Fidelity UCITS ICAV

GENERAL INFORMATION

Fidelity UCITS ICAV (the “Fund”) was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 (as amended) on 19 August 2016 under registration number C158668 and is authorised by the Central Bank of Ireland (the “Central Bank”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”).

Effective from 1 June 2022, the Manager of the Fund changed from FIL Fund Management (Ireland) Limited to FIL Investment Management (Luxembourg) S.A., Ireland Branch (“Manager”).

Except where the context otherwise requires, defined terms shall bear the meaning given to them in the Prospectus of the Fund.

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently there are sixteen Sub-funds under the umbrella (each, a “Sub-Fund” and, collectively, the “Sub-Funds”), fifteen of which were launched as of the financial year end and are detailed in the table below.

There is one other Sub-Fund of the umbrella that has been approved by the Central Bank of Ireland (Fidelity Crypto Industry and Digital Payments UCITS ETF), but it has not been launched as at the financial year end.

<i>Sub-Fund</i>	<i>Launch Date</i>
Fidelity Global Quality Income UCITS ETF	27 March 2017
Fidelity US Quality Income UCITS ETF	27 March 2017
Fidelity Emerging Markets Quality Income UCITS ETF	30 October 2017
Fidelity Europe Quality Income UCITS ETF	30 October 2017
Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF	18 May 2020
Fidelity Sustainable Research Enhanced US Equity UCITS ETF	21 May 2020
Fidelity Sustainable Research Enhanced Global Equity UCITS ETF	27 May 2020
Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF	24 November 2020
Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF	1 December 2020
Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF	3 December 2020
Fidelity Electric Vehicles and Future Transportation UCITS ETF	24 August 2022
Fidelity Clean Energy UCITS ETF	24 August 2022
Fidelity Cloud Computing UCITS ETF	24 August 2022
Fidelity Digital Health UCITS ETF	24 August 2022
Fidelity Metaverse UCITS ETF	24 August 2022
Fidelity Crypto Industry and Digital Payment UCITS ETF	Unlaunched

With the prior approval of the Central Bank, the Fund from time to time may create an additional Sub-Fund or Sub-Funds. The investment policies and objectives for which will be outlined in a Relevant Supplement, together with details of the initial offer period, the initial subscription price for each Share and such other relevant information in relation to the additional Sub-Fund or Sub-Funds as the Directors may deem appropriate, or the Central Bank requires, to be included. Each Relevant Supplement will form part of, and should be read in conjunction with, the Prospectus. In addition, the Fund may create additional Classes of Shares within a Sub-Fund to accommodate different terms, including different charges and/or fees and/or brokerage arrangements provided that the Central Bank is notified in advance, and gives prior clearance, of the creation of any such additional Class of Shares.

The most recent Prospectus of the Fund is dated 1 December 2022. The most recent Supplements for all the Sub-Funds are dated 1 December 2022.

The Sub-Funds are exchange traded funds (“ETFs”) and all active Shares in the Sub-Funds are designated as “ETF Shares” (being Shares that are intended to be actively traded on a secondary market). The following Sub-Funds are the Index Tracking Sub-Funds: Fidelity Global Quality Income UCITS ETF, Fidelity US Quality Income UCITS ETF, Fidelity Emerging Markets Quality Income UCITS ETF, Fidelity Europe Quality Income UCITS ETF, Fidelity Electric Vehicles and Future Transportation UCITS ETF, Fidelity Clean Energy UCITS ETF, Fidelity Cloud Computing UCITS ETF, Fidelity Digital Health UCITS ETF and the Fidelity Metaverse UCITS ETF. The following Sub-Funds are the Actively Managed Sub-Funds: Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF, Fidelity Sustainable Research Enhanced US Equity UCITS ETF, Fidelity Sustainable Research Enhanced Global Equity UCITS ETF, Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF, Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF and the Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF. The Manager has appointed Geode Capital Management, LLC to act as Investment Manager of the Index Tracking Sub-Funds and FIL Investments International to act as Investment Manager of the Actively Managed Sub-Funds (each, an “Investment Manager” and, collectively, the “Investment Managers”).

The investment objective of the Index Tracking Sub-Funds is to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the relevant benchmark index (each, an “Index”).

For more information on the Index please refer to the available index methodology which can be downloaded from the Fidelity ETFs website, www.spdji.com.

The investment objective of the Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies in Europe.

The investment objective of the Fidelity Sustainable Research Enhanced US Equity UCITS is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies in the United States.

The investment objective of the Fidelity Sustainable Research Enhanced Global Equity UCITS ETF is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies domiciled globally.

The investment objective of the Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies in emerging markets.

The investment objective of the Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies domiciled in Japan.

The investment objective of the Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF is to achieve long-term capital growth from a portfolio primarily made up of equity securities of companies domiciled in developed market countries in the Pacific region excluding Japan.

Fidelity Global Quality Income UCITS ETF

The Fidelity Global Quality Income Index is designed to reflect the performance of stocks of large and mid-capitalisation dividend paying companies from developed countries that exhibit quality fundamental characteristics. The Index comprises the equity securities of the relevant companies. The Index constituents are screened according to fundamental measures such as free cash flow margin, return on invested capital and free cash flow stability with the objective of identifying financially robust companies. The companies with highest dividend yield are then selected for inclusion within the Index. The Index is rebalanced annually.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund’s performance and that of the Index.

In order to seek to achieve this investment objective, Geode Capital Management LLC (the “Investment Manager”) will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF

The Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF is designed to achieve its investment objective by actively investing in a portfolio primarily made up of equity securities of companies domiciled, or exercising the predominant part of their economic activity, in Europe.

FIL Investments International will use a quantitative approach to deliver a portfolio of investments that are usually focused on the highest conviction stock recommendations identified by the Investment Manager's research analysts. The portfolio will have a robust environmental, social and governance (the "ESG") profile, focusing on companies that maintain strong ESG credentials.

The Sub-Fund will hold a portfolio of equity securities which is systematically selected and managed with the aim of outperforming the MSCI Europe (Net Total Return) Index (the "Benchmark") over the long-term. The Benchmark is designed to measure the capital gains of the larger segments of the European stock market and assumes that any cash distributions, such as dividends, are reinvested.

The following is the active Share Class in the Sub-Fund as at 31 January 2023:

<i>Share Class</i>	<i>Share Class Launch Date</i>	<i>Currency</i>

Fidelity Electric Vehicles and Future Transportation UCITS ETF

The Fidelity Electric Vehicles and Future Transportation ESG Tilted Index NR is designed to reflect the performance of a global universe of companies engaged in the production of electric and/or autonomous vehicles and their components, technology, or energy systems or engaged in other initiatives that aim to change the future of transportation (the "Index Theme"). The Index Theme comprises two sub-themes: (a) future transportation technologies, which covers activities such as, but not limited to, manufacturing of electric vehicle, lithium batteries, electric vehicles charging stations or ride sharing apps and (b) future transportation enablers, which covers activities such as, but not limited to, power devices, application processors or electronic circuits semi-conductor company or supporting components and software manufacturing such as sensors, GPS, or autonomous software/electronics. The Index comprises equity securities of the relevant companies.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

Fidelity UCITS ICAV

GENERAL INFORMATION (CONTINUED)

Fidelity Electric Vehicles and Future Transportation UCITS ETF (continued)

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. The Sub-Fund may in certain, limited circumstances, where replication of the Index is not reasonably practical (for example as a result of the illiquidity or unavailability of certain securities within the Index), invest in instruments that are not included in the Index but which the Investment Manager believes will help the Sub-Fund track the Index, e.g. securities which provide similar price and yield performance and risk profiles to constituents of the Index.

The following is the active Share Class in the Sub-Fund as at 31 January 2023:

<i>Share Class</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
Acc	24 August 2022	USD

Fidelity Clean Energy UCITS ETF

The Fidelity Clean Energy ESG Tilted Index NR is designed to reflect the performance of a global universe of companies that distribute, produce or provide technology or equipment to support the production of energy from solar, wind, hydrogen and other renewable sources (the "Index Theme"). The Index comprises equity securities of the relevant companies who are positioned to benefit from the increased demand for clean energy.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. The Sub-Fund may in certain, limited circumstances, where replication of the Index is not reasonably practical, invest in instruments that are not included in the Index but which the Investment Manager believes will help the Sub-Fund track the Index, e.g. securities which provide similar price and yield performance and risk profiles to constituents of the Index.

<i>Share Class</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
Acc	24 August 2022	USD

Fidelity Cloud Computing UCITS ETF

The Fidelity Cloud Computing ESG Tilted Index NR is designed to reflect the performance of a global universe of companies that provide products or services enabling the increased adoption of cloud computing, characterized by the delivery of computing resources over the internet (the "Index Theme"). The Index may therefore encompass stock of companies engaged in activities linked to cloud infrastructure, such as, but not limited to, on-demand data storage space, remote servers technology and networks, cloud platforms, such as, but not limited to, tools supporting the creation of computer programs or operating systems delivered online and cloud software, such as, but not limited to, software applications delivered over the internet relevant to the Index Theme. The Index comprises equity securities of the relevant companies who are positioned to benefit from the increased adoption of cloud computing technology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. The Sub-Fund may in certain, limited circumstances, where replication of the Index is not reasonably practical, invest in instruments that are not included in the Index but which the Investment Manager believes will help the Sub-Fund track the Index, e.g. securities which provide similar price and yield performance and risk profiles to constituents of the Index.

INVESTMENT MANAGER'S REPORT

Fidelity Global Quality Income UCITS ETF

The Fidelity Global Income Index ("Index") returned -2.38% for the one-year period ending January 31, 2023. The Fidelity Global Quality Income UCITS ETF ("Sub-Fund") returned -2.15% (gross of fees) for the same period ahead of its benchmark by twenty-three basis points. The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of trading due to dividend accruals, trading costs as a result of index rebalancing, and withholding tax differences between the Sub-Fund and the Index.

Ten of the twenty one countries within the Index had positive returns for the one-year period. Belgium contributed the most, up 18.3% followed by Denmark which was up 17.1%. The two countries in negative return territory were Norway and Austria; they fell -30.7% and -21.3% respectively. On a stock level, Ororon Energy Ab rose 191.2% and Texas Pacific Land Corp was up 21.7% over the year. Stocks on the negative side of the equation included Cable One Inc and SL Green Realty REIT, which fell -48.3% and -44.4% respectively.

The Sub-Fund seeks to track benchmark returns by closely replicating the constituents and characteristics of the Fidelity Global Quality Income Index, investing dividend income and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 – Tracking Error section from pages 211 to 212.

February 2023

Geode Capital Management LLC

Fidelity US Quality Income UCITS ETF

The Fidelity US Quality Income Index ("Index") fell -3.10% for the one-year period ending January 31, 2023. The Fidelity US Quality Income UCITS ETF ("Sub-Fund") outperformed the index by returning -2.73% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of trading due to dividend accruals, trading cost associated with index rebalancing, and withholding tax differences between the Sub-Fund and the Index.

Five of the eleven GICS sectors had positive returns over the year. Energy had the highest return in the index return up 30.7% followed by the Utilities sector gaining 12.5%. Information Technology, Communication Services, and Real Estate were the strongest laggards during the period. On the stock side, Eli Lilly & Co and Chevron Corp led the way returning 42.1% and 37.3% respectively. The top two detractors were Cable One Inc which fell -48.3% and SL Green Realty REIT dropped -46.5%.

The Sub-Fund continues to track benchmark returns by closely replicating the constituents and characteristics of the Fidelity US Quality Income Index, investing dividend income and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform in line with its benchmark.

Please see table in Appendix 3 – Tracking Error section from pages 211 to 212.

Fidelity Emerging Markets Quality Income UCITS ETF

The Fidelity Emerging Markets Quality Income Index ("Index") fell -15.87% for the one-year period ending January 31, 2023. The Fidelity Emerging Markets Quality Income UCITS ETF ("Sub-Fund") returned nineteen basis points lower, down -16.06% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of trading costs sourced from index rebalances and security selection from the portfolio optimization employed and tax differentials between the Sub-Fund and benchmark.

Eleven out of the twenty-five countries within the Index had positive returns. Mexico led the way (+73.5%), Thailand (+31.1%) and Turkey (+25.8%) were also positive contributors. Russia was the leading laggard and lost -71.6% during the period. On a stock level, Banco Del Bajio was up 73.1% followed by Yadea Group Holdings Ltd which gained 50.0%. Detractors from the index return included Evraz Plc which fell -84.1% for the year and Polymetal Intl Plc which declined -71.6%.

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Emerging Markets Quality Income UCITS ETF (continued)

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Fidelity Emerging Markets Quality Income Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Fidelity Europe Quality Income UCITS ETF

The Fidelity Europe Quality Income Index (“Index”) fell -5.33% for the one-year period ending January 31, 2023. The Fidelity Europe Quality Income UCITS ETF (“Sub-Fund”) outperformed for the period by thirty eight basis points, returning -4.95% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of trading due to dividend accruals, trading costs associated with index rebalancing, and withholding tax differences between the Sub-Fund and the Index. Returns are in Euros.

Seven of the countries within the Index had positive returns for the year. Belgium (+21.0%) and The United States (+19.6%) rose the highest. Norway and Austria were the primary laggards for the period -24.7% and -12.9% respectively. Novo Nordisk A/S was the leading contributor to benchmark performance; the stock price was up 45.9%. Orion Corporation was also a top contributor up 41.5%. The leading underperformers included Aroundtown Sa which fell -50.4% and Getinge Ab -40.2%.

The Sub-Fund continues to track the benchmark return by closely replicating the constituents and characteristics of the Fidelity Europe Quality Income Index, investing dividend income and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 – Tracking Error section from pages 211 to 212.

Geode Capital Management LLC

Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF

Market Commentary

The Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF (“Sub-Fund”) returned -1.21% gross over the period (from February 1st 2022 through January 31st 2023) underperforming the MSCI Europe Net Return EUR Index (“The Index”) returns of -0.15%.

European equities generated negative returns over the period. Increasing concerns around inflation and higher bond yields led to volatile swings and significant sector and style rotations across global markets. The geopolitical crisis arising from the war in Ukraine accelerated the economic deterioration that was already underway and increased the pressure on supply chains that were already strained due to successive COVID-19 lockdowns. There was also a sharp rise in the cost of energy, further fuelling inflationary pressures and inviting a more hawkish stance by most major central banks. Record high levels of inflation led the European Central Bank (ECB) to hike its policy rate four times between July and December by 2.5% in total. However, there was some respite in inflation towards the end of period in January this year, supported by falling natural gas prices as the mild winter meant that the anticipated energy crisis failed to materialise. Optimism surrounding China's economic reopening also supported markets. This, coupled with slowing headline inflation in the US and Europe, raised hopes of a softer economic slowdown in the region, especially after confirmation that the eurozone economy narrowly avoided falling into a recession in the fourth quarter of 2022. The release of upbeat corporate results helped ease some worries about profits being hit by higher borrowing costs, raising hopes that earnings may fall less than initially feared. However, European Central Bank (ECB) President Christine Lagarde continued to signal the need for higher interest rates in order to return inflation to its 2% target. Against this backdrop, most of the sectors ended the year in negative territory with the exception of energy.

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF (continued)

Portfolio commentary

The Sub-Fund underperformed its index, primarily due to stock selection in industrials, consumer staples and an overweight stance in energy. On a positive note, stock selection in financials, materials and an overweight stance in utilities boosted the relative returns. At a stock level, an overweight stance in Ericsson, Tele2 and Vonovia detracted from relative performance. On a positive note, a lack-of-exposure to adidas, an underweight stance in BASF and Credit Suisse supported the relative returns.

Positioning and Outlook

This enhanced index Sub-Fund is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. It is designed to provide sustainable broad Europe equity exposure with low active risk and a tracking error of below 2%. This Sub-Fund leverages Fidelity's unique fundamental research and proprietary sustainable ratings. It is expected to behave similarly to the index, with broadly neutral sector and regional positions, with security selection being the predominant driver of risk. The portfolio is designed to outperform its benchmark, with an alpha target of +1% gross per annum through the market cycle, i.e. more than five years.

At a sector level, communication services, energy and information technology are the key overweights. Conversely, the key underweights are utilities, consumer discretionary and industrials. At a stock level, the Sub-Fund has key overweight positions in Air Liquide, TotalEnergies and Hensoldt. On the other hand, key underweight positions include Siemens, Novartis and BP.

February 2023

FIL Investments International

Fidelity Sustainable Research Enhanced US Equity UCITS ETF

Market Commentary

The Fidelity Sustainable Research Enhanced US Equity UCITS ETF ("Sub-Fund") returned -10.10% gross over the period (from February 1st 2022 through January 31st 2023) underperforming the MSCI USA Net Return USD Index ("The Index") returns of -9.45%.

US equities generated negative returns over the period. Equities declined sharply in the first half following the Russian invasion of Ukraine and the Federal Reserve's (Fed) interest rate hikes. Market sentiment continued to plunge after the US economy witnessed two consecutive quarters of negative growth and the Fed confirmed that it will continue to raise interest rates even at the risk of an economic downturn, until inflation returns to its 2% target rate. Equities rebounded strongly at the start of the fourth quarter, as markets reacted positively to third quarter earnings. Names outside the technology sector and mega-cap group were particularly strong. The rally continued after October and November's Consumer Price Index (CPI) figures surprised to the downside, raising expectations that we may have reached peak inflation, and as third quarter GDP was raised to 2.9% at an annualised rate, reflecting an improvement in consumer spending and exports. Equities fell in December, after Fed Chairperson Jerome Powell reiterated the central bank's hawkish monetary policy measures. Fed officials forecast interest rate hikes for 2023, and the projected terminal rate (peak fed funds rate) increased from 4.6% in September to 5.1% in December. Rates are projected to decline in 2024. However, investor confidence quickly turned positive in January after the CPI eased for a sixth consecutive month to 6.5% annualised in December, fourth-quarter GDP growth came in stronger than expected at a 2.9% annualised rate and unemployment continued to inch down, strengthening the case for a smaller rate hike by the US Fed. Against this backdrop, most sectors declined over the one-year period; only energy ended in deep positive territory.

Portfolio commentary

The Sub-Fund underperformed its index, primarily due to stock selection in information technology, real estate and industrials. On a positive note, stock selection in communication services, financials and consumer staples boosted the relative returns. At a stock level, a lack-of-exposure to Eli Lilly and Company, Merck & Co and an overweight stance in Block detracted from relative performance. On a positive note, an underweight stance in Walt Disney, an overweight stance in Howmet Aerospace and Marathon Petroleum supported the relative returns.

At a stock level, the Sub-Fund has key overweight positions in Howmet Aerospace, Coca Cola and Bristol-Myers Squibb. On the other hand, key underweight positions include Chevron, Lilly (Eli) & Co and Merck & Co.

February 2023

FIL Investments International

Fidelity Sustainable Research Enhanced Global Equity UCITS ETF

Market Commentary

The Fidelity Sustainable Research Enhanced Global Equity UCITS ETF ("Sub-Fund") underperformed, returning -7.64% over the period (from February 1st 2022 through January 31st 2023) versus the MSCI World USD Index ("The Index") returns of -7.45%.

Global equities ended lower in US dollar terms over the 12-month period, as major central banks aggressively tightened their monetary policies to curb elevated inflation and as global growth weakened. Geopolitical uncertainties arising from Russia's attack on Ukraine, the resultant energy crisis in Europe and a resurgence in COVID-19 infections in several regions further weighed on markets. Towards the end of the period, equities recovered some losses as investors appeared to bet on signs of peaking inflation and slowing growth, which could eventually force global central banks to pursue a slower pace of tightening. Against this backdrop, US and Europe ex UK equities were the worst performers among key developed markets. Emerging market equities also fell and lagged developed markets, led by weakness in China amid economic and COVID-19-related challenges. However, there was a strong rebound in January as upbeat economic data and improving corporate earnings boosted investor sentiment. The prospects of a less restrictive monetary policy underpinned by signs of cooling inflation provided additional support. At a sector level, communication services, information technology and consumer discretionary were among the key decliners. Meanwhile, energy companies ended higher as crude oil prices rose amid uncertainties over global energy supply due to the Russia-Ukraine war.

Portfolio Commentary

The Sub-Fund underperformed its index, primarily due to stock selection in information technology, utilities and real estate. On a positive note, stock selection in consumer discretionary, energy and consumer staples boosted the relative returns. At a stock level, an overweight stance in Fidelity National Information Services, Inc., Z Holdings Corporation and Air Products and Chemicals, Inc. detracted from relative performance. On a positive note, an overweight stance in Schlumberger, Steel Dynamics and an out-of-benchmark exposure to Hensoldt supported the relative returns.

Positioning and Outlook

This enhanced index Sub-Fund is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. It is designed to provide sustainable broad Europe equity exposure with low active risk and a tracking error of below 2%. This Sub-Fund leverages Fidelity's unique fundamental research and proprietary sustainable ratings. It is expected to behave similarly to the index, with broadly neutral sector and regional positions, with security selection being the predominant driver of risk. The portfolio is designed to outperform its benchmark, with an alpha target of +1% gross per annum through the market cycle, i.e. more than five years.

At a sector level, financials and energy are the key overweights. Conversely, the key underweights are health care, communication services and information technology. At a stock level, the Sub-Fund has key overweight positions in Morgan Stanley, Nextera Energy and Bristol-Myers Squibb. On the other hand, key underweight positions include Procter & Gamble, Chevron and Lilly (Eli) & Co.

February 2023

FIL Investments International

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF

Market commentary

The Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF ("Sub-Fund") underperformed over the period (from February 1st 2022 through January 31st 2023) returning -13.69% against the MSCI Emerging Markets Net Return Index ("The Index") - 12.12%.

Emerging markets declined sharply over the period. Emerging markets lagged the developed world in the face of uncertainty as a panoply of factors including geopolitics, China's regulatory crackdown, COVID-induced lockdowns, high global inflation and as the Fed signalled tighter financial conditions before moving decisively to hike rates to tame inflation. The war in Ukraine had many ramifications and exacerbated inflationary pressures, leading to price spikes in food and energy. Oil topped \$100 for the first time since 2014, peaking at \$139. Investors rotated accordingly - exiting markets in proximity to Russia and reallocating to commodity producing countries across wider EMEA and Latin America which were perceived beneficiaries. Emerging central banks took heed of the past and moved early and aggressively to tighten monetary policy having noted that inflation was developing substantially above the respective central bank targets. Performance was very mixed: the Latin America region ended the year in positive territory which was head and shoulders above the Emerging EMEA and EM Asia region (dragged down by China, Taiwan and South Korea). As the year ended China's change in COVID policy drove a period of outperformance as investors looked forward to reopening. Brazilian equities in the region had a good run for the first ten months of the year before Presidential elections in the country and global headwinds dominated the last few months. The market rallied on hopes that Lula will adopt a middle path with the dominance of Centre / right in the senate. All of that came shattering down post 31 Oct as Lula started to act differently and started pursuing less prudent spending translated into loss of confidence in the Brazilian Market. On a positive note, Emerging markets snapped back partially in January and outperformed most developed markets. Sentiment remained positive, supported by the economic reopening in China and a weaker US dollar. Prospects of less aggressive monetary tightening by the Fed also improved investor appetite.

Portfolio commentary

The Sub-Fund underperformed its index, primarily due to stock selection in materials, financials and communication services. On a positive note, stock selection in consumer discretionary, real estate and information technology boosted the relative returns. At a stock level, an overweight stance in Hapvida Participacoes E Investimentos Sa, Sberbank and a lack-of-exposure to Vale detracted from relative performance. On a positive note, a lack-of-exposure to Lukoil, NIO and MMC Norilsk Nickel supported the relative returns.

Positioning and Outlook

This enhanced index Sub-Fund is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. It is designed to provide sustainable broad Europe equity exposure with low active risk and a tracking error of below 2%. This Sub-Fund leverages Fidelity's unique fundamental research and proprietary sustainable ratings. It is expected to behave similarly to the index, with broadly neutral sector and regional positions, with security selection being the predominant driver of risk. The portfolio is designed to outperform its benchmark, with an alpha target of +1% gross per annum through the market cycle, i.e. more than five years.

At a sector level, energy, communication services and financials are the key overweights. Conversely, the key underweights are utilities, industrials and materials. At a stock level, the Sub-Fund has key overweight positions in Samsung Electronics, B3 Sa Brasil Bolsa Balcao and Kumba Iron Ore. On the other hand, key underweight positions include Vale, China Construction Bank and Hon Hai Precision.

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF

Market commentary

The Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF ("Sub-Fund") outperformed, returning 7.18% over the period (from February 1st 2022 through January 31st 2023) against the MSCI Japan Net Return Index ("The Index") of 5.26%. Japanese equities increased marginally over the period.

Japanese equities ended the period in positive territory though was pressured for most of the year as concerns over broadening inflationary risks, as well as increasing interest rates weighed on stock prices. Russia's invasion of Ukraine, and its spill over effect on the global economy also weighed on investor sentiment. Faced with escalating price pressures, the US Federal Reserve (Fed) responded with a series of interest rate hikes, which saw the yen weaken sharply against the US dollar. This prompted Japan's Ministry of Finance to intervene in the currency market in September, for the first time since 1998. With inflation showing no signs of abating in many countries, investors started to price in the risk of an economic recession. Earlier in the period, share price gains were supported by strong earnings momentum and domestic political developments. Towards the end of the year, a more hawkish tone from the Fed and the Bank of Japan's unexpected decision to adjust its yield curve control policy drove a sharp decline in share prices. 2023 also started on a very strong note, buoyed by signs of a peak in US inflation and accompanying gains in technology companies, as well as expectations for a recovery in the Chinese economy. Against this backdrop, at a sector level, financials and energy were the leading gainers. Conversely, consumer discretionary and information technology companies were among the weakest performers.

Portfolio commentary

The Sub-Fund outperformed its index, primarily due to stock selection in industrials, consumer discretionary and health care. Conversely, stock selection in information technology, an underweight stance in communication services and an underweight stance in energy detracted from relative returns. At a stock level, an overweight stance in Tokio Marine Holdings, Ajinomoto and Eisai supported the relative returns. Conversely, an overweight stance in KDDI Corporation and an underweight stance in Mitsubishi UFJ Financial Group and Nippon Steel detracted from relative performance.

Positioning and Outlook

This enhanced index Sub-Fund is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. It is designed to provide sustainable broad Europe equity exposure with low active risk and a tracking error of below 2%. This Sub-Fund leverages Fidelity's unique fundamental research and proprietary sustainable ratings. It is expected to behave similarly to the index, with broadly neutral sector and regional positions, with security selection being the predominant driver of risk. The portfolio is designed to outperform its benchmark, with an alpha target of +1% gross per annum through the market cycle, i.e. more than five years.

At a sector level, information technology, industrials and consumer discretionary are the key overweights. Conversely, the key underweights are health care, utilities and communication services. At a stock level, the Sub-Fund has key overweight positions in Tokyo Electron, Komatsu and Ajinomoto. On the other hand, key underweight positions include Seven & I Holdings, Softbank and Hoya Corporation.

February 2023

FIL Investments International

Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF

Market commentary

The Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF ("Sub-Fund") returned 8.67% over the period (from February 1st 2022 through January 31st 2023) against the MSCI Pacific ex-Japan Net Return Index ("The Index") 8.23%, outperforming by 0.44%.

Pacific ex Japan equities ended in a positive territory after being suppressed for the first 9 months due to concerns over broadening inflationary risks, as well as increasing interest rates weighed on stock prices. We witnessed a confluence of events including unfortunate geopolitical crisis in Europe, the continuation of China's restrictive zero COVID-19 policy for a large part of the year, the strengthening of the US dollar against most Asian currencies, and aggressive global policy tightening led by the US. However, markets rebounded sharply in the fourth quarter led by Australia which rallied amid cautious optimism anticipating the end of the rate hiking cycle, with attention shifting from taming inflation to supporting the economic outlook. The materials sector remained one of the best performers as hopes of China's reopening supported a favourable demand outlook. Further, increasingly bullish sentiment towards Chinese equities following its international border re-opening and an abrupt end to its zero-COVID-19 policy last month helped Hong Kong securities to recovery strongly. At a sector level, material and energy were the best performing sectors while communication services and utilities declined the most.

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF (continued)

Portfolio commentary

The Sub-Fund outperformed its index, primarily due to stock selection in industrials, communication services and an underweight stance in utilities. Conversely, an underweight stance in materials, stock selection in real estate and stock selection in information technology detracted from relative returns. At a stock level, an underweight stance in Sea, Xero Limited and a lack-of-exposure to CLP Holdings supported the relative returns. Conversely, an overweight stance in Link Real Estate Investment Trust, a lack-of-exposure to Mineral Resources and an underweight stance in Westpac Banking Corporation detracted from relative performance.

Positioning and Outlook

This enhanced index Sub-Fund is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. It is designed to provide sustainable broad Europe equity exposure with low active risk and a tracking error of below 2%. This Sub-Fund leverages Fidelity's unique fundamental research and proprietary sustainable ratings. It is expected to behave similarly to the index, with broadly neutral sector and regional positions, with security selection being the predominant driver of risk. The portfolio is designed to outperform its benchmark, with an alpha target of +1% gross per annum through the market cycle, i.e. more than five years.

At a sector level, information technology, communication services and consumer staples are the key overweights. Conversely, the key underweights are materials, industrials and utilities. At a stock level, the Sub-Fund has key overweight positions in Sun Hung Kai Properties, HKT Trust And HKT Ltd (Stapled) and DBS Group. On the other hand, key underweight positions include National Australia Bank, ANZ Group and Wesfarmers.

* The Sub-Fund launched on 24 August 2022.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023

1. Organisation

Fidelity UCITS ICAV (the “Fund”) was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 (as amended) on 19 August 2016 under registration number C158668 and is authorised by the Central Bank of Ireland (the “Central Bank”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”).

The Fund is organised in the form of an umbrella fund with segregated liability between Sub-Funds. The Prospectus provides that the Fund may offer separate Sub-Funds. Each Sub-Fund will have a distinct schedule of investments. The portfolio of assets maintained for each Sub-Fund will be invested in accordance with the investment objectives and policies applicable to such Sub-Fund as specified in the Relevant Supplement. For more information please refer to the General Information section from pages 2 to 9.

The active Shares of each Index Tracking Sub-Fund are admitted to the Official List and to trading on the Regulated Market of Euronext Dublin and are admitted to trading on the London Stock Exchange, Deutsche Börse, SIX Swiss Exchange and Borse Italiana.

The Shares of each Actively Managed Sub-Fund are admitted to the Official List and to trading on the Regulated Market of Euronext Dublin and are admitted to trading on the London Stock Exchange, Deutsche Börse, SIX Swiss Exchange and Borse Italiana.

2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by each Sub-Fund are as follows:

a) Basis of Preparation of Financial Statements

The financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union (‘IFRS’), interpretations adopted by the International Accounting Standards Board (‘IASB’), ICAV ACT 2015 and certain requirements of the UCITS Regulations and the Central Bank’s (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (the “Central Bank UCITS Regulations”) that apply to financial reports. The financial statements have been prepared on the going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates as adopted by the European Union. It also requires the Directors to exercise their judgement in the process of applying each Sub-Fund’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to each Sub-Fund’s financial statements are disclosed in the following notes.

The Fund is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations.

For the Fidelity Electric Vehicles and Future Transportation UCITS ETF, Fidelity Clean Energy UCITS ETF, Fidelity Cloud Computing UCITS ETF, Fidelity Digital Health UCITS ETF and Fidelity Metaverse UCITS ETF the year ended 31 January 2023 is the first reporting cycle, and therefore there are no comparatives in the financial statements.

b) New standards, amendments and interpretations

New standards and amendments to existing standards

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2022 that have a material effect on the financial statements of the Sub-Funds.

New standards, amendments and interpretations effective after 1 January 2023 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

2. Significant Accounting Policies (continued)**c) Financial Instruments at Fair Value through Profit or Loss***Classification**(i) Assets*

The Sub-Funds classify their investments based on both the Sub-Funds business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Sub-Funds are primarily focused on fair value information and use that information to assess the assets' performance and to make decisions. The Sub-Funds have not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Sub-Funds debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving each the Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

The contractual cash flows of the Sub-Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving each Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective Interest rate. Financial liabilities are classified according to the substance of the contractual arrangements entered into.

(iii) Recognition, derecognition and measurement

Purchases and sales of investments are recognised on trade date, the date on which the Sub-Funds commit to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs for all financial assets and liabilities carried at fair value through profit and loss are expensed as incurred in the Statement of Comprehensive Income.

Subsequent to initial recognition, all investments continue to be classified at fair value through profit or loss, and the changes in fair value are recognised as net unrealised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise.

Investments are derecognised when the contractual rights to the cash-flows from the financial asset expire or a Sub-Fund has transferred the financial asset and the transfer qualifies for de-recognition. A financial liability is de-recognised when the obligation specified in the contract is discharged, cancelled or has expired. Realised gains and losses on sales of investments are calculated based on the average cost of the investment in local currency and are recognised in net realised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise. Realised gains or losses on investment transactions in debt instruments are calculated as the difference between sales proceeds and the historic cost of the instrument.

(iv) Fair value estimation

At the financial year end, the Investments were valued at last traded price as is consistent with the Prospectus. In circumstances where the last traded price is not within the bid-ask spread, the Investment Manager will determine the point within the bid-ask spread that is most representative of fair value. Where market quotations are not available or are unrepresentative, fair value may be determined by the Sub-Fund's using reputable pricing sources (such as pricing agencies) or indicative prices from bond/debt market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. The Sub-Fund's would exercise judgement and estimates on the quantity and quality of pricing sources used. Where no market data is available, each Sub-Fund may value positions using their own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry.

Shares or shares in collective investment schemes shall be valued on the basis of the latest unaudited available net asset value per Shares or share as published by the collective investment scheme.

(v) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

2. Significant Accounting Policies (continued)

d) Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held on call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. All cash at bank balances are held with Brown Brothers Harriman, or with third party institutions approved by the FIL Investment Management (Luxembourg) S.A., Ireland Branch (the “Manager”) on overnight deposit or directly with a sub-custodian. All deposits held on call with banks are returned to the Depositary the following day. Details are shown in Note 3.

e) Futures Contracts

A futures contract is a legal agreement, to buy or sell a particular commodity or financial instrument at a predetermined price at a specified time in the future.

Initial margin deposits are made upon entering into open futures contracts and are generally made in cash or cash equivalents. Subsequent payments (variation margin) to and from the clearing broker are made on a daily basis based on changes in the market value of futures contracts. Initial margin and variation margin is presented under Margin Cash Due from Broker or Margin Cash Due to Broker on the Statement of Financial Position. The fair value of open futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised.

f) Forward Foreign Exchange Contracts

Forward foreign exchange contracts are agreements between two parties to exchange two designated currencies at a specific time in the future.

The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the valuation date. Changes in the value of forward foreign exchange contracts are recognised as unrealized gains or losses on forward foreign exchange contracts until the contracts are terminated, at which time realized gains and losses are recognised.

A Sub-Fund may use forward foreign exchange contracts for the purposes of hedging the currency exposure of the underlying securities into the relevant base currency or on behalf of a specific class in order to hedge some or all of the foreign exchange risk for such class.

For each relevant Sub-Fund, gains or losses on open foreign currency exchange spot contracts are included in Cash and Cash Equivalents in the Statement of Financial Position. Unrealised gains and losses on open forward foreign currency exchange contracts are included in Financial Derivative Instruments (the “FDIs”) under assets or liabilities, as appropriate, on the Statement of Financial Position and are shown on the Schedule of Investments of each relevant Sub-Fund. Realised gains and losses and change in unrealised gains and losses on forward foreign currency contracts are included in Net Gain/(Loss) in Financial Assets at Fair Value through Profit or Loss and Financial Derivative Instruments on the Statement of Comprehensive Income.

g) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the Sub-Funds’ financial statements are measured using the currency in which Shareholder transactions take place (the “Functional Currency”). The Functional Currency and presentation currency of each Sub-Fund is as follows:

<i>Sub-Fund</i>	<i>Functional currency</i>	<i>Presentation currency</i>
Fidelity Global Quality Income UCITS ETF	USD	USD
Fidelity US Quality Income UCITS ETF	USD	USD
Fidelity Emerging Markets Quality Income UCITS ETF	USD	USD

Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF	JPY	JPY
Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF	USD	USD

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

2. Significant Accounting Policies (continued)

g) Foreign Exchange Translation (continued)

<i>Sub-Fund</i>	<i>Functional currency</i>	<i>Presentation currency</i>
Fidelity Electric Vehicles and Future Transportation UCITS ETF	USD	USD
Fidelity Clean Energy UCITS ETF	USD	USD
Fidelity Cloud Computing UCITS ETF	USD	USD
Fidelity Digital Health UCITS ETF	USD	USD
Fidelity Metaverse UCITS ETF	USD	USD

Transactions and Balances

Assets and liabilities denominated in currencies other than the Functional Currency are translated into the Functional Currency at the exchange rates ruling at the Statement of Financial Position date. Transactions in currencies other than the Functional Currency are translated into the Functional Currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the Functional Currency are translated into the Functional Currency at the exchange rates prevailing at the dates of the transactions.

h) Investments Purchased and Sold Awaiting Settlement

Investments purchased and sold represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the Statement of Financial Position date respectively. The due from brokers balance is held for collection. These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Sub-Funds shall measure the loss allowance on amounts due from broker at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Sub-Funds shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required if the credit risk increases to the point that it is considered to be credit impaired. During the financial years ended 31 January 2023 and 31 January 2022 no such impairments have occurred.

i) Interest Revenue and Interest Expenses

Interest revenue is recognised on the effective interest method and credited to the Statement of Comprehensive Income.

j) Dividend Income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as “ex-dividend”. Income is shown gross of any non-recoverable withholding taxes and net of any tax credits. Withholding tax is disclosed in the Statement of Comprehensive Income.

k) Transaction Costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

l) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis.

m) Foreign Withholding Taxes

Dividends, interest and capital gains (if any) received on investments made by each Sub-Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Sub-Funds or their Shareholders.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

2. Significant Accounting Policies (continued)

m) Foreign Withholding Taxes (continued)

Dividend and interest revenue is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

n) Redeemable Participating Shares

Redeemable Participating Shares provide the Shareholders with the right to redeem their Shares for cash equal to their proportionate share of the Net Asset Value of the Sub-Funds and, accordingly, are classified as financial liabilities. The liability to Shareholders is presented in the Statement of Financial Position as "Net Assets Attributable to Holders of Redeemable Participating Shares" and is based on the residual assets of each Sub-Fund after deducting all other liabilities.

o) Distribution Policy

The Prospectus empowers the Directors to declare dividends in respect of Shares in any Distributing Class out of net income (including dividend income, securities lending income and interest revenue less expenses) in respect of investments of each Sub-Fund (collectively, "Net Income").

In respect of Distributing Classes, and subject to Net Income being available for distribution, it is the current intention of the Directors, subject to any de minimis threshold, to declare dividends out of Net Income attributable to each of the relevant classes. Under normal circumstances, the Directors intend that dividends shall be declared on a quarterly basis in or around February, May, August and November of each year and paid on the last Thursday of that relevant month, or any such other Business Day that the Directors deem appropriate in relation to the Net Income for the relevant period. However, Shareholders should note that the Directors may, in their discretion, decide not to make such payment in respect of a Distributing Class.

The Directors may in their sole discretion, determine that the Fund shall, on behalf of one or more Sub-Funds, apply an equalisation methodology in respect to any Distributing Class Shares. An equalisation account will be maintained for each Sub-Fund so that the amount distributed will be the same for all Shares of each Distributing Class notwithstanding different dates of issue. A sum equal to that part of the subscription issued price of an Distributing Class Share which reflects income (if any) accrued but undistributed up to the date of issue will be deemed to be an equalisation payment and treated as repaid to Shareholders in the relevant Sub-Fund with the first dividend to which the Shareholder was entitled in the same relevant year as that in which the Shares are issued. The redemption price of each Distributing Class Share will also include an equalisation payment in respect of the accrued income of the relevant Sub-Fund up to the Dealing Day on which the relevant Distributing Class Shares are redeemed.

Dividends for the financial year ended 31 January 2023 are disclosed in the table below:

	18 November 2021	119,183	0.0441

Distributions are recognised in the Statement of Comprehensive Income as Finance Costs.

p) Income Equalisation

In respect of the "Distributing Classes", each Sub-Fund operates equalisation arrangements and makes equalisation payments in respect of each Share of such Distributing Classes to reflect the pro rata payment of distributions based on the year of time the share has been owned by a Shareholder. Income equalisation is recognised in the Statement of Comprehensive Income as Finance Costs.

q) Price Adjustment Policy (Swing Pricing)

A price adjustment policy has been adopted and implemented to protect the interests of the Shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Fund will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Directors of the Manager may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests.

At 31 January 2023 and 31 January 2022, price adjustments were not made to the Net Asset Value of the Funds.

6. Taxation

Each Sub-Fund is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. The Sub-Funds will not be liable to Irish tax in respect of their income and gains, other than on the occurrence of a chargeable event with respect to Irish resident Shareholders. The Fund will be obliged to account for Irish income tax to the Irish Revenue Commissioners if Shares are held by non-exempt Irish resident Shareholders.

In accordance with the reporting fund regime introduced by the United Kingdom HM Revenue and Customs, each Share Class will be viewed as a separate "offshore fund" for UK tax purposes. The reporting regime permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a reporting fund. Once an offshore fund has been granted "reporting fund" status it will maintain that status for so long as it continues to satisfy the conditions to be a "reporting fund", which include making reports to HM Revenue and Customs and investors for each year of account, without a requirement to apply for further certification by HM Revenue and Customs.

Each Share Class in the Sub-Funds is treated as a "reporting fund". This has been approved by HM Revenue and Customs.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares by an Irish resident Shareholder or on the ending of a "Relevant Period". A "Relevant Period" for these purposes is an eight year beginning with the acquisition of the Shares by the Irish resident Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the Sub-Fund; or
- (ii) certain exempted Irish resident investors who have provided the Sub-Fund with the necessary signed statutory declaration.

Capital gains, dividends, and interest received by the Sub-Funds may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Sub-Funds or their Shareholders.

7. Fees

All of the fees and expenses payable in respect of each Sub-Fund are paid as one single fee. This is referred to as the total expense ratio or "TER". The Manager is responsible for arranging the payment from the TER of all operational expenses of the Sub-Funds, including Directors', Auditors', Legal Advisors', Administrator's, Depositary's and other service providers' fees and expenses and Class hedging costs. The Manager is entitled to an annual fee in respect of the services that it provides to the Sub-Funds. However, this fee will only be paid in circumstances where there is a residual amount left from the TER after the other operational expenses have been paid. Save where another party has agreed to reimburse the Sub-Funds, the TER includes but is not limited to fees and expenses of the Investment Manager, Depositary, Administrator, Secretary and any sub-investment advisor. Subject to applicable law and regulation, the Manager or the Investment Manager may pay part or all of its fees to any person that invests in or provides services to the Fund or in respect of the Sub-Funds.

Effective from 1 June 2022, the Manager of the Fund changed from FIL Fund Management (Ireland) Limited to FIL Investment Management (Luxembourg) S.A., Ireland Branch. This change had no impact on the TER fee structure outlined below.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

7. Fees (continued)

The TER does not include extraordinary costs, transaction costs and related expenses, including but not limited to, transaction charges, stamp duty or other taxes on the investments of the Sub-Funds, including duties and charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Sub-Funds' investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Sub-Funds and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Sub-Funds or the Fund, which will be paid separately out of the assets of the relevant Sub-Fund.

The TER is calculated and accrued daily from the Net Asset Value of the Sub-Funds and payable at least quarterly in arrears. The TER of each Sub-Fund is as listed in the Relevant Supplement. If the Sub-Funds' expenses exceed the TER outlined above in relation to operating the Sub-Funds, the Manager will cover any shortfall from its own assets.

The table below outlines the maximum TER figures applicable to the active share classes of each Sub-Fund:

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

7. Fees (continued)

Directors' Fees

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the Sub-Funds (including expenses) for the financial year ended 31 January 2023 was EUR40,000 which were paid to Denise Kinsella and Bronwyn Wright as Independent Directors.

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the Sub-Funds (including expenses) for the financial year ended 31 January 2022 was EUR68,333 which were paid to Denise Kinsella, Bronwyn Wright and Dominic Rossi as Independent Directors.

Executive Directors are not paid a fee from the Fund.

Auditors' Remuneration

The statutory audit fee (including out-of-pocket expenses incurred by the auditors in connection with their work) paid by the Manager on behalf of the Fund for the financial year ended 31 January 2023 amounted to EUR131,160 (excluding VAT) and for the financial year ended 31 January 2022 amounted to EUR78,000 (excluding VAT). There were no other fees paid to the auditors other than the statutory audit fee.

8. Related Parties

Related Party Disclosures

In the opinion of the Directors of the Manager, the list of related parties under IAS 24 "Related Party Transactions" is as follows:

- FIL Limited – the ultimate holding company of the Manager and fellow subsidiary undertakings namely:
 - (i) FIL Investment Management (Luxembourg) S.A., Ireland Branch (since 1 June 2022)
 - (ii) FIL Fund Management (Ireland) Limited (until 31 May 2022)
 - (iii) FIL Distributors
- The Directors of the Fund and their dependents.
- The Manager of the Fund and the Investment Manager of the Actively Managed Sub-Funds are related parties to the Fund and receive fees, as outlined in the Note 7. The amounts payable as at 31 January 2023 and 31 January 2022 are disclosed in the Statement of Financial Position.

There were no related parties holding shares in the Sub-Funds as at 31 January 2023 and 31 January 2022.

All related parties transactions are at arm's length.

9. Transaction Costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

10. Financial Risk Management

Each Sub-Fund may be exposed to market price risk, interest rate risk, credit risk, liquidity risk or currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on financial performance.

The policies documented below are standard operational practices and are reviewed regularly by the Investment Manager. In certain market conditions, the Investment Manager may apply additional risk procedures to minimise potential adverse effects on the Sub-Funds' financial performance.

a) Global Exposure

Under the UCITS Regulations, the Manager employs a risk management process which enables it to accurately monitor and manage the global exposure of the Sub-Funds to financial derivative instruments (which are a subset of the financial instruments in which the Sub-Funds invest).

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

10. Financial Risk Management (continued)

a) Global Exposure (continued)

The Sub-Funds' global exposure and leverage is calculated using the commitment approach and the Sub-Funds' global exposure will not exceed 100% of Net Asset Value. The commitment approach converts the Sub-Funds' FDI positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated.

b) Market Risk

This risk comprises of three main types of risk: market price risk, currency risk and interest rate risk.

i) Market Price Risk

For Sub-Funds which invest in equities, the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events. Currency exchange rate movements will also cause changes in value when the currency of the investment is other than the Base Currency of the Sub-Fund holding that investment.

The following sensitivity analysis assumes a change in the market price of investments while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the variables may be correlated. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature. The Investment Manager deems the percentage used applicable for the Sub-Funds' analysis. At 31 January 2023 and 31 January 2022, had the fair value of investments increased/decreased by 5%, with all other variable held constant, the net asset attributable to shareholders for each Sub-Fund would have increased/decreased as set out in the table below:

<i>Sub-Fund</i>	<i>Currency</i>	<i>Effect on NAV 31 January 2023</i>	<i>Effect on NAV 31 January 2022</i>
Fidelity Global Quality Income UCITS ETF	USD	17,534,925	21,554,895
Fidelity US Quality Income UCITS ETF	USD	59,628,107	49,721,552
Fidelity Emerging Markets Quality Income UCITS ETF	USD	5,207,280	5,330,515

Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF	USD	7,946,860	10,597,452
Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF	JPY	647,708,594	654,397,692
Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF	USD	6,893,647	4,165,218
Fidelity Electric Vehicles and Future Transportation UCITS ETF	USD	245,447	–
Fidelity Clean Energy UCITS ETF	USD	235,929	–
Fidelity Cloud Computing UCITS ETF	USD	257,257	–
Fidelity Digital Health UCITS ETF	USD	257,815	–
Fidelity Metaverse UCITS ETF	USD	260,348	–

ii) Currency Risk

The Sub-Funds' total return and Statement of Financial Position can be significantly affected by foreign exchange rate movements if the Sub-Funds' assets and income are denominated in currencies other than the Base Currency of the Sub-Funds and this means that currency movements may significantly affect the Sub-Funds' Net Asset Value per Share. The three principal areas of foreign currency risk are where movements in exchange rates affect the value of investments, short term timing differences or income received. A Sub-Funds may, or may not, hedge these risks using either spot or forward foreign exchange contracts.

At 31 January 2023 and 31 January 2022, had the exchange rates increased/decreased by 5%, with all other variable held constant, the net asset attributable to shareholders for each Sub-Fund would have increased/decreased as set out in the below tables. Forward Foreign Exchange Contracts held for Class Hedging Purposes are excluded from the analysis, as they are not considered to be exposed to the risk.

iii) Interest Rate Risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and future cash flows.

The majority of the Sub-Funds' financial assets and liabilities are non-interest bearing as at 31 January 2023 and 31 January 2022. As a result, the Sub-Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

c) Credit Risk

Each Sub-Fund may be exposed to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when they fall due. Impairment provisions are provided for losses that have been incurred by the Statement of Financial Position date, if any. The main concentration to which each Sub-Fund is exposed arises from each Sub-Fund's investments in derivative instruments. Each Sub-Fund is also exposed to counterparty credit risk on the cash and cash equivalents, amounts due from brokers and other receivable balances. Each Sub-Fund invests in equity securities and has limited or no credit risk on their investments.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

10. Financial Risk Management (continued)

c) Credit Risk (continued)

As at 31 January 2023 and 31 January 2022, the institutions where the Sub-Funds' cash was held and their respective short term credit ratings, as rated by Fitch, are listed below:

Institution	Short Term Credit Indicator 31 January 2023	Short Term Credit Indicator 31 January 2022
Australia and New Zealand Banking Group	F1	F1
Banco Bilbao	F2	F2
Bank of Nova Scotia	F1+	-
BNP Paribas	F1	F1
Brown Brothers Harriman	F1+	F1+
Citi	F1	-
Credit Suisse	-	F2
DBS Bank	F1+	-
DNB Bank	F1	F1
HSBC	F1+	F1+
ING Bank	-	F1+
JPMorgan Chase	F1+	F1+
Mitsubishi UFJ Financial Group	F1	F1
Nordea Bank	F1+	F1+
SEB Group	F1+	F1+
Societe Generale	F1	F1
Standard Chartered Bank	F1	-
Sumitomo Bank	F1	F1

All cash at bank balances at the financial years ended 31 January 2023 and 31 January 2022 are held with Brown Brothers Harriman in segregated accounts or swept to overnight time deposits held in pooled accounts in eligible institutions.

d) Liquidity Risk

In normal market conditions the assets of each Sub-Fund comprise mainly realisable investments which can be readily sold. Each Sub-Fund's main liability is the redemption of any Shares that investors wish to sell. In general, the investments, including cash, of each Sub-Fund are managed so that it can meet its liabilities. Investments held may need to be sold if insufficient cash is available to finance such redemptions. If the size of the disposals are sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the Net Asset Value of the Sub-Funds. The Manager employs an appropriate liquidity risk management process, which takes into account efficient portfolio management transactions employed by the Sub-Funds, in order to ensure that the Sub-Funds are able to comply with their stated redemption obligations. However, it is possible that in the type of circumstances described above, the Sub-Funds may not be able to realise sufficient assets to meet all redemption requests that they receive or the Sub-Funds may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders.

The tables below analyse the Sub-Funds' financial liabilities into relevant maturity groupings based on the remaining year at the Statement of Financial Position date to the contractual maturity date. The amounts in the table below are the contractual undiscounted cash flows. Detailed analyses of the Sub-Funds' assets are not shown as they are considered liquid based on the fact that they could be converted to cash in less than one month at close to their carrying value. Forward Foreign Exchange Contracts held for Class Hedging Purposes are excluded from the analysis, as they are not considered to be exposed to the risk.

e) Capital Risk Management

The capital of each Sub-Fund is represented by the net assets attributable to holders of redeemable participating Shares. The amount of net assets attributable to holders of redeemable participating Shares is subject to subscriptions and redemptions at the discretion of the Shareholders as well as changes resulting from the Sub-Fund's performance. The Manager's objective when managing capital is to safeguard the Sub-Funds' ability to continue as a going concern in order to provide returns for Shareholders, provide benefits to other stakeholders and maintain a strong capital base to support the development of the investment activities of the Sub-Fund.

In order to maintain the capital structure, the Manager's policy is to perform the following:

- monitor liquidity relative to the assets under management and the dealing cycle;
- make appropriate adjustments to distributions the Sub-Funds pay to redeeming Shareholders; and
- redeem and issue new Shares in accordance with the constitutional documents of the Fund which permit the restriction of redemptions in certain circumstances and require certain minimum holdings and subscriptions.

f) Fair Value Estimation

Each Sub-Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels as defined under IFRS 13:

(i) Level 1: Investments whose values are based on quoted market prices in active markets and are therefore classified within level 1 include active listed equities, U.S. government treasury bills and certain non-U.S. sovereign obligations. Quoted prices for these instruments are not adjusted.

(ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds and certain non-U.S. sovereign obligations, listed equities and over the counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

(iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include certain corporate debt securities. As observable prices are not available for these securities, the Sub-Funds have used valuation techniques to derive the fair value.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Directors. The Directors have delegated this task to the Administrator. The Administrator considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Where unobservable inputs are used in determining the fair value of an investment, the Administrator receives instruction from the Manager of the fair value measurement to use.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

10. Financial Risk Management (continued)

f) Fair Value Estimation (continued)

As at 31 January 2023 and 31 January 2022, cash and cash equivalents are classified as Level 1. All other assets and liabilities not disclosed in the tables below are classified as Level 2.

The following tables analyse within the fair value hierarchy of the Sub-Funds' financial assets and liabilities measured at fair value at 31 January 2023 and 31 January 2022:

*The Equity level 3 holdings as at 31 January 2023 consist of: Sunac China Holdings which is classified as Level 3 because it is suspended and valued at zero. Alrosa, MMC Norilsk Nickel, Novolipetsk Steel, Sberbank of Russia, Tatneft and Transneft and are classified as Level 3 because their fair value has been written down due to Russian sanctions. TCS Group Holding's fair value has been written down to zero because its primary dealings are in Russia and is subject to sanctions.

The following table presents the transfers between hierarchy levels for the financial year ended 31 January 2023:

	Level 1 USD	Level 2 USD	Level 3 USD
Equities	(3,239,985)	–	3,239,985
Total	(3,239,985)	–	3,239,985

Transfers between levels of the fair value hierarchy, for the purpose of preparing above table, are deemed to have occurred at the beginning of the financial year.

The Equities transfer of USD 3,239,985 out of Level 1 and into Level 3 relates to the following holdings: MMC Norilsk Nickel (USD 1,032,619), Sberbank of Russia (USD 1,244,475) and Transneft (USD 962,891).

These investments are now being classed as Level 3 because they are Russian holdings and a decision has been taken by the Fund to write their fair value down to zero.

There were no transfers between levels as at 31 January 2022.

The following table presents movement in Level 3 instruments for the financial year ended 31 January 2023.

Balance at 1 February 2022	–

g) Cybersecurity Risk

The Fund and its service providers (including the Manager and Investment Manager) are susceptible to cyber-attacks and technological malfunctions that may have effects that are similar to those of a cyber-attack. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorisation, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Fund, the Manager, Investment Manager, or the Depositary, or other service provider may adversely affect the Sub-Funds or their Shareholders. For instance, cyber-attacks may interfere with the processing of Shareholder transactions, affect the Fund's ability to calculate its Net Asset Value, cause the release or misappropriation of private Shareholder information or confidential Sub-Fund information, impede trading, cause reputational damage, and subject the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. The Manager and the Investment Manager have established business continuity plans and systems designed to prevent cyber-attacks. Such plans and systems are subject to inherent limitations. Similar types of cyber security risks also are present for issuers of securities in which the Sub-Funds invest, which could result in material adverse consequences for such issuers, and may cause the Sub-Funds' investments in such securities to lose value.

h) Offsetting

The Sub-Funds are required to disclose the impact of offsetting assets and liabilities represented in the Statement of Financial Position to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognised assets and liabilities. These recognized assets and liabilities are derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of set-off criteria: the amounts owed by a Sub-Fund to another party are determinable, the Sub-Fund has the right to set-off the amounts owed with the amounts owed by the other party, the Sub-Fund intends to set-off on a net basis, and the Sub-Funds right of set-off is enforceable at law.

For financial reporting purpose, the Sub-Funds do not offset derivative assets and derivative liabilities in the statement of financial position. The following tables present the Sub-Funds over the counter derivative assets and liabilities by counterparty, net of amounts available for offset under ISDA Master Agreement and net of the related collateral received by the Sub-Funds for assets and pledged by the Sub-Funds for liabilities as at 31 January 2023 and 31 January 2022:

i) Custody and Title Risk

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Fund's ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Fund holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Sub-Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Sub-Fund. Therefore, in such jurisdictions, there is a risk that if a subcustodian becomes bankrupt or insolvent, the Sub-Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Sub-Fund. In those jurisdictions where the Sub-Fund's beneficial ownership of its assets is ultimately recognised, the Sub-Fund may suffer delay and cost in recovering those assets.

The Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Sub-Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. The Depositary is obliged to maintain an appropriate level of supervision over the sub-custodian and make appropriate enquiries from time to time to confirm that the obligations of the agent continue to be competently discharged.

	<u>164,329</u>
Net Gain on Financial Assets at Fair Value through Profit or Loss and Financial Derivative Instruments	<u><u>219,779</u></u>

In arriving at the results for the financial year all amounts relate to continuing operations.

13. Soft Commission Agreements

There were no soft commission arrangements entered into during the financial years ended 31 January 2023 and 31 January 2022.

14. Efficient Portfolio Management

The Sub-Funds may employ investment techniques and instruments for efficient portfolio management purposes only, subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland. Any such technique or instrument must be one which (alone or in combination with one or more other techniques or instruments) is believed by the Investment Manager to be economically appropriate to the efficient portfolio management of the Sub-Fund, i.e. the use of a technique or instrument may only be undertaken for the purposes of one or more of the following:

- (a) a reduction in risk;
- (b) a reduction in costs; or
- (c) the generation of additional capital or income for the Sub-Fund with an appropriate level of risk, taking into account the risk profile of the Sub-Fund and the general provisions of the UCITS Regulations.

During the financial years ended 31 January 2023 and 31 January 2022, the Sub-Funds used futures contracts for efficient portfolio management purposes. The exposure, counterparties, net revenues and costs from using these techniques are all detailed below.

Exposure obtained through the efficient portfolio management:

Fidelity Global Quality Income UCITS ETF

31 January 2023

Collateral Issuer	Type	Net Exposure USD
Morgan Stanley	Futures Contract	129,635

Revenues and costs arising from the efficient portfolio management techniques employed were as follows:

Futures Contracts	Revenues USD	Costs USD
Futures Commission Expense	-	2,450
Net Realised Loss on Futures Contracts	(176,399)	-
Net Movement in Unrealised position on Futures Contracts	192,746	-
Net Revenue on Futures Contracts	<u>16,347</u>	<u>2,450</u>

Collateral Issuer	Type	Net Exposure EUR
Morgan Stanley	Futures Contract	(1,705)

Revenues and costs arising from the efficient portfolio management techniques employed were as follows:

Futures Contracts	Revenues EUR	Costs EUR
Futures Commission Expense	-	82
Net Realised Gain on Futures Contracts	44,884	-
Net Movement in Unrealised position on Futures Contracts	156	-
Net Revenue on Futures Contracts	45,040	82

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2023 (CONTINUED)

15. Significant Events during the Financial Year

Ukraine Crisis

In February 2022, Russia invaded Ukraine and following this Irish, EU, UK, and US governmental and regulatory bodies issued sanctions against Russia and related regions, targeting individuals, companies and sectors. The Company is continuing to comply with sanctions related obligations and has no material exposures to Russia or Belarus involving investments, counterparties or vendors. The above situation continues to evolve, including increased wider geopolitical tensions between the USA, Russia and also China. This together with the withdrawal of governmental and central bank support mechanisms, the replacement of quantitative easing with quantitative tightening, combined with increased central bank interest rates and further possible increases, in response to increases in inflation and commodity energy prices (oil and gas), has led to increased volatility in the financial and related commodity markets, and in the outlook for inflation, interest rates, bonds and debt instruments yields. The Directors of the Company continue to monitor the situation closely considering the needs and requirements of clients and stakeholders, including ongoing monitoring of market volatility, funds, fund liquidity, business continuity planning, cyber risk assessment, operational resilience, scenario planning together with other operational risks and emerging risks that may arise.

The supplements for Fidelity Global Quality Income UCITS ETF; Fidelity US Quality Income UCITS ETF; Fidelity Emerging Markets Quality Income UCITS ETF and Fidelity Europe Quality Income UCITS ETF were updated on 27 May 2022 to reflect various changes, including provision for the issue of various new unlisted (standard fund) share classes, a change to the definition of 'Dealing Day' and updates to the details of the website detailing the index methodology.

The Prospectus was updated on 2 June 2022 to reflect the takeover by FIL Investment Management (Luxembourg) S.A. ("FIMLUX") of FIL Fund Management (Ireland) Limited by way of a merger by absorption and the appointment of FIMLUX as manager of the Fund through its newly established Ireland branch with effect from 1 June 2022 and certain other minor changes. The supplements for each of the Sub-Funds were also re-issued on 2 June 2022 to coincide with the issue of the revised Prospectus.

The supplements for Fidelity Sustainable Research Enhanced US Equity UCTS ETF, Fidelity Sustainable Research Enhanced Global Equity UCTS ETF, Fidelity Sustainable Research Enhanced Global Equity UCTS ETF, Fidelity Sustainable Research Enhanced Emerging Market Equity UCTS ETF, Fidelity Sustainable Research Enhanced Europe Equity UCTS ETF, Fidelity Sustainable Research Enhanced Japan Equity UCTS ETF and Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCTS ETF (the "SRE Equity ETF Sub-Funds") were updated on 30 June 2022 to incorporate climate awareness into the systematic ESG tilt employed as part of the investment process and described in the supplements and to note that the portfolio is on a pathway aligned with a net zero transition.

The Central Bank of Ireland approved six new thematic ETF sub-funds of the Fund on 18 July 2022, namely: Fidelity Clean Energy UCITS ETF, Fidelity Cloud Computing UCITS ETF, Fidelity Crypto Industry and Digital Payments UCITS ETF, Fidelity Digital Health UCITS ETF, Fidelity Electric Vehicles and Future Transportation UCITS ETF and Fidelity Metaverse UCITS ETF. All the Sub-Funds excluding Fidelity Crypto Industry and Digital Payments UCITS ETF launched on 24 August 2022.

The Prospectus for the Fund and the supplements for all the Sub-Funds were updated on 1 December 2022 to reflect the pre-contractual disclosure requirements of the EU Sustainable Finance Disclosure Regulation (the "SFDR").

There have been no other significant events affecting the Fund during the financial year.

16. Events since the Financial Year End

Following the market events effecting SVB Financial Group and Signature Bank, the Manager took the decision to apply discounts to their prices of 100% effective 13th March 2023. The NAV impact of these discounts on the Sub-Funds which held these investments on that date were as follows:

Holding	Sub-Fund	NAV Impact at 13th March 2023
Signature Bank	Fidelity Sustainable Research Enhanced US Equity UCITS ETF	0.03%
Signature Bank	Fidelity Sustainable Research Enhanced Global Equity UCITS ETF	0.08%
SVB Financial Group	Fidelity Sustainable Research Enhanced Global Equity UCITS ETF	0.12%

The Manager continues to monitor the pricing of the SVB Financial Group and Signature Bank investments on a regular basis.

Ms. Denise Kinsella resigned as a director of the Fund, effective 31 March 2023.

There have been no other significant events affecting the Fund after the financial year.

17. Approval of Financial Statements

The annual report and audited financial statements were approved by the Board of Directors of the Fund on 26 May 2023.

DIRECTORS' REPORT

The Directors present, herewith their annual report and audited financial statements for Fidelity UCITS ICAV (the "Fund") for the financial year ended 31 January 2023.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations. The Irish Collective Asset-management Vehicles Act 2015 (as amended) (the "ICAV Act") requires the Directors to prepare financial statements for each financial year which give a true and fair view of the Fund's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Fund for the financial year. The Directors have elected to prepare the financial statements in accordance with applicable Irish law and International Financial Reporting Standards, as adopted by the European Union ("IFRS").

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy, at any time, the assets and liabilities and financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS and comply with the ICAV Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Fund's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors are required to entrust the assets of the Fund to a Depositary for safe-keeping. In carrying out this duty, the Fund has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited as Depositary (the "Depositary").

Accounting Records

The Fund is obliged to keep or cause to be kept adequate accounting records as outlined in Section 110 of the ICAV Act. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at the Administrator's registered office at 30 Herbert Street, Dublin 2, Ireland.

Principal Activities

The objective of the Fund is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

The Fund was registered in Ireland on 19 August 2016 as an Irish collective asset-management vehicle with variable capital and having segregated liability between its Sub-Funds and is structured as an umbrella collective asset-management vehicle in that the Share capital of the Fund may be divided into different Share Classes with one or more Share Classes representing a separate Sub-Fund of the Fund. Each Sub-Fund may have more than one Share Class. The assets of each Sub-Fund are invested in accordance with the investment objectives applicable to such Sub-Fund.

Fidelity UCITS ICAV

DIRECTORS' REPORT (CONTINUED)

Principal Activities (continued)

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently, there are fifteen Sub-Funds (each, a "Sub-Fund" and, collectively, the "Sub-Funds") under the umbrella:

<i>Name</i>	<i>Launch Date</i>
Fidelity Global Quality Income UCITS ETF	27 March 2017
Fidelity US Quality Income UCITS ETF	27 March 2017
Fidelity Emerging Markets Quality Income UCITS ETF	30 October 2017
Fidelity Europe Quality Income UCITS ETF	30 October 2017
Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF	18 May 2020
Fidelity Sustainable Research Enhanced US Equity UCITS ETF	21 May 2020
Fidelity Sustainable Research Enhanced Global Equity UCITS ETF	27 May 2020
Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF	24 November 2020
Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF	1 December 2020
Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF	3 December 2020
Fidelity Electric Vehicles and Future Transportation UCITS ETF	24 August 2022
Fidelity Clean Energy UCITS ETF	24 August 2022
Fidelity Cloud Computing UCITS ETF	24 August 2022
Fidelity Digital Health UCITS ETF	24 August 2022
Fidelity Metaverse UCITS ETF	24 August 2022

Review of Business

The investment objectives of each individual Sub-Fund trading during the year ended 31 January 2023 are stated in the General Information section from pages 2 to 9.

The performance of the Sub-Funds against these investment objectives for the relevant fiscal year is detailed in the Investment Manager Reports from pages 10 to 18.

In addition to providing the performance of each Sub-Fund these reports also provide an additional portfolio commentary and a future outlook relevant to each individual Sub-Fund.

Principal Developments

The development and future activity for each Sub-Fund is detailed in the Investment Manager Reports from pages 10 to 18. The portfolio commentary refers to the main contributors and detractors to performance of the Sub-Fund portfolios during the year.

Results for the Year and Assets, Liabilities and Financial Position at 31 January 2023

Details of the assets, liabilities and financial position of the Sub-Funds and results for the financial year ended 31 January 2023 are set out in the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flows.

Directors

The names of the persons who were Directors at any time during the financial year are listed below:

Ms. Catherine Fitzsimons (Ireland) (Chairperson)
Ms. Denise Kinsella (Ireland) (resigned 31 March 2023)
Mr. David Greco (USA)
Mr. Nick King (UK)
Ms. Bronwyn Wright (Ireland)
Ms. Lorraine McCarthy (Ireland)

All current Directors are Non-Executive.

Ms. Denise Kinsella and Ms. Bronwyn Wright are Independent Directors.

DIRECTORS' REPORT (CONTINUED)

Directors' Interests

None of the Directors, the Secretary, nor their families holds or held any beneficial interests in the Fund at 31 January 2023 and 31 January 2022 or during the financial years.

Transactions Involving Directors

There are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors had any interest, as defined in the ICAV Act, at any time during the financial years ended 31 January 2023 and 31 January 2022 other than those disclosed in Note 7 'Fees' of these financial statements.

Connected Person Transactions

Connected Persons

The Manager, the Depositary, the Investment Manager and each of their respective affiliates are considered to be connected parties of the Fund for the purposes of the Central Bank UCITS Regulations.

The following table details the types of transaction entered into with counterparties that are connected persons:

<i>Type of Transaction</i>	<i>Counterparty</i>
Administration	Brown Brothers Harriman Fund Administration Services (Ireland) Limited
Depositary, FX and Hedging Services	Brown Brothers Harriman Trustee Services (Ireland) Limited
Distributor	FIL Distributors
Manager	FIL Investment Management (Luxembourg) S.A., Ireland Branch (since 1 June 2022) FIL Fund Management (Ireland) Limited (until 31 May 2022)
Investment Manager	Geode Capital Management LLC FIL Investments International

Dealing with Connected Persons

Regulation 43 of the Central Bank UCITS Regulations ("Restriction on transactions with connected persons") states that "a responsible person shall ensure that any transaction between a UCITS and connected person is:

- (i) conducted at arm's length; and
- (ii) in the best interest of the unit-holders of the UCITS".

In accordance with Regulation 81(4) of the Central Bank UCITS Regulations, the Directors of the Manager are satisfied that:

- (i) there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and
- (ii) all transactions with connected persons that were entered into during the year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Risk Management Objectives and Policies

The principal risks and uncertainties faced by the Fund are outlined in Note 10 'Financial Risk Management'.

Dividends and Retention

The dividend distributions declared and paid during the year are disclosed in the Statement of Comprehensive Income and Note 2o.

Future Developments

The Sub-Funds will continue to pursue their investment objectives as set out in the Prospectus and outlined in these financial statements.

Independent Auditors

The independent auditor, Deloitte Ireland LLP ("Deloitte"), have indicated their willingness to continue in office in accordance with section 383(2) of the Companies Act, 2014.

DIRECTORS' REPORT (CONTINUED)

Irish Funds Corporate Governance Code for Management Companies

The Board of Directors has assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds in December 2011 (the "IF Code"). The Board has adopted all corporate governance practices and procedures in the IF Code.

Signed on behalf of the Board of Directors by:

Catherine Fitzsimons
Date: 26 May 2023

David Greco
Date: 26 May 2023

Fidelity UCITS ICAV

REPORT FROM THE DEPOSITARY TO THE SHAREHOLDERS (UNAUDITED)

We have enquired into the conduct of the Fidelity UCITS ICAV (the "Fund") for the financial year ended 31 January 2023 in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the Shareholders in the Fund, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (The "UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the Shareholders. Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund's Instrument of Incorporation of the Fund and the UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Fund has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Instrument of Incorporation of the Fund and the appropriate regulations and (ii) or otherwise in accordance with the Fund constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Fund has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations, and
- (ii) or otherwise in accordance with the provisions of the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations.

Brown Brothers Harriman Trustee Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329, Ireland

26 May 2023

Independent auditor's report to the members of Fidelity UCITS ICAV

Report on the audit of the annual accounts

Opinion on the annual accounts of Fidelity UCITS ICAV (the 'ICAV')

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 January 2023 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the Applicable Regulations.

The annual accounts we have audited comprise:

- the Schedules of Investments;
- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 17, including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the annual accounts*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our audit approach

Key audit matters	The key audit matters that we identified in the current year were: <ul style="list-style-type: none">• Valuation of Investments• Existence of Investments
Materiality	The materiality that we used in the current year was 0.5% of Average Net Assets which was determined in respect of each sub-fund.
Scoping	Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.
Significant changes in our approach	No significant changes in our approach were made in the current year.

Conclusions relating to going concern

In auditing the annual accounts, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the annual accounts is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Reviewing all board meeting minutes during the period up to the date of approval of the annual accounts, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the annual accounts.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the annual accounts of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the annual accounts as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of Investments

Key audit matter description

For the financial year ended the investments of the ICAV of \$3.1bn make up 99.6% of total net assets of \$3.1bn.

The valuation of investments is considered a key audit matter as it is the most significant number on the Statement of Financial Position.

There is a risk that investments traded on an exchange or a secondary market may not be valued correctly in accordance with IFRS.

Refer also to note 10 in the annual accounts.

How the scope of our audit responded to the key audit matter

- We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV'S Prospectus documents and the requirements of IFRS, as adopted by the EU.
- We independently valued and re-priced all exchange traded securities using our own market feeds.
- We independently recalculated the value of all forward currency contracts at year-end.
- We reviewed the investment portfolios of the ICAV for any stale prices or infrequently traded securities that may suggest the positions are illiquid.
- We reviewed the fair value levelling disclosures in the annual accounts to ensure they are appropriate.
- We reviewed the SOC 1 report of Brown Brothers Harriman Fund Administration Services (Ireland) Limited and assessed the scope, sufficiency and results of the control reports to determine whether we could place reliance on these reports with regard to controls over the valuation of investments.

Existence of Investments

Key audit matter description

The investment portfolio at the year-end principally comprised equities, transferable securities, forward contracts and futures valued at \$3.1bn.

The existence of investments is considered a key audit matter as the investments represent a significant number on the Statement of Financial Position.

The existence of and title to the ICAV's investments is crucial to ensuring the annual accounts are free from material misstatement. There is a risk that the investments may not exist at year end.

Refer also to note 10 in the annual accounts.

How the scope of our audit responded to the key audit matter

- We obtained direct confirmation of the investments of the ICAV from the Depositary and Brokers at year-end. Any reconciling items between the confirmations and the ICAV's investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We reviewed the SOC 1 Report of Brown Brothers Harriman Fund Administration Services (Ireland) Limited and assessed the scope, sufficiency and results of the Service Auditor Report to determine whether we could place reliance on this report with regard to controls over the existence of investments.

Our audit procedures relating to these matters were designed in the context of our audit of the annual accounts as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the annual accounts is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the annual accounts that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the annual accounts as a whole as follows:

Basis for determining materiality	0.5% of Average Net Assets of each Sub-fund.
Rationale for the benchmark applied	The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the annual accounts. The use of the Average Net Asset Value is considered the industry practice benchmark for Investment Funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the annual accounts as a whole.

Performance materiality was set at 80% of materiality for the 31 January 2023 audit. In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to the Board all audit differences in excess of 5% of Materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the annual accounts.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV was registered in Ireland pursuant to the ICAV Act. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) as a UCITS (Undertaking for Collective Investment in Transferable Securities) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator Brown Brothers Harriman Fund Administration Services (Ireland) Limited at 30 Herbert Street, Dublin 2, Ireland.

Other information

The other information comprises the information included in the annual accounts, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual accounts.

Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the annual accounts and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

A further description of our responsibilities for the audit of the annual accounts is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists regarding how and where fraud might occur in the annual accounts and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the annual accounts. The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the annual accounts but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the annual accounts;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland;
- In addressing the risk of fraud in Revenue Recognition, independently valuing all securities using our own market feeds and completing an unrealised gain/loss reconciliation;
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments;

- assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and
- evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the Applicable Regulations

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

Opinion on other matters prescribed by the Applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the annual accounts to be readily and properly audited.
- The annual accounts are in agreement with the accounting records.

Other matters which we are required to address

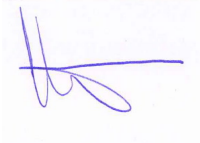

We were appointed by the Board of Directors on 24 July 2019 to audit the annual accounts for the financial year end ending 31 January 2020. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 4 years, covering the years ending 31 January 2020 to 31 January 2023.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Christian MacManus
Partner
For and on behalf of Deloitte Ireland LLP
Chartered Accountants and Statutory Audit Firm

Date: 29 May 2023

Note: An audit does not provide assurance on the maintenance and integrity of the website, including controls used to achieve this, and in particular on whether any changes may have occurred to the annual accounts since first published. These matters are the responsibility of the directors but no control procedures can provide absolute assurance in this area.

Legislation in Ireland governing the preparation and dissemination of annual accounts differs from legislation in other jurisdictions.

DIRECTORY (UNAUDITED)

Directors:

Ms. Catherine Fitzsimons (Ireland) (Chairperson)
Ms. Denise Kinsella (Ireland) (resigned 31 March 2023)
Mr. David Greco (USA)
Mr. Nick King (UK)
Ms. Bronwyn Wright (Ireland)
Ms. Lorraine McCarthy (Ireland)

All current Directors are Non-Executive.

Ms. Denise Kinsella and Ms. Bronwyn Wright are Independent Directors.

APPENDIX 1 – STATEMENT OF SIGNIFICANT CHANGES IN THE COMPOSITION OF PORTFOLIO (UNAUDITED)

In accordance with the UCITS Regulations, as amended, a statement of changes in the composition of the Schedule of Investments during the reporting year is provided to ensure that Shareholders can identify changes in the investments held by the Sub-Funds. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the year. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Fidelity Global Quality Income UCITS ETF

Top Twenty Purchases for the financial year ended 31 January 2023

APPENDIX 2 – REPORT OF REMUNERATION (UNAUDITED)

Remuneration Disclosure

The Fund is managed by FIL Investment Management (Luxembourg) S.A., Ireland Branch ('FIMLUX'),

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL Limited ('FIL'). The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition, FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Fund, or the Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long-term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at <https://www.fidelityinternational.com>.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in February 2023 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Total Remuneration paid to staff employed by FIMLUX for the financial year ended 31/01/2023	EUR 9,048,751
Of which, fixed remuneration	EUR 7,452,063
Of which, variable remuneration	EUR 1,596,688
Total number of employees of FIMLUX (at 31/01/2023)	91

The aggregate total remuneration paid to the Identified Staff, considering all existing delegation arrangements, and where information has been made available, is as follows: EUR 10.49 million. It should be noted that this remuneration information is that which was disclosed by the delegate, in its annual report for its financial year ended 30 June 2022 and is an aggregate figure disclosed by the Investment Manager for its relevant staff and is not specific to the Fund.

List of Investment Manager

The following table discloses the breakdown of the Investment Manager by sub-funds for the financial year under review.

Sub-fund name	Investment Manager

Fidelity Digital Health UCITS ETF	GEODE
Fidelity Electric Vehicles & Future Transportation UCITS ETF	GEODE
Fidelity Metaverse UCITS ETF	GEODE

APPENDIX 3 – TRACKING ERROR (UNAUDITED)

Each of the Index Tracking Sub-Funds employ a “passive” investment strategy designed to replicate the performance of the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably possible (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Index Tracking Sub-Funds will use optimisation to select Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

Tracking error measures the volatility of the return difference between each Index Tracking Sub-Fund and the Index. It is calculated as the standard deviation of the delivered excess returns over an annual period. Anticipated tracking error is disclosed for the Index Tracking Sub-Funds in the table below. Realised (ex-post) tracking error may vary from the anticipated tracking error, depending on a range of circumstances. These include transaction costs, securities lending income and withholding tax differences. The anticipated tracking error and ex-post tracking error are not expected to vary significantly under normal circumstances.

For the financial year ended 31 January 2023, the anticipated tracking errors and the ex-post tracking errors were as follows:

<i>Sub-Fund</i>	<i>Anticipated tracking error (bps)</i>	<i>Ex-post tracking error (bps)</i>
Fidelity Global Quality Income UCITS ETF	10	8
Fidelity US Quality Income UCITS ETF	5	3
Fidelity Emerging Markets Quality Income UCITS ETF	75	255*
Fidelity Europe Quality Income UCITS ETF	10	27**
Fidelity Electric Vehicles and Futures Transportation UCITS ETF	50	5
Fidelity Clean Energy UCITS ETF	50	2
Fidelity Cloud Computing UCITS ETF	50	1
Fidelity Digital Health UCITS ETF	50	3
Fidelity Metaverse UCITS ETF	50	2

* Increased Ex-post tracking error caused in part by the sub-funds exposure to Russian investments whose fair value has been written down to zero by the Manager due to Russian sanctions.

** Increased Ex-post tracking error caused in part by increased trading costs.

The table below compares the realised Sub-Funds' performance against the performance of the relevant benchmark Index during the financial year ended 31 January 2023. An explanation for the difference gross of TER is provided:

<i>Sub-Fund</i>	<i>Sub-Fund return for the financial year ended 31 January 2023 %</i>	<i>Benchmark return for the financial year ended 31 January 2023 %</i>	<i>Tracking difference net of TER %</i>	<i>TER %</i>	<i>Tracking difference gross of TER %</i>	<i>Explanation of the gross tracking difference</i>
Fidelity Global Quality Income UCITS ETF	-2.15	-2.38	0.23	0.40	0.63	The outperformance of the Sub-Fund was due to the sampling techniques employed.
Fidelity US Quality Income UCITS ETF	-2.73	-3.10	0.37	0.30	0.67	The outperformance of the Sub-Fund was due to the sampling techniques employed.
Fidelity Emerging Markets Quality Income UCITS ETF	-16.06	-15.87	-0.19	0.50	0.31	The outperformance of the Sub-Fund was due to the sampling techniques employed.
Fidelity Europe Quality Income UCITS ETF	-4.95	-5.33	0.38	0.30	0.68	The outperformance of the Sub-Fund was due to the sampling techniques employed.

Fidelity UCITS ICAV

APPENDIX 3 – TRACKING ERROR (UNAUDITED) (CONTINUED)

<i>Sub-Fund (continued)</i>	<i>Sub-Fund return for the financial year ended 31 January 2023 %</i>	<i>Benchmark return for the financial year ended 31 January 2023 %</i>	<i>Tracking difference net of TER %</i>	<i>TER %</i>	<i>Tracking difference gross of TER %</i>	<i>Explanation of the gross tracking difference</i>
Fidelity Electric Vehicles and Futures Transportation UCITS ETF	-3.09	-3.10	0.01	0.50	0.51	The outperformance of the Sub-Fund was due to the sampling techniques employed.
Fidelity Clean Energy UCITS ETF	-7.04	-7.07	0.03	0.50	0.53	The outperformance of the Sub-Fund was due to the sampling techniques employed.
Fidelity Cloud Computing UCITS ETF	2.75	2.71	0.04	0.50	0.54	The outperformance of the Sub-Fund was due to the sampling techniques employed.

Fidelity Metaverse UCITS ETF	4.67	4.77	-0.10	0.50	0.40	The outperformance of the Sub-Fund was due to the sampling techniques employed.

APPENDIX 4 – SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

The Securities Financing Transactions (“SFTs”) Regulation (the “Regulation”) came into force on 12 January 2016 and introduced additional disclosure requirements around securities lending, repurchase agreement/reverse repurchase agreements, total return swaps (TRSs) and other lending/borrowing transactions in annual and semi-annual financial statements, published after 13 January 2017. The Regulation came about due to what was perceived as ‘shadow banking’ risk in the securities financing markets and aims to reduce this risk by improving transparency in the securities financing markets in a number of ways:

- By imposing conditions on the 'reuse' of collateral, so that clients and counterparties understand the risks involved and give their consent to the reuse,
- By requiring managers to make detailed disclosures to their investors of the use they make of SFTs both in their periodic financial statements and pre-contractual documentation; and
- By requiring counterparties to report SFTs to a trade repository so as to provide transparency to regulators on the use of SFTs by market participants.

As the Sub-Funds did not hold any SFTs as at 31 January 2023, the annual report and audited financial statements do not include any additional disclosures.

APPENDIX 5 – SHAREHOLDER’S RIGHTS DIRECTIVE II (UNAUDITED)

For the financial year ended 31 January 2023

The Shareholder’s Rights Directive II (“SRD II”) is EU legislation which is applicable within Irish law from 30 March 2020. Under SRD II Asset Managers are required to provide additional annual information regarding the risks and composition of the portfolio.

Key material medium to long-term risks associated with the investments

Please refer to Note 10 for a detailed analysis of the risk management policies and procedure that effect the Sub-Funds.

Portfolio composition

Refer to each Sub-Fund’s Schedule of Investments from pages 19 to 90 for details of the portfolio composition by investment type and geographic location.

As at 31 January 2023, the following tables outline the Top 10 holdings by market value of each Sub-Fund.

Fidelity Global Quality Income UCITS ETF

Holding	Type	Market Value USD
Apple	Equities	11,997,281
Microsoft	Equities	10,244,713
Chevron	Equities	3,588,640
Comcast	Equities	3,577,702

Portfolio Turnover Rate

SRD II does not define a methodology for calculating the Portfolio Turnover Rate (“PTR”). For the purpose of these financial statements the following formula has been applied when calculating PTR.

$$\text{PTR} = (\text{purchases} + \text{sales}) - (\text{subscriptions} + \text{redemptions}) / \text{average 12-month net asset value attributable to shareholders}$$

For the year financial year ended 31 January 2023 the PTR of each Sub-Fund is as follows:

 Sub-Fund 	 PTR
Fidelity Global Quality Income UCITS ETF	91.29%
Fidelity US Quality Income UCITS ETF	53.63%
Fidelity Emerging Markets Quality Income UCITS ETF	158.71%
Fidelity Europe Quality Income UCITS ETF	74.12%
Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF	84.04%
Fidelity Sustainable Research Enhanced US Equity UCITS ETF	109.42%
Fidelity Sustainable Research Enhanced Global Equity UCITS ETF	82.31%
Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF	121.27%
Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF	91.20%
Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF	97.58%
Fidelity Electric Vehicles and Future Transportation UCITS ETF*	55.07%
Fidelity Clean Energy UCITS ETF*	32.87%
Fidelity Cloud Computing UCITS ETF*	28.03%
Fidelity Digital Health UCITS ETF*	46.32%
Fidelity Metaverse UCITS ETF*	25.40%

* The Sub-Fund launched on 24 August 2022.

Portfolio Turnover Cost

Portfolio Turnover Costs (“PTC”) is calculated as follows:

$$\text{PTC} = \text{PTR (capped at 100\%)} \times \text{transaction cost}$$

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

APPENDIX 5 – SHAREHOLDER’S RIGHTS DIRECTIVE II (UNAUDITED) (CONTINUED)

Portfolio Turnover Cost (continued)

For the financial year ended 31 January 2023 the PTC of each Sub-Fund is as follows:

APPENDIX 6 – SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Per the Sustainable Finance Disclosure Regulation ('SFDR') the following Sub -Funds are classified as Article 8:

- Fidelity Sustainable Research Enhanced Europe Equity UCITS ETF,
- Fidelity Sustainable Research Enhanced US Equity UCITS ETF,
- Fidelity Sustainable Research Enhanced Global Equity UCITS ETF,
- Fidelity Sustainable Research Enhanced Emerging Markets Equity UCITS ETF,
- Fidelity Sustainable Research Enhanced Japan Equity UCITS ETF,
- Fidelity Sustainable Research Enhanced Pacific ex-Japan Equity UCITS ETF,
- Fidelity Clean Energy UCITS ETF,
- Fidelity Cloud Computing UCITS ETF,
- Fidelity Digital Health UCITS ETF,
- Fidelity Electric Vehicles & Future Transportation UCITS ETF,
- Fidelity Metaverse UCITS ETF.

All other Sub-Funds are classified as Article 6 Funds, meaning their investments do not take into account the EU criteria for environmentally sustainable economic activities.

The following disclaimer should be considered when reading the SFDR Annexes contained in the subsequent pages of these financial statements.

In relation to Fidelity Clean Energy UCITS ETF, Fidelity Cloud Computing UCITS ETF, Fidelity Digital Health UCITS ETF, Fidelity Electric Vehicles and Future Transportation UCITS ETF and Fidelity Metaverse UCITS ETF, desirable ESG characteristics and sustainable investments percentages (with the exception sustainable investments with an environmental objective aligned with the EU Taxonomy); ©2023 Sustainalytics. Percentages contained in the SFDR Annexes are subject to rounding.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity UCITS ICAV - Fidelity Sustainable
Research Enhanced Europe Equity UCITS ETF

Legal entity identifier:
2549006YGN8TU1T8M925

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.95% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 97% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 58.95% of the sub-fund was invested in sustainable investments;
- iv) 3.45% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 23.85% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 31.65% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 58.95% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Sustainability indicators measured how the environmental or social characteristics promoted by the financial product are attained.

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:
 1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
 2. a principle-based screening policy which includes:
 - (a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - (b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country
NESTLE SA-REG	Consumer Staples	4.27%	Switzerland
ROCHE HOLDING AG-GENUSSCHEIN	Health Care	3.12%	Switzerland
SHELL PLC	Energy	2.91%	United Kingdom
ASML HOLDING NV	Information Technology	2.69%	Netherlands

SANOFI	Health Care	1.23%	France
NOVARTIS AG-REG	Health Care	1.21%	Switzerland

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 58.95% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 97% of its assets in securities of issuers with favourable ESG characteristics;
2. 58.95% in sustainable investments (#1A sustainable)* of which 3.45% have an environmental objective (which is aligned with the EU Taxonomy), 23.85% have an environmental objective (which is not aligned with the EU Taxonomy) 31.65% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Communication Services	Telecommunication Services	3.19%
	Media & Entertainment	0.87%

Real Estate	Real Estate Management & Development	0.44%
	Equity Real Estate Investment Trusts (REITs)	0.37%
Utilities	Utilities	3.38%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 3.45% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 23.85% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 31.65% in sustainable investments with a social objective.

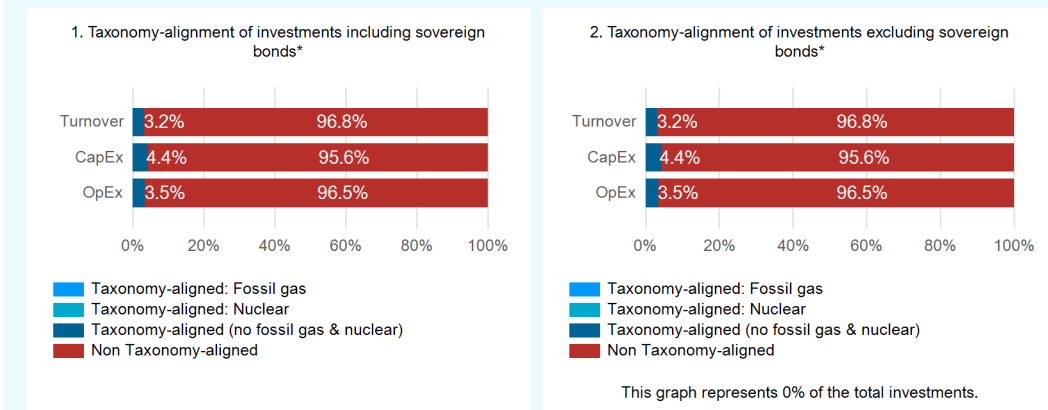

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity is 2.2% and the Transitional Activity: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.96% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period 1 December 2022 to 31 January 2023. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the sustainable environmental or social characteristics that it promoted was:

- i) 90% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity’s Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 46.96% of the sub-fund was invested in sustainable investments;
- iv) 0.12% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 25.08% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 21.76% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 46.96% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or

(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or

(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives;

provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

Norms-based screens - the screening out of securities identified under Fidelity's norms based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:
 - 1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
 - 2. a principle-based screening policy which includes:
 - (a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - (b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country
APPLE INC	Information Technology	7.07%	United States

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

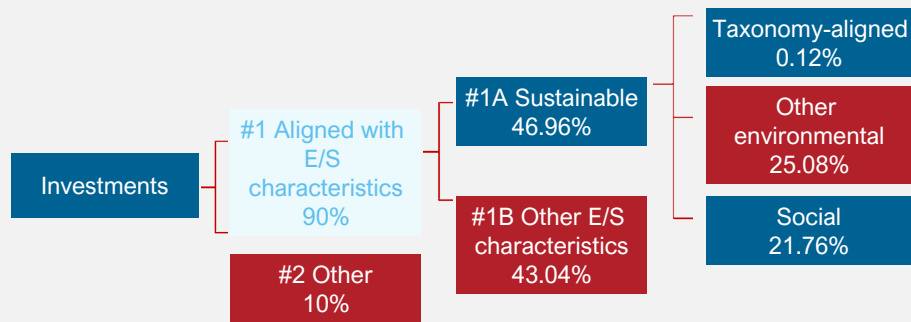

The sub-fund invested 46.96% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

- 90% of its assets in securities of issuers with favourable ESG characteristics;
- 46.96% in sustainable investments (#1A sustainable)* of which 0.12% have an environmental objective (which is aligned with the EU Taxonomy), 25.08% have an environmental objective (which is not aligned with the EU Taxonomy) 21.76% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0.12% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
 No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 25.08% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

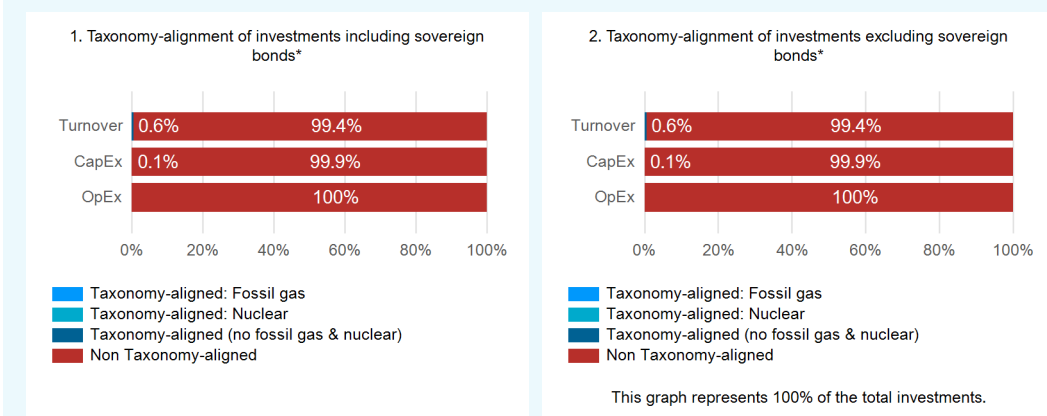

The sub-fund invested 21.76% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.3%; Transitional Activity: 0.3% measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.4% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 91% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 47.4% of the sub-fund was invested in sustainable investments;
- iv) 23.74% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 22.71% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 47.4% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or

(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or

(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives;

provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below);

Sustainability indicators measured how the environmental or social characteristics promoted by the financial product are attained.

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be ‘sustainable investments’ unless Fidelity’s fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:
 1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
 2. a principle-based screening policy which includes:
 - (a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - (b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0.95% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 23.74% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 22.71% in sustainable investments with a social objective.

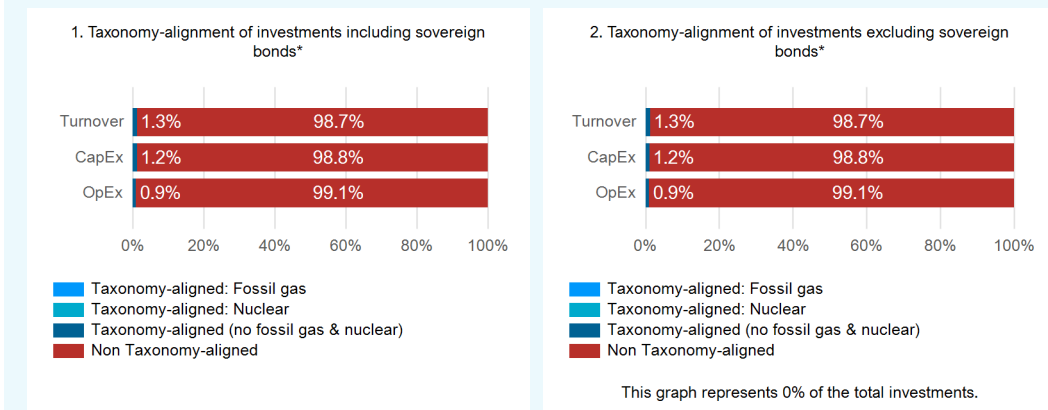

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.7%; Transitional Activity: 0.4%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.79% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 89% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 35.79% of the sub-fund was invested in sustainable investments; and
- vi) 24.35% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 35.79% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives;
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below);
Sustainability indicators measured how the environmental or social characteristics promoted by the financial product are attained.

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be ‘sustainable investments’ unless Fidelity’s fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:
 1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
 2. a principle-based screening policy which includes:
 - (a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - (b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	6.63%	Taiwan

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 35.79% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 89 % of its assets in securities of issuers with favourable ESG characteristics;
2. 35.79% in sustainable investments (#1A sustainable)* of which 0.02% have an environmental objective (which is aligned with the EU Taxonomy), 11.41% have an environmental objective (which is not aligned with the EU Taxonomy) 24.35% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0.02% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 11.41% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 24.35% in sustainable investments with a social objective.

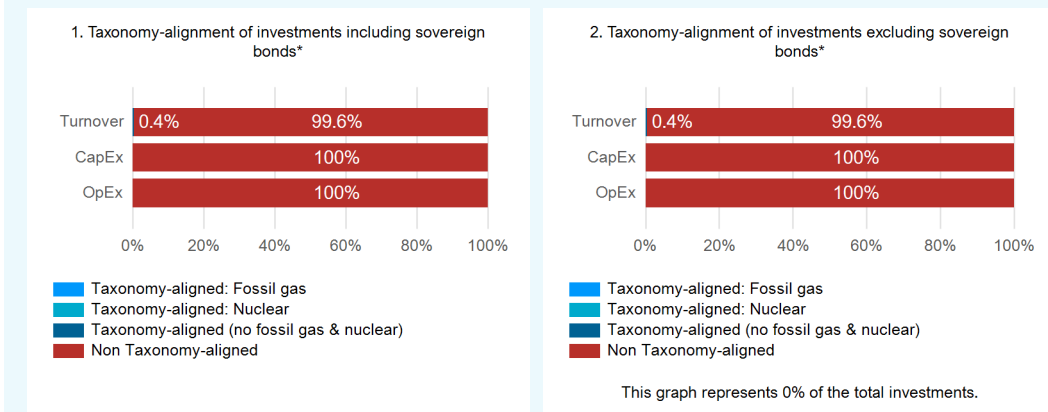

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity is 0.1% and the Transitional Activity: 0.2%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.36% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 90% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 43.36% of the sub-fund was invested in sustainable investments;
- iv) 22.95% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 20.12% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 43.36% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives;
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

Norms-based screens - the screening out of securities identified under Fidelity's norms based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:

- 1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
- 2. a principle-based screening policy which includes:
 - (a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - (b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information. (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.

(vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

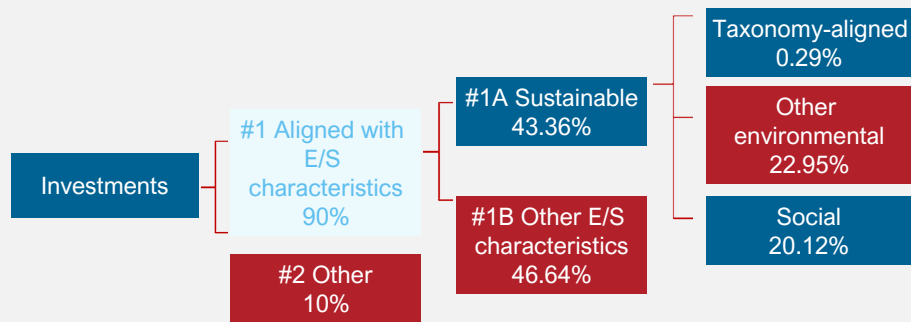

The sub-fund invested 43.36% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 90% of its assets in securities of issuers with favourable ESG characteristics;
2. 43.36% in sustainable investments (#1A sustainable)* of which 0.29% have an environmental objective (which is aligned with the EU Taxonomy), 22.95% have an environmental objective (which is not aligned with the EU Taxonomy) 20.12% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Communication Services	Telecommunication Services	5.63%
	Media & Entertainment	2.06%
Consumer Discretionary	Automobiles & Components	9.43%

Utilities	Utilities	0.25%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 22.95% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 20.12% in sustainable investments with a social objective.

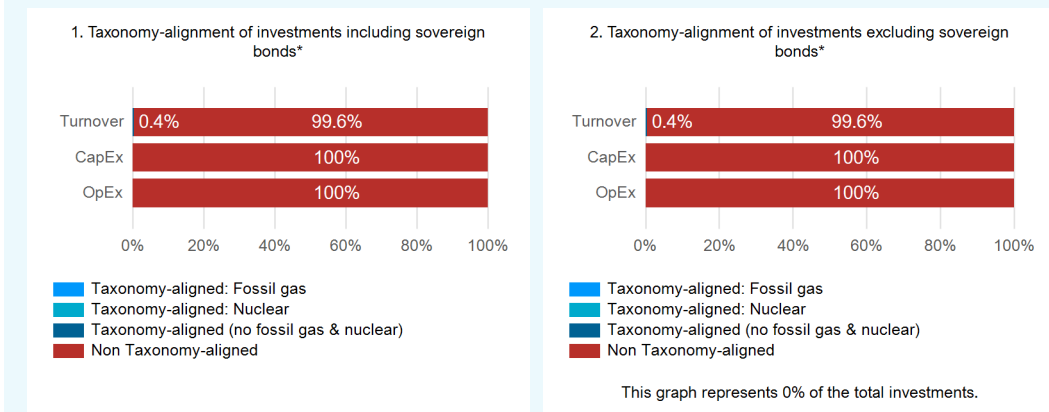

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.1%; Transitional Activity: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name:
Fidelity UCITS ICAV - Fidelity Sustainable
Research Enhanced Pacific ex-Japan Equity
UCITS ETF

Legal entity identifier:
2549009VS6NGTW2P1T22

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.81% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. Please refer to the website for more information

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the sustainable environmental or social characteristics that it promoted was:

- i) 95% of the sub-fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 31.81% of the sub-fund was invested in sustainable investments;
- iv) 1.43% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 11.53% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 18.85% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the sub-fund did not have as its objective a sustainable investment, it had a proportion of 31.81% of sustainable investments. The sustainable investments had an environmental or social objective.

The sub-fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives;
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

Norms-based screens - the screening out of securities identified under Fidelity's norms based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered to be sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - When investing directly in corporate issuers, the sub-fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. In respect of its direct investments, the sub-fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(a) norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and

(b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the [website](#) for more information. (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.

(vi) Quarterly reviews - monitoring of principal adverse impacts through the sub-fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 1.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 11.53% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

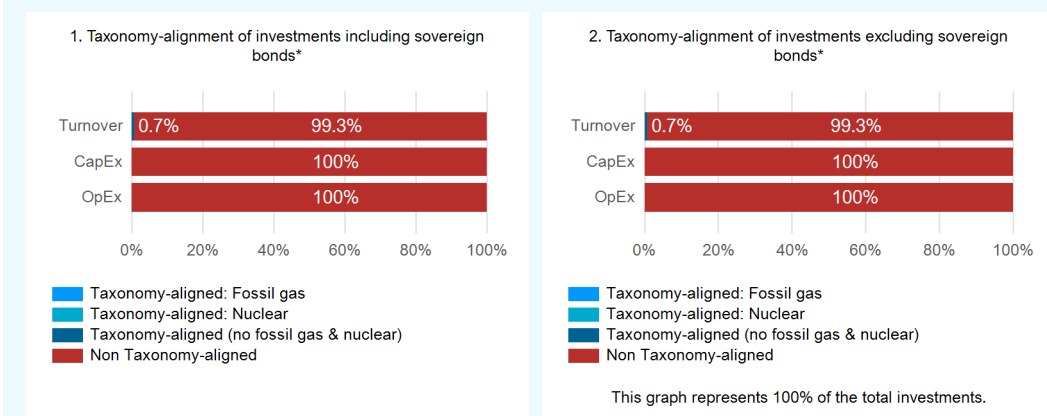

The sub-fund invested 18.85% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the sub-fund adhered to the Exclusions.

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0%; Transitional Activity: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics are determined by reference to ESG ratings. Additionally, we have a Quarterly Sustainability Review for all our Article 8 funds, to discuss the fund's qualitative and quantitative ESG characteristics, and whether they are consistent with requirements. This is an extension of our pre-existing risk and compliance processes. Where appropriate we have actively engaged with issuers.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.5% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund sought to track the performance of the Fidelity Clean Energy ESG Tilted Index NR (the "Index") which integrated desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics were determined by reference to Sustainalytics ESG ratings.

Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

The Index comprised of equity securities that distribute, produce or provide technology or equipment to support the production of energy from solar, wind, hydrogen and other renewable sources.

Some of the investments made by the sub-fund during the period were sustainable investments. The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 73% of the sub-fund was invested in securities of issuers with desirable ESG characteristics;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 71.5% of the sub-fund was invested in sustainable investments; and
- iv) 24.4% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy).

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 71.5% of sustainable investments. The sustainable investments had an environmental and social objective. A sustainable investment was determined as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”);
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to adverse impacts. This included:

Norms-based screens - the screening out of securities identified under norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a ‘ Severe’ controversy (having a Sustainalytics score of 5) using controversy screens, including i) operational issues, ii) society and communities, iii) employee rights and supply chain, iv) customers, and v) governance.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, the Index applied a quantitative evaluation to identify issuers with challenging performance on adverse impact indicators. Issuers with a low score were ineligible to be sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Consideration of the adverse impacts on sustainability factors were considered by the Index methodology through a variety of tools, including:

(i) ESG rating - The Index referenced Sustainalytics ESG ratings which incorporated consideration of material adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management.

(ii) Exclusions - the Index applied the Exclusions to help mitigate the adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. The Index applied ESG screens and revenue thresholds (including norms-based screening and exclusions based screening):

1. exclusions based screens, which included weapons, certain fossil fuels and tobacco, and
2. a norms-based screening of issuers which Fidelity considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the Index methodology for further information (www.moorgatebenchmarks.com).

Fidelity also had discretion to implement enhanced, stricter sustainable requirements and exclusions within the Index methodology from time to time.

(iii) Engagement - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the adverse impacts. This includes the adoption of proxy voting guidelines designed to promote long-term shareholder value by supporting good corporate governance practices and engagement with investee companies, either directly or by means of collective engagement initiatives via third party providers that act as agent for a pool of investors in certain companies.

The specific adverse impacts that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country
FIRST SOLAR INC	Information Technology	4.48%	United States
ENPHASE ENERGY INC	Information Technology	4.39%	United States
VESTAS WIND SYSTEMS A/S	Industrials	3.73%	Denmark
ORSTED A/S	Utilities	3.71%	Denmark
EDP RENOVAVEIS SA	Utilities	3.39%	Spain
SIEMENS GAMESA RENEWABLE ENE	Industrials	3.13%	Spain
CORP ACCIONA ENERGIAS RENOVA	Utilities	2.94%	Spain
VERBUND AG	Utilities	2.76%	Austria
MERIDIAN ENERGY LTD	Utilities	2.52%	New Zealand
XINYI SOLAR HOLDINGS LTD	Information Technology	2.40%	Cayman Islands
PLUG POWER INC	Industrials	2.37%	United States
NORTHLAND POWER INC	Utilities	2.34%	Canada
ORMAT TECHNOLOGIES INC	Utilities	2.27%	United States
SUNRUN INC	Industrials	2.23%	United States
ERG SPA	Utilities	2.09%	Italy

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 71.5% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 73 % of its assets in securities of issuers with desirable ESG characteristics;
2. 71.5% in sustainable investments (#1A sustainable) of which 34% have an environmental objective (which is aligned with the EU Taxonomy), 24.4% have an environmental objective (which is not aligned with the EU Taxonomy) 13.1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with desirable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Industrials	Capital Goods	26.03%
	Commercial & Professional Services	1.74%
Information Technology	Technology Hardware & Equipment	3.41%
	Semiconductors & Semiconductor Equipment	16.73%
Utilities	Utilities	52.10%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 34% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and/or adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

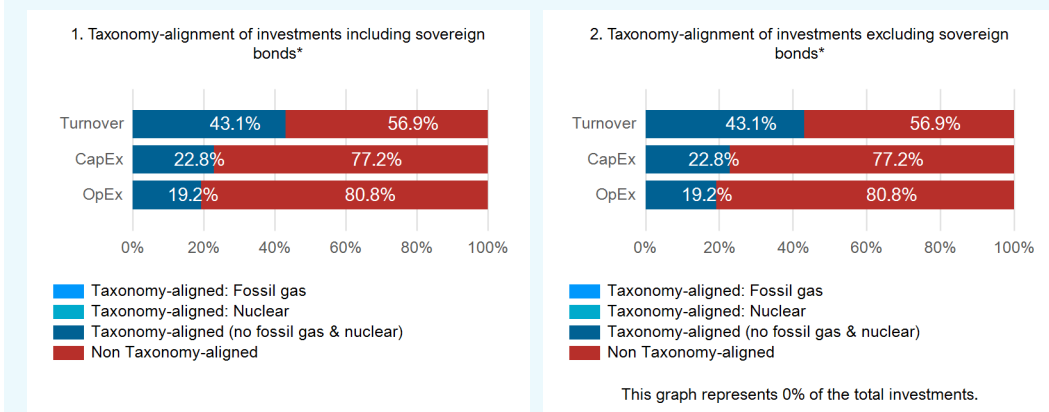

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the sub-fund invested in Enabling Activities: 22.35%; Transitional Activities: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 24.4% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 13.1% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Index applied the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by tracking the Index which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics are determined by reference to Sustainalytics ESG ratings.

How did this financial product perform compared to the reference benchmark?

An Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes. The Index methodology can be found [here](#).

How does the designated index differ from a broad market index?

The Index comprises of equity securities that distribute, produce or provide technology or equipment to support the production of energy from solar, wind, hydrogen and other renewable sources. In addition, a wide range of environmental and social characteristics are assessed during the Index construction process. In particular, a minimum of 50% of the Index is comprised of securities of issuers with desirable ESG characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

As measured by the sustainability indicators, the sub-fund attained each of the environmental and social characteristics promoted by tracking the Index, which integrates desirable ESG characteristics on an ongoing basis as part of the Index construction process.

How did this financial product perform compared with the reference benchmark?

The sub-fund tracked the Index.

How did this financial product perform compared with the broad market index?

The sub-fund tracked the Index which integrates desirable ESG characteristics on an ongoing basis. A broad market Index does not integrate ESG characteristics.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name:
Fidelity UCITS ICAV - Fidelity Cloud Computing UCITS ETF

Legal entity identifier:
254900B9H16262S3I010

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund sought to track the performance of the Fidelity Cloud Computing ESG Tilted Index NR (the "Index") which integrated desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics were determined by reference to Sustainalytics ESG ratings.

Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

The Index comprised of equity securities of companies that provide products or services enabling the increased adoption of cloud computing, characterized by the delivery of computing resources over the internet.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 90% of the sub-fund was invested in securities of issuers with desirable ESG characteristics; and
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below).

... and compared to previous periods?

Not applicable as this is the first reporting period.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This question is not applicable as the Fund did not make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable as the Fund did not make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable as the Fund did not make sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable as the Fund did not make sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Consideration of the adverse impacts on sustainability factors were considered by the Index methodology through a variety of tools, including:

(i) ESG rating - The Index referenced Sustainalytics ESG ratings which incorporated consideration of material adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management.

(ii) Exclusions - the Index applied the Exclusions to help mitigate the adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. The Index applied ESG screens and revenue thresholds (including norms-based screening and exclusions based screening):

1. exclusions based screens, which included weapons, certain fossil fuels and tobacco, and
2. a norms-based screening of issuers which Fidelity considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the Index methodology for further information (www.moorgatebenchmarks.com).

Fidelity also had discretion to implement enhanced, stricter sustainable requirements and exclusions within the Index methodology from time to time.

(iii) Engagement - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the adverse impacts. This includes the adoption of proxy voting guidelines designed to promote long-term shareholder value by supporting good corporate governance practices and engagement with investee companies, either directly or by means of collective engagement initiatives via third party providers that act as agent for a pool of investors in certain companies.

The specific adverse impacts that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

This question is not applicable as the sub-fund did not make sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in 90% of its assets in securities of issuers with desirable ESG characteristics.

(#2 Other) The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Consumer Discretionary	Consumer Services	0.97%
Information Technology	Software & Services	78.70%
	Technology Hardware & Equipment	13.79%
Real Estate	Equity Real Estate Investment Trusts (REITs)	6.54%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

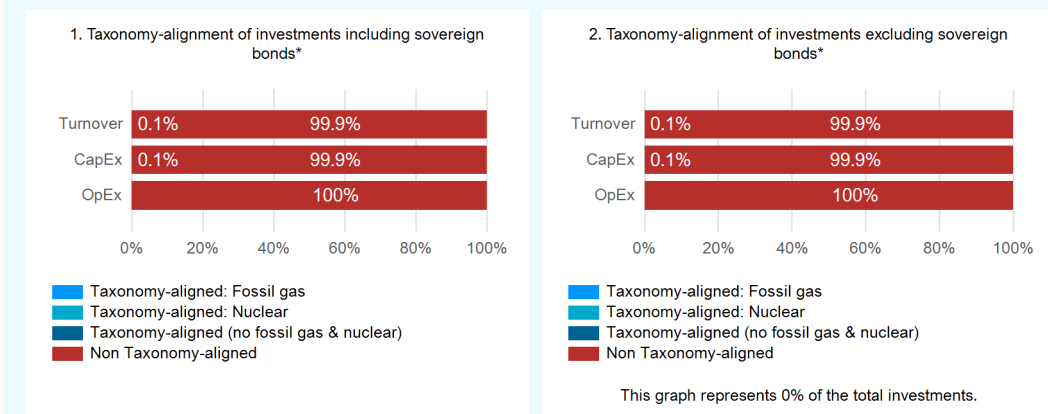

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the sub-fund invested in Enabling Activities: 0.03%; Transitional Activities: 0.02%, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

This question is not applicable as the Fund did not make sustainable investments.

What was the share of socially sustainable investments?

This question is not applicable as the Fund did not make sustainable investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Index applied the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by tracking the Index which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics are determined by reference to Sustainalytics ESG ratings.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes. The Index methodology can be found [here](#).

How does the designated index differ from a broad market index?

The Index comprises of equity securities of companies that provided products or services enabling the increased adoption of cloud computing, characterized by the delivery of computing resources over the internet.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

As measured by the sustainability indicators, the sub-fund attained each of the environmental and social characteristics promoted by tracking the Index, which integrates desirable ESG characteristics on an ongoing basis as part of the Index construction process.

How did this financial product perform compared with the reference benchmark?

The sub-fund tracked the Index.

How did this financial product perform compared with the broad market index?

The sub-fund tracked the Index which integrates desirable ESG characteristics on an ongoing basis. A broad market Index does not integrate ESG characteristics.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity UCITS ICAV - Fidelity Digital Health UCITS ETF

Legal entity identifier:
2549009TGHNMQ5F55O16

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.8% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund sought to track the performance of the Fidelity Digital Health ESG Tilted Index NR (the "Index") which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics were determined by reference to Sustainalytics ESG ratings.

Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

The Index comprised of equity securities of companies providing healthcare records management, connected healthcare devices, surgical robotics, telemedicine, and other technology-enabled health care products and services.

Some of the investments made by the sub-fund during the period were sustainable investments. The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 84% of the sub-fund was invested in securities of issuers with desirable ESG characteristics;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 77.8% of the sub-fund was invested in sustainable investments; and
- iv) 77.8% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 77.8% of sustainable investments. The sustainable investments had an environmental and social objective. A sustainable investment was determined as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to adverse impacts. This included:

Norms-based screens - the screening out of securities identified under norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a ‘ Severe’ controversy (having a Sustainalytics score of 5) using controversy screens, including i) operational issues, ii) society and communities, iii) employee rights and supply chain, iv) customers, and v) governance.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, the Index applied a quantitative evaluation to identify issuers with challenging performance on adverse impact indicators. Issuers with a low score were ineligible to be sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Consideration of the adverse impacts on sustainability factors were considered by the Index methodology through a variety of tools, including:

(i) ESG rating - The Index referenced Sustainalytics ESG ratings which incorporated consideration of material adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management.

(ii) Exclusions - the Index applied the Exclusions to help mitigate the adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. The Index applied ESG screens and revenue thresholds (including norms-based screening and exclusions based screening):

1. exclusions based screens, which included weapons, certain fossil fuels and tobacco, and
2. a norms-based screening of issuers which Fidelity considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the Index methodology for further information (www.moorgatebenchmarks.com).

Fidelity also had discretion to implement enhanced, stricter sustainable requirements and exclusions within the Index methodology from time to time.

(iii) Engagement - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the adverse impacts. This includes the adoption of proxy voting guidelines designed to promote long-term shareholder value by supporting good corporate governance practices and engagement with investee companies, either directly or by means of collective engagement initiatives via third party providers that act as agent for a pool of investors in certain companies.

The specific adverse impacts that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 77.8% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 84 % of its assets in securities of issuers with desirable ESG characteristics;
2. 77.8% in sustainable investments (#1A sustainable) of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 0% have an environmental objective (which is not aligned with the EU Taxonomy) 77.8% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with desirable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Consumer Discretionary	Consumer Durables & Apparel	1.76%
Consumer Staples	Consumer Staples Distribution & Retail	11.08%
Health Care	Health Care Equipment & Services	76.23%
	Pharmaceuticals, Biotechnology & Life Sciences	1.46%
Industrials	Commercial & Professional Services	2.06%
Information Technology	Software & Services	5.47%
	Technology Hardware & Equipment	1.94%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and/or adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

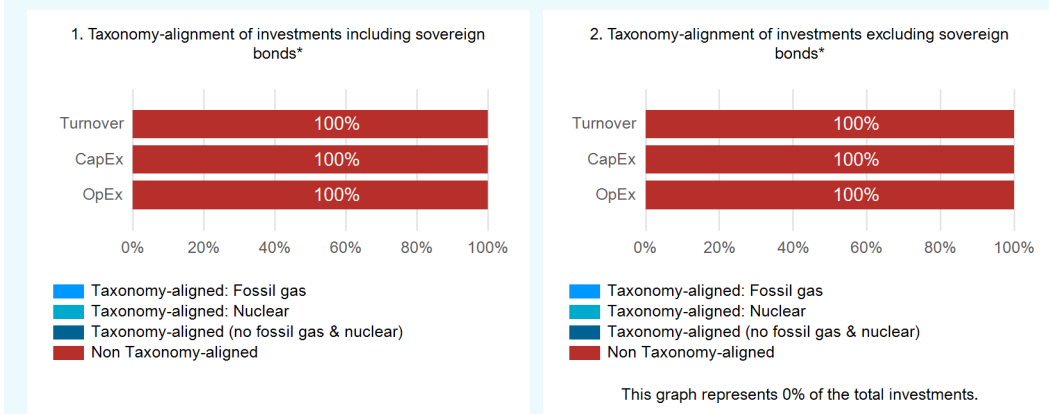

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

This question is not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 0% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 77.8% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Index applied the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by tracking the Index which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics are determined by reference to Sustainalytics ESG ratings.

How did this financial product perform compared to the reference benchmark?

An Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes. The Index methodology can be found [here](#).

How does the designated index differ from a broad market index?

The Index comprises of equity securities of companies providing healthcare records management, connected healthcare devices, surgical robotics, telemedicine, and other technology-enabled health care products and services.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

As measured by the sustainability indicators, the sub-fund attained each of the environmental and social characteristics promoted by tracking the Index, which integrates desirable ESG characteristics on an ongoing basis as part of the Index construction process.

How did this financial product perform compared with the reference benchmark?

The sub-fund tracked the Index.

How did this financial product perform compared with the broad market index?

The sub-fund tracked the Index which integrates desirable ESG characteristics on an ongoing basis. A broad market Index does not integrate ESG characteristics.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity UCITS ICAV - Fidelity Electric Vehicles and Future Transportation UCITS ETF

254900U7C6REQ0UAQE13

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund sought to track the performance of the Fidelity Electric Vehicles and Future Transportation ESG Tilted Index NR (the "Index") which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics were determined by reference to Sustainalytics ESG ratings.

Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

The Index comprised of equity securities engaged in the production of electric and/or autonomous vehicles and their components, technology, or energy systems or in other initiatives that aimed to change the future of transportation.

Some of the investments made by the sub-fund during the period were sustainable investments. The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 73% of the sub-fund was invested in securities of issuers with desirable ESG characteristics;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 59% of the sub-fund was invested in sustainable investments;
- iv) 5.42% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 48.08% of the sub-fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 5.5% of the sub-fund invested in sustainable investments with a social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments. The sustainable investments had environmental or social objectives.

A sustainable investment was determined as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”);
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to adverse impacts. This included:

Norms-based screens - the screening out of securities identified under norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a ‘ Severe’ controversy (having a Sustainalytics score of 5) using controversy screens, including i) operational issues, ii) society and communities, iii) employee rights and supply chain, iv) customers, and v) governance.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, the Index applied a quantitative evaluation to identify issuers with challenging performance on adverse impact indicators. Issuers with a low score were ineligible to be sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Consideration of the adverse impacts on sustainability factors were considered by the Index methodology through a variety of tools, including:

(i) ESG rating - The Index referenced Sustainalytics ESG ratings which incorporated consideration of material adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management.

(ii) Exclusions - the Index applied the Exclusions to help mitigate the adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. The Index applied ESG screens and revenue thresholds (including norms-based screening and exclusions based screening):

1. exclusions based screens, which included weapons, certain fossil fuels and tobacco, and
2. a norms-based screening of issuers which Fidelity considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the Index methodology for further information (www.moorgatebenchmarks.com).

Fidelity also had discretion to implement enhanced, stricter sustainable requirements and exclusions within the Index methodology from time to time.

(iii) Engagement - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the adverse impacts. This includes the adoption of proxy voting guidelines designed to promote long-term shareholder value by supporting good corporate governance practices and engagement with investee companies, either directly or by means of collective engagement initiatives via third party providers that act as agent for a pool of investors in certain companies.

The specific adverse impacts that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-02-01 / 2023-01-31

Largest investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	4.20%	United States

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 59% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

- 73 % of its assets in securities of issuers with desirable ESG characteristics;
- 59% in sustainable investments (#1A sustainable) of which 5.42% have an environmental objective (which is aligned with the EU Taxonomy), 48.08% have an environmental objective (which is not aligned with the EU Taxonomy) 5.5% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with desirable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Consumer Discretionary	Automobiles & Components	32.82%
	Consumer Durables & Apparel	2.67%
	Consumer Discretionary Distribution & Retail	1.29%
Industrials	Transportation	2.97%
	Capital Goods	16.84%
	Commercial & Professional Services	1.52%
Information Technology	Semiconductors & Semiconductor Equipment	32.29%
	Technology Hardware & Equipment	3.21%
Materials	Materials	6.38%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 5.42% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and/or adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

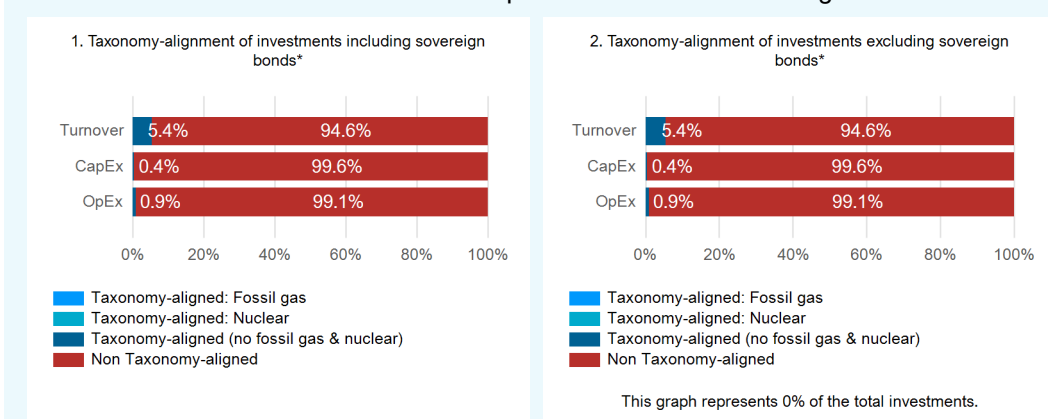

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

The share of the sub-fund invested in Enabling Activities: 5.44%; Transitional Activities: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 54% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 5% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Index applied the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by tracking the Index which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics are determined by reference to Sustainalytics ESG ratings.

How did this financial product perform compared to the reference benchmark?

An Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes. The Index methodology can be found [here](#).

How does the designated index differ from a broad market index?

The Index comprises of equity securities engaged in the production of electric and/or autonomous vehicles and their components, technology, or energy systems or engaged in other initiatives that aim to change the future of transportation.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

As measured by the sustainability indicators, the sub-fund attained each of the environmental and social characteristics promoted by tracking the Index, which integrates desirable ESG characteristics on an ongoing basis as part of the Index construction process.

How did this financial product perform compared with the reference benchmark?

The sub-fund tracked the Index.

How did this financial product perform compared with the broad market index?

The sub-fund tracked the Index which integrates desirable ESG characteristics on an ongoing basis. A broad market Index does not integrate ESG characteristics.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective ?	
● ● <input type="checkbox"/> Yes	● ● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.1% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sub-fund sought to track the performance of the Fidelity Metaverse ESG Tilted Index NR (the "Index") which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics were determined by reference to Sustainalytics ESG ratings.

Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

The Index comprised of equity securities of companies that develop, manufacture, distribute, sell products or services related to establishing and enabling the "Metaverse", which is a term used to describe a future state of the internet characterized by a network of both augmented reality and virtual worlds that can be experienced persistently and in a shared environment by large numbers of users.

Some of the investments made by the sub-fund during the period were sustainable investments. The sustainable investments figures in this periodic disclosure are as at 30 December 2022.

Where the sub-fund invested in economic activities that qualify as environmentally sustainable under the EU Taxonomy, this contributed towards the climate change mitigation and/or adaptation environmental objectives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted was:

- i) 87% of the sub-fund was invested in securities of issuers with desirable ESG characteristics;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below); and
- iii) 14.1% of the sub-fund was invested in sustainable investments.

... and compared to previous periods?

Not applicable as this is the first reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 14.1% of sustainable investments. The sustainable investments had an environmental and social objective. A sustainable investment was determined as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”);
- provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to adverse impacts. This included:

Norms-based screens - the screening out of securities identified under norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a ‘ Severe’ controversy (having a Sustainalytics score of 5) using controversy screens, including i) operational issues, ii) society and communities, iii) employee rights and supply chain, iv) customers, and v) governance.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, the Index applied a quantitative evaluation to identify issuers with challenging performance on adverse impact indicators. Issuers with a low score were ineligible to be sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Consideration of the adverse impacts on sustainability factors were considered by the Index methodology through a variety of tools, including:

(i) ESG rating - The Index referenced Sustainalytics ESG ratings which incorporated consideration of material adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management.

(ii) Exclusions - the Index applied the Exclusions to help mitigate the adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. The Index applied ESG screens and revenue thresholds (including norms-based screening and exclusions based screening):

1. exclusions based screens, which included weapons, certain fossil fuels and tobacco, and
2. a norms-based screening of issuers which Fidelity considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the Index methodology for further information (www.moorgatebenchmarks.com).

Fidelity also had discretion to implement enhanced, stricter sustainable requirements and exclusions within the Index methodology from time to time.

(iii) Engagement - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the adverse impacts. This includes the adoption of proxy voting guidelines designed to promote long-term shareholder value by supporting good corporate governance practices and engagement with investee companies, either directly or by means of collective engagement initiatives via third party providers that act as agent for a pool of investors in certain companies.

The specific adverse impacts that were taken into consideration were subject to data availability and may evolve with improving data quality and availability.

The top investments table is populated based on the weighted average of the investment during the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The sub-fund invested 14.1% in sustainable investments.

What was the asset allocation?

(#1 aligned with E/S characteristics) The sub-fund invested in:

1. 87% of its assets in securities of issuers with desirable ESG characteristics;
2. 14.1% in sustainable investments (#1A sustainable) of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 6.2% have an environmental objective (which is not aligned with the EU Taxonomy) 7.9% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with desirable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	%of NAV as at January 31, 2023
Communication Services	Media & Entertainment	55.00%
	Telecommunication Services	2.27%
Consumer Discretionary	Consumer Durables & Apparel	0.90%
	Consumer Services	0.24%
Industrials	Capital Goods	2.15%
Information Technology	Technology Hardware & Equipment	7.46%
	Software & Services	20.10%
	Semiconductors & Semiconductor Equipment	11.88%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and/or adaptation economic objectives.

The compliance of the investments of the sub-fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the sub-fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

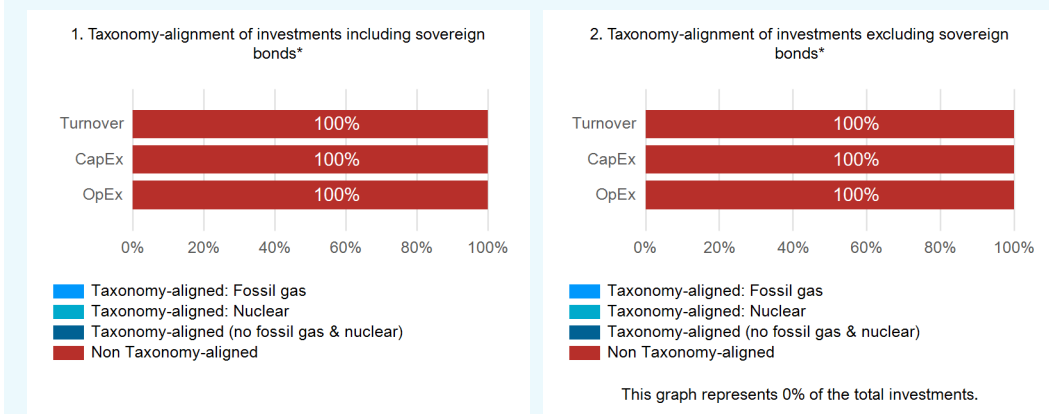

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

The above charts display all investments in the portfolio that were taxonomy aligned as at 31 January 2023. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied

What was the share of investments made in transitional and enabling activities?

This question is not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 6.2% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The sub-fund invested 7.9% in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the sub-fund were invested in assets aligned with the financial objective of the sub-fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Index applied the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund promoted environmental and social characteristics by tracking the Index which integrates desirable ESG characteristics on an ongoing basis as part of the Index methodology and construction process. Desirable ESG characteristics are determined by reference to Sustainalytics ESG ratings.

How did this financial product perform compared to the reference benchmark?

An Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes. The Index methodology can be found [here](#).

How does the designated index differ from a broad market index?

The Index comprises of equity securities of companies that develop, manufacture, distribute, sell products or services related to establishing and enabling the “Metaverse”, which is a term used to describe a future state of the internet characterized by a network of both augmented reality and virtual worlds that can be experienced persistently and in a shared environment by large numbers of users.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

As measured by the sustainability indicators, the sub-fund attained each of the environmental and social characteristics promoted by tracking the Index, which integrates desirable ESG characteristics on an ongoing basis as part of the Index construction process.

How did this financial product perform compared with the reference benchmark?

The sub-fund tracked the Index.

How did this financial product perform compared with the broad market index?

The sub-fund tracked the Index which integrates desirable ESG characteristics on an ongoing basis. A broad market Index does not integrate ESG characteristics.

Reference benchmarks are indexes to measure whether financial products attain the environmental or social characteristics that they promote.
