse movements in exchange rates and interest returns.

The Company engages in transactions in FDIs for the purpose of hedging economic risks and does not apply hedge accounting.

By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist the Funds in meeting their investment objectives.

The relevant Investment Manager will look to ensure that the techniques and instruments used are economically appropriate in that they will be realised in a cost-effective way.

#### Specific instruments

At 30 June 2023 a number of the Funds hold derivative financial instruments, namely forward currency contracts, futures contracts, swaps, rights, warrants, and option contracts. Details of the open derivative financial instruments at the reporting date are included in the Schedule of Investments for each Fund.

##### *Forward currency contracts*

Certain Funds may invest in Forward currency contracts. As part of its investment policy, a Fund may enter into transactions which alter the currency exposure of underlying assets in which the Fund is invested from time to time where the Investment Manager considers it appropriate to retain the currency exposure consistent with the Fund's investment objective. This may involve a Fund investing in an asset denominated in currency (X) where the Investment Manager wishes to translate the currency denomination of that asset (X) into a third party currency (Y) that may be different to the base currency through the use of forward currency contracts. There can be no guarantees that the practice of investing in an uncorrelated currency (Y) will be effective and there is a risk of loss in the event of adverse currency movements relative to both the currency of denomination and the base currency.

Investment in FDI permits the Fund to manage risk and invest more efficiently to achieve the investment objective of the Fund. These strategies include increasing the Level of exposure to non-base currency in the Fund's portfolio in response to the Investment Manager's views on market prospects and prices and values. Gains and losses arising from such transactions are reflected at Fund Level in the Statement of Comprehensive Income.

Where a Fund utilises FDI which alter the currency exposure characteristics of transferable securities held by that Fund, the performance of that Fund may be strongly influenced by movements in foreign exchange rates because currency positions held by the Fund may not correspond with the securities positions held.

##### *Futures contracts*

Certain of the Funds may invest in Futures contracts for hedging or investment purposes. Futures contracts allow investors to hedge against market risk or modify exposure to the underlying market. They can also be used to "equitise" cash balances as described in Efficient Portfolio Management, an unaudited schedule attached to these financial statements. Using Futures to achieve a particular strategy instead of transacting the underlying or related equity security or equity index, can result in both lower transaction costs as well as more timely execution of portfolio strategy. Since these contracts are marked to market daily, investors can, by closing out their position, exit from their obligation to buy or sell the underlying assets prior to the contract's delivery date. Futures contracts are valued based upon their quoted daily settlement prices. Changes in the value of open Futures contracts are recognised as unrealised gains or losses on Futures contracts until the contracts are terminated, at which time realised gains and losses are recognised.

##### *Interest rate, index and inflation swaps*

Interest rate swaps may be used for hedging against adverse movements in interest rate. Interest rate swaps involve the exchange by a Fund with a counterparty of their respective commitments to pay or receive interest. The differential to be paid or received on the interest rate swap is recognised over the life of the agreement as a realised gain or loss with payments made or received on a net basis on the stated payment dates. The interest rate swap agreements are stated at fair value. A Fund may also use index and inflation rate swaps in a similar manner, to exchange payments at a fixed or floating rate in return for payments based on realised inflation or to swap the return of an index such as an interest rate index with that of another. Such swaps are also stated at fair value. Unrealised gains/losses are reported in the Statement of Comprehensive Income.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 10 Transactions in Financial Derivative Instruments (continued)

#### Specific instruments (continued)

##### Option contracts

Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a currency at a specified rate. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. A Fund, where permitted to use options, may be a seller or buyer of put and call options. Options are liquid and traded efficiently. Changes in the value of open options contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised.

##### Warrants

A stock warrant gives the holder the right to purchase a company's stock at a specific price and at a specific date. A stock warrant is issued directly by the company concerned; when an investor exercises a stock warrant, the shares that fulfill the obligation are not received from another investor but directly from the company. Warrants are not typically traded on an exchange but on secondary markets. Changes in the value of warrants are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised.

##### Rights

Rights are derivative products issued to existing holders of a stock. The rights give the holder the right to purchase the company's stock at a specific price, typically at a discount to the listed price, and before a specific date. A right is issued directly by the company concerned; when an investor exercises a right, the shares that fulfill the obligation are not received from another investor but directly from the company. Rights are typically short term in nature and although transferable are traded on secondary markets. Changes in the value of rights are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the right is exercised or the specified date has lapsed, at which time realised gains and losses are recognised.

#### Risks

##### Market risk

This is the general risk attendant to all investments that the value of a particular investment will change in a way detrimental to the portfolio's interest.

##### Management risk

FDI are highly specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The successful use of FDI draws upon the Investment Manager's special skills and experience and usually depends on the Investment Manager's ability to forecast price movements, interest rates, or currency exchange rate movements correctly.

Should prices, interest rates, or exchange rates move unexpectedly, a portfolio may not achieve the anticipated benefits of the transactions or may realise losses and thus be in a worse position than if such strategies had not been used. The use of FDI requires an understanding not only of the underlying instrument but also of the FDI itself, without the benefit of observing the performance of the FDI under all possible market conditions. In particular, the use and complexity of FDI require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that an FDI adds to a portfolio and the ability to forecast price, interest rate or currency exchange rate movements correctly.

##### Counterparty and Credit Risk

This is the risk that a loss may be sustained by a portfolio as a result of the failure of a counterparty to an FDI to comply with the terms of the FDI contract. The credit risk for exchange-traded FDI is generally less than for privately negotiated FDI, since the clearing house, which is the issuer or counterparty to each exchange-traded FDI, provides a guarantee of performance. This guarantee is supported by a daily payment system (i.e., margin requirements) operated by the clearing house in order to reduce overall credit risk. For privately negotiated FDI, there is no similar clearing agency guarantee. Therefore, the Investment Manager will consider the creditworthiness of each counterparty to a privately negotiated FDI in evaluating potential credit risk.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 10 Transactions in Financial Derivative Instruments (continued)

#### Risks (continued)

##### *Liquidity Risk*

Liquidity risk exists when a particular instrument is difficult to purchase or sell. If an FDI transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated FDI), it may not be possible to initiate a transaction or liquidate a position at an advantageous price.

##### *Legal Risk*

The use of OTC FDI, such as forward contracts, swap agreements and CFDs, will expose the Fund to the risk that the legal documentation of the relevant OTC contract may not accurately reflect the intention of the parties.

##### *Other risks*

Other risks in using FDI include the risk of mispricing or improper valuation of FDI and the inability of FDI to correlate perfectly with underlying assets, rates and indices. Many FDI, in particular privately negotiated FDI, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the portfolio concerned.

FDI do not always perfectly or even closely track the value of the assets, rates or indices they are designed to track. Consequently, a portfolio's use of FDI may not always be an effective means of, and sometimes could be counterproductive to, furthering the portfolio's investment objective.

#### **Collateral**

At 30 June 2023 and 30 June 2022, the Funds have not received any non-cash assets as collateral with respect to the open FDIs.

Margin accounts, as disclosed in the Statement of Financial Position, represent cash deposited with brokers transferred against open FDIs. The balances may be restricted.

#### **Gains and losses on Financial Derivative Instruments**

Details of the net unrealised gains/(losses) on open forward currency contracts, interest rate swaps, futures and options if any, are disclosed in the Schedule of Investments of each Fund.

Net realised and change in unrealised gains/(losses) on FDI's are included in the Statement of Comprehensive Income of each Fund within net gains/(losses) on financial assets and liabilities at fair value through profit or loss.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 11 Efficient portfolio management

The Company on behalf of a Fund may employ techniques and instruments relating to transferable securities, money market instruments and/or other financial instruments in which it invests for efficient portfolio management purposes. Use of such techniques and instruments should be in line with the best interests of Shareholders and will generally be made for one or more of the following reasons:

- (a) the reduction of risk;
- (b) the reduction of cost; or
- (c) the generation of additional capital or income for the relevant Fund with an appropriate Level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules.

The Funds may engage in transactions in Financial Derivative Instruments (FDI) for the purposes of efficient portfolio management. Further details on the Funds' investments in FDIs are disclosed in Note 10.

The Funds may enter into forward foreign currency contracts for efficient portfolio management purposes. Forward foreign currency exchange contracts are used to hedge against anticipated future changes in exchange rates which otherwise might either adversely affect the value of the Fund's portfolio securities or adversely affect the price of securities which the Funds intend to purchase at a later date.

The Funds may also enter into futures contracts for efficient portfolio management purposes. The primary purpose for which the Funds use futures contracts are cash equalisation, hedging and return enhancement. The purpose of cash equalisation is to expose uninvested cash within the Funds to equity market-like returns and ensure that the Funds' liquid assets are utilised as though invested in the markets.

Interest rate swaps are used for hedging against adverse movements in interest rates. Options offer the ability, when used as a hedging tool to be utilised in efficient portfolio management, to provide offsetting insurance of asset value in an uncertain or highly volatile market environment. The Funds, where permitted, may use options to hedge or achieve exposure to a particular currency, underlying security or equity index.

By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist the Funds in meeting their investment objectives.

The Funds also engage in securities lending activities for efficient portfolio management purposes, details of which are set out in Note 14. Disclosures in accordance with the EU Securities Financing Transactions Regulation ("SFTR") are set out in the unaudited schedules attached to these financial statements.

### 12 Soft commissions and investment research

As set out in the Prospectus, Investment Managers and connected persons to certain of the Funds may enter into soft commission arrangements with brokers in respect of which certain goods and services used to support the investment decision process were received. Such Investment Managers and connected persons may not make direct payment for these services but may instead transact an agreed amount of business with the brokers on behalf of the Company and commission is paid on these transactions.

The goods and services utilised for the Company may include computer hardware and software used for economic and political analysis, portfolio analysis including valuation and performance measurement, market analysis, data and quotation services and investment related publications. An Investment Manager may only enter into such arrangements if the arrangements are to the benefit of a Fund (to which the Investment Manager has been appointed) of the Company and the Investment Manager has satisfied itself that it obtains best execution on behalf of the Fund and the brokerage rates are not in excess of customary institutional full service brokerage rates.

For certain Funds where the consumption of specialised research is regarded as critical to the investment process, the relevant Fund of the Company will pay for such costs up to a level pre-agreed with the Directors. The Funds that paid for the cost of specialised research during the period ended 30 June 2023 are listed below:

- Sanlam World Equity Fund
- Sanlam Sustainable Global Dividend Fund
- Sanlam Active UK Fund

### 13 Contingent and cross liability of Funds

The Directors are not aware of any such existing or contingent liability at 30 June 2023 or 30 June 2022. The Company's amended Articles provide for segregated liability between the various Funds. These provisions, and the Funds' application of them may not yet have been fully tested by Irish or foreign courts. Accordingly, while the liabilities of one Fund will not generally impact on or be paid out of the assets of another Fund, it is not entirely free from doubt that the assets of any Fund are protected from the liabilities of other Funds of the Company.

As at 30 June 2023 and 30 June 2022, there were no cross liabilities held between the Funds.

**NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS**

for the six months ended 30 June 2023

**14 Securities lending activities**

Securities lending activities are conducted through SAMI and Brown Brothers Harriman & Co pursuant to the Securities Lending Agency Agreement and Securities Lending Sub-Agency Agreement dated 24 February 2016.

In this arrangement, the Company transfers securities to a counterparty, in return for which it is agreed that securities of the same kind and amount should be transferred back to the Company at a later date. The arrangement has the substance of a loan of the Company's securities in return for collateral. Aggregate income arising from securities lending activities consists of fees charged to counterparty, where the counterparty has provided collateral other than cash, plus net realised income derived from investments of cash collateral less any rebate payable to counterparty on cash collateral less any commissions or similar transaction costs. Pursuant to the Securities Lending Agency Agreement, income from securities lending activities is split in the ratio of 80:20 in favour of the Company, with SAMI receiving 20% as remuneration for their services. SAMI reimburses the securities lending sub-agent to the Company in the amount of 20% of the income from securities lending activities.

The tables below and overleaf disclose the income arising from securities lending activities, the costs and fees incurred, the exposure at the reporting date and the amount of collateral held. For the period ended 30 June 2023 the Funds of the Company earned USD 120,193 (30 June 2022: USD 220,651) from securities lending activity. This income of fees earned by the securities lending agent and sub-agent.

At 30 June 2023 and 31 December 2022, all collateral is in the form of high quality government bonds.

At 30 June 2023, the counterparties to the Funds' outstanding securities lending activities are Citigroup Global Markets Limited, JP Morgan Securities Plc, Merrill Lynch International, Societe Generale and UBS AG.

The following Funds incurred the following income, costs and fees in relation to securities lending activities for the year ended 30 June 2023:

<sup>1</sup>On 1 March 2023 this Fund merged with a sub-fund of Stonehage Fleming Pooled Investments (Ireland) PLC

**NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS  
(CONTINUED)**

*for the six months ended 30 June 2023*

**17 Significant events during the period**

On 1 March 2023, with the approval of its shareholders, Rootstock Global Equity UCITS Fund merged with Stonehage Fleming Global Best Ideas Equity Fund, a sub-fund of Stonehage Fleming Pooled Investments (Ireland) PLC. The merger was carried out in accordance with Regulation 3(1)(c) of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 352 of 2011), as amended, meaning that the net assets of Rootstock Global Equity UCITS Fund transferred to Stonehage Fleming Global Best Ideas Equity Fund on 1 March 2023 and the Shareholders of the Fund became shareholders of Stonehage Fleming Global Best Ideas Equity Fund.

On 2 March 2023, the Sanlam Global Property terminated and all trading in the Fund ceased as it was determined that the continued existence and operation of the Fund was not economically viable and not in the best interests of the shareholders.

On 31 March 2023, the Company issued a new offering supplement for Sanlam AI Global Managed Risk Fund. The offering supplement was updated to reflect the appointment of Sanlam Investments UK Limited as Distributor of the Fund replacing the previous Distribution, Sanlam Global Investment Solutions Ltd.

On 21 April 2023, the Company issued a new offering supplement for Satrix Global Factor Enhanced Equity Fund. The offering supplement was updated to reflect a reduction in the management fee of certain of the share classes of the Fund.

There were no other significant events during the period from 1 January 2023 to 30 June 2023.

**18 Significant events since the end of the period**

On 7 July 2023, the Company issued a new offering supplement for Sanlam Multi-Strategy Fund. The offering supplement was updated to reflect amendments to the investment objective and Investment Policy and Guidelines to remove reference to the quantitative indication of target outperformance (CPI+4%). In addition, the list of individual equity indices which the Fund may gain exposure to as extended.

On 25 August 2023, an updated offering supplement for Sanlam Global High Quality Fund was approved by the Central Bank. The supplement was updated in order to provide for additional disclosure in relation to the research payment account in accordance with MiFID II to be funded by a specific research charge to the Fund.

Up to the date of approval of the unaudited condensed interim financial statements, there were no other material subsequent events affecting the Company which necessitate disclosure or revision of the figures included in the unaudited condensed interim financial statements.

## NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS (CONTINUED)

for the six months ended 30 June 2023

### 19 Index Tracking

Tracking error is the volatility of the difference between the return of the index tracking UCITS and the return of the index or indices tracked.

The Company has two index-tracking funds in existence at 30 June 2023. The table below compares the anticipated tracking error (disclosed as a range in the prospectus on an ex ante basis) against the actual realised tracking error of the Funds as at 30 June 2023. An explanation of the difference, if any, is provided in the table below:

Fund Name	Benchmark Index	Anticipated Tracking Error %	Realised Tracking Error %
Satrix World Equity Tracker Fund	MSCI World Index (Developed Markets) in US Dollars Unhedged with income reinvested (or another appropriate major world index selected by the Manager)	+/- 1.00	0.05
Satrix Emerging Markets Equity Tracker Fund	MSCI Emerging Markets Index	+/- 1.00	-0.58
Fund Name	Explanation of difference		
Satrix World Equity Tracker Fund	The Fund has tracked its benchmark index within the anticipated tracking error range		
Satrix Emerging Markets Equity Tracker Fund	The Fund has tracked its benchmark index within the anticipated tracking error range		

Tracking difference is defined as the difference in the annual return of the Index-tracking UCITS and the annual return of the tracked index. The realised Fund performance against the performance of the relevant benchmark index during the period ended 30 June 2023 is set out in the Investment Manager's report for each of the index-tracking Funds.

### 20 Off balance sheet arrangements

The Company was not party to off balance sheet arrangements for the twelve months from 1 January 2023 to 30 June 2023.

### 21 Approval of the Financial Statements

The financial statements were approved by the Board of Directors on 29 August 2023.

**PURCHASES AND SALES FOR THE PERIOD ENDED 30 JUNE 2023 (UNAUDITED)**

The schedule of significant portfolio movements reflects the material changes in the portfolio which is defined as the aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the financial year and/or aggregate disposals greater than 1 per cent of the total value of disposals for the financial year. If there are fewer than 20 purchases/disposals that meet the material changes definition, the Fund shall disclose those purchases/disposals and such number of the next largest purchases/disposals so at least 20 purchases/sales are disclosed
