

Federated Hermes Investment Funds plc
Swiss Extract Prospectus

Manager – Hermes Fund Managers Ireland Limited

The date of this Swiss Extract Prospectus is 19 August 2024

THIS PROSPECTUS IS AN EXTRACT PROSPECTUS FOR OFFERING IN SWITZERLAND ONLY AND DOES NOT CONSTITUTE A PROSPECTUS FOR THE PURPOSES OF IRISH APPLICABLE LAW. THIS EXTRACT REFERS TO THE OFFERING OF THE FUNDS LISTED HEREIN. OTHER FUNDS OF FEDERATED HERMES INVESTMENT FUNDS PUBLIC LIMITED COMPANY HAVE BEEN APPROVED BY THE CENTRAL BANK OF IRELAND, BUT ARE NOT APPROVED FOR OFFERING IN SWITZERLAND

This Swiss Extract Prospectus replaces the Swiss Extract Prospectus dated 12 June 2024.

If you are in any doubt about the contents of this Prospectus, you should seek advice from your financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration", are the persons responsible for the information contained in this Prospectus and accept responsibility accordingly. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of the information.

Federated Hermes Investment Funds Public Limited Company

IMPORTANT INFORMATION

This Prospectus contains information relating to the Company, an open-ended investment company with variable capital and having segregated liability between its Funds incorporated in Ireland on 23 October 2008. It qualifies and is authorised in Ireland by the Central Bank as an Undertakings for Collective Investment in Transferable Securities ("UCITS") for the purposes of the Regulations. The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different Share Classes with one or more classes representing a separate Fund of the Company. The creation of any Fund will require the prior approval of the Central Bank.

This Prospectus may only be issued with one or more Supplements, each containing information relating to a separate Fund. If there are different Share Classes representing a Fund, details relating to the separate classes may be dealt with in the same Supplement or in separate Supplements for each class. The creation of further Share Classes will be effected in accordance with the requirements of the Central Bank. This Prospectus and the relevant Supplement should be read and constituted as one document. To the extent that there is any inconsistency between this Prospectus and the relevant Supplement, the relevant Supplement shall prevail.

Applications for Shares will only be considered on the basis of this Prospectus (and any relevant Supplement) and the latest published annual report and audited financial statements and, if published after such report, a copy of the latest half-yearly report and unaudited financial statements. These reports will form part of this Prospectus.

Overview of Share Classes

Share Classes may be distinguished on the basis of such factors as:

- the target market for each Share Class;
- the level of fees to be charged; and
- the Minimum Initial Subscription, Minimum Redemption and Minimum Holding limits applicable.

Share Classes may be further divided by the following criteria:

- currency of denomination of the Share Class;
- dividend policy; and
- hedging policy;

All Share Classes are available at the Manager's discretion. Where an investor subscribes through a distributor or intermediary, the Company may require that those distributors or intermediaries be approved by the Manager and/or the Investment Manager.

The Net Asset Value per Share will differ between Share Classes, reflecting differing fee levels and in some cases due to the initial subscription price per Share differing from the Net Asset Value per Share of Share Classes already in issue. The NAV per Share for all Share Classes is calculated to four decimal places, except for Class A, Class B and Class K Shares.

As at the date hereof, the following categories of Share Class may be offered for investment within a Fund. The table below is a summary of the general features of individual Share Classes. Further information in relation to the particular features of Share Classes available within each Fund shall be set out in the relevant Supplement. Further information in relation to the types of fees applicable to the Funds can be found under the section Fees and Expenses within this Prospectus.

Standard Share Classes

Standard Share Classes are the most widely available Share Classes within the Company. Furthermore, while other categories of Shares may be created within the Company from time to time (including Client Agreement Classes, Capacity Share Classes, Limited Share Classes and Other Share Classes as described in further detail below).

| | |
|----------------|--|
| Class F | Class F Shares are available to the widest category of investors. Class F Shares are subject to a Minimum Subscription and Minimum Holding Amount of GBP 100,000 or foreign currency equivalent. |
| Class P | The Class P Shares are only available to investors who subscribe through distributors or intermediaries that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly will charge a separate fee directly to their end-client). Class P Shares are subject to a Minimum Subscription and Minimum Holding Amount of GBP 400,000 or foreign currency equivalent. |
| Class R | Class R Shares are typically available to investors who subscribe through distributors or intermediaries who, according to regulatory requirements or based on individual fee arrangements with their clients, are allowed to accept or retain retrocessions Class R Shares are subject to a Minimum Subscription and Minimum Holding Amount of EUR 1,000 or foreign currency equivalent. |

Client Agreement Classes

Client Agreement Classes are Share Classes that are typically available to investors who have signed an agreement with the Manager which pertains to a separate fee arrangement that is charged outside of the Company.

| | |
|----------------|--|
| Class T | Class T Shares are available to investors, and in particular certain pension fund investors, who typically have entered into a Client Agreement which will address certain fees payable by the relevant investor to the Investment Manager. No fee is charged by the Fund in respect of Class T Shares. Class T Shares are subject to a Minimum Subscription and Minimum Holding Amount of GBP 1,000 or foreign currency equivalent. |
| Class Z | Class Z Shares are typically only available to investors who have entered into a Client Agreement which addresses all fees to be paid by the relevant investor to the Investment Manager. No management fee is charged by the Fund in respect to Class Z Shares. |

Capacity Share Classes

Capacity Share Classes are Share Classes which may be introduced or offered within a Fund which has limited capacity for further investment. Capacity Share Classes offer an alternative to the closure of such Fund to all new investment by facilitating additional investment into such Fund upon the fee terms set out in respect of that Capacity Share Class. These will typically involve higher fees than would be charged in the equivalent Headline Share Class. Details of Capacity Share Classes are set out below.

Class C This Share Class is equivalent to the Class F Share Class. The Class C Shares will be subject to higher fees than the equivalent Class F Shares within the same Fund. Existing holders of Class F Shares will continue to hold their existing Class F Shares and to will be permitted to acquire new Class F Shares. However, new investors into the relevant Fund (or investors who redeem in full and then re-invest) will only be allowed to invest into Class C Shares. Class C Shares are subject to a Minimum Subscription and Minimum Holding amount of GBP 100,000 or foreign currency equivalent.

Class RC This Share Class is equivalent to the Class R Share Class. The Class RC Shares will be subject to higher fees than the equivalent Class R Shares within the same Fund. Existing holders of Class R Shares will continue to hold their existing Class R Shares and to acquire new Class R Shares. However, new investors into the relevant Fund (or investors who redeem in full and then re-invest) will only be allowed to invest into Class R Shares. Class RC Shares are subject to a Minimum Subscription and Minimum Holding amount of EUR 1,000 or foreign currency equivalent.

Limited Share Classes

Limited Share Classes are Share Classes which may be introduced or offered within a Fund in order to encourage early investment into a Fund at a time when it is seeking to build or increase assets under management, or otherwise to encourage later investment into a Fund to substantially increase its assets under management. These will typically involve lower fees than would be charged in the equivalent Standard Share Class. Details of the Limited Share Classes are set out below.

Class X Class X Shares are subject to a Minimum Subscription and Minimum Holding amount of GBP 10 million or foreign currency equivalent. Class X Shares may be offered in a Fund until such time as the NAV of the relevant Fund reaches 100 million in the base currency of the relevant Fund (or such other amount as the Directors should determine in their absolute discretion).

Class Y Class Y Shares are generally subscribed for by investors who subscribe through distributors or intermediaries that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly will charge a fee directly to their end-client). Class Y Shares are subject to a Minimum Subscription and Minimum Holding amount of GBP 10 million or foreign currency equivalent. Class Y Shares may be offered in a Fund until such time as the NAV of the relevant Fund reaches 100 million in the base currency of the relevant Fund (or such other amount as the Directors should determine in their absolute discretion).

Class W Class W Shares are typically available to investors who subscribe through distributors or intermediaries who, according to regulatory requirements or based on individual fee arrangements with their clients, are allowed to accept or retain or retrocessions Class W Shares are subject to a Minimum Subscription and Minimum Holding amount of GBP 1,000 or foreign currency equivalent. The Class W Shares may be offered in a Fund until such point as the NAV of the relevant Fund reaches 100 million in the base currency of the relevant Fund (or such other amount as the Directors should determine in their absolute discretion).

Other Share Classes

The Company may offer other categories of Share Classes from time to time within a Fund. This may be at the request of a specific category of investors, to offer greater choice in terms of fee arrangements within a given Fund or to provide for other features, including the number of decimal places to which the NAV of the relevant Share Class is calculated. Information is set out below in relation to such Other Share Classes in existence as at the date of this Prospectus. Details of such Other Share Classes will be set out in the relevant Supplement.

| | |
|----------------|---|
| Class A | The Class A Shares are typically available to investors who subscribe through US Offshore distributors or intermediaries which utilise clearing networks and who, according to regulatory requirements or based on individual fee arrangements with their clients, are allowed to accept or retain retrocessions. Class A Shares are subject to a Minimum Subscription and Minimum Holding amount of USD 1,000 or foreign currency equivalent. |
| Class D | The Class D Shares are typically available to investors who subscribe through distributors or intermediaries who, according to regulatory requirements or based on individual fee arrangements with their clients, are allowed to accept or retain trail commissions. Class D Shares are subject to a Minimum Subscription and Minimum Holding amount of GBP 200million or foreign currency equivalent. |
| Class G | The Class G Shares are typically available to investors in the Nordic region who subscribe through distributors or intermediaries who, according to regulatory requirements or based on individual fee arrangements with their clients, are allowed to accept or retain retrocessions Class G Shares are subject to a Minimum Subscription and Minimum Holding amount of EUR 1,000 or foreign currency equivalent |
| Class I | The I Share Classes are typically available to investors who subscribe through US Offshore distributors or intermediaries which utilise clearing networks and that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly will charge a fee directly to their end-client). Class I Shares are subject to a Minimum Subscription and Minimum Holding amount of USD 1,000,000 or foreign currency equivalent. |
| Class K | The Class K Shares are typically available to investors who subscribe through US Offshore distributors or intermediaries that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly will charge a fee directly to their end-client). Class K Shares are subject to a Minimum Subscription and Minimum Holding Amount of USD 100million or foreign currency equivalent. |
| Class L | The Class L Shares are typically available to investors who subscribe through distributors or intermediaries that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly will charge a fee directly to their end-client). Class L Shares are subject to a Minimum Subscription and Minimum Holding Amount of GBP 100million or foreign currency equivalent. |
| Class M | The Class M Shares are typically available to investors who subscribe through distributors or intermediaries that, according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept or retain retrocessions (and accordingly may charge a fee directly to their end-client). Class M Shares are subject to a Minimum Holding Amount of GBP 200million or foreign currency equivalent. |

Shareholders in Distributing (5) and Distributing (6) Share Classes should note that all/part of fees and expenses (including management fees) shall be charged to the capital of a Fund. This will have the effect of lowering the capital value of your investment.

The Company is both authorised and supervised by the Central Bank. The authorisation of the Company is not an endorsement or guarantee of the Company by the Central Bank and the Central Bank is not responsible for the contents of this Prospectus. The authorisation of the Company by the Central Bank does not constitute a warranty by the Central Bank as to the performance of the Company and the Central Bank shall not be liable for the performance or default of the Company.

Statements made in this Prospectus are, except where otherwise stated, based on the law and practice currently in force in Ireland, which may be subject to change.

No person has been authorised to give any information or to make any representation in connection with the offering or placing of Shares other than those contained in this Prospectus, any Supplement and the reports referred to above and, if given or made, such information or representation must not be relied upon as having been authorised by the Company. The delivery of this Prospectus (whether or not accompanied by the reports) or any issue of Shares shall not, under any circumstances, create any implication that the affairs of the Company have not changed since the date of this Prospectus or the relevant Supplement.

It is intended that applications may be made in jurisdictions outside Ireland to enable the Shares of the Company to be marketed freely in these jurisdictions. In the event that such registrations take place, local regulations in European Economic Area countries may require the appointment of paying agents and the maintenance of accounts by such agents through which subscription monies may be paid. Investors who choose or are obliged under local regulations to pay/receive subscription/redemption monies via an intermediary rather than directly to the Depositary bear a credit risk against that intermediate entity with respect to (a) subscription monies prior to the transmission of such monies to the Depositary and (b) redemption monies payable by such intermediate entity to the relevant investor. The fees and expenses in connection with the registration and distribution of Shares in such jurisdictions, which will be at normal commercial rates, may be borne by the Company and/or the Funds.

The distribution of this Prospectus and the offering and placing of Shares in certain jurisdictions may be restricted and, accordingly, persons into whose possession this Prospectus comes are required by the Company to inform themselves about and to observe such restrictions.

This Prospectus does not constitute an offer or solicitation to anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation.

Potential investors should inform themselves as to:

- (a) the legal requirements within the countries of their nationality, residence, ordinary residence or domicile for the acquisition of Shares;
- (b) any foreign exchange restrictions or exchange control requirements which they might encounter on the acquisition or sale of Shares; and
- (c) the income tax and other taxation consequences which might be relevant to the acquisition, holding or disposal of Shares.

Further information regarding the restrictions to offering and placing of Shares can be found in "Appendix IV – Selling Restrictions" of this Prospectus.

Definitions

"Act", the Irish Companies Act 2014, as may be amended.

"Accumulating Classes", such Share Classes of a Fund as the Directors may from time to time designate and in respect of which income of the Fund will be reinvested and not distributed.

"Administration Agreement", the restated agreement made between the Company, the Manager and the Administrator dated 1 February 2019, as may be amended.

"Administrator", Northern Trust International Fund Administration Services (Ireland) Limited, and/or such other person as may be appointed, in accordance with the requirements of the Central Bank, to provide administration services to the Company.

"AIF", alternative investment fund.

"Amortising Bonds", bonds in which a portion of the underlying principal amount is paid in addition to periodic interest payments to the security's holder.

"Application Form", such application form as the Directors may prescribe for the purposes of subscribing for Shares in the Company and/or relevant Fund.

"Articles", the Articles of Association of the Company, as amended from time to time.

"Asset-Backed Securities", any debt securities that are backed by assets for example pools of mortgages (mortgage-backed securities), home equity loans, boat and vehicle loans, credit card receivables, student loans, equipment leases etc. They are typically securitised, issued in tranches from an investment vehicle that is collateralised with a pool of the assets that back the security. Asset-Backed Securities also include collateralised debt obligations (CDOs) that typically contain a mixture of underlying loans or other forms of debt which are typically accessed within a multi tranche structure. Asset-Backed Securities also include collateralised mortgage obligations (CMOs) which generally represent a participation in, or are secured by, a pool of mortgage loans. CMOs are issued in separate classes with different stated maturities that may have different credit and investment profiles. These may be amortising or non-amortising. Amortising loans have regular payments of both principal and interest over the life of the loan (e.g., repayment mortgages, student loans, auto loans) while non-amortising loans have no pre-payment of principal prior to maturity (for example, credit cards).

"Auditors", Deloitte, Registered Auditors, Dublin.

"Australian Dollar" or "AUD", the lawful currency in Australia.

"Below Investment Grade", bonds or other securities that are rated below Baa3 by Moody's or BBB- by Standard & Poor's ("S&P") or an equivalent rating by another rating agency or are unrated.

"Business Day", in respect of a Fund (and unless otherwise set out in the Supplement for a Fund), a day (excluding Saturday and Sunday) on which the banks are open for business in both Ireland and London (or such other day as the Directors may from time to time determine and notify in advance to Shareholders).

"Canadian Dollar" or "CAD", the lawful currency in Canada.

"Canadian Resident", a person resident in Canada for the purposes of the Income Tax Act of Canada.

"Central Bank", the Central Bank of Ireland or any successor thereof.

"Central Bank UCITS Regulations", the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as may be amended from time to time;

"Client Agreement", an agreement between the Manager and/or the Investment Manager or their affiliate and an investor under which the investor has (i) appointed the Manager and/or the Investment Manager or its affiliate to carry out investment management or advisory services on its behalf and/or (ii) agreed the fees to be paid by it to the Manager and/or the Investment Manager or their affiliate.

"Chinese Yuan" or "CNH", legal currency in China traded in the offshore market.

"Company", Federated Hermes Investment Funds public limited company.

"Contingent Convertibles", are a type of debt security that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined event ("the trigger event"). The trigger event is ordinarily linked to the financial position of the issuer and therefore the conversion is likely to occur as a result of a deterioration of the relative capital strength of the underlying.

"Conventional Weapons", small arms and military contracting

"Convertible Debt Securities", debt securities that are convertible into equity securities of the issuer.

"Controversial Weapons", anti-personnel mines, cluster munitions, depleted uranium, nuclear weapons, white phosphorous and chemical & biological weapons.

"Danish Krone" or "DKK", the lawful currency of Denmark.

"Data Protection Legislation", (i) the Data Protection Acts 1988 and 2003 or any other legislation or regulations implementing Directive 95/46/EC, (ii) the European Communities (Electronic Communications Networks and Services) (Privacy and Electronic Communications) Regulations 2011, (iii) on and with effect from 25 May 2018, the General Data Protection Regulation (Regulation (EU) 2016/679 of the European Parliament and the Council of 27 April 2016) and any consequential national data protection legislation and (iv) any guidance and/or codes of practice issued by the Irish Data Protection Commissioner or other relevant supervisory authority, including without limitation the European Data Protection Board.

"Dealing Day", each Business Day (and/or such other day as the Directors may from time to time determine (with the approval of the Depositary) and notify to Shareholders) for dealings in a Fund, provided always that there shall be at least one Dealing Day per fortnight.

"Dealing Deadline", in respect of each Fund means the cut-off time in respect of any Dealing Day for receipt of applications for subscriptions and redemptions as shall be set out in the relevant Supplement or such earlier or later time prior to the Valuation Point as the Directors may, at their discretion, determine and notify in advance to Shareholders.

"Dealing Form", such dealing form as the Directors may prescribe for the purposes of dealing in Shares of the Company and relevant Share Class of a Fund.

"Defaulted Bonds", bonds where the issuer has failed to make required debt payments on a timely basis or to comply with other conditions of the bond.

"Depositary", Northern Trust Fiduciary Services (Ireland) Limited and/or such other person as may be appointed, with the prior approval of the Central Bank, to act as depositary to the Company.

“Depository Agreement”, the agreement between the Company, the Manager and the Depository dated 1 February 2019 and as may be amended from time to time.

“Depository Receipt”, an equity-related security which evidences ownership of underlying securities. Depository Receipts may include American Depository Receipts (“ADRs”), European Depository Receipts (“EDRs”), Non-Voting Depository Receipts (“NVDRs”) and Global Depository Receipts (“GDRs”).

“Distributing Classes”, such Share Class of a Fund as the Directors may from time to time designate and in respect of which income from the Fund will be distributed.

“Distribution Period”, a period in respect of which dividends are declared and paid (in respect of Distributing Classes) or accumulated and reinvested on behalf of Shareholders (Accumulating Classes).

“Directive”, Directive 2009/65/EC of the European Parliament and of the European Council of 13 July 2009 on the co-ordination of laws, regulations and administrative provisions relating to UCITS, as the same may be amended or replaced.

“Directors”, the directors of the Company or any duly authorised committee thereof.

“Duties and Charges”, in relation to any Fund, all stamp and other duties, taxes, governmental charges, brokerage, bank charges, interest, transfer fees, registration fees and other duties and charges whether in connection with the original acquisition or increase of the assets of the relevant Fund or the creation, issue, sale, conversion or repurchase of Shares or the sale or purchase of Investments or in respect of certificates or otherwise which may have become or may be payable in respect of or prior to or in connection with or arising out of or upon the occasion of the transaction or dealing in respect of which such duties and charges are payable but shall not include any commission payable to agents on sales and purchases of Shares or any commission, taxes, charges or costs which may have been taken into account in ascertaining the Net Asset Value of Shares in the relevant Fund.

“Eligible CIS”, UCITS Collective Investment Schemes (CIS) (including money market schemes) and alternative funds as defined in the Central Bank UCITS Regulations, the managers of which may not charge more than 2% of net asset value of such Eligible CIS as management fees and which Eligible CIS may not invest more than 10% of its Net Asset Value in underlying CIS. Eligible CIS will be regulated and authorised in Ireland or in another jurisdiction by a supervisory authority established to ensure the protection of shareholders and which, in the opinion of the Central Bank, provides an equivalent level of investor protection to that provided under Irish laws, regulations and conditions governing collective investment schemes. The investment strategies and investment restrictions of Eligible CIS may differ in certain respects from the strategy and investment restrictions of the Fund, provided that the investment in such Eligible CIS is consistent with the overall investment policy of the Fund and the Manager and/or and the Investment Manager is of the view that it does not result in a circumvention of the investment strategy or investment restrictions of the investing Fund. The Eligible CIS may be structured as mutual funds, actively managed funds or exchange-traded funds. These include:

- (a) UCITS CIS authorised in any Member State or authorised in any other European Economic Area (EEA) (being EU Member States, Norway, Iceland and Liechtenstein) member state pursuant to domestic legislation implementing the Directive, Guernsey Class A CIS, Jersey Recognised Funds, Isle of Man authorised schemes and retail AIFs authorised by the Central Bank provided such CIS comply in all material respects with the Central Bank UCITS Regulations;

- (b) alternative investment funds authorised in any EEA member state (and the UK in the event that it ceases to be an EEA member state), the United States, Jersey, Guernsey or the Isle of Man which comply in all material respects with the Central Bank's AIF Rulebook in respect of all retail schemes; and
- (c) alternative investment funds in jurisdictions other than those set out above which have obtained the prior approval of the Central Bank on the basis of a submission made by the Investment Manager for such purpose and where the jurisdiction of those collective investment schemes is set out in an update to the relevant Supplement.

"ERISA Plans", (i) any retirement plan subject to Title I of the US Employee Retirement Income Security Act of 1974, as amended ("ERISA"); (ii) any individual retirement account or plan subject to Section 4975 of the US Internal Revenue Code of 1986, as amended; or (iii) an entity whose assets include plan assets by reason of a plan's investment in the entity (generally because 25% or more of a class of equity interests in the entity is owned by plans).

"ESMA", the European Securities and Markets Authority.

"Euro" or "€", the single European currency unit referred to in Council Regulation (EC) No. 974/98 on 3 May 1998 on the introduction of the Euro.

"Exchange Traded Notes", a debt security typically issued by a bank or other financial institution, which is listed and traded on recognised exchanges throughout the day at prices determined by the market and which may provide exposure to the performance of an underlying asset, index or benchmark.

"FATCA", Sections 1471–1474 of the US Internal Revenue Code or the Foreign Account Tax Compliance Act.

"FDIs", financial derivative instruments.

"Fees and Expenses to Higher Income Share Classes" means the share classes which may charge certain fees and expenses to capital rather than income.

"Forward Currency Exchange Contract", a financial contract where one party agrees to buy or sell a currency amount in the future at a particular price.

"Fund", a fund of assets established (with the prior approval of the Central Bank) for one or more Share Classes, which is invested in accordance with the investment objective and policies applicable to such fund.

"Future", a financial contract where one party agrees to buy or sell a standard quantity of a specific asset (or, in some cases, receive or pay cash based on the performance of an underlying asset, instrument or index) at a fixed date in the future for a particular price.

"Global Supplement", a Supplement to this Prospectus which lists all Funds of the Company currently approved by the Central Bank.

"Hong Kong", the Hong Kong Special Administrative Region of the People's Republic of China.

"Hong Kong Dollars" or "HKD", the lawful currency of Hong Kong.

"Initial Offer Period", the period set out by Directors in relation to any Share Class as the period during which such Shares are initially on offer unless such period is shortened or extended and notified to the Central Bank. Specific details of the Initial Offer Period for a Fund's Share Classes are set out in the relevant Supplement.

“Initial Offer Price”, the price set by the Directors in relation to any Share Class at which Shares are offered during the Initial Offer Period which may be increased by such dilution/adjustment as the Directors consider to be in the best interests of the Shareholders. Specific details of the Initial Offer Price for a Fund’s Share Classes are set out in the relevant Supplement.

“Inverse Exposure”, in relation to a Fund and where disclosed in its investment policy, exposure achieved, through the use of FDIs, to a category (or categories) of Investment(s) that correspond(s) to the inverse performance of an underlying category (or categories) of Investment(s). For example, if a security provides a return of +1% the return delivered to the Fund will be -1%.

“Inverse Leveraged Exposure”, in relation to a Fund and where disclosed in its investment policy, exposure achieved, through the use of FDIs, to a category (or categories) of Investment(s) that correspond(s) to the inverse leveraged performance of an underlying category (or categories) of Investment(s). For example, if a security provides a return of +1% the return delivered to the Fund will be a multiple of the opposite exposure, for example -2%.

“Investment”, any investment which is permitted by the Regulations and the Articles and is authorised by the Memorandum of Association of the Company.

“Investment Grade”, bonds or other securities that are rated at or above Baa3 by Moody’s or BBB- by S&P or an equivalent rating by another rating agency.

“Investment Manager”, any such person as may be appointed, in accordance with the requirements of the Central Bank, to provide investment management services to one or more Funds of the Company. The Investment Manager appointed to manage a particular Fund will be listed on the cover page of the Supplement of that Fund and in the section of this Prospectus titled **“Management and Administration”**. Unless otherwise disclosed in this Prospectus, references to the Investment Manager shall be to any Investment Manager appointed in respect of one or more Funds.

“Investment Management Agreement”, any agreement between the Manager and the Investment Manager, as may be amended from time to time, and detailed in the section of this Prospectus titled **“Material Contracts”**.

“Japanese Yen” or “JPY”, the lawful currency of Japan.

“KID”, a key information document.

“KIID”, a key investor information document.

“Leveraged Exposure” in relation to a Fund and where disclosed in its investment policy, exposure achieved, through the use of FDIs, to a category (or categories) of Investment(s) which corresponds to a multiple of the performance of an underlying category (or categories) of Investment(s). For example, if a security provides a return of +1% the return delivered to the Fund will be a multiple of the return, for example +2% (or conversely, a return of -1% will provide a return to the Fund of -2%).

“Management Agreement”, the agreement between the Company and the Manager dated 1 February 2019 and as may be amended from time to time.

“Manager”, Hermes Fund Managers Ireland Limited

“Maximum Subsequent Subscription Amount”, the maximum amount which a Shareholder can subscribe for Share Class of a Fund as set out in the relevant Supplement or, where specified

in respect of a Fund, on [Federated Hermes Capacity Management](#). This amount may be set or waived at the discretion of the Investment Manager.

"Member State", a member state of the European Union; the member states at the date of this Prospectus being Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and the Netherlands..

"MiFID II Directive", Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU.

"Minimum Holding Amount", a holding of Shares of any class having an aggregate value of such minimum amount as set out in the relevant Supplement, which may be set or waived at the discretion of the Investment Manager. Shareholders will be notified of any permanent change to the Minimum Holding Amount and the Company has the power to redeem the remaining holding of any Shareholder who redeems his holding of Shares in any Share Classes to below the amount set out in the Supplement or its foreign currency equivalent.

"Minimum Initial Subscription Amount", a minimum subscription for Shares of any class as set out in the relevant Supplement, which may be set or waived at the discretion of the Investment Manager. Shareholders will be notified of any permanent change to this Minimum Initial Subscription Amount.

"Minimum Redemption Amount", a minimum redemption for Shares of any class as set out in the relevant Supplement, which may be set or waived at the discretion of the Investment Manager. Shareholders will be notified of any permanent change to Minimum Redemption Amount.

"Minimum Subsequent Subscription Amount", a minimum subsequent subscription for Shares of any class as set out in the relevant Supplement, which may be set or waived at the discretion of the Investment Manager. Shareholders will be notified of any permanent change to this Minimum Subsequent Subscription Amount.

"Net Asset Value", "NAV" means the net asset value of a Fund determined in accordance with the Articles.

"Net Asset Value Per Share", the Net Asset Value divided by the number of Shares in issue of the relevant Fund subject to such adjustment, if any, as may be required where there is more than one class of Shares in the Fund.

"Net Redemption Position", when on any Dealing Day total redemptions exceed total subscriptions.

"Net Subscription Position", when on any Dealing Day total subscriptions exceed total redemptions.

"Norwegian Krone" or "NOK", the lawful currency of Norway.

"OECD", the Organisation for Economic Co-operation and Development.

"Option", a financial contract which gives the contract buyer the right, but not the obligation, to exercise a term of the option, such as buying a specified quantity of a particular product, asset or financial instrument, on, or up to and including, a future date. The 'writer' (seller) has the obligation to honour the specified term of the contract.

"OTC ("over the counter") Derivatives", derivative contracts between a Fund and one or more counterparties, undertaken without the involvement of an exchange or intermediary.

"Privacy Statement", the privacy statement adopted by the Company, as amended from time to time. The current version will be available via the website www.hermes-investment.com/privacy/ from 25 May 2018 onwards.

"Prospectus", this document as it may be amended from time to time in accordance with the requirements of the Central Bank together with, where the context requires or implies, any Supplement or addendum.

"Qualified Holder", any person, corporation or entity other than (i) a US Person; (ii) an ERISA Plan; (iii) a Canadian Resident; (iv) any other person, corporation or entity which cannot acquire or hold Shares without violating laws or regulations whether applicable to it or the Company or otherwise or whose holding might result (either individually or in conjunction with other Shareholders in the same circumstances) in the Company incurring any liability to taxation or suffering pecuniary disadvantages which the Company might not otherwise incur or suffer or the Company being required to register or register any class of its securities under the laws of any jurisdiction (including without limitation, the 1933 Act or the 1940 Act); or (v) a depository, nominee, or trustee for any person, corporation or entity described in (i) to (iv) above.

"Relevant Institution", a credit institution which falls under one of the following categories: (i) a credit institution authorised in the EEA and the UK; (ii) a credit institution authorised within a signatory state, other than an EEA Member State, the UK, or to the Basle Capital Convergence Agreement of July 1988 or (iii) a credit institution authorised in Jersey, Guernsey, the Isle of Man, Australia or New Zealand.

"Regulated Markets", the stock exchanges and/or regulated markets listed in Appendix I.

"Regulations", the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011) and the European Communities (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 (S.I. No. 143 of 2016) as may be amended or replaced.

"REITs", real estate investment trusts.

"Retail Price Index", an index published by the UK Office for National Statistics and which represents a measure of UK inflation.

"Securities Lending Agent", such person as may be appointed to act as a securities lending agent to the Company.

"Share", a share of no par value in the Company designated as a participating share.

"Share Class" or "Share Classes", such Share Class of a Fund as the Directors may from time to time designate.

"Shareholder", the registered holder of a Share.

"Singapore Dollars" or "SGD", the lawful currency of Singapore.

"Sterling" or "GBP", the lawful currency of the United Kingdom.

"Subscriber Shares", shares of GBP 1 each in the capital of the Company designated as "Subscriber Shares" in the Articles and issued for the purposes of incorporating the Company.

"Supplement", any document issued by the Company expressed to be a supplement to this Prospectus in accordance with the requirements of the Central Bank.

"Swaps", OTC FDI contracts, entered into on behalf of the Fund and a counterparty (of the type or nature referred to in Appendix II, Part B of the Prospectus) and/or options on such contracts (swaptions) for the purpose of gaining economic exposure to an asset class, or a combination of asset classes described in the investment policy in furtherance of the investment objective of the Fund. Swaps in which the Fund may invest include index Swaps, total return Swaps, currency Swaps, cross-currency Swaps, excess-return Swaps, cross-currency asset Swaps, interest rate Swaps, credit default Swaps, inflation Swaps or asset Swaps.

"Swedish Krona" or "SEK", the lawful currency of Sweden.

"Swiss Francs" or "CHF", the lawful currency of Switzerland.

"Synthetic Short Exposure", in relation to a Fund and where disclosed in its investment policy, exposure achieved, through the use of FDIs, to create the same effect as entering into a contract to sell an Investment not actually held by the Fund.

"Taxes Act", the Taxes Consolidation Act, 1997, as amended, (of Ireland).

"UCITS", an Undertaking for Collective Investment in Transferable Securities established pursuant to the Directive.

"Umbrella Cash Account", a cash account designated in a particular currency opened in the name of the Company on behalf of all Funds into which (i) subscription monies received from investors who have subscribed for Shares are deposited and held until Shares are issued as of the relevant Dealing Day; (ii) redemption monies due to investors who have redeemed Shares are deposited and held until paid to the relevant investors; and (iii) dividend payments owing to Shareholders are deposited and held until paid to such Shareholders.

"UN Global Compact", a non-binding United Nations pact to encourage businesses and firms worldwide to adopt sustainable and socially responsible policies which is derived from human rights, labour, environment, and anti-corruption principles. A third-party provider provides the Investment Manager with a list of companies that they deem to be in violation. Exemptions are allowed where the Investment Manager can articulate why a company is not in violation.

"United Kingdom" or "UK", the United Kingdom of Great Britain and Northern Ireland.

"US", the United States of America, its territories, possessions, any state of the United States and the District of Columbia.

"US Dollars", and "USD", the lawful currency of the US.

"US Person", is defined in Appendix IV of this Prospectus. US Persons may not purchase Shares in the Company without the prior approval of the Directors.

"Valuation Point", in respect of a Fund, such time and day as the Directors may from time to time determine in relation to the valuation of the assets of a Fund.

"Value-at-Risk" (VAR), is a daily estimation of the maximum loss a Fund may incur over a specified holding period. It is arrived at through quantitative simulations with a one-tailed confidence interval of 99% and an observation period of at least 1 year (250 business days). Each Fund that uses VAR will utilise an "Absolute VAR" approach which aims to ensure that the value-at-risk of the relevant Fund, measured using a 20 day (one month) holding period and a historical return observation period of 1 year, will be no greater than 20% of the Net Asset Value of the Fund. It shall be calculated on at least a daily basis.

"Warrant", a security that gives the holder the right to purchase securities from the issuer at a specific price within a certain time frame.

Federated Hermes Investment Funds Public Limited Company

Introduction

The Company is an open-ended investment company with variable capital and segregated liability between its Funds incorporated in Ireland on 23 October 2008. The Company has been authorised by the Central Bank as a UCITS within the meaning of the Regulations.

The Company is structured as an umbrella fund in that different Funds of the Company may be established with the prior approval of the Central Bank. In addition, each Fund may have more than one Share Class allocated to it. Additional Share Classes may be added to a Fund in accordance with the requirements of the Central Bank. The Shares of each class allocated to a Fund will rank equally with each other in all respects except as to all or any of the following or as the Directors may otherwise determine:

- currency of denomination of the class;
- dividend policy;
- hedging policy;
- the level of fees and expenses to be charged; and
- the Minimum Subscription, Minimum Redemption and Minimum Holding limits applicable.

The assets of each Fund will be separate from one another and will be invested in accordance with the investment objectives and policies applicable to each such Fund. The share capital of each Fund shall at all times equal its Net Asset Value.

The base currency of the Company is Sterling. The base currency of each Fund will be determined by the Directors and will be set out in the relevant Supplement.

Details of the Funds of the Company currently approved by the Central Bank are set out in the Global Supplement. Specific details concerning each Fund are set out in the Supplement for that Fund. On the establishment of any new Fund or the creation of a new Share Class of an existing Fund, a Supplement will be issued in respect thereof and, where applicable, the Global Supplement will be updated accordingly.

Investment Objectives and Policies

General

The specific investment objectives and policies for each Fund will be formulated by the Directors at the time of the creation of that Fund and set out in the relevant Supplement.

Any alteration to the investment objective of a Fund at any time will be subject to the prior approval in writing of all of the Shareholders of that Fund, or, if a general meeting of the Shareholders of the Fund is convened, by a simple majority of the votes cast at such meeting. Any material alteration to the investment policy of a Fund at any time will be subject to the prior approval in writing of all of the Shareholders of that Fund, or, if a general meeting of the Shareholders of the Fund is convened, by a simple majority of the votes cast at such meeting. Shareholders will be given reasonable notice so as to enable them to redeem their Shares prior to the implementation of any alteration to the investment objectives or any material alteration of the investment policies of a Fund.

The stock exchanges and markets in which the Funds may invest are set out in Appendix I. These stock exchanges and markets are listed in accordance with the requirements of the Central Bank, it being noted that the Central Bank does not issue a list of approved exchanges or markets.

A Fund may utilise FDIs for investment purposes where this intention is disclosed in a Fund's investment policies.

A Fund may, subject to the conditions set out in Appendix III and where it is appropriate to its investment objective and policies, invest in other Funds of the Company and/or other collective investment schemes. As an investor in such other collective investment schemes, the Fund will bear, along with other investors of the underlying schemes, its portion of the expenses of the underlying scheme including management, investment management and administration and other expenses.

The following investment restrictions apply where a Fund (the "**Investing Fund**") invests in other Funds of the Company (the "**Receiving Funds**"):

- (a) a Fund will not invest in a Fund of the Company which itself holds shares in other Funds of the Company;
- (b) a Fund investing in such other Fund of the Company will not be subject to subscription, redemption or switching fee;
- (c) any commission (including a rebated commission) received by the Investment Manager in respect of such investment will be paid into the assets of the Fund. Where an Investing Fund invests in a Receiving Fund, the rate of the annual management fee which Shareholders in the Investing Fund are charged in respect of that portion of the Investing Fund's assets invested in Receiving Funds (whether such fee is paid directly at Investing Fund level, indirectly at the level of the Receiving Funds or a combination of both) shall not exceed the rate of the maximum annual investment management fee which investors in the Investing Fund may be charged in respect of the balance of the Investing Fund's assets, such that there shall be no double charging of the annual investment management fee to the Investing Fund as a result of its investments in the Receiving Fund; and

- (d) investment by a Fund in another Fund of the Company will be subject to the limits set out in paragraphs 3.1 to 3.3 of Appendix III.

Following a formal decision to terminate a Fund, the Investments of the Fund may be liquidated and converted to cash so as to enable termination of the Fund in an orderly manner and in order to preserve Shareholder value.

Investment and Borrowing Restrictions

Investment of the assets of each Fund must comply with the Regulations. A detailed statement of the general investment and borrowing restrictions applicable to all Funds is set out in Appendix III. The Directors may impose further restrictions in respect of any Fund. Details will be set out in the relevant Supplement.

The Directors may also from time to time impose such further investment restrictions as may be compatible with or be in the interest of the Shareholders in order to comply with the laws and regulations of the countries where Shareholders of the Company are located or the Shares are marketed.

It is intended that the Company should, subject to the prior approval of the Central Bank, have power to avail itself of any change in the investment restrictions laid down in the Regulations which would permit investment by the Company in securities or in any other forms of investment which, as at the date of this Prospectus, is restricted or prohibited under the Regulations. The Company will give Shareholders reasonable notice of its intention to avail itself of any such change which is material in nature and the Prospectus will be updated accordingly.

Investment in FDIs and Efficient Portfolio Management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities for investment purposes, where this intention is disclosed in a Fund's investment policies, and/or for efficient portfolio management purposes. Such techniques and instruments are set out in Appendix II and the instruments may include investments in FDIs such as investments in Futures (which may, for example, be used to manage cash flows on a short term basis by holding the Future to gain exposure to an asset class pending direct investment), Forward Currency Exchange Contracts, Options, Warrants, swaptions, contracts for differences and Swaps (which may, for example, be used to manage interest rate and currency risk), including inflation Swaps (which may, for example, be used to manage inflation risk).

Efficient portfolio management means investment techniques involving transactions that are entered into for one or more of the following specific aims: the reduction of risk, the reduction of cost, or the generation of additional capital or income for a Fund with an appropriate level of risk, taking into account the risk profile of that Fund. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques and instruments in accordance with the requirements of the Central Bank. The Company will only utilise FDIs which are included in its risk management process as filed with the Central Bank. A Fund may enter into stock lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management in accordance with the provisions of Appendix II.

Unless otherwise stated in the relevant Supplement, the Manager and/or the Investment Manager may on an ancillary basis and for cash management purposes invest in deposits, money market instruments and in Eligible CIS in accordance with the requirements of the Central Bank.

Leverage and Global Exposure

Unless otherwise specified in a Fund Supplement, the Manager and/or the Investment Manager calculates global exposure using a methodology known as the commitment approach which seeks to manage and measure the global exposure and potential loss due to market risk of each Fund. When using the commitment approach, a Fund's global exposure, which is the incremental exposure and leverage generated by the Fund through its use of FDIs, shall be calculated on at least a daily basis and, in accordance with the requirements of the Central Bank. The total leverage may at no time exceed 100% of the Fund's Net Asset Value and the total exposure may at no time exceed 200% of the Fund's Net Asset Value. Total exposure is defined as the NAV of the Fund and its global exposure. Where relevant, each Fund will set out in its Supplement its expected level of leverage.

Dividend Policy

The Directors are empowered to declare and pay dividends on any Share Class in the Company.

Accumulating Classes

For each of the Accumulating Classes it is not intended to distribute dividends to the Shareholders in a Fund. The income and other profits will be accumulated and reinvested on behalf of Shareholders. Dividends, if paid on the Shares, may be paid out of the net income of the Fund including interest and dividends earned by the Fund less expenses of the Fund.

Distributing Classes

For each of the Distributing Classes it is intended to declare dividends on the Shares of the Distributing Classes of a Fund out of the net income of the Fund including interest and dividends earned by the Fund less expenses of the Fund. The Directors may change the frequency with which the Distributing Classes declare and pay dividends and Shareholders will be notified of any changes by way of a note to the annual or semi-annual financial statements of the Company. Distribution payments will be made to the bank account detailed on the Application Form, to such bank account as may be subsequently notified to the Administrator in writing or as confirmed under separate agreement with the Distributor and pre-agreed with the Administrator, in its capacity as the Transfer Agent.

The dividend is distributed to Shareholders based upon the number of Shares held at the end of the relevant period. Distributing Classes distribute income semi-annually, unless otherwise indicated by a numerical suffix accompanying the share class letter. Dividends will be paid within 30 days of the end of the relevant calculation dates set out in respect of each Class in the table below.

In accordance with the provisions of the Company's Articles of Association, each Fund operates equalisation in relation to all Share Classes. The process is outlined in further detail in the "Income Equalisation" section below.

Calculation of Dividends

| | Calculation Frequency |
|---|--|
| Distributing shares (this will be referred to as the share class type e.g. F2) | The dividend is calculated semi-annually as at 30 June and 31 December in each year. |
| Distributing (1) shares (this will be referred to with the share class type e.g. F1) | The dividend is calculated annually as at 31 December in each year. |
| Distributing (3) shares (this will be referred to with the share class type e.g. F3) | The dividend is calculated quarterly as at 31 March, 30 June, 30 September and 31 December in each year. |
| Distributing (4) shares (this will be referred to with the share class type e.g. F4) | The dividend is calculated monthly as at the last calendar day in each month. |
| Distributing (5) shares (this will be referred to with the share class type e.g. F5) | The dividend is calculated quarterly as at 31 March, 30 June, 30 September and 31 December in each year. |
| Distributing (6) shares (this will be referred to with the share class type e.g. F6) | The dividend is calculated monthly as at the last calendar day in each month. |

Share Class types (5) and (6) shall charge certain fees and expenses to capital.

Currency Hedging Policy

Hedging at Portfolio Level

At the Manager's and/or the Investment Manager's discretion, a Fund may enter into transactions for the purposes of hedging the currency exposure of the underlying securities into the base currency of a Fund. If undertaken, the aim of this hedging will be to reduce a Fund's level of risk or to hedge the currency exposure to the currency of denomination of some or all of a Fund's underlying securities. FDIs such as Forward Currency Exchange Contracts and currency Swaps (which will seek to give exposure to an underlying currency) may be utilised if a Fund engages in such hedging. The currency exposure generated as a result of investing in securities which are denominated in a currency other than the base currency will not be allocated to separate classes.

Hedging at Share Class Level against Base Currency

Hedging will normally be against the base currency of a Fund (set out in the relevant Supplement) (the "Hedged Share Classes").

A Fund is permitted to enter into transactions for the purpose of hedging the currency exposure of any class which is denominated in a currency other than the base currency of a Fund (set out in the relevant Supplement) against fluctuations in the base currency. This is facilitated by the offering of Hedged Share Classes. For example, an investor subscribing for Shares in their local currency would invest in a Fund via one of the local currency Hedged Share Classes. The value of the investment at the time of subscription on an ongoing basis would be hedged against the

base currency of a Fund to try and minimise the impact of currency movements between the currency of denomination of the relevant Hedged Share Class and the base currency of a Fund.

Hedging at Share Class Level against Portfolio Currencies

Where set out in the relevant Supplement, a Fund may hedge the currency of denomination of the relevant hedged Share Classes of a Fund against some or all of the currencies in which the assets contained in a Fund's portfolio are denominated (the "Portfolio Hedged Share Classes").

A Fund is permitted to enter into transactions for the purpose of hedging the currency exposure with a view to mitigating the effect of adverse currency movements between the currencies of the relevant Share Class and some or all of the currencies in which the underlying assets of that Fund are denominated. This is facilitated by the offering of Portfolio Hedged Share Classes. For example, an investor subscribing for Shares in their local currency would invest in a Fund via one of the local currency Portfolio Hedged Share Classes. The value of the investment at the time of subscription on an ongoing basis would be hedged against some or all of the currencies in which the underlying assets of that Fund are denominated to try and minimise the impact of currency movements between the currency of denomination of the relevant Portfolio Hedged Share Class and the currencies in which the assets contained in a Fund's portfolio are denominated.

It may not be practical to hedge against all currencies of the underlying assets of the relevant Fund. In such circumstances, the Manager and/or the Investment Manager will select a representative basket of currencies with the aim of ensuring that the most significant risks arising from currency fluctuations are mitigated without incurring unnecessary operational costs or complexity.

Where a Fund offers Portfolio Hedged Share Classes, it will not enter into hedging at portfolio level as described in the sub-section "Hedging at Portfolio Level" above. This is to avoid a situation where the relevant Portfolio Hedged Share Class participates in both hedges with the result that it is inadvertently over-hedged or that the combined effect of hedging at both levels results in unintended currency exposure.

General

This hedging will typically be undertaken by means of Forward Currency Exchange Contracts and currency Swaps (which will seek to hedge exposure to the base currency of a Fund). Shareholders of Hedged Share Classes and Portfolio Share Classes should be aware that there can be no assurance that any such strategy will be effective.

The extent to which a Fund intends to hedge against such currency fluctuations shall not exceed total gross exposure of 105% of the Net Asset Value of the relevant Share Class. Whilst not the intention, over-hedged or under-hedged positions may arise due to factors outside of the control of a Fund. Hedged positions will be kept under review by the Manager and/or the Investment Manager to ensure that over-hedged positions do not exceed the permitted level and under-hedged positions do not fall short of 95% of the portion of the Net Asset Value of the relevant Share Class which is to be hedged. This review will also incorporate a procedure to ensure that positions materially in excess of 100% will not be carried forward from month to month. All such transactions will be clearly attributable to the specific class and currency exposures of different classes will not be combined or offset. The costs and gains/losses of the hedging transactions will accrue solely to the relevant Share Class.

The Hedged Shares will be hedged against the base currency of a Fund regardless of whether the base currency of a Fund is declining or increasing in value relative to the Hedged Share Class currency denominations available and so while holding Hedged Shares may substantially protect the Shareholders against declines in the base currency of a Fund relative to the currency denomination of the Hedged Share Class in which they are invested, holding such Hedged Shares may also substantially limit the Shareholders from benefiting if there is an increase in the value of the base currency of a Fund relative to the currencies in which Hedged Share Classes are available in a Fund. Details of the currencies in which Hedged Share Classes are available in a Fund are set in the relevant Supplement.

The Portfolio Hedged Shares will be hedged against some or all of the currencies in which the underlying assets of that Fund are denominated, regardless of whether those currencies are declining or increasing in value relative to the Portfolio Hedged Share Class currency denominations available and so while holding Portfolio Hedged Shares may substantially protect the Shareholders against declines in currencies in which the underlying assets of that Fund are denominated relative to the currency denomination of the Portfolio Hedged Share Class in which they are invested, holding such Portfolio Hedged Shares may also substantially limit the Shareholders from benefiting if there is an increase in the value of some or all of the currencies in which the underlying assets of that Fund are denominated relative to the currencies in which Portfolio Hedged Share Classes are available in a Fund. Details of the currencies in which Portfolio Hedged Share Classes are available in a Fund are set in the relevant Supplement.

Common Investment Pools

Subject to the Central Bank's requirements, the Company may establish common investment pools. Common investment pools are pools of assets to which Investments of some or all of the Funds may be allocated and in which, subject to the requirements of the Central Bank, assets of other Irish regulated collective investment schemes may be allocated. Common investment pools will only be established if the Company's service providers have been authorised by the Central Bank to operate such common investment pools and the Prospectus will be updated prior to implementing investment in such common investment pools.

Risk Factors

Potential investors should consider the following risk factors before investing in the Company.

General Risk Factors

Concentration Risk

Where a Fund invests a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries. Fund performance could therefore be more volatile than the performance of more geographically-diversified funds.

When a Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Counterparty Risk to the Depositary

The Company will be exposed to the credit risk of the Depositary as a counterparty or any depositary used by the Depositary where cash is held by the Depositary or other depositaries. In the event of the insolvency of the Depositary or other depositaries, the Company will be treated as a general creditor of the Depositary or other depositaries in relation to cash holdings of the Funds. The Fund's securities are however maintained by the Depositary or other depositaries in segregated accounts and should be protected in the event of insolvency of the Depositary or other depositaries. Were such a counterparty to have financial difficulties, even if a Fund is able to recover all of its capital intact, its trading could be materially disrupted in the interim, potentially resulting in material losses.

Credit Risk

A credit risk is the risk of default on a debt that may arise from a counterparty or other entity with a payment obligation to the Company failing to make required payments from time to time. A Fund will be exposed to a credit risk on parties (counterparties or otherwise) with whom it trades and may also bear the risk of settlement default. In the event of a bankruptcy or other default, a Fund could experience both delays in liquidating the underlying securities and losses, including a possible decline in value of the underlying securities during the period when a Fund seeks to enforce its rights thereto. This will have the effect of reducing levels of capital and income in a Fund and lack of access to income during this period together with the expense of enforcing such Fund's rights.

A Fund may be subject to risk of loss of its assets held by a broker (including a settlement system) in the event of the broker's bankruptcy or fraud, the bankruptcy or fraud of any clearing broker through which the broker executes and clears transactions on behalf of a Fund, or the bankruptcy or fraud of an exchange clearing house. This may affect the Company's right of action in respect of such assets. Even if a Fund is able to recover all of its assets intact, its trading could be materially disrupted in the interim, potentially resulting in material losses to the Company and its Shareholders.

Counterparty Credit Risk

Counterparty credit risk arises from a counterparty failing to settle an open transaction. This includes the purchase and sale of equity and fixed income securities, money market transactions, foreign exchange and all types of on exchange and OTC derivatives. The counterparty is typically defined as a financial institution such as a bank or a broker. The risk associated with each transaction varies depending on the instrument traded, method of settlement, legal documentation in place, any collateralisation or netting arrangements and market practice, amongst other factors. Counterparty credit risk involves both pre-settlement risk and settlement risk. Settlement risk is the risk that one party will fail to deliver the terms of a contract with another party at the time of settlement. Pre-settlement risk is the risk that a counterparty fails to fulfil its obligation or default prior to the settlement of a transaction.

Issuer Credit Risk

Issuer risk arises where the issuing party fails to fulfil its obligations (e.g. defaults on repayments), thus negatively impacting the value of the assets held.

Currency Risk

Assets of a Fund of the Company may be denominated in a currency other than the base currency of the relevant Fund and changes in the exchange rate between the base currency of the Fund and the currency of the asset may lead to an appreciation or depreciation of the value of the relevant Fund's assets as expressed in the base currency.

Depending on the currency of the relevant share class, currency fluctuations between that currency and the base currency of a Fund may adversely affect the value of an investment in that Fund.

A Fund may from time to time enter into currency exchange transactions such as Forward Currency Exchange Contracts. Forward Currency Exchange Contracts do not eliminate fluctuations in the prices of a Fund's assets or in foreign exchange rates, or prevent losses if the prices of these assets should decline. Performance of a Fund may be strongly influenced by movements in foreign exchange rates because currency positions held by a Fund may not correspond with the base currency of the assets held. To the extent that hedging at Share Class level is successful, the performance of the Share Class is likely to move in line with the performance of the underlying Investments and investors in a hedged Share Class will not benefit if the Share Class currency falls against the base currency and/or the currency in which the assets of the relevant Fund are denominated.

Currency Hedging Risk

A Share Class in a Fund may be designated in a currency other than the base currency of the Fund. Changes in the exchange rate between the base currency and such designated currency may lead to a depreciation of the value of such Shares as expressed in the designated currency. The Manager and/or the Investment Manager may try, but is not obliged, to mitigate this risk by using financial instruments such as those described under the sub-heading "Currency Risk", provided that such instruments shall in no case exceed 105% of the Net Asset Value attributable to the relevant Share Class of the Fund or fall short of 95% of the portion of the Net Asset Value of the relevant Share Class which is to be hedged. In addition, hedged positions materially in excess of 100% of Net Asset Value and hedged positions falling short of the level described above will not be carried forward from month to month. Investors should be aware that this

strategy may substantially limit Shareholders of the relevant Share Class from benefiting if the designated currency weakens against the base currency. In such circumstances, Shareholders of the relevant Share Class of the Fund may be exposed to fluctuations in the Net Asset Value per Share reflecting the gains / losses on and the costs of the relevant financial instruments. Financial instruments used to implement such strategies shall be assets / liabilities of the Fund as a whole. However, the gains / losses on and the costs of the relevant financial instruments will accrue solely to the relevant Share Class of the Fund.

Cyber Security Risk

The Company and its service providers are susceptible to operational and information security and related risks of cyber security incidents. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber security attacks include, but are not limited to, gaining unauthorised access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber-attacks also may be carried out in a manner that does not require gaining unauthorised access, such as causing denial-of-service attacks on website (i.e., efforts to make services unavailable to intended users). Cyber security incidents affecting the Company, the Directors, the Manager, the Investment Manager, Administrator or Depositary or other service providers such as financial intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with the Company's ability to calculate its NAV, impediments to trading, the inability of Shareholders to transact business with the Company, violations of applicable privacy, data security or other laws, regulatory fines and penalties, reputational damage, reimbursement or other compensation or remediation costs, legal fees; or additional compliance costs. Similar adverse consequences could result in cyber security incidents affecting issuers of securities in which the Company or any Fund invests, counterparties with which the Company or any portfolio engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in any cyber security risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

Dealing Day Risk

A Fund may not trade on a particular non-Dealing Day or on a particular Dealing Day, when the calculation of its Net Asset Value (and as a result the subscription and redemption of Shares) may have been suspended, notwithstanding that foreign exchanges on which a Fund's Investments may be listed or traded may be open. As a result the value of the securities in the Fund's portfolio may change on days when Shareholders or other investors will not be able to purchase or sell a Fund's Shares.

The risk of suspending the calculation of its Net Asset Value (and as a result the subscription and redemption of Shares) is outlined further in "Suspension Risk" below.

ESG Data Risk

The Company, the Manager and/or the relevant Investment Manager may rely on third parties to provide ESG data. Therefore, the Company is subject to certain operational and data quality risks associated with reliance on third party screening providers and data sources. ESG

data provided by third parties may not always be reliable, consistent, or available and this may impact a Fund's ability to accurately assess Sustainability Risks and effectively promote environmental, governance and social characteristics or achieve its sustainable investment objective, where relevant.

Insufficiency of Dilution Adjustment Risk

A Fund will impose a Dilution Adjustment (as defined in the "Single Swing Pricing" section below) in order to meet the costs associated with the purchase and sale of Investments. The level of the Dilution Adjustment is determined by the Company and is estimated based on historic information concerning the costs incurred in trading the relevant securities in the relevant markets. If a Fund levies a Dilution Adjustment which is insufficient to discharge all of the costs incurred in the purchase or sale of Investments, the difference will be paid out of the assets of a Fund, which will result in a reduction in the value of a Fund (and a corresponding reduction in the value of the holding of all Shareholders).

Investment Risk

There is no assurance that the value of Investments will increase, or that the investment objectives of any Fund will be achieved. The value of Investments and the income derived therefrom may fall as well as rise and investors may not recoup the original amount invested in a Fund. An investment should only be made by those persons who are able to sustain a loss on their investment.

Key Personnel Risk

The success of a Fund depends upon the ability of the Manager and/or the Investment Manager to develop and implement investment strategies that achieve a Fund's investment objective. The operations of a Fund are substantially dependent upon the skill, judgment and expertise of the principals of the Manager and/or the Investment Manager with respect to the trading activities of a Fund. In the event of the dissolution of the Manager and/or the Investment Manager, or personnel changes thereat (including the removal, death or a permanent incapacity of a principal), the business of the relevant Fund could be adversely affected.

Operational Risk

The Company depends on the Manager, the Investment Manager and their delegates to develop appropriate systems and procedures to control operational risk. These systems and procedures may not account for every actual or potential disruption of the Company's operations. The Company's business is dynamic and complex. As a result, certain operational risks are intrinsic to the Company's operations, especially given the volume, diversity and complexity of transactions that the Company is expected to enter into daily. The Company's business is highly dependent on the ability of the Manager, the Investment Manager, their delegates and other service providers of the Company to process, on a daily basis, transactions across numerous and diverse markets. Consequently, the Company relies heavily on the Manager's and the Investment Manager's financial, accounting and other data processing systems. The ability of such systems to accommodate an increasing volume, diversity and complexity of transactions could also constrain the ability of the Company to properly manage its Funds. Systemic failures in the systems employed by the Manager, the Investment Manager, the Administrator, and/or counterparties, exchanges and similar clearance and settlement facilities and other parties could result in mistakes made in the confirmation or settlement of transactions, or in transactions not

being properly booked, evaluated or accounted for. These and other similar disruptions in operations may cause a Fund to suffer, among other things, financial loss, the disruption of its businesses, liability to third parties, regulatory intervention or reputational damage.

Changes in Applicable Law and Regulation Risk

The Company is obliged to comply with various legal requirements, including requirements imposed by the securities laws, tax laws and pension laws in various jurisdictions. Legal, tax, and regulatory changes are likely to occur during the term of the Company and some of these changes may adversely affect the Company, perhaps materially. The financial services industry generally, and the activities of collective investment schemes and their managers, in particular, have been subject to intense and increasing regulatory scrutiny. Such scrutiny may increase the Company's exposure to potential liabilities and to legal, compliance, and other related costs and charges. Increased regulatory oversight may also impose additional administrative burdens on the Company, the Manager and the Investment Manager, including, without limitation, responding to investigations and implementing new policies and procedures. Such burdens may direct the Manager's and the Investment Manager's time, attention, and resources from portfolio management activities.

In addition, securities and futures markets are subject to comprehensive statutes, regulations, and margin requirements. The Central Bank and other regulators, self-regulatory organisations, and exchanges are authorised to take extraordinary actions in the event of market emergencies. The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial actions. Such changes may adversely affect the ability of the Company to obtain the leverage it might otherwise obtain or to pursue its investment strategies and may adversely affect the value of the investments held by a Fund. The effect of any future regulatory or tax change on the Company or any Fund is impossible to predict.

Investors should understand that the Company's business is dynamic and is expected to change over time. Therefore, the Company may be subject to new or additional regulatory constraints in the future. This Prospectus cannot address or anticipate every possible current or future regulation that may affect the Manager, the Investment Manager, the Company, or their businesses. Such regulations may have a significant impact on the Shareholders or the operations of the Company, including, without limitation, restricting the types of investments the Company may make, requiring the Company to disclose the identity of its investors, or otherwise. The Manager and/or the Investment Manager may cause a Fund to be subject to such regulations if it believes that an investment or business activity is in such Fund's interests, even if such regulations may have a detrimental effect on one or more Shareholders.

LIBOR Phase Out Risk

A fund may invest in certain securities or instruments which may be linked to LIBOR. LIBOR is an interbank offered rate intended to reflect the average cost of borrowing or obtaining unsecured short term funds in the interbank market in the relevant currency and maturity and is determined by the ICE Benchmark Administration. Interbank offered rates have been used extensively as a reference rate across the financial markets for many years; for instance a fund may invest in securities or derivatives whose value or payments may be derived from an interbank offered rate. Any potential effects of the transition away from LIBOR on a Fund or on certain securities and instruments in which a Fund invests can be difficult to ascertain, and they may vary depending on factors that include, but are not limited to: (i) existing fallback or termination provisions in individual contracts and (ii) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. For example, certain of a Fund's securities and investments may involve individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or reduced liquidity as a result of the transition process. The transition may also result in a reduction in the value of certain investments held by a Fund or a reduction in the effectiveness of related Fund transactions such as hedges. Furthermore, the transition process may also require changes to be made to a Fund's investment objective and policies. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Fund or in additional costs being borne by the Fund. This could lead to different results for a similar securities referencing different interbank offered rates which could have material effects on the performance of a Fund.

Liquidity Risk

It is possible that investments of a Fund may be subject to liquidity constraints in difficult market conditions. In such circumstances, it may be difficult to determine the appropriate valuation of Investments and the Fund's ability to sell or liquidate Investments at favourable times or for favourable prices may be restricted.

Market Risk

The Investments of a Fund are subject to general economic conditions, normal market fluctuations and the risks inherent in investment in international securities markets and there can be no assurances that appreciation in value will occur. Investment markets can be volatile and securities prices can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, market perception of the creditworthiness of the issuer and general market liquidity. Even if general economic conditions do not change, the value of an Investment in a Fund could decline if the particular industries, sectors or companies in which a Fund invests do not perform well or are adversely affected by events. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Since investment in securities may involve currencies other than the base currency of a Fund, the value of a Fund's assets may also be affected by changes in currency rates and exchange control regulations, including currency blockage. Further, legal, political, regulatory and tax changes may also cause fluctuations in markets and securities prices.

Pandemic Risk

Events such as pandemics or outbreaks of disease may lead to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. For example, beginning in late 2019, China experienced an outbreak of a new and highly contagious form of coronavirus disease, COVID-19 or 2019-nCoV. In the ensuing months, COVID-19 spread to numerous countries, prompting precautionary government-imposed restrictions to freedom of movement, population lockdowns and business closures in many countries.

The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, could have a significant negative impact on the economy and business activity in the countries in which a Fund may invest and global commercial activity and thereby adversely affect the performance of the Company's investments. Pandemics or outbreaks could result in a general economic decline in a given region, or globally, particularly if the outbreak persists for an extended period of time or spreads globally. This could have an adverse impact on the Company's investments, or the Company's ability to source new investments or to realize its investments. Pandemics and similar events could also have an acute effect on individual issuers or related groups of issuers and could adversely affect securities markets, availability of price, interest rates, auctions, secondary trading, ratings, credit risk, inflation, deflation and other factors relating to the Company's investments or the Investment Manager's operations and the operations of the Investment Manager's and the Company's service providers.

Additionally, the risks related to pandemics or outbreaks of disease are heightened due to uncertainty as to whether such an event would qualify as a force majeure event. The applicability, or lack thereof, of force majeure provisions could also come into question in connection with contracts that the Company and its investments have entered into, which could ultimately work to their detriment. The factors that are considered when determining whether a force majeure event has occurred are entirely dependent on the specific force majeure provision included in each contract. If a force majeure event is determined to have occurred, a counterparty to the Company or a portfolio investment may be relieved of its obligations under certain contracts to which it is a party, or, if it has not, the Company and its investments may be required to meet their contractual obligations, despite potential constraints on their operations and/or financial stability. Either outcome could adversely impact investments and the Company's performance.

Any outbreak of disease epidemics may result in the closure of the Manager and/or the Investment Manager's offices or other businesses. Such outbreaks of disease may have an adverse impact on the Company's value and/or the Company's investments. To the extent an epidemic is present in jurisdictions in which the Manager and/or the Investment Manager have offices or investments, it could affect the ability of the Manager and/or the Investment Manager's and their service providers to operate effectively, including the ability of personnel to function, communicate and travel to the extent necessary to carry out the Company's investment strategy and objectives. The Company may also suffer losses and other adverse impacts if disruptions continue for an extended period of time. In addition, the Manager and the Investment Manager's personnel may be directly impacted by the spread, both through direct exposure and exposure to family members. The spread of a disease among the Manager and/or the Investment Manager's personnel would significantly affect their ability to properly oversee the affairs of the Company, resulting in the possibility to implement a temporary or permanent suspension of the Company's investment activities or operation (including suspension of the Net Asset Value calculation), in accordance with the provisions of this Prospectus.

Reliance on Third Party Data Providers

To meet the stated investment objective and policy each Fund, the Company, the Manager and/or the relevant Investment Manager (together "the Parties") may rely on financial, economic and other data made available by companies, index providers, governmental agencies, rating agencies, exchanges, professional services firms, central banks or other third party providers (the "external data providers"). This data can have a material effect on the investments held by the relevant Fund. While the Parties carry out due diligence prior to engaging any such external data providers, the Parties do not generally have the ability to independently verify any such financial, economic and/or other data and are therefore dependent on the integrity of both the external data providers and the processes by which any such data is generated. The Fund could incur unexpected costs as a result of external data provider failures of, or substantial inaccuracy in, the generation of such data, for which losses the Parties, acting in good faith, will not be held liable.

Securities Lending Risk

The Company on behalf of a Fund may engage in a securities lending programme through a Securities Lending Agent. Fund Investments can be lent to counterparties over a period of time. A default by the counterparty, or fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of a Fund. Where securities lending transactions are entered into with companies related to the Manager and/or the Investment Manager these companies may have interests which conflict with those of a Fund in that they may act as principal or may provide banking, brokerage or other services to a Fund, thereby deriving benefit.

Segregated Liability Risk

The Company is structured as an umbrella fund with segregated liability between its Funds. As a matter of Irish law, the assets of one Fund will not be available to meet the liabilities of another. However, the Company is a single legal entity that may operate or have assets held on its behalf or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of any Fund of the Company will not be exposed to the liabilities of other Funds of the Company. As at the date of this Prospectus, the Directors are not aware of any existing or contingent cross-claim liability between any Funds of the Company.

Settlement Risk

A Fund may have dealing procedures which provide for the settlement of subscriptions monies after the cut-off time for receipt of Application Forms and/or Dealing Forms. The Fund will therefore bear the risk that investors fail to pay some or all of the relevant subscription monies or that such payments are not made within the timeframe set out in the relevant Supplement. The Company may pursue such investors to recover any losses suffered by the relevant Fund. However, the relevant Fund may suffer a loss if the Company is unable to recover these losses from such investors.

Systems Risk

The Company and the Funds depend on the Manager and/or the Investment Manager to develop and implement appropriate systems for a Fund's activities. The operational infrastructure around

the Company and the Funds relies extensively on computer programs and systems (and may rely on new systems and technology in the future) for various purposes including, without limitation, trading, clearing and settling transactions, evaluating certain financial instruments, monitoring its portfolio and net capital, and generating risk management and other reports that are critical to oversight of the Fund's activities. Certain of a Fund's and the Company's delegates' operations interface will be dependent upon systems operated by third parties, the Depositary, the Administrator, market counterparties and their sub-custodians and other service providers, and the Company may not be in a position to verify the risks or reliability of such third-party systems. These programs or systems may be subject to certain limitations, including, but not limited to, those caused by computer "worms", viruses and power failures. All operations are highly dependent on each of these systems and the successful operation of such systems is often out of the Company's or the relevant delegates' control. The failure of one or more systems or the inability of such systems to satisfy the Fund's growing businesses could have a material adverse effect on the Funds. For example, systems failures could cause settlement of trades to fail, lead to inaccurate accounting, recording or processing of trades, and cause inaccurate reports, which may affect the ability of a Fund to monitor its investment portfolio and risks.

Shareholder Concentration Risk

From time to time, a relatively large percentage of Shares of a Fund may be held by a small number of Shareholders. Redemptions by these Shareholders may reduce a Fund's liquidity and make it difficult for remaining Shareholders to redeem their Shares in a timely manner. Redemptions of large shareholdings may require the Manager and/or the Investment Manager to sell Investments at an inopportune time or prices, possibly resulting in a lower Net Asset Value per Share. Reduction in the size of a Fund could make it more difficult to generate a positive return or to recoup losses due to, among other things, reductions in the relevant Fund's ability to take advantage of particular investment opportunities or decreases in the ratio of its income to its expenses. In addition, there is a risk that the level of redemptions may become such that the remaining assets in the relevant Fund are not at a level that makes proper management of the Fund viable.

Suspension Risk

As outlined in "Dealing Day Risk" above, the Company may suspend calculation of the Net Asset Value and the subscription and redemption of Shares of one or more Funds under certain circumstances. During such suspension the market price of a Fund's Investments may not reflect the Net Asset Value per Share. In the event that the Company has to suspend the subscription and/or redemption of Shares of a Fund, or if a stock exchange on which a Fund's underlying investments are traded is closed, it is expected that larger discounts or premiums could arise. In certain markets trading on the local exchange may be carried out by one or a small number of local market account holders. If such account holder(s) fail(s) to deliver stock or monies in relation to a trade, there is a risk of suspension in relation to Funds which effect their trading on the local market through such account holder(s). This risk may be increased where a Fund participates in a securities lending programme. Suspension in either case may increase the costs of the Fund.

Sustainability Risk

As set out in the relevant Supplement, a Fund may promote environmental and social characteristics, as well as stewardship activities, as part of a responsible investment approach

or have sustainable investment as its objective. In such circumstances, sustainability risks are a key component of, and are integrated into, the investment process for a Fund.

The integration of sustainability risks may have a material impact on a Fund's value and returns. A Fund which invests in securities of companies based on their ESG behaviours may require that Fund to forego certain investment opportunities. As a result, a Fund may perform differently to other funds, which do not seek to promote environmental and social characteristics or do not have sustainable investment as their objective. This may include underperforming or outperforming those funds. In addition, investor sentiment towards companies perceived as managing their ESG risks better relative to their peers or attitudes to ESG generally may change over time, thereby potentially affecting the demand for such funds and their performance. The prices of securities in which a Fund may invest may be adversely affected by ESG conditions and events, further potentially affecting a Fund's value and performance.

However, a responsible investment approach encompassing systematic consideration of a range of ESG factors alongside stewardship activities, as well as more traditional financial analysis, may provide the potential for longer-term growth and returns, which may not be available in funds that do not seek to promote environmental and social characteristics or do not have sustainable investment as their objective.

The consideration of ESG factors involves the incorporation of longer-term risk factors including a company's relationship with its stakeholders as well as its impact, through both its operations and the products and services it offers, on the environment and wider society. The consideration of ESG factors also necessitates recognising the importance of the long-term health and stability of investment markets. Inadequate sustainability practices and policies can lead to, among other things, inefficiencies, operational disruption, litigation and reputational damage. Conversely, robust sustainability practices can mitigate these risks and enhance business quality, thereby delivering potentially superior longer-term returns for a Fund which invests in such issuers.

Taxation Risk

The tax information provided in the section entitled "Taxation" is based on the law and our understanding of the practice of taxation as at the date of this Prospectus and is subject to change from time to time. Any change in the tax status of the Company or a Fund, or in accounting standards, or in taxation or the tax regime, or in the practice relating to the interpretation or application of tax legislation in Ireland or in any jurisdiction where a Fund is registered, listed, marketed or invested could affect the tax status of the Company and any Fund. It could also affect the value of a Fund's Investments in the affected jurisdiction, a Fund's ability to achieve its investment objective, and/or alter the after-tax returns to Shareholders. It is possible that any legislative changes may have retrospective effect. Where a Fund trades in FDI, these considerations may also extend to the jurisdiction of the governing law of the FDI and/or the relevant counterparty and/or to the markets to which the FDI provides exposure. The availability and value of any tax relief available to Shareholders depend on the individual circumstances of each Shareholder. The tax information provided in the section entitled "Taxation" is not exhaustive. It is intended as a guide only and does not constitute legal or tax advice. Prospective Shareholders should consult their tax advisers with respect to their particular tax situations and the tax effects of an investment in the Funds. Where a Fund invests in a jurisdiction where the tax regime is not fully developed or is not sufficiently certain, neither the Company, the Manager, the Investment Manager, the Depositary nor the Administrator shall be liable to account to any Shareholder for any payment made or suffered by the Company or the affected Fund in good faith to a fiscal authority for taxes or other charges of the Company or the

affected Fund notwithstanding that it is later found that such payments need not or ought not have been made or suffered.

A Shareholder that is eligible for an exemption from Irish withholding tax is required to provide a declaration to the Company confirming their status as a condition of obtaining the exemption. Investors are advised to consult their own tax advisors in relation to their personal circumstances and suitability of this investment. Please see the section headed "Taxation" below."

The Company may be required to account for tax on any distribution or the value of the Shares deemed or actually disposed of, repurchased or transferred at the applicable rate unless it has received from the recipient or the transferor a declaration in the prescribed form confirming that the Shareholder is not a Shareholder in respect of whom it is necessary to deduct tax. The Company reserves the right to repurchase such number of Shares held by a transferor as may be necessary to discharge the tax liability arising therefrom. The Company reserves the right to refuse to register a transfer of Shares until it receives a declaration as to the transferee's residency or status in the form prescribed by the Irish Revenue Commissioners.

Valuation Risk

The Net Asset Value of a Fund will be calculated by the Administrator based, to the extent possible, on prices obtained from independent third-party sources including exchanges. The fair market value of those assets of a Fund for which a third-party price is not available will be valued based on other sources deemed reliable by the Directors, in consultation with the Administrator. Investors should note that there is a risk that a Shareholder who redeems their Shares while a Fund holds particular assets may be paid an amount less or more than it would otherwise be paid if the actual value of such assets is higher or lower than the value provided to the Administrator. In addition, there is a risk that a subscription for Shares could dilute the underlying value of such assets for the other Shareholders if the actual value of such assets is higher than the value provided to the Administrator. There is also a risk that greater investment management fees and performance fees (to the extent that performance fees are payable by a Fund) may be paid by a Fund in respect of certain assets or liabilities of the Fund than would have been paid if the actual value of such assets or liabilities is lower or higher than the value determined for the purposes of calculating those fees and allocations. None of the Directors, the Manager, the Investment Manager or the Administrator is under any liability (including any obligation to remit excess investment management fees or performance fees to a Fund or any of the Shareholders) if a price reasonably believed to be an accurate valuation of a particular asset of the Fund is found not to be such.

Volatility Risk

The Net Asset Value of certain Funds may be subject to a high degree of variation. The Manager and/or the Investment Manager will seek to manage the volatility of these Funds. However, Shareholders should be aware that Investments are subject to normal market fluctuations and other risks inherent in investing in securities.

Underlying Collective Investment Schemes Investment Risk

As a shareholder of underlying collective investment schemes, some of which may invest in underlying funds, a Fund will bear, along with other shareholders in an underlying collective investment scheme, its portion of the expenses of the underlying collective investment scheme including management, administration, custody and/or other fees. These fees will be in addition

to the management, administration and custody fees and other expenses which a Fund bears directly in connection with its own operations. Investment in affiliated underlying collective investment schemes with the Manager and/or the Investment Manager will be made on an arm's length basis. Where a Fund invests in an underlying collective investment scheme managed by the Manager and/or the Investment Manager or their affiliates, and the Manager and/or the Investment Manager or their affiliate, as the case may be, is entitled to receive a preliminary charge for its own account in respect of an investment in such underlying collective investment scheme, the Manager and/or the Investment Manager or the affiliate, as appropriate, shall waive the preliminary charge. Where a commission is received by the Manager and/or the Investment Manager by virtue of an investment in the shares of an underlying collective investment scheme, this commission will be paid into the property of the relevant Fund.

Potential Indemnity Risk in relation to certain sub-distribution arrangements

A sub-distributor and / or platform service provider, through which a Fund or Funds may be distributed could seek an indemnity from the Distributor in relation to certain losses which they might incur as a result of the negligence or failure of the Company or one of its service providers. The Distributor has been indemnified in turn by the Company in respect of payments it is obliged to make under such provisions. In most cases, the Company will be able to recover, in turn, from the relevant service provider or delegate whose acts or omissions caused the relevant loss. However, if the relevant service provider was to contest their liability, the Company could be obliged to pay out under the indemnity before receiving compensation, if any, from the relevant service provider. Furthermore, the indemnities provided to the sub-distributors could require compensation for a broader list of losses than would be covered under the relevant contract between the Company and the relevant service provider. The Company will use all reasonable efforts to limit these circumstances, where possible.

Potential implications of Brexit

On 31 January 2020, the United Kingdom (the "U.K.") formally left the EU. Under the terms of the withdrawal agreement a transition period ran to 31 December 2020, during which EU law continued to apply in the U.K. while the U.K. government and the EU continued to negotiate the terms of their future relationship. Following the conclusion of these negotiations and the expiry of the transition period, the longer term economic, legal, political and social framework to be put in place between the U.K. and the EU remains unclear in a number of respects.

Political and economic uncertainty and periods of exacerbated volatility in both the U.K. and in wider European markets may continue for some time. In particular, the U.K.'s decision to leave the EU may lead to a call for similar referendums in other European jurisdictions, which may cause increased economic volatility in the European and global markets. This mid- to long-term uncertainty may have an adverse effect on the economy generally and on the ability of the Company to successfully execute its strategy and to earn attractive returns.

In particular, currency volatility may mean that the returns of certain positions of the Company are adversely affected by market movements and may make it more difficult, or more expensive, for the Company to execute prudent currency hedging policies. Potential decline in the value of the British Pound and/or the Euro against other currencies, along with the potential downgrading of the U.K.'s sovereign credit rating, may also have an impact on the performance of certain investments made in the U.K. or Europe. In light of the above uncertainties, no definitive

assessment can currently be made regarding the impact that Brexit will have on the Company and its investments.

Limitation of Application Form Indemnities for Trustees Risk

The Company has agreed that for certain investors who are structured as trusts / pension funds (“**Trustee Investors**”) that in the absence of negligence or fraud, certain indemnities in the Application Form and Dealing Form would be limited to the assets of the trust / pension scheme in question. The result of this is that any such indemnities would not extend to the personal assets of the individual trustees of the Trustee Investor.

Risks associated with Fees and Expenses to Higher Income Share Classes

The Fees and Expenses to Higher Income Share Classes may charge certain fees and expenses to capital rather than income. Charging all or part of the fees and expenses to capital will result in income being increased for distribution; however, the capital that these Share Classes have available for investment in the future, and capital growth, may be reduced notwithstanding the performance of the relevant Fund. Shareholders should note that there is an increased risk that on the redemption of Shares of these Share Classes, Shareholders may not receive back the full amount invested. For investors in Fees and Expenses to Higher Income Share Classes this may result in the erosion of investors’ capital investment, or capital gains attributable to that original investment, which will likely diminish the value of future returns. The increased dividend payout as a result of charging fees and expenses to capital effectively amounts to a return or withdrawal of an investor’s original capital investment or of capital gains attributable to that original investment. Shareholders should note that to the extent expenses are charged to capital, some or all of the distributions made by the Fees and Expenses to Capital Share Classes should be considered to be a form of capital reimbursement.

As the Fees and Expenses to Higher Income Share Classes may charge certain fees and expenses to capital, there is an increased risk that on the redemption of the Shares of these Share Classes, Shareholders may not receive back the full amount invested because charging fees and expenses to capital may result in the erosion of capital notwithstanding the performance of the relevant Fund. As a result, some of the potential for future capital growth will be lost as a consequence of seeking to increase the amount of income that can be distributed by these Share Classes. The reason for this policy is to assist these Share Classes in trying to increase the rate of distributions for these Share Classes. Although these Funds are permitted to charge certain fees and expenses to capital for the Higher Income Share Classes they may choose not to do so. The Funds’ annual and semi-annual reports will disclose whether such Higher Income Share Classes have charged fees and expenses to capital and the amount of such fees and expenses. For more information, contact the Manager.

Fund Specific Risk Factors

Bonds Risk

Investment in bonds is subject to the risk of an issuer’s inability to meet principal and interest payments on the obligation (credit risk) and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (market risk). Below Investment Grade bonds are more likely to react

to developments affecting market and credit risk than more highly rated bonds, which react primarily to movements in the general level of interest rates. A Fund may invest in bonds from issuers with a range of credit worthiness. A default by the issuer of a bond may result in a reduction in the value of the Fund.

Cash interest rates vary over time, and the price of bonds will generally be affected by changing interest rates and credit spreads. The price of a fixed interest bond generally has an inverse relationship with interest rate movements, i.e., if interest rates increase, the price of a fixed interest bond will typically decrease, which can result in capital loss.

Although a Fund will seek to invest in bonds that trade in the secondary market, the secondary market for bonds can often be illiquid and therefore it may be difficult to achieve fair value on purchase and sale transactions. In addition, there is a risk that bonds which are nearing maturity may become illiquid. In such cases, it may become more difficult to achieve fair value on the purchase and sale thereof.

A Fund which invests in sovereign bonds is subject to a government's ability to pay, which is a function of a government's economic position. A country with a strong economy, manageable debt burden, stable currency, strong tax collection and positive demographics will likely have the ability to pay back its debt. This ability will usually be reflected in a strong credit rating by the major ratings agencies. On the other hand, a country with a weak economy, high debt burden, weak or volatile currency, little ability to collect taxes and poor demographics may find itself in a position where it is unable to pay back its debt.

Where a Fund intends to invest in corporate bonds either Investment Grade and/or Below Investment Grade bonds, investors should note that Below Investment Grade bonds could be rated in the lowest rating categories by S&P or by Moody's or could be unrated. Bonds rated in medium to low rating categories of internationally recognised rating services or unrated securities of comparable quality, commonly called junk bonds, are considered speculative and payments of principal and interest thereon may be questionable. In some cases, such bonds may be highly speculative, may have poor prospects for reaching Investment Grade standing and may be in default. As a result, investment in such bonds will entail greater speculative risks than those associated with investment in Investment Grade bonds (i.e., bonds rated at least BBB- (long term) or A3 (short term) by S&P or Baa3 (long term) or Prime 3 (short term) by Moody's, or a similar rating by another internationally recognised rating service).

Chinese Market Risk

Investing in the People's Republic of China (PRC) is subject to the risk of investing in Emerging Markets (see Emerging Markets Risk), and furthermore risks that are specific to the PRC Market.

Many of the economic reforms in China are unprecedented or experimental and are subject to adjustment and modification, and such adjustment and modification may not always have a positive effect on investment in the companies in China.

The national regulatory and legal framework for capital markets and joint stock companies in China is not well developed when compared with those of developed countries.

Under the prevailing tax policy in China, there are certain tax incentives available to foreign investment. There can be no assurance, however, that the aforesaid tax incentives will not be abolished in the future.

Investments in China will be sensitive to any significant change in political, social or economic policy in China. Such sensitivity may, for the reasons specified above, adversely affect the capital growth and thus the performance of these investments.

Collateral Reinvestment Risk

The Fund could receive cash collateral as a result of its securities lending, derivatives or other trading activities. Where such cash collateral is reinvested, there is a risk that the capital value of the collateral could decline due to a decline in the value of the underlying investment. This in turn may cause losses to the Fund because it is obliged to return collateral to the counterparty.

Contingent Convertible Securities Risk

A Fund may invest in convertible securities, including contingent convertible bonds which are hybrid bonds that may be convertible into equity, written down or written off by the issuer if a pre-determined trigger event occurs. Due to the contingent write-down, write-off and conversion features of contingent convertible bonds, such instruments are sensitive to changes in volatility in credit and volatility in interest rates and may have greater risk than other forms of securities in times of credit stress. Should a predetermined trigger event specified in the terms of issuance of a contingent convertible bond occur, the Fund will not be able to control whether the issuer chooses to write-down, write-off or convert the bond into equity. Furthermore, there is no guarantee that an issuer will choose to convert the bond into equity on the occurrence of a pre-determined trigger event. The coupon payments on contingent convertible bonds may be entirely discretionary. This means that coupon payments may be cancelled by the issuer at any point, for any reason, for any length of time and the amount of such coupon payment will not be recoverable. The Fund could suffer a loss on its investment because the issuer may force a conversion of the bond to equity before the Fund would otherwise choose or the value of the issuance may be written down or written off.

Contingent convertible risk can be exposed to several additional risks, including:

Trigger level risk

The trigger event is ordinarily linked to the financial position of the issuer and therefore the conversion is likely to occur as a result of a deterioration of the relative capital strength of the underlying. The relative risk associated with different contingent convertibles will depend on the distance between the current capital ratio and the effective trigger level. It is likely that the conversion to equity would occur at a share price, which is lower than when the bond was issued or purchased

Capital structure inversion risk

In the case of a principal write down contingent convertible security, it is possible that the holder could take a write down before equity holders, which is contrary to the typical capital structure hierarchy.

Liquidity risk

In stressed market conditions, the liquidity profile of the issuer can deteriorate significantly and it may be difficult to find a ready buyer which means that a significant discount may be required in order to sell it.

Call extension risk

Contingent convertible securities can also be issued as perpetual securities (i.e. without a maturity date), while these will have call dates, there is no guarantee that the issue will be called on this date and there is a possibility that the security may never be called resulting in the investor not receiving the return of the principal at any date, like for any other non-callable perpetual security.

Unknown risk

Contingent convertible securities are relatively new instruments and the trigger events are generally untested, therefore it is uncertain how the asset class will perform in stressed market conditions and risk to capital, and volatility could be significant.

Coupon cancellation risk

Coupon payments may be discretionary and can be cancelled at any time, for any reason.

Valuation risk

Investment in contingent convertible securities may have a higher yield, however, they can carry higher risk than investment in traditional debt instruments and in certain cases equities; the volatility and risk of loss can be significant.

Credit Default Swaps Risk

The "buyer" in a credit default Swap is obligated to pay the "seller" a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation. Generally, a credit event means bankruptcy, failure to pay, obligation acceleration or modified restructuring. If a credit event occurs, the seller typically must pay the contingent payment to the buyer, which is typically the "par value" (full notional value) of the reference obligation. The contingent payment may be a cash settlement or by physical delivery of the reference obligation in return for payment of the face amount of the obligation. A Fund may be either the buyer or seller in the transaction. If a Fund is a buyer and no credit event occurs, the Fund may lose its investment and recover nothing. However, if a credit event occurs, the buyer typically receives full notional value for a reference obligation that may have little or no value. A seller will receive a fixed rate of income throughout the term of the contract, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, the seller may pay the buyer the full notional value of the reference obligation. The value of the reference obligation received by the seller, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to a Fund.

Credit default Swaps involve greater risks than if a Fund had invested in the reference obligation directly. In addition to general market risks, credit default Swaps are subject to liquidity risk and credit risk.

Depository Receipts Risk

Depository Receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. A Fund will not invest in any unlisted Depository Receipts or any Depository Receipt that the Manager and/or the Investment Manager deems to be illiquid or for which pricing information is not readily available. Depository Receipts are generally sponsored; however, Depository Receipts may be unsponsored. The issuers of unsponsored Depository Receipts are not obligated to disclose material information and,

therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the Depositary Receipts.

Emerging Markets Risk

Where a Fund invests in or otherwise has exposure to emerging markets or emerging market securities the following additional risk factors may be relevant.

Political and economic factors

There is, in some emerging market countries, a higher than usual risk of nationalisation, expropriation or confiscatory taxation, any of which might have an adverse effect on the value of Investments in those countries. Emerging market countries may also be subject to higher than usual risks of political changes, government regulation, social instability or diplomatic developments (including war) which could adversely affect the economies of the relevant countries and thus the value of Investments traded in those countries. The economies of many emerging market countries can be heavily dependent on international trade and accordingly have been and may continue to be adversely affected by trade barriers, managed adjustments in relative currency values, other protectionist measures imposed or negotiated by the countries with which they trade and international economic developments generally. Emerging markets may be subject to international sanctions or exhibit heightened financial crime thus requiring increased compliance screening and checks.

Counterparty risk and liquidity factors

There can be no assurance that there will be any market for any Investments acquired by a Fund or, if there is such a local market, that there will exist a secure method of delivery against payment which would, in the event of a sale by or on behalf of a Fund, avoid exposure to counterparty risk on the buyer. It is possible that, even if a market exists for such Investment, that market may be highly illiquid. Such lack of liquidity may adversely affect the value or ease of disposal of such Investments. There is a risk that counterparties may not perform their obligations and that settlement of transactions may not occur. It may not be possible to execute trades on behalf of a Fund at the requisite time or at the requisite quantity, and bid-offer spreads can be relatively wide.

Legal factors

The legislative framework in emerging market countries for the purchase and sale of Investments and in relation to beneficial interests in those Investments may be relatively new and untested and there can be no assurance regarding how the courts or agencies of emerging market countries will react to questions arising from a Fund's investment in such countries and arrangements contemplated in relation thereto. There is no guarantee that any arrangements made, or agreement entered into, between the Depositary and any correspondent (i.e., an agent, sub-Depositary or delegate) will be upheld by a court of any emerging market country, or that any judgement obtained by the Depositary or the Company against any such correspondent in a court of any jurisdiction will be enforced by a court of any emerging market country.

Reporting and valuation factors

There can be no guarantee of the accuracy of information available in emerging market countries in relation to Investments which may adversely affect the accuracy of the value of Shares in a

Fund. Accounting practices are in many respects less rigorous than those applicable in more developed markets. Similarly, the amount and quality of information required for reporting by companies in emerging market countries is generally of a relatively lower degree than in more developed markets. Standards of corporate governance and financial reporting among listed companies in some emerging market countries can be uneven.

Exchange control and repatriation factors

It may not be possible for a Fund to repatriate capital, dividends, interest and other income from emerging market countries, or it may require government consents to do so. A Fund could be adversely affected by the introduction of, or delays in, or refusal to grant any such consent for the repatriation of funds or by any official intervention affecting the process of settlement of transactions. Economic or political conditions could lead to the revocation or variation of consent granted prior to investment being made in any particular country or to the imposition of new restrictions.

Settlement factors

There can be no guarantee of the operation or performance of settlement, clearing and registration of transactions in emerging market countries nor can there be any guarantee of the solvency of any securities system or that such securities system will properly maintain the registration of the Depository or the Company as the holder of securities. Where securities markets and banking and telecommunications systems are underdeveloped, concerns inevitably arise in relation to settlement, clearing and registration of transactions in securities where these are acquired other than as direct investments. Furthermore, due to the local postal and banking systems in many emerging market countries, no guarantee can be given that all entitlements attaching to quoted and OTC traded securities acquired by a Fund, including those related to dividends, can be realised. Some emerging markets currently dictate that monies for settlement be received by a local broker a number of days in advance of settlement, and that assets are not transferred until a number of days after settlement. This exposes the assets in question to risks arising from acts, omissions and solvency of the broker and counterparty risk for that period of time. Failed trades may occur more frequently in certain emerging market countries, as settlement processes may be less standardised, less automated and more prone to errors. The market may enforce buy-ins for failed settlements, resulting in potential fines.

Currency factors

The economies of emerging market countries generally are heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. In this regard, Investments in emerging market countries may involve risks of restrictive currency control regulations and currency conversion rates may be artificial to actual market values. Currency exchange rates in emerging markets may fluctuate significantly over short periods of time.

Investors that seek to build a portfolio covering new markets need to be aware that they may face a higher risk of investment exposure to potentially volatile currencies.

Custody factors

Local custody services remain underdeveloped in many emerging market countries and there is a transaction and custody risk involved in dealing in such markets. In certain circumstances a

Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of a sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding Investments in such markets will generally be higher than in developed securities markets.

Regulatory and trading-execution factors

Market liberalisation and openness to non-local investors may have increased for certain markets, however, market barriers should not be underestimated. Foreign ownership restrictions, currency limits, local custody rules, local funding and registration requirements are widespread and sometimes difficult to navigate. Some markets may even require foreign market participants to execute trades via local brokers.

Transaction costs factors

In many markets, high local transaction fees and commissions inflate trading costs.

Sector and sovereign risk factors

Part of the attraction of investing in securities in new markets is the potential for diversification and low correlation benefits to other held securities from other markets. However, investors should be aware that some markets are dominated by a few sectors, thus a sizeable allocation can result in concentrated exposures to certain sectors. Certain markets may be highly exposed to sovereign risk.

Frontier Market Risk

Frontier markets are a sub-set of emerging markets, which are smaller in market capitalization and have less accessibility, while remaining open for foreign investment and are not impacted by extreme economic or political instability. The risks associated with investments in frontier market countries include all the risks associated with investments in developing and emerging markets as listed above; however, these risks are magnified for frontier market countries. As a result, investments in companies in frontier market countries are generally subject to a higher risk of loss than investments in companies in traditional emerging and developing market countries due to less developed securities markets, different settlement procedures, greater price volatility, less developed governments and economies, more government restrictions, and the limited ability of foreign entities to participate in certain privatization programs. Investments in companies operating in frontier market countries are highly speculative in nature.

Equity Risk

The market prices of equity securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer of the equities in question (for example, changes in an issuer's financial condition. In addition, changes in the specific economic or political conditions or changes in the general economic or political conditions can affect a security's or instrument's value. The values of equity securities also may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. A Fund may continue to accept new subscriptions and to make

additional investments in equity securities even under general market conditions that the Manager and/or the Investment Manager views as unfavorable for equity securities.

FDIs Risk

Where a Fund uses FDIs, they will be used subject to the limits and conditions set out in Appendix II. These derivative positions may be executed either on exchange or OTC. Such FDIs tend to have a greater volatility than the securities to which they relate and they bear a corresponding greater degree of risk. The primary risks associated with the use of such derivatives are (i) failure to predict accurately the direction of the market movements and (ii) market risks, for example, lack of liquidity or lack of correlation between the change in the value of the underlying asset and that of the value of a Fund's derivatives. Trading in FDIs involves a risk of loss to a Fund that could materially adversely affect the Fund's Net Asset Value. Other risks associated with the use of FDIs include risks relating to settlement default; structuring risks; legal risks; operations risks; counterparty financial soundness, credit worthiness and performance risk. These techniques may not always be possible or effective in enhancing returns or mitigating risk.

In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which currencies, forward, spot and Option contracts, credit default Swaps, total return Swaps and certain options on currencies are generally traded) than of transactions entered into on organised exchanges. In addition, many of the protections afforded to participants on some organised exchanges, such as the performance guarantee of an exchange clearing house, may not be available in connection with OTC financial derivative transactions. Therefore, a Fund entering into OTC transactions will be subject to the risk that its direct counterparty will not perform its obligations under the transaction and that it will sustain losses. The Company will only enter into transactions with counterparties which it believes to be creditworthy, and may reduce the exposure incurred in connection with such transactions through the receipt of collateral from certain counterparties. However, regardless of the measures the Company may seek to implement to reduce counterparty credit risk there can be no assurance that a counterparty will not default or that a Fund will not sustain losses as a result, which may ultimately impact the performance of a Fund and potential returns to Shareholders.

From time to time, the counterparties with which a Fund may effects transactions might cease making markets or quoting prices in certain of the instruments. In such instances, the Company might be unable to enter into a desired transaction in currencies, credit default Swaps or total return Swaps or to enter into an offsetting transaction with respect to an open position, which might adversely affect its performance. Further, in contrast to exchange traded instruments, forward, spot and Option contracts on currencies do not provide the Manager and/or the Investment Manager with the possibility to offset the Company's obligations through an equal and opposite transaction. For this reason, in entering into forward, spot or Options contracts, the Company may be required, and must be able, to perform its obligations under the contracts.

If disclosed in a Fund's investment policy that a Fund may enter into Forward Currency Exchange Contracts, Futures, Options, Swaps, or Warrants investors should refer to the risk factor similarly titled under the heading "Fund Specific Risk Factors", below.

The use of FDIs can result in leverage being created in a Fund's portfolio.

Leverage Risk

In relation to the use of FDIs, leverage exists when a Fund purchases or sells an instrument or enters into a transaction without investing cash in an amount equal to the full economic exposure

of the instrument or transaction. A Fund could therefore lose more than it invested. Increases and decreases in the value of a Fund's portfolio will be magnified when the Fund uses leverage. Leveraged transactions multiply the risk of potential losses when positions results are contrary to expected market directions, compared to direct holdings, and may add significant risk because of added payment obligations. The use of leverage may cause a Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet any required asset segregation requirements.

The use of leverage may result in large fluctuations in the Net Asset Value of a Fund amplifying both gains and losses. Investors are referred to the investment policy of each Fund in relation to the level of leverage used or market risk expected within a Fund.

Counterparty Default Risk

A Fund's investment in OTC FDIs is subject to the risk of counterparty default. In addition, a Fund may have to transact with counterparties on standard terms which it may not be able to negotiate and may bear the risk of loss because a counterparty does not have the legal capacity to enter into a transaction, or if the transaction becomes unenforceable due to relevant legislation and regulation. To the extent that a Fund invests in FDIs, a Fund may take a credit risk with regard to parties with whom it trades and may also bear the risk of settlement default.

FDI positions (such as Swaps or other FDIs with similar characteristics) may be entered into on an OTC basis. Trading in such derivatives results in credit risk exposure to counterparties with which a Fund trades (i.e., the risk that the counterparty will fail to discharge its obligations under the terms of the trade in respect of the relevant Fund). Where the Manager and/or the Investment Manager enters into OTC FDI trades it may seek to mitigate much of its credit risk to the counterparty by receiving collateral from that counterparty. To the extent that any such FDIs are not fully collateralised, a default by the counterparty may result in a reduction in the value of the relevant Fund and thereby a reduction in the value of an investment in the Fund.

Where the Manager and/or the Investment Manager enters into FDIs with companies related to the Manager and/or the Investment Manager these companies may have interests which conflict with those of a Fund in that they may act as principal or may provide banking, brokerage or other services to a Fund, thereby deriving benefit.

Financial Indices Investment Risk

Financial indices in which a Fund may invest or gain exposure to will be subject to periodic rebalancing. Rebalancing involves an adjustment to the weightings or components in a financial index in order to meet the index provider's methodology requirements. Where rebalancing occurs, a Fund may adjust its exposure or investment in the financial index to reflect the rebalancing that has occurred. Any rebalancing or investment by the index may result in a Fund incurring certain related costs (including, but not limited to, brokerage or counterparty costs). In the event that the weighting of a stock in a financial index exceeds the investment restrictions applicable to the Fund, the Manager and/or the Investment Manager will review the level of investment in the financial index with a view to returning the Fund to compliance. This may also result in additional costs to the Fund.

Forward Currency Exchange Contracts Risk

Forward Currency Exchange Contracts and Options thereon, unlike Futures Contracts, are not traded on exchanges and are not standardised; rather, banks and dealers act as principals in

these markets, negotiating each transaction on an individual basis. Forward and "cash" trading is substantially unregulated; there is no limitation on daily price movements and speculative position limits are not applicable. For example, there are no requirements with respect to financial responsibility or segregation of customer funds or positions. In contrast to exchange-traded Futures Contracts, interbank traded instruments rely on the dealer or counterparty being contracted with to fulfil its contract. As a result, trading in interbank Forward Currency Exchange Contracts may be subject to more risks than Futures or Options trading on regulated exchanges, including, but not limited to, the risk of default due to the failure of a counterparty with which a Fund has a forward currency contract. Although a Fund may seek to trade with responsible counterparties, failure by a counterparty to fulfil its contractual obligation could expose the relevant Fund to unanticipated losses. The principals who deal in the forward markets are not required to continue to make markets in the currencies or commodities they trade and these markets can experience periods of illiquidity, sometimes of significant duration. There have been periods during which certain participants in these markets have quoted prices with an unusually wide spread between the price at which they were prepared to buy and that at which they were prepared to sell. Disruptions can occur in any currency market traded by a Fund due to unusually high or low trading volumes, political intervention or other factors. The imposition of controls by governmental authorities might also limit such forward trading to less than that which the Manager and/or the Investment Manager would otherwise experience, to the possible detriment of a Fund. Market illiquidity or disruption could result in major losses to a Fund.

Futures Risk

Transactions in Futures involve the obligation to make, or to take, delivery of the underlying asset of the contract at a future date, or in some cases to settle the position with cash. They carry a high degree of risk. The low margins normally required in Futures trading permit a very high degree of leverage. As a result, a relatively small movement in the price of a Futures contract may result in a profit or loss which is high in proportion to the amount of funds actually placed as margin and may result in unquantifiable further loss exceeding any margin deposited. Futures trading in many contracts on Futures exchanges (although generally not in currencies) is subject to daily price fluctuation restrictions, commonly referred to as "daily limits", which prohibit the execution of Futures trades on any given day outside a prescribed price range based on the previous day's closing prices. Daily limits do not limit ultimate losses but may make it costly or impossible for the Manager and/or the Investment Manager to liquidate a Futures position against which the market is moving. A series of "limit moves", in which the market price moves the "daily limit" with little or no trading taking place, could subject a Fund to major losses.

Inflation-Linked Risk

Where a Fund seeks to deliver a return in excess of inflation, a period of low inflation or deflation will adversely affect any economy and as a consequence capital growth of the Fund may be limited or may not be achieved.

Loans Investment Risk

Where a Fund invests in fixed or floating-rate commercial bank loans from one or more financial institutions ("Lender(s)") to a borrower ("Borrower") by way of (i) assignment/transfer of or (ii) loan participation in the whole or part of the loan amount outstanding it will do so only where the loan qualifies as a money market instrument. The loans must therefore be capable of being freely traded and transferred. Where a Fund invests by way of participation, it will have a

contractual relationship only with a Lender as grantor of the participation but not with the Borrower. The Fund can acquire a participatory interest only where the Lender(s) interposition between the Fund and the Borrower is determined by the Manager and/or the Investment Manager to be creditworthy. When purchasing loan participation, the Fund assumes the economic risk associated with the Borrower and the credit risk associated with the Lender. Loan assignments typically involve a transfer of debt from the Lender to a third party. When purchasing loan assignments, the Fund assumes the credit risk associated with the Borrower only.

The Fund may invest in secured or unsecured loans. Loans that are fully secured offer the Fund more protection than an unsecured loan, in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the Borrower's obligation. In addition, investments in loans through a direct assignment include the risk that if a loan is terminated, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. Loan participation typically represents direct participation in a loan to a Borrower and generally are offered by banks or other financial institutions or lending syndicates. A loan is often administered by an agent bank acting as agent for all holders. Unless, under the terms of the loan or other indebtedness, the Fund has direct recourse against the Borrower, the Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a Borrower. The loans in which a Fund invested may not be rated by any internationally recognised rating service.

Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk

Traditional debt securities typically pay a fixed rate of interest until maturity, when the entire principal amount is due. By contrast, payments on mortgage-backed securities (MBS) typically include both interest and partial payment of principal. Principal may also be prepaid voluntarily, or as a result of refinancing or foreclosure. The Company may have to invest the proceeds from prepaid investments under less attractive terms and yields. Compared to other debt, MBS are less likely to increase in value during periods of declining interest rates and have a higher risk of decline in value during periods of rising interest rates. They can increase the volatility of the relevant Fund.

Asset-Backed Securities are structured like MBS, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as motor vehicle instalment sales or instalment loan contracts, leases of various types of real estate and personal property and receivables from credit card agreements. Because Asset-Backed Securities generally do not have the benefit of a security interest in the underlying assets that is comparable to a mortgage, Asset-Backed Securities present certain additional risks that are not present with MBS. For example, the ability of an issuer of ABS to enforce its security interest in the underlying assets may be limited.

MBS and Asset-Backed Securities are generally issued in multiple classes, each having different maturities, interest rates and payment schedules, and with the principal and interest on the underlying mortgages or other assets allocated among the several classes in various ways. Payment of interest or principal on some classes may be subject to contingencies or some classes or series may bear some or all of the risk of default on the underlying mortgages or other assets. In some cases, the complexity of the payment, credit quality and other terms of such securities may create a risk that terms of the security are not fully transparent. The complexity of MBS

and Asset-Backed Securities may make valuation of such securities at an appropriate price more difficult, particularly where the security is customised. In determining the average maturity or duration of an MBS or Asset-Backed Securities, the Manager and/or the Investment Manager must apply certain assumptions and projections about the maturity and prepayment of such security; actual prepayment rates may differ. If the life of a security is inaccurately predicted, the Company may not be able to realise the expected rate of return. In addition, many MBS and Asset-Backed Securities are subject to heightened liquidity risk. The number of investors that are willing and able to buy such instruments in the secondary market may be smaller than that for more traditional debt securities.

A Fund may also invest in collateralised mortgage obligations (CMOs). CMOs are issued in separate classes with different stated maturities that may have different credit and investment profiles. As the mortgage pool experiences prepayments, the pool pays off investors in classes with shorter maturities first. Prepayments may cause the actual maturity of a CMO to be substantially shorter than its stated maturity. Conversely, slower than anticipated prepayments can extend the effective maturities of CMOs, subjecting them to a greater risk of decline in market value in response to rising interest rates than traditional debt securities, and, therefore, potentially increasing their volatility.

CMOs and other instruments with complex or highly variable prepayment terms generally entail greater market, prepayment and liquidity risks than other MBS.

A Fund may also invest in collateralised debt obligations (CDOs), which are tranching securities that involve risks similar to those of CMOs, but are collateralised not by pools of mortgage loans, but pools of other debt obligations (such as corporate debt obligations). The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which a Fund may invest.

CDOs and CMOs carry additional risks to MBS and Asset-Backed Securities including the risks that: (i) the distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) a Fund may invest in tranches of CDOs or CMOs that are subordinate to other tranches; (iv) the complex structure of the security may not be fully transparent and, if not understood at the time of investment, may produce disputes with the issuer or unexpected investment results; and (v) the manager of the CDOs or CMOs may perform poorly.

Options Risk

Options enable a Fund to take a position in an underlying security. The Option position can offset unfavorable price movements in the underlying security. Specific strategies include covered call writing and protective put buying. Use of these strategies can improve the yield on a security and may be employed to generate additional income or to hedge a security exposure.

Call Options

The seller (writer) of a call Option which is covered (i.e., the writer holds the underlying security) assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered call Option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the Option. The securities necessary to satisfy the exercise of an uncovered call Option may be unavailable for purchase, except at much higher prices,

thereby reducing or eliminating the value of the premium. Purchasing securities to cover the exercise of an uncovered call Option can cause the price of the securities to increase, thereby exacerbating the loss. The buyer of a call option assumes the risk of losing its entire premium investment in the call Option.

Put Options

The seller (writer) of a put Option which is covered (i.e., the writer has a short position in the underlying security) assumes the risk of an increase in the market price of the underlying security above the sales price (in establishing the short position) of the underlying security plus the premium received, and gives up the opportunity for gain on the underlying security if the market price falls below the exercise price of the Option. The seller of an uncovered put Option assumes the risk of a decline in the market price of the underlying security below the exercise price of the Option. The buyer of a put Option assumes the risk of losing its entire investment in the put Option.

Stock Connect Risk

Certain Funds may make investments that are tied economically to issuers from the People's Republic of China ("**PRC**"). This exposure to the Chinese market may be obtained via the Shanghai-Hong Kong Stock Connect program ("**Shanghai Stock Connect**") and the Shenzhen-Hong Kong Stock Connect ("**Shenzhen Stock Connect**") (together "**Stock Connect**") within certain investment quotas as approved under and subject to applicable Chinese regulatory requirements.

Stock Connect Risks

If a Fund invests through Stock Connect, it will be subject to some or all of the following additional risks, the details of which are contained at Appendix VI:

- (a) Risks linked with dealing in securities in China via Stock Connect;
- (b) Pre-trade check risk;
- (c) Beneficial owner of the Eligible Securities risk;
- (d) Not protected by Investor Compensation Fund;
- (e) Restriction on Turnaround (day) Trading;
- (f) Quota risk;
- (g) Difference in trading day and trading hours;
- (h) Recalling of eligible stocks;
- (i) Trading costs;
- (j) Clearing and settlement risk;
- (k) Local market rules, foreign shareholding restrictions and disclosure obligations;
- (l) No manual trade or block trade, order priority and execution issues;
- (m) No off-exchange trading and transfers;
- (n) Currency risks;
- (o) Risk of ChinaClear default;

- (p) Risk of HKSCC default;
- (q) Ownership of Eligible Securities risk;
- (r) Regulatory risk; and
- (s) Taxation risk.

Repurchase and Reverse Repurchase Agreements Risk

Where a Fund enters into repurchase and reverse repurchase agreements it is exposed to credit risk. This can arise where the seller of a repurchase agreement fails to fulfil its commitment to repurchase the security in accordance with the terms of the agreement. In this instance a Fund may incur a loss to the extent that the proceeds realised on the sale of the securities are less than the repurchase price. Likewise, if the seller becomes insolvent, a bankruptcy court may determine that the securities do not belong to the Fund and may order that the securities be sold to pay off the seller's debts. A Fund may, therefore, experience both delays in liquidating the underlying securities and losses during the period while it seeks to enforce its rights thereto, including possible sub-normal levels of income and lack of access to income during the period and expenses in enforcing its rights.

Reverse repurchase agreements involve the risk that the market value of the securities sold by a Fund may decline below the prices at which the Fund is obliged to repurchase such securities under the agreement. In the event that the buyer of securities under a reverse repurchase agreement files for bankruptcy or proves insolvent, a Fund's use of proceeds from the agreement may be restricted pending the determination by the other party or its trustee or receiver whether to enforce the obligation to repurchase the securities.

Where repurchase and reverse repurchase agreements are entered into with companies related to the Manager and/or the Investment Manager, these companies may have interests which conflict with those of a Fund in that they may act as principal or may provide banking, brokerage or other services to a Fund, thereby deriving benefit.

Russian Investment Risk

Russian laws relating to securities investments and regulations have been created on an ad-hoc basis and do not tend to keep pace with market developments leading to ambiguities in interpretation and inconsistent and arbitrary application. Monitoring and enforcement of applicable regulations is rudimentary. Russian rules regulating corporate governance either do not exist or are underdeveloped.

Small and Mid-Capitalisation ("Cap") Companies Risk

The equity securities of small and mid-cap companies tend to be more volatile and less liquid than the equity securities of large companies. As small and mid-cap companies may experience more market price volatility than equity securities of larger companies, the Net Asset Value of any Funds which invest in small and mid-cap companies may reflect this volatility. Small and mid-cap companies, as compared with larger companies, may have a shorter history of operations, may not have as great an ability to raise additional capital, may have a less diversified product line making them susceptible to market pressure and may have a smaller public market for their shares. Investment in small and mid-cap companies may involve relatively higher investment costs and accordingly investment in Funds which invest in small and mid-cap companies should be viewed as a long-term investment. Such Funds may, however,

dispose of an Investment made by it within a relatively short period of time; for example, to meet requests for redemption of Shares.

Sovereign Debt Risk

Sovereign debt includes securities issued by or guaranteed by a sovereign government, their agencies or instrumentalities, or other government-related entities. The entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. The entity's ability to repay the principal and/or interest due in a timely manner may be affected by, among other factors, its cash flow, the extent of its foreign reserves (where relevant), the state of its country's economy, the relative size of the debt service burden to the economy as a whole, restrictions on its ability to raise more cash and the political constraints to which the entity may be subject. The value of sovereign debt securities may be affected by the creditworthiness of the relevant government and any default or potential default by the relevant government. Holders of sovereign debt, including the Fund, may be requested to participate in the rescheduling of such debt and to extend further loans. In addition, there is no bankruptcy proceeding by which this debt may be collected in whole or in part.

Swaps Risk

Swaps are entered into in an attempt to obtain a particular return without the need to actually purchase the reference asset. Swaps can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, Swaps may increase or decrease the Fund's exposure to long-term or short-term interest rates, currency values, commodities, indices, or other factors such as security prices, baskets of securities, or inflation rates. Depending on how they are used, Swaps may increase or decrease the overall volatility of the Fund's Net Asset Value. Swaps may embed an agreed fee or rate of return for the counterparty.

Most Swaps entered into by a Fund would require the calculation of the obligations of the parties to the agreements on a "net basis". Consequently, a Fund's current obligations (or rights) under a Swap generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The risk of loss with respect to Swaps is limited to the net amount of payments that the Fund is contractually obligated to make. If the other party to a Swap defaults, a Fund's risk of loss consists of any margin or the net amount of payments that the Fund is contractually entitled to receive if uncollateralised.

Thematic Risk

Funds or companies focused on particular economic themes may face more specific risks related to such themes. As such they may perform less well than more diverse investments.

The customers and/or suppliers of thematic companies may be concentrated in a particular country, region or industry. Any adverse event affecting one of these countries, regions or industries could have a negative impact on thematic companies. These companies may also be more affected by overall capital spending levels, economic cycles and changes in consumer and social trends than companies focused on more established business industries. Such considerations may lead the value of companies involved in a given economic theme to

experience greater volatility than it would likely experience if a broader investment strategy were employed.

The emergent nature of many economic themes could result in increasing regulatory scrutiny in the future, which may impede the growth of companies that develop and/or focus on such economic themes. Further, such companies may be involved in fast evolving industries with increased exposure to the risks associated with changes in applicable laws, as well as market developments, which may cause businesses to contract or close suddenly and negatively impact the value of these companies.

Warrants Risk

Warrants are similar to Options in that they give the holder the right but not the obligation to buy or sell stock at a set price in the future. A Warrant guarantees the holder the right to buy (or sell) a specific number of shares at a specific price (the strike price) for a defined period of time. Unlike Options on equity securities that are listed and traded on exchanges, Warrants are usually issued by corporations through private transactions and typically trade over-the-counter. The general movement in the stock markets, prevailing and anticipated economic and general economic conditions, interest rate movements, strike level, time remaining to expiry could affect the value of a Warrant. The buyer of a Warrant assumes the risk of losing its entire investment in such Warrant.

Management and Administration

The Directors control the affairs of the Company and are responsible for the overall investment policy, which will be determined by them.

The Directors

The Company shall be managed and its affairs supervised by the Directors whose details are set out below. The Directors are all non-executive directors of the Company.

Ronan Walsh

(Chairman) (Irish): Mr. Walsh, born May 1952, is an Irish citizen and was a partner in the law firm of Arthur Cox in Dublin from 1981 to April 2009, specialising in corporate law, with a particular emphasis on corporate finance and financial services. Mr. Walsh is also a non-executive director of a number of Irish companies. Mr. Walsh was educated at Trinity College, Dublin and qualified as a solicitor in 1975.

Joseph Kagan

(British/South African): Joseph is Head of Legal at Federated Hermes Limited, responsible for Hermes' legal and company secretarial functions. He joined Federated Hermes Limited in 2010 and was promoted to Head of Legal in 2015. He is a director of the Company and of Hermes Fund Managers Ireland Limited, in addition to a number of other Federated Hermes entities.

Prior to joining Hermes, Joseph was in private practice at City law firm Bryan Cave Leighton Paisner LLP for nine years, where he practised corporate and funds law. Joseph is qualified as a solicitor in England and Wales and as an attorney in South Africa. He holds a Bachelor of Arts and LLB degree from the University of the Witwatersrand, Johannesburg and a Bachelor of Arts (Honours) Economics degree from the University of Cape Town.

Gregory Dulski

Mr. Dulski is Federated Hermes' senior counsel responsible for all legal and regulatory matters impacting the international operations of the legacy Federated business and currently serves as Federated Investors (UK) LLP's General Counsel and Head of International Government Affairs. Mr. Dulski has nearly 20 years of experience in the financial services industry and has worked with Federated Hermes for more than 15 years, both as outside counsel and in-house counsel. Mr. Dulski serves as a director on a number of Federated Hermes' international boards and has worked extensively on financial services reform in both Europe and the United States. In addition to his work with Federated Hermes, Mr. Dulski has extensive industry experience having worked for Janus Capital Group and ALPS Fund Services in Denver, Colorado and in the investment management group of Reed Smith LLP. Mr. Dulski graduated with honors from The George Washington University School of Law in 2001 and received his undergraduate degree in Accounting from Arizona State University and is a non-practicing Certified Public Accountant.

Michael Boyce

(Irish): Mr. Boyce, born March 1954, is an Irish citizen, and acts as an independent director and a consultant to a number of Irish collective investment schemes. Prior to his election as Director,

Mr. Boyce served as Executive Director of Northern Trust Investor Services (Ireland) Limited, formerly known as Ulster Bank Investment Services Limited ("UBIS"), since 1990.

Mr. Boyce was Managing Director of Ulster Bank Custodial Services and Managing Director of UBIS. Following Northern Trust's purchase of UBIS in May 2000, he was appointed Director of Client Operations responsible for servicing a large range of institutional and retail clients. Mr. Boyce has worked in the financial services industry for more than 30 years including the areas of stockbroking, fund management and fund administration.

Mr. Boyce is a graduate of the Michael Smurfit School of Business at University College Dublin from which he holds a Diploma in Corporate Governance. He is a member of the Securities Institute and has served on several committees of the Irish Funds Industry Association. He is also a member of the Institute of Directors Ireland, and a member of the Corporate Governance Association of Ireland.

Sylvie McLaughlin

(Irish): Sylvie McLaughlin was appointed Head of Office at Hermes Fund Managers Ireland Limited in August 2021. Prior to joining Hermes Fund Managers Ireland Limited Sylvie was Compliance and Operations Officer for Brandes Investment Partners Ireland Limited since October 2017 and before that spent 12 years working for Arthur Cox where she advised on all aspects of asset management and investment funds in particular, advising international and Irish investment management businesses and financial service providers on legal, compliance and risk matters relating to all Irish legislative and regulatory matters. Sylvie is a qualified solicitor, admitted to the Law Society of Ireland in 2005, and holds a Bachelor of Business and Legal Studies from University College Dublin and an MSc (Finance and Financial Law) from the University of London.

Manager

The Company has appointed Hermes Fund Managers Ireland Limited as its management company pursuant to the Management Agreement. The Manager will be responsible for providing such collective portfolio management services to the Company and each Fund as may from time to time be required, in accordance with the investment objectives and policies described in this Prospectus and the Supplement for the relevant Fund, subject always to the supervision and direction of the Directors. The Manager's functions include general administration and distribution.

The Manager was established on 3 July 2018 in Ireland under registration number 629638, is organised under the laws of Ireland as a private company with limited liability pursuant to the Companies Act, and is authorised by the Central Bank as a UCITS management company.

The Manager is a fully-owned subsidiary of Federated Hermes Limited and a member of the Federated Hermes Group.

The Manager may, in accordance with the requirements of the Central Bank, appoint one or more investment managers to whom it may delegate all or part of the day-to-day conduct of its investment management responsibilities in respect of any Fund. Details of any investment managers will, however, be provided to Shareholders on request and disclosed in the Company's periodic reports. The Manager will arrange for the fees and expenses of any investment manager to be paid out of the Manager's fees.

If more than one investment manager is appointed to a Fund, the Manager shall allocate the assets of the Fund between the investment managers in such proportions as it shall, at its discretion, determine.

Responsible Investing

Hermes Investment Management Limited is committed to investing responsibly and incorporating environmental, social and governance (“ESG”) considerations as fundamental factors in investment decisions. Across the investment process, including stock selection, portfolio construction, and risk management, this means analysing companies; governance practices, environmental impacts, treatment of workforces and the influence of operations on local communities; before investing in the individual security or various classes of securities. Once invested, this means aiming to improve the behaviour of those companies by being active, engaged, and responsible owners of those companies and asset classes. The Investment Manager is also an advocate for systematic improvements to the financial system in which they participate.

Further information regarding the Investment Manager approach to responsible investing and incorporation of ESG considerations applied to a specific Fund can be found in the relevant Supplement.

Stewardship Activities

Voting rights are exercised with a view to achieving best practice standards of corporate governance and equity stewardship and with the aim of supporting the delivery of long-term value in the Funds. In exercising its voting rights (either through the Manager, its delegate or a duly appointed agent), the Company intends to have due regard to relevant best practice standards of corporate governance and equity stewardship and the protection of shareholder rights through company engagement.

Federated Hermes Limited has appointed Hermes Equity Ownership Services Limited (“EOS at Federated Hermes” or “EOS”) to assist it and its subsidiaries in stewardship activities. EOS has responsibility for engaging with investee companies on ESG matters with the aim of improving the investee companies’ ESG performance and making a recommendation to the Investment Manager as to how to vote, on behalf of the Company, with regards to proxy voting forms received from the entities in which the Funds invest. EOS will make its recommendations in accordance with the Federated Hermes voting guidelines (“Federated Hermes Global Voting Policy and Guidelines”). The Federated Hermes Global Voting Policy and Guidelines articulate EOS’ global proxy voting guidelines which inform recommendations and explicitly references environmental, social and governance factors and aims to harness voting rights as an asset to be deployed in support of achieving engagement outcomes. EOS’ fees will be borne by Hermes Investment Management Limited.

In fulfilling its commitment to being good stewards of those companies in which it is invested through engagement and voting, Hermes Investment Management Limited and EOS may encounter potential conflicts of interest. Hermes Investment Management Limited has adopted a specific conflicts of interest policy which ensures that appropriate processes are established to identify and manage such conflicts fairly and prioritise the long-term value of the companies concerned.

EOS was incorporated under the laws of England and Wales on 30 June 2004 EOS assists its clients in developing and implementing responsible asset management and ownership strategies.

The Manager's Directors

The Manager's directors are Joseph Kagan, Patrick Wall, Gregory Dulski, Sylvie McLaughlin, Michael Boyce and Ronan Walsh. Details about Mr. Kagan, Mr. Dulski, Ms. McLaughlin, Mr. Boyce and Mr. Walsh are set out above. Details about Mr. Wall are set out below. The rest of the directors of the Manager are non-executive directors.

Patrick Wall

(Chairperson) (Irish): Patrick Wall was a senior partner in PricewaterhouseCoopers (PwC) for nearly 30 years specialising in international taxation with a particular focus on investment management and international funds distribution, retiring in 2015. He was Chair of the PwC's Irish Governance Board and served in various senior management roles including tax and financial services leader. He was also a member of the PwC European and Global Investment Management Leadership teams where he had special responsibility for international financial centres and he has been closely associated with the development of the IFSC since its inception. He was a member of the IFSC Clearing House Group for over 20 years and has also chaired and/or participated in various industry/Government working/advisory groups and worked closely with government agencies in the design of Irish tax policy. Prior to joining PwC in 1981, he was an Inspector of Taxes with the Irish Revenue. He currently holds a number of Central Bank approved independent non-executive directorships. He is a graduate of University College Dublin (BA) and is a member of the Institute of Directors (Cert IoD).

Investment Manager

Hermes Investment Management Limited

The Manager has delegated to Hermes Investment Management Limited ("HIML"), day to day portfolio management and certain risk management functions pursuant to the Investment Management Agreement. Among other things, the Investment Manager will be responsible for the management of the investment of the assets of the Fund(s) of the Company to which it has been appointed Investment Manager in accordance with the investment objectives and policies described in this Prospectus and the Supplement for the relevant Fund, subject always to the supervision and direction of the Manager.

HIML is a wholly owned subsidiary of Federated Hermes Limited. HIML is authorised by the FCA to carry on regulated activities in the United Kingdom and is subject to the rules of the FCA. HIML was incorporated under the laws of England and Wales and was established on 1 February 1990. As at 31 March 2023, funds under investment management and advice of HIML, together with its affiliates, totalled approximately GBP 28.7 billion.

Federated Investment Counseling

Federated Investment Counseling ("FIC"), has been appointed by the Manager pursuant to the Investment Management Agreement dated 9 July 2020 to provide investment management services to certain Funds, as disclosed in the relevant Supplement. FIC's registered office is at 1001 Liberty Avenue, Pittsburgh, Pennsylvania PA 15222, United States of America.

FIC is regulated by the US Securities and Exchange Commission and provides investment management services to both individual and institutional investors. As of 31 December 2022, the Investment Manager had USD 184.6 billion of assets under management.

The Investment Managers may, in accordance with the requirements of the Central Bank, appoint one or more sub-investment managers to whom they may delegate all or part of the day-to-day conduct of their investment management (or other) responsibilities in respect of any Fund. Details of any sub-investment managers will, however, be provided to Shareholders on request and disclosed in the Company's periodic reports. The Investment Managers will arrange for the fees and expenses of any sub-investment manager to be paid out of the fee it receives from the Manager.

If more than one sub-investment manager is appointed to a Fund, the relevant Investment Manager shall allocate the assets of the Fund between the sub-investment managers in such proportions as it shall, at its discretion, determine, subject always to the supervision and direction of the Manager.

Distributor

The Manager, whilst it acts as the Company's distributor itself, has also delegated the distribution function in certain jurisdictions to Hermes Investment Management Limited, which as part of its role and at its discretion has the ability to appoint sub-distributors globally, subject always to the supervision and direction of the Manager.

Securities Lending Agent

A Securities Lending Agent may be appointed as the lending agent for the Company, subject to the terms of a securities lending management agreement that would be put in place to govern such an appointment.

The Administrator, Registrar and Transfer Agent

Northern Trust International Fund Administration Services (Ireland) Limited has been appointed by the Manager to act as administrator, registrar and transfer agent under the terms of the Administration Agreement as set out under the heading "Material Contracts" below.

The Administrator is a private limited liability company incorporated in Ireland on 15 June 1990 and is an indirect wholly-owned subsidiary of Northern Trust Corporation. Northern Trust Corporation and its subsidiaries comprise the Northern Trust Group, one of the world's leading providers of global custody and administration services to institutional and personal investors. As at 31 December 2021, the Northern Trust Group's assets under custody and administration totalled in excess of USD 16.2 trillion. The principal business activity of the Administrator is the administration of collective investment schemes.

The duties and functions of the Administrator include, inter alia, the calculation of the Net Asset Value and the Net Asset Value per Share, the keeping of all relevant records in relation to the Company as may be required with respect to the obligations assumed by it pursuant to the Administration Agreement, the preparation and maintenance of the Company's books and accounts, liaising with the Auditor in relation to the audit of the financial statements of the Company and the provision of certain Shareholder registration and transfer agency services in respect of shares in the Company.

The Administrator is not involved directly or indirectly with the business affairs, organisation, sponsorship or management of the Company and is not responsible for the preparation of this document other than the preparation of the above description and accepts no responsibility or liability for any information contained in this document except disclosures relating to it.

As at the date of this Prospectus, the Administrator is not aware of any conflicts of interest in respect of its appointment as administrator to the Company. If a conflict of interest arises, the Administrator will ensure it is addressed in accordance with the Administration Agreement, applicable laws and in the best interests of the Shareholders.

The Depositary

The Company and the Manager have appointed Northern Trust Fiduciary Services (Ireland) Limited to act as Depositary to the Company.

The Depositary is a private limited liability company incorporated in Ireland on 5 July 1990. Its main activity is the provision of custodial services to collective investment schemes. The Depositary is an indirect wholly-owned subsidiary of Northern Trust Corporation. Northern Trust Corporation and its subsidiaries comprise the Northern Trust Group, one of the world's leading providers of global custody and administration services to institutional and personal investors. As at 31 December 2021, the Northern Trust Group's assets under custody and administration totalled in excess of USD 16.2 trillion.

The Depositary has been entrusted with the following main functions:

- (i) ensuring that the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with applicable law and the Articles;
- (ii) ensuring that the value of the Shares is calculated in accordance with applicable law and the Articles;
- (iii) carrying out the instructions of the Company and/or the Manager unless they conflict with applicable law and the Articles;
- (iv) ensuring that in transactions involving the assets of the Company any consideration is remitted within the usual time limits;
- (v) ensuring that the income of the Company is applied in accordance with applicable law and the Articles;
- (vi) monitoring the Company's cash and cash flows; and
- (vii) safe-keeping of the Company's assets, including the safekeeping of financial instruments to be held in custody and ownership verification and record keeping in relation to other assets.

The Depositary may delegate its safekeeping obligations provided that: (i) the services are not delegated with the intention of avoiding the requirements of the UCITS Regulations, (ii) the Depositary can demonstrate that there is an objective reason for the delegation; and (iii) it has exercised all due skill, care and diligence in the selection and appointment of any third-party to whom it wants to delegate parts of the services, and keeps exercising all due skill, care and diligence in periodic review and ongoing monitoring of any third party to whom it has delegated parts of its safekeeping services and of the arrangements of the third party in respect of the matters delegated to it. The liability of the Depositary will not be affected by virtue of any such

delegation. The Depositary has delegated to its global sub-custodian, the Northern Trust Company, London branch, responsibility for the safekeeping of the Company's financial instruments and cash. The global sub-custodian proposes to further delegate these responsibilities to sub-delegates, the identities of which are set forth in Appendix V attached.

The Depositary Agreement provides that the Depositary shall be liable: (i) in respect of a loss of a financial instrument held in its custody (or the custody of its duly appointed delegate), unless it can prove that the loss has arisen as a result of an external event beyond the Depositary's reasonable control, the consequences of which would have been unavoidable despite all reasonable measures to the contrary; and (ii) in respect of all other losses, as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Regulations.

Legal Advisers

The Company has appointed Arthur Cox as its legal advisers.

Company Secretary

The Company has appointed Bradwell Limited as the company secretary.

Auditors

The Company has appointed Deloitte, Registered Auditors, Dublin, as its auditors.

Conflicts of Interest

Due to the widespread operations undertaken by the Directors, the Manager, the Investment Manager, the Administrator and the Depositary and, where applicable, their respective holding companies, subsidiaries and affiliates (each an "Interested Party") conflicts of interest may arise. This includes the conflicts of interest that may emerge through the integration of sustainability risk and factors, including (but not limited to), any activities that give rise to greenwashing, mis-selling, or misrepresentation of investment strategies.

Subject to the provisions below, the Interested Parties may effect transactions where those conflicts arise and shall not (subject as below) be liable to account for any profit, commission or other remuneration arising. All such transactions must be in the best interests of Shareholders.

In the event that a conflict of interest does arise, the Directors will endeavour, so far as they are reasonably able, to ensure that it is resolved fairly and that investment opportunities are allocated on a fair and equitable basis and in the best interests of Shareholders.

Without prejudice to the generality of the foregoing, the following conflicts of interest may arise:

- (i) an Interested Party may acquire or dispose of any Investment notwithstanding that the same or similar Investments may be owned by or for the account of or otherwise connected with the Company;
- (ii) an Interested Party may acquire, hold or dispose of Investments notwithstanding that such Investments had been acquired or disposed of by or on behalf of the

Company by virtue of a transaction effected by the Company in which the Interested Party was concerned provided that the acquisition by an Interested Party of such Investments is effected as if negotiated on an arm's length basis and such Investments held by the Company are acquired on the best terms having regard to the interests of the Company;

- (iii) an Interested party may misrepresent the sustainability outcomes and/or labels of investment products and services, or fail to align these consistently with any sustainability preferences (where relevant) of the target market.
- (iv) an Interested Party may deal with the Company as principal or as agent, provided that:
 - A. there is obtained a certified valuation of the transaction by a person approved by the Depositary (or the Directors in the case of a transaction with the Depositary) as independent and competent;
 - B. the transaction is executed on best terms on an organised investment exchange in accordance with the rules of such exchange; or
 - C. where A and B are not practical, execution is on terms which the Depositary (or the Directors in the case of a transaction with the Depositary) is satisfied conforms with the principle that the transaction is in the best interest of the Shareholders and is carried out as if effected on normal commercial terms negotiated at arm's length;

The Depositary (or the Directors in the case of a transaction involving the Depositary or an affiliate of the Depositary) shall document how it has complied with A, B, or C above. Where transactions are conducted in accordance with C, the Depositary (or the Directors in the case of a transaction involving the Depositary or an affiliate of the Depositary) shall document its rationale for being satisfied that the transaction conformed to the principles outlined in this paragraph.

- (i) certain of the Directors of the Company are or may in the future be connected with the Manager and/or the Investment Manager and its affiliates. However, in their capacity as Directors of the Company, they will function as persons with independent fiduciary duties and will not be subject to the control of the Manager and/or the Investment Manager. For the avoidance of doubt, the Directors shall not be liable to account to the Company in respect of such conflict, for example, as a result of receiving remuneration as directors or employees of the Manager and/or the Investment Manager or their affiliates;
- (ii) the Manager's fee may be based on a percentage of the Net Asset Value of a Fund. The Manager or its affiliates may provide valuation services to the Administrator (to assist in calculating the Net Asset Value of a Fund) in relation to Investments which are not listed or traded on a Regulated Market. This may result in a potential conflict of interest as the Manager's fee will increase as the Net Asset Value of a Fund increases;
- (iii) the Company may invest in other collective investment schemes which may be operated and/or managed by an Interested Party. Where commission is received by the Manager and/or the Investment Manager by virtue of an investment by the Company in the units/shares of any collective investment scheme, such commission will be paid into the property of the relevant Fund; and

- (iv) the Company may purchase or hold an Investment the issuer of which is an Interested Party or where an Interested Party is its adviser or banker.

The Manager and the Investment Manager are prohibited from receiving inducements (other than acceptable minor non-monetary benefits) such as soft commission arrangements or other inducements from a broker, whether utilised in executing a transaction or otherwise. In managing the assets of the Company, the Manager and the Investment Manager may from time to time receive or utilise certain investment research and statistical and other investment related commentary, statistics, information and assistance or material (collectively "Research") provided by third parties that does not qualify as a minor non-monetary benefit. Direct charges for Research will be borne by the Manager and/or the Investment Manager out of their fees and will not, in any circumstances be allocated to the Company and or the Funds.

Remuneration Policies and Practices

The Manager is subject to remuneration policies, procedures and practices (together, the "Remuneration Policy"). The Remuneration Policy is consistent with and promotes sound and effective risk management. It is designed not to encourage risk-taking which is inconsistent with the risk profile of the Funds. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Company and the Funds, and includes measures to avoid conflicts of interest. The Remuneration Policy applies to staff whose professional activities have a material impact on the risk profile of the Company or the Funds, and ensures that no individual will be involved in determining or approving their own remuneration. The Remuneration Policy will be reviewed annually and the Manager shall provide such periodic confirmations to the Company regarding the Manager's compliance with the Remuneration Policy as may be agreed between the Manager and the Company. The Manager shall advise the Company of any changes to the Remuneration Policy on an ongoing basis

Decision-Making Process for Determining Remuneration Policy

Details of the up-to-date Remuneration Policy including a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits are available via [Hermes Ireland Remuneration Policy | Federated Hermes Limited \(hermes-investment.com\)](https://hermes-investment.com) The remuneration policy summary will be made available for inspection and a paper copy may be obtained, free of charge, at the registered offices of the Manager and the Company.

Meetings

Shareholders in the Company will be entitled to attend and vote at general meetings of the Company. All general meetings of the Company shall be held in Ireland and at least one general meeting of the Company shall be held in each year as the Company's annual general meeting. At least twenty-one (21) days' notice (inclusive of the day on which the notice is served or deemed to be served and of the day for which the notice is given) shall be given to Shareholders. The notice shall specify the place, day and hour of the meeting and the terms of the resolutions to be proposed. A proxy may attend on behalf of any Shareholder.

Accounts and Information

The Company's accounting period ends on 31 December in each year, and half-yearly reports will be prepared to each 30 June.

The Company prepares an annual report and audited financial statements within four months of the end of the financial period to which they relate, i.e., by 30 April of each year. Copies of the half-yearly report and unaudited financial statements (made up to 30 June) are also prepared within two months of the end of the half year period to which they relate, i.e., by 31 August of each year. Copies of the annual report and audited financial statements and half-yearly report and unaudited financial statements will be sent, on request, to Shareholders.

Copies of the Prospectus, Supplements, annual and half-yearly reports of the Company may be obtained from the Company at its registered office at the address given under "Directory". Alternatively, these can be viewed on the Manager's website at www.hermes-investment.com.

Valuation, Subscriptions and Redemptions

Calculation of Net Asset Value

The Net Asset Value of each Fund is expressed in its base currency. The calculation of the Net Asset Value of each Fund and the Net Asset Value attributable to each Share Class thereof will be carried out by the Administrator in accordance with the requirements of the Articles, and details are set out under the heading "Statutory and General Information" below. Except when the determination of the Net Asset Value of any Fund has been suspended or postponed in the circumstances set out under the heading "Temporary Suspensions" below, the calculation of the Net Asset Value of each Fund, the Net Asset Value per Share (and, where there is more than one Share Class of a Fund, the Net Asset Value attributable to each Share Class and the Net Asset Value per Share per Share Class) will be prepared as at each Valuation Point and will be available to Shareholders on request. The Net Asset Value per Share per Share Class may differ between each Share Class of a Fund. The Price (as defined below) shall also be made public at the offices of the Administrator during normal business hours and will be published daily on the Manager's website at <https://www.hermes-investment.com/professional/products> and will be kept up to date. The Net Asset Value per Share may also be published in such newspapers and/or other publications as may be necessary where the Company is registered in jurisdictions outside Ireland and Shareholders in the relevant jurisdictions will be notified where such publication takes place.

The Net Asset Value attributable to any Share Class of a Fund will be determined by deducting the share of liabilities of that Share Class from its share of the assets of the Fund. Unless otherwise disclosed in the relevant Supplement, the Net Asset Value of each Share of each Share Class will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of that Share Class and rounding the result to four decimal places.

Where there are different Share Classes of a Fund, the relevant Supplement shall state whether or not a hedging policy is being adopted in respect of any Share Class of such Fund. The costs and liabilities/benefits arising from instruments entered into for the purposes of hedging the currency exposures for the benefit of a Share Class of a Fund shall be attributable exclusively to that Share Class.

In calculating the Net Asset Value, the Administrator shall not be liable for any loss suffered by the Company by reason of any error resulting from any inaccuracy in the information provided by any third party pricing service that the Administrator is directed to use by the Company in accordance with the Company's Valuation Policy.

In calculating the Net Asset Value and Net Asset Value per Share, the Administrator shall not be responsible for the accuracy of financial data, opinions or advice furnished to it by the Company, or its delegates, including an external valuer, prime broker(s), market makers and/or independent third party pricing services. The Administrator may accept, use and rely on prices provided to it by the Company, the Manager or its delegates or other agreed independent third party pricing services for the purposes of determining the Net Asset Value and Net Asset Value per Share and shall not be liable to the Company, the Manager, the Depositary, an external valuer, any Shareholder or any other person in so doing by reason of any error in the calculation of the Net Asset Value resulting from any inaccuracy in the information provided by the Company its delegates, an external valuer or other independent third party pricing services or its delegates that the Administrator is directed to use by the Company or an external valuer in accordance

with the Company's Valuation Policy. The Company acknowledges and agrees that the Administrator has not been retained to act as external valuer or independent valuation agent.

In the event that there is an error in the calculation of the Net Asset Value of the Company or the Fund which results in a Shareholder receiving an overpayment from the Company, the Company reserves the right to seek to recover from such Shareholder any excess amount received by them or to re-issue a contract note with the correct Net Asset Value of the Company or Fund.

Single Swing Pricing

Shares in each Fund (unless otherwise stated in the relevant Supplement) will be issued and redeemed at a single price (the "Price") (excluding subscription or redemption charges, if any) which will be the Net Asset Value per Share, which may be adjusted on any Dealing Day in the manner set out below depending on whether or not the relevant Fund is in a Net Subscription Position or in a Net Redemption Position on such Dealing Day. Where there is no dealing on the Fund or Share Class of the Fund on any Dealing Day, the Price will be the Net Asset Value per Share unadjusted.

The basis on which the Investments are valued for the purpose of calculating the buying and selling price of Shares is as stipulated in the Articles. The total proceeds of the sale of an Investment may be less than, and the total purchase price of an Investment may be more than, the last traded price (or the bid price where set out in the relevant Fund Supplement) used in calculating the Share price, for example, due to dealing charges, or through dealing at prices other than the last traded price. Under certain circumstances (for example, large volumes of deals) this may have an adverse effect on the Shareholders' interest in a Fund. In order to mitigate this effect, called "dilution", the Directors have the power to apply a dilution adjustment ("Dilution Adjustment"). A Dilution Adjustment is an adjustment to the Share price. The Directors shall comply with the Central Bank's requirements in its application of any such Dilution Adjustment.

The Dilution Adjustment for each Fund will be calculated by reference to the estimated costs of dealing in the underlying Investments of that Fund, including any dealing spreads ("Spreads"), commissions and transfer taxes.

Dilution Adjustment and Large Deals

In the event of the Fund being in a Net Subscription Position on any Dealing Day, the Company may make a Dilution Adjustment to the Net Asset Value per Share of the relevant Share Classes to cover the Duties and Charges and Spreads, being the costs involved in rebalancing the Fund's portfolio in respect of the net issue of Shares on that Dealing Day.

In the event of the Fund being in a Net Redemption Position on any Dealing Day, the Company may make a Dilution Adjustment to cover the Duties and Charges and Spreads, being the costs involved in rebalancing the Fund's portfolio in respect of the net redemption of Shares on that Dealing Day.

The purpose of any Dilution Adjustment would be to limit the impact of trading costs on the value of a Fund.

The need to apply a Dilution Adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of Shares. It may also depend on the nature of a particular Fund (i.e., whether it invests primarily in equities or bonds). The Directors may

apply a Dilution Adjustment on the issue and redemption of such Shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a Dilution Adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the Dilution Adjustment may be applied in circumstances where:

- (a) over a dealing period, a Fund has experienced a large level (as determined by the Directors) of net issues or redemptions relative to its size;
- (b) a Fund is in continual decline (i.e., is experiencing a net outflow of redemptions); and
- (c) in any other case where the Directors are of the opinion that the interests of the Shareholders require the imposition of a Dilution Adjustment.

The Dilution Adjustment will involve adding to, when the Fund is in a Net Subscription Position, and deducting from, when the Fund is in a Net Redemption Position, the Net Asset Value per Share such figure as the Directors consider represents an appropriate figure (not exceeding 3.5% of the Net Asset Value per Share) to meet the relevant Duties and Charges and Spreads. The resultant amount will be the Price at which all subscriptions and redemptions (including both seeded and unseeded Share Classes) occurring on the relevant Dealing Day will be made.

The Price of each Share Class of the Fund will be calculated separately but any Dilution Adjustment will in percentage terms affect the Price of each Share Class in an identical manner.

It should be noted that as dilution is directly related to the inflows and outflows of monies from a Fund, it is not possible to predict accurately whether or not dilution will occur at any particular future point in time, and how frequently the Directors will need to make such a Dilution Adjustment.

The application of this pricing methodology will comply with the requirements of the Central Bank.

Subscriptions

The Directors may issue Shares of any Share Class of any Fund and on such terms as they may from time to time determine.

Shares shall be issued at the Net Asset Value per Share plus any charges as specified in the relevant Supplement. All Shares will be in registered form and evidenced by entry on the Company's register of Shareholders and confirmations of ownership in writing, or via electronic methods, will be issued to Shareholders. No share certificates will be issued.

Under the Articles, the Directors are given authority to effect the issue of Shares and have absolute discretion to accept or reject in whole or in part any application for Shares without assigning any reason therefore. The Directors have power to impose such restrictions as they think necessary to ensure that no Shares are acquired by any person which might result in the legal and beneficial ownership of Shares by persons who are not Qualified Holders or expose the Company to adverse tax or regulatory consequences.

If an application is rejected, any monies received will be returned to the applicant (minus any handling charge incurred in any such return) as soon as possible by telegraphic transfer (but without interest, costs or compensation). Additionally, any monies received relating to incomplete applications (for example where documentation relating to anti money laundering

measures have not been provided), will be returned by the Administrator within five business days. Should the shareholder wish to progress, all validation checks relating to anti money laundering measures must be completed.

No Shares of any Fund will be issued or allotted during a period when the determination of Net Asset Value of that Fund is suspended.

All subscriptions will be dealt on a forward pricing basis, i.e., by reference to the Price for Shares calculated as at the Valuation Point on the relevant Dealing Day. Any applications received after the cut-off time specified in the relevant Supplement will normally be held over until the next Dealing Day but may be accepted for dealing on the relevant Dealing Day, at the discretion of the Directors on an exceptional basis only (provided the application is received by the Administrator before the relevant Valuation Point).

Prospective investors should note that by completing the Application Form they are providing to the Company personal information, which may constitute personal data within the meaning of the Data Protection Legislation. The personal data of prospective investors and registered Shareholders shall be processed in accordance with the Privacy Statement.

In addition, in order to comply with the Investment Undertaking Reporting, FATCA, the Common Reporting Standard and DAC 2 information reporting regimes as implemented in Ireland by Section 891C, Section 891E to Section 891G (inclusive) of the Taxes Act and regulations made pursuant to those sections, Shareholders' personal data (including financial information) may be shared with the Irish Revenue Commissioners. The Irish Revenue Commissioners in turn may exchange information (including personal data and financial information) with foreign tax authorities (including foreign tax authorities located outside the EEA). Please consult the AEOI (Automatic Exchange of Information) webpage on www.revenue.ie for further information in this regard.

By signing the Application Form, prospective investors consent to the recording of telephone calls made to and received from investors by the Company, the Manager, their delegates, their duly appointed agents and any of their respective related, associated or affiliated companies for record keeping, security and/or training purposes.

The Administrator may and will hold all or part of the data provided in accordance with applicable laws even after the investor has fully redeemed from the relevant Fund.

Account Opening, Subsequent Subscriptions and Electronic Dealing

All applicants applying for the first time for Shares in the Company must complete (or arrange to have completed under conditions approved by the Directors) and sign the Application Form prescribed by the Directors in relation to the Company and the relevant Share Class of a Fund by either wet-ink or by electronic means approved by the Administrator and send the Application Form by post or electronic means approved by the Administrator to the Administrator as well as all relevant anti-money laundering documentation. The Application Form may also be concurrently submitted by fax or other electronic means approved by the Administrator to expedite an account setup process. Subscriptions will only be permitted, and Shares issued once the application form and any required anti-money laundering documentation have been received, reviewed and cleared by the Administrator in line with their money laundering prevention procedures.

Subsequent dealings by existing Shareholders may be made by completing a Dealing Form, which may be submitted by fax without the requirement to submit documents or otherwise in

writing as may be prescribed by the Directors, in accordance with the requirements of the Central Bank, from time to time provided that there has been no change in the relevant details of the Shareholder. Subsequent dealings may also be made by electronic instruction methods, which must be pre-agreed with the Administrator. Application Forms and Dealing Forms may be obtained from the Company or the Administrator. Application Forms, Dealing Forms and electronic instruction methods shall (save as determined by the Directors and as outlined in further detail below in the "Policy in relation to amending Dealing Forms" section below) be irrevocable and should be sent to the Administrator by the cut-off time specified in the relevant Supplement.

On an ongoing basis, and as part of the customer due diligence processes and ongoing monitoring, the Administrator may request further anti-money laundering documentation from Shareholders. Should this documentation not be received within a reasonable timeframe (within 120 days), the Directors reserve the right to discontinue the relationship and compulsorily redeem the relevant Shares.

Policy in relation to amending Dealing Forms

Amendment request is received before the cut-off time

Where an amendment request is received before the cut-off time, the Administrator is authorised to accept any such withdrawal or amendment of a dealing request.

Amendment request is received after the cut-off time but before the Valuation Point

Where the amendment request is made to the Administrator after the cut-off time for such orders but before the relevant Valuation Point, the Administrator shall refer the request to the Manager. The Manager is fully authorised to determine whether to accept such amendment request on a case-by-case basis. In doing so, it may have regard to such factors as (a) whether it or its delegate has placed trades in furtherance of the previous dealing request, (b) whether the amendment of the request might impact on the Company or on other non-dealing Shareholders, (c) whether there are any circumstances which might justify the request on the part of the investor or potential investor to vary their dealing request (for example, failure or electronic communication or fax or clerical error).

Amendment request is received after the Valuation Point

Where an amendment request is received after the Valuation Point, the amendment request will be refused and the investor notified accordingly. The investor may then, if they so wish, place a new amended dealing request for the next Dealing Day.

Dealing Forms and electronic instruction methods are considered in greater detail in the "Dealing Form and Electronic Instruction" section below.

Subscription Price

Shares will be issued on each Dealing Day at the relevant Price.

The latest Price for Shares will be available during normal business hours every Business Day at the office of the Administrator and will be published daily on the following website: www.hermes-investment.com.

Fractions

Fractions of Shares will be issued where any part of the subscription monies for Shares represents less than the Price for one Share, provided, however, unless otherwise disclosed in the Relevant Supplement, that fractions shall not be less than four decimal points or such number of decimal points of a Share as the Directors may determine from time to time. Subscription monies, representing less than the relevant fraction of a Share will not be returned to the applicant but will be retained by the Fund in order to defray administration costs.

Method of Payment

Subscription payments net of all bank charges should be paid to the Administrator by BACS, CHAPS, SWIFT or telegraphic transfer to the bank account specified at the time of dealing (except where local banking practices do not allow electronic bank transfers). Other methods of payment are subject to the prior approval of the Company in consultation with the Administrator. No interest will be paid in respect of payments received in circumstances where the application is held until a subsequent Dealing Day.

Currency of Payment

Subscriptions may be accepted in a currency other than the designated currency of the relevant Share Class at the discretion of the Administrator (see section headed "Currency of Payment and Foreign Exchange Transactions").

Timing of Payment

Payment in respect of subscriptions must be received by the Administrator by the time specified in a Supplement in relation to a Fund. If payment in full in cleared funds in respect of a subscription has not been received by the relevant time, the Company and/or the Administrator may cancel the allotment and the Shareholder shall indemnify the Company for any loss suffered by the Company as a result of a failure by the Shareholder to pay the subscription monies by the relevant time. In addition, the Company will have the right to sell all or part of the applicant's holding of Shares in a Fund in order to meet these charges.

Subscription payments should not be transferred to the Administrator until confirmation that the Shareholder account is open, and the dealing account number has been received. Subscription proceeds transferred in advance of the account opening process may result in delays with subscriptions being processed. Payments cannot be accepted during the account opening process, until all anti money laundering checks are complete.

The Company may temporarily borrow an amount equal to the subscription, subject to the Fund's borrowing limit of 10% of its Net Asset Value, and invest the amount borrowed in accordance with the investment objective and policies of the Fund. Once the required subscription monies have been received, the Company will use this to repay the borrowings. In the event of any delay in the settlement of the investor's subscription monies, the Company reserves the right to charge that Shareholder for any interest or other costs incurred by the Company as a result of this borrowing. If the Shareholder fails to reimburse the Company for those charges, the Company will have the right to sell all or part of the investor's holdings of Shares in any Fund in order to meet those charges and/or to pursue that Shareholder for such charges.

The Company reserves the right to reverse any allotment of Shares in the event of a failure by the Shareholder to settle the subscription monies on a timely basis. In such circumstances, the

Company shall compulsorily redeem any Shares issued and the Shareholder shall be liable for any loss suffered by the Company in the event that the redemption proceeds are less than the amount originally subscribed for.

Initial Offer Period

Applications for Shares during the Initial Offer Period must be received during the Initial Offer Period. Subscription monies must be received within three business days thereafter. All applicants applying for Shares during the Initial Offer Period must complete (or arrange to have completed under conditions approved by the Directors) the Application Form and Dealing Form prescribed by the Directors in relation to the relevant Share Class of the Fund. Completed Application Forms and Dealing Forms should be sent to the Administrator.

Notwithstanding the foregoing, subscription monies received during the Initial Offer Period may be returned to investors and the launch of the Fund or a Share Class postponed in the event that, in the Directors' opinion, insufficient monies are received during the Initial Offer Period to launch the Fund or Share Class as a viable concern. Details of the Initial Offer Price per Share for all Share Classes will be set out in the relevant Supplement.

Operation of Umbrella Cash Account in the name of the Company

The Company has established an Umbrella Cash Account designated in different currencies at umbrella level in the name of the Company. All subscriptions, redemptions or dividends payable to or from the relevant Fund will be channeled and managed through such Umbrella Cash Accounts and no such accounts shall be operated at the level of each individual Fund. However, the Company will ensure that the amounts within an Umbrella Cash Account whether positive or negative can be attributed to the relevant Fund in order to comply with the requirement as set out in the Instrument that the assets and liabilities of each Fund are kept separate from all other Funds and that separate books and records are maintained for each Fund in which all transactions relevant to a Fund are recorded.

Subscription monies received from an investor in advance of a Dealing Day in respect of which an application for Shares has been, or is expected to be, received will be held in an Umbrella Cash Account in the name of the Company and will be treated as an asset of the relevant Company upon receipt and will not benefit from the application of any investor money protection rules (i.e. the subscription monies in such circumstance will not be held on trust as investor monies for the relevant investor). In such circumstance, the investor will be an unsecured creditor of the relevant Company with respect to the amount subscribed and held by the Company until such Shares are issued as of the relevant Dealing Day.

In the event of an insolvency of the Fund or the Company, there is no guarantee that the Fund or the Company will have sufficient funds to pay unsecured creditors in full. Investors who have forwarded subscription monies in advance of a Dealing Day as detailed above and which are held in an Umbrella Cash Account will rank equally with all other unsecured creditors of the relevant Fund and will be entitled to a pro-rata share of monies which are made available to all unsecured creditors by the insolvency practitioner. Therefore, in such circumstances, the investor may not recover all monies originally paid into an Umbrella Cash Account in relation to the application for Shares.

Any failure to supply the Company with any documentation requested by it for anti-money laundering and terrorist financing procedures may result in a delay in the settlement of redemption proceeds or dividend monies. In such circumstances and where a redemption

request is received, the Company will process any redemption request received by a Shareholder, however the proceeds of that redemption will be held in an Umbrella Cash Account and, therefore, shall remain an asset of the relevant Fund. The redeeming Shareholder will rank as a general creditor of the relevant Fund until such time as the Company is satisfied that its anti-money laundering and terrorist financing procedures have been fully complied with, following which redemption proceeds will be released.

In the event of an insolvency of the Fund or the Company, there is no guarantee that the Fund or the Company will have sufficient funds to pay unsecured creditors in full. Investors / Shareholders due redemption / dividend monies which are held in an Umbrella Cash Account will rank equally with all other unsecured creditors of the relevant Fund and will be entitled to a pro-rata share of monies which are made available to all unsecured creditors by the insolvency practitioner. Therefore, in such circumstances, the investor/ Shareholder may not recover all monies originally paid into an Umbrella Cash Account for onward transmission to that investor / Shareholder.

Therefore, a Shareholder is advised to ensure that all relevant documentation requested by the Company or its delegate in order to comply with anti-money laundering, terrorist financing and ongoing client due diligence procedures is submitted to the Company or its delegate prior to subscribing or redeeming Shares in the Company.

In the event of the insolvency of a Fund, recovery of any amounts to which other Funds are entitled, but which may have transferred to the insolvent Fund as a result of the operation of the Umbrella Cash Account, will be subject to the principles of Irish trust law and the terms of the operational procedures for the Umbrella Cash Account. There may be delays in effecting and/or disputes as to the recovery of such amounts, and the insolvent Fund may have insufficient funds to repay amounts due to other Funds.

Income Equalisation

In accordance with the provisions of the Company's Articles of Association, each Fund operates equalisation in relation to all Share Classes. This means that a Shareholder who has purchased Shares during a Distribution Period will receive a distribution made up of two amounts;

- (a) income that has accrued from the date of purchase; and
- (b) equalisation, which represents a return of capital.

The effect is that income is distributed to Shareholders in proportion to the duration of their ownership of Shares of a Fund in the relevant Distribution Period.

Equalisation will be calculated on each Dealing Day at each Valuation Point during a Distribution Period. All Shares purchased during a Distribution Period will contain in their Net Asset Value per Share an "equalisation rate", which represents a proportion of the income (if any) of a Fund attributable to the relevant Share Class that has accrued (but has not been distributed) from the beginning of the Distribution Period up to the date of issue of such Share.

The amount of equalisation is therefore reflected in the Price of each Share on each Dealing Day and is refunded to Shareholders as part of the first distribution after their subscription for Shares. Such returned equalisation may be treated as a return of capital for tax purposes depending on the tax rules in the country where a Shareholder pays tax. Shareholders of all Share Classes who redeem their Shares will receive an amount that will include the income accrued to the date of redemption and which may be treated as income for tax purposes, subject to the tax rules in the country where a Shareholder pays tax.

Anti-Money Laundering

Measures provided for in the Criminal Justice (Money Laundering and Terrorist Financing) Act 2010 - 2021 (the "Criminal Justice Acts"), as may be amended, which are aimed towards the prevention of money laundering and counter terrorist financing require a subscriber to verify his/her identity to the Company.

The documentation required will vary between applicants and is dependent on the type of investor subscribing for Shares in the Company. Where applicable, (for example: in the case of a corporate entity) identification of underlying beneficial ownership of the applicant will be required.

An individual may be required to produce a copy of a passport or identification card duly certified by a public authority such as a notary public or the ambassador in their country of residence, together with one item of evidence of their address such as a utility bill or bank statement dated within the last 6 months. In the case of corporate applicants this may require production of a certified copy of the Certificate of Incorporation (and any change of name), Memorandum and Articles of Association (or equivalent), and the names and addresses of all directors and beneficial owners (who may also be required to provide proof of identity). Updated anti-money laundering documentation may be requested from Shareholders where required from time to time.

In the event of delay or failure by the applicant at any time during the business relationship to produce any information required for verification purposes or for other purposes required in order for the Company to comply with the Criminal Justice Acts, the Administrator may take such action as it sees fit including refusing to proceed with the application, in the case of initial subscriptions, or, in the case of ongoing client due diligence documentation requirements, block any further transactions on the account including any payments due to the Shareholder. Interest will not accrue on any monies held while client due diligence is being completed. None of the Company, the Directors, the Depositary, the Manager, the Investment Manager nor the Administrator shall be liable to the subscriber or Shareholder where an application for Shares is not processed or Shares are compulsorily redeemed in such circumstances. If an application is refused, the Administrator will return application money or the balance thereof by telegraphic transfer in accordance with any applicable laws to the account from which it was paid at the cost and risk of the applicant. The Administrator may refuse to pay redemption monies to such investors until they comply with applicable verification and identification standards.

In connection with the establishment of anti-money laundering/counter terrorist financing procedures, the Directors may implement additional restrictions on the transfer or dealing in Shares. The Directors may impose additional requirements from time to time to comply with all applicable anti-money laundering/counter terrorist financing laws and regulations.

Each applicant for Shares acknowledges that the Administrator shall be indemnified and held harmless against any loss arising as a result of failure to process his application for, or request for the redemption of Shares, if such information and documentation has been properly requested by the Administrator and has not been provided by the applicant. In addition, if an application is refused, subscription monies will only be returned if such return is permissible under Irish money laundering and counter terrorist financing laws.

The details given above are by way of example only and the Administrator reserves the right to request such documentation as is necessary to verify the identity of the applicant and to ensure compliance by the Company with its obligations under the Criminal Justice Acts.

Redemptions

Shareholders may redeem their Shares in any Fund on any Dealing Day (save during any period when the calculation of the Net Asset Value is suspended) on furnishing to the Administrator a redemption request.

All redemption requests are dealt with on a forward pricing basis, i.e., by reference to the Price for Shares calculated at the Valuation Point on the relevant Dealing Day. If a redemption request is received after the cut-off time specified in the relevant Supplement it shall (unless otherwise determined by the Directors on an exceptional basis only and provided it is received by the Administrator prior to the Valuation Point) be treated as a request for redemption on the Dealing Day following such receipt and Shares will be redeemed at the Price for that day. Where the Company receives in respect of any Dealing Day requests for redemption or switching which in the aggregate amount to more than 10% of the Net Asset Value of any Fund, the Manager may reduce each such request for redemption or switching of Shares of the relevant Fund pro rata so that all such requests cover no more than 10% of the Net Asset Value of the relevant Fund and shall treat the redemption or switching requests as if they were received on each subsequent Dealing Day until all the Shares in the relevant Fund to which the original request related have been redeemed. If redemption or switching requests are so carried forward, the Manager shall procure that the Shareholders whose dealings are affected thereby are promptly informed.

Dealing Form and Electronic Instruction

All applicants seeking to redeem Shares must complete (or arrange to have completed under conditions approved by the Directors) and sign a Dealing Form, which may be obtained from the Administrator or the Manager. Completed Dealing Forms should be sent to the Administrator by the cut-off time specified in the relevant Supplement.

Redemption requests will only be accepted where cleared funds have been received and there is no outstanding client due diligence.

Dealing Forms shall (save as determined by the Directors) be irrevocable and may be sent by fax at the risk of the relevant Shareholder.

Electronic instruction methods must be pre-agreed with the Administrator. Electronic instructions shall (save as determined by the Directors) be irrevocable and are sent at the risk of the relevant Shareholder.

Redemption Price

Shares will be redeemed on each Dealing Day at the relevant Price.

The latest Price for Shares will be available during normal business hours every Business Day at the office of the Administrator and will be published daily on the following website www.hermes-investment.com.

Fractions

Apart from circumstances in which a Shareholder is redeeming his entire holding of Shares in the Fund:

- (a) fractions of Shares will be issued where any part of the redemption monies for Shares represents less than the Price for one Share, provided however, unless otherwise disclosed in the Relevant Supplement, that fractions shall not be less

than four decimal points or such number of decimal points of a Share as the Directors may determine from time to time; and

- (b) redemption monies representing less than the relevant fraction of a Share will not be returned to a Shareholder but will be retained by the Fund in order to defray administration costs.

Method of Payment

Redemption payments will be made to the bank account detailed on the Application Form, as subsequently notified to the Administrator in writing or as confirmed under separate agreement with the Distributor and pre-agreed with the Administrator, in its capacity as the Transfer Agent.

Currency of Payment

Shareholders will normally be repaid in the currency of denomination of the relevant Share Class. Redemptions may be paid in another currency at the request of a Shareholder and at the Administrator's discretion (see section headed "Currency of Payment and Foreign Exchange Transactions" in the Prospectus).

Timing

Redemption proceeds in respect of Shares will be paid by the time specified in a Supplement in relation to a Fund provided that all the required documentation has been furnished to and received by the Administrator. In exceptional circumstances, and at the discretion of the Directors, redemption proceeds in respect of Shares may be paid at a later date provided that payment on such date is in accordance with the requirements of the Central Bank.

Any failure to supply the Company or the Administrator with any documentation requested by them for anti-money laundering purposes, as described above, may result in a delay in the settlement of redemption proceeds. In such circumstances, the Administrator will process any redemption request received by a Shareholder, however the proceeds of that redemption shall remain an asset of the Fund and the Shareholder will rank as a general creditor of the Company until such time as the Administrator has verified the Shareholder's identity to its satisfaction, following which redemption proceeds will be released.

Switching

Shareholders of any Share Class within a Fund may switch free of charge to another Share Class within this Fund or to the same or another Share Class of another Fund as the Directors may permit, subject to meeting the specific requirements set out in the relevant Supplement for the relevant Share Class.

Shareholders of any Share Class within a Fund other than the Class T Shares may switch free of charge to another Share Class within the Fund or to the same or another Share Class of another Fund as the Directors may permit. Shareholders may not switch into or out of Class T Shares.

Shareholders can only switch into Class Z Shares if they have a Client Agreement in place.

On the establishment of any new Fund (or Share Class thereof) the Directors shall specify the switching rights relating to such Fund (or Share Class thereof).

Switching may be effected by submission of a Dealing Form to the Administrator or by such other means, such as by means of written instructions, as the Administrator may prescribe from time to time where such means are in accordance with the requirements of the Central Bank.

If the switch would result in the Shareholder holding a number of Shares in the original Share Class or Fund with a value of less than the Minimum Holding, the Administrator may, at its discretion, convert the whole of the applicant's holding of Shares in the Share Class or Fund or refuse to effect any switch. No switches will be made during any period in which the rights of Shareholders to require the redemption of their Shares are suspended.

The general provisions on procedures for redemptions (including provisions relating to the cut-off time for receipt of Dealing Forms) will apply equally to switching.

The number of Shares to be issued in the new Share Class and/or Fund will be calculated in accordance with the following formula:

$$A = \frac{B \times C \times D}{E}$$

Where

A = number of Shares of the new Share Class and/or Fund to be allocated

B = number of Shares of the original Share Class or Fund to be converted

C = redemption price per Share on the relevant Dealing Day for the original Share Class or Fund

D = the currency conversion factor determined by the Administrator as representing the prevailing rate of exchange of settlement on the relevant Dealing Day applicable to the transfer of assets between the relevant Funds (where the base currencies of the relevant Funds are different) or where the base currencies of the relevant Share Classes or Funds are the same D = 1

E = subscription price per Share on the relevant Dealing Day for the new Share Class and/or Fund

Please see "Currency of Payment and Foreign Exchange Transactions" section below for further information.

Subscriptions/Redemptions in Specie

Subscriptions in Specie

The Company may issue Shares of any Share Class of Fund by way of exchange for Investments (as approved by the Manager) provided that:

- (a) in the case of a person who is not an existing Shareholder no Shares shall be issued until the person concerned has completed and delivered to the Administrator an Application Form and Dealing Form as required under this Prospectus (or otherwise) and satisfied all the requirements of the Directors and the Administrator as to such person's application, including any anti-money laundering documentation;

- (b) the nature of the Investments transferred into the Fund are such as would qualify as Investments of such Fund in accordance with the investment objectives, policies and restrictions of such Fund;
- (c) no Shares shall be issued until the Investments shall have been vested in the Depositary or any sub-Depositary to the Depositary's satisfaction and the Depositary shall be satisfied that the terms of such settlement will not be such as are likely to result in any prejudice to the existing Shareholders of the Fund; and
- (d) the Depositary is satisfied that the terms of any exchange would not be such as would be likely to result in any prejudice to remaining Shareholders and provided that any such exchange shall be effected upon the terms (including provision for paying any expenses of exchange and any preliminary charge as would have been payable for Shares issued for cash) that the number of Shares issued shall not exceed the number which would have been issued for cash against payment of a sum equal to the value of the Investments concerned calculated in accordance with the procedures for the valuation of the assets of the Company. Such sum may be increased by such amount as the Directors may consider represents an appropriate provision for a Dilution Adjustment or Duties and Charges and Spreads which would have been incurred by the Fund in the acquisition of the Investments by purchase for cash or decreased by such amount as the Directors may consider represents any Dilution Adjustment or Duties and Charges and Spreads to be paid to the Fund as a result of the direct acquisition by the Fund of the Investments.

Redemptions in Specie

The Company may, at its discretion, redeem Shares of any Share Class of a Fund by way of exchange for Investments provided that:

- (a) a Dealing Form is completed and delivered to the Administrator as required by this Prospectus and the redemption request otherwise satisfies all the requirements of the Directors and the Administrator (including any anti-money laundering documentation) as to such request and the Shareholder seeking redemption of Shares, agrees to such course of action;
- (b) the Company is satisfied that the terms of any exchange would not be such as would be likely to result in any prejudice to the remaining Shareholders, and elects that instead of the Shares being redeemed in cash, the redemption shall be satisfied in specie by the transfer to the Shareholder of Investments provided that the value thereof shall not exceed the amount which otherwise would have been payable on a cash redemption and provided that the transfer of Investments is approved by the Depositary. Such value may be reduced by such amount as the Directors may consider represents any Dilution Adjustment or Duties and Charges and Spreads to be paid to the Fund as a result of the direct transfer by the Fund of the Investments or increased by such amount as the Directors may consider represents any appropriate provision for Dilution Adjustment or Duties and Charges and Spreads which would have been incurred by the Fund in the disposition of the Investments to be transferred. The shortfall (if any) between the value of the Investments transferred on a redemption in specie and the redemption proceeds which would have been payable on a cash redemption shall be satisfied in cash. Any decline in the value of the Investments to be transferred in settlement of a redemption

between the relevant Dealing Day and the day on which Investments are delivered to the redeeming Shareholders shall be borne by the redeeming Shareholders; and

- (c) if a redeeming Shareholder requests redemption of a number of Shares that represents 5% or more of the Net Asset Value of a Fund, the Directors may in their sole discretion redeem the Shares by way of exchange for Investments and in such circumstances the Company will, if requested by the redeeming Shareholder, sell the Investments on behalf of the Shareholder. The cost of the sale can be charged to the Shareholder.

If the discretion conferred upon the Company above is exercised, the Company shall notify the Depositary and shall supply to the Depositary particulars of the Investments to be transferred and any amount of cash to be paid to the Shareholder. All stamp duties and registration fees in respect of such transfers shall be payable by the Shareholder. Any allocation of Investments pursuant to an in specie redemption is subject to the approval of the Depositary.

Compulsory Redemption

Some or all of the Shares of any Share Class of any Fund may be redeemed compulsorily if:

- (a) in the opinion of the Directors, such redemption would eliminate or reduce the exposure of the Company or its Shareholders to adverse tax or regulatory consequences or if Shares are held by a Shareholder who is not a Qualified Holder;
- (b) a Shareholder's holding falls below the relevant Minimum Holding limit;
- (c) the holders of 75% in value of the relevant Share Class approve of the redemption at a meeting of the Shareholders thereof of which not less than 21 days' notice has been given;
- (d) at the discretion of the Directors, after the first anniversary of the first issue of Shares of the relevant Share Class if the Net Asset Value of the Fund of which the Share Class forms part falls below the amount and for such period specified in the relevant Supplement in respect of such Fund;
- (e) in the Directors' opinion, the holding of such Shares may result in regulatory, pecuniary, legal, taxation or material administrative disadvantage for the Company or its Shareholders as a whole;
- (f) at the discretion of the Directors, by giving not less than 30 days' notice in writing to the relevant Shareholders; or
- (g) a Shareholder has not completed the anti-money laundering and ongoing client due diligence procedures to the satisfaction of the Company and/or the Administrator.

All the Shares of a Fund may be redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below the amount set out in a Supplement in respect of a Fund for any period of time.

The Company shall have the right to redeem compulsorily any Share at the Price or to require the transfer of any Share to a Qualified Holder if in their opinion (i) such Share is held by a person other than a Qualified Holder; (ii) the redemption or transfer (as the case may be) would eliminate or reduce the exposure of the Company or the Shareholders to adverse tax, legal, reputational, fiscal or regulatory consequences; (iii) the holding of Shares by that Shareholder

would be a material administrative disadvantage to the Company or its Shareholders as a whole; (iv) the Shareholder has not completed the anti-money laundering procedures to the satisfaction of the Company and/or the Administrator; or (v) the holding of such Shares may result in regulatory, pecuniary, legal, taxation or material administrative disadvantage for the Company or its Shareholders as a whole.

Transfer of Shares

Shares are (save as described below) freely transferable and may be transferred in writing in a form approved by the Directors or by such other means as the Company may prescribe from time to time where such means are in accordance with the requirements of the Central Bank. Share Classes which are available only to investors who have entered into a Client Agreement can only be transferred to investors who have a Client Agreement in place. Prior to the registration of any transfer, transferees must complete an Application Form and provide such other information (e.g., any anti-money laundering documentation) as the Company may reasonably require. The Directors may decline to register any transfer of a Share where they reasonably believe that such transfer would result in the legal or beneficial ownership of such Share by a person who is not a Qualified Holder or expose the Company to adverse tax or regulatory consequences.

Temporary Suspensions

The Company may temporarily suspend the determination of the Net Asset Value of any Fund and the issue and redemption of any Share Class of any Fund during the whole or any part of any period:

- (a) when any of the principal markets on which any significant portion of the Investments of the relevant Fund from time to time are quoted, listed, traded or dealt in is closed (otherwise than for customary weekend or ordinary holidays) or during which dealings therein are restricted or suspended or trading on any relevant Futures exchange or market is restricted or suspended;
- (b) when, as a result of political, economic, military or monetary events or any other circumstances outside the control, responsibility and power of the Directors, any disposal or valuation of Investments of the relevant Fund is not, in the opinion of the Directors, reasonably practicable without this being seriously detrimental to the interests of owners of Shares in general or the owners of Shares of the relevant Fund or if, in the opinion of the Directors, the redemption price cannot fairly be calculated or such disposal would be materially prejudicial to the owners of Shares in general or the owners of Shares of the relevant Fund;
- (c) during which any breakdown occurs in the means of communication normally employed in determining the value of any of the Investments of the Company or when for any other reason the value of any of the Investments or other assets of the relevant Fund cannot reasonably or fairly be ascertained;
- (d) when the Company is unable to repatriate funds required for the purpose of making redemption payments or when such payments cannot, in the opinion of the Directors, be effected at normal prices or normal rates of exchange or during which any transfer of funds involved in the realisation or acquisition of Investments or

- when payments due or redemption cannot, in the opinion of the Directors, be effected at normal prices or normal rates of exchange;
- (e) any period when proceeds of the sale or redemption of Shares cannot be transmitted to or from the Company or the Fund's account; or
 - (f) upon the publication of a notice convening a general meeting of Shareholders for the purposes of resolving to wind up the Company.

The Company, where possible, will take all necessary steps to bring any period of suspension to an end as soon as possible.

In the event of any suspension as set out above, the Company will immediately publish such facts on the Manager's website on www.hermes-investment.com and will immediately (and in any event during the Business Day on which the suspension occurred) notify the Central Bank and any other competent authority in a Member State or other country in which Shares are marketed.

Market Timing

The Company is intended to be a long-term investment vehicle and is not designed to be used by investors for speculating on short-term market or currency movements. The Company reserves the right, as it deems appropriate, to take any necessary or desirable measures in order to limit or prevent abusive trading practices, including "market timing" or "portfolio churning". Such actions may include (but are not limited to) the Company rejecting any application for subscriptions or conversions of Shares from any investor which the Company believes is engaged in or suspected to be engaged in such abusive practices. Although there can be no assurance that the Company will be able to detect and prevent all such occurrences, the goal of this policy is to minimise any negative impact of such abusive short-term trading practices on the other Shareholders while recognising the benefits that accrue to all Shareholders from sharing fund expenses across a large asset base.

Currency of Payment and Foreign Exchange Transactions

Where a Shareholder is switching between Share Classes, subscription monies may be paid in a currency other than the currency of denomination of the Share Class into which the Shareholder is investing. In these circumstances, any necessary foreign exchange transactions may be arranged by the Administrator (at its discretion) for the account of, and at the risk and expense of, the applicant at the time the request for the switch is received and accepted. The exchange rate applicable to any such transactions will be the prevailing exchange rate quoted by the Administrator's bankers.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on a Fund. Details about whether a Fund is currently under capacity management constraints will be published on the Manager's website: [Federated Hermes / Capacity Management](#). Shareholders are advised to consult the Manager's website in advance of submitting any subscription request.

Switches will not be permitted from the C Class Shares to the F Class Shares or from the RC Class Shares to the R Class Shares, unless otherwise determined by the Directors.

1. Normal Scenario

When a Fund is not under capacity management – subscriptions, transfers and switches may be affected in the manner set out in this Prospectus.

2. Capacity Constrained Scenario

If a Fund is under capacity management, and within set tolerances, all or some of the following provisions may be applied:

All Share Classes in the relevant Fund may be closed to new investors. However, the Directors reserve the right to open Share Classes to new investors in the future. For the purposes of capacity management, a new investor is an investor who is not on a Fund's shareholder register as of that specific Dealing Day. Under the Articles, the Directors are given authority to affect the issue of Shares and have absolute discretion to accept or reject in whole or in part any application for Shares without assigning any reason. If an application is rejected, any monies received will be returned to the applicant (minus any handling charge incurred in any such return) as soon as possible by telegraphic transfer (but without interest, costs or compensation).

The Directors may, at their absolute discretion, set a Maximum Subsequent Subscription Amount for a Share Class. Maximum Subsequent Subscription Amounts may vary from time to time. Details of the Maximum Subsequent Subscription Amount will be published on the Manager's website: [Federated Hermes / Capacity Management](#).

In the event that a Shareholder subscribes for more than the Maximum Subsequent Subscription Amount in respect of a Dealing Day, the Directors will reject the subscription in full. Any such monies received will be returned to the Shareholder (minus any handling charge incurred in any such return) as soon as possible by telegraphic transfer (but without interest, costs or compensation).

A Shareholder acting as nominee for a number of underlying beneficial investors will be permitted to subscribe the Maximum Subsequent Subscription Amount for each underlying beneficial investor for whom it is holding Shares directly in a Fund as nominee on the basis that the Shareholder can provide the required undertakings, confirmations, information and ongoing reporting to the Company.

Unless otherwise determined by the Directors and notified to the relevant Shareholders, further investment may be made in all Share Classes by existing Shareholders subject to the Maximum Subsequent Subscription Amount.

If a Shareholder wishes to transfer part of their holding of Shares in a particular Share Class, they may transfer only to another Shareholder who at the time of such transfer also holds Shares in the relevant Fund.

If a Shareholder (other than a Shareholder acting as nominee for an underlying beneficial investor) wishes to transfer Shares to an investor who is not a Shareholder in the relevant Fund, the Shareholder must transfer all of their holding in that Fund and the Shareholder will not be permitted to make further subscriptions into that Fund.

If a Shareholder holding Shares of a particular Share Class as nominee for an underlying beneficial investor wishes to transfer such Shares to an investor who is not a Shareholder in the

relevant Fund, the Shareholder must transfer all their holding in that Fund attributable to that beneficial investor.

Fees and Expenses

Establishment Expenses

The Funds will bear their own direct establishment costs and such costs will be amortised over the first five financial years after their launch or such other period as the Directors may determine and advise to Shareholders via, for example, the Company's financial statements.

Value Added Tax (if any) on fees payable by the Company will be borne by the Company.

Service Providers' Fees

The fees of service providers to the Funds shall be as set out in the relevant Supplement. The Investment Manager may, in accordance with its responsibilities for the distribution of the Company, and at its sole discretion, agree to pay trailer fees to distributors and/or sub-distributors and/or retrocession fees to Shareholders out of the fees which it receives from the Manager in certain circumstances.

Administrator's Fees

The Administrator's fee as detailed in a Supplement will be accrued and calculated daily and payable monthly in arrears. The Administrator is also entitled to be paid for all agreed transfer agency charges, transaction fees at normal commercial rates and reimbursed for out of pocket expenses properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement. All such fees and expenses will be borne by the relevant Fund.

Depositary's Fees

The Depositary's fee as detailed in a Supplement will be accrued daily and payable monthly in arrears. The Depositary shall also be entitled to be reimbursed for all agreed out of pocket expenses properly incurred by it in the performance of its duties. The Depositary will also charge fees and expenses of any delegate of the Depositary, including sub-custodians, provided they are at normal commercial rates.

Management Fees

The Company will pay the Manager a management fee out of the assets of each Fund. The management fee shall be charged at the rates detailed in the relevant Supplement in relation to each Fund. The management fee shall accrue daily and be payable monthly in arrears at the end of each calendar month. The maximum management fee in respect of each Fund shall be disclosed in the relevant Supplement in relation to each Fund.

Investment Management Fees

Unless otherwise specified in relation to a Fund, the Manager will discharge the fees of the Investment Manager.

Sub-Investment Management Fees

Unless otherwise specified in relation to a Fund, the Manager and/or the Investment Manager will discharge the fees of any sub-investment manager appointed by them in relation to a Fund.

Subscription Fee

The Articles authorise the Directors to charge a preliminary fee on the issue of Shares of some Share Classes up to a maximum of 5% of the Net Asset Value per Share, such fee being payable to the Manager.

Fees payable to Intermediaries

Additional fees and other service charges in respect of subscriptions for, redemptions of and exchanges of Shares, may be payable by Shareholders or investors to intermediaries or platforms through whom they invest in such amount as they may agree with the relevant intermediaries or platform and this may result in differing yields to different investors in relation to their Shares. Such fees and charges may include an initial sales charge of up to 5% in respect of all A Shares, save in the case of A Shares in any Credit Fund (being a Fund which has the term "Credit" in its name) in which case the initial sales charge may be up to 3%). Any such fees or charges will not be payable to and will not directly benefit the Company and shall be deducted from the subscription proceeds by such intermediary or platform with the balance paid to the Fund in respect of the relevant subscription. The investor is advised to carefully consider these fees charged by the intermediary. The intermediary might be required to make appropriate disclosures to its clients (including, but not limited to, disclosure of any inducements and/or fees received or paid).

Directors' Fees

The Directors shall be entitled to a fee and remuneration for their services at a rate to be determined from time to time by the Directors. The fees of any Director in any one financial year shall not exceed €50,000 without the approval of the board of Directors. The Directors may also be paid, inter alia, for travelling, hotel and other expenses properly incurred by them in attending meetings of the Directors or in connection with the business of the Company. Joseph Kagan, Sylvie McLaughlin and Gregory Dulski, as executive employees within the Federated Hermes Group, will not be paid a fee.

Operational Expenses

The Company will also pay out of the assets of each Fund:

- (a) any fees in respect of circulating details of the Net Asset Value (including publishing prices) and Net Asset Value per Share;
- (b) stamp duties;
- (c) taxes (other than taxes taken into account as Duties and Charges) and contingent liabilities as determined from time to time by the Directors;
- (d) company secretarial fees;
- (e) execution brokerage or other expenses of acquiring and disposing of Investments;
- (f) fees and expenses of the auditors, tax, legal and other professional advisers of the Company;
- (g) fees and expenses of any portfolio monitoring and/or proxy voting agents;
- (h) fees connected with listing of Shares on any stock exchange;

- (i) fees and expenses in connection with the distribution of Shares and costs of registration and listing of the Company in jurisdictions outside Ireland;
- (j) costs of preparing, printing and distributing the Prospectus and Supplements, KID, KIIDs, reports, financial statements and any explanatory memoranda;
- (k) any necessary translation fees;
- (l) any costs incurred as a result of periodic updates of the Prospectus of the Company, any Supplements and/or KIIDs / KIDs, or of a change in law or the introduction of any new law (including any costs incurred as a result of compliance with any applicable code, whether or not having the force of law);
- (m) the Central Bank's industry funding levy;
- (n) fees connected with the winding up of the Company and/or any Fund;
- (o) any other fees and expenses relating to the management and administration of the Company or attributable to the Investments, including but not limited to, the relevant operational expenses of the Manager;
- (p) in respect of each financial year of the Company in which expenses are being determined, such proportion (if any) of the establishment expenses and reconstruction expenses (if any) as are being amortised in that year; and
- (q) all other liabilities of the Company of whatsoever kind and nature except liabilities represented by Shares in the Company and reserves (other than reserves authorised or approved by the Directors for Duties and Charges or contingencies).

The above expenses shall be charged as between each Fund and Share Class thereof on such terms and in such manner as the Directors (with the consent of the Depositary) deem fair and equitable.

For the avoidance of doubt, from 3 January 2018, all investment research costs will be borne by the Investment Manager.

All fees and expenses, Duties and Charges will be charged to the Fund (and Share Class thereof, if appropriate) in respect of which they were incurred or, where an expense is not considered by the Directors to be attributable to any one Fund (or Share Class thereof), the expense will normally be allocated to Share Classes of all Funds pro rata to the Net Asset Value of the relevant Funds. Expenses of the Company which are directly attributable to a specific Share Class will typically be charged against the income available for distribution to the holders of such Shares, other than in the case of Fees and Expenses to Higher Income Share Classes where such expenses are charged against capital. In the case of any fees or expenses of a regular or recurring nature, such as audit fees, the Directors may calculate such fees and expenses on an estimated figure for yearly or other periods in advance and accrue the same in equal proportions over any period.

Rebates

The Manager and Investment Manager may rebate a portion of the management fee to certain institutional clients.

Commission Sharing

Neither the Manager, the Investment Manager nor any of their affiliates may retain the benefit of any cash commission or rebate paid or payable by any broker or dealer to the Investment Manager or affiliate in respect of any business placed with such broker or dealer by any such person, for and on behalf of the Company.

The execution of all such transactions shall be on a best execution basis and the Company will pay brokerage which is not in excess of customary institutional full brokerage rates for the service provided.

Allocation of Assets and Liabilities

The Articles require the establishment of a separate Fund for different Share Classes in the following manner:

- (a) the records and accounts of each Fund shall be maintained separately in the base currency of the relevant Fund;
- (b) the liabilities of each Fund shall be attributable exclusively to that Fund;
- (c) the assets of each Fund shall belong exclusively to that Fund, shall be segregated in the records of the Depositary from the assets of other Funds, shall not be used to discharge directly or indirectly the liabilities of or claims against any other Fund and shall not be available for any such purpose;
- (d) the proceeds from the issue of each Share Class shall be applied to the relevant Fund established for that Share Class, and the assets and liabilities and income and expenditure attributable thereto shall be applied to such Fund subject to the provisions of the Articles;
- (e) where any asset is derived from another asset, the derived asset shall be applied to the same Fund as the assets from which it was derived and on each revaluation of an asset the increase or diminution in value shall be applied to the relevant Fund; and
- (f) in the case where an asset or a liability of the Company cannot be considered as being attributable to a particular Fund, the Directors shall have the discretion, to determine the basis upon which such asset or liability shall be allocated between the Funds and the Directors shall have power at any time and from time to time subject to the approval of the Auditors to vary such basis, provided that the approval of the Auditors shall not be required in any case where the asset or liability is allocated between all Funds pro rata to their Net Asset Values.

Taxation

General

The information given is not exhaustive and does not constitute legal or tax advice. Prospective investors should consult their own professional advisers as to the implications of their subscribing for, purchasing, holding, switching or disposing of Shares under the laws of Ireland and/or the jurisdictions in which they may be subject to tax.

If you are in any doubt about your tax position, or if you may be subject to tax in a jurisdiction other than Ireland or the UK, you should consult your professional adviser.

The following is a general summary of the main Irish and United Kingdom tax considerations relevant to the Company and certain investors in the Company who are the beneficial owners of the Shares in the Company. It is based on the law and practice and official interpretation currently in effect, all of which are subject to change and it does not purport to deal with all of the tax consequences applicable to the Company or to all categories of investors, some of whom may be subject to special rules. For instance, it does not address the tax position of Shareholders whose acquisition of Shares in the Company would be regarded as a shareholding in a Personal Portfolio Investment Undertaking (PPIU). The tax consequences of an investment in Shares in the Company will depend not only on the nature of the Company's operations and the then applicable tax principles, but also on certain factual determinations which cannot be made at this time. Accordingly, its applicability will depend on the particular circumstances of each Shareholder. For tax information relevant to investors resident in other jurisdictions please refer to the Investment Manager's website at www.hermes-investment.com/profesional/products for further details.

The following statements on taxation are based on advice received by the Directors regarding the law and practice in force in Ireland and the United Kingdom at the date of this document. Legislative, administrative or judicial changes may modify the tax consequences described below and as is the case with any investment, there can be no guarantee that the tax position or proposed tax position prevailing at the time an investment is made will endure indefinitely.

Dividends (if any) and interest which any of the Funds receive with respect to their Investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of Investments are located. It is anticipated that the Company may not be able to fully benefit from reduced rates of withholding tax in double taxation agreements between Ireland and such countries.

If this position changes in the future and the application of a lower rate results in a repayment to the Company of withholding tax suffered, the Net Asset Value will not be re-stated and the benefit of any repayment will be allocated to the then existing Shareholders rateably at the time of the repayment.

Irish Taxation

The Directors have been advised that under current Irish law and practice, the Company qualifies as an investment undertaking for the purposes of Section 739B of the Taxes Act so long as the

Company is resident in Ireland for taxation purposes. Accordingly, the taxation position of the Company and the Shareholders is as set out below.

Definitions

For the purposes of this section, the following definitions shall apply.

“Exempted Irish Investor” means the following categories of Irish Resident and Irish Ordinary Resident Shareholders:

- a pension scheme which is an exempt approved scheme within the meaning of Section 774 of the Taxes Act or a retirement annuity contract or a trust scheme to which Section 784 or 785 of the Taxes Act applies;
- a company carrying on life business within the meaning of Section 706 of the Taxes Act;
- an investment undertaking within the meaning of Section 739(B)(1) of the Taxes Act;
- an investment limited partnership within the meaning of Section 739J of the Taxes Act;
- a special investment scheme within the meaning of Section 737 of the Taxes Act;
- a unit trust to which Section 731(5)(a) of the Taxes Act applies;
- a charity being a person referred to in Section 739D(6)(f)(i) of the Taxes Act;
- a qualifying management company within the meaning of Section 739B(1) of the Taxes Act;
- a specified company within the meaning of Section 734(1) of the Taxes Act;
- a person entitled to exemption from income tax and capital gains tax under Section 784A(2) of the Taxes Act where the Shares held are assets of an approved retirement fund or an approved minimum retirement fund;
- a person who is entitled to exemption from income tax and capital gains tax by virtue of Section 787I of the Taxes Act and the Shares are assets of a PRSA;
- a credit union within the meaning of Section 2 of the Credit Union Act, 1997;
- an Irish Resident company investing in a money market fund being a person referred to in Section 739D(6)(k)(I) of the Taxes Act;
- The National Treasury Management Agency or a Fund Investment Vehicle (within the meaning of section 37 of the National Treasury Management Agency (Amendment) Act 2014) of which the Minister for Finance is the sole beneficial owner, or Ireland acting through the National Treasury Management Agency;
- the National Asset Management Agency (NAMA);
- an Irish Resident company being a person referred to in section 739D(6)(m) of the Taxes Act; or
- any other Irish Resident or Irish Ordinary Resident who may be permitted to own Shares under taxation legislation or by written practice or concession of the Revenue Commissioners without giving rise to a charge to tax in the Company or jeopardising tax exemptions associated with the Company;

provided that they have completed a Relevant Declaration and the Company is not in possession of any information which would reasonably suggest that the information contained in the declarations is not, or is no longer, materially correct.

“Foreign Person” means a person who is neither an Irish Resident nor an Irish Ordinary Resident for tax purposes and either: (i) it has provided the Company with the Relevant Declaration under Schedule 2B of the Taxes Act and in respect of whom the Company is not in possession of any information that would reasonably suggest that the Relevant Declaration is not, or is no longer, materially correct; and (ii) it has confirmed that to the Company and the Company is in possession of written notice of approval from the Irish Revenue Commissioners to the effect that the requirement to provide the necessary declaration of non-residence has been complied with in respect of the Shareholder and the approval has not been withdrawn.

“Intermediary” means an intermediary within the meaning of Section 739B(1) being a person who:

- carries on a business which consists of, or includes, the receipt of payments from an investment undertaking on behalf of other persons; or
- holds units in an investment undertaking on behalf of other persons.

“Ireland” means the Republic of Ireland.

“Irish Ordinary Resident”

- in the case of an individual, means an individual who is ordinarily resident in Ireland for tax purposes;
- in the case of a trust, means a trust that is ordinarily resident in Ireland for tax purposes.

An individual who has been resident in Ireland for three consecutive tax years becomes ordinarily resident with effect from the commencement of the fourth tax year.

An individual who has been ordinarily resident in Ireland ceases to be ordinarily resident at the end of the third consecutive year in which s/he is not resident.

The concept of ordinary residence does not apply to corporate entities.

“Irish Resident”

- in the case of a company, means a company that is resident in Ireland for tax purposes;
- in the case of an individual, means an individual who is resident in Ireland for tax purposes; or
- in the case of a trust, means a trust that is resident in Ireland for tax purposes.

“Residence” – Individual

An individual will be regarded as being resident in Ireland for a particular twelve month tax year if s/he:

- spends 183 days or more in Ireland in that twelve month tax year; or
- has a combined presence of 280 days in Ireland, taking into account the number of days spent in Ireland in that twelve month tax year together with the number of days spent in Ireland in the preceding twelve month tax year. Presence in a twelve month tax year by an individual of not more than 30 days in Ireland will not be reckoned for the purpose of

applying the two year test. Presence in Ireland for a day means the personal presence of an individual at any time during that day.

If an individual is not resident in Ireland in a particular tax year the individual may, in certain circumstances, elect to be treated as resident. **“Residence”** – Trust

A trust will generally be regarded as resident in Ireland for tax purposes if all of its trustees are resident for tax purposes in Ireland. However, the rules to determine the residency of a trust can be complex and trustees should consult their professional advisers if they are in doubt as to whether the trust is resident in Ireland.

“Residence” – Company

A company which has its central management and control in Ireland is tax resident in Ireland irrespective of where it is incorporated. A company which does not have its central management and control in Ireland but which was incorporated in Ireland on or after 1 January 2015 is tax resident in Ireland except where the company is regarded as resident in a country other than Ireland and no resident in Ireland under a double taxation treaty between Ireland and that other country.

“Relevant Declaration” means the declaration relevant to the Shareholder as set out in Schedule 2B of the Taxes Act. The Relevant Declaration for investors who are neither Irish Resident nor Irish Ordinary Resident (or Intermediaries acting for such investors) is set out in the Application Form accompanying this Prospectus.

“Taxable Irish Person” means any person, other than

- a Foreign Person; or
- an Exempted Irish Investor.

The Company

The Directors have been advised that, under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Act so long as the Company is resident in Ireland, and as such it is not chargeable to Irish tax on its income and gains.

However, Irish tax can arise (at rates ranging from 25% to 60%) on the happening of a “chargeable event” in respect of the Company. A chargeable event includes any distribution or payments to Shareholders or any encashment, repurchase, redemption, cancellation or transfer of Shares and any deemed disposal of Shares arising as a result of holding Shares in the Company for a period of eight years or more. Where a chargeable event occurs, the Company is required to account for the Irish tax thereon.

No Irish tax will arise on the Company in respect of chargeable events in respect of a Shareholder who is a Foreign Person or is an Exempted Irish Investor. In the absence of a signed and completed Relevant Declaration there is a presumption that the investor is Irish Resident or Irish Ordinary Resident or is not an Exempted Irish Investor and a charge to tax arises. However, it is not necessary to obtain a Relevant Declaration from Shareholders if appropriate measures have been put in place by the Company to ensure Shareholders are neither Irish Resident nor Irish Ordinary Resident and the Company has received written notice of approval from the Irish Revenue Commissioners to the effect that the requirement to provide the necessary declaration of non-residence has been complied with in respect of the Shareholder and the approval has not been withdrawn.

A chargeable event does not include:

- an exchange by a Shareholder, effected by way of an arm's length bargain with the Company of Shares in the Company for other Shares in the Company;
- any transaction (which might otherwise be a chargeable event) in relation to Shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- a transfer by a Shareholder of the entitlement to a Share where the transfer is between spouses, civil partners, former spouses, and former civil partners subject to certain conditions; and
- an exchange of Shares arising on a qualifying amalgamation or reconstruction of the Company with another investment undertaking (within the meaning of Section 739H of the Taxes Act).

In addition, where Shares are held by the Irish Courts Service, the Company is not required to account for Irish tax on a chargeable event in respect of those Shares. Rather, where money under the control or subject to the order of any Court is applied to acquire Shares in the Company, the Courts Service assumes, in respect of the Shares acquired, the responsibilities of the Company to, inter alia, account for tax in respect of chargeable events and file returns.

If the Company becomes liable to account for tax if a chargeable event occurs, the Company shall be entitled to deduct from the payment arising on a chargeable event an amount equal to the appropriate tax and/or where applicable, to repurchase or cancel such number of Shares held by the Shareholder or such beneficial owner as are required to meet the amount of tax. The relevant Shareholder shall indemnify and keep the Company indemnified against loss arising to the Company by reason of the Company becoming liable to account for tax on the happening of a chargeable event.

Please see the "Shareholders" section below dealing with the tax consequences for the Company and the Shareholders of chargeable events in respect of:

- (i) Shareholders who are neither Irish Resident nor Irish Ordinary Resident;
- (ii) Shareholders who are either Irish Resident or Irish Ordinary Resident; and
- (iii) Exempt Irish Investors.

An additional regime applies to IREFs (i.e., Irish Real Estate Funds) which imposes a 20% withholding tax on 'IREF taxable events'. This primarily targets non-Irish resident investors. On the basis that neither the Company, nor any of its Funds, holds or intends to hold Irish property assets, these provisions should not be relevant and are not discussed further.

Shareholders

(i) Shareholders who are neither Irish Resident nor Irish Ordinary Resident

Shareholders who are neither Irish Resident nor Irish Ordinary Resident and who (directly or through an intermediary) have made the necessary declaration of non-residence in Ireland, where required, are not liable to Irish tax on the income or gains arising to them from their investment in the Company and no tax will be deducted on distributions from the Company or payments by the Company in respect of an encashment, repurchase, redemption, cancellation or other disposal of their investment. Such Shareholders are generally not liable to Irish tax in

respect of income or gains made from holding or disposing of Shares except where the Shares are attributable to an Irish branch or agency of such Shareholder.

Unless the Company is in possession of written notice of approval from the Irish Revenue Commissioners to the effect that the requirement to provide the necessary declaration of non-residence has been complied with in respect of the Shareholder and the approval has not been withdrawn, in the event that a Shareholder who is a Foreign Person (or an intermediary acting on its behalf) fails to make the necessary declaration of non-residence, tax will be deducted as described below on the happening of a chargeable event and notwithstanding that the Shareholder is not resident or ordinarily resident in Ireland any such tax deducted will generally not be refundable.

Where a non-Irish Resident company holds Shares in the Company which are attributable to an Irish branch or agency, it will be liable to Irish corporation tax in respect of income and capital distributions it receives from the Company under the self-assessment system.

(ii) Shareholders who are Irish Resident or Irish Ordinary Resident

Deduction of Tax

Unless a Shareholder is an Exempted Irish Investor, tax at the rate of 41% will be deducted and remitted to the Irish Revenue Commissioners by the Company from distributions made by the Company and any gains arising to a Shareholder on an encashment, repurchase, redemption, cancellation or transfer or other disposal of Shares by such Shareholder. Tax at a rate of 25% will be deducted and remitted to the Irish Revenue Commissioners by the Company from distributions made by the Company and any gains arising to Shareholders which are Companies on an encashment, repurchase, redemption, cancellation or transfer or other disposal of Shares by such Shareholder provided the Company is in possession of a relevant declaration from such Shareholder that it is a company and which includes the company's tax reference number.

Any gain will be computed as the difference between the value of the Shareholder's investment in the Company at the date of the chargeable event and the original cost of the investment as calculated under special rules.

Deemed disposal

A deemed disposal of Shares will occur on each and every eight anniversary of the acquisition of Shares in the Company held by Taxable Irish Persons. The Company may elect not to account for Irish tax in respect of deemed disposals in certain circumstances. Where more than 10% or more of the Net Asset Value of the Shares in the Company is held by Taxable Irish Persons, the Company will be liable to account for the tax arising on a deemed disposal in respect of Shares in that Fund. However, where less than 10% of the Net Asset Value of Shares in the Company is held by Taxable Irish Persons, the Company may, and it is expected that the Company will, elect not to apply a withholding tax to a deemed disposal of Shares in the Company and the Administrator will advise the Irish Revenue Commissioners of this election. Shareholders who are Taxable Irish Persons will therefore be required to account for the tax arising under the self-assessment system themselves. Shareholders should contact the Administrator to ascertain whether the Company made such an election in order to establish their responsibility to account to the Irish Revenue Commissioners for any relevant tax.

The deemed gain will be calculated as the difference between the value of the Shares held by the Shareholder on the relevant eighth year anniversary or, where the Company so elects, the value of the Shares on the later of the 30 June or 31 December prior to the date of the deemed

disposal and the relevant cost of those Shares. The excess arising will be taxable at the rate of 41% (or in the case of Irish resident corporate Shareholders where a relevant declaration has been made, at the rate of 25%). Tax paid on a deemed disposal should be creditable against the tax liability on an actual disposal of those Shares.

Residual Irish Tax Liability

Irish Resident corporate Shareholders which receive distributions from which tax has been deducted will be treated as having received an annual payment chargeable to tax under Case IV of Schedule D of the Taxes Act from which tax at 25% (or 41% if no declaration has been made) has been deducted. Subject to the comments below concerning tax on a currency gain, in general, such Shareholders will not be subject to further Irish tax on any other payments received in respect of their shareholding from which tax has been deducted. An Irish Resident corporate Shareholder whose Shares are held in connection with a trade will be taxable on any Irish income or gains received from the Company as part of that trade with a set-off against corporation tax payable for any tax deducted from those payments by the Company. In practice, where tax at a rate higher than 25% has been deducted from payments to a corporate Shareholder resident in Ireland, a credit of the excess tax deducted over the higher corporation tax rate of 25% should be available.

Where a currency gain is made by a Shareholder on the disposal of his or her Shares, such Shareholder may be liable to capital gains tax in the year of assessment in which the Shares are disposed of.

Any Shareholder who is a Taxable Irish Person and who receives a distribution or a gain on an encashment, repurchase, redemption, cancellation, transfer or other disposal of Shares from which tax has not been deducted by the Company (for example, because the Shares are held in a recognised clearing system), may be liable to account for income tax or corporation tax on the amount of such distribution or gain under the self-assessment system and in particular, Part 41A of the Taxes Act.

(iii) Shareholders who are Exempted Irish Investors

The Company will not be required to deduct tax in respect of Exempted Irish Investors, provided the Company has in its possession the necessary declarations from those persons (or an intermediary acting on their behalf) and the Company is not in possession of any information which would reasonably suggest that the information contained in the declarations is not, or is no longer, materially correct.

In general, there is no provision for any refund of tax to Shareholders who are Exempted Irish Investors where tax has been deducted in the absence of the necessary declaration.

Investment Undertaking Reporting

Pursuant to Section 891C of the Taxes Act and the Return of Values (Investment Undertakings) Regulations 2013, there is an obligation on the Company to report information in relation to Shareholders and the value of their investments to the Irish Revenue Commissioners on an annual basis. The details to be reported include the name, address, date of birth (if on record) and the tax reference number of the Shareholder (being an Irish tax reference number or VAT registration number, or in the case of an individual, the individual's PPS number or, in the absence of a tax reference number, a marker indicating that this was not provided) and the investment number associated with and the value of the Shares held by the Shareholder. These

provisions do not require such details to be reported in respect of (i) Shareholders who are neither Irish Resident nor Irish Ordinary Resident (provided the Relevant Declarations have been made, (ii) Exempted Irish Investors, or (iii) Shareholders whose Shares are held in a recognised clearing system (as designated by order of the Irish Revenue Commissioners).

Stamp Duty

On the basis that the Company qualifies as an investment undertaking within the meaning of Section 739B of the Taxes Act, generally, no stamp duty is payable in Ireland on the issue, transfer, repurchase or redemption of Shares in the Company. However, where any subscription for or redemption of Shares is satisfied by an in-kind or in specie transfer of Irish securities or other Irish property, Irish stamp duty might arise on the transfer of such securities or property.

No Irish stamp duty will be payable by the Company on the conveyance or transfer of stock or marketable securities provided that the stock or marketable securities in question have not been issued by a company registered in Ireland and provided that the conveyance or transfer does not relate to any immovable property situated in Ireland or any right over or interest in such property or to any stock or marketable securities of a company (other than a company which is an investment undertaking within the meaning of Section 739B of the Taxes Act) which is registered in Ireland.

Capital Acquisitions Tax

The disposal of Shares by means of a gift or inheritance made by persons not domiciled or Ordinarily Resident in Ireland will not be subject to Irish gift or inheritance tax (Capital Acquisitions Tax), provided that the Company falls within the definition of an investment undertaking (within the meaning of Section 739B of the Taxes Act) and that:

- (i) at the date of the gift or inheritance, the beneficiary is neither domiciled nor Ordinary Resident in Ireland;
- (ii) at the date of the disposition, the Shareholder disposing of the Shares is neither domiciled nor Ordinarily Resident in Ireland; and
- (iii) the Shares are comprised in the gift or inheritance at the date of the gift or inheritance and at the "valuation date" (as defined for Irish Capital Acquisitions Tax Purposes).

The disposal of Shares by means of a gift or inheritance made by persons domiciled or ordinarily resident in Ireland or received by a beneficiary domiciled or ordinarily resident in Ireland may give rise to a charge to Capital Acquisitions Tax for the beneficiary of such a gift or inheritance with respect to those Shares.

Foreign Account Tax Compliance Act

The provisions of FATCA are designed to require certain U.S. persons' direct and indirect ownership of certain non-U.S. accounts and non-U.S. entities to be reported by foreign financial institutions ("**FFIs**") to foreign tax authorities who will then provide the information to the IRS.

The Company may be regarded as an FFI for FATCA purposes. FATCA may impose a withholding tax of up to 30% with respect to certain U.S. source income (including dividends and interest).

FATCA compliance is enforced under Irish tax legislation, including the Financial Accounts Reporting (United States of America) Regulations 2014, and reporting rules and practices.

In order to comply with its FATCA obligations, the Company may require Shareholders to provide the Company with information and documentation prescribed by applicable law and such additional documentation as reasonably requested by the Company. The Company may disclose the information, certificates or other documentation that it receives from (or concerning) its Shareholders to the Irish Revenue Commissioners as necessary to comply with the Irish tax legislation and reporting rules and practices relating to FATCA, related intergovernmental agreements or other applicable law or regulation.

If a Shareholder causes (directly or indirectly) the Company to suffer a withholding for or on account of FATCA ("FATCA Deduction") or other financial penalty, cost, expense or liability, the Company may compulsorily repurchase any Shares of such Shareholder and/or take any action required to ensure that such FATCA Deduction or other financial penalty, cost, expense or liability is economically borne by such shareholder. Each prospective investor should consult their own tax adviser regarding the requirements under FATCA with respect to their particular circumstances.

Although the Company will use commercially reasonable efforts to comply with any requirements that are necessary to avoid the imposition of withholding taxes on payments to the Company pursuant to FATCA, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a withholding tax as a result of FATCA, the return of all investors may be materially affected.

Common Reporting Standard

The Common Reporting Standard ("CRS") is an agreement to automatically exchange information based on Article 6 of the Convention on Mutual Administrative Assistance in Tax Matters. This agreement came in to force on 1 January 2016. The Republic of Ireland is a party to this agreement. The Company is required to provide details of non-Irish resident investors holding assets in the Republic of Ireland to the Irish Revenue Commissioners on an annual basis. The Irish Revenue Commissioners are then required to report this information to the tax authority in the country in which the non-Irish investor resides.

Accordingly, in order to comply with its CRS obligations, the Company may require investors to provide the Company with information and documentation prescribed by applicable law and such additional documentation as reasonably requested by the Company. By subscribing for Shares in the Company, each Shareholder is agreeing to provide such information upon request from the Company or its delegate. Shareholders refusing to provide the requisite information to the Company may be reported to the Irish Revenue Commissioners or other parties as necessary to comply with the CRS.

The above description is based in part on regulations, guidance from the OECD and the CRS, all of which are subject to change. Each prospective investor should consult their own tax adviser regarding the requirements under the CRS with respect to their particular circumstances.

Although the Company will use commercially reasonable efforts to comply with any requirements that are necessary to avoid the imposition of any penalties on payments to the Company pursuant to the CRS, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to penalties as a result of the CRS, the return of all investors may be materially affected.

UK Taxation

General

The Directors have been advised that on the basis that the Company is resident in Ireland for taxation purposes the taxation position of the Company and the Shareholders is as set out below.

The following is a summary guide based on the law and practice currently in force in the UK. It applies to the Company and to investors who are resident in the UK for tax purposes and who hold Shares as an investment. As is the case with any investment, the tax position at the time an investment is made is unlikely to continue indefinitely.

Prospective investors should consult their professional advisers on the tax and other consequences of their subscribing for, purchasing, holding, selling, or redeeming Shares under the laws of their country of residence, domicile, citizenship, incorporation or establishment.

Taxation of the Company in the UK

The Board of Directors intend that the affairs of the Company should be managed and conducted so that it does not become resident in the UK for UK taxation purposes. Accordingly, and provided the Company is not trading in the UK through a fixed place of business or agent situated therein that constitutes a "permanent establishment" for UK taxation purposes and that all its trading transactions in the UK are carried out through a broker or investment manager acting as an agent of independent status in the ordinary course of its business, and that it does not receive any rental income in respect of UK real estate, the Company will not be subject to UK corporation or income tax on its profits. The Board of Directors and the Investment Manager each intend that the respective affairs of the Company and the Investment Manager are conducted so that these requirements are met insofar as this is within their respective control. However, it cannot be guaranteed that the necessary conditions will, at all times, be satisfied.

Certain interest and other income received by the Company which has a UK source may, however, be subject to withholding taxes in the UK. Certain disposals by the Company of UK real estate or interest in vehicles which derive at least 75% of their value from UK real estate may also be subject to corporation tax.

Taxation of Shareholders in the UK

Taxation of Dividends (where relevant)

Subject to their personal circumstances, Shareholders resident in the UK for taxation purposes will generally be liable to UK income tax or corporation tax in respect of dividends or other distributions of an income nature made to them in respect of a Share Class in the Company, whether or not such dividends or distributions are reinvested. Exempted UK Investors, such as registered pension schemes and charities, may be exempt from UK income tax on the income.

UK resident individuals are generally entitled to a dividend tax allowance of £2,000 per tax year with any excess income currently being taxed at 7.5%, 32.5% and 38.1% for basic rate, higher rate and additional rate taxpayers respectively. From April 2022, the rates of tax on dividend income will increase by 1.25 percentage points.

Investors who are within the charge to UK corporation tax in respect of Shares in the Company will generally be exempt from corporation tax on dividends and other income distributions, unless the bond fund rules (described below) or other anti-avoidance provisions apply. However,

such Shareholders are advised to consult their independent professional tax advisers to determine whether such dividends will be subject to UK corporation tax. If the dividends do not fall within any of the exempt classes, the dividends will be subject to tax currently at a rate of 19 per cent (but due to rise to 25 per cent. from 1 April 2023).

Capital Gains – Offshore Funds Tax Regime

Each Share Class is intended to meet the definition of an offshore fund for the purposes of UK taxation.

The reporting fund regime operates by reference to whether a fund opts in and obtains reporting fund status. If a fund does not opt in, it will be treated as a non-reporting offshore fund for the purposes of UK taxation. Under the regime, UK tax resident investors in Share Classes that have reporting fund status are subject to tax on the share of the reporting fund's income ("the reportable income") attributable to their holding in the fund, whether or not distributed, but any gains on disposal of their holding will be subject to tax as capital gains.

HM Revenue & Customs ("HMRC") can approve a fund (or class of shares in a fund) in advance as a reporting fund. Investors in non-reporting funds would not be subject to tax on income retained by the non-reporting fund but any gains on disposal of their holding would be subject to tax as offshore income gains.

Capital Gains – Reporting Fund Status

The Directors of the Company intend to manage the affairs of each relevant Share Class in such a way that the reporting fund regulations can apply to each Share Class where it is appropriate. Provided that HMRC approve that the reporting fund regulations apply to a Share Class throughout the Shareholder's period of ownership of Shares in that Share Class, any gains realised on the disposal of Shares will be subject to tax as capital gains and not income.

The amount of any gain or loss on any disposal will depend on the Shareholder's circumstances and subject to any available exemption or relief. For individual Shareholders, capital gains tax currently at the rate of tax at 10 per cent. (for basic rate taxpayers) or 20 per cent. (for higher or additional rate taxpayers) will be payable on any gain. Individuals may benefit from certain reliefs and allowances (including a personal annual exemption allowance, which exempts the first £12,300 for tax year 2022-23) depending on their circumstances. Any undistributed income that has been subject to tax as income under the reporting fund regulations is treated as capital expenditure for the purpose of computing the amount of any chargeable gain.

Shareholders who are bodies corporate resident in the United Kingdom for tax purposes or carry on a trade in the UK through a permanent establishment in connection with which the Shares are held or who hold Shares through a permanent establishment in the UK and dispose Shares may be taxed or relieved on any gain or loss arising from such disposal in accordance with the provisions of UK corporation tax, subject to any applicable exemption or relief. The applicable rate of corporation tax in respect of such disposals is currently 19 per cent., and expected to rise to 25 per cent. from 1 April 2023 for certain companies with profits over £250,000.

Capital Gains – Non-Reporting Fund Status

If reporting fund status is not obtained during the period (or part of the period) of ownership, any gain on a disposal of Shares would be taxed as an "offshore income gain" subject to UK tax for any relevant Shareholders as income (and not as a capital gain).

Capital Gains – Exempt UK Investors

Exempt UK Investors, such as registered pension schemes and charities, are exempt from income tax on dividend income and offshore income gains, and tax on capital gains, regardless of whether the relevant Share Class has been certified as a reporting fund by HMRC.

Taxation of investors in Bond Funds

An offshore fund is considered a bond fund for UK taxation purposes if at any time more than 60% of the assets of the fund by market value comprise "qualifying investments". "Qualifying investments" are: (a) money placed at interest (other than cash awaiting investment); (b) securities (other than shares in a company); (c) shares in a building society; (d) qualifying holdings in a unit trust scheme, an offshore fund or an open-ended investment company (this is interpreted as a holding in a unit trust, offshore fund or OEIC which itself fails, at that time or at any other time in the relevant accounting period, the non-qualifying investment test (as set out above) in respect of its holdings of investments); (e) alternative finance arrangements; (f) derivative contracts in respect of currency or any of the matters listed in (a) to (e) above; (g) contracts for differences relating to interest rates, creditworthiness or currency; and (h) derivative contracts not within (f) or (g) where there is a hedging relationship between the derivative contract and an asset within (a) to (d) above.

The relevant Shares will constitute material interests in an offshore fund and, on the basis of the investment policies of the Company, more than 60% of its assets could be invested in government and corporate debt securities or as cash on deposit or in certain derivative contracts or in other non-qualifying collective investment schemes and hence could fall to be treated as a bond fund for UK taxation purposes. The Directors do not anticipate that the 60% limit will be breached for Funds invested predominantly in equities or equity-related securities. However, the loan relationship regime is likely to apply to holders of bond and credit funds.

Other UK Tax Considerations

As it is intended that the Distributing Classes will distribute substantially all of their income each year, the UK anti-avoidance provisions which attribute income accruing to an offshore company to UK resident individuals are not expected to apply to holders of Shares in the Distributing Classes.

The attention of individuals resident in the UK is drawn to Chapter 2 of Part 13 of the UK Income Tax Act 2007 which may render those individuals liable to income tax in respect of the undistributed income of the Company.

The UK "controlled foreign company" ("CFC") provisions subject UK resident companies to tax on the profits of companies not so resident in which they have certain interests and which are controlled by UK persons, subject to certain "gateway" provisions and exemptions. UK corporate

Shareholders are advised to consult their own professional tax advisers as to the implications of the CFC provisions. Other UK Tax Considerations – Capital Gains

The attention of persons resident in the UK for taxation purposes is drawn to the provisions of Sections 3-3G of the Taxation of Chargeable Gains Act 1992 under which, in certain circumstances, a portion of chargeable gains made by a non-UK resident company can be attributed to certain UK resident participators. This applies if the non-UK resident company would be a close company were the company to be resident in the United Kingdom for taxation purposes. Stamp Duty and Stamp Duty Reserve Tax

Neither UK stamp duty nor stamp duty reserve tax will be payable on the issue of Shares. Agreements to transfer Shares will not be subject to stamp duty, provided the instrument of transfer is not executed in the UK and no matters or actions relating to the transfer are performed in the UK.

Provided that the Shares are not registered in any register kept in the UK by or on behalf of the Company and that the Shares are not paired with shares issued by a company incorporated in the UK, any agreement to transfer the Shares will not be subject to UK SDRT.

German Tax Considerations

Certain German tax considerations may apply to certain Funds, pursuant to the German Investment Tax Act (2018) and where such considerations do apply, this will be disclosed in the relevant Supplement.

Statutory and General Information

1. Incorporation, Registered Office and Share Capital

- (a) The Company was incorporated in Ireland on 23 October 2008 as an investment company with variable capital, limited liability and having segregated liability between its Funds under registration number 463628.
- (b) The registered office of the Company is presently at 7/8 Upper Mount Street, Dublin 2, D02 FT59, Ireland.
- (c) On incorporation the authorised share capital of the Company was GBP 1,000,000 divided into 1,000,000 Subscriber Shares of a par value of GBP 1 each and 500,000,000,000 shares of no par value initially designated as participating shares. The unclassified shares are available for issue as Shares.

These Subscriber Shares may be repurchased by the Company at any time. The repurchase price will be GBP 1 per Subscriber Share.

- (d) As of the date of this Prospectus, no capital of the Company is under option or is agreed, conditionally or unconditionally to be put under option.
- (e) Neither the Subscriber Shares nor the participating shares carry pre-emption rights.

2. Share Rights

(a) **Subscriber Shares**

The holders of the Subscriber Shares shall:

- (i) on a vote taken on a show of hands, be entitled to one vote per holder and, on a poll, be entitled to one vote per Subscriber Share;
- (ii) not be entitled to any dividends whatsoever in respect of their holding of Subscriber Shares; and
- (iii) in the event of a winding up or dissolution of the Company, have the entitlements referred to under "Distribution of Assets on a Liquidation" below.

(b) **Shares**

The holders of Shares shall:

- (i) on a vote taken on a show of hands, be entitled to one vote per holder and, on a poll, be entitled to one vote per whole Share;
- (ii) be entitled to such dividends as the Directors may from time to time declare; and
- (iii) in the event of a winding up or dissolution of the Company, have the entitlements referred to under "Distribution of Assets on a Liquidation" below.

3. Voting Rights

This is dealt with under the rights attaching to the Subscriber Shares and Shares respectively referred to at 2 above. Shareholders who are individuals may attend and vote at general meetings in person or by proxy. Shareholders who are corporations may attend and vote at general meetings by appointing a representative or by proxy.

At any general meeting on a show of hands every holder of Shares who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder present as aforesaid or by proxy shall have one vote for every Share held.

To be passed, ordinary resolutions of the Company in a general meeting will require a simple majority of the votes cast by the Shareholders voting in person or (being a corporation) present by a duly authorised representative or by proxy at the meeting at which the resolution is proposed.

A majority of not less than 75% of the Shareholders present in person or (being a corporation) present by a duly authorised representative or by proxy and (being entitled to vote) voting in general meetings is required in order to pass a special resolution including a resolution to (i) rescind, alter or amend an Article or make a new Article and (ii) wind up the Company.

4. Memorandum of Association

The Memorandum of Association of the Company provides that the Company's sole object is the collective investment in transferable securities and/or other liquid financial assets referred to in Regulation 68 of the Regulations of capital raised from the public operating on the principle of spreading investment risk in accordance with the Regulations. The object of the Company is set out in full in Clause 3 of the Memorandum of Association which is available for inspection at the registered office of the Company.

5. Articles of Association

Alteration of Share capital

The Company may from time to time by ordinary resolution increase its capital, consolidate and divide its Shares or any of them into Shares of a larger amount, sub-divide its Shares or any of them into Shares of a smaller amount, or cancel any Shares not taken or agreed to be taken by any person. The Company may also by special resolution from time to time reduce its share capital in any way permitted by law.

Issues of Shares

The Shares shall be at the disposal of the Directors and they may (subject to the provisions of the Act) allot, offer or otherwise deal with or dispose of them to such persons, at such times and on such terms as they may consider in the best interests of the Company.

Variation of rights

Whenever the share capital is divided into different Share Classes, the rights of any class may be varied or abrogated with the consent in writing of the holders of three quarters of the issued and outstanding Shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of that class of Shares and the necessary quorum shall be (other than an adjourned meeting) two persons holding Shares issued in that class (and at the adjourned meeting the necessary quorum shall be one person holding shares of that class or his proxy).

The special rights attaching to any Shares of any class shall not (unless the conditions of issue of such class of shares expressly provide otherwise) be deemed to be varied by the creation or issue of other Shares ranking equally therewith.

Transfers of Shares

- (a) All transfers of Shares shall be effected by an instrument in writing in a form approved by the Directors but need not be under seal or by such other means as the Administrator may prescribe from time to time where such means are in accordance with the requirements of the Central Bank. No transfer of Subscriber Shares can be effected without the prior written consent of the Company.
- (b) The instrument of transfer of a share must be signed by or on behalf of the transferor. The transferor shall be deemed to remain the holder of the share until the name of the transferee is entered in the Company's register of shareholders in respect of such Share.
- (c) The Directors may decline to register a transfer of Shares unless the instrument of transfer is deposited at the registered office of the Company together with such evidence as is required by the Directors to show the right of the transferor to make the transfer and satisfying the Directors as to their requirements to prevent money laundering as they may apply from time to time. The registration of transfers may be suspended for such times and at such periods as the Directors may determine provided always that such registration may not be suspended for more than thirty days in any one year.
- (d) The Directors may decline to register any transfer of a Share where:
 - (i) they are aware or reasonably believe that such transfer would result in the beneficial ownership of such Shares by a person who is not a Qualified Holder or expose the Company to adverse tax or regulatory consequences; or
 - (ii) to a person who is not already a Shareholder if, as a result of such transfer, the proposed transferee would not be the holder of a Minimum Holding.

Directors

- (a) Any Director who devotes special attention to the business of the Company may be paid such extra remuneration as the Directors may determine. (See section headed "Fees and Expenses" above in relation to the Director's Fees).
- (b) A Director may hold any other office or place of profit under the Company (other than the office of auditor) in conjunction with his office of Director, and may act in a professional capacity to the Company on such terms as the Directors may determine.

- (c) Subject to the provisions of the Act, and provided that he has disclosed to the Directors the nature and extent of any material interest of his, a Director notwithstanding his office:
- (i) may be a party to, or otherwise interested in, any transaction or arrangement with the Company or any subsidiary or associated company thereof;
 - (ii) may be a Director or other officer of, or employed by, or a party to any transaction or arrangement with, or otherwise interested in, any body corporate promoted by the Company or in which the Company thereof is otherwise interested; and
 - (iii) shall not be accountable, by reason of his office, to the Company for any benefit which he derives from any such office or employment or from any such transaction or arrangement or from any interest in any such body corporate and no such transaction or arrangement shall be liable to be avoided on the ground of any such interest or benefit.
- (d) A Director shall not generally be permitted to vote at a meeting of the Directors or a committee of Directors on any resolution concerning a matter in which he has, directly or indirectly, an interest which is material or a duty which conflicts or may conflict with the interests of the Company. A Director shall not be counted in the quorum present at a meeting in relation to any such resolution on which he is not entitled to vote. Notwithstanding the foregoing, a Director shall be entitled to vote (and be counted in the quorum) in respect of resolutions concerning certain matters in which he has an interest including (inter alia) any proposal concerning any other company in which he is interested, directly or indirectly provided, that he is not the holder of or beneficially interested in 10% or more of the issued shares of any class of such company or of the voting rights available to members of such company (or of a third company through which his interest is derived).
- (e) There is no provision in the Articles requiring a Director to retire by reason of any age limit and no share qualification for Directors.
- (f) The number of Directors shall not be less than two (2).
- (g) The quorum for meetings of Directors may be fixed by the Directors and unless so fixed shall be two (2).
- (h) The office of a Director shall be vacated in any of the following circumstances:
- (i) he ceases to be a Director by virtue of any provisions of the Act or becomes prohibited by law from being a Director;
 - (ii) without prejudice to paragraph (i) above, the Central Bank has issued a prohibition notice in respect of such a Director;
 - (iii) he becomes a bankrupt or makes any arrangement or composition with his creditors generally;
 - (iv) in the opinion of a majority of the Directors he becomes incapable by reason of mental disorder of discharging his duties as a Director;
 - (v) he resigns from his office by notice to the Company;

- (vi) he is convicted of an indictable offence and the Directors determine that as a result of such conviction he should cease to be a Director;
- (vii) by a resolution of a majority of his co-Directors, he is requested to vacate office;
- (viii) without prejudice to paragraph (vii) above, a majority of the Directors are satisfied on reasonable grounds that he no longer complies with any standards of fitness and probity in a code issued by the Central Bank from time to time;
- (ix) he shall for more than six (6) consecutive months have been absent without permission of the Directors from any meetings of the Directors held during that period and the Directors pass a resolution that he has by reason of such absence vacated office.

The Company may also, as a separate power, in accordance with and subject to the provisions of the Act, by ordinary resolution of the shareholders, remove any Director (including any managing director or other executive director) before the expiry of his period of office notwithstanding anything to the contrary contained in the Articles or in any agreement between the Company and any such Director.

Borrowing powers

The Directors may exercise all the powers of the Company to borrow or raise money (including the power to borrow for the purpose of repurchasing Shares) and to hypothecate, mortgage, charge or pledge its undertaking, property, assets or any part thereof. The Company may not borrow other than in accordance with the provisions of the Regulations.

Dividends

No dividends are payable on the Subscriber Shares.

Subject to the provisions of the Act, the Company may by ordinary resolution declare dividends on a class or Share Classes, but no dividends shall exceed the amount recommended by the Directors. If the Directors so resolve and in any event on the winding up of the Company or on the total redemption of Shares, any dividend which has remained unclaimed for six (6) years shall be forfeited and become the property of the relevant Fund.

Distribution of assets on a liquidation

- (a) If the Company shall be wound up the liquidator shall apply the assets of the Company in such manner as he thinks fit in satisfaction of creditors' claims.
- (b) The assets available for distribution among the members shall then be applied in the following priority:
 - (i) firstly, in the payment to the holders of the Shares of each class of each Fund of a sum in the currency in which that class is designated or in any other currency selected by the liquidator as nearly as possible equal (at a rate of exchange determined by the liquidator) to the Net Asset Value of the Shares of such class held by such holders respectively as at the date of commencement to wind up provided that there are sufficient assets available in the relevant Fund to enable such

payment to be made. In the event that, as regards any class of Shares there are insufficient assets available in the relevant Fund to enable such payment to be made recourse shall be had to the assets of the Company (if any) not comprised within any of the Funds and not (save as provided in the Act) to the assets comprised within any of the Funds;

- (ii) secondly, in the payment to the holders of each class of Shares of any balance remaining in the relevant Fund, such payment being made in proportion to the number of Shares held; and
 - (iii) thirdly, in the payment to the holders of the Shares of any balance then remaining and not comprised within any of the Funds, such payment being made in proportion to the value of each Fund and within each Fund to the value of each class and in proportion to the number of Shares held in each class.
- (c) If the Company shall be wound up (whether the liquidation is voluntary, under supervision or by the court) the liquidator may, with the authority of a special resolution and any other sanction required by the Act, divide among the members in specie the whole or any part of the assets of the Company, and whether or not the assets shall consist of property of a single kind, and may for such purposes set such value as he deems fair upon any one or more class or classes of property, and may determine how such division shall be carried out as between the members or different classes of members. The liquidator may, with the like authority, vest any part of the assets in trustees upon such trusts for the benefit of members as the liquidator, with the like authority, shall think fit, and the liquidation of the Company may be closed and the Company dissolved, but so that no member shall be compelled to accept any assets in respect of which there is liability and any member may instruct the liquidator to sell any assets, to which he is entitled, on his behalf.

Indemnities

The Directors (including alternates), Secretary and other officers of the Company and its former directors and officers shall be indemnified by the Company against losses and expenses which any such person may become liable to by reason of any contract entered into or any act or thing done by him as such officer in the discharge of his duties (other than in the case of fraud, wilful default, bad faith, recklessness, breach of contract or negligence). The Administrator, the Manager and the Depositary shall be entitled to such indemnity from the Company under such terms and subject to such conditions and exceptions and with such entitlement to have recourse to the assets of the Company with a view to meeting and discharging the costs thereof as shall be provided under the Administration Agreement, the Management Agreement and the Depositary Agreement respectively.

The assets of the Company's Funds and the calculation of the Net Asset Value of the Shares

- (a) The Net Asset Value of each Fund shall be the value of all the assets comprised in the Fund less all the liabilities attributable to the Fund and subject to the Regulations.
- (b) The assets of the Company and each of the Funds shall be deemed to include (i) subscription monies receivable for Shares allocated, all cash in hand, on deposit or on

call including any interest accrued thereon and all accounts receivable, (ii) all bills, demand notes, certificates of deposit and promissory notes, (iii) all bonds, forward currency transactions, time notes, shares, stock, convertibles, units of or participation in collective investment schemes/mutual funds, debentures, debenture stock, subscription rights, warrants, futures contracts, options contracts, swap contracts, contracts for differences, fixed rate securities, floating rate securities, securities in respect of which the return and/or repurchase amount is calculated by reference to any index, price or rate, financial instruments and other investments and securities owned or contracted for in respect of the Company, other than rights and securities issued by it; (iv) all stock and cash dividends and cash distributions to be received in respect of a Fund and not yet received by the Company but declared to stockholders on record on a date on or before the day as of which the Net Asset Value is being determined, (v) all interest accrued on any interest-bearing securities owned by the Company except to the extent that the same is included or reflected in, the principal value of such security, (vi) all other Investments of the Company, (vii) the establishment costs attributable to the Company and the cost of issuing and distributing Shares of the Company in so far as the same have not been written off and (viii) all other assets of the Company of every kind and nature including prepaid expenses as valued and defined from time to time by the Directors.

(c) The valuation principles to be used in valuing the Company's assets are as follows:

(i)

- A. the amortised cost method of valuation may only be used in relation to Funds which comply with the Central Bank's requirements for short-term money market funds and where a review of the amortised cost valuation vis-à-vis market valuation will be carried out in accordance with the Central Bank's guidelines; and
- B. money market instruments in a money-market or non-money market fund may be valued on an amortised basis in accordance with the Central Bank's requirements;

the value of an Investment which is quoted, listed or normally dealt in on a Regulated Market shall (save in the specific cases set out in the relevant paragraphs below) be the last traded price on such Regulated Market as at the Valuation Point or, in accordance with the terms of any relevant Supplement, either the closing mid-market price or the latest mid-market price as at the Valuation Point when no last traded price is available, provided that:

- C. if an Investment is quoted, listed or normally dealt in on more than one Regulated Market, the Directors may, in their absolute discretion, select any one of such markets for the foregoing purposes (provided that the Directors have determined that such market constitutes the main market for such Investment or provides the fairest criteria for valuing such securities) and once selected a market shall be used for future calculations of the Net Asset Value with respect to that Investment unless the Directors otherwise determine;
- D. in the case of any Investment which is quoted, listed or normally dealt in on Regulated Market but in respect of which for any reason,

prices on that market may not be available at any Relevant Time, or, in the opinion of the Directors, may not be representative, the value therefore shall be the probable realisation value thereof estimated with care and in good faith by a competent person, firm or association making a market in such Investment (approved for the purpose by the Depositary) and/or any other competent person, appointed by the Directors (and approved for the purpose by the Depositary); and

- E. in the case of any Investment which is quoted, listed or normally dealt in on a Regulated Market but which was acquired at a premium or at a discount outside or off the relevant market, the level of premium or discount at the date of valuation may be taken into account when valuing such Investment provided the Depositary ensures that the adoption of such procedure is justifiable in the context of establishing the probable realisation value thereof.
- (i) the value of any Investment which is not quoted, listed or normally dealt in on a Regulated Market shall be the probable realisable value estimated with care and in good faith by a competent person, firm or association making a market in such Investment (approved for the purpose by the Depositary) and/or any other competent person appointed by the Directors (and approved for the purpose by the Depositary);
 - (ii) the value of any Investment which is a unit of or participation in an open-ended collective investment scheme/mutual fund shall be the latest available Net Asset Value of such unit/participation as published by the collective investment scheme;
 - (iii) the value of any prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof unless in any case the Directors are of the opinion that the same is unlikely to be paid or received in full in which case the value thereof shall be arrived at after making such discount as the Directors (with the approval of the Depositary) may consider appropriate in such case to reflect the true value thereof;
 - (iv) cash in hand and cash deposits shall be valued at their nominal value plus accrued interest from the date on which the same were acquired or made;
 - (v) treasury bills shall be valued at the closing mid-market price on the market on which same are traded or admitted to trading as at the Valuation Point, provided that where such price is not available, same shall be valued at the probable realisation value estimated with care and good faith by a competent person (appointed by the Directors and approved for the purpose by the Depositary);
 - (vi) bonds, notes, debenture stocks, certificates of deposit, bank acceptances, trade bills and similar assets shall be valued at the latest available middle market dealing price on the market on which these assets are traded or admitted for trading (being the market which is the sole market or in the opinion of the Directors the principal market on which the assets in

question are quoted or dealt in) plus any interest accrued thereon from the date on which same were acquired. Notwithstanding the foregoing, bonds may be valued using bid prices obtained from pricing vendors approved for that purpose by the Directors, where set out in the relevant Fund supplement plus any interest accrued thereon from the date on which same were acquired;

- (vii) the value of any exchange traded futures contracts and options (including index futures) which are dealt in on a Regulated Market shall be the settlement price as determined by the market in question, provided that if such settlement price is not available for any reason or is unrepresentative, same shall be valued at the probable realisation value estimated with care and good faith by a competent person (appointed by the Directors and approved for the purpose by the Depositary);
- (viii) the value of any OTC FDI contracts shall be valued at least daily at a price obtained from the counterparty or by an alternative valuation provided by a competent person (which may be the Investment Manager) appointed by the Company and approved by the Depositary for such purpose, or by any other means provided the value is approved by the Depositary. If a derivative instrument is valued at a price obtained from the counterparty, such price shall be verified at least weekly by a party independent of the counterparty (which may be the Investment Manager) approved for such purpose by the Depositary. If a derivative instrument is valued in any other way, the Company will follow international best practice and adhere to the principles on valuation of OTC instruments established by bodies such as IOSCO and AIMA and such alternative valuation shall be reconciled on at least a monthly basis to a valuation provided by the counterparty and any significant difference shall be promptly investigated and explained.

Forward foreign exchange and interest rate swaps contracts for which market quotations are freely available will be valued by reference to market quotations (in which case there is no requirement to have such prices independently verified or reconciled to the counterparty valuation). If no such market quotations are available, interest rate swaps contracts will be valued in accordance with the previous paragraph;

- (ix) money market Investments of a Fund with a known residual maturity of less than three months and that have no specific sensitivity to market parameters, including credit risk may be valued using the amortised cost method of valuation in accordance with the requirements of the Central Bank. The Directors or their delegates shall review or cause a review to take place of deviations between the amortised method of valuation and the market value of Investments in accordance with the Central Bank's requirements;
- (x) notwithstanding any of the foregoing sub-paragraphs, the Directors with the approval of the Depositary may adjust the value of any Investment if, having regard to currency, applicable rate of interest, maturity, marketability and/or such other considerations as they may deem

relevant, they consider that such adjustment is required to reflect the fair value thereof;

- (xi) if in any case a particular value is not ascertainable as above provided or if the Directors shall consider that some other method of valuation better reflects the fair value of the relevant Investment then in such case the method of valuation of the relevant Investment shall be such as the Directors shall decide with the approval of the Depositary;
 - (xii) notwithstanding the foregoing, where at any time of any valuation any asset of the Company has been realised or contracted to be realised there shall be included in the assets of the Company in place of such asset the net amount receivable by the Company in respect thereof provided that if such amount is not then known exactly then its value shall be the net amount estimated by the Directors as receivable by the Company and provided that such adjustment method is approved by the Depositary; and
 - (xiii) the Directors, may, in order to comply with any applicable accounting standards, present the value of any assets of the Company in financial statements to Shareholders in a manner different to that set out in the Articles.
- (d) Any certificate as to Net Asset Value of Shares given in good faith (and in the absence of negligence or manifest error) by or on behalf of the Directors shall be binding on all parties.

6. Circumstances of a Winding Up

- (a) The Company shall be wound up in the following circumstances:
- (i) by the passing of a special resolution for a winding-up;
 - (ii) where the Company does not commence business within a year of being incorporated or where it suspends its business for a year;
 - (iii) where the number of members falls below the statutory minimum of 2;
 - (iv) where the Company is unable to pay its debts and a liquidator has been appointed;
 - (v) where the appropriate court in Ireland is of the opinion that the Company's affairs and the powers of the Directors have been exercised in a manner oppressive to members; or
 - (vi) the appropriate court in Ireland is of the opinion that it is just and equitable that the Company should be wound up.
- (b) The Depositary Agreement provides that where the Depositary has given to the Company notice of termination and no new Depositary shall have been appointed in accordance with the Articles within 120 days from the giving of such notice, the Depositary may require the Directors to convene a general meeting of the Company and propose at the meeting a resolution that the Company be wound up. The

Depository's appointment under the Depository Agreement shall not however terminate until revocation of the authorisation of the Company by the Central Bank.

7. Money Laundering

The Company has a responsibility for compliance with money laundering regulations and, for that reason, existing Shareholders, potential subscribers for and transferees of Shares may be asked for proof of identity, and/or to fulfil other requirements. Until satisfactory proof of identity is provided and/or those requirements are fulfilled, the Directors reserve the right to withhold issuance, redemption and approval of transfers of Shares.

In case of delay or failure to provide satisfactory proof of identity, the Company and the Administrator may take such action as they see fit including the right to redeem issued Shares compulsorily. In addition, the Company will not pay/settle the proceeds of any redemption in circumstances where the Shareholder has failed to provide satisfactory evidence of their identity.

8. Directors' Interests

Sylvie McLaughlin is an executive employee of the Manager, Hermes Fund Managers Ireland Limited. Joseph Kagan is an executive employee of the Manager's parent company, Hermes Fund Managers Limited. Gregory Dulski is an employee of Federated Hermes, Inc.

9. Commissions

Save as disclosed under the heading "Fees and Expenses" above, no commissions, discounts, brokerages or other special terms have been granted or are payable by the Company in connection with the issue or sale of any capital of the Company.

10. Material Contracts

The following contracts, not being contracts entered into in the ordinary course of business, have been entered into by the Company and are, or may be, material:

- (a) the Depository Agreement. The Depository Agreement dated 1 February 2019 between the Company, the Manager and the Depository under which the Depository has been appointed as Depository of the Company's assets subject to overall supervision of the Directors, as may be amended from time to time. This agreement provides that the appointment of the Depository will continue unless and until terminated by any party giving to the other party not less than 90 days' written notice although in certain circumstances the Agreement may be terminated immediately by the any party provided that the appointment of the Depository shall continue in force until a replacement Depository approved by the Central Bank has been appointed and provided further that if within a period of 90 days' from the date on which the Depository notifies the Company and/or the Manager of its desire to retire or from the date on which the Company and/or the Manager notifies the Depository of its intention to remove the Depository, no replacement Depository shall have been appointed, the Company or the Manager on behalf of the Company shall apply to the High Court for an order to wind up the Company or convene an extraordinary general meeting of the

Shareholders of the Company at which there shall be proposed an ordinary resolution to wind up the Company. This Agreement contains certain indemnities in favour of the Depositary (and each of its officers, employees and delegates) which are restricted to exclude matters arising by reason of the negligent or intentional failure of the Depositary in the performance of its duties.

- (b) the Administration Agreement. The Administration Agreement dated 1 February 2019 between the Company, the Manager and the Administrator as amended or updated from time to time pursuant to which the Administrator has been appointed as administrator to administer the affairs of the Company subject to the overall supervision of the Directors, as may be amended from time to time. This agreement provides that the appointment of the Administrator will continue unless and until terminated by the any party giving to the other party not less than 90 days' written notice although in certain circumstances the Agreement may be terminated immediately by either party to the other. This agreement contains certain indemnities in favour of the Administrator (and its officers and employees) which are restricted to exclude, inter alia, matters arising by reason of the negligence, wilful default or fraud of the Administrator or its permitted delegates in the performance of its obligations and duties.
- (c) the Management Agreement. The Management Agreement dated 1 February 2019 between the Company and the Manager pursuant to which the Manager has been appointed as manager to carry out the investment management, distribution and administration services in respect of the Company. This Agreement provides that the appointment of the Manager will continue unless and until terminated by the any party giving to the other party not less than 90 days' written notice although in certain circumstances the Agreement may be terminated immediately by either party to the other. The Management Agreement contains certain indemnities in favour of the Manager (and its officers and employees) which are restricted to exclude, inter alia, matters arising by reason of the negligence, wilful default or fraud of the Manager or its permitted delegates in the performance of its obligations and duties.
- (d) the Investment Management Agreements. The Investment Management Agreement dated 1 February 2019 between the Manager and HIML in respect of the Company. The Investment Management Agreement provide that the appointment of the Investment Manager will continue in force unless and until terminated by either party giving to the other not less than 3 months' written notice although in certain circumstances (e.g. the insolvency of either party, unremedied breach after notice, etc.) the Agreement may be terminated forthwith by notice in writing by either party to the other. The Investment Management Agreement contains indemnities in favour of the Investment Manager other than for matters arising by reason of its negligence, wilful default, fraud or bad faith. The Investment Management Agreement dated 9 July 2020 between the Manager and FIC in respect of certain Funds of the Company. The Investment Management Agreement provides that the appointment of FIC will continue in force unless and until terminated by either party giving to the other not less than 6 months' written notice although in certain circumstances (e.g. the insolvency of either party, unremedied breach after notice, etc.) the Agreement may be terminated forthwith by notice in writing by either party to the other. The Investment Management Agreement contains indemnities in favour of FIC other than for matters arising by reason of its negligence, wilful default, fraud or bad faith.

11. Inspection of Documents

Copies of the following documents will be available for inspection at any time during normal business hours on any day (excluding Saturdays, Sundays and public holidays) and may be obtained, on request, free of charge, from the registered office of the Company in Dublin:

- (a) this Prospectus and any Supplement or addendum thereto;
- (b) any KIID (UK Investors), KID (investors outside the UK);
- (c) the Memorandum and Articles of Association of the Company; and
- (d) the latest annual and half-yearly reports of the Company (when issued).

Appendix I

Stock Exchanges and Regulated Markets

With the exception of permitted investment in unlisted securities in accordance with the permitted limits as outlined further in the “Investment and Borrowing Restrictions” section at Appendix III below, investment will be restricted to those stock exchanges and markets listed below in this Prospectus or any Supplement thereto or revision thereof each of which stock exchanges and markets is regulated, operates regularly, is recognised and is open to the public. These stock exchanges and markets are listed in accordance with the requirements of the Central Bank, it being noted that the Central Bank does not issue a list of approved markets and exchanges.

1. Stock exchanges in any Member State of the European Union, Norway, Iceland or Liechtenstein, Australia, Canada, Guernsey, Japan, Hong Kong, New Zealand, Switzerland, United Kingdom or the United States.
2. The following stock exchanges:

| | |
|----------------------|--|
| in Argentina | Bolsa de Comercio de Buenos Aires Mercado Abierto Electronico S.A. |
| in Bangladesh | the Dhaka Stock Exchange |
| in Bermuda | the Bermuda Stock Exchange Ltd |
| in Brazil | the B3 |
| in Chile | the Santiago Stock Exchange the Bolsa Electronica de Chile |
| in China | the Shanghai Stock Exchange the Shenzhen Stock Exchange |
| in Colombia | the Bolsa de Valores de Columbia |
| in Egypt | Egyptian Exchange (EGX) |
| in Guernsey | the International Stock Exchange |
| in India | the National Stock Exchange of India the Mumbai Stock Exchange the Bombay Stock Exchange (BSE) the Calcutta Stock Exchange the Inter-connected Stock Exchange of India Ltd |
| in Indonesia | the Indonesian Stock Exchange |
| in Israel | the Tel Aviv Stock Exchange |
| in Jordan | the Amman Stock Exchange |
| In Kuwait | Boursa Kuwait |
| in Kenya | Nairobi Securities Exchange |
| in Malaysia | the Bursa Malaysia |
| in Mauritius | The Stock Exchange of Mauritius |

| in Uruguay | Bolsa de Valores de Montevideo |
| in Vietnam | Ho Chi Minh Stock Exchange (HSX or HOSE) Hanoi Stock Exchange (HNX) |

3. The following regulated markets:

- (a) the market organised by the International Capital Market Association;
- (b) the market conducted by "listed money market institutions" as described in the Bank of England publication "The Regulation of the Wholesale Cash and OTC Derivatives Markets (in Sterling, foreign currency and bullion)";
- (c) NASDAQ in the United States;
- (d) the market in US Government Securities conducted by primary dealers regulated by the Federal Reserve Bank of New York;
- (e) the OTC market in the United States regulated by the National Association of Securities Dealers Inc.;

- (f) the OTC market in the United States conducted by primary and secondary dealers regulated by the Securities and Exchanges Commission and by the National Association of Securities Dealers;
 - (g) EASDAQ (European Association of Securities Dealers Automated Quotation);
 - (h) NASDAQ Europe (the European Association of Securities Dealers Automated Quotation);
 - (i) the market conducted by "listed money market institutions" as described in the Bank of England publication on "The Regulation of the Wholesale Cash and OTC Derivatives Markets (in Sterling, foreign currency and bullion)";
 - (j) AIM – the Alternative Investment Market in the UK, regulated and operated by the London Stock Exchange;
 - (k) the OTC market in Japan regulated by the Securities Dealers Association of Japan;
 - (l) the French market for "Titres de Creance Negotiable" (OTC market in negotiable debt instruments);
 - (m) the OTC market in Canadian Government Bonds, regulated by the Investment Dealers Association of Canada;
 - (n) the Second Marche of the stock exchange set up in France in accordance with the laws of France;
 - (o) the Korea Exchange (Futures Market);
 - (p) the OTC market in Czech government securities traded on the Short-Term Bond Market known as the TKD System;
 - (q) the Chicago Mercantile Exchange (CME) and the Chicago Board of Trade (CBOT);
 - (r) Australia Stock Exchange (ASE);
 - (s) Hong Kong Futures Exchange (HFE); and
 - (t) Singapore Exchange Limited (SGX).
4. Any approved derivative market:
- (a) within the European Economic Area, Australia, Canada, Japan, Hong Kong, New Zealand, Switzerland, United Kingdom and the United States which is not listed in paragraph 3 on which FDIs are traded.

(b) the following markets:

| | |
|------------------------|--|
| in Brazil | the B3 |
| in Malaysia | the Malaysia Derivatives Berhad (BMD) |
| in Mexico | the Mexican Derivatives Exchange |
| in South Africa | the South African Futures Exchange (SAFEX) |
| in Turkey | the Turkish Derivatives Exchange |

The above markets are consistent with the Articles and are listed in accordance with the requirements of the Central Bank, it being noted the Central Bank does not issue a list of approved markets or stock exchanges.

Appendix II

FDIs/Efficient Portfolio Management

A. Investment in FDIs

The following provisions apply whenever a Fund proposes to engage in transactions in FDIs including, but not limited to, Futures, Forward Currency Exchange Contracts, Swaps, inflation Swaps (which may be used to manage inflation risk), Options, swaptions and Warrants, where the transactions are for the purposes of the efficient portfolio management of any Fund or for direct investment purposes (and such intention is disclosed in the Fund's investment policy). Where it does intend to engage in transactions in relation to FDIs, the Company will employ a risk management process to enable it to manage, monitor and measure, on a continuous basis, the risk of all open derivative positions and their contribution to the overall risk profile of a Fund's portfolio. The Company will, on request, provide supplemental information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investment.

The conditions and limits for the use of such techniques and instruments in relation to each Fund are as follows:

1. Where a Fund uses the commitment approach to calculate its global exposure, its global exposure relating to FDI must not exceed its total Net Asset Value and therefore leverage will be limited to 100% of the Net Asset Value of such Fund. The total gross exposure associated with investments of a Fund using the commitment approach, including investments of FDI, may amount to 200% of the Net Asset Value of a Fund. Where a Fund uses Value-at-Risk, details will be set out in its Supplement.
2. Position exposure to the underlying assets of FDI, including embedded FDI in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the regulatory investment limits. (This provision does not apply in the case of index based FDI provided the underlying index is one which meets with the criteria for financial indices.)
3. A Fund may invest in FDIs dealt in OTC provided that the counterparties to OTC transactions are institutions (with legal personality, typically located in OECD jurisdictions) subject to prudential supervision and belonging to categories approved by the Central Bank.
4. Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

B. Counterparty Policy

Counterparties with whom the Investment Manager, on behalf of a Fund, transacts will be one of the following:

- (i) a credit institution authorised in the European Economic Area (EEA) (European Union Member States, Norway, Iceland, Liechtenstein) and / or in the UK in the event that it ceases to be an EEA Member State;

- (ii) a credit institution authorised within a signatory state, other than a Member State of the EEA, to the Basle Capital Convergence Agreement of July 1988 (Switzerland, Canada, Japan, United States);
- (iii) a credit institution authorised in Jersey, Guernsey, the Isle of Man, Australia or New Zealand;
- (iv) an investment firm, authorised in accordance with the Markets in Financial Instruments Directive in an EEA Member State or in the UK in the event that it ceases to be an EEA Member State and subject to compliance with the requirements of the Central Bank);
or
- (v) is an entity subject to regulation as a Consolidated Supervised Entity ("CSE") by the US Securities and Exchange Commission.

In the case of a counterparty which is not a credit institution, the counterparty complies with the requirements of the Central Bank UCITS Regulations where a credit assessment has been undertaken. Where the counterparty is subject to a credit rating by any agency registered and supervised by ESMA, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A2 or below (or comparable rating) by such a credit rating agency, a new credit assessment in respect of the counterparty will be undertaken without delay.

In the case of subsequent novation of OTC derivative contracts, the counterparty must be one of the following:

1. the entities set out in paragraphs (i) to (iv) above; or
2. a central counterparty (CCP) authorised or recognised by ESMA under Regulation (EU) No. 648/2012 on OTC derivatives, central counterparties and trade repositories (EMIR) or, pending recognition by ESMA under Article 25 of EMIR, an entity classified as a derivatives clearing organisation by the Commodity Futures Trading Commission or a clearing agency by the SEC (both CCP).

C. Efficient Portfolio Management - Other Techniques and Instruments

Where disclosed in a Fund's Supplement, the Company may employ techniques and instruments relating to transferable securities and money market instruments for efficient portfolio management purposes subject to the conditions imposed by the Central Bank. Techniques and instruments which relate to transferable securities and money market instruments and which are used for the purpose of efficient portfolio management, including FDIs which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
 - i. reduction of risk;
 - ii. reduction of cost;
 - iii. generation of additional capital or income for the Fund with a level of risk which is consistent with the risk profile of the Fund and the regulatory risk diversification rules;
- (c) their risks are adequately captured by the risk management process of the Fund;
and

- (d) they cannot result in a change to the Fund's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

In addition to entering into FDI for efficient portfolio management purposes, the Company may also employ (without limit) techniques including repurchase/reverse repurchase agreements and securities lending for the purposes of efficient portfolio management only and subject to the Central Bank UCITS Regulations and the conditions set out below.

- (a) Repurchase/reverse repurchase agreements ("repo contracts") and stock lending arrangements may only be effected in accordance with normal market practice;
- (b) Without prejudice to the provisions below relating to the use of non-cash and cash collateral, a Fund may be permitted to undertake repo transactions pursuant to which additional leverage is generated through the re-investment of collateral. In this case, the repo transaction must be taken into consideration for the determination of global exposure as required by the Central Bank UCITS Regulations. Any global exposure generated must be added to the global exposure created through the use of derivatives and the total of these must not be greater than 100% of the Fund's Net Asset Value. Where collateral is re-invested in financial assets that provide a return in excess of the risk-free return the Fund must include, in the calculation of global exposure:
 - (i) the amount received if cash collateral is held; or
 - (ii) the market value of the instrument concerned if non-cash collateral is held.
- (c) The counterparty to a repo contract or stock lending arrangement must comply with the requirements of the Central Bank UCITS Regulations where a credit assessment has been undertaken. Where the counterparty is subject to a credit rating by any agency registered and supervised by ESMA, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A2 or below (or comparable rating) by such a credit rating agency, a new credit assessment in respect of the counterparty will be undertaken without delay;
- (d) Repo contracts, stock borrowing or stock lending agreements do not constitute borrowing or lending for the purposes of Regulation 103 and Regulation 111 respectively;
- (e) The Company must have the right to terminate the stock lending agreement at any time and demand the return of any or all of the securities loaned. The agreement must provide that, once such notice is given, the borrower is obligated to redeliver the securities within five business days or other period as normal market practice dictates; and
- (f) A Fund may enter into stock lending programmes organised by generally recognised International Central Securities Depositories Systems provided that the programme is subject to a guarantee from the system operator.

For the avoidance of doubt, the Company does not currently employ repurchase/reverse repurchase agreements and securities lending for the purposes of efficient portfolio management. Should it be decided in the future to do, the relevant Supplement will be updated as required.

D. Collateral Policy

1. All assets received by the Company on behalf of a Fund in the context of efficient portfolio management techniques should be considered as collateral. All assets received by the Company on behalf of a Fund in the context of efficient portfolio management techniques and/or OTC FDI transactions must comply with the criteria set out below.
 - (a) Liquidity: collateral received other than cash should be transferable securities or money market instruments (of any maturity) which are highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. Collateral received should also comply with the provisions of Regulation 74;
 - (b) Valuation: collateral received should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place. Collateral may be marked to market daily by the counterparty using its procedures, subject to any agreed haircuts, reflecting market values and liquidity risk and may be subject to variation margin requirements;
 - (c) Issuer credit quality: collateral received should be of high quality. In making such a determination (a) where the issuer is subject to a credit rating by an agency registered and supervised by ESMA that rating shall be taken into account in the credit assessment process; and (b) where an issuer is downgraded below the two highest short-term credit ratings by the credit rating agency referred to in (a) this shall result in a new credit assessment of the issuer being conducted without delay;
 - (d) Correlation: collateral received should be issued by an entity that is independent from the counterparty and is not expected to display a high correlation with the performance of the counterparty;
 - (e) Diversification (asset concentration): Subject to the below, collateral should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure to a given issuer of 20% of a Fund's Net Asset Value. When a Fund is exposed to different counterparties, the different baskets of collateral should be aggregated to calculate the 20% limit of exposure to a single issuer. A Fund may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by a Member State, one or more of its local authorities, a third country, or a public international body to which one or more Member States belong. Any such Fund shall receive securities from at least six different issues, but securities from any single issue should not account for more than 30 per cent of the Fund's net asset value. Where it is intended that a Fund may be fully collateralised in securities issued or guaranteed by a Member State, this shall be set out in the relevant Supplement. The Member States, local authorities, or public international bodies or guaranteeing securities which can be accepted as collateral for more than 20% of a Fund's Net Asset Value shall also be set out in the relevant Supplement; and
 - (f) Immediately available: collateral received should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

2. Collateral received on a title transfer basis should be held by the Depository. For other types of collateral arrangement, the collateral can be held by a third party Depository which is subject to prudential supervision and which is unrelated to the provider of the collateral.
3. Non-cash collateral cannot be sold, pledged or re-invested.
4. Cash collateral may not be invested other than in the following:
 - i. deposits with Relevant Institutions;
 - ii. high-quality government bonds;
 - iii. reverse repurchase agreements provided the transactions are with Relevant Institutions and the Company on behalf of a Fund is able to recall at any time the full amount of cash on an accrued basis;
 - iv. short-term money market funds as defined in the ESMA Guidelines on a Common Definition of European Money Market Funds (*ref CESR/10-049*); or
 - v. In accordance with paragraph (d) of Section C above, invested cash collateral should be diversified in accordance with the diversification requirement applicable to non-cash collateral. Invested cash collateral may not be placed on deposit with the counterparty or a related entity.

5. Permitted types of collateral

Where a Fund receives collateral as a result of trading in FDI on an OTC basis or as result of entry into repurchase agreements or stock lending the Company intends, subject to the criteria set out at D.1.(a-f), above, to accept collateral in the following form:

- (a) cash; or
- (b) government bonds with fixed interest rate payments with a minimum rating of Aaa/AAA by Moody's, Fitch and Standard & Poor's and a maximum maturity, or remaining maturity, of ten years.

6. Level of collateral required

The value of any collateral received by the Company, adjusted in light of the haircut policy, must be marked to market daily and must equal or exceed, in value, at all times, the value of the amount invested or securities loaned.

7. Haircut Policy

Non-cash collateral received by a Fund will be subject to a haircut of between 95% to 99% of the value of such collateral.

8. Stress Testing Policy

A Fund receiving collateral for at least 30% of its Net Asset Value should have an appropriate stress testing policy in place to ensure regular stress tests are carried out under normal and exceptional liquidity conditions to enable the Company, on behalf of the Fund, to assess the liquidity risk attached to the collateral. The liquidity stress testing policy should at least prescribe the following:

- i. design of stress test scenario analysis including calibration, certification and sensitivity analysis;

- ii. empirical approach to impact assessment, including back-testing of liquidity risk estimates;
- iii. reporting frequency and limit/loss tolerance threshold(s); and
- iv. mitigation actions to reduce loss, including haircut policy and gap risk protection.

9. Reinvested Cash Collateral Risks

Where a Fund reinvests cash collateral this will generate market exposure within the expectation of generating capital gain. Where the reinvestment does not achieve this aim, and, instead the reinvestment generates a loss, the Fund will bear this loss and will be obliged to return to the counterparty the full value of the cash collateral originally invested (rather than the then current value market value of the cash collateral post reinvestment).

10. Fees and Expenses

There is no current intention for the Investment Manager, on behalf of a Fund, to enter into repurchase agreements or reverse repurchase agreements or to engage in securities lending transactions. To the extent the Investment Manager takes advantage from the use of efficient portfolio management techniques in respect of a Fund, the Fund will bear the associated direct and indirect costs (which should not include hidden costs) and will not participate in revenue sharing arrangements. The Investment Manager shall ensure that all revenues arising from efficient portfolio management techniques and instruments, net of direct or indirect costs, are returned to the relevant Fund. To the extent the Company on behalf of a Fund, engages in efficient portfolio management techniques, the Company will disclose information on the costs and fees, as well as the identity of the entity or entities, to which such costs and fees are paid, indicating whether or not these are related parties to the Depositary in the annual report of the Company, to the extent required by the Regulations.

Appendix III

Investment and Borrowing Restrictions

Investment of the assets of the relevant Fund must comply with the Regulations. The Regulations provide:

| | |
|------------|---|
| 1 | Permitted Investments |
| | Investments of each Fund are confined to: |
| 1.1 | Transferable securities and money market instruments, as prescribed in the Central Bank UCITS Regulations, which are either admitted to official listing on a stock exchange in a Member State or non-Member State or which are dealt on a market which is regulated, operates regularly, is recognised and open to the public in a Member State or non-Member State. |
| 1.2 | Recently issued transferable securities which will be admitted to official listing on a stock exchange or other market (as described above) within a year. |
| 1.3 | Money market instruments, as defined in the Regulations, other than those dealt on a regulated market. |
| 1.4 | Units of UCITS. |
| 1.5 | Units of AIFs. |
| 1.6 | Deposits with credit institutions as prescribed in the Central Bank UCITS Regulations, from time to time. |
| 1.7 | FDIs as prescribed in the Central Bank UCITS Regulations. |
| 2 | Investment Restrictions |
| 2.1 | Each Fund may invest no more than 10% of its Net Asset Value in transferable securities and money market instruments other than those referred to in paragraph 1 as accords with the requirements of the Central Bank. |
| 2.2 | Each Fund may invest no more than 10% of its Net Asset Value in recently issued transferable securities which will be admitted to official listing on a stock exchange or other market (as described in paragraph 1.1) within a year. This restriction will not apply in relation to investment by a Fund in certain US securities known as Rule 144A securities which satisfy the requirements of paragraph 1.1 provided that: (i) the securities are issued with an undertaking to register with the US Securities and Exchanges Commission within one year of issue; and (ii) the securities are not illiquid securities, i.e., they may be realised by the UCITS within seven days at the price, or approximately at the price, at which they are valued by the Fund. |
| 2.3 | Each Fund may invest no more than 10% of its Net Asset Value in transferable securities or money market instruments issued by the same body provided that the total value of transferable securities and money market instruments held in the issuing bodies in each of which it invests more than 5% is less than 40%. |
| 2.4 | The limit of 10% (in 2.3) is raised to 25% in the case of bonds that are issued by a credit institution which has its registered office in a Member State and is subject by law to special public supervision designed to protect bond-holders. If a Fund invests more than 5% of its Net Asset Value in these bonds issued by one issuer, the total value of these investments may not exceed 80% of the Net Asset Value of the Fund. To avail of this provision the prior approval of the Central Bank is required. |

| | |
|-------------|--|
| 2.5 | The limit of 10% (in 2.3) is raised to 35% if the transferable securities or money market instruments are issued or guaranteed by a Member State or its local authorities or by a non-Member State or public international body of which one or more Member States are members. |
| 2.6 | The transferable securities and money market instruments referred to in 2.4 and 2.5 shall not be taken into account for the purpose of applying the limit of 40% referred to in 2.3. |
| 2.7 | Cash booked in accounts and held as ancillary liquidity shall not exceed 20% of the net assets of a Fund |
| 2.8 | <p>The risk exposure of a Fund to a counterparty to an OTC derivative and/or to efficient portfolio management techniques may not exceed 5% of its Net Asset Value.</p> <p>This limit is raised to 10% in the case of credit institutions authorised in the EEA, credit institutions authorised within a signatory state (other than an EEA Member State) to the Basle Capital Convergence Agreement of July 1988 or credit institutions authorised in Jersey, Guernsey, the Isle of Man, Australia or New Zealand.</p> |
| 2.9 | <p>Notwithstanding paragraphs 2.3, 2.7 and 2.8 above, a combination of two or more of the following issued by, or made or undertaken with, the same body may not exceed 20% of its Net Asset Value:</p> <ul style="list-style-type: none"> – investments in transferable securities or money market instruments; – deposits; and/or – counterparty risk exposures arising from OTC derivatives transactions. |
| 2.10 | The limits referred to in 2.3, 2.4, 2.5, 2.7, 2.8 and 2.9 above may not be combined, so that exposure to a single body shall not exceed 35% of its Net Asset Value. |
| 2.11 | Group companies are regarded as a single issuer for the purposes of 2.3, 2.4, 2.5, 2.7, 2.8 and 2.9. However, a limit of 20% of its Net Asset Value may be applied to investment in transferable securities and money market instruments within the same group. |
| 2.12 | <p>Each Fund may invest up to 100% of its Net Asset Value in different transferable securities and money market instruments issued or guaranteed by any Member State, its local authorities, non-Member States or public international body of which one or more Member States are members.</p> <p>The individual issuers must be listed in the prospectus and may be drawn from the following list:</p> <p>OECD Governments (provided the relevant issues are investment grade), Government of the People’s Republic of China, Government of Brazil (provided the relevant issues are investment grade), Government of India (provided the relevant issues are investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter-American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC, Export-Import Bank.</p> <p>Each Fund must hold securities from at least 6 different issues, with securities from any one issue not exceeding 30% of its Net Asset Value.</p> |

| | |
|------------|--|
| 3 | Investment in Collective Investment Schemes ("CIS") |
| 3.1 | Investments made by a Fund in units of a UCITS or other CIS may not exceed, in aggregate, 10% of the assets of the Fund. |
| 3.2 | <p>Notwithstanding the provisions of paragraph 3.1, where the investment policy of a Fund states that it may invest more than 10% of its assets in other UCITS or collective investment undertakings, the following restrictions shall apply instead of the restrictions set out at section 3.1 above:</p> <p>(i) Each Fund may not invest more than 20% of its Net Asset Value in any one CIS.</p> <p>(ii) Investments in AIFs may not, in aggregate, exceed 30% of the Funds' Net Asset Value.</p> |
| 3.3 | The CIS in which a Fund invests may not itself invest more than 10% of its Net Asset Value in other open-ended CIS. |
| 3.4 | When a Fund invests in the units of other CIS that are managed, directly or by delegation, by the Investment Manager or by any other company with which the Investment Manager is linked by common management or control, or by a substantial direct or indirect holding, the Investment Manager or other company may not charge subscription, conversion or redemption fees on account of the Fund's investment in the units of such other CIS. |
| 3.5 | Where a commission (including a rebated commission) is received by the Investment Manager or an investment adviser by virtue of an investment in the units of another CIS, this commission must be paid into the property of the Fund. |
| 4 | Index Tracking UCITS |
| 4.1 | A Fund may invest up to 20% of its Net Asset Value in shares and/or debt securities issued by the same body where the investment policy of the Fund is to replicate an index which satisfies the regulatory criteria recognised by the Central Bank. |
| 4.2 | The limit in 4.1 may be raised to 35%, and applied to a single issuer, where this is justified by exceptional market conditions. |
| 5 | General Provisions |
| 5.1 | The Company may not acquire any shares carrying voting rights which would enable it to exercise significant influence over the management of an issuing body. |
| 5.2 | <p>A Fund may acquire no more than:</p> <p>(i) 10% of the non-voting shares of any single issuing body;</p> <p>(ii) 10% of the debt securities of any single issuing body;</p> <p>(iii) 25% of the units of any single CIS;</p> <p>(iv) 10% of the money market instruments of any single issuing body.</p> <p>NOTE: The limits laid down in (ii), (iii) and (iv) above may be disregarded at the time of acquisition if at that time the gross amount of the debt securities or of the money market instruments, or the net amount of the securities in issue cannot be calculated.</p> |

5.1 and 5.2 shall not be applicable to:

- (i) transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities;
- (ii) transferable securities and money market instruments issued or guaranteed by a non-Member State;
- (iii) transferable securities and money market instruments issued by public international bodies of which one or more Member States are members;
- (iv) shares held by a Fund in the capital of a company incorporated in a non-member State which invests its assets mainly in the securities of issuing bodies having their registered offices in that State, where under the legislation of that State such a holding represents the only way in which the Fund can invest in the securities of issuing bodies of that State. This waiver is applicable only if in its investment policies the company from the non-Member State complies with the limits laid down in 2.3 to 2.11, 3.1, 3.2, 5.1, 5.2, 5.4, 5.5 and 5.6, and provided that where these limits are exceeded, paragraphs 5.5 and 5.6 below are observed.
- (v) Shares held by the Company in the capital of subsidiary companies carrying on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the repurchase of Shares at Shareholders' request exclusively on their behalf.

5.4 A Fund need not comply with the investment restrictions herein when exercising subscription rights attaching to transferable securities or money market instruments which form part of their assets.

5.5 The Central Bank may allow recently authorised Funds to derogate from the provisions of 2.3 to 2.12, 3.1, 3.2, 4.1 and 4.2 for six months following the date of their authorisation, provided they observe the principle of risk spreading.

5.6 If the limits laid down herein are exceeded for reasons beyond the control of a Fund, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of its Shareholders.

The Company may not carry out uncovered sales of:

- (i) transferable securities;
- (ii) money market instruments*;
- (iii) units of CIS; or
- (iv) FDIs.

5.8 A Fund may hold ancillary liquid assets.

6 Financial Derivative Instruments ('FDIs')

6.1 The Company global exposure relating to FDI must not exceed its total Net Asset Value.

6.2 Position exposure to the underlying assets of FDI, including embedded FDI in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the Central Bank UCITS Regulations. (This provision does not apply in the case of index based FDI provided the underlying index is one which meets with the criteria set out in Central Bank UCITS Regulations.)

6.3 A Fund may invest in FDIs dealt in over-the-counter (OTC) provided that the counterparties to over-the-counter transactions (OTCs) are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.

6.4 Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

*Any short selling of money market instruments by the Company is prohibited.

Borrowing Restrictions

The Regulations provide that the Company in respect of each Fund:

- (a) may not borrow, other than borrowings which in the aggregate do not exceed 10% of the Net Asset Value of the Fund and provided that this borrowing is on a temporary basis. Borrowing may be secured on the assets of the Fund. Credit balances (e.g., cash) may not be offset against borrowings when determining the percentage of borrowings outstanding; and
- (b) may acquire foreign currency by means of a back-to-back loan. Foreign currency obtained in this manner is not classed as borrowings for the purpose of the borrowing restriction in paragraph (a), provided that the offsetting deposit: (i) is denominated in the base currency of the Fund and (ii) equals or exceeds the value of the foreign currency loan outstanding. However, where foreign currency borrowings exceed the value of the back-to-back deposit, any excess is regarded as borrowing for the purposes of paragraph (a) above.

Appendix IV

Selling Restrictions

Argentina

This prospectus has not been registered with the Comisión Nacional de Valores ("CNV").

This Prospectus, and the information contained herein does not constitute and is not intended to constitute an offer of Shares and accordingly should not be construed as such. This document and the information contained herein has been made available in accordance with the restrictions and/or limitations implemented by any applicable laws and regulations.

This document is directed at and intended for institutional investors (as such term is defined in each jurisdiction in which the product is marketed). Each subscriber or purchaser of Shares should inform themselves of and observe all applicable laws, rules and regulations of any relevant jurisdictions and obtain professional advice as to whether he/she/it is qualified to subscribe to or purchase the Shares

Australia

This Prospectus is not a prospectus or product disclosure statement under the Corporations Act 2001 (Cth) (Corporations Act) and does not constitute a recommendation to acquire, an invitation to apply for, an offer to apply for or buy, an offer to arrange the issue or sale of, or an offer for issue or sale of, any securities in Australia except as set out below. The Company has not authorised nor taken any action to prepare or lodge with the Australian Securities & Investments Commission an Australian law compliant prospectus or product disclosure statement. Accordingly, this Prospectus may not be issued or distributed in Australia and the Shares may not be offered, issued, sold or distributed in Australia by the Manager, Investment Manager, or any other person, under this Prospectus other than by way of or pursuant to an offer or invitation that does not need disclosure to investors under Part 6D.2 or Part 7.9 of the Corporations Act or otherwise. This Prospectus does not constitute or involve a recommendation to acquire, an offer or invitation for issue or sale, an offer or invitation to arrange the issue or sale, or an issue or sale, of shares to a 'retail client' (as defined in section 761G of the Corporations Act and applicable regulations) in Australia.

Brunei

This prospectus relates to a private collective investment scheme under the Securities Markets Order, 2013 and the regulations thereunder ("Order"). This Prospectus is intended for distribution only to specific classes of investors who are an accredited investor, an expert investor or an institutional investor as defined in the Order at their request so that they may consider an investment and subscription in the Shares and must not, therefore, be delivered to, or relied on by, a retail client. The Authority is not responsible for reviewing or verifying any prospectus or other documents in connection with this collective investment scheme. The Authority has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in this Prospectus and has no responsibility for it. The Shares to which this Prospectus relates may be illiquid or subject to restrictions on their resale.

Prospective purchasers of the Shares offered should conduct their own due diligence on the Shares.

Canada

The Shares may not be offered and sold, and this Prospectus may not be delivered, in Canada or to a resident of Canada unless the investor qualifies as a "permitted client", as such term is defined in National Instrument 31-103 - Registration Requirements, Exemptions and Ongoing Registrant Obligations and the offering, purchase and sale of the Shares is otherwise conducted in accordance with the requirements of applicable securities legislation of the investor's province or territory of residence.

Chile

This Prospectus has not been and will not be registered with the Superintendencia de Valores y Seguros.

The issuing of shares is subject to the regulations contained in General Rule No. 336 of 27 June, 2012 (Norma de Carácter General 336 de fecha 27 de junio de 2012) issued by the Financial Markets Commission (Comisión para el Mercado Financiero). The offering relates to Shares not registered in the Securities Registry (Registro de Valores) or the Foreign Securities Registry (Registro de Valores Extranjeros) maintained by the Financial Markets Commission and therefore are not subject to its surveillance.

The Shares cannot be publicly-offered while unregistered in the appropriate Securities Registry.

People's Republic of China

This Prospectus does not constitute a public offer of the Shares, whether by sale or subscription, in the People's Republic of China (excluding Hong Kong, Macau and the Republic of China, the "PRC"). The Shares are not being offered or sold directly or indirectly in the PRC to or for the benefit of, legal or natural persons of the PRC. Further, no legal or natural persons of the PRC may directly or indirectly purchase any of the Shares or any beneficial interest therein without obtaining all prior PRC's governmental approvals that are required, whether statutorily or otherwise. Persons who come into possession of this Prospectus are required by the issuer and its representatives to observe these restrictions.

Colombia (SFC)

This Prospectus, and the information contained herein does not constitute and is not intended to constitute an offer of Shares and accordingly should not be construed as such. This document and the information contained herein has been made available in accordance with the restrictions and/or limitations implemented by any applicable laws and regulations.

This document is directed at and intended for institutional investors (as such term is defined in each jurisdiction in which the product is marketed). Each subscriber or purchaser of Shares should inform themselves of and observe all applicable laws, rules and regulations of any relevant jurisdictions and obtain professional advice as to whether he/she/it is qualified to subscribe to or purchase the Shares.

Hong Kong

Shares in any Fund may not be offered or sold in Hong Kong by means of this Prospectus or any other document other than to "professional investors" as defined in Part I of Schedule 1 to within the meaning of the Securities and Futures Ordinance (Cap. 571) of Hong Kong or the Securities and Futures (Professional Investor) Rules (Cap. 571D) of the laws of Hong Kong and any rules made thereunder or in other circumstances which do not result in the document being a "Prospectus" as defined in the Companies Ordinance (Cap. 32) of Hong Kong (the "CO") or which do not constitute an offer to the public within the meaning of the CO.

No action has been taken, in Hong Kong or elsewhere, to permit the distribution of this document to the public of Hong Kong or in a manner in which this document may be accessed or read by the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong). No Shares in the Company will be issued to any person other than the person to whom this document has been sent. No person in Hong Kong other than the person to whom the copy of this document has been addressed may treat the same as constituting an invitation to him to invest. This document may not be reproduced in any form or transmitted to any person other than the person to whom it is addressed.

The contents of this Prospectus have not been reviewed by any regulatory authority in Hong Kong. You are advised to exercise caution in relation to the offer. If you are in any doubt about any of the contents of this Prospectus you should obtain independent professional advice.

India

The Shares are not being offered to the Indian public for sale or subscription. The Shares are not registered and/or approved by the Securities and Exchange Board of India, the Reserve Bank of India or any other governmental/ regulatory authority in India. This Prospectus is not and should not be deemed to be a 'prospectus' as defined under the provisions of the Companies Act, 2013 (18 of 2013) and the same shall not be filed with any regulatory authority in India. The Company does not guarantee or promises to return any portion of the money invested towards the Shares by an investor and an investment in the Shares is subject to applicable risks associated with an investment in the Shares and shall not constitute a deposit within the meaning of the Banning of Unregulated Deposits Schemes Act, 2019. Pursuant to the Foreign Exchange Management Act, 1999 and the regulations issued there under, any investor resident in India may be required to obtain prior special permission of the Reserve Bank of India before making investments outside of India, including any investment in the Company. The Company has neither obtained any approval from the Reserve Bank of India or any other regulatory authority in India nor does it intend to do so and hence any eligible investor who is resident of India will be entirely responsible for determining its eligibility to invest in the Shares.

Indonesia

This Prospectus does not constitute a public offer under the laws and regulations of Indonesia and the Shares may not be sold to the public in Indonesia.

Malaysia

No action has been, or will be, taken to comply with Malaysian laws for making available, offering for subscription or purchase, or issuing any invitation to subscribe for or purchase or sale of the Shares in Malaysia or to persons in Malaysia as the Shares are not intended by the Company to

be made available, or made the subject of any offer or invitation to subscribe or purchase, in Malaysia. Neither this Prospectus nor any document or other material in connection with the Shares should be distributed, caused to be distributed or circulated in Malaysia. No person should make available or make any invitation or offer or invitation to sell or purchase the Shares in Malaysia unless such person takes the necessary action to comply with Malaysian laws.

New Zealand

This Prospectus is not a product disclosure statement for the purposes of the Financial Markets Conduct Act 2013 (the FMCA) and does not contain all the information typically included in such offering documentation. The offer of Shares does not constitute "regulated offer" for the purposes of the FMCA and, accordingly, there is neither a product disclosure statement nor a register entry available in respect of the offer. Shares may not be offered in breach of the FMCA other than to persons who are:

1. "wholesale investors" within the meaning of clause 3(2) of schedule 1 of the FMCA, being persons who fall within one or more of the following categories of "wholesale investor":
 - (i) A person that is an "investment business" within the meaning of clause 37 of schedule 1 of the FMCA;
 - (ii) A person that meets the investment activity criteria specified in clause 38 of schedule 1 of the FMCA;
 - (iii) A person that is "large" within the meaning of clause 39 of schedule 1 of the FMCA; or
 - (iv) A person that is a "government agency" within the meaning of clause 40 of schedule 1 of the FMCA; or
2. in other circumstances where there is no contravention of the FMCA.

Peru

This prospectus has not been and will not be registered with the Peruvian Superintendency of Capital Markets (Superintendencia del Mercado de Valores, or the "SMV"). Shares are not permitted to be sold, offered or issued in Peru except, among others, if such offering is considered a private offer under the securities laws and regulations of Peru.

The shares cannot be offered or sold in Peru or in any other jurisdiction except in compliance with the securities laws thereof. In making an investment decision, institutional investors (as defined by Peruvian law) must rely on their own examination of the terms of the offering of the shares to determine their ability to invest in the shares.

Philippines

This Prospectus has not been registered with the Philippine Securities and Exchange Commission under the Philippine Securities Regulation Code ("SRC"). Any offer or sale of the Shares is subject to registration requirements under the SRC unless such offer or sale qualifies as an exempt transaction.

The Shares are being sold to the investor on the understanding that it is a "Qualified Buyer" as defined under 10.1(1) of the Code, and consequently this transaction is exempt from registration requirements.

By purchase of a Share, the investor will be deemed to acknowledge that the issue of, offer for subscription or purchase of, or invitation to subscribe for or purchase, such Shares was made outside the Philippines.

Taiwan

This Prospectus has not been and will not be registered with the Securities and Futures Bureau or Financial Supervisory Commission of Taiwan. Shares are not permitted to be sold, offered or issued in Taiwan except:

- (i) outside Taiwan for purchase by such investors outside Taiwan or
- (ii) by the offshore banking units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan banks, the offshore securities units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan securities firms or the offshore insurance units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan insurance companies purchasing the Shares either for their proprietary account or for the accounts of their non-Taiwan clients; and/or
- (iii) where applicable, through properly financial institutions expressly permitted to make shares available to their customers under applicable Taiwanese laws and regulations.

Each subscriber or purchaser of Shares must seek professional advice as to whether he/she/it is qualified to subscribe to or purchase Shares and represents and warrants that he/she/it is duly qualified to subscribe to or purchase the Shares under applicable Taiwan laws and regulations. Purchasers/ subscribers may be restricted or prohibited from re-selling the Shares.

Thailand

The Prospectus has not been approved by the Securities and Exchange Commission of Thailand which takes no responsibility for its contents. No offer to the public to purchase the Shares will be made in Thailand and this Prospectus is intended to be read by the addressee only and must not be passed to, issued to, or shown to the public generally.

United Arab Emirates (excluding Dubai International Financial Centre and Abu Dhabi Global Market)

This Prospectus, and the information contained herein, does not constitute, and is not intended to constitute, a public offer of Shares in the United Arab Emirates (the "UAE") and accordingly should not be construed as such. The Shares are only being offered to a limited number of sophisticated investors in the UAE who (a) are willing and able to conduct an independent investigation of the risks involved in an investment in such strategies, and (b) upon their specific request. The Shares have not been approved by or licensed or registered with the UAE Central Bank, the Emirates Securities and Commodities Authority ("ESCA") or any other relevant licensing authorities or governmental agencies in the UAE. The marketing of any fund requires the prior approval of the ESCA unless the provisions of the SCA Board of Directors' Chairman Decision No. 9/R.M. of 2016 concerning the regulations on mutual funds do not apply. The Prospectus is for the use of the named addressee only and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof).

UK

Prospective United Kingdom ("UK") resident investors must rely on their own examination of the legal, taxation, financial and other consequences of any investment in the Company including the risk involved. Prospective investors should not treat the contents of this Prospectus as advice relating to legal, taxation or other matters and, if in any doubt about the Company, its suitability, or what action should be taken, should consult a person authorised and regulated by the Financial Conduct Authority ("FCA") under the Financial Services and Markets Act 2000 ("FSMA") and qualified to advise on investments in collective investment schemes.

The Company is recognised under section 264 FSMA as a recognised collective investment scheme, and this Prospectus may be issued or distributed in the UK without restriction.

Prospective investors should note that most of the protections under FSMA do not apply to investments in the Company and that compensation under the Financial Services Compensation Scheme may not be available.

The Company is required under the rules to maintain at an address in the UK certain facilities in the interests of investors in the Funds in the UK. The Company has appointed Hermes Investment Management Limited to maintain the relevant facilities at its offices in the UK. Further details are set out in the Country Supplement for the United Kingdom.

This Prospectus and any Supplements may also be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus/Supplement. To the extent that there is any inconsistency between the English language Prospectus/Supplement and the Prospectus/Supplement in another language, the English language Prospectus/Supplement will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the Shares are sold, that in an action based upon disclosure in a Prospectus in a language other than English, the language of the Prospectus/Supplement on which such action is based shall prevail.

The value of Investments and the income derived therefrom may fall as well as rise and investors may not recoup the original amount invested in a Fund. The difference at any one time between subscription and redemption prices for Shares means that any investment should be viewed as long term.

Investors should read and consider the risk disclosures under the "Risk Factors" section above and the "Risk Factors" section in the relevant Supplement before investing in the Company.

Uruguay

This Prospectus has not and will not be registered with Financial Services Superintendency of the Central Bank of Uruguay ("BCU"). The Shares correspond to investment funds that are not investment funds regulated by Uruguayan law 16,774 dated September 27, 1996, as amended.

The sale of Shares qualifies as a private placement pursuant to section 2 of Uruguayan law 18,627. Shares must not be offered or sold to the public in Uruguay, except in circumstances which do not constitute a public offering or distribution under Uruguayan laws and regulations.

This Prospectus, and the information contained herein does not constitute and is not intended to constitute an offer of Shares and accordingly should not be construed as such. This document and the information contained herein has been made available in accordance with the restrictions and/or limitations implemented by any applicable laws and regulations.

This document is directed at and intended for institutional investors (as such term is defined in each jurisdiction in which the product is marketed). Each subscriber or purchaser of Shares should inform themselves of and observe all applicable laws, rules and regulations of any relevant jurisdictions and obtain professional advice as to whether he/she/it is qualified to subscribe to or purchase the Shares.

US

The Shares have not been and will not be registered under the US Securities Act of 1933, as amended (the "1933 Act") or the securities laws of any of the states of the US. The Shares may not be offered or sold directly or indirectly in the US or to or for the account or benefit of any US Person, except pursuant to an exemption from, or in a transaction not subject to the regulatory requirements of, the 1933 Act and any applicable state securities laws. Any re-offer or resale of any of the Shares in the US or to US Persons may constitute a violation of US law. The Company has not been and will not be registered under the United States Investment Company Act of 1940, as amended (the "1940 Act"), and investors will not be entitled to the benefit of registration.

The Shares have not been approved or disapproved by the US Securities and Exchange Commission, any state securities commission or other regulatory authority, nor have any of the foregoing authorities passed upon or endorsed the merits of this offering or the accuracy or adequacy of these offering materials. Any representation to the contrary is unlawful.

The Shares are subject to restrictions on transferability and resale and may not be transferred or resold in the US except as permitted under the 1933 Act and applicable state securities laws, pursuant to registration or exemption therefrom.

In order to ensure compliance with the restrictions referred to above, the Company and its Funds are, accordingly, not open for investment by any US Person and/or Canadian Resident except in exceptional circumstances and then only with the prior consent of the Directors. Please see below for the definition of US Person and additional information on the restrictions pertaining to US Persons.

Shares may not be acquired or owned by, or acquired with the assets of, an ERISA Plan.

A prospective investor may be required at the time of acquiring Shares to represent that such investor is (i) a Qualified Holder and, in particular, is not a US Person or Canadian Resident or acquiring Shares for the account or benefit, directly or indirectly, of a US Person or Canadian Resident, and (ii) not an ERISA Plan or acquiring Shares with the assets of an ERISA Plan. The granting of prior consent by the Company to an investment does not confer on the investor a right to acquire Shares in respect of any future or subsequent application.

Shareholders are required to notify the Company immediately in the event that they cease to be a Qualified Holder.

Definition of US Person and Related Information

Information Related to Definition of US Person(s)

Each subscriber for Shares will be required to certify to the Company, among other things, that the Shares are not being acquired and will not at any time be held for the account or benefit, directly or indirectly, of any US Person (as defined below) or any non-US person subject to the

restrictions described herein. Shareholders are required to notify the Company immediately of any change in such information. EACH SHAREHOLDER WILL BE REQUIRED TO VERIFY THAT IT IS NOT A US PERSON THAT IS PROHIBITED FROM OWNING SHARES IN THE COMPANY.

Each prospective Shareholder is urged to consult with its own advisers to determine the suitability of an investment in the Shares, and the relationship of such an investment to the purchaser's overall investment programme and financial and tax position. By subscribing for Shares, each purchaser of Shares represents that, after all necessary advice and analysis, its investment in the Company is suitable and appropriate, in light of the foregoing considerations.

ERISA PLANS AND PERSONS ACQUIRING SHARES WITH THE ASSETS OF AN ERISA PLAN MAY NOT PURCHASE SHARES IN THE FUNDS.

THE TAX AND OTHER MATTERS DESCRIBED IN THIS PROSPECTUS DO NOT CONSTITUTE, AND SHOULD NOT BE CONSIDERED AS, LEGAL OR TAX ADVICE TO PROSPECTIVE SHAREHOLDERS.

THE SHARES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED. THE COMPANY IS NOT AND WILL NOT BE REGISTERED UNDER THE US INVESTMENT COMPANY ACT OF 1940, AS AMENDED. THE INVESTMENT MANAGER IS NOT REGISTERED AS AN INVESTMENT ADVISER UNDER THE US INVESTMENT ADVISERS ACT OF 1940, AS AMENDED.

Definition of US Person(s)

A "US Person" is a person described in any the following paragraphs:

1. With respect to any person, any individual or entity that would be a US Person under Regulation S of the US Securities Act of 1933. The Regulation S definition is set forth below. **Even if you are not considered a US Person under Regulation S, you can still be considered a "US Person" within the meaning of this Prospectus under Paragraphs 2, 3 and 4, below.**
2. With respect to any person, any individual or entity that would be excluded from the definition of "Non-United States person" in Commodity Futures Trading Commission ("CFTC") Rule 4.7. The definition of "Non-United States person" is set forth below.
3. With respect to individuals, any US citizen or "resident alien" within the meaning of US income tax laws as in effect from time to time. Currently, the term "resident alien" is defined under US income tax laws to generally include any individual who (i) holds an Alien Registration Card (a "green card") issued by the US Immigration and Naturalization Service or (ii) meets a "substantial presence" test. The "substantial presence" test is generally met with respect to any current calendar year if (i) the individual was present in the US on at least 31 days during such year and (ii) the sum of the number of days on which such individual was present in the United States during the current year, 1/3 of the number of such days during the first preceding year, and 1/6 of the number of such days during the second preceding year, equals or exceeds 183 days.
4. With respect to persons other than individuals, (i) a corporation or partnership created or organised in the United States or under the law of the United States or any state, (ii) a trust where (a) a US court is able to exercise primary supervision over the administration of the trust and (b) one or more US persons have the authority to control all substantial decisions of the trust and (iii) an estate which is subject to US tax on its worldwide income from all sources.

Regulation S Definition of US Person

1. Pursuant to Regulation S of the US Securities Act of 1933, as amended (the "Act"), "US Person" means:
 - (i) any natural person resident in the United States;
 - (ii) any partnership or corporation organised or incorporated under the laws of the United States;
 - (iii) any estate of which any executor or administrator is a US person;
 - (iv) any trust of which any trustee is a US person;
 - (v) any agency or branch of a foreign entity located in the United States;
 - (vi) any non-discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a US Person;
 - (vii) any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organised, incorporated, or (if an individual) resident in the United States; or
 - (viii) any partnership or corporation if:
 - A. organised or incorporated under the laws of any non-US jurisdiction; and
 - B. formed by a US Person principally for the purpose of investing in securities not registered under the Act, unless it is organised or incorporated, and owned, by accredited investors (as defined in Rule 501(a) under the Act) who are not natural persons, estates or trusts.
2. Notwithstanding (1) above, any discretionary account or similar account (other than an estate or trust) held for the benefit or account of a non-US Person by a dealer or other professional fiduciary organised, incorporated, or (if an individual) resident in the United States shall not be deemed a "US Person".
3. Notwithstanding (1) above, any estate of which any professional fiduciary acting as executor or administrator is a US Person shall not be deemed a "US Person" if:
 - a. an executor or administrator of the estate who is not a US Person has sole or shared investment discretion with respect to the assets of the estate; and
 - b. the estate is governed by non-US law.
4. Notwithstanding (1) above, any trust of which any professional fiduciary acting as trustee is a US Person shall not be deemed a "US Person" if a trustee who is not a US Person has sole or shared investment discretion with respect to the trust assets, and no beneficiary of the trust (and no settlor if the trust is revocable) is a US Person.
5. Notwithstanding (1) above, an employee benefit plan established and administered in accordance with the law of a country other than the United States and customary practices and documentation of such country shall not be deemed a "US Person".
6. Notwithstanding (1) above, any agency or branch of a US Person located outside the United States shall not be deemed a "US Person" if:
 - (i) the agency or branch operates for valid business reasons; and

- (ii) the agency or branch is engaged in the business of insurance or banking and is subject to substantive insurance or banking regulation, respectively, in the jurisdiction where located.

- 7. The International Monetary Fund, the International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the United Nations, and their agencies, affiliates and pension plans, and any other similar international organisations, their agencies, affiliates and pension plans shall not be deemed "US Persons".

In addition, a discretionary or similar account managed or held for the benefit of a US Person as defined above will be treated as a US Person, irrespective of whether discretion is exercised within or outside the United States.

The Directors may amend the definition of "US Person" without notice to Shareholders as necessary in order best to reflect then-current applicable US law and regulation. Contact your sales representative for a list of persons or entities that are deemed to be "US Persons".

Definition of "Non-United States Person"

CFTC Rule 4.7 currently provides in relevant part that the following persons are considered "Non-United States persons":

1. a natural person who is not a resident of the United States or an enclave of the US government, its agencies or instrumentalities;
2. a partnership, corporation or other entity, other than an entity organised principally for passive investment, organised under the laws of a non-US jurisdiction and which has its principal place of business in a non-US jurisdiction;
3. an estate or trust, the income of which is not subject to US income tax regardless of source;
4. an entity organised principally for passive investment such as a pool, investment company or other similar entity, provided, that units of participation in the entity held by persons who do not qualify as Non-United States persons or otherwise as qualified eligible persons (as defined in CFTC Rule 4.7(a)(2) or (3)) represent in the aggregate less than ten per cent. of the beneficial interest in the entity, and that such entity was not formed principally for the purpose of facilitating investment by persons who do not qualify as Non-United States persons in a pool with respect to which the operator is exempt from certain requirements of Part 4 of the CFTC's regulations by virtue of its participants being Non-United States persons; and
5. a pension plan for the employees, officers or principals of an entity organised and with its principal place of business outside the United States.

Where the Company becomes aware that any Shares are directly or beneficially owned by any person in breach of the above restrictions, the Company may direct the Shareholder to transfer his Shares to a person qualified to own such Shares or to request the Company to redeem Shares, in default of which, the Shareholder shall, on the expiration of 30 days from the giving of such notice, be deemed to have given a request in writing for the redemption of the Shares.

Appendix V

List of sub-custodial agents appointed by The Northern Trust Company

The Depositary's global sub-custodian has appointed the following entities as sub-delegates in each of the markets set forth below. This list may be updated from time to time and is available upon request in writing from the Administrator or the Depositary. The Depositary does not anticipate that there would be any specific conflicts of interest arising as a result of any delegation to The Northern Trust Company or any of the sub-delegates listed below. The Depositary will notify the board of the Company of any such conflict should it so arise.

| Depositary – Sub-custodian Delegate Information | | |

Appendix VI

Stock Connect disclosures

Investment in China

Certain Funds may invest in securities or instruments which have exposure to the Chinese market. Direct exposure may be obtained via Stock Connect or indirectly via access products such as H-Shares, participation notes, equity-linked notes or similar financial instruments, or through other UCIs that invest in China, where the underlying assets consist of securities issued by companies quoted on regulated markets in China, and/or the performance of which is linked to the performance of securities issued by companies quoted on regulated markets in China. Other than risks involved in investments on an international basis and in emerging markets and frontier markets, as well as other risks of investments generally as described above which are applicable to investments in China, investors should also note the additional specific risks below.

Stock Connect Risks

Risks linked with dealing in securities in China via Stock Connect

A Fund may invest through Shanghai Stock Connect in certain eligible stocks listed on the Shanghai Stock Exchange ("**SSE**") ("**SSE Securities**") and through the Shenzhen Stock Connect in certain eligible stocks listed on the Shenzhen Stock Exchange ("**SZSE**") ("**SZSE Securities**"), (collectively with the SSE Securities, "**Eligible Securities**").

The relevant regulations are untested and subject to change. Stock Connect is subject to quota limitations which may restrict the Fund's ability to deal via Stock Connect on a timely basis. This may impact the Fund's ability to implement its investment strategy effectively.

The scope of the Shanghai Stock Connect includes all constituent stocks of the SSE 180 Index and the SSE 380 Index and all the SSE-listed China A Shares which have corresponding H shares listed on SEHK, except for the following:

- (a) SSE listed shares which are included in the "risk alert board" or under a delisting arrangement;
- (b) SSE listed shares which are not traded in RMB.

The scope of Shenzhen Stock Connect includes all constituent stock of the SZSE Component Index and SZSE Small/Mid Cap Innovation Index which has a market capitalisation of RMB6 billion or above and all the SZSE-listed China A Shares which have corresponding H shares listed on SEHK, except the following:

- (a) SZSE-listed shares which are not traded in RMB;
- (b) SZSE-listed shares which are subject to suspension; and
- (c) SZSE-listed shares which are included in the "risk alert board" or under a delisting arrangement.

Shareholders should note further that under the relevant regulations a security may be recalled from the scope of Stock Connect. This may adversely affect the Fund's ability to meet its

investment objective, e.g., when the Investment Manager wishes to purchase a security which is recalled from the scope of Stock Connect.

Pre-trade check

PRC law provides that the SSE and SZSE will reject a sell order if an investor does not have sufficient available China A Shares in its account. SEHK will apply a similar check on all sell orders of Stock Connect securities on the Northbound Trading link at the level of SEHK's registered exchange participants ("**Exchange Participants**") to ensure there is no overselling by any individual exchange participant ("**Pre-Trade Checking**"). In addition, Stock Connect investors will be required to comply with any requirements relating to Pre-Trade Checking imposed by the applicable regulator, agency or authority with jurisdiction, authority or responsibility in respect of Stock Connect ("**Stock Connect Authorities**").

This Pre-Trade Checking requirement may require a pre-trade delivery of the Eligible Securities from a Stock Connect investor's domestic custodian or sub-custodian to the Exchange Participant which will hold and safekeep such securities so as to ensure that they can be traded on a particular trading day. There is a risk that creditors of the Exchange Participant may seek to assert that such securities are owned by the Exchange Participant and not the Stock Connect investor, if it is not made clear that the Exchange Participant acts as a custodian in respect of such securities for the benefit of the Stock Connect investor.

When the Investment Manager trades Eligible Securities through a broker affiliated to the Investment Manager's sub-custodian, who is an Exchange Participant and a clearing agent of its affiliated broker, the Stock Connect investor may request such a Custodian Participant to open a Special Segregated Account ("**SPSA**") in Hong Kong Central Clearing and Settlement System ("**CCASS**") to maintain its holdings in SSE Securities. CCASS will take a snapshot of the SSE Securities holdings under each SPSA of an Exchange Participant and replicate such holdings to perform pre-trade checking, no pre-trade delivery of securities will be required and the above risk is mitigated.

Beneficial owner of the Eligible Securities

Stock Connect comprises the Northbound link, through which Hong Kong and overseas investors like the Fund may purchase and hold Eligible Securities ("**Northbound Trading**"), and the Southbound link, through which investors in Mainland China may purchase and hold shares listed on the SEHK ("**Southbound Trading**"). These Eligible Securities will be held following settlement by brokers or custodians as clearing participants in accounts in ("**CCASS**") maintained by the Hong Kong Securities and Clearing Corporation Limited ("**HKSCC**") as central securities depository in Hong Kong and nominee holder. HKSCC in turn holds Eligible Securities of all its participants through a "single nominee omnibus securities account" in its name registered with ChinaClear, the central securities depository in Mainland China.

Because HKSCC is only a nominee holder and not the beneficial owner of Eligible Securities, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong, investors should note that Eligible Securities will not be regarded as part of the general assets of HKSCC available for distribution to creditors even under Mainland China law. However, HKSCC will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in Eligible Securities in Mainland China. Foreign investors like the concerned Funds investing through the Stock Connect holding the Eligible Securities through HKSCC are the beneficial owners of the assets and are therefore eligible to exercise their rights through the nominee only. While PRC law does not prohibit a Stock Connect investor as a

beneficial owner from taking legal actions directly in PRC courts, the beneficial owner may need to be prepared to conduct the actions at its own costs and provide indemnity to HKSCC in relation to the actions.

Not protected by Investor Compensation Fund

Investors should note that any Northbound or Southbound Trading under Stock Connect will not be covered by Hong Kong's Investor Compensation Fund or the China Securities Investor Protection Fund ("CSIPF") and thus investors will not benefit from compensation under such schemes.

Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

The Investor Compensation Fund only covers products traded in Hong Kong's recognised securities market (i.e., SEHK) and recognised futures market (i.e. Hong Kong Futures Exchange Limited or "HKFE"), as defined in the Securities and Futures Ordinance (Cap 571) of Hong Kong. Since defaults in relation to Northbound Trading do not involve products listed or traded on SEHK or HKFE, thus, similar to the case of investors trading overseas securities, such defaults will not be covered by the Investor Compensation Fund.

On the other hand, according to the Measures for the Administration of Securities Investor Protection Fund 《證券投資者保護基金管理辦法》, the functions of CSIPF include "indemnifying creditors as required by China's relevant policies in case a securities company is subjected to compulsory regulatory measures including dissolution, closure, bankruptcy and administrative takeover by the China Securities Regulatory Commission ("CSRC") and custodian operation" or "other functions approved by the State Council". However, since Northbound Trading is carried out through securities brokers in Hong Kong and not PRC brokers, the CSIPF also does not extend to protect defaults experienced on Northbound Trading.

Restriction on day trading

Save with a few exceptions, day (turnaround) trading is generally not permitted on the China A Share market. If a Fund buys Eligible Securities on a dealing day (T), the Fund may not be able to sell the Eligible Securities until on or after T+1 day.

Quotas used up

When the respective aggregate quota balance for Northbound Trading is less than the daily quota, the corresponding buy orders will be suspended on the next trading day (sell orders will still be accepted) until the aggregate quota balance returns to the daily quota level. Once the daily quota is used up, acceptance of the corresponding buy orders will also be immediately suspended and no further buy orders will be accepted for the remainder of the day. Buy orders which have been accepted will not be affected by the using up of the daily quota, while sell orders will be continued to be accepted. Depending on the aggregate quota balance situation, buying services will be resumed on the following trading day.

Difference in trading day and trading hours

Due to differences in public holiday between Hong Kong and Mainland China or other reasons such as bad weather conditions, there may be a difference in trading days and trading hours in the three markets SSE, SZSE and SEHK. Stock Connect will only operate on days when all the relevant markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the Mainland China market but it is not possible to carry out any China A Shares trading in Hong Kong. The Investment Manager should take note of the days and the hours during which Stock Connect is open for business and decide according to its own risk tolerance capability whether or not to take on the risk of price fluctuations in China A Shares during the time when Stock Connect is not trading.

The recalling of eligible stocks and trading restrictions

A stock may be recalled from the scope of eligible stocks for trading via Stock Connect for various reasons, and in such event the stock can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the Investment Manager. The Investment Manager should therefore pay close attention to the list of eligible stocks as provided and renewed from time to time by SSE, SZSE and SEHK.

Under Stock Connect, the Investment Manager will only be allowed to sell China A Shares but restricted from further buying if: (i) the China A Share subsequently ceases to be a constituent stock of the relevant indices; (ii) the China A Share is subsequently under "risk alert"; and/or (iii) the corresponding H share of the China A Share subsequently ceases to be traded on SEHK. The Investment Manager should also note that price fluctuation limits would be applicable to China A Shares.

Trading costs

In addition to paying trading fees and stamp duties in connection with China A Shares trading, the Funds carrying out Northbound Trading should also take note of any new portfolio fees, dividend tax and tax concerned with income arising from stock transfers which would be determined by the relevant authorities.

Local market rules, foreign shareholding restrictions and disclosure obligations

Under Stock Connect, China A Shares listed companies and trading of China A Shares are subject to market rules and disclosure requirements of the China A Shares market. Any changes in laws, regulations and policies of the China A Shares market or rules in relation to Stock Connect may affect share prices. The Investment Manager should also take note of the foreign shareholding restrictions and disclosure obligations applicable to China A Shares.

The Investment Manager will be subject to restrictions on trading (including restriction on retention of proceeds) in China A Shares as a result of its interest in the China A Shares. The Investment Manager is solely responsible for compliance with all notifications, reports and relevant requirements in connection with its interests in China A Shares.

Under the current Mainland China rules, once an investor holds up to 5% of the shares of a company listed on the SSE or SZSE, the investor is required to disclose his interest within three working days and during which he cannot trade the shares of that company. Furthermore, according to PRC Securities Law a shareholder of 5% or more of the total issued shares of a PRC listed company ("major shareholder") sells shares within six months from purchasing them or

purchases shares within 6 months of the holder's last sale of shares, all proceeds of the sale must be paid to such PRC listed company.

According to existing Mainland China practices, the Investment Manager as beneficial owners of China A Shares traded via Stock Connect cannot appoint proxies to attend shareholders' meetings on its behalf. HKSCC can attend shareholders' meeting or appoint Stock Connect investor as proxy when the articles of association of the listed company allows.

Clearing, settlement and custody risks

HKSCC and ChinaClear have established the clearing links between the two exchanges and each will become a participant of the other to facilitate clearing and settlement of cross-border trades. For cross-border trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

Hong Kong and overseas investors which have acquired Stock Connect securities through Northbound Trading should maintain such securities with their brokers' or custodians' stock accounts with CCASS (operated by HKSCC).

No manual trade or block trade

Currently there is no manual trade facility or block trade facility for Stock Connect securities transactions under Northbound Trading. A Fund's investment options may become limited as a result.

Order priority

Trade orders are entered into China Stock Connect System ("CSC") based on time order. Trade orders cannot be amended, but may be cancelled and re-entered into the CSC as new orders at the back of the queue. Due to quota restrictions or other market intervention events, there can be no assurance that trades executed through a broker will be completed.

Execution issues

Stock Connect trades may, pursuant to the Stock Connect rules, be executed through one or multiple brokers that may be appointed by the Investment Manager for Northbound Trading. Given the Pre-Trade Checking requirements and hence the pre-trade delivery of Eligible Securities to an Exchange Participant, the Investment Manager has determined that it is in the interest of a Fund that it only executes Stock Connect trades through a broker who is affiliated to the Depository's sub-custodian that is an Exchange Participant. In that situation, whilst the Investment Manager will be cognisant of its best execution obligations it will not have the ability to trade through multiple brokers and any switch to a new broker will not be possible without a commensurate change to the Depository's sub-custody arrangements.

No off-exchange trading and transfers

Market participants must match, execute or arrange the execution of any sale and buy orders or any transfer instructions from investors in respect of any Eligible Securities in accordance with the Stock Connect rules. This rule against off-exchange trading and transfers for trading of Eligible Securities under Northbound Trading may delay or disrupt reconciliation of orders by market participants. However, to facilitate market players in conducting Northbound Trading and

the normal course of business operation, off-exchange or “non-trade” transfer of Eligible Securities for the purposes of post-trade allocation to different Funds by fund managers have been specifically allowed.

Currency risks

Northbound investments by a Fund in the Eligible Securities will be traded and settled in Renminbi. If the Fund holds a class of shares denominated in a local currency other than RMB, the Fund will be exposed to currency risk if the Fund invests in a RMB product due to the need for the conversion of the local currency into RMB. During the conversion, the Fund will also incur currency conversion costs. Even if the price of the RMB asset remains the same when the Fund purchases it and when the Fund redeems/sells it, the Fund will still incur a loss when it converts the redemption/sale proceeds into local currency if RMB has depreciated.

Risk of ChinaClear default

ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. Pursuant to the General Rules of CCASS, if ChinaClear (as the host central counterparty) defaults, HKSCC will, in good faith, seek recovery of the outstanding Eligible Securities and monies from ChinaClear through available legal channels and through ChinaClear’s liquidation process, if applicable.

HKSCC will in turn distribute the Stock Connect securities and/or monies recovered to clearing participants on a pro-rata basis as prescribed by the relevant Stock Connect authorities. Although the likelihood of a default by ChinaClear is considered to be remote, the Fund should be aware of this arrangement and of this potential exposure before engaging in Northbound Trading.

Risk of HKSCC default

A failure or delay by the HKSCC in the performance of its obligations may result in a failure of settlement, or the loss, of Eligible Securities and/or monies in connection with them and the Fund and its investors may suffer losses as a result. The Investment Manager shall not be responsible or liable for any such losses.

Ownership of Eligible Securities

Eligible Securities are uncertificated and are held by HKSCC for its accountholders. Physical deposit and withdrawal of Eligible Securities are not available under the Northbound Trading for the Funds.

The Funds’ title or interests in, and entitlements to Eligible Securities (whether legal, equitable or otherwise) will be subject to applicable requirements, including laws relating to any disclosure of interest requirement or foreign shareholding restriction. It is therefore uncertain whether the Chinese courts would recognise the ownership interest of the investors when direct interest cannot be established or proved due to circumstances to allow them standing to take legal action against the Chinese entities in case disputes arise.

The above may not cover all risks related to Stock Connect and any above mentioned laws, rules and regulations are subject to change.

This is a complex area of law and investors should seek independent professional advice.

China Tax Considerations

Stock Connect Tax Considerations

The Chinese tax authorities have clarified that:

an exemption from valued added tax and income tax on capital gains applies to trading on Stock Connect (this is stated to be a temporary exemption, but no expiry date is provided);

- (a) normal Chinese stamp duty is payable; and
- (b) a 10% dividend withholding tax will be applied.

Investors should seek their own tax advice on their position with regard to their investment in any Fund.

Federated Hermes Investment Funds Public Limited Company

*(An open-ended investment company with variable capital and having
segregated liability between its Funds incorporated with limited
liability in Ireland)*

Country Supplement Dated 19 August 2024 for investors in Switzerland

THIS COUNTRY SUPPLEMENT FORMS PART OF AND SHOULD BE READ IN CONJUNCTION WITH THE SWISS EXTRACT PROSPECTUS DATED 19 AUGUST 2024 OF THE COMPANY. IN PARTICULAR, SWISS INVESTORS SHOULD REFER TO THE SECTION HEADED "FEES AND EXPENSES" IN THE PROSPECTUS.

INFORMATION FOR INVESTORS IN SWITZERLAND

i. Representative

The representative in Switzerland is Acolin Fund Services AG, Maintower, Thurgauerstrasse 36/38, CH-8050 Zurich.

ii. Paying agent

The paying agent in Switzerland is NPB Neue Privat Bank AG, Limmatquai 1/am Bellevue, P.O. Box, CH-8024 Zurich.

iii. Place where the relevant documents may be obtained

The prospectus, the key information documents or the key investor information document, the Memorandum of Association as well as the annual and semi-annual reports may be obtained free of charge from the representative in Switzerland.

iv. Publications

Publications concerning the fund are made in Switzerland on the electronic platform www.fundinfo.com.

Each time units are issued or redeemed, the issue and the redemption prices or the net asset value together with a reference stating "excluding commissions" must be published on the electronic platform www.fundinfo.com. Prices are published daily.

v. Payment of retrocessions and rebates

The investment fund respectively the fund management company and its agents may pay retrocessions to compensate the distribution activity of fund units in Switzerland. This compensation may be used in particular to cover the following services::

1. for any offering of and advertising for the investment fund, including any type of activity whose object is the purchase of the fund, such being for example the organization of road shows, the participation at fairs and presentations, the preparation of marketing materials, the training of distributors, etc.

Retrocessions are not considered rebates even if they are ultimately passed on to investors in whole or in part.

The disclosure of the receipt of retrocessions is governed by the relevant provisions of the FinSA.

The investment fund respectively the fund management company and its agents, may pay rebates directly to investors upon request in distribution in Switzerland. Rebates serve to reduce the fees or costs attributable to the investors concerned. Discounts are permissible provided that they:

- are paid from fees of the investment fund respectively the fund management company and thus do not place an additional burden on the fund assets;
- are granted on the basis of objective criteria;
- are granted to all investors who fulfil the objective criteria and request, under the same time conditions and to the same extent.

The objective criteria for the granting of rebates by the investment fund respectively the fund management company are:

- the volume subscribed by the investor or the total volume held by the investor in the collective investment scheme or, where applicable, in the promoter's product range;
- the amount of the fees generated by the investor;
- the investment behaviour practised by the investor (e.g., expected investment period);
- the investor's willingness to provide support in the launch phase of a collective investment scheme.

Upon request by the investor, the investment fund respectively the fund management company shall disclose the corresponding amounts of the rebates free of charge.

vi. Place of performance and jurisdiction

For units offered in Switzerland, the place of performance is at the registered office of the representative. The place of jurisdiction shall be at the registered office of the representative or at the registered office or domicile of the investor.

Global Supplement

Federated Hermes Investment Funds plc

The date of this Global Supplement is 15 August 2023

This Global Supplement contains a list of all Funds of the Company. This Global Supplement forms part of, and should be read in conjunction with, the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”) and any amending Supplements to the Prospectus.

Unless the context requires otherwise, capitalised terms used in this Global Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Global Supplement, you should consult your stockbroker, or other financial adviser.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors due to investment in emerging markets and Russian listed or traded securities.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The Fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons;
- companies that generate over 0% of their revenues from the production of weapons for retail use or companies that generate over 5% of their revenues from the distribution of weapons for retail use;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution; and
- companies that generate over 10% of their revenues from the extraction of unconventional fossil fuels (thermal coal, shale energy, oil sands, or Arctic oil and gas).

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

The Investment Manager conducts analysis of individual companies in search of favourable investment opportunities. These opportunities are also evaluated in the context of the conditions and potential for growth in the region/country. The Investment Manager will run a relatively concentrated portfolio with a long-term investment perspective. The Investment Manager will

invest in companies of different sizes and integrates the consideration of environmental, social and governance factors into the investment analysis. Other than investment in the excluded sectors, the Investment Manager is not otherwise subject to any limitation on the types of companies to which it will seek exposure (either in terms of industry, size or focus).

The Investment Manager identifies companies which it believes will generate capital appreciation through fundamental company analysis whereby the Investment Manager seeks high-quality and efficient companies which benefit from long-term trends when such companies are trading at attractive values. In addition to the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the company, including evidence of companies' awareness, vision and planning on ESG issues, through research and local investigation. ESG includes environmental items (such as the impact on natural resources and climate change), social issues (such as human rights) and governance (being the way in which the company is run and employee wellbeing). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager further assesses the ESG characteristics of a company by assigning an ESG score to each company within its investment universe. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a company's ESG behaviours on a scale. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The Investment Manager believes that engagement by EOS at Federated Hermes is an important tool to drive change to better sustainability.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI Emerging Markets Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc.), as deemed appropriate. The MSCI Emerging Markets Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in emerging markets around the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For

the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related securities (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenues from, global emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Debt: The Fund may hold Investment Grade government and Investment Grade and Below Investment Grade corporate fixed income debt securities of fixed and/or floating rate and that may be rated or unrated (including bonds, notes, and/or Convertible Debt Securities) listed or traded on a Regulated Market. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options, participation notes, and rights.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including Investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Investment Restrictions

The Fund may invest up to 30% of its Net Asset Value in Russian listed or traded securities. Any such investment shall be limited to those securities that are listed or traded on the Moscow Exchange.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Frontier Markets Risk | 37 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Stock Connect Risk | 43 |
| Russian Investment Risk | 44 |
| Small and Mid-Cap Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|---|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company. Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.75% |
| F | 1.00% |
| G | 1.75% |
| I | 1.00% |
| K | 0.70% |
| L | 0.70% |
| P | 1.00% |
| R | 1.50% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| G | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Global Emerging Markets Equity Fund
Legal entity identifier: 549300A5XPYJ4HEZ5K02

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

It will make a minimum of **sustainable investments with an environmental objective:** ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, Exposure to Fossil Fuels, Energy Consumption from Non-Renewables, Water Intensity, Waste Intensity;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, Board Gender Diversity and Employee Turnover; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society.*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model (as detailed below) to identify if a company has any sustainability risks;*
- screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company has in place limit the amount of harm or that the company is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's ESG assessment (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager's qualitative review of the investee companies, to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the assessment. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager will seek to invest in high quality and efficient companies trading at attractive valuations in global emerging markets, where conditions are supportive of growth. In selecting investments for the Fund, the Investment Manager incorporates ESG factors aimed at the promotion of the environmental and social characteristics through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducts an assessment of a company's ESG characteristics based on both quantified ESG metrics and through a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors include, but are not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as Board gender diversity and employee turnover). The ESG assessment favours companies with reduced ESG risks and which comply with the Investment Manager's policy on good governance practices, outlined further below. The Investment Manager may invest in companies with a poor ESG factors, where the company has shown a desire to improve their ESG behaviours.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager may undertake direct engagement with the company or works with EOS to engage with companies to address those risks. Engagement occurs through meetings with company boards and management and through the exercise of voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company is not receptive to engagement on sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, unconventional fossil fuels and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons.
- Companies that generate over 0% of their revenues from the production of weapons for retail use or companies that generate over 5% of their revenues from the distribution of weapons for retail use.
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution.
- Companies that generate over 10% of their revenues from the extraction of unconventional fossil fuels (thermal coal, shale energy, oil sands, or Arctic oil and gas).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

● To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What is the minimum share of investments in transitional and enabling activities?**

Not Applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Global Equity ESG Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 5 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation by investing in worldwide equity securities with favourable environmental, social and governance (“ESG”) characteristics.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund’s investments will be aligned with the environmental objectives under the Taxonomy Regulation. The “do no significant harm” principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the Fund will invest at least 67% of its assets in these securities. In addition, the Fund will invest at least 80% in equity securities that are component securities of the MSCI All Country World Index or equity securities of companies listed in the countries referenced in the MSCI All Country World Index. The MSCI All Country World Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Investment Manager will not invest in companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons.

Investment Strategy

The Investment Manager intends to create an actively managed portfolio using a disciplined bottom up stock selection process. The analysis of companies is based on a large number of proven fundamental factors and on ESG characteristics, as measured by the Investment Manager’s proprietary ratings system, which draws upon a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager intends to use a proprietary quantitative model, which captures systematic behavioural biases of market participants, in order to generate returns for the Fund. The Fund’s Investments will be selected based on the output of this quantitative model and will favour equity securities which have a combination of characteristics. Companies with a competitive advantage and a sustainable business model are sought after as they are more likely to offer visibility of earnings growth. In addition, it is important that companies behave responsibly, which tends to lead the Fund towards companies that are well governed and treat their responsibilities to the environment and society seriously as they are likely to avoid unforeseeable negative impacts. Choosing stocks

that demonstrate a combination of these characteristics allows the Fund to hold stocks over the long-term. The Investment Manager employs a disciplined subjective analysis that interrogates the model's efficacy and further assesses the ESG characteristics of a company, as described below.

In seeking to achieve the objective of the Fund, the Investment Manager assesses companies within its investment universe on their exposure to and management of ESG risks and assigns a weighted score for each. ESG represents environmental issues, (such as the impact on natural resources), social issues (such as human rights), and governance, (being the way in which the company is run). No sector or industry is excluded from the initial analysis. The Investment Manager's approach to ESG integration in its investment analysis draws upon both internal and external sources, as outlined above, where an ESG score is assigned to each company within its investment universe. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The ESG score favours companies with lower ESG risks and companies who are actively improving their focus on ESG issues. The ESG score is combined with the output of the quantitative model to determine the overall attractiveness of each company. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The Investment Manager will generally not invest in companies whose ESG score is in the lowest 20%. The output from this quantitative model is analysed by the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to risks not otherwise identified by this quantitative model. The ESG characteristics are also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI All Country World Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI All Country World Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and, except for the above disclosure regarding the percentage of assets that shall be invested in the MSCI All Country World Index for investment purposes, the Fund is not constrained by the constituents of any such index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenue from, global developed and emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly)

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs which may be used by the Fund for such purposes include Warrants, Futures and Options.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities,

floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level", "Hedging at Share Class Level against Base Currency" and "Hedging at Share Class Level against Portfolio Currencies" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.30% |
| D | 0.55% |
| F | 0.55% |
| I | 0.55% |
| K | 0.40% |
| L | 0.40% |
| P | 0.55% |
| R | 1.10% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| D | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Global Equity ESG Fund
Legal entity identifier: 549300T139RZTOV6TX05

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|--|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- favourable or improving ESG characteristics;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

The MSCI All Country World index has been designated as a reference benchmark for the purpose of attaining the above characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, Exposure to Fossil Fuels, Energy Production from Non-Renewables, Water Emissions, Hazardous Waste Ratio;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises and Board Gender Diversity; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary QESG scoring model (the "QESG Scoring Model" – see further detail below) to identify if a company has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company has in place limit the amount of harm or that the company is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary QESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. This is done by evaluating the results from the QESG Scoring Model, as well as, the underlying principle adverse impacts on sustainability factors and other sustainability indicators used within the QESG Scoring Model. Reviewing both the output and the inputs to the QESG Scoring Model ensures that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost.

Where the risk of sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the

aim of reducing under-performance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager intends to create an actively managed portfolio using a disciplined bottom up stock selection process which is determined through the incorporation of ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

Positive ESG Tilt: The Investment Manager seeks to invest in companies with favourable or improving sustainability Indicators. To achieve this the Investment Manager utilises its QESG Scoring Model which considers environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). The QESG Scoring Model rates companies on a low to high scale of 0 to 100. The QESG Scoring Model seeks to capture not only where a company has good sustainability indicators but also where improvements to the sustainability indicators can or are being made. The QESG score allows the Investment Manager to individually assess the environmental, social and governance scores relative to the benchmark and also to assess this on an aggregated basis considering all three scores. The Investment Manager will not invest in companies whose QESG score is in the lowest 20%.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager works with EOS to engage with companies to address those risks. Engagement occurs through meetings with management and the exercise of voting rights. Engagement seeks develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company is not receptive to engagement on sustainability risks, or makes insufficient progress in addressing them over time, it will lower the company's QESG score, which may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies that generate over 0% of their revenues from the production of Controversial Weapons.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in companies whose QESGscore is in the lowest 20%.
- The Investment Manager will not invest in companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons.

● What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

● What is the policy to assess good governance practices of the investee companies?

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

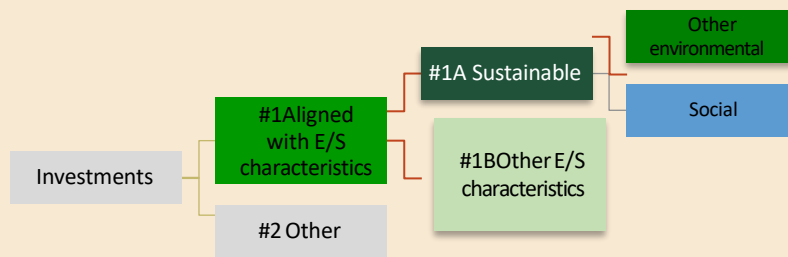

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 15% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- Yes:
- In fossil gas
- In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures**

● What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 15% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 6% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 15% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 6% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The MSCI All Country World Index is used as a reference for determining whether the Fund achieves favourable ESG characteristics. This is achieved via a comparison of the Fund's QESG score relative to the benchmark.

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

The MSCI All Country World Index is a broad market index that does not take into account any ESG or Sustainability criteria. The reference benchmark is therefore not continuously aligned with the environmental and social characteristics promoted by the Fund. It is used as a comparator to evidence whether the Fund's positive ESG tilt is being achieved relative to a relevant broad market index.

● **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The methodology of the strategy and the index are not aligned, the index serves as a comparator for financial and ESG performance only.

● **How does the designated index differ from a relevant broad market index?**

The designated index does not differ from a broad market index.

● **Where can the methodology used for the calculation of the designated index be found?**

Further information relating to the designated index can be found at <https://www.msci.com>

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Global High Yield Credit Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 8 is 5 April 2024

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a high level of income over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in Below Investment Grade securities and potential investment in emerging markets. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to generate a high level of income.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below). The Fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the Fund may invest will be selected on a global basis.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons
- companies that generate over 10% of their revenues from gambling products
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution; and
- companies that generate over 5% of their revenues from the extraction of unconventional oil sands.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest in a diversified portfolio of Below Investment Grade securities, and may use credit default Swaps extensively. The Investment Manager intends to use an active approach to seek risk-adjusted returns through a thorough analysis of individual Below Investment Grade corporate and/or government issuers which it believes will generate returns. This fundamental, bottom-up analysis of individual credit

will be used to generate returns through anticipated price changes. In addition, the Investment Manager intends to use a wider analysis of general economic conditions for portfolio risk management purposes. The Investment Manager intends to diversify the Fund's portfolio across different geographic regions and industries.

The Investment Manager identifies credit assets which it believes will generate a high level of income. In addition to the analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies' own disclosures. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager's approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each country and company in the portfolio. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%. To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or a company's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on issues if they arise. The Investment Manager will generally exclude the issuers with an ESG score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 75%-125% for long positions and 0%-40% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the ICE BofA Merrill Lynch Global High Yield Constrained Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc.), as deemed appropriate. The ICE BofA Merrill Lynch Global High Yield Constrained Index is designed to track the performance of below-investment grade corporate debt denominated in US Dollars, Canadian Dollars, British Pounds and Euros that are publicly issued in the major US or Eurobond markets. The weighting of index constituents is limited to a maximum 2%. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The

Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities, Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund may, to a limited extent, invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depositary Receipts) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may use credit default Swaps extensively for direct investment (i.e., to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swaps spreads of specific issuers or market indices that compromise a basket of issuers of bond instruments) and/or efficient portfolio management purposes.

The Fund may also utilise other FDIs, such as Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include credit default Swap indices), equity index Options and Options on credit default Swaps and equity Options) for direct investment and/or efficient portfolio management purposes.

The Fund may also enter Swaps such as currency Swaps for currency hedging purposes.

FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or Credit Default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash, invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 40% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 140% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Collateral Reinvestment Risk | 33 |
| Contingent Convertible Securities Risk | 33 |
| Credit Default Swaps Risk | 34 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Loans Investment Risk | 40 |
| Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk | 41 |
| Swaps Risk | 45 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depositary's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depositary fee of up to 0.0110% of its Net Asset Value to the Depositary. The Fund will also pay other costs to the Depositary such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company. Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.10% |
| D | 0.60% |
| F | 0.60% |
| I | 0.60% |
| K | 0.50% |
| L | 0.50% |
| M | 0.35% |
| P | 0.60% |
| R | 1.20% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| D | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 8 April untry and close at 5 p.m. on 7 October 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is Euro. The underlying portfolio exposure is hedged in Euro.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Global High Yield Credit Fund**
 Legal entity identifier: **549300YIBH6MUAAPW881**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

| | |
|---|---|
| <input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___% | <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, and Board Gender Diversity; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where issuers may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model (as detailed below) to identify if an issuer has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

 Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager uses an active approach to seek risk-adjusted returns. This is achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings direct the team's bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provide superior relative value. The Investment Manager further incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of an issuer into its investment process. The Investment Manager achieves this by using its ESG Scoring Model to score a country or a company's ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considers environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favours issuers with low environmental and social risks and issuers which comply with the Investment Manager's policy on good governance practices, outlined further below. As such, the Fund will have a higher percentage of investments scoring 3 or lower. The Investment Manager may invest in issuers with a poor ESG score, where the issuer has shown a desire to improve its ESG behaviours. The Investment Manager will not invest in new issuers with an ESG score of 5 from the investment universe. These scores are not static and therefore could be downgraded. In circumstances where an issuer's score is downgraded to a 5, the Investment Manager will seek to disinvest.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager will work with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks to develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, gambling unconventional oil sands and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in new issuers with an ESG score of 5 (scores are evaluated on an on-going basis and can fluctuate).
- The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):
 - companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made

product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons

- *companies that generate over 10% of their revenues from gambling products*
- *companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution; and*
- *companies that generate over 5% of their revenues from the extraction of unconventional oil sands.*
- *In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 80% of the Fund's investments will be in issuers who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2Other includes the remaining investments of the Fund, which may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the attainment of the environmental and social characteristics in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Supplement

Federated Hermes Asia ex-Japan Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 12 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five-year time horizon who understand and accept the associated high level of risk with high volatility attached to a fund that has an emerging market equity exposure in the Asia ex-Japan region. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors due to investment in emerging markets.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a portfolio of equity and equity-related securities of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from, the Asia ex-Japan region. These companies will be listed or traded on a Regulated Market worldwide.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- Companies that generate over 0% of their revenue from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 0% of their revenue from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenue from the mining or energy generation of thermal coal; and
- Companies that generate over 5% of their revenues from adult entertainment products;

Investment Strategy

The strategy follows a contrarian investment style, and is neither growth nor value orientated. Instead, the Investment Manager seeks companies trading at attractive price-to-value propositions, which are often found in those parts of the market which are less popular. The Investment Manager believes this allows the Fund to potentially outperform the market irrespective of whether growth or value styles are in favour. An important characteristic that the Investment Manager seeks in potential investments is asymmetry: the potential for gains in the case of favourable future scenarios exceeding losses in the case of unfavourable future scenarios. Other than investment in the excluded sectors listed above, the Investment Manager

is not otherwise subject to any limitation on the types of companies to which it will seek exposure (either in terms of industry, size or focus).

The Investment Manager incorporates analysis that assesses the environmental, social and governance (“ESG”) characteristics of a company into its investment process. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging their knowledge of and direct contact and engagement with companies. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The Investment Manager may invest in companies with poor ESG characteristics where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The ESG characteristics are also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The Fund’s market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager’s analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI All Country Asia ex Japan Investable Market Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI All Country Asia ex Japan Investable Market Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across Asia (excluding Japan). As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund’s objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and equity-related securities (such as GDRs and ADRs) of, or relating to, companies in, or that derive a substantial proportion of their revenues from, the Asia

ex-Japan region. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Debt: The Fund may hold Investment Grade government and Investment Grade or Below Investment Grade corporate fixed income debt securities of fixed and/or floating rate and that may be rated or unrated (including bonds, notes and/or Convertible Debt Securities) and that may be issued by or relate to companies and or governments from the Asia ex-Japan region. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares of Eligible CIS, including exchange-traded funds, money market funds and other funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures, Options, Swaps, participation notes, non-voting Depository Receipts, rights and Warrants.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash), subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via: [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Stock Connect Risk | 43 |
| Small and Mid-Cap Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|---|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities that are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example, via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| C | 1.10% |
| F | 0.75% |
| I | 0.75% |
| P | 0.75% |
| R | 1.50% |
| RC | 2.20% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, and Class I Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, and Class I Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| C | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| RC | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T* | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z** | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management/.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Asia ex-Japan Equity Fund
Legal entity identifier: 5493000S2N1BDU0KK492

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|---|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|---|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- potential for improvement to ESG factors; and/or
- a willingness to engage on any material ESG issues; and/or
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions and Carbon Footprint;*
- *Violation of UN Global Compact Principles 4 and 5; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable..

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable

— — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

Does this financial product consider principal adverse impacts on sustainability factors?

X Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the assessment. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from the dedicated stewardship team, EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where material sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager follows a bottom-up stock selection process and a contrarian investment style that seeks exposure to companies from emerging and developed markets in Asia excluding Japan that are attractively priced relative to their quality. In selecting investments for the Fund, the Investment Manager incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Improvers: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. As part of this assessment, the Investment Manager conducts an assessment of a company's ESG characteristics based on quantified ESG metrics and a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors include, but are not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as employee satisfaction and turnover). The ESG assessment seeks to identify companies that might have current ESG deficiencies but which have shown the potential and/or desire to improve their ESG behaviours, through identified management goals, provided the companies can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined below. This may be further supported via engagement with the company or where the company may be subject to related advocacy with relevant government bodies and/or regulators.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager works with EOS to engage with companies to address those risks. Engagement is conducted in the context of the company's sector and regional policy, where corporate governance standards and social safeguards may differ to international expectations in developed markets. Engagement occurs through meetings with company boards and management and through the exercise of voting rights. The Investment Manager also engages in advocacy with government, regulators and governance associations. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company is not receptive to engagement on material ESG risks, or makes insufficient progress in addressing them over time, it may result in divestment of that company.

Exclusions: The Investment Manager will not invest in the following companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, thermal coal and adult entertainment.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):
 - Companies that generate over 0% of their revenue from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- Companies that generate over 0% of their revenue from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenue from the mining or energy generation of thermal coal; and
- Companies that generate over 5% of their revenues from adult entertainment products.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through a variety of means, including the Investment Manager's proprietary corporate governance tool and qualitative analysis, insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company related to its governance, which have not been mitigated through subsequent demonstrative actions.

However, a company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

However, no investments will be made in any company which is in violation of Principles 4 and 5 of the UN Global Compact Principles relating to forced and compulsory labour and the abolishment of child labour..

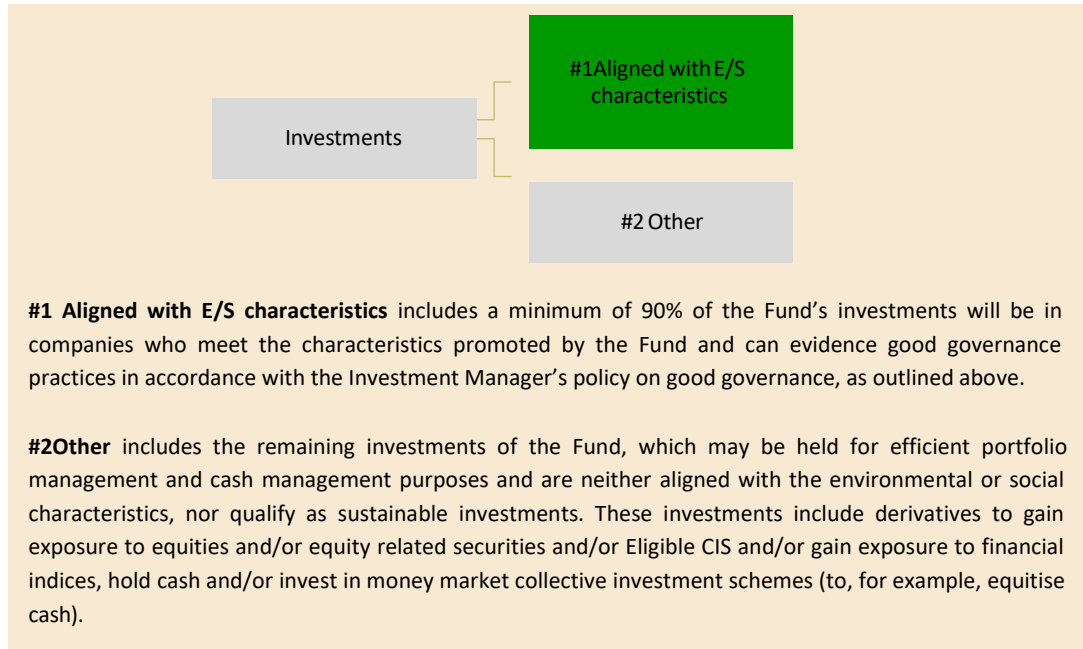

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

● To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash)

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**
Not Applicable
- **How does the designated index differ from a relevant broad market index?**
Not Applicable
- **Where can the methodology used for the calculation of the designated index be found?**
Not Applicable

Supplement

Federated Hermes US SMID Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 13 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated high level of risk with high volatility attached to a fund that delivers a US equity exposure to small and medium-capitalisation companies. For more information please refer to the section entitled "Risk Factors".

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to provide long-term capital appreciation.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in the US, or companies that derive a large proportion of their income from US activities, and that the Investment Manager has identified as being, in its view, undervalued. These companies will be listed or traded on a Regulated Market worldwide (primarily in the US or Canada).

In aiming to achieve superior long-term returns, the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies)

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from gambling products;
- Companies that generate over 5% of their revenues from adult entertainment products;
- Companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund the Investment Manager will seek to identify companies which, in its view, provide the potential for long-term capital appreciation. The Investment Manager, through fundamental analysis of relevant companies, seeks to identify 'high quality' companies (for example, companies with stable earnings, sustainable growth and strong balance sheets) that are undervalued. This is done in order to ascertain whether the companies may provide the potential for long-term capital appreciation notwithstanding that equities of such companies may, at the time of purchase (in the Investment Manager's opinion), be undervalued. Other than investment in the excluded sectors listed above, the Investment Manager is not otherwise subject to any limitation on the types of companies to which it will seek exposure (either in terms of industry, size or focus).

The Investment Manager identifies companies which it believes will generate capital appreciation. In addition to the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the company through research and local investigation. ESG includes environmental items (such as the use of and impact on natural resources), social issues (such as employment practices and human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research from a wide variety of sources, including the Federated Hermes' proprietary ESG tools and analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that assessing the ESG opportunities and risks inherent to a company's direct operations, supply chain, and products/services is integral to delivering sustained outperformance. In undertaking such an assessment, the Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of pertinent ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Fundamental analysis and judgement is critical, and to that end, the most material ESG issues to an investment case are identified for each company being considered. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The Investment Manager's assessment of the ESG characteristics of a company results in an ESG score being assigned to each company considered for investment. The ESG assessment and subsequently determined score is the combination of a company's performance on a discrete set of material ESG topics, informed by both quantified metrics and the Investment Manager's subjective but informed judgement. Only companies which clear a threshold of ESG performance are eligible for investment. All else being equal, for portfolio construction purposes, this assessment would result in promotion of companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies which fall just short of the established ESG threshold only where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on those identified material ESG issues. The ESG assessment is used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of redressing poor ESG practices or capitalising on opportunities. In turn a company's responsiveness to engagement and the further insights gained are factored into the investment appraisal and ESG score. The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges

are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the Russell 2500 Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The Russell 2500 Index is a free float adjusted market cap-weighted index that is designed to measure the performance of shares in mid and small-sized companies, which are listed in US equity markets and represents the 2,500 smallest companies in the Russell 3000 Index. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock) and/or equity-related securities (such as GDRs and ADRs). These companies will be listed or traded on a Regulated Market worldwide (primarily in the US or Canada). Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

The Fund may acquire units/shares of listed closed-ended REITs that can deliver exposure to companies in the US or that derive a large proportion of their income from US activities.

Eligible CIS: The Fund may acquire units/shares of Eligible CIS including exchange-traded funds, money market funds and other funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e., it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options and Swaps.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Small and Mid-Cap Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.65% |
| L | 0.65% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes US SMID Equity Fund
Legal entity identifier: 5493000XIPS54YZE4T68

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|--|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, Exposure to Fossil Fuels, Energy Production from Non-Renewables, Energy Consumption Intensity, Water Intensity and Waste Intensity;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, Board Gender Diversity and Employee Turnover; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) is either to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below) to identify if a company has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company has in place limit the amount of harm or that the company is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

✘ Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. This is done by evaluating the results from the ESG scoring model, as well as, the underlying sustainability indicators used within the ESG Scoring Model. Reviewing both the output and the inputs to the ESG Scoring Model ensures that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing under-performance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager identifies companies which it believes will generate long-term capital appreciation. To achieve this the Investment Manager seeks to identify high quality small and mid-capitalisation companies, in US markets, that are trading at attractive valuations. In selecting investments for the Fund, the Investment Manager incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducts an assessment of the ESG characteristics of a company using its ESG Scoring Model which results in an ESG score being assigned to each company considered for investment. The score is measured on a scale of 0 to 30 and is comprised of a weighted combination of three distinct pillars; E & S factors, impact and governance. E&S factors include but are not limited to such metrics as carbon intensity (tonnes of scope 1 and 2 GHG per \$m revenue) along with employee turnover rates and accident rates and employee pay. Impact is measured by the proportion of revenue derived from positively impactful products and services. While governance factors include but are not limited to board independence, diversity and executive compensation and adherence with the Investment Manager's policy on good governance practices, outlined further below. The aggregate weighted score needs to be at least 18 out of 30 to be immediately eligible for investment. The assessment results in promotion of companies with reduced sustainability risks. Where a company scores below the threshold they may only be considered for investment if they have shown a desire to improve their ESG practices and/or a willingness to engage on those identified lagging ESG practices.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by its own research and from EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager may undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurs through meetings with company boards & management and through exercising voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. The engagement activity of the Fund is measured by the percentage of engagement progress (e.g. the percentage of engagement objectives which have achieved engagement objective milestones) and the effectiveness measured by monitoring changes over a rolling 3 year basis, in the specific sustainability indicators relevant to that engagement objective (for example a company's carbon intensity). Where a company is not receptive to engagement on sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, controversial weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.
- The Investment Manager will also exclude investment in companies involved in the following activities (based on information available to the Investment Manager on these companies);
 - Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from gambling products;
- Companies that generate over 5% of their revenues from adult entertainment products;
- Companies that generate over 5% of their revenues from GMO crop production; or
- Companies that are in contravention of the principles of the UN Global Compact

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

- Does the financial product invest in fossil gas and/or nuclear energy related

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas
- In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Global Small Cap Equity Fund

a sub-fund of Federated Hermes Investment
Funds public limited company, an umbrella fund
with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 17 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated high level of risk with high volatility attached to a fund investing in small-capitalisation companies. For more information please refer to the section entitled "Risk Factors".

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to provide long-term capital appreciation.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small capitalisation companies domiciled in, or that derive a large proportion of their income from, developed markets. The Fund may (but is under no obligation to) invest in component securities of the MSCI World Small Cap Index or in securities of companies listed in the countries referenced in this index. The MSCI World Small Cap Index measures the performance of small capitalisation companies across developed markets.

In aiming to achieve superior long-term returns, the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies)

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from gambling products;
- Companies that generate over 5% of their revenues from adult entertainment products;
- Companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund the Investment Manager will seek to identify companies that, in its view, provide the potential for long-term capital appreciation. The Investment Manager will therefore, through a fundamental analysis of relevant companies, seek to identify companies that are undervalued. This is done in order to ascertain whether the companies may provide the potential for long-term capital appreciation notwithstanding that equities of such companies may, at the time of purchase (in the Investment Manager's opinion), be undervalued. The Investment Manager will not, save in relation to the capitalisation of companies that may be invested in, be subject to any limitation on the types of companies in which it may invest (either in terms of industry or focus).

The Investment Manager identifies companies which it believes will generate long-term capital appreciation. In addition to the analysis of individual companies set out above, the Investment Manager will consider the Environmental, Social and Governance ("ESG") qualities of the company through research and local investigation. ESG includes environmental items (such as the use of and impact on natural resources), social issues (such as employment practices and human rights) and governance (being the way in which the company is run). The Investment Manager further assesses the ESG characteristics of a company by considering ESG research from a wide variety of sources, including the Federated Hermes' proprietary ESG tools and analysis from EOS at Federated Hermes, along with third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that assessing the ESG opportunities and risks inherent to a company's direct operations, supply chain, and products/services is integral to delivering sustained outperformance. In undertaking such an assessment, the Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of pertinent ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Fundamental analysis and judgement is critical, and to that end, the most material ESG issues to an investment case are identified for each company being considered. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The Investment Manager's assessment of the ESG characteristics of a company results in an ESG score being assigned to each company considered for investment. The ESG assessment and subsequently determined score is the combination of a company's performance on a discrete set of material ESG topics, informed by both quantified metrics and the Investment Manager's subjective but informed judgement. Only companies which clear a threshold of ESG performance are eligible for investment. All else being equal, for portfolio construction purposes, this assessment would result in promotion of companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies which fall just short of the established ESG threshold only where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on those identified material ESG issues. The ESG assessment is used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of redressing poor ESG practices or capitalising on opportunities. In turn a company's responsiveness to engagement and the further insights gained are factored into the investment appraisal and ESG score.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light

of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI World Small Cap Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI World Small Cap Index is a free float-adjusted market capitalisation weighted index that is designed to measure the performance of shares in small-sized companies, denominated in various currencies, which are listed in developed markets across the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and, save the above disclosure in relation to the percentage of assets that shall be invested in the MSCI World Small Cap Index for investment purposes, the Fund is not constrained by the constituents of any such index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market. Investments of the Fund may be denominated in the base currency or in other currencies.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to, small market capitalisation companies in, or that derive a large proportion of their income from, developed markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

The Fund may acquire units/shares of listed closed-ended REITs that can deliver exposure to companies in developed markets or that derive a large proportion of their income from activities in developed markets.

Debt: The Fund may invest in Convertible Debt Securities listed or traded on a Regulated Market worldwide. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares appropriate Eligible CIS that can deliver exposure to small market capitalisation companies. The Eligible CIS in which the Fund invests will meet the requirements of the Central Bank and may include exchange-traded funds and other funds of the Company. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt

Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e., it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options (including Options on Futures), Swaps and rights.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including Investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Small and Mid-Cap Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.60% |
| L | 0.60% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| X | 0.45% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Global Small Cap Equity Fund
Legal entity identifier: 549300Z154S624IFBU03

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|--|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, Exposure to Fossil Fuels, Energy Production from Non-Renewables, Energy Consumption Intensity, Water Intensity and Waste Intensity;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, Board Gender Diversity and Employee Turnover; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) is either to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example. Investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below) to identify if a company has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company has in place limit the amount of harm or that the company is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. This is done by evaluating the results from the ESG scoring model, as well as, the underlying sustainability indicators used within the ESG Scoring Model. Reviewing both the output and the inputs to the ESG Scoring Model ensures that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing under-performance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager identifies companies which it believes will generate long-term capital appreciation. To achieve this the Investment Manager seeks to identify high quality small capitalisation companies, in developed markets, that (in the Investment Manager's opinion) are trading at attractive valuations. The Investment Manager further incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducts an assessment of the ESG characteristics of a company using its ESG Scoring Model which results in an ESG score being assigned to each company considered for investment. The score is measured on a scale of 0 to 30 and is comprised of a weighted combination of three distinct pillars; E & S factors, impact and governance. E&S factors include but are not limited to such metrics as carbon intensity (tonnes of scope 1 and 2 GHG per \$m revenue) along with employee turnover rates and accident rates and employee pay. Impact is measured by the proportion of revenue derived from positively impactful products and services. While governance factors include but are not limited to board independence, diversity and executive compensation and adherence with the Investment Manager's policy on good governance practices, outlined further below. The aggregate weighted score needs to be at least 18 out of 30 to be immediately eligible for investment. The assessment results in promotion of companies with reduced sustainability risks. Where a company scores below the threshold they may only be considered for investment if they have shown a desire to improve their ESG practices and/or a willingness to engage on those identified lagging ESG practices.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by its own research and from EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager may undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurs through meetings with company boards & management and through exercising voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. The engagement activity of the Fund is measured by the percentage of engagement progress (e.g. the percentage of engagement objectives which have achieved engagement objective milestones) and the effectiveness measured by monitoring changes over a rolling 3 year basis, in the specific sustainability indicators relevant to that engagement objective (for example a company's carbon intensity). Where a company is not receptive to engagement on sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, Controversial Weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.
- The Investment Manager will also exclude investment in companies involved in the following activities (based on information available to the Investment Manager on these companies);
 - Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from gambling products;
- Companies that generate over 5% of their revenues from adult entertainment products;
- Companies that generate over 5% of their revenues from GMO crop production; or
- Companies that are in contravention of the principles of the UN Global Compact

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

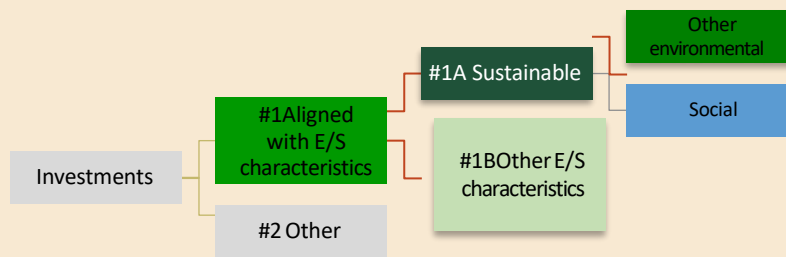

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● **Does the financial product invest in fossil gas and/or nuclear energy related**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas
- In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Absolute Return Credit Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 19 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a total return (capital growth and income) over at least a three to five-year time horizon and who understand and accept the associated level of risk attached to a fund that seeks to deliver an investment return in all market conditions. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to potential investment in emerging markets and in Below Investment Grade securities. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to target a positive investment return (absolute return) over a rolling 12 month period irrespective of market conditions, but there is no guarantee that this will be achieved and your capital is in fact at risk.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below). The Fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the Fund may invest will be selected on a global basis.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 10% of their revenues from gambling products; and
- companies that generate over 5% of their revenues from the extraction of unconventional oil sands.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund the Investment Manager will seek to identify Investments that it views as having the potential to add value while at the same time seeking to reduce market-related risks. For example, the Investment Manager will analyse securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Investment Manager's view, reflective of its value (after taking account of the credit risk). At the same time, the Investment Manager will analyse securities to seek to identify whether their

market price is reflective of the value of the issuer of the securities (when taking market news into account). For example, the Investment Manager could hold a bond that is issued on terms whereby its value is capped if the credit risk of an issuer reduces (with the market value of the bond reducing). At the same time it could also purchase bonds (from the same issuer) with different terms or enter into FDI (related to the same issuer) whose value increases in the same circumstances.

The Investment Manager identifies credit assets which it believes will generate an absolute return, irrespective of market conditions. In addition to the analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the issuer, as well as their impact on climate change. ESG analysis includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run), and climate change analysis assesses how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. The Investment Manager assesses the ESG and climate change characteristics of a company by considering research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies' own disclosures. The Investment Manager believes that quantitative data must be complemented by a fundamental bottom-up review of ESG and climate change issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager draws upon these internal and external sources to assign an ESG score and Climate Change Impact ("CCI") score to each country and company in the portfolio on a scale of 1-5 (5 being the lowest score). The Investment Manager will generally exclude the issuers with an ESG or CCI score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. The proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%. The CCI score helps identify securities of companies that are adapting their business models to reduce their environmental impact on climate change. If the issuers fail to deliver on the Investment Manager's carbon transition expectations, this will be reflected in their ongoing CCI score. These are considered before investment and on an ongoing basis. The Investment Manager has a tactical and strategic approach to investment with a view to achieving an absolute return regardless of market direction over a rolling 12 month period. A strategic approach is taken where the Investment Manager takes a medium-to-long term view on the purchase of a particular asset (i.e., the longer the asset is held the more likely it will generate a gain). A tactical approach is taken where the Investment Manager takes a short-to-medium term view on the purchase of a particular asset with a view to exploiting short-term valuation opportunities. The Investment Manager can also seek to exploit divergent views on two companies in a market-neutral way: it can use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. This may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way the Investment Manager would use FDIs to

reduce market-related risks with the Fund then benefitting from the increase or decrease in the value of the companies (as the case may be).

The Investment Manager intends to diversify the Fund's exposure but it is not limited as to the extent of investment in different geographic regions, industries and/or stocks of a particular market capitalisation. The Investment Manager will hold a diversified portfolio of Investments at any one time and will (while being primarily invested in debt securities) apply discretionary internal limits to determine the weights of specific asset classes within the Fund.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 0%-200% for long positions and 0%-100% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark.

The fund is subject to Federated Hermes Limited's ("FHL") approach to climate change and will contribute to FHL's commitments made through the Net Zero Asset Managers Initiative. Details of this approach and how FHL intends to achieve this can be found on the Manager's website at www.hermes-investment.com /climate-change-hub.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities, Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund may invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depositary Receipts) issued by companies domiciled in, or that derive

a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may also gain exposure to the aforementioned debt securities, money market instruments, equities, equity-related securities, Eligible CIS and/or financial indices through the use of FDIs and/or through investment in Convertible Debt Securities.

The Fund may also use FDIs to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The FDIs which may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures, Options (such as credit/index Options (to include credit default Swap indices), equity index Options, Options on credit default Swaps and equity Options) and Swaps (such as index Swaps, credit default Swaps, and interest rate Swaps).

A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment or financial index than to purchase the Investment or securities within a financial index directly) or for investment/strategy purposes (i.e. to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swap spreads of specific issuers or financial indices).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities in a quicker and/or more efficient manner). The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options (including Options on Futures), and Swaps (such as currency Swaps).

Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Credit exposure delivered by these financial indices may be long exposure (for example, allocating a portion of assets to the purchase of securities which, together, represent the holdings of a financial index), Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or credit default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via: [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash and/or invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Manager and the Investment Manager use a risk management technique known as absolute Value-at-Risk to assess the Fund's market risk to seek to ensure that the use of FDIs by the Fund is within regulatory limits. Using the Value-at-Risk approach for exposure measurement does not necessarily limit leverage levels. However, the Fund through its investments in FDIs will be leveraged.

The Fund's Value-at-Risk and expected level of leverage in terms of global exposure (as measured by the 'sum of notionals') is set out below.

| VaR Approach | Expected Level of Leverage (as measured by the "sum of notionals") |
|---------------------|---|
| Absolute | 100% - 400% of Net Asset Value |

*The "sum of the notionals" methodology measures leverage as the absolute value of the notionals of all derivative contracts used. It does not allow for offsets of FDI which reference the same underlying assets or hedging transactions and other risk mitigation strategies involving FDI, such as currency hedging, duration management and macro hedging. Consequently, the reported level of leverage based on the "sum of notionals" methodology may exceed, at times considerably, the economic leverage assumed by the Fund.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

Investors should note that, while the Fund seeks to deliver positive absolute returns over a specified period irrespective of market conditions the Fund does not guarantee that this will be achieved over the specified period, or any other period, and in fact, the capital invested within the Fund is at risk.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Collateral Reinvestment Risk | 33 |
| Contingent Convertible Securities Risk | 33 |
| Credit Default Swaps Risk | 34 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Loans Investment Risk | 40 |
| Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk | 41 |
| Swaps Risk | 45 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | <p>The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used.</p> <p>The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available.</p> |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 0.90% |
| F | 0.40% |
| I | 0.40% |
| M | 0.30% |
| P | 0.40% |
| R | 0.80% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A and Class I Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A and Class I Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available.

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Product name: **Federated Hermes Absolute Return Credit Fund**
 Legal entity identifier: **549300SL3ZGSZRKEVY73**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective: ___%**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective: ___%**

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *climate change impact;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, and Board Gender Diversity; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society and/or;*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where issuers may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model and CCI Scoring Model (as detailed below) to identify if an issuer has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG scoring model (the "ESG Scoring Model") and CCI Scoring Model, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

 Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors by: (i) evaluating the results from both the ESG Scoring Model and the CCI Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of both the ESG Scoring Model and the CCI Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model and the CCI Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager seeks to identify investments that it views as having the potential to add value while at the same time seeking to reduce market-related risks. The Investment Manager identifies credit assets which it believes will generate an absolute return, irrespective of market conditions, and which also have good or improving ESG exposure, which is achieved through ESG integration, engagement with underlying issuers and by excluding certain sectors, as outlined below.

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG and climate change characteristics of an issuer into its investment process. The Investment Manager achieves this by using its ESG Scoring Model to score a country or a company's ESG behaviours, assigning an ESG score and CCI Score on a scale of 1 to 5. The ESG Scoring Model considers environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management), and the CCI Scoring Model assesses how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. This ESG Scoring Model favours issuers with low environmental and social risks and issuers which comply with the Investment Manager's policy on good governance practices, outlined further below. The CCI score helps identify securities of companies that are adapting their business models to reduce their environmental impact on climate change. If the issuers fail to deliver on the Investment Manager's carbon transition expectations, this will be reflected in their ongoing CCI score. These are considered before investment and on an ongoing basis. As such, the Fund will have a higher percentage of investments with an ESG score and CCI score of 3 or lower. The Investment Manager may invest in issuers with a poor ESG score, where the issuer has shown a desire to improve its ESG behaviours. The Investment Manager will not invest in new issuers with an ESG score or CCI score of 5 from the investment universe. These scores are not static and therefore could be downgraded. In circumstances where an issuer's score is downgraded to a 5, the Investment Manager will seek to disinvest.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager will work with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks to develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, gambling unconventional oil sands and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in new issuers with an ESG score of 5 (scores are evaluated on an on-going basis and can fluctuate).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- *The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):*
 - *companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons;*
 - *companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;*
 - *companies that generate over 10% of their revenues from gambling products; and*
 - *companies that generate over 5% of their revenues from the extraction of unconventional oil sands.*

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 80% of the Fund's investments will be in issuers who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, which may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the attainment of the environmental and social characteristics in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● Does the financial product invest in fossil gas and/or nuclear energy related

activities that comply with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes SDG Engagement Equity Fund

a sub-fund of Federated Hermes Investment
Funds public limited company, an umbrella fund
with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 19 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth, alongside positive societal impact, over at least a three to five year time horizon who understand and accept the associated high level of risk with high volatility attached to a fund investing in small and mid-capitalisation companies. For more information please refer to the section entitled "Risk Factors".

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to provide long-term capital appreciation alongside positive societal impact, as outlined in further detail in the Investment Strategy below.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in, or that derive their income from, developed and emerging markets. These companies will be listed and/or traded on a Regulated Market worldwide.

In aiming to provide long-term capital appreciation alongside positive societal impact, the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels;
- Electricity utility companies with a carbon intensity not aligned with a below 1.5 degrees scenario;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products; and
- Companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will seek to identify companies that, in its view, provide the potential for long-term capital appreciation alongside delivering

positive societal impact aligned to the United Nations Sustainable Development Goals (the “UN SDGs”) (as outlined in further detail below)¹.

The Investment Manager will, through fundamental analysis of relevant companies, seek to identify companies that the Investment Manager believes will provide long term capital appreciation. It will do so by having regard to such factors as balance sheet quality, franchise value (i.e., brand strength and sustainability of the business model) and quality of management. The review process may include analysis of financial statements of target companies, meetings with management, consideration of the general economic environment in which the company operates, structural growth potential of the relevant industry segment and other relevant factors which allow the Investment Manager to assess the intrinsic value of a company, and compare this to the market valuation, as reflected in the current share price of the relevant company. The Investment Manager will also use standard accounting methodologies to assess the growth prospects by estimating its future operating cash flow less capital expenditures (and adjusting in each case for the time value of money). This analysis will determine whether the companies may provide the potential for long-term capital appreciation notwithstanding that equities of such companies may, at the time of purchase (in the Investment Manager’s opinion), be undervalued.

In order to promote environmental or social characteristics under SFDR, the Investment Manager will seek companies that also display the potential to be receptive to and benefit from active corporate engagement that will contribute to the UN SDGs. In addition to fundamental financial criteria, engagement criteria that may be used to identify such companies will include, for example, exposure to one or more UN SDGs via the supply chain, internal resources and the products and services of a company, and as assessment of the willingness and desire of company management to respond to such engagement. Engagement opportunities may arise from company specific matters or may come as a result of the Investment Manager and EOS’s understanding of best practice in other regions or industries.

It is anticipated that by identifying solutions to meeting specific UN SDGs, companies will be able to incrementally improve long-term financial returns and resilience by generating either additional revenue or higher productivity by delivering, for example, improved health or educational outcomes for their employees and local community. The Investment Manager’s in-house stewardship team and EOS will support both the identification of, and engagement with, suitable companies that meet the criteria outlined above and further below. The percentage of companies in the Fund that are engaged with will always be between 90%-100%. The UN SDGs are as follows: no poverty; zero hunger; good health and well-being; quality education; gender equality; clean water and sanitation; affordable and clean energy; decent work and economic growth; industry, innovation and infrastructure; reduced inequalities; sustainable cities and communities; responsible consumption and production; climate action; life below water; life on land; peace, justice and strong institutions; and partnership for the goals.

As part of the analysis of individual companies set out above, the Investment Manager will also undertake an assessment of the Environmental, Social and Governance (“ESG”) qualities of the company. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at

¹ Please refer to <https://sustainabledevelopment.un.org/?menu=1300> for further information on the United Nations Sustainable Development Goals.

Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager's approach to ESG integration in its investment analysis draws upon both internal and external sources. The Investment Manager may invest in companies with poor ESG ratings where the company has good potential to improve on its environmental and social characteristics and hence make a contribution, or greater contribution, to the attainment of the UN SDGs as, outlined above, provided that the company can evidence good corporate governance.

The Investment Manager will not, save in relation to the capitalisation of companies that may be invested in, be subject to any limitation on the types of companies in which it may invest (either in terms of industry or focus) so long as these companies are viewed by the Investment Manager to provide the potential for long-term capital appreciation alongside delivering positive societal impact aligned to the UN SDGs.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI All Country World SMID Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI All Country World SMID Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in small and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and the Index is not aligned with the environmental or social characteristics promoted by the Fund. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market. Investments of the Fund may be denominated in the base currency or in other currencies.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to, small and mid-market capitalisation companies in, or that derive a large proportion of their income from, developed and emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

The Fund may acquire units/shares of listed closed-ended REITs that can deliver exposure to companies in developed and emerging markets or that derive a large proportion of their income from activities in developed markets and/or emerging markets.

Debt: The Fund may invest in Convertible Debt Securities listed or traded on a Regulated Market worldwide. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares appropriate Eligible CIS that can deliver exposure to small and mid-market capitalisation companies. The Eligible CIS in which the Fund invests will meet the requirements of the Central Bank and may include exchange-traded funds and other funds of the Company. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options (including Options on Futures) and rights.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including Investments in FDIs, may amount to 110% of the Net Asset Value of the Fund and will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level", "Hedging at Share Class Level against Portfolio Currencies" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Small and Mid-Cap Companies Risk | 44 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.70% |
| L | 0.70% |
| M | 0.65% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| W | 1.25% |
| X | 0.60% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| W | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

| | |
|--|--|
| <p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|--|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- the potential to be receptive to, and benefit from, active corporate engagement that will be aligned to contribute to at least one or more of the United Nations Sustainable Development Goals (the “UN SDGs”); and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: MWh renewable energy generated, Metric T CO₂ avoided, M³ water saved, GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables, Energy Consumption Intensity;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises and Board Gender Diversity;*
- *SDG Engagement Intensity: % of engagement interactions aligned to each SDG; and*
- *Engagement Effectiveness: The rate of change over a rolling 3 year period of the environmental or social indicators related to the engagement interaction.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the relevant investee company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model to provide products/services that has a positive impact on the environment and the wider society This can be achieved by, for example, investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below) to identify if a company has any sustainability risks;*
- screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the

practices the company has in place limit the amount of harm or that the company is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. This is done by evaluating the results from the ESG scoring model, as well as, the underlying sustainability indicators used within the ESG Scoring Model. Reviewing both the output and the inputs to the ESG Scoring Model ensures that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing

under-performance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager seeks to invest in companies that will provide long term capital appreciation and that display the potential to be receptive to, and benefit from, active corporate engagement that will be aligned to contribute to at least one or more of the UN SDGs. This is achieved by having regard to such factors as balance sheet quality, franchise value (i.e., brand strength and sustainability of the business model) and quality of management.

In addition to fundamental financial indicator criteria, engagement criteria that may be used to identify such companies includes, for example, an assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Investment Manager following discussions between the Investment Manager and the company, in so doing enhancing the investees contribution to at least one or more of the UN SDGs. It is anticipated that by identifying solutions to meeting specific UN SDGs, companies will be able to incrementally improve long-term financial returns and resilience by generating higher sales and better productivity by delivering, for example, improved health and educational outcomes for their employees and local community.

Engagement activity includes setting specific targets and timelines in relation to an engagement objective, these targets will differ at an individual company engagement level. As part of the thematic investment strategy of the fund, UN SDG linked engagement objectives will be identified for all investments. In addition, non-UN SDG linked engagement may also take place with companies to address sustainability and governance risks. The effectiveness of the engagements is measured by the change to the specific sustainability indicators related to that engagement.

Where a company makes insufficient progress against the engagement objectives, it will result in divestment from that company.

The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, electricity utilities not aligned with a 1.5 degree scenario, Controversial Weapons, Conventional Weapons, tobacco, gambling and companies in contravention of the principles of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

- *The percentage of companies in the fund that are engaged with will always be between 90%- 100%*
- *Each engagement will also be aligned with at least one or more of the UN SDGs with a defined engagement thesis designed to effect positive change*
- *The Investment Manager will not invest in the following companies (based on information available to the Investment Manager on these companies);*
 - *Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels*
 - *Electricity utility companies with a carbon intensity not aligned with a below 1.5 degrees scenario*
 - *Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies*

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

that generate over 5% of their revenues from production of Conventional Weapons;

- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution
- Companies that generate over 2% of their revenues from gambling products; and
- Companies that are in contravention of the principles of the UN Global Compact

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or
- the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 30% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy²?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- Yes:
- In fossil gas
- In nuclear energy
- No

● **What is the minimum share of investments in transitional and enabling activities?**

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 30% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 30% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Impact Opportunities Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 20 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s sustainable investment objective.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation by investing in companies which will benefit from meeting the world's environmental and social challenges.

Investment Policy

The Fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation, as more particularly described in the annex to this Supplement.

The Fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted and/or traded on Regulated Markets worldwide, and the Fund will invest at least 67% of its assets in these securities.

In aiming to achieve superior long-term returns, the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies)

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Electricity utility companies with a carbon intensity that are not aligned with a below 2 degrees scenario
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenues from GMO crop production

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

The Investment Manager intends to create an actively managed portfolio using a disciplined bottom up stock selection process. The sustainable investment opportunity that the strategy addresses is the superior growth that can compound over time from identifying companies adopting innovative approaches to tackling issues facing society and whose growth is not solely driven by the normal economic cycle. In particular, the Investment Manager will seek to identify and invest in companies which stand to benefit from their investment in the development of solutions to such societal challenges as water shortages, environmental degradation, waste management, the search for sustainable energy sources, healthcare needs, aging populations, demographic change and the achievement of financial inclusion and global equality. The analysis of companies is based on a large number of proven fundamental factors relevant to the individual target company (such as company growth potential, cash generation, and financial discipline) as well as on impact and sustainability characteristics. In the latter case, the Investment Manager will have regard to such factors as impact opportunity (the opportunity for creating positive change, and the potential extent of that change). For example, a company which invests in an innovative new solution to such issues as water shortages or waste management will have a significant “first mover” advantage and consequential potential for significant returns if it successfully develops and markets such solution(s). The Investment Manager will also have regard to financial sustainability, and long-term value creation when evaluating companies for investment. The percentage of companies in the fund that are analysed for sustainability characteristics will always be between 90%-100%.

The Investment Manager bases its sustainable investment strategy on the belief that a company can achieve impact in three ways: (i) providing innovative new products; (ii) broadening access of existing products through preferential pricing or supplying to places where it was not supplied before; or (iii) operating in a way that by itself creates substantial benefits, for example through the company’s treatment of employees and the environment. Companies with a competitive advantage and a sustainable business model are sought after as they are more likely to offer visibility of earnings growth. The Investment Manager believes that companies which display the long term impact and sustainability characteristics outlined above will deliver better returns to investors in the medium to longer term.

In addition to the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance (“ESG”) qualities of the company. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager’s approach to ESG integration in its investment analysis draws upon both internal and external sources. The Investment Manager may invest in companies with poor ESG ratings where the company has shown to have good governance and meet the impact and sustainability characteristics outlined above. The ESG scores are also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve their sustainability characteristics.

The Fund’s market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-

100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI All Country World Investable Market Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI All Country World Investable Market Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and the Index is not aligned with the Fund's sustainable investment objective. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, cash and cash equivalents (for example, overnight deposits for efficient portfolio management purposes as detailed below), investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenue from, global developed and emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs which may be used by the Fund for such purposes include Warrants, Futures and Options.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund and will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level", "Hedging at Share Class Level against Base Currency" and "Hedging at Share Class Level against Portfolio Currencies" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Thematic Risk | 45 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.60% |
| L | 0.60% |
| M | 0.45% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| X | 0.25% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Impact Opportunities Equity Fund**
 Legal entity identifier: **213800KSESCSDJKBL382**

Sustainable investment objective

| Does this financial product have a sustainable investment objective? | |
|---|---|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes | <input type="radio"/> <input type="radio"/> <input type="checkbox"/> No |
| <input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 30% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 30% | <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The sustainable investment objective of the Fund is to invest in companies which will benefit from meeting the world's environmental and social challenges.

The Fund targets investment in global companies identified as contributing to one or more of nine environmental or social investment themes, which are aligned to the United Nations Sustainable Development Goals (UN SDGs).

- *Energy transition: Transforming the energy system to power a low-carbon economy*
- *Circular economy: Enhancing resource efficiency and waste reduction*
- *Water: Improving access to quality supply and preservation of the resource*
- *Health and wellbeing: Improving life expectancy and quality*
- *Education: Providing opportunities for all – irrespective of wealth, geographical location or ability*
- *Financial inclusion: Providing financial services to underserved populations*
- *Future mobility: Improving vehicle efficiency to increase low-carbon transportation*

- *Food security: Ensuring a sustainable food supply and productive farmlands for future generations*
- *Impact enablers: Providing crucial solutions and services to impactful companies directly involved in the various themes*

A reference benchmark is not used for the purposes of attaining the sustainable investment objective.

The Fund may make sustainable investments in issuers which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaptation as defined under the Taxonomy Regulation (EU) 2020/852

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

- *Environmental Indicators: Annualised Metric T CO2 emitted (Scope 1 & 2), Metric T CO2 avoided, MW installed renewable capacity, MWH renewable energy generated, M3 water used, M3 water saved, Metric T waste generated, Metric T waste recycled, MT Food loss/waste avoided, Hectares forest or land restored or conserved and # species preserved*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, Employee turnover (%), # incidents/accidents/1m hours worked, % women on board representation, % female manager representation, % Health Care R&D/Sales, # patients treated, # lives extended, # labs enabled, # new people with financial access, # students enrolled and # people with access to nutritious food*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS, and*
- *% of AUM contributing to each UN SDGs*

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager conducts a sustainability assessment for each investment, as further detailed below, which includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes;

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers sustainability assessment to identify if a company has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's sustainability assessment, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these companies.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified through a proprietary framework which considers the sustainability risks and opportunities for each company, and uses the breadth and depth of the Investment Manager's engagement data to put this analysis in context. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks are identified the company is identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The sustainable investment opportunity that the strategy addresses is the superior growth that can compound over time from identifying companies adopting innovative approaches to tackling issues facing society and whose growth is not solely driven by the normal economic cycle. In order to achieve the sustainable investment objective, the Fund targets investment in global companies identified as contributing to one or more of nine environmental or social investment themes, which are aligned to the United Nations Sustainable Development Goals (UN SDGs).

- *Energy transition: Transforming the energy system to power a low-carbon economy*
- *Circular economy: Enhancing resource efficiency and waste reduction*
- *Water: Improving access to quality supply and preservation of the resource*
- *Health and wellbeing: Improving life expectancy and quality*
- *Education: Providing opportunities for all – irrespective of wealth, geographical location or ability*
- *Financial inclusion: Providing financial services to underserved populations*
- *Future mobility: Improving vehicle efficiency to increase low-carbon transportation*
- *Food security: Ensuring a sustainable food supply and productive farmlands for future generations*
- *Impact enablers: Providing crucial solutions and services to impactful companies directly involved in the various themes*

The Investment Manager uses a proprietary 'Impact Database' to analyse for sustainable investments, and to determine which of the Fund's themes (as mentioned above) an investment may contribute to. The database draws on data from company, sector, and impact related industry reports. It provides theme specific KPI

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

outputs including, but not limited to: number of new people with financial access (Financial Inclusion); -MWH renewable energy generated and Metric T CO2 avoided (Energy Efficiency) and M3 water saved (Water). At a portfolio level, the Investment Manager can therefore measure what % of the Fund is contributing to each individual theme (and therefore SDG) to measure the attainment of the sustainable objectives. The Investment Manager's stock selection process comprises of three primary considerations:

- (i) *The Fundamentals of the business model: the Investment Manager seeks to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework, identify those who are capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager seeks to identify companies which are bringing value to society, rather than drawing from it.*
- (ii) *ESG Metrics: the Investment Manager considers how well companies manage environmental, social and governance factors (including how companies limit their emissions, how they ensure product safety, how they manage diversity in the workforce and how their board is structured). When looking at the ESG profile of a company, consideration will be given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.*
- (iii) *Product Impact: involves a thematic analysis whereby the Investment Manager will seek to understand the broader benefit or cost of each company. As well as looking at companies which "do no significant harm", the Investment Manager also looks beyond this and, where appropriate, the portfolio will actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as (i) companies that avoid harm, (ii) companies that provide benefits to all stakeholders and (iii) companies that contribute to solutions. The belief is that following this thematic approach to idea generation and focusing on companies which meet the 'sustainable leader' criteria facilitates the Fund's goal to achieve superior long-term returns.*

Engagement: Where material ESG risks are identified, the Investment Manager works either directly or with the in-house stewardship team, EOS at Federated Hermes ("EOS"), to engage with companies to mitigate those risks and promote good practices. Engagement occurs through meetings with company boards & management and through exercising voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, specific targets and timelines are set in relation to that engagement, these targets will differ at an individual company engagement level. Where a company is not receptive to engagement on material ESG risks, or makes insufficient progress in addressing them over time, it may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, electricity utilities not aligned with a 2 degree scenario, Controversial Weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The Investment Manager will select investments to seek to achieve the following binding criteria:

- The percentage of companies analysed for sustainability characteristics in the Fund will always be between 90%-100%.
- All invested companies will contribute to one or more of the Fund's investable themes.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;
- Electricity utility companies with a carbon intensity that are not aligned with a below 2 degree scenario

- Companies that generate over 0% of their revenues from the production of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or
- the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives. A minimum of 90% of the portfolio will be invested in companies who contribute to the sustainable investment objective through their contribution to one or more of the nine environmental or social investment themes. Those investments will also evidence good governance practice in accordance with the Investment Manager’s policy on good governance and do no significant harm to any other environmental or social objectives within the meaning of the SFDR. The portfolio is further split with a minimum of 30% in the environmental investment themes and 30% in the social investment themes.

#2 Not sustainable includes the remaining investments in the Fund, which do not qualify as sustainable investments and may be held for efficient portfolio management and cash management purposes. This includes derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

● How does the use of derivatives attain the sustainable investment objective?

The use of derivatives does not contribute to the attainment of the Fund’s sustainable objective. The Fund may use derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund may make sustainable investments in companies which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaption and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852 (“Taxonomy”). A minimum of 2% of the Fund’s investments will be aligned with the environmental objectives under the Taxonomy Regulation. The “do no significant harm” principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

In fossil gas
 In nuclear energy

 No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What is the minimum share of investments in transitional and enabling activities?**

A minimum of 1% of the Fund's investments will be aligned with the transitional and enabling activities under the Taxonomy Regulation.

🌐 **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the EU taxonomy.

👤 **What is the minimum share of sustainable investments with a social objective?**

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

📄 **What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Investments which do not contribute to the Fund's sustainable objective will only be held for efficient portfolio management and cash management purposes. The Fund may invest in derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise

cash) subject to the conditions and limits of the Central Bank of Ireland. There are no minimum environmental and social safeguards for these investments.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

- **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

Not applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable

- **How does the designated index differ from a relevant broad market index?**

Not applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not applicable

Where can I find more product specific information online?

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Supplement

Federated Hermes Unconstrained Credit Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 21 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a total return (capital growth and income) over at least a three to five year time horizon and who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in Below Investment Grade securities and to potential investment in emerging markets. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to generate capital growth and a high level of income over the long term.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below). The Fund will manage and adapt its market exposures dependent on market conditions, and the view of where markets will move to in the short, medium and long term. The Fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may choose to reduce the market-related risks within the Fund by using FDIs to create a Synthetic Short Exposure to credit indices. In other market conditions, the Investment Manager can also seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long or short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market-related risks with the Fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the Fund may invest will be selected on a global basis.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 10% of their revenues from gambling products; and
- companies that generate over 5% of their revenues from the extraction of unconventional oil sands.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest at least 80% in a diversified portfolio of debt securities: Investment Grade securities, Below Investment Grade securities (high yield), emerging market debt securities (i.e., debt situated in emerging markets), credit spreads (i.e., the difference between the quoted rates of return on two different investments that compensate investors for the relative corporate credit risk of the underlying company being able to repay its debt) via Credit Default Swaps ("CDS") and Credit Default Swaps Indices ("CDSI"), Asset-Backed Securities, preference shares, convertible bonds and secured bank loans ("Credit Asset Classes") as described in the section entitled "Categories of Investment" below, using the methods of access as described in the section entitled "Methods of Access and Efficient Portfolio Management" below. CDS have several benefits compared to investing in cash bonds. CDS do not have interest rate risk and the Fund only gains exposure to the credit spread of the underlying issuer when it invests via CDS. This differs from a corporate bond which provides exposure to both the credit spread and interest rate risk. The Fund can choose which maturity date the CDS is most attractive while cash bonds offer less flexibility on maturity dates. CDS can also provide a more liquid way to access the credit risk of the issuer. CDSI provide access to the credit spread component of the market without the interest rate risk and are extremely liquid. The Investment Manager intends to use an active approach to seek risk-adjusted returns by combining a top-down approach, i.e., taking into account economic, political and other factors that influence the broader economy (interest rates, currencies, inflation and economic growth and as further outlined below) and bottom-up approach, i.e., based on fundamental analysis of the Credit Asset Classes on a case-by-case basis as further outlined below. The Fund is relatively unconstrained in nature and the portfolio holdings may vary greatly at different points depending on the market conditions. The unconstrained approach allows the Investment Manager to manage the Fund in a relatively defensive manner or with more risk when the market conditions require it.

The Investment Manager will identify, using the active approach described above and further below, those Credit Asset Classes which have the potential to add value while at the same time seeking to reduce market-related risks by considering a broad analysis of general economic conditions. The Investment Manager intends to diversify the Fund's exposure but it is not limited as to the extent of investment in different geographic regions, industries and/or instruments of a particular market size. The Investment Manager will hold a diversified portfolio of Investments at any one time and will (while being primarily invested in debt securities) apply discretionary internal limits to determine the weights of specific asset classes and instruments within the Fund. The Investment Manager applies internal limits on the less liquid elements of the portfolio. These remain internal as they are dynamic and may change depending on market conditions. Additionally, the Investment Manager may choose to hold different market, sector, risk or instrument limits within the portfolio, depending on market conditions. Due to the unconstrained nature of the Fund, these limits and the portfolio construction can change greatly depending on market conditions.

The Investment Manager intends to use this active approach to seek returns within each Credit Asset Class through a thorough analysis of individual corporate and/or government issuers. Based on this analysis of individual issuers and through assessment of the Environment Social

and Governance (“ESG”) qualities of the issuer, the Investment Manager will identify Credit Asset Classes which it believes will generate a high level of total return (capital growth and income). ESG represents governance (being the way in which the company is run), environmental issues (such as the impact on natural resources) and social issues (such as human rights). The Investment Manager incorporates analysis that assesses the environmental, social and governance aspects of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies’ own disclosures. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager’s approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each country and company in the portfolio. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%. To generate these ESG scores, the Investment Manager uses Federated Hermes’ proprietary scoring methodology to score a country or a company’s ESG behaviours, assigning the ESG score on a scale of 1 to 5. The proprietary ESG score favours companies with lower ESG risks than companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in issuers with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The Investment Manager will generally exclude the issuers with an ESG score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. The quantitative ESG score is combined with actively engaging companies with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. This fundamental bottom-up analysis of individual Credit Asset Classes will be used to generate returns through anticipated price changes. For example, the Investment Manager will analyse securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Investment Manager’s view, reflective of its value (after taking account of the credit risk). At the same time, the Investment Manager will analyse securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (as determined by the fundamental analysis outlined above and when taking market news into account).

The Fund’s market exposure (which is the aggregate exposure to the Categories of Investments outlined below and excludes cash held by the Fund) may vary in time and will typically range between 75%-300% for long positions and 0%-250% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager’s analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities include bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities, Contingent Convertibles, Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes, short-term mortgage and Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Equity: The Fund will not actively seek exposure to equities, however the Fund may invest in or hold preferred stock, preference shares and/or Depositary Receipts (investing in small, medium and/or large cap) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. The Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may also gain exposure to the aforementioned debt securities, money market instruments, equities, equity-related securities, Eligible CIS and/or financial indices through the use of FDIs and/or through investment in Convertible Debt Securities. The Fund may also use FDIs to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The FDIs which may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures (such as government bond Futures), Options (such as credit/index Options (to include credit default Swap indices), equity index Options, Options on CDS and equity Options) and Swaps (such as index Swaps, credit default Swaps, and interest rate Swaps).

A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment or financial index than to purchase the Investment or securities within a financial index directly) or for investment/strategy purposes (i.e. to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swap spreads of specific issuers or financial indices).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities in a quicker and/or more efficient manner). The FDIs that may be used by the Fund for such purposes include Futures, Options (including Options on Futures) and Swaps (such as currency Swaps). Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Credit exposure delivered by these financial indices may be long exposure (for example, allocating a portion of assets to the purchase of securities which, together, represent the holdings of a financial index), Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or credit default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash and/or invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Manager and the Investment Manager use a risk management technique known as absolute Value-at-Risk to assess the Fund's market risk to seek to ensure that the use of FDIs by the Fund is within regulatory limits. Using the Value-at-Risk approach for exposure measurement does not necessarily limit leverage levels. However, the Fund through its investments in FDIs will be leveraged.

The Fund's Value-at-Risk and expected level of leverage in terms of global exposure (as measured by the 'sum of notionals') is set out below.

| VaR Approach | Expected Level of Leverage (as measured by the "sum of notionals") |
|---------------------|---|
| Absolute | 100% - 400% of Net Asset Value |

**The "sum of the notionals" methodology measures leverage as the absolute value of the notionals of all derivative contracts used. It does not allow for offsets of FDI which reference the same underlying assets or hedging transactions and other risk mitigation strategies involving FDI, such as currency hedging, duration management and macro hedging. Consequently, the reported level of leverage based on the "sum of notionals" methodology may exceed, at times considerably, the economic leverage assumed by the Fund.*

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

Investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Contingent Convertible Securities Risk | 33 |
| Credit Default Swaps Risk | 34 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Loans Investment Risk | 40 |
| Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk | 41 |
| Options Risk | 42 |
| Swaps Risk | 45 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the Dealing Day. |
| Valuation | <p>The Valuation Point will be close of business in the relevant market on each Business Day provided that if any of the relevant markets are not open on a Business Day, the value of the relevant Investments at the close of business on the previous Business Day shall be used.</p> <p>The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available.</p> |
| Income Equalisation | The Fund operates income equalisation as disclosed in the "Income Equalisation" section in the Prospectus . |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depositary's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depositary fee of up to 0.0110% of its Net Asset Value to the Depositary. The Fund will also pay other costs to the Depositary such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Unconstrained Credit Fund
Legal entity identifier: 213800HODS5PQAT7LD40

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|--|
| <input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments |
|---|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, and Board Gender Diversity; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; (ii) or to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where issuers may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) *taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model (as detailed below) to identify if an issuer has any sustainability risks;*
- (ii) *screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) *identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing

underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager uses an active approach to seek risk-adjusted returns. This is achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings direct the team's bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provide superior relative value. The Investment Manager further incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of an issuer into its investment process. The Investment Manager achieves this by using its ESG Scoring Model to score a country or a company's ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considers environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favours issuers with low environmental and social risks and issuers which comply with the Investment Manager's policy on good governance practices, outlined further below. As such, the Fund will have a higher percentage of investments scoring 3 or lower. The Investment Manager may invest in issuers with a poor ESG score, where the issuer has shown a desire to improve its ESG behaviours. The Investment Manager will not invest in new issuers with an ESG score of 5 from the investment universe. These scores are not static and therefore could be downgraded. In circumstances where an issuer's score is downgraded to a 5, the Investment Manager will seek to divest.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager will work with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks to develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, gambling unconventional oil sands and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- *The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%.*
- *The Investment Manager will not invest in new issuers with an ESG score of 5 (scores are evaluated on an on-going basis and can fluctuate).*
- *The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):*
 - *companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made*

product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Weapons;

- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 10% of their revenues from gambling products; and
- companies that generate over 5% of their revenues from the extraction of unconventional oil sands.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or
- the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 80% of the Fund's investments will be in issuers who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, which may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the attainment of the environmental and social characteristics in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

Enabling activities directly enable other activities to make a substantial are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Global Emerging Markets SMID Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 22 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund is suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors due to investment in emerging markets and Russian listed or traded securities.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to small and mid-capitalisation companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The Fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide. The Fund will follow a long only equity strategy.

The Fund may also invest in securities of issuers in less-developed or emerging market countries that are not included in standard emerging market benchmarks or classifications and are traditionally less accessible to investors or in the early stages of capital market or economic development (such countries are commonly referred to as "frontier" market countries). Frontier market countries generally have smaller economies and less developed capital markets than traditional emerging and developing market countries. Investments in issuers in frontier market countries are included in the two-thirds of the Fund's assets discussed in the investment policy above.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons;
- companies that generate over 0% of their revenues from the production of weapons for retail use or companies that generate over 5% of their revenues from the distribution of weapons for retail use;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution; and
- companies that generate over 10% of their revenues from the extraction of unconventional fossil fuels (thermal coal, shale energy, oil sands, or Arctic oil and gas).

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

The Investment Manager conducts analysis of individual companies in search of favourable investment opportunities. These opportunities are also evaluated in the context of the conditions and potential for growth in the relevant global emerging market region/country. The Investment Manager will run a portfolio with a long-term investment perspective. The Investment Manager will invest in companies of different sizes and integrates the consideration of environmental, social and governance factors into the investment analysis.

The Investment Manager identifies companies which it believes will generate capital appreciation through fundamental company analysis whereby the Investment Manager seeks high-quality and efficient companies which benefit from long-term trends when such companies are trading at attractive values. In addition to the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the company, including evidence of companies' awareness, vision and planning on ESG issues, through research and local investigation. ESG includes environmental items (such as the impact on natural resources and climate change), social issues (such as human rights and employee wellbeing) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager further assesses the ESG characteristics of a company by assigning an ESG score to each company within its investment universe. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a company's ESG behaviours on a scale. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The Investment Manager believes that engagement by EOS at Federated Hermes is an important tool to drive change to better sustainability.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. The long position range is not a limit and the actual exposure may from time to time fall outside this estimated range. For the avoidance of doubt, the Fund will not hold short positions.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI Emerging Markets SMID Cap Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI Emerging Markets SMID Cap Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in mid and small-sized companies, denominated in various currencies, which are listed in emerging markets across the world. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market. Investments of the Fund may be denominated in the base currency or in other currencies.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related securities (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenues from, global emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Debt: The Fund may hold Investment Grade government and Investment Grade and Below Investment Grade corporate fixed income debt securities of fixed and/or floating rate and that may be rated or unrated (including bonds, notes, and/or Convertible Debt Securities) listed or traded on a Regulated Market. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such collective investment schemes satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes are Warrants, Futures, Options, participation notes, convertible bonds and rights.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including Investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Investment Restrictions

The Fund may invest up to 30% of its Net Asset Value in Russian listed or traded securities. Any such investment shall be limited to those securities that are listed or traded on the Moscow Exchange.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

Of particular relevance is the following risk:

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Frontier Markets Risk | 37 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Stock Connect Risk | 43 |
| Russian Investment Risk | 44 |
| Small and Mid-Cap Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.75% |
| F | 1.00% |
| I | 1.00% |
| K | 0.75% |
| L | 0.75% |
| P | 1.00% |
| R | 1.50% |
| T* | 0.00% |
| X | 0.45% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes Global Emerging Markets SMID Equity Fund
Legal entity identifier: 213800GMQKIA91NSV588

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

| | |
|--|---|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|--|---|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, Exposure to Fossil Fuels, Energy Consumption from Non-Renewables, Water Intensity, Waste Intensity;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, Board Gender Diversity and Employee Turnover; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate the impacts of such products or services on the environment or to stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Fund's sustainable investments will contribute to either of these objectives by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model (as detailed below) to identify if a company has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company has in place limit the amount of harm or that the company is being engaged on that topic

Where a company is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's ESG assessment (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

 Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager's qualitative review of the investee companies, to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the assessment. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing

underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager will seek to invest in high quality and efficient small to mid-capitalisation companies trading at attractive valuations, in global emerging markets, where conditions are supportive of growth. The Investment Manager further incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducts an assessment of a company's ESG characteristics based on both quantified ESG metrics and through a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors include, but are not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as Board gender diversity and employee turnover). The ESG assessment favours companies with reduced ESG risks and which comply with the Investment Manager's policy on good governance practices, outlined further below. The Investment Manager may invest in companies with a poor ESG factors, where the company has shown a desire to improve their ESG behaviours.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager may undertake direct engagement with the company or works with EOS to engage with companies to address those risks. Engagement occurs through meetings with company boards and management and through the exercise of voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company is not receptive to engagement on sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, unconventional fossil fuels and companies in contravention of the principles of the UN Global Compact.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons.
- Companies that generate over 0% of their revenues from the production of weapons for retail use or companies that generate over 5% of their revenues from the distribution of weapons for retail use.
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- Companies that generate over 10% of their revenues from the extraction of unconventional fossil fuels (thermal coal, shale energy, oil sands, or Arctic oil and gas).

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance

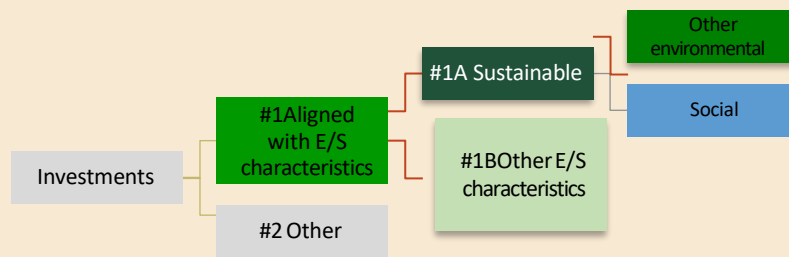

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 10% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

● To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

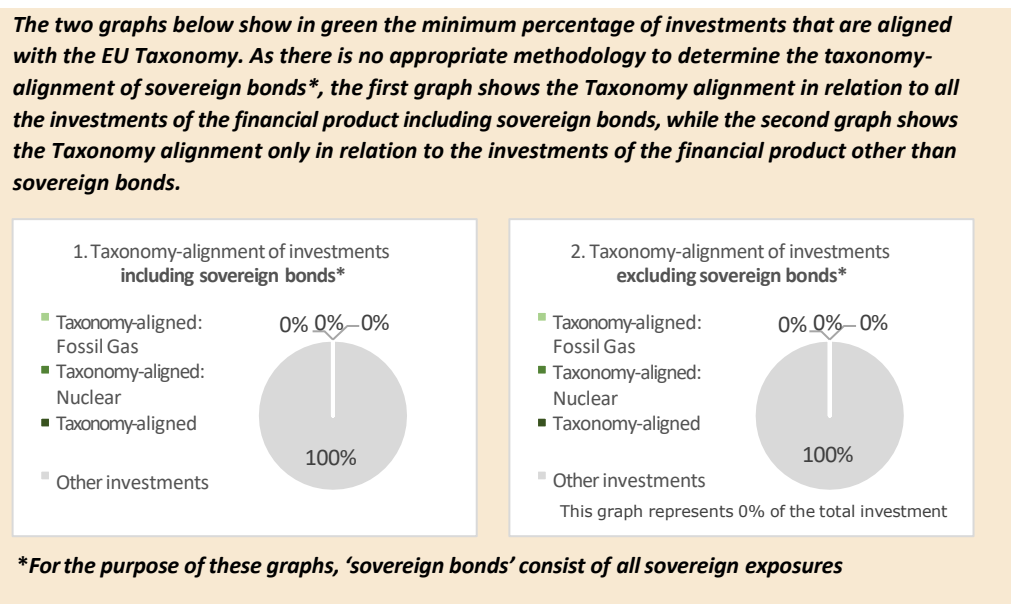

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Yes: In fossil gas In nuclear energy

No:

● **What is the minimum share of investments in transitional and enabling activities?**

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 10% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Supplement

Federated Hermes Emerging Markets Debt Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager –

Federated Investment Counseling

The date of this Supplement No. 23 is 7 May 2024

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a high total return comprising capital growth and income over at least a three to five-year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in emerging markets and investments in Below Investment Grade securities. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to deliver capital growth and a high level of income.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective over a rolling five year period, by investing at least 80% in a diversified portfolio of foreign currency denominated debt securities (which are outlined in the "Debt" sub-section in the Categories of Investment section below) issued by governments, government agencies and other quasi-governmental institutions issued in or by global emerging market countries, or issued by emerging market companies. Exposure to global emerging markets will be primarily obtained by the Fund through foreign currency sovereign and corporate bonds, but the Fund may invest opportunistically into locally denominated debt securities to a maximum of 20%. The Fund may invest up to 100% into Below Investment Grade securities, however it will typically invest no more than 75% in such securities during periods of normal market activity. From time to time, the Fund may invest into debt securities issued by supranational institutions.

The Fund will manage and adapt its market exposures dependent on market conditions (i.e. a variety of factors that could influence the markets to act a certain way yielding either a positive or a negative return, for example, increase or decrease in interest rates), and the Investment Manager's view of market trends (depending on, for example, credit quality of the issuer or region) in the short, medium and long term.

In aiming to deliver capital growth and a high level of income over a rolling five year period, the Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons;
- companies that generate over 10% of their revenues from the mining or energy generation of thermal coal; and
- companies that are in contravention of principles 4 and 5 of the UN Global Compact

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest in a diversified portfolio of Investment Grade and Below Investment Grade global emerging market debt securities (the Fund's exposure to Below Investment Grade securities may be up to 100%), futures (the underlying of which will be currencies and interest rates), unsecured bank loans (the Fund's exposure to such loans may be up to 10%) and credit default swaps ("**CDS**") as described in the section "Methods of Access and Efficient Portfolio Management" below.

The Investment Manager intends to diversify the Fund's exposure and is not limited as to the extent of investment in different geographic regions, industries or instruments. The Investment Manager will hold a diversified portfolio of Investments (while being primarily invested in debt securities) at any one time but may apply discretionary internal limits, which are dynamic and subject to change depending on market conditions (as outlined above), to determine the weights of specific asset classes and instruments within the Fund.

The Investment Manager intends to use an active approach to seek risk-adjusted returns through combining top-down allocation across the liquid credit spectrum with bottom-up, high conviction security selection. This fundamental bottom-up analysis of individual debt securities will be used to generate returns through anticipated price changes. The Investment Manager will also utilise both country risk and credit risk analyses. For example, the Investment Manager will analyse securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Investment Manager's view, reflective of its value (after taking account of the credit risk). At the same time, the Investment Manager will analyse securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (as determined by the fundamental analysis outlined above and when taking market news into account).

The Investment Manager identifies debt securities which it believes will generate a high level of total return (capital growth and income). In addition to the analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("**ESG**") qualities of the issuer. This analysis is performed using the Investment Managers proprietary Country of Issuance, Debtholder Stewardship, Environmental, Social and Governance rating process ("**CD-ESG**"). CD-ESG includes analysis of the country of issuance from a political and economic perspective, an analysis of the stewardship of the issuer, environmental items (such as the impact on greenhouse emissions and natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager incorporates analysis that assesses the CD-ESG characteristics of a government, government agency, quasi-governmental institution or a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies' own disclosures. The Investment Manager believes that quantitative CD-ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager's approach to CD-ESG integration in its investment analysis draws upon these internal and external sources to assign an CD-ESG score to each country and company in the portfolio. The percentage of CD-ESG-analysed issuers in the fund will always be between 90%-100%. To generate these CD-ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or a company's CD-ESG behaviours, assigning the CD-ESG score on a scale of 1 to 3. This proprietary CD-ESG score favours governments and companies with lower CD-ESG risks and companies with

good governance, who are actively improving their focus on CD-ESG issues. The Investment Manager may invest in companies with poor CD-ESG scores where the government or company has shown a desire to improve their CD-ESG behaviours and can demonstrate good governance practices and/or a willingness to engage in issues if they arise. The CD-ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor CD-ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The Fund's market exposure (which is exposure to the categories of investments outlines below, and excludes cash held by the Fund) may vary in time and will typically range between 75%-140% for long positions and 0%-40% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposure may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the JP Morgan EMBIGD Global Diversified for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The JP Morgan EMBIGD Global Diversified is a market capitalisation weighted emerging market index that is designed to track the bond performance of emerging markets sovereign debt denominated in US Dollar. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents (such as term deposits and bank certificates), Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities include bonds (that may be issued by governments, government agencies or other quasi-government institutions of/in global emerging markets, corporations domiciled in, or that derive a large proportion of their income from, global emerging markets, and/or public institutions such as supranational institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities (including contingent convertible debt securities in which the Fund may invest up to 10% of its net assets), Amortising Bonds, Zero Coupon Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper and floating rate notes). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Eligible CIS: The Fund may, on an ancillary basis, acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible

CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Equity: The Fund will not actively seek exposure to equities, however the Fund may invest in or hold preferred stock, preference shares and/or Depositary Receipts (investing in small, medium and/or large cap) issued by companies domiciled in, or that derive a large proportion of their income from, global emerging markets. The Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may also gain exposure to the aforementioned debt securities, money market instruments, equities, equity-related securities (common stocks, new issues, convertibles and warrants), Eligible CIS and/or financial indices through the use of FDIs and/or through investment in Convertible Debt Securities (including contingent convertible debt securities in which the Fund may invest up to 10% of its net assets).

The Fund may also use FDIs to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The FDIs which may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures (such as government bond Futures), Options (such as credit/index Options (to include CDS indices), equity index Options, Options on CDS and equity Options) and Swaps (such as index swaps, CDS, and interest rate swaps).

A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment or financial index than to purchase the Investment or securities within a financial index directly) or for investment/strategy purposes (i.e. to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in CDS spreads of specific issuers or financial indices).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities in a quicker and/or more efficient manner). The FDIs that may be used by the Fund for such purposes are Futures, Options (including Options on Futures) and Swaps (such as currency swaps).

Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or CDS. These exposures may be achieved

through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash and/or invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 40% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 140% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Liquidity Risk | 24 |
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Contingent Convertible Securities Risk | 32 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Counterparty Default Risk | 39 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depositary's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depositary fee of up to 0.0110% of its Net Asset Value to the Depositary and any other costs such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.15% |
| F | 0.65% |
| I | 0.65% |
| K | 0.55% |
| L | 0.55% |
| M | 0.45% |
| P | 0.65% |
| R | 1.30% |
| X | 0.35% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment/capacity-management

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available.

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Emerging Markets Debt Fund**
 Legal entity identifier: **213800S31X2GZF162275**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- Environmental Indicators: GHG Intensity of investee Countries, Carbon Emissions
- Social Indicators: Violation of UN Global Compact Principles 4 and 5
- Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How have the indicators for adverse impacts on sustainability factors been taken into account?

Not applicable

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Does this financial product consider principal adverse impacts on sustainability factors?

✘ Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors by: (i) evaluating the results from the Investment Manager’s proprietary CD-ESG scoring model (the “CD-ESG Scoring Model” – see further detail below); and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the CD-ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the CD-ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the CD-ESG Scoring Model. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The investment strategy seeks debt securities which the Investment Manager believes will generate a high level of total return (capital growth and income) across a broad range of geographic regions and industries across global emerging markets and which also have good or improving CD-ESG exposure. The CD-ESG exposure of an issuer is determined in the following manner by incorporating ESG factors aimed at the promotion of the environmental and social characteristics in the investment process:

ESG Integration: The Investment Manager incorporates analysis that assesses the ESG characteristics of an issuer into its investment process. The Investment Manager achieves this by using its proprietary CD-ESG Scoring Model to assesses the ESG characteristics of a government, government agency, quasi-governmental institution or an issuer by considering the country of issuance from a political and economic perspective, an analysis of the stewardship of the issuer and ESG research (which includes but is not limited to GHG intensity of the investee country and whether the investee country is subject to any international treaties or conventions). The CD-ESG score is generated to score each country's and issuer's CD-ESG behaviours on a scale of 1 to 3. The CD-ESG score favours issuers with lower ESG risks and issuers which comply with the Investment Manager's policy on good governance practices, outlined further below. The Investment Manager may invest in issuers with a poor CD-ESG scores, where the issuer has shown a desire to improve their ESG behaviours.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where material ESG risks are identified, the Investment Manager works with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on material ESG risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in issuers that generate over 0% of their revenues from the production of Controversial Weapons, issuers that generate over 10% of their revenue from the mining or energy generation of thermal coal or issuers that are in contravention of principles 4 and 5 of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

- The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons;
- The Investment Manager will not invest in issuers that generate over 10% of their revenues from the mining or energy generation of thermal coal.
- The Investment Manager will not invest in issuers that are in contravention of principles 4 and 5 of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of Federated Hermes Limited's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

However, no investments will be made in any company which is in violation of Principles 4 and 5 of the UN Global Compact Principles relating to forced and compulsory labour and the abolishment of child labour.

Further information on the Federated Hermes Limited's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may utilise FDIs, such as Credit Default Swaps at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned

#1 Aligned with E/S characteristics includes a minimum of 70% of the Fund's investments will be in issuers who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2Other includes the remaining investments of the Fund, which may include issuers that do not meet the characteristics promoted by the Fund but can evidence can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

Investment Manager's policy of good governance, as outlined above, or may be held for efficient portfolio management and cash management purposes. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Asset allocation describes the share of investments in specific assets.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What is the minimum share of investments in transitional and enabling activities?**

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

● **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

● **How does the designated index differ from a relevant broad market index?**

Not Applicable

● **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

Profile of a Typical Investor

The Fund may be suitable for investors seeking total return, through a combination of income and capital growth over at least a three to five-year horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in Below Investment Grade securities and potential investment in emerging markets. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to provide total return, through a combination of income and capital growth over a rolling period of any five years, whilst delivering positive societal impact as outlined in further detail in the Investment Strategy below.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Below Investment Grade debt securities (as referenced in the Categories of Investments section below) on a global basis. The portfolio will be actively managed where all holdings within the Fund will have both an investment and an engagement thesis. Each holding will also be aligned with at least one of the United Nations Sustainable Development Goals (the "UN SDGs"). The Fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 10% of their revenues from gambling products; and
- companies that generate over 5% of their revenues from the extraction of unconventional oil sands.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will seek to identify debt instruments of companies that, in its view, have the potential to meet the Investment Objective

through fundamental analysis (as further outlined below) and deliver positive societal impacts that are aligned with the UN SDGs (as outlined in further detail below).

The Fund will invest at least 80% in a diversified portfolio of Below Investment Grade securities and may use credit spreads (i.e., the difference between the quoted rates of return on two different investments that compensate investors for the relative corporate credit risk of the underlying company being able to repay its debt) via Credit Default Swaps ("CDS") and Credit Default Swaps Indices ("CDSI"). Further detail on the use of CDS and CDSIs can be found in the Methods of Access and Efficient Portfolio Management section. The Investment Manager intends to use an active approach to seek risk-adjusted returns through a thorough analysis of individual Below Investment Grade corporate and/or government issuers which it believes will generate returns.

This fundamental, bottom-up analysis of individual credit will be used to generate returns through anticipated price changes. For example, the Investment Manager will analyse securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Investment Manager's view, reflective of its value (after taking account of the credit risk). At the same time, the Investment Manager will analyse securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (as determined by the fundamental analysis outlined above and when taking market news into account). In addition, the Investment Manager intends to use a wider analysis of general economic conditions, as more particularly described within the "*Market Risk*" section of the Prospectus, for portfolio risk management purposes. The Investment Manager intends to diversify the Fund's portfolio across different geographic regions and industries.

In order to promote environmental or social characteristics under SFDR, the Investment Manager will seek companies that also display the potential to be receptive to and benefit from active corporate engagement that will be aligned to contribute to the UN SDGs. In addition to fundamental financial indicator criteria, engagement criteria that may be used to identify such companies will include, for example, assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Investment Manager following discussions between the Investment Manager and the company, as well as align with at least one of the UN SDGs. It is anticipated that by identifying solutions to meeting specific UN SDGs, companies will be able to incrementally improve long-term financial returns and resilience by generating higher sales and better productivity by delivering, for example, improved health and educational outcomes for their employees and local community. The Investment Manager's in-house stewardship team and EOS will support both the identification of, and engagement with, suitable companies that meet the criteria outlined above and further below. The percentage of companies in the Fund that are engaged with will always be between 90%-100%. The UN SDGs are as follows; no poverty; zero hunger; good health and well-being; quality education; gender equality; clean water and sanitation; affordable and clean energy; decent work and economic growth; industry, innovation and infrastructure; reduced inequalities; sustainable cities and communities; responsible consumption and production; climate action; life below water; life on land; peace, justice and strong institutions; and partnership for the goals.

As part of the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the company. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run).

The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies' own disclosures. The Investment Manager's approach to ESG integration in its investment analysis draws upon both internal and external sources. The Investment Manager may invest in companies with poor ESG ratings where the company has good potential to improve on its environmental and social characteristics and hence make a contribution, or greater contribution, to the attainment of the UN SDGs as, outlined above, provided that the company can evidence good corporate governance practices.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 75%-125% for long positions and 0%-40% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. Short positions employed by the Fund will be via credit derivatives (such as CDS and CDSI or similar FDIs as more particularly described in the "Methods of Access and Efficient Portfolio Management section below"). These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the ICE BofA Merrill Lynch Global High Yield Constrained Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The ICE BofA Merrill Lynch Global HY Constrained Index is designed to track the performance of below-investment grade corporate debt denominated in US Dollars, Canadian Dollars, British Pounds and Euros that are publicly issued in the major US or Eurobond markets. The weighting of index constituents is limited to a maximum 2%. As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and the Index is not aligned with the environmental or social characteristics promoted by the Fund. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible Collective Investment Schemes ("CIS"), FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities, Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange,

call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS (up to 10% of the Fund's Net Asset Value), including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund will not actively seek exposure to equities, however the Fund may invest in or hold preferred stock, preference shares and/or Depositary Receipts (investing in small, medium and/or large cap) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. The Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: Defined as investments which are based on and priced according to the value of the underlying assets. The Fund may utilise FDIs, such as Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes.

The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps.

FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

The Fund may invest up to 50% of the portfolio in CDS for direct investment (i.e., to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in CDS spreads of specific issuers or market indices that compromise a basket of issuers of bond instruments) and/or efficient portfolio management purposes. CDS have several benefits compared to investing in cash bonds. CDS do not have interest rate risk and the Fund only gains exposure to the credit spread of the underlying issuer when it invests via CDS. This differs from a corporate bond which provides exposure to both the credit spread and interest rate risk. The Fund can choose which maturity date the CDS is most attractive while cash bonds offer less flexibility on maturity dates. CDS can also provide a more liquid way to access the credit risk of the issuer. CDSI provide access to the credit spread component of the market without the interest rate risk and are extremely liquid.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. . Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a

diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or CDS. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash and/or invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into any repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 100% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 200% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Collateral Reinvestment Risk | 33 |
| Contingent Convertible Securities Risk | 33 |
| Credit Default Swaps Risk | 34 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Loans Investment Risk | 40 |
| Swaps Risk | 45 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation as disclosed in the Prospectus. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third business day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.10% |
| D | 0.90% |
| F | 0.60% |
| I | 0.60% |
| K | 0.50% |
| L | 0.50% |
| M | 0.45% |
| P | 0.60% |
| R | 1.20% |
| T* | 0.00% |
| W | 0.80% |
| Y | 0.40% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| D | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| W | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Y | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per client agreement | Per client agreement | Per client agreement | Per client agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacitymanagement.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes SDG Engagement High Yield Credit Fund
Legal entity identifier: 213800P4WDHNNHYHR7H68

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|--|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|--|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- the potential to be receptive to, and benefit from, active corporate engagement that will be aligned to contribute to at least one or more of the United Nations Sustainable Development Goals (the “UN SDGs”); and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, and Board Gender Diversity; and*
- *Engagement Activity: as a % of AUM and/or issuers in the portfolio;*
- *Engagement Activity: as a % of progress made against the objective milestones set by Investment Manager; and*
- *SDG Engagement Intensity: as the number and/or % of objectives & engagements carried out by the Investment Manager in reference to each of the 17 UN SDGs.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially intends to make are: (i) to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) to contribute to reducing the environmental and social impacts of the products/services that the relevant investee company provides through processes which mitigate the impacts of such products or services on the environment or stakeholders including, but not limited to employees, communities, supply chain employees or customers.

The Funds' sustainable investments will contribute to either of these objective by:

- *the relevant investee companies providing products or services that have a goal of solving environmental or social challenges we face as a society; and/or*
- *the relevant investee companies investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. to provide products/services that has a positive impact on the environment and the wider society. This can be achieved by, for example, investing in clean technology, divesting from fossil fuels to invest more in renewables.*

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's assessment of sustainable investments includes identifying where issuers may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary ESG Scoring Model (as detailed below) to identify if an issuer has any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the investment in the issuer will not be considered a sustainable investment.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary ESG scoring model (the "ESG Scoring Model" – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors. This is done by: (i) evaluating the results from both the SDG Scoring Model and the ESG Scoring Model; and (ii) evaluating the underlying principle adverse impacts on sustainability factors and other sustainability indicators used as part of both the SDG and ESG Scoring Models. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise

identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager will seek companies that will provide long term capital appreciation and that display the potential to be receptive to, and benefit from, active corporate engagement that will be aligned to contribute to the UN SDGs.

In order to achieve this, the Investment Manager uses a proprietary SDG Scoring Model, which seeks to identify "under-engaged" issuers that have the potential to effect positive change but have yet to do so. Many will be issuers that have yet to embrace the idea that they, too, can do their part to see society attain the UN SDGs. Two key elements for consideration are (1) ability to engage and (2) materiality of the impact post engagement. They show their potential based on credit strength; governance structure; sectors and geographies that they operate it in; a link to financial performance and positive societal change, among other factors. Each underlying issuer on which the debt security is issued will be given a SDG score on a scale of 1-5 (5 being the lowest). The Investment Manager believes that the issuers with the greatest potential for a positive societal change (e.g. SDG 1 & SDG 2) will have a greater likelihood of enhancing portfolio returns over the long term. The team believes that by engaging with this pool of companies and enticing them to respond, it can improve society's chances to reach the UN SDGs. The Investment Manager will invest in issuers with a SDG score of 1-4 and exclude the issuers with a SDG score of 5 from the investment universe.

In addition to the analysis of individual issuers and the SDG metrics set out above, the Investment Manager also undertakes an assessment of the ESG qualities of each issuer through a proprietary ESG Scoring Model. The Investment Manager's approach to ESG integration in its investment analysis draws upon internal and external sources to assign an ESG score to each country and issuer in the portfolio. To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or an issuer's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This ESG Scoring Model favours issuers with low environmental and social risks and issuers with who comply with the policy to assess good governance practices good governance, outlined further below. The Investment Manager will invest in issuers with a ESG score of 1-4. The Investment Manager will not invest in new issuers with an ESG score of 5 from the investment universe. These scores are not static and therefore could be downgraded. In circumstances where an issuer's score is downgraded to a 5, the Investment Manager will seek to disinvest.

Engagement activity includes setting specific targets and timelines in relation to an engagement objective, these targets will differ at an individual company engagement level. As part of the thematic investment strategy of the fund, UN SDG linked engagement objectives will be identified for all investments. In addition, non-UN SDG linked engagement may take place with companies to address any material ESG risks that are identified. The engagement activity of the Fund is measured by the percentage of companies that are being engaged with on material ESG issues and the percentage of engagement progress (e.g. the percentage of engagement objectives which have achieved engagement objective milestones). Where a company makes insufficient progress against the engagement objectives, it will result in divestment from that company.

The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, gambling unconventional oil sands and companies in contravention of the principles of the UN Global Compact..

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

- *The percentage of companies in the fund that are engaged with will always be between 90%-100%*
- *Each holding will also be aligned with at least one or more of the United Nations Sustainable Development Goals with a defined engagement thesis designed to effect positive change*
- *The issuers with a SDG score or ESG score of 5 will be excluded.*
- *The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):*
 - *companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 10% of their revenues from production of Conventional Weapons;*
 - *companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;*
 - *companies that generate over 10% of their revenues from gambling products; and*
 - *companies that generate over 5% of their revenues from the extraction of unconventional oil sands.*

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

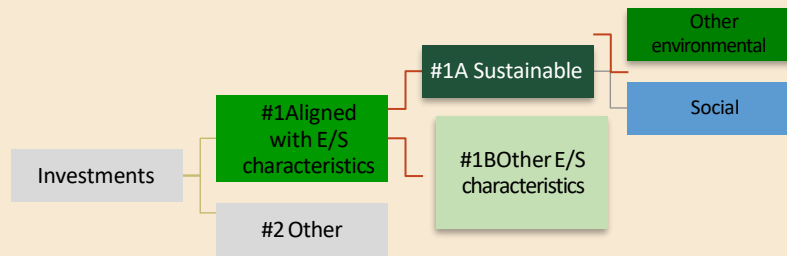

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

#1 Aligned with E/S characteristics includes a minimum of 80% of the Fund's investments will be in issuers who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, which may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. A minimum of 30% of the Fund's investments will be in sustainable investments as outlined above
- The sub-category **#1B Other E/S characteristics** covers the remainder of this category, which will be investments aligned with the environmental or social characteristics but do not qualify as sustainable investments.

● How does these derivatives attain the environmental or social characteristics promoted by the financial product?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the attainment of the environmental and social characteristics in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 30% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What is the minimum share of socially sustainable investments?

While the Fund commits to a minimum of 30% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Where can I find more product specific information online?

Supplement

Federated Hermes Sustainable Global Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 27 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s sustainable investment objective.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective and Policies

Investment Objective

The investment objectives of the Fund are to: (i) achieve capital growth over a rolling five year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

Investment Policy

The Fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation, as more particularly described in the annex to this Supplement.

The Fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity and equity-related securities (as referenced in the "Categories of Investments" section below). These companies will be listed or traded on a Regulated Market worldwide.

In aiming to achieve superior long-term returns, the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies)

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;
- Electricity utility companies with a carbon intensity that are not aligned with a below 2 degrees scenario;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenues from GMO crop production

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

A high conviction (i.e. taking large positions in a small number of stocks), actively managed portfolio using a disciplined bottom-up stock selection process, within a thematic framework.

The Fund aims to reduce the environmental footprint in comparison to the Benchmark (as defined below) and this is measured (using available third party data relating to the carbon, water and waste metrics detailed below) by comparing the following characteristics of the companies in respect of which the Fund holds equity with the Benchmark: (i) total carbon emissions normalised by the market value of the portfolio, expressed in tons CO₂ per \$ million invested; (ii) the total waste (landfill, nuclear and incinerated) for a portfolio normalised by the market value of the portfolio, tonnes per \$ million invested; and (iii) the total water used (cooling, processed and purchased) normalised by the market value of the portfolio, m³ per \$ million invested.

The opportunity that this strategy targets is investment in companies identified as 'sustainable leaders' in order to capture the growth of such companies, which can compound over time. Our definition of a 'sustainable leader' is predicated on three primary considerations and we consider these as part of a bottom-up process. Firstly, business model; the Investment Manager seeks to understand historic financial metrics and competitive dynamics (for example, Porter's Five Forces analysis will be used to identify a company's competitive advantage and the effect on the company's position in the market. The Five Forces consider how suppliers, buyers, market entrants, substitute products and competitor rivalry affect the profitability of a company) and, in conjunction with our thematic analysis outlined below, identify those who are capable of sustaining strong growth over the long-term.

Secondly, the Investment Manager considers how well companies manage environmental, social and governance ("ESG") factors (including how companies limit their emissions, how they ensure product safety, how they manage diversity in the workforce and how the board is structured). The Investment Manager uses a proprietary framework to consider the material ESG risks and opportunities for each company, and use the breadth and depth of our engagement data to put our analysis in context. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%. As a result of the consideration of ESG factors, the Fund's weighted average ESG rating will be better than the weighted ESG rating of the Benchmark after eliminating the worst 20% of securities.

Our third consideration involves a thematic analysis whereby we seek to understand the broader benefit or cost of each company. As well as looking at companies which do no significant harm, the Investment Manager also looks beyond this and, where appropriate, the portfolio will actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as (i) companies that avoid harm, (ii) companies that provide benefits to all stakeholders and (iii) companies that contribute to solutions. The belief is that following this thematic approach to idea generation and focusing on companies which meet the 'sustainable leader' criteria facilitates the Fund's goal to achieve superior long-term returns.

The Fund's market exposure (which is exposure to the Categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objectives of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective to provide capital growth over a rolling period of any five years on an active basis, without reference to a benchmark.

The Company will use MSCI All Country World Index (the "**Benchmark**") for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations, etc.), as deemed appropriate. The Benchmark is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across the world.

In addition, the Fund will seek to achieve its investment objective to have a reduced environmental footprint compared to the Benchmark. The Investment Manager may (but is under no obligation to) invest in component securities of the Benchmark that meet the "sustainable leader" criteria set out above as well as in securities anticipated to enter or exit this Benchmark. The selection of securities remains at the entire discretion of the Investment Manager so the Fund's portfolio may include securities which are not part of the Benchmark. However, the Fund's portfolio composition will not be constrained in any way by the content of this benchmark and the Benchmark is not aligned with the Fund's sustainable investment objective. For the avoidance of doubt, the Fund's objective is not to track the performance of the Benchmark. The Fund does not charge any performance fees and accordingly, no fees are paid to the Investment Manager on the basis of outperformance of the Benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, cash and cash equivalents (for example, overnight deposits for efficient portfolio management purposes as detailed below), investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenue from, global developed and emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund may invest up to 30% of its net assets in equity or equity-related instruments of or relating to companies in emerging markets. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs which may be used by the Fund for such purposes include Futures and Options.

For efficient portfolio management purposes, the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#) and in the financial accounts.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund and will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level", "Hedging at Share Class Level against Base Currency" and "Hedging at Share Class Level against Portfolio Currencies" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--------------------------|----------------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.60% |
| L | 0.60% |
| M | 0.45% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| X | 0.25% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Sustainable Global Equity Fund**

Legal entity identifier: **213800UPG8JP108WG561**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes | <input type="radio"/> <input type="radio"/> <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 30%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 30%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The sustainable investment objective of the Fund is to have a reduced environmental footprint compared to the Benchmark.

The Investment Manager aims to invest in companies within a thematic framework closely aligned with the UN Sustainable Development Goals based on the environmental and social objectives of:

- *Environmental Preservation,*
- *Efficient Production and Resource Usage,*
- *Health and Wellbeing, and*
- *Social Inclusion.*

The MSCI All Country World Index is used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. The index is also used to compare the weighted average ESG rating of the Fund against the benchmark once the lowest scoring 20% of companies have been eliminated.

The Fund may make sustainable investments in issuers which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaptation as defined under the Taxonomy Regulation (EU) 2020/852

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The Investment Manager seeks to achieve the Fund's sustainable investment objective to deliver a reduced environmental footprint relative to the Benchmark by measuring:

- total carbon emissions normalised by the market value of the portfolio, expressed in tons CO₂ per \$ million invested;
- the total waste (landfill, nuclear and incinerated) for a portfolio normalised by the market value of the portfolio, tonnes per \$ million invested; and
- the total water used (cooling, processed and purchased) normalised by the market value of the portfolio, m³ per \$ million invested.

The Investment Manager further assesses the following indicators as part of the investment strategy:

- Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels and Energy Production from Non-Renewables;
- Social Indicators: lives extended, lives enabled, patients treated, financial inclusion and affordable housing. employee turnover, gender diversity and lost time incident rate are also considered.
- Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS; and
- % of AUM contributing to each relevant UN SDGs.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager conducts a sustainability assessment for each investment, as further detailed below, which includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes;

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers sustainability assessment to identify if a company has any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

— **How have the indicators for adverse impacts on sustainability factors been taken into account?**

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainability assessment, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these companies.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified through a proprietary framework which considers the sustainability risks and opportunities for each company, and uses the breadth and depth of the Investment Manager's engagement data to put this analysis in context. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks are identified the company is identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager seeks to achieve a better environmental footprint compared to the benchmark, the MSCI All Country World Index, after the removal of the lowest 20% of securities within the benchmark from an ESG score perspective. The Investment Manager aims to achieve this by investing in companies within a thematic framework closely aligned with the UN Sustainable Development Goals based on environmental and social objectives of;

- *environmental preservation,*
- *efficient production and resource usage,*
- *health and wellbeing, and*
- *social inclusion.*

The Investment Manager seeks to invest in companies that can demonstrate a contribution to a more sustainable future, not just through the products and services that they offer, but also through their entire value chain. The Investment Manager conducts a sustainability assessment designed to identify companies as 'impactful', 'leaders' or 'improvers'. The sustainability assessment is predicated on three primary considerations:

- (i) *The Fundamentals of the business model: the Investment Manager seeks to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework,*

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

identify those who are capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager seeks to identify companies which are bringing value to society, rather than drawing from it.

- (ii) *ESG Metrics: the Investment Manager considers how well companies manage environmental, social and governance factors (including how companies limit their emissions, how they ensure product safety, how they manage diversity in the workforce and how their board is structured). When looking at the ESG profile of a company, consideration will be given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.*
- (iii) *Product Impact: involves a thematic analysis whereby the Investment Manager will seek to understand the broader benefit or cost of each company. As well as looking at companies which “do no significant harm”, the Investment Manager also looks beyond this and, where appropriate, the portfolio will actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as (i) companies that avoid harm, (ii) companies that provide benefits to all stakeholders and (iii) companies that contribute to solutions. The belief is that following this thematic approach to idea generation and focusing on companies which meet the ‘sustainable leader’ criteria facilitates the Fund’s goal to achieve superior long-term returns.*

Engagement: *Where sustainability risks are identified, the Investment Manager works either directly or with the in-house stewardship team, EOS to engage with companies to mitigate those risks and promote good practices. Engagement occurs through meetings with company boards and management and through the exercise of voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, specific targets and timelines are set in relation to that engagement, these targets will differ at an individual company engagement level. Where a company is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it will result in divestment from that company.*

Exclusions: *The Investment Manager does not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, electricity utilities not aligned with a 2 degree scenario, Controversial weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.*

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The Investment Manager will select investments to seek to achieve the following binding criteria:

- *The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.*
- *Achievement of a better weighted average ESG score compared to the benchmark (after the removal of the lowest 20% of securities within the benchmark from an ESG score perspective).*

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- *Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;*
- *Electricity utility companies with a carbon intensity that are not aligned with a below 2 degrees scenario*
- *Companies that generate over 0% of their revenues from the production of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;*
- *Companies that generate over 5% of their revenues from nuclear power;*
- *Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;*

- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager's proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or
- the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives. A minimum of 90% of the portfolio will be invested in companies who contribute to the sustainable investment objective through their contribution to one or more of the four environmental or social investment themes. Those investments will also evidence good governance practice in accordance with the Investment Manager’s policy on good governance and do no significant harm to any other environmental or social objectives within the meaning of the SFDR. The portfolio is further split with a minimum of 30% in the environmental investment themes and 30% in the social investment themes.

#2 Not sustainable includes the remaining investments in the Fund, which do not qualify as sustainable investments and may be held for efficient portfolio management and cash management purposes. This includes derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

● How does the use of derivatives attain the sustainable investment objective?

The use of derivatives does not contribute to the attainment of the Fund’s sustainable objective. The Fund may use derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund may make sustainable investments in companies which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaptation and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852 (“Taxonomy”). A minimum of 2% of the Fund’s investments will be aligned with the environmental objectives under the Taxonomy Regulation. The “do no significant harm” principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

In fossil gas In nuclear energy
 No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What is the minimum share of investments in transitional and enabling activities?**

A minimum of 1% of the Fund's investments will be aligned with the transitional and enabling activities under the Taxonomy Regulation.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the EU taxonomy.

What is the minimum share of sustainable investments with a social objective?

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Investments which do not contribute to the Fund's sustainable objective will only be held for efficient portfolio management and cash management purposes. The Fund may invest in derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equities cash) subject to the conditions and limits of the Central Bank of Ireland. There are no minimum environmental and social safeguards for these investments.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes. The MSCI All Country World Index is used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. The index is also used to compare the weighted average ESG rating of the Fund against the benchmark once the lowest scoring 20% of companies have been eliminated.

- **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

The MSCI All Country Index is a broad market index that does not take into account any sustainability criteria. The reference benchmark is therefore not continuously aligned with the sustainable investment objective of the Fund. It is used as a comparator to evidence whether the Fund's sustainable objective is being achieved relative to a relevant broad market index.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The methodology of the strategy and the index are not aligned, the index serves as a comparator for financial, ESG and sustainability performance only.

- **How does the designated index differ from a relevant broad market index?**

The designated index does not differ from a broad market index.

- **Where can the methodology used for the calculation of the designated index be found?**

Further information relating to the designated index can be found at <https://www.msci.com>

Where can I find more product specific information online?

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Supplement

Federated Hermes Climate Change High Yield Credit Fund

a sub-fund of Federated Hermes Investment
Funds public limited company, an umbrella fund
with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 28 is 1 November 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s sustainable investment objective.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a total return comprised of income and capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in Below Investment Grade securities and potential investment in emerging markets. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objectives of the Fund are to: (i) provide total return, (through a combination of income and capital growth) over a rolling period of any five years; and (ii) contribute towards the objectives of the Paris Agreement by investing in companies which are transitioning to net zero carbon emissions.

Investment Policy

The Fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation, as more particularly described in the annex to this Supplement.

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below). The Fund may take long positions and/or generate Synthetic Short Exposure through the use of Financial Derivative Instruments ("FDIs"). The securities in which the Fund may invest will be selected on a global basis by reference to the Investment Manager's proprietary Climate Change Impact ("CCI") scoring system that indicate how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. Further information on the Investment Manager's proprietary CCI scoring system and metrics can be found in the Investment Strategy section below. The Investment Manager invests on a global basis, however investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries and will be capped at 20% of the Fund.

In aiming to achieve superior long-term returns, the Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Companies that own thermal coal reserves expected to provide more than 1,000MtCO₂ (Carbon Dioxide) emissions;
- Companies that generate over 50% of their revenues from providing technology used to support fossil fuel extraction;
- Companies that sit within the ICE Energy Sector, being defined by ICE as companies involved in energy exploration and production, gas distribution, integrated energy, oil field equipment and services and oil refining and marketing;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;

- Companies that generate over 5% of their revenues from GMO crop production;
- Companies that generate over 5% of their revenues from extracting or refining or uranium, or use of uranium for electricity generation;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution; and,
- Companies that generate over 0% of their revenues from the production of medicinal and recreational cannabis products, companies that receive over 10% of their revenues from medicinal cannabis product distribution and companies that generate over 0% of their revenues from recreational cannabis product distribution.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

In seeking to contribute to the net-zero carbon emissions objective of the Paris Agreement, the Investment Manager commits that a minimum of 25% of the net assets of the Fund will be aligned with a 1.5°C pathway by 2025, 50% by 2027, and 80% by 2030.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest in a diversified portfolio of Below Investment Grade securities and may use credit default Swaps extensively. The Investment Manager intends to use an active approach to seek risk-adjusted returns through a thorough analysis of individual Below Investment Grade corporate and/or government issuers which it believes will generate returns. This fundamental, bottom-up analysis of individual credit will be used to generate returns through anticipated price changes. The Investment Manager will also use the CCI metrics of each issuer as part of the bottom-up analysis in order to meet its sustainable investment objective. Such metrics are financial in nature and measure securities' credit rating, credit quality, yield and duration. In addition, the Investment Manager intends to use a wider analysis of general economic conditions for portfolio risk management purposes. The Investment Manager intends to diversify the Fund's portfolio across different geographic regions and industries.

The Investment Manager identifies debt securities which it believes will generate a total return and transition to a lower carbon world, in line with the objectives of the Paris Agreement. The Paris Agreement adopted under the United Nations Framework Convention on Climate Change seeks to strengthen the response to climate change by, among other things, making finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development. The Investment Manager's proprietary CCI scoring considers internal and external information gained from several sources such as engagement feedback, CDP (a not-for-profit provider of information that supports issuers to report and manage their environmental risks), S&P Global Trucost (a provider of environmental data on companies to support the assessment of risk relating to climate change), science-based targets, public sustainability disclosures and Transition Pathway Initiative (a not-for-profit provider of environmental information specifically relating to decarbonisation and carbon footprint reduction) amongst others. Along with the financial characteristics of each security these CCI metrics will be considered both prior to investment as well as on an ongoing basis. Each underlying company on which the debt security is issued will be given a CCI score on a scale of 1-5 (5 being the lowest score where, for example,

there is no evidence that the company is trying to reduce its carbon emissions). CCI metrics are intended to measure both the progress of a company in reducing its carbon footprint as well as the impact that the reduction in its carbon footprint could have on its sector or the global economy. For example, if a manufacturing firm was developing new technology to reduce the carbon emissions of its production process, and this could also support a reduction in carbon emissions in other companies in the same sector, the impact of the reduction in carbon emissions would be high. The CCI Score for an issuer can range from 1 to 5, where a CCI Score of 1 indicates an impact leader and 5 indicates an issuer indifferent to decarbonisation. An issuer with a CCI Score of 1 will typically exhibit best practice and sector leading decarbonisation targets, a historic track record of decarbonisation superior to peers, and be highly receptive to engagement on improving their environmental footprint. At the other end of the spectrum, an issuer with a CCI Score of 5 would be characterised by no or highly limited evidence of targets or decarbonisation initiatives, no evidence of historic decarbonisation, and be unresponsive to engagement.

All issuers in the portfolio will have an assigned CCI Score. The Investment Manager will only invest in issuers with a CCI score of 1-3, save for hedging and efficient portfolio management purposes. Should an issuer held by the Fund have their CCI score downgraded by the Investment Manager to 4 or 5, this will result in the disposal of the security, within a reasonable time frame. The Investment Manager believes that the issuers with the greatest potential for a positive real world impact on climate change (e.g. CCI 1 & CCI 2) will have a greater likelihood of enhancing portfolio returns over the long term, that the increase in portfolio value will be at least in part due to their transition to a reduced carbon footprint. The Investment Manager will use the CCI scores to support the identification and measure the progress of issuers as they adapt their business to reduce their carbon emissions and therefore reduce the impact of Climate Change. If the issuers fail to deliver on the Investment Manager's carbon transition expectations, this will be reflected in their ongoing CCI score. The Investment Manager will seek issuers who have the greatest ability and inclination to transition their business to one which has a lower carbon footprint and reduce the impact of Climate Change on the planet. The CCI scores will influence portfolio allocation however the Investment Manager will not target a specific average CCI score for the portfolio as these will be considered along with a number of portfolio metrics that will determine the holdings and size at any given time. Such portfolio metrics considered by the Investment Manager are financial in nature and relate to duration, credit rating, sector weighting in the portfolio, macroeconomic factors (such as inflation, unemployment rates and central bank interest rates in each relevant jurisdiction), contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the analysis of individual issuers and the CCI metrics set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as the EOS engagement reports, CDP, MSCI, Sustainalytics and Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager's approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each country and company in the portfolio. To generate these ESG scores, the Investment Manager uses Federated Hermes'

proprietary scoring methodology to score a country or a company's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can evidence good corporate governance. The Investment Manager will only invest in issuers with an ESG score of 1-4, save for hedging and efficient portfolio management purposes. Should an issuer held by the Fund have their ESG score downgraded by the Investment Manager to 5, this will result in the disposal of the security, within a reasonable time frame. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The Fund's market exposure (which is exposure to the Categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 75%-125% of the Net Asset Value of the Fund for long positions and 0%-30% of the Net Asset Value of the Fund for short positions, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund provided that short positions may only be taken for efficient portfolio management purposes. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the ICE Global High Yield Paris-Aligned Absolute Emissions USD Hedged Index (the "**Benchmark**") for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The Benchmark is designed to track the performance of below-investment grade corporate debt denominated in US Dollars, Canadian Dollars, British Pounds and Euro that are publicly issued in the major US or Eurobond markets, with constituents restricted to those on a decarbonisation trajectory aligned with the global warming target of the Paris Agreement. The Benchmark differs from a broad market index in that the Benchmark applies specific targets and exclusionary filters to establish alignment with the Paris Agreement; a broad market index does not apply these and is not aligned with the Paris Agreement. The Benchmark is consistent with the sustainable investment objective of the Fund. The Fund will seek to achieve its sustainable investment objective through targeting to deliver a weighted average carbon intensity lower than the Benchmark. The Investment Manager may (but is under no obligation to) invest in component securities of the Benchmark that meet the CCI score criteria set out above as well as in securities anticipated to enter or exit this Benchmark. The weighting of Benchmark constituents is limited to a maximum 2%. As at the date of this Supplement, the Investment Manager has determined that this Benchmark may be used for such purposes.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities (including contingent convertible debt securities in which the Fund may invest up to 10% of its net assets), Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, and floating rate notes). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long basis. Short positions will only be used for efficient portfolio management purposes.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund may, to a limited extent, invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depositary Receipts) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may use credit default Swaps extensively for direct investment (i.e., to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swaps spreads of specific issuers or market indices that compromise a basket of issuers of bond instruments) and/or efficient portfolio management purposes.

The Fund may also utilise the following other FDIs: Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include credit default Swap indices), equity index Options and Options on credit default Swaps and equity Options) for direct investment and/or efficient portfolio management purposes.

The Fund may also enter Swaps such as currency Swaps for currency hedging purposes.

FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial

indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or Credit Default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash, invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 30% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 130% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 26 |
| Bonds Risk | 30 |
| Collateral Reinvestment Risk | 32 |
| Contingent Convertible Securities Risk | 32 |
| Credit Default Swaps Risk | 33 |
| Emerging Markets Risk | 34 |
| Forward Currency Exchange Contracts Risk | 38 |
| Futures Risk | 39 |
| Loans Investment Risk | 39 |
| Swaps Risk | 44 |

Dealing Information

| | |
|--|---|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company. Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.10% |
| D | 0.65% |
| F | 0.60% |
| I | 0.60% |
| K | 0.50% |
| L | 0.50% |
| M | 0.35% |
| P | 0.60% |
| R | 1.20% |
| T* | 0.00% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| D | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: <https://www.hermes-investment.com/capacity-management>.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Climate Change High Yield Fund**

Legal entity identifier: **21380099JOAAZ5PNBG96**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The sustainable investment objective of the Fund contribute towards the objectives of the Paris Agreement by investing in companies which are transitioning to net zero carbon emissions.

The Fund uses the ICE Global High Yield Paris-Aligned Absolute Emissions USD Hedged Index as a reference index to meet the sustainable investment objective of the Fund.

The Fund may make sustainable investments in issuers which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The Investment Manager seeks to achieve the Fund's sustainable investment objective contribute towards the objectives of the Paris Agreement by investing in companies which are transitioning to net zero carbon emissions by measuring:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment manager uses both a proprietary Climate Change Impact scoring model (the "CCI Scoring Model") and a proprietary ESG scoring model (the "ESG Scoring Model"), as further detailed below, to identify issuers that are adapting their business models to reduce their environmental impact on climate change. The Investment Manager will not invest in securities that have a CCI score of 4 or 5 or an ESG score of 5 as such scores indicate those issuers that have the greatest sustainability risks and that are most likely to cause significant harm to the sustainable investment objective of the Fund.

- taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers proprietary CCI Scoring Model and ESG Scoring Model (as detailed below) to identify if an issuer has any sustainability risks;*
- screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

— **How have the indicators for adverse impacts on sustainability factors been taken into account?**

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary CCI Scoring Model and ESG Scoring Model, see further detail below, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

----- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors. This is done by: (i) evaluating the results from both the CCI Scoring Model and the ESG Scoring Model; and (ii) evaluating the underlying principle adverse impacts on sustainability factors and other sustainability indicators used as part of both the CCI and ESG Scoring Models. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Fund aims to invest in a diversified portfolio of Below Investment Grade securities and credit default swaps 'seeking to provide total return (through a combination of income and capital growth) over a rolling period of any five years, contribute towards the objectives of the Paris Agreement by investing in companies which are transitioning to net zero carbon emissions.

In order to achieve this, the Investment Manager uses a proprietary CCI Scoring Model, which considers internal and external information gained from several sources such as engagement feedback, CDP (a not-for-profit provider of information that supports issuers to report and manage their environmental risks), S&P Global Trucost (a provider of environmental data on companies to support the assessment of risk relating to climate change), science-based targets, public sustainability disclosures and Transition Pathway Initiative (a not-for-profit provider of environmental information specifically relating to decarbonisation and carbon footprint reduction) amongst others. Along with the financial characteristics of each security, CCI metrics are considered both prior to investment as well as on an ongoing basis. Each underlying issuer on which the debt security is issued will be given a CCI score on a scale of 1-5 (5 being the lowest score where, for example, there is no evidence that the issuer is trying to reduce its carbon emissions). CCI metrics are intended to measure both the progress of an issuer in reducing its carbon footprint as well as the impact that the reduction in its carbon footprint could have on its sector or the global economy. The CCI Score for an issuer can range from 1 to 5, where a CCI Score of 1 indicates an impact leader and 5 indicates an issuer indifferent to decarbonisation. An issuer with a CCI Score of 1 will typically exhibit best practice and sector leading decarbonisation targets, a historic track record of decarbonisation superior to peers, and be highly receptive to engagement on improving their environmental footprint. At the other end of the spectrum, an issuer with a CCI Score of 5 would be characterised by no or highly limited evidence of targets or decarbonisation initiatives, no evidence of historic decarbonisation, and be unresponsive to engagement. The Investment Manager will only invest in issuers with

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

a CCI score of 1-3, save for hedging and efficient portfolio management purposes. Should an issuer held by the Fund have their CCI score downgraded by the Investment Manager to 4 or 5, this will result in the disposal of the security, within a reasonable time frame. The Investment Manager believes that the issuers with the greatest potential for a positive real world impact on climate change (e.g. CCI 1 & CCI 2) will have a greater likelihood of enhancing portfolio returns over the long term, that the increase in portfolio value will be at least in part due to their transition to a reduced carbon footprint. The Investment Manager uses the CCI scores to support the identification and measure the progress of issuers as they adapt their business to reduce their carbon emissions and therefore reduce the impact of climate change. If the issuers fail to deliver on the Investment Manager's carbon transition expectations, this will be reflected in their ongoing CCI score. The Investment Manager seeks issuers who have the greatest ability and inclination to transition their business to one which has a lower carbon footprint and reduce the impact of climate change on the planet. The CCI scores influences portfolio allocation however the Investment Manager does not target a specific average CCI score for the portfolio as these will be considered along with a number of portfolio metrics that will determine the holdings and size at any given time. Such portfolio metrics considered by the Investment Manager are financial in nature and relate to duration, credit rating, sector weighting in the portfolio, macroeconomic factors (such as inflation, unemployment rates and central bank interest rates in each relevant jurisdiction), contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the analysis of individual issuers and the CCI metrics set out above, the Investment Manager also undertakes an assessment of the ESG qualities of each issuer through a proprietary ESG Scoring Model. The Investment Manager's approach to ESG integration in its investment analysis draws upon internal and external sources to assign an ESG score to each country and issuer in the portfolio. To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or an issuer's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This ESG Scoring Model favours issuers with low environmental and social risks and issuers with who comply with the policy to assess good governance practices good governance, outlined further below. The Investment Manager will only invest in issuers with an ESG score of 1-4, save for hedging and efficient portfolio management purposes. Should an issuer held by the Fund have their ESG score downgraded by the Investment Manager to 5, this will result in the disposal of the security, within a reasonable time frame.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager will work with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to issuer revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels including thermal coal, gas and oil, Controversial Weapons, Conventional Weapons, nuclear power, tobacco, cannabis, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The Investment Manager will select investments to seek to achieve the following binding criteria:

- The Investment Manager will not invest in issuers with a CCI score of 4 or 5. Should an issuer held by the Fund have their CCI score downgraded by the Investment Manager to 4 or 5, this will result in the disposal of the security, within a reasonable time frame.
- The Investment Manager will not invest in issuers with an ESG score of 5. Should an issuer held by the Fund have their ESG score downgraded by the Investment Manager to 5, this will result in the disposal of the security, within a reasonable time frame.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- Issuers that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Issuers that own thermal coal reserves expected to provide more than 1,000MtCO₂ (Carbon Dioxide) emissions;
- Issuers that generate over 50% of their revenues from providing technology used to support fossil fuel extraction;
- Issuers that sit within the ICE Energy Sector, being defined by ICE as companies involved in energy exploration and production, gas distribution, integrated energy, oil field equipment and services and oil refining and marketing;
- Issuers that generate over 0% of their revenues from the production of controversial weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Issuers that generate over 5% of their revenues from GMO crop production;
- Issuers that generate over 5% of their revenues from extracting or refining or uranium, or use of uranium for electricity generation;
- Issuers that generate over 0% of their revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Issuers that generate over 0% of their revenues from the production of medicinal and recreational cannabis products, companies that receive over 10% of their revenues from medicinal cannabis product distribution and companies that generate over 0% of their revenues from recreational cannabis product distribution; and
- Issuers that are in contravention of the principles of the UN Global Compact.

The Investment Manager commits a minimum of 25% of the net assets of the Fund will be aligned with a 1.5°C pathway by 2025, 50% by 2027, and 80% by 2030.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the issuer's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer; or
- the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

#1 Sustainable covers sustainable investments with environmental or social objectives. A minimum of 80% of the Funds' investment will be in issuers who contribute to the sustainable investment objective through their contribution to a reduced environmental impact to climate change. Those investment will also evidence good governance practice in accordance with the Investment Manager's policy on good governance and do no significant harm to any other environmental or social objectives within the meaning of the SFDR, as outlined above.

#2 Not sustainable includes the remaining investments in the Fund, which do not qualify as sustainable investments and may be held for efficient portfolio management and cash management purposes. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● How does the use of derivatives attain the sustainable investment objective?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the sustainable investment in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund may make sustainable investments in companies which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaptation and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852 ("Taxonomy"). A minimum of 1% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

A minimum of 0% of the Fund's investments will be aligned with the transitional and enabling activities under the Taxonomy Regulation.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 80% in sustainable investments, due to the proposed dynamic allocation to sustainable investments with an environmental objective that may or may not be aligned to

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

the EU taxonomy, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the EU taxonomy.

What is the minimum share of sustainable investments with a social objective?

A minimum of 0% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Investments which do not contribute to the Fund's sustainable objective will only be held for efficient portfolio management and cash management purposes. The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. There are no minimum environmental and social safeguards for these investments.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes. The Fund uses the ICE Global High Yield Paris-Aligned Absolute Emissions USD Hedged Index i as a reference index to meet the sustainable investment objective of the Fund.

● How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

The reference benchmark takes into account Environmental, Social and Governance factors, including the exclusion of securities of issuers that do not meet requirements for inclusion in Paris-Aligned benchmarks under the EU and UK Benchmark Regulation, and adjustments to security weightings so as to reduce the overall carbon footprint of the reference benchmark in accordance with Benchmark Regulation.

Constituents of the reference benchmark are thus aligned with the Paris Agreement, and aligned with the sustainable investment objective of the Fund.

● How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

The reference index is rebalanced on a monthly basis such that all constituents are aligned with the Paris Agreement, ensuring alignment with the investment strategy and objective of the Fund.

● How does the designated index differ from a relevant broad market index?

The Benchmark differs from a broad market index in that the Benchmark applies specific targets and exclusionary filters to establish alignment with the Paris Agreement; a broad market index does not apply these and is not aligned with the Paris Agreement.

● Where can the methodology used for the calculation of the designated index be found?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Further information relating to the designated index can be found at:

<https://www.theice.com/market-data/indices/sustainability-indices>

Where can I find more product specific information online?

More product specific information can be found via:

Supplement

Federated Hermes Sustainable Global Investment Grade Credit Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 29 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s sustainable investment objective.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a total return comprised of income and capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objectives of the Fund are to: (i) generate a total return (through a combination of income and capital growth) over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

Investment Policy

The Fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation (EU) 2020/852, as more particularly described in the annex to this Supplement.

The Fund will seek to achieve its investment objectives by investing at least 90% in a diversified portfolio of Investment Grade corporate debt securities (as referenced in the Categories of Investments section below). The Fund will manage and adapt its market exposures depending on market conditions and the view of where markets will move to in the short, medium and long term (which is determined by the Investment Manager using a combination of top-down and bottom-up approaches to assess the various drivers of the credit markets, such as valuations, sentiment, technicals and fundamentals, which is then reviewed on a regular basis to determine the Fund's allocation to risk across geographic location, sectors and credit quality and the Investment Manager's selection of the Fund's investments). The securities in which the Fund may invest will be selected on a global basis. However, investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries.

In aiming to achieve superior long-term returns, the Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- electricity utility companies with a carbon intensity that are not aligned with a below 1.5 degrees scenario;
- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- companies that generate over 5% of their revenues from nuclear power;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 2% of their revenues from gambling products;
- companies that generate over 2% of their revenues from adult entertainment products;

- companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution; and
- companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest in a diversified portfolio of Investment Grade corporate bonds, as rated by Moody's Investor Services, Standard & Poor's or Fitch Ratings, and may use credit default Swaps. The Investment Manager intends to use an active approach to seek positive risk-adjusted returns through a thorough analysis of individual Investment Grade corporate issuers, which it believes are "sustainable leaders" (as defined below) and will generate positive returns. This fundamental, bottom-up analysis of individual issuers will be used to generate returns through anticipated price changes. If the credit rating assigned to an issue differs between the aforementioned credit rating providers, the Investment Manager shall assume the highest credit quality rating provided for each issue. In addition, the Investment Manager intends to use a wider analysis of general economic conditions and factors for portfolio risk management purposes. The Investment Manager intends to diversify the Fund's portfolio across different geographic regions and industries.

The Fund aims to have a reduced environmental footprint in comparison to the Benchmark, which is measured (using available third party data relating to the carbon, waste and direct water metrics detailed below) by comparing the following characteristics of the issuers in respect of which the Fund holds debt with the Benchmark: (i) total carbon emissions (expressed in tons CO₂ per \$ million invested); (ii) the total waste (landfill, nuclear and incinerated) (expressed in tonnes per \$ million invested); and (iii) the total water used (direct cooling, direct processed and purchased) (expressed as m³ per \$ million invested).

Sustainable investment seeks to understand the broader benefit or cost of each company. As well as looking at companies that do no significant harm, the Investment Manager also looks beyond this and, where appropriate, the portfolio will actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as: (i) companies that avoid harm; (ii) companies that provide benefits to all stakeholders; and (iii) companies that contribute to solutions. The Fund will invest in issuers identified by the Investment Manager as "sustainable leaders", in order to gain exposure to the growth and development of such companies, which can compound over time. Investing in "Sustainable leaders" utilises negative and positive screening techniques to identify and invest in issuers that together form a portfolio that is more sustainable than the Benchmark. The Fund negatively screens companies by excluding those engaged in, or that derive revenues from, specified activities (listed as exclusions in the "Investment Policy" section). Positive screening is achieved using the Investment Manager's proprietary sustainability leaders scoring methodology ("**SL Score**"), to concentrate investments in companies that demonstrate best-in-class sustainability characteristics, including high quality reporting, robust risk management practices and a low environmental footprint relative to peers. The SL Score is a ranked assessment of the sustainability leadership of issuers, which establishes ranking and momentum in sustainability, as well as recognition of and response to non-fundamental risks. The term momentum is used in this instance to capture progress, planning and leadership in the development and enhancement of sustainable practices.

The Investment Manager uses the SL Scoring system to determine the investable universe and contribute towards portfolio construction. Issuers with a passable SL Score will then be assessed through fundamental credit analysis and portfolio metrics, as specified below, before a further analysis of each issuer is carried out for their contribution towards environmental or social objectives, significant harm to those objectives and good governance (as detailed in the Annex to this Supplement).

The SL Score is calculated by way of a quantitative proprietary tool to assess an issuer's environmental and social behaviours and to produce two scores (on a scale of 0 – 100), one environmental and one social. The SL Score is designed to ensure that an issuer's most impactful behaviours drive their score; as the materiality of environmental and social behaviours vary between sectors, environmental or social scores may be magnified to reflect the proportional significance of sustainability considerations that may otherwise be diluted. The Investment Manager then takes a weighted average of the two scores, which delivers a preliminary SL Score for an issuer. The preliminary SL Score is then reviewed by credit and sustainability analysts and either confirmed or amended, as required.

The SL Score for an issuer can range from 1 to 5, where an SL Score of 1 indicates a sustainable leader with momentum and 5 indicates a sustainability failure. An issuer with an SL Score of 1 will typically exhibit high quality disclosures, good visibility of their sustainability trajectory and often advanced management of environmental and social risks. At the other end of the spectrum, an issuer with an SL Score of 5 would be characterised by low levels of intent or progress towards more sustainable practices, with poor disclosures and involvement in controversial activities. As detailed above, the SL Score is derived from the weighted average combination of the Investment Manager's proprietary environmental and social scores, which rewards issuers displaying leadership and momentum in sustainable practices, but penalises laggards, poor disclosure and so-called controversial companies. At least 90% of issuers in the portfolio will have an assigned SL Score. Where the Investment Manager is unable to calculate an issuer's SL Score (for example, privately owned companies that do not publicly disclose enough data to calculate underlying environmental or social scores), it will revert to other methods of sustainability analysis to determine if an issuer meets the criteria for a sustainable leader. This can include other proprietary sustainability scores such as the Investment Manager's assessments on impact and decarbonisation potential. The Investment Manager will not initiate a position in an issue that has been issued by a company with a SL Score of 4 or 5. Should a debt security issuer held by the Fund have their SL Score downgraded by the Investment Manager to a 4 or 5, this will result in the disposal of the security. The Investment Manager will not target a specific average SL Score for the Fund, as this will be considered along with a number of portfolio metrics that will determine the holdings and size at any given point. Such portfolio metrics considered by the Investment Manager are financial in nature and relate to duration, credit rating, sector weighting in the portfolio, macroeconomic factors, contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the fundamental and sustainability analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("**ESG**") qualities of the issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes; third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others; and companies' own disclosures. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of

and direct contact and engagement with companies. The Investment Manager's approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each country and company in the portfolio. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%. As a result of the consideration of ESG factors, the Fund's weighted average ESG rating will be better than the weighted ESG rating of the Benchmark after eliminating the worst 20% of securities, ensuring the portfolio meets a stricter criteria than the Benchmark as a whole. The weighted average ESG ratings of the Fund and of the Benchmark are derived from multiplying each issuer's ESG score by its portfolio/benchmark weighting, as applicable, and adding these together. Further information on the Fund's Benchmark can be found below.

To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or a company's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on issues if they arise. The Investment Manager will generally exclude the issuers with an ESG score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. The ESG score is also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. In constructing the portfolio, the Investment Manager will place greater emphasis on an issuer's SL Score and fundamental credit analysis than its ESG Score.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 75%-125% for long positions and 0%-40% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its total return objective on an active basis, without reference to a benchmark. The Company shall use the ICE BofA Global Corporate Index (the "**Benchmark**") for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The ICE BofA Global Corporate Index is designed to track the performance of investment grade corporate debt denominated in US Dollars, Canadian Dollars, British Pounds and Euros that are publicly issued in the major US or Eurobond markets. The Benchmark does not have an ESG focus. As at the date of this Supplement, the Investment Manager has determined that this Benchmark may be used for such purposes.

In addition, the Fund will seek to achieve its investment objective to have a reduced environmental footprint compared to the Benchmark. The Investment Manager may (but is under no obligation to) invest in component securities of the Benchmark that meet the "sustainable leader" criteria set out above as well as in securities anticipated to enter or exit this Benchmark. The selection of securities remains at the entire discretion of the Investment Manager so the Fund's portfolio may include securities which are not part of the Benchmark. However, the Fund's portfolio composition will not be constrained in any way by the content of

this benchmark and the Benchmark is not aligned with the Fund's sustainable investment objective. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and the index is not aligned with the Fund's sustainable investment objective. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities (including contingent convertible debt securities in which the Fund may invest up to 10% of its net assets), Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis. The Fund will not invest in Mortgage-Backed Securities.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund may, to a limited extent, invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depositary Receipts) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may use credit default Swaps for direct investment (i.e., to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swaps spreads of specific issuers or market indices that compromise a basket of issuers of bond instruments) and/or efficient portfolio management purposes.

The Fund may also utilise the following other FDIs: Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include credit default Swap indices), equity

index Options and Options on credit default Swaps and equity Options) for direct investment and/or efficient portfolio management purposes.

The Fund may also enter Swaps such as currency Swaps for currency hedging purposes.

FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure or Inverse Leveraged Exposure. Financial indices may give exposure to, for example, fixed income instruments or Credit Default Swaps. These exposures may be achieved through vanilla indices. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash, invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 100% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 200% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|--|----------------------------------|
| Sustainability Risk | 27 |
| Bonds Risk | 31 |
| Collateral Reinvestment Risk | 33 |
| Contingent Convertible Securities Risk | 33 |
| Credit Default Swaps Risk | 34 |
| Emerging Markets Risk | 35 |
| Forward Currency Exchange Contracts Risk | 39 |
| Futures Risk | 40 |
| Loans Investment Risk | 40 |
| Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk | 41 |
| Options Risk | 42 |
| Swaps Risk | 45 |

Dealing Information

| | |
|--|---|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company. Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 0.85% |
| F | 0.35% |
| I | 0.35% |
| K | 0.30% |
| L | 0.30% |
| M | 0.25% |
| P | 0.35% |
| R | 0.70% |
| T* | 0.00% |
| X | 0.15% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 100,000 | No minimum | USD 100,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacity-management.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available.

** Certain Fees and Expenses are charged against Capital.

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 200 |

The base currency of the Fund is US Dollars. The underlying portfolio exposure is hedged in US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Sustainable Investment Grade Credit Fund**
 Legal entity identifier: **2138002IUNKYRRMCTS17**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes | <input type="radio"/> <input type="radio"/> <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 30%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 30%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The sustainable investment objective of the Fund is to have a reduced environmental footprint compared to the Benchmark.

The Investment Manager aims to achieve the sustainable objective by actively targeting those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as: (i) companies that avoid harm; (ii) companies that provide benefits to all stakeholders; and (iii) companies that contribute to solutions.

ICE BofA Global Corporate Index is used as a reference for comparing the environmental footprint of the Fund compared to the Benchmark.

The Fund may make sustainable investments in issuers which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The Investment Manager seeks to achieve the Fund's sustainable investment objective to deliver a reduced environmental footprint relative to the Benchmark by measuring:

- *total carbon emissions, expressed in tons CO₂ per \$ million invested;*
- *the total waste (landfill, nuclear and incinerated) for a portfolio, tonnes per \$ million invested; and*
- *the total water used (direct cooling, direct processed and purchased), m³ per \$ million invested.*

The Investment Manager further assesses the following indicators as part of the investment strategy:

- *Environmental Indicators: GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables;*
- *Social Indicators: Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, and Board Gender Diversity; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

Once an issuer has passed the SL Score screen and fundamental credit analysis, but prior to being determined eligible for the portfolio, the Investment Manager carries out an 'Do No Significant Harm' ("DNSH") test on all issuers in the portfolio. This process sees the Investment Manager review each issuer individually for historic controversies and qualitatively assesses the issuer against all mandatory corporate principal adverse impact indicators. The DNSH test has been devised to:

- take into account all adverse impact indicators and other relevant ESG indicators, to identify if an issuer has any sustainability risks;*
- screen for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- identify, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's proprietary DNSH tests, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors. This is carried out through the DNSH test carried out on all issuers prior to investment, whereby each issuer is considered and assessed against all relevant mandatory principal impact indicators, as well as select voluntary or other adverse impact indicator, as relevant. This analysis enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS"); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager will invest in a diversified portfolio of Investment Grade corporate bonds, as rated by Moody's Investor Services, Standard & Poor's or Fitch Ratings, and may use credit default Swaps. The Investment Manager intends to use an active approach to seek positive risk-adjusted returns through a thorough analysis of individual Investment Grade corporate issuers, which it believes are "sustainable leaders" (as defined below) and will generate positive returns. This fundamental, bottom-up analysis of individual issuers will be used to generate returns through anticipated price changes. The securities in which the Fund may invest will be selected on a global basis. However, investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries. The Investment Manager also seeks to achieve a better environmental footprint compared to the Benchmark.

The Investment Manager aims to achieve the sustainable objective by actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as: (i) companies that avoid harm; (ii) companies that provide benefits to all stakeholders; and (iii) companies that contribute to solutions. The Fund will invest in issuers identified by the Investment Manager as "sustainable leaders", in order to gain exposure to the growth and development of such companies, which can compound over time. Investing in "Sustainable leaders" utilises negative and positive screening techniques to identify and invest in issuers that together form a portfolio that is more sustainable than the Benchmark. The Fund negatively screens companies by excluding those engaged in, or that derive revenues from, specified activities. Positive screening is achieved using the Investment Manager's SL Scoring Model, to concentrate investments in companies that demonstrate best-in-class sustainability characteristics, including high quality reporting, robust risk management practices and a low environmental footprint relative to peers. The SL Score is a ranked assessment of the sustainability leadership of issuers, which establishes ranking and momentum

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

in sustainability, as well as recognition of and response to non-fundamental risks. The term momentum is used in this instance to capture progress, planning and leadership in the development and enhancement of sustainable practices.

The Investment Manager uses the SL Scoring Model to determine the investable universe and contribute towards portfolio construction. Issuers with a passable SL Score will then be assessed through fundamental credit analysis and portfolio metrics, before a further analysis of each issuer is carried out for their contribution towards environmental or social objectives, significant harm to those objectives and good governance.

The SL Score is calculated by way of a quantitative proprietary tool to assess an issuer's environmental and social behaviours and to produce two scores (on a scale of 0–100), one environmental and one social. The SL Score is designed to ensure that an issuer's most impactful behaviours drive their score; as the materiality of environmental and social behaviours vary between sectors, environmental or social scores may be magnified to reflect the proportional significance of sustainability considerations that may otherwise be diluted. The Investment Manager then takes a weighted average of the two scores, which delivers a preliminary SL Score for an issuer. The preliminary SL Score is reviewed by credit and sustainability analysts and either confirmed or amended, as required.

The SL Score for an issuer can range from 1 to 5, where an SL Score of 1 indicates a sustainable leader with momentum and 5 indicates a sustainability failure. An issuer with an SL Score of 1 will typically exhibit high quality disclosures, good visibility of their sustainability trajectory and often advanced management of environmental and social risks. At the other end of the spectrum, an issuer with an SL Score of 5 would be characterised by low levels of intent or progress towards more sustainable practices, with poor disclosures and involvement in controversial activities. As detailed above, the SL Score is derived from the weighted average combination of the Investment Manager's proprietary environmental and social scores, which rewards issuers displaying leadership and momentum in sustainable practices, but penalises laggards, poor disclosure and so-called controversial companies. At least 90% of issuers in the portfolio will have an assigned SL Score. Where the Investment Manager is unable to calculate an issuer's SL Score (for example, privately owned companies that do not publicly disclose enough data to calculate underlying environmental or social scores), it will revert to other methods of sustainability analysis to determine if an issue meets the criteria for a sustainable leader. This can include other proprietary sustainability scores such as the Investment Manager's assessments on decarbonisation potential. The Investment Manager will not initiate a position in an issue that has been issued by a company with a SL Score of 4 or 5. Should a debt security issuer held by the Fund have their SL Score downgraded by the Investment Manager to a 4 or 5, this will result in the disposal of the security. The Investment Manager will not target a specific average SL Score for the Fund, as this will be considered along with a number of portfolio metrics that will determine the holdings and size at any given point. Such portfolio metrics considered by the Investment Manager are financial in nature and relate to duration, credit rating, sector weighting in the portfolio, macroeconomic factors, contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the fundamental and sustainability analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the issuer. The Investment Manager's approach to ESG integration in its investment analysis draws upon internal and external sources to assign an ESG score to each country and company in the portfolio. As a result of the consideration of ESG factors, the Fund's weighted average ESG rating will be better than the weighted ESG rating of the Benchmark after eliminating the worst 20% of securities, ensuring the portfolio meets a stricter criteria than the Benchmark as a whole. The weighted average ESG ratings of the Fund and of the Benchmark are derived from multiplying each issuer's ESG score by its portfolio/benchmark weighting, as applicable, and adding these together.

To generate these ESG scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a country or a company's ESG behaviours, assigning the ESG score on a scale of 1 to 5. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on issues if they arise. The Investment Manager will generally exclude the issuers with an ESG score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. In constructing the portfolio, the Investment Manager will place greater emphasis on an issuer's SL Score and fundamental credit analysis than its ESG Score.

Once an issuer has passed the screening and fundamental analysis assessments, it is put through three further, separate assessments for DNSH, Good Governance (both as described above) and Sustainable Investment (“SI”) to confirm its eligibility for investment. The SI assessment is a qualitative analysis that considers issuers’ contribution to the achievement of the SDGs. If the Investment Manager concludes an issuer to do no significant harm, exhibit good governance and constitute a sustainable investment, it becomes eligible for investment in the portfolio.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager will work with EOS to engage with issuers to address those risks. Engagement occurs through meetings with management and exercising voting rights. Engagement seeks to develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels including thermal coal, gas and oil, controversial weapons, Conventional Weapons, nuclear power, tobacco, cannabis, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The Investment Manager will select investments to seek to achieve the following binding criteria:

- The percentage of companies in the Fund that are analysed for sustainability characteristics will always be between 90%-100%.
- Companies with an SL score of 4 or 5 will be excluded.
- The Fund’s weighted average ESG rating will be better than the weighted ESG rating of the Benchmark after eliminating the worst 20% of securities.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- electricity utility companies with a carbon intensity that are not aligned with a below 1.5 degrees scenario;
- companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- companies that generate over 5% of their revenues from nuclear power;
- companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- companies that generate over 2% of their revenues from gambling products;
- companies that generate over 2% of their revenues from adult entertainment products;
- companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 5% of their revenues from alcohol distribution;
- companies that generate over 5% of their revenues from GMO crop production; and

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- *companies that are in contravention of the principles of the UN Global Compact.*

● ***What is the policy to assess good governance practices of the investee companies?***

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager’s proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer’s corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer’s corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer’s governance practices, as further detailed in the section of this annex titled “What investment strategy does this financial product follow?”*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>.

What is the asset allocation and the minimum share of sustainable investments?

#1 Sustainable covers sustainable investments with environmental or social objectives. A minimum of 80% of the portfolio will be invested in companies who contribute to the sustainable investment objective of a reduced environmental footprint by seeking to improve their effect on people and the planet through their products or services. Those investment will also evidence good governance practice in accordance with the Investment Manager’s policy on good governance and do no significant harm to any other environmental or social objectives within the meaning of the SFDR, as outlined above.

#2 Not sustainable includes the remaining investments in the Fund, which do not qualify as sustainable investments and may be held for efficient portfolio management and cash management purposes. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

specific assets.

● How does the use of derivatives attain the sustainable investment objective?

The investment manager may utilise credit default swaps to gain exposure to an issuer’s capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the sustainable investment in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund may make sustainable investments in companies which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852 (“Taxonomy”). A minimum of 1% of the Fund’s investments will be aligned with the environmental objectives under the Taxonomy Regulation. The “do no significant harm” principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities.

● Does the financial product invest in fossil gas and/or nuclear energy related

activities that comply with the EU Taxonomy¹?

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Yes:

In fossil gas

In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

A minimum of 0.5% of the Fund's investments will be aligned with the transitional and enabling activities under the Taxonomy Regulation.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 80% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the EU taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

What is the minimum share of sustainable investments with a social objective?

While the Fund commits to a minimum of 80% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Not sustainable", what is their

purpose and are there any minimum environmental or social safeguards?

Investments which do not contribute to the Fund's sustainable objective will only be held for efficient portfolio management and cash management purposes. The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. There are no minimum environmental and social safeguards for these investments.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes. ICE BofA Global Corporate Index is used as a reference for comparing the environmental footprint of the Fund compared to the Benchmark.

● **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

The ICE BofA Global Corporate Index is a broad market index that does not take into account any sustainability criteria. The reference benchmark is therefore not continuously aligned with the sustainable investment objective of the Fund. It is used as a comparator to evidence whether the Fund's sustainable objective is being achieved relative to a relevant broad market index.

● **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The methodology of the strategy and the index are not aligned, the index serves as a comparator for financial, ESG and sustainability performance only.

● **How does the designated index differ from a relevant broad market index?**

The designated index does not differ from a broad market index.

● **Where can the methodology used for the calculation of the designated index be found?**

Further information relating to the designated index can be found at:

<https://www.theice.com/market-data/indices/fixed-income-indices>

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Where can I find more product specific information online?

More product specific information can be found via:

<https://www.hermes-investment.com/products>

Supplement

Federated Hermes Biodiversity Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 31 is 15 August 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s sustainable investment objective.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective and Policies

Investment Objective

The investment objectives of the Fund are: (i) to achieve capital growth over a rolling five year period; and (ii) to invest in companies that are helping to protect and restore biodiversity or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

Investment Policy

The Fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation, climate change adaptation and the protection and restoration of biodiversity and ecosystems under the Taxonomy Regulation, as more particularly described in the annex to this Supplement.

The Fund will seek to achieve its investment objectives by investing at least 80% in a diversified portfolio of equity and equity-related securities (as referenced in the "Categories of Investments" section below) listed or traded on a Regulated Market worldwide. The Fund may invest up to 30% of its net assets in emerging markets.

In aiming to achieve superior long-term returns (i.e. returns that are superior in the sense that they provide positive benefit to the environment and society as well as long-term returns), the Investment Manager will also exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;
- Electricity utility companies with a carbon intensity that is not aligned with a below 1.5 degrees scenario;
- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 10% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenues from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

The Investment Manager intends to create an actively managed portfolio using a disciplined bottom up stock selection process. The sustainable investment opportunity that the strategy addresses is the superior growth that can compound over time from identifying companies adopting innovative approaches to protecting and restoring biodiversity.

The Investment Manager's process begins with a thematic framework whereby it has identified six themes that have a direct impact on biodiversity: land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, and deforestation. Each theme consists of a number of sub-themes which correspond to at least one of the United Nations Sustainable Development Goals¹. The industries within each sub-theme represent the initial investible universe for the Fund. For example, the land pollution theme consists of the following investible industries: waste management, plastic recycling and plastic alternatives, and hazardous chemical management.

The Investment Manager then aims to invest in best in class companies within one or more industries which help protect or restore biodiversity through their business operations, products or services. The Investment Manager seeks to achieve this by identifying companies for which biodiversity is the source of competitive advantage whilst also considering financial sustainability and long-term value creation. The Investment Manager believes companies which include biodiversity as a part of their risk mitigation and business strategies have better risk adjusted profiles given the huge systematic risk biodiversity poses to the world. At the same time, the Investment Manager seeks to identify those companies that have a clear understanding of their dependencies and impacts on biodiversity and sees this as a competitive advantage. The Investment Manager is looking for companies which are exposed to persistent and scalable sources of demand for the products/services that such companies provide alongside compelling valuation and financial sustainability, determined by reference to a company's financial statements and engagement with the companies themselves. These are determined by identifying companies which are providing innovative solutions to the various reasons for biodiversity loss. As estimated by the World Economic Forum, over 50% of the global GDP is highly or moderately dependent on nature and those companies that provide solutions to prevent loss of biodiversity, are by default exposed to persistent and scalable sources of demand for the products/services that such companies provide.²

In addition to the analysis of individual companies set out above, the Investment Manager will undertake assessment of the Environmental, Social and Governance ("ESG") qualities of each company. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager's approach to ESG integration in its investment analysis draws upon both internal and external sources. The Investment Manager

¹ Please refer to <https://sustainabledevelopment.un.org/?menu=1300> for further information on the United Nations Sustainable Development Goals.

² Please refer to [WEF_New_Nature_Economy_Report_2020.pdf](https://www.weforum.org/reports/New-Nature-Economy-Report-2020) (weforum.org)

may invest in companies with poor ESG ratings where the company has shown to have good governance and meet the impact and sustainability characteristics outlined above. The ESG scores are also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve their sustainability characteristics. The percentage of companies in the Fund that are analysed for sustainability characteristics will always be between 90%-100%.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark.

The Company shall use the MSCI All Country World Investable Market Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI All Country World Investable Market Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in both developed and emerging markets across the world.

The Investment Manager commits to donating 5% (minus any tax cost) of the annual management fee received (net of rebates and retrocessions) to charities that it believes are helping in the drive to protect and restore biodiversity.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, cash and cash equivalents (for example, overnight deposits for efficient portfolio management purposes as detailed below), investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund may invest in a diversified portfolio of equity (such as common and/or preferred stock and/or rights) and/or equity-related instruments (such as GDRs and ADRs) of, or relating to companies in, or that derive a large proportion of their revenue from, global developed and emerging markets. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs which may be used by the Fund for such purposes include Futures and Options.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via: [Federated Hermes / Financial Indices](#).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund and will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level", "Hedging at Share Class Level against Base Currency" and "Hedging at Share Class Level against Portfolio Currencies" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|----------------------------------|---------------------------|
| Sustainability Risk | 27 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Small and Mid-Cap Companies Risk | 44 |
| Thematic Risk | 45 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.60% |
| L | 0.60% |
| M | 0.45% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| X | 0.25% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: <https://www.hermes-investment.com/capacity-management>.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes Biodiversity Equity Fund**

Legal entity identifier: **213800BON6MFUO5BCK90**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes | <input type="radio"/> <input type="radio"/> <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 30%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 10%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The sustainable investment objectives of the Fund is to invest in companies that are helping to protect and restore biodiversity or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of the following six themes:

- Land pollution
- Marine pollution and exploitation
- Unsustainable living
- Climate change
- Unsustainable farming
- Deforestation

A reference benchmark is not used for the purposes of attaining the sustainable investment objective.

The Fund may make sustainable investments in companies which contribute to the environmental objectives of climate change mitigation and climate change adaptation and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

- *Environmental Indicators: Hectares of Forest or Land Restored or Conserved, No. or Species Preserved, MW of Installed Renewable Capacity, MWH of Renewable Energy Generated, Metric T of CO2 Avoided, M3 Water Saved, GHG Emissions, Carbon Footprint, GHG Intensity, Exposure to Fossil Fuels, Energy Production from Non-Renewables, Metric Tonnes of Waste Generated and Recycled and Metric Tonnes of Food loss/waste avoided;*
- *Social Indicators: No. of People With Access to Nutritious Food, and Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises; and*
- *Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS.*
- *% of AUM contributing to each UN SDGs*

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager conducts a sustainability assessment for each investment, as further detailed below, which includes identifying where companies may cause significant harm through the products and services that they offer, but also through their entire value chain. The assessment includes;

- taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Managers sustainability assessment to identify if a company has any sustainability risks;*
- screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where a company is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

— **How have the indicators for adverse impacts on sustainability factors been taken into account?**

The Investment Manager takes into account all mandatory principal adverse impact indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager's sustainability assessment, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

— **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these companies.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified through a proprietary framework which considers the sustainability risks and opportunities for each company, and uses the breadth and depth of the Investment Manager's engagement data to put this analysis in context. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks are identified the company is identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The sustainable investment opportunity that the strategy addresses is the superior growth that can compound over time from identifying companies adopting innovative approaches to protecting and restoring biodiversity. The Investment Manager targets companies that have been identified as not only presenting the best investment opportunity, but also as demonstrating capacity to help protect and restore biodiversity.

The Investment Manager uses a proprietary 'Impact Database' to analyse for sustainable investments, and to determine which of the Fund's themes (as mentioned above) an investment may contribute to. The database draws on data from company, sector, and impact related industry reports. It provides theme specific KPI outputs including, but not limited to: number of new people with financial access (Financial Inclusion); -MWh renewable energy generated and Metric T CO₂ avoided (Energy Efficiency) and M³ water saved (Water). At a portfolio level, the Investment Manager can therefore measure what % of the Fund is contributing to each individual theme (and therefore SDG) to measure the attainment of the sustainable objectives. The Investment Manager's stock selection process comprises of three primary considerations:

- (i) The Fundamentals of the business model: the Investment Manager seeks to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework, identify those who are capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager seeks to identify companies which are bringing value to society, rather than drawing from it.*
- (ii) ESG Metrics: the Investment Manager considers how well companies manage environmental, social and governance factors (including how companies limit their emissions, how they ensure product safety, how they manage diversity in the workforce and how their board is structured). When looking at the ESG profile of a company, consideration will be given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.*
- (iii) Product Impact: involves a thematic analysis whereby the Investment Manager will seek to understand the broader benefit or cost of each company. As well as looking at companies which "do*

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

no significant harm”, the Investment Manager also looks beyond this and, where appropriate, the portfolio will actively target those companies seeking help protect and restore biodiversity.

Engagement: Where material ESG risks are identified, the Investment Manager works either directly or with the in-house stewardship team, EOS at Federated Hermes (“EOS”), to engage with companies to mitigate those risks and promote good practices. Engagement occurs through meetings with company boards & management and through exercising voting rights. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, specific targets and timelines are set in relation to that engagement, these targets will differ at an individual company engagement level. Where a company is not receptive to engagement on material ESG risks, or makes insufficient progress in addressing them over time, it will result in divestment from that company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels, electricity utilities not aligned with a 1.5 degree scenario, Controversial Weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The Investment Manager will select investments to seek to achieve the following binding criteria:

- The percentage of companies analysed for sustainability characteristics in the Fund will always be between 90%-100%.
- All invested companies will contribute to one or more of the Fund’s investable themes.

The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):

- Companies that generate over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil Fuels for electricity generation;
- Electricity utility companies with a carbon intensity that are not aligned with a below 1.5 degree scenario
- Companies that generate over 0% of their revenue from the production of Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 5% of their revenues from nuclear power;
- Companies that generate over 0% of their revenue from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 2% of their revenues from gambling products;
- Companies that generate over 2% of their revenues from adult entertainment products
- Companies that generate over 2% of their revenues from the production of alcohol and companies that receive over 10% of their revenues from alcohol distribution; and
- Companies that generate over 5% of their revenue from GMO crop production.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager’s proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer; or
- the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

#1 Sustainable covers sustainable investments with environmental or social objectives. A minimum of 90% of the portfolio will be invested in companies who contribute to the sustainable investment objective through their contribution to one or more of the six investment themes. Those investments will also evidence good governance practice in accordance with the Investment Manager's policy on good governance and do no significant harm to any other environmental or social objectives within the meaning of the SFDR. The portfolio is further split with a minimum of 30% in the environmental investment themes and 10% in the social investment themes.

#2 Not sustainable includes the remaining investments in the Fund, which do not qualify as sustainable investments and may be held for efficient portfolio management and cash management purposes. This includes derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

- **How does the use of derivatives attain the sustainable investment objective?**

Taxonomy-aligned activities are expressed as a share of: - **turnover**

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

(OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The use of derivatives does not contribute to the attainment of the Fund's sustainable objective. The Fund may use derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund may make sustainable investments in companies which contribute to the environmental objectives of Climate Change Mitigation and Climate Change Adaption and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852 ("Taxonomy"). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy³?

Yes: In fossil gas In nuclear energy

No:

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

A minimum of 1% of the Fund's investments will be aligned with the transitional and enabling activities under the Taxonomy Regulation.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund will be invested in sustainable investments with an environmental objective that is not aligned with the EU taxonomy.

What is the minimum share of sustainable investments with a social objective?

While the Fund commits to a minimum of 90% in sustainable investments, due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 10% of the investments underlying this Fund will be invested in sustainable investments with a social objective.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Investments which do not contribute to the Fund’s sustainable objective will only be held for efficient portfolio management and cash management purposes. The Fund may invest in derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank of Ireland. There are no minimum environmental and social safeguards for these investments.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

- **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

Not applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable

- **How does the designated index differ from a relevant broad market index?**

Not applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Where can I find more product specific information online?

Supplement

Federated Hermes China Equity Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 25 is 15 August 2023.

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the “Prospectus”).

Investors should refer to the annex to this Supplement regarding the Fund’s environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading “Management and Administration” in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund is suitable for investors seeking capital growth over at least a three to five-year horizon, who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors due to investment in emerging markets.

Investment Objective and Policy

Investment Objective

The investment objective of the Fund is to achieve capital growth over a rolling period of any five years.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). As at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Equity and Equity related securities (as referenced in the Categories of Investments section below) of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from China or Hong Kong. These companies will be listed or traded on a Regulated Market worldwide. The Investment Manager will seek exposure to securities which it expects to rise in value (known as a long-only strategy). The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;
- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from the mining or energy generation of thermal coal; and
- Companies that generate over 5% of their revenues from adult entertainment products;

Investment Strategy

The strategy follows a contrarian investment style, with the Investment Manager seeking exposure to companies that they believe to be undervalued by the market. These securities may be undervalued because of many factors, including market decline, actual, or anticipated unfavourable developments affecting the issuer of the security. The strategy does not follow general market trends and so these securities may be in areas of the market which are out of

favour. The Investment Manager believes this provides the Fund with the opportunity to outperform the market.

The Investment Manager intends to use an active approach to seek risk-adjusted returns through a thorough analysis of individual Equity and Equity related securities which it believes will generate returns. Other than investment in the excluded sectors listed above, the Investment Manager is not otherwise subject to any limitation on the types of companies to which it will seek exposure (either in terms of industry, size or focus).

The Investment Manager incorporates analysis that assesses the environmental, social and governance ("ESG") characteristics of a company into its investment process. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as proprietary analysis from EOS at Federated Hermes and third party providers such as ISS, CDP, MSCI, Sustainalytics and S&P Global Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging their knowledge of and direct contact and engagement with companies. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The Investment Manager may invest in companies with poor ESG characteristics where the company has shown a desire to improve their ESG behaviours including and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise. The ESG characteristics are also used to identify where active engagement with companies by the Investment Manager and EOS would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability. The Fund's market exposure (which is exposure to the Categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI China All Shares Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI China All Shares Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, which are listed on the Hong Kong, Shanghai, Shenzhen markets and through foreign listings outside of China. As at the date of this Supplement, the Investment Manager has determined this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible Collective Investment Schemes ("Eligible CIS"), Financial Derivative Instruments ("FDIs"), money market instruments,

cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

Equity: The Fund will invest in Equity (such as common and/or preferred stock and/or rights) and Equity related securities (such as GDRs and ADRs) of, or relating to, companies in, or that derive a substantial proportion of their revenues from China or Hong Kong. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in Section 2 Paragraph 8 of the German Investment Tax Act (2018).

Equity may include China A-Shares, directly through the Stock Connect or indirectly through FDIs (as referenced in the Methods of Access section below and Appendix VI of the Prospectus).

Debt: The Fund will not actively seek exposure to Debt, however, the Fund may invest in or hold Investment Grade government and Investment Grade or Below Investment Grade corporate fixed income debt securities of fixed and/or floating rate and that may be rated or unrated (including bonds, notes, and/or Convertible Debt Securities) of, or relating to companies and/or governments in, or that derive a substantial proportion of their revenues, from China or Hong Kong. Investment in or exposure to such securities will be on a long-only basis.

Eligible CIS: The Fund may acquire units/shares of Eligible CIS, including exchange-traded funds, money market funds and other funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis. Investments made by the Fund in units/shares of a UCITS or other CIS may not exceed, in aggregate, 10% of the assets of the Fund.

Methods of Access and Efficient Portfolio Management

FDIs: Defined as investments which are based on and priced according to the value of the underlying assets. The Fund may gain exposure to the aforementioned Equity, Equity related securities, Debt or Eligible CIS through the use of FDIs.

FDIs may be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

The FDIs that may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures, Options, Swaps, participation notes, Non-Voting Depositary Receipts, rights and Warrants.

For efficient portfolio management purposes, the Fund may also invest in and/or gain exposure to financial indices, hold cash and invest in money market collective investment schemes (to, for example, equitise cash). Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to, will be found via: [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into any total return swaps, repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|---|----------------------------------|
| Sustainability Risk | 27 |
| Chinese Market Risk | 32 |
| Depository Receipts Risk | 34 |
| Emerging Markets Risk | 35 |
| Equity Risk | 37 |
| Futures Risk | 40 |
| Stock Connect Risk | 43 |
| Small and Mid-Capitalisation Companies Risk | 44 |
| Warrants Risk | 46 |

Dealing Information

| | |
|--|---|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be 12 noon (Irish time) on each Dealing Day. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the latest mid-market price as at the Valuation Point when no last traded price is available. |
| Income Equalisation | The Fund operates income equalisation as disclosed in the "Income Equalisation" section in the Prospectus. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.04% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company, (including the establishment expenses of the Fund). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.50% |
| F | 0.75% |
| I | 0.75% |
| K | 0.60% |
| L | 0.60% |
| M | 0.45% |
| P | 0.75% |
| R | 1.50% |
| T* | 0.00% |
| W | 0.50% |
| X | 0.25% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, and Class I Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: <https://www.hermes-investment.com/capacity-management>.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 16 August 2023 and close at 5 p.m. on 15 February 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Federated Hermes China Equity Fund**
 Legal entity identifier: **213800KLE7HKNN6ZD806**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

| | |
|---|---|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|---|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in companies exhibiting the following characteristics:

- potential for improvement to ESG factors; and/or
- a willingness to engage on any material ESG issues; and/or
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

- Environmental Indicators: GHG Emissions and Carbon Footprint;
- Violation of UN Global Compact Principles 4 and 5; and
- Engagement Activity: as a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Manager and EOS.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable..

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— How have the indicators for adverse impacts on sustainability factors been taken into account?

Not applicable

— How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Does this financial product consider principal adverse impacts on sustainability factors?

✘ Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors are identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the assessment. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from the dedicated stewardship team, EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where material sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager follows a bottom-up stock selection process and a contrarian investment style that seeks exposure to companies in China that are attractively priced relative to their quality. In selecting investments for the Fund, the Investment Manager incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Improvers: The Investment Manager incorporates analysis that assesses the ESG characteristics of a company into its investment process. As part of this assessment, the Investment Manager conducts an assessment of a company's ESG characteristics based on quantified ESG metrics and a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors include, but are not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as employee satisfaction and turnover). The ESG assessment seeks to identify companies that might have current ESG deficiencies but which have shown the potential and/or desire to improve their ESG behaviours, through identified management goals, provided the companies can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined below. This may be further supported via engagement with the company or where the company may be subject to related advocacy with relevant government bodies and/or regulators.

Engagement: The Investment Manager leverages quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks are identified, the Investment Manager works with EOS to engage with companies to address those risks. Engagement is conducted in the context of the company's sector and regional policy, where corporate governance standards and social safeguards may differ to international expectations in developed markets. Engagement occurs through meetings with company boards and management and through the exercise of voting rights. The Investment Manager also engages in advocacy with government, regulators and governance associations. Engagement seeks to identify measurable objectives to deliver positive change within set time periods. Where there is engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company is not receptive to engagement on material ESG risks, or makes insufficient progress in addressing them over time, it may result in divestment of that company.

Exclusions: The Investment Manager will not invest in the following companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include Controversial Weapons, Conventional Weapons, tobacco, thermal coal and adult entertainment.

● What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in companies which meet the following criteria (based on information available to the Investment Manager on these companies):
 - Companies that generate over 0% of their revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers Controversial Weapons and companies that generate over 5% of their revenues from production of Conventional Weapons;

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- Companies that generate over 0% of their revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenues from the mining or energy generation of thermal coal; and
- Companies that generate over 5% of their revenues from adult entertainment products.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

As part of the investment strategy, the Investment Manager assesses the corporate governance of a company by reference to its policy on good governance and through a variety of means, including the Investment Manager's proprietary corporate governance tool and qualitative analysis, insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, a company's management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company related to its governance, which have not been mitigated through subsequent demonstrative actions.

However, a company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the company's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager and/or EOS is engaging with the company to address enhancements to the company's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

However, no investments will be made in any company which is in violation of Principles 4 and 5 of the UN Global Compact Principles relating to forced and compulsory labour and the abolishment of child labour..

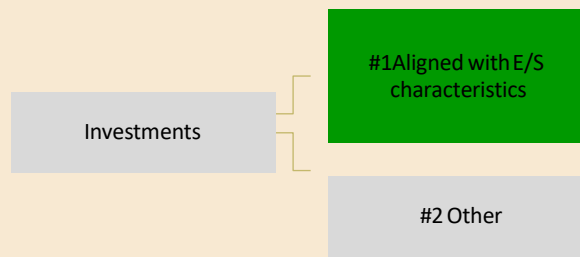

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes a minimum of 90% of the Fund's investments will be in companies who meet the characteristics promoted by the Fund and can evidence good governance practices in accordance with the Investment Manager's policy on good governance, as outlined above.

#2 Other includes the remaining investments of the Fund, which may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash).

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The use of derivatives does not contribute to the attainment of the Fund's environmental or social characteristics. The Fund may use derivatives to gain exposure to equities and/or equity-related securities and/or Eligible CIS. The decision to utilise these instruments may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying investment than to purchase the investment directly). They may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner).

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include derivatives to gain exposure to equities and/or equity related securities and/or Eligible CIS and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable

Supplement

Federated Hermes US High Yield Credit Fund

a sub-fund of Federated Hermes Investment Funds public limited company, an umbrella fund with segregated liability between sub-funds

Investment Manager – Federated Investment Counseling

The date of this Supplement No. 26 is 18 October 2023

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 15 August 2023 as may be amended or updated from time to time (the "Prospectus").

Investors should refer to the annex to this Supplement regarding the Fund's environmental and/or social characteristics.

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a high level of income over at least a three to five year horizon, who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to investment in Below Investment Grade securities.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to generate a high level of income.

Investment Policy

The Fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

The Fund promotes investment in issuers exhibiting the following characteristics: (i) reduced ESG risks, including GHG emissions, carbon footprint and carbon intensity, human capital management, board independence, etc. (as determined by reference to the Investment Manager's proprietary ESG scoring methodology described in the annex to this Supplement); (ii) seeking to reduce their environmental / social impacts on the industry / region in which they operate as demonstrated through a willingness to engage on such issues; and (iii) limited to no revenue generated from excluded sectors. Further information on the manner in which the Fund achieves the promotion of these characteristics can be found below and in the annex to the Supplement.

The Fund will seek to achieve its objective by investing in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below), with at least 80% invested in Below Investment Grade securities.

The Investment Manager will exclude investment in the following companies (based on information available to the Investment Manager on these companies):

- companies that generate more than 0% of revenues from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons;
- companies that generate more than 5% of their revenues from the production of tobacco products.

In addition, the Investment Manager excludes companies that are in contravention of the principles of the UN Global Compact.

Investment Strategy

In managing the assets of the Fund, the Investment Manager will invest at least 80% in a diversified portfolio of Below Investment Grade securities denominated in USD issued by issuers located in or outside the US and which may include up to 5% of the Fund's net asset value in emerging market debt securities denominated in USD. Non-USD denominated investments will not exceed 5% of the net asset value of the Fund.

The Investment Manager employs fundamental analysis that assesses the ESG characteristics of an issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The integration of ESG considerations in the research and investment process provides a valuable extension to the Investment Manager's credit research and helps identify additional ESG-related risks. The Investment Manager assesses the ESG risks of a company by considering ESG research and scores from a wide variety of third party providers, where available, such as MSCI, Sustainalytics and S&P Global Trucost; and companies' own disclosures. The Investment Manager's approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each company in the portfolio. To generate these ESG scores, the Investment Manager uses the Investment teams proprietary scoring methodology to score a company's ESG behaviours, assigning the ESG score on a scale of 1 to 10. The Investment Manager will not invest in new issuers with an ESG score of 2 or lower from the investment universe. The percentage of ESG-analysed companies in the fund will always be between 90%-100%. The Investment Manager believes that quantitative data must be complemented by a fundamental bottom-up review of ESG and climate change issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager draws upon these internal and external sources to assign a Climate Change Impact ("CCI") score to companies in the portfolio on a scale of 1-5 (5 being the lowest score). The CCI score helps identify securities of companies that are adapting their business models to reduce their environmental impact on climate change. If the issuers fail to deliver on the Investment Manager's carbon transition expectations, this will be reflected in their ongoing CCI score. These are considered before investment and on an ongoing basis. The Investment Manager may invest in companies with poor ESG characteristics where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage in issues if they arise.

The Investment Manager selects securities that it believes have attractive risk-return characteristics. The securities selection process is divided into three steps including (i) a qualitative analysis of the issuer's business and product strength, its competitive position within its industry or market sector and management expertise (ii) a quantitative analysis of the issuer business profile based on financial models which are created by the Investment Manager's research team focussing on the issuer's ability to generate free cash flow and the stability and predictability of the free cash flow and (iii) a qualitative analysis of the issuer's ESG risk as further detailed above.

The Investment Manager attempts to minimise the Fund's portfolio credit risk by investing in a diversified portfolio of securities. The Investment Manager selects securities to maintain broad portfolio diversification by both company and industry. The Investment Manager does not target an average maturity for the Fund's portfolio.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis. The Investment Manager may (but is under no obligation to) invest in component securities of the Bloomberg Barclays US Corporate High Yield 2% Issuer Capped Index as well as in securities anticipated to enter or exit this index. The selection of securities remains at the entire discretion of the Investment Manager and thus the Fund's portfolio may include securities which are not part of the Bloomberg Barclays US Corporate High Yield 2% Issuer Capped Index and portfolio holdings may deviate on a limited basis from this index. The Bloomberg Barclays US Corporate High Yield 2% Issuer Capped Index is an index that measures the USD-denominated, high yield, fixed-rate corporate bond market and limits the exposure of each issuer to 2% of the total market value

and redistributes any excess market value index wide on a pro rata basis. In addition, the Company shall use the ICE BofA Merrill Lynch US High Yield Constrained Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The ICE BofA Merrill Lynch US High Yield Constrained Index is designed to track the performance of below-investment grade corporate debt denominated in US Dollars that are publicly issued in the major US or Eurobond markets. However, the Fund's portfolio composition will not be constrained in any way by the content of this index. As at the date of this Supplement, the Investment Manager has determined that these benchmarks may be used for such purposes. For the avoidance of doubt, the Fund's objective is not to track the performance of any index or benchmark. The Fund does not charge any performance fees and accordingly, no fees are paid to the Investment Manager on the basis of outperformance of any index or benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities (such as convertible bonds, mandatory convertible bonds and convertible preferred stock), Asset-Backed Securities, Amortising Bonds and/or up to 5% of the Fund's net asset value in Defaulted Bonds. The Fund may invest in money market instruments (including bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long basis.

Eligible CIS: The Fund may acquire up to 10% of its net asset value in units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long basis.

Equity: The Fund may, to a limited extent, invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depositary Receipts) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may utilise FDIs, such as Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include credit default Swap indices), equity index Options, Options on credit default Swaps and equity Options) for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Exposure delivered may be long exposure, Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure. Financial indices may give exposure to, for example, fixed income instruments or Credit Default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [Federated Hermes / Financial Indices](#).

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash, invest in money market collective investment schemes, for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure (defined as the NAV of the Fund and its global exposure) associated with the Investments of the Fund,

including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

| Risk | Prospectus page reference |
|---------------------------|----------------------------------|
| Operational Risk | 21 |
| Liquidity Risk | 23 |
| Sustainability Risk | 26 |
| Bonds Risk | 30 |
| Counterparty Default Risk | 38 |

Dealing Information

| | |
|--|--|
| Dealing Deadline | 9.30 am (Irish time) on the relevant Dealing Day. |
| Valuation | The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used. The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available. |
| Income Equalisation | The Fund operates Income Equalisation. |
| Timing of Payment for Subscriptions | Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day. |
| Timing of Payment for Redemptions | Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day. |
| Administrator's Fee | Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Depository's Fee | The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Other Fees and Expenses | The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company. Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses". |
| Compulsory Redemption Threshold | All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time. |

Share Class Information

Fees

| Class | Management Fee (Max) |
|-------|----------------------|
| A | 1.10% |
| F | 0.60% |
| I | 0.60% |
| K | 0.50% |
| L | 0.50% |
| M | 0.35% |
| P | 0.60% |
| R | 1.20% |
| T* | 0.00% |
| X | 0.30% |
| Z** | 0.00% |

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Notwithstanding what is disclosed in the Prospectus, please note that for operational reasons fractions of the Class A, Class I and Class K Shares in issue will be calculated to three decimal places. The Net Asset Value of each Class A, Class I and Class K Shares will be determined by dividing the Net Asset Value attributable to the class by the number of Shares of the Share Class and rounding the result to four decimal places in the normal way as described in the Prospectus.

Minimum Transactions

| Class | Minimum Initial Subscription Amount | Minimum Subsequent Subscription Amount | Minimum Holding Amount | Minimum Redemption Amount |
|-------|-------------------------------------|--|------------------------|---------------------------|
| A | USD 1,000 | No minimum | USD 1,000 | No minimum |
| F | GBP 100,000 | No minimum | GBP 100,000 | No minimum |
| I | USD 1,000,000 | No minimum | USD 1,000,000 | No minimum |
| K | USD 100,000,000 | No minimum | USD 100,000,000 | No minimum |
| L | GBP 100,000,000 | No minimum | GBP 100,000,000 | No minimum |
| M | GBP 200,000,000 | No minimum | GBP 200,000,000 | No minimum |
| P | GBP 400,000 | No minimum | GBP 400,000 | No minimum |
| R | EUR 1,000 | No minimum | EUR 1,000 | No minimum |
| T | GBP 1,000 | No minimum | GBP 1,000 | No minimum |
| X | GBP 10,000,000 | No minimum | GBP 10,000,000 | No minimum |
| Z | Per Client Agreement | Per Client Agreement | Per Client Agreement | Per Client Agreement |

The above amounts can be paid in the currency stated or its foreign currency equivalent. For Maximum Subsequent Subscription Amounts that apply due to capacity management, please see www.hermes-investment.com/capacitymanagement.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacitymanagement.

Initial Offer of Shares

As more particularly described in the Prospectus, the Company offers 17 Classes of Shares with various distribution policies, distribution frequencies, hedging policies and currencies in each Class.

The table below sets out details of the Classes of Shares in the Fund approved by the Central Bank, and the Classes which are available for purchase as at the date of this Supplement. Unless otherwise indicated by (*), the currency available in each Class of Shares set out below are available in hedged and unhedged versions.

| Currency | Accumulating | Distributing Annually | Distributing Semi Annually | Distributing Quarterly | Distributing Monthly | Distributing Quarterly** | Distributing Monthly** |

*Hedged USD Shares are not available

** Certain Fees and Expenses are charged against Capital

Share Classes which have received subscriptions have a price available, which can be found via www.hermes-investment.com/products. Where no price is available for a Share Class in respect to Share Classes that have not received subscriptions, the Initial Offer Period will start at 9 a.m. on 19 October 2023 and close at 5 p.m. on 18 April 2024.

The Initial Offer Price per Share Class shall be determined by reference to the currency denomination of the Share Class and is as follows:

| GBP | EUR | USD | CHF | SEK | NOK | DKK | HKD | SGD | AUD | CNH | CAD | JPY |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 2 | 2 | 20 | 20 | 10 | 20 | 3 | 3 | 10 | 2 | 200 |

The base currency of the Fund is US Dollars.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Federated Hermes US High Yield Credit Fund

Legal entity identifier: 213800HG5292EKBX3U90

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

 No

| | |
|---|---|
| <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p> | <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p> |
|---|---|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes investment in issuers exhibiting the following characteristics:

- *reduced Environmental, Social and Governance risks (including GHG emissions, carbon footprint, carbon intensity, human capital management, board independence etc.) as determined by reference to the Investment Manager’s proprietary ESG scoring methodology explained below;*
- *seeking to reduce their environmental / social impacts on the industry / region in which they operate as demonstrated through a willingness to engage on such issues;and*
- *limited to no revenue generated from excluded sectors.*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The following sustainability indicators are used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

Environmental characteristics

- *GHG emissions of the Fund compared to the index (Scope 1 and Scope 2, Scope 3, measured using tCO2eq);*
- *Carbon footprint of the Fund compared to the index (measure as total Scope 1 and Scope 2 GHG emissions normalised by market value of portfolio);*
- *Carbon intensity of the Fund compared to the index (measured as total Scope 1 and Scope 2 GHG emissions normalised by \$m revenues per company); and*

Social characteristics

- *% of the Fund invested in issuers in violation of the UN Global Compact Principles.*

In addition, the Fund measures the attainment of its characteristics by reference to the % of issuers engaged on carbon emissions and to the % progress made against objective milestones set by the Investment Manager and EOS

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

Not applicable

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objectives?

Not applicable

How have the indicators for adverse impacts on sustainability factors been taken into account?

Not applicable

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

As part of the investment strategy, the Investment Manager considers whether companies exhibit any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

both the results from and the underlying indicators used by the ESG Scoring Model enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from the teams analysts and third party providers, where available, such as MSCI, Sustainalytic, SASB, Bloomberg and S&P Trucost amongst others; and companies' own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

Relevant information on principal adverse impacts on sustainability factors will be disclosed in due course in the Fund's annual report.

No

What investment strategy does this financial product follow?

The Investment Manager uses an active approach to seek a high level of income. To achieve this the Investment Manager believes that a bottom-up, fundamental analysis that focuses on the underlying quality of an issuer's business has the potential to generate competitive returns over time. The Investment Manager further incorporates ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporates analysis that assesses the environmental, social and governance ("ESG") characteristics of a company into its investment process. The Investment Manager achieves this by using a proprietary scoring methodology to score a company's ESG behaviours, assigning an ESG score on a scale of 1 to 10. The ESG score considers environmental and social characteristics including (but not limited to) the management of environmental risks (such as GHG emissions, impact on climate change and natural resource use) and social risks (such as human & labour rights). The Investment Manager may invest in companies with a poor ESG score, where the company has shown a desire to improve their ESG behaviours. The Investment Manager will not invest in new issuers with an ESG score of 2 or below from the investment universe. These scores are not static and therefore could be downgraded. In circumstances where a company's score is downgraded to a 2 or below the Investment Manager will seek to divest. The percentage of ESG-analysed companies in the Fund will always be between 90%-100%.

Exclusions: The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds (see below for further detailed information) Excluded activities include controversial weapons, tobacco production, and companies in contravention of the principles of the UN Global Compact.

Engagement: The Fund leverages quantitative and qualitative engagement insights generated by the Investment Manager, engagers embedded with the investment management team, and, when available, engagement from EOS. Where sustainability risks are identified, the Investment Manager and the team will work to engage with issuers to address those risks. Engagement occurs through meetings with management. Engagement seeks to develop a plan to address the issue and deliver positive change within set time periods. Where there is engagement with an issuer, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer is not receptive to engagement on any sustainability risks, or makes insufficient progress in addressing them over time, it may result in divestment from that issuer.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%.
- The Investment Manager will not invest in new issuers with an ESG score of 2 or below (scores are evaluated on an on-going basis and can fluctuate).

- *The Investment Manager will also exclude investment in companies involved in the following activities (based on information available to the Investment Manager on these companies);*
 - *Companies that generate revenue from the production of controversial weapons (which includes anti-personnel mines, cluster munitions, depleted uranium, nuclear weapons, white phosphorus and chemical & biological weapons)*
 - *Companies that receive over 5% of their revenues from tobacco production;*
 - *Companies that are in contravention of the principles of the UN Global Compact.*

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

As part of the investment strategy, the Investment Manager assesses the corporate governance of an company by reference to its policy on good governance and through the use of Federated Hermes Limited's proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research. In considering good governance, the Investment Manager will assess, among other things, an issuer's management structure, employee relations, staff remuneration and compliance with applicable tax rules, where the information is accessible.

A company is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer's corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company's corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*
- *the Investment Manager has conducted a qualitative analysis of the private company and determined the company's corporate governance is in line with expectations, or*
- *the Investment Manager is engaging with the issuer to address enhancements to the issuer's governance practices, as further detailed in the section of this annex titled "What investment strategy does this financial product follow?"*

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

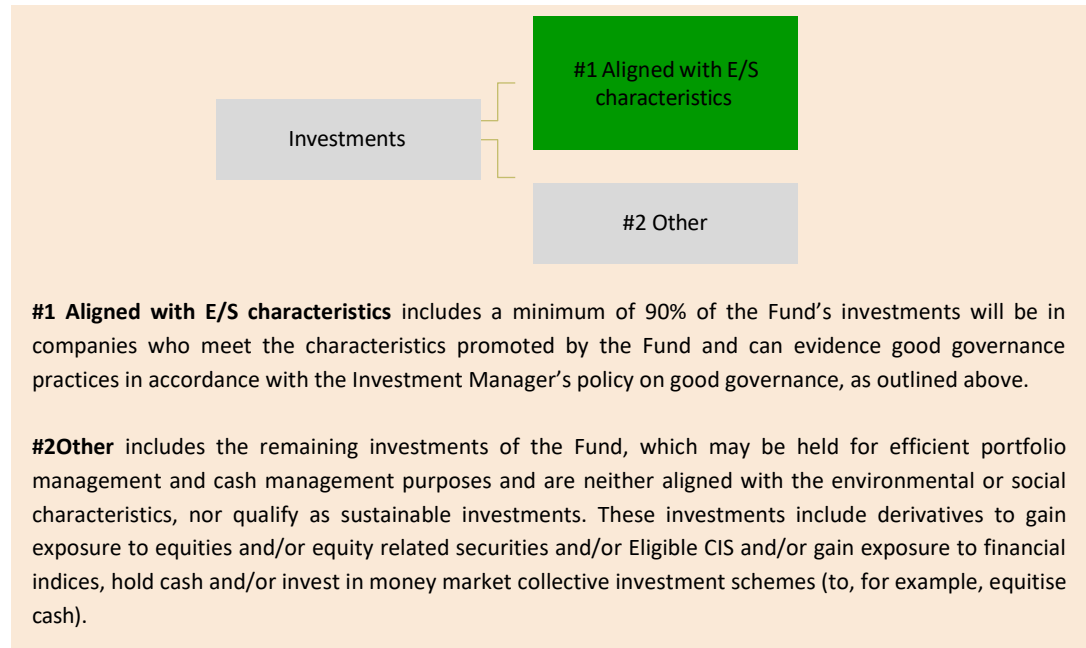

A company is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on Federated Hermes Limited's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>.

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The investment manager may utilise credit default swaps to gain exposure to an issuer's capital structure, where they deem this the most efficient way of doing so. As such these derivatives act as corporate exposure and contribute to the attainment of the environmental and social characteristics in the same way as holding a corporate bond.

The Fund may also utilise FDIs, such as CDS at an index level, Futures, Forward Currency Exchange Contracts, Options (such as credit/index Options (to include CDSI), equity index Options and Options on CDS and equity Options) and for direct investment and/or efficient portfolio management purposes. The Fund may also enter Swaps such as currency Swaps for currency hedging purposes and Credit Default Swaps. FDIs will be used for purposes such as assisting cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities, such as the bonds described in the preceding section, in a quicker and/or more efficient manner. These FDIs may be dealt in on an exchange traded or OTC basis. These instruments do not contribute to the attainment of the environmental and social characteristics.

● To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. As such the Fund will have a minimum of 0% Taxonomy-alignment.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that

comply with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of investments in transitional and enabling activities?

Not Applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Investments included under “#2 Other” may be held for efficient portfolio management and cash management purposes and are neither aligned with the environmental or social characteristics, nor qualify as sustainable investments. These investments include cash and money market instruments, as well as FDI to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs. There are no minimum safeguards for these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not Applicable

- **How does the designated index differ from a relevant broad market index?**

Not Applicable

- **Where can the methodology used for the calculation of the designated index be found?**

Not Applicable
