General Information

Structure

Aegon Asset Management Investment Company (Ireland) Plc (the "Company") is structured as an umbrella type open-ended investment company with variable capital consisting of a number of different sub-funds ("Funds"), incorporated on 25 June 2007 under the Companies Act 2014 (as amended) and is authorised in Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). Accordingly, the Company is supervised by the Central Bank of Ireland (the "Central Bank").

Shares representing interests in different Funds may be issued from time to time by the Directors. Shares of more than one class may be issued in relation to a Fund. All shares of each class will rank pari passu save as provided for in the relevant Supplement. A separate portfolio of assets will be maintained for each Fund (and accordingly not for each class of shares) and will be invested in accordance with the investment objective and policies applicable to such Fund.

The Company has segregated liability between its Funds and accordingly any liability incurred on behalf of or attributable to any Fund shall be discharged solely out of the assets of that Fund.

As at 31 October 2022, the Company has eleven active Funds in existence, all of which are open to new subscriptions:

Aegon Strategic Global Bond Fund

Aegon Investment Grade Global Bond Fund

Aegon High Yield Global Bond Fund

Aegon Absolute Return Bond Fund

Aegon Global Equity Income Fund

Aegon Global Diversified Income Fund

Aegon Global Sustainable Equity Fund

Aegon Global Sustainable Diversified Growth Fund

Aegon Global Equity Market Neutral Fund

Aegon Short Dated High Yield Global Bond Fund

Aegon Global Short Dated Climate Transition Fund*

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

General Information (continued)

Investment Objectives and Policies of the Funds

Aegon Strategic Global Bond Fund

The investment objective of the Aegon Strategic Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Investment Grade and AAA Government Bond sector includes all fixed income securities available globally.

The Fund may invest in government and corporate bonds which may be at a fixed or floating rate, rated or unrated.

Aegon Investment Grade Global Bond Fund

The investment objective of the Aegon Investment Grade Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing primarily in Investment Grade Government and Corporate bonds in any currency which may be at a fixed or floating rate, rated or unrated (deemed to have an equivalent rating by the Investment Manager). The Fund may also hold selected High Yield bonds and cash.

Aegon High Yield Global Bond Fund

The investment objective of the Aegon High Yield Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in High Yield bonds (i.e. securities having a rating of Ba1 by Moody's or below or BB+ by Standard and Poor's or below, or other debt instruments deemed by the Investment Manager to be of similar credit quality) in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund may also hold selected investment grade bonds and cash.

The Fund will invest primarily in High Yield bonds whose credit rating is rated below investment grade.

Aegon Absolute Return Bond Fund

The investment objective of the Aegon Absolute Return Bond Fund is to generate positive absolute returns for investors over a rolling 3 year period irrespective of market conditions.

The Fund will seek to achieve its investment objective by investing in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Fund may invest in all types of fixed and floating rate fixed income securities.

Aegon Global Equity Income Fund

The investment objective of the Aegon Global Equity Income Fund is to provide income and capital growth over the longer term by investing in the global equities market. The Fund will aim to deliver a yield higher than that generally available from investment in global equities.

In seeking to achieve its investment objective the Fund intends to invest primarily in a portfolio of global equity securities providing an above average yield (i.e. a higher yield than the yield of the overall global equity market). The Fund may also invest to a limited extent, in other securities and instruments.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

General Information (continued)

Aegon Global Diversified Income Fund

The investment objective of the Aegon Global Diversified Income Fund is to provide income with the potential for capital growth over the medium term.

The Fund will seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the FDIs.

Aegon Global Sustainable Equity Fund

The investment objective of the Aegon Global Sustainable Equity Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing directly in a diversified portfolio of global equity securities which meet the Fund's predefined sustainability criteria. The Fund is not constrained by any index weightings and will not concentrate on any particular sector. There are no currency or geographical limitations on the Fund's investments.

Aegon Global Sustainable Diversified Growth Fund

The investment objective of the Aegon Global Sustainable Diversified Growth Fund is to maximise total return (income plus capital) over the medium term at a lower risk than global equity markets by investing in a diversified portfolio of global assets.

The Fund will seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the FDIs.

Aegon Global Equity Market Neutral Fund

The investment objective of the Aegon Global Equity Market Neutral Fund is to generate positive absolute returns over a rolling 3 year period irrespective of market conditions by investing in the global equities market.

The Fund will seek to achieve its investment objective by investing in companies listed or traded on a recognised market. The Fund will invest in these companies or equity indices primarily using FDIs such as swaps and contracts for difference but may also invest directly in equities.

Aegon Short Dated High Yield Global Bond Fund

The investment objective of the Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in High Yield bonds in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund's exposure to bonds may be obtained through direct investment or through the FDIs. The Fund may also hold selected Investment Grade bonds and cash.

Aegon Global Short Dated Climate Transition Fund*

The investment objective of the Aegon Global Short Dated Climate Transition Fund is to provide a return (income plus capital).

The Fund seeks to achieve its investment objective by investing primarily in global Investment Grade Bonds, including government and corporate bonds denominated in any currency and which might be fixed or floating rate and rated or unrated, which meet the Fund's predefined sustainable criteria.

* On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Directors' Report

The Directors present their annual report and audited financial statements for the financial year ended 31 October 2022.

Statement of Directors' Responsibilities in respect of the Financial Statements

The Directors are responsible for preparing the Annual Report and financial statements in accordance with applicable law and regulations. Under that law the Directors have prepared the financial statements in accordance with Irish Generally Accepted Accounting Practice (accounting standards issued by the UK Financial Reporting Council, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and Irish law) and European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the UCITS Regulations").

Irish company law requires the Directors to prepare financial statements for each financial year, which give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors' report comply with the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) ("the Central Bank UCITS Regulations") and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Under the UCITS Regulations, the Directors are required to entrust the assets of the Company to a Depositary for safekeeping. In carrying out this duty, the Directors have delegated custody of the Company's assets to Citi Depositary Services Ireland DAC.

Statement on relevant audit information

The Directors confirm so far as they are aware that there is no relevant audit information of which the Company's statutory auditors are unaware. The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Directors' Report (continued)

General Principles

The Board of Directors voluntarily complies with the Corporate Governance Code for Collective Investment Schemes and Management Companies as published by the Irish Funds Industry Association (the "IF Code") in December 2011, as the Company's corporate governance code and which can be obtained at http://www.irishfunds.ie/regulatory-technical/corporate-governance. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and procedures for the financial year.

Directors' Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. The Directors have performed a review, during the financial year, of the arrangements and structures in place to ensure material compliance with the Company's relevant obligations.

Principal Activities

Please refer to General Information, for a summary of the Company's principal activities.

Review of the Business and Future Developments

The Directors have entrusted the management of the Funds to the Management Company, the Management Company has delegated certain duties to the Investment Manager and the Administrator. The investment management activities and the details of the performance of the Funds over the last financial year are reviewed in detail in the Investment Manager's Report.

The Directors of the Company do not anticipate any change in the structure or investment objectives of the Funds.

Risk management objectives and policies

The Company has been approved by the Central Bank as an Undertakings for Collective Investments in Transferable Securities ("UCITS") Fund. It is an umbrella Fund which at the date of this report consisted of eleven active Funds. All Funds were operational during the financial year under review.

A detailed review of the principal risks and the management of those risks are included in Note 12 to the Financial Statements. The prospectus of the Company sets out a comprehensive disclosure of the risk inherent in investing in the Funds. See 'Events during the Financial Year' and 'Events after the Statement of Financial Position Date' notes on pages 8 and 9 for a detailed review of the other risks and uncertantities facing the Company.

Results

The financial position and results for the financial year are set out in Statement of Financial Position and the Statement of Comprehensive Income.

Detailed distributions are disclosed in Note 9 of the notes to the financial statements.

The decrease in net assets attributable to the shareholders of the Company for the financial year amounted to USD (646,380,987) (2021: increase of USD 450,885,690).

On 9 December 2021, Aegon Asset Management Investment Company (Ireland) Plc appointed Aegon Investment Management B.V. as its Management Company. The Prospectus and Supplements were updated to reflect this restructure.

On 15 July 2022, Aegon Short Dated Investment Grade Fund changed its name to Aegon Short Dated Climate Transition Fund.

The Board of Directors have noted the developments in the Ukraine and governments continue to impose sanctions on Russia. Given the absence of exposure in the region, the Board of Directors' view is that those developments and sanctions are unlikely to have a significant direct adverse impact on the Company. Nonetheless, the situation continues to evolve, and it remains difficult at this stage to estimate all direct and indirect impacts which may arise from these emerging developments. The Board of Directors continue to monitor the developments closely and to take all the necessary actions.

There have been no other significant events during the financial year.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Directors' Report (continued)

Events after the Statement of Financial Position date

On 31 January 2023, the Directors declared the following dividends for the Income Share Classes on the following Funds:

Aegon Strategic Global Bond Fund USD 415,277.

Aegon Investment Grade Global Bond Fund USD 99,944.

Aegon High Yield Global Bond Fund USD 1,187,669.

Aegon Absolute Return Bond Fund GBP 363,277.

Aegon Global Equity Income Fund USD 361,765.

Aegon Global Sustainable Diversified Growth Fund EUR 115.

Aegon Short Dated High Yield Global Bond Fund USD 101,990.

Aegon Global Short Dated Climate Transition Fund GBP 1,417,794

The Directors declared the following dividends for the Income Share Classes on Aegon Global Diversified Income Fund: 30 November 2022 – EUR 344,915, 31 December 2022 – EUR 277,581 and 31 January 2023 – EUR 311,784.

There have been no other significant events since the financial year end.

Directors

The Directors of the Company during the financial year were:

Mr. Mike Kirby

Ms. Bronwyn Wright

Mr. Stuart Donald

Directors' and Secretary's Interests

Apart from those noted below, none of the Directors and Secretary held any interests in the Company as at 31 October 2022 or at any point during the financial year (31 October 2021: None).

Mike Kirby is a director of the Waystone Group of which KB Associates is a member firm, a firm which provides consultancy, VAT reporting and money laundering reporting officer services to the Company. Please refer to Note 14 for details of fees paid to KB Associates.

Stuart Donald is an employee of Aegon Asset Management UK Plc, the Investment Manager. Please refer to the "Directors' Fees" Note 11 for details of transactions to the Directors' respective entities during the financial year.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Directors' Report (continued)

Connected Persons

Regulation 43 of the Central Bank UCITS Regulations 'Restrictions of transactions with connected persons" states that 'A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unit holders of the UCITS".

As required under Central Bank UCITS Regulation, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected parties that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Audit Committee (Section 167 of Companies Act 2014)

The Directors believe that there is no requirement to form an audit committee as the Board has only nonexecutive Directors and one independent Director and the Company complies with the provisions of the Irish Funds' Corporate Governance Code. The Directors have delegated the day to day investment management and administration of the Company to the Investment Manager and to the Administrator respectively. The Directors have also appointed Citi Depositary Services Ireland Designated Activity Company as depositary of the assets of the Company.

Accounting Records

To ensure that adequate accounting records are kept in accordance with Sections 281 to 285 of the Companies Act 2014, the Directors of the Company have employed a service organisation, Citibank Europe Plc (the "Administrator"). The accounting records are kept at the offices of the Administrator at 1 North Wall Quay, Dublin 1, Ireland.

Auditors

The auditors, PricewaterhouseCoopers, Chartered Accountants, will continue in office in accordance with Section 383 of the Companies Act 2014.

On behalf of the Board

Director: Bronwyn Wright

Director: Mike Kirby

Investment Manager's Report

Aegon Strategic Global Bond Fund

Performance

The Aegon Strategic Global Bond Fund returned -18.21% over the 12-month period, compared to the peer group median return of -13.74%. The fund share class is B Inc USD.

Strategic Review

Almost all areas of the bond market came under significant pressure over the period. The combination of rising inflation with rising interest rates and slower economic growth was an extremely poor background for fixed income. Both government and corporate bond markets subsequently recorded large negative returns over the period as a whole.

The fund was not immune to the sharp sell-off seen in almost all fixed income assets. Over the first half of the period, the fund performed relatively well, making full use of its flexible, global remit to navigate its way through the turbulent conditions. However, the magnitude of the sell-off in bond markets during the second half of the 12-month period hurt performance.

Initially, interest rate risk management added some value to the fund. We began the period with a slightly longer position than the median, which came under pressure as yields backed-up due to concerns over central bank intentions regarding monetary policy (central bank communications were somewhat erratic to say the least). As we moved into 2022, however, we adopted a cautious positioning across most risk markets as it became clear that significant risks lay ahead. The fund was therefore well positioned to benefit from the sharp sell-off in global rates markets witnessed at the start of 2022.

From this point onwards we actively managed our duration positioning to reflect the turbulent conditions. During the second half of the period, we typically trimmed the duration of the fund when it was clear yields would inevitably back-up, and then subsequently added back some interest risk as valuations looked more attractive.

During the second half of the period, however, it became clear that central banks were fully focused on their drive to control inflation, even at the expense of growth, which pushed yields higher across all markets. Duration management, particularly during those periods where we looked to take advantage of higher yields, therefore detracted from performance. Towards the end of the period we reduced our interest rate risk exposure, mainly in the UK given the political crises gripping the country. Following a significant sell-off in UK gilts we added back some risk which worked well as UK gilts rallied following a backtrack on fiscal plans and an eventual change in Prime Minister.

In terms of yield curve positioning, we maintained a US yield curve flattening trade at the beginning of the period (we held a preference for the long end of the US government bond market). This trade added value as an early start to the Fed's rate hiking cycle began to be priced-in. We finally closed the trade at the end of March, when the difference between the yields on the 5-year and 30-year US government bonds became negative (inverted yield curve). We also benefited from taking tactical short positions in Italian government bonds as they generally underperformed core rates markets.

As we moved through 2022 we positioned the fund for steeper yield curves, especially in the US owing to the inversion between 5-year and 30-year bonds. This position added some value initially, but the more aggressive approach from the US Federal Reserve to controlling inflation caused the 5-year/30-year curve to invert to levels only seen once in the past 30 years. While this move hurt performance, it did reverse somewhat at the periodend when some Fed members raised the prospect of moving to smaller rate hike increments in future meetings.

Our exposure to corporate bonds also detracted from performance although within our weighting to investment grade bonds, the majority of the poor performance was due to the duration component in the face of government bond volatility, with the actual credit spread moves proving to be more orderly. Our exposure to high yield bonds began the period well but as the market sell-off intensified during the second half of the period, this area also detracted. As the period came to an end, corporate bonds (both high yield and investment grade) benefited from the drop in yields and narrowing in credit spreads. In particular, the recovery in UK-based assets was noticeable and a positive contributor to performance.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Investment Manager's Report (continued)

Aegon Investment Grade Global Bond Fund

Performance

The Aegon Investment Grade Global Bond Fund returned -19.06% over the 12-month period, underperforming the index return of -17.09%. The share class is B Inc USD.

Strategy review

The period was marked by concerns over persistent high inflation and, as a consequence, the hawkish comments and subsequent action by central banks. Adding to the challenges facing markets was the tragic outbreak of war in Ukraine, which contributed to the inflationary pressures. In this environment, bond markets endured a significant sell-off, both in government and corporate bonds.

The fund was not immune to the very challenging backdrop, as evidenced by the negative absolute return for the period. It is important to note, however, that the sell-off was largely indiscriminate in nature and there was generally nothing material at an individual bond level behind the declines seen in many of our holdings. This was certainly the case at the beginning of the period when our exposure to the bank and insurance sectors came under pressure.

Over the first half of the period, we tended to run the fund with less duration than the index and also adopted a cautious approach to credit risk. Our short duration position was beneficial, given the extent to which interest rate markets moved to price-in more policy tightening. However, the decision to be strategically underweight interest rate risk did not preclude us from trying to exploit shorter-term periods of volatility, where we believed it was prudent to add duration. We were most active in the dollar and sterling interest rate markets – and managed to run with profitable positions across both markets at various times as we moved into 2022.

By March, we viewed the widening we had seen in credit spreads (which was exacerbated by events in Ukraine) as an opportunity to add credit risk to the portfolio. We also instigated a long duration position in the portfolio in April– primarily through the US Treasury market. This move was based on our view that we were approaching the peak in inflation, and therefore that the market was pricing-in too many rate hikes given the deteriorating economic backdrop.

We were too early into this move, however, as inflation concerns continued and were joined by worries over economic growth. Our overweight exposure to BBB-rated credit – and cyclical names especially – was subsequently a key detractor from fund performance. One of the notable consequences of the sell-off in both rates and credit markets was the sharp decline we saw in callable bonds, with the REIT sector in particular coming under sustained pressure, which hurt our exposure to the area.

While markets subsequently recovered somewhat, the backdrop deteriorated once again, and particularly in September. A combination of concerns over the persistence of inflation, fears over the extent of a consumer-led slowdown, and an uptick in primary (new issuance) weighed heavily on spreads. These concerns were exacerbated by the mini-budget announcement by the new (and short-lived) Liz Truss-led government in the UK. While the spending commitments announced were largely as expected, the unfunded tax cuts raised concerns over the government's fiscal credibility, which ultimately led to a severe sell-off in gilts and also impacted credit markets. The resultant weakness in subordinated financial credit and corporate hybrids in particular – especially insurance paper – was detrimental to fund performance. Offering some relief was the fund's holdings in short-dated bonds as well the exposure to less rates-sensitive subordinated bonds.

By the end of the period, we saw some recovery in rates and in credit spreads, predominantly in the sterling market which vindicated our decision to remain overweight credit risk.

Aegon High Yield Global Bond Fund

Performance

The Aegon High Yield Global Bond fund returned -10.23%, against the peer group median return of -13.40%. The fund share class is B Inc USD.

Strategy review

The period was marked by concerns over persistent high inflation and, as a consequence, the hawkish comments and subsequent action by central banks. Adding to the challenges facing markets was the tragic outbreak of war in Ukraine, which added to the inflationary pressures. In this environment, bond markets endured a significant sell-off, both in government and corporate bonds.

The fund was not immune to the very challenging backdrop, as evidenced by the negative absolute return generated over the period. It is important to note, however, that the sell-off was indiscriminate in nature and, in many cases, there was nothing material at an individual bond level behind the decline witnessed. Short-dated bonds in particular, were impacted by the significant move higher in government bond yields but also by widening credit spreads as investors demanded more of a risk premium to own credit risk given the tighter monetary policy backdrop.

We retained a cautious approach due to the uncertainty and volatility that resulted from the market backdrop, which was evidenced through taking on low interest rate risk. In particular, we held a preference for short-dated holdings that were trading to near-term call dates over longer-dated as we valued the lower volatility nature of these holdings. We maintained a short duration position overall, which supported performance.

The fund held a bias towards lower rated credit throughout the period. Our largest position was in single-B rated bonds which was beneficial to performance. Our next largest allocation was to BB-rated bonds, although we were underweight in a relative sense. Although there were some gains to be found in BB, particularly in quarter-two of 2022, our underweight position was a tailwind for performance. Our overweight allocation to CCC provided the greatest amount of negative return against the benchmark on a rating level. Our regional allocation detracted from performance, but our allocation in the UK - which was the smallest allocation - fared the best, with the US allocation being the largest detractor.

Disciplined issue selection helped mitigate some of the worst effects of the sell-off in markets and while the fund returned negatively, it managed to outperform the peer group median. The largest positive contribution came from not holding challenged energy name Petroleos Mexicanos. However, our position in Enquest was a notable positive holding throughout the period as energy enjoyed a strong rally. Our holding in US technology name Avaya was the main detractor, followed by our lack of position in real estate name Ado Properties.

Our largest allocation was to energy which benefited performance due to rally in the sector as a result of rising oil and gas prices. Our slight overweight allocation to banking was the area of largest detraction, followed by an overweight positioning in technology and electronics, which struggled over the period.

Aegon Absolute Return Bond Fund

Performance

The Aegon Absolute Return Bond Fund returned -1.94% over the 12-month period, compared to a benchmark return of 0.66% for the SONIA cash benchmark. The fund share class is B Acc GBP.

Strategy review

Almost all areas of the bond market came under significant pressure over the period. The combination of rising inflation with rising interest rates and slower economic growth was an extremely poor background for fixed income. Both government and corporate bond markets subsequently recorded large negative returns over the period as a whole.

The Fund is made up of three modules: the Credit module focuses on credit-neutral, relative-value positions within global investment grade, high yield and emerging markets; the Rates module focuses primarily on duration-neutral, relative-value positions; and the Carry module invests in a range of short-dated, investment grade bonds. The Carry module detracted from performance while the Rates module added value, and the Carry module was relatively flat.

Within the Credit module our collection of hedged corporate bonds was not immune to the challenging conditions, although periods of underperformance were typically not driven by any specific holdings or positions. Initially, we managed to avoid much of the volatility by managing our hedging positions carefully as well as through disciplined security selection. During the second half of the period, however, the magnitude of the sell-off in bond markets was such that our hedged corporate bonds detracted. In particular, the credit market in Europe was particularly weak, owing in part to stresses within the property sector. The fund had exposure to this sector and, although the companies we held were not the direct focus of concern for the market, they nonetheless traded poorly. The knock-on effect of these concerns was that liquidity in the broader European corporate bond markets deteriorated.

Towards the end of the period a combination of growth and inflation concerns were exacerbated by the UK's mini-budget announcement which caused a significant repricing in gilt yields and a sharp widening in credit spreads. While the duration and credit hedges against these bonds served to mitigate the impact, they were not sufficient to insulate the fund entirely. Again, there was little, if any, idiosyncratic factors driving individual positions but rather the impact of broad-based selling of corporate bonds in response to heightened rate market volatility and the need for liquidity within UK pension schemes.

Our CDS pair trades performed well over the first half of the period but came under pressure over the second half as the market environment deteriorated. Initially, our long-risk Stellantis versus short-risk Daimler position performed well, as did our long-risk AstraZeneca versus short-risk Akzo Nobel position. The pharmaceuticals giant continued to see strong top-line earnings from its Covid-19 vaccine, while Akzo faced growing margin pressures. In contrast, our long-risk Tesco versus short-risk British Telecom moved against us as BT benefited from some supportive newsflow during the second half of the period. Our basis trades – where we are long a company's bonds and long CDS protection in the same name – were relatively subdued although positions in Ford, HSBC and Credit Suisse all added value.

The Rates module benefited from a number of relative value core markets. This was due partly to our decision to hold short positions in those markets whose central banks were most likely to tighten policy – the US and UK – against long positions in German assets. A key driver of the volatility early in the period was therefore the somewhat erratic communications from central banks regarding future policy to combat inflation.

For example, during the first half of the period our short position in 10-year UK futures versus long positions in both 10-year US and German futures aided performance. This position was an expression of our bearish view on UK government bonds and the need for their yields to reprice higher to better reflect the inflationary backdrop the country faces and the need for rate hikes. As the period progressed, we saw a steady underperformance of UK gilts which supported our position.

Aegon Absolute Return Bond Fund (continued)

Investment Manager's Report (continued)

Strategy review (continued)

In Europe, we began the period with a long 5-year US versus a short 5-year German position, in anticipation of euro rates underperforming. However, the tragic outbreak of war in the Ukraine saw 5-year German futures outperform their US counterparts. As a result, we closed the trade before opening the opposite position. Our long 5-year Germany versus short 5-year US position subsequently performed well.

Also adding value of over the first half of the period was a long position in 30-year US inflation breakevens. This involved buying 30-year US TIPS – inflation protected bonds – and selling 30-year US Treasury futures against it to remove the duration risk. The position performed well as investor demand for inflation protection continued to rise.

Political activity also provided an opportunity to add value. As we moved through 2022 our long-held short in 10-year France versus long 10-year Germany made a positive contribution. French bonds widen against their German counterparts due to nervousness in the run up to the French Presidential election. During the second half of the period, we also added a long 10-year Germany versus short 10-year Italy position, which was beneficial as Italian government bonds came under pressure, partly due to the surprise collapse of the Draghiled government. We subsequently decided to lock-in the profits made.

Towards the end of the period, our yield curve steepening trades detracted from performance as the US Fed voiced its determination to fight inflation, which caused the curve to flatten. Similarly, the yield curve flattened in the UK, as both rate expectations and short-dated bond yields continued to rise. This was more than offset, however, by the performance of two trades, The first was a long 5-year Swedish rates versus short 5-year German futures position. The pace of the Swedish economy showed signs of slowing and market expectations had looked too hawkish compared to our expectations for the future rate path. This supported Swedish rates at a time when German bonds were coming under pressure as rate expectations continued to build.

The second trade was our long 10-year Australia versus short 10-year US position. The RBA had been slow to start its tightening cycle but once it did, the market began to price-in a very aggressive rate path. However the Bank later indicated that the series of larger-than-normal rate hikes may not be needed as rates reach higher levels. This guidance supported Australian bonds and we subsequently closed our position at a profit.

The Carry module struggled over the course of the period. The combination of sharply higher yields and credit spreads moving wider meant that the module detracted from performance. There were few idiosyncratic or company-specific factors driving the returns but rather the widespread repricing of short-dated bond yields. Within the module, we continued to focus on careful security selection, and continued to review our positions given the challenging market conditions.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Investment Manager's Report (continued)

Aegon Global Equity Income Fund

The Aegon Global Equity Income Fund returned -15.31% over the 12-month period, compared to the Investment Association Global Equity Global Income median fund return of -5.91%, and the MSCI ACWI return of -19.58%. The fund share class is C Inc USD.

In terms of income generation the fund achieved a rolling annual distribution yield of 2.80% based on the C Income USD share class, compared to the MSCI AC World index yield of 2.33%.

Strategy review

Inflation, and subsequent central bank interest rate rises to dampen the effects, resulted in a challenging environment for equity markets. Furthermore, the tragic and ongoing Russia-Ukraine war that began in February caused supply chain issues for some metals and agricultural products, but perhaps most significantly, a rise in the cost of oil and gas. This contributed to increasing inflationary pressures even more. Political turmoil in the UK after a mini-budget announcement, which included unfunded tax cuts, also caused further uncertainty in markets. China has also faced numerous headwinds over the period, including continued Covid-19 lockdowns due to its 'Zero COVID' policy, worries over the health of its massive property sector and government interventions in certain sectors. For most of the period, we saw an outperformance of value over growth which had a major negative impact on areas of the market that tend to trade on higher valuations such as information technology. While valuations across equity markets have fallen over the period, corporate earnings have generally remained robust, providing a source of solace for investors. The challenging macro backdrop has meant the pace of earning growth has slowed compared to the exceptional levels seen in 2021, but a sever deterioration in corporate profitability, as some participants had feared, has not yet materialised.

Both attribution and stock selection contributed positively, with excellent stock selection being the main driver of performance. In terms of sector allocation, the fund benefitted from its underweight exposure to communication services and consumer discretionary sectors, which posted the most precipitous falls over the period. In addition, carrying a higher weighting in consumer staples and financials also helped. This was slightly offset by our lower exposure to energy, which was the best performing sector, but where we hold only one position, as well as our lower weight to healthcare compared to the index.

Within stock selection, Pepsico was the top positive contributor. Over the period the company posted a convincing earnings beat with double digit revenue growth, as they successfully passed on price increases to consumers and navigated a challenging cost environment. Our position to Astrazeneca was also a top contributor and did well throughout the majority of the year. During quarter-two of 2022 the company posted better than expected results and reaffirmed guidance, supporting performance. Holding positions in financial names Zurich Insurance and DBS Group was also to our advantage.

Within stock selection, semiconductor stocks in general performed poorly, with the fund's largest detractor being TSMC. The industry is inherently cyclical and has seen sentiment deteriorate over the period. That said, we remain positive on the long-term drivers of growth. Garmin was another top detractor as it experienced softer results as its fitness segment decelerated from the massive pandemic boost. During the period we sold the position as the investment case had changed. Ball Corp fell sharply as supply-demand dynamics shifted significantly in the aluminum can market, leading to it mothballing two existing plants and postponing construction of another one. We sold the position as this was a change from our original investment thesis. Energy has been the best performing sector over the period, so not holding major index constituents Exxon and Chevron, acted as a relative drag.

Investment Manager's Report (continued)

Aegon Global Diversified Income Fund

Performance

The Aegon Global Diversified Income Fund returned -12.17% in the 12 months up to 31 October 2022. The fund share class is B Inc euro.

Strategy review

Almost all asset classes came under significant pressure over the 12-month period with rising inflation the main driver of the challenging conditions. The period started with concerns over the outbreak of the Omicron variant of the Covid-19 virus, although these concerns softened as it became clear that the variant was less virulent than expected. Economies therefore slowly began to open up which resulted in a surge in inflation as countries wrestled with supply chain pressures. As we moved into 2022 the inflationary pressure increased rapidly following Russia's tragic invasion of Ukraine. This led to a sharp rise in the price of oil and gas as well as many metals. Central banks subsequently raised interest rates to combat rising inflation levels. Towards the end of the period, the market also had to contend with political volatility in the UK in particular, as the Truss-led government announced a mini-budget, which included unfunded tax cuts. This move, which was eventually reversed, added to the inflationary pressure in the UK economy.

Renewable energy was one of the few areas to contribute positively to performance. The sector performed strongly following the Russian invasion of Ukraine. This was mainly due to higher global energy prices - in particular European gas - driving up electricity prices; a greater general perceived urgency to build out renewable energy in an effort to reduce dependence on energy sourced from politically unstable regions; and higher expected inflation which would benefit producers with inflation-linked pricing contracts.

In contrast, our allocations to bank credit and listed real estate were the areas that detracted the most. Due to credit spreads widening and the sell-off in bond markets, the weakness in bank credit was unsurprising. While our exposure to government bonds also detracted, the impact was limited given our very small allocation to the asset class. Initially, the lower sensitivity of high yield corporate bonds to changes in government bond yields lessened the sell-off in this segment. As we moved through the second half of the period, however, high yield eventually succumbed to the very challenging conditions.

Real estate came under pressure, particularly as we moved through 2022. Rising bond yields and concerns for European economies due to the Ukraine war resulted in a fall in share prices for residential exposures in Germany, France and the UK. Asian and US exposures were less impacted and helped to offset some, but not all, of the European weakness. Among the worst contributors within listed real estate positions were Leg Immobilien, Grand City Properties, Vonovia.

Both our equity allocations – high dividend and global equity income – delivered negatively in relative terms over the period. Despite the style rotation in equity markets from growth into value, the allocation came under pressure during the second half of the period. The impact within stock selection was broad-based. Belgian telecoms company Telenet was one of the largest detractors. Our holdings in tech companies Broadcom, Garmin, Samsung, Simplo and TSMC all struggled, while exposure to banks (Nordea, Morgan Stanley) and insurance (Zurich Financial, Legal & General) also hampered overall returns. In contrast, our exposure to pharmaceuticals, while volatile, contributed positively. Among the strongest performers in this area were AstraZeneca and Pfizer. Our holdings in large mining names such as Rio Tinto and Anglo American also performed well, given the rise in metal prices.

Investment Manager's Report (continued)

Aegon Global Sustainable Equity Fund

Performance

The Aegon Sustainable Equity Fund returned -36.26%, underperforming the benchmark MSCI AC World Index return of -5.84%. The fund share class is B Acc euro.

Strategy review

Inflation, and subsequent central bank interest rate rises to dampen the effects, resulted in a challenging environment for equity markets. Furthermore, the tragic and ongoing Russia-Ukraine war that began in February caused supply chain issues for some metals and agricultural products, but perhaps most significantly, a rise in the cost of oil and gas. This contributed to increasing inflationary pressures even more. Political turmoil in the UK after a mini-budget announcement, which included unfunded tax cuts, also caused further uncertainty in markets. China has also faced numerous headwinds over the period, including continued Covid-19 lockdowns due to its 'Zero COVID' policy, worries over the health of its massive property sector and government interventions in certain sectors. For most of the period, we saw an outperformance of value over growth which had a major negative impact on areas of the market that tend to trade on higher valuations such as information technology. While valuations across equity markets have fallen over the period, corporate earnings have generally remained robust, providing a source of solace for investors. The challenging macro backdrop has meant the pace of earning growth has slowed compared to the exceptional levels seen in 2021, but a sever deterioration in corporate profitability, as some participants had feared, has not yet materialised.

The fund struggled due in large part to the change in market leadership from growth into value. The material underperformance was down to the fact that its mid cap growth style puts it at the centre of the area of the market that has been most affected by the valuation de-rating. This has resulted in many of our high growth holdings falling sharply, despite there being no change to the underlying investment thesis.

Over the period, our sector allocation contributed slightly positively, whereas our stock selection had a negative contribution. From an allocation perspective, having a large weighting to healthcare was beneficial, as was having almost no exposure to communication services. In contrast, having no exposure to energy, due to the fund's sustainability criteria, was a significant headwind, as the sector was by far the best performer in the index.

Within stock selection, many of the largest detractors were caught up in the indiscriminate valuation de-rating in growth stocks. On an operational level, many of our holdings continued to perform well and managed to execute on their growth plans despite the detrimental style rotation. Endava, Amplifon and Eurofins are three such examples. However, there were also instances where more stock specific factors were at play and companies did encounter disappointing operational performance in the short term. Such issues are to be expected in this type of portfolio, as rarely is a company's growth path linear. Kornit Digital struggled due to weakness in e-commerce environment, which affected companies across the market. Everbridge suffered guidance downgrading twice, as well as the resignation of its CEO during the period. Trustpilot downgraded growth forecasts for the US market, which is key to the firm's growth plans.

A name we hold that performed well was Genmab. The health care company climbed on solid sales of its Darzalex drug for multiple myeloma and further progress on its pipeline. One high growth company where positive results were rewarded with the share price reaction we would hope for was Alfen, the maker of electricity smart grid, EV charging and battery storage solutions. Quarter-one revenues were a record for the company, increasing 77% year-on-year, in part thanks to a 185% increase in the EV charging segment. Despite noting some supply chain issues, good pricing power and operational leverage meant margins beat expectations. Full year guidance also surprised to the upside.

Investment Manager's Report (continued)

Aegon Global Sustainable Equity Fund

Strategy review (continued)

In other positive news, stocks with exposure to green energy and renewable infrastructure spending were boosted over the third quarter after the passing of the Inflation Reduction Act in the US, which earmarks \$369 billion of provisions for clean energy spending over a multi-year period. It's hard to understate how much of a game changer this could be, and it is clear evidence of further support for the long-term growth prospects of companies with exposure to the area, a number of which are held in the portfolio. One of the stocks held that stands to benefit from the act is Advanced Drainage Systems, which makes water pipes and water management solutions from recycled plastics. On top of the boost from the Act, shares were further supported by an excellent set of numbers, which saw both revenue and earnings beat expectations and full year guidance raised. Being vertically integrated and using recycled plastics for its products has provided a significant cost advantage compared to peers given rampant inflation levels.

Throughout this year, we have emphasised that, despite share price moves, we continue to be pleased with the operational and financial performance of the vast majority of our holdings. That sentiment remains unchanged and the most recent bout of market weakness has again been predominantly driven by falling valuations in light of macro factors, rather than a deterioration in the fundamental growth prospects of individual businesses. As a result, many businesses in our universe are trading at valuation levels not seen for a number of years. We believe this presents a fantastic opportunity for investors with a long-term mindset to invest in high quality growth companies at extremely attractive levels.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Investment Manager's Report (continued)

Aegon Global Sustainable Diversified Growth Fund

Performance

The Aegon Sustainable Diversified Growth Fund returned -17.40% over the period. The fund share class is B Acc euro.

Strategy review

Almost all asset classes came under significant pressure over the 12-month period with rising inflation the main driver of the challenging conditions. The period started with concerns over the outbreak of the Omicron variant of the Covid-19 virus, although these concerns softened as it became clear that the variant was less virulent than expected. Economies therefore slowly began to open up which resulted in a surge in inflation as countries wrestled with supply chain pressures. As we moved into 2022 the inflationary pressure increased rapidly following Russia's tragic invasion of Ukraine. This led to a sharp rise in the price of oil and gas as wells many metals. Central banks subsequently raised interest rates to combat rising inflation. Towards the end of the period, the market also had to contend with political volatility in the UK in particular, as the Truss-led government announced a mini-budget, which included unfunded tax cuts. This move, which was eventually reversed, added to the inflationary pressure in the UK economy.

Given the extent to which markets came under pressure over the period - with a distinct lack of diversifying opportunities on offer - each of the fund's asset allocations detracted from performance. The exposure to equity markets, and sustainable equity growth in particular, was the worst performer. Growth stocks struggled in the strong inflationary environment and underperformed their 'value' counterparts over the period as a whole. The style-rotation from growth into value was a significant driver of the fund's absolute negative return, given it held a mid-cap tilt as sentiment shifted in favour of large-cap names. The fund's exposure to global sustainable equity income also detracted but to a far lesser extent. As equity markets sold off, we reduced our exposure to the asset class and entered the second half of the period with a more defensive positioning.

Stock selection within equities reflected the challenges facing growth areas of the market. For example, our holding in Kornit Digital (digital garment printing company) fell back due to slowing e-commerce-related spending. Workiva (a regulatory and compliance reporting software company) also struggled after it lowered its near-term sales guidance during the second half of the period, although it did increase its full-year guidance. Other holdings within the growth allocation that detracted included Everbridge, Trustpilot, Dynatrace, Zur Rose and Endava. In many cases, the declines were a reflection of market sentiment rather than concern over the fundamental health of the companies.

Our allocation to alternatives added value over the first half of the period but was not immune to the turbulent conditions as we moved through 2022. The fund's exposure to Real Estate Investment Trusts (REITS) came under significant pressure, with names such as LEG (German residential real estate) detracting. Again, we reduced our exposure to the sector as the backdrop deteriorated. Our exposure to the infrastructure sector was more mixed; our holdings in National Grid, Enegas and Essential Utilities all added value. In contrast, our weightings in Cordiant Digital Infrastructure, American Water Works and International Public Partnership detracted. Offsetting some of these negative outcomes was our exposure to the renewables sector, which contributed positively to performance overall. Higher energy prices generally boosted this area of the market for most of the period, with our holdings in Greencoat UK, JLEN Environmental Assets Group and Next Energy Solar Fund all adding value.

With bond markets, our exposure to US Treasuries was the main detractor, given the sharp rise in government bond yields. Investment grade bonds also struggled as rates increased, while our exposure to the high yield sector finally succumbed to the difficult conditions during the second half of the period. One positive outcome was our exposure to index-linked bonds. We purchased these bonds following significant price weakness and they subsequently recovered somewhat towards the end of the period.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Investment Manager's Report (continued)

Aegon Global Equity Market Neutral Fund

Performance

The Aegon Global Equity Market Neutral Fund returned -8.73% over the one-year period to 31 October 2022, compared to the cash benchmark return (1-month SONIA) of 0.82%. The fund share class is B Acc GBP.

Strategy review

Inflation, and subsequent central bank interest rate rises to dampen the effects, resulted in a challenging environment for equity markets. Furthermore, the tragic and ongoing Russia-Ukraine war that began in February caused supply chain issues for some metals and agricultural products, but perhaps most significantly, a rise in the cost of oil and gas. This contributed to increasing inflationary pressures even more. Political turmoil in the UK after a mini-budget announcement, which included unfunded tax cuts, also caused further uncertainty in markets. China has also faced numerous headwinds over the period, including continued Covid-19 lockdowns due to its 'Zero Covid' policy, worries over the health of its massive property sector and government interventions in certain sectors. For most of the period, we saw an outperformance of the value style over the growth style which had a major negative impact on areas of the market that tend to trade on higher valuations such as information technology. While valuations across equity markets have fallen over the period, corporate earnings have generally remained robust, providing a source of solace for investors. The challenging macro backdrop has meant the pace of earning growth has slowed compared to the exceptional levels seen in 2021, but a severe deterioration in corporate profitability, as some participants had feared, has not yet materialised.

The fund's short book delivered strong performance against this challenging backdrop, whereas the long book struggled in aggregate. January was a particularly difficult month for the long book as several stocks de-rated as a result of heightened volatility in the market rather than company specific factors.

Focusing on the short book, positions which added value over the period included a cloud-based AI lending platform and a digital payments company, with both stocks retreating on the back of weak operational updates and disappointing future guidance. A short in a tele healthcare services business also made a notable contribution to returns, with the stock falling sharply after we opened the position in quarter-four 2021. The investment thesis behind the position was based on the company experiencing a post-Covid-19 slowdown and increased competition. This played out in line with expectations, with the company downgrading its full year guidance and subsequently took profits and closed out the position in April.

Lastly, our derivatives based short in the FTSE 250 boosted returns during the period as did our short in an expensive software' derivative basket. We added the latter position during quarter-one 2022 as an efficient way to manage style risk over the short-term, without having to cut exposure to individual growth stocks in which we have long-term conviction. It was therefore pleasing to see it work as intended during the year. In contrast, a notable short position which didn't work over the period was an oil and gas major, with the company re-rating due to the rally in the sector.

Turning to the long book, our position in Glencore added value as the mining giant's shares were supported by rising coal prices over the period. Multi-national pharmaceutical company, AstraZeneca, was another strong contributor to returns. The stock gained from the release of strong financial results in the first half of the period, which saw both revenue and earnings beat consensus expectations.

These gains were offset by holdings such as S4 Capital (digital media) which was the largest detractor in the long book. The stock fell aggressively after the digital media company issued a profit warning, with management lowering the company's full year earnings guidance well below consensus expectations (a downgrade of c. 25%) due to increased operating costs. We exited the position over July as the ongoing issues around accounting controls within the company and future earnings uncertainty compromised the original investment thesis for the stock in our view. Elsewhere, digital textile printing firm, Kornit Digital, suffered due to a combination of the overall style rotation in the market during the period, as well as tougher operating conditions as a result of the economic backdrop.

With regards to portfolio activity, positioning and trading has remained focused on keeping beta and net exposure close to zero in order to ensure the fund's return profile remains uncorrelated to broad equity markets.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Investment Manager's Report (continued)

Aegon Short Dated High Yield Global Bond Fund

Performance

The Aegon Short-Dated High Yield Bond Fund returned -3.59% over the 12-month period. The fund share class is B Acc USD.

Strategy review

The period was marked by concerns over persistent high inflation and, as a consequence, the hawkish comments and subsequent action by central banks. Adding to the challenges facing markets was the tragic outbreak of war in Ukraine, which added to the inflationary pressures. In this environment, bond markets endured a significant sell-off, both in government and corporate bonds.

The fund was not immune to the very challenging backdrop, as evidenced by the negative absolute return generated over the period. It is important to note, however, that the sell-off was indiscriminate in nature and there was nothing material at an individual bond level behind the decline witnessed. Short-dated bonds were impacted by the significant move higher in government bond yields but also by widening credit spreads as investors demanded more of a risk premium to own credit risk given the tighter monetary policy backdrop.

Throughout the period, we continued to focus on bottom-up issue selection and lending to credits which have strong balance sheets, plenty of liquidity, high barriers to entry and strong, free cash generation. The fund's remit of lending to companies for short periods of time helped to limit volatility, protect downside and provide attractive carry, with the additional benefit of the 'pull-to-par' as bonds approached their maturity date. This disciplined approach helped to protect the fund from the worst of the sell-off in markets.

In terms of allocation, we avoided short-dated CCC-rated assets and focused our attention on short-dated single-B and above, and on credits at the front end of capital structures. Among the best performers over the period were Adient (a global leader in automotive seating), Sally Holdings (speciality retailer) and Ford Motor Credit. The main detractor was Ado Properties (real estate company focusing on Germany). The property sector came under significant pressure, particularly during the second half of the period, given concerns for European economies due to the war in Ukraine.

We retain our cautious approach, which is manifested in disciplined, bottom-up credit selection, and continue to focus on the balance sheets and cashflows of our companies, and their ability to refinance debt.

Investment Manager's Report (continued)

Aegon Global Short Dated Climate Transition Fund

Performance

The Aegon Short-Dated Investment Grade Bond Fund returned -4.49% over the 12-month period, compared to 0.89% for the SONIA cash benchmark. The fund share class is S Acc GBP.

Note: on 15 July 2022 the fund name changed from the Aegon Short-Dated Investment Grade Bond Fund to the Aegon Short Dated Climate Transition Fund.

Strategy review

The period was marked by concerns over persistent high inflation and, as a consequence, the hawkish comments and subsequent action by central banks. Adding to the challenges facing markets was the tragic outbreak of war in Ukraine, which added to the inflationary pressures. In this environment, bond markets endured a significant sell-off, both in government and corporate bonds.

The fund was not immune to the very challenging backdrop, as evidenced by the negative absolute return generated over the 12 months. Throughout the period we retained our focus on disciplined issue selection, which - combined with the fund's natural low duration level - helped to shield the fund from worst of the market sell-off.

In terms of issue selection, the magnitude of the sell-off was such that no sector was left untouched, which was subsequently reflected in the performance of the fund's holdings. However, there were few idiosyncratic or company-specific factors driving the returns but rather the widespread repricing of short-dated bond yields. These assets were impacted by the significant move higher in government bond yields but also by widening credit spreads as investors demanded more of a risk premium to own credit risk given the tighter monetary policy backdrop.

The fund began the period with a duration (a measure of interest rate risk) of around 2.1 years, which gradually reduced to around 1.8 years by the end of April 2022. The reduction mostly reflected the passage of time, as individual bonds moved closer to maturity. We subsequently increased the fund's duration to just over 2 years as we moved into the second half of the period, reflecting our view that the market had become too aggressive in pricing in multiple future rate hikes, especially in the UK.

However, in the aftermath of the UK budget volatility we increased our duration position in the UK by 25bps. Yields on both short-dated government and corporate bonds had moved materially higher at this point, with the UK at the epicentre of the weakness in global bond markets. We continued to actively manage duration up to the end of the period; we increased the fund's overall interest rate risk in October, taking headline duration to a little over 2.1 years. We did this through adding duration in the US dollar market, as we regarded pricing at the time reflected the US being very close to the top of its interest rate cycle.

The fund's overall exposure to credit risk was broadly unchanged for most of the period, with the average credit rating at A-. The fund's large exposure (around 70% of the portfolio) to non-sterling assets protected it, to an extent, from the worst of the turmoil in the UK as the period came to an end.

Report of the Depositary to the Shareholders

We have enquired into the conduct of Aegon Asset Management Investment Company (Ireland) Plc ('the Company') for the year ended 31 October 2022, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the Central Bank of Ireland's UCITS Regulations, Part 12. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations, as amended. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Regulations, Part 12 and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the UCITS Regulations, as amended, ('the Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

Independent auditors' report to the members of Aegon Asset Management Investment Company (Ireland) Plc

Report on the audit of the financial statements

Opinion

In our opinion, Aegon Asset Management Investment Company (Ireland) Plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 31 October 2022 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 October 2022;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio of Investments for each of the Funds as at 31 October 2022; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 October 2022 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities in respect of the Financial Statements set out on page 6, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Statement of Financial Position (continued)

(1) On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

* The assets and liabilities at fair value through profit or loss are split between transferable securities admitted to an official stock exchange listing, transferable securities traded on a regulated market and financial derivative instruments in the portfolio of investments for each respective Fund.

The GBP and EUR Funds were translated into USD at a rate of 1.15375 and 0.99335 respectively.

The accompanying notes form an integral part of these financial statements.

On behalf of the Board:

Director: Bronwyn Wright Date: 24 February 2023

Director: Mike Kirby **Date:** 24 February 2023

 $^{^{(1)}}$ Aegon Short Dated Investment Grade Fund re-launched on 4 March 2021.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements

1. Significant Accounting Policies

a) Statement of Compliance

The financial statements are prepared in accordance with FRS 102 Financial Reporting Standard applicable in the UK and Republic of Ireland ("FRS 102") issued by the Financial Reporting Council ("FRC") and in accordance with Irish statute comprising the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"). The financial statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss that have been measured at fair value.

The Company has applied the same accounting policies and methods of computation in this annual report and financial statements as in its annual financial statements for the financial year ended 31 October 2021, except for the adoption of any new accounting standards.

The format and certain wordings of the financial statements have been adapted from those contained in the FRS 102 and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment Funds under FRS 102 (Section 7.1A(c)) not to present a cash flow statement.

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

b) Basis of Accounting and Presentation of Financial Statements

The financial statements are measured and presented in the currency of the primary economic environment in which each Fund operates. These are the United States Dollar ("USD"), Euro ("EUR") and Pound Sterling ("GBP") reflecting the fact that the Funds' operations are conducted in USD, EUR and GBP.

The financial statements are prepared on a fair value basis for the financial assets and financial liabilities through profit or loss. The financial statements have been prepared on a going concern basis as the Directors are of the view that the Company can continue in operational existence for twelve months from the date of approval of these financial statements. The Directors anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the Company's liabilities as they fall due.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported accounting policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the periods of revision and future periods if the revision affects both current and future periods. Actual results could differ from estimates.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

c) Foreign Currency Translation

While the Funds' operations are conducted in USD, EUR and GBP, the functional currency of the Company is USD, (as the Directors have determined that this reflects the Company's primary economic currency). The presentation currency of the Company is also USD. Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to USD at the foreign currency exchange rate ruling at the Statement of Financial Position date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Foreign exchange gains/losses relating to investments at fair value through profit or loss are included in gains and losses on investments in the Statement of Comprehensive Income.

The Statement of Financial Position is translated using exchange rates at the financial year end and the Statement of Comprehensive Income is translated at an average rate over the financial year. The Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders is translated at an average rate over the financial year for inclusion in the combined financial statements of the Company. The resulting notional currency gain/(loss) and the notional currency gain/(loss) on retranslation of opening net assets is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. The method of translation has no effect on the value of net assets allocated to the individual Funds.

d) Financial Instruments

(i) Classification

In accordance with FRS 102, the Company has elected to adopt IAS 39 Financial Instruments: Recognition and Measurement. The Company designates all its investments into financial assets and liabilities at fair value through profit or loss in accordance with FRS 102 and IAS 39. The category of financial assets and liabilities at fair value through profit or loss comprises:

Financial instruments held for trading: These include all financial instruments, (as the Company does not designate any derivatives as financial hedges) including futures, swaps, forward contracts, bonds, CFD's and equities.

Financial instruments designated at fair value through profit or loss upon initial recognition: These include financial assets that are not held for trading purposes and which may be sold.

These financial instruments are designated on the basis that their fair value can be reliably measured and their performance has been evaluated on a fair value basis in accordance with the risk management and/or investment strategy as set out in the Company's Prospectus.

Gains and losses arising from changes in the fair value of the financial assets and liabilities at fair value through profit or loss category are included in the Statement of Comprehensive Income in the financial year in which they arise.

(ii) Recognition and Derecognition

All regular way purchases and sales of financial instruments are recognised on the trade date, which is the date that the Company commits to purchase or sell an asset. Regular way purchases or sales are purchases or sales of financial instruments that require delivery of assets within the period generally established by regulation or convention in the market place. Realised gains and losses on disposals of financial instruments, with the exception of futures are calculated using the average cost method. Realised gains and losses on disposals of futures are calculated using the First In First Out (FIFO) method.

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or a financial asset is transferred and the transfer qualifies for derecognition in accordance with FRS 102.

The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

d) Financial Instruments (continued)

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in fair value recognised in the Statement of Comprehensive Income.

Financial liabilities arising from redeemable shares issued by the Company are carried at redemption amount representing the investors' right to a residual interest in the Company's assets.

(iv) Fair value measurement principles

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from reputable brokers/counterparties or independent market data providers, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and liabilities are priced at their current mid prices.

For all other financial instruments not traded in an active market or where no broker/counterparty quotes can be obtained, the fair value is determined by using appropriate valuation techniques, which include using arm's length transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible.

Subsequent changes in the fair value of financial assets and liabilities at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

e) Cash and Cash Equivalents, Overdrawn Cash and Cash Equivalents, Collateral Cash

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less.

Overdrawn cash and cash equivalents are shown in Current Liabilities in the Statement of Financial Position.

Broker cash received as collateral is recorded as an asset on the Statement of Financial Position as 'Collateral cash' and a related liability to repay the collateral is disclosed within Current Liabilities as 'Collateral payable to broker'. This cash received from brokers as collateral is not ringfenced or segregated from other cash and cash equivalents, and can be invested and used in daily operations.

Cash collateral provided by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin owed from broker'. Cash collateral which is due by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin due to broker'. Collateral cash receivable from broker is cash pledged as collateral for financial derivative instrument transactions. It is not included as a component of cash and cash equivalents in the Statement of Financial Position and is not available to the Funds on demand. Margin owed from broker/Collateral cash is valued at amortised cost plus accrued interest which approximates fair value. Further details of collateral cash received or pledged on derivative instruments are disclosed in Note 17.

Details of investments pledged as collateral and investments received as collateral are disclosed in Note 17.

Term Deposits are disclosed within Cash and Cash Equivalents and Collateral Cash in the Statement of Financial Position.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

f) Operating Expenses

Operating expenses of the Company are accounted for on an accruals basis and expensed in the period to which they relate.

g) Interest, Dividend Income and Withholding Tax

Bond interest income is recognised in the Statement of Comprehensive Income. Bond interest is recognised as income on an effective yield basis using the original effective interest rate of the instrument calculated at the acquisition or origination date. Bond interest income includes amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. Accrued interest payable or receivable is shown in the Statement of Financial Position and represent interest payable or receivable that has been accrued for but not yet paid or received on the Statement of Financial Position date. Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "exdividend". Withholding tax is presented gross in the Statement of Comprehensive Income.

h) Swap Income and Expense

Swap income and expense are included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

i) Net Asset Value Per Share

The Net Asset Value per share for each share class within each Fund is calculated by dividing the total Net Asset Value of each share class within each Fund by the total number of shares outstanding for that particular share class within each Fund.

j) Distributions

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as Finance Costs.

k) Redeemable Participating Shares

All Redeemable Participating Shares issued by the Funds provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Funds' net assets at the redemption date. In accordance with FRS 102 such instruments give rise to a financial liability for the present value of the redemption amount. The redemption price for each redeemable share is equal to the Net Asset Value per redeemable shares on the dealing day.

I) Dilution Adjustment

A Fund may suffer dilution which is a reduction in the value of the assets as a result of the costs incurred in dealing in its underlying investments and of any spread between the buying and the selling prices of such investments which is not reflected in the issue or redemption price paid by or to shareholders. With a view to countering this (which, if it is significant, disadvantages existing or continuing shareholders), the Directors may make an adjustment to the share price on a daily or quarterly basis at the discretion of the Directors and in accordance with the Prospectus.

The dilution adjustment may apply to redemptions or to subscriptions and if charged, the value of the dilution adjustment will be paid into the Fund and will become part of the property attributed to the relevant Fund. Dilution adjustments are disclosed in Statement of Changes in the Net Assets Attributable to Redeemable Participating Shareholders.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

m) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss.

Transaction costs on the purchase and sale of bonds, forwards, CFDs and swaps are included in the purchase and sale price of the investment. During this financial year, they cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Transaction costs on purchases and sales of equities and futures are disclosed in Note 11.

n) Due to/from Redeemable Participating Shareholders

Amounts due to or from Redeemable Participating Shareholders represent redemptions or subscriptions where the shares have been redeemed or subscribed by the Redeemable Participating Shareholder, but as at Statement of Financial Position date the cash has not been paid/received.

•

o) Receivable/Payable for Sale/Purchase of Securities

Amounts Receivable or Payable for securities represent sales or purchases where the proceeds or payments have not been received or paid as at Statement of Financial Position date. Non base currency transactions are converted at the prevailing rate on a daily basis until settlement.

p) Fund Assets Cash Balances, Outstanding Fund Assets Cash Balances, Fund Assets Receivables, Fund Assets Payable

Fund asset cash and receivable balances, including an appropriate equal and opposing liability, are reflected at a Fund level on the Statement of Financial Position. They represent umbrella cash collection account balances attributable to the individual Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Fund, as Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

q) Equalisation

All Funds operating an income or distributing share class intend to operate income equalisation. Income equalisation prevents the dilution of current shareholders' earnings by applying a portion of the proceeds from Redeemable Participating Shares issued or redeemed to undistributed income. When Redeemable Participating Shares are purchased or redeemed the price may include an element of income. Equalisation is this element of income paid out to shareholders who have purchased or redeemed during this financial year and it is disclosed in the Statement of Comprehensive Income.

r) Interest Expense

The Funds may incur interest expense and earn dividend income on long CFD positions. CFD Interest is calculated daily based on the value of the open positions. Such CFD interest expense is included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Interest Expense in the Statement of Comprehensive Income includes shareclass hedging interest.

s) Other Assets

Other assets on the Statement of Financial Position include dividend receivable, tax reclaimable dividends and preliminary expenses where applicable.

t) Other Liabilities

Other liabilities on the Statement of Financial Position include payable amounts for shareclass hedging, tax services, legal fees, director fees, advisory, tax services, regulatory, company secretarial, transaction fees and other miscellaneous expenses.

u) Other Income

Other income on the Statement of Comprehensive Income include interest income on deposits, interest income on cash accounts, interest income on collateral and interest income on derivative instruments i.e. futures, etc. where applicable.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

2. Fair Value Estimation

The Company under FRS 102 is required to classify fair value measurements for Funds using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

FRS 102 requires the Funds to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3 Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement and consideration of factors specific to the asset or liability.

The following tables present the fair value hierarchy of each Fund's financial assets and liabilities measured at 31 October 2022 and 31 October 2021:

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

3. Derivative Contracts and Efficient Portfolio Management

Typically, derivative contracts serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any derivatives as hedges for hedge accounting purposes as described under IAS 39).

The Company may also enter into derivative contracts for the purposes of efficient portfolio management. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Funds with an appropriate level of risk, taking into account the risk profile of the Funds. Permitted efficient portfolio management transactions are transactions in derivative contracts dealt in or traded on regulated markets operating regularly or over-the-counter arrangements with highly rated financial institutions specializing in this type of transactions.

During the financial year contracts for difference ("CFD"), forward currency contracts, futures and swap contracts were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. Details of all open transactions and counterparties to these derivative positions at the financial period end are disclosed in the Portfolio of Investments. Please refer to Note 17 for details of collateral received by the Company to reduce the counterparty exposure. Any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income. Please refer to Global Exposure in Note 13 for details of global exposure related to efficient portfolio management techniques.

The Company did not engage in any efficient portfolio management techniques of repurchase, reverse repurchase and stock lending arrangements.

Contracts for difference ("CFD")

CFD involve a contract between two counterparties ("buyer" and "seller") which requires that the seller will pay to the buyer the difference between the current value of an asset and its value at a particular contract time. (If the difference is negative, then the buyer pays instead to the seller.) CFD allow traders to take advantage of prices moving up or prices moving down on underlying financial instruments and are often used to speculate on markets. CFD are typically traded "over-the-counter", which means that they are traded "off-exchange". CFD are traded on margin, and the leveraging effect of this increases the risk significantly. The Company will invest in CFD to gain exposure to equity investments and equity market.

The difference between the initial recognition amount and the market value of the open contract is recorded as unrealised gains or losses in the Statement of Financial Position. Realised gains or losses are recognised on the closing or trade date of the contract and are recorded as net gain/(loss) on financial assets and liabilities on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Forward Currency Contracts

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to a forward price at which a new forward contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward contracts is calculated as the difference between the contract rate and this forward price and is taken to the Statement of Comprehensive Income.

Futures Contracts

A futures contract is an agreement between two parties to buy and sell a security, index or currency at a specific price or rate at a future date. Upon entering into a futures contract, the Company is required to deposit with a broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as 'initial cash margin'. Subsequent payments ('variation margin') are made or received by the Funds each day, depending upon the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealised gains or losses and the Funds recognise a realised gain or loss when the contract is closed. Unrealised and realised gains and losses on futures contracts are recognised in the Statement of Comprehensive Income.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

3. Derivative Contracts and Efficient Portfolio Management (continued)

Swaps

A standard swap is an agreement between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time period, with the terms initially set so that the present value of the swap is zero. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency. These agreements are used to transform the currency denomination of assets and liabilities.

Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default. The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred. If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value.

Inflation-linked swaps are agreements between two parties whereby one party pays a fixed rate on a notional principal amount, while the other party pays a floating rate linked to prevailing inflation measurement indices such as Retail Price Index (RPI).

Unrealised and realised gains and losses on swap contracts are recognised in the Statement of Comprehensive Income. Any swap related income/expenses are recognised in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

4. Share Capital

The authorised share capital of the Company is 1,000,000,000,000 shares of no par value initially designated as unclassified shares; the issued share capital of the Company is €2 represented by 2 shares (the 'subscriber shares') issued for the purposes of the incorporation of the Company at an issue price of €1 per share which are fully paid up and which are held by Aegon Asset Management UK Plc and Aegon Asset Management UK Limited. The unclassified shares are available for issue as Redeemable Participating Shares.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of Redeemable Participating Shares, on a show of hands every holder who is present in person or by proxy shall have one vote and the holder(s) of subscriber shares present in person or by proxy shall have one vote in respect of all the subscriber shares in issue and on a poll, every holder present in person or by proxy shall have one vote for every Redeemable Participating Share of which he is the holder and every holder of a subscriber share present in person or by proxy shall have one vote in respect of his holding of subscriber shares. Holders who hold a fraction of a Redeemable Participating Share may not exercise any voting rights, whether on a show of hands or on a poll, in respect of such fraction of a Redeemable Participating Share.

Redeemable Participating Shares

The net assets attributable to holders of Redeemable Participating Shares are at all times equal to the Net Asset Value of the Company. The participating shares which comprise the equity capital of the Company are in substance a liability of the Company to shareholders under the terms of FRS 102 as they can be redeemed at the option of the shareholder.

Participating shares may be redeemed on each dealing date or such other date or dates as the Board of Directors shall from time to time determine (Valuation Day) at the Net Asset Value per share.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

4. Share Capital (continued)

Equalisation

The Company will operate grouping for equalisation with respect to Income shares (shares which are entitled to a portion of the Funds ordinary income). Each income class of each Fund will operate its own equalisation account. Shares purchased during a distribution period are called Group 2 Shares. Shares purchased during any previous distribution period are called Group 1 Shares. Group 2 Shares contain in their purchase price an amount called equalisation which represents a proportion of the net income of the Fund that has accrued up to the date of purchase. The amount of equalisation is averaged across all the Shareholders of Group 2 Shares and is refunded to them as part of their first distribution.

The movement in the number of participating shares per share class during the financial year ended 31 October 2022 is as follows:

⁽¹⁾ Aegon Short Dated Investment Grade Fund re-launched on 4 March 2021. On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

5. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended (the "TCA"). On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax can arise on the happening of a "chargeable event" in the Company. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation, transfer or deemed disposal of Shares for Irish tax purposes, arising as a result of holding shares in the Company for a period of eight years or more, or the appropriation or cancellation of Shares of a Shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D TCA) or in respect of a Shareholder who is neither Irish resident nor ordinarily resident in Ireland at the time of the chargeable event provided that a relevant declaration is in place (in accordance with Schedule 2B of the TCA) and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

6. Commitments and Contingent Liabilities

There are no commitments or contingent liabilities as at 31 October 2022 (31 October 2021: None).

7. Soft Commission Arrangements

There were no soft commission arrangements in place during the financial year (31 October 2021: Nil).

9. Distribution Policy

It is the current intention of the Directors to declare dividends for the Income Share Classes on the Strategic Global Bond Fund, the Investment Grade Global Bond Fund, the High Yield Global Bond Fund, the Absolute Return Bond Fund, the Global Equity Income Fund, the Absolute Return Bond Global Fund, the Global Sustainable Equity Fund, the Global Sustainable Diversified Growth Fund, Global Short Dated Climate Transition Fund and Short Dated High Yield Global Bond Fund on a quarterly basis on the last Business Days of July, October, January and April.

It is the current intention of the Directors to declare dividends for the Income Share Classes on the Global Diversified Income Fund on a monthly basis on the last Business Day of each month. Dividends will be declared out of the accumulated revenue (consisting of all revenue accrued including interest and dividends) less any applicable expenses. This Fund will operate a dividend calculation policy known as "smoothing" whereby income earned in an interim accounting period need not be distributed immediately and may instead be retained. Any residual income will be distributed at the Fund's annual income allocation date, 31 October of each year.

During the financial year to 31 October 2022 dividends declared were as follows:

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

11. Fees

The Company may pay out of the assets of each Fund the fees and expenses payable to the Manager (which includes the fees and expenses payable to the Investment Manager), the Depositary, the Administrator and the Distributor, the fees and expenses of sub-depositaries which will be at normal commercial rates, the fees and expenses of the Directors, any other miscellaneous fees such as, all taxes, company secretarial fees, any costs incurred in respect of meetings of Shareholders and marketing and distribution costs.

Such fees, duties and charges will be charged to each Fund in respect of which they were incurred or, where an expense is not considered by the Directors to be attributable to any one Fund, the expense will be allocated by the Directors with the approval of the Depositary, in such manner and on such basis as the Directors in their discretion deem fair and equitable.

In the case of any fees or expenses of a regular or recurring nature, such as audit fees, the Directors may calculate such fees and expenses on an estimated figure for yearly or other periods in advance and accrue the same in equal proportions over any period.

Administration Fee

The Investment Manager pays Administration fees on behalf of the Funds. These fees are paid directly by the Investment Manager to the Administrator, Citibank Europe Plc. The Investment Manager is invoiced directly and pays these fees out of the Investment Management fee. The fee payable to the Administrator for the services provided shall not exceed 1% per annum (plus VAT, if any) of the net asset value of the Fund. During the financial year ended 31 October 2022 the fees incurred amounted to USD 1,401,648 (31 October 2021: USD 1,432,495), this amount is included in the Operating Expenses figure in the Statement of Comprehensive Income. At the financial year end USD 101,793 was payable (31 October 2021: USD 121,619), this amount is included in the Investment Management fee payable figure on the Statement of Financial Position.

Transfer Agency Fee

The fee payable to the Administrator for registration services provided to the Company will not exceed 0.5% per annum (plus VAT, if any) of the net asset value of the Fund. Such fee shall be accrued daily and payable monthly in arrears.

Management Fee

The fee payable to the Manager (excluding the Performance Fee) will be no more than 1% per annum of the Net Asset Value of the Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon High Yield Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Short Dated High Yield Global Bond Fund and the Aegon Global Short Dated Climate Transition Fund including both Income shares and Accumulation shares. The fee payable to the Manager (excluding the Performance Fee) will be no more than 1.5% per annum of the Net Asset Value of the Aegon Global Sustainable Equity Fund and the Aegon Global Equity Market Neutral Fund including both Income shares and Accumulation shares. The fee payable to the Manager (excluding the Performance Fee) will be no more than 2% per annum of the Net Asset Value of the Global Diversified Income Fund and the Aegon Global Sustainable Diversified Growth Fund including both Income shares and Accumulation shares.

Such fees shall be calculated daily and payable monthly in arrears. The Manager shall also be entitled to be reimbursed out of the assets of each Fund for reasonable out-of pocket expenses incurred by the Manager and Investment Manager in the performance of its duties.

The Manager shall be responsible for discharging from the above, the fees of the Investment Manager.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

11. Fees (continued)

Management Fee (continued)

The Management Fees payable are presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Management Fees for the financial year ended 31 October 2022 and 31 October 2021:

	_	31 October 2022	31 October 2021
	CCY

Depositary and Trustee Fees

The fee payable to the Depositary, for custodial services provided to the Company, will not exceed 0.5% per annum of the Net Asset Value of each Fund. The Depositary will also be entitled to receive any out-of-pocket expenses incurred (including any transaction charges or sub-Depositary fees at normal commercial rates).

The Trustee Fees include safekeeping fees which are transaction based and are payable to the Depositary. For all Funds the Depositary will be entitled to a minimum fee of £3,000 per annum.

The Depositary and Trustee Fees payable are presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Depositary and Trustee Fees for the financial year ended 31 October 2022 and 31 October 2021:

11. Fees (continued)

Performance Fee

In addition to the Investment Manager Fees, a Performance Fee is payable to the Investment Manager of the Aegon Global Equity Market Neutral Fund in certain circumstances as outlined in the prospectus. The Investment Manager may agree at its discretion to waive the Performance Fee or a portion of the Performance Fee with respect to certain Shareholders' investment in the Fund. Any such waiver or reduction will not entitle other Shareholders to a similar waiver. The Performance fee shall be payable annually in arrears. Currently there are no share classes which can accrue performance fees.

There was no Performance Fee for the financial year ended 31 October 2022 (31 October 2021: Nil).

Distributor Fee

In addition to the preliminary charge that may be paid to the Distributor, the fee payable to the Distributor for its services in the distribution of shares of the Fund shall not exceed 1% per annum of the Net Asset Value attributable to the Class A Shares. The Distributor may, at its sole discretion and in accordance with applicable laws and regulations, (i) pay commission to financial intermediaries including but not limited to sub-distributors, intermediaries and advisers who refer and/or advise prospective investors out of the Distributor's fee as set out above and/or (ii) waive the Distributor Fee for certain prospective investors based on factors deemed appropriate by the Distributor.

The Distributor Fee payable is presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Distributor Fees for the financial year ended 31 October 2022 and 31 October 2021:

		31 October 2022	31 October 2021

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments

Risk is inherent in the activities of each Fund but it is managed through a process of ongoing identification, measurement and monitoring, subject to risks limits and other controls. The Funds are exposed to market risk (which includes currency risk, interest rate risk and market price risk), credit risk and liquidity risk arising from the financial instruments it holds.

The main risks arising from financial instruments and the policies for managing these risks are stated below. These policies have been applied throughout the period under review.

Market Price Risk

The main risk arising from each Fund's financial instruments is market price. Market price risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in market price caused by factors other than interest rate or foreign currency movements. Market price risk arises mainly from uncertainty about future prices of financial instruments that the Fund might hold. It represents the potential loss the Funds might suffer through holding market positions in the face of price movements. The Funds' investment portfolios are exposed to market price fluctuations, which are monitored by the Investment Manager in pursuance of the stated investment objectives, and policies as set out in the Prospectus. In addition, the Funds are also exposed to unfavourable market price changes of the underlying financial instruments in case of contracts for difference. The Funds may incur a significant loss if the value of the underlying instruments falls below the value of a particular contract.

Adherence to the investment guidelines and to investment and borrowing powers set out in the instrument of incorporation, the Prospectus and UCITS regulations issued by the Central Bank mitigates the risk of excessive exposure per industry to any particular type of security or issuer.

The following tables show the market price exposure per industry for the relevant Funds:

⁽¹⁾ Aegon Short Dated Investment Grade Fund re-launched on 4 March 2021. On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Foreign Currency Risk

Foreign currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in foreign currency exchange rates.

For the Funds where an element of the investment portfolio is denominated in currencies other than the base currency of the Fund, the Statement of Financial Position can be affected by movements in exchange rates. The Investment Manager may seek to manage exposure to currency movements by using forward foreign currency contracts or by hedging the Fund currency value of investments that are priced in other currencies. Income received in other currencies is converted to Fund currency on or near the date of receipt.

Non-monetary

The gross foreign currency exposure for the relevant Funds is shown in the following tables:

Monetary

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Interest Rate Risk

Interest rate risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in interest rates.

All of the Funds, except the Aegon Global Sustainable Equity Fund, the Aegon Global Equity Income Fund and the Aegon Global Equity Market Neutral Fund invest in fixed interest securities. The income from these Funds may be affected by changes to interest rates relevant to particular securities or as a result of the Directors being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed interest securities may be affected by such movements in the future. Interest receivable on bank deposits and payable on bank overdrafts will be affected by fluctuations in interest rates, as will Floating Rate Bonds. All other assets and liabilities of the Funds are non-interest bearing.

The Funds will adjust their exposure to interest rate risk according to their views on how rates will move in the future. This may mean that at times the Funds may take on more or less risk depending on the view of the Investment Manager.

Derivatives

Fixed Rate

The interest rate profile for the relevant Funds is as follows:

Floating Rate

⁽¹⁾ Aegon Short Dated Investment Grade Fund re-launched on 4 March 2021. On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Liquidity Risk

Liquidity risk is defined as the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the Company's net assets value per share at the time of redemption. The Redeemable Participating Shares are carried at the redemption amount that is payable at the reporting date if the holder exercises the right to put the share back to the Company. The assets of the Company are considered to be readily realisable. Assets from a Fund may need to be sold if insufficient cash is available to finance redemptions.

The Company manages its liquidity risk by investing primarily in marketable securities.

The Company may repurchase some proportion or all shares held by a shareholder at the Repurchase Price on the relevant Dealing Day, subject to the following exceptions:

- (a) Where the total of repurchase requests on any Dealing Day exceeds 10% of the Net Asset Value of shares of any Fund in issue at the Valuation Point, the Company may scale down pro rata the number of shares to be repurchased in response to each request to ensure that the 10% limit is not exceeded. Any unfulfilled balance of repurchase requests will be carried forward to the next Dealing Day and so on thereafter until each request has been dealt with in full. Requests for repurchase that have been carried forward from an earlier Dealing Day will be dealt with in priority to later requests.
- (b) If in respect of any single repurchase, monies amount to more than 5% of the Net Asset Value of the Fund at the Valuation Point for the Dealing Day, the Company has the power to divide in specie all or any part of the Assets of the relevant Fund, and has the right to elect by notice in writing to the investor to appropriate and transfer Assets to him in full or part satisfaction of the Repurchase Price.

The table below analyses each of the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Credit Risk

Certain transactions in securities that the Funds enter into expose them to the risk that the counterparty will not deliver the investment for a purchase, or cash for a sale after the Funds have fulfilled their responsibility. The Funds only buy and sell investments through brokers, which have been approved by the Directors as an acceptable counterparty. In addition, limits are set to the exposure to any individual broker that may exist at any time and changes to brokers' financial ratings are reviewed.

The table below shows the credit ratings of the portfolios (bonds and cash and cash equivalents) held by the Funds.

⁽¹⁾ Aegon Short Dated Investment Grade Fund re-launched on 4 March 2021. On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

12 . Risks Associated with Financial Instruments (continued)

Credit Risk (continued)

The Company has granted the Depositary a specific lien, and the right to grant such lien, to Citibank N.A., London Branch on particular securities, which, in accordance with the Company's specific instructions, have been purchased or sold for the account of the Company. The Depositary or Citibank N.A., London Branch has, in its absolute discretion, extended or granted financial accommodation, or otherwise advanced moneys to the Company for the purposes of such purchase or sale, until satisfaction or discharge of all liabilities of the Company to the Depositary, including any fees, expenses or credit exposures incurred in connection with the such purchase or sale.

Substantially all of the assets of the Funds are held by the Depositary in segregated accounts in each Fund's name. Bankruptcy or insolvency of the Depositary may cause a Fund's rights with respect to securities held by the Depositary to be delayed. The Investment Managers monitor this risk by monitoring the credit quality and financial positions of the Depositary that the Fund/Company uses.

Cash is held with Citibank, N.A. London as Depositary with the exception of margin cash which is held with Deutsche Bank AG, Goldman Sachs, Merrill Lynch and UBS Limited.

The Funds also pledge and receive collateral. Details of Counterparties to these derivative positions are disclosed in the Portfolio of Investments for the Funds, respectively.

The Aegon Absolute Return Bond Fund holds Credit Default Swaps as at 31 October 2022. The Company's maximum gross exposure to credit risk is approximately the carrying value of the financial assets plus nominal value of the credit default swaps (protection sold) in the Statement of Financial Position. For Credit Default Swaps in which the Company is selling protection the total credit exposure of Credit Default Swaps (protection sold) is EUR 26,500,000 (31 October 2021: EUR NIL) and USD Nil (31 October 2021: USD NIL) as at 31 October 2022. The percentage of these securities' market values over the net asset of each relevant Fund is disclosed in the Portfolio of Investments.

In prior year the Aegon Composite Rating used ratings from Moody's and Fitch. If there is no rating from any of the agencies, the IBOXX rating is used as the Aegon Composite rating. A score is assigned to each rating based on an IBOXX static table and the average score is calculated and translated to a rating based on the same IBOXX static table.

In the current year period ratings from Moody's, Fitch and Standard & Poor's ("S&P") were used.

The IBOXX rating was not used as at 31 October 2022 and 31 October 2021.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

13. Global Exposure

The Investment Manager has assessed the risk profiles of the Funds on the basis of the Investment policy, strategy and the use of Financial Instruments. Based on the risk profile, the Investment Manager has determined that the method for the calculation of the global exposure to financial instruments for all Funds will be the Value-at-Risk ("VaR") approach.

Value at Risk (VaR), as a figure, is the maximum loss not exceeded with a given probability defined as the confidence level, over a given period of time. VaR is widely applied in finance for quantitative risk management for many types of risk. As the VaR analysis is presented in the 2022 financial statements along with the 2021 comparatives, sensitivity analysis on interest rate risk, market price risk and currency risk is not required.

The Investment Manager reviews the levels of investment risk on a no less than monthly basis, using a range of metrics including VaR and leverage, where the latter exists. The Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon High Yield Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Global Diversified Income Fund, the Aegon Global Sustainable Equity Fund, the Aegon Global Sustainable Diversified Growth Fund, the Aegon Global Equity Market Neutral Fund, the Aegon Short Dated High Yield Global Bond Fund and the Aegon Global Short Dated Climate Transition Fund use the absolute VaR approach. The Aegon Global Equity Income Fund uses the relative VaR approach and the Aegon Global Sustainable Equity Fund uses the relative VaR approach.

To assess the performance of the VaR model used to monitor global exposure, Funds are back-tested on a monthly basis. Back-testing compares realised returns with predicted losses - days with losses beyond that predicted by the model are deemed an overshoot. The number of overshoots "expected" in a given year correspond to the confidence interval used by the model.

During the financial year the exceptional market volatility resulted in a higher number of overshoots than expected for the Funds. This makes sense given the longer term calibration of the model currently utilised, but prompted the question if this calibration remains appropriate. We are therefore in the process of implementing a new calibration to be used going forward, coinciding with the implementation of a new model for monitoring risk – Aladdin.

This update is in the latter stages of testing and governance and will likely be finalised in H1 2023.

VaR has three parameters:

- The time horizon (period) of the VaR. The maximum loss is considered over this period. Typical periods using VaR are 1 day, 10 days, or 1 month.
- The confidence level is the interval estimate in which the VaR would not be expected to exceed the maximum loss. Commonly used confidence levels are 99% and 95%. (Confidence levels are not indications of probabilities.) Here a 95% confidence interval is used (31 October 2021: 95%).
- Calculation methods used are parametrical (variance-covariance approach), historical or Monte Carlo. In this case the Investment Manager has utilised the historical approach.

Limitations

Whilst VaR is a good general risk measure it is acknowledged it does have certain limitations, including:

- The measure is a point-in-time calculation, reflecting positions as recorded at that date, which do not necessarily reflect the risk positions held at any other time.
- VaR is a statistical estimation and therefore it is possible that there could be, in any period, a greater number of days in which losses could exceed the calculated VaR than implied by the confidence level.
- Although losses are not expected to exceed the calculated VaR on 95% of occasions, on the other 5% of occasions losses will be greater and might be substantially greater than the calculated VaR.
- The period over which positions are expected to be held may differ and so will the modelled losses incurred.
- A look back period of 5 financial years means that any return that has not been evidenced in this time period will not be present in the distribution.

	VaR Level	Interval (%)	Period	VaR (%)	Amount
Aegon Global Equity Income Fund	2 * Bmrk VAR	95%	1 Month	0.90	37,796,951
Aegon Global Sustainable Equity Fund	2 * Bmrk VAR	95%	1 Month	1.54	36,704,071

^{*}The benchmark for the Aegon Global Equity Income Fund and the Aegon Global Sustainable Equity Fund is the MSCI World AC Index

Derivatives

Some of the Funds may also enter into derivative transactions in the form of contracts for difference, forward foreign currency contracts, swaps, futures. Forward foreign currency contracts are used to manage currency risk arising from holdings of overseas securities, contracts for difference, swaps (including Credit Default Swaps), options and future contracts are used to manage market risks arising from the Funds investment activities.

The Aegon Strategic Global Bond Fund, Aegon Investment Grade Global Bond Fund, Aegon Global Diversified Income Fund, Aegon Global Diversified Growth Fund, Aegon Absolute Return Bond Fund and Aegon Global Short Dated Climate Transition Fund enter into financial derivative instruments (including forward foreign currency contracts, futures, and swaps) for investment purposes.

⁽¹⁾ Aegon Short Dated Investment Grade Fund was lunched on 30 January 2020, closed on 23 September 2020 and relaunched on 4 March 2021. On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Global Short Dated Climate Transition Fund.

14. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions or if one party is a member of the key management personnel of the other party.

The following are related parties under FRS102:

- * Directors of the Company and their close family members as listed in the Directory.
- * The Investment Manager, Distributor & Promoter, Aegon Asset Management UK Plc.
- * Partially delegated Investment Manager and Management Company, Aegon Investment Management B.V.
- * Stuart Donald, a senior employee of the Investment Manager.
- * Mike Kirby is a director of the Waystone Group of which KB Associates is a member firm, which provides consultancy, VAT reporting and money laundering reporting officer services to the Company.
- * Scottish Equitable and Aegon Asset Management UK Plc. Both entities have the same ultimate parent in the Aegon group. The Investment Manager is under common control with both entities, and both have invested in one or more of the Funds.

Investment Manager Fees, Performance Fee, Directors' Fees, Management Fees, Depositary Fees and Other Charges are disclosed in Note 11.

The fees paid by the Company for the financial year ended 31 October 2022 to KB Associates for consultancy, VAT reporting and money laundering reporting officer services amounted to USD 121,960 (31 October 2021: USD 122,426). Fees Payable as at 31 October 2022 are USD Nil (31 October 2021: USD 22,778).

During the financial year Scottish Equitable had subscriptions of USD 43,598,246 (31 October 2021 USD 33,274,830) and redemptions of USD 23,361,051 (31 October 2021: USD 235,148,888) and Aegon Asset Management UK Plc had subscriptions of USD 102,711 (31 October 2021: USD 263,856) and redemptions of USD 117,593 (31 October 2021: USD Nil).

As at 31 October 2022 Scottish Equitable held total shares of 34,020,941 (31 October 2021: 31,911,887) with a value of USD 517,107,139 (31 October 2021: USD 684,742,240) and Aegon Asset Management UK Plc held total shares of 81,600 (31 October 2021: 81,329) with a value of USD 784,997 (31 October 2021: USD 1,101,240).

Total redemption of Aegon Global Sustainable Equity Fund for the amount of EUR 220,773,977 during the financial year ended 31 October 2022 includes in-specie transactions to the value of EUR NIL (31 October 2021: Total redemption of Aegon Global Sustainable Equity Fund for the amount of EUR 270,087,201 during the financial year ended 31 October 2021 includes in-specie transactions to the value of EUR 117,810,943).

The following lists the number of shareholders that as at 31 October 2022 and 31 October 2021 hold more than 20% of shares in each Fund based on the relevant Fund's share value compared to the total Net Asset Value of each Fund:

Number of shareholders	31 October 2022	31 October 2021
Aegon Strategic Global Bond Fund	-	-
Aegon Investment Grade Global Bond Fund	2	2
Aegon High Yield Global Bond Fund	-	-

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Notes to the Financial Statements (continued)

15. Events during the financial year (continued)

On 9 December 2021 Aegon Asset Management Investment Company (Ireland) Plc appointed Aegon Investment Management B.V. as its Management Company. The Prospectus and Supplements were updated to reflect this restructure.

On 15 July 2022, the fund name changed from Aegon Short Dated Investment Grade Fund to Aegon Short Dated Climate Transition Fund.

The Board of Directors have noted the developments in the Ukraine and governments continue to impose sanctions on Russia. Given the absence of exposure in the region, the Board of Directors' view is that those developments and sanctions are unlikely to have a significant direct adverse impact on the Company. Nonetheless, the situation continues to evolve, and it remains difficult at this stage to estimate all direct and indirect impacts which may arise from these emerging developments. The Board of Directors continue to monitor the developments closely and to take all the necessary actions.

There have been no other significant events during the financial year.

16. Events after the Statement of Financial Position date

On 31 January 2023, the Directors declared the following dividends for the Income Share Classes on the following Funds:

Aegon Strategic Global Bond Fund USD 415,277.

Aegon Investment Grade Global Bond Fund USD 99,944.

Aegon High Yield Global Bond Fund USD 1,187,669.

Aegon Absolute Return Bond Fund GBP 363,277.

Aegon Global Equity Income Fund USD 361,765.

Aegon Global Sustainable Diversified Growth Fund EUR 115.

Aegon Short Dated High Yield Global Bond Fund USD 101,990.

Aegon Global Short Dated Climate Transition Fund GBP 1,417,794

The Directors declared the following dividends for the Income Share Classes on Aegon Global Diversified Income Fund: 30 November 2022 – EUR 344,915, 31 December 2022 – EUR 277,581 and 31 January 2023 – EUR 311,784.

There have been no other significant events since the financial year end.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Global Exposure (Unaudited)

The following table details the lowest, highest and average utilisation of the VaR limit:

	Lowest Utilisation (%)	Highest Utilisation (%)	Average Utilisation (%)
Aegon Strategic Global Bond Fund	120.35%	191.62%	151.62%
Aegon Investment Grade Global Bond Fund	9.19%	60.85%	42.99%
Aegon High Yield Global Bond Fund	45.38%	64.82%	51.29%
Aegon Absolute Return Bond Fund	94.58%	163.43%	131.41%
Aegon Global Diversified Income Fund	100.14%	199.59%	130.31%
Aegon Global Sustainable Diversified Growth Fund	86.08%	159.44%	127.57%
Aegon Global Equity Market Neutral Fund	65.80%	95.17%	77.72%
Aegon Short Dated High Yield Global Bond Fund	52.21%	67.56%	56.54%
Aegon Global Short Dated Climate Transition Fund	56.93%	96.52%	73.04%

Leverage is calculated as the sum of the notionals of the derivatives used. The median level of leverage employed during the financial year was as follows:

	Median
	Level of
	Leverage
Aegon Strategic Global Bond Fund	150.37%
Aegon Investment Grade Global Bond Fund	43.41%
Aegon High Yield Global Bond Fund	50.03%
Aegon Absolute Return Bond Fund	130.30%
Aegon Global Diversified Income Fund	122.57%
Aegon Global Sustainable Diversified Growth Fund	131.20%
Aegon Global Equity Market Neutral Fund	77.53%
Aegon Short Dated High Yield Global Bond Fund	55.29%
Aegon Global Short Dated Climate Transition Fund	76.21%

Securities Financial Transactions Regulations

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation ("SFTR") which came into effect on 13 January 2017.

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- · A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

None of the Funds were engaged in securities lending transactions during the financial year ended 31 October 2022 (31 October 2021: None). In addition, no SFTs that meet above definition were held by any of the Funds as at 31 October 2022 (31 October 2021: None).

There were no securities and commodities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) as at 31 October 2022 (31 October 2021: None).

- Aggregate total remuneration paid by Aegon Investment Management B.V to all Aegon Investment Management B.V staff; and
- Aggregate total remuneration paid by Aegon Investment Management B.V to Remuneration Code Staff

	Headcount	Total Remuneration (£'000s)
Aegon Investment Management		
B.V.	469	55,287
of which		
Fixed remuneration	469	47,187
Variable remuneration	469	8,100

Due to the nature of the business in which Aegon Investment Management B.V operates, it is not possible to accurately allocate the time spent by each employee on each fund. As such it has been deemed appropriate to disclose total remuneration information for Aegon Asset Management UK Plc.

	Headcount	Total Remuneration (£'000s)
Aegon Asset Management UK Plc		
Remuneration Code Staff	9	4,742

Manco activities

The following table provides an overview of the size and composition of the assets under management (AUM) by Aegon Asset Management B.V, including Aegon Asset Management Investment Company (Ireland) Plc. This shows the split between General Account and Third-party mandates:

	AUM (€'000s)	% of AUM
Aegon Investment Management B.V	96,977,632	100.00
of which		
General Account	20,045,557	20.67
Third party	53,042,924	54.70
Third party (affiliated sales)	23,889,151	24.63

^{*}Please note that the AUM figures are as at the 30.09.2022.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Supplementary Information (Unaudited)

Cybersecurity Risk

Cybersecurity breaches may occur allowing an unauthorized party to gain access to assets of the Funds, Shareholder data, or proprietary information, or may cause the Platform, the Investment Manager, the Distributor, the Administrator or the Depositary to suffer data corruption or lose operational functionality.

The Funds may be affected by intentional cybersecurity breaches which include unauthorized access to systems, networks, or devices (such as through "hacking" activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws).

A cybersecurity breach could result in the loss or theft of Shareholder data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs.

Such incidents could cause the Company, the Investment Manager, the Distributor, the Administrator, the Depositary, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Shareholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which the Funds invests, and thereby cause a Fund's investments to lose value, as a result of which investors, including the relevant Funds and its Shareholders, could potentially lose all or a portion of their investment with that issuer.

CRS Data Protection Information Notice

The Funds hereby provides the following data protection information notice to all shareholders in the Funds either as at 31 December 2015 or at any point of time since this date.

For the avoidance of doubt, this notice applies equally to any shareholders that have ceased to hold shares in the Funds since January 1, 2016. Furthermore, it should be noted that this notice may be applicable to Controlling Persons of certain shareholders.

The Funds hereby confirm that they intend to take such steps as may be required to satisfy any obligations imposed by (i) the OECD's Standard for Automatic Exchange of Financial Account Information in Tax Matters ("the Standard"), which therein contains the Common Reporting Standard ("CRS"), as applied in Ireland by means of the relevant international legal framework and Irish tax legislation and (ii) EU Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange information in the field of taxation ("DAC2"), as applied in Ireland by means of the relevant Irish tax legislation, so as to ensure compliance or deemed compliance (as the case may be) with the Standard/CRS and the DAC2 from 1 January 2016.

In this regard, the Manager on behalf of the Funds is obliged under Section 891F and Section 891G of the Irish Taxes Consolidation Act, 1997 (as amended) and regulations made pursuant to those sections to collect certain information about each shareholder's tax arrangements (and also collect information in relation to relevant Controlling Persons of specific shareholders).

In certain circumstances, the Manager on behalf of the Funds may be legally obliged to share this information and other financial information with respect to a shareholder's interests in the Funds with the Irish Revenue Commissioners (and, in particular situations, also share information in relation to relevant Controlling Persons of specific shareholders). In turn, and to the extent the account has been identified as a Reportable Account, the Irish Revenue Commissioners will exchange this information with the country of residence of the Reportable Person(s) in respect of that Reportable Account.

In particular, information that may be reported in respect of a shareholders (and relevant Controlling Persons, if applicable) includes name, address, date of birth, place of birth, account number, account balance or value at year end (or, if the account was closed during such year, the balance or value at the date of closure of the account), any payments (including redemption and dividend/interest payments) made with respect to the account during the calendar year, tax residency(ies) and tax identification number(s).

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Supplementary Information (Unaudited) (continued)

Custody and Title Risk Statement

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Company's ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Company holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Fund. Therefore, in such jurisdictions, there is a risk that if a sub-custodian becomes bankrupt or insolvent, the Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Fund. In those jurisdictions where the Fund's beneficial ownership of its assets is ultimately recognised, the Fund may suffer delay and cost in recovering those assets.

The Fund may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Fund which are traded in such markets and which have been entrusted to subcustodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. The Depositary monitors its delegates on an ongoing basis and shall exercise all due skill, care and diligence to ensure that entrusting financial instruments to its sub custodian (appointed pursuant to Article 22 a (2) of Directive 2009/65/EC provides an adequate standard of protection in accordance with Article 15 UCITS delegated regulation 2018/149 amending regulation 2016/438.

Aegon Asset Management Investment Company (Ireland) Plc, is an umbrella type open-ended investment company with variable capital registered in the Republic of Ireland (Company Number 442106), registered office at 25-28 North Wall Quay, International Financial Services Centre, Dublin 1. Board of Directors: Stuart Donald (UK), Mike Kirby (Ireland) and Bronwyn Wright (Ireland). Aegon Asset Management Investment Company (Ireland) Plc is regulated by the Central Bank of Ireland.

Aegon Asset Management UK plc (Company No. SC113505) and Aegon Asset Management UK Limited (Company No. SC212159) are registered in Scotland at Aegon House, 3 Lochside Crescent, Edinburgh EH12 9SA. Aegon Asset Management UK plc is authorised and regulated by the Financial Conduct Authority. Aegon Asset Management UK Limited is an appointed representative of Scottish Equitable plc which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited)

Article 6

Sustainable Finance Disclosure Regulation (in fund specific part)

This Fund integrates sustainability risks but does not promote ESG characteristics or has a sustainable investment objective according to the Sustainable Finance Disclosure Regulation (SFDR).

EU Taxonomy (in general part)

The EU Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the "Climate Objectives").

The EU Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria. Investors should note with respect to Funds that do not promote ESG characteristics or have a sustainable investment objective, the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

The Manager is keeping this situation under active review and where sufficient reliable, timely and verifiable data on the investment becomes available, it will re-evaluate its approach to the EU Taxonomy Regulation and relevant documentation will be updated.

Fund	Art. 6	Art. 8	Art. 9
Aegon Strategic Global Bond Fund

EU criteria for environmentally sustainable economic activities are not considered for investments within the funds that fall under Article 6.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Global Diversified Income Fund

Legal entity identifier: 213800P4B14T1IBZX714

Environmental and/or social characteristics

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Did this financial product have a s	ustainable investment objective?
☐ Yes	⊠ No
☐ It made sustainable investments with an environmental objective:%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of
☐ in economic activities that qualify as	% of sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics were achieved through the exclusion of securities whose issuer had been identified as contravening a set of ESG exclusion and watch list criteria (as detailed below). These criteria worked as sustainability indicators. Each indicator had a specific threshold that determined if an issuer was excluded from the portfolio. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

How did the sustainability indicators perform?

	Sustainability indicator	Metric	Value
	Companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium	% exposure	0%
Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Companies involved in the production and maintenance of nuclear weapons for any country other than those allowed to possess nuclear weapons based on international agreements	% exposure	0%
	Companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use	% exposure	0%
	Companies involved in controversial arms trade to countries where a United Nations Security Council, European Union, United States or other relevant multilateral arms embargo is in place	% exposure	0%
	Companies that hold a stake of 20% or more in, or are currently 50% or more owned by, a company that is involved in controversial weapons based on the above criteria	% exposure	0%
	Investments in any form of government-issued debt from countries that are under an arms embargo of the United Nations, the European Union, or the United States.	% exposure	0%
	Companies that currently derive 30% or more of their revenue from the exploration, mining or refining of thermal coal	% exposure	0%
	Companies that produce more than 20 million tons of thermal coal annually and are actively expanding expploration, mining or refining operations	% exposure	0%
	Companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively explading coal-fired electricity production capacity	% exposure	0%
	Companies that derive 30% or more of their total oil equivalent production from oil sands;	% exposure	0%
	Companies building or operating pipelines that significantly facilitate export of oil extracted from oil sands	% exposure	0%
	Investments in any form of government-issued debt (e.g. government bonds) from countries whose governments systematically breach human rights.	% exposure	0%
	Companies that derive 5% or more of their revenues from tobacco production.	% exposure	0%

The first reporting period for this product is 2022. The sustainability indicators in this report are reported for the first time. No Sustainability Indicators are available for previous periods.

Aegon Global Diversified Income Fund (continued)

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

 How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What was the proportion of sustainability-related investments?

0%

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	3.44%
Communications	3.74%
Consumer, Cyclical	6.59%
Consumer, Non-cyclical	11.48%
Energy	2.51%
Equity Investments	2.74%
Financial	35.10%
Government	7.76%
Industrial	6.75%
Technology	5.44%
Utilities	7.02%
Infrastructure	1.08%

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We identified issuers by using the sustainability indicators used to measure attainment of the environmental and social characteristics promoted. Issuers identified in connection with these activities were added to the Exclusion List. The Fund may not invest in securities from issuers identified as involved in the activities. The Exclusion List is compiled annually using the broadest available research universe offered by our specialist ESG data providers. Therefore, since it is subject to the availability of appropriate research data, it should not be considered as a fully comprehensive list of issuers involved in excluded activities. Our Exclusion List is not applied to investments in index-based derivatives, such as futures or options, or structured credit. This list is reviewed at least annually.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Global Sustainable Diversified Growth Fund

Legal entity identifier: 21380097T28R8D6FW710

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

☐ Yes	⊠ No

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted environmental and social characteristics. First, internal and third-party screening were used to ensure compliance with the exclusions of the Fund. This was monitored by the Investment Manager's Portfolio Risk Control team monthly to ensure that the exclusions were adhered to. Second, the Investment Manager's Responsible Investment team analysed and reviewed every holding at least every 12 months. This was also monitored by Portfolio Risk Control team and it can report that this analysis cycle was adhered to. As described below, this review included the categorisation of companies/issuers according to their ESG performances. The Fund is only allowed to invest in companies categorised as "Improvers" and "Leaders" and sovereign issuers categorised as ""Leaders", ""Influencers" and ""Improvers", as these are the companies/issuers that it believes fulfil the definition of sustainable investments as articulated in the following answers. The Investment Manager can report the split held within the portfolio at any time.

How did the sustainability indicators perform?

Sustainability
indicators measure
how the environmental
or social
characteristics
promoted by the
financial product are
attained.

Sustainability indicator	Metric	Value
Adult entertainment: Firms which own an adult entertainment company or produce adult entertainment.	% exposure	0%

Annual Report and Audited Financial Statements for the financial year ended 31 October 2022

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

 What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Investment Manager assigned each sustainable investment in the portfolio to one of six 'sustainability pillars', which it has defined as the main sustainable themes it can address through public equity investments. There are three environmental pillars (Climate Change, Eco Solutions, Resource Efficiency) and three social pillars (Health & Wellbeing, Inclusion, Sustainable Growth), which together capture a broad spectrum of sustainability issues. The objectives of the sustainable investments will vary on a case by case basis but each investment must be deemed by the Investment Manager's RI team to be positively contributing to the overall theme through its products and/ or practices. The RI team review the sustainability performance of each investment at least annually to ensure it is contributing to the overall pillar in the expected manner.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

First, the Investment Manager used a mixed quantitative and qualitative approach when analysing the company to assess whether the product or practices would be deemed to be harmful to society or the environment. This was generally captured by the exclusions (as detailed in the description of the Fund's investment strategy), but there may be other companies that the Investment Manager would capture as not being suitable for investment and inclusion in the Fund's portfolio.

Secondly, in the course of the Investment Manager's in depth analysis it looked at the controversies the company may have been involved in. Those with Sustainalytics scores of 4 or 5 as per Sustainalytics' methodology or with significant supply chain issues could be considered as doing significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been a major determinant in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the decription of the Fund's investment strategy and in the Investment Manager's Sustainability Risks and Impacts Policy applicable to this Fund (the "Aegon AM UK Sustainability Risks and Impacts Policy") . PAIs were also considered within the thorough, bottom-up sustainability analysis of companies' products and practices undertaken by the Investment Manager's Responsible Investment team. This process included an in depth analysis of the material (single and double) ESG factors for companies and PAIs were considered as part of this. This process also ensured that companies were doing no significant harm. The Investment Manager took its active ownership responsibilities seriously. Company meetings (AGMs, EGMs, etc.) were individually analysed, and the Investment Manager votes in meetings took due consideration of the governance of each company. The Investment Manager recognizes that good governance is often key to ensuring the good management of environmental and social issues. For sovereign debt issuers, the sustainability research process described above incorporated PAIs relevant to sovereigns when conducting sustainability research to determine the investable universe. The PAIs for sovereigns overlap with the quantitative and qualitative considerations as part of the sustainability process. The process was designed to evaluate the sustainability ambitions of each sovereign including an analysis of greenhouse gas ("GHG") emissions, inequality, human rights, governance and controversies.

Were sustainable investments aligned with the OECD [] Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager ensured that the Sustainable Investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by periodically screening the portfolio holdings using external specialized research, such as controversies, that indicated actual or potential breaches of international norms and standards. Please refer to the Aegon AM UK Sustainability Risks and Impacts Policy for further details of this process. For sovereign debt investment, these international norms are not directly relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Yes, the Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Aegon Global Sustainable Diversified Growth Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This Fund has avoided investing in companies identified as having significant adverse impact on biodiversity, environment, human rights and health by adhering to the exclusions list in the Aegon AM UK Sustainability Risks and Impacts Policy (by using the broadest available coverage universe from our specialist ESG data vendors).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Not applicable

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There was no minimum allocation to sustainable investments targeting environmental objectives. The Fund committed to a minimum of 85% investment in sustainable investments, categorised across the 6 sustainability pillars described above in the case of corporate securities and allocated to countries that were making substantial progress towards achieving the UN SDGs in the case of sovereign securities. This minimum could be achieved through any mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other.

What was the share of socially sustainable investments?

There is no minimum allocation to sustainable investments targeting social objectives. As above, the minimum of 80% investment in sustainable investments can be achieved through any mix of such environmental and / or social sustainable investments and there is no prioritization of one category over the other.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, cash, bank deposits, money market instruments, exchanged traded products and FX forward positions. These other investments were not subject to the Fund's environmental or social criteria.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability is incorporated in both an initial exclusionary screen and our detailed fundamental sustainability analysis on each stock considered for the portfolio. Our exclusionary screen covers: Animal welfare, Tobacco, Weapons, Nuclear power, Gambling, Adult entertainment, Genetic modification, Coal, Oil exploration and production. The fundamental analysis stage is a collaborative process between the investment management team and the Aegon AM Responsible Investment (RI) team to assess each idea considered for the strategy from a sustainability perspective. The process is led by the RI team, and companies are assessed based on a unique three-dimensional framework: (1) Sustainable Products; (2) Sustainable Practices; (3) Sustainable Improvement (tracking positive and negative sustainability change).

The output of this analysis is that the RI team categorise each company as one of the following:

- Sustainability Leader: Excellent performance on practices and strategically well positioned products. Activities that generate clear positive impact are viewed favourably.
- Sustainability Improver: Companies where sustainability issues have been identified and the company is showing clear evidence of addressing these or has meaningful plans in place to do so.
- Sustainability Influencer (Only applies to the Sovereign investments): Material portion of collateral or organizational mission is linked to sustainable initiatives.
- Sustainability Laggard: Poorly positioned, with unacceptably low standards, negative impacts and/or a lack of evidence of improvement.

There is a slightly different process applied to Sovereign investments:

The Fund seeks to invest in securities issued by countries that are making substantial progress towards achieving the UN's Sustainable Development Goals ("UN SDGs") as a result of good policy and whose government is able to manage risks to sustainable development. There are five sustainable categories for sovereign issuers:

- Sustainability Leader: The country has already achieved critical UN SDGs and is on track to achieve others. Leaders show outstanding commitment to increase or maintain their sustainability performance. Leaders do not have sustainability risk or controversial policies.
- Sustainability Influencer: The country is on track to achieve some UN SDGs and exhibits a clear commitment to sustainability. Influencers have limited sustainability risk and no major controversial policies.
- Sustainability Improver: The country demonstrates an above average performance as compared to its development peers, but still faces significant challenges in terms of UN SDG achievements. Improvers have sustainability risk but continue to deliver a credible promise through policy or other means to tackle its potential controversies.
- Sustainability Neutral: The country is not on track to achieve most UN SDGs, shows no significant improvements in its sustainability performance and seems to have no clear ambition to do so in the future. Neutral's have sustainability risk with controversies that require monitoring.
- Sustainability Detrimental: Country is not on track to achieve the UN SDGs and has no intention of doing so. Detrimentals have the highest sustainability risk, with possible major controversies.

For the purpose of this report, Neutral and Detrimental are grouped with Laggards.

Importantly, the fund can only invest in sustainable leaders and improvers - it cannot invest in laggards.

In terms of actions, the sustainability analysis is reviewed at least annually by the RI team, who can upgrade or downgrade a stock's categorisation. Should a stock be downgraded to a laggard, it must be sold from the portfolio (no stocks were downgraded to this level over the period). Additionally, we also reviewed the fund's carbon footprint, carbon intensity and weighted average carbon intensity regularly over the period.

Aegon Global Sustainable Equity Fund (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E / S characteristics. First, internal and third-party screening was used to ensure compliance with the exclusions of the Fund. Second, the Investment manager set certain Key Performance Indicators (KPIs) for each company held in the Fund to measure the attainment of the environmental and social characteristics promoted. These KPIs were specific to each company and were set by the Investment Manager's Responsible Investment team based on the factors considered most material to the holding. The Responsible Investment team was also responsible for monitoring these KPIs. As decribed below, the Investment Manager categorised companies according to their ESG performances into "Laggards", "Improvers" and "Leaders" and was allowed to invest in companies categorised as "Improvers" and "Leaders" as these were the companies that it believed fulfil the definition of sustainable investments as articulated in the following table.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability indicator	Metric	Value
Adult entertainment: Firms which own an adult entertainment company or produce adult entertainment.	% exposure	0%
Animal testing: Firms that engage in the production or sales of animal tested cosmetics	% exposure	0%
Gambling: Firms which derive more than 10% of revenue from gambling	% exposure	0%
Genetic modification: Firms which conduct genetic modification for agricultural policies	% exposure	0%
Tobacco: Firms which derive more than 10% of revenue from tobacco	% exposure	0%
Weapons: Firms which produce or sell civilian firearms and firms which manufacture or sell armaments, nuclear weapons or associated strategic products.	% exposure	0%
Nuclear power: Firms which own a nuclear power facility	% exposure	0%
Fossil fuels: Firms which engage in the extraction of oil, gas or coal	% exposure	0%
Human Rights: Firms failing to address serious allegations of violations of international standards on human rights including the use of child, forced or bonded labour.	% exposure	0%
% investments with individually set KPI's	% exposure	100%
% Portfolio in entities rated Laggard	% exposure	0%
% Portfolio in entities rated Improver	% exposure	59%
% Portfolio in entities rated Leader	% exposure	41%

The first reporting period for this product is 2022. The sustainability indicators in this report are reported for the first time. No Sustainability Indicators are available for previous periods.

Aegon Global Sustainable Equity Fund (continued)

 What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Investment Manager assigned each sustainable investment in the portfolio to one of six 'sustainability pillars', which it has defined as the main sustainable themes it can address through public equity investments. There are three environmental pillars (Climate Change, Eco Solutions, Resource Efficiency) and three social pillars (Health & Wellbeing, Inclusion, Sustainable Growth), which together capture a broad spectrum of sustainability issues. The objectives of the sustainable investments will vary on a case by case basis but each investment must be deemed by the Investment Manager's RI team to be positively contributing to the overall theme through its products and/ or practices. The RI team review the sustainability performance of each investment at least annually to ensure it is contributing to the overall pillar in the expected manner.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

First, the Investment Manager used a mixed quantitative and qualitative approach when analysing the company to assess whether the product or practices would be deemed to be harmful to society or the environment. This was generally captured by the exclusions (as detailed in the description of the Fund's investment strategy), but there may be other companies that the Investment Manager would capture as not being suitable for investment and inclusion in the Fund's portfolio.

Secondly, in the course of the Investment Manager's in depth analysis it looked at the controversies the company may have been involved in. Those with Sustainalytics scores of 4 or 5 as per Sustainalytics' methodology or with significant supply chain issues could be considered as doing significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs could be no more significant than other factors in the investment selection process, such that PAIs could not be determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain companies were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the decription of the Fund's investment strategy and in the Investment Manager's Sustainability Risks and Impacts Policy applicable to this Fund (the "Aegon AM UK Sustainability Risks and Impacts Policy") . PAIs were also considered within the thorough, bottom-up sustainability analysis of companies' products and practices undertaken by the Investment Manager's Responsible Investment team. This process included an in depth analysis of the material (single and double) ESG factors for companies and PAIs were considered as part of this. This process also ensured that companies were doing no significant harm. The Investment Manager took its active ownership responsibilities seriously. Company meetings (AGMs, EGMs, etc.) were individually analysed, and the Investment Manager voted in meetings taking due consideration of the governance of each company. The Investment Manager recognized that good governance was often key to ensuring the good management of environmental and social issues.

Were sustainable investments aligned with the OECD [] Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager ensured that the sustainable investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by periodically screening the portfolio holdings using external specialized research, such as controversies, that indicated actual or potential breaches of international norms and standards. Please refer to the Aegon AM UK Sustainability Risks and Impacts Policy for further details of this process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Yes. Please refer to the section above titled "How have the indicators for adverse impacts on sustainability factors been taken into account?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1-11-2021 to 31-10-2022

Largest investments	Sector	% Net Assets	Country
Relx plc	Consumer, non-cyclical	4.66%	United kingdom
Idp education Itd	Consumer, non-cyclical	4.33%	Australia
Alfen nv	Industrial	4.03%	Netherlands

Aegon Global Sustainable Equity Fund (continued)

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

• In which economic sectors were the investments made?

Sector	% Assets
Communications	7.23%
Consumer, Cyclical	3.82%
Consumer, Non-cyclical	36.37%
Energy	4.28%
Financial	6.10%
Industrial	21.53%
Technology	16.05%

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Not applicable

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There was no minimum allocation to sustainable investments targeting environmental objectives. The Fund committed to a minimum of 80% investment in sustainable investments, categorised across the 6 sustainability pillars described above. This minimum could be achieved through any mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other.

What was the share of socially sustainable investments?

There was no minimum allocation to sustainable investments targeting social objectives. As above, the minimum of 80% investment in sustainable investments could be achieved through any mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 'other' category currently includes only cash and equivalents. The Fund also has the ability to use derivative instruments, which may only be used for efficient portfolio management purposes. These would also be included in this section, although there were no derivatives in the portfolio at the time of reporting.

Aegon Global Sustainable Equity Fund (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability is incorporated in both an initial exclusionary screen and our detailed fundamental sustainability analysis on each stock considered for the portfolio. Our exclusionary screen covers: Animal welfare, Tobacco, Weapons, Nuclear power, Gambling, Adult entertainment, Genetic modification, Coal, Oil exploration and production. The fundamental analysis stage is a collaborative process between the investment management team and the Aegon AM Responsible Investment (RI) team to assess each idea considered for the strategy from a sustainability perspective. The process is led by the RI team, and companies are assessed based on a unique three-dimensional framework: (1) Sustainable Products; (2) Sustainable Practices; (3) Sustainable Improvement (tracking positive and negative sustainability change)

The output of this analysis is that the RI team categorise each company as one of the following:

- Sustainability Leader: Excellent performance on practices and strategically well positioned products. Activities that generate clear positive impact are viewed favourably.
- Sustainability Improver: Companies where sustainability issues have been identified and
 the company is showing clear evidence of addressing these or has meaningful plans in place
 to do so.
- Sustainability Laggard: Poorly positioned, with unacceptably low standards, negative impacts and/or a lack of evidence of improvement.

Importantly, the fund can only invest in sustainable leaders and improvers - it cannot invest in laggards.

In terms of actions, the sustainability analysis is reviewed at least annually by the RI team, who can upgrade or downgrade a stock's categorisation. Should a stock be downgraded to a laggard, it must be sold from the portfolio (no stocks were downgraded to this level over the period). Additionally, we also reviewed the fund's carbon footprint, carbon intensity and weighted average carbon intensity regularly over the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Did this financial product have a sus	tainable investment objective?
☐ Yes	⊠ No
☐ It made sustainable investments with an environmental objective:%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of
☐ in economic activities that qualify as	% of sustainable investments
environmentally sustainable under the EU Taxonomy	 with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 □ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	□ with a social objective
☐ It made sustainable investments with a social objective:%	☑It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons. The criteria included thresholds that determined if an issuer was excluded from the portfolio. Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest. Thirdly, holdings were categorized into one of five categories based on their climate related transition readiness and net zero alignment. Issuers were then assigned a climate category ranging from 1 – 5, which were used as sustainability indicators. As a consequence of which, the Fund was expected to have at least 30% lower weighted average carbon intensity compared with the broader universe as defined by BofAML Global Large Cap Corporate 1-5 Year Index. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability indicator	Metric	Value
Companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions		
containing depleted uranium	% exposure	0%
Companies involved in the production and maintenance of nuclear weapons for any country other than those allowed to possess nuclear weapons based on international agreements	% exposure	0%
Companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use	% exposure	0%
Companies involved in controversial arms trade to countries where a United Nations Security Council, European Union, United States or other relevant multilateral arms embargo is in place	% exposure	0%
Companies that hold a stake of 20% or more in, or are currently 50% or more owned by, a company that is involved in controversial weapons based on the above criteria	% exposure	0%
Investments in any form of government-issued debt from countries that are under an arms embargo of the United Nations, the European Union, or the United States.	% exposure	0%
% Portfolio in entities rated Leader	% exposure	7.01%
% Portfolio in entities rated Prepared	% exposure	21.71%
% Portfolio in entities rated Transitioning	% exposure	38.63%
% Portfolio in entities rated Unprepared	% exposure	20.15%
% Portfolio in entities rated Laggard	% exposure	6.37%
% Portfolio in entities rated ESG 1: Leader	% exposure	6.30%
% Portfolio in entities rated ESG 2: Minimal Risk	% exposure	42.80%
% Portfolio in entities rated ESG 3: Event Risk	% exposure	48.20%
% Portfolio in entities rated ESG 4: Fundamental Risk	% exposure	0%
% Portfolio in entities rated ESG 5: Rating Risk	% exposure	0%
Portfolio weighted average carbon intensity (WACI)	WACI tCO2e / \$1m revenue	64.73
Benchmark weighted average carbon intensity (WACI)	WACI tCO2e / \$1m revenue	159.47

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio.More specifically, the climate transition research framework considered issuers greenhouse gas ("GHG") absolute and intensity based scope 1, 2 and 3 emissions, which are a key part of evaluating a company's alignment to long-term climate transition. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term cerificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's ESG, climate transition, and carbon intensity was reviewed on a regular basis. Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Responsible Investment team maintained, reviewed and provided updates on climate transition research and issuers' designated categorisations. We regularly monitored the portfolio's carbon intensity vs broad universe. The Portfolio Managers took these ESG and Climate Conderations into account in their investment decisions.
