Neuberger Berman Japan Equity Engagement Fund ("Fund")

a sub-fund of Neuberger Berman Investment Funds plc

JPY IS Accumulating Class - Unhedged, IE00BL5B4J15

This Fund is managed by Neuberger Berman Asset Management Ireland Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to achieve a target average return of 3% over the benchmark before fees over a market cycle (typically 3 years) from investing primarily in a portfolio of Japanese equity holdings. There can be no guarantee that the Fund will ultimately achieve its investment objective.

The Fund invests the majority of its assets in equity securities (shares) of small and mid sized companies that are publically traded, conduct most of their business in Japan or are headquartered in Japan, and are listed or traded on recognised markets (defined in Prospectus) globally. The Fund invests across all economic sectors in both small and mid-capitalisation companies which are those that are valued at less than 1 trillion Japanese Yen at the time of purchase. Investment selection is the result of bottom up research in an effort to identify companies that are believed to have the potential to increase in value and achieve growth, and which can be maintained. This is done through active engagement such as continued dialogue and interaction with the companies.

The Fund is actively managed and does not intend to track the benchmark, the MSCI Japan Small Cap Net Index (Total Return, JPY) which is used for performance comparison purposes only. The Fund's investment policy restricts the extent to which the Fund's holdings may deviate from the benchmark. This deviation may be significant.

More information on the Fund's sustainability factors can be found in the prospectus.

This Fund may not be appropriate for short-term investment and is more suitable as part of a diversified portfolio.

You may sell your shares on any day when the financial markets in London and New York are open for business.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs will reduce the Fund's return.

RISK AND REWARD PROFILE

This Fund is in category 6 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- **Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including the overall performance of companies and the market perception of the global economy.
- **Liquidity Risk:** The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments. Smaller companies' shares can be harder to sell and their prices more volatile.
- **Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.
- **Derivative Risk:** The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Sub-Investment Managers (or the Manager where applicable) will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.
- **Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.
- **Currency Risk:** Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local

currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

- **Concentration Risk:** The Fund's investments may be concentrated in a small number of investments or in bonds issued by a small number of issuers and its performance may therefore be more variable than the performance of a more diversified fund.
- **Sustainable Risk:** The Fund may focus on investments in companies that relate to certain sustainable development themes and demonstrate adherence to environmental, social and corporate governance practices. This may mean the universe of securities from which the Fund can invest in may be smaller than that of other funds and may underperform the market as a result.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated using past data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

CHARGES

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	0.73%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charge shown is an estimate. This figure may vary from year to year.

You can find more details on these charges in the "Fees and Expenses" section of the prospectus and supplement.

PAST PERFORMANCE

There is insufficient data to produce a useful indication of past performance for the share class.
--

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in Japanese Yen.

The Fund launched on 12 May 2020.

This class started to issue shares on 16 February 2021.
