## What is this Product?

### Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is USD.

### Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long-term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, shares, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a combination of quantitative investment strategies that are developed by the Investment Manager, Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

### Intended investor

The Fund is intended for sophisticated retail and institutional investors

### Term

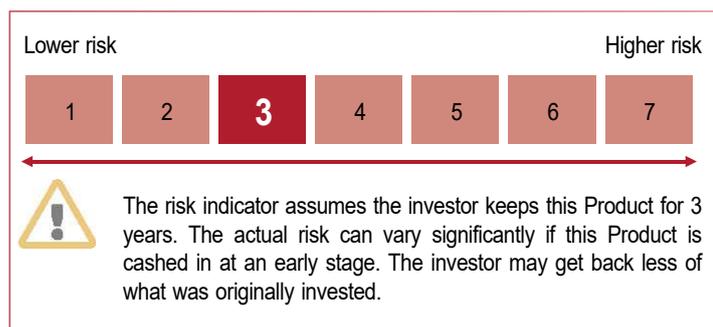

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

**Depository:** The Bank of New York Mellon SA/NV, Dublin Branch

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 3 out of 7, which is a medium-low risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.winton.com>.

### Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

## What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

## What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 USD	If you exit after 1 year	If you exit after 3 years
Total Costs	389 USD	1,270 USD
Annual cost impact % *	3.9 %	4.0 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.90 % before costs and 0.90% after costs.

#### Composition of costs
