Directors' Report

The Board of Directors (the "Directors") present their Annual Report together with the Audited Financial Statements of VanEck UCITS ETFs plc (the "Company") for the financial year ended 31 December 2022.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and financial statements, in accordance with applicable law and regulations.

Irish Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and applicable law.

Under Irish company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its changes in net assets attributable to holders of redeemable participating shares for that financial year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that its financial statements comply with the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2019 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (collectively the "Central Bank UCITS Regulations"). They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to a trustee for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to State Street Custodial Services (Ireland) Limited (the "Depository") for safekeeping. In carrying out this duty, the Directors have delegated custody of the Company's assets to the Depository. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

Directors' Report (continued)

Compliance Statement

The Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations as set out in section 225 of the Companies Act 2014. The Directors confirm that:

1. A compliance policy document has been drawn up that sets out policies, that in our opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
2. Appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
3. During the financial year, the arrangements or structures referred to in (2) have been reviewed.

Audit Committee

Pursuant to section 167 of the Companies Act, 2014, the Board of Directors established an audit committee (the "Audit Committee") with effect from December 2016. The Audit Committee comprise of the following Directors: Adrian Waters, Mary Canning, Jon Lukomnik. The chairman of the Audit Committee is Mr. Adrian Waters. The Audit Committee will hold office for a period of one year unless earlier removed by the Board of Directors or by the members of the Company. The secretary of the Company acts as secretary of the Audit Committee. The Manager has delegated the day to day investment management for certain sub-funds of the company to Van Eck Associates Corporation ("The Investment Manager"). The administration of the company has been delegated to State Street Fund Services (Ireland) Limited ('the Administrator').

Relevant Audit Information

The Directors believe that they have complied with the requirements of Section 330 of the Companies Act 2014, as follows:

- So far as each person who is a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditor is unaware; and
- Having made enquiries of fellow Directors and the Company's auditor, each Director has taken all the steps that he/she is obliged to take as a Director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of the information.

Adequate Accounting Records

The Directors believe that they have complied with the Companies Act 2014, with regard to accounting records by engaging the services of an Administrator, who employs personnel with appropriate expertise and adequate resources to provide the Company's finance function.

The Company has appointed VanEck Asset Management B.V. (the "Manager") as manager of the Company who has, in turn delegated certain duties to the Investment Manager and the Administrator.

The measures taken by the Directors to secure compliance with the Company's obligations to keep adequate accounting records include the use of appropriate systems and procedures and the employment of competent persons. The accounting records are retained at the office of the Administrator at 78 Sir John Rogerson's Quay, Dublin 2.

Corporate Governance Statement

Introduction and Background

The Directors of VanEck UCITS ETFs plc (the "Company") consider that solid and sustainable corporate governance structures and processes are in place for the Company for the financial year under review.

On 19 November 2014, the Directors voluntarily adopted the Corporate Governance Code for Irish domiciled Collective Investment Schemes and Management Companies (the "Code") as issued by the industry body,

Directors' Report (continued)

Corporate Governance Statement (continued)

Introduction and Background (continued)

Irish Funds, with effect from 8 December 2014, the date of authorisation of the Company. The Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes and is available from the website www.irishfunds.ie. The Board considers that the Company has been in full compliance with the Code during the financial year under review.

Furthermore, the Company is subject to corporate governance rules, regulations and practices imposed by:

- The Constitution of the Company which can be inspected at the registered office of the Company at 33 Sir John Rogerson's Quay, Dublin 2, Ireland, and may be obtained from the Companies Registration Office in Ireland;
- Companies Act 2014, as amended, which is available the website, www.irishstatutebook.ie;
- The Central Bank of Ireland pursuant to Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (which can be inspected at the registered office of the Company) and Standards of Fitness & Probity issued pursuant to section 50 of the Central Bank Reform Act 2010 both of which can be obtained from the website, www.centralbank.ie; and
- Euronext Dublin through its Code of Listing Requirements and Procedures which can be obtained from the website, www.ise.ie.

The Companies are not subject to the European Communities (Takeover Bids (Directive 2004/25/EC)) Regulations 2006.

Board Diversity

The Company is subject to a number of legal and regulatory requirements regarding the make-up of its board of directors (the "Board") including the European Communities (Undertakings for Collective Investment in Transferable Securities (Regulations 2019)), the Central Bank (Supervision and Enforcement) Act 2019 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities (Regulations 2019 (as amended))) and the Companies Act 2014. In addition, the Company has adopted the Irish Fund's Corporate Governance Code for Collective Investment Schemes and Management Companies which includes requirements regarding board composition. As a consequence, the Company is obliged to have at least two directors resident in Ireland, to have at least one independent director and to have a majority of non-executive directors (as defined for the purposes of the Corporate Governance Code). In addition, the Company is obliged to ensure that each of its directors meet all legal and regulatory requirements including being of sufficiently good repute and sufficiently experienced in relation to the type of business carried out by the Company, that all directors meet the Central Bank's fitness and probity requirements and that the Board of the Company has a good balance of skill and expertise so as to enable it to properly and effectively conduct the business of the Company.

These requirements help to ensure a diverse and balanced range of skills as between the Directors on the Board.

The Company is committed to actively promoting inclusive and diverse boards and to ensuring an open and fair recruitment process. The diversity may be achieved by having boards with a blend of skills, educational and professional backgrounds, as well as being comprised of individuals with different characteristics (including age, gender, marital status and ethnicity). As part of the annual performance evaluation of the effectiveness of the boards, the Companies will consider the balance of skills, experience, independence, and knowledge of the sub-funds and the diversity representation of the boards.

The Board has regard to the various requirements set out above when considering any prospective new appointments to the Board.

Directors' Report (continued)

Corporate Governance Statement (continued)

Compliance

The Board considers that the Company has complied with the relevant provisions contained within the Code throughout this accounting period. This Corporate Governance Statement describes how the Code is applied to the Company.

Internal Control and Risk Management Systems

The Directors are responsible for establishing and maintaining adequate internal control and risk management processes of the Company in relation to the financial reporting process. Such processes are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. These include appointing the Administrator to maintain the adequate accounting records of the Company independent of the Investment Manager and the Depositary. The Administrator is authorised and regulated by the Central Bank of Ireland (the "Central Bank") and complies with the rules imposed by the Central Bank.

The Directors have put procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and half-yearly financial statements. The annual financial statements of the Company are required to be approved by the Directors of the Company and filed with the Central Bank and Euronext Dublin. The statutory financial statements are required to be audited by independent auditors who report annually to the Board on their findings. From time to time the Directors also examine and evaluate the Administrator's financial accounting and reporting routines and monitor and evaluate the independent auditor's performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

The Directors receive regular presentations and review reports from the Depositary, the Manager, the Investment Manager and the Administrator. The Directors also have an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditor.

Operation of the Shareholder Meeting, the Key Powers of the Shareholder Meeting, Shareholder Rights and the Exercise of Such Rights

The annual general meeting of the Company is held in Ireland. Notice convening the annual general meeting in each financial year at which the audited financial statements of the Company will be presented (together with the Directors' and Auditor's reports) will be sent to the shareholders at their registered address. The Annual Report and Audited Financial Statements of the Company will be made available to shareholders within four months after the conclusion of each accounting year and at least 21 days before the general meeting of the Company at which they are to be submitted for approval.

The convening and conduct of shareholder meetings are governed by the Articles of Association of the Company and the Companies Act 2014. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors are required to convene an annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter.

Shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Directors to convene a shareholder meeting. Not less than twenty one days notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders and 14 days notice must be given in the case of any other general meeting unless the auditors of the Company and all the shareholders of the Company entitled to attend and vote agree to shorter notice. Two members present either in person or by proxy constitutes a quorum at a general meeting provided that the quorum for a general meeting convened to consider any alteration to the class rights of shares is two shareholders holding or representing by proxy at least one third of the issued shares of the relevant sub-fund or class.

Directors' Report (continued)

Corporate Governance Statement (continued)

Board composition

The Company has no employees. The Board currently consists of seven non-executive Directors. Details about the Directors are available from the Prospectus. The Board considers this a sufficient size to oversee adequately the operations of the Company. Three Directors (Mrs. Mary Canning, Mr. Adrian Waters and Mr. Jon Lukomnik) are independent of the Manager, the Investment Manager and other third party service providers such as the Administrator and Depositary. Two of the independent Directors are Irish resident and thus available to meet the Central Bank at short notice. Mr. Gijsbert Koning is an employee of the Manager, VanEck Asset Management B.V., the other three Directors are employees of the Investment Manager, VanEck Associates Corporation. As demonstrated in the Directors' biographies in the Company's Prospectus, the Board also maintains an appropriate balance of skills, expertise, experience and independence amongst its members. The Directors have a combination of investment knowledge, business and financial skills. The Board considers this a reasonable composition of the Board to ensure a proper governance of the Company. The Directors also have sufficient time to devote to the role of director and associated responsibilities. They disclose in writing on an annual basis to the Board their other time commitments including directorships held outside the Company. The Board is satisfied that the Directors have sufficient time to fully discharge their duties not only for the quarterly Board meetings but also to deal with items at short notice from time to time. The Board informally reviews the overall Board's performance and that of individual Directors annually with a formal documented review taking place every three years.

Responsibilities of the Board

The Board is responsible for the effective and prudent oversight of the Company and is ultimately responsible for ensuring that risk and compliance is properly managed on behalf of the Company. Certain areas of responsibility have been delegated but the key decisions of strategic nature relating to the Company have to be considered by the Board.

Delegation and Service Providers

The Manager of the Company is VanEck Asset Management B.V. (the "Manager"). The Manager is responsible for day-to-day management, administration and distribution of the Company and its sub-funds. The Manager has appointed VanEck Associates Corporation as the Investment Manager of VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Emerging Markets High Yield Bond UCITS ETF and VanEck Global Fallen Angel High Yield Bond UCITS ETF sub-funds (the "Investment Manager"). The Investment Manager operates pursuant to the terms of its respective investment management agreement, guidelines determined by the Manager and as detailed in the Company's Prospectus and the supplements relating to the relevant sub-funds. The Investment Manager has direct responsibility for the decisions relating to the day-to-day operation of the relevant sub-funds and is accountable to the Board of the Manager and the Company for the investment performance of the relevant sub-funds. The Manager has appointed Dasym Managed Accounts B.V. as investment advisor for VanEck Smart Home Active UCITS ETF pursuant to an investment advisory agreement dated 7 October 2021 between the Manager and the Investment Advisor as detailed in the sub-funds supplement.

The Board has established an Audit Committee and delegated certain functions to the audit committee.

Directors and Secretary

The Directors as at 31 December 2022 and throughout the financial year then ended are listed in Directors and Other Information on page 3. Tudor Trust Limited held the office of secretary (the "Secretary").

Directors' and Secretary's Interests in Shares and Contracts

The Directors with the exception of Gijsbert Koning, Secretary and their families had no interests in the shares of the Company at 31 December 2022. No Director (with the exception of Gijsbert Koning) had a material interest in any contract of significance during or at the end of the financial year in relation to the business of the Company.

Directors' Report (continued)

Corporate Governance Statement (continued)

Directors' and Secretary's Interests in Shares and Contracts (continued)

A Director (Gijsbert Koning) has USD598,274 outstanding worth of shares of the Company as at 31 December 2022, and all transactions with that Director during the financial year are on normal commercial terms. An entity (Angkor Holding B.V.) controlled by the Director (Gijsbert Koning) has USD295,727 outstanding worth of shares of the Company as at 31 December 2022, and all transactions with that entity during the financial year are on normal commercial terms. Mr. Gijsbert Koning held 11,479 shares, purchasing 53,934 shares during the financial year and holding 65,413 shares with a value of USD598,274 as at 31 December 2022. Angkor Holding B.V., an entity controlled by Mr. Gijsbert Koning held 10,219 shares at the beginning of the financial year as Director. The entity held 12,504 shares with a value of USD295,727 as at 31 December 2022. All transactions with Angkor Holding B.V. and Mr. Gijsbert Koning during the financial year were on normal commercial terms.

Employees

The governance framework of the Company reflects the fact that, as a collective investment scheme, it has no employees and outsources investment management and administration.

Connected Persons Transactions

Regulation 41 of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the shareholders of the UCITS".

As required under Central Bank UCITS Regulation 78.4, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 41(1) are applied to all transactions with a connected party; and all transactions with connected persons that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 41(1).

Principal Activities: Review of the Business and Future Developments

The Company is a public limited company with variable capital intended to be an umbrella sub-fund with segregated liability between sub-funds established pursuant to the Companies Act 2014.

The investment objective of each sub-fund with the exception of VanEck Smart Home Active UCITS ETF is to seek to provide shareholders with a return linked to a reference index.

The investment objective of VanEck Smart Home Active UCITS ETF is to seek long-term capital appreciation by investing primarily in equity securities of companies which are active in, maintain assets in, or derive revenues from smart homes and intelligent building solutions.

The Manager's Report contains a review of the factors which contributed to the performance for the financial year.

Principal Risks and Uncertainties

The main risks arising from the Company's financial instruments are market price risk, interest rate risk, currency risk and liquidity risk which are outlined in Note 3 to these financial statements.

The Company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the sub-fund's financial performance. Investment in the Company carries with it a degree of risk including, but not limited to, the risks referred to in Note 3 of these financial statements. The Company's business activities, together with the factors likely to affect its future development, performance and position are set out in the Investment Manager's Report. The financial position of the Company as at 31 December 2022 is described in the financial statements on pages 56 to 60.

Directors' Report (continued)

Principal Risks and Uncertainties (continued)

In addition, the Investment Manager's Report sets out the objectives of VanEck Junior Gold Miners UCITS ETF, VanEck Gold Miners UCITS ETF, VanEck Morningstar US Sustainable Wide Moat UCITS ETF, VanEck Morningstar Global Wide Moat UCITS ETF, VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Global Fallen Angel High Yield Bond UCITS ETF, VanEck Emerging Markets High Yield Bond UCITS ETF, VanEck Global Mining UCITS ETF, VanEck Video Gaming and eSports UCITS ETF, VanEck Semiconductor UCITS ETF, VanEck Hydrogen Economy UCITS ETF, VanEck Crypto and Blockchain Innovators UCITS ETF, VanEck Rare Earth and Strategic Metals UCITS ETF, VanEck New China ESG UCITS ETF, VanEck Smart Home Active UCITS ETF, VanEck Space Innovators UCITS ETF, VanEck Sustainable Future of Food UCITS ETF, VanEck Genomics and Healthcare Innovators UCITS ETF, [Sub-fund is not registered for distribution in Switzerland] and [Sub-fund is not registered for distribution in Switzerland] the outlook for the "sub-funds". The Company has considerable assets under management with minimal to moderate levels of tracking error. As a consequence, the Directors believe that the Company is well placed to manage its business successfully.

Climate risk

The Directors acknowledge that climate change is an emerging risk impacting the global economy and will continue to be of interest to all stakeholders with a focus on how climate change is expected to impact industry including societal response and the regulatory environment in the future. However, having considered such factors relating to climate change, the Directors have determined that there are no direct or immediate impacts of climate change on the business operations of the Company. Given this, there is no basis on which to provide extended information of analysis relating to climate change risks on the business operations of the Company. Furthermore, the Directors conclude that at present there is no material impact to the fair value of financial instruments, assets and liabilities of the Company. The Directors recognise that governmental and societal responses to climate change risks are still developing and the future impact cannot be predicted. Therefore, the future fair value of assets and liabilities may fluctuate as the market responds to climate change policies, physical events and changes in societal behaviours.

Significant Events During the Financial Year

Coronavirus disease (COVID-19)

The Board of Directors is aware that global financial markets have been monitoring and reacting to the impact of COVID 19 on the Company.

Russian invasion of Ukraine

Russia's invasion of Ukraine and corresponding events in late February 2022, have caused volatility on regional and global economic markets for securities and commodities. The risk arising to the sub-funds is low considering that only two sub-funds, VanEck J.P. Morgan EM Local Currency Bond UCITS ETF and VanEck Global Mining UCITS ETF had a low level of exposure to Russian Rouble and Russian equities as at 31 December 2022. Management are closely monitoring global financial markets and following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia. The Russian invasion has sparked a chain of events that have increased uncertainty and presents challenges to the outlook for inflation and in particular energy related inflation.

Prospectus, supplements and other events

Effective 16 February 2022 the term "Vectors" and Trademark was removed from the Company name and sub-funds.

A new Prospectus and Supplements were issued on 16 February 2022.

VanEck Morningstar US Wide Moat UCITS ETF changed name to VanEck Morningstar US Sustainable Wide Moat UCITS ETF on 16 February 2022.

Directors' Report (continued)

Significant Events During the Financial Year (continued)

Prospectus, supplements and other events (continued)

Following the introduction of ESG screening in the underlying index, as of 18 March 2022 VanEck Semiconductor UCITS ETF was categorized as a product promoting environmental and social characteristics in accordance with Article 8 of SFDR.

A new supplement for VanEck Space Innovators UCITS ETF and VanEck Sustainable Future of Food UCITS ETF was issued on 8 April 2022.

VanEck Digital Assets Equity UCITS ETF changed name to VanEck Crypto and Blockchain Innovators UCITS ETF on 24 June 2022.

VanEck Space Innovators UCITS ETF was launched on 24 June 2022.

VanEck Sustainable Future of Food UCITS ETF was launched on 24 June 2022.

A supplement for VanEck Genomics and Healthcare Innovators UCITS ETF was issued on 29 July 2022.

VanEck Genomics and Healthcare Innovators UCITS ETF was launched on 2 September 2022.

A supplement for [Sub-fund is not registered for distribution in Switzerland] was issued on 21 September 2022.

A supplement for [Sub-fund is not registered for distribution in Switzerland] was issued on 30 November 2022.

[Sub-fund is not registered for distribution in Switzerland] was launched on 21 October 2022.

[Sub-fund is not registered for distribution in Switzerland] was launched on 2 December 2022.

VanEck Video Gaming and eSports UCITS ETF has been changed from SFDR Article 6 product to SFDR Article 8 product. On 16 December 2022, VanEck replaced the MVIS® Global Video Gaming & eSports Index with the MarketVector™ Global Video Gaming & eSports ESG Index for the sub-fund.

There were no other significant events during the financial year that requires disclosure in the financial statements.

Subsequent Events after the Financial Year End

[Sub-fund is not registered for distribution in Switzerland] launched post year end.

There were no other significant events after the financial year end that requires disclosure in the financial statements.

The Results and Dividends

The results for the financial year are set out in the Statement of Comprehensive Income. The Directors are permitted to declare dividends on any Class of Shares as appears to the Directors to be justified by the profits of the relevant sub-fund. No dividends were declared for the financial years ended 31 December 2022 or 31 December 2021.

Independent Auditors

KPMG Chartered Accountants were appointed as statutory auditor on 28 August 2014 and will continue in office in accordance with section 383(2) of the Companies Act 2014.

Report from the Depositary to the Shareholders

Report of the Depositary to the Shareholders

We have enquired into the conduct of VanEck Asset Management B.V. as the Manager of VanEck UCITS ETFs plc ('the Company') for the financial year ended 31 December 2022, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitution (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and
- (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

Manager's Report

MARKET REPORT

Gold Miners

This market background summary covers VanEck Gold Miners UCITS ETF and VanEck Junior Gold Miners UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Gold Miners UCITS ETF returned -8.92% and VanEck Junior Gold Miners UCITS ETF returned -14.65%.
- For the year, the gold price finished with a loss of just \$5.18. While gold ended nearly unchanged, the year was far from calm, with prices dropping \$450 from highs to lows before returning to its starting point. Gold saw a maximum drawdown of 11.3% but finished with just a 0.3% loss, which was a very respectable result, given the 18.1% loss for the S&P 500 Index and 64.3% loss for bitcoin.
- Gold had been trading in a range centered on \$1,800 for most of 2021. It broke out in February 2022 as warnings surfaced of a possible attack on Ukraine. However, once Russia's bombing of Ukraine began, gold went on to test its all-time highs on 8 March at \$2,070 per ounce. By May, the war premium had faded as it became clear that the fighting was not likely to escalate beyond Ukraine.
- The war provided a temporary positive catalyst; however, the dominant driver through most of the year was increasing pressure on gold prices from U.S. Federal Reserve ("Fed") policies and the U.S. Dollar. The market underestimated the resolve of the Fed to fight inflation. In early January 2022, interest rate futures were pricing a 0.77% increase in Fed Funds rates by the end of the year.
- By April 2022, markets were pricing in at least 1.5% in further rate increases. However, Fed Chairman Jerome Powell continued to talk a tough stance on inflation, and the Fed actually increased interest rates by 4.25%, in one of the sharpest raises in history. The war, the rise in rates, and the relative strength of the U.S. economy contributed to the relentless strength in the U.S. Dollar, which made new 20-year highs continue from May to September.

Morningstar US Sustainable Wide Moat

This market background summary covers VanEck Morningstar US Sustainable Wide Moat UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Morningstar US Sustainable Wide Moat UCITS ETF returned -18.80%.
- VanEck Morningstar US Sustainable Wide Moat UCITS ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar US Sustainable Moat Focus Index TM (MSUSSMNU). The index targets U.S. companies with sustainable competitive advantages, i.e., "moats," and attractive valuations in the view of Morningstar's team of more than 100 equity analysts, subject to ESG screening based on Sustainalytics data.
- According to the forward-looking process of Morningstar's Equity Research group, companies with moats have the potential to create above-average returns for longer periods of time. The index's approach to investing in U.S. companies with wide economic moats when they are attractively priced has resulted in long-term outperformance versus the broad U.S. equity market.
- In 2022 Moat Index saw increased exposure to financials as a result of interest rates hikes expectations. Technology sector, that was decreased in weight during Q2 and Q3 of the year, gained share in Q4 after many stocks falling into undervalued category.

Morningstar Global Wide Moat

This market background summary covers VanEck Morningstar Global Wide Moat UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Morningstar Global Wide Moat UCITS ETF returned -11.40%.

Manager's Report (continued)

MARKET REPORT (continued)

Morningstar Global Wide Moat (continued)

- VanEck Morningstar Global Wide Moat UCITS ETF provides exposure to global firms with Morningstar Economic Moat Ratings that are trading at the lowest current market price/fair value ratios.

Emerging Markets Government Debt

This market background summary covers VanEck J.P. Morgan EM Local Currency Bond UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck J.P. Morgan EM Local Currency Bond UCITS ETF returned -10.32%.
- Within emerging markets debt, local currency bonds have historically provided the greatest diversification benefit compared to U.S. dollar-denominated emerging markets sovereign or corporate bonds, as measured by the segment's relatively low correlation to other asset classes.
- Continued inflationary pressures may benefit commodity sensitive currencies – the currencies of Uruguay, Brazil, and Peru have significantly appreciated this year. Reopening of China might add further boost to commodity sensitive currencies, while high-yielding currencies tend to a Fed re-pricing and may appreciate as well.
- Local currency bonds (based on EMLC's index) now provide a yield of around 7%, a significant pick-up over a generic 7-year German bond.
- Many emerging markets ("EM") central banks were well ahead of the Fed in hiking rates over the past two years and maintain a hawkish bias to keep inflation in check, while also providing room to ease if needed (as is the case in China). The result has been both higher yields and positive real rates, which provides support to local currencies. Longer term, EMFX remains at depressed valuations on a historical basis.

Emerging Markets Corporate Debt

This market background summary covers VanEck Emerging Markets High Yield Bond UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Emerging Markets High Yield Bond UCITS ETF returned -12.36%.
- EM high yield corporates provide an overall average yield of 10.82% vs 8.97% for the US high yield bonds
- While providing higher yields, EM universe contains a greater portion of bonds rated BB, and fewer rated CCC and below, versus high yield U.S. and Developed Market corporate bonds
- From a fundamental standpoint, EM issuers currently exhibit more favorable debt metrics versus US high yield issuers including interest coverage and leverage; as a result, investors are getting paid more by issuers with less leverage
- EM high yield corporate bonds may benefit from elevated global inflation, with high exposure to sectors such as Energy (21%) and Basic Materials (11%). Currency depreciation in some emerging markets may benefit exporters in those countries; approximately 70% of HYEM's portfolio is exposed to issuers based in countries with depreciating currencies this year, and 40% of them are large exporting economies or exports-dependent.

Fallen Angels

This market background summary covers VanEck Global Fallen Angel High Yield Bond UCITS ETF.

Manager's Report (continued)

MARKET REPORT (continued)

Fallen Angels (continued)

- For the period from 1 January 2022 to 31 December 2022, VanEck Global Fallen Angel High Yield Bond UCITS ETF returned -12.96%.
- Fallen angel bonds are part of the overall high yield universe but unique in that they were originally issued with investment grade ratings and later downgraded to non-investment grade, or high yield. This results in differentiating characteristics versus the broader high yield bond market—such as, a higher average credit quality—and the crossover from investment grade to high yield markets is where the value proposition of fallen angels originates.
- Yield to Worst of the ETF as of 31 December 2022 was 7.62%, significantly higher than 3.43% at the beginning of the year. Most of the increase in yield has been driven by rising interest rates.
- The Option-Adjusted Spreads widened significantly, reflecting market sentiment on worsening economic conditions and inflationary pressures. Despite that, the Global Fallen Angel universe size shrunk by ~17% since the beginning of the year.

Global Mining

This market background summary covers VanEck Global Mining UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Global Mining UCITS ETF returned 1.95%.
- Many secular trends have driven increased demand for green metals such as copper, lithium, and rare earth elements in recent years, and that demand is only expected to increase moving forward. Technological advancements—including those technologies and applications needed for the transition from fossil fuels to a low carbon economy—are expected to continue to fuel the next wave of demand.
- The conflict in Ukraine has added a level of urgency to the energy transition and also raised other national security concerns, all of which can be tied back to these metals. Many rare earth elements for example are used in radar technology, jet engines, and missile defense systems, and many governments have signaled increases to defense spending.
- Large, diversified metals and mining companies are heavily involved in the extraction and processing of green metals but, their revenues and expenses are often far more influenced by industrial metals such as aluminum and iron ore.
- Reopening of China, one of the largest consumers of commodities, as well as push for the renewables in the Inflation Reduction Act in the US are expected to boost the demand even further.

Esports and Video Gaming

This market background summary covers VanEck Video Gaming and eSports UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Video Gaming and eSports UCITS ETF returned -34.09%.
- Mobile gaming continues to dominate industry revenues and provide the most growth by segment (compared to PC and console). This is further boosted by increasing internet connectivity, the development of high bandwidth network such as 5G and rising adoption of smartphones worldwide.
- A revolution of the revenue model is under way with “game as a service” replacing “game as a product”. Revenues generated under this model are known as recurrent consumer spending and substitute a single revenue-generating fee. Consumers don't carry out anymore a single initial purchase to buy the product but instead engage in more frequent spending over time. The game as a

Manager's Report (continued)

MARKET REPORT (continued)

Esports and Video Gaming (continued)

service trend is being accompanied by the in game spending phenomenon that sees players carrying out regular purchases within the gaming environment. Popular games, who turned out to be great successes, adopted this business model.

- The Play to Earn trend (P2E) is on the rise with gamers who have the chance to earn cash, prizes and digital assets by playing and participating in various games. It is an entirely new gaming business model where economic benefits flow not only in the direction of publishers but also gamers.
- Within the P2E trend crypto games are emerging. Just like traditional gaming, also crypto gaming is filled with a variety of games and is based on the concept of integrating gaming and crypto in the same environment. These games are built on the blockchain and players can earn crypto by playing and completing tasks.
- We currently see a slow-down in sales activity. The decreased consumer spending comes amid inflationary pressures and rising living costs, given the discretionary nature of videogames. However, the sector has indeed exhibited some resiliency, as the numbers of some late popular game launches show.
- On December 16th 2022, VanEck replaced the MVIS® Global Video Gaming & eSports Index with the MarketVector™ Global Video Gaming & eSports ESG Index. With the new index, the VanEck Video Gaming and eSports UCITS ETF integrates ESG characteristics into its investment process.

Semiconductor

This market background summary covers VanEck Semiconductor UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Semiconductor UCITS ETF returned -34.77%.
- Despite lockdowns in China and related supply shortages, the broad Semiconductor market was hit amid worsening economic conditions. The valuations of semiconductor companies have compressed against the broad stock market. The premium needed to access the sector is significantly lower.
- Chip supply became a major national security topic in 2022 with multiple countries announcing measures to woo chip manufacturing facilities.
- Following the introduction of ESG screening in the underlying index, as of 18 March 2022 the sub-fund was categorized as a product promoting environmental and social characteristics in accordance with Article 8 of SFDR.

Hydrogen

This market background summary covers VanEck Hydrogen Economy UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Hydrogen Economy UCITS ETF returned -38.77%.
- Hydrogen is the simplest energy dense element that if burned for fuel only, produces water as its byproduct. A fuel cell combines hydrogen and oxygen to produce energy. The challenge has been in producing hydrogen fuel cells at a scale. Falling costs of production along with government and corporate interest alike is supportive of this nascent technology.
- Hydrogen Stocks have fallen significantly in price, along with the wider tech market in the first half year.

Manager's Report (continued)

MARKET REPORT (continued)

Hydrogen (continued)

- The climate change crisis and Russia's invasion of Ukraine were factors pushing green hydrogen to the mainstream.
- In 2022 EU announced targets for local renewable hydrogen production, and the also the US Inflation Reduction Act offers a 10-year production tax credit for "clean hydrogen" production facilities.

Digital Assets

This market background summary covers VanEck Crypto and Blockchain Innovators UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Crypto and Blockchain Innovators UCITS ETF returned -85.85%.
- Digital transformation companies engage in a wide variety of business lines within the broader ecosystem such as: payment gateways, hardware, crypto miners, exchanges, crypto holding and trading, software and value added services, banking and asset management.
- Despite the recent negative performances of crypto assets, digital assets usage and implementation – including cryptocurrencies and decentralized applications – are projected to grow as global adoption continues according to our studies. Especially Bitcoin adoption keeps being on the rise with an increasing number of active addresses and some countries declaring it as legal tender, which can contribute to further boost the crypto ecosystem development.
- Over 2022, digital assets prices suffered thus affecting negatively digital assets equities whose performance is strongly correlated. VanEck Crypto and Blockchain Innovators ETF is a pure-play product investing in companies truly involved in the blockchain ecosystem. Digital assets equities can be viewed as a leveraged bet on digital assets, outperforming them during bull markets but underperforming them over market downturns. Over 2022, besides negative crypto prices dynamics, there were also other headwinds affecting public companies in the digital assets space, from rising interest rates to extended valuations at the peak.

Rare Earth

This market background summary covers VanEck Rare Earth and Strategic Metals UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Rare Earth and Strategic Metals UCITS ETF returned -30.56%.
- Rare earths access and availability continues to be a hot topic worldwide: in fact, these 17 metal elements keep being necessary for technological developments and key advancements across various sectors. From computers and batteries to defense systems and monitors they are of vital importance. Over the year the worsening tensions between the US, China and Russia, as well as talks of a deglobalisation process being well under way, have further contributed to bring under the spotlight rare earths.
- China keeps producing almost the entire annual amount of extracted rare earths, with the sector assuming almost the characteristics of a monopoly. On the fear of deteriorating relationships with China, the US department of defense carried out consistent investments to strengthen their position. It is recent the news of an important deal with the listed Australian company Lynas Rare Earths to build one of the first US rare earths facilities. Western nations are in fact striving to achieve a higher degree of independency with this respect.
- Europe has also come recently under the spotlight after the largest rare earths site of the old continent was discovered in Sweden. Although some years will have to go by before it is fully operative, the potential to satisfy a good part of Europe's demand is there.

Manager's Report (continued)

MARKET REPORT (continued)

Rare Earth (continued)

- VanEck Rare Earth and Strategic Metals ETF achieved over the mentioned period a negative performance. Elements that played a role, thus contributing to the negative result, have been the initially high multiples of rare earths stocks as well as an investment style more oriented at growth firms.
- Despite the recent negative performance of rare earths extraction companies, we remain positive on the outlook for these strategic elements. In particular, we believe that they will play a vital role in the green transition whose pace has been accelerating over the last months because of multiple factors. Rare earths are in fact relevant for electric vehicles and wind turbines, just to mention a couple, and thus will be relevant in the decarbonisation process that is taking place worldwide. Moreover, their future supply is forecasted to lag the expected demand, which could support positively their price dynamics.

China New

This market background summary covers VanEck New China ESG UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck New China ESG UCITS ETF returned -27.90%.
- China keeps being on the way of a structural change that sees consumer-oriented sectors replacing heavy industries. Factors contributing to this shift are a growing middle class, further technological developments, an aging population and a particularly high number of millennials in the country.
- The transition towards a new economic model keeps being under way: the sectors shaping the Chinese economy include healthcare, consumer staples and discretionary as well as technology.
- VanEck New China ESG UCITS ETF achieved a negative performance over the year. The growing geopolitical tensions with the western world as well as the impact of strict Covid lockdowns that were imposed in the country weighted on Chinese equities. The former were worsened by the outbreak of the war in eastern Europe as well as talks and signals of a Chinese invasion of Taiwan. The latter caused significant economic damages with growth slowing significantly down.
- However, at the very end of 2022 the Chinese government signaled intentions to abruptly end the strict Covid-19 rules. After the last years being dominated by draconian lock-down measures and very low consumer confidence levels, this decision could provide a strong boost to the economy.
- Moreover, China likely remains one of the few major economies that will keep adopting a loose monetary policy and will keep stimulating the economy. Financial conditions in the country remain easy, as the other central banks of the world instead play catch-up with the Federal Reserve.

Smart Home

This market background summary covers VanEck Smart Home Active UCITS ETF.

- For the period from 1 January 2022 to 31 December 2022, VanEck Smart Home Active UCITS ETF returned -42.29%.
- In a February 2022 report, McKinsey estimated that up to \$265 billion worth of medical services (representing up to 25% of the total cost of care) could shift from traditional facilities to the home by 2025 without a reduction in quality or access.
- Faced with higher costs of living crisis, households can employ smart home solutions to become more resilient and cut costs. The example of energy shows how households adopted smart home solutions such as solar panels, energy management systems, and heat pumps, to lower their cost of

Manager's Report (continued)

MARKET REPORT (continued)

Smart Home (continued)

living. More saving opportunities are emerging in other areas of our daily lives as the gap between in-home and out-of-home experiences becomes easier to bridge.

- The Matter protocol is improving compatibility between smart home devices and ecosystems, making it easier and more attractive for households to adopt smart home devices (see also our blog on Matter). Following its official release in October 2022, the number of supported products will only increase. Many big name manufacturers (including the large smart home providers such as Samsung, Amazon and Apple) confirmed their support and announced Matter-supported products.

Space

This market background summary covers VanEck Space Innovators UCITS ETF.

- For the period from 24 June 2022 to 31 December 2022, VanEck Space Innovators UCITS ETF returned 6.40%.
- A technology shift is simplifying access to space, shrinking the cost of reaching the stars. VanEck's Space ETF tracks the progress of the innovative companies developing tomorrow's equipment, disrupting established operators, shaping the commercial space age.

Future of Food

This market background summary covers VanEck Sustainable Future of Food UCITS ETF.

- For the period from 24 June 2022 to 31 December 2022, VanEck Sustainable Future of Food UCITS ETF returned -3.92%.
- The agri-food industry's level of impact on the environment is dwarfed by other measures, such as the use of fresh water, deforestation levels and biodiversity. With environmental limits already straining the traditional agriculture supply chain, feeding an ever-growing population presents a unique challenge. Going forward, we expect increasing demand for cleaner, healthier, and more environmentally sustainable foods will continue to create growth opportunities.
- The global food crisis that is inundating countries around the world is becoming more glaring, possibly catastrophic and likely longer lasting. The fact that this is an indiscriminate phenomenon is written largely in the recent U.S. inflation figures. The U.S. headline Consumer Price Index (CPI) declined by the end of the year after reaching four-decade-high year-over-year rates in June, but still remained on a relatively high level, partly driven by sharp increases in food and grocery prices, which were up 11.8% (food at home, the highest increase since 1979). While Russia's invasion of Ukraine has greatly conflated the current situation, food prices worldwide have been moving up for a number of years. The United Nations Food and Agriculture Organization (U.N. FAO) Food Price Index increased by 41% from January 2016 to December 2022, surpassing previous highs last seen in 2011. The pressure reached its peak in March 2022 and declined since then, but still remained on a relatively high level. One of the greatest concerns and one that likely has much more significant global consequences is the constrained supply and cost of fertilizers.

Genomics and Healthcare Innovators

This market background summary covers VanEck Genomics and Healthcare Innovators UCITS ETF.

- For the period from 2 September 2022 to 31 December 2022, VanEck Genomics and Healthcare Innovators UCITS ETF returned 4.05%.
- VanEck's Genomics ETF invests in the innovative companies harnessing scientific advances to develop breakthrough treatments and give patients more control over how they access care.

Manager's Report (continued)

MARKET REPORT (continued)

Genomics and Healthcare Innovators (continued)

- The healthcare market in America alone, consumes 18% of GDP, equivalent to \$3.6trn a year. In other wealthy countries, the share is lower, around 10%, but it is increasing as populations age. Just as science is developing new gene therapies, so too the pandemic has made people comfortable with digitally-mediated care.

Circular Economy

This market background summary covers [Sub-fund is not registered for distribution in Switzerland].

- For the period from 21 October 2022 to 31 December 2022, [Sub-fund is not registered for distribution in Switzerland] returned 9.03%.
- The [Sub-fund is not registered for distribution in Switzerland] invests in companies involved in a new economic model that is expanding rapidly. Circular economy is a model of production and consumption which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products in order to extend their lifecycle as long as possible. These companies are at the forefront of the recycling and reuse-related solutions, opposed to the traditional take-make-waste economy.
- This new economic model not only entails environmental benefits but also tangible economic advantages. As an example, it is estimated that recycled aluminium and copper require 95% and 85% less energy respectively, compared to primary material production.
- As the world gradually transitions towards a carbon-free economy, waste management, recycling and reuse solutions are set to be on the rise. We expect the companies actively involved in this thematic to benefit from this development.

Bionic Engineering

This market background summary covers [Sub-fund is not registered for distribution in Switzerland]

- For the period from 2 December 2022 to 31 December 2022, [Sub-fund is not registered for distribution in Switzerland] returned -2.00%.
- As the global population ages, so does the demand for biologically-inspired systems that improve the quality of later life. [Sub-fund is not registered for distribution in Switzerland] tracks the performance of the portfolio of innovative companies delivering medical, dental or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue.

The sub-fund returns are based on the calculated ending net asset value ("NAV") for the financial period under review.

The sub-fund returns are net of management fees.

Until 17th December 2021, the performance of VanEck Morningstar US Sustainable Wide Moat UCITS ETF was achieved with a different investment policy.

Important information on performance

The performance data quoted represents past performance. All sub-fund and Index performances are calculated in USD.

Past performance is not a guarantee of future results. Performance information for the sub-fund is net of expenses and/or fees. These returns do not reflect the deduction of taxes that a shareholder would pay on the sale of sub-fund shares.

Investment return and value of the shares of the sub-fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted.

Manager's Report (continued)

MARKET REPORT (continued)

Important information on performance (continued)

The "Net Asset Value" (NAV) of a VanEck UCITS ETFs Plc sub-fund is determined at the close of each business day, and represents the dollar value of one share of the sub-fund; it is calculated by taking the total assets of the sub-fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with sub-fund returns. Investors cannot invest directly in the Index. Returns for actual sub-fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Tracking Error

The realised tracking error is the annualised standard deviation of the difference in daily returns between a sub-fund and its index. Tracking error shows the consistency of the returns relative to the index over the defined period of time.

Anticipated tracking error is based on the annualised standard deviation of the difference in daily returns between a sub-fund and its index under normal market conditions.

Cash management, efficient portfolio management techniques including securities lending, transaction costs from rebalancing and currency hedging can have an impact on tracking error as well as the return differential between the cash component of the sub-fund. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

In addition to the above, the sub-funds may also have a tracking error due to withholding tax charged to the sub-funds on any income received from its investments. The level of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed by the sub-funds with various tax authorities, any benefits obtained by the sub-funds under a tax treaty or any securities lending activities carried out by the sub-funds.

VanEck UCITS ETFs plc

*Until 17 December 2021, the performance of VanEck Morningstar US Sustainable Wide Moat UCITS ETF was achieved with a different investment policy.

**The realised tracking error was driven by sub-fund's pricing NAV versus the benchmark Index.

***Until 16 December 2022, the performance of VanEck Video Gaming and eSports UCITS ETF was achieved with a different investment policy.

****The realised tracking error was driven by Corporate Action on the sub-fund.

*****The realised tracking error was driven by sub-fund's pricing CNH in the NAV versus CNY in the benchmark Index.

*****VanEck Space Innovators UCITS ETF's inception date is 24 June 2022. VanEck Sustainable Future of Food UCITS ETF's inception date is 24 June 2022. VanEck Genomics and Healthcare Innovators UCITS ETF's inception date is 2 September 2022. [Sub-fund is not registered for distribution in Switzerland] inception date is 21 October 2022. [Sub-fund is not registered for distribution in Switzerland] inception date is 2 December 2022. Funds' performance and indices' performance do not cover the entire reported period.

Performance Comparison

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with sub-fund returns. Investors cannot invest directly in the Index. Returns for actual sub-fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

VanEck UCITS ETFs plc

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc

Report on the audit of the financial statements

Opinion

We have audited the financial statements of VanEck UCITS ETFs PLC ('the Company') for the year ended December 31, 2022 set out on pages 56 - 218, which comprise the Statement of Financial Position, the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, the Statement of Cash Flows, Portfolio Listings and related notes, including the summary of significant accounting policies set out in Note 2.

The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union.

Opinion under International Standards on Auditing (Ireland) ('ISAs (Ireland)')

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at December 31, 2022 and of its decrease in net assets attributable to holders to redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Opinion under generally accepted auditing standards in the United States of America ('U.S. GAAS')

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2022 and the results of its operations and its cash flows for the year then ended in accordance with US GAAP and applicable law.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law and in accordance with US GAAS. Our responsibilities under those standards are further described in the Auditor's responsibilities section of our report. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were appointed as auditor by the directors on 28 August 2014. The period of total uninterrupted engagement is the 8 years ended 31 December 2022. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with, ethical requirements applicable in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), together with the American Institute of Certified Public Accountants (AICPA) Code of Professional Conduct, as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included our knowledge of the Company and the asset management industry to identify the inherent risks to the Company's business model and analysis of how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the Company's available financial resources over this period was the availability of capital to meet operating costs and other financial commitments (liquidity risk) and the valuation of investments at fair value as a result of market performance. In the director's assessment it was noted that the Company held, and continues to hold, a large number of shares through different sub-funds, and the composition of the sub-fund's portfolio reduces the going concern risk resulting from market performance of the investments. The director's assessment is consistent with our understanding of the Company.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the directors as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of directors regarding their assessment of the risk that the financial statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board minutes.
- Performing planning analytical procedures to identify any usual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items, including assessing the financial statement disclosures and agreeing them to supporting documentation when necessary.

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: certain aspects of company legislation recognising the financial and regulated nature of the Company's activities and its legal form.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls. We did not identify any additional fraud risks.

In response to the fraud risks, we also performed procedures including:

- Identifying journal entries and other adjustments to test for all full scope components based on risk criteria and comparing the identified entries to supporting documentation.
- Evaluating the business purpose of significant unusual transactions.
- Assessing significant accounting estimates for bias.
- Assessing the disclosures in the financial statements.

As the Company is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the Company operates and gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

VanEck UCITS ETFs plc

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

In arriving at our audit opinion above, the key audit matters, in decreasing order of audit significance, were as follows (unchanged from 2021):

Accuracy and ownership of financial assets at fair value through profit and loss (level 1) USD3,346,892,347 (31 December 2021: USD3,984,815,915)

Refer to Note 2 (Significant Accounting Policies) and Note 3 (Financial Risk Management)

The key audit matter

Accuracy and ownership of level 1 financial assets at fair value through profit and loss of the Company is considered a key audit matter. Level 1 financial assets at fair value through profit and loss comprise 94% of the total assets (by value of the Company) and is considered to be one of the key drivers of the Company's capital and revenue performance and required significant audit attention in performing the audit.

We do not consider the accuracy of level 1 financial assets to be a significant risk of material misstatement because they comprise liquid, quoted investments. Due to the materiality of financial assets at fair value through profit and loss (Level 1) in the context of the financial statements as a whole and as the main asset owned by the company, it was therefore one of the focus areas of the audit and a key audit matter.

How the matter was addressed in our audit

Our audit procedures over the accuracy of inputs used in the valuation of level 1 investments and ownership of the Company's investment portfolio included, but were not limited to:

Using professional judgement we independently determine the fair value hierarchy of the instruments and compared our results to management's level for each instrument in accordance with the fair value hierarchy set out in IFRS as adopted by the EU;

With the assistance of our valuation specialists, we agreed the accuracy of the prices of 100% of the level 1 investments in the portfolio to externally quoted prices; and

We assessed the accuracy and ownership of level 1 financial assets at year end by obtaining an independent third party confirmation directly from the Depositary and agreeing it to the portfolio held at year end.

Based on the audit procedures performed, we found that that the accuracy and ownership of the Level 1 financial assets at fair value through profit and loss was not materially misstated.

VanEck UCITS ETFs plc

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

Valuation and ownership of level 2 financial assets at fair value through profit and loss (level 2) USD171,133,396 (31 December 2021: USD139,798,231)

Refer to Note 2 (Significant Accounting Policies) and Note 3 (Financial Risk Management)

The key audit matter

Valuation and ownership of level 2 financial assets at fair value through profit and loss of the Company is considered a key audit matter. Level 2 financial assets at fair value through profit and loss comprise 5% of the total assets (by value of the Company) and is considered to be one of the drivers of the Company's capital and revenue performance and required significant audit attention in performing the audit.

We do not consider the valuation of level 2 financial investments to be a significant risk of material misstatement because they comprise liquid, quoted investments. Due to the materiality of financial assets at fair value through profit and loss (Level 2) in the context of the financial statements as a whole and as the main asset owned by the company, it was therefore one of the focus areas of the audit and a key audit matter.

How the matter was addressed in our audit

Our procedures over the valuation and ownership of the Company's investment portfolio included, but were not limited to:

Using professional judgement we independently determine the fair value hierarchy of the instruments and compared our results to management's level for each instrument in accordance with the fair value hierarchy set out in IFRS as adopted by the EU;

With the assistance of our valuation specialists, we agreed the valuation of 100% of the level 2 investments in the portfolio to externally quoted prices; and

We assessed the existence and ownership of level 2 financial assets at year end by obtaining an independent third party confirmation directly from the Depositary and agreeing it to the portfolio held at year end.

Based on the audit procedures performed, we found that the valuation and ownership of the Level 2 assets at fair value through profit and loss was not materially misstated.

Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at \$30m (2021: \$41.43m), determined with reference to a benchmark of the Company's total asset value (of which it represents 1% (2021: 1%).

Performance materiality for the financial statements as a whole was set at \$22.5m (2021: \$31.1m), determined with reference to a benchmark of the Company's total asset value (of which it represents 0.75% (2021: 0.75%).

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. In applying our judgement in determining performance materiality, we considered a number of factors including; the low number and value of misstatements detected and the low number and severity of deficiencies in control activities identified in the prior year financial statement audit.

We consider the Company's total asset value to be the most appropriate benchmark as is it one of the principal considerations for shareholders of the Company in assessing financial performance of the Company.

We reported to the Audit Committee any corrected or uncorrected identified misstatements exceeding 5 basis points of the Company's total asset value, in addition to other identified misstatements that warranted reporting on qualitative grounds.

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

In planning the audit, we applied materiality and performance materiality to assist us in determining audit scoping and risk assessment.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin.

Other Information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the Directors' report, Report from the Depositary to the Shareholders, Manager's Report, Statement of Portfolio Changes (Unaudited), Appendix 1: Other Information (Unaudited), Appendix 2: UCITS V (Unaudited) and Sustainable Finance Disclosures Regulation and Taxonomy Regulation (unaudited). The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;
- in our opinion, the information given in the directors' report is consistent with the financial statements;
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

Corporate governance statement

In addition, we report, in relation to information given in the Corporate Governance Statement on pages 6 to 10, that:

- based on knowledge and understanding of the Company and its environment obtained in the course of our audit, no material misstatements in the information identified above have come to our attention; and
- based on the work undertaken in the course of our audit, in our opinion:
 - the description of the main features of the internal control and risk management systems in relation to the process for preparing the financial statements is consistent with the financial statements and has been prepared in accordance with the Companies Act 2014;
 - the Company is not subject to the European Communities (Takeover Bids (Directive 2004/25/EC)) Regulations 2006 and therefore not required to include information relating to voting rights and other matters required by those Regulations and specified by the Companies Act 2014 for our consideration in the Corporate Governance Statement;
 - the Corporate Governance Statement contains the information required by the Companies Act 2014; and
 - the Corporate Governance Statement contains the information required by the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017.

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

Our opinion on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion, the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

We have nothing to report on other matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on pages 5 and 6, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Director's responsibilities for the financial statements in accordance with US GAAS

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework, including the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued; to disclose, as applicable, matters related to going concern; and to use the going concern basis of accounting unless the directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at:
<https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

Auditor's responsibilities in accordance with US GAAS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgement, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements. We are responsible for the direction, supervision, and performance of the group audit of the Company. We remain solely responsible for our audit opinion.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

VanEck UCITS ETFs plc

Independent Auditor's Report to the Shareholders of VanEck UCITS ETFs plc (continued)

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

1. Organisation

VanEck UCITS ETFs plc, formerly VanEck Vectors™ UCITS ETFs plc, (the “Company”) with a registered number of 548554 was incorporated on 26 August 2014 under the laws of Ireland. The Company is a public limited company with variable capital and is structured as an umbrella sub-fund with segregated liability between sub-funds established pursuant to the Companies Act 2014. The sole objective for which the Company is established is the collective investment in transferable securities and/or other liquid financial assets as pursuant to the UCITS Regulations and Central Bank UCITS Regulations. The Company was authorised by the Central Bank of Ireland on 8 December 2014 with its registered office at 33 Sir John Rogerson’s Quay, Dublin 2, Ireland.

The Board of Directors agreed to remove the term “Vectors” and Trademark from the Company and sub-fund names effective from 16 February 2022.

As at 31 December 2022, the Company consisted of twenty active sub-funds, collectively the “sub-funds”, and individually the “sub-fund”. As at 31 December 2022, each sub-fund had one share class in issue – USD A Share class (31 December 2021: one share class in issue – USD A Share class).

VanEck Junior Gold Miners UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the MVIS Global Junior Gold Miners Index (the “Index”).

VanEck Gold Miners UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the NYSE Arca Gold Miners Index (the “Index”).

VanEck Morningstar US Sustainable Wide Moat UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the Morningstar® US Sustainability Moat Focus Index (the “Index”). The Index changed on 17 December 2021 from Morningstar US Wide Moat UCITS ETF Index.

VanEck Morningstar Global Wide Moat UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the Morningstar® Wide Moat Focus IndexSM (the “Index”).

VanEck J.P. Morgan EM Local Currency Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the J.P. Morgan GBI–EM Global Core Index (the “Index”).

VanEck Global Fallen Angel High Yield Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the ICE Global Fallen Angel High Yield 10% Constrained Index (the “Index”).

VanEck Emerging Markets High Yield Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the ICE Diversified High Yield US Emerging Markets Corporate Plus Index (the “Index”).

VanEck Global Mining UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the EMIX Global Mining Constrained Weights Index (the “Index”).

VanEck Video Gaming and eSports UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate as closely as possible, before fees and expenses, the price and yield performance of the MarketVector Global Video Gaming and eSports ESG Index (the “Index”).

VanEck Semiconductor UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS® US Listed Semiconductor 10% Capped Index (the “Index”).

Notes to the Financial Statements (continued)

1. Organisation (continued)

VanEck Hydrogen Economy UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS® Global Hydrogen Economy Index (the "Index").

VanEck Crypto and Blockchain Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS CryptoCompare Digital Assets Index (the "Index").

VanEck Rare Earth and Strategic Metals UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS Global Rare Earth/Strategic Metals Index (the "Index").

VanEck New China ESG UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MarketGrader New China ESG Index (the "Index").

VanEck Smart Home Active UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to seek long-term capital appreciation by investing primarily in equity securities of companies which are active in, maintain assets in, or derive revenues from smart homes and intelligent building solutions.

VanEck Space Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the yield performance of MVIS Global Space Industry ESG Index, before fees and expenses, of an index that provides exposure to the performance of companies involved in the global space exploration, equipment and communications industries.

VanEck Sustainable Future of Food UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the yield performance of MVIS Global Future of Food ESG Index, before fees and expenses, of an index that supports sustainable food production and development and provides exposure to the performance of companies involved in food and agricultural technology, organic foods, or food companies that display high standards in food waste, food safety or environmental impact.

VanEck Genomics and Healthcare Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of an index that provides exposure to the performance of a representative portfolio of companies involved in the genomic healthcare and electronic healthcare industries. For a further description of the Index see the section entitled Information on the Index below.

[Sub-fund is not registered for distribution in Switzerland] (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of an index that provides exposure to companies involved in the “Circular Economy”, which is commonly viewed as including companies involved in the following sectors: water purification and treatment products or services, waste-to-energy and biofuels, general waste management services that include recycling services and metal recycling services, as well as companies deriving revenues from products that are made of - or services related to - recycled, repurposed, or reused materials.

[Sub-fund is not registered for distribution in Switzerland] (the “sub-fund”)

The sub-fund’s investment objective is to replicate the price and the performance, before fees and expenses, of an index that provides exposure to companies involved in the bionic implants industry including medical, dental, or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue.

Notes to the Financial Statements (continued)

1. Organisation (continued)

As at 31 December 2022, the sub-funds of the Company are listed on Euronext Dublin, London Stock Exchange, Borsa Italiana, XETRA and Six Swiss Exchange.

2. Significant Accounting Policies

a) Basis of Preparation

The Company's annual financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), the UCITS Regulations, the Companies Act 2014 and the Central Bank UCITS Regulations.

The financial statements have been prepared on a going concern basis which assumes that the Company will continue in operational existence for the foreseeable future. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

Critical accounting estimates and assumptions

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The Board of Directors make estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. There are no estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.

International Financial Reporting Standards

New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2022

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2022.

The following new and amended standards and interpretations are not expected to have a significant impact on the Company's financial statements:

- COVID-19 Related Rent Concessions (Amendment to IFRS 16).
- Onerous Contracts - Cost of Fulfilling a Contract (Amendments to IAS 37).
- Property, Plant and Equipment; Proceeds before Intended Use (Amendments to IAS 16).
- Reference to the Conceptual Framework (Amendments to IFRS 3).
- IFRS 17 Insurance Contracts. - Classification of Liabilities as Current or Non-Current (Amendments to IAS 1).

New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2022, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Company.

The following new and amended standards and interpretations are not expected to have a significant impact on the Company's financial statements:

- Annual Improvements to IFRS Standards 2018-2020.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

a) Basis of Preparation (continued)

International Financial Reporting Standards (continued)

- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- Classification of Liabilities as Current or Non-current (Amendments to IAS 1).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).

b) Financial assets and liabilities at fair value through profit or loss

The fair value of financial instruments is based on their quoted market prices, in an active market, at the financial year end date without any deduction for estimated future selling costs. Financial assets and liabilities are priced at current mid prices or quoted market prices at the close of trading on the reported date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on current quoted market prices at the close of trading on the reporting date.

If a quoted market price in an active market is not available on a recognised stock exchange or from a broker/dealer for non-exchange traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the financial year end date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the financial year end date.

i) Classification and recognition

IFRS 9 sets out the requirements for recognition and measurement of all financial assets and financial liabilities including derivative instruments.

Financial assets at fair value through profit or loss.

The Company primarily invests in equities and bonds as at the financial year end based on the business model of the Company.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the VanEck UCITS ETF considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the VanEck UCITS ETFs management; the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity. Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the VanEck UCITS ETF's continuing recognition of the assets.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

b) Financial assets and liabilities at fair value through profit or loss (continued)

i) Classification and recognition (continued)

The VanEck UCITS ETF has determined that it has two business models.

- Held-to-collect business model: this includes cash and cash equivalents, receivable for investment sold, Receivable from holders of redeemable participating shares and other assets. These financial assets are held to collect contractual cash flow.
- Other business model: this includes Derivative financial instruments, debt securities, investment funds and equity investments. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Financial assets that are not at fair value through profit or loss include cash and cash equivalents which are generally short term in nature. These assets together with accounts receivable are classified as amortised cost and the Expected Credit Loss (ECL) is immaterial at year end.

Financial liabilities that are not at fair value through profit or loss include balances due to brokers, accounts payable and financial liabilities arising on redeemable participating shares and are classified as amortised cost.

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument, and all significant rights and access to the benefits from the assets, and the exposure to the risks inherent in those benefits, are transferred to the Company.

A regular way purchase of financial assets is recognised using trade date accounting. From this date, any gains and losses, arising from changes in fair value of the financial assets or financial liabilities, are recorded.

ii) Measurement

Financial instruments are measured initially at fair value (transaction price) plus, in case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. The fair value of instruments traded in active markets is based on quoted market prices at the financial year end date.

Financial liabilities, arising from the redeemable participating shares issued by the Company, are carried at the redemption amount representing the shareholders' right to a residual interest in the Company's assets.

iii) Derecognition

A financial asset is derecognised when the contractual right to receive cash flows from the financial asset has expired or the Company has transferred substantially all risks and rewards of ownership. A financial liability is derecognised when the obligation specified in the contract has been discharged, cancelled or expired.

iv) Amortised cost measurement

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

v) Impairment of financial assets

The impairment model applies to financial assets measured at amortised cost and debt investments at fair value through other comprehensive income, but not investments in equity instruments.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

b) Financial assets and liabilities at fair value through profit or loss (continued)

v) Impairment of financial assets (continued)

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

vi) IFRS 13, Fair Value Measurement

IFRS 13 'Fair Value Measurement' requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Statement of Financial Position.

The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value. The fair value of financial assets and financial liabilities traded in an active market (such as trading securities) are based on quoted market prices at the close of trading on the reporting date.

The quoted market price used for financial assets held by the sub-funds is the current mid price; the appropriate quoted market price for financial liabilities is the last traded price.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at the reporting date.

The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

As the fair values of the investments for VanEck Gold Miners UCITS ETF, VanEck Morningstar Global Wide Moat UCITS ETF, VanEck Morningstar US Sustainable Wide Moat UCITS ETF, VanEck Video Gaming and eSports UCITS ETF, VanEck Semiconductor UCITS ETF, VanEck Crypto and Blockchain Innovators UCITS ETF, VanEck New China ESG UCITS ETF, VanEck Smart Home Active UCITS ETF, VanEck Space Innovators UCITS ETF, VanEck Sustainable Future of Food UCITS ETF, VanEck Genomics and Healthcare Innovators UCITS ETF, [Sub-fund is not registered for distribution in Switzerland] and [Sub-fund is not registered for distribution in Switzerland] are based on quoted prices in active markets, the sub-funds' financial assets measured at fair value are considered Level 1 for the year ended 31 December 2022 and 31 December 2021 with the exception of Xebec Adsorption Inc with fair value of USD515 for the financial year ended 31 December 2022 for VanEck Hydrogen Economy UCITS ETF.

As the fair values of the investments for VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Global Fallen Angel High Yield Bond UCITS ETF and VanEck Emerging Markets High Yield Bond UCITS ETF are based on inputs other than quoted prices, the sub-funds' financial assets are considered Level 2 for the year ended 31 December 2022 and 31 December 2021.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial year. The ongoing conflict between Russia and Ukraine has led to significant disruption and volatility in the

Notes to the Financial Statements (continued)

b) Financial assets and liabilities at fair value through profit or loss (continued)

vi) IFRS 13, Fair Value Measurement (continued)

global stock market. As a result of this, the fair value of Russian securities held within the Sub-Funds experienced a sharp decline. These Russian securities can be seen in the table below:

Fund Name	Security Name	Level as at 31 December 2022	Level as at 31 December 2021
VanEck Junior Gold Miners UCITS ETF	Archer Expl		
	Corp	3	1
VanEck Global Mining UCITS ETF	NMDC Steel		
	Limited	3	2
VanEck Global Mining UCITS ETF	Alrosa PJSC	3	1
	AVZ Minerals		
VanEck Global Mining UCITS ETF	Ltd	3	1
VanEck Global Mining UCITS ETF	Polyus PJSC	3	1
	MMC Norilsk		
VanEck Global Mining UCITS ETF	Nickel PJSC	3	1
	Xebec		
VanEck Hydrogen Economy UCITS ETF	Adsorption Inc	2	1
VanEck Junior Gold Miners UCITS ETF	Firefinch Ltd	3	1
VanEck Rare Earth and Strategic Metals UCITS ETF	AVZ Minerals		
	Ltd	3	1

There were two Level 3 securities Archer Expl Corp with fair value of USD42,398 and Firefinch Ltd with fair value of USD171,357 for the financial year ended 31 December 2022 for VanEck Junior Gold Miners UCITS ETF. There were five Level 3 securities Alrosa PJSC with fair value of USD84, AVZ Minerals Ltd with fair value of USD272,782, MMC Norilsk Nickel PJSC with fair value of USD2, Nmdc Steel Limited with fair value of USD160,182 and Polyus PJSC with fair value of USD1 for the financial year ended 31 December 2022 for VanEck Global Mining UCITS ETF. There was one Level 3 security AVZ Minerals Ltd with fair value of USD2,642,472 for the financial year ended 31 December 2022 for VanEck Rare Earth and Strategic Metals UCITS ETF. There were no Level 3 securities for the financial year ended 31 December 2021.

The Company's assets and liabilities (by class) not measured at fair value at financial year ended 31 December 2022 but for which fair value is disclosed within the fair value hierarchy are considered Level 2, except for cash and cash equivalents, which are considered Level 1.

c) Foreign currency translation

i) Functional and presentation currency

The financial statements are presented in US Dollars (USD) (the "presentation currency"). Items included in the sub-fund's financial statements are measured and presented using the currency of the primary economic environment in which it operates. The functional currency and presentation currency of the sub-funds is USD as they invest primarily in USD denominated securities.

ii) Transactions and balances

Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the closing rate of exchange at each financial year end date. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

c) Foreign currency translation (continued)

ii) Transactions and balances (continued)

Translation differences on financial instruments, held at fair value through profit and loss are reported as part of the fair value gain and loss.

Reported net realised and unrealised gains and losses arising from foreign currency transactions are reflected in the Statement of Comprehensive Income.

d) Transaction Costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. They include fees and commissions paid to agents, advisors, brokers and dealers. Transaction costs when incurred are expensed immediately and are included within net gain/loss on financial assets and liabilities at fair value through profit and loss in the Statement of Comprehensive Income.

e) Interest income and interest expense

Interest income is recognised in the Statement of Comprehensive Income as it accrues, using the original effective interest rate of the instrument calculated at the acquisition or origination date. Interest expense is recognised on an accruals basis in line with the contractual terms. Interest is accrued on a daily basis.

Bank interest income is calculated using the effective interest method and is recognised in the Statement of Comprehensive Income.

f) Redeemable participating shares

Redeemable participating shares are redeemable at the shareholder's option and are classified as financial liabilities. Any distributions on these shares are recognised in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

g) Fees and charges

A Total fee is expensed as incurred and is charged to the Statement of Comprehensive Income on an accruals basis. Refer to Note 9 for more detail.

h) Gains and losses on investments

Realised gains or losses on disposal of investments during the financial year and unrealised gains and losses on valuation of investments held at the financial year end are recognised within the net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

i) Cash flows

The Company has prepared a Statement of Cash Flows using the direct method, whereby major classes of cash receipts and payments related to operating activities are disclosed.

j) Dividend policy

It is not proposed that the Directors will declare a dividend in respect of the sub-funds. Full details of any change to a sub-fund's dividend policy will be provided in an updated Supplement and all Shareholders will be notified in advance.

k) Dividend income and dividend receivable

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex dividend". Income is shown gross of any non-recoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits. Dividend receivable is recognised in the Statement of Financial Position and represents the contractual amounts due to the Company at the financial year end.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

l) Withholding tax

Dividend and interest income received by the Company may be subject to withholding tax imposed in the country of origin, which is shown separately in the Statement of Comprehensive Income.

m) Cash and Cash equivalents

Cash comprises of cash on hand and demand deposits. Cash equivalents, if any, are short term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. Bank overdraft is included in the liabilities section of the Statement of Financial Position.

n) Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Refer to Note 13 for details in respect of offsetting and presentation in the financial statements.

o) Spot currency contracts

In a Spot Currency Contract the Company agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date (the spot date). This date is typically within the three business days of inception of the contract. The fair value of open currency contracts is calculated as the difference between the contracted rate and the current spot rate that would close out the contract on the Statement of Financial Position date. Any realised gains or losses are recognised in the Statement of Comprehensive Income on trade date. The sub-funds may enter into these contracts to hedge against changes in currency exchange rates.

p) Segmental reporting

VanEck UCITS ETF Plc is the reporting entity and each sub-fund is a segment. All the entity-wide disclosures are covered in the Company's financial statements on pages 56 to 91 the Company being the sum of each segment.

There were no transactions between reportable segments during the year.

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. It is the opinion of the Directors that each sub-fund can be treated as a segment as the return on each sub-fund is linked to a different group of assets and operations. Furthermore, financial information reviewed by the Board of Directors is split out by sub-fund and decisions are made on the basis of this information. In addition, the Company has no single major customer from which greater than 10% of revenue is generated.

The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Directors.

3. Financial Risk Management

a) Investment strategy

Van Eck Associates Corporation acts as Investment Manager for certain sub-funds as stated in the Prospectus and the Investment Management Agreement between the Manager and the Investment Manager.

The detailed investment objectives and policies of each sub-fund are set out in the Prospectus and relevant Supplements. In order to achieve the investment objective, the Company, on behalf of the sub-funds seeks to track the performance of the reference index with the exception of VanEck Smart Home Active UCITS ETF, which does not track an index or replicate the reference index or invests in securities similar in nature to the components of the reference index. The Manager has due regard to the best interests of the sub-funds and to prevailing market conditions will determine which investment policy to follow at any given time and shall invest all or substantially all of the net proceeds of any issue of shares.

Notes to the Financial Statements (continued)

3. Financial Risk Management (continued)

a) Investment strategy (continued)

In pursuing its investment objective, the Company is exposed to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk that could result in a reduction in the Company's net assets. The Company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the sub-fund's financial performance.

The nature and extent of the financial instruments held at the reporting date and the risk management policies employed by the Company are discussed below.

b) Market risk

At 31 December 2022, the Company's market risk was affected by changes in actual market prices, interest rate movements and foreign currency movements.

i) Market price risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The sub-funds are susceptible to market price risk arising from uncertainties about future prices of the instruments. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments.

The Investment Manager seeks to moderate market price risk within the sub-funds by adhering to the investment restrictions outlined in the Central Bank UCITS Regulations. These investment restrictions ensure that the sub-funds are appropriately diversified and not overly concentrated within particular investments. The Company calculates its Global Exposure using the commitment approach.

Notes to the Financial Statements (continued)

3. Financial Risk Management (continued)

b) Market risk (continued)

i) Market price risk (continued)

The estimated sensitivities are for illustrative purposes only and are not intended to be predictive. Actual fluctuations in response to market price changes may differ.

ii) Interest rate risk

Interest rate risk is the risk due to fluctuation in the prevailing levels of market interest rates, which would cause the fair value of the assets and liabilities to fluctuate accordingly. The Company did not employ leverage and did not borrow for liquidity purposes and therefore the sub-funds were not exposed to significant interest rate risk during the financial years ended 31 December 2022 or 31 December 2021 with the exception of all of the sub-funds small cash holdings and VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Global Fallen Angel High Yield Bond UCITS ETF and VanEck Emerging Markets High Yield Bond UCITS ETF. As the majority of VanEck J.P. Morgan EM Local Currency Bond UCITS ETF's, VanEck Global Fallen Angel High Yield Bond UCITS ETF and VanEck Emerging Markets High Yield Bond UCITS ETF assets and liabilities are interest bearing it is exposed to interest rate risk. The total overdraft as at 31 December 2022 was USD10,943 (31 December 2021: USDNil).

A reasonable approximate increase or decrease in net assets attributable to holders of redeemable participating shares due to a 1% (1% is considered to be a reasonable possible change in market price) change in market interest rates as at 31 December 2022 is USD1,064,507 for VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, USD363,897 for VanEck Global Fallen Angel High Yield Bond UCITS ETF and USD306,978 for VanEck Emerging Markets High Yield Bond UCITS ETF.

The following table and tables overleaf summarise the exposure to interest rate risks. Included in the tables are the assets and trading liabilities at fair value at 31 December 2022 and 31 December 2021.

31 December 2022

iii) Currency risk

Currency risk is the risk that the value of a sub-fund's net assets will fluctuate due to changes in foreign currency rates.

The Company can hold assets denominated in currencies other than USD, the functional currency. It can therefore be exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in the exchange rates.

Notes to the Financial Statements (continued)

3. Financial Risk Management (continued)

b) Market risk (continued)

iii) Currency risk (continued)

VanEck Morningstar US Sustainable Wide Moat UCITS ETF and VanEck Semiconductor UCITS ETF did not have material currency risk exposure during the financial years ended 31 December 2022 or 31 December 2021. Notes to the Financial Statements (continued)

3. Financial Risk Management (continued)

b) Market risk (continued)

iii) Currency risk (continued)

Currency risk is not managed actively in its separate form. Significant currency risk arises from the portfolio of investments denominated in foreign currencies and this affects the carrying value of the securities, hence is considered as part of price risk.

c) Credit risk

Credit risk is the risk that a counterparty or issuer will be unable to meet a commitment it has entered into with the sub-funds.

State Street Custodial Services (Ireland) Limited (the "Depositary") has been appointed as Depositary to the Company. Depending on the requirements of the jurisdictions in which the investments of the sub-funds are issued, the Depositary may use the services of one or more sub-custodians. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities held to be delayed or limited. The Depositary held an AA- credit rating from the rating agency Standard and Poor's as at 31 December 2022 (31 December 2021: State Street Custodial Services (Ireland) Limited AA-). The Depositary is responsible for the safe-keeping of the assets of the Company. The Depositary may, however, appoint any person or persons to be the sub-custodian of such assets but any liability of the Depositary shall not be affected by the fact that it has entrusted some or all of the assets in its safekeeping to any third party. To mitigate the Company's exposure to the Depositary, the Company employs specific procedures to ensure that the Depositary is a reputable institution and that the counterparty credit risk is acceptable to the Company. The Company only transacts with Custodians with high credit.

In order to reduce its net counterparty risk exposure, the Company may, in relation to any of its sub-funds, avail itself of all mitigation techniques such as netting and financial collateral techniques, which are or may become authorised by the Regulations. In particular, the Company may reduce the overall counterparty risk of each sub-fund's OTC derivative by causing the counterparty to deliver collateral (which will comply with the requirements of the Central Bank) to the Depositary (or as otherwise permitted by the Central Bank). Such collateral will be enforceable by the Company at all times and will be marked to market on a daily basis. The amount of collateral to be delivered will be at least equal to the value by which the overall exposure limit as determined pursuant to the Regulations has been exceeded. The Company did not trade in any OTC derivatives during the financial years ended 31 December 2022 or 31 December 2021. All counterparties are approved before the Managers may deal with them.

In addition to the above, the Manager manages the credit risk on a daily basis and provides the Directors with an update each quarter. Any credit risk issues are discussed quarterly with Directors and monitored thereafter.

For these reasons, the Manager considers that the risk that counterparties would fail to discharge their obligations to the sub-funds is low.

There are no significant concentrations of credit risk to counterparties at 31 December 2022 and 31 December 2021 other than in the VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Global Fallen Angel High Yield Bond UCITS ETF and VanEck Emerging Markets High Yield Bond UCITS ETF. The maximum credit risk exposure of the sub-funds amounts to USD109,969,872, USD37,076,709 and USD32,120,163. The Manager monitors the credit position on a daily basis. As at 31 December 2022 and 31 December 2021 the break-down of the bond related credit ratings for these sub-funds was as follows:

Morgan EM Local Currency Bond UCITS ETF did not hold over 20% (31 December 2021: 20%) of its investments in any particular country but it did hold 97.30% (31 December 2021: 97.92%) of its investments in Bonds, VanEck Global Fallen Angel High Yield Bond UCITS ETF held over 20% (31 December 2021: 20%) of its investments in following country: 34.46% (31 December 2021: 45.20%) in United States and held 97.78% (31 December 2021: 97.54%) of its investments in Bonds, VanEck Emerging Markets High Yield Bond UCITS ETF did not hold 20% (31 December 2021: 20%) of its investments in any particular country but it did hold 96.97% (31 December 2021: 97.82%) of its investments in Bonds. A detailed breakdown of the countries and industries invested in is contained in the Portfolio Listing.

d) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The Company is exposed to daily cash redemptions of redeemable participating shares.

Notes to the Financial Statements (continued)

3. Financial Risk Management (continued)

d) Liquidity risk (continued)

The Manager monitors the Company's liquidity position on a daily basis. The Manager reviews the current and future forecasted liquidity position of the Company on a daily basis and ensures that any cash required to meet the settlement of redemption requests is generated as appropriate.

The Company is entitled to limit the number of shares redeemed on any dealing day to shares representing not more than 10% of the Net Asset Value of the sub-fund on that dealing day. In this event, the limitation will apply pro rata, so that all shareholders wishing to redeem their shareholding in the sub-fund on the relevant dealing day will realize the same proportion of their redemption request. Shares not redeemed but which would otherwise have been redeemed, will be carried forward for repurchase on the next dealing day and will be dealt with in priority (on a pro rata basis as detailed above) to redemption requests received subsequently. If requests for redemptions are so carried forward, the Administrator will inform the shareholders affected.

The Company has the ability to borrow in the short term to ensure settlement. The Company's Prospectus allows for borrowing up to 10% of the Company's net assets at any time and the Depositary may have charged the assets of the Company as security for any such borrowing, provided that such borrowing is only for temporary purposes.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at financial year end to the contractual maturity date.

e) Fair Value

For more information on financial assets at fair value through profit or loss refer to Note 2(b).

Assets and liabilities not carried at fair value but for which fair value is disclosed

The Company's assets and liabilities (by class) not measured at fair value at 31 December 2022 and 31 December 2021 but for which fair value is disclosed within the fair value hierarchy are considered Level 2, except for cash and cash equivalents, which are considered Level 1.

The assets and liabilities are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Cash and cash equivalents include cash in hand, deposits held with banks and brokers.

4. Share Capital

The Authorised Share Capital of the Company is 2 subscriber shares of €1 each and 1,000,000,000,000 participating shares of no par value. There are no rights of pre-emption attached to the shares.

In accordance with the objectives listed in the Directors' Report and in the risk management policies in Note 3, the Company strives to invest the subscriptions of redeemable shares in appropriate investments, while maintaining sufficient liquidity to meet shareholder redemptions.

Notes to the Financial Statements (continued)

4. Share Capital (continued)

The Company complies with the minimum capital requirements by ensuring that each registered shareholder holds a minimum of 50,000 shares.

Shareholders are entitled to attend and vote at general meetings of the Company. Every shareholder, holding shares that are present in person or by proxy shall have one vote and on a poll, every shareholder present in person or by proxy shall have one vote for every share of which they are the holder.

The Directors are authorised to allot relevant securities up to an amount equal to the authorised share capital of the Company. No shares were allotted during the financial years ended 31 December 2022 and 31 December 2021.

The Directors reserve the right to reject, in whole or in part, any application for shares. In particular, if the Directors determine that it would be detrimental to the existing shareholders to accept a cash application for Shares of any sub-fund which represents more than 10% of the Net Asset Value of such sub-fund, the Directors may decide that all or part of the application for shares in excess of 10% be deferred until the next Dealing Day. If the Directors decide to defer all or part of the application in excess of 10% the applicant shall be informed prior to the deferral taking place.

Capital Management

The redeemable participating shares issued by each sub-fund provide a shareholder with the right to request redemption for cash at a value proportionate to the investor's share in the net assets at each redemption date. The Company's objectives in managing the redeemable shares are to ensure to maximise returns to all investors, and to manage liquidity risk arising from redemptions. The Company's management of liquidity risk arising from redeemable participating shares is disclosed in Note 3(d).

The share issued and share redeemed in USD are included within the Statement of Cash Flows. During the financial years ended 31 December 2022 and 31 December 2021 the number of redeemable shares issued and fully paid was as follows:

6. Cash and Cash Equivalents

The cash balances and bank overdraft at the financial year ended 31 December 2022 and 31 December 2021 were held with the Depositary. As at 31 December 2022 the sub-fund VanEck Sustainable Future of Food UCITS ETF had an overdraft balance of USD688 (31 December 2021: VanEck Sustainable Future of Food UCITS ETF USDNil) and VanEck Genomics and Healthcare Innovators UCITS ETF had an overdraft balance of USD10,255 (31 December 2021: VanEck Genomics and Healthcare Innovators UCITS ETF USDNil). The credit rating of State Street Custodial Services (Ireland) Limited was AA- at 31 December 2022 (31 December 2021: State Street Custodial Services (Ireland) Limited AA-). Refer to Note 3 for further details on cash held in foreign currency.

7. Efficient Portfolio Management

The Company may, on behalf of each sub-fund and subject to the conditions and within the limits laid down by the Central Bank of Ireland, employ techniques and instruments relating to transferable securities for efficient

Notes to the Financial Statements (continued)

7. Efficient Portfolio Management (continued)

portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a sub-fund and may not be speculative in nature.

The sub-funds may invest in financial derivative instruments (“FDI”) for efficient portfolio management or hedging purposes. The sub-funds may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the sub-fund. These techniques and instruments may include investments into hedging transactions on currencies to protect against a decline in the value of investments denominated in currencies other than USD, and against any increase in the cost of investments denominated in currencies other than USD. The sub-funds employ the commitment approach to assess the global exposure and to ensure that the sub-fund’s use of derivative instruments is in accordance with the requirements of the Central Bank of Ireland.

Forward foreign currency contracts can be used to hedge out unwanted currency exposures and to limit the sub-funds exposure to anticipated changes in exchange rates. There are no forward foreign currency contracts held at the financial period ended 31 December 2022 and the financial year ended 31 December 2021.

The sub-funds may enter into stock lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank UCITS Regulations. The sub-funds did not enter into such agreements during the financial period ended 31 December 2022 or the financial year ended 31 December 2021.

8. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On this basis, it is generally not chargeable to Irish tax on its income or gains.

However, Irish tax can arise on the happening of a “chargeable event” in the Company. A chargeable event includes any payments of distributions to shareholders, any encashment, repurchase, redemption, cancellation or transfer of shares and any deemed disposal of shares as described below for Irish tax purposes arising as a result of holding shares in the Company for a period of eight years or more. Where a chargeable event occurs, the Company is required to account for the Irish tax thereon.

No Irish tax will arise on the Company in respect of chargeable events where:

- a) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations; or
- b) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- c) an exchange of shares representing one sub-fund for another sub-fund of the Company; or
- d) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another company; or
- e) certain exchanges of shares between spouses and former spouses.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event. There were no chargeable events during the financial period under review. Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

9. Expenses

Total Fee

The Total Fee, a percentage of the Net Asset Value of the relevant class of shares, is payable by the Company out of the sub-funds’ assets to the Manager.

VanEck UCITS ETFs plc

Notes to the Financial Statements (continued)

9. Expenses (continued)

The Total Fee incurred by the Company during the financial periods ended 31 December 2022 and 31 December 2021 are detailed below.

Other assurance	-	-
Tax advisory	USD49,093	USD43,725
Other non-audit	-	-
Total	USD259,908	USD219,398

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on purchases and sales of equities are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each sub-fund.

For the financial year ended 31 December 2022 and the financial year ended 31 December 2021, the Company incurred transaction costs that are identifiable as follows:

	31 December 2022 USD

10. Related Parties

Mr. Adam Phillips, Mr. Jonathan R. Simon, Mr. Bruce Smith and Mr. Gijsbert Koning are related to Van Eck Associates Corporation and also serve as directors or officers of affiliates of Van Eck Associates Corporation.

Ms. Mary Canning, Mr. Jon Lukomnik and Mr. Adrian Waters are independent directors. Mr. Adam Phillips, Mr. Jonathan R. Simon and Mr. Bruce Smith also serve as Supervisory Board members of the Manager, VanEck Asset Management B.V. Mr. Jon Lukomnik is also an independent director of the VanEck US mutual funds. Mr. Gijsbert Koning is a Director of VanEck Asset Management B.V. Mr. Adrian Waters, Mr. Jon Lukomnik and Ms. Mary Canning are entitled to receive a directors' fee of €20,000 (31 December 2021: €20,000) per annum as payment for their services to the Company. For the financial year ended 31 December 2022 the Directors were paid a total fee of €63,229 (31 December 2021: €50,625).

As outlined on page 3 of this report, Van Eck Associates Corporation acts as Investment Manager to certain sub-funds of the Company pursuant to an investment management agreement between the Manager and the Investment Manager. VanEck Asset Management B.V. (the "Manager") acts as Manager and Distributor. The Manager is a 99% owned subsidiary of Van Eck Associates Corporation. The Manager receives the net amount of Total fees less operating costs and expenses payable by the sub-funds as disclosed in Note 9. The Total fee is disclosed in the Statement of Comprehensive Income and amounts owed at the financial year end are disclosed in the Statement of Financial Position.

VanEck Switzerland AG and VanEck (Europe) GmbH are related parties, by virtue of the fact that they have a distribution agreement with the Manager and have the same ultimate parent group, Van Eck Associate Corporation, which held 1,550,000 (31 December 2021: 764,750) outstanding shares in the Company.

MV Index Solutions, the index provider of the MVIS Global Junior Gold Miners Index, which the VanEck Junior Gold Miners UCITS ETF seeks to track and the MarketVector Global Video Gaming and eSports ESG Index which the VanEck Video Gaming and eSports UCITS ETF seeks to track, is a wholly owned subsidiary of Van Eck Associates Corporation. The index licensing fees related to the VanEck Global Junior Gold Miners Index and the VanEck Video Gaming and eSports UCITS ETF are borne by the Manager. MV Index Solutions was paid a fee of USD880,368 for the financial year ended 31 December 2022 (31 December 2021: 807,633).

Mr. Gijsbert Koning held 11,479 shares, purchasing 53,934 shares during the financial year and holding 65,413 shares with a value of USD598,274 as at 31 December 2022. Angkor Holding B.V., an entity controlled by Mr. Gijsbert Koning held 10,219 shares at the beginning of the financial year as Director. The

Notes to the Financial Statements (continued)

10. Related Parties (continued)

entity held 12,504 shares with a value of USD295,727 as at 31 December 2022. All transactions with Angkor Holding B.V. and Mr. Gijsbert Koning during the financial year were on normal commercial terms.

Two record holders of shares own 55.92% of the Company on behalf of Nominee accounts.

11. Contingent Liabilities and Commitments

There were no significant liabilities or commitments as at financial period ended 31 December 2022 and financial year ended 31 December 2021.

The Investment Manager did not enter into any directed brokerage services on behalf of the sub-funds during the period ended 31 December 2022 and year ended 31 December 2021.

12. Segregation of Liability

Under the provisions of the Companies Act 2014, the Directors maintain for each sub-fund a separate portfolio of assets. As between shareholders, each portfolio of assets is invested for the exclusive benefit of the relevant sub-fund. The shareholders are only entitled to the assets and profits of that sub-fund in which they participate. The Company is considered one single legal entity. With regard to third parties, in particular towards the Company's creditors, the Company is responsible for all liabilities incurred by a sub-fund exclusively based on the assets of this relevant sub-fund. Among the shareholders, the liabilities of each sub-fund shall only be incurred to the sub-fund.

While the provisions of the Companies Act provide for segregated liability between sub-funds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims.

Accordingly, it is not free from doubt that the assets of a sub-fund of the Company may not be exposed to the liabilities of other sub-funds of the Company.

13. Offsetting and Amounts Subject to Master Netting Arrangements and Similar Agreements

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The legally enforceable right must be based on future events and must not be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

The Company was not subject to master netting arrangements with its derivative counterparties as the Company did not trade in any OTC derivatives during the financial years ended 31 December 2022 or 31 December 2021.

14. US GAAP Reconciliation

SEC Custody Rule

Van Eck Associates Corporation (the "Investment Manager") is a registered advisor with the United States Securities and Exchange Commission (the "SEC"). Rule 206(4)-2 of the US Investment Advisers Act of 1940, as amended (the "Custody Rule") imposes requirements on SEC registered investment advisors that are deemed to have custody of client sub-funds or securities. The Investment Manager has elected to use the audit exemption provision to satisfy that obligation of the Custody Rule and therefore is required to prepare financial statements for the investment entities they manage in accordance with US generally accepted accounting principles ("US GAAP") or in accordance with accounting standards other than US GAAP if they contain information substantially similar to statements prepared in accordance with US GAAP, with any material differences reconciled. These financial statements must be audited according to requirements of US generally accepted auditing standards ("US GAAS"). These financial statements are prepared in accordance with International Financial Reporting Standards and additional US GAAP information has been provided to meet the requirements of the Custody Rule to reconcile material differences.

Notes to the Financial Statements (continued)

14. US GAAP Reconciliation (continued)

Taxation

The Financial Accounting Standards Board (“FASB”) issued accounting guidance “Accounting for Uncertainty in Income Taxes” (ASC 740) related to income taxes which provides direction for how uncertain tax positions should be recognised, measured, presented and disclosed. Under this guidance, the recognition of a benefit from a tax position requires that the Board of Directors determine whether such tax position is “more likely than not” to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the positions. If this threshold is met, the tax benefit is then measured and recognised at the largest amount that is greater than 50 percent likely of being realised upon settlement. It is the Company’s policy to recognise interest and penalties related to unrecognised taxes in other expenses. The Company has undertaken an analysis of its tax exposures, and it has determined that there is no potential liability arising. In addition, the Company has determined that its only other tax exposure is to withholding tax on dividends. For the financial year ended 31 December 2022 and the year ended 31 December 2021, no other interest or penalties have been accrued or incurred. The Investment Manager’s conclusions regarding the accounting standard may be subject to review and adjustment at a later date based on factors including, but not limited to, further implementation guidance from the FASB, and ongoing analyses of tax laws, regulations and interpretations thereof. The Company files tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Company is subject to examination by federal, state, local and foreign jurisdictions, where applicable.

**Reconciliation to US GAAP – Company Statement of Financial Position
31 December 2022**

	USD
Net assets under IFRS	3,528,786,744
(a) Redemptions Payable	-
(b) Subscription Receivable	<u>(12,551,530)</u>
Net assets under US GAAP	<u>3,516,235,214</u>

31 December 2021

	USD
Net assets under IFRS	4,131,035,286
(a) Redemptions Payable	-
(b) Subscription Receivable	<u>(5,155,907)</u>
Net assets under US GAAP	<u>4,125,879,379</u>

(a) In accordance with US GAAP, redemption requests received prior to period end for 1 January redemption days are recognised as liabilities at period end. There were no redemptions payable as at 31 December 2021.

(b) Under US GAAP, only subscriptions received in advance qualify as subscriptions receivable.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

A Global Depositary Receipt (GDR) is very similar to an American depositary receipt or an ADR. It is a type of bank certificate that represents shares in a foreign company, such that a foreign branch of an international bank then holds the shares. The shares themselves trade as domestic shares, but globally, various bank branches offer the shares for sale.

* In accordance with the Central Bank UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial year and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial year and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial year and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

Remuneration Policy

VanEck Asset Management B.V.

UCITS shall include in their remuneration policies information on how these policies are consistent with the integration of sustainability risks, and shall publish that information on their websites effective from 10 March 2021.

As a UCITS Management Company VanEck Asset Management B.V. (the “Manager”) must implement a remuneration policy that is consistent with a promote sound and effective risk management in accordance with the UCITS Directive and the remuneration guidelines published by the European Securities and Markets Authority (ESMA) as well as other relevant laws and binding guidance in the Netherlands (together the “UCITS Remuneration Code”), which restrict the structure and form of remuneration to certain categories of staff (the “Identified Staff”).

The remuneration policy aims to:

- Align the business strategy, values and interests of the Company.
- Discourage excessive risk taking.
- Enable the Company to align the interests of shareholders and the sub-funds managed with the interests of the Identified Staff managing the sub-funds.

The Board is satisfied that the Manager's remuneration policies and practices for the Directors whose activities may have a material impact on the risk profiles of the Manager, are consistent with and promote sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profiles of the sub-funds. The Board is satisfied that Manager's remuneration policy is designed to be consistent with the UCITS Remuneration Code.

Delegated Functions

Where risk management or portfolio management is delegated, the delegate need only put arrangements in place with respect to those staff of the delegate who have a material impact on the risk profiles of the relevant sub-funds, and in respect of remuneration that is connected with the delegated activities.

Portfolio management for certain sub-funds has been delegated by the Manager to Van Eck Associates Corporation, a US based SEC registered investment adviser (“The Investment Manager”).

The Manager will, where applicable, seek to ensure that the Investment Manager is contractually obliged in accordance with the terms of the investment management agreements to observe the UCITS Remuneration Code when making payments to their identified staff for the performance of portfolio management activities on behalf of the company.

Circumstances where the board should be consulted include the following:

- any material issues arise in relation to the Investment Manager's remuneration policies and practices between the regular annual reports which could impact on the Company; and/or
- when the Investment Manager indicates to the Manager that its policies no longer comply with the UCITS Remuneration Code.

Where a material issue arises in relation to the Company's remuneration policies and practices, the Designated Director may consider either tabling the matter for discussion at a Board meeting of the Company, or where time sensitive, convening an ad-hoc Board meeting to discuss.

Appendix 2: UCITS V (Unaudited) (continued)

NAME	TITLE	RESPONSIBILITIES	REMUNERATION RECEIVED
Jonathan Simon	Chairman	Designated Director for Remuneration	No
Bruce Smith	Director		No
Adam Phillips	Director		No
Jon Lukomnik	Independent Director		€20,000 per annum
Adrian Waters	Independent Director		€20,000 per annum
Mary Canning	Independent Director		€20,000 per annum

Remuneration Disclosure

Based on the Company's Remuneration Policy its delegates are obliged to disclose certain elements of the remuneration of their employees. These elements are disclosed in the below table.

For the period from 1 January 2022 to 31 December 2022, the table below sets out the portion of total remuneration paid or payable to the Identified Staff of the Company's delegates, split into Fixed Remuneration and Variable Remuneration which are relevant to the Company based upon a pro-rata allocation of total remuneration paid to the Identified Staff of the delegates as reported to the Company by the delegates by reference to the portion of the assets managed by the delegates for the Company when compared to their total assets under management.

Average number of Identified Staff of the delegates	Fixed Remuneration	Variable Remuneration
14 employees	USD470,492	USD619,647

Following the review of the Remuneration Policy undertaken in 2022 and its implementation, no irregularities were identified and no material changes were made to the Remuneration Policy.

Sustainable Finance Disclosures Regulation and Taxonomy Regulation Disclosures (unaudited)

The European Union's ("EU") Regulation on the Establishment of a Framework to Facilitate Sustainable Investment (Regulation EU/2020/852) (the "Taxonomy Regulation") requires VanEck UCITS ETFs plc to provide additional disclosure with respect to each of the Funds in order to enhance transparency and to provide for objective comparison of financial products regarding the proportion of such financial products' investments that contribute to environmentally sustainable economic activities, noting that the scope of environmentally sustainable economic activities, as prescribed in the Taxonomy Regulation, is narrower than the scope of sustainable investments under the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR"). Please see the Relevant Supplement for the disclosures for each Fund required by the Taxonomy Regulation.

SFDR Art. 6 Sub-Funds

With respect to the following Funds, the investments underlying each of these Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities for VanEck UCITS ETFs plc Annual Report and Audited Financial Statements for the financial year ended 31 December 2022:

1. VanEck Gold Miners UCITS ETF
2. VanEck Junior Gold Miners UCITS ETF

Annex 1

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: VanEck Morningstar US Sustainable Wide Moat UCITS ETF
Legal entity identifier: 549300JHVM3IG26SW860

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics applied to the Fund's investments during the reporting period:

1. The Fund has promoted the reduction of the most negative impacts on society and the environment through:

- Reducing the exposure to ESG and carbon risks by excluding companies with high or severe levels of ESG and Carbon risks. The performance of this characteristic has been measured with the sustainability indicators on total greenhouse gas emissions and greenhouse gas intensity.
- Limiting exposure to controversies and controversial business activities by means of of revenue-based screening and exclusion of companies involved in severe UNGC violations and other controversies

The performance of the Fund’s environmental and social characteristics has been measured with the sustainability indicators included in the next question.

2. The Glass Lewis ESG tilted voting policy was applied whereby votes were cast on sustainability matters.

A reference benchmark, Morningstar US Sustainability Moat Focus Index, has been designated for the purpose of attaining the environmental and social characteristics promoted by the financial product.

● ***How did the sustainability indicators perform?***

The sustainability Indicators performed as below:

Indicator	Score
Total GHG Emissions (Scope 1+2+3) per Mio EUR Enterprise Value	176.62
GHG Intensity (t CO2e/\$M Revenue)	1,590.82

● ***...and compared to previous periods?***

This question will be answered when this report has been published for more than one reporting periode. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

This question and the corresponding questions below were not applicable as the Fund did not intend to make sustainable investments during the reporting period.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

- — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

- — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts by means of screening and excluding companies with a low performance on the below subjects in the following manner:

1. Greenhouse Gas (GHG Emissions):
 - Part of Global Standards screen "Energy Use and Greenhouse Gas Emissions", which comprises the Controversy Score used in the selection process. Companies with critical (5 out of 5) controversies score within the last 3 years are excluded from the selection process.
 - Exclusion of companies with High and Severe Carbon Risk scores based on Sustainalytics metrics
 - Excludes companies with Involvement (>0% Revenue) in Thermal Coal extraction or power generation
2. Biodiversity
 - Part of Global Standards screen "Land Use and Biodiversity", which comprises the Controversy Score used in the selection process. Companies with critical (5 out of 5) controversies score within the last 3 years are excluded from the selection process.
3. Water
 - Part of Global Standards screen "Discharges and Releases (Water)" , which comprises the Controversy Score used in the selection process. Companies with critical (5 out of 5) controversies score within the last 3 years are excluded from the selection process.
4. Waste
 - Part of Global Standards screen "Degradation & Contamination (Land)" , which comprises the Controversy Score used in the selection process. Companies with critical (5 out of 5) controversies score within the last 3 years are excluded from the selection process.
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - Global Standards screening includes ratings for controversial practices that have adverse impacts on society and the environment in line with established

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.

- Part of the Social and Governance components of the Global Standards screening, which comprises the Controversy Score used in the selection process. Companies with critical (5 out of 5) controversies score within the last 3 years are excluded from the selection process.
- Controversial weapons screenings are performed whereby companies with any exposure are excluded from the index.

Additionally, principal adverse impacts were considered as part of the ESG tilted voting policy whereby votes were casted regarding the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

As of 31/12/2022

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022

Largest investments	Sector	% Assets	Country
ROCKWELL	Industrials	2.89	US
EMERSON ELECTRIC	Industrials	2.72	US
KLA CORP	Information Technology	2.64	US
INTERCONTINENTAL	Financials	2.63	US
ROPER	Information Technology	2.62	US
STATE STREET CORP	Financials	2.59	US
MONDELEZ	Consumer Staples	2.57	US
BANK OF NEW YORK	Financials	2.55	US
CLOROX CO/THE	Consumer Staples	2.52	US
KELLOGG CO	Consumer Staples	2.45	US
POLARIS INC	Consumer Discretionary	2.44	US
APPLIED MATERIALS	Information Technology	2.43	US
CONSTELLATION	Consumer Staples	2.40	US
MICROSOFT CORP	Information Technology	2.39	US
MASCO CORP	Industrials	2.36	US

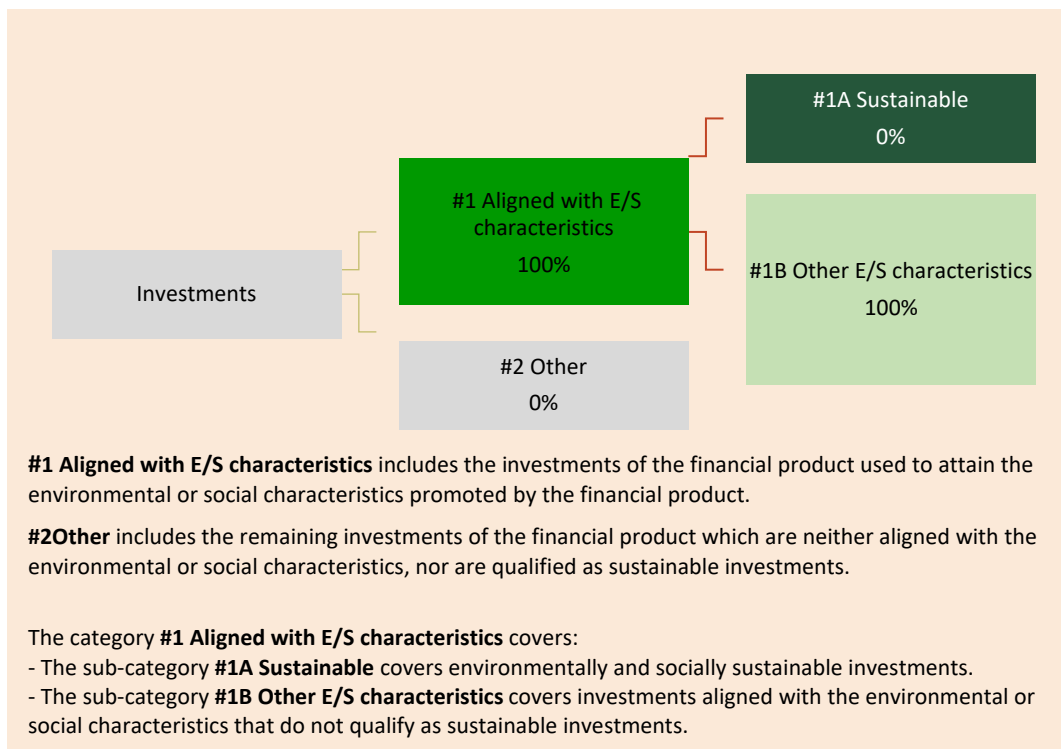

What was the proportion of sustainability-related investments?

The Fund has invested in direct financial instruments of which 100% was aligned with the the environmental and social characteristics that it promotes on the basis that all of the Index holdings are screened against its exclusion strategy.

● *What was the asset allocation?*

The Fund has invested in direct financial instruments of which 100% is aligned with the promoted environmental or social characteristics.

● *In which economic sectors were the investments made?*

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Information Technology	30.61
Financials	21.65
Consumer Staples	13.75
Industrials	11.27
Consumer Discretionary	8.93
Health Care	7.84
Communication Services	4.53
Materials	1.23
Other/Cash	0.18

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

Please note that the weights may not sum up to 100% due to rounding.

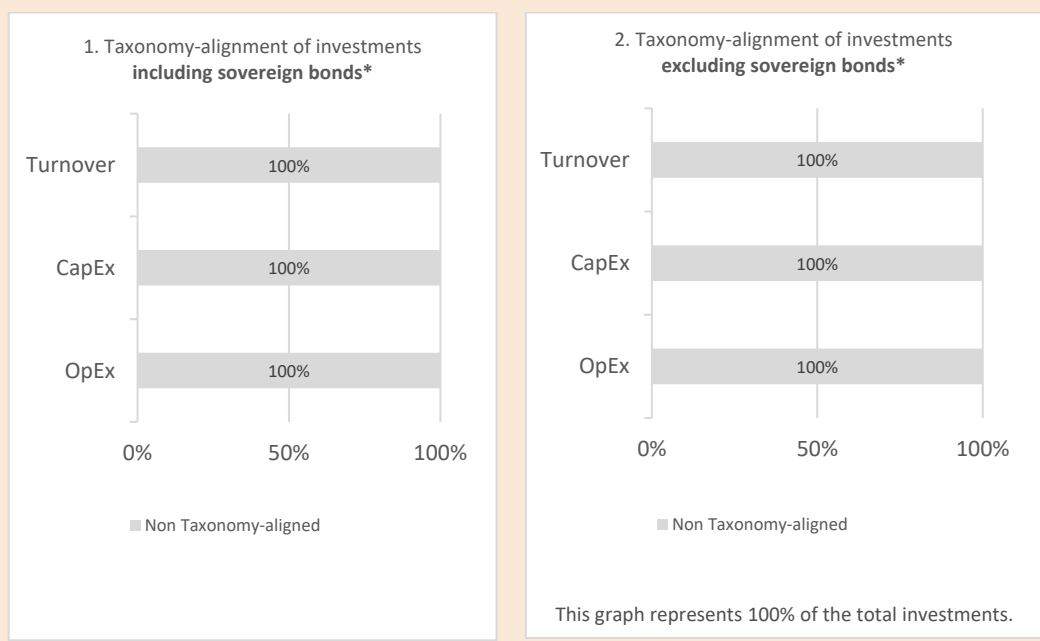

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. The Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
 - In fossil gas
 - In nuclear gas
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
The minimum share of investments in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the Taxonomy-aligned investments will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Fund did not intend to make sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable. The Fund did not intend to make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were aligned with the environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As a passive investments strategy, during the reporting period the Fund has tracked the Morningstar US Sustainable Moat Focus Index. The index has incorporated the relevant ESG screenings in the selection process, and thereby ensures the compliance with the environmental and/or social characteristics. Moreover, Glass Lewis ESG voting guidelines were applied to this Fund, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of of the environmental and social characteristics of the Sub-fund.

No breaches of the index have occurred.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

● *How does the reference benchmark differ from a broad market index?*

The index differs from a generic US broad market index in following ways:

- Moat investment approach: the index only selected companies with long-term competitive advantages (“Moats”) (switching costs, intangible assets, network effect, cost advantage, efficient scale) according to Morningstar research;
- Investing in relatively attractively valued companies: undervalued companies according to estimated “Fair Value” by Morningstar research;
- Equal weighting: the constituents of the index are equal-weighted as opposed to market-capitalization weighting;
- Staggered rebalancing: the index consists of two annually rebalanced sub-portfolios;
- Target ESG score: index selection targets a Morningstar Sustainability Rating of 4 out of 5 globes, equivalent to the best 32.5% in its peer group, whereby the worst ESG performers will be replaced;
- ESG Screening: companies with very severe norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

The Fund aims to invest 100% in line with its reference benchmark and will for that reason normally have very similar performance on sustainability indicators as the reference benchmark: Morningstar US Sustainability Moat Focus Index. The European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the environmental and social characteristics it intends to promote.

● *How did this financial product perform compared with the reference benchmark?*

Indicator	Fund: VanEck Morningstar US Sustainable Wide Moat UCITS ETF	Reference benchmark: Morningstar US Sustainability Moat Focus Index
tCO2 Total GHG Emissions (Scope 1+2+3) per Mio EUR EV	176.62	176.62
GHG Intensity - CO2e/\$M Revenue.	1590.65	1590.65

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund: VanEck Morningstar US Sustainable Wide Moat UCITS ETF	Broad market index: Solactive GBS United States Large & Mid Cap Index
tCO2 Total GHG Emissions (Scope 1+2+3) per Mio EUR EV	176.62	326.92
GHG Intensity - CO2e/\$M Revenue.	1590.65	1126.36

Annex 2

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: VanEck Video Gaming and eSports UCITS ETF

Legal entity identifier: 6354004UKGUQNCOZOU60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics applied to the Fund's investments:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

1. Reducing exposure to very severe controversies relating to international standards on responsible business, human rights and labour rights, via exclusions based on the Norm-based research
2. Minimizing the exposure to controversial business activities relating to tobacco, controversial weapons, energy extractives, civilian firearms and military, based on the ESG provider research on revenues
3. Limiting the exposure to carbon risk by excluding companies deriving significant (>5%) revenues from certain sectors and energy extractives, such as thermal coal.
4. The Glass Lewis ESG policy guidelines was applied, whereby votes were cast on sustainability matters.

The performance of the Fund’s environmental and social characteristics has been measured with the sustainability indicators included in the next question.

A reference benchmark, MarketVector™ Global Video Gaming & eSports ESG Index, has been designated for the purpose of attaining the environmental and social characteristics promoted by the financial product.

● ***How did the sustainability indicators perform?***

The sustainability Indicators performed as below:

Indicator	Score
The percentage of portfolio involved in violation of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%
The percentage of portfolio involved in non-renewable energy production	0.00%

● ***...and compared to previous periods?***

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

This question and the related questions below were not applicable as the Fund did not intend to make sustainable investments during the reporting period.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts on sustainability:

1. Greenhouse Gas (GHG Emissions):
 - Part of Norm-based research on environmental protection "Failure to mitigate climate change impacts", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
 - Fossil Fuel/Coal exclusions - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill", which comprises the Controversy Score used in the selection

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

process. Companies with very severe controversies score were excluded from the selection process.

4. Waste

- Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.

5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters

- ISS norms based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
- Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
- Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG tilted voting policy, whereby votes are casted regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

As of 31/12/2022:

Largest investments	Sector	% Assets	Country
TENCENT HOLDINGS LTD	Communication Services	9.06	CN
NVIDIA CORP	Information Technology	7.4	US
ACTIVISION BLIZZARD INC	Communication Services	6.68	US
ADVANCED MICRO DEVICES INC	Information Technology	6.59	US
NINTENDO CO LTD	Communication Services	6.07	JP

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022.

ELECTRONIC ARTS INC	Communication Services	5.44	US
NETEASE INC	Communication Services	5.41	CN
TAKE-TWO INTERACTIVE SOFTWARE INC	Communication Services	4.8	US
BANDAI NAMCO HOLDINGS INC	Consumer Discretionary	4.47	JP

SEA LTD	Communication services	4.11	TW
Unity Software INC	IT	3.8	US
Capcom Co LTD	Communication services	3.01	JP

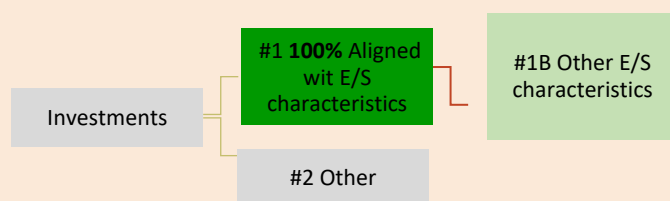

What was the proportion of sustainability-related investments?

100% of the portfolio was deemed to be constituted by sustainability-related investments, according to the definition given of promoting environmental and social characteristics.

● *What was the asset allocation?*

The Fund invests in direct financial instruments of which 100% was aligned with the environmental and social characteristics that it promotes on the basis that all of the Index holdings are screened against its exclusion strategy.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Communication	69.4%
IT	19.5%
Consumer discretionary	11.1%
Other	0.1%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. The Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

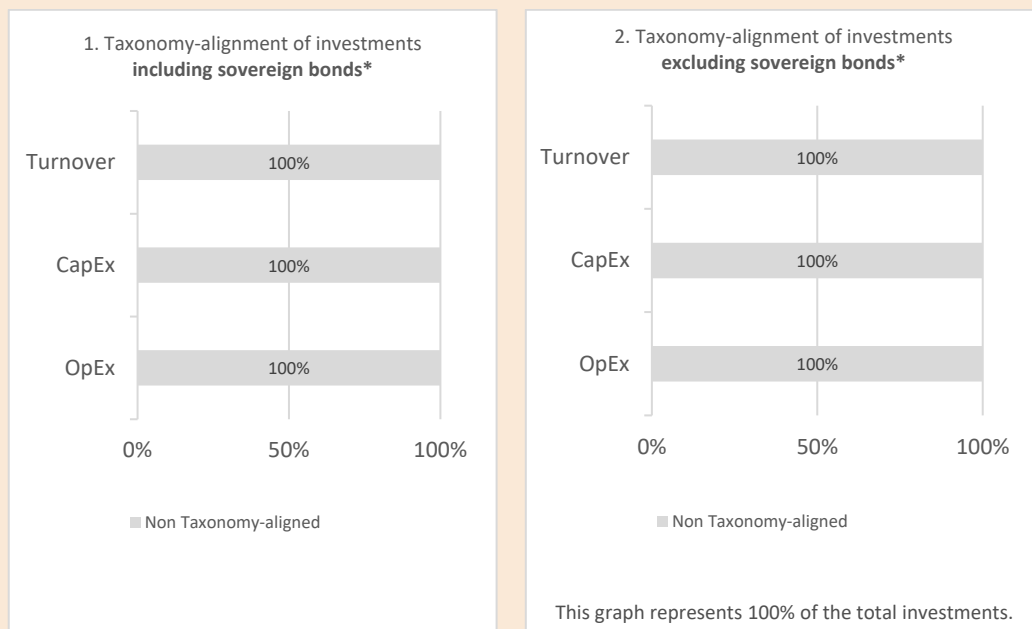

Yes

In fossil gas In nuclear gas

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Fund did not intend to make environmental sustainable investments.

What was the share of socially sustainable investments

Not applicable. The fund did not intend to make socially sustainable investments.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were aligned with the environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022 an index replacement to incorporate sustainability-related considerations in the investment process of the VanEck Video Gaming and eSports UCITS ETF was made during the reporting period. The change has introduced ESG filters to the Fund’s selection process. The Fund’s investment policy now includes screens for companies that very seriously violate UN Global Compact and OECD Multinational Enterprise principles, as well as the ones deriving significant revenues from controversial weapons, firearms, tobacco and energy extractives. As a result, Fund is now classified as Art. 8 SFDR.

Companies have been screened for compliance with the Index rules and the Index is rebalanced on a quarterly basis by the Index Provider. The Fund replicates the Index based on the Index rules.

No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the environmental and social characteristics of the Fund.

How did this financial product perform compared to the reference benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

● *How does the reference benchmark differ from a broad market index?*

The index differs from a generic broad market index in following ways:

- Thematic investment approach: companies that generate at least 50% (25% for current components) of their revenues from video gaming & eSports.
- ESG screenings: Companies with very severe norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

The Fund aimed at investing 100% in line with its reference benchmark and will for that reason normally have very similar performance on sustainability indicators as

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

the reference benchmark: MarketVector™ Global Video Gaming & eSports ESG Index. The European ESG Committee has analysed and confirmed the alignment of the reference benchmark with its promoted environmental or social characteristics.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund:	Reference benchmark:

Product name: VanEck Semiconductor UCITS ETF

Legal entity identifier: 2549005YADH8Q7K3ON79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics applied to the Fund's investments:

1. The Fund promoted the reduction of the most negative impacts on society and the environment through:
 - Reducing exposure to very severe controversies relating to international standards on responsible business, human rights and labour rights. Minimizing exposure to controversial business activities relating to tobacco, controversial weapons, energy extractives, civilian firearms and military.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Limiting exposure to carbon risk by excluding companies deriving significant (>5%) revenues from energy extractives, such as thermal coal.
2. The Glass Lewis ESG policy guidelines was applied whereby votes were cast on sustainability matters.

A reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the financial product.

● ***How did the sustainability indicators perform?***

The Fund measured the following sustainability indicator:

Indicator	Fund
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights.	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%
The percentage of portfolio involved in non-renewable energy production	0.00%

● ***...and compared to previous periods?***

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

This question and the related questions below were not applicable as the Fund did not intend to make sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts by means of screening and excluding companies with a low performance on the below subjects in the following manner:

1. Greenhouse Gas (GHG Emissions):
 - Part of Norm-based research on environmental protection "Failure to mitigate climate change impacts", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
 - Fossil Fuel/Coal exclusions - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - ISS norms based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
 - Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value", which comprises the Controversy Score used in the selection

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

process. Companies with very severe controversies score were excluded from the selection process.

- Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider will review the impact and will act on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company.

Additionally, principal adverse impacts were considered as part of the ESG tilted voting policy whereby votes were casted regarding the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

As of 31/12/2022:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

The Fund has invested in direct financial instruments of which 100% was aligned with the the environmental and social characteristics that it promotes on the basis that all of the Index holdings are screened against its exclusion strategy.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

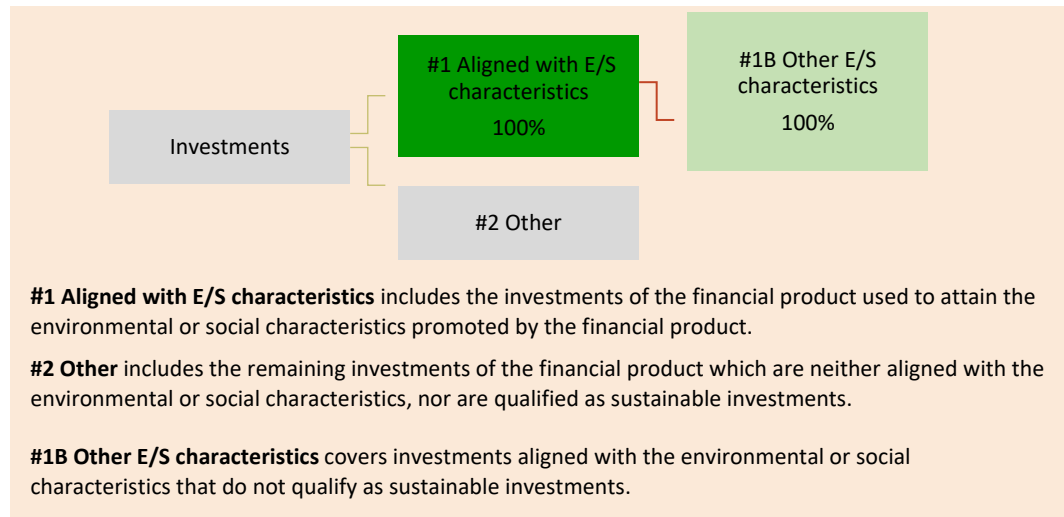

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

● **What was the asset allocation?**

The Fund has invested in direct financial instruments of which 100% were aligned with the promoted environmental or social characteristics.

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Information Technology	99.88
Other/Cash	0.12

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0%. The Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

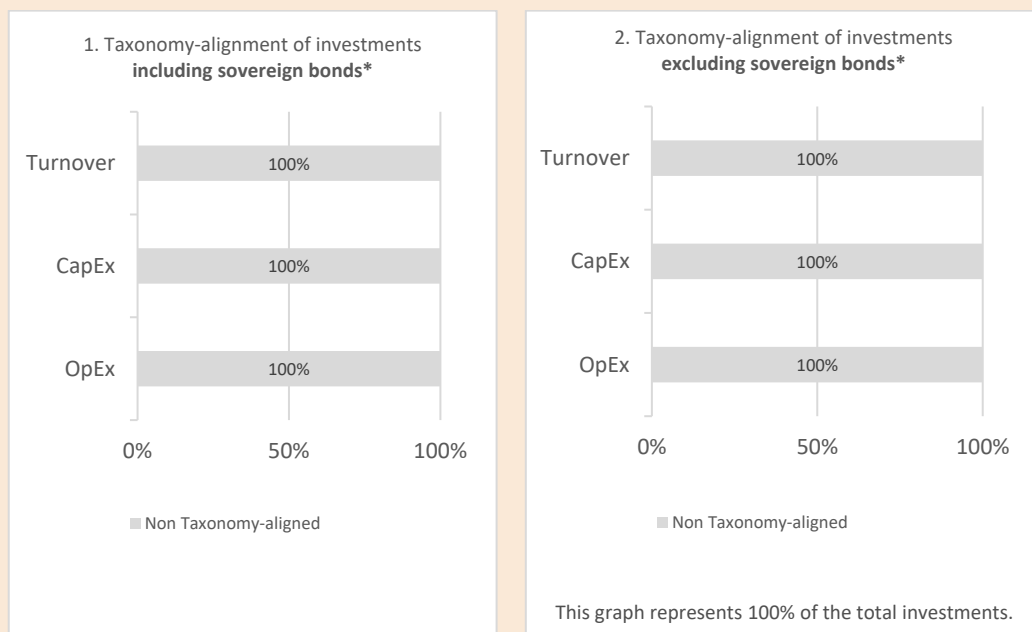

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas In nuclear gas

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the Taxonomy-aligned investments will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The fund did not intend to make environmental sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments

Not applicable. The fund did not intend to make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were aligned with the environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As a passive investments strategy, the Fund is tracking the MVIS® US Listed Semiconductor 10% Capped ESG Index, which incorporates relevant ESG screenings in the selection process, and thereby ensures the compliance with the Environmental/Social characteristics.

The European ESG Committee has analysed and confirmed and reported on the the environmental and social characteristics of the Fund.

No breaches of the index have occurred.

Moreover, Glass Lewis ESG voting guidelines were applied to this Fund, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

How did this financial product perform compared to the reference benchmark?

● *How does the reference benchmark differ from a broad market index?*

The Index differs from a generic broad market index in following ways:

- hematic investment approach: companies that generate at least 50% of their revenues from semiconductors and are engaged primarily in the production of semiconductors and semiconductor equipment;
- ESG screenings: companies with very severe norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Fund invested 100% in line with its reference benchmark and will for that reason normally have very similar performance on sustainability indicators as the reference benchmark. The European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the environmental and social characteristics it intends to promote.

- **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund: VanEck Semiconductors UCITS ETF	Reference benchmark: MVIS® US Listed Semiconductor 10% Capped ESG Index
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles	0.00%	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%	0.00%
The percentage of portfolio involved in non-renewable energy production	0.00%	0.00%

- **How did this financial product perform compared with the broad market index?**

Indicator	Fund: VanEck Semiconductors UCITS ETF	Broad market index: Solactive GBS Global Markets Large & Mid Cap Index
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles	0.00%	4.80%
The percentage of portfolio involved in the fossil fuels industry	0.00%	11.54%
The percentage of portfolio involved in non-renewable energy production	0.00%	0.03%

Annex 4

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: VanEck Hydrogen Economy UCITS ETF

Legal entity identifier: 254900DO5110DY0JC821

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 100%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund during the reference period was to support enhancing and developing sustainable forms of energy generation and storage, because the Fund invests in companies that generate part of their revenues from hydrogen projects or projects that have the potential to generate at least part of their revenues from the hydrogen industry when developed.

Companies were included that have significant (>50%) revenue exposure to hydrogen, fuel cells or technologies that were directly connected to the hydrogen economy. In case it was not possible to do so without severely compromising Fund's liquidity, tradability and representativeness, the Fund also considered companies with at least part of their revenues from fuel cells or industrial gases projects or projects that have the potential to generate at least part of their revenues from the fuel cell industry or the industrial gases industry. Such companies could potentially enable Hydrogen Economy by either providing crucial supplies or creating infrastructural solutions that could be repurposed for hydrogen-related usage.

A percentage of the portfolio was involved in the fossil fuel industry. This is due to the early development stages of the global hydrogen segment. The strategy targets companies with significant proportion of their revenues from hydrogen projects or projects that have the potential to generate significant revenues from the hydrogen industry when developed. The ETF also considers companies that participate in fuel cells or industrial gases projects. Thanks to their scale, such companies can provide R&D funding and expertise crucial to the development of hydrogen economy, as well as potentially repurpose their facilities for hydrogen generation and distribution. Some of those companies would inevitably be involved in the fossil fuels industry.

The Fund's total contribution to these sub-themes has been calculated by measuring the net weighted percentages of companies' revenues derived from the themes mentioned above.

A reference benchmark, MVIS® Global Hydrogen Economy ESG Index, has been designated for the purpose of attaining the sustainable investment objective. To measure the attainment of the Fund's sustainable investment objective, the sustainability indicators included in the next question were calculated for the Fund.

● **How did the sustainability indicators perform?**

The sustainability Indicators performed as below:

Indicator	Score
The weighted percentage of investee companies' revenues derived from hydrogen and fuel cell projects.	42.37%
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights.	0.00%
The percentage of portfolio involved in the fossil fuels industry	8.60%
The percentage of portfolio involved in non-renewable energy production	0.00%

...and compared to previous periods?

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The Fund has not invested in companies which cause significant harm to any other environmental or social sustainable investment objective by applied screenings.

The screenings consist of various components:

- Controversial sector involvement, whereby companies were screened for involvement in:
 - Controversial weapons: a 0% revenue threshold is applied.
 - Tobacco, thermal coal, fossil fuels, oil sands, nuclear energy, civilian firearms, military and gambling: a 5% revenue threshold is applied.
- Norm-Based Research, whereby companies were screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery.

Companies for which there was no data available on one or more screening components, do not constitute a violation of environmental or social objectives on that specific screening component. Companies that were not covered by the ESG data provider or for which all relevant data fields were not collected by the ESG data provider may be eligible for inclusion, by means of the Index Provider acting on its best effort.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Indicators for adverse impacts on sustainability factors were taken into account based on the Fund's thematic investment policy focusing on sustainable forms of energy generation, adverse impacts on sustainability factors such as GHG emissions, carbon footprint, GHG intensity are limited and therefore implicitly taken into account.

In addition, the Fund considered the following indicators for principal adverse impacts:

1. Greenhouse Gas (GHG Emissions):
 - As part of Norm-based research companies are assessed relating to environmental protection based on the screening on "Failure to mitigate climate change impacts"
 - Fossil Fuel/Coal - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.

- Companies that are eligible for the index inclusion under sub-theme F, must display a positive environmental impact by having at least one score larger than zero, and the other score at least zero, related to the Contribution and Achievement of Sustainable Agriculture and Forestry or Agriculture Climate Change Contribution.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging"
 3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill"
 4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances"
 5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - Norm-based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
 - Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value"
 - Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

All companies included in the Index since the Fund launch, were covered by the ESG data provider.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, norm-based research was conducted, whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery. Norm-based Research framework consists of research on the level of adherence of a company to the

Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and is embedded in the Sustainable Development Goals.

Violations of these standards were measured by reference to the Case Severity Indicator. The Case Severity Indicator is a measure of the reported risk or impact on society or the environment and takes into account the degree of corporate involvement. The values which refer to severity are indicated in the Normed-based Research Methodology as 'Very Severe', 'Severe', 'Moderate' and 'Potential'. The 'Very Severe' value identified instances where the company is reportedly causing/contributing to critical adverse impact and is excluded from the Index.

Furthermore, the overall Norm-based research Score ("NBSOverallScore") assigns a 1-10 rating score to an issuer based on the issuer's link with any violations of international standards. The Index Provider excluded from the investable universe the companies which were assessed with a score of 9 or 10.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product considered principal adverse impacts on sustainability factors as exposure to certain environmental adverse impacts was minimized due to the thematic investment policy of the Fund, whereby specific emphasis was placed on companies which contribute to the development of hydrogen-based energy generation. In addition, by means of Norm-based research and Controversial sector involvement screenings, the Fund took the principal adverse impacts on sustainability factors relating to greenhouse gas emissions, biodiversity, water, waste, social and employee, respect for human rights, anti-corruption and anti-bribery matters into account.

For detailed information, please refer to the questions "How were the indicators for adverse impacts on sustainability factors taken into account?" and "How did sustainable investments not cause significant harm to any environmental or social sustainable investment objective?"

Additionally, principal adverse impacts were considered as part of the Glass Lewis ESG tilted voting policy, whereby votes were casted regarding the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
NEL ASA	Industrials	10.22	NO
BLOOM	Industrials	9.97	US

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022

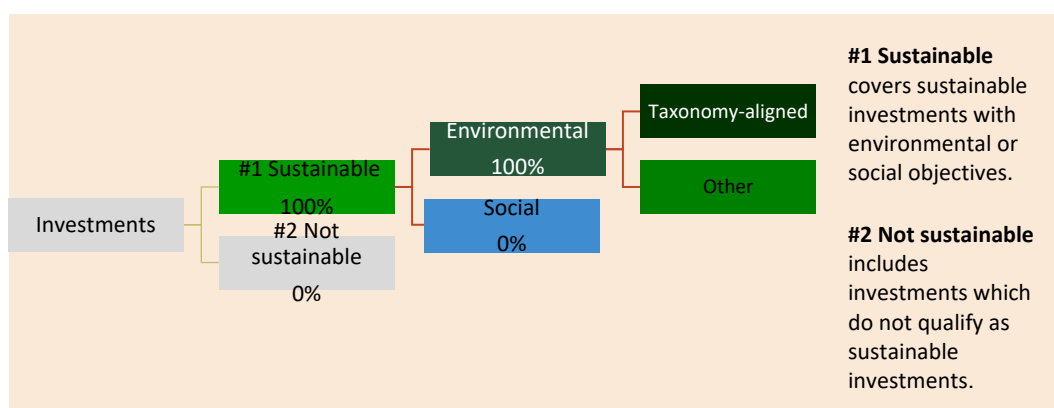

PLUG POWER	Industrials	9.45	US
LINDE PLC		8.23	GB
mitsubishi		8.22	JP
AIR PRODUCTS	Materials	8.16	US
AIR LIQUIDE SA		8.14	FR
BALLARD	Industrials	7.22	CA
DOOSAN FUEL	Industrials	5.42	KR
NIKOLA CORP	Industrials	4.24	US
CERES POWER	Industrials	3.18	GB
POWERCELL	Industrials	3.15	SE
ITM POWER	Industrials	2.87	GB
SFC ENERGY	Industrials	2.6	DE
ILJIN HYSOLUS	Consumer	1.53	KR

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

The Fund invested in direct financial instruments of which 100% was sustainable. All of these sustainable investments were environmentally sustainable.

● *In which economic sectors were the investments made?*

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Industrials	64.8
Materials	32.7
Consumer Discretionary	1.5
Consumer Staples	0.3
n/a	0.5
Other/Cash	0.2

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. While the Fund had a sustainable investment objective within the meaning of Article 9 of the SFDR and invests in sustainable food and agriculture, thereby aiming to enhance the development of sustainable agricultural services and food products, the Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

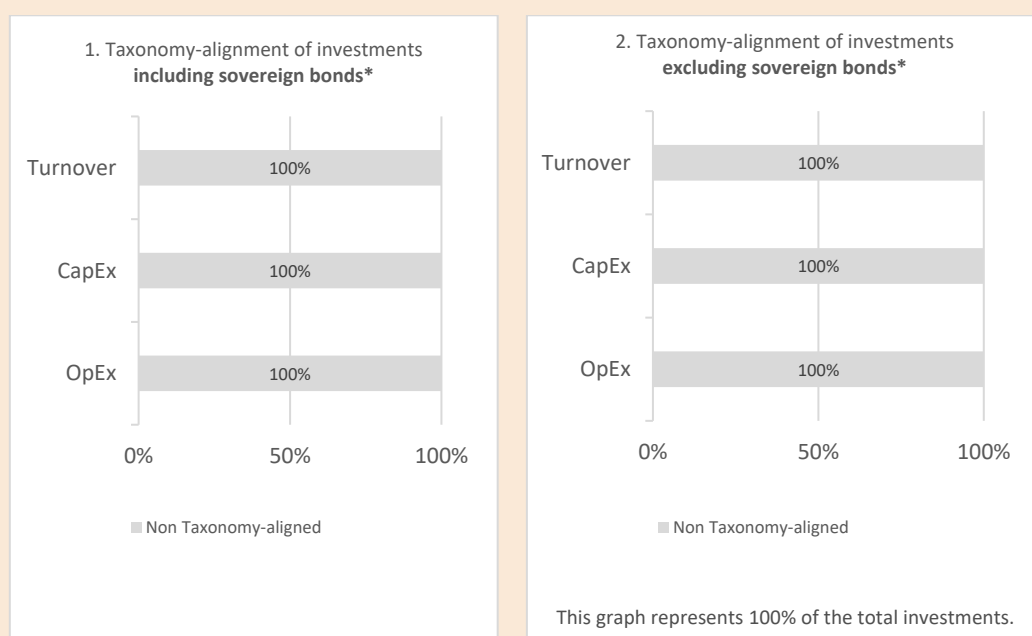

Yes

In fossil gas

In nuclear gas

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

100% of the Fund's investments was sustainable with an environmental objective that were not aligned with the EU Taxonomy. This were determined based on the (potential) revenue streams of companies related to hydrogen technology and the criteria defined for Norm-based research and Controversial sector involvement screenings to ensure that the companies in the portfolio do no significant harm to other sustainability related objectives. The Fund's investments were considered to be sustainable investments with an environmental objective, but were not aligned with the expansive and strict criteria which were defined for hydrogen in the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable as the Fund was not pursuing a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were sustainable.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Index Provider defined an ESG objective for the Index, as of 18 March 2022 the fund is since then categorized as a product that has a sustainable investment objective in accordance with Article 9 of SFDR. Companies have been screened for compliance with the Index rules and the Index is rebalanced on a quarterly basis by the Index Provider. The Fund replicates the Index based on the Index rules during the reporting period.

No breaches of the index have occurred.

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the sustainable investment objective of the Fund.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference sustainable benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

● ***How did the reference benchmark differ from a broad market index?***

The reference benchmark differs from the broad market index in the following ways:

- Thematic investment approach: companies that had significant (>50%) revenue exposure to hydrogen, fuel cells or technologies that were directly connected to the hydrogen economy are eligible for inclusion. In case it was not possible to do so without severely compromising Fund's liquidity, tradability and representativeness, the Fund also considers companies with at least part of their revenues from fuel cells or industrial gases projects or projects that had the potential to generate at least part of their revenues from the fuel cell industry or the industrial gases industry. Such companies could potentially enable Hydrogen Economy by either providing crucial supplies or creating infrastructural solutions that could be repurposed for hydrogen-related usage.
- ESG screenings: companies with very severe social norms violations, the ones that had greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

The Fund invested 100% in line with the reference benchmarks and had for that reason the same score on the sustainability indicators as the benchmarks. The Manager's European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund: VanEck Hydrogen Economy UCITS ETF	Reference benchmark: MVIS® Global Hydrogen Economy ESG Index
The weighted percentage of investee companies' revenues derived from hydrogen and fuel cell projects	42.37%	42.38%

Annex 5

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: VanEck New China ESG UCITS ETF

Legal entity identifier: 25490078IX1AAY2DHK87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics applied to the Fund's investments:

- The Fund promoted the reduction of the most negative impacts on society and the environment through:
 - Reducing exposure to controversies, by using OWL KPIs "Diversity & Rights", "Human Rights", "Management Ethics" and "Disclosure & Accountability" as part of the OWL Analytics consensus ESG score used in the index selection process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Limiting exposure to carbon risk, by using OWL KPIs “Pollution Prevention” and “Resource Efficiency” as part of the OWL Analytics consensus ESG score used in the index selection process.
2. The Glass Lewis ESG policy guidelines was applied, whereby votes were cast on sustainability matters.

The performance of the Fund’s environmental and social characteristics has been measured with the sustainability indicators included in the next question.

A reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the financial product. Compared to a non-ESG fund with similar exposure, this Fund applies mandatory Environmental and Social factors and limits. These are corresponding to the Principle Adverse Impacts specified below.

● **How did the sustainability indicators perform?**

During the reporting period, the SFDR precontractual disclosure template was not yet available and applicable for this Fund. Therefore, the sustainability indicators mentioned therein were not yet applicable as well.

Consequently, the Fund measured the following sustainability indicator:

Indicator	Score
Total GHG Emissions (Scope 1+2+3) per Mio EUR Enterprise Value	188.75

● **...and compared to previous periods?**

Since the product was launched on September 24th 2021, it is not possible to compare the performance of sustainability indicators over 2022 with the year 2021.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This question and the related questions below were not applicable as the Fund did not intend to make sustainable investments during the reporting period.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

- — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts on sustainability:

1. Greenhouse Gas (GHG Emissions):
 - Part of ESG score screening via OWL KPIs “Pollution Prevention” (including Carbon Gas Pollutant reporting, Emissions Reduction Actions and Policies) and “Resource Efficiency” (including Carbon-based Energy Use, Carbon Based Energy Productivity)
2. Biodiversity
 - Part of ESG score screening via OWL KPI “Resource Efficiency” (Biodiversity Controversies)
3. Water
 - Part of ESG score screening via OWL KPI “Resource Efficiency” (Water Use, Water Efficiency and Water Reduction Performance)
4. Waste
 - Part of ESG score screening via OWL KPIs “Pollution Prevention” (Resource Reduction Policies) and “Resource Efficiency” (including Waste Reduction, Resource Recycling)
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - ESG score includes ratings for controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
 - Part of the ESG score screening via OWL KPIs “Diversity & Rights”, “Human Rights”, “Management Ethics” and “Disclosure & Accountability”.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG tilted voting policy, whereby votes are casted regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

As of 31/12/2022:

Largest investments	Sector	% Assets	Country
YIHAI INTERNATIONAL	Food Products	1.56	CN
3SBIO INC	Biotechnology	1.47	CN

DIAGNOSTICS GROUP CO			

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022.

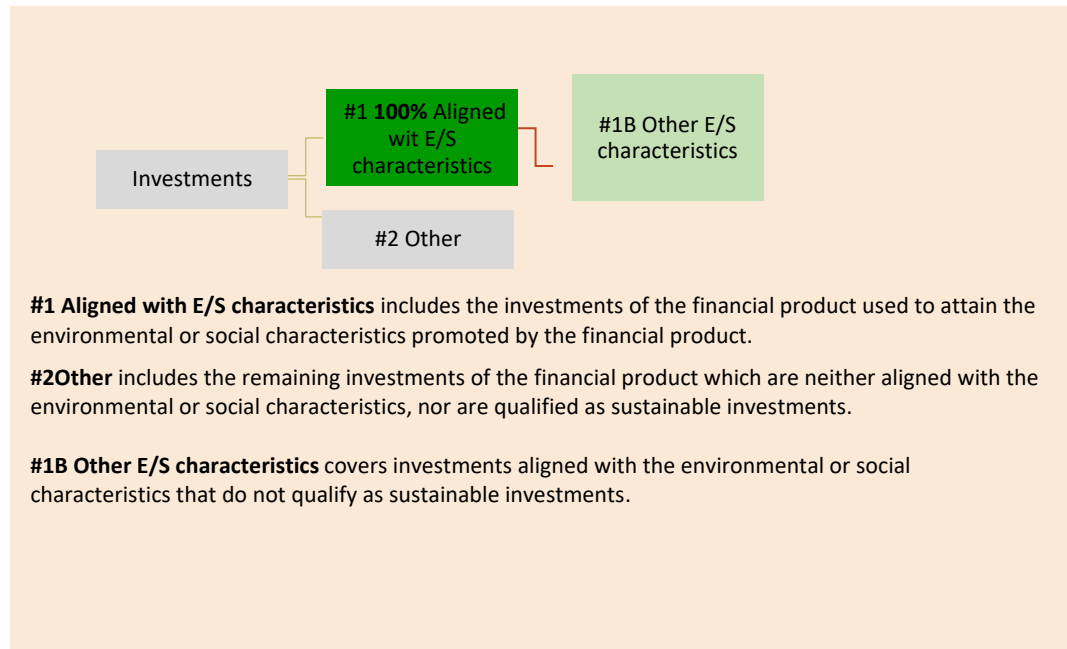

What was the proportion of sustainability-related investments?

The Fund has invested in direct financial instruments of which 100% was aligned with the environmental and social characteristics that it promotes on the basis that all of the Index holdings are screened against its exclusion strategy.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The Fund has invested in direct financial instruments of which 100% was aligned with the promoted environmental and social characteristics.

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Healthcare	28.5%
Durable goods	20.2%
IT	18.6%
Discretionary goods	11.6%
Communication	5.9%
Other	15.2%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. The Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

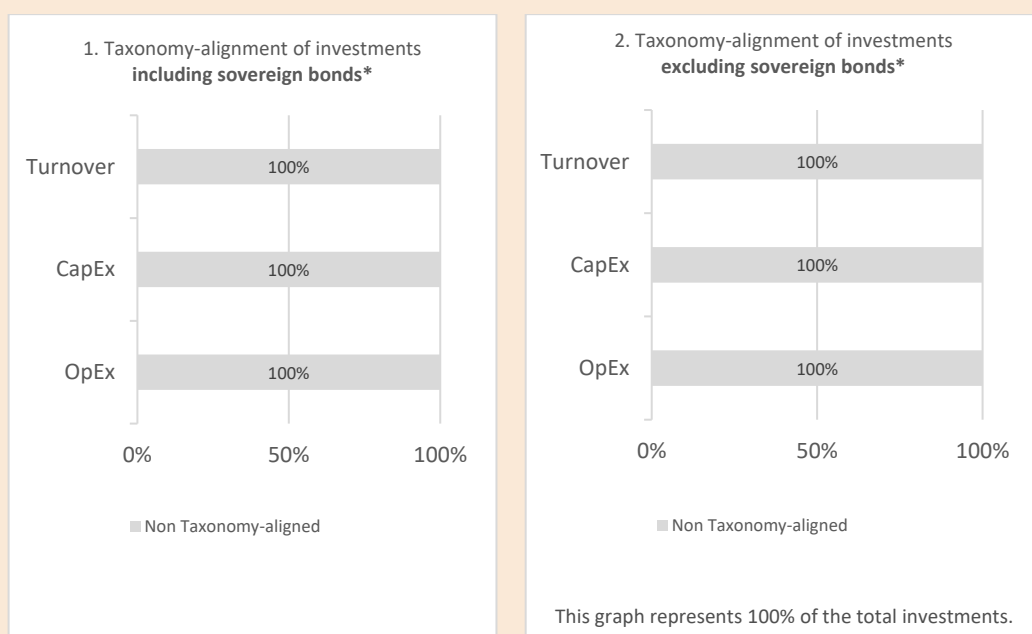

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas In nuclear gas

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Since the product was launched on September 24th 2021, it is not possible to compare the performance of sustainability indicators over 2022 with the year 2021.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Fund did not intend to make environmental sustainable investments.

What was the share of socially sustainable investments

Not applicable. The Fund did not intend to make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were aligned with the environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As a passive investments strategy, during the reporting period the Fund has tracked the MarketGrader New China ESG Index. Companies have been screened for compliance with the Index rules and the Index is rebalanced on a semi annual basis by the Index Provider. The Fund replicates the Index based on the Index rules.

No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the environmental and social characteristics of the Fund.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference benchmark?

● How does the reference benchmark differ from a broad market index?

The MarketGrader New China ESG Index differs from a broad market index by offering exposure to the chinese economy. In particular, the fund invests in targeted sectors that are expected to benefit from trends like ageing population, increasing adoption of technology and a rising upper middle class.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Fund invested 100% in line with the reference benchmarks and had for that reason the same score on the sustainability indicators as the benchmarks. The Manager's European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the environmental and social characteristics.

- **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund:	Reference benchmark:

Annex 6

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: VanEck Smart Home Active UCITS ETF
Legal entity identifier: 254900VG2ZKJ2XJZGW28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics applied to the Fund's investments:

1. The Fund promoted the reduction of the most negative impacts on society and the environment through:
 - Reducing exposure to very severe controversies relating to international standards on responsible business, human rights and labour rights;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Minimizing exposure to controversial business activities relating to tobacco, controversial weapons, energy extractives, civilian firearms and military;
- Limiting exposure to carbon risk, by excluding companies deriving significant (>5%) revenues from energy extractives, such as thermal coal.

The performance of the Fund’s environmental and social characteristics has been measured with the sustainability indicators included in the next question.

2. The Glass Lewis ESG policy guidelines was applied, whereby votes were cast on sustainability matters.
3. The Engagement policy applied to the Fund, whereby active engagement with investee companies was an integral component of the investment process. In 2022 the Sub-fund did not engage with companies on ESG-related issues specifically. However, Sub-fund’s advisors engaged with at least one company on non-ESG related matters.

A reference benchmark has not been designated for the purpose of attaining the environmental and social characteristics promoted by the financial product.

● ***How did the sustainability indicators perform?***

The Fund measured the following sustainability indicators:

Indicator	Score
Overall ESG rating of the portfolio (MSCI)	AA / 8.12
The number of sustainability matters voted on in shareholder meetings	8

● ***...and compared to previous periods?***

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

This question and the related questions below were not applicable as the Fund does not intend to make sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

- — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

- — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts on sustainability factors:

1. Greenhouse Gas (GHG Emissions):
 - Carbon emissions industry data is used for screening of investments
 - The ESG score used for screening incorporates the topic via theme “Climate Change”
 - Unacceptable greenhouse gas emitters and companies involved in production of coal or coal-based energy are excluded through the Norges Bank Exclusion list
2. Biodiversity
 - The ESG score used for screening incorporates the topic via theme “Natural Capital”
3. Water
 - The ESG score used for screening incorporates the topic via theme “Natural Capital”
4. Waste
 - The ESG score used for screening incorporates the topic via theme “Pollution & Waste”
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - The ESG score used for screening incorporates the relevant topics via themes “Human Capital”, “Product Liability”, “Stakeholder Opposition” and “Corporate Behavior”
 - Exclusions based on violation of human rights through Norges Bank Exclusion list.
 - Exclusions based on cluster munitions or nuclear weapons involvement through Norges Bank Exclusion list.

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG tilted voting policy, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

As of 31/12/2022:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022.

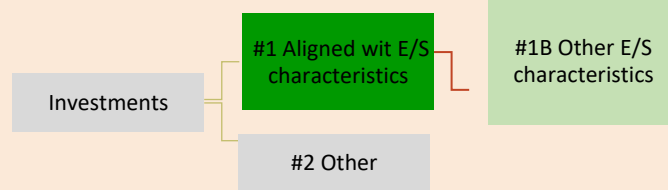

Largest investments	Sector	% Assets	Country
ZOETIS INC	Health Care	4.06	US
ELECTRONIC ARTS INC	Communication Services	4.02	US

PAYPAL HOLDINGS INC	Information Technology	2.56	US
ARISTA NETWORKS INC	Information Technology	2.56	US

What was the proportion of sustainability-related investments?

The Fund has invested in direct financial instruments of which 100% was aligned with the environmental and social characteristics that it promotes on the basis that all of the Index holdings are screened against its exclusion strategy.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

● **What was the asset allocation?**

The Fund invested in direct financial instruments of which 100% was aligned with the promoted environmental and social characteristics.

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Information Technology	28.3
Communication Services	20.66
Consumer Discretionary	14.9
Health Care	14.12
Industrials	9.04
Real Estate	5.15
Consumer Staples	5.02
Utilities	2.79
Other/Cash	0.02

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

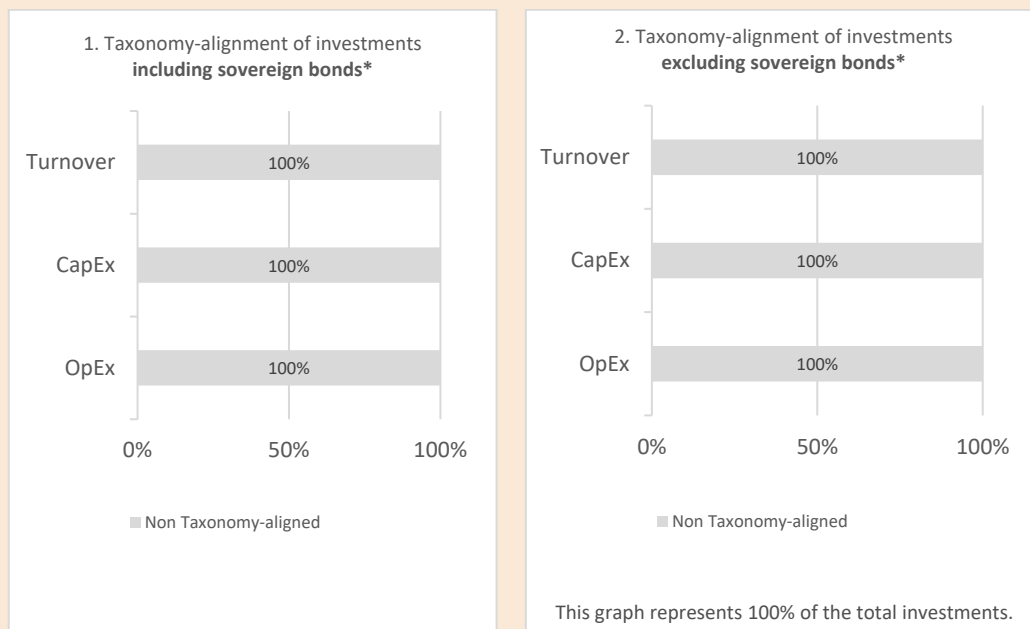

0%. The Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

- Yes
 - In fossil gas
 - In nuclear gas
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities is 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The minimum share of non-aligned environmental sustainable investments is 0%.

What was the share of socially sustainable investments

The minimum share of socially sustainable investments was 0%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable, all investments were aligned with the environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As an actively managed Fund, companies have been screened for compliance with the Investment policy by the Fund Investment Advisor. All the trades were confirmed by the Compliance team to be in line with the applicable investment guidelines.

No breaches of the ESG screening criteria have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the the environmental and social characteristics of the Fund.

How did this financial product perform compared to the reference benchmark?

Not applicable, the Fund was not assigned a reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts on sustainability factors:

1. Greenhouse Gas (GHG Emissions):
 - Part of Norm-based research on environmental protection "Failure to mitigate climate change impacts"
 - Fossil Fuel/Coal exclusions - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging"
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill"
4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances"
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - ISS norms based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
 - Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value"
 - Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons,

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-

cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG tilted voting policy, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The index differed from a generic broad market real estate index in following ways:

- Thematic investment approach: companies that generate at least 50% (25% for current components) of their revenues from the following themes:
 - Space Exploration (including design of commercial spacecrafts, space tourism, scientific research, or delivery of equipment or cargo to space);
 - Rockets and Propulsion Systems (including products and services directly related to or to space vehicle systems or equipment, space payload, or

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- other materials and equipment used to build spacecrafts or other vehicles used in space);
 - Satellite Equipment and Communications Solutions (including systems and software for satellite-based communication but excluding Pay-TV and communications service providers);
 - Other Satellite Equipment (including satellite equipment, systems or software for areas such as research, earth observation, space imaging or GPS).
- ESG Screening: companies with severe and very severe norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested 100% in line with the reference benchmark and had for that reason the same score on the sustainability indicators as the reference benchmark. The European ESG Committee has analysed and confirmed the alignment of the reference benchmark with its promoted environmental and social characteristics.

Annex 8

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: VanEck Sustainable Future of Food UCITS ETF

Legal entity identifier: 25490018AUJGR6833G82

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 100%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: ___%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The sustainable investment objective of the Fund during the reference period was to support sustainable Food Production and Development. Therefore, the Fund selected companies involved in food and agricultural technology, organic foods, or food companies that displayed high standards in food waste, food safety or environmental impact.

This included companies with at least 50% (25% for current components) of their revenues from the following sub-themes:

- (A) Plant-Based or Cultured Meat, Protein or Dairy alternatives;
- (B) Vertical or Urban Farming - this includes agricultural companies that grow crops vertically, in greenhouses or specialize in localized farming;
- (C) Precision Agriculture - this includes irrigation and smart water grid equipment, greenhouse equipment, or autonomous/robotic farming or agriculture- related equipment but excludes agricultural chemicals and plant seeds;
- (D) Food Flavors and Functional Ingredients;
- (E) Organic or Health Foods - this includes packaged foods, or agricultural products but excludes meat, poultry, fish or vitamins;
- (F) In addition, companies that met certain ESG standards related to food and agriculture sustainability and safety were also included as followed and referred to as sub-theme F. The Index Provider utilizes ESG data provided by ISS. Companies that were eligible under these conditions needed derive at least 50% (25% for current components) of their revenues from agricultural services or agricultural products (limited to fruits, vegetables, grains and dairy), or packaged plant/grain-based or dairy food products.

The Fund's total contribution to these sub-themes has been calculated by measuring the net weighted percentages of companies' revenues derived from the sub-themes A until E. Companies satisfying additional ESG criteria and thereby eligible per sub-theme F "Food ESG" were assigned a score of 50%.

A reference benchmark, MVIS® Global Future of Food ESG Index, has been designated for the purpose of attaining the sustainable investment objective.

To measure the attainment of the Fund's sustainable investment objective, the sustainability indicators included in the next question were calculated for the Fund.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as below:

Indicator	Score
The weighted percentage of investee companies' revenues derived from contribution to sustainable food production and development	49.37%
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%
The percentage of portfolio involved in non-renewable energy production	0.00%

...and compared to previous periods?

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The Fund has not invested in companies which cause significant harm to any other environmental or social sustainable investment objective. The screenings consisted of various components:

- Controversial sector involvement whereby companies were screened for involvement in:
 - Controversial weapons: a 0% revenue threshold was applied.
 - Tobacco, thermal coal, fossil fuels, oil sands, nuclear energy, civilian firearms, military and gambling: a 5% revenue threshold is applied.
- Norm-Based Research whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery.
- Companies for which there was no data available on one or more screening components, do not constitute a violation of environmental or social objectives on that specific screening component. Companies that were not covered by the ESG data provider or for which all relevant data fields were not collected by the ESG data provider may be eligible for inclusion, by means of the Index Provider acting on its best effort. All companies included in the Index since the Fund launch, were covered by the ESG data provider.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Indicators for adverse impacts on sustainability factors were taken into account on the Fund's thematic investment policy focusing on sustainable forms of food production, adverse impacts on sustainability factors such as GHG emissions, carbon footprint, GHG intensity are limited and therefore implicitly taken into account.

In addition, the Fund considered the following principal adverse impacts on sustainability factors:

1. Greenhouse Gas (GHG Emissions):

- As part of Norm-based research companies are assessed relating to environmental protection based on the screening on "Failure to mitigate climate change impacts"
- Fossil Fuel/Coal - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for the issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Companies that are eligible for the index inclusion under sub-theme F, must display a positive environmental impact by having at least one score larger than zero, and the other score at least zero, related to the Contribution and Achievement of Sustainable Agriculture and Forestry or Agriculture Climate Change Contribution.
 2. Biodiversity
- Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging"
 3. Water
- Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill"
 4. Waste
- Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances"
- Companies that are eligible for the index inclusion under sub-theme F, must display a positive environmental impact by having a rank of at least 2.5 (on a scale of 1-4) in: A.) Food Waste OR B.) Food Safety and Food Safety Certification Program.
 5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
- Norm-based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
- Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value"
- Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.
- Companies that are eligible for the index inclusion under sub-theme F, must display a positive environmental impact by having a rank of at least 2.5 (on a scale of 1-4) in: A.) Food Waste OR B.) Food Safety and Food Safety Certification Program.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, norm-based research was conducted, whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery. Norm-based Research framework consists of research on the level of adherence of a company to the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and is embedded in the Sustainable Development Goals.

Violations of these standards were measured by reference to the Case Severity Indicator. The Case Severity Indicator is a measure of the reported risk or

impact on society or the environment and takes into account the degree of corporate involvement. The values which refer to severity are indicated in the Normed-based Research Methodology as 'Very Severe', 'Severe', 'Moderate' and 'Potential'. The 'Very Severe' value identified instances where the company is reportedly causing/contributing to critical adverse impact and is excluded from the Index.

Furthermore, the overall Norm-based research Score ("NBSOverallScore") assigns a 1-10 rating score to an issuer based on the issuer's link with any violations of international standards. The Index Provider excluded from the investable universe the companies which were assessed with a score of 9 or 10.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product considered principal adverse impacts on sustainability factors as exposure to certain environmental adverse impacts is minimized due to the thematic investment policy of the Fund whereby specific emphasis is placed on companies which contribute to the development of sustainable forms of food production. In addition, by means of Norm-based research and Controversial sector involvement screenings, the Fund takes the principal adverse impacts on sustainability factors relating to greenhouse gas emissions, biodiversity, water, waste, social and employee, respect for human rights, anti-corruption and anti-bribery matters into account. For detailed information, please refer to the questions "How were the indicators for adverse impacts on sustainability factors taken into account?" and "How did the sustainable investments not cause significant harm to any sustainable investment objective?"

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG policy guidelines, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product ?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022.

Largest investments	Sector	% Assets	Country
INGREDION INC	Consumer Staples	8.06	US
SPROUTS FARMERS	Consumer Staples	5.3	US
CHR HANSEN	Materials	5.17	DK
AAK AB	Consumer Staples	4.62	SE
CHINA FEIHE LTD	Consumer Staples	4.61	CN
SAPUTO INC	Consumer Staples	4.61	CA
ARCHER-DANIELS-DANONE SA	Consumer Staples	4.57	US
		4.54	FR

FLOWERS FOODS INC	Consumer Staples	4.52	US
KERRY GROUP PLC	Consumer Staples	4.51	IE
INTERNATIONAL	Materials	4.45	US
CORBION NV		4.37	NL
GIVAUDAN SA	Materials	4.34	CH
SENSIENT		4.28	US
BALCHEM CORP	Materials	4.2	US

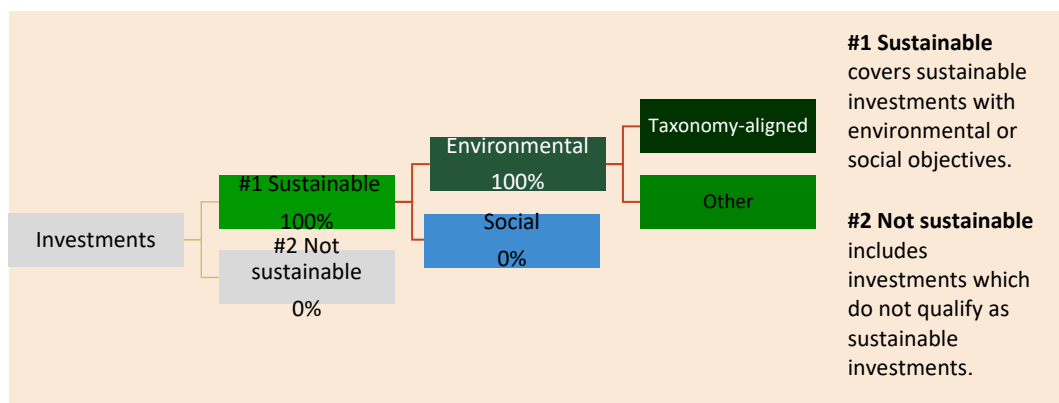

What was the proportion of sustainability-related investments?

100% of the portfolio was deemed as composed by sustainability-related investments, according to the definition given above.

● What was the asset allocation?

The Fund invested in direct financial instruments of which 100% was sustainable. All of these sustainable investments were environmentally sustainable.

● In which economic sectors were the investments made?

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Consumer Staples	66.4
Materials	29.3
Industrials	2.9
Consumer Discretionary	1.3
Other/Cash	0.1

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. While the Fund had a sustainable investment objective within the meaning of Article 9 of the SFDR and invests in sustainable food and agriculture, thereby aiming to enhance the development of sustainable agricultural services and food products, the Fund did not intend to make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reporting period. During the reporting period a limited amount of companies has reported on Taxonomy-alignment.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear gas

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

100% of the Fund's investments was sustainable with an environmental objective that were not aligned with the EU Taxonomy. This is determined based on the (potential) revenue streams of companies related to sustainable food production and the criteria defined for Norm-based research and Controversial sector involvement screenings to ensure that the companies in the portfolio do no significant harm to other sustainability related objectives. The Fund's investments were considered to be sustainable investments with an environmental objective, but were not aligned with the expansive and strict criteria which were defined for sustainable food production in the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not intend to make socially sustainable investments..

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were sustainable.

What actions have been taken to attain the sustainable investment objective during the reference period?

Companies have been screened for compliance with the Index rules and the Index has been rebalanced on a quarterly basis by the Index Provider. The Fund has replicates the Index based on the Index rules during the reporting period.

No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the sustainable investment objective of the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference sustainable benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

● *How did the reference benchmark differ from a broad market index?*

The reference benchmark differs from the broad market index in the following ways:

- Thematic investment approach: companies that generate at least 50% (25% for current components) of their revenues from agricultural and food technology, organic foods, or food companies that display high standards in food waste, food safety or environmental impact are eligible for inclusion.
- ESG screenings: companies with very severe social norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

The Fund invested 100% in line with the reference benchmarks and had for that reason the same score on the sustainability indicators as the benchmarks. The Manager's European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the Fund's sustainable investment objective.

● *How did this financial product perform compared with the reference benchmark?*

Indicator	Fund:	Reference benchmark:
	VanEck Sustainable Future of Food UCITS ETF	MVIS® Global Future of Food ESG Index
The weighted percentage of investee companies' revenues derived from	49.37%	49.38%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

contribution to sustainable food production and development		
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights	0.00%	0.00%

Annex 9

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: VanEck Genomics and Healthcare Innovators UCITS ETF
Legal entity identifier: 254900K9GCSPWNLRN078

Sustainable investment objective

Did this financial product have a sustainable investment objective?

●● <input checked="" type="checkbox"/> Yes	●○ <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 100%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund during the reference period was to invest in companies that enhance and developing products and services that increase the accessibility of healthcare (e-healthcare) and improvement of the quality of life via genomic disease treatment and diagnostics, thereby contributing to social objectives aligned with the Sustainable Development Goals (SDG) goal “Good Health and Well-being”.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Therefore, the Fund invested in companies which were determined by the Index Provider to generate a significant (>50%, >25% for current components) part of their revenues from the following sub-themes:

- (A) Healthcare therapies based on the targeting or modification of genetic makeup of cells or uses mRNA;
- (B) Technology platforms that enable the development of genetics-based healthcare therapies;
- (C) Laboratory equipment or services used to test, code, or develop genetics-based healthcare therapies;
- (D) Software used to facilitate online medical consultations;
- (E) E-Commerce pharmacies;
- (F) Software for the management of medical practices and/or patient records;
- (G) Outpatient medical Internet of Things devices which allow remote monitoring of health indicators such as heart rate and rhythm, or glucose levels.

The Fund's total contribution to these sub-themes has been calculated by measuring the net weighted percentages of companies' revenues derived from genomics and e-healthcare (sub-themes A till G).

A reference benchmark, MVIS® Global Future Healthcare ESG Index, has been designated for the purpose of attaining the sustainable investment objective.

To measure the attainment of the Fund's sustainable investment objective, the sustainability indicators included in the next question were calculated for the Fund.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as below:

Indicator	Score
The weighted percentage of investee companies' revenues derived from contribution to genomics and e-Healthcare	49.59%
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%
The percentage of portfolio involved in non-renewable energy production	0.00%

...and compared to previous periods?

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that the Fund has not invested in companies which cause significant harm to any other environmental or social sustainable investment objective,

screenings were applied in the underlying index construction process. The screenings consist of various components:

- Controversial sector involvement whereby companies are screened for involvement in:
 - Controversial weapons: a 0% revenue threshold is applied.
 - Tobacco, thermal coal, fossil fuels, oil sands, nuclear energy, civilian firearms, military and gambling: a 5% revenue threshold is applied.
- Norm-Based Research whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider reviews the impact and acts on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

In addition, the Fund considered the following principal adverse impacts on sustainability factors:

1. Greenhouse Gas (GHG Emissions):
 - Part of Norm-based research on environmental protection "Failure to mitigate climate change impacts", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
 - Fossil Fuel/Coal - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for the issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

hazardous substances", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.

5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - Norm-based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.
 - Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
 - Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider will review the impact and will act on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company. All companies included in the Index since the Fund launch, were covered by the ESG data provider.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, norm-based research was conducted, whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery. Norm-based Research framework consists of research on the level of adherence of a company to the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and is embedded in the Sustainable Development Goals.

Violations of these standards were measured by reference to the Case Severity Indicator. The Case Severity Indicator is a measure of the reported risk or impact on society or the environment and takes into account the degree of corporate involvement. The values which refer to severity are indicated in the Normed-based Research Methodology as 'Very Severe', 'Severe', 'Moderate'

and 'Potential'. The 'Very Severe' value identified instances where the company is reportedly causing/contributing to critical adverse impact and is excluded from the Index.

Furthermore, the overall Norm-based research Score ("NBSOverallScore") assigns a 1-10 rating score to an issuer based on the issuer's link with any violations of international standards. The Index Provider excluded from the investable universe the companies which were assessed with a score of 9 or 10.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product considered principal adverse impacts on sustainability factors by means of Norm-based research and Controversial sector involvement screenings the Fund takes the principal adverse impacts on sustainability factors relating to greenhouse gas emissions, biodiversity, water, waste, social and employee, respect for human rights, anti-corruption and anti-bribery matters into account.

For detailed information, please refer to the questions "How were the indicators for adverse impacts on sustainability factors taken into account?" and "How did the sustainable investments not cause significant harm to any sustainable investment objective?"

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG policy guidelines, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MODERNA INC	Health Care	8.35	US

ALIBABA HEALTH	Consumer Discretionary	1.76	CN

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022.

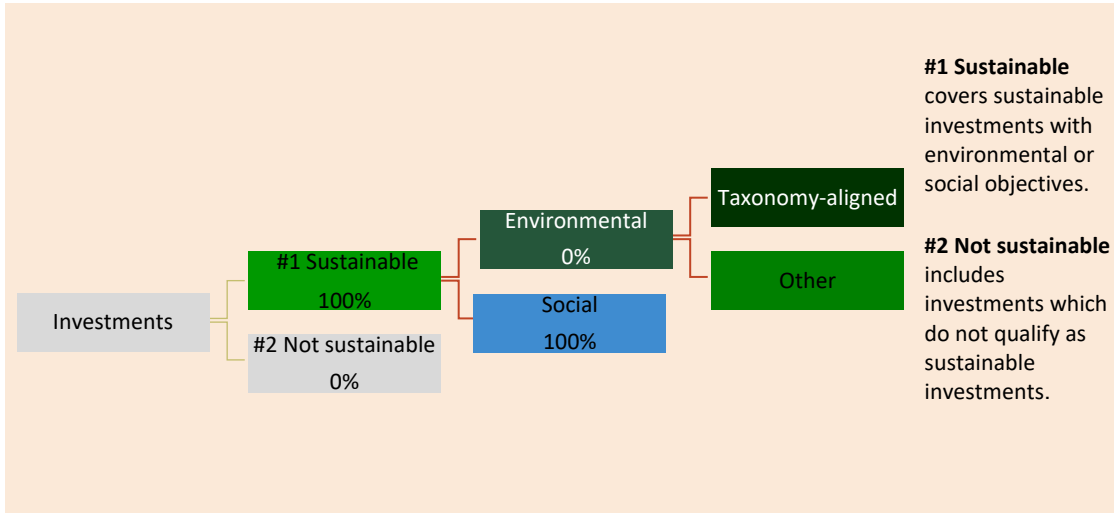

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

The Fund invested in direct financial instruments of which 100% was sustainable. All of these sustainable investments were socially sustainable.

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Health Care	93.8
Consumer Discretionary	5.9
Materials	0.2
Consumer Staples	0.2
Other/Cash	-0.2

The weights may not sum up to 100% due to rounding.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. Due to the Fund’s emphasis on social objectives, within the meaning of Article 9 of the SFDR, the Fund did not intend to invest in economic activities that contribute to an environmental objective during the reporting period. The investments underlying the Fund therefore did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

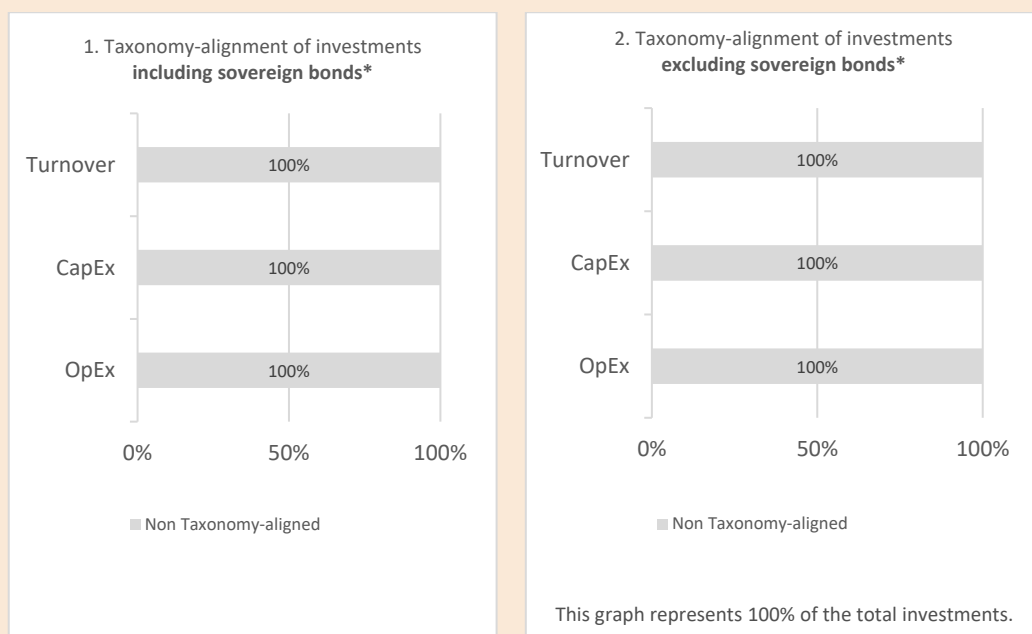

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas In nuclear gas

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Not applicable as the Fund did not intend to make environmentally sustainable investments.

What was the share of socially sustainable investments?

100% of the Fund's investments was sustainable with a social objective. This is determined based on the (potential) revenue streams of companies related to the genomic health care and electronic healthcare industries and the criteria defined for Norm-based research and Controversial sector involvement screenings to ensure that the companies in the portfolio do no significant harm to other sustainability related objectives.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were sustainable.

What actions have been taken to attain the sustainable investment objective during the reference period?

Companies have been screened for compliance with the Index rules and the Index has been rebalanced on a semi-annual basis by the Index Provider. The Fund has replicated the Index based on the Index rules during the reporting period. No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the sustainable investment objective of the Fund.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference sustainable benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

The Index differs from a generic broad market index in following ways:

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- Thematic investment approach: only companies that generate at least 50% (25% for current components) of their revenues from the genomic health care and electronic healthcare industries are eligible for inclusion.
- ESG screenings: companies with very severe social norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

The Fund aimed at investing 100% in line with its reference benchmark and will for that reason normally have very similar performance on sustainability indicators as the reference benchmark: MVIS® Global Future Healthcare ESG Index. The European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the Fund’s sustainable investment goal.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund: VanEck Genomics and Healthcare Innovators UCITS ETF	Reference Benchmark: MVIS® Global Future Healthcare ESG Index
The weighted percentage of investee companies’ revenues derived from contribution to genomics and e-Healthcare	49.59%	49.59%

Annex 10

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: [Sub-fund is not registered for distribution in Switzerland]

Legal entity identifier: 25490039EAJAQAXY8457

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 100%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund aimed at supporting sustainable production and consumption practices. Therefore, the Fund invests in companies active in water purification and treatment products or services, waste-to-energy and biofuels, general waste management services that include recycling services, metal recycling services as well as companies deriving majority of their revenues from products that are made of - or services related to - recycled, repurposed, or reused materials. Companies that meet certain ESG standards related to sustainable water purification, waste management and recycling services are also included. The Fund's total contribution to these sub-themes has been calculated by

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

measuring the weighted percentages of companies' revenues derived from aforementioned themes.

A reference benchmark, MVIS® Global Circular Economy ESG Index, has been designated for the purpose of attaining the sustainable investment objective.

To measure the attainment of the sustainable investment objective of this financial product, the sustainability indicators included in the next question were calculated for the Fund.

● ***How did the sustainability indicators perform?***

The sustainability Indicators performed as below:

Indicator	Score
The weighted percentage of investee companies' revenues attributable to circular economy	50%
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights. The target is 0% at rebalancing;	0.00%
The percentage of portfolio involved in the fossil fuels industry	0.00%
The percentage of portfolio involved in non-renewable energy production	0.02%

...and compared to previous periods?

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

To ensure that the companies do not significantly harm any environmental or social sustainable investment objective, screenings were applied in the underlying index construction process. The screenings consist of various components:

- Controversial sector involvement whereby companies are screened for involvement in:
 - Controversial weapons: a 0% revenue threshold is applied.
 - Tobacco, thermal coal, fossil fuels, oil sands, nuclear energy, civilian firearms, military and gambling: a 5% revenue threshold is applied.
- Norm-Based Research whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider will review the

impact and will act on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Based on the Fund's thematic investment policy focusing on recycling and sustainable production, adverse impacts on sustainability factors such as GHG intensity, Water Emissions and Hazardous Waste Ratio were limited and therefore implicitly taken into account. The Fund also considered the following principal adverse impacts on sustainability factors:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1. Greenhouse Gas (GHG Emissions):
 - Part of Norm-based research on environmental protection "Failure to mitigate climate change impacts", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
 - Fossil Fuel/Coal - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for the issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - Norm-based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.

- Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value", which comprises the Controversy Score used in the selection process. Companies with very severe controversies score were excluded from the selection process.
- Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider reviews the impact and acts on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company. As of December 2022 rebalancing, no companies which were not covered by the ESG data provider, were included in the Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, norm-based research was conducted, whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery. Norm-based Research framework consists of research on the level of adherence of a company to the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and is embedded in the Sustainable Development Goals.

Violations of these standards were measured by reference to the Case Severity Indicator. The Case Severity Indicator is a measure of the reported risk or impact on society or the environment and takes into account the degree of corporate involvement. The values which refer to severity are indicated in the Normed-based Research Methodology as 'Very Severe', 'Severe', 'Moderate' and 'Potential'. The 'Very Severe' value identified instances where the company is reportedly causing/contributing to critical adverse impact and is excluded from the Index.

Furthermore, the overall Norm-based research Score ("NBSOverallScore") assigns a 1-10 rating score to an issuer based on the issuer's link with any violations of international standards. The Index Provider excluded from the investable universe the companies which were assessed with a score of 9 or 10.

How did this financial product consider principal adverse impacts on sustainability factors?

Exposure to certain environmental adverse impacts is minimized due to the thematic investment policy of the Fund whereby specific emphasis is placed on companies which contribute to the development of sustainable forms of production and consumption. In addition, this financial product considered principal adverse impacts on sustainability factors by means of Norm-based research and Controversial sector involvement screenings the Fund takes the principal adverse impacts on sustainability factors relating to greenhouse gas emissions, biodiversity, water, waste, social and employee, respect for human rights, anti-corruption and anti-bribery matters into account.

For detailed information, please refer to the questions *“How have the indicators for adverse impacts on sustainability factors been taken into account?”* and *“How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”*

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG policy guidelines, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The Fund invested in direct financial instruments of which 100% was sustainable. All of these sustainable investments were environmentally sustainable.

● In which economic sectors were the investments made?

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Industrials	56.85
Materials	31.89
Consumer Staples	5.05
Utilities	4.39
Energy	1.61
Other/Cash	0.2

The weights may not sum up to 100% due to rounding

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund has a sustainable investment objective within the meaning of Article 9 of the SFDR and invests in companies involved in recycling products and services and those enabling enhancement of goods lifecycles, thereby aiming to enhance the development of sustainable recycling solutions and reducing the amount of generated waste, the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, the Fund's portfolio alignment with such Taxonomy Regulation was not calculated. It follows that the minimum extent of sustainable investments with an aligned environmental objective aligned with the Taxonomy Regulation is currently 0%.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

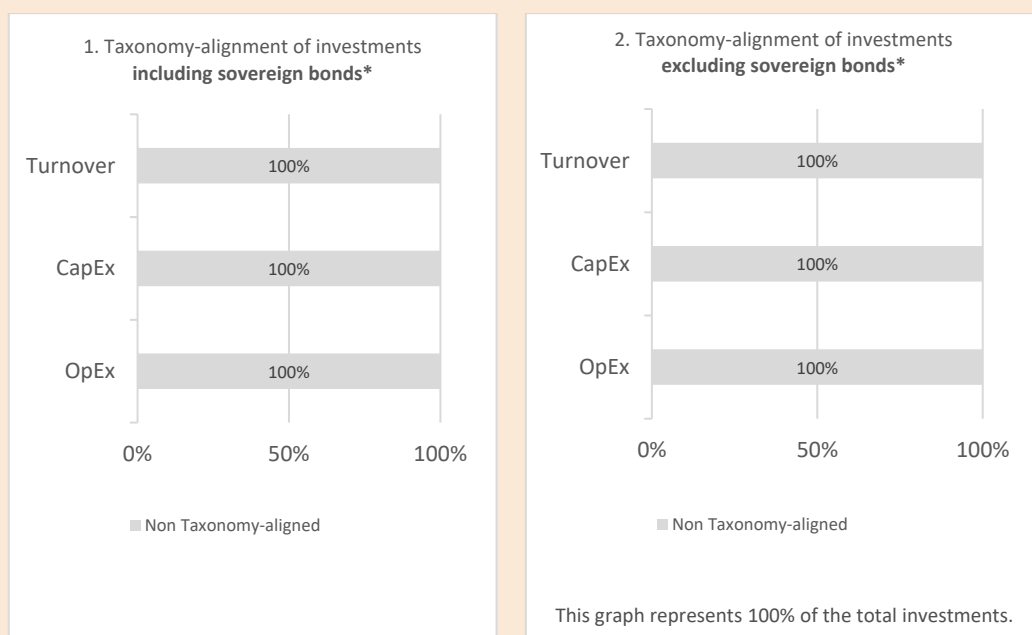

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

- Yes
- In fossil gas In nuclear gas
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting periode. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

100% of the Fund’s investments is sustainable with an environmental objective that are not aligned with the EU Taxonomy. This is determined based on the (potential) revenue streams of companies related to sustainable production and consumption practices and the criteria defined for Norm-based research and Controversial sector involvement screenings to ensure that the companies in the portfolio do no significant harm to other sustainability related objectives. The Fund’s investments are considered to be sustainable investments with an environmental objective, but are not aligned with the expansive and strict criteria which are defined for circular economy in the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable as the Fund did not intend to make socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were sustainable.

What actions have been taken to attain the sustainable investment objective during the reference period?

Companies have been screened for compliance with the Index rules and the Index has been rebalanced on a semi-annual basis by the Index Provider. The Fund has replicated the Index based on the Index rules during the reporting period.

No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the sustainable investment objective of the Fund.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

How did this financial product perform compared to the reference sustainable benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

● **How did the reference benchmark differ from a broad market index?**

The index differs from a generic broad market index in following ways:

- Thematic investment approach: only companies that derive at least 50% (25% for current components) of their revenues from water purification and treatment products or services, waste-to-energy and biofuels, general waste management services that include recycling services, metal recycling services or companies with at least 50% of their revenues (25% for current components) from products that are made of - or services related to - recycled, repurposed, or reused materials. In addition, companies that meet certain ESG standards related to sustainable water purification, waste management and recycling services could also be included are eligible for inclusion.
- ESG screenings: companies with very severe social norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The Fund invested 100% in line with the reference benchmarks and had for that reason the same score on the sustainability indicators as the benchmarks. The Manager’s European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the Fund’s sustainable investment objective.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund [Sub-fund is not registered for distribution in Switzerland]	Reference benchmark MVIS®Global Circular Economy ESG Index

Annex 11

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: [Sub-fund is not registered for distribution in Switzerland]
Legal entity identifier: 254900QPAYF1L0Z4C422

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 100%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 100%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund during the reference period was to support enhancing and developing products that increase the quality of life by providing goods and services vital to preservation, correction and augmentation of human body functions, thereby contributing to social objectives aligned with the Sustainable Development Goals (SDG) "Good Health and Well-Being" and "Reduced Inequality".

Therefore, the Fund aimed at investing in companies which were determined by the Index Provider to generate a significant (>50%, >25% for current components) part of their

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

revenues from medical implants, prosthesis, or bioprinting and preservation of organs and tissues.

The Fund's total contribution to these sub-themes has been calculated by measuring the net weighted percentages of companies' revenues derived from the themes named above.

A reference benchmark, MVIS® Global Bionic Healthcare ESG Index, has been designated for the purpose of attaining the sustainable investment objective.

To measure the attainment of the Fund's sustainable investment objective, the sustainability indicators included in the next question were calculated for the Fund.

● ***How did the sustainability indicators perform?***

The sustainability Indicators performed as below:

Indicator	Score
The weighted percentage of investee companies' revenues derived from contribution to medical implants, prosthesis, or bioprinting and preservation of organs and tissues	50.00%
The percentage of portfolio involved in violations of UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights	00.00%
The percentage of portfolio involved in the fossil fuels industry	00.00%
The percentage of portfolio involved in non-renewable energy production.	00.00%

...and compared to previous periods?

This question will be answered when this report has been published for more than one reporting periode. The first time a comparison of the sustainability indicators will be included is in the annual report over 2023.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The Fund has not invested in companies which cause significant harm to any other environmental or social sustainable investment objective. The screenings consist of various components:

- Controversial sector involvement whereby companies are screened for involvement in:
 - Controversial weapons: a 0% revenue threshold is applied.
 - Tobacco, thermal coal, fossil fuels, oil sands, nuclear energy, civilian firearms, military and gambling: a 5% revenue threshold is applied.

- Norm-Based Research whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery.

Companies for which there is no data available on one or more screening components do not constitute a violation of environmental or social objectives on that specific screening component. In these cases the Index Provider reviews the impact and acts on a best efforts basis to ensure data coverage by performing qualitative data research through the review of press releases, reporting and other relevant publicly available information of the respective company.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Indicators for adverse impacts on sustainability factors were taken into account. The Fund considered the following principal adverse impacts on sustainability factors:

1. Greenhouse Gas (GHG Emissions):
 - As part of Norm-based research on environmental protection based on the screening on "Failure to mitigate climate change impacts"
 - Fossil Fuel/Coal - Total Maximum Percentage of Revenues is 5%: This factor provides the maximum percentage of recent-year revenues for the issuer's total involvement in coal/fossil fuel, including any exposure in Production, Exploration, Distribution, and Services.
 - Companies that are eligible for the index inclusion under sub-theme F, must display a positive environmental impact by having at least one score larger than zero, and the other score at least zero, related to the Contribution and Achievement of Sustainable Agriculture and Forestry or Agriculture Climate Change Contribution.
2. Biodiversity
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity" and "Failure to prevent deforestation / illegal logging"
3. Water
 - Part of Norm-based research on environmental protection "Failure to prevent depletion of biodiversity", "Failure to prevent water pollution" and "Failure to prevent oil spill"
4. Waste
 - Part of Norm-based research on environmental protection "Poor waste management", "Poor nuclear safety", "Failure to prevent pollution" and "Failure to mitigate the production / distribution of hazardous substances"
5. Social and employee, respect for human rights, anti-corruption and anti-bribery matters
 - Norm-based screening covers controversial practices that have adverse impacts on society and the environment in line with established expectations for Responsible Business Conduct as set forth in the core normative framework consisting of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights, all of which are embedded in the Sustainable Development Goals.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Part of Norm-based research on Human Rights, including "Failure to conduct human rights due diligence" and "Failure to provide equal pay for work of equal value"
- Controversial weapons screenings are performed whereby companies with a RED exposure score in anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, incendiary weapons, white phosphorus and nuclear weapons are excluded from the index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, norm-based research was conducted, whereby companies are screened for violations of international standards concerning various norms such as human rights, labor rights, environmental risk and bribery. Norm-based Research framework consists of research on the level of adherence of a company to the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and is embedded in the Sustainable Development Goals.

Violations of these standards were measured by reference to the Case Severity Indicator. The Case Severity Indicator is a measure of the reported risk or impact on society or the environment and takes into account the degree of corporate involvement. The values which refer to severity are indicated in the Norm-based Research Methodology as 'Very Severe', 'Severe', 'Moderate' and 'Potential'. The 'Very Severe' value identified instances where the company is reportedly causing/contributing to critical adverse impact and is excluded from the Index.

Furthermore, the overall Norm-based research Score ("NBSOverallScore") assigns a 1-10 rating score to an issuer based on the issuer's link with any violations of international standards. The Index Provider excluded from the investable universe the companies which were assessed with a score of 9 or 10.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product considered principal adverse impacts on sustainability factors. By means of Norm-based research and Controversial sector involvement screenings, the Fund takes the principal adverse impacts on sustainability factors relating to greenhouse gas emissions, biodiversity, water, waste, social and employee, respect for human rights, anti-corruption and anti-bribery matters into account. For detailed information, please refer to the questions "How were the indicators for adverse impacts on sustainability factors taken into account?" and "How did the sustainable investments not cause significant harm to any sustainable investment objective?"

Additionally, principal adverse impacts are considered as part of the Glass Lewis ESG policy guidelines, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022.

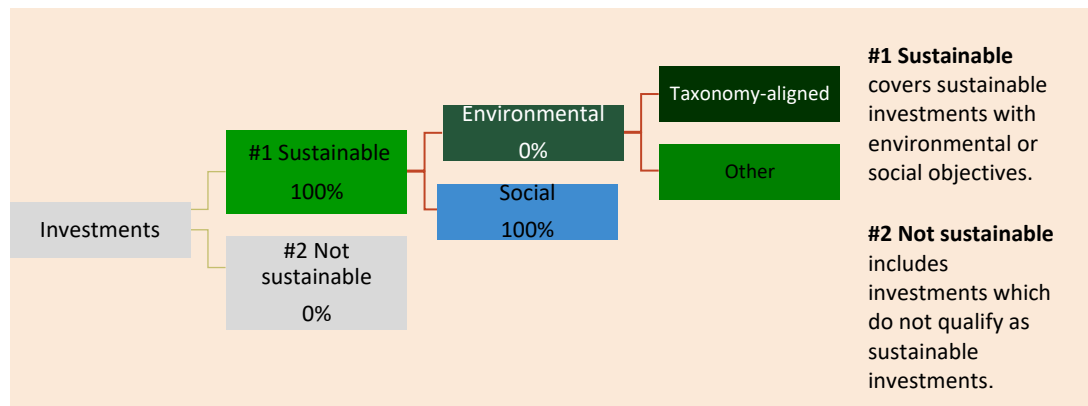

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

The Fund invested in direct financial instruments of which 100% was sustainable. All of these sustainable investments were environmentally sustainable.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

● **In which economic sectors were the investments made?**

As of 31/12/2022 the assets were allocated to the following sectors:

Sector	Weight, %
Health Care	99.9
Other/Cash	0.1

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

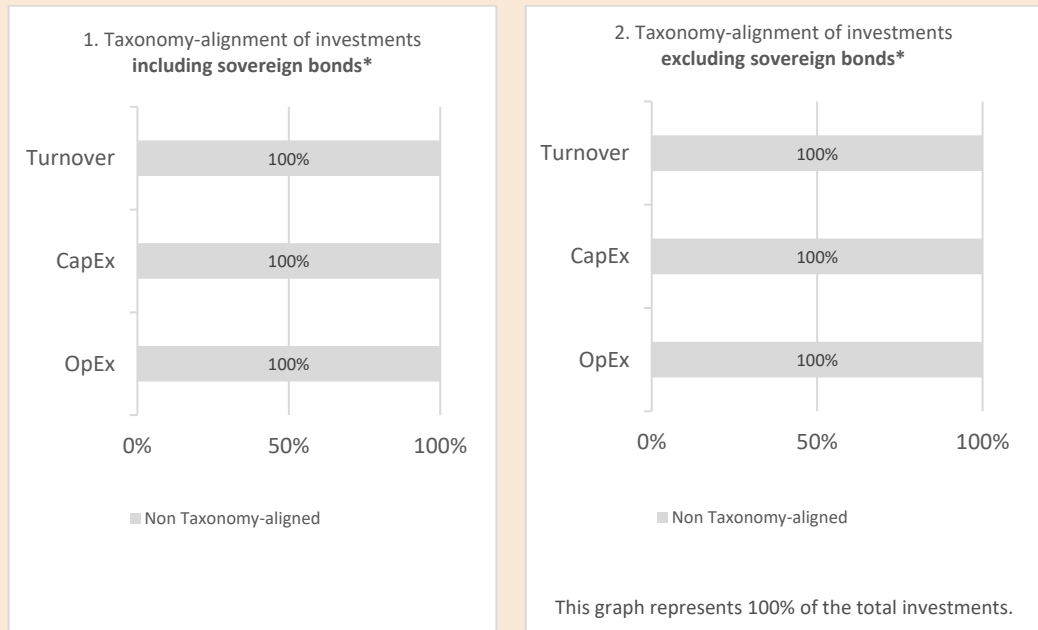

0%. Due to the Fund’s emphasis on social objectives, within the meaning of Article 9 of the SFDR, the Fund did not intend to invest in economic activities that contribute to an environmental objective during the reporting period. The investments underlying the Fund therefore did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

- Yes
- In fossil gas In nuclear gas
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The minimum share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question will be answered when this report has been published for more than one reporting period. The first time a comparison of the investments aligned with the EU Taxonomy will be included is in the annual report over 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Not applicable as the Fund did not intend to make environmentally sustainable investments.

What was the share of socially sustainable investments?

100% of the Fund's investments was sustainable with a social objective. This is determined based on the (potential) revenue streams of companies related to the genomic health care and electronic healthcare industries and the criteria defined for Norm-based research and Controversial sector involvement screenings to ensure that the companies in the portfolio do no significant harm to other sustainability related objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable, all investments were sustainable.

What actions have been taken to attain the sustainable investment objective during the reference period?

Companies have been screened for compliance with the Index rules and the Index is rebalanced on a quarterly basis by the Index Provider. The Fund replicates the Index based on the Index rules during the reporting period.

No breaches of the index have occurred.

Furthermore, the European ESG Committee has performed a review and reported on the alignment of the sustainable investment objective of the Fund.

In addition, the Glass Lewis ESG voting guidelines applied to this Fund. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

As a passive investments strategy, the Fund has replicated the reference sustainable benchmark in order to be aligned with the sustainable investment objective.

● **How did the reference benchmark differ from a broad market index?**

The reference benchmark differs from the broad market index in the following ways:

- Thematic investment approach: companies that generate at least 50% (25% for current components) of their revenues from the following: Medical, dental or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue and be listed or traded on the Eligible Markets are eligible for inclusion. This does not include companies involved in implantable or wearable devices or materials used only for cosmetic purposes.
- ESG screenings: companies with very severe social norms violations, the ones that have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The Fund invested 100% in line with the reference benchmarks and had for that reason the same score on the sustainability indicators as the benchmark: MVIS® Global Bionic Healthcare ESG Index. The Manager’s European ESG Committee has analysed and confirmed the alignment of the reference benchmark with the Fund’s sustainable investment objective.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund: [Sub-fund is not registered for distribution in Switzerland]	Reference benchmark: MVIS® Global Bionic Healthcare ESG Index
The weighted percentage of investee companies’ revenues derived from contribution to medical implants, prosthesis, or bioprinting and preservation of organs and tissues	50.00%	50.00%
