Sustainable Emerging Markets Bond Fund

Investment Objective

The investment objective of the Fund is to seek to maximise total return (a combination of income and capital growth) by investing in a diversified portfolio consisting primarily of bonds issued by governments, local authorities, Supranational Organisations, public sector bodies and corporates in emerging market countries which meet the environmental, social and governance criteria of the Investment Manager's proprietary environmental, social and governance framework and will exclude governments, local authorities, Supranational Organisations, public sector bodies and corporates in emerging market countries whose activities/or products, behaviour and/or services are inconsistent with international standards of conduct.

The Fund offered the following Share Classes as at 31 March 2023:

Share Class	Launch Date	Launch Price
Class B USD Accumulation Shares	31 March 2022	USD10
Class B USD Income Shares	31 March 2022	USD10
Class C USD Accumulation Shares	31 March 2022	USD10

US Equity Alpha Fund¹

Investment Objective

The investment objective of the Fund is to maximise total return principally through investment in equities which are listed on Regulated Markets in the United States. The Fund may also invest to a lesser extent in other transferable securities as disclosed in the investment policy for the Fund, money market instruments, cash and cash equivalents.

The Fund offered the following Share Classes as at 31 March 2023:

Share Class	Launch Date	Launch Price
Class A USD Accumulation Shares	12 December 2022	USD10
Class B CHF Accumulation Shares	12 December 2022	CHF10
Class B EUR Accumulation Shares	12 December 2022	EUR10
Class B GBP Accumulation Shares	12 December 2022	GBP10
Class B USD Accumulation Shares	12 December 2022	USD10

US Equity Growth Fund

Investment Objective

The investment objective of the Fund is to maximise total return principally through investment in equities which are listed on regulated markets in the United States. The Fund may also invest to a lesser extent in other transferable securities as disclosed in the investment policy for the Fund, in the prospectus, money market investment, cash and cash equivalents.

Share Class	Launch Date	Launch Price
Class A CHF Accumulation Shares	29 October 2020	CHF10
Class A EUR Accumulation Shares	30 September 2019	EUR10
Class A USD Accumulation Shares	13 December 2019	USD10
Class B CHF Accumulation Shares	29 October 2020	CHF10
Class B EUR Accumulation Shares	3 April 2017	EUR10
Class B GBP Accumulation Shares	3 October 2019	GBP10
Class B USD Accumulation Shares	3 April 2017	USD10
Class C GBP Accumulation Shares	13 November 2012	GBP10

¹Fund commenced operations on 12 December 2022.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 ASIA EX JAPAN FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in early February 2020 and therefore still has a relatively short track record; however, we have been managing Asia ex Japan equities since 1989. Over the period to 31 March 2023, the Fund has contributed 13.2% in absolute terms but has underperformed its benchmark. While it is tempting to draw significant conclusions from one quarter to the next, we would ask that the Fund is judged on longer, more meaningful time frames.

Sea Limited, the Association of Southeast Asian Nations gaming and ecommerce company, has been a case in point. It has been one of the top performance contributors over the period ended 31 March 2023. Total net income turned positive (\$422m for Q4 2022, compared with -\$613m for Q4 2021). Forest Li, the CEO, talked of the 'decisive pivot to efficiency and profitability'. He also said the approach will be to 'do less and to do it better', which we view positively. The business had been aggressively experimenting with new geographies for the ecommerce arm, Shopee, with frankly very mixed results. We are supportive of the rationalisation of the operations in this part of the business.

Other positive performance contributors include Samsung group companies, Samsung Engineering and Samsung SDI. The latter enjoys a global reputation as one of the world's key battery suppliers for both small form electronics and importantly, electric vehicles, working with the likes of BMW and GM. Indeed, in March 2023, it was announced that Samsung SDI will supply General Motors with cylindrical batteries. Together the companies will invest close to \$4bn in a joint factory in the US. At its latest financial results, Samsung SDI posted record annual revenue and record operating profit, exceeding 5 trillion KRW and 500bn KRW respectively for the first time.

One detractor from performance over the period has been JD.com, the ecommerce major in China. Our thesis on the competitive advantage of this company remains largely unchanged. We believe it has a structural advantage in ecommerce logistics, as well as a reputation for quality that others cannot boast. The recent results announcement highlighted a complex macro environment over the last year, as well as cost cutting and cutting of unprofitable investments, all of which was to be expected. Full year revenues grew around 10% year over year. In truth trying to disentangle the macro and micro to understand the movements of Chinese investments is very difficult in the short term, especially for those that are owned heavily by foreign investors.

Reliance was another detractor of performance over the period ended 31 March 2023. Reliance has one of the largest and most complex refineries in the world (as well as some upstream gas fields), but it is in truth a conglomerate; its telecom arm, Reliance Jio has over 400 million mobile subscribers, while Reliance's retail arm is the largest formal player in the market. In addition, Reliance has committed to spending US\$ 10 billion over the next few years to build its green energy division, encompassing wind, solar and hydrogen.

Overall, the team remains very enthusiastic about the range of opportunities available in Asia ex Japan. While positive investment views on the developing world - be those centred on valuations or the macro environment - are perhaps becoming more common, these are yet to be reflected in most portfolios. Indices are inherently backwards-looking of course, but does it really feel right that China and India combined are a lower portion of a global tracker than Japan? How might that change in the coming decade? Emerging Asian economies benefit from incredibly powerful growth tailwinds: the income catch up potential, huge commodity reserves, growing consumer populations, to name but a few.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 CHINA A SHARES GROWTH FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in February 2019 and therefore still has a relatively short track record. The benchmark index MSCI China A Onshore rose over the 6 months' period to end March and the Fund outperformed. The Fund has outperformed since inception.

After a challenging period for the Chinese stock market for most of the year 2022, sentiment changed rapidly towards the end of the year. The speed of China's response to growing domestic frustration over the zero-Covid policy and its economic woes surprised many. Beijing also rolled out a series of measures to restore confidence in the property sector. A share market embraced the "reopening" rally at the beginning of the year 2023. However, the rally deflated towards the end of the first quarter of 2023. Delayed macro data release due to Chinese New Year holidays could be one thing to blame; waning hope for big bang domestic stimulus could be another.

Our view remains that short-term macroeconomic shifts are not necessarily a good guide to stock market direction. A careful understanding of individual businesses is vital for long term returns. As always we would ask that the Fund is judged on longer, more meaningful time frames.

Top contributors to relative return over the period include Glodon and iFlytek. Glodon is a proprietary software company with more than 50% market share in China in construction, engineering, procurement and costing software. It announced strong 2022 results with revenue up by 17% year-over-year and net profit up by 41%. Glodon plays an important role in the long term digitalisation and cloud transformation of the vast construction industry in China. iFlytek is domestic leader in speech software and artificial intelligence. OpenAI's progress with AI language models fuelled global enthusiasm about the sector, and iFlytek's share price surged. This has been a small "incubation" position in the portfolio. Although the original investment case remains intact, it is still an early-stage business with high return potential and uncertainties. We will be reviewing the positioning size after the recent share price movement.

Top detractors to the relative return over the period include Beijing United Information Technology (BUIT) and LONGi Green Technology. BUIT is an industrial eCommerce platform. It is China's largest wholesale platform for paint materials but has been expanding into other industry verticals where they can displace traditional offline distributors and bring benefits to both suppliers and customers. Share price was under pressure from a media report claiming wrongdoing with regards to the trade financing and equity raising of the company. We commissioned a third party investigation which found no evidence of financial fraud nor a transfer of interests between related parties. Management guidance for 2022 remains upbeat with 90%+ growth in both revenue and profit. LONGi is the world's largest solar wafter and module maker. Share price was likely under pressure for geopolitical concerns, as the US released its Inflation Reduction Act which incentivises domestic production, and the US accounted for 16% of LONGi's 2021 revenue. We however believe the long-term investment case for LONGi remains intact. As the world's leading solar wafer producer, we believe the company set to benefit from the approach to grid parity and the strong domestic demand as China strives to achieve its 2060 carbon neutral goal.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 CHINA FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in June 2021 and therefore still has a relatively short track record; however, we have been managing the strategy since 2006. The benchmark index MSCI China All Share rose over the 6 months' period to the end of March and the Fund outperformed.

After a challenging period for the Chinese stock market for most of the year 2022, sentiment changed rapidly towards the end of the year. The speed of China's response to growing domestic frustration over the zero-Covid policy and its economic woes surprised many. Beijing also rolled out a series of measures to restore confidence in the property sector. Chinese authorities had also allowed access for complete audit inspections into US-listed American depositary receipts ("ADRs"), removing a significant overhanging threat of companies being forcibly delisted. Chinese stock market embraced the "reopening" rally at the beginning of 2023. However, the rally deflated towards the end of the first quarter of 2023. Continued Sino-American tension over chips and balloons could be one thing to blame; waning hope for big bang domestic stimulus could be another.

Our view remains that short-term macroeconomic shifts are not necessarily a good guide to stock market direction. A careful understanding of individual businesses is vital for long term returns. As always we would ask that the Fund is judged on longer, more meaningful time frames.

Top contributors to relative return over the period include Zijin Mining and Estun. Zijin is China's largest miner of gold and copper. 2022 revenue grew by 20% year-over-year and net profit grew by 28%, a record high. We believe Zijin is set to benefit from the supply-demand imbalance in metals and minerals as the world pushes forward the green agenda. As a small step in the right direction, the company acknowledges various environmental, social and governance concerns, and is now disclosing an additional 200+ environmental, social and governance concerns details, and has set goals to achieve carbon peak before 2029 and carbon neutral before 2050. Estun is one of China's leaders in general manufacturing and industrial robots. The growth opportunity here is multi-decade due to China's comparatively low automation levels and rising demand for import substitution. Policy tailwinds should support industry leader Estun, given its strong product quality driven by its better in-house component production capability and a savvy acquisition strategy to enhance competitiveness.

Top detractors to relative return over the period include JD.com and Meituan. JD.com, one of the major eCommerce players in China, saw slower revenue growth recently. This highlighted a complex macro environment over the last year, as well as cost-cutting and cutting of unprofitable investments, all of which were to be expected. 2022 revenue grew around 10% year over year; net income for 2022 was US\$1.5 billion compared to a net loss of roughly US\$ 0.5 billion in 2021. Our thesis on the competitive advantage of JD.com remains largely unchanged. We believe it has a structural advantage in eCommerce logistics, as well as a reputation for quality that others cannot boast. Meituan is China's large food delivery platform. Despite beating market estimates for revenue and earnings growth last quarter, share price was hurt by rising competitive threats from Douyin, a major social media platform in China. Meituan's share price was also likely impacted by technical factors surrounding Tencent's sale of a 15% stake. These two things took the focus away from a continued recovery in Meituan's core businesses. Q4 2022 revenue grew by +21.4% year over year, and net income turned positive. We think the market is overreacting to Douyin's threat. The latter mainly sells packaged deals via coupons and uses third parties for delivery. Meituan's own delivery network remains a formidable competitive advantage.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 DISCOVERY FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Over the period ended 31 March 2023, the Fund is up in absolute terms but notably behind the benchmark. The broad investing backdrop remains heavily influenced by macroeconomic and geopolitical challenges that have unhelpfully preoccupied the agenda for much of the past year. Growing optimism that inflation may have peaked, even if it is set to remain elevated, has lifted the current mood in equity markets. It does at least now feel that some of the disaster scenarios on interest rates are now off the table, which seems to have provided an underpinning to valuations.

That said, we expect investor attention over the coming months to be stubbornly focused on the issues of economic slowdown and second-guessing central bank actions as the path forward becomes more apparent. At the corporate level, the response to heightened uncertainty has generally been to batten down the hatches regarding operational activities (workforce reductions, preserving cash runways, reshoring and better resilience in supply chains etc.) alongside a repositioning of balance sheets (retiring expensive debt, opportunistic buybacks if flexibility allows).

Bottom contributors to Fund performance have been Novocure, Alnylam Pharmaceuticals and Staar Surgical. Novocure, the Israeli medical device company using electrical fields to treat cancer, was among the leading detractors. The positive news that its non-small cell lung cancer (NSCLC) study had met its primary goal, was more than offset by soft quarterly results, which reported declining revenue that fell short of analyst expectations. We retain confidence in management's ability to become a platform technology with treatments spanning multiple cancers and a wide range of patient populations. Alnylam Pharmaceuticals, a US biotech company developing RNA interference treatments for disease-causing genes, was also among the largest detractors. Uncertainty around the recent submission of Onpattro to the US FDA for treating a rare heart disease weighed on the share-price. Yet overall, Alnylam continues to benefit from a deep and well-diversified portfolio across multiple patient populations, as well as a robust pipeline of future drugs. Staar Surgical, a US manufacturer of lenses for correcting refractive eyesight errors, was a further large detractor. Shares fell as the company unexpectedly changed CEO; Caren Mason being replaced by board member Tom Frinzi. While unexpected we don't think this represents anything sinister and note that the incoming CEO brings a host of refractive surgical experience that should help de-risk the ongoing US launch.

Conversely holdings in MarketAxess, Exact Sciences, and Axon Enterprise have been the top contributors. MarketAxess, the leading electronic trading platform for fixed-income securities, was a significant contributor over the period. Evidence of sustained positive operational momentum buoyed the share price, with the firm announcing record total revenue and commission figures in its full-year report. Exact Sciences, the US maker of high efficacy cancer tests, was also among the main contributors. Shares had surged in January after the announcement of preliminary quarterly results which showed both better-than-expected revenue and its first-ever EBITDA adjusted profit. The latter was particularly important since the firm hadn't expected to report cash profits until late 2023 at the earliest. Axon Enterprise, a US provider of law enforcement technology solutions, was a major contributor. The share price was buoyed by the firm's robust 2022 results which exceeded market expectations. Revenues rose 38% to \$1.2bn, driven by impressive growth in the US market and increased demand for its premium offerings.

The period saw the complete sales of Galapagos, Morphosys, Rubius Therapeutics, and Tesla. There were no new purchases, instead, this capital was recycled into existing positions such as Beam Therapeutics, Jfrog, and Oxford Nanopore.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 EMERGING MARKETS ALL CAP FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in early February 2021 and therefore still has a relatively short track record; however, we have been managing emerging market equities since 1994. The Fund delivered positive performance over the period and outperformed its benchmark. While it is tempting to draw significant conclusions from one quarter to the next, we would ask that the Fund is judged on longer, more meaningful time frames.

Over the period, the contributors to performance have been diverse, but most notably included the online platforms such as MercadoLibre. MercadoLibre produced good results in 2022 with a strong fourth quarter of 2022 helping the company to reach new highs across the business, surpassing US\$100bn in total payments volume, US\$10 billion of revenue, one billion items shipped through its Mercado Envios logistics business and US \$1 billion of Earnings Before Interest and Tax in 2022, all for the first time in its history.

Other top contributors to performance over the period includes TSMC - the world's dominant semiconductor foundry. Sentiment appears to be shifting more positively on large semiconductor companies, with end customer inventories looking to have peaked. Because of their diverse customer base, TSMC believe that while the short-term dynamics can be hard to predict, in the longer term the mega trends are actually quite clear and visible. Industry growth will be driven by 5G and AI forming the backbone of a world of ubiquitous computing with 4 large platforms: Smartphones, the Internet of Things, High Performance Computing, and Automobiles. TSMC decided to ramp up capex from US\$ 17.6bn in 2020 to US\$ 36.4bn in 2022.

On the other hand, having spent parts of last year trading above US\$ 100/barrel, the oil price has weakened at the start of 2023 and with concerns about a recession in developed markets, recently dipping below US\$ 70/barrel. These short-term fluctuations obviously impacted stocks in the Energy sector, notably Reliance Industries, and Petrobras, which both detracted from performance over the period. Concerns circle Petrobras about the level of government intervention, but it remains the case that the company enjoys some of the lowest lifting costs outside the Middle East and continues to remain highly profitable at current oil price levels. Reliance has one of the largest and most complex refineries in the world (as well as some upstream gas fields), but it is in truth a conglomerate; its telecom arm, Reliance Jio has over 400 million mobile subscribers, while Reliance's retail arm is the largest formal player in the market. In addition, Reliance has committed to spending US\$ 10 billion over the next few years to build its green energy division, encompassing wind, solar and hydrogen.

Overall, the team remains very enthusiastic about the range of opportunities available in emerging markets. Whilst positive investment views on the developing world, be those centred on valuations or the macro environment, are perhaps becoming more common, these are yet to be reflected in most portfolios. Indices are inherently backward looking of course, but does it really feel right that China and India combined are a lower portion of a global tracker than Japan? How might that change in the coming decade? Emerging market economies benefit from incredibly powerful growth tailwinds: the income catch up potential, huge commodity reserves, growing consumer demand, to name but a few.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 EMERGING MARKETS LEADING COMPANIES FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund delivered positive performance over the period and outperformed its benchmark. While it is tempting to draw significant conclusions from one quarter to the next, we would ask that the Fund is judged on longer, more meaningful time frames.

The contributors to performance have been diverse over the past 6 months, but most notably included the online platforms such as MercadoLibre. MercadoLibre produced good results in 2022 with a strong fourth quarter of 2022 helping the company to reach new highs across the business, surpassing US\$100bn in total payments volume, US\$10 billion of revenue, one billion items shipped through its Mercado Envios logistics business and US \$1 billion of Earnings Before Interest and Tax in 2022, all for the first time in its history.

Other top contributors to performance over the period includes TSMC - the world's dominant semiconductor foundry. Sentiment appears to be shifting more positively on large semiconductor companies, with end customer inventories looking to have peaked. Because of their diverse customer base, TSMC believe that while the short-term dynamics can be hard to predict, in the longer term the mega trends are actually quite clear and visible. Industry growth will be driven by 5G and AI forming the backbone of a world of ubiquitous computing with 4 large platforms: Smartphones, the Internet of Things, High Performance Computing, and Automobiles. TSMC decided to ramp up capex from US\$ 17.6bn in 2020 to US\$ 36.4bn in 2022

On the other hand, having spent parts of last year trading above US\$ 100/barrel, the oil price has weakened at the start of 2023 and with concerns about a recession in developed markets, recently dipping below US\$ 70/barrel. These short-term fluctuations obviously impacted stocks in the Energy sector, notably Reliance Industries, and Petrobras, which both detracted from performance over the period. Concerns circle Petrobras about the level of government intervention, but it remains the case that the company enjoys some of the lowest lifting costs outside the Middle East and continues to remain highly profitable at current oil price levels. Reliance has one of the largest and most complex refineries in the world (as well as some upstream gas fields), but it is in truth a conglomerate; its telecom arm, Reliance Jio has over 400 million mobile subscribers, while Reliance's retail arm is the largest formal player in the market. In addition, Reliance has committed to spending US\$ 10 billion over the next few years to build its green energy division, encompassing wind, solar and hydrogen.

Overall, the team remains very enthusiastic about the range of opportunities available in emerging markets. Whilst positive investment views on the developing world, be those centred on valuations or the macro environment, are perhaps becoming more common, these are yet to be reflected in most portfolios. Indices are inherently backward looking of course, but does it really feel right that China and India combined are a lower portion of a global tracker than Japan? How might that change in the coming decade? Emerging market economies benefit from incredibly powerful growth tailwinds: the income catch up potential, huge commodity reserves, growing consumer demand, to name but a few.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 EUROPEAN GROWTH FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing the investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund outperformed the MSCI Europe ex UK Index over the period but, as ever, we would ask that performance be judged over much longer time frames.

Zalando was among the contributors to performance. Zalando is Europe's leading online fashion marketplace and enjoyed a period of supernormal growth over the pandemic period, like many internet-enabled consumer businesses. Since then, it has faced a more challenging period operationally as well as in share price terms as the market has punished long duration growth stocks. The share price rallied over the period, partly due to a re-pricing of risk in the European market and thanks to the resilience of European consumers. Despite the challenging backdrop, Zalando's long-term ambitious goals remain in place as it aims to become the starting point for fashion.

Wizz Air, the ultra-low-cost airline, also contributed. It is impressive to see how much progress Wizz has made versus the pre-COVID period. It has grown its seat capacity by 60% and is achieving load factors of greater than 90%. This is coming at a time when overall air travel capacity is lower due to competitors retrenching, thereby giving Wizz the opportunity to take market share.

Sartorius Stedim Biotech was a detractor from performance. This is a bioprocessing technology and equipment company which has performed well both operationally and in share price terms in recent years. However, after a period of exceptional demand, a normalisation is kicking in and as such shares have been weaker more recently.

Delivery Hero also detractor. This is one of the world's leading online food delivery companies and is the number one player in the majority of its over 70 markets. Results over the period disappointed the market with revenue growth slightly weaker than expectations. However, we believe Delivery Hero is making good progress. It has achieved greater profitability in a short space of time and is taking further share in many markets, particularly as its more distressed peers are forced to retrench by the economic environment.

In a changeable environment such as this, all an investor can control is the disciplined application of their philosophy and process. Deviation from this task might have led us to investing in fundamentally unattractive businesses in order to chase short-term returns. We believe our edge is as business analysts for the long-term and we think our competitive advantages are greater in periods such as these as we look through the noise and take advantage of the falling share prices of sustainably growing companies which have prospects of becoming much bigger and more profitable companies in the future.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 EUROPEAN HIGH YIELD BOND FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

Despite significant volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the outlook remains uncertain, inflation has started to stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

During the six-month period to 31 March 2023 the European High Yield Bond Fund marginally underperformed the benchmark index. Weak returns from bank and real estate holdings, impacted by the higher interest rate environment and instability in the banking sector, were offset by strong contributions from bond selection. For example, the Fund's holding in convertible bonds issued by Spanish telecommunications infrastructure company Cellnex added value as the company performed strongly on reports of a takeover bid.

Given the uncertain macroeconomic outlook, we placed a number of trades to reduce portfolio risk during the period. We are bearish on the economic outlook for the United Kingdom and conscious that the uncertain path of monetary policy may put pressure on corporate balance sheets and create further volatility in the hybrid bond market. This led us to sell holdings in European hotel group Accor's hybrid bonds as prices recovered close to par and sell positions in perpetual bonds issued by UK insurer Rothesay Life and Japanese telco Rakuten. In addition, we sold out of holdings in British bar and restaurant owner Mitchells & Butlers and retailer Marks & Spencer. We have also reduced exposure to cyclical, consumer-facing sectors such as retail, real estate and financial services and adding to resilient sectors such as healthcare, telecommunications and services.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 GLOBAL ALPHA CHOICE FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe to judge performance.

The Global Alpha Choice Fund underperformed the benchmark index MSCI ACWI during the six-month period to 31 March 2023. The macroeconomic environment has continued to dominate investor sentiment. Market volatility intensified as turmoil in the banking sector emerged, leading regulators to take action to protect the financial system.

Given the market environment, the Fund's exposure to Financials detracted from returns over the period. Signature Bank was a small, short-lived holding in the Fund. The circumstances which led to the demise of Signature Bank are still unclear. The board, which included Barney Frank, co-author of the Dodd-Frank Act on banking regulation, is adamant that the bank could have opened for business on the Monday following the weekend they were instead taken into receivership. The regulator decided not to allow them the benefit of the doubt. More information will likely emerge in due course, which may clarify what the regulator saw that caused them to take dramatic action.

Beyond Signature Bank, the Fund's Financials exposure is well-diversified with the only other banking exposure being HDFC in India. However, as market fear grew, US brokerage powerhouse Charles Schwab experienced share price weakness with shares down close to a third year-to-date. Fears emerged because of unrealised losses from its large securities portfolio. However, Schwab is a fundamentally different business to that of Silicon Valley Bank or Signature Bank. Schwab is a brokerage and financial advisor and its customers are enormously diversified, and a deposit run is highly unlikely, with over 80% of deposits held being Federal Deposit Insurance Corporation insured.

On the positive side, shares in Prosus rose strongly over the period ended 31 March 2023, in part benefitting from improving market sentiment for Chinese equities. Prosus is a global consumer internet group that invested early in Tencent and remains its largest shareholder (27%). Tencent has faced multiple headwinds over recent years which now appear to be reversing with the relaxing of zero-Covid policies, game approvals resuming and improving consumer confidence. Meanwhile, Prosus has continued to sell Tencent shares to fund its buyback programme - aiming to reduce the discount to its underlying Net Asset Value (NAV) of its portfolio.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 GLOBAL INCOME GROWTH FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Global equity markets rebounded over the six months to the end of March 2023, and the Fund outperformed its MSCI ACWI benchmark.

The two themes which marked 2022 - geopolitical uncertainty and the tug of war between inflation and rising interest rates - continued to drive financial markets over the period. Whilst the unexpected reopening of the Chinese economy in December triggered hope of a boost to the global economy, tensions with the US are still on the rise and creating uncertainty.

At the same time, persistent inflation keeps the pressure on Central Banks to raise interest rates. The impact of rising interest rates was evident in the US banking crisis in March and there is no doubt that it will affect other parts of the global economy.

During the period, and as is usually the case, the Fund's outperformance was driven by the stocks we own rather than a particular bet on a sector or country.

The top contributor was the Danish pharmaceutical company Novo Nordisk, whose diabetes and obesity drugs are in high demand. US-listed National Instruments specializes in testing equipment for scientist and academics and received a takeover bid at a large premium to its market price, making the company a top contributor. The Chinese sportswear maker Anta Sports was another strong contributor to performance as investors anticipate a boom in consumer spending after the strict covid policy has been lifted in China.

There were, however, some disappointments during the period. Brazilian stock-exchange operator B3 detracted from performance as stock market volumes normalized after a period of unusually high activity in the pandemic. Lithium miner Albemarle was another drag on performance as lithium prices fell off record highs reached at the end of the year, and despite delivering record profit growth for the year 2022. Shares in the Swiss pharmaceutical company Roche declined in the period as some of its new drug trials proved disappointing.

Geopolitics and the impact of rising inflation and interest rates on the economy remain very difficult to forecast, but in a more volatile economic environment, we believe that the quality and resilience of companies we typically invest in should help us navigate a more uncertain market environment.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 GLOBAL STEWARDSHIP FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing the investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Global Stewardship Fund, while underperforming the benchmark index MSCI ACWI during the six-month period to 31 March 2023, posted strong returns in absolute terms. We closed out 2022 with markets buoyed by mounting evidence that some of the year's headwinds were abating, with lockdowns easing in China, supply chains returning to normal and a steadily declining oil price dragging inflation lower and interest rate expectations with it. This represents a much more positive environment for long-term growth investors, and we began to see a degree of rationality return to markets, with fundamentally strong companies again coming to the fore. 2023 started in a similarly positive vein only to be derailed by a banking mini crisis in March following the sudden implosion of Silicon Valley Bank and Signature Bank (neither of which were holdings in the Fund). Our exposure to this turmoil came primarily through First Republic Bank in California, which was the Fund's largest detractor during the period.

Until recently, First Republic was viewed as a fundamentally sound business with an excellent credit risk record and extremely deep customer relationships. However, a deposit base concentrated on the west coast of the US and a degree of interest rate exposure on the balance sheet drew comparisons with Silicon Valley Bank. That many of these deposits emanated from wealthy individuals and exceeded the limit for federal insurance coverage prompted fears of a run, and a sharp fall in the share price resulted, the two factors forming a nasty downward spiral. The situation was compounded by the decisions of credit rating agencies to downgrade the bank's rating to sub-investment grade. This further eroded the confidence of counterparties and looks likely to have a long-term effect on the cost and availability of funding, depressing margins for the foreseeable future. We decided to sell out of the position we have held for clients since 2016. Ultimately, banks are confidence machines – even with sound fundamentals, the business model breaks down once trust is eroded.

Electric vehicle maker Tesla's stock also weakened, in part due to issues unrelated to its core business. Investors are concerned by the takeover of Twitter by Elon Musk, Tesla's Chief Executive and majority shareholder. This is due to the risk that he is distracted from his stewardship of Tesla at a time when economic conditions are deteriorating. We have engaged with the company on this issue. In addition, there is further pressure on the share price as Musk is forced to sell down his Tesla stake to provide funding for the Twitter acquisition. Our investment case for Tesla continues to play out however, with a recent price reduction resulting in strong order flow, which is currently exceeding production by about 2-to-1. While we remain enthusiastic about Tesla's long-run potential to decarbonise personal transport we have reduced our holding as our trust in the management team has diminished somewhat.

Pacira Biosciences is a manufacturer of non-opioid pain relief drugs. The shares have performed poorly in the recent past as sales growth of its key drug Exparel has disappointed. This is, to some extent, a hangover from the pandemic, as many elective surgeries are postponed or cancelled. Optimism for the Exparel franchise remains, with, for example, positive results from trials of the product in some knee and foot surgeries.

More positively, electronic bond trading platform MarketAxess was a bright spot within financials, following the company's update that highlighted the ongoing shift to electronic solutions within the US high-grade bond market. Management sees this going from 40% penetration to greater than 80% with the help of a new user interface and algorithmic trading. This will be a key driver of double-digit revenue growth from here.

Elsewhere, the increased enthusiasm for the potential of Artificial Intelligence benefited NVIDIA, with the stock more than doubling in the period. While positive sentiment is welcome, we would argue this move is rooted in an expansion of the company's opportunity set. Open AI's Chat GPT has illustrated the power of generative machine learning and many imaginative use cases are beginning to emerge, for example allowing non-technical users to write coherent computer code. Nvidia's graphics processing chips are well positioned to power these innovations.

Perhaps the stock most illustrative of the recent shift in market sentiment is Canadian ecommerce platform Shopify. The shares remain around a third of their 2021 peak and close to pre-pandemic levels despite continued operating progress, significant investment in the business and the launch of a host of new features. The company's confidence in the strength of its offering for merchants is evidenced by its recent decision to raise prices for the first time in 12 years, which it expects to result in very little customer chum.

Shopify is an example of the resilience and adaptability present within your portfolio. We have many more price makers than price takers, which is helpful in inflationary times. However, we continue to build resilience, adaptability, and diversity at the portfolio level with a strong flow of new ideas. During the period we took new holdings in companies as diverse as Japanese HR tech business Recruit, machine vision pioneer Cognex and supplier of plastic pipes Advanced Drainage Systems.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 GLOBAL STRATEGIC BOND FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

Despite significant volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the outlook remains uncertain, inflation has started to stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

During the six-month period to 31 March 2023 the Global Strategic Bond Fund underperformed the benchmark index. Overall, asset allocation detracted reflecting underweights in the energy and healthcare sectors, both of which performed strongly in the period. This was partially offset by strong contributions from bond selection. For example, within the technology and electronics sector, the Fund's holding in convertible bonds issued by Spanish telecommunications infrastructure company Cellnex added value as the company performed strongly on reports of a takeover bid. We believe that this is an unlikely outcome in the short term and took the opportunity to lock in these gains by switching into Cellnex's straight bonds.

Over three years, the Fund has outperformed the index. Asset allocation has made a meaningful contribution, in keeping with our strategic approach, with the Fund profiting from a dynamic approach to allocation between investment grade and high yield bonds. Individual bond selection has continued to make a strong contribution to relative returns. Examples among the top performers in the past three years include British packaging company, DS Smith and American subscription streaming company, Netflix.

Given the uncertain macroeconomic outlook, we have dialled down portfolio credit risk over the period ended 31 March 2023 by reducing high yield exposure from c. 38% to c. 27% by the end of March. We sold positions in Burford Capital and Enel perpetual bonds as part of this risk reduction, as well as selling some consumer-facing names, including US retailer Nordstrom and UK bars and restaurants company Mitchell & Butlers. High-quality purchases included the addition of A-rated bonds issued by leading Japanese telco, NTT. We believe this partially state-owned company's strong cash generation and commitment to deleveraging will see the balance sheet glide back to strength over the coming years.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 HEALTH INNOVATION FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Against a backdrop of rising inflation and interest rates, and a series of bank failures, the Health Innovation Fund underperformed the benchmark during the six months to 31 March 2023. Several companies continued to see a dislocation between their share prices and operational performance over the period. Overall, we remain encouraged that the portfolio is in strong financial health. During periods of volatility, it is important that we remain true to our belief in the deep-rooted structural trends that are driving forward progress in human health, developing cures for difficult diseases, and making healthcare systems more efficient.

The largest contributors to performance during the period included 10x Genomics, Ambu and Exact Sciences.

10x Genomics develops single-cell analysis technologies, which are ushering in a new era of biological research and enabling a growing number of scientific and medical breakthroughs. When combined with next generation sequencing, 10x Genomics' tools enable researchers to measure and interpret differences between individual cells in a sample. 10x Genomics contributed positively over the period as its share price reacted favourably to recent results. We continue to believe that the growth opportunities for 10x Genomics remain significant and penetration rates of its products are still low. A recent meeting with the CEO provided further reassurance of the growth opportunity going forward, their deep understanding of the end user market, and their clear product roadmap to reduce barriers to adoption.

Ambu is a Danish MedTech company that produces single-use products, mainly used in operating theatres. The single-use scope is the critical product of focus and the primary driver of long-term growth. Shares have performed strongly in recent months, most notably supported by the latest better-than-forecast quarterly results, with most segments of the business posting stronger growth than expected.

Exact Sciences, the US based producer of liquid biopsy tests for cancers, also contributed positively during the period. One of their leading products is Cologuard, a test for lower intestinal tract cancers that is non-invasive and can be performed by patients at home, reducing the need for unnecessary endoscopies and biopsies. The stronger performance was driven by weak data from a key competitor, Guardant Health. Guardant published data for its liquid biopsy test for screening colon cancer and underwhelmed in its ability to detect pre-cancerous polyps. This has strengthened the position of Exact relative to its competitor. Our investment thesis focusses on Exact Sciences' ability to utilise liquid biopsy to create several tests for different cancers, coupled with strong execution from a proven management team with several already commercialised products.

Shockwave Medical, M3 and Alnylam were among the largest detractors to performance during the period.

Shockwave Medical makes innovative catheters to treat blocked heart arteries that conventional treatments struggle to deal with. It performed strongly in 2022 but has given back some of its gains over recent months despite continuing progress. The company announced another set of quarterly and full year results ahead of consensus. It is seeing strong demand for its products and again raised guidance. We were also encouraged to see Shockwave take advantage of its financial strength to invest aggressively in sales and product development to further unlock demand in its market, and its products have now reached well beyond early adopters, fueling strong revenue growth projections for the year ahead.

M3, the Japanese online healthcare platform, detracted from performance. Its Q3 2022 results were underwhelming but generally anticipated. As management had indicated, an area where M3 has struggled is overseas pharma customers cutting their marketing budgets, meaning there was less need for M3's services during 2022. Longer term, we believe the opportunity for M3 is sizeable and still at an early stage. Only ~20% of pharma marketing budgets are spent on digital channels, the rest still relying on drug representatives going door-to-door to promote their products. When you compare this with Fortune 100 companies where ~80% of marketing spend is on digital, there is considerable opportunity in this space. This is where the power of existing networks, such as M3's, could prove to be significantly disruptive.

Alnylam, the US biotechnology company that is developing a new class of drugs based on RNA interference (RNAi), also weighed negatively on performance during the period. This was partly driven by weaker-than-expected guidance for 2023, with predicted revenues below market expectations. The market uncertainty, with rising interest rates and higher inflation, is also unfavourable to an early-stage biotech like Alnylam, which has further hampered the share price in the short term. Over the long term, however, we believe that Alnylam's pipeline of drugs is likely to continue to have high rates of success driven by its advancements in RNAi technology. It is also already beginning to open up new markets for its current commercial-stage drug Onpattro, raising the probability of future success for its exciting pipeline.

While a more challenging financing environment may delay progress in some areas as companies are forced to prioritize programs in their clinical pipelines, we continue to believe that the force behind the technological revolution in healthcare and life sciences is unstoppable. In these more challenging times, we remain focused on finding and owning the companies that are enabling and benefiting from this revolution and supporting them with our patient, long-term capital.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 ISLAMIC GLOBAL EQUITIES FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below.

We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing investment ability and would suggest five-year periods is a more sensible timeframe over which to judge performance. We look forward to reporting to you on more meaningful performance time frames in the years to come.

During the six-month period to 31 March 2023 the Worldwide Islamic Global Equity Fund posted positive returns and marginally underperformed the benchmark. The Fund was seeded in May 2022 and therefore has insufficient track record to provide any meaningful performance commentary at this stage.

As at 31 March 2023, the Fund was invested in 41 companies, held across global stock markets. Investing under Islamic principles, our aim is to identify high quality growth companies that will outperform over a 5-year (or longer) horizon. The Fund is relatively index and sector agnostic, as we primarily focus on finding the best Islamic aligned, long-term investments irrespective of their size, position in an index or location of listing.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 JAPANESE FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing the investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

During the six-month period to 31 March 2023 the Japanese B JPY Acc share class gained in value by 8.4% when measured in yen, but marginally underperformed the benchmark.

Although conditions have continued to improve within Japan and broader Asia, the period ended 31 March 2023 has provided a difficult backdrop for our style of bottom-up growth investing, as the prospect of changing monetary policy and regulatory initiatives aimed at improving equity returns of the market's most lowly rated stocks has favoured value-based sectors, such as financials. In the long-term we believe that companies which present stronger fundamental attractions, and exhibit greater earnings potential, will be rewarded by the market.

Japan - long seen as lagging the west in its rate hike cycle - surprised markets late last year by raising the ceiling of its yield-curve control mechanism; an act which was widely perceived as a prelude to further policy shifts. The Yen subsequently regained lost ground as a result, and on easing inflationary pressures elsewhere in the world. Monetary policy once again stole headlines when the central bank unexpectedly announced the appointment of academic Kazuo Ueda as Kuroda-San's replacement as central bank governor.

This marks an end of an era for Kuroda-San, who has employed unconventional tactics to defeat the country's three decade fight with deflation. There are tentative signs that suggest he may has succeeded; with consumer prices rising at rates not seen since the 1980s and wage inflation reaching its highest since 1993 (according to initial spring negotiation or 'Shunto' wage data). Japan's escape from its deflationary past presents a huge opportunity. For 30 years, corporates have delayed investment and consumers have put off purchases, handicapping the country's productive capacity. The advent of real wage growth could reverse this cycle and augur well for Japan's equity market, which presents an exciting proposition for international investors looking to position their portfolios for higher inflation.

Japan has also seen tourism numbers tick up during the past six months, as the country (and broader region) continue to relax mobility restrictions. The recent declassification of Covid to a similar status as the common flu and the easing of rules regarding the use of facemasks underlie this gradual improvement. Consumption has been climbing at a healthy rate as a result.

The broader economic revival/reopening that Japan, and its neighbours, have experienced has helped encourage higher capital expenditure as companies recalibrate supply for higher demand. This has helped the prospects for our robotic and manufacturing businesses, such as Fanuc, the world's largest robotic company, Yaskawa, a leader in servomotors and inverters, Keyence, a leader in vision and sensory automation solutions, and DMG Mori, a leading global machine tool maker. Many have benefited from the reopening of China, where capex sentiment has until now, been subdued due to covid-related restrictions.

During the past six months there were a collection of companies that have remained under pressure. Kakaku, a leading online price comparison site and provider of Tabelog, an online restaurant booking service, has suffered as supply chain issues impede product postings on its price comparison site, and cautious consumers put-off eating out. A slow and steady recovery in the economy should allow Kakaku to return to its double-digit organic growth profile. Cyberagent, a business with gaming, advertising and media operations has also been weak, on slowing sales from its gaming business and concerns over high content spend for the media business 'AbemaTV'. We remain excited by the long-term opportunity here. Evidence of an energetic, experimental and entrepreneurial culture should allow the company to deliver more mobile hit games in the future, and its content is clearly driving up sticky subscriber numbers for its media business, as the company takes share from terrestrial TV. Furthermore, we believe there is untapped value potential in overlapping the company's three complementary business units.

During the period we used the rally in energy prices to exist our position in Inpex, Japan's largest oil and gas exploration company. We also sold out of Mazda, leaving the Fund devoid of all auto OEMs and oil and gas exposure. These funds were used to take a new position in Nihon Kohden, a medical device company with core competency in sensor technology, used in patient monitors, defibrillators, and biometric testing machines – where it acts as a monopolist in several product lines. We believe their technological focus and growth prospects overseas present an exciting and profitable long-term opportunity.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 LONG TERM GLOBAL GROWTH FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ to the Fund performance. We believe that shorter-term performance measurements are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Long Term Global Growth Fund marginally underperformed the benchmark index over the six-month period to 31 March 2023.

Two of the largest detractors from performance over the six months were Tesla and Meituan.

Tesla's share price declined over the previous six months as the market showed signs of concern over slowing electric vehicle demand in the face of rising interest rates. Chief Executive Officer, Elon Musk, also concluded his purchase of Twitter. Both these factors weighed on sentiment. Despite these developments Tesla's operational performance remains strong, having delivered just over 1.3 million new vehicles to customers in 2022 – an increase of 40% over the previous year.

Meituan is an online marketplace for the local service industry in China. It operates in more than 200 categories in 2,800 cities with dominant market shares in on-demand restaurant delivery, in-store dining, hotel booking and film ticketing. Revenues in 2022 grew north of 20% year-on-year, and this was despite continued lockdowns and restrictions across China. Simultaneously, the company significantly narrowed its operating losses. Despite this, the shares dropped during the previous six months due to concerns around competition and uncertainty as to whether the regulatory cloud has lifted for this and the other Chinese technology platform businesses.

Two of the largest contributors to performance over the six months were NVIDIA and Kering.

NVIDIA's share price has rebounded strongly over the past six months, undoing the 60% drawdown seen between March and October of 2022. The United States government's restricting of NVIDIA sales to China in September spooked the market, however the recent near vertical rally can be attributed to the company's association with OpenAI as its provider of graphic processing units (GPUs).

Kering delivered strong returns over the past six months. The company continues to focus on the exclusivity of their brands, which has in turn protected growth despite the challenging macro backdrop for wider retail. Revenue for the 2022 financial year grew 15% year-on-year and operating income was up 11% over the same period.

As ever, we aim to look beyond the short-term vagaries of the stock market, focusing instead on the operational progress of companies, along with their competitive advantages and long-term prospects.

		6 months	1 year p.a.	2 years p.a.	3 years p.a.	5 years p.a.	Since Inception p.a.	Launch Date

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 PAN-EUROPEAN FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing the investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund outperformed the MSCI Europe Index over the period but, as ever, we would ask that performance be judged over much longer time frames.

The top contributor to performance was Games Workshop, the UK-based manufacturer of miniature figures and games, best known for Warhammer. While this may appear to be a relatively obscure business, headquartered on the outskirts of Nottingham, it has established a global presence with trade outlets across the world. It has more than doubled revenues in the past 5 years while also expanding its profit margin as it leans on its loyal customer base and leverages its intellectual property. We think the prospects continue to look bright for the company, particularly if it can monetise this IP in other channels, something its recent deal with Amazon on movie content speaks to.

Zalando also contributed to performance. Zalando is Europe's leading online fashion marketplace and enjoyed a period of supernormal growth over the pandemic period, like many internet-enabled consumer businesses. Since then, it has faced a more challenging period operationally as well as in share price terms as the market has punished long duration growth stocks. The share price rallied over the period, partly due to a re-pricing of risk in the European market and thanks to the resilience of European consumers. Despite the challenging backdrop, Zalando's long-term ambitious goals remain in place as it aims to become the starting point for fashion.

The largest detractor was Farfetch which, like Zalando, is a fashion marketplace and provider of ancillary services to brands, but which focuses on luxury fashion. Perhaps the most significant driver of the stock's poor performance was the reception to its capital markets day where its communication to investors was judged as poor and its targets were viewed as far too ambitious at a time when the backdrop looks difficult. Thinking longer term, though, Farfetch is well positioned to benefit from e-commerce taking share in the large and growing luxury fashion market, while also deepening its ties with the brands themselves.

Sartorius Stedim Biotech also detracted. This is a bioprocessing technology and equipment company which has performed well both operationally and in share price terms in recent years. However, after a period of exceptional demand, a normalisation is kicking in and as such shares have been weaker more recently.

In a changeable environment such as this, all an investor can control is the disciplined application of their philosophy and process. Deviation from this task might have led us to investing in fundamentally unattractive businesses in order to chase short-term returns. We believe our edge is as business analysts for the long-term and we think our competitive advantages are greater in periods such as these as we look through the noise and take advantage of the falling share prices of sustainably growing companies which have prospects of becoming much bigger and more profitable companies in the future.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 POSITIVE CHANGE FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing the investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Positive Change Fund outperformed the index over the six months to 31 March 2023.

Two of the largest contributors to relative performance over the period were MercadoLibre and ASML.

Latin America's largest ecommerce group, MercadoLibre, was a top contributor over the period. MercadoLibre's ecommerce business performed strongly and extended its market share leadership in most markets, with Brazil and Mexico growing particularly strongly. Its nascent fintech business continued to show strong momentum with total payment volumes reaching \$36 billion and transactions showing 63% year-over-year growth.

ASML is the world's leading manufacturer of specialist lithographic equipment without which leading edge semiconductors could not be manufactured. It has developed a position of dominance in the industry that is cemented by the transition to EUV lithography, for which ASML is the monopolist equipment supplier. Financial year results came in ahead of guidance with demand for its devices consistently rising despite low demand from consumer driven end markets, increasing geopolitical tensions and a shifting macroeconomic environment. Demand remains 40% ahead of the company's current capacity, driven by increasing use of artificial intelligence and high performance computing functionality across multiple sectors. ASML is currently working to upscale production capacity.

Two of the largest detractors from relative performance over the period were Tesla and Alnylam.

Tesla, the world's most valuable car maker, detracted from performance over the period. The market reacted negatively to news of CEO Elon Musk's takeover of Twitter. We met with the Chair of Tesla's board in December, she noted there is a discrepancy between how the acquisition of Twitter is reported in the media and the reality, and that Musk's focus and intensity on Tesla remains unchanged. Despite negative share price performance, Tesla continues to go from strength to strength. It delivered 1.3 million vehicles in 2022, a year on year increase of 40% and has since seen its share price begin to recover. Over the long term our conviction remains unchanged that Tesla will meet our dual objectives.

Biotechnology company Alnylam, a pioneer in developing treatments based on RNA interference (RNAi), recently reported a net loss per share and has suffered share price weakness. However, product revenues are strong, with 35% year-over-year growth. Alnylam continues to make good operational progress, with the US Food and Drug Administration accepting the Company's supplemental New Drug Application (sNDA) for Patisiran, an investigational RNAi therapeutic in development for the treatment of ATTR Amyloidosis with cardiomyopathy. Alnylam's treatments have the ability to vastly improve the quality of life for sufferers of rare diseases by providing novel treatments. Our conviction in Alnylam's potential remains unchanged.

Despite a challenging and fast evolving landscape, we remain optimistic and true to our dual objectives. With an investment and impact horizon as long term as ours, short term volatility is to be expected, but we can take comfort from the ability of the companies in the fund to withstand more challenging periods and continue making operational progress.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 RESPONSIBLE GLOBAL EQUITY INCOME FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Global equity markets rebounded over the six months to end March 2023, and the Fund outperformed its MSCI ACWI benchmark.

The two major themes which marked 2022 - geopolitical uncertainty and the tug of war between inflation and rising interest rates - continued to drive financial markets over the period. Whilst the unexpected reopening of the Chinese economy in December triggered hope of a boost to the global economy, tensions with the US are still on the rise and creating uncertainty.

At the same time, persistent inflation keeps the pressure on Central Banks to raise interest rates. The impact of rising interest rates was evident in the US banking crisis in March and there is no doubt that it will affect other parts of the global economy.

During the period, and as is usually the case, the Fund's outperformance was driven by the stocks we own rather than a particular bet on a sector or country.

The top contributor was the Danish pharmaceutical company Novo Nordisk, whose diabetes and obesity drugs are in high demand. US-listed Analog Devices sells semiconductors used in a wide range of applications, from electric vehicles to wireless communications equipment, and they have delivered strong growth in profits, boosting performance. French industrial company Schneider Electric was another top contributor as it benefited from robust demand for some of its products, which are used in the energy transition.

There were, however, some disappointments during the period. Lithium miner Albemarle was the largest detractor as lithium prices fell off record highs reached at the end of the year, and despite delivering record profits for the year 2022. Shares in the Swiss pharmaceutical company Roche declined in the period as some of its new drug trials proved disappointing. Brazilian stock-exchange operator B3 was another detractor as stock market volumes normalized after a period of unusually high activity in the pandemic.

Geopolitics and the impact of rising inflation and interest rates on the economy remain very difficult to forecast, but in a more volatile economic environment, we believe that the quality and resilience of companies we typically invest in should help us navigate a more uncertain market environment.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 SUSTAINABLE EMERGING MARKETS BOND FUND

The performance of selected share classes through to 31 March 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

The Worldwide Sustainable Emerging Markets Bond Fund was seeded at the end of March 2022 and the performance track record is therefore limited to 1 year at this stage.

The Fund invests in hard currency credit with the flexibility to invest in local currency bonds and FX. Our aim is to invest with conviction in debt issued by governments and companies contributing to a sustainable future.

The Fund produced a total return of +10.7% during this six month period, which was marginally ahead of the +10.1% return benchmark index during the same period.

Global financial markets have oscillated in wide ranges for much of the period ended 31 March 2023, yet emerging market bonds recovered strongly from the recent lows seen last September. During the past two years, we have seen substantial interest rate rises in many emerging markets, to combat high levels of inflation. Many emerging market central banks - particularly in the Latin America region - acted more quickly than their developed market counterparts and raised interest rates much higher. As we started to see early signs of global inflation decelerating, bond prices rallied particularly strongly in those parts of the world where both nominal and real bond yields are high.

Although inflationary pressures may have peaked in many countries, inflation rates remain significantly above target levels in both developed and emerging markets. Bringing these towards these target levels will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and therefore, the risk of 'something breaking' and the economy falling into recession increases

At this stage, our base case is that emerging market economies will not be at the epicentre of any looming recession, however, any slowdown in developed markets will have knock-on effects. These will vary significantly between emerging market countries, yet these economies are experienced in coping with significant tightening in financial conditions during short periods. After all, following recent rate hikes, there is scope for monetary policy to loosen if growth deteriorates.

One of the key contributors to performance during the period was the Fund's interest rate positioning. The Fund has a longer duration position, compared with the benchmark index, and benefited as investors became increasingly confident of inflation being controlled in emerging markets. The managers decided to reduce exposure to the US dollar in late 2022 on the expectation that the recent, prolonged period of US exceptionalism was likely to fade. This reduction in dollar exposure proved positive for the Fund's returns thereafter as the dollar weakened from its multi-year highs.

Towards the end of the period, the Fund's off-benchmark allocation to corporate bonds detracted from returns. Bonds of Totalplay, one of the leading telecommunications companies in Mexico, underperformed due to concerns over the company's capital expenditure spending. We also saw some weakness among emerging market bank holdings, caused by issues in the US and European banking sectors, though we are assured by the strong fundamentals of the corporate names we own, many of which have considerable experience in adjusting to fast-changing interest rate cycles, especially compared with their developed market peers.

A backdrop of weaker economic growth and abating inflationary pressures in many regions should be constructive for emerging market bond returns. A deep recession would carry the potential to weigh on sentiment towards emerging markets assets, however that is not our base case. We continue to find attractive opportunities among emerging market countries and companies, where fundamentals are strong, governance is good or improving and valuations are attractive.

MANAGER'S REPORT FOR THE PERIOD ENDED 31 MARCH 2023¹ US EQUITY ALPHA FUND

The performance of selected share classes for the period since inception on 12 December 2022 to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing investment ability and would suggest five-year periods is a more sensible timeframe over which to judge performance. We look forward to reporting to you on more meaningful performance time frames in the years to come.

The Worldwide US Equity Alpha Fund was seeded in December 2022 and therefore has insufficient track record to provide any meaningful performance commentary at this stage.

As at 31 March 2023, the Fund was invested in 70 companies, held across US stock markets. Our aim is to identify high quality growth companies that will outperform over a 5-year (or longer) horizon.

The Fund is relatively index and sector agnostic, as we primarily focus on finding the best long-term US investments irrespective of their size, position in an index or location of listing.

Baillie Gifford Investment Management (Europe) Limited

¹Fund commenced operations on 12 December 2022.

MANAGER'S REPORT FOR THE SIX MONTHS ENDED 31 MARCH 2023 US EQUITY GROWTH FUND

The performance of selected share classes for the six months to 31 March 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

For the six months to 31 March 2023, the US Equity Growth Fund delivered a positive return but lagged behind the benchmark S&P 500 index. Stock market sentiment continued to swing on updates and projections of inflation and interest rate rises. The rapid tightening of monetary policy seems likely to continue to produce unexpected stresses in the US economy. During this six-month period, it prompted a mini-banking crisis in the country. The rapid change in the investment backdrop will also create opportunities and new competitive advantages in the corporate landscape. As long-term growth investors we look for companies with the opportunities to expand their revenues and earnings for several years across a wide range of operating environments

One of the largest detractors from returns during this period was First Republic Bank. This was the Fund's only bank holding. Our investment case had been built upon First Republic's ability to use its exemplary service model and conservative lending culture to maintain a stable and low-cost funding base from its depositors. This did not protect from a panic-driven run on the bank. First Republic was not an outlier versus other regional banks in terms of liquidity, nor did it have a problem with credit quality. It had a sudden problem with consumer confidence. We sold the position as the situation developed but not before the share price fell significantly.

Tesla was also among the largest detractors as volume growth slowed towards the end of the calendar year and investors questioned Elon Musk's ability to dedicate enough of his time to the business. Tesla is in the strongest operating position it has ever been in. It is growing production rapidly, has reached a battery surplus and its manufacturing model is enabling it to lower prices to accelerate demand. Our conviction in the return opportunity is rising and we added to the position during the period.

There were stronger returns from Shopify and NVIDIA, which were among the largest individual contributors to performance. The ecommerce platform Shopify saw its shares recover as it worked through cost reductions following a period of over-expansion. The breadth of service it offers to merchants that use its platform is reflected in the rising fees it collects for the goods being sold. We are excited by its progress. The computer chip manufacturer NVIDIA also had a strong quarter. Its GPU technology is well suited to the development of chips that power artificial intelligence because of its ability to process many calculations in parallel. AI appears to be moving closer to mass adoption. If this happens then NVIDIA stands to benefit as the pre-eminent supplier of this essential element of AI technology.

Over the past decade, many fantastic growth businesses have been able to prioritize revenue expansion over profitability. That appears to be changing. Growth at all costs is now a less viable strategy than it was in the previous decade. Companies with great growth opportunities and the ability to finance that growth from their ongoing operations while still making a profit may provide us with the best return opportunities in the next decade. We are encouraged by the progress that the Fund's holdings are making to adjust to an era of growth with cost control. Great companies are made in difficult times.

1. Statement of Accounting Policies

The significant accounting policies and estimation techniques adopted by Baillie Gifford Worldwide Funds plc (the "Company") are as follows:

The Company is comprised of thirty sub-funds (each a "Fund", together the "Funds"), twenty three of which are funded and approved by FINMA for offering in Switzerland; Baillie Gifford Worldwide Asia ex Japan Fund (the "Asia ex Japan Fund"), Baillie Gifford Worldwide China A Shares Growth Fund (the "China A Shares Growth Fund"), Baillie Gifford Worldwide China Fund (the "China Fund"), Baillie Gifford Worldwide Discovery Fund (the "Discovery Fund"), Baillie Gifford Worldwide Emerging Markets All Cap Fund (the "Emerging Markets All Cap Fund"), Baillie Gifford Worldwide Emerging Markets Leading Companies Fund (the "Emerging Markets Leading Companies Fund"), Baillie Gifford Worldwide European Growth Fund (the "European Growth Fund"), Baillie Gifford Worldwide European High Yield Bond Fund (the "European High Yield Bond Fund"), Baillie Gifford Worldwide Global Alpha Choice Fund (the "Global Alpha Choice Fund"), Baillie Gifford Worldwide Global Alpha Fund (the "Global Alpha Fund"), Baillie Gifford Worldwide Global Income Growth Fund (the "Global Income Growth Fund"), Baillie Gifford Worldwide Global Stewardship Fund (the "Global Stewardship Fund"), Baillie Gifford Worldwide Global Strategic Bond Fund (the "Global Strategic Bond Fund"), Baillie Gifford Worldwide Health Innovation Fund (the "Health Innovation Fund"), Baillie Gifford Islamic Global Equities Fund (the "Islamic Global Equities Fund"), Baillie Gifford Worldwide Japanese Fund (the "Japanese Fund"), Baillie Gifford Worldwide Long Term Global Growth Fund (the "Long Term Global Growth Fund"), Baillie Gifford Worldwide Pan-European Fund (the "Pan-European Fund"), Baillie Gifford Worldwide Positive Change Fund (the "Positive Change Fund"), Baillie Gifford Worldwide Responsible Global Equity Income Fund (the "Responsible Global Equity Income Fund"), Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund (the "Sustainable Emerging Markets Bond Fund"), Baillie Gifford Worldwide US Equity Alpha Fund (the "US Equity Alpha Fund") and Baillie Gifford Worldwide US Equity Growth Fund (the "US Equity Growth

a) Basis of Preparation of Financial Statements

The financial statements for the six months ended 31 March 2023 have been prepared in accordance with accounting standards generally accepted in Ireland, including FRS 102 "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" ("FRS 102"), Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, as amended and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations"). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The financial statements have been prepared on a going concern basis which assumes that the Company will be in operational existence for the foreseeable future.

The format and certain wording of the financial statements have been adapted from those contained in the Companies Act 2014, as amended and FRS 102 so that, in the opinion of the Directors, they more appropriately reflect the Company's business as an investment fund.

The Company meets the criteria to avail of the exemption available to certain investment funds under FRS 102 not to prepare a statement of cash flow.

b) Financial Assets and Liabilities at Fair Value through Profit or Loss

The Net Asset Values of the Funds are calculated by the administrator on each dealing day at the valuation point which is 10.00 a.m. Irish time. For the financial reporting purposes, the Net Asset Values have been stated to close of business. Dealing takes place on each business day unless otherwise determined by the Directors.

The fair value of underlying funds is based on the unaudited Net Asset Value per share advised by the administrator of the underlying funds at the close of business on the dealing day.

In accordance with the prospectus, listed investments are stated at the latest mid-market price at the valuation point, or if unavailable, the probable realisation value on the principal exchange or market for such investments on the valuation day for the purpose of calculating the Net Asset Value for subscriptions and redemptions and for various fee calculations.

NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED 31 MARCH 2023 (CONTINUED)

1. Statement of Accounting Policies (continued)

b) Financial Assets and Liabilities at Fair Value through Profit or Loss (continued)

Fair value measurement and recognition

On initial application of FRS 102, in accounting for its financial instruments at fair value through profit or loss a reporting entity is required to apply either:

- The full provisions of section 11 "Basis Financial Instruments" and section 12 "Other Financial Instruments" of FRS 102; or
- The recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of Sections 11 and 12 of FRS 102; or
- The recognition and measurement provisions of IFRS 9 Financial Instruments and/or IAS 39 (as amended following the publication of IFRS 9) and only the disclosure requirements of Sections 11 and 12 of FRS 102.

The Company has chosen to implement the recognition and measurement provisions of IAS 39 and only disclosure requirements of Sections 11 and 12 of FRS 102.

In accordance with FRS 102 and for reporting purposes, the Company has classified all its investments as financial assets designated at fair value through profit or loss. Investments are initially recognised at the fair value of the consideration given, with transaction costs for such investments being recognised directly in the Statement of Comprehensive Income. Investments are subsequently remeasured at fair value at the period end as described below.

Listed Securities

Securities listed on a recognised stock exchange or traded on any other organised market are valued at the latest mid-market price on the relevant market at the valuation point on the relevant dealing day.

Unlisted Securities

The fair value of any instrument that is not listed or dealt with on a market shall be the probable realisation value of the investment estimated with care and in good faith by the Directors in consultation with Baillie Gifford Overseas Limited (the "Investment Manager") or by a competent person, firm or corporation appointed for such purpose by Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary").

Recognition and Derecognition

The Company recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Company.

Investment transactions are accounted for on a trade date plus one business day basis. For financial reporting purposes, investment transactions are accounted for on a trade date basis.

The Company derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Company.

Realised and Unrealised Gains and Losses on Investments

Realised gains and losses on disposal of investments are calculated using the First In First Out ("FIFO") method and are recognised in the Statement of Comprehensive Income. Realised and unrealised gains and losses on investments arising during the period are dealt with in the Statement of Comprehensive Income.

Subsequent Measurement

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "Financial Assets or Financial Liabilities at Fair Value through Profit or Loss" category are presented in the Statement of Comprehensive Income within "Net Gain/(Loss) on Financial Assets/Liabilities at Fair Value through Profit or Loss".

Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or revalue the assets and settle the liability simultaneously.

Cash

Cash is valued at its fair value, together with interest accrued, where applicable, to the valuation point on the relevant dealing day.

Forward Foreign Currency Contracts

Each Fund may invest in currency forwards in line with its investment objective and policy. All forward foreign currency contracts are fair valued using forward exchange rates prevailing at the relevant valuation date for the remaining period to maturity and any resulting unrealised gains are recorded as assets and unrealised losses as liabilities in the Statement of Financial Position. Realised gains and losses are recorded in the Statement of Comprehensive Income at the time the forward foreign exchange currency contracts settle. In relation to class specific forward foreign currency contracts the realised and unrealised gains and losses and transaction costs are allocated solely to those Share Classes.

Futures Contracts

Upon entering into a futures contract, a Fund is required to deposit with its futures broker, an amount of cash in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract ("variation margin"). For open futures, changes in the value of the contract are recognised as unrealised gains or losses by "marking-to-market" the value of the contract at the balance sheet date. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a realised gain or loss in the Statement of Comprehensive Income.

1. Statement of Accounting Policies (continued)

b) Financial Assets and Liabilities at Fair Value through Profit or Loss (continued)

Swaps

Swap agreements are privately negotiated agreements between a Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified future intervals. In connection with these agreements, securities or cash may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Centrally cleared swaps are valued at the price determined by the relevant exchange or clearinghouse. In the event that market quotations are not readily available or deemed unreliable, certain swap agreements may be valued, pursuant to guidelines established by the Investment Manager, with reference to other securities or indices. In the event that market quotes are not readily available, and the swap cannot be valued pursuant to one of the valuation methods, the value of the swap will be determined in good faith by the Investment Manager.

Currency Swaps

Currency swaps involve the exchange of the two parties' respective commitments to pay or receive fluctuations with respect to a notional amount of two different currencies.

Interest and Inflation Rate Swaps

A Fund may enter into interest and inflation rate swap contracts which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage a Fund's exposure to interest and inflation rates. Interest and inflation rate swap contracts are marked-to-market daily based in some cases on quotations from counterparties and in other cases from pricing services and the change in value, if any, is recorded as an unrealised gain or loss. Payments made or received are recorded as part of realised gains and losses.

c) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the 'functional currency'). The functional currency of of Asia ex Japan Fund, China Fund, Discovery Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, Global Income Growth Fund, Global Stewardship Fund, Global Strategic Bond Fund, Health Innovation Fund, Islamic Global Equities Fund, Long Term Global Growth Fund, Positive Change Fund, Responsible Global Equity Income Fund, Sustainable Emerging Markets Bond Fund, US Equity Alpha Fund and US Equity Growth Fund is US dollar ('USD'), the functional currency of European Growth Fund, European High Yield Bond Fund, Global Alpha Choice Fund, Global Alpha Fund and Pan-European Fund is Euro ('EUR'), the functional currency of Japanese Fund is Japanese yen ('JPY') and the functional currency of China A Shares Growth Fund is Chinese Yuan Renminbi ('CNH').

Transactions and Balances

Assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the balance sheet date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the period. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions.

2. Exchange Rates

The USD exchange rates at 31 March 2023 and 30 September 2022 used in this report are as follows:

	31 March 2023	30 September 2022
Australian dollar	1.49533	1.53527
Brazilian real	5.09425	5.39780
British pound sterling	0.80867	0.89158
Canadian dollar	1.35565	1.36685

Uruguayan peso	38.85000	41.64000
Vietnamese dong	23,475.50000	23,867.50000
Zambian kwacha	N/A	15.82500

3. Collateral

Cash received as collateral is recorded as an asset on the Statement of Financial Position under "Receivable from Broker Margin Accounts" and is valued at its fair value. A related liability to repay the collateral is recorded as a liability on the Statement of Financial Position under "Cash Collateral Payable" and is also valued at its fair value in line with the requirement of FRS 102.

There were no collateral pledged as at 31 March 2023. The following cash has been pledged to the relevant Fund as collateral as at 30 September 2022:

30 September 2022

Fund Name	Counterparty	Amount
Global Strategic Bond Fund	JP Morgan	USD2,970,000
	NatWest Group	USD1,570,000
	Royal Bank of Canada	USD2,340,000
Sustainable Emerging Markets Bond Fund ¹	Barclays Bank	USD860,000
	Citigroup	USD560,000
	National Australia Bank	USD120,000

¹Fund commenced operations on 31 March 2022.

4. Risk Disclosures

General Risk Management Process

The management of financial instruments and associated risks is fundamental to the management of the Company's business. The Company's risk management process ("RMP") is managed by Baillie Gifford Investment Management (Europe) Limited (the "Manager") who is responsible for adhering to the provisions set out in the RMP. This is organised by the Manager by ensuring distinct separation of responsibility between portfolio managers, dealers and investment administration personnel. The Manager has delegated the discretionary investment management function in respect of the Funds to the Investment Manager. In addition, the directors of the Manager have appointed a Designated Person to accept responsibility for the day-to-day monitoring and control of the risk management in respect of the Company. Through the delegation arrangements in place, the board of directors of the Manager has sub-delegated risk management for trading, global distribution out with Europe, and other investment operation activities to the Investment Manager and a number of specified committees to ensure that reasonable care is taken to organise and support the affairs of the Manager. The Depositary independently reviews the Company's controls and procedures on a periodic basis as part of its oversight role when enquiring into the conduct of the Company.

The board of directors of the Manager receive regular reporting to ensure effective risk management of the Funds, and the reporting of information back to the Company's board of directors to enable them to fulfil their responsibilities as directors. This covers all control assessments, emerging risks, incidents, Investment Risk trends and insights as well as regulatory developments and monitoring outcomes. There is an ongoing exchange of risk related information across the Manager's and Group (Risk and Compliance) functions and full access to relevant Committee papers and/or meeting minutes to supplement oversight responsibilities.

Funds Risks

Asset allocation is determined by the Manager who ensures that the distribution of each Fund's assets is appropriate in terms of the investment objective and policy. Divergence from the target asset allocation is strictly controlled and the portfolio is closely monitored in terms of risk.

Derivatives are used in keeping with the investment objective and policy of each Fund, with the intention of protecting or enhancing the return on each Fund. The strategies used include active currency management, bond curve strategies, interest rate strategies, asset allocation and market spread strategies; in addition, derivatives are used for the purposes of efficient portfolio management. The Manager makes use of these strategies as and when it considers it appropriate to do so. Derivative investments (which may be exchange-traded and/or over the counter) are undertaken on a covered basis and the types of asset which underlie the derivative contract are appropriate for the context of the Fund investing primarily in market traded securities. The Investment Manager's use of derivatives is constrained to a level that the risk and exposure, as measured by the Fund's tracking error and Value at Risk ("VaR"), is within prescribed limits.

Managing Risks

In pursuing their investment objectives, the Funds hold significant numbers of financial instruments. The main risks arising from the Funds' financial instruments are market price, foreign currency, interest rate, credit and liquidity risks. The approach to these is set out below.

Market Price Risk

Market price risk arises mainly from uncertainty about future prices of the financial instruments held. It represents the potential loss a Fund might suffer through holding market positions in the face of price movements.

The Company attempts to manage market price risk through its investment policies as specified in the Company's prospectus and by evaluating the Investment Manager's risk management capabilities as a criterion for appointment. The Investment Manager has its own methodology for monitoring and managing market risk with respect to the assets managed by it, which is tailored to the Investment Manager's own specific investment style and approach to risk management. The Company monitors the Investment Manager's adherence to the applicable investment policies through various reports, telephone conference calls and face-to-face meetings.

4. Risk Disclosures (continued)

Managing Risks (continued)

Market Price Risk (continued)

The Asia ex Japan Fund, China A Shares Growth Fund, China Fund, Discovery Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, European Growth Fund, Global Alpha Choice Fund, Global Alpha Fund, Global Income Growth Fund, Global Stewardship Fund, Health Innovation Fund, Islamic Global Equities Fund, Japanese Fund, Long Term Global Growth Fund, Pan-European Fund, Positive Change Fund, Responsible Global Equity Income Fund, US Equity Alpha Fund and US Equity Growth Fund use the commitment approach. The standard commitment approach means that the Fund converts each financial derivative instrument, if any, into the market value of an equivalent position in the underlying asset of that derivative taking into account the current value of the underlying assets, the counterparty risks, future market movements and the time available to liquidate the positions.

The market risk of European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund's financial asset and liability positions is monitored by the Investment Manager using VaR analysis. VaR analysis attempts to reflect the interdependencies between risk variables, unlike a traditional sensitivity analysis. VaR represents the potential losses from adverse changes in market factors for a specified time period and confidence level.

Foreign Currency Risk

The Investment Manager has identified three principal areas where foreign currency risk could impact the Funds which are movements in exchange rates affecting the value of investments, short term timing differences and income received.

With the exception of European High Yield Bond Fund, Global Strategic Bond Fund, US Equity Alpha Fund and US Equity Growth Fund, a substantial proportion of the net assets of each Fund are denominated in currencies other than the base currency of the Fund, with the effect that the Statement of Financial Position and the Statement of Comprehensive Income can be significantly affected by currency movements.

The Funds may be subject to short term exposure to exchange rate movements, for instance where the date of an investment purchase and the date when the settlement occurs are different. To reduce this risk the Investment Manager will normally execute a foreign currency contract on the transaction date wherever practicable.

The Funds receive income in currencies other than their base currency and hence movements in exchange rates can affect the value of this income. To minimise this risk, arrangements are in place to convert all income receipts to the base currencies on, or shortly after, the date of receipt.

Interest Rate Risk

The Company attempts to manage interest rate risk through its investment policies and investment restrictions as specified in the Company's prospectus.

The majority of the financial assets held by the Asia ex Japan Fund, China A Shares Growth Fund, China Fund, Discovery Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, European Growth Fund, Global Alpha Choice Fund, Global Alpha Fund, Global Income Growth Fund, Global Stewardship Fund, Health Innovation Fund, Islamic Global Equities Fund, Japanese Fund, Long Term Global Growth Fund, Pan-European Fund, Positive Change Fund, Responsible Global Equity Income Fund, US Equity Alpha Fund and US Equity Growth Fund are equities and other investments which neither pay interest nor have a maturity date. Therefore, these Funds' direct exposure to interest rate risk is not considered to be significant.

The European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund invest primarily in fixed income instruments. Therefore these Funds are exposed to the risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The Manager uses the VaR model as noted previously in the "Market Price Risk" section to assist in the monitoring of interest rate risk for these Funds.

Credit Risk

Credit risk is the risk that the counterparty to a transaction or an issuer of a financial instrument will cause a financial loss to a Fund by failing to repay an obligation which may have arisen by the Fund; such transactions include purchasing debt instruments, placing deposits or entering into derivative contracts. Credit risk is generally more significant for those Funds that invest primarily in debt instruments or that use over the counter derivative contracts to a material degree.

As at 31 March 2023, the maximum exposure of a Fund to debt instruments is the fair value of the debt instruments as listed in the Statement of Investments for that Fund.

Virtually all broker transactions in listed securities are settled upon delivery to the Depositary. The risk of default is considered minimal as delivery of securities sold is only made once the Depositary has received payment from the broker. Payment to a broker is made on a purchase once the securities have been received by the Depositary. The trade will fail if either party fails to meet its obligation. All counterparties to all derivatives held at 31 March 2023 are listed in the Statement of Investments. The Company's maximum risk of loss for derivative contracts may exceed the amounts recognised on the Statement of Financial Position.

For cash accounts, funds deposited are liabilities of the banks, creating a debtor-creditor relationship between the bank and the Company. Cash accounts opened on the books of Brown Brothers Harriman ("BBH") are obligations of BBH while cash accounts opened on the books of a third-party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. For safekeeping of security assets, BBH's policy under European Union Directive 2014/91/EU (known as "UCITS V Directive") is to maintain segregated client security accounts on its books and on the books of its sub-custodians. While BBH is responsible for exercising reasonable care and diligence in the administration of agency cash accounts, it is not liable for their repayment in the event that the sub-custodian, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment.

4. Risk Disclosures (continued)

Managing Risks (continued)

Credit Risk (continued)

BBH performs both initial and ongoing due diligence on the sub-custodians in its global custody network. Such reviews include an assessment of the sub-custodian's financial strength and general reputation and standing and, at a minimum, meet the due diligence requirements established by applicable law.

Regular financial analysis of all sub-custodians is carried out by BBH's risk and credit group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing. These reviews are not audits.

European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund invest in debt instruments that may receive a credit rating from an international rating agency, or if unrated, may be assigned a credit rating using an approach which is consistent with that used by rating agencies.

Liquidity Risk

Liquidity risk is the risk that a Fund will encounter difficulty in meeting obligations associated with financial liabilities. Such obligations may arise from daily cash redemptions or from derivative contracts such as futures and swaps.

The Funds' assets mainly consist of readily realisable securities. This enables the payment of any investor redemptions without unbalancing the portfolio.

To manage liquidity risk, in extraordinary situations as specified in the Company's prospectus, the Company reserves the right to limit the amount of shares that may be redeemed by an individual Shareholder and/or temporarily suspend the redemption of shares. A suspension of redemptions may be made at any time prior to the payment of the redemption monies and the removal of the details of the relevant shares from the register of Shareholders. Any such suspension shall be notified immediately to the Central Bank. Where possible, all reasonable steps will be taken to bring a period of suspension to an end as soon as possible.

In accordance with the Company's policy, the Manager monitors the Funds' liquidity position on a daily basis.

Other Risk

The Manager monitors both the creditworthiness of counterparties to financial derivative transactions and the extent to which the counterparty risk is diversified.

The aim is to strike a balance between spreading counterparty risk amongst a number of institutions and keeping costs low by achieving economies of scale. Settlement risk is minimised as virtually all transactions are settled on a delivery against payment basis.

Umbrella Structure of the Company and Cross-Liability Risk

Each Fund will be responsible for paying its fees and expenses regardless of the level of its profitability. The Company is an umbrella fund with segregated liability between Funds and under Irish law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross-liability between Funds. Notwithstanding the foregoing, there can be no assurance that, should an action be brought against the Company in the courts of another jurisdiction, the segregated nature of the Funds would necessarily be upheld.

Fair Value Estimation

FRS 102 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Funds have classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- (i) Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- (iii) Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Directors in consultation with the Investment Manager. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

4. Risk Disclosures (continued)

Fair Value Estimation (continued)

The tables below provide an analysis within the fair value hierarchy of the Fund's financial assets and liabilities measured at fair value as at both 31 March 2023 and 30 September 2022.

^{*}In February 2022, following the Russian invasion of Ukraine, the Russian stocks were suspended and initially the Fair Value committee advised to value using a haircut of the last price determined by the movement of two Russian ETFs in the market. On 3 March 2022, it was determined by the Fair Value committee that nil was a more appropriate valuation due to significant drops in the stocks that had been trading in the days after the invasion as well as expected liquidity concerns upon the markets reopening. This has been reviewed on a daily basis by the Fair Value committee and at period-end they have determined the nil value to continues to be appropriate.

Balance, end of period		_	_
Change in unrealised gains or losses for Level 3 assets		_	_
held at period end			
	Level 1	Level 2	Level 3

	Level 1	Level 2	Level 3
	USD	USD	USD
Transfer between Level 3 and Level 1:			
Equities	28,027		(28,027)

At 31 March 2023, for the Asia Ex Japan Fund, there were no securities classified as level 3.

At 30 September 2022

	Listed	
	Equities	Total
Balance, beginning of year	51,554	51,554
Gains and losses recognized in profit and loss	(23,527)	(23,527)
Balance, end of year	28,027	28,027
Change in unrealised gains or losses for Level 3 assets	(23,527)	(23,527)
held at year-end		

At 30 September 2022, for the Asia Ex Japan Fund, the level 3 amount consisted of 1 common stock position (USD28,027). The security was suspended at the year-end and has been valued at the Investment Manager's valuation.

There were no transfers in and out of level 3 during the year ended 30 September 2022.

A 5% increase or decrease in the market price of the securities categorised as Level 3 at 30 September 2022, with all other variables held constant, would have no material impact on the increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares.

6. Connected Person Transactions

In accordance with Regulation 81(4) of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), the board of directors of the Manager is satisfied that:

- (a) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected person (as defined in Regulation 42 of the Central Bank UCITS Regulations); and
- (b) all transactions with a connected person that were entered into during the period to which this report relates complied with the obligations prescribed by Regulation 43(1) of the Central Bank UCITS Regulations.

7. Soft Commissions

Baillie Gifford Investment Management (Europe) Limited has appointed Baillie Gifford Overseas Limited as the Investment Manager. The Investment Manager is the entity responsible for trading and has traded with brokers using execution-only commission rates. The execution-only commission includes the costs of access to each global market, the broker's ability to source liquidity, the use of alternative trading venues, the provision of risk capital, the capabilities of individual sales traders, and the provision of proprietary technology for trading programmes and algorithms. The Investment Manager pays directly for research services under separate agreements with the brokers.

There were no soft commission arrangements for the Funds entered into during the period ended 31 March 2023 (30 September 2022: Nil).

8. Dividends

It is the present intention that the Company will declare dividends annually in respect of distributing Classes of Shares of each Fund (other than European High Yield Bond Fund, Global Income Growth Fund, Global Strategic Bond Fund, Responsible Global Equity Income Fund and Sustainable Emerging Markets Bond Fund) on 1 October in each year (or in the event that 1 October in any year does not fall on a Business Day, the Business Day following that date) and will pay dividends on or around 30 November in each year from net income (i.e. income less expenses). Payment will be made to all Shareholders who held Shares at the record date of 30 September in the relevant year (or in the event that 30 September in any year does not fall on a Business Day, the Business Day preceding that date).

In relation to European High Yield Bond Fund, Global Income Growth Fund, Global Strategic Bond Fund, Responsible Global Equity Income Fund and Sustainable Emerging Markets Bond Fund, it is proposed that the Company will declare dividends quarterly, in respect of distributing Classes of Shares of the Funds, on 1 January, 1 April, 1 July and 1 October in each year (or in the event that any of these dates in any year does not fall on a Business Day, the Business Day following that date) and will pay dividends on or around 28 February, 31 May, 31 August and 30 November in each year. In relation to the Global Strategic Bond Fund, dividends will be paid from net income (i.e. income less expenses). In relation to the European High Yield Bond Fund, the Global Income Growth Fund and the Responsible Global Equity Income Fund dividends may be paid from income and/or capital. Shareholders should be aware that paying dividends from capital may lower the capital value of their investment. Payment will be made to all Shareholders who held Shares at the relevant record date of 31 December, 31 March, 30 June and 30 September in the relevant year (or in the event that any of these dates in any year does not fall on a Business Day, the Business Day preceding that date).

²Fund commenced operations on 10 May 2022.

³Fund commenced operations on 31 March 2022.

⁴Fund commenced operations on 12 December 2022.

Bond Fund				

There were no other dividends declared for the period ended 31 March 2023 and year ended 30 September 2022.

It is not intended to pay dividends in respect of accumulation Classes of Shares in any Fund.

9. Efficient Portfolio Management

The Company may employ techniques and instruments relating to transferable securities and/or other financial instruments in which it invests for investment purposes or hedging. Techniques and instruments utilised for the purpose of efficient portfolio management may only be used in accordance with the investment objective of the Company. Any technique or instrument must be one which is reasonably believed by the Investment Manager to be economically appropriate to the efficient portfolio management of the Company.

No efficient portfolio management techniques were used by the Funds during the period ended 31 March 2023 (30 September 2022: none). There was no revenue or fees derived from efficient portfolio management during the period ended 31 March 2023 (30 September 2022: none).

10. Whistleblowing Policy

The Company has adopted a whistleblowing policy pursuant to the Protected Disclosures Act 2014, as amended, which gives legal protection to workers, which includes directors and shareholders, who make disclosures, including protections against dismissal or being penalised by the Company. Further details about the policy are available on request.

11. Significant Events during the period

The regulatory approval of the US Concentrated Growth Fund was withdrawn from the Central Bank on 11 October 2022, following the application of the Company, which was made before the start of the reporting period.

An updated prospectus was noted by the Central Bank on 14 October 2022 which related principally to the below changes:

- The addition of new Fund: the US Equity Alpha Fund;
- Updates to the investment policies for the following Funds in order to reflect their re-classification pursuant to Article 8 of Regulation (EU) 2019/2088 ("SFDR"). These changes were approved by the shareholders at an extraordinary general meeting of each of the relevant Funds held on 26 September 2022 and 3 October 2022:

the China A Shares Growth Fund the China Fund the Emerging Markets All Cap Fund the Emerging Markets Leading Companies Fund the Global Alpha Fund the Japanese Fund the Long Term Global Growth Fund the US Equity Growth Fund

- Amendments to the investment objective and policy of the Positive Change Fund to clarify the Fund's objective in relation to sustainable investments, which reflect its classification pursuant to Article 9 of SFDR. These changes were approved by the shareholders at an extraordinary general meeting of the Fund held on 26 September 2022;
- Additional disclosures relating to exclusions of certain investments (such as investment in the production or distribution of armaments, thermal coal and/or sale of tobacco) to a number of existing Funds classified pursuant to Article 8 and Article 9 of SFDR.
- Other minor amendments to the investment policies of the Funds, including to provide for investments by certain of the Funds in shares listed on the ChiNext Market and STAR Board. Except in the case of the Funds listed above as being re-classified pursuant to Article 8 of SFDR and in the case of the Positive Change Fund, the changes to the investment policies were not material and the shareholders of the Funds were notified in advance of these changes taking effect;
- Amendments to the target narratives of a number of Funds;
- An amendment to the selling restriction for Australia;
- Amendments for the reduced management fee from 0.36% to 0.24% for an initial period of 24 months in respect of the Baillie Gifford Worldwide China A Shares Growth Fund;
- Minor amendments to the Sustainable and Responsible Investment and Impact Risk disclosure; and
- Removal of the Moscow Exchange MICEX-RTS from the list of regulated markets as listed at schedule II of the prospectus.

An updated prospectus was noted by the Central Bank on 25 November 2022 which related to the inclusion of the template pre-contractual disclosures required under Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022 supplementing SFDR (the "SFDR Level 2 RTS") and other changes related to SFDR, the SFDR Level 2 RTS and Regulation (EU) 2020/852 the "Taxonomy Regulation").

The US Equity Alpha Fund launched on 12 December 2022.

An updated prospectus was noted by the Central Bank on 16 March 2023, which related to updated disclosure requirements principally relating to nuclear energy and fossil gas required by the SFDR Level 2 RTS and other changes related to SFDR, the SFDR Level 2 RTS and the Taxonomy Regulation.

There were no other significant events affecting the Company during the period.

12. Events since the period end

There were no significant events affecting the Company since the period end.

13. Approval of Financial Statements

The report and unaudited financial statements were approved by the board of directors on 24 May 2023.
