GENERAL INFORMATION

The ICAV was incorporated initially in Ireland on 11 June 2010 and commenced operations on 1 October 2010 as an investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds pursuant to the Companies Act 2014. It converted to an Irish Collective Asset-management Vehicle pursuant to the Irish Collective Asset-management Vehicles Act 2015 and 2021 (the "Acts") and came into operation as an ICAV on 18 March 2016. Waystone Management Company (IE) Limited (the "Manager") (Waystone Fund Management (IE) Limited up to 31 October 2022) has been appointed as manager to the ICAV.

The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The ICAV is constituted as an umbrella fund insofar as the share capital of the ICAV is divided into different classes of shares with each class of shares representing a portfolio of assets which comprises a separate fund (each a "Sub-Fund"). Assets and liabilities are segregated between each Sub-Fund.

The investment objective and policies for each Sub-Fund will be formulated by the Directors at the time of creation of such Sub-Fund and will be set out in the relevant Supplement to the ICAV's Prospectus for the time being in issue ("Prospectus").

Shares of any particular series may be divided into different classes to accommodate different subscription and redemption charges, dividends and fee arrangements. A Sub-Fund may hedge the foreign currency exposure of individual Share Classes against the Base Currency of a Sub-Fund or the currencies in which the assets of a Sub-Fund are denominated. A separate pool of assets is not being maintained for each Class.

The following table details the Sub-Funds currently available for subscription. Investors should note that there can be no guarantee that any Sub-Fund will achieve its investment objectives.

| Sub-Fund Name | Launch Date | Investment Objective |
|-----------------------------------|-----------------|--|
| 10AK Multi Asset 40 UCITS Fund | To be launched | The investment objective of the Sub-Fund is to achieve long term capital appreciation while maintaining a level of investment risk typically associated with a long term portfolio allocation target of 40% to equities and 60% to bonds. |
| 10AK Multi Asset 60 UCITS Fund | To be launched | The investment objective of the Sub-Fund is to achieve long term capital appreciation while maintaining a level of investment risk typically associated with a long term portfolio allocation target of 60% to equities and 40% to bonds. |
| 10AK Multi Asset 80 UCITS Fund | 28 January 2021 | The investment objective of the Sub-Fund is to achieve long term capital appreciation while maintaining a level of investment risk typically associated with a long term portfolio allocation target of 80% to equities and 20% to bonds. |
| ABR 75/25 Volatility UCITS Fund | 22 October 2021 | The investment objective of the Sub-Fund is to achieve long term capital appreciation by investing in securities and derivative instruments that provide (i) long exposure to Chicago Board Options Exchange ("CBOE") Volatility Index (the "VIX Index") futures, exchange-traded funds ("ETFs") and exchange-traded notes ("ETNs" and, together with ETFs, "ETPs"), S&P 500 Index futures and ETPs; (ii) short exposure to VIX Index futures and ETPs; (iii) long exposure to long-dated U.S. treasury securities; and (iv) exposure to cash. |
| Advent Global Partners UCITS Fund | 14 July 2016 | The Sub-Fund's investment objective is to seek to achieve risk-adjusted absolute returns by investing and trading in the global convertible bond and equity-linked securities markets. |

| Sub-Fund Name | Launch Date | Investment Objective |
|---|-----------------|--|
| AlphaQuest UCITS Fund | 9 December 2016 | The Sub-Fund's investment objective is to seek capital appreciation over the long term. The sub-Fund seeks to achieve its investment objective by investing, up to 100% of the Net Asset Value of the Sub-Fund, on a long and/or short basis, in a globally diversified portfolio representing the major asset classes of equities, fixed income and currencies in accordance with the Investment Manager's trading program. The Sub-Fund will also gain exposure to commodities, on a long and/or short basis, through the use of structured financial instruments. |
| Angel Oak Multi-Strategy Income UCITS Fund | 4 December 2015 | The Sub-Fund invests in a diversified portfolio of asset-backed securities, which are securities whose value and income payments are derived from a pool of underlying assets, such as bank loans, mortgages, corporate bonds, credit card debt and other receivables. |
| Ash Park Global Consumer Franchise UCITS Fund | 14 October 2014 | The Sub-Fund invests in companies in the food, beverage, tobacco, household and personal care sectors that are listed on global recognised markets. The Sub-Fund may also hold cash or cash equivalents to aid efficient management of the Sub-Fund or to enable the redemption of shares. |
| Balanced Capital UCITS Fund | To be launched | The investment objective of the Sub-Fund is to aim to deliver capital appreciation over the medium term. The Sub-Fund seeks to achieve its investment objective by following a fund of funds approach and accordingly up to 100% of the Net Asset Value of the Sub-Fund may be invested in Underlying Funds, subject to a maximum of 20% in any one collective investment scheme and a maximum of 30%, in aggregate, in alternative investment collective investment schemes ("AIFs"). The Sub-Fund will, through investment in Underlying Funds, gain exposure to equities, fixed income and alternative strategy funds. The Sub-Fund may gain exposure of up 30% of the Net Asset Value to Underlying Funds exposed to emerging markets. |
| Burren Global Arbitrage UCITS Fund | 7 April 2015 | The Sub-Fund aims to increase the value of shares by seeking exposure to companies which are subject to or connected with events such as takeovers, mergers, exchange offers, restructurings, liquidations and other extraordinary corporate events that have been publicly announced. |

| Sub-Fund Name | Launch Date | Investment Objective |
|---|--------------------|---|
| Chelodina UCITS Fund | 1 November 2019 | The investment objective of the Sub-Fund is to achieve long term capital appreciation. The Sub-Fund seeks to achieve its investment objective by investing primarily in equity and equity related securities which will be listed on recognised markets globally, although investments in emerging markets securities are typically expected not to exceed 10% of the Sub-Fund's Net Asset Value. The equity and equity-related securities in which the Sub-Fund may invest include common shares, preference shares and global depositary receipts. The Sub-Fund will primarily gain exposure to equities and equity related securities to through the use of Financial Derivative Instruments ("FDI") and, in particular contracts for difference. |
| Chilton Small Cap European UCITS Fund | 7 September 2021 | The Sub-Fund's investment objective is to generate absolute return for investors. The Sub-Fund seeks to achieve the investment objective by investing on a long and/or short basis in equities, equity-related securities and equity indices either directly or indirectly through the use of ("FDI"). The Sub-Fund will primarily invest in Small Cap European equities. The Sub-Fund may also invest or hold positions in companies with a market capitalisation of greater than EUR3 billion however less than 20% of the Net Asset Value of the Fund will be invested in companies or hold positions with a market capitalisation of greater than EUR3 billion and no more than 10% of the Net Asset Value of the Sub-Fund may be invested in companies with greater than EUR5 billion at any given time. |
| Collidr Adaptive Global Equity UCITS Fund | 18 February 2016 | The investment objective of the Sub-Fund is to deliver returns through a combination of capital growth and income. The Sub-Fund seeks to achieve its investment objective by investing in a portfolio of equities and equity-linked securities (including without limitation, common and preferred stocks) which are listed, traded or dealt on a recognised market and issued by U.S., European (excluding UK), UK and Japanese companies, while following an adaptive process to alter the level of the market risk exposure using ("FDI") (primarily index futures) and/or open-ended exchange traded funds. |
| Collidr Global Growth Strategy UCITS Fund* | 26 May 2020 | The investment objective of the Sub-Fund is to seek capital appreciation over the medium-to-long term. The Sub-Fund aims to achieve its investment objective by investing on a long and short basis in equities and equity-linked securities either, directly, or indirectly through the use of ("FDI"), which are listed, traded or dealt on a recognised market. The Sub-Fund will not have any particular geographical or industry focus and may invest globally. |

^{*}Collidr Global Growth Strategy UCITS Fund terminated on 31 January 2023.

| Sub-Fund Name | Launch Date | Investment Objective |
|---|-----------------|--|
| Conservative Capital UCITS Fund | To be launched | The investment objective of the Sub-Fund is to aim to deliver capital preservation over the medium term. The Sub-Fund seeks to achieve its investment objective by following a fund of funds approach and accordingly up to 100% of the Net Asset Value of the Sub-Fund may be invested in, subject to a maximum of 20% in any one collective investment scheme and a maximum of 30%, in aggregate, in alternative investment collective investment schemes ("AIFs"). The Sub-Fund will, through investment in Underlying Funds, gain exposure to equities, fixed income and alternative strategy funds. The Sub-Fund may gain exposure of up to 50% of the Net Asset Value to Underlying Funds exposed to sub-investment grade securities and up to 30% of the Net Asset Value to Underlying Funds exposed to emerging markets. |
| Cooper Creek Partners North America Long Short Equity UCITS Fund | 12 November 201 | 8 The investment objective of the Sub-Fund is to achieve long term capital appreciation. The Sub-Fund seeks to achieve its investment objective by gaining exposure (on a long and/or short basis) to U.S. equities and equity related securities (as further described below) primarily of small-capitalisation and mid-capitalisation companies (market capitalisation of US\$250 million to US\$10 billion). The Sub-Fund may also take exposure, to a more limited extent, in issuers in Canada and developed markets in Western Europe. |
| Crabel Advanced Trend UCITS Fund | 2 October 2017 | The investment objective of the Sub-Fund is to seek to achieve long term capital growth. The Sub-Fund is a portfolio of systematic trading strategies designed to efficiently capture long-term returns across a diverse set of global futures and foreign exchange instruments. The Sub-Fund seeks to achieve the investment objective by gaining long and/or short exposure to four asset classes, namely commodities, currencies, interest rates and equity indices (each an "Asset Class" and collectively the "Asset Classes") listed or traded on recognised markets across North American, European and Asian geographic regions. |
| Crabel Gemini UCITS Fund | 2 October 2017 | The investment objective of the Sub-Fund is to seek to achieve long term capital growth. The Sub-Fund is a systematic portfolio of predominantly short holding period strategies designed to target behavioural and structural market inefficiencies across a broadly diversified set of global futures and foreign exchange instruments. The Sub-Fund seeks to achieve the investment objective by gaining long and/or short exposure to four asset classes, namely commodities, currencies, interest rates and equity indices (each an "Asset Classe" and collectively the "Asset Classes") listed or traded on recognised markets across North American, European and Asian geographic regions. |

| Sub-Fund Name | Launch Date | Investment Objective |
|---|------------------|--|
| Descartes Alternative Credit UCITS Fund | 26 March 2019 | The Sub-Fund's investment objective is to generate risk adjusted returns. The Sub-Fund will seek to achieve its investment objective by investing on a long only basis in a diversified portfolio of structured finance securities ("SFS"), in particular in the form of European collateralised loan obligations ("CLOs") which will be listed or traded on a recognised market. It is anticipated that the Sub-Fund may invest up to 100% of its Net Asset Value in CLOs. |
| Disciplined Alpha U.S. Long Short UCITS Fund | 21 February 2019 | The investment objective of the Sub-Fund is to aim to deliver capital appreciation over the medium term. In order to achieve its investment objective, the Sub-Fund will primarily invest both long and / or short in U.S. equity securities of companies, at least 50% of which will be in the Russell 1000 Index. |
| DUNN WMA Institutional UCITS Fund | 31 August 2011 | The investment objective of the Sub-Fund is to generate returns for investors over a five year period. The Sub-Fund will seek to achieve its objective by taking exposure to a systematic program called the DUNN WMA Institutional Program. The allocation of assets is dictated by the Dunn WMA Institutional Program which does so on the basis of risk. The aim is that the maximum potential risk (measured by VaR) is allocated equally amongst the traded futures markets with the exception that the allocation to VIX may be as high as 10%. |
| First Quadrant Global Diversified Macro UCITS Fund | To be launched | The investment objective of the Sub-Fund is to provide long-term capital appreciation by gaining exposure (on a long and/or short basis) to three asset classes, namely bonds, equity indices and global currencies which are listed or traded globally. The Sub-Fund does not have any specific industry or sector focus and will be invested globally. |
| Giano UCITS Fund* | 11 July 2018 | The Sub-Fund's investment objective is to achieve long term capital appreciation. The investment objective of the Sub-Fund will be achieved by gaining long and/or short, direct and/or indirect exposure to the following asset classes: (i) equities and equity-related securities, (ii) bonds, (iii) commodities (indirect only), and (iv) currencies (as further described below) (each an "Asset Class" and collectively the "Asset Classes") listed or traded on recognised markets. There is no restriction on the proportion of the Sub-Fund which may be invested in any one of the Asset Classes, although there will be a limit of 10% of the Net Asset Value of the Sub-Fund which may be invested in securities which are primarily traded on a recognised market in an emerging market. The Sub-Fund will also typically diversify its exposure across a range of individual investments and industry sectors, across each of the Asset Classes. |
| Invenomic US Equity Long/Short UCITS Fund | 16 September 202 | The investment objective of the Sub-Fund is to achieve long- term capital appreciation by gaining direct or indirect exposure (on a long and/or short basis) to equity and equity related securities which are listed or traded on a recognised market in developed markets worldwide, with a focus on US equities. |

^{*}Giano UCITS Fund terminated on 21 April 2023.

| Sub-Fund Name | Launch Date | Investment Objective |
|---|-----------------|--|
| Ironshield Credit Fund | 31 March 2020 | The investment objective of the Sub-Fund is to achieve a positive risk-adjusted rate of return for investors. The Sub-Fund seeks to achieve its investment objective by gaining direct and, through the use of ("FDI"), indirect exposure to corporate and other fixed income securities (for example, bonds, debentures and promissory notes which pay a fixed or floating rate of interest over a fixed time period), which may be rated or unrated and, if rated, may be rated investment grade or below by a Recognised Rating Agency. The Sub-Fund's principal focus will be on credit exposure to European issuers. |
| Ironshield High Yield Alpha Fund | 25 August 2022 | The investment objective of the Sub-Fund is to achieve a positive risk-adjusted rate of return for investors. The Sub-Fund seeks to achieve its investment objective by principally gaining direct and, through the use of ("FDI"), indirect exposure to corporate and other fixed income securities as further set out below, which may be rated by a Recognised Rating Agency, or unrated. The fixed income securities which the Sub-Fund may gain exposure to are bonds, debentures and promissory notes which pay a fixed or floating rate of interest over a fixed time period. The Sub-Fund will focus on exposure to global credit markets and there is no restriction on the amount of the Sub-Fund that may be invested in unrated securities. The Sub-Fund may have exposure of up to 100% of its Net Asset Value in emerging market countries. |
| Kayne Anderson Renewable Infrastructure UCITS Fund | 9 February 2022 | The Sub-Fund's investment objective is to seek total return through a combination of current income and capital appreciation by investing in renewable energy infrastructure companies. The Sub-Fund aims to achieve its investment objective by investing on a long-only basis principally in equities and equity-related securities. The equities and equity-related securities to which the Sub-Fund may take exposure are equities, depositary receipts, and preferred stock. |
| MontLake Abrax Merger Arbitrage UCITS Fund | 24 July 2019 | The investment objective of the Sub-Fund is to achieve absolute return over the medium term. The Sub-Fund seeks to achieve its investment objective by gaining direct and, through the use of ("FDI"), indirect exposure (on a long and/or short basis) to global equities of companies which are involved in mergers and acquisitions events or share class reorganisations. The Sub-Fund may also take exposure to other equity-related and debt securities (such as bonds which may be fixed or floating rate, investment grade, sub-investment grade or unrated or convertible into shares) issued by such companies. The equity-related securities in which the Sub-Fund may invest will include preference shares and global depositary receipts. Exposure to corporate debt securities shall not exceed 30% of the Net Asset Value of the Sub-Fund. |

|---|------------------|---|
| Sub-Fund Name | Launch Date | Investment Objective |
| MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund | 15 November 2018 | The objective of the Sub-Fund is to produce long term capital growth. The Sub-Fund will invest in multinational large capitalisation companies which own established brands with global recognition and which have sustainable value that persists across market cycles. Investments will be made in the equity securities (including common shares and preference shares) of these companies which will be listed or traded on one or more recognised markets, globally. |
| Mygale Event Driven UCITS Fund | 1 December 2015 | The Sub-Fund aims to increase the value of shares in the medium to long term by seeking exposure to companies which are likely to go through some kind of corporate event or restructuring which is expected to result in a significant change in the price of the securities involved. |
| Nutshell Growth Fund | 18 May 2020 | The Sub-Fund's investment objective is to achieve capital appreciation. The Sub-Fund seeks to achieve the investment objective primarily by gaining direct or indirect exposure (primarily on a long only basis but sometimes synthetically on a short basis) to equity and equity-related securities (as further described below) which are listed or traded on a recognised market in developed markets worldwide. |
| Perspective American Absolute Alpha UCITS Fund | 11 November 2022 | The Sub-Fund's investment objective is to seek a positive return in excess of the Secured Overnight Financing Rate over a three-year period. The Sub-Fund seeks to achieve the investment objective by investing on a long and short basis in equities, equity-related securities and equity indices either directly or indirectly through the use of ("FDI"). The Sub-Fund will invest primarily in companies listed, quoted or traded, or which are headquartered or have a significant part of their activities, in North America. While the Sub-Fund will primarily gain exposure to companies incorporated in, or with their principal economic activity arising in North America, it may also gain exposure of up to 25% of its portfolio to companies incorporated in, or with their principal economic activity arising outside of North America. The Sub-Fund does not have a particular industry or sector focus. |
| Purple Global Core Strategy UCITS Fund | To be launched | The investment objective of the Sub-Fund is to deliver returns through a combination of capital growth and the generation of income over the medium-to-long term. The Sub-Fund aims to achieve its investment objective by combining a fund of funds approach with a direct investment approach. The allocation between the Underlying Funds and direct investments will be determined at the discretion of the Investment Manager who may allocate up to 100% of the Net Asset Value of the Sub-Fund to investments in Underlying Funds on a long-only basis. Further, |

Underlying Funds.

at the Investment Managers discretion, up to 50% of the Net Asset Value of the Sub-Fund may be held in direct investments. The Sub-Fund will have a bias towards fixed income securities. The Sub-Fund will gain exposure to fixed income securities either directly or indirectly through investment in Underlying Funds, while exposure to equities and equity-linked securities will be taken indirectly by investing through investment in

| Sub-Fund Name | Launch Date | Investment Objective |
|--|-----------------|---|
| RoboCap UCITS Fund | 4 January 2016 | The Sub-Fund's objective is to increase the value of shares over the long term. The Sub-Fund will seek to achieve its objective by investing in the robotics and automation theme in different countries, sectors and markets. This theme includes not just companies involved in the production of robots and automated machinery, but also businesses that are developing or producing automation software and technology, artificial intelligence, 3D printing, autonomous vehicles, automated services, components and subsystems. |
| SHARP UCITS Fund | 23 July 2020 | The Sub-Fund's investment objective is to seek to achieve long-term capital appreciation with a typical investment horizon of 3 to 5 years. The Sub-Fund seeks to achieve the investment objective by investing in a global portfolio of diversified and liquid assets (as described below). The asset classes to which the Sub-Fund shall take either long or short exposure consist of equity indices, bonds, currency rates and commodities (each as further described below and collectively referred to as the "Asset Classes"). The Sub-Fund is not restricted to any particular industry or sector and will be invested globally. |
| Sixteen02 Global Equities UCITS Fund | 27 October 2020 | The Sub-Fund's investment objective is to achieve capital appreciation over the long term. The Sub-Fund seeks to achieve the investment objective primarily by gaining direct or indirect exposure on a long only basis to equity and equity-related securities which are listed or traded on recognised markets worldwide. |
| Solanas ESG Sustainability UCITS Fund* | 25 June 2021 | The Sub-Fund's investment objective was to achieve a total return through the deployment of capital across sustainable, impact and alternative energy companies. The Sub-Fund sought to achieve the investment objective by investing with a long bias in equities and equity-related securities either directly or indirectly through the use of ("FDI"). However the Sub-Fund also gained short exposure to equities and equity-related securities. The Sub-Fund invested primarily in equity securities of companies that are principally focused on global renewables, clean technology, efficiency, water infrastructure, recycling and waste management. The Sub-Fund invested on a global basis and was not restricted to any particular country or jurisdiction. |
| Three Bridges Europe Pure Alpha UCITS Fund | To be launched | The investment objective of the Fund is to seek long term capital appreciation while preserving capital during challenging investment environments in a portfolio that seeks to maintain Beta-neutral exposure relative to the European equity market. The Sub-Fund seeks to achieve the investment objective by primarily gaining exposure (on a long and/or short basis) to publicly-traded equity and equity related securities (as further described below) which are listed or traded on a recognised market. The Sub-Fund's portfolio will be concentrated on companies who are based in, or have a significant level of business in, the European developed markets such as Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom. |

^{*}Solanas ESG Sustainability UCITS Fund terminated on 30 November 2022.

| Sub-Fund Name | Launch Date | Investment Objective |
|---|-----------------|--|
| Tosca Micro Cap UCITS Fund | 1 October 2010 | The investment objective of the Sub-Fund is to achieve long-term capital appreciation. The Sub-Fund will invest primarily in "micro cap" companies (i.e. companies with a market capitalisation of up to £250 million) that are listed in the United Kingdom, and which are or are expected to become constituents of the FTSE Small Cap ex Investment Trust Index or the FTSE AIM All Share Index. The Sub-Fund may also invest up to 20% of its Net Asset Value in equity securities issued by companies that are listed in the United Kingdom with a market capitalisation between £250 million and £2 billion. |
| Tosca UCITS Fund | 1 November 2018 | The Sub-Fund's investment objective is to achieve medium-term capital appreciation. The Sub-Fund seeks to achieve the investment objective primarily by gaining direct or indirect exposure (on a long and/or short basis) to global equity and equity related securities (as further described below) which are listed or traded on a recognised market. The Sub-Fund may also gain exposure to global equity securities through investment in equity indices (as described below). While the investment focus will primarily be on global equity and equity related securities, the Sub-Fund may also, in certain circumstances more particularly set out below, gain exposure to fixed-income securities which are listed or traded on a recognised market. |
| Trinity Street Global Equity UCITS Fund | 4 October 2018 | The investment objective of the Sub-Fund is to seek a return for shareholders through long-term capital growth. The Sub-Fund seeks to achieve the investment objective by primarily gaining exposure (on a long only basis) to equities and equity related securities (as further described below). The global equities and global equity related securities in which the Sub-Fund may invest will be listed or traded on recognised markets, generally in developed market countries and, to a limited extent, in emerging market countries. The Sub-Fund's portfolio will be focused primarily on mid to large capitalisation companies, with some focus on small capitalisation companies. |
| Virtuoso UCITS Fund | 9 July 2020 | The Sub-Fund's investment objective is to achieve long term growth in value. The Sub-Fund seeks to achieve the investment objective by investing on a long and/or short basis in equities and equity-related securities (including common shares, depositary receipts and preference shares) either directly or indirectly through the use of ("FDI"). The Sub-Fund does not have a particular industry or sector focus. |
| Westbeck Energy Transition UCITS Fund | To be Launched | The Sub-Fund's investment objective is to seek long-term capital gains. The Sub-Fund seeks to achieve the investment objective by investing in equities, equity indices and UCITS compliant ETF's, primarily focused on investment opportunities relating to the global energy transition theme, with a particular focus on the full value chain surrounding batteries. |

Central Bank of Ireland Authorisations and Terminations

3 Sub-Funds were established and authorised by the Central Bank and subsequently launched during the year.

| Sub-Fund | Launch Date | Investment Manager |
|--|------------------|---------------------------------------|
| Kayne Anderson Renewable Infrastructure UCITS Fund | 9 February 2022 | Kayne Anderson Capital Advisors, L.P. |
| Ironshield High Yield Alpha Fund | 25 August 2022 | Ironshield Capital Management, LLP |
| Perspective American Absolute Alpha UCITS Fund | 11 November 2022 | Tavira Financial Limited |

The Sub-Funds listed below have been established and authorised by the Central Bank but had not launched by 31 December 2022.

| Sub-Fund Name | Authorisation Date |
|--|--------------------|
| Three Bridges Europe Pure Alpha UCITS Fund | 31 October 2017 |
| Purple Global Core Strategy UCITS Fund | 2 February 2018 |
| Balanced Capital UCITS Fund | 25 January 2019 |
| Conservative Capital UCITS Fund | 25 January 2019 |
| 1OAK Multi Asset 60 UCITS Fund | 24 November 2020 |
| 1OAK Multi Asset 40 UCITS Fund | 24 November 2020 |
| First Quadrant Global Diversified Macro UCITS Fund | 26 July 2021 |

The Sub-Funds listed below have terminated and their authorisation is in the process of being revoked by the Central Bank. Termination financial statements for Solanas ESG Sustainability UCITS Fund have been included in these financial statements. The other terminated Sub-Funds have either had separate termination financial statements prepared for them or termination financial statements have been included in previous annual financial statements for the ICAV.

| High Ridge Credit Opportunities UCITS Fund | 29 April 2022 | Spectrum Asset Management, Inc | |
| Kingswood Defensive Alpha Absolute Return UCITS Fund | 28 June 2022 | KW Investment Management Limited | |
| Avenir UCITS Fund | 19 August 2022 | Hyposwiss Private Bank Genève SA | |
| Solanas ESG Sustainability UCITS Fund | 30 November 2022 | Leucadia Asset Management LLC | |

Please refer to Note 17 on subsequent events for details of the new Sub-Funds which were authorised or which launched and Sub-Funds that have terminated and ceased operations after the year end.

DEPOSITARY REPORT TO SHAREHOLDERS

For the year ended 31 December 2022

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed as Depositary to the ICAV, provide this report solely in favour of the shareholders of the ICAV for the year ended 31 December 2022 (the "Annual Accounting Period"). This report is provided in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, which implemented Directive 2009/65/EU into Irish Law (the "Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the ICAV for this Annual Accounting Period and we hereby report, thereon to the shareholders of the ICAV as follows;

We are of the opinion that the ICAV has been managed during the Annual Accounting period, in all material respects:

- (i) In accordance with the limitations imposed on the investment and borrowing powers or the ICAV by the constitutional documents and by the Regulations; and
- (ii) Otherwise in accordance with the provisions of the constitutional documents and the Regulations.

For and on behalf of:

28 April 2023

DIRECTORS' REPORT

For the year ended 31 December 2022

The Directors of MontLake UCITS Platform ICAV submit their Annual Report and Audited Financial Statements for the year ended 31 December 2022 to the Shareholders.

Segregated Liabilities

The ICAV is an umbrella fund with segregated liability between Sub-Funds.

Activities and Business Review

A detailed review of the ICAV's activities for the financial year ended 31 December 2022 is included in the Investment Managers' Reports and significant events during the year are outlined in Note 16 to these financial statements.

Future Developments

The ICAV will continue to act as an investment vehicle as set out in the Prospectus.

Risk Management Objectives and Policies

The principal risks and uncertainties faced by the ICAV are the investment risks associated with the portfolio of investments held for the account of each of the Sub-Funds and the operational risks associated with its management and administration.

The information required under the accounting standard adopted by the ICAV, International Financial Reporting Standards as adopted by the EU ("IFRS"), in relation to the use by the ICAV of financial instruments, the financial risk management objectives and policies of the ICAV and the exposures of the ICAV to market risk, currency risk, interest rate risk, liquidity risk, credit risk, price and cash flow risk are outlined in Note 10 to these financial statements.

Directors who held office during the year

The Directors who held office at any time during the year were: Cyril Delamare, David Hammond, David Tease, Raymond O'Neill and Mary Murphy.

Directors' Interests in Shares of the ICAV

Cyril Delamare, a Director of the ICAV, held shares in the EUR Institutional Class of DUNN WMA Institutional UCITS Fund. Further details are outlined in Note 13 to the financial statements.

No other Director, nor the Company Secretary, had any beneficial interest in the shares of the ICAV or its Sub-Funds during the year or in the prior year.

Transactions involving Directors

Other than as disclosed in Note 13 to the Financial Statements, there were no contracts or agreements of any significance in relation to the business of the ICAV in which the Directors had any interest, as defined in the Act, at any time during the year.

Transactions with Connected Persons

The UCITS Regulations require that any transaction carried out with the ICAV by a manager or depositary to the UCITS, the delegates or sub-delegates of the manager or depositary, and any associated or group companies of such a manager, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the year complied with these obligations.

The connected persons are the Manager, any appointed investment managers (the "Investment Managers"), Northern Trust International Fund Administration Services (Ireland) Limited (the "Administrator") and Northern Trust Fiduciary Services (Ireland) Limited (the "Depositary") and their associated firms. The relevant fees charged by connected persons are detailed in Note 5 and the Statement of Comprehensive Income.

Statement on Relevant Audit Information

In accordance with the Acts each of the persons who are Directors at the time the report is approved confirm the following:

- So far as the Director is aware, there is no relevant audit information of which the ICAV's statutory auditors are unaware, and
- The Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

DIRECTORS' REPORT (CONTINUED)

For the year ended 31 December 2022

Statement on Relevant Audit Information (continued)

Corporate Governance Code

Irish Funds, the association for the funds industry in Ireland, has published a corporate governance code (the "Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Board of Directors has adopted the Code, and the ICAV was in compliance with all elements of the Code during the year.

Results

The results of operations for the year are set out in the Statement of Comprehensive Income on pages 104 to 108.

Key Performance Indicators

The key performance indicators monitored for each Sub-Fund include the performance of the Sub-Funds, the level of subscriptions and redemptions and compliance with investment restrictions and risk limits. The performance of the Sub-Funds is reviewed in the Investment Managers' Reports on pages 22 to 78.

Accounting Records

The Directors believe that they have complied with the requirements of Sections 109 to 115 of the Act with regard to keeping adequate accounting records. The Directors have appointed the Administrator to maintain adequate accounting records. The records are maintained by the Administrator at its offices at:

Georges Court 54-62 Townsend Street Dublin D02 R156 Ireland

Dividends

It is intended that dividends will be paid quarterly in respect of the distributing share classes in 1OAK Multi Asset 80 UCITS Fund, Angel Oak Multi-Strategy Income UCITS Fund, Descartes Alternative Credit UCITS Fund and Kayne Anderson Renewable Infrastructure UCITS Fund. The Directors do not intend to declare dividend distributions in respect of the other Sub-Funds or classes. Accordingly all income and capital gains in respect of the other Sub-Funds and classes will be reinvested by the Sub-Funds and shall be reflected in the Net Asset Value per Share of the Sub-Funds and classes. Dividends declared and paid during the year are detailed in Note 15.

Significant Events During the Year

Any significant events which are material in the context of these Financial Statements during the financial year are detailed in Note 16.

Subsequent Events

Any subsequent events which are material in the context of these Financial Statements since the financial year end date are detailed in Note 17.

Independent Auditor

In accordance with Section 125 of the Act, KPMG, Chartered Accountants and Registered Auditors, have expressed their willingness to continue in office as the ICAV's auditor.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and financial statements, in accordance with applicable law and regulations.

DIRECTORS' REPORT (CONTINUED)

For the year ended 31 December 2022

Statement of Directors' Responsibilities (continued)

The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the Sub-Funds at the end of the financial year and of the profit or loss of the Sub-Funds for the financial year. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Sub-Funds or cease operations, or have no realistic alternative but to do so. Please see Note 1 for details of Sub-Funds for which the financial statements have not been prepared on a going concern basis.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Sub-Funds and enable them to ensure that the financial statements comply with the Act and the Central Bank UCITS Regulations.

They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Sub-Funds. In this regard they have entrusted the assets of the Sub-Funds to the Depositary for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Act.

The Manager is responsible for the maintenance and integrity of the corporate and financial information concerning the ICAV included on the Manager's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

On behalf of the Board

Paymond O'Nill

Raymond O'Neill

INVESTMENT MANAGERS' REPORTS

10AK Multi Asset 80 UCITS Fund 2022 Performance Review

The Sub-Fund is a multi-asset sub-fund where we use guidance from BlackRock to determine the asset allocation. BlackRock have made four small changes to the asset allocation over the period. First, they have maintained a pro-risk position, favouring equities over bonds.

Figure 1. The change in asset allocation over 2022

Equity Sleeve Performance

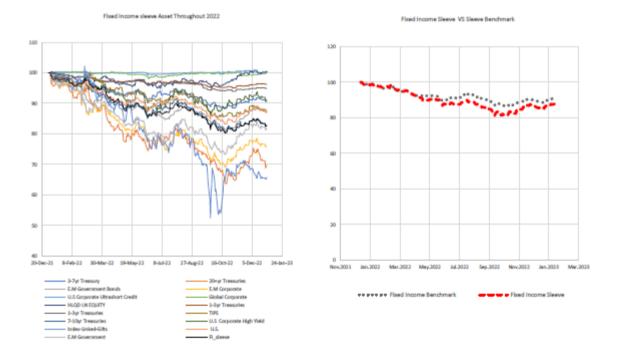

10AK Multi Asset 80 UCITS Fund 2022 Performance Review (continued)

Figure 4. Performance attribution (continued)

Fixed Income Sleeve Performance

2022 was a dismal year which was dominated by uncertainty. Sky-high inflation, rising rates and the invasion of Ukraine were just a few factors that undermined asset prices and boosted volatility. As the global economy recovered from Covid, supply-side constraints caused inflation to pick up. Initially, the markets discounted inflationary pressures as temporary, but the effect of the war in Ukraine confounded these hopes. By the end of the year, inflation was out of control, and central banks were raising rates aggressively to bring prices down.

The combination of geo-political uncertainty and the sharp reversal of monetary policy led many commentators to predict a global recession. As a result, most equity market indices were hit, and global stock markets were down (-16%), their worst performance since 2008.

10AK Multi Asset 80 UCITS Fund 2022 Performance Review (continued)

Investors were left limited places of refuge because bonds offered little protection. Traditionally bonds and equities have an inverse relationship meaning when the value of one goes up, the other goes down. However, in 2022, this was not the case. Bond prices fell due to central banks' efforts to fight the four-decade-high inflation with monetary tightening, which caused bond yields to rise and values to fall.

The Sub-Fund's value fell, reflecting the market's dismal performance throughout 2022. The USD Share Class fell 17% from 31 December 21 in the period to 31 December 22. The Sub-Fund's heavy weighting towards equities (80% allocation), and US equities in particular, significantly affected returns.

We use two benchmarks to compare the Sub-Fund's performance; for the equity sleeve, we use the MSCI ACWI Index (ACWI) and the Bloomberg Global Aggregate Bond Index (AGGU) for the fixed income sleeve. The Sub-Fund's performance against its benchmarks for the year was mixed; the equity sleeve outperformed the ACWI by 2.2%; but both ended the year well into the red. On the other hand, the fixed income sleeve underperformed the AGGU by 3% again; both assets realised negative returns for 2022.

The Sub-Fund's equity sleeve returned -17.0% in 2022. All the assets in the equity sleeve realised negative returns. The worst-performing assets were US and Japanese equities.

US equities experienced their worst year since the Global Financial Crisis in 2008, with the S&P 500 returning -18.5%, starkly contrasting the record performance in 2021. The main cause cited by analysts was the pivot in monetary policy by the Fed to control soaring inflation resulting from supply chain bottlenecks and the conflict in Ukraine. The constant rate hikes throughout the year meant that interest rates were at 4% at the end of 2022. Higher rates caused concern that consumer demand would fall drastically. Our position in US equities contributed -10.1% to the Sub-Fund's underperformance.

Japanese equities suffered because of inflation caused by skyrocketing energy and commodity prices, a by-product of Covid and the conflict in Ukraine. The Bank of Japan maintained its dovish monetary policy compared to its developed market counterparts for most of the year, only raising rates in towards the end of the year. The BoJ has tried to allow economic growth to get back to pre-pandemic levels; however, the delay in monetary tightening harmed the performance of Japanese equities. The Sub-Fund's position in Japanese equities contributed -1.3% to the Sub-Fund's underperformance.

The equity sleeve's top performers were UK and Pacific ex-Japan equities. The UK equity market outperformed in 2022 compared to its peers due to the FTSE 100 greater weighting to sectors such as Energy and Materials relative to its peers. The UK index was also helped by the depreciation of GBP and the international nature of the companies in the index. Therefore the Sub-Fund's position in UK equities only contributed -0.5% to the Sub-Fund's underperformance.

The Sub-Fund's fixed income sleeve returned -14.5% in 2022. Inflation was a recurring theme and was at the forefront of investors' minds throughout 2022. As previously mentioned, bonds failed to provide diversification benefits for investors when equity values fell. The fixed income sleeve offered no protection against the losses suffered in the equity sleeve, instead, it contributed to the losses. Concerns of continual central bank rate hikes and soaring inflation meant both government and corporate bonds suffered.

The two main contributors to the fixed income sleeve's negative performance were the positions in index linked gilts and 20+yr Treasuries.

20+yr Treasuries suffered in 2022, returning -30.3% in 2022. Longer-dated bonds have a greater sensitivity towards interest rates. Therefore the 4% jump in interest caused the value of 20+yr treasuries to plummet. The same can be seen in index linked gilts. Despite increasing inflation, the value of both US and UK inflation-linked bonds has dropped. For these assets, the negative effect of rising nominal rates has overpowered the positive effect of higher inflation. In the short term, real (inflation-adjusted) interest rates drive returns, and these have been rising from all-time lows.

Outlook

The Sub-Fund is well positioned for 2023. It starts the year slightly overweight equities and with low exposure to conventional bonds. Although the performance of the Sub-Fund suffered against our peers for structural reasons, we believe that these are temporary and will be reversed in the medium term.

10AK Multi Asset 80 UCITS Fund 2022 Performance Review (continued)

Outlook (continued)

The primary cause of negative underperformance came from the Sub-Fund's global benchmark. We derive the asset allocation from the BlackRock model portfolios. We selected a blend of GBP and USD portfolios appropriate for a fund which is benchmarked against global equities and bonds. As a result, the Sub-Fund had a high level of exposure to US equities (among the worst-performing global markets) and a low level of exposure to UK equities (one of the better-performing markets) compared to our peers.

The other asset-allocation factor that worsened the returns was our allocation to long-dated US Treasuries and inflation-linked gilts because both markets performed poorly as nominal rates increased. In hindsight, we would have done better if BlackRock had not held these assets in their models, but at the time, BlackRock believed that these assets would offer diversification benefits. The very poor performance of UK inflation-linked gilts is perplexing because inflation accelerated so sharply. However, it is the spread between nominal rates and inflation that drives the value of these assets in the short term, and real rates have increased significantly throughout the year.

The Sub-Fund uses a swap to get exposure to the equity sleeve and some of the fixed-income assets, which means that 1OAK can add value by managing the collateral portfolio. Unfortunately, meagre rates, an inverted yield curve and compressed credit spreads that prevailed for the first part of the year meant that adding value and remaining within our imposed risk limits was challenging.

Finally, our decision to hedge all the FX risk negatively impacted the performance of the GBP share class. Moreover, the global benchmark exacerbated the losses because most of the Sub-Fund's assets are denominated in USD or other currencies. Hedging the FX risk meant that the value of the GBP share class reflected the fall in the value of US equities and other international assets.

These four structural factors harmed the performance of the Sub-Fund in 2022 and made a bad year a bit worse. However, we expect that the effect will be temporary. Therefore, we remain convinced that managing the Sub-Fund using a global benchmark is correct. We still consider FX exposure to bring unrewarded risk and expect that we will be able to add value through collateral management as rates pick up.

10AK Capital Limited

January 2023

ABR 75/25 Volatility UCITS Fund 2022 Performance Review

The investment objective of the Sub-Fund is to seek long-term capital appreciation. Investors should note that there can be no guarantee that the Sub-Fund will achieve its investment objective. The Sub-Fund seeks to achieve the investment objective by investing in securities and derivative instruments that provide (i) long exposure to the Chicago Board Options Exchange ("CBOE") Volatility Index (the "VIX Index") futures, exchange traded funds ("ETFs") and exchange-traded notes ("ETNs") and, together with ETFs, exchange traded products ("ETPs") and S&P 500 Index futures; (ii) short exposure to VIX Index futures and ETPs; (iii) long exposure to long-dated U.S. treasury securities; and (iv) exposure to cash.

The Investment Manager's approach to managing the Sub-Fund involves creating a 75/25 blend based on the Sub-Fund's net assets, of (i) the Investment Manager's Long Volatility Strategy; and (ii) its Short Volatility Strategy (each as further described below). The strategies are model-based and rely on various measures of equity volatility to assess the level of volatility in the market environment.

Long Volatility: In low to medium volatility environments, the long volatility model typically targets a larger long exposure to S&P 500 Index futures and S&P 500 Index ETPs and a lesser long exposure to VIX Index futures and VIX Index ETPs. This lesser long exposure to VIX Index futures and VIX Index ETPs in low to medium volatility environments is intended to provide long volatility strategy exposure while also potentially reducing any possible drag on returns. In medium to high volatility environments, the model typically targets a lesser long exposure to S&P 500 Index futures and S&P 500 Index ETPs and a larger long exposure to VIX Index futures and VIX Index ETPs.

Short Volatility: In low volatility environments, the short volatility model typically targets a larger long exposure to long-term U.S. Treasuries and a lesser, but still meaningful, short exposure to VIX Index futures and VIX Index ETPs. This lesser short exposure to VIX Index futures and VIX Index ETPs is intended to provide meaningful exposure to the risks and expected returns of a short volatility strategy while also providing some mitigation in the event of sudden and rapid appreciation in the prices of VIX Index futures and VIX Index ETPs. In medium volatility environments, the model typically targets a lesser long exposure to long-term U.S. Treasuries and a larger short exposure to long-term U.S. Treasuries and short exposure to VIX Index futures and VIX Index ETPs, with a larger exposure to cash.

The first six months of 2022 saw the end of a U.S. equity bull market, followed by a relatively calm grind down in equities. Equity volatility was only modestly elevated, even at its highest levels. The highest closing value of the CBOE S&P 500 Volatility Index ("VIX") was only 36.45. For context, the long-term average of the VIX has been 19.64, and the VIX exceeded 80 in the COVID-19 crisis. Further illustrative of the historically unusual combination of equity losses with relatively muted volatility is the fact that the S&P 500 Index return of -19.96% in the first half of 2022 is in the worst One percentile of all S&P 500 returns with realized volatility below 25% over six month periods. In addition to the fact that volatility remained relatively low, it was also quite choppy and trendless in the first half of 2022. One illustration of the choppy nature of volatility is the fact that the VIX rose above 30 on nine separate occasions in the first half of 2022 without ever even reaching 37 – the average over all six month periods is 1.3 times and nine times is the most in the history of the VIX. All of this is to say that there were repeated reversals in volatility without major trends in the first half of 2022. The historically very unusual, choppy, trendless volatility environment was unfavorable for the Sub-Fund's primarily volatility trend-following model. For the first half of the year, the Sub-Fund was down 31.52%.

As with all rare occurrences, this one didn't last. In the second half of 2022, volatility returned to its more normal patterns. Volatility trends were measured in months, instead of the days and weeks of the first half of the year. Further, the pairing of equity return and volatility level was much more normal, with the S&P 500 up 2.31% and volatility around 23%. This environment was much more in line with the long-term behavior of volatility and was more favorable for the Sub-Fund's model. For the second half of the year, the Sub-Fund was up 5.50%, bringing the total for the year to down 27.75%.

January 2023

Advent Global Partners UCITS Fund 2022 Performance Review

The Sub-Fund returned -3.87% net in 2022. Both equities and bonds posted double digit losses for 2022, with equities experiencing their worst year since the global financial crisis and bonds the worst year in a 97-year history. Fixed income, as represented by the Bloomberg Barclays Global Bond Aggregate, experienced a drawdown of -20% in the first 10 months of 2022. This was around four times worse than any year since records began in 1992. We believe the persistent sharp selloffs and rebounds seen in 2022 are likely to continue to be driven by ongoing inflationary pressures, and a highly uncertain geopolitical environment likely to remain at the forefront of investors' minds and lists of concerns. Furthermore, we expect the Federal Reserve ("Fed") policy uncertainty to continue to be a contributor to 2023 volatility. The favorable risk/reward of a long-volatility strategy remains attractive as idiosyncratic volatility and rapid sector rotations will likely ensue. We remain confident in the prospects for our strategy in 2023, given a highly conducive market backdrop to exploit cheap volatility and market dislocation. Top contributors in 2022 included Royal Caribbean Cruises, and security software company Zscaler. Top detractors from the portfolio in 2022 included Norwegian Cruise Line, and online finance company, SoFi.

The Sub-Fund profited from the Royal Caribbean Cruises position. Although the stock dropped almost 40% in June due to global economic worries, the convertible richened as a result of its high gamma profile and short duration. We actively traded the underlying equity hedge and monetized the elevated volatility across the cruise line sector. Despite the selloff in the equity, we still believe the company's credit profile remains resilient over the medium term. In August, the company also successfully refinanced a large portion of their two convertibles due in 2023 with a very well-priced new issue convertible. We had positioned the Royal Caribbean investment to profit from this particular transaction. The portfolio benefitted from the exchange offering.

Zscaler also meaningfully contributed to performance throughout the year as the stock exhibited wild volatility surges. In May, shares dropped 37% from the start of the month through May 18, but strong earnings from security software peer, Palo Alto Networks, halted the decline in Zscaler shares. Zscaler jumped 12.6% after its earnings report a week later. Zscaler's revenue grew 63% year-over-year and billings increased 54% year-over-year. In September, the stock surged 22% on solid earnings as revenue growth (61% year-over-year), billings and operating margin were all above expectations due to strength for Zscaler's cybersecurity solutions. However, by the end of the month, the stock gave back most of its gains, as broader software sector valuations cheapened on higher interest rates. In November, the stock tumbled 25% due to concerns of a broader software sector slowdown, only to recover 15% as optimism built into the company's third quarter earnings release. Zscaler remains one of our favorite positions to trade as realized volatility has exceeded 80, while the implied volatility in the convertible was priced at 50 – a very large dispersion to generate gamma trading profits. The Sub-Fund has a meaningful allocation to these types of long volatility investments.

The Sub-Fund suffered losses in the Norwegian Cruise Line position in the first half of 2022. Despite an ongoing demand recovery for cruising, the company experienced volatility during the period because of sharp oil price fluctuations stemming from geopolitical tensions, concerns about a protracted cruise recovery, and the impact of rising interest rates on refinancing pandemic related debt issuance. The convertible bonds cheapened on basis due to these concerns, which we believe were largely unwarranted. The equity remained highly volatile over the course of the year, while the credit profile continues to improve. Norwegian Cruise Line's exposure to the U.S. consumer, energy prices, and covid rates is expected to create trading opportunities for the Sub-Fund to monetize volatility in 2023.

Despite reporting strong third quarter results on November 1, SoFi underperformed after the Biden Administration announced another extension on the federal student loan moratorium. The extension followed an injunction by a federal appeals court blocking the Administration's student loan forgiveness program. We believe SoFi can deliver continued revenue growth from non-student loan businesses, even during the current moratorium, demonstrating the attractiveness of the platform. We view the risk/reward as attractive, as student loan volumes are likely to recover, although the exact timing of such remains uncertain.

Outlook

We expect the sharp selloff that we witnessed in December 2022 to continue through the foreseeable future. The markets have entered a period we have not undergone since the 1980's with higher interest rates, elevated inflation, global macro uncertainty at near all-time highs, and the threat of a major market disruption driven by geopolitical events a distinct possibility. Equity markets and credit markets are being influenced by a multitude of factors that are causing sharp movements. This will likely be a benefit to disciplined relative value strategies, in particular this strategy which seeks to identify and monetize these idiosyncratic inefficiencies created by these sharp rapid swings in the value of financial assets. We believe we are in a secular bull market for relative value volatility strategies driven by dislocations which will continue to drive global opportunities for this long-volatility relative value strategy.

Advent Capital Management, LLC January 2023

AlphaQuest UCITS Fund 2022 Performance Review

The Sub-Fund finished 2022 up 13.31%,¹ significantly outperforming the S&P 500 Total Return Index (-18.1%) and once again demonstrating its ability to generate sizable profits and alpha during tail events for equity and hedge fund portfolios. 2022 marked the Sub-Fund's best performance since its inception in 2016.

The year began with steady declines in equities which accelerated towards the middle of January. The Sub-Fund, reacting to the increases in volatility, developed meaningful short-equity positions. While such exposures detracted, due to large reversals in the final days in January and early days of February, the Sub-Fund remained profitable through the first two months of the year.

The broader risk-off lean in the Sub-Fund boosted performance in March, when the reverberations of the Russian invasion of Ukraine were felt. The Sub-Fund generated larger positions in response to the rapid expansion in volatility, profiting in every sector and trading system time horizon to deliver its best month of performance for the year. The streak of strong performance continued in April, the second-best month on the year, as the widening dispersion of central bank interest rate policy propelled the U.S. Dollar Index to its highest level in two decades.

The summer months proved less eventful for the Sub-Fund as the risk-reward potential for long-convexity positions weakened following the sizable volatility expansions earlier in the year. During such periods, it is normal for risk taking to decrease as the Sub-Fund waits for more lucrative opportunities in the markets it trades.

September proved to be just that, as markets were rife with volatility amid concerns around the potential for a new 'Lehman moment' when the new U.K. government sought cuts to the highest income-tax rate. The market reacted swiftly, with the news provoking one of the largest fixed income selloffs in a generation, exposing such fragility in the U.K. financial system that it required a course reversal and immediate, emergency stimulus to stabilize the market. The Sub-Fund was able to capitalize on the volatility, generating its third-best month on the year in September.

Despite large reversals in long-term trends in October and November, the Sub-Fund retained the vast majority of its profits into the end of the year. As a whole, 2022 was a considerable success for the Sub-Fund as it once again delivered substantial positive convexity during a market crisis.

As we look to 2023, the U.S. economy seems poised for a recession. Numerous leading indicators have begun to show signs of economic contraction: home sales were down 11 of 12 months last year, Institute of Supply Management ("ISM") manufacturing and services Purchasing Managers' Index ("PMIs") are now in contraction territory, the yield curve is the most inverted since the 1980s, and consumer confidence remains at one of the lowest levels ever. The last holdout remains the job market—a lagging indicator—which, for now, has been the strongest since the 1960s. While its resiliency is certainly noteworthy, news headlines suggest the potential for meaningful change, with each new day seemingly met with another company announcing record layoffs. These layoffs are now beginning to transcend the technology sector and it is likely that will continue through the year, exacerbating should the economy show definitive signs of weakness. Such an environment would certainly be auspicious for the Sub-Fund and could lead to another year of strong performance.

Angel Oak Multi-Strategy Income UCITS Fund 2022 Performance Review

The Sub-Fund's Institutional Founders Accumulating Share Class (ticker: AOMUIFA) was down approximately -15.46% net for the 12-month period ending December 31, 2022. During the same period, the Sub-Fund's benchmark, the Bloomberg U.S. Aggregate Bond Index, was down approximately -13.01%.

The great bond bear market of 2022 left a swath of destruction in financial assets, especially within long-duration fixed income. Market participants around the globe were completely offside for the parabolic inflation experienced in 2022, leading to a surge in rates, a spike in interest rate volatility, wider credit spreads, significant fixed-income outflows, and the worst performance for the traditional 60/40 portfolio since 1931. A Federal Reserve ("Fed") that was supposed to be on hold at zero until 2023 hiked rates 17 times in 2022, humbling market participants in a historic policy panic. Not only did implied interest rate volatility spike, but it also has remained elevated for the longest period of time since the Global Financial Crisis. While we expected higher inflation, a higher target rate, and quantitative tightening ("QT"), we did not foresee the Russian invasion of Ukraine, the subsequent food and energy shock, the historic policy panic from the Federal Open Market Committee ("FOMC"), or the volatility storm that ensued.

While shorter-duration areas of securitized credit, which we focused on, outperformed areas of traditional fixed income for most of 2022, persistently elevated interest rate volatility, QT, and a buyer's strike from banks and money managers led to an eventual spread blowout in securitized credit. The sharp move wider in credit spreads began at the end of quarter three and bled into quarter four, weighing on performance heading into year-end. Detractors from performance relative to the index were the overweight to securitized credit, notably non-agency residential mortgage-backed securities, and the spread widening experienced in the second half of 2022. The Sub-Fund's current income of approximately 6.33% was a positive contributor relative to the benchmark, but price depreciation of approximately -20.83% drove underperformance for the Sub-Fund relative to the benchmark.

The interest rate volatility storm of 2022 put immense pressure on mortgage-backed securities and our favored areas of securitized credit, but encouraging signs are emerging to indicate we are nearing peak policy and can expect declining volatility in 2023. In our view, a decline in interest rate volatility will be very supportive for mortgage and securitized product spreads in 2023. In addition, while the Federal Reserve (the "Fed") and banks will remain largely absent from purchase activity in 2023 due to our expectation that QT will continue for most of the year, we believe money manager and pension allocations back into fixed income (in order to take advantage of the opportunities in securitized credit) will be enough to offset the lack of demand, particularly at the most risk-remote areas of the capital structure.

Pandemics and wars are difficult to anticipate using our typical macroeconomic indicators, but our focus on sustainable fundamentals in high-quality areas of securitized credit positions us to outperform over the long-run credit cycle as the bond bear market of 2022 created years of total return potential. Loss-adjusted yields have potentially reached equity-like return hurdles for most investors, ranging from 6% to 15% in senior secured cash flows. Bonds are the new stocks in 2023, and we encourage investors to take note of that when they assess the carnage of the 2022 bond bear market. We believe the relative value of securitized credit stands out across risk assets when considering the new 40/60 portfolio in 2023.

As we close the book on 2022 and on quantitative easing, we leave behind a year that marks the worst performance for the traditional 60/40 portfolio since 1931. While investors spent 2022 focused on weathering the storm, investors will spend 2023 taking advantage of the opportunities it created. Most fixed-income asset classes look cheap today, but very few exhibit the sustainable fundamentals, robust structural protections, and crisis-level credit spreads that we see in U.S. securitized credit. Presenting the possibility of equity-like returns, we believe securitized credit should be a focal point of fixed-income portfolios as the era of the 40/60 portfolio begins.

Angel Oak Capital Advisors, LLC

January 2023

Ash Park Global Consumer Franchise UCITS Fund 2022 Performance Review

The Sub-Fund finished down 7.5%¹ in 2022, outperforming in a difficult year for almost all markets. Although we are always disappointed to see a period of negative returns, we are reassured by the growth in the underlying earnings of the portfolio. We continue to believe that the steady and consistent compounding characteristics of our strategy will deliver attractive returns over an extended period of time.

Our work using over 40 years of data shows that the Consumer Staples sector generates higher returns than the wider market, but with lower risk, and in that period the strategy has never lost money over any holding period of five years or more. Not all Consumer Staples companies are reliable compounders, and there are of course companies in other industries that can also sustain steady growth, but we are confident that there are enough high-quality Consumer Staples companies in our universe that we can spend 100% of our time on this sector.

The critical factor in the success of Consumer Staples companies is consistency; growth is steady and does not require lots of capital investment, giving scope for attractive dividends or share repurchases instead. Consumer Staples is rarely the most exciting sector in stock market terms, and doesn't produce the instant gratification that investors often seem to seek, but it is relatively immune from the cyclicality and technological or fashion changes that hold back returns elsewhere.

Brands such as Campari, Heineken, Nescafé and Lindt are amongst the world's oldest and most iconic. The fact that the businesses and brands in our portfolio have been around for so long gives us a lot of comfort. Consumers come back to brands they know and trust in the developed world, and they are aspirational to large swathes of the growing middle classes in emerging markets. It is these brands that allow their owners to generate high and sustainable margins and underlying returns on capital.

We aim to run a high-quality, concentrated portfolio of around 20 stocks. Because we seek to own businesses which we believe to be capable of compounding earnings and cash flows at attractive rates for the foreseeable future, we also expect portfolio turnover to be low, which should have the benefit of minimising the transactional costs borne by our investors. During 2022 we added one new stock to the portfolio – BellRing Brands, the owner of the Premier Protein and Dymatize brands. Although the company was only listed in 2019, the two main brands are over 25 years old and have both been gaining share in the attractive and fast-growing protein drinks category. This leaves us with 21 stocks in the portfolio, with no major disposals in 2022.

It is difficult to predict the path of inflation through 2023 and beyond, but we have been reassured in the pricing power of the businesses we own in 2022 and their ability to grow sales whilst (largely) protecting profitability through volatile economic conditions. We also retained a significant exposure to the Asian Beauty market and have been encouraged by the early signs of strong demand in response to the ending of the zero-Covid policies in China. Despite the negative returns in 2022, the underlying portfolio was able to grow both earnings and cash flow (with further progress expected in 2023), leaving it well-placed to deliver positive returns in the medium and longer-term.

¹Performance figures are those of the EUR Class A share class.

Ash Park Capital LLP

January 2023

Burren Global Arbitrage UCITS Fund 2022 Performance Review

The Sub-Fund returned 0.52% in 2022, compared to the HFRX Merger Arbitrage Index performance of -0.32% and the HFRX Event Driven Index performance of -7.27%.

In 2022 according to Refinitiv, global mergers and acquisitions ("M&A") volumes and values declined in by -17% and -37% respectively, from record-breaking 2021 levels, although both remained above 2020 and pre-pandemic levels. Declines have been universal, with no region, deal-type or sector spared. There are few signs of a plateau in the US, with transaction value recovering some 23% in the final quarter of the year, while Europe continues to underperform with -39% down year on year in the same quarter.

Given the relatively small size of our funds, the number of M&A transactions available provide more than enough opportunities to produce material returns and to continue to protect capital from the significant volatility that both equity and fixed income markets experienced during 2022. The most relevant M&A themes in 2022 continued to be taking private UK public companies given the modest multiples companies trade on, leveraged buyouts ("LBOs"), in particular in the tech and growth-driven sectors, due to the global reset in valuations following the increase in interest rates, industrial mergers to improve size and take advantage of synergies, and pharma deals to replenish diminishing pipelines with new promising drugs.

Despite lower M&A activity overall, 2022 still recorded 34 M&A mega deals valued at \$10 billion or greater (2021 was a boom year with 46 such deals). Most of them (27) were controlling-stake transactions, four were spinoffs, two were transactions for a minority or additional stake, and one was a joint venture deal. The largest mega deals announced in 2022 belonged to the technology sector: the \$68.7bn mega merger of Microsoft and Activision Blizzard; the \$68.3bn acquisition of VMware by Broadcom; and Elon Musk's X Holding's acquisition of Twitter for \$40.3bn. The pharmaceutical industry has seen also several mega deals - among them: Horizon Therapeutics being acquired by Amgen (\$28.3bn enterprise value) and Abiomed by J&J (\$16.6bn enterprise value).

The global political environment was tense in 2022 due to the Russian invasion of Ukraine and the continued tensions between China and US around Taiwan and technology trade issues, where the US is trying to limit the export of relevant technologies to China and to improve its trade deficit with the country. These political tensions have contributed to higher volatility and wider spreads in cross-border deals. High inflation and fears of a recession pushed many private equity investors into choppy waters.

Last year the antitrust regulatory environment in the US was in a period of nearly unprecedented public attention and policy debate, with bold public statements from the Administration's antitrust enforcers. The Federal Trade Commission ("FTC") and Department of Justice ("DOJ") have changed the focus of merger enforcement, emphasizing vertical theories of harm (as seen through challenges to the Lockheed/Aerojet, UnitedHealth/Change, which the government lost in court, and Microsoft/ Activision acquisitions) and sharply scrutinizing private equity firms and transactions in which they are involved. Nevertheless, the statistics did not fully live up to the statements with the total number of cases of challenged mergers in line with previous years. In 2023, we might face major policy developments, notably the issuance of new Merger Guidelines to replace both the widely accepted 2010 Horizontal Merger Guidelines and the controversial 2020 Vertical Merger Guidelines. In Europe, we saw a heightened interventionism by the UK agency (the Competition and Markets Authority (("CMA")), cementing its place as a powerful and proactive antitrust regulator on the global stage.

Outlook

Global M&A activity is expected to rise in the second half of 2023 as investors and businesses look to balance short-term risks with their long-term strategies, according to the PwC 2023 Outlook. The current environment has its tailwinds conducive to deal activity. The weakening economy leads companies to focus on balance sheets and the corporate portfolio, considering options from business sales to asset sales/ divestiture via corporate carve-out. Increased pressure from activist investors could also lead to deals, while some sectors, such as airlines and tourism, are still experiencing a post-pandemic rebound that could propel M&A activity. Companies emerging from pandemic disruption in a stronger competitive position are likely to pursue bolt-on acquisitions and further consolidation in the technology sector and in consumer products industries could also be expected. Private equity firms have ample dry powder to use for acquisitions, and are increasingly pursuing club deals (forming consortia with other sponsors).

We are pleased to have protected investors' capital during 2022, which proved to be one of the worst years since the 70s from a financial point of view. We are excited about the numerous set of opportunities available in 2023 and we plan to take advantage of the increased volatility and wider spreads within the M&A space.

Burren Capital Advisors Limited January 2023

Chelodina UCITS Fund 2022 Performance Review

2022 saw the European market record its worst annual performance for four years, returning -12.9%. The ongoing war in Ukraine, the European energy crisis, high inflation and aggressive monetary tightening by the central banks hit investors' confidence, leading to high volatility and heightened uncertainty in the market.

⁽¹⁾ Chelodina UCITS Fund returns are provided in USD, monthly and net of fees and expenses for the Institutional Class A Shares.

First quarter: Volatility returns

The economy began the year 2022 in fundamentally good form. Global GDP growth in 2021 was 6.1 percent, a solid rebound from the pandemic-induced contraction of –3.1 percent in 2020. That momentum carried into January 2022, despite concerns about the new Omicron variant of COVID-19: manufacturing was expanding, and trade levels had once again reached all-time highs. However, the markets started the year with a bout of volatility and January ended down -3.88% after having been up for the first week of the month. By the month end, the Federal Reserve (the "Fed") was already signalling it would start to raise rates at its March meeting. The rotational nature of the market proved to be tough for signal-based and trend-following strategies to capitalise on. Broadly these strategies fared worse, whilst the best performing allocations within the Sub-Fund were to fundamental strategies.

Geopolitical events drove the markets in February, with the market growing increasingly concerned about a potential move by Russia on Ukraine. The Sub-Fund responded proactively and early by eliminating any direct exposure to Russia and Ukraine. In the days that followed Russia's eventual invasion of Ukraine, the Sub-Fund's gross decreased as capital deployed in fundamental strategies was reduced, reshaping the exposure of the Sub-Fund toward shorter duration thematic and trading orientated strategies. The invasion of Ukraine by Russia led to a domino effect on the global economy. Prices spiked for gold, crude oil, and natural gas; stock markets shuddered. Energy markets took centre stage causing an energy crisis in Europe whilst emphasizing the opportunity in clean energy.

By March, the rate of growth that January seemed to promise was becoming constrained by three major challenges: the invasion of Ukraine, inflation, and the Omicron variant, which closed Shanghai, the world's largest container port. March saw a market de-risking early in the month then staged a rally for the second half on the belief that the war in Ukraine would be short and sharp. Capital protection was the primary focus of the Sub-Fund during this period.

Second quarter: Bear market

During April, investor sentiment continued to weaken as rate rises and inflation fuelled concerns. Managers reduced directionality and single stock dispersion lead to a good opportunity set for the fundamental managers which drove the Sub-Fund's positive return.

By May, the economy had hit housing markets worldwide, including the US and China. In China, work on many large projects stopped, developers defaulted, and buyers withheld mortgage payments and staged public protests. Globally, buyers were contending with higher prices from pandemic-era demand and also higher mortgage rates. This saw the equity market increasingly price in the risk of a growth shock. Growth and duration sectors endured the worst of the sell-off early in the month before the market settled around the March lows of when Russia invaded Ukraine. Equities then rallied off an oversold level. European markets (STOXX 600 Total Return) experienced high volatility throughout May and eventually recovered from an early 7% drawdown to end the month down -1.56%. Chelodina Fundamental Discretionary strategies drove performance profiting from the outperformance of sectors leveraged to commodities inflation, energy transition and traditional defensives, while conversely expressing a negative stance on front-end cyclical exposures.

Chelodina UCITS Fund 2022 Performance Review (continued)

Second quarter: Bear market (continued)

Following May's brief rally, global equity markets continued their downturn in June as a slowing US economy pushed the S&P into official bear market territory. As inflation hit levels not seen since the 1980s, investors conceded the view that inflation needed to be dealt with and came to the realisation that the likelihood of the Federal Reserve being able to orchestrate a soft economic landing (whilst bringing inflation under control) was remote. Every sector finished in negative territory in June, with the largest losses in the material and energy sectors. The STOXX Europe 600 dropped circa 8.0% in June (circa 15% year to date at month end) and wasn't far from joining the S&P 500 in a bear market. Attribution from shorts was strong for June (online clothes retailers, credit spread sensitive financials and basic resources), and although overall attribution from longs was negative, stock specific (alpha) return from long positions was accretive (rate sensitive financials and healthcare). P&L was predominantly driven by idiosyncratic returns. Chelodina managers remained nimble, prioritising earnings certainty, business model quality and internally driven growth stories on the long side, and companies with poor pricing power, stretched balance sheets and over inflated inventory positions into an economic downturn on the short side.

Third Ouarter: Recession concerns

July saw concerns of a recession weigh on the market as Europe continued to feel the effects of the Ukraine war, rampant inflation (prices in some countries had risen eightfold), the energy crisis, and a tightened monetary policy. However, the market had reached extreme oversold levels so when companies began reporting second-quarter results, as significant downgrades had already been factored into the market, a relief rally ensued. The Sub-Fund recorded a slight negative net performance in July (-0.24%). Specific and factor returns were both modest detractors from cumulative performance, with sector gains coming from long exposure to technology and banks, while losses were concentrated in short consumer discretionary and long energy positions.

Investors came into August hopeful the Fed would slow the pace of rate hikes. In the first half of the month, major indices rallied thanks in large part to that sentiment. But as the month wore on, concerns rose around ongoing COVID-19 lockdowns in China and the knock-on effects that they could have on global supply chains, as well as earnings forecast downgrades. Then, Powell indicated in a key speech in Jackson Hole that policy will remain tight for "some time." Stocks, which had already been slipping from a mid-month peak, dropped, with U.S. and Eurozone equities contracting in August. Tech firms - big beneficiaries of the era of near-zero borrowing costs - were particularly hard hit. Factor exposure increased intramonth following a sharp and extended move in momentum which led to the Chelodina Investment & Risk Committee actively working with portfolio managers to reduce this tilt.

September seasonality didn't disappoint, with the STOXX Europe 600 falling 6.57% and closing just off its lows of the month. Central banks continued to express a hawkish narrative, but the market's focus had shifted from worrying about inflation to worrying about growth. Rates and the USD continued to move higher, at the same time as earnings revisions were set to accelerate to the downside. Against this backdrop, the Sub-Fund returned 0.83%, benefitting from long exposure to banks and insurance and short exposure to real estate, consumer discretionary and technology.

Fourth Quarter: Rebound

Stocks entered rebound mode in the fourth quarter, with the Dow posting its largest monthly gain in October since 1976. This move was echoed by Europe and continued into November with the market delivering back-to-back gains for the first time over the year. As the narrative of a Fed pause, or a pivot, strengthened, Treasury yields dropped. Stocks found their footing. And the bears were soon on the back foot.

The final month of the year brought the economy into focus as a red-hot jobs report pointed to underlying strength in the economy. Yet, the alarm bells that continued to ring in the bond market were now difficult to ignore. The 2-10 Treasury yield curve saw its biggest inversion in about four decades, signalling increasing concerns about a potential recession. This led to a sell off into the final two weeks of the year causing the STOXX Europe 600 to end December down -3.44%. The Sub-Fund benefitted from long exposure to retail, travel and leisure and industrial goods along with short exposure to chemicals, energy, and basic resources. Following high factor volatility in November and the 'momentum crash', the Sub-Fund's factor exposure was kept low. A general de-grossing by portfolio managers into the quiet holiday period and year end saw the Sub-Fund's gross exposure shrink to a low of 92% at year end. Given increased volatility and tighter liquidity, the Chelodina Investment & Risk Committee was comfortable allowing this to happen on this occasion.

Marble Bar Asset Management, LLP January 2023

Chilton Small Cap European UCITS Fund 2022 Performance Review

Markets started the year turbulently with a number of challenging themes appearing. In January, it became clear that inflation was far from transient and was running higher than many thought. This caused a complete reassessment of policy by central banks. The faster trajectory of forecast rate rises understandably had an effect on growth stocks. We had been cognizant of this factor and had not proliferated the portfolio with so-called "growth at any price" names. That said, some of our higher rated sustainable growth ideas suffered, such as MIPS and Fortnox. There was another feature of this move that manifested itself in Europe: the region has less high growth companies than in the US, and we believe the pullback spilled into the "quality" names which we tend to focus on such as Watches of Switzerland and Treatt.

At the end of February Russia invaded Ukraine. We had very limited direct exposure to the region. At the stock level we reduced our exposure to the consumer area, selling names such as Dometic and Global Fashion Group and introducing a short in Kingfisher plc. The cyclical exposure was reduced and we increased some higher conviction shorts in companies whose business models were not able to absorb the inflationary pressures.

Whilst the first quarter's market action was defined by the awareness that the world was entering a persistent phase of inflation, and by Russia's invasion of Ukraine, the direction of equities in the second quarter was led by the response of central banks and the emergence of an ensuing economic slowdown with a meaningful squeeze on consumers' "cost of living." This is something that was compounded by escalating food costs. Unsurprisingly this phenomenon had a catastrophic effect on any consumer-facing stocks, and the malaise then spread to industrial and cyclical stocks.

At the end of the first quarter, in accordance with our risk management policy, we dramatically reduced the net exposure of the Sub-Fund by adding meaningful market index shorts. This took our net down to 25%. This enabled us to preserve capital, especially in June when the Sub-Fund fell by 2.95% in a market down 11.80%. This also allows us the flexibility to instantaneously increase the Sub-Fund's exposure once we feel more positive on markets. At the stock level, we increased the "quality" of the businesses in the portfolio.

We adopted a defensive position going into the third quarter; we wanted to protect the Sub-Fund from any further capital losses and were unclear as to how the economic situation would evolve. During the quarter the Sub-Fund lost -3.93% vs the MSCI Europe Small Cap Index -8.95%. This defensiveness paid off, especially in the bloodbath that was September. Our combination of single stocks and market shorts had reduced our net exposure to approx. 25% and these protected us. We were rewarded for our patience in the short book as several names finally cracked, such as Varta, Cliq Digital, and "concept stocks", CM.com and Ebusco. The long book was more of a curate's egg. Our more defensive bias and focus on quality served us well, especially in September. We have been greatly encouraged by the performance of SES Imagotag, a French firm that produces electronic shelf labels for retailers.

During the fourth quarter the Sub-Fund rose by 7.23% vs the index performance of 10.92%. Given our net long position averaged 33% between October and December we were greatly encouraged by this uptick in performance, achieving two thirds of the market performance with one third of the market net exposure. One could argue that markets bore all the hallmarks of a bear market rally in the quarter, bouncing from very oversold levels, coupled with troughs of investor sentiment and very defensive positioning from nearly all types of investors.

The performance was predominantly driven by the long book. Stolt Nielsen, Do & Co, SES Imagotag, Interpump Group and Keywords Studios were the largest contributors. The Sub-Fund also made money in several short names including Draegerwerk, Societe BIC and Ebusco. In the majority of cases, we remain confident in the strong prospects and value propositions (or business models) of our companies, and haven taken this opportunity to increase our ownership in names such as Watches of Switzerland, MIPS, Treatt and Fortnox. We have great faith in the companies' business model and their managements' ability to navigate these difficult times and believe that the outlook for the businesses has actually improved through the year.

Experience would reiterate this: over the last 15 years this strategy has had its most fruitful periods, both in absolute performance and in alpha generation, coming out of crises, be that after the Global Financial Crisis 2009-11, after the Eurozone Crisis 2012-14, after the Brexit vote 2016-18 or more recently after COVID 2020-21. We may be close to another turning point. Caution is still the byword but the mantra probably changes from "sell the bounces" to "buy the dips". This is reflected in our current positioning where we can still make money without yet being "all in".

Chilton Investment Company, LLC

Collidr Adaptive Global Equity UCITS Fund 2022 Performance Review

The Sub-Fund returned -11.2% in 2022.

2022 was a difficult year for many asset classes, especially equity markets. While equities were strong at the end of 2021, increasing concerns about rising inflation and interest rate hikes made investors nervous in January, pushing down equities. This continued for the rest of the first quarter, exacerbated by Russia's invasion of Ukraine towards the end of February, which increased inflationary concerns.

Despite a small recovery in the second quarter, equity markets continued to sell off for the remainder of the year, with heightened volatility noted. This was a continuation of the concerns that a higher interest rate and higher inflationary environment would have on equity markets. Bond markets also incurred a substantial drawdown over the year, increasing correlations between equity and bond markets. This increased correlation made it more difficult for investors to find protection to insulate from the worst of the drawdowns in what was a severe market correction.

The Sub-Fund uses a quantitative system to direct the level of market exposure taken by the Sub-Fund. This system uses various metrics involving sentiment, technical and volatility factors to adapt to the market conditions.

The Sub-Fund returned -11.2% in 2022, significantly outperforming global equity markets. The Sub-Fund started the year at the higher end of the market exposure, given the strength going into the New Year. However, as markets sold off, the beta was reduced in line with the quantitative process. This meant that the Sub-Fund participated in the initial drawdown of 2022. However, the Sub-Fund beta was quickly reduced towards the lowest levels, which allowed the Sub-Fund to insulate investors from the worst of the market drawdown.

The defensive nature of the stock book also helped to insulate performance. The stock book has a hefty overweight position to the consumer staples sector and is underweight the technology sector, when compared to global equity indices. The portfolio construction is driven by the quantitative screening process as outlined in the Sub-Fund prospectus, and is generally more defensive in nature, which aided the insulation against the severe market correction in 2022.

Going forward, the quantitative system will continue to direct the level of beta taken by the Sub-Fund. In December, as a result of the volatility over the year, the beta exhibited by the Sub-Fund remained at low levels. However, we expect this to increase as the volatility in the market eases. The Sub-Fund will continue to adapt to market conditions to ensure the appropriate level of market exposure is taken to remain in line with the Sub-Funds mandate.

Collidr Asset Management Limited

Collidr Global Growth Strategy UCITS Fund 2022 Performance Review

The Sub-Fund returned -26.72% in 2022.

2022 was a difficult year for many asset classes, especially equity markets. While equities were strong at the end of 2021, increasing concerns about rising inflation and interest rate hikes made investors nervous in January, pushing down equities. This continued for the rest of the first quarter, exacerbated by Russia's invasion of Ukraine towards the end of February, which increased inflationary concerns.

Despite a small recovery in the second quarter, equity markets continued to sell off for the remainder of the year, with heightened volatility noted. This was a continuation of the concerns that a higher interest rate, higher inflationary environment would have on equity markets. Bond markets also incurred a substantial drawdown over the year, increasing correlations between equity and bond markets. This increased correlation made it more difficult for investors to find protection to insulate from the worst of the drawdowns in what was a severe market correction.

The Sub-Fund used a combination of concentrated single name equity positions as well as leveraged and unleveraged index ETF holdings and index futures to provide a return profile that provides enhanced returns and higher volatility than global equity markets. The Sub-Fund used our proprietary quantitative signals to direct the stock positions to invest in. These signals also determined the level of market beta to be taken at all times, adding leverage to increase returns as conditions improve, and removing leverage when conditions deteriorate.

The Sub-Fund started the year with an enhanced market beta, participating in the drawdown in the first quarter. Market beta was subsequently reduced in line with the quantitative signals to closer in line with the market. However, some stock specific and sectoral challenges led the Sub-Fund to have a challenging year, until a compulsory redemption noticed was issued to all shareholders as the Net Asset Value of the Sub-Fund fell below the minimum level required for the Sub-Fund to be efficiently managed in the interests of the investors.

The Sub-Fund terminated on 31 January 2023.

Collidr Asset Management Limited

Cooper Creek Partners North America Long Short Equity UCITS Fund 2022 Performance Review

The Sub-Fund generated a 13.2% return in the second half of 2022 and a 32.3% return for the year. The Sub-Fund averaged 3.4% net exposure in the second half of the year and 6.7% net exposure over the course of the year. We are pleased to report that the Sub-Fund generated both positive absolute returns and strong alpha on each side of the portfolio during 2022. The short side generated a 32.4% return, with 28.1% alpha, and the long side produced a -0.1% return, with 18.1% alpha.

On a last 12-month trailing basis, the Sub-Fund returns have exhibited a beta and correlation to the Russell 2000 of 0.16 and 0.44, respectively.

On a last-36-month trailing basis, the Sub-Fund has generated a 17.0% annualized return with a beta and correlation to the Russell 2000 of -0.02 and -0.05, respectively. The Sub-Fund has averaged 6.2% net long exposure over this period.

Since inception, the Sub-Fund has generated a 13.9% annualized return, with 4.9% average net exposure, while exhibiting a 0.06 beta and 0.12 correlation to the Russell 2000.

In what was an extremely challenging year for the markets, the portfolio continued to exhibit strong downside protection, while generating upside through strong idiosyncratic security selection. In 2022, the Russell 2000 index was down on 52.6% of the trading days, averaging a -1.42% return on the down days. On those same days, the Sub-Fund averaged a -0.05% return. Furthermore, the Sub-Fund generated positive returns on 49.3% of the down days for the Russell 2000 index in 2022.

The second half of the year performance was led by the long side, with five long positions each generating 60 basis points or more, and two of those contributing over 100 basis points to performance. Energy and retail long positions led returns during the second half of the year. For the fiscal year, 4 longs and 8 shorts each contributed 100 basis points or more to the Sub-Fund's performance. Additionally, 11 shorts each contributed between 60 and 100 basis points to the 2022 performance. Notably, despite the market drawdown, our three largest winners were longs: Hudson Technologies ("HDSN"), Scorpio Tankers ("STNG"), and Weatherford International ("WFRD"). While we fully monetized our position in STNG, we continue to hold positions in HDSN and WFRD today, albeit at decreased weightings.

During the year, the largest short contributions came from peak margin stories and one-time events. Additionally, one of these 19 short winners during the year was a special purpose acquisition company or ("SPAC") and we continue to have three SPAC shorts in the portfolio today. Looking forward, the most intriguing shorts are companies with potential leverage issues, and we anticipate several debt maturity issues and covenant violations will drive short returns over the next year. Moreover, we expect two business development corporations ("BDCs") to contribute materially to short returns as they face increasing defaults on their loans to technology companies resulting in precipitous declines of their book values. Additionally, as we focus on the credit metrics of our companies to better understand the potential equity impacts, we have initiated six new shorts in the fourth quarter that have interest expense issues due to their exposure to floating rate debt that should lead to free cash flow and earnings degradation.

Looking back at 2022, we continued our increased trading orientation, utilizing the highest dollar turnover since inception. While dollar turnover has strategically increased by approximately 46% since the end of 2018, this past year it increased further by another 15%.

This increased trading approach, as well as tighter risk management parameters, and a conscious decision to move into and out of positions closer to their catalysts were key contributing factors to our success in 2022. The increased volatility in the markets afforded us the ability to trade around our core positions. This in turn led to an increase in our turnover. From a risk management perspective, we exited positions more quickly, locking in profits when we were correct and cutting losses when we were wrong. Additionally, we adjusted our position sizes in order to stay nimble on the long side and take advantage of market drawdowns on the short side.

This mindset resulted in the Sub-Fund lowering portfolio exposure by approximately 25%, after a 16.7% return in the first half and growing concerns about the quarter two earnings season, valuations, and fear of short squeezes. As we worked our way through the quarter two earnings season, we once again increased gross exposure to normalized levels, initiating several new portfolio positions, some of which we had been working on and monitoring since quarter four 2021. These adjustments, alongside more disciplined risk management, helped generate an additional 13.4% in the second half of the year, culminating in a total return of 32.3% for the year.

Cooper Creek Partners North America Long Short Equity UCITS Fund 2022 Performance Review (continued)

We continue to be excited about the value we are encountering on the long side. While it does not appear that the market has necessarily bottomed or earnings estimates have been reset low enough for 2023 (and maybe 2024), we do expect a more discerning stock market environment, separating winners from losers within sectors and sub-sectors. Moreover, several of our small/mid capitalization under-followed companies are near trough valuation multiples, creating strong opportunities for positive investment returns when catalysts occur. More and more of the management teams and corporate boards we have been interacting with for over two decades recognize this valuation discrepancy and are initiating shareholder friendly initiatives. This is a stark change from the environment of the past decade when most companies held the view that they would simply focus on fundamentals and wait for the market to value the company appropriately rather than take proactive actions. This is a much more conducive environment for our value-based approach and explains why we initiated 25 new long names in quarter four and several new names early in 2023 as well. Sum-of-the-part stories represent the largest exposure in the long portfolio, with 11 of 37 positions. These sum-of-the-parts opportunities consist of spin-offs and break-ups or optionality around unlocking value of a part. Six Flags Entertainment ("SIX"), this quarter's illustrative investment idea, is a turnaround led by a new CEO, with optionality around a value-unlocking split into an operating company and a property company ("OpCo/PropCo").

We are clearly encouraged by our recent performance, but are equally as excited about the current portfolio and the near-term catalysts on both the long and the short side. As volatility persists, our increased trading, alongside enhanced risk management, will continue to enhance our overall returns. As always, we are focused on preserving your capital first and foremost, while capitalizing on the increased opportunity that is available to us in this environment.

We entered January of this year 175.9% gross invested and 12.1% net long.

As of 1 January 2023, we are managing over \$300 million in the Sub-Fund and over \$1 billion firm-wide.

Cooper Creek Partners Management, LLC

Crabel Advanced Trend UCITS Fund 2022 Performance Review

The Sub-Fund finished 2022 with a strong positive return of +23.43%.

After a strong start through the first half of the year, performance turned mixed through the second half. Despite the modest return later in the year, markets continued to exhibit high levels of volatility and turbulence. Much of the market momentum that drove returns early in the year continued into the third quarter. Yields globally continued to surge and the portfolio's short interest rate futures positioning pushed the fixed income sector to strong returns. As a result, every month except July, October, and November recorded a positive attribution in the fixed income sector.

Similarly, with yields rising swiftly in the United States, the US Dollar continued to strengthen into the third quarter. The third quarter proved the largest positive attributing quarter for the foreign exchange sector for the year. While the foreign exchange and fixed income sectors continued to drive the portfolio's returns, the commodities sector did not see a continuation of the bullish environment from earlier in the year. After five consecutive positive trading months for the commodities sector to start the year, commodities posted negative attributions in five of the final seven trading months. Nonetheless commodities ended the year with a strong positive contribution. Overall, commodity markets later in the year exhibited tape-driven price behaviour that lacked multi-week directional follow-through.

Similarly, while the equities sector showed heightened volatility and an overall bearish environment, equities witnessed many pullbacks and reversals that frustrated trend following models. Trading in equities across different geographies exhibited significant return dispersion. The three most difficult markets for the portfolio in the year were all non-US equity indices. The Nikkei 225 Index, which was caught within a large trading range all year proved the most challenging. Similarly, the DAX Index was the second most difficult and the TOPIX the third.

The portfolio pursues diversification not only by timeframe, but also by geography, and diversification beyond the United States modestly disadvantaged the portfolio. While the most negatively impactful equity indices tended to be outside North America, the best performing markets portfolio-wide were sourced globally. While 10 of the 13 strongest contributors were fixed income markets, five were US markets (2-Year Treasury Note, 5-Year Treasury Note, 30-Year Treasury Bond, 10-Year Treasury Note and Ultra 10-Year Treasury Note), and five were European markets (Long Gilt, Euro-OAT French Government Bond, Euro Dollar, German Bund, and German Bobl). The first nine months of the year provided some of the strongest trading opportunities for trend following in some time, and the Sub-Fund portfolio responded with outsized returns through September.

Furthermore, as yields continued to charge higher on inflationary fears, the Sub-Fund's utilization of futures and OTC foreign exchange markets placed the portfolio in a strong position from a cash efficiency perspective. Macro uncertainty all year created tremendous price volatility and dispersion, suggesting the possibility that price movements will be significant into 2023.

For many years prior to 2022, perpetually low interest rates limited the utility of the fixed income sector for the portfolio. With the uptick in volatility in the sector comes a possibly heightened opportunity set. While every other market sector was positive in 2022 for the Sub-Fund, the equities sector stood out as the lone negative attribution. Nonetheless, losses in equities for the year were less than gains in 2021. While market price action late in the year was choppy and often news-driven, if the global economy starts to settle into a dismal recessionary view or a more consistent recovery mindset, the price directionality that might follow could provide strong opportunities in 2023 for the Sub-Fund.

Crabel Capital Management, LLC

Crabel Gemini UCITS Fund 2022 Performance Review

The Sub-Fund finished 2022 with a modest loss of -0.26%.

Inflationary fears and the war in Ukraine proved the most impactful storylines for markets in 2022. The resultant volatility and price directionality produced significant opportunity for directionally oriented strategies within the Sub-Fund. However, tapedriven market price action triggered by news and sharp reactionary market moves created challenges that ultimately produced a modest loss on the year.

Volatility Breakout strategies were the largest beneficiary of higher volatility in 2022. This strategy group recorded its largest single-year return since the inception of the portfolio. The equity indices sector was particularly useful for Volatility Breakout strategies. While the long-term trend was more convoluted in equity indices, the Sub-Fund's focus on an average 10-day hold duration for directional Volatility Breakout strategies allowed it to capture shorter bursts of price dislocation. The year as a whole in equities, particularly in the US, generally featured a bearish environment. However, moves tended to be sharp, with numerous multi-day risk-on reversals.

While choppy conditions are difficult for longer-duration momentum strategies that are not utilised within the Sub-Fund, for the Sub-Fund portfolio they presented as a meaningful opportunity set. The Sub-Fund's positive attribution in the sector differed meaningfully from the trend following community, as equity indices were the most difficult market sector for many trend programs. In addition to equity indices, the fixed income and foreign exchange sectors were also useful for the Volatility Breakout strategy.

As inflationary fears ramped up early in the year, a global rise in yields was accompanied by a sharp paradigm shift in the stock/bond correlation. The resultant price action created meaningful opportunity for the directional elements of the Sub-Fund, but the Factor Timing and Opportunistic strategy categories at times tried to anticipate corrections in the prevailing interest rate trend. However, such corrections rarely materialised over the first 9 months of the year, and strategies in those 2 categories were penalized as a result.

In the foreign exchange sector, the US Dollar strengthened through the first 3 quarters of the year. While directional reversals, particularly in the Japanese Yen and Australian Dollar complexes, challenged the program in the 4th quarter, the strengthening US Dollar did create a useful environment for most of the year. The Japanese Yen was the third largest positive attribution for the portfolio in 2022, illustrating the opportunity set in the sector.

Similarly, the commodities sector showed tremendous price movement and one-way directionality early in the year. Moves in the energy sub-complex within the commodity sector were particularly forceful, and the Sub-Fund's Volatility Breakout strategies were able to pounce on the opportunities presented. Over the 2nd half of the year, however, the bullish momentum stalled, and the commodity sector become increasingly susceptible to sharp price movements driven by news dispatches and economic data releases. While losses in the commodity sector were modest, the net result for the year was a loss in the sector.

A consideration of all 4 strategy categories within the Sub-Fund highlights that Volatility Breakout strategies performed as expected in a higher volatility regime. While Volatility Breakout strategies are eager for higher volatility, the other strategies – Reversal, Factor Timing, and Opportunistic – are designed to offer diversification in other market regimes. Given the turbulence created, particularly early in the year, by large macro shifts, including in the relationship between equity indices and fixed income, the Sub-Fund traded to a negative attribution in each of the three other strategy categories.

The result for 2022 was disappointing, but the year afforded a tremendously useful environment for additional research and development. While the core philosophy of the Sub-Fund remains firmly unchanged, improvements have been made across all strategies that lend increased optimism for the portfolio headed into 2023. Further, with macro drivers, including continued uncertainty around the inflationary environment and the Ukrainian conflict, very much in play, high levels of volatility may well persist. These considerations suggest the possibility of heightened opportunity for the portfolio heading into the new year.

Crabel Capital Management, LLC

Descartes Alternative Credit UCITS Fund 2022 Performance Review

Overview 2022

The Collateralised Loan Obligations ("CLO") market, along with all credit markets, faced massive headwinds in 2022 with credit spreads widening strongly by 300 basis points to 500 basis points, depending on the ratings of the tranches concerned. As a result, the Sub-Fund performed negatively by 8.7% in total (Euro Institutional Founder class), which is a relatively satisfactory outcome when compared to a large number of high yield credit funds.

This resilience can be explained by, on the one hand, the floating rate nature of our asset class, and on the other hand, the fact that we started the year with a defensive portfolio, having nearly 20% in cash and AAA rated assets throughout the year, and a rather short duration on our BBB and BB mezzanine tranches exposure.

Our portfolio turnover was rather limited and we used some market technical up moves to lighten gradually our B rated tranches and some long dated BB exposures to rebalance in either AAA or BBB rated tranches, depending on the quality of the offered assets and market momentum. Our portfolio risk profile stayed conservatively positioned during the year, maintaining over 30% in investment grade assets (including cash) vs our minimum guideline of 20% and around 80% in assets rated BB or above vs our minimum guideline of 70%.

Our asset under management ("AUM"), excluding mark to market adjustments, has been relatively stable, illustrating the long term approach of our clients invested in the Sub-Fund and the confidence that mezzanine tranches are extremely protected by the over collateralisation features of the CLO financing structure, in addition to the expertise of the selected CLO managers who have demonstrated their agility and ability to navigate through volatile markets and credit market down cycles.

| I madii | tutio nal | Ea una | ler Class |
|---------|-----------|--------|-----------|
| | | | |

| | YTD 19* | FY20 | FY21 | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sept | Oct | Nov | Dec | YTD 22 |
|-----|---------|-------|-------|-------|--------|--------|-------|--------|--------|--------|-------|--------|--------|-------|-------|--------|
| EUR | 4,06% | 4,37% | 6,83% | 0,61% | -0,43% | -1,81% | 0,39% | -6,63% | -2,94% | -1,56% | 4,31% | -4,60% | -0,36% | 2,19% | 2,20% | -8,77% |
| USD | 6,30% | 6,42% | 7,62% | 0,63% | -0,40% | -1,75% | 0,43% | -6,56% | -2,74% | -1,33% | 4,47% | -4,42% | -0,19% | 2,43% | 2,55% | -7,15% |
| CHF | 3,50% | 3,94% | 6,52% | 0,61% | -0,47% | -1,83% | 0,38% | -6,63% | -2,91% | -1,52% | 4,31% | -4,63% | -0,44% | 2,11% | 2,00% | -9,13% |

Perspectives 2023

For 2023, we believe most of the bad news on the likely recession risk (which we believe will be a shallow one if it happens), a wave of loan rating downgrades and a slight pick-up in defaults, are already priced in the CLO mezzanine tranches. However, our portfolio positioning remains prudent in early 2023 as we expect credit markets to remain volatile until there is a clarification on what will be the European Central Bank ("ECB") terminal rate and how far the economic slowdown will go this year.

We do not expect the default rate to move significantly and anticipate the constant default rate ("CDR") to stay below 1% within CLO loan portfolios vs 0.15% today, considering the corporate healthy balance sheet and the low maturity profile of European senior loans at 10% over 2023 and 2024.

We are going to focus our attention mainly on the average rating of CLO portfolios, in particular the CCC bucket which should move higher vs the current 3.75%, but with a large and increasing dispersion between the conservative and more aggressive CLO managers. Our objective is to concentrate our portfolio on the former and not the latter. In that respect, we will be using our ammunition carefully to add high quality assets, probably more in the investment grade space, as the yield to maturity is getting quite attractive when taking into account the upward Euribor forward curve.

Cartesia SAS

Disciplined Alpha U.S. Long Short UCITS Fund 2022 Performance Review

The Sub-Fund generated a net return from 31 December 2021, through 31 December 2022, of +10.82%.

From a gross return sector perspective, Health Care, Consumer Discretionary and Information Technology contributed +7.29%, +2.22% and +2.11% to performance respectively. Industrials, Energy and Materials detracted -1.75%, -0.84% and -0.35% from performance respectively.

It is notable that the strategy has returned +32.08% in 2021, during a positive year for the overall equity market, yet also returned another +10.82% in 2022, during the recent significant equity market decline.

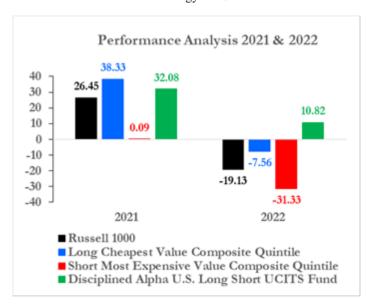

Two of the four unique attributes of the strategy are relevant to explaining how this was accomplished. First, our Regime Model has been in Value Regime since the end of March 2020. When our Regime Model is in Value Regime, the largest weight in the overall stock selection model is our Value Composite.

Second, over the years, we have met with over 1,000 company managements and fundamental analysts. The fundamental insights gained from these meetings were then tested very rigorously, and unique Industry Group based valuation models were built. Price to Book, for instance, is used in some more mature Industry Groups, while other more dynamic valuation metrics are used in other Industry Groups. When these various Industry Group based valuation models are combined, an overall Value Composite is created.

When the Regime Model is in Value Regime, going Long the Cheapest Quintile of the Value Composite and going Short the Most Expensive Quintile of the Value Composite is a significant contributor to the overall strategy return.

In the chart below, the performance for the 2021 calendar year is shown in the first four columns. The performance for the 2022 calendar year is shown in the second four columns. The return for the overall Russell 1000 is shown in black. The return generated by going Long the Cheapest Quintile of the Value Composite is shown in blue. The return generated by going Short the Most Expensive Quintile of the Value Composite is shown in red. The net return of Sub-Fund is shown in green.

The net return of the Sub-Fund is significantly, but not completely, explained by the difference between the blue and red bars. The reasons for this include the fact that there are other factors in the stock selection model, and that the strategy also has a net long exposure. The net long exposure, for instance, would have contributed to the total return of the strategy in 2021, but detracted from the total return of the strategy in 2022.

Outlook and Strategy

In June, 2021, we hosted a webinar on the many reasons why we expect Value stocks to outperform Growth stocks in the next 12 months (replay link: https://www.disciplinedalpha.com/webinar-value-shift-june-2021 to unmute, click on the musical notes in the bottom right corner of the slides).

Disciplined Alpha U.S. Long Short UCITS Fund 2022 Performance Review (continued)

As has also been well documented by others, Growth stocks outperformed Value stocks for four years through 2020. The webinar, however, makes the case that the market that most closely resembles the four years ending in 2020 is the four years known as the Internet Bubble that ended in February 2000.

While some investors might look at the return of the Disciplined Alpha U.S. Long Short UCITS Fund and conclude that they missed the opportunity, as discussed in the webinar, and for similar reasons today, our outlook is that Value stocks will continue to significantly outperform Growth stocks and our strategy is well positioned to take advantage of this outperformance.

Disciplined Alpha, LLC

DUNN WMA Institutional UCITS Fund 2022 Performance Review

The Sub-Fund was up 35.64% gross (before fees and expenses) for 2022. Gains made in interest rates, energies, currencies and agriculturals outweighed losses in stock indices, metals and volatility. A brief analysis of portfolio risk targeting, attribution and positioning on a sector-by-sector basis follows below:

Value at Risk ("VaR"): the Sub-Fund entered 2022 targeting a monthly VaR (at the 99% confidence level) of 8.5%, materially above the expected long-term average of 7.5%. Exposure increased in the latter half of the first quarter as increasing signal strengths outweighed increasing volatility and correlations of the portfolio positions, with the Sub-Fund's monthly VaR peaking in early March at 9.8%. From mid-March through the second quarter, VaR targeting steadily ratcheted down as trend strengths weakened and, in some cases, reversed. Declining momentum combined with a sustained level of heightened volatility and slightly reduced correlations brought the portfolio's monthly VaR down to a YTD low of 6.6% by the end of June. Overall exposure expanded again during the first half of the third quarter, as the strengthening environment in some sectors (fixed income, currencies) helped push the VaR above 8.5% in August. The models then detected the rising volatility and correlations and trimmed positions accordingly by the end of the quarter, targeting 6.9%. Increased positioning during the fourth quarter did not follow through as lower US inflation data lowered expectations for future Fed rate hikes. The models adjusted positions by year-end with the portfolio targeting VaR at 8.6%.

DUNN WMA Institutional UCITS Fund 2022 Performance Review (continued)

Energies (Portfolio Allocation: 12%): Coming into the year, the Sub-Fund held long positions across the entire energy sector. Energy prices continued higher in January as the outlook for Omicron improved, which helped solidify projected energy demand. The focus in the sector continued to be on Iran's nuclear negotiations and the intensification of the Russia-Ukraine standoff. Energies moved higher again on the unfortunate reality that Russia invaded Ukraine in late February. Prices peaked during early March as Russian energy was boycotted by much of the West. Energy prices continued higher into the second quarter as the production outlook remained tight for the near term. COVID-19 shutdowns in China remained a consistent concern which kept volatility elevated in the second quarter. Markets began to focus on recession fears on a global level which ultimately helped cap energy prices by mid-June. The Sub-Fund's models remained with modest long positions in the energy sector at mid-year. During the third quarter, prices retreated during the first half of the quarter due to several key factors. Weaker global demand due to COVID-19 lockdowns in China, unprecedented releases of crude oil from the US Strategic Petroleum Reserve, and a stronger US Dollar all contributed to lower energy prices. Despite the weakness in energies during the quarter, the Sub-Fund's models stayed with long positioning (albeit smaller sized) and ended the third quarter long all energy markets. Prices continued to look for direction in the fourth quarter as covid concerns in China and the Organisation of the Petroleum Countries ("OPEC's") forecast for lower demand were the focus. The models trimmed long positions further into year-end. For the year, the energy sector was up 11.02% led by long positions in Heating Oil and RBOB gasoline.

Interest Rates (Portfolio Allocation: 9% Short-End, 15% Long-End): the Sub-Fund's portfolio came into 2022 with short positions across most of the yield curve. As worry from the Omicron variant began to fade early in the first quarter, the market focused on global inflation. The Federal Reserve ("Fed") held rates steady in January but announced that with current inflation levels (which they stopped describing as "transitory") and a strong labor market, they would soon raise the target for the Fed Funds Rate. In early February, the Bank of England ("BOE") raised its bank rate by 25 basis points, the second time in as many months. The Sub-Fund had transitioned to short positions in US Bonds and Japanese Government Bonds ("JGBs") during February as bond prices made another leg lower. By mid-quarter, the market had shifted its attention to the expectation that Russia would soon invade Ukraine. Bond markets bottomed on this expectation and rallied on the news when the invasion became reality in late February. The Sub-Fund remained predominantly short and flipped its last long in the Australian 10-year notes by mid-March. Weakness in the sector continued into the second quarter as higher interest rates remained in play for many countries globally. The Fed raised rates twice in the second quarter, as expected, by 50 and 75 basis points at the May and June meetings, respectively. On a global level there were 75 rate increases by central banks during the second quarter of 2022. Fixed income markets bottomed in mid-June as recession fears took hold placing a temporary cap on yields. Positioning remained steady in the second quarter as the program ended the first half of the year with short positions across the entire sector. Bond markets remained firm during the first month of the third quarter as focus was on a possible global slowdown as China was experiencing covid lockdowns and investors calculated that a Fed pivot could be on the horizon. Fixed income prices peaked early in August as inflation continued to run hot globally. The BOE raised rates at its meeting early in the month, which helped set the tone for higher rates to come. The Fed joined by raising its Fed Funds rate in September, and fixed income markets moved lower. Bonds continued lower early in the fourth quarter but were able to find a bottom mid-quarter as the focus was centered on lower economic growth globally. Dovish sentiment was also conveyed by the Federal Open Market Committee the ("FOMC") minutes as members saw smaller rate hikes soon. Despite the year-end short covering in bonds, the Sub-Fund exploited significant trending activity for the year with the program experiencing a gross attribution of 12.90% in short-term interest rates, led by Euribor, and 11.21% in long-term interest rates, led by the Euro Bund and Bobl.

Agriculturals (Portfolio Allocation: 21%): Coming into the year, the Sub-Fund was positioned long in most markets in the agricultural sector, except for short positions in Live Cattle, Cocoa, and Soymeal. Commodity prices were somewhat subdued early in the first quarter as the focus was on the outcome of the Omicron variant, but moved higher by mid-quarter as focus shifted to inflation. The Russian invasion of Ukraine further increased price pressure as supply disruption concerns reverberated throughout many commodity markets. The Sub-Fund transitioned to small, long positions in Soymeal and Cocoa in mid-to-late of the first quarter as trends in those markets reversed. Grain prices trended higher into the second quarter while softs and meats generally looked for direction. The Sub-Fund transitioned to a small, short position in Sugar early in the second quarter as prices trended lower. As agricultural prices softened late in the second quarter with growing concern for global economic growth, the Sub-Fund transitioned to short positions in Wheat and Cocoa. A stronger trending US Dollar provided a continuous headwind for commodity prices during the third quarter. The program's models did not detect any increased trending behavior during the third quarter and stayed the course with most of the agricultural positions. During the fourth quarter, recession fear rippled through most markets and the Sub-Fund's models exited long positions in Lean Hogs and Coffee. The Sub-Fund transitioned to a long position in Sugar as prices moved higher late in November-December. For the year, the sector generated a gross attribution of 1.50%, with positive contributions led by the Soy Complex, Cotton, and Corn, and negative contributions primarily coming from Livestock, Coffee, and Sugar positions.

DUNN WMA Institutional UCITS Fund 2022 Performance Review (continued)

Metals (Portfolio Allocation: 8%): the Sub-Fund added Aluminum to its metals sector in January 2022. The program began the year with small, long positions in Gold and Copper, and a small, short position in Silver. It also initiated a moderate, long position in Aluminum early in the quarter. Early in January metals prices were held in check over concerns of the Omicron outbreak that began late 2021. As that fear subsided in late January, increased inflation expectations helped rally metals prices into mid-quarter. Metals prices continued higher over the conflict in Ukraine as the Sub-Fund transitioned from its short Silver position to a long position by the end of February. Prices remained firm into early March, then went into a consolidation phase into quarter-end with the models slightly decreasing exposure. Prices found little support in the second quarter as fears of higher rates due to high inflation and talk of global economic slowdown helped drive prices lower. The Sub-Fund's models shifted to short positions in Copper and Silver by mid-April, soon followed by a short Aluminum position later in the quarter. Metals prices drifted lower for much of the third quarter as markets were concerned about declining global growth, a strong US Dollar, and expectations of higher interest rates. The models added to the portfolio's short Silver and Copper positions during the quarter while looking for direction in the Gold and Aluminum markets. The system ultimately switched to all short positions by the end of the third quarter. Global recession fear and concerns of central bank pivots gave life to metals prices in the fourth quarter. The Sub-Fund transitioned to a long Silver position by late in the quarter while holding short the rest of the sector. The Sub-Fund added platinum to the portfolio in December and held a long position at year-end. For the year, the sector had a gross loss of 0.18% with the Aluminum short position unable to offset losses in the rest of the sector.

Currencies (Portfolio Allocation: 12%): the Sub-Fund held short positions in most currencies versus the US Dollar coming into 2022, except for long positions in Canadian Dollar and Mexican Peso. As in 2021, the Dollar found a base early in the year as inflation expectations provided support. The Dollar also experienced a flight to quality move mid-first quarter as the standoff between Russia and Ukraine intensified. The Sub-Fund's models transitioned to a small, short position in the Canadian Dollar by the end of February, while at the same time lightening the rest of the currency positions due to increased volatility. The Dollar remained on its upward trend into the second quarter supported by the Fed's rate hike in March. Expectations for future interest rate hikes were firmly in place as inflation remained strong. The Sub-Fund added to its short currency positions into mid-quarter as the Fed raised interest rates in May and June. The Sub-Fund's models lightened up slightly going into the end of the second quarter, holding short all currencies except for a moderate long position in Mexican Peso. The US Dollar moved slightly lower during July as uncertainty about global growth and higher interest rates were the focus. With higher inflation reports taking over by mid-third quarter, the Dollar surged again on expected rate hikes in coming central bank meetings. The models responded with increased positioning during August and September. Dollar highs remained in place early in the fourth quarter as concern for global growth and lower rate hikes going forward by the Fed put the Dollar on the defensive. The Fed hiked rates in November and December as expected but expectations of smaller hikes going forward kept a lid on any Dollar strength. The models stayed with similar positioning throughout the fourth quarter with short positions in most currencies versus the Dollar except for a long Mexican Peso position. The program generated a gross return of 4.73% from currencies in 2022, with Yen, British Pound, and Euro as the largest contributors offsetting losses in Australian and Canadian Dollars.

Stock Indices (Portfolio Allocation: 19%): the Sub-Fund entered 2022 long all stock indices, except for a short Hang Seng position. Equity prices were pressured early in the first quarter by worries over the Omicron variant slowing economies globally. The Sub-Fund moved from small, long positions in Nikkei and TOPIX to small, short positions early in the quarter. As Omicron worries faded, higher interest rate expectations fueled by inflation and tension between Russia and Ukraine took over. The Sub-Fund's models lightened most of the long index positions by the end of February as the expectation of invasion became reality. Equity prices found a temporary bottom in early March as a diplomatic solution to the Russia-Ukraine conflict was being sought. Heading into the second quarter, stock index markets remained on the defensive as the focus remained on inflation, war, and covid. Price trends continued on a lower trajectory as expectations remained for higher rates in the near term to quell rising inflation. The Fed raised rates in May and June meetings as expected. The Japanese stock indices and FTSE had outperformed on a relative basis to other global indices as of mid-year. The Sub-Fund moved to small, long positions in Japan by mid-quarter while it also moved to small, short positions in US and some European markets late in the second quarter. Prices found a base during the first half of the third quarter as participants thought economic uncertainty would have the central bankers pivot from higher interest rates sooner than later. As the quarter progressed, inflation continued to run hot and stock prices soon again moved lower. Talk by the Fed remained hawkish in nature and indices went back on the defensive for the remainder of the quarter. Rate hikes by multiple G7 members became reality by mid-to-late third quarter, ending any talk of a pivot for the time being. Early in the fourth quarter, stock indices found a base from recent third quarter lows as markets focused on dovish central bank talk. Market expectations of lower rate increases may suggest the rate hike cycle was closer to its end. The Sub-Fund transitioned out of short positions in Dax and Euro Stoxx by mid-fourth quarter leaving the program short primarily the US and Hang Seng indices while long the rest of the sector. Positioning remained the same at year-end with the stock index sector realizing a gross loss of 5.51%.

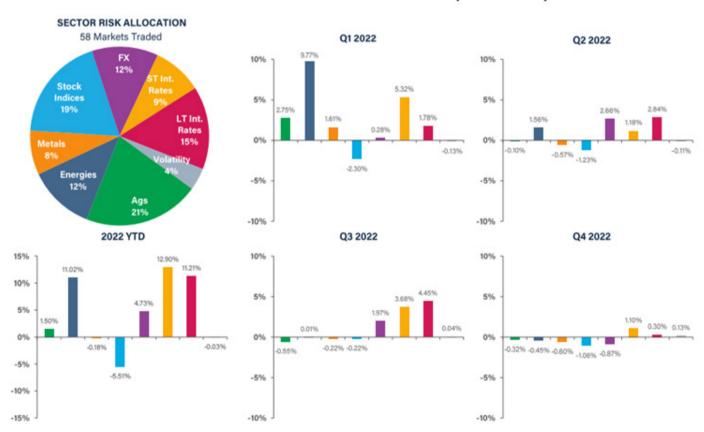

DUNN WMA Institutional UCITS Fund 2022 Performance Review (continued)

Volatility Index ("VIX") (Portfolio Allocation: 4%): The program entered 2022 flat on the VIX contract. The models moved to a small, long VIX exposure early in the first quarter as equity prices were under pressure due to Omicron concerns. Markets rebounded late January into mid-quarter and the model's positioning moved to a short VIX exposure. Market pricing was uneven for most of the quarter as tension between Russia and Ukraine kept equity prices in a general downward trend. The models kept overall VIX exposure on the short side for the remainder of the quarter but were unable to capture any significant moves. The program moved to a long bias in early April detecting weakness in equity markets early in the second quarter. However, equity markets stabilized somewhat by mid-quarter as concerns for a possible recession brought long term-rate hikes into question. The models moved back to a short VIX bias by mid-quarter and held this posture into the third quarter. Market uncertainty with Covid lockdowns in China, higher inflation, and tighter central bank monetary policy kept the equity markets in a holding pattern for much of the third quarter. The models moved from long back to short for the quarter end with small, long positions in the VIX producing small gains in July and August. With equity prices moving higher for most of the fourth quarter, the volatility program traded positions from the long side for the rest of the year. The positioning was favorable as the sector returned a gross attribution of 0.13% for the fourth quarter and -0.03% for 2022.

DUNN Capital Management, LLC

Giano UCITS Fund 2022 Performance Review

The Sub-Fund's performance in 2022 was down 18.0% vs the Eurostoxx 600 down 12.9%.

During the year we continued to focus on developing our new tools and maintaining our legacy positions.

2022 was an awful year for financial markets, with the S&P 500 seeing its worst annual performance since 2008, just as global bond markets had their worst performance in many decades. The biggest driver of this was much stronger than expected inflation that led central banks to embark on a very aggressive tightening cycle.

Outlook for 2023

As we enter 2023, monetary policy remains hawkish as the Fed remains concerned about a very strong labour market and continues to communicate the need to weaken it.

Investors' positioning seems to have become substantially neutral according to the latest surveys and indicators.

On the earnings side, the ratio of Orders to Inventories continues to anticipate a very significant reduction of industrial earnings over the next six to nine months. Instead there is a significant risk for earnings compared to expectations which is greatest since 2008.

The good news for Europe is that Natural gas market prices have collapsed and are now lower than when the war in Ukraine started.

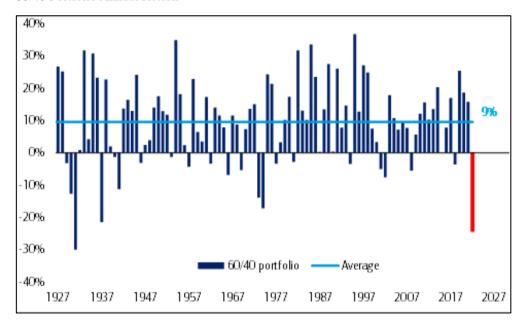

The Sub-Fund terminated on 21 April 2023.

Quay Partners Investments (UK), LLP

Invenomic US Equity Long/Short UCITS Fund 2022 Performance Review

2022 proved to be a very challenging year for both equities and bonds. These market conditions created an exceptionally difficult environment for asset allocation. This is evident when looking at the return of a traditional 60/40 portfolio, which had its worst return since the early 1920s, falling 24.4%. We are pleased with the results that we produced for our investors last year, particularly in the context of these market conditions. The Sub-Fund returned 38.83% during 2022. We believe one of the only ways to produce differentiated returns in a year like 2022 was through an active short portfolio. In past monthly commentaries, we have spoken at length about our view that effectively shorting stocks is necessary to navigate volatile markets. This could not have proven truer in 2022.

60/40 Portfolio Annual Return

Source: Bank of America

Our short portfolio was responsible for our strong results last year, contributing 46% to the Sub-Fund's performance on a gross basis. Shorts in the Information Technology and Consumer Discretionary sectors were the strongest performers, each contributing approximately 11%. We generated profits in all 11 sectors we shorted during the year and generated gains in more than 80% of those names. Our top ten contributors added 8.5% to the Sub-Fund's performance during 2022 with the top name adding approximately 2%.

Our long portfolio detracted approximately 7% from performance during the year. With equity markets down substantially more for the year, we view this as a favorable outcome. On the long side, we generated gains in three sectors during the year: Energy (3%), Health Care (1%) and Financials (1%). We produced losses in the other eight sectors we invested in, with Communication Services (-6%) and Consumer Discretionary (-2%) detracting the most. Our top ten long detractors cost the Sub-Fund approximately 10% during 2022. All contribution numbers referenced above are approximate and presented gross of fees.

While it is important to understand how we got here, it is more important to talk about how the portfolio is set up for 2023 and where we are going. We sit at 30.6% net long, with the long portfolio at 107.2% and the short portfolio at -76.7%. The table below summarizes how our portfolio looks from a sector perspective.

Invenomic US Equity Long/Short UCITS Fund 2022 Performance Review (continued)

| Sector Allocation (%) | Long | Short | Net | |
|------------------------|--------|--------|-------|--|
| Communication Services | 12.86 | -0.18 | 12.68 | |
| Consumer Discretionary | 19.42 | -15.64 | 3.78 | |
| Consumer Staples | 0.95 | -2.63 | -1.68 | |
| Energy | 4.83 | -1.21 | 3.62 | |
| Financials | 2.86 | -9.58 | -6.72 | |
| Healthcare | 11.05 | -8.63 | 2.42 | |
| Industrials | 14.74 | -17.25 | -2.51 | |
| Information Technology | 34.08 | -17.9 | 16.18 | |
| Materials | 5.98 | -2.75 | 3.23 | |
| Real Estate | 0.47 | -0.88 | -0.41 | |
| Utilities | 0 | 0 | 0 | |
| Total | 107.24 | -76.67 | 30.57 | |

Our biggest net sector exposure is in Information Technology, at 16.2%. As is the case with all our sector exposures, the large Information Technology positioning is a result of our stock selection process and not a top-down call or a shift in our investment philosophy. Our strategy brings us to where the opportunities lie. A deeper look into our technology exposure shows that the ideas that we are finding are very much "value" in nature. The vast majority of our investments in Technology Longs are strong free cash flow generating companies, producing free cash flow of greater than 5% of their share price. On the flipside, at -17.9%, our exposure in Information Technology is also our largest sector short exposure. These companies for the most part have low or negative free cash flow. The volatility in the sector over the last year created substantial opportunities for us, which we can take advantage of given our diversified portfolio and our ability to invest long and short. We do not expect this positioning to remain static in 2023. As stocks hit price targets, we will naturally move on and redeploy that capital into new, more attractive, opportunities. All exposure numbers referenced above are as of the end of December.

We expect 2023 to be another challenging year for equity investors, with volatility remaining elevated. We can see an environment where inflation cools and the Federal Reserve stops raising interest rates, yet the risk of a recession remains extremely high. Either one of these outcomes would likely dramatically change the risk dynamic in the market. That said, we trust our investment process to point us in the right direction.

Invenomic Capital Management LP

Ironshield Credit Fund 2022 Performance Review

2022 saw performance broadly flat to Pan-European High Yield down 14% on an absolute basis, but performance since inception in 2020 remains very strong on an absolute and relative basis, with a cumulative return of +54% net of fees. Dispersion within credit markets fell significantly in 2022 as severe macro headwinds led to a broad based sell off across asset classes, sectors and geographies. This indiscriminate repricing of credits impacted our fundamental based strategy as idiosyncratic credit stories were outweighed by the broader macro global weakness.

The majority of the period was dominated by the same key themes including Russia's invasion of Ukraine, multi-decade high inflationary pressures, accelerated central bank rate hiking cycles, a sharp increase in risk free rates and a withdrawal of the post-Covid fiscal support. Russia's invasion of Ukraine led to a large complex of sanctions from Western governments which contributed to a huge spike in energy prices and resulted in a number of multi-national companies withdrawing their presence from Russia. Given many European countries are heavily reliant on Russian energy supply, there was a significant impact on a range of corporate credits. Labour markets remain tight with unemployment levels hitting record lows, and with central banks acknowledging that inflation is likely to persist, there was increasingly hawkish rhetoric from a number of central banks: the Fed accelerated its pace of tightening, the Bank of England started raising rates and the ECB announced an end to its asset purchase programs and an increase in rates.

Against this backdrop we repositioned the portfolio significantly across the year, bringing net exposure down from 110% at the start of 2022, to 32% halfway through the year and a net short position by year end. This was done by a combination of adding select alpha short positions with strong near-term catalysts, and the natural run off of some long positions including via cash distributions and tenders. We had been moving to build up our cash position in the expectation that there would be a plethora of attractive risk/reward credit situations to deploy into produced by the overall change in financial conditions throughout 2022. On an absolute basis, one credit in particular dragged on performance throughout the year - a telecom company where the near-term, asset sale events occurred as we predicted, allowing the company to finally emerge from a 6-year bankruptcy process. But as the capital markets turned down severely in June, the disposal proceeds from one of the assets was reduced and the additional financing the company would require became more uncertain because of general capital markets conditions. The position was fully exited during the first half of the year.

The end of 2022 saw a more optimistic outlook creep into markets as early signs of peaking inflation led markets to scale down the expected rate of hiking from central banks, and the hope of a softer landing. Whilst there remains a large part of European High Yield that would struggle to refinance at current rates, there is also value to be found with 10%+ yields for senior parts of capital structures in fundamentally solid opportunities. As we look forward into 2023, given the market environment, we expect to be adding to our long positions, whilst continuing to take advantage of a higher number of event driven credit situations to provide both alpha long and alpha short positions in the portfolio and drive performance on both an absolute and relative basis.

Ironshield Capital Management, LLP

Ironshield High Yield Alpha Fund 2022 Performance Review

In August 2022 Ironshield launched a new UCITS vehicle in the credit space, offering daily liquidity. The investment team's objective is to achieve absolute returns by investing in a diversified portfolio of long and short European corporate credits hedged with single names and index shorts to create a low net exposure credit fund. The Sub-Fund targets low volatility across market cycles and is designed to be part of a core fixed income allocation. The investment process involves a dynamic allocation between three areas of return generation: capital appreciation, carry and special situations. Credit selection is based on a holistic approach capturing mispricing opportunities driven by fundamentals, the macro environment, market technicals and relative value. The portfolio is focused on actively traded bonds, credit default swaps, total return swaps and interest rate derivatives. The Sub-Fund returned -0.02% from inception to 31 December 2022.

The Sub-Fund was launched in a period of volatility in markets, including Russia's invasion of Ukraine, multi-decade high inflationary pressures, accelerated central bank rate hiking cycles, a sharp increase in risk free rates and a withdrawal of the post-Covid fiscal support. Russia's invasion of Ukraine led to a large complex of sanctions from Western governments which contributed to a huge spike in energy prices and resulted in a number of multinational companies withdrawing their presence from Russia. Given many European countries are heavily reliant on Russian energy supply, there was a significant impact on a range of corporate credits. Labour markets remain tight with unemployment levels hitting record lows, and with central banks acknowledging that inflation is likely to persist there was increasingly hawkish rhetoric from a number of central banks: the Fed accelerated its pace of tightening, the Bank of England ("BOE") started raising rates and the European Central Bank (the "ECB") announced an end to the asset purchases programs, and an increase in rates.

Since inception the Sub-Fund has exhibited its key characteristics by offering less volatility compared to the broader high yield market, in particular minimising sharp drawdowns and offering fully hedged credit exposure, whilst offering a return in line with IBOXX EUR Liquid High Yield.

The end of 2022 saw a more optimistic outlook creep into markets as early signs of peaking inflation led markets to scale down the expected rate of hiking from central banks, and the hope of a softer landing. Whilst there remains a large part of European High Yield that would struggle to refinance at current rates, there is also value to be found with 8%+ yields for senior parts of capital structures in fundamentally solid opportunities. As we look forward into 2023, given the market environment, the portfolio will be constructed to offer an attractive yield on a fully hedged basis, whilst continuing to take advantage of credit situations to provide both alpha long and alpha short positions in the portfolio and drive performance on both an absolute and relative basis.

Ironshield Capital Management, LLP

Kayne Anderson Renewable Infrastructure UCITS Fund 2022 Performance Review

The Sub-Fund launched on 9 February 2022 and returned -5.15% (based on the USD Founder Class A Accumulating Shares) through 31 December 2022. The headwinds of market volatility driven by Russia's invasion of Ukraine, its impact on energy prices and ensuing inflation, and worries about a downturn in global economies, took their toll on equity and credit markets in 2022.

The tailwinds previously driving much of the growth in renewable energy infrastructure development, such as the declining cost of renewable energy and net zero carbon emission commitments by corporations and governments, were significantly bolstered in 2022. Concerns related to energy security and energy independence following Russia's invasion of Ukraine and curtailment of gas supplies led European policymakers to explore ways to accelerate renewable energy project permitting and development. The most important development of 2022 was the passage of the Inflation Reduction Act in the United States, which will have major implications for domestic clean energy development for the next 10-20 years. The legislation provides powerful incentives for the development of renewable energy infrastructure (wind, solar, battery, etc.) as well as emerging technologies like green hydrogen, carbon capture, and storage. The incentives it provides for the use of domestic clean energy components have already sparked an industrial manufacturing renaissance of sorts in the United States, with seemingly weekly announcements for new manufacturing plants to make solar panels, batteries, inverters and other components domestically.

Access to secure and abundant energy sources such as wind and solar will continue to spur investment in renewable energy infrastructure. Early estimates suggest 2022 was likely another record year for renewable energy deployment. Bloomberg New Energy Finance ("BNEF") estimates that global investment in low-carbon energy transition totaled \$1.1 trillion in 2022 – the highest ever. They note that this was likely the first year in history that this investment reached parity with capital deployed in fossil fuel energy.

While final numbers are not yet available for December, global corporations' procurement of power purchase agreements ("PPAs") was on pace to rival record 2021 levels. Signings of PPA contracts by corporates are a leading indicator of future projects that will be deployed in coming years, helping to provide good visibility on industry growth through mid-decade. Bloomberg estimates that the ~390 major global companies that have committed to the RE100, a global corporate initiative bringing together businesses committed to 100% renewable energy sourcing, will need to more than double the amount of renewable energy they are buying today by 2030 under their existing commitments. This does not include additional companies joining the RE100 initiative or demand from utilities, governments, and non-corporate buyers.

Performance and Distributions

Amid the challenging sector and market environment in 2022, our strongest performers included (1) renewable energy companies with higher exposure to rising market power prices, (2) early or obvious beneficiaries of the US Inflation Reduction Act passage or (3) companies taken private (or subject to takeout rumors) at significant premiums compared to depressed public market valuations.

Our weakest performance contributors were companies that were negatively impacted by the higher risk premium in Europe amid the energy crisis and policy intervention, or renewable infrastructure investments in North America with higher cash yields that saw pressure amid the rising interest rate environment.

Portfolio Positioning and Outlook

In many ways, fiscal 2022 ushered in a "long forgotten" era for financial markets. Inflation rose to levels not seen since the early 1980s and remains stubbornly high. The Federal Reserve has engaged in a very aggressive tightening cycle and short-term interest rates rose to levels not seen in decades. As investors digested the potential for a global recession, SPACs and NFTs ceded market share to "old economy" stocks like Exxon Mobil and Berkshire Hathaway. Unsettled capital markets and heightened geopolitical risk drove a flight to investments with defensive attributes, and many of the Sub-Fund's portfolio investments have benefited from this shift in investor sentiment.

Throughout the year, we shifted more of the Sub-Fund towards companies exposed to renewable energy development in the United States, via US and foreign companies that have large US renewables businesses. The passage of the Inflation Reduction Act (IRA) in the United States is a game-changer for the #2 global renewables market. And we believe many of our largest Sub-Fund holdings will be significant beneficiaries of this legislation, setting them up for accelerated growth with improved visibility over the next few years.

Kayne Anderson Renewable Infrastructure UCITS Fund 2022 Performance Review (continued)

Portfolio Positioning and Outlook (continued)

We see a very constructive picture beginning to form for 2023. We believe this is a year when companies will begin outlining their plans under the Inflation Reduction Act in more detail, with an upward bias to forecasts in 2024/2025 and beyond – potentially in sharp contrast to many other sectors if global economies tip into recession. Headwinds related to supply chain and cost inflation are notably abating, though we are not completely out of the woods. Regulatory and political risks in Europe are cooling, with recent warm temperatures significantly reducing European gas prices and improving storage levels. Many of the interventionist policies that worried renewable energy investors in the EU last year have now been enacted, modified, or scrapped. With the "rules of the game" now better defined, the risk premium is easing. Europe and Canada are also mulling a response to IRA in the US, creating the potential for an "arms race" in renewable incentives. Amid this backdrop, the Sub-Fund has the potential for some exciting investment opportunities ahead.

Domestic legislation like the landmark Inflation Reduction Act and the European Commission's REPowerEU plan – replete with tax credit extensions, regional incentives, and other policy support mechanisms – create an extremely attractive commercial backdrop for new renewable infrastructure and other energy transition related investments. Commercial traction in emerging energy subsectors continues to accelerate, and we believe renewable energy infrastructure companies are just beginning to capitalize on the multi-decade global decarbonization megatrend.

The energy infrastructure industry today – in its themes, corporate structure, and even its jargon – is fundamentally different than a decade ago. Our diverse team of industry experts embraces this evolution and is well-positioned to capitalize on opportunities emerging from the energy transition. We do this with decades of experience and a deep appreciation for, and understanding of, business cycles and the dangers of chasing investment fads.

We appreciate the trust you have placed in us, and we take this responsibility very seriously. We are very optimistic about the Sub-Fund's prospects moving forward and look forward to executing on our investment objective. Please do not hesitate to contact us with any questions or comments.

Kayne Anderson Capital Advisors, L.P.

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review

The Sub-Fund posted a net performance of -9.09% for the year ended 31 December 2022 (USD Institutional Founder Class).

In a volatile start to the year for markets, the Sub-Fund was down 0.93% in January, in line with the Merger Arbitrage Index (HFRXMA), which lost 0.9%.

Merger Arbitrage spreads were not immune to January's market sell off and this coupled with an absence of catalysts, meant that none of our deals closed during the month (only Xilinx/AMD got the approval from China which is a positive for future cross border M&A). Some merger stocks are part of indices and ETFs and therefore also suffered from the broader market volatility, hence some spreads remained wide even up to their last day of trading when the deal closed.

A good example of spreads trading at a very wide level was JOB51, which saw positive developments on 12 January, where the buying consortium agreed to propose a reduced offer of \$57.25, which was a significant price cut versus the \$79 initial offer (-28%), to reflect the impact of tighter policies from the Chinese regulator. While we had increased the sizing of our position below \$55, we would still make profit on the position, yet the spread was at +15%, which is very wide, while the company confirmed that the updated structure will now not trigger any new regulatory filing in China.

February was a volatile month with a spike around the 24 February as the Ukraine invasion unfolded. Against this difficult backdrop, the Sub-Fund proved to be very resilient, ending the month almost flat at -0.34%.

From a broader perspective, the Ukraine situation clearly strongly impacted markets but in the world of Merger Arbitrage, whilst spreads widened, no deals were specifically called into question because of these events. This is because 'Acts of War' are typically excluded as a Material Adverse Event in merger contracts. Spreads were at their widest levels since March 2020, a situation we navigated well and from which we managed to generate a robust performance in 2020 and 2021.

The Merger Arbitrage spread universe was such that our invested performance was close to the same level as April 2020. This also does not take into account opportunities into which we had not yet invested from our current cash pile. By the end of the first quarter, we were looking forward to portfolio deal catalysts which should unfold in the following weeks, and which would help to generate profits, despite the persisting market volatility. A good example of this was the JOBS deal which saw a higher bid in early March.

We typically reduce leverage in difficult periods so that we have less risk but also 'dry powder' to reinvest. In fact, our leverage at the end of February was below 1.3 times. There were a series of new opportunities which we were waiting to invest into and existing positions which we were waiting to add to. Investing on the back of panic selling in the market, which turns the spread widening environment into a significant spread dislocation, has always been part of our broader investment strategy and has generated significant profits since inception.

The Sub-Fund gained 0.74% in March, bringing the first quarter of 2022 performance to -0.54%. The first quarter of 2022 was a historically rough one for stock and bond investors, with the Ukraine war and a hawkish Federal Reserve ("Fed") stance towards spiralling inflation fuelled by rising commodity prices, which saw the S&P 500 down 5%, the Euro Stoxx 50 down 9%, Treasuries down 5.6% and investment grade bonds down 7.8%. The combined drop of these four categories has not been witnessed since 1980.

Since our Merger Arbitrage strategy is a largely decorrelated one, our portfolio proved to be resilient against a volatile market backdrop. However, spreads were not all totally immune from the global turmoil as some Merger Arbitrage stocks are constituents of the main indices and ETFs therefore also suffered. Some spreads therefore remained wide even up to their last day of trading prior to the deal closing.

Critically, none of our deals were being questioned or were at risk in March (we avoided the Avast/Norton situation in Europe which is now under the UK's Competition and Markets Authority ("CMA") heavy scrutiny resulting in Avast's stock losing -12%) but overall, spreads were still at their widest level since March/April 2020. We looked at this as an attractive opportunity and were looking to judiciously add risk where appropriate.

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review (continued)

Despite this market volatility, we did have some positive news flow in March, these being:

- The Sbanken acquisition by DNB received the antitrust nod of approval which had been challenged and delayed for six months and was the last condition for the closing of the deal.
- We also had a +6.5% increase in the consideration to be paid for the acquisition of JOBS which was one of our largest position by its majority shareholders from \$57.25 to \$61, as well as the long-awaited filing of the definitive proxy to the shareholders, with the vote confirmed for April 17, paving the way for the closing of the merger shortly after, as this was the last condition.

April was another volatile month, with the S&P dropping 8.8% to reach -13.3% year to date. Against this difficult backdrop, the Sub-Fund resisted well and ended April at -0.77%, while the HFRXMA Index lost 67basis points.

The decline in the HFRXMA Index was due to the widening of the majority of all the spreads due to some forced selling, while no deals were being put into question. However, as always in Merger Arbitrage, while spreads can significantly widen with the market during some volatile days, inducing some liquidation mechanisms, these moves are temporary since market corrections or even a bear market will not prevent (i) M&A deals from closing and (ii) the spreads to reconverge and crystalise profits, as these transactions are all bound by definitive merger agreements, which makes Merger Arbitrage a truly de-correlated strategy.

This is well highlighted by the closing of the JOB51 transaction, which brought in a significant positive contribution to the Sub-Fund, despite volatile market conditions, but didn't compensate enough for the general spread backdrop in April.

Indeed, while we had been flat during the month, all spreads widened on April 29th when the S&P 500 lost circa 3.6%, sending the HFRX Merger Arbitrage Index (unlevered spreads) to -0.67% for the month. Main Merger Arbitrage spreads significantly widened that day, including Activision (-1.43%), Tenaris (-3%), First Horizon Corp (-1.58%), MoneyGram (-1.55%), Sanderson Farms (-1.07%), Tegna (-0.81%) and South Jersey Industry (-0.67%). Again, this was on no specific news on any of these deals, particularly since changes in conditions of global financial markets or general economic conditions, are always excluded as a Material Adverse Event allowing termination of a merger.

Our largest loss was on MoneyGram (-0.36%) following a potential fine imposed by the New York Attorney General ("NY AG") (the amount was immaterial to the deal as it had been for all the previous fines) of which the acquirer was fully aware, and the final decision on the fine will not be made or the fine become for the next few years. Elsewhere, we lost marginally on 80% of all our other spreads.

In this volatile market environment, we were, very cautiously, adding on some new selected spreads which had been trading at distressed levels, while reducing the overall leverage of the portfolio, by (i) selling spreads that we perceived as too tight in the spread environment and (ii) through the closing of some of our deals, so that we had less risk overall but also 'dry powder' to reinvest. The Merger Arbitrage spread universe was such that our invested performance was getting very close to the levels last seen in April 2020.

May was yet again a volatile month in the M&A world which saw a broad series of spread dislocations following some forced liquidations. This was subsequently reflected in the broader HFRXMA Index which lost 2.4%, its largest drop since March 2020. There was no hiding place for the Sub-Fund, even if we were running on a relatively low leverage level, and the Sub-Fund lost 1.73% following this mechanical spread widening.

Whilst many spreads continued to widen, it would have been easy to sit back and do nothing. In our experience, however, this has always been an attractive time to very selectively add risk. We continued to therefore judiciously add to our positions where appropriate but being mindful of the fact that this dislocation trend had lasted relatively longer than previously (3 months with a peak in May) and that we will always keep dry powder to ensure good liquidity on the book.

The main Merger Arbitrage spreads which significantly widened intra-month, included:

- Shaw (widened by up to -11.33% on 11 May),
- Tenneco (widened by up to -15.6% on 6 May),
- First Horizon Corp (widened by up to -4% on 11 May),
- Moneygram (widened by up to -7.03% on 20 May),
- Twitter (widened by up to -27% on 27 May),
- Tegna (widened by up to -5.6% on 19 May 19).

We also avoided the deal termination of Momentive/ZEN (-25% in May).

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review (continued)

In addition to adding spreads as discussed above, we also continued to sell spreads that were trading in tighter fashion. The result is that the portfolio in May had an invested performance with projected returns above that which we had during mid-March/early April 2020. Hence portfolio deal catalysts would eventually unlock significant profits, despite the persistent market volatility.

During the month of June, all Merger Arbitrage spreads faced a period of severe dislocation, wherein the HFRXMA Index lost circa 5% during the first 10 consecutive trading sessions of the month. As a result, the Sub-Fund lost 1.36% while the HFRX Merger Arbitrage Index ended at -1.42% month to date and -3.92% year to date.

The average spreads on US transactions spiked above 15% close to levels last seen during the early days of the pandemic in early 2020.

However, there were differences between the situation then and the one in June:

- We were absolutely not in a pandemic situation where some deals had been unilaterally terminated by their acquirors (when the target had been significantly impacted by Covid lockdowns Tiffany/LVMH, Taubman Centers/Simon Property, Cineplex/Cineworld) even though all litigation was either settled, or ultimately proved to be unsuccessful in court,
- No deals were terminated and there were no reasons nor grounds for deal termination. A good example was ACCEL (tender unconditional) and Ultra Electronics (UK government approval), which both contributed significantly to the Sub-Fund. This meant that when deals did close, they brought significant P&L to our portfolio, while their spreads were very wide (+10%) up until the unfolding of their respective key catalysts. Leveraged Buyout ("LBO") transactions were also closing with debt being over-subscribed by debt investors (Intertape Polymer, an LBO deal with a 100% M&A premium announced one day after the Ukraine invasion and with circa 11x Net Debt/EBITDA, got priced \$400mn at 14.361%).

We took this severe spread widening, which was caused by the forced selling/liquidation of a major Merger Arbitrage player as a unique opportunity to aggressively add into the most dislocated spreads, while maintaining an overall lower leverage (selling the non-profitable spreads to free up liquidity).

As a result, we had recouped half of our intra-month loss at month end, on the back of spreads re-converging and our invested performance was then at one of the highest levels ever, while deals continued to close. Hence, we believed that the crystallisation of these spreads could have a strong impact on the Sub-Fund's performance. We, however, remained cautious in case further spread dislocation occured in said market environment.

The Sub-Fund generated a strong return of +2.21% in July (vs HFRXMA Index +1.3%), thanks to the closing/key approvals of four deals including; Atotech/MKS Instruments, Vonage Holdings, Ultra Electronics and GTY Technology. We also made significant profits on the spread retightening of Citrix, Rogers, Tenneco, MoneyGram and Mandiant, which had significantly widened during the forced selling/liquidation period of June.

This performance was largely driven by taking advantage of and investing into the spread widening of the previous three months. Our classic investment process remained the same and simply evolves over time but the trading component of our strategy during volatile markets is also a critical part of what we do. We regard sell offs as an opportunity to shrink our leverage and to then judiciously invest into 'over done' wide spreads. We typically build a large P/L to come during these periods and 2021/22 has been no different. July was the first month in which we saw some of this pent-up return come through.

The Sub-Fund generated a positive return of +0.42% in August, while markets had a sharp sell-off during the second part of August, with the S&P 500 and the EuroStoxx ending August at -4% and -6% respectively. This again highlights the true decorrelation of the Sub-Fund strategy versus US and EU indices, yielding a positive return in such adverse markets.

Our performance in August was mainly attributed to the approval of the Avast/NortonLifeLock transaction by the UK CMA, for which the spread was at a +47% level prior to this decision. Again, this showed the unprecedented dislocation of some spreads, prior to an ultimate catalyst. Avast/NortonLifeLock was trading at only a +1.2% spread back on 14 March 2022, a spread in which we were not invested in at the time, considering the potential UK CMA phase 2 risk.

We also made a profit on the closing of Sailpoint Technologies (this spread was trading at +10.4% spread on 14 June), as well as profits on the closings of Tufin Software and Vifor Pharma, respectively. While we had reduced our leverage by taking some profits during the first part of August, spreads started to widen back with the market sell off during the second part of August.

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review (continued)

Notably, some of our spreads for which we had reduced the sizing widened sharply, including; Rogers, Shaw Communications and Twitter, even if the total impact was compensated by the Avast/NortonLifeLock profit. Other spreads, such as Silicon Motion/MaxLinear, Tower Semiconductor, in which we were not yet invested, also widened significantly during the second part of August. Silicon Motion/MaxLinear was then trading at the same spread level to where it was trading prior to the announcement of the deal.

Hence Merger Arbitrage spreads remained very wide (the average of our invested spread universe was back at 13.5% versus 15% on 15 June (widest level), while it had converged to +8.0% in mid-August). These spreads would only reconverge upon closing or by a key catalyst being received.

We took this opportunity to gradually invest back into some of these wider spreads, as we did back in May and June. We again built a large P/L to come, while we were cautiously increasing our leverage again. It is worth noting that with the M&A volume drop in Europe (-35% year to date) we were then invested at more than 95% in the US, which was less affected by this M&A slowdown.

Broader equity markets suffered a sharp sell off during September, with the S&P 500 ending the month at -9.34% and the Euro Stoxx at -5.7%. Merger Arbitrage spreads were not immune from this and mechanically widened as evidenced by the Merger Arbitrage Index (HFRXMA), ending the month at -1.4%. The Sub-Fund finished the month at -1.93%.

The Merger Arbitrage Index, as well as the Sub-Fund, was nicely positive month to date until 22 September, after which the Merger Arbitrage Index lost 1.7% in the last 6 trading sessions of the month, following the Fed rate hike and negative comments from J. Powell.

Merger Arbitrage spreads were back at their widest level; as a result, the average of our invested spread universe was back at +15%, a level similar to the widest levels seen in mid-June. This period had been shortly followed by a strong recovery for the Sub-Fund from June 15 until mid-August, where the average of our invested spread universe came in at +8% and other deals closed (Avast/Norton).

We continued to play the volatility of Merger Arbitrage spreads by gradually investing in some of the most dislocated ones, as we did back in May and June. However, our leverage remained low as we expected some persistent volatility until year end.

The Sub-Fund had a strong month in October (+1.06%) following the closing of the Twitter transaction by Elon Musk (+3.22% month to date) and the narrowing of other spreads, as they moved closer to their deal completion. Elon Musk eventually proposed to close at the deal price of \$54.2. As we had repeatedly said, the outcome of this litigation shows how little leverage Elon Musk had from a legal point of view, according to the lawyers we had consulted with, in terms of demonstrating a Material Adverse Event in a Delaware Chancery court. The outcome was obvious to us, especially since Elon Musk didn't conduct any due diligence prior to the signing of the transaction.

The Sub-Fund also made profits on spread convergence, such as Tenneco being acquired by Apollo (following EU approval - a position that we had closed and for which we had then been short, given the very tight level of the spread and the downside of the deal). We also made a profit on First Horizon Corp/Toronto Dominion Bank, Shaw Communications/Rogers Communications, and on our Cineplex hedged position. On the other hand, we lost on Black Night/Intercontinental and on Rogers/Dupont spread widening.

We still had a low leverage of 1.67 times as at the end of October, given (i) the significant performance invested across the spread universe which remained very wide and (ii) the volatility of the markets.

The Sub-Fund reported a severe negative month of -4.86% in November due to a very unexpected deal break, where DuPont de Nemours ("DuPont") called off its \$5bn deal with Rogers, a couple of hours prior to the termination date. DuPont let the deal lapse because it didn't get antitrust clearance in a "timely manner". This move was obviously a major surprise for all Merger Arbitrage funds, as it was for us. We had very specific and detailed feedback from advisors involved on the deal (bankers and lawyers) that the termination date would be extended by DuPont. DuPont had completed its \$12 billion divestiture to Celanese in order to refocus its business on Rogers' activities, which would have been their new core strategy.

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review (continued)

While there were no antitrust concerns in China, since it was a vertical merger (confirmed by several sources involved, including at the Chinese competition regulator, the State Administration for Market Regulation (("SAMR")) who were going to "wrap up" the review after some side deals had been agreed with competitors), it seems DuPont had been using this delay to get out of the deal. With respect to the Chinese approval, this is the first time ever that a US-US transaction has not been approved, and the acquirer did not extend the deal. Indeed, since both Rogers and DuPont are under tight US export control, a US-US merger does not change anything for the Chinese. The sale of the Raw Materials division for \$12 billion to Celanese by DuPont (to focus on Rogers by reshuffling its core portfolio), was approved by the SAMR in mid-December.

Rogers was one of the largest positions for all Merger Arbitrage funds, given the strategic nature of the deal and the limited antitrust issues, hence the stock plunged much lower than its fair value of \$150 per share, aggravating the loss for the Sub-Fund.

Unfortunately, we also didn't benefit during November from the convergence of two risky (following increasing US/China tensions and newly announced US export ban measures in October) and long-dated situations (mid-2023), with very wide spreads, converging on no news. There was also the closing of a hostile situation which had a wide spread:

- Silicon Motion Technology (SIMO US); a Taiwanese semiconductor company (selling 31% of its revenues in China) being acquired by MaxLinear US which would hence be under US export control in China, if approved by the SAMR (not to mention the Taiwanese political angle). That spread converged from 96% on 1 November to 61%.
- Tower Semiconductor (TSEM US); an Israeli semiconductor company in a similar situation (20% of its revenues in China), being acquired by Intel US, saw its spreads converging by 8% on no news, while TSEM would also be under US export control in China, if approved by the Chinese.
- Turquoise Hill Resources (TRQ CN); spread also converged to 12.36% on 1 November when Pentwater with a 11.6% blocking stake (minority buyout) struck a deal with Rio after Rio's hostile first offer failed in August because of Pentwater. The Pentwater/Rio deal was ultimately blocked by the Canadian stock market regulator, and they had to cancel the agreement, but the deal ultimately closed.

It was therefore a very frustrating month for the Sub-Fund. The Sub-Fund once again reported a negative performance in December (-1.83%) due to some spread widening, which unfortunately was not offset by our other positions. Overall, the year was extremely challenging for the Sub-Fund due to the unprecedented Rogers/DuPont situation at year end and further volatility throughout the year which played out till the very end of the year, including December.

The Rogers situation has shown us, that despite receiving persistent confirmation from Dupont's advisors that the deal would be extended, our sizing was probably too big, especially given the crowdedness of Merger Arbitrage funds in this spread, thus aggravating the downside. Indeed, when analysing the deal break price of core deal breaks (Willis Towers in 2021 and Rogers in 2022) the share price goes 20% to 30% below fair value or the market-adjusted price prior to the deal, due to some hedge fund trading effects that resulted in a complete dislocation of market prices. We will be taking this into account in our position sizing going forward as it seems that crowdedness of Merger Arbitrage funds in such spreads is the new norm today.

However, in the 11-year history of the Sub-Fund we have always been able to recoup our drawdowns, usually in a swift manner. The latest example was in mid-June 2022, when we had the exact same negative performance as at this year-end. We managed to recover from this drawdown through the invested performance we had in the portfolio at the time, which we had mentioned in our June 2022 newsletter, and the Sub-Fund ended up at +1/+2% year to date around 15 August, due to several deals closing and other catalysts. Today, this invested performance is higher than back in June 2022 and is on a few selected deals which are not necessarily mainstream, or which have been structured using various sophisticated options strategies which could be very profitable.

While this year was by far the most frustrating one for the Sub-Fund, Merger Arbitrage is a differentiated strategy that delivers consistent and persistent returns, and our drawdown also means that we have a significant invested performance to come from several deals, which should come to fruition within the next few months.

2022 M&A Market Review and Increase in Deal Breaks

M&A market volume was down 34% year on year with volume of \$3.4 trillion for 2022 which was lower than 2020 (\$3.5 trillion), with the latter having been impacted by the COVID-19 shutdown. The 2022 drop was mostly driven by a drop in European volumes (-41%) versus the US (-30%), while the third and fourth quarter were the slowest quarters, with M&A, now at its lowest level since 2013.

MontLake Abrax Merger Arbitrage UCITS Fund 2022 Performance Review (continued)

2022 M&A Market Review and Increase in Deal Breaks (continued)

However, deal count was only down 11.5%, hence the M&A market contraction is really due to macro-uncertainty and the market backdrop. Interest rate increases did not have much impact on private equity activity, nor on the levels of Merger Arbitrage spreads.

We have also seen a significantly higher number of deals breaking this year, quite curiously only involving strategic transactions, which could be due to the tougher antitrust regulatory environment in the US (which is also a consequence of an ongoing natural contraction of the deal size), national security issues or market backdrop. Yet, despite the steep interest rate increases throughout 2022 and massive losses on deal debt pricing for banks, not a single LBO/Private Equity deal has been terminated, including Tenneco/Apollo which reported in the third quarter of 2022 a negative "solvency ratio" just before closing.

2023 M&A Market Outlook

According to The Wall Street Journal, deal advisers expect M&A to pick up in 2023 following last year's slump, though when that will happen remains an open question. Buyers and sellers want more certainty about the pace of further interest rate increases from the Federal Reserve, as well as data showing inflation continuing to abate after notching 40-year highs.

However, as interest rates have spiralled, valuations have decreased substantially during 2022, pricing in a hard landing, while a full recession remains yet to materialise. Hence, we could see some rebound in M&A if inflation continues to abate and interest rates stabilize accompanied by a soft landing of the economy. This is not unrealistic, and would result in some targets trading at attractive valuation multiples, for potential industry consolidators.

However, we will probably still be seeing small sized transactions within this tough regulatory environment, with antitrust enforcers globally applying greater scrutiny on large transactions.

AUM Asset Management Limited

MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund 2022 Performance Review

The performance of the Sub-Fund was -1.5% in the second half of 2022, closing the year down 25.7%.

After the negative performance of the markets due to increased inflation and a general slowdown of the worldwide economy, the net exposure was reduced with a 50% cash buffer in June. This level of cash was maintained in July and reduced to 30% for the remainder of the year in order to protect the investors from a potential continuation of a bear market.

Sector wise, the Consumer sector was favored, ranging from 35% to 50% of the portfolio, the Healthcare ranged in a narrow band between 27% and 32% while Tech was reduced as low as 23% in November, continuing the shift from growth and momentum to quality and value.

The US exposure was gradually reduced from 67% to 56% while the European received the largest increase from 23% to 36%. Asian exposure has been increased from 10% to 17% from June to October but was halved in December to 8%.

We are confident that our AI based systematic approach will continue to manage the challenging environment well – as was the case during the COVID Crisis (proof of concept). The main outlook for the Sub-Fund remains positive, thanks to its flexible investment approach which has built in risk management tools allowing it to adapt and handle all kind of market scenarios – an economic soft-landing with robust growth as well as serious market turmoil.

The portfolio currently holds 35% in cash and 65% in Quality Brands Equities (in 3 sectors: Tech, Healthcare, Consumer) and can anytime, if required, convert more equities into cash, ie up to 100 % into short term US Treasury Bills, until the markets have stabilized and will start to recover. In case of a strong and healthy market recovery, the Sub-Fund portfolio will move back to 100 % in equities, and with the tool of adding an Alpha Overlay of up to 100 % (with proceeds of a short MSCI World Index position invested in the same 48 stocks as are already in the portfolio), it can potentially add additional performance and compensate investors for the time the Sub-Fund has stayed with its cash buffer in a risk reduction mode.

We trust that in this highly complex and risky environment, the above-mentioned competitive edges of our Premiere Palm-Tree Strategy will differentiate us from the competition and benefit us by being able to offer our investor true added value and peace of mind in these challenging times.

Quay Partners Investments (UK), LLP

Mygale Event Driven UCITS Fund 2022 Performance Review

The Sub-Fund returned -2.16% to 31 December 2022.

Looking back on 2022, we reflect on what has proven a very testing period for the portfolio which unfortunately delivered its first annual negative performance since the Sub-Fund's inception. As ever, merger activity is dependent on market and economic stability and the shock invasion of Ukraine removed both of these for a number of months. Naturally, acquirers took a much more cautious approach, with rising interest rates, financing challenges and the possibility of a recession all providing concern and doubt. Unsurprisingly, in the face of these challenges, global deal flow fell 37% from a record high in 2021. This is the biggest drop since 2001 when the US economy fell into recession. Despite these challenges however, companies and financial buyers alike continued to do deals over the year and adapted financing structures to meet what became a more difficult environment as investment banks pulled back from large leveraged loans.

Reflecting on the last six months, the general landscape for M&A going into the third quarter was less clear cut than most commentators would have had us believe, as expectations started to grow for more forward-thinking corporates to take advantage of the destabilised environment at the time. With broader equity markets staging a strong recovery from mid-July, we saw a degree of normality return to all sub-strategies and added a number of new positions to the portfolio, mainly in announced merger situations, but also in a couple of pre-announced names. Unsurprisingly, market nervousness continued in August, particularly so in the second half of the month as inflationary fears continued to spook investors. With low equity volumes, we also saw a lack of rationality in many of the Catalyst and Relative Value portfolio positions. At the time, some of these situations were trading at historically high levels, and whilst we remained cautious on some of the catalyst names due to market nervousness serving to delay expected catalysts, with others we gradually increased exposure feeling that the balance between risk and reward had become more favourable. Looking back at the third quarter as a whole, it is interesting to note that our feelings toward the end of September remained very much unchanged from those earlier in the year, in that the combination of marked moves in valuations and the challenging general market backdrop had the potential to lead to a flurry of opportunistic deal activity over the coming years. September proved to be another volatile month for equity markets, but also continued to see a slow and sustained pick up in merger activity - particularly so in the UK where a number of new deals were announced.

Behaviourally more rational markets brought a welcome change in October, and some of the more heavily sold but strong catalyst situations in the portfolio finally started to perform in a way that had been expected in the months before. However, deal activity in Europe also quietened significantly and we only initiated five new positions on the month, with activity being more buoyant in the US where we began to build a further position. The portfolio performed strongly in November as much of the negativity that characterised 2022 gave way to more optimistic investor behaviour. With markets buoyed by hopes of moderating inflation and signs that China was beginning to loosen its strict COVID-19 policy, both equities and investors began to reflect a more positive outlook. As we saw in October, this brought about more rational thinking in investment decisions that helped to deliver strong returns, particularly from the Relative Value and Catalyst Driven sub-strategies. Unsurprisingly, news flow and volumes were both relatively light in December, but we remained quite active with both existing and new investments. Overall, we initiated eight new positions on the month and closed a similar amount.

Looking ahead into the new year, the most important ingredients needed for increased deal activity remain unchanged: confidence and predictability. We need to see evidence that inflation is abating and that the pace of rate increases is slowing, and it feels like we are starting to observe these already. At the moment, admittedly, it feels unlikely that activity will pick up in the first few months of the year, but in some ways, it wouldn't be wholly surprising if it did. M&A will likely play an increasingly important part in corporate strategies and at present, with lower target company valuations, corporates have more reason to make bold and unexpected moves to achieve their strategic priorities. After all, if they do not, then it is highly likely that private equity players will.

Private equity is an area where, contrary to some recent concern, we are still seeing significant fundraising taking place and the need to deploy capital and take advantage of opportunities remains undiminished. The more difficult funding environment is undebatable but, as usual in difficult times, buyout firms have altered their strategies and, in many cases, have been seen structuring deals using a higher percentage of equity, presumably to refinance further down the line when terms are more favourable. The Ukraine invasion, inflation and economic uncertainty has hit equity valuations hard in some sectors, and we continue to expect the private equity industry to be at the forefront of a dealmaking recovery as they look to take advantage of valuation opportunities.

Mygale Event Driven UCITS Fund 2022 Performance Review (continued)

Geographic differences are also creating and driving deal activity. The soaring US Dollar has hit profit margins in many areas and will likely drive dealmaking in coming quarters. Take the UK as an example, where the combination of dollar strength and weaker company profits will likely lead to opportunistic activity from both US buyers and private equity firms, and it's a very similar story in Europe also. Over in Australia, merger activity has already been particularly active in late 2022, with the benefits of political stability and favourable currency movements proving attractive to global investment firms. The Australian market has a high proportion of infrastructure, energy and mining companies, and it is logical that dealmakers increase focus on these sectors that benefit from stronger cash flow and commodity prices in times of uncertainty.

It is clearly very difficult to predict when deal activity will turn a corner as headwinds still exist. However, when financing markets start to re-open then deal volumes and activity will increase. From our experience, this frequently happens sooner than people expect.

Tavira Financial Limited

Nutshell Growth Fund 2022 Performance Review

The Sub-Fund returned -19.16% for the year. In a period where value stocks dominated, the Sub-Fund therefore underperformed the MSCI World Index (which returned -7.83%), alongside its quality growth fund peer group. Throughout the period we have maintained a focussed strategy with a concentrated portfolio of quality, resilient and exceptional companies at reasonable valuations.

The bulk of the Sub-Fund has continued to be invested in US Dollar denominated stocks (generally between 65% and 78% of the portfolio) and so with Sterling depreciating by around 11% versus the Dollar during the period as the flight to quality ensued, this was in fact positive for the Sub-Fund, particularly during the first three quarters of the year.

Ongoing concerns regarding the global economy and inflationary expectations, particularly after the Russian invasion of Ukraine, have led to negative returns in almost all market sectors during the year with the exception of Energy which had extremely strong returns, driven by the increases in oil and gas prices. From the Sub-Fund's perspective however, in sector terms, Industrials provided the strongest numbers with a marginal positive contribution of +0.4%, followed by Healthcare and Consumer Staples. On the other hand, the weakest performing sectors were Communication Services, Information Technology and Consumer Discretionary with the worst performing stocks being Meta Platforms, Adobe and Alphabet. The best performing stock over the period (+1.4% contribution to total return) was Novo Nordisk, the Danish pharmaceutical company which has been a constituent of the Sub-Fund since its inception. Encore Wire, a more recent purchase within the Industrials sector, in March 2022, and Amgen (within Healthcare) which we've held for most of the year were our other top performing stocks.

Overall the Sub-Fund's weightings to Information Technology and Industrials have increased, particularly after the first quarter of the year, at the expense of Healthcare and Financials. The Sub-Fund ended the period with its largest weighing in Information Technology (53%), followed by Healthcare (14%) and Industrials (12%). In line with our investment policy which prohibits allocations to fossil fuel related investments, we have a zero allocation to the Energy sector. Top ten holdings now make up around 54% of the Sub-Fund, with our largest holding in Visa.

The year was dominated by market volatility, which continued right up until the end of December, with the Nasdaq concluding its poorest annual performance since 2008. Continued Federal Reserve ("Fed") hawkishness and rampant pessimism masked what would usually be regarded as good news. US CPI, productivity, labour costs, factory orders, durable goods, personal income, inflation expectations, GDP and ISM prices paid all came in better than expected at the end of the year. More importantly, earning releases are continuing to beat estimates with all 3 of our holdings releasing during the month of December doing so. We are of the opinion that CPI will drop through 2023 regardless of further rate action, but are hopeful that healthy household and company balance sheets and strong employment will be able to withstand the overly hawkish Fed. We believe that further falls in inflation, and rate hike moderation, together with the seasonally best three quarters of the 4 year US election cycle, will reward investors, especially the Quality Growth style that has had a rare period of underperformance.

As long-term investors, although we are very interested in the macro environment, we understand that the market, viewed one way, is a time series of adverse events and headlines that could shake one's resolve. It is necessary therefore to stick to the plan, knowing that these events will pass and that more fruitful times are characterised on the other side. As such, we remain positive in the knowledge that we own a portfolio of truly high-quality companies, with wide moats and high stable profit margins, at around zero premium to the US market as a whole. We look forward to sticking to our process of investing globally in exceptional companies which offer exposure to quality factors at attractive valuations. As we move into a new year, we are optimistic that many of the worries of 2022 are likely to be resolved and sentiment will normalise along with asset prices.

Nutshell Asset Management Limited

Perspective American Absolute Alpha UCITS Fund 2022 Performance Review

Following the Sub-Fund's launch in mid-November, the portfolio was built out into month end ensuring that we entered December fully invested. During the month the S&P500 continued a year-long decline, falling 5.8% whilst the Sub-Fund delivered a positive performance of 0.52%.

As we approached year-end, we observed a dramatic tightening of liquidity as quantitative tightening had a greater effect, draining excess liquidity from the financial system. In addition, the stepped-up usage of the NY Fed's reverse repo facility ("RRF") also contributed to the drain in liquidity, resulting in risk assets being negatively affected. We saw a reversal in the year end cash hoarding at the RRF. The US Treasury has dramatically slowed down bill and bond issuance and begun "extraordinary" measures to fund internal expenses by effectively creating its own money (IOUs) instead of borrowing it from the financial system. This led to a significant improvement in liquidity and a reversal of the risk of sell-off. However, as quantitative tightening continues and the debt-ceiling is resolved one way or the other, it is expected that liquidity will deteriorate throughout the year.

The US economy has showed resilience in the face of a significant tightening in monetary policy over the last year. However, monetary policy tends to have a lag of 12 to 18 months - 12 months ago, Fed Funds rates were 25bps and they are currently 4.5%. As a result, we do believe that the true impact of the biggest central banking tightening cycle in 40 years has not been experienced yet.

The prospects of counter-cyclical economic stimulus are very low, and there is a likelihood of fiscal cuts on the back of negotiations around the debt-ceiling. The high level of conflict within congress - even within political parties - compared to previous negotiations, preserves the possibility of default. Additionally, US public debt to GDP has doubled since 2008, and senior loan officer surveys indicate a dramatic reduction in bank lending due to the tightening of credit standards, which will add to the tightening of monetary conditions. As a result of these factors, we expect credit to deteriorate, driving our negative positioning in financials.

Entering 2023, we observed a combination of factors shift momentum in the market dramatically, such as the decline of gas prices in Europe and the "reopening" of the Chinese economy, which reduced the risk of recession in the 'old continent' and improved sentiment for economic growth globally. In addition, wage pressure in the US subsided somewhat.

While these are all positive developments, they do not change the overall outlook for the market materially. Declining gas prices from very high levels is positive, but global energy (and food) prices remain at levels that have historically slowed economic activity and pressured asset prices. Greater demand from China will exacerbate this trend. Similarly, wage growth remains at levels that have historically stoked inflation.

The structural changes in these factors have been negative, most notably the breakdown of global food, energy and materials supply lines as well as the reduction in the US labour force; and they are likely to be more determinative going forward.

Looking forward, it is our assessment that the current economic landscape is characterized by a gradual decline towards recession, driven by the convergence of tightening monetary and fiscal conditions. Historically, any significant increase in interest rates has resulted in a notable slowdown in economic activity, and the recent hike in rates is five times more substantial than anything experienced in the last forty years. We use the ISM New orders series as the best leading indicator of economic activity, and our analysis suggests that this deceleration will persist throughout the year and is likely to culminate in a recession.

In addition to monetary tightening, we anticipate that the latter half of the year will bring about fiscal tightening due to debt ceiling negotiations. Despite these ominous indicators, the stock market appears to be pricing in a recovery in economic activity, which we believe is overly optimistic.

In light of this outlook, we are actively seeking shorting opportunities in this basket and seeking out long positions in sectors negatively correlated to PMIs. We expect healthcare companies and secular growth companies that make up essential parts of the economy – e.g., semiconductor companies - will fare the best in this slowing economic environment.

One key factor for the tightening of monetary conditions and the slowing of economic growth is the supply shock experienced in the resource markets. Should economic growth recover, it will likely lead to a tight energy and materials market, and we have positioned ourselves to capitalize on this eventuality.

Tavira Financial Limited

RoboCap UCITS Fund 2022 Performance Review

The Sub-Fund USD Institutional Founder share class ended 31 December 2022 with a NAV of 189.90, down 36.63% in 2022 net of all fees. This brings performance since inception on 4 January 2016 to the end of 2022 to +89.90%. As a thematic fund in robotics, automation and AI stocks, the portfolio is drawn from a universe of over 350 companies across a broad range of sectors, countries and market caps. Given the strategy and investment universe, we do not believe that any equity index is a relevant benchmark for the Sub-Fund.

Global equity markets were rocked by the soaring levels of global inflation in 2022 created by inefficiencies in the global supply chains during the Covid-19 pandemic which started in March 2020. These issues were compounded by the Russian invasion of Ukraine which further inflated commodity prices in early 2022 and by labour shortages. Other factors to have impacted performance in 2022 included an increase in trade tensions between the United States and China, and the latter's failed zero-Covid policy. As the US began to try to limit China's ability to use cutting edge chips in military and AI applications, the impact was mainly seen in the Sub-Fund's exposure to wafer fabrication equipment suppliers.

The US central bank, the Fed, sought to rapidly address the issue of high inflation by increasing interest rates off what were close to all-time low levels. The unfortunate result of this has been a repricing of equities, driven by the unprecedented speed of US interest rate increases in 2022, which in turn has also stoked fears of a global recession. Growth names were hit particularly hard in this environment as higher interest rates begun to be factored into the valuations of these names. Overall, portfolio companies' sales and earnings were strong, but not enough to offset the valuation multiples compression.

Analysing the Sub-Fund's performance attribution in 2022, the best performing sub-theme has been the exposure to General Automation and Industrial Robotics where demand remained robust throughout the year despite challenges brought about by the supply chain issues mentioned earlier. Healthcare Robotics names also performed relatively well in the year aided by automation-led secular growth trends and a recovery in surgical procedures after two years of disruption caused by Covid-19 lockdowns. At the other end of the spectrum, high growth AI-powered software names where much of the free cash flow generation and hence fundamental valuation of the company is back-end loaded were the worst performing names despite very strong sales growth in the year. As we write this letter, only one company in the portfolio was not FCF positive at the end of 2022.

For 2023, we expect that after the macro-driven falls in stocks seen in 2022, the market will return to a greater focus on company fundamentals as we believe that peak interest rates in the US will be seen somewhere in the first half of 2023. We also expect the market to focus more on 2024 and 2025 sales and earnings outlooks which will be much clearer by then once the extent of the interest rate headwind is fully known. Supply chain issues should be less prevalent in 2023, and inflation pressures should continue to ease. Automation will be key to offset labour force shortages as new factories are built outside of China. Markets should progressively focus back on companies' fundamentals, and as valuation multiples stabilise, stocks returns will once again be driven by sales and earnings growth.

The fundamentals of the companies in which we invest remain strong, supported by long-term secular trends. Robotics, Automation and Artificial Intelligence are now firmly established as key growth themes for the next couple of decades. We continue to believe that the macro-economic environment for robotics demand remains strong in the medium and long-term. As such, we could use market weakness to enter new positions or increase existing positions at more favourable prices. Following a prolonged period of volatility, we believe it is wise to continue to hedge the currency risk systematically and remain cautious in our stock selection and may hedge part of the equity risk.

Starting from January 1st 2023, Robocap LLP has ceased to operate as an Appointed Representative of Sturgeon Ventures LLP and Investment Adviser of the Robocap UCITS Fund, and has been replaced by Robocap Asset Management Ltd, as the new Investment Manager regulated by the FCA. The team and business has been transferred on that date, but it should not make any noticeable difference to investors.

Robocap Asset Management Ltd.

SHARP UCITS Fund 2022 Performance Review

Over the year, the Sub-Fund (based on the USD Select Institutional share class) returned -12.3%.

The macro set-up at the start of 2022 was one of slowing economic growth (from a high level) and accelerating inflation (record surge) against a backdrop of extremely easy monetary policy. Both equities and bonds were significantly overvalued relative to history on a broad set of metrics. Russia's invasion of Ukraine in late February caused a global shock. Commodity prices soared. This contributed to feed further inflation and supply chain disruption. The Federal Reserve ("Fed") raised interest rates by 0.25% in March, with calls from within for more. Elsewhere, Chinese equities were negatively affected by renewed COVID-19 outbreaks, leading to new lockdowns in some major cities.

In the second quarter, both equities and bonds were under pressure as markets repriced the policy rate trajectory materially higher amid expectations of an increased risk of recession. Inflation continued to move higher and surprised to the upside in many major economies.

In the third quarter, after a rally in July, both equities and bonds turned lower. Central banks pushed back against any policy pause and reaffirmed their commitment to fighting inflation. The Fed raised policy rates by 75 basis points to 3.25% in September (the third consecutive 75 basis point increase). The European Central Bank ("ECB") and the Bank of England ("BOE") raised interest rates in the quarter as well keeping the global tightening trend well alive.

Equities rounded off a tumultuous year with gains in the last quarter. Asian shares were boosted by China's relaxation of its zero-COVID-19 policy, while European equities also advanced strongly. Government bond yields edged up towards the end of the quarter.

Overall, there were few hiding places in 2022 when it came to asset allocation. The major asset classes - equities and bonds – were down double digits and corrected their valuation excesses. At the trough, global stock prices had fallen by over a quarter (through to October) and the VIX touched 36% earlier in the year.

Not all assets performed badly. Some commodities moved higher as global supplies tightened. The US Dollar also continued to appreciate against most currencies, reinforcing its role as a safe haven.

The Sub-Fund is an absolute return-oriented multi-asset strategy with the objective of outperforming the traditional 50/50 portfolio while delivering differentiated returns. It also follows a systematic process built on eco-principles and expressed through advanced quantitative techniques – Risk Budgeting, Trend Following, Dynamic Volatility Management.

The strategy operates on a diversified range of liquid markets – Equities, Rates, Credit and Real Assets. It exhibits a typical volatility of 8% with a long bias. And it is also designed to adapt to various market cycles and economic environments within a dynamic risk management framework.

2022 was marked by increasing volatilities (especially in rates) and a sustained correlation shock, with the traditional equity-bond correlation turning positive and staying there for most of the year. That created toxic conditions for leveraged risk-based portfolio construction. Early on, our active Risk Models captured the deteriorating risk environment, leading to a significant reduction in gross exposure from c.a. 240% at the peak to c.a. 65% at the low to protect capital and limit drawdowns. With improving cross-asset trends and falling volatilities, the portfolio regeared to c.a. 115% over the fourth quarter.

Over the year, main tactical asset allocation changes include a significant reduction in rates exposure (to historical lows) to the benefit of equities, credit (spread exposure) and real assets (mainly gold and commodities). Within the equity space, worth noting is a move away from US to non-US as local currency trends improved in EU and Japan. Within the rates space, long-dated exposure was favored as the flattening of the curve amplified.

Outlook

The macro-policy set-up in 2023 is challenging for risk assets as the Fed should remain tighter for longer into a slowing global economy with increased recession risk.

While encouraging disinflationary signs are emerging, the elevated starting inflation rate, tight job market, wage pressures and recent easing of financial conditions make a short-term pivot unlikely. Rate cut expectations for the second part of the year are unlikely to materialize. The Fed has been vocal about avoiding repeating the 1980s mistake (early rates cuts producing a new wave of price pressures with de-anchoring of inflation expectations). Policy risk is skewed to overtightening as the focus is on lagged indicators such as jobs and inflation.

SHARP UCITS Fund 2022 Performance Review (continued)

Markets pricing is showing high expectations of a "soft landing", with tight equity risk premia, well behaved credit spreads and elevated EPS estimates for 2023. Forward-looking economic indicators suggest those expectations might be too optimistic and that the risks to activity and earnings are clearly to the downside. Soft data is already at recessionary levels, the record tightening of 2022 will materially cut into demand in 2023 (the typical lagged impact of monetary policy) and the yield curve is deeply inverted.

The near term liquidity outlook is a headwind for markets as well, while quantitative tightening is expected to continue, increasing the probability of left tail events/volatility shocks.

Against this backdrop, equities offer an unattractive risk/return proposition. High style regional dispersion should be expected, with an outperformance of defensive, strong balance-sheet companies (opportunities in both the value and growth space).

Bond valuations have improved, especially in high quality government bonds (positive real rates across the US treasury curve for example). As main risk shifts from inflation to growth, their diversification benefits should resurface.

The risk/reward on gold is attractive as well, as real rates and USD currency uptrends could reverse somewhat in 2023 and the focus could turn to defensive real assets in a context of above average inflation, below average growth. The tail hedge properties of gold (against geopolitical shocks and monetary disorder) could be welcome in a multi-asset portfolio.

Rothschild & Co Bank AG

Sixteen02 Global Equities UCITS Fund 2022 Performance Review

Fund and market update

The USD Institutional Class returned -32.44% for 2022 versus the MSCI ACWI of -18.4%.

Only a few days into the new year but investors were more than ready to turn the page on a tempestuous 2022 - an annus horribilis which tested nerves across many asset classes. The past year saw a variety of macro and geopolitical shocks - sharply higher global rates, a stronger US Dollar, stubbornly high inflation, China headwinds and the largest conflict in Europe since WWII. Investors in turn responded to these events by derating the S&P 500 P/E multiple by as much as seven turns.

Years in which both stocks and bonds have fallen in tandem are few and far between, which is one reason why last year's brutal losses mark one of the biggest outliers in market history. As the chart below shows, 2022 saw the worst combined total return for both stocks and bonds dating back to 1872.

Figure 1: Macro Malaise: Annual total return performance of the S&P500 and

Source: DB

In fact, 10-year Treasury bonds and the S&P 500 index both lost more than 10% on a total-return basis. Longer duration paper performed even worse - 30-year US Treasuries were down by 33% and registered the worst annual performance ever. As a result, even the much-heralded portfolio of 60% equities and 40% bonds dropped by 24%, the worst return for this type of portfolio since 1930.

While years in which stocks and bonds have both declined are rare, the silver lining is that they have typically been followed by a sharp rebound. The sample size is small given how rare the occurrence is but on average the S&P 500 logged a total return of 17.6% in the following year after stocks and bonds declined in tandem.

Figure 2: S&P 500 returns the year following a decline in stock & bonds

| Years When Stocks And Bonds Both Declined | Next Year's S&P 500 Total Return | Next Year's 10-Yr. Bond Total Return | | |
|---|--|--|--|--|
| 1890 | 22.6 | -0.8 | | |
| 1907 | 44.5 | 5.5 | | |
| 1917 | 25.6 | 4.6 | | |
| 1931 | -8.9 | 8.9 | | |
| 1969 | 4.0 | 18.9 | | |
| 2022 | ? | ? | | |
| Average | 17.6 | 7.4 | | |

Sixteen02 Global Equities UCITS Fund 2022 Performance Review (continued)

Fund and market update (continued)

Figure 3: Five Largest Holdings as of December 2022

| 1 | ASML Holding N.V. |
|---|-------------------------------|
| 2 | Mastercard Incorporated |
| 3 | NVIDIA Corporation |
| 4 | Thermo Fisher Scientific Inc. |
| 5 | TSMC |

Holdings shown in alphabetical order

A number of variables worth understanding more deeply have driven this relative and absolute underperformance.

At the last Federal Open Market Committee ("FOMC") meeting in 2021, the Federal Reserve ("Fed") expected a median rate of 0.9% by the end of 2022 and a peak rate of 2.1% by 2024 which they thought would be sufficient to control inflation. Fast forward to today, the Fed ended 2022 at a median rate of 4.4% and expects a peak rate of 5.1% by 2023. In response to this rapid hiking cycle, Mr Market compressed multiples, punishing some areas of the market more severely than others. A rolling bear market ensued with several, painful corrections, followed by prolonged rallies, which created an illusion that we are finally out of this malaise!

On a sector basis, software was one of the hardest hit in the portfolio. Despite hefty headwinds in the form of a strong Dollar and skyrocketing energy costs (especially at the cloud hyper-scalers), these companies are on track to deliver or beat their guidance for 2022. Separately, the payments and healthcare sectors enjoyed robust earnings growth and relatively less multiple contraction as they continue to benefit from global re-opening.

Moving forward, 2023 looks to be a year of reckoning, as it will become clearer whether the Fed's response was adequate in taming inflation. Although recent data points to some success, the Fed may continue its tightening stance for a while longer so as not to repeat the mistakes made in 1960s - 1970s. As such, there is a range of possible macro-outcomes for 2023, from a deep recession at one end, to a return of pre-2022 era of above-average growth and easy monetary policy at the other end. Current expectations are centered around a "soft landing", where the economy experiences a mild or no recession and inflation eases to target levels with no further central bank tightening.

Whatever the scenario may be, it is important to bear in mind that all recessions and bear markets eventually end, and history suggests that stock markets could rebound about six months before the economy does.

Figure 4: Stocks have been leading the economy

Source: CG

At a fundamental level, the focus is now on earnings as investors try to envisage what a recession may mean to different companies and in what form or environment these companies will find themselves post-recession.

Sixteen02 Global Equities UCITS Fund 2022 Performance Review (continued)

Fund and market update (continued)

Most of the companies in your portfolio are beneficiaries of a strong secular trend, if not multiple such trends. They are disintermediating existing legacy players and continue to win market share. For example, Amazon is still benefiting from penetration of e-commerce (which is circa 22% of US retail sales versus >60% in some countries such as South Korea, China), and the transition to the cloud. Adyen, PayPal, Visa & Mastercard are still riding the secular shift to electronic payments, while Taiwan Semiconductor (TSMC) and ASML are benefitting from the diffusion of semiconductors into all aspect of life. Nvidia benefits from the emergence of big data and artificial intelligence & machine learning use cases: ChatGPT & DALLE-E are recent example of such use-cases that have real ramifications in the business world. History suggests that such secular trends do not dissipate due to market cycles and often emerge stronger post cyclical correction.

Secondly, management teams are rapidly responding to the changing environment. They are refocusing and reprioritizing their opex and capex to meet new challenges. For example, last week Salesforce announced that they will accelerate head count reduction and rationalize their real estate portfolio. We estimate the proposed actions have brought forward margin expansion of as much as 500 basis points by about two years, strengthening our original investment thesis even more.

We expect similarly aggressive moves from other portfolio companies too. Given cash rich balance sheets and attractive valuations, opportunistic acquisitions may serve to strengthen the moats of a number of our portfolio companies. All in all, we expect our portfolio companies to generate relatively better earnings growth in 2023 and emerge much stronger than before.

In the fourth quarter, we utilized the bear market drawdowns to our advantage and increased our existing holding in Nvidia, ASML and TSMC, as we felt that these names were washed-out both on earnings expectations and multiples. Similarly, we added to some of our software names such as Service Now as it continues to execute well and its valuation is even more attractive. We initiated a position in Eli Lilly and then added to it as we grew more confident of its product cycle and execution. We remain interested in a few other names and look forward to discussing them in future letters.

Eighteen 48 Partners Limited

Solanas ESG Sustainability UCITS Fund 2022 Performance Review

The shares of the Sub-Fund were fully redeemed on 30 November 2022 and the Sub-Fund terminated on this date.

Leucadia Asset Management LLC

Tosca Micro Cap UCITS Fund 2022 Performance Review

The Sub-Fund reported a return of -26.55% versus the -30.7% return of the FTSE AIM All-Share TR Index.

The top five contributors to performance were Crestchic Plc (+2.5%), Ashtead Technology (+1.4%), Fonix Mobile (+0.8%), Wandisco (+0.7%) and Kistos (+0.5%). Detractors to performance included Synairgen (-3.0%), Essensys Group (-1.8%), Tungsten West (-1.5%), MusicMagpie (-1.3% and Maxcyte (-1.1%).

Following a torrid 2022 dominated by macro-economic and geopolitical factors such as soaring inflation, rising interest rates, recession fears, the Ukraine War and China COVID-19 policy, equity markets remained volatile but were able to regain some semblance of stability towards the latter part of the year. In this challenging environment we identified a number of medium to longer term trends and positioned the portfolio accordingly. Such themes include energy security (owning and controlling resources, investing in alternative energy), corporate productivity (digitization across public and private markets is long overdue) or managing wider security issues (be they internet based or defense focused). These are all areas of material opportunity and the Sub-Fund is exposed to a host of names that are well placed to be net winners from these multi-year trends.

Additionally, the stock picking focus was shaped by a number of guiding principles:

- Scale gearing towards companies that are either of a certain scale already or have the clear potential to achieve such scale (the average market cap in the Sub-Fund increased during 2022);
- · Robust Balance Sheets given that rescue equity raises are hard and costly in this market, and
- Management Conviction high inside ownership.

The result of this approach is that the smaller stocks by market capital have the smallest weighting in the portfolio. Stocks of the Sub-Fund with less than £50m have a weighting percentage of less than 1% NAV, while companies above £250m in market capitalization have an average 2.8% of NAV. Additionally, the average management shareholding across the portfolio is 14% and the average leverage (excluding Spire which has substantial asset backing) is circa 0.5 times of EBITDA.

As we reflect on what has been a difficult year for the Sub-Fund, we are hoping that there are still opportunities to deploy capital in companies that are well placed to grow despite macro uncertainties, given a mixture of their assets, geographic and sector exposure plus management acumen, the latter being critical in trying times.

As at 31 December 2022, the Sub-Fund held circa 13% of NAV in cash providing a healthy level of firepower as we continue to seek out gems and, where sensible, recycle capital from other holdings. The opportunity set for the Sub-Fund stocks has not gone away. Indeed, we believe that it has got even bigger as we look forward to a more normalized environment in 2023 where company specific fundamentals become the more dominant factors allowing for alpha generation from a proven, fundamental stock-picking investment process.

Toscafund Asset Management, LLP

Tosca UCITS Fund 2022 Performance Review

The Sub-Fund reported a full year net return of 7.96% (GBP Founder Shares) in 2022.

The top contributors to performance in the period were banks (mainly UK and European), which represented by far the largest sub-sector exposure in the Sub-Fund (circa 50% of long exposure). Within the bank holdings, notable contributions came from Bank of Ireland (+2.1%), Commerzbank (+1.6%), Natwest Group (+1.5%) and Bank of Baroda (+2.1%). The insurance subsector also made a helpful contribution to 2022 Sub-Fund returns led by Lancashire Holdings (+1.8%).

The main detractors to performance came from our long position in 888 Holdings Plc (-2.1%), which underperformed on concerns over debt levels, regulation and integration execution issues, and the Sub-Fund's short positions in the Turkish banks Akbank (-1.1%) and Yapi Ve Kredi Bankasi (-1.1%) as Turkish investors sought "safety" in equities as inflation rose over 80%.

Overall, 2022 was dominated by macro factors and geopolitical issues such as inflation, rising interest rates, recession fears, the Ukraine war and China COVID-19. Given the extent of such uncertainties, the Sub-Fund generally maintained its net and gross exposures towards the lower end of the typical historical ranges during the year. The sharp increases in interest rates by global central banks, including the European Central Bank ("ECB"), to counter elevated inflation levels has provided a highly compelling backdrop for bank earnings, although valuations remained close to all-time relative and absolute lows given the fears of an interest rate-induced recession and the resulting impact on credit quality.

Outlook

In 2023, our highest conviction remains in the European banking space as we see further profit upgrades, outsized capital returns and maybe even some accretive M&A while valuations remain at both absolute and relative lows. In our view, investors and many analysts are way behind the curve here, focusing on the impact of a European recession rather than the much larger benefit of rising rates. Our forecasts are 20-40% above consensus for 2024, leaving us owning several banks with 20% free cashflow yields. This is clearly unsustainable, and we see potential upside of 50-100% for the bank stocks we own.

We also expect to see a material change in equity flows towards Europe, which would be highly beneficial to our bank positions.

While European banks make up 50% of our long positions, we are also excited by two other areas within our universe where we have been building positions in the last few months: Reinsurance and China Reopening plays.

Similar to the banks space, the reinsurance industry has been significantly impacted by the low-interest rate world. The reinsurers lost their float income of up to 50% of their profits, while "outsiders" put pressure on pricing as they came into the industry seeking uncorrelated returns. This, combined with a period of outsized natural catastrophes, left the industry at unsustainably low levels of profitability. The response has been a material 30-50% increase in pricing while also reducing the risk coverage. We believe that this will have an underappreciated impact on the sector's profitability and, with many of the stocks still trading at mid-single digit P/Es versus low double digits over time, there remains substantial upside. We have exposure to four reinsurers and they make up circa 10% of the Sub-Fund.

China is reopening, and we are using the European/US 2020/2021 playbook to take advantage. We have added to our position in Prudential, which is set to benefit from a huge increase in insurance sales as the Hong Kong/China border reopens. We have also added to our position in HSBC and introduced a position in Melco to take advantage of the reopening of Macau. Finally, we retain our two positions in the Chinese property management space, which trades at sub-4 times earnings but should be a major beneficiaries of both the reopening of China and government actions to restart the Chinese property market. Our Chinese-related positions make up 12% of the Sub-Fund.

The remainder of our long positions are more idiosyncratic, with our short positions primarily focused on the European real estate space, where we continue to see material downside.

Toscafund Asset Management, LLP

Trinity Street Global Equity UCITS Fund 2022 Performance Review

The Sub-Fund USD A Class ended 2022 with an absolute return of -9.9% but ahead of the MSCI ACWI NDR Benchmark by 10.4% net and has 2.1% net annualised outperformance over 3 years, 0.22% net annualised over 5 years and 1.10% net annualised over 10 Years.

The uncorrelated returns with the indices in 2022 were stark within sectors and regions: in the Sub-Fund's portfolio the largest sector exposure was to Industrials, at 24.6%, which is almost triple that of the MSCI ACWI NDR benchmark (9.7%), but whereas the benchmark return on this sector exposure was -13.1%, the return for the portfolio sectoral exposure was +24.2%; that is the power of stock selection. Other good relative contributions came from Communication Services, Healthcare and the Consumer Discretionary Sectors. One of the worst performing sectors in the Index was Information Technology (-31.1%), which was also the largest single sectoral exposure at 21.4% of the Index; the Sub-Fund's portfolio of IT stocks was of similar size at 21.7% of the exposure and a drag which was also similar at -30.8%, contributing by far the largest absolute drag to returns. Utilities and Energy were single stock exposures but the returns compared unfavorably to the Index, especially in energy.

By region, the most interesting data points were the portfolio exposure to Europe ex-UK where at 25.6% (compared to the Index at 12.2%) the return was an absolute positive of 0.6%, whereas within the Index the return was -18.2%. The other major positive was in North America where the 50.4% exposure of the portfolio suffered a drag of -6.6%, whereas in the benchmark the exposure was 64.3% and the drag -19.5%. Less flattering was the performance in Japan where the 7.8% portfolio exposure suffered a -25.2% drag compared to -16.7% in the benchmark (on an exposure of 5.5%).

Individual stock contribution unusually varied in 2022 with much of the contribution coming from the defence holdings of Rheinmetall, Thales, Lockheed Martin and Northrop Grumman, but there were also good contributions from Cigna, Astra Zeneca, Activision, Rentokil and Mowi. Several of the holdings in the defence sector have been in the portfolio for some time (Thales from June 2021, Rheinmetall from December 2018), whereas Lockheed and Northrop were more recent (September 2021 and February 2022 respectively) with each investment having a specific structural change independent from the overall level of defence spending. Rheinmetall was close to its target price in early 2022 before the Russian invasion of the Ukraine totally changed the long-term outlook for European defence spending, and so necessitated a review of the stock return target. It is now almost certain that Europe will embark on a multi-decade long increase in its defence budgets, as will other nations such as Japan, Australia and South Korea in response to the threat from China. As multinationals, we believe these defence companies will benefit from the rollout of projects globally, be they the new missile defence systems proposed in Japan, or the armoured fighting vehicles, artillery and munitions which are being built in Australia as well as in Europe and in South Africa.

There were a significant number of stocks detracting from performance in 2022 with five holdings losing more than 35%: Qualcomm, SK Hynix, Fortum, Icon and Shimano. All these positions continue to be in the portfolio in 2023. Portfolio turnover declined in 2022 to 18%. Following a third quarter in which there was no turnover, the fourth quarter was also subdued with the only change being the sale of our Terminix position around the corporate action with Rentokil, which we continue to own.

Trinity Street Asset Management, LLP

Virtuoso UCITS Fund 2022 Performance Review

| | Jan | Feb | March | April | May | June | July | Aug | Sept | Oct | Nov | Dec | YTD |
|------|-------|-------|-------|-------|-------|-------|------|-------|-------|-------|------|-------|---------|
| 2022 | -1.48 | -2.34 | -2.18 | -6.42 | -0.76 | -5.15 | 5.68 | -2.66 | -6.52 | -1.07 | 3.84 | -4.46 | -21.79% |

A number of spectacular occurrences from the recently passed year, including the conflict in Ukraine and the ensuing shocks to the energy and food supply, will be recalled. The monetary policies of the world's central banks have changed from being accommodative to being restrictive. Starting in March 2022, the Federal Reserve ("Fed") increased interest rates by a stunning one thousand seven hundred percent (1700%), from 0.25% to 4.50%, in less than 10 months. These quite bleak, and to a large extent unanticipated, scenarios contributed to the worst yearly performance in bonds and equities seen in over a decade. In 2022, we saw declines in the NASDAQ of 32.5%, the MSCI World Index of 19.45%, the S&P 500 Index of 19.68%, the Euro Stoxx 600 of 12.81%, and the Shanghai Shenzhen CSI 300 Index of 21.63%. Despite our interventions aiming to adapt to the fast changing market conditions, our portfolio fell short of the desired level of resilience. Our year-end performance was negative by 21.79% due to a mix of a few underperforming single stock investments and our initial regional and sector allocation.

Environmental, Social and Governance ("ESG") investing is gaining popularity as assets managed in ESG-related strategies increase. We would urge investors to select managers that can articulate the role of these factors in the investment process instead of simply providing a plethora of scores with questionable impact. Our focus on Governance has borne fruits this year with short positions in companies pursuing excessive top management compensation such as Intel and Unity Software.

Outlook

The core investment thesis in most of our holdings has not changed, although in some cases, the time horizon has been extended. As the environment stabilizes we might be surprised by how resilient many of our holdings are over a longer time frame, where macroeconomic and geopolitical factors are less important. For example, Renault lost a third of its value in February and March due to its Russian exposure, to recover completely by the end of the year. Our goal for the Sub-Fund is to resume its upward return track.

ESG Centered Corporate Engagement is becoming more popular as energy security takes center stage as a result of the conflict in the Ukraine. Furthermore, regulatory changes are slowly but surely increasing the attention of the C-suite and boards to ESG issues.

Tavira Financial Limited

Report on the audit of the financial statements

Opinion

We have audited the financial statements of 1OAK Multi Asset 80 UCITS Fund, ABR 75/25 Volatility UCITS Fund, Advent Global Partners UCITS Fund, AlphaQuest UCITS Fund, Angel Oak Multi-Strategy Income UCITS Fund, Ash Park Global Consumer Franchise UCITS Fund, Burren Global Arbitrage UCITS Fund, Chelodina UCITS Fund, Chilton Small Cap European UCITS Fund, Collidr Adaptive Global Equity UCITS Fund, Collidr Global Growth Strategy UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, Crabel Advanced Trend UCITS Fund, Crabel Gemini UCITS Fund, Descartes Alternative Credit UCITS Fund, Disciplined Alpha U.S. Long Short UCITS Fund, DUNN WMA Institutional UCITS Fund, Giano UCITS Fund, Invenomic US Equity Long/Short UCITS Fund, Ironshield Credit Fund, Ironshield High Yield Alpha Fund, Kayne Anderson Renewable Infrastructure UCITS Fund, MontLake Abrax Merger Arbitrage UCITS Fund, MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund, Mygale Event Driven UCITS Fund, Nutshell Growth Fund, Perspective American Absolute Alpha UCITS Fund, RoboCap UCITS Fund, SHARP UCITS Fund, Sixteen02 Global Equities UCITS Fund, Solanas ESG Sustainability UCITS Fund, Tosca Micro Cap UCITS Fund, Tosca UCITS Fund, Trinity Street Global Equity UCITS Fund and Virtuoso UCITS Fund (collectively "the Sub-Funds") of MontLake UCITS Platform ICAV ('the ICAV') for the year ended December 31, 2022 set out on pages 93 to 336, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows and related notes, including the summary of significant accounting policies set out in note 2.

In our opinion:

- the financial statements of each of the Sub-Funds of the ICAV give a true and fair view of the assets, liabilities and financial position of each of the Sub-Funds of the ICAV as at December 31, 2022 and of their changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Acts 2015 to 2021 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the ICAV in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF MONTLAKE UCITS PLATFORM ICAV (continued)

Report on the audit of the financial statements (continued)

Emphasis of matter – non-going concern basis of preparation – Solanas ESG Sustainability UCITS Fund, Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund

We draw attention to the disclosure made in note 1 to the financial statements which explains that the financial statements of Solanas ESG Sustainability UCITS Fund, Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund are not prepared on the going concern basis for the reason set out in that note. Our opinion is not modified in respect of this matter.

Conclusions relating to going concern

In auditing the financial statements of the Sub-Funds, other than for the financial statements of Solanas ESG Sustainability UCITS Fund, Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, other than for the financial statements of Solanas ESG Sustainability UCITS Fund, Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on any of the Sub-Fund's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the Directors' Report, the Directory, the General Information, the Depositary Report to Shareholders, the Investment Managers' Reports, the Sub-Fund Performance Data and the Unaudited Schedules. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work undertaken during the course of the audit, we have not identified material misstatements in the other information.

Opinion on other matter prescribed by the Irish Collective Asset-management Vehicles Acts 2015 to 2021

In our opinion, the information given in the Directors' Report is consistent with the financial statements.

Matters on which we are required to report by exception

The Irish Collective Asset-management Vehicles Acts 2015 to 2021 requires us to report to you, if in our opinion, the disclosures of Directors' remuneration specified by law are not made. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF MONTLAKE UCITS **PLATFORM ICAV (continued)**

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on page 20 to page 21, the directors are responsible for the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing each of the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate any of the Sub-Funds of the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-thefinancial-statements/.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the shareholders of each Sub-Fund of the ICAV, as a body, in accordance with the Section 120 of the Irish Collective Asset-management Vehicles Act 2015. Our audit work has been undertaken so that we might state to the each of Sub-Funds' shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Sub-Funds of the ICAV and each of the Sub-Funds' shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

BASIS OF PREPARATION

(a) Statement of compliance

The financial statements of the Sub-Funds of the ICAV (the "Financial Statements"), which are authorised at 31 December 2022, are prepared in accordance with IFRS and with the requirements of the Act and pursuant to the provisions of the UCITS Regulations and the Central Bank UCITS Regulations.

The Financial Statements are prepared on a Sub-Fund basis.

(b) Basis of Measurement

The Financial Statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss which have been measured at fair value. Items included in the ICAV's financial statements are measured using the currency of the primary economic environment in which the respective Sub-Funds operate (the "functional currency"). The functional currency, which is either USD, GBP or EUR, is shown in the Statement of Financial Position of each Sub-Fund. The ICAV has also adopted these functional currencies as the presentation currency of each of the Sub-Funds.

The Financial Statements for the Sub-Funds for the year ended 31 December 2022 have been prepared on a going concern basis, except those for Solanas ESG Sustainability UCITS Fund, Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund which terminated on 30 November 2022, 31 January 2023 and 21 April 2023 respectively. The Financial Statements for these Sub-Funds have been prepared on a basis other than that of going concern. The comparatives relating to Solanas ESG Sustainability UCITS Fund have been prepared on a going concern basis for the period since launch to 31 December 2021. The comparatives relating to Collidr Global Growth Strategy UCITS Fund and Giano UCITS Fund have been prepared on a going concern basis for the year ended 31 December 2021.

In all other respects, the accounting policies set out in Note 2 have been applied consistently to all periods presented in these financial statements.

(c) Use of Estimates and Judgements

The preparation of the Financial Statements in conformity with IFRS requires the ICAV to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the Financial Statements are the functional currency disclosed in Note 1 (b) and in the involvement with unconsolidated structured entities in Note 14.

Estimates

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 31 December 2022 is included in Note 10 and relates to the determination of fair value of financial instruments.

2. SIGNIFICANT ACCOUNTING POLICIES

- (a) Financial Instruments
- (i.) Classification

The ICAV classifies financial assets and liabilities into the following categories:

Financial assets at fair value through profit or loss:

Assets

The ICAV classifies its investments based on both the ICAV's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The ICAV is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The ICAV has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of each Sub-Fund's debt securities are solely principal and interest. However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the ICAV's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

Financial liabilities at fair value through profit or loss:

Liabilities

The ICAV takes short positions synthetically using derivatives in pursuance of the relevant Sub-Fund's investment policy. Derivative contracts that have a negative fair value are classified as financial liabilities at fair value through profit or loss.

As such, the ICAV classifies all of its investment portfolio as financial assets or liabilities as fair value through profit or loss.

The ICAV's policy requires the Manager and the Board of Directors to evaluate the information about these financial assets and financial liabilities on a fair value basis together with other related financial information.

Financial assets at amortised cost:

The ICAV measures cash and deposits with credit institutions, collateral and margin cash, balances due from brokers, dividends and other receivables at amortised cost.

Financial liabilities at amortised cost:

The ICAV measures amounts owing to credit institutions, balances due to brokers, redemptions payable and other payables and accrued expenses at amortised cost.

Recognition and Measurement

The ICAV recognises financial assets and financial liabilities on the date it becomes party to the contractual provisions of the instrument. Transactions are recognised using trade date accounting.

Financial assets and liabilities categorised as at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income, whilst on other financial instruments they are amortised. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets and financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method, less impairment loss, if any. Financial liabilities arising from the redeemable participating units issued by a Sub-Fund are carried at the redemption amount, representing the shareholders' right to a residual interest in that Sub-Fund's assets.

- 2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
- (a) Financial Instruments (continued)
- (i.) Classification (continued)

Subsequent Measurement

After initial measurement, the ICAV measures financial instruments which are classified as at fair value through profit or loss, at their fair value. Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs.

Assets traded on a market shall be valued for financial reporting purposes at the last traded price on the relevant market at the most recent close of business on the market, taking into account any premium or discount if appropriate.

Liabilities traded on a market shall be valued at the last traded price on the relevant market at the most recent close of business on the market, taking into account any premium or discount where the liability was acquired or trades at an off-market premium or discount if appropriate.

For any investment for which a quoted market price is not available on a recognised stock exchange or from a reputable broker/counterparty or which is not normally traded on a market, the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction and is estimated with care and in good faith by the Directors or by a competent person appointed for such purpose by the Directors and approved by the Depositary.

Cash deposits held with credit institutions and similar instruments shall be measured at amortised cost together with accrued interest.

Derivatives traded on a market shall be measured at the settlement price as determined by the relevant market at the close of business on the market, provided that where it is not the practice of the market to quote a settlement price, or if a settlement price is not available for any reason, a derivative shall be measured at its fair value estimated with care and in good faith by the Directors or a competent person appointed by the Directors and approved for the purpose by the Depositary.

Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred.

The ICAV derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Impairment

IFRS 9 uses an expected credit loss ("ECL") model. This impairment model applies to financial assets measured at amortised cost, contract assets and debt investments at fair value through other comprehensive income, but not to investments at fair value through profit or loss. IFRS 9 requires the ICAV to record ECLs on all of its loans, if any, and trade receivables, either on a 12-month or lifetime basis. Given the limited exposure of the ICAV to credit risk, this does not have a material impact on the financial statements. The ICAV only holds receivables with no financing component and which have maturities of less than 12 months at amortised cost. The ICAV has therefore adopted an approach similar to the simplified approach to ECLs. The simplified approach to ECLs determines the ECL using the following formula: the exposure at default multiplied by the probability of default multiplied by the expected percentage value of a loss, given a default.

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (a) Financial Instruments (continued)
- (ii.) Specific Instruments

Forward Currency Contracts

Forward currency contracts are measured at their fair value by reference to the forward price at which a new forward currency contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward currency contracts is calculated as the difference between the forward rate for the transaction specified in the contract and the forward rate on the valuation date as reported in published sources, multiplied by the notional amount of the forward currency contract. Any resulting unrealised gains are recorded as assets and unrealised losses are recorded as liabilities in the Statement of Financial Position.

Realised gains and losses are recognised in the Statement of Comprehensive Income at the time the forward currency contract settles. Realised and unrealised gains and losses applicable to forward currency contracts entered into at Sub-Fund level are allocated at Sub-Fund level.

Certain Sub-Funds and share classes incur foreign currency risk in a currency other than the reporting currency of the Sub-Fund or share class. Certain Sub-Funds manage their exposure to currency risk through the use of forward currency contracts.

Where gains and losses arise on foreign exchange transactions that are taken to hedge the currency exposure of share classes denominated in a currency other than the base currency of the Sub-Fund involved, such gains and losses are allocated solely to those share classes.

Futures Contracts

While futures contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by marking-to-market on a daily basis to reflect the value of the contracts at the end of each day's trading. Futures contracts are measured at the settlement price established each day by the exchange on which they are traded and the Sub-Fund's investment therein is included in the Statement of Financial Position. The Sub-Funds recognise realised and unrealised gains or losses in the Statement of Comprehensive Income.

Options

Exchange traded options are measured at fair value based on the closing price on the relevant valuation date. Over the counter options are measured based on the closing price as provided by the relevant counterparty or market source.

The premium on purchased put options exercised is subtracted from the proceeds of sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currency purchased.

Premiums received for written options which expire unexercised are treated as realised gains. For unsettled positions, unrealised gains or losses are recognised in the Statement of Comprehensive Income.

Warrants

Certain Sub-Funds may invest in warrants. Warrants which are fully paid up and have a zero strike price exhibit the identical risk and return characteristics as in the case where the Sub-Fund had acquired the underlying equity directly. Such warrants are measured at the market price for the underlying equity quoted on the stock exchange or principal market on which it is listed or, if the market price is unavailable or unrepresentative, the last available market price on such stock exchange or market.

Swaps

All swaps contracts are measured at fair value through profit or loss. The unrealised gain or loss is reported as an asset or liability and changes in the market value are reflected in the Statement of Comprehensive Income in the year in which they occur.

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (a) Financial Instruments (continued)
- (ii.) Specific Instruments (continued)

Contracts for Difference

During the period in which contracts for difference are open, the changes in the contract values are recorded as unrealised gains or losses. The Sub-Funds recognise a realised gain or loss when the contract is closed. Movements in the unrealised gains or losses on contracts for difference are recorded in the Statement of Comprehensive Income.

Investment Funds

Investments in investment funds are measured at the latest available unaudited net asset value per share as published by the relevant investment fund or, if listed or traded on a recognised exchange, will be measured at the official closing price in the event that the valuation point of the fund is close of business in the relevant market on a dealing day and otherwise at the last traded price.

Structured Notes

Certain Sub-Funds may invest in structured notes for which the coupon payment, principal repayment or repayment schedule varies according to pre-agreed conditions relating to fluctuations in another asset such as a currency or a stock index. Structured notes are measured at fair value through profit or loss.

Asset Backed Securities

The Sub-Funds record the principal repayments of Asset Backed Securities ("ABS"), Mortgage Backed Securities ("MBS"), Collateral Mortgage Obligations ("CMOs"), Collateralised Loan Obligations ("CLOs") and Collateralised Debt Obligations ("CDOs") as they arise and realises gains and losses in net gains/(losses) on financial assets at fair value through profit or loss on the Statement of Comprehensive Income in the period in which they occur. ABS, MBS, CMOs, CLOs and CDOs are measured at fair value based on their quoted market price at the Statement of Financial Position date.

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where the Sub-Fund currently has a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The ICAV generally has ISDA Master Agreements with its counterparties for OTC derivatives. Under certain conditions, as set out under the agreements, amounts payable by one party to the other in respect of derivative contracts covered by the agreements may be offset against any other amounts payable by the payee to the payer.

Cash and cash equivalents, Deposits with credit institutions, Deposits owing to credit institutions, Margin at brokers and Cash which is subject to collateral arrangements

Cash and cash equivalents and deposits with credit institutions at 31 December 2022 are disclosed in Note 9 and include all unencumbered cash held. Cash equivalents are short-term liquid investments that are readily convertible to known amounts of cash, and are subject to an insignificant risk of a change in value.

Margin at broker represents cash deposits with brokers and counterparties, transferred to the broker or counterparty as collateral against open financial derivative instrument positions.

Cash which is subject to collateral arrangements represents cash held in an account in the name of the relevant Sub-Fund but over which the counterparty has a security interest. Cash collateral provided by a Sub-Fund is identified in the Statement of Financial Position as a collateral asset and is not included as a component of cash and cash equivalents. Cash collateral received by a Sub-Fund is identified in the Statement of Financial Position as collateral liability and is not included as a component of cash and cash equivalents.

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (a) Financial Instruments (continued)
- (ii.) Specific Instruments (continued)

Cash and cash equivalents, Deposits with credit institutions, Deposits owing to credit institutions, Margin at brokers and Cash which is subject to collateral arrangements (continued)

Certain Sub-Funds may pledge or receive collateral other than cash i.e. securities being US Treasury Bills. If the Sub-Fund has to pledge collateral to the counterparty they will deliver underlying securities which comprise US Treasury Bills to the counterparty's depositary. If the Sub-Fund receives collateral other than cash then the counterparty will deliver the securities to the Sub-Fund through physical deposit with the Sub-Fund's Depositary. If the collateral is in the form of securities they are held in the custody of the Depositary and similarly if cash is received it is held by the Depositary on behalf of the Sub-Fund. Collateral pledged to the Sub-Fund as at 31 December 2022 is disclosed in the applicable Schedule of Investments.

See also Note 9 to the financial statements for full details of margin at broker and cash which is subject to collateral arrangements as at 31 December 2022.

Amounts due to/from broker

Amounts due to and owing from broker represents cash and cash equivalents held with a Sub-Fund's clearing brokers and various other brokers, as well as amounts receivable for securities sold and payables for securities purchased or sold that have been contracted for but which have not yet been settled or delivered on the Statement of Financial Position date.

Redeemable Participating Shares

The ICAV classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instrument.

All redeemable participating shares issued by the Sub-Funds provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Sub-Funds' net assets at the redemption date. In accordance with IAS 32 such instruments give rise to a financial liability for the present value of the redemption amount.

Equalisation on Redeemable Participating Shares

Equalisation on redeemable participating shares is accrued income included in the price of shares purchased and redeemed during the accounting year. The subscription price of redeemable participating shares is deemed to include an equalisation payment calculated by reference to the accrued income of the relevant Sub-Fund. The redemption price of each redeemable participating share will also include an equalisation payment in respect of the accrued income of the relevant Sub-Fund up to the date of redemption. Equalisation on redeemable participating shares is detailed on the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares of each Sub-Fund where applicable.

(b) Net gain/(loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss

Net gain/(loss) on financial assets and liabilities at fair value through profit or loss include all realised and unrealised fair value changes and foreign exchange differences but excludes interest and dividend income and expenses. The ICAV uses the first-in first-out ("FIFO") method to determine realised gains and losses on derecognition.

(c) Foreign Currency Transactions

Transactions during the year, including purchases and sales of securities, income and expenses, are translated at the rate of exchange prevailing on the date of the transaction. Foreign currency gains and losses are included in realised and unrealised gain and loss on investments, and in net gain/(loss) on financial assets and liabilities at amortised cost in the Statement of Comprehensive Income.

(d) Income and Expense

Dividend income on long positions and dividend expense on short positions are recognised as income and expense respectively, on the dates the securities are first quoted as "ex-dividend". Other income and expense items are accounted for on an accruals basis. Dividends payable to holders of Redeemable Participating Shares are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend".

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Effective Yield

Interest income and expense presented in the Statement of Comprehensive Income comprises interest on financial assets and financial liabilities measured at amortised cost calculated on an effective yield basis. The 'effective yield' is the interest rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective yield is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective yield to the amortised cost of the financial asset. If the asset is no longer credit impaired, then the calculation of interest income reverts to the gross basis.

Interest income from financial assets at fair value through profit or loss is comprised of interest on financial instruments which are measured at fair value through profit or loss.

(f) Transaction costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of fixed income securities and forward currency contracts are included in the purchase and sale price of the investment. Information on transaction costs for bonds and forward currency contracts cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities are included in Other Expenses in the Statement of Comprehensive Income for each Sub-Fund during the year and are disclosed in Note 6.

(g) Taxation

Capital gains, dividend and interest income received by the ICAV may be subject to withholding tax imposed in the country of origin. Gains and investment income are recorded gross of such taxes and the corresponding withholding tax is recognised as a tax expense. Tax reclaims are accounted for on a cash receipts basis.

(h) Establishment Expenses

Under IFRS costs of establishment are charged immediately to the statement of comprehensive income after the launch of a Sub-Fund. In accordance with the Prospectus and relevant Sub-Fund Supplements, for dealing purposes, costs of establishment for newly-established Sub-Funds are amortised on a straight line basis over a period of up to 3 years. The Sub-Funds do not make these adjustments to establishment expenses.

(i) Swap Financing Costs

These are costs borne by certain Sub-Funds of the ICAV in entering into swap contracts. These costs include dividend, contract for difference and interest expenses.

(j) Other accounting standards

New and amended accounting standards in issue that have been adopted:

'Reference to the Conceptual Framework (Amendments to IFRS 3)' updates an outdated reference in IFRS 3. The amendments are effective for annual periods beginning on or after 1 January 2022, with earlier application permitted. The adoption of the standard has not had a material impact on the ICAV.

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(j) Other accounting standards (continued)

New and amended accounting standards in issue that have been adopted: (continued)

'Annual Improvements 2018-2020' makes amendments to IFRS 1, IFRS 9 and IAS 41. The amendments are effective for annual periods beginning on or after 1 January 2022. The adoption of the standard has not had a material impact on the ICAV.

There are no other standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2022 that have a material effect on the financial statements of the ICAV.

Accounting standards in issue that are not yet effective and have not been early adopted:

Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statement 2, Definition of Accounting Estimate – Amendments to IAS 8 are in issue, are not yet effective and have not been early adopted by the ICAV. The impact of the amendments on the ICAV is currently being assessed.

There are no other standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2022 that have a material effect on the financial statements of the ICAV.

3. TAXATION

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. The ICAV will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a "Relevant Period", being an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A chargeable event does not arise in respect of:

- (i) Transactions by a shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the ICAV; or
- (ii) Transactions by certain exempted Irish resident investors who have provided the ICAV with the necessary signed statutory declaration; or
- (iii) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (iv) An exchange of shares representing one Sub-Fund for another Sub-Fund of the ICAV; or
- (v) An exchange of shares arising on a qualifying amalgamation or reconstruction of the ICAV with another ICAV;
- (vi) Certain exchanges of shares between spouses and former spouses.

Capital gains, dividends, and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

Uncertainty over income tax treatments

IFRIC 23 - Uncertainty over Income Tax Treatments clarifies how the recognition and measurement requirements of IAS 12 Income taxes are applied where there is uncertainty over income tax treatments. When there is uncertainty over income tax treatments, the Directors will determine whether to disclose the following:

- a. judgements made in determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.
- b. information about the assumptions made and other estimates used in determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

If it is probable that a taxation authority will accept an uncertain tax treatment, the Directors shall determine the taxable amount consistently with the tax treatment used or planned to be used in its tax filings and will determine whether to disclose the potential effect of the uncertainty as a tax-related contingency.

5. FEES AND EXPENSES

Management/Platform Fee

Up to 22 October 2021, the Manager received a management fee from the ICAV (the "Management Fee") in respect of each Sub-Fund. For Sub-Funds launched after this date, the Manager has adopted a new fee model consisting of a combined management, administration and depositary fee (a "Platform Fee"), out of which it is remunerated and out of which it also pays the fees of the Administrator and the Depositary, and certain other operating costs, in respect of each Sub-Fund to which the new fee model applies. The Manager intends to adopt a Platform Fee for all of the Sub-Funds in place of a Management Fee over time. Shareholders in a number of the existing Sub-Funds have approved the substitution of a Platform Fee for a Management Fee with effect from 1 January 2023, and the Manager intends to seek approval for a similar change from the Shareholders of any remaining Sub-Funds over time.

For those Sub-Funds which were subject to a Management Fee during the year, the Management Fee for each of the following Sub-Funds was payable by the Sub-Fund as a whole at the rates below, subject to a minimum fee where shown:

| Sub-Fund | Management Fee | Minimum Fee |
|---|-----------------|------------------|
| 1OAK Multi Asset 80 UCITS Fund | 0.10% per annum | €5,000 per month |
| AlphaQuest UCITS Fund | 0.15% per annum | €5,000 per month |
| Chelodina UCITS Fund | 0.15% per annum | €5,000 per month |
| Chilton Small Cap European UCITS Fund | 0.15% per annum | €5,000 per month |
| Collidr Global Growth Strategy UCITS Fund | 0.05% per annum | €5,000 per month |
| Cooper Creek Partners North America Long Short Equity UCITS | | |
| Fund | 0.10% per annum | n/a |
| Crabel Advanced Trend UCITS Fund | 0.15% per annum | €5,000 per month |
| Crabel Gemini UCITS Fund | 0.15% per annum | €5,000 per month |
| Descartes Alternative Credit UCITS Fund | 0.15% per annum | €5,000 per month |
| Giano UCITS Fund | 0.05% per annum | €5,000 per month |
| Invenomic US Equity Long/Short UCITS Fund | 0.15% per annum | €5,000 per month |
| Ironshield Credit Fund | 0.15% per annum | €5,000 per month |
| MontLake Abrax Merger Arbitrage UCITS Fund | 0.10% per annum | €5,000 per month |
| MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS | | |
| Fund | 0.05% per annum | €5,000 per month |
| Nutshell Growth Fund | 0.15% per annum | €5,000 per month |

| Ash Park Global Consumer Franchise UCITS Fund | - | - | - | - | - | 0.60% | 1.00% | - |
| DUNN WMA Institutional UCITS Fund | 0.20% | - | - | - | - | - | - | - |
| Mygale Event Driven UCITS Fund | _ | 1.00% | 0.85% | _ | _ | _ | _ | _ |

For those Sub-Funds subject to a Management Fee during the year, the Manager has assumed responsibility for the payment of the fees of the Investment Managers, except where a Sub-Fund pays a separate investment management fee, as noted further below. The Manager may from time to time, and in its sole discretion and out of its own resources, decide to pay a rebate to some or all shareholders (or their agents).

Share classes with 0% fee rates are not disclosed in the above table. The ICAV also reimburses the Manager out of the assets of the Sub-Funds for reasonable out-of-pocket expenses incurred by the Manager and the Investment Managers.

The Management Fees accrued during the year ended 31 December 2022 are shown in the Statement of Comprehensive Income and any Management Fees payable at the end of the year are shown in Note 8.

5. FEES AND EXPENSES (CONTINUED)

Management/Platform Fee (continued)

For those Sub-Funds subject to a Platform Fee during the year, the Platform Fee will not exceed the percentage per annum of the Net Asset Value shown for each Sub-Fund below and will be subject to a minimum fee where shown:

| Sub-Fund | Platform Fee | Minimum Fee |
|--|------------------|--------------------|
| ABR 75/25 Volatility UCITS Fund | 0.275% per annum | €160,000 per annum |
| Ironshield High Yield Alpha Fund | 0.25% per annum | €155,000 per annum |
| Kayne Anderson Renewable Infrastructure UCITS Fund | 0.20% per annum | €155,000 per annum |
| Perspective American Absolute Alpha UCITS Fund | 0.18% per annum | €150,000 per annum |

The Platform Fee will accrue at each Valuation Point and is paid monthly in arrears together with reasonable vouched out of pocket expenses incurred by the Manager in the performance of its duties. Notwithstanding anything to the contrary in the Prospectus, the Manager is responsible for paying the fees of the Directors, Administrator, Depositary and the Auditors (in respect of the annual audit only) and these fees shall be discharged out of the Platform Fee received by the Manager. The Platform Fees charged during the period ended 31 December 2022 in respect of the above Sub-Funds are included in Management Fees in the Statement of Comprehensive Income and any Platform Fees payable at the end of the year are included in Management Fees payable in Note 8.

Effective 1 January 2023, Shareholders in the other Sub-Funds have approved the substitution of a Platform Fee for a Management Fee, with the exception of 1OAK Multi Asset 80 UCITS Fund, Collidr Adaptive Global Equity UCITS Fund, Collidr Global Growth Strategy UCITS Fund, Giano UCITS Fund and MontLake Abrax Merger Arbitrage UCITS Fund.

For the year ended 31 December 2022

Investment Management Fees accrued during the year ended 31 December 2022 are shown in the Statement of Comprehensive Income and any Investment Management Fees payable at the end of the year are shown in Note 8.

Performance Fees

A number of the share classes in certain Sub-Funds are subject to performance fees.

The performance fee is paid by the ICAV to the Manager or Investment Manager, depending on the Sub-Fund involved. The calculation of the performance fee is verified by the Depositary.

The performance fee in respect of each of the relevant share classes for all Sub-Funds is calculated annually for the period to 31 December (a "Calculation Period") by reference to the Net Asset Value before deduction for any accrued performance fee. The performance fee is deemed to accrue on a daily basis.

Depending on the share class, the performance fee is calculated using one of two methods. The first method, often referred to as the equalisation method, is calculated on a share-by-share basis so that each share is charged a performance fee, which equates precisely with that share's performance (the "performance fee"). This method of calculation ensures that:

- (i) any performance fee is charged only to those shares which have appreciated in value;
- (ii) all holders of shares of the same class have the same amount of capital per share at risk in the Sub-Funds; and
- (iii) all shares of the same class have the same Net Asset Value per share.

For each Calculation Period, the performance fee in respect of each Class will be equal to the percentage detailed below of the appreciation in the Net Asset Value per share of each Class during that Calculation Period above the Peak Net Asset Value per share of that Class. The Peak Net Asset Value per share ("Peak Net Asset Value per Share") is the greater of (i) the initial offer price or a hurdle rate in the case of certain long-only funds (ii) the highest Net Asset Value per share of the relevant Class in effect immediately after the end of the previous Calculation Period in respect of which a performance fee (other than a performance fee redemption, as defined below) was charged.

With the second method, which is used for pooled share classes issued by some Sub-Funds, the performance fee is based on the performance of the class as a whole without any adjustment for the performance of individual shares.

5. FEES AND EXPENSES (CONTINUED)

Performance Fees (continued)

For some share classes, payment of a performance fee may also be subject to achieving a specified hurdle rate of return.

For further information on the method of calculation used for each Share Class please refer to the relevant Sub-Fund's Supplement.

The Performance fees are normally payable by a Sub-Fund in arrears within 14 calendar days of the end of each Calculation Period. However, in the case of shares redeemed during a Calculation Period, the accrued performance fee in respect of those shares is payable within 14 calendar days after the date of redemption.

In addition, if the Management Agreement is terminated before the end of any Calculation Period, the performance fee in respect of the then current Calculation Period will be calculated and paid as though the date of termination were the end of the relevant period.

A performance fee will only be paid in respect of a share class that has been in issue for a minimum period of 12 months. A negative performance fee may occur in relation to a share class which has been existence for less than 12 months as at 31 December in a year and for which a performance fee, although accrued, is not yet payable. The amount of the accrued performance fee, although included in the calculation of the net asset value per share of the class for share dealing purposes, will be written back for financial reporting purposes and shown as a negative amount in the Statement of Comprehensive Income. Any outstanding amount of performance fees accrued in respect of such a share class will then become payable at the following 31 December as if the Calculation Period had been extended from the date of launch of the class to that date.

The tables overleaf summarise the performance fee rates that are currently imposed in respect of each share class in the applicable Sub-Funds.

For the year ended 31 December 2022

For the year ended 31 December 2022

5. FEES AND EXPENSES (CONTINUED)

Performance Fees (continued)

Performance fees incurred during the year are shown in the Statement of Comprehensive Income and performance fees payable at the year end are shown in Note 8.

Share classes with 0% fee rates are not disclosed in the above table.

Administration Fee

For those Sub-Funds not subject to a Platform Fee during the year, the ICAV will be subject to an administration fee in respect of each Sub-Fund as follows:

- 6 basis points (0.06%) on the first \$100 million on the Net Asset Value of each Sub-Fund
- 5 basis points (0.05%) on the next \$100 million on the Net Asset Value of each Sub-Fund
- 4 basis points (0.04%) on over \$200 million on the Net Asset Value of each Sub-Fund subject to a minimum annual fee in respect of each Sub-Fund as set out in the following table:

| Sub-Fund | Minimum annual fee |
|--|---|
| Chelodina UCITS Fund | \$6,500 per month |
| Crabel Advanced Trend UCITS Fund | |
| Crabel Gemini UCITS Fund | |

| | following launch, |
| | \$5,500 per month for the next six months and |
| | \$6,500 per month thereafter |

In addition, the ICAV will pay the Administrator transfer agency fees of up to \$100 per annum per investor and fees for each investor transaction at normal commercial rates.

5. FEES AND EXPENSES (CONTINUED)

Administration Fee (continued)

The ICAV will reimburse the Administrator out of the assets of the relevant Sub-Fund for the provision of other services such as the provision of financial statements (\$5,000 per annum per Sub-Fund) and tax assistance at normal commercial rates. The ICAV will also reimburse the Administrator out of the assets of the relevant Sub-Fund for reasonable out-of-pocket expenses incurred by the Administrator. The fees and expenses of the Administrator accrue on a daily basis and are payable monthly in arrears. The Administration Fees accrued during the year ended 31 December 2022 are shown in the Statement of Comprehensive Income and any Administration Fees payable at the end of the year are shown in Note 8.

For those Sub-Funds subject to a Platform Fee, certain fees and expenses charged by the Administrator and not included in the Platform Fee are included in Administration Fees in the Statement of Comprehensive Income and in Administration fee payable in Note 8 as appropriate.

Depositary Fees

For those Sub-Funds not subject to a Platform Fee during the year, the ICAV will pay the Depositary a depositary fee which will not exceed 2.25 basis points (0.0225%) per annum of the Net Asset Value of each Sub-Fund, subject to a minimum annual fee in respect of each Sub-Fund of \$18,000, together with value added tax, if any, applicable to such fees.

The ICAV will also reimburse the Depositary out of the assets of each Sub-Fund for reasonable out-of-pocket expenses incurred by the Depositary and for fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary and any transaction charges. The fees and expenses of the Depositary accrue on a daily basis and are payable monthly in arrears. The Depositary Fees accrued during the year ended 31 December 2022 are shown in the Statement of Comprehensive Income and any Depositary Fees payable at the end of the year are shown in Note 8.

For those Sub-Funds subject to a Platform Fee, certain fees and expenses charged by the Depositary and not included in the Platform Fee are included in Depositary Fees in the Statement of Comprehensive Income and in Depositary fee payable in Note 8 as appropriate.

Operating Expenses

Each Sub-Fund bears its own costs and expenses including, but not limited to, taxes, organisational and offering expenses, administration expenses not included in the Platform Fee for those Sub-Funds subject to a Platform Fee and other expenses associated with its activities. Where such costs are not directly attributable to the Sub-Funds, the Sub-Funds will bear such costs and expenses in proportion to their Net Asset Values.

Directors' Fees and Expenses

The Directors holding office as at 31 December 2022 are listed on page 2. The Directors are entitled to a fee in remuneration for their services at a rate to be determined from time to time by the Directors, but so that the aggregate amount of Directors' remuneration in any one year shall not exceed €300,000 plus VAT, if any, unless otherwise notified to Shareholders or the increase is due to the addition of new Sub-Funds and the cost to each Sub-Fund is reduced. For those Sub-Funds subject to a Platform Fee, the Directors' fees will be paid by the Manager out of the Platform Fee.

5. FEES AND EXPENSES (CONTINUED)

Directors' Fees and Expenses (continued)

Based on the current number of active Sub-Funds and the likely increase in new Sub-Funds during the remainder of the current financial year, the annual cost of the Directors' fees for the ICAV and for each Sub-Fund not subject to a Platform Fee will be as follows:

| Number of Sub-Funds | Annualised Directors' Remuneration | Average Annualised Directors' remuneration per Sub-Fund |
|---------------------|------------------------------------|--|
| | € | € |
| 34 | 370,000 | 10,882 |
| 35 | 380,000 | 10,857 |
| 36 | 390,000 | 10,833 |
| 37 | 395,000 | 10,676 |
| 38 | 400,000 | 10,526 |
| 39 | 405,000 | 10,385 |
| 40 | 410,000 | 10,250 |

The number of active Sub-Funds as at 31 December 2022 is 34 (31 December 2021: 35).

The Directors shall also be paid all travelling, hotel and other reasonable expenses properly incurred by them in attending and returning from meetings of the Directors or Shareholders or any other meetings with regulatory authorities or professional advisers or otherwise in connection with the business of the ICAV. Directors' expenses for the year ended 31 December 2022 amounted to \$Nil (31 December 2021: \$Nil), of which \$Nil (31 December 2021: \$Nil) was payable at 31 December 2022.

Cyril Delamare has no entitlement to a Director's fee. All other Directors are compensated for their role.

Audit Fees

The remuneration for all work carried out by the statutory audit firm for the year ended 31 December 2022 and 31 December 2021 was:

| | Total for the year ended 31 December | Total for the year ended 31 December |
|-----------------------|--------------------------------------|--------------------------------------|
| | 2022 | 2021 |
| | \$ | \$ |
| Statutory audit | 440,502 | 408,790 |
| Tax advisory services | 300,770 | 275,889 |
| Total | 741,272 | 684,679 |

^{*}The Investment Managers of certain Sub-Funds have agreed to cap the operating expenses of their Sub-Funds for a period of time by reimbursing the Sub-Funds for part of these costs. The amounts shown represent the amount of the expenses reimbursed to the Sub-Funds for the year.

^{**}Other costs include directors and officers insurance, Central Bank levies, the costs of publishing Net Asset Values and the costs of meeting tax and reporting obligations in the countries where the Sub-Funds are registered for marketing. These costs include \$276,800 for specialist pricing services for Angel Oak Multi-Strategy Income UCITS Fund and swap finance cost of \$342,589 for Cooper Creek Partners North America Long Short Equity UCITS.

^{*} Source: S&P and Fitch. Long Term Issuer Ratings.

^{**}Cash held in an account in the name of the Sub-Fund which the Sub-Fund has pledged as collateral in favour of the counterparty.

^{***}Cash deposited as margin with a broker or counterparty as support for the ICAV's derivative transactions on behalf of the relevant Sub-Fund. Depending on the arrangements applying to the account, part of this cash may in turn be held on deposit with derivative exchanges and central clearing counterparties on a segregated basis on behalf of the Sub-Fund in client accounts.

^{**}Cash held in an account in the name of the ICAV which the ICAV has pledged as collateral in favour of the counterparty.

***Cash deposited as margin with a broker or counterparty as support for the ICAV's derivative transactions on behalf of the relevant Sub-Fund. Depending on the arrangements applying to the account, part of this cash may in turn be held on deposit with derivative exchanges and central clearing counterparties on a segregated basis on behalf of the Sub-Fund in client accounts.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS

Risk Disclosures

Investment in the Sub-Funds carries with it a degree of risk including, but not limited to, the risks referred to below. The investment risks described below are not purported to be exhaustive and potential investors should consult with their professional advisors before purchasing shares. A more detailed discussion of some of the main risk factors affecting the Sub-Funds is set out in the Prospectus and relevant Sub-Fund Supplements. There can be no assurance that any Sub-Fund will achieve its investment objective. The Net Asset Value of a Sub-Fund, and the income therefrom, may go down as well as up and investors may not get back the amount invested or any return on their investment.

Limitations of Sensitivity Analysis

The sensitivity analysis of the risk factors in the notes below represents sensitivity analysis of the effect of movements in various risk variables on the relevant Sub-Fund's performance.

Some limitations of sensitivity analysis are;

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

Global Exposure

The Investment Manager monitors the exposure of each Sub-Fund to derivatives, if any, on a daily basis. The exposure can be calculated in 2 ways, using either;

- the Commitment Approach which is based on calculating the exposure generated by the derivatives held in the Sub-Fund to the assets underlying each derivative, taking into account hedging and netting arrangements or;
- Value at Risk ("VaR"). The VaR measure estimates the potential loss of the portfolio over a predefined period of time given a specified confidence level. The VaR methodology is a statistical measurement that produces a single aggregated result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets represented in the Sub-Fund's portfolio as well as their correlations, allowing for offsetting across different assets and markets.

The VaR method used by the Manager typically uses market data from the previous year and observed relationships between different markets and prices, and attempts to predict a model using a range of plausible future scenarios for market price movements. The VaR produced from the historical factor model is then validated, or adjusted as appropriate through a Monte-Carlo simulation.

Although VaR is an important tool for measuring market risk, the assumptions which are used to calculate it give rise to some limitations. Some of these assumptions, and resulting limitations, are:

- A 20 day holding period assumes that assets will be held for that period.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR of an unchanged position reduces if market price volatility declines.

| Virtuoso UCITS Fund | 6.50% | 4.10% | 8.10% | 6.60% |

The following Sub-Funds use the commitment approach:

1OAK Multi Asset 80 UCITS Fund
ABR 75/25 Volatility UCITS Fund
Angel Oak Multi-Strategy Income UCITS Fund
Ash Park Global Consumer Franchise UCITS Fund
Chilton Small Cap European UCITS Fund
Descartes Alternative Credit UCITS Fund
Kayne Anderson Renewable Infrastructure UCITS Fund
Nutshell Growth Fund
RoboCap UCITS Fund
Sixteen02 Global Equities UCITS Fund
Solanas ESG Sustainability UCITS Fund
Tosca Micro Cap UCITS Fund
Trinity Street Global Equity UCITS Fund

The Board, together with the Manager, will monitor the assets of each Sub-Fund to ensure that any derivatives exposure and leverage will, at all time, remain within the limits set by the Central Bank.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices of positions held by the Sub-Funds.

In accordance with the ICAV's policy, the Manager monitors the Sub-Funds' positions on a daily basis and reports regularly to the Directors, who review the information on the Sub-Funds' overall market exposures provided by the Manager at its periodic meetings.

In addition, the Investment Managers manage the exposure of the portfolio to the risk of adverse changes in the general level of market prices through adhering to their respective formal risk management processes, which includes the use of systems and technology to monitor the overall market and their respective positions risk on a daily basis. The maximum risk arising from an investment is determined by the fair value of the financial instruments except for certain derivatives positions, where the potential for loss may be much greater.

The overall market exposures and concentration of risk can be seen on the schedule of investments and Statement of Financial Position of each Sub-Fund. The fair value exposures by Sub-Fund are also disclosed in the fair value hierarchy notes on pages 288 to 305, and the related percentage of net assets are as disclosed in the schedule of investments.

Each Sub-Fund's market price risk is affected by three components: changes in market prices, interest rates and currency exchange rates.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Market Risk (continued)

Price Sensitivity Analysis

If the price of each equity security (excluding options and warrants) held by each of the Sub-Funds that mainly invest in equities and investment funds or that have direct exposure to equity securities had increased by 1% at 31 December 2022 and 31 December 2021 respectively, with all other variables remaining constant, this would have increased the net assets of that Sub-Fund as disclosed in the table below. Conversely, if the price of each equity security (excluding options and warrants) held by each of these Sub-Funds had decreased by 1% at 31 December 2022 and 31 December 2021, this would have an equal but opposite effect on the net assets of that Sub-Fund.

| Sensitivity Analysis | | 31 December 2022 | 31 December 2021 |

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Interest Rate Risk

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Sub-Funds' interest-bearing financial assets and liabilities expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial positions and cash flows. Depending on its investment objective and policy, a Sub-Fund may be invested in fixed income investments, while for other Sub-Funds, some investments may pay interest or have an associated interest cost. As a result, Sub-Funds which do not have investment in fixed income as part of their primary investment strategy may be subject to some interest rate risk due to fluctuations in the prevailing levels of market interest rates on these investments although those Sub-Funds which hold cash and treasury bills which are short term in nature (as shown in the Schedule of Investments) are not exposed to material interest rate risk changes, as such interest rate risk is considered immaterial.

For those Sub-Funds which use VaR, any exposure to interest rate risk is best considered in the context of the overall risk exposure of the Sub-Fund and is captured in the VaR model discussed on page 196.

Of the Sub-Funds which use the commitment approach, Angel Oak Multi Strategy Income UCITS Fund invests primarily in fixed income investments, for which interest rate duration is considered an appropriate way to measure risk. Duration measures the sensitivity of the fair value of a portfolio to changes in market interest rates and indicates the approximate percentage change in the value of the portfolio if interest rate changes by 1%.

The durations for the year, and the amount by which its net asset value would decrease, given an increase of 1% in the level of market interest rates, and all other variables remaining constant, are:

| Sub-Fund | Net Asset Decrease 2022 | | Net Asset Decrease 2021 | Average Duration 2021 |
|--|----------------------------|------|-------------------------------|-----------------------------|
| Angel Oak Multi-Strategy Income UCITS Fund | \$6,533,336 | 3.70 | \$20,363,874 | 2.38 |

A decrease in market interest rates would result in an increase of the same magnitude in net asset value, all other variables remaining constant.

Descartes Alternative Credit UCITS Fund is exposed to changes in interest rates, such that any changes in interest rates may affect the valuation of the Sub-Fund's assets. However the vast majority of the Sub-Fund's investments being floating rate instruments (with coupons being reset every quarter), the sensitivity of those valuations to interest rate changes is negligible.

The remaining Sub-Funds that use the commitment approach invest primarily in equities or other non-interest bearing assets and do not have significant exposure to interest rate risk.

For the year ended 31 December 2022

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Interest Rate Risk (continued)

The following table summarises the interest rate gap position of all assets less liabilities, analysed by the earlier of contractual re-pricing or maturity date, for all Sub-Funds as at 31 December 2022:

Currency Risk

The Sub-Funds invest in financial instruments and enter into transactions denominated in currencies other than their functional currency. Consequently, the Sub-Funds are directly exposed to currency risks arising out of their investment strategies. Other receivables and payables of the Sub-Funds may be denominated in currencies other than the Sub-Funds' own currency and therefore the exchange rate of this currency relative to other currencies may change in a manner which may have a favourable or unfavourable effect on the value of that receivable or payable balance. The Sub-Funds may buy and sell foreign currency options and foreign currency futures and may engage in foreign currency transactions either on a spot or forward basis, subject to the limits and restrictions set down by the Central Bank from time to time as notified by the ICAV to the Investment Manager, to reduce the risks of adverse market changes in exchange rates or to increase exposure to foreign currency fluctuations from one country to another.

For the year ended 31 December 2022

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Currency Risk (continued)

31 December 2022

The following table details the foreign currency exposure of the Sub-Funds at 31 December 2022. This includes share class FX hedges which are specific to individual share classes, the exposures relating to which will not impact all investors.

If the exchange rate between the functional currency and other currencies to which each Sub-Fund had exposure to at 31 December 2022 and 31 December 2021 had increased such that the value of the assets denominated in other currencies when measured in the functional currency decreased by the percentage shown overleaf, with all other variables held constant, this would have decreased net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund by the approximate amount shown overleaf. Conversely, if the exchange rate between the functional currency and other currencies to which each Sub-Fund had exposure to had decreased such that the value of the assets denominated in the other currencies when measured in the functional currency increased by the percentage shown overleaf, with all other variables held constant, this would have increased net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund by the approximate amount shown overleaf. It should be noted that this analysis ignores the extent to which any other currencies held that represent the value of share class FX hedges are attributable to individual share classes, rather than to the Sub-Fund as a whole.

Liquidity Risk

The Sub-Funds' investments are exposed to liquidity risk to the extent that the Sub-Funds may not be able to quickly liquidate their investments at an amount close to their fair value in order to meet their liquidity requirements. A decrease in the value of investments may also require a Sub-Fund to post additional collateral or otherwise sell assets at a time when it may not be in the Sub-Fund's best interest to do so. The failure of a Sub-Fund to continue to post the required collateral could result in a disposal of the Sub-Fund's assets at times and prices which could be disadvantageous to the Sub-Fund and could result in substantial loss.

The Sub-Funds manage liquidity risk in the following manner. The majority of the Sub-Funds' assets consist of investments that are traded in an active market, and can be readily disposed of, and deposits with credit institutions. Derivative contracts entered into by the Sub-Funds are generally either traded on an exchange, where there is a high degree of liquidity, or if OTC, include terms which include a commitment from the counterparty to agree to terminate a contract at short notice at the request of the Sub-Fund. However, market conditions may sometimes mean that it is difficult to sell assets quickly or to close out an open derivatives position without accepting a significant discount on what the Investment Manager believes is a fair price for the asset or derivative.

For the year ended 31 December 2022

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Liquidity Risk (continued)

The tables that follow show the liabilities of each Sub-Fund analysed according to the period over which each liability falls due. As the Sub-Funds allow for redemption of shares at any time, the value of the shares of a Sub-Fund, which equals the net asset value of each Sub-Fund, is assumed to represent a liability which the Sub-Fund may be required to meet in less than one month. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant.

The contractual maturities of financial liabilities as at 31 December 2022 are detailed as follows:

| | | Less than | 1 month | More than | No |

Credit Risk

Credit risk is the risk that a counterparty or the issuer of a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Sub-Fund, resulting in a financial loss to the Sub-Fund. It arises principally from debt securities held, and also from derivative financial assets, cash and cash equivalents, deposits with credit institutions and balances due from brokers.

The Depositary is responsible for the safekeeping of assets. The Depositary has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both the Depositary and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at 31 December 2022, NTC had a long term credit rating from Standard & Poor's of A+ (31 December 2021: A+).

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Sub-Funds, clearly identifiable as belonging to the Sub-Funds, and distinct and separately from the proprietary assets of TNTC, the Depositary and NTC. Other assets, typically derivatives contracts, will generally remain in the name of the Sub-Fund.

In addition TNTC, as banker, holds cash of the Sub-Funds on deposit. Such cash is held on the balance sheet of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Sub-Funds will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Insolvency of the Depositary may cause the Sub-Funds' rights with respect to its assets to be delayed or may result in the Sub-Funds not receiving the full value of its assets.

Cash and deposits, cash subject to collateral arrangements and margin at broker were also held with Argon Markets BNP Paribas, Citigroup Global Markets Limited, Marex Group, Credit Suisse Group AG, Deutsche Bank, Goldman Sachs, Interactive Brokers, Jefferies GmbH, JP Morgan, Merrill Lynch International, Morgan Stanley, Natixis, Nomura, RJ O'Brien, Skandinaviska Enskilda Banken, Societe Generale International Limited, StoneX Financial, The Northern Trust Company and UBS AG Cash and deposits with and amounts owing to credit institutions and other counterparties and brokers are disclosed in Note 9.

The Sub-Funds also enter into over-the-counter ("OTC") derivatives. OTC derivatives expose the Sub-Funds to the risk that the counterparties to the derivative financial instruments might default on their obligations to the Sub-Funds. The Sub-Funds' maximum credit risk exposure at the reporting date is represented by the respective carrying amounts of the relevant financial assets in the Statement of Financial Position less any collateral held for that counterparty.

Bankruptcy or insolvency of any counterparty used by the Sub-Funds may cause their rights with respect to cash deposits and derivative contracts to be unenforceable.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Credit Risk (continued)

At 31 December 2022 receivables and cash and short-term deposits are held with counterparties with credit ratings ranging from BBB+ to A+ or can be settled within 1 week. There are also counterparties which are not rated. The Directors consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly immaterial to the Sub-Funds.

In accordance with the ICAV's policy, the Manager monitors the Sub-Funds' credit exposures and reports regularly to the Board of Directors.

At 31 December 2022, the Sub-Funds' exposure to credit risk on their fixed income assets, analysed by credit rating, was as follows:

| ABR 75/25 Volatility UCITS Fund | 2022 | |

Fair Value Hierarchy

Investments measured and reported at fair value are classified and disclosed in one of the following fair value hierarchy levels based on the significance of the inputs used in measuring its fair value:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within Level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies utilising such inputs. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, implied volatilities and credit spreads).
- Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the ICAV's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the ICAV and might include the ICAV's own data.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Fair Value Hierarchy (continued)

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgement and is specific to the investment.

There were no significant transfers between levels 1 and 2 during the year ended 31 December 2022 or during the year ended 31 December 2021.

There were investments categorised as level 3 as at 31 December 2022 and as at 31 December 2021.

As at 31 December 2022

The following table shows an analysis of equities, debt and financial derivative instruments measured at fair value as at 31 December 2022, between those the fair value of which is based on quoted marked prices and those involving valuation techniques where all the model inputs are observable in the market.

Carrying amounts of all financial assets and financial liabilities, not measured at fair value, approximate their fair values at the reporting date.

As at 31 December 2021

The following table shows an analysis of equities, debt and financial derivative instruments measured at fair value, between those the fair value of which is based on quoted marked prices and those involving valuation techniques where all the model inputs are observable in the market for the year ended 31 December 2021.

Carrying amounts of all financial assets and financial liabilities, not measured at fair value, approximate their fair values at the reporting date.

Investments classified as Level 3

Within the Sub-Funds noted on the tables below, there are a number of asset backed securities which have been classified as Level 3 assets. Due to the use of discounted cash flow techniques and the nature of the underlying assets, directly comparable data is not readily available, and the fair value of these instruments has been measured using significant unobservable inputs and are therefore deemed to be classified as Level 3.

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Investments classified as Level 3 (continued)

The following table represents the movement in Level 3 investments for the financial year ended 31 December 2022. These Sub-Funds recognise transfers between levels as at the year end 31 December 2022.

| 31 December 2022 | Angel Oak Multi-Strategy Income UCITS Fund | Descartes Alternative Credit UCITS Fund |
|------------------------|---|--|
| | Level 3 | Level 3 |
| | \$ | € |
| Opening Value | 16,760,305 | 5,717,722 |
| Transfer from Level 2 | 3,404,636 | _ |
| Purchases | _ | _ |
| Sales | (13,482,403) | _ |
| Realised loss | (4,136,804) | _ |
| Unrealised gain/(loss) | 2,117,289 | (2,033,572) |
| Closing Value | 4,663,023 | 3,684,150 |

The following table represents the movement in Level 3 investments for the financial year ended 31 December 2021. These Sub-Funds recognise transfers between levels as at the year end 31 December 2021.

| 31 December 2021 | Angel Oak Multi-Strategy | Descartes Alternative |
|-----------------------|--------------------------|------------------------------|
| | Income UCITS Fund | Credit UCITS Fund |
| | Level 3 | Level 3 |
| | \$ | € |
| Opening Value | _ | _ |
| Transfer from Level 2 | _ | 6,315,808 |
| Purchases | 17,724,967 | 1,017,308 |
| Sales | _ | _ |
| Realised loss | _ | _ |
| Unrealised (loss) | (964,662) | (1,615,394) |
| Closing Value | 16,760,305 | 5,717,722 |

Unobservable Inputs

Unobservable inputs are developed based on the best information available in the circumstances. The valuation method being used for the valuation of the securities classified as level 3 in both Angel Oak Multi-Strategy Income UCITS Fund and Descartes Alternative Credit UCITS Fund is the use of discounted cash flow ("DCF") techniques.

For the securities classified as level 3 in Angel Oak Multi-Strategy Income UCITS Fund a third party pricing vendor uses DCF techniques to value the asset backed securities using unobservable inputs including discount rates and yields. The yield being used in the DCF is considered the most significant unobservable input used which impacts the price and related fair value of the securities. The table below shows the price sensitivity to changes in the yield.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Investments classified as Level 3 (continued)

For the securities classified as level 3 in Descartes Alternative Credit UCITS Fund a third party pricing vendor uses DCF techniques to value the securities using unobservable inputs including the constant annual default rate ("CADR") applied to the underlying portfolio, the recovery rate on the defaulted loans and the yield. The table below shows the price sensitivity to changes in the yield which is considered the most significant unobservable input which impacts the price and related fair value of these instruments.

Sensitivity of fair value measurement to changes in unobservable inputs

The use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, in changing one or more of the assumptions used to reasonably possible alternative significant unobservable inputs by decreasing or increasing by 1% with all other variables held constant, the impact on valuation is shown in the table below:

| Fund | Fair value as at 31 December 2022 | Valuation technique | Significant unobservable input | Range of yield (%) | Sensitivity | Change in valuation |
|---|---|----------------------|--------------------------------------|--------------------|---------------------------------|--|
| Angel Oak Multi- Strategy Income UCITS Fund | \$4,663,023 S | Discounted cash flow | Yield | 13-61 | Yield +1%/Yield -1% | (\$3,533m)/\$3,577m |
| Descartes Alternative Credit UCITS Fund | €3,684,150 | Discounted cash flow | Yield | 25 | Yield +1%/Yield -1% | (€90,531)/€94,033 |
| | | | | | | |
| Fund | Fair value as at 31 December 2021 | Valuation technique | Significant unobservable | Range of yield (%) | Sensitivity | Change in valuation |
| Fund Angel Oak Multi- Strategy Income UCITS Fund | 31 December 2021 \$16,760,305 | | 0 | O | Sensitivity Yield +1%/Yield -1% | Change in valuation (\$438,118)/\$453,363 |

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2022

11. FINANCIAL DERIVATIVE INSTRUMENTS AND EFFICIENT PORTFOLIO MANAGEMENT

Subject to the conditions and within the limits from time to time laid down by the Central Bank, and except as otherwise stated in the investment objective and policies of a Sub-Fund, the Investment Managers may employ, for certain Sub-Funds, investment techniques and instruments for efficient portfolio management and derivatives, such as futures, options, forward currency contracts and swaps for investment purposes. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Sub-Fund in the future, and a Sub-Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank.

During the year, contracts for difference, futures, forward currency transactions, swaps and options were entered into to hedge currency and market exposure or for investment purposes. The notional amounts are detailed in the Schedule of Investments.

Depending on the Sub-Fund, currency hedging may take place at a share class level, to hedge against changes in the exchange rate between the currency of the share class and the currency in which the Sub-Fund is valued, the base currency, or at the portfolio level, to reduce exchange rate risk in relation to investments in currencies other than the base currency of the Sub-Fund. Hedging is typically carried out using forward currency contracts, but currency swaps and exchange rate options may also be used.

Derivatives used for investment purposes may include using derivatives for such purposes as to take positions in securities, interest rates, currencies, credit spreads or indices representing price levels in these markets, at an overall market level or in relation to specific sectors of the market involved. The rationale for using derivatives may be to take exposure more cheaply, more quickly or more efficiently than can be taken using direct investment, to take short or leveraged exposure or to take exposure to specific risk or value factors of a particular market or security without having to take exposure to all of the factors associated with that form of investment.

Details of collateral are disclosed in Note 9.

12. SHARE CAPITAL

The authorised share capital of the ICAV is 500,000,000,002 shares of no par value divided into 2 subscriber shares of no par value and 500,000,000,000 unclassified shares of no par value.

Subscriber Shares entitle the holders to attend and vote at general meetings of the ICAV but do not entitle the holders to participate in the profits or assets of the ICAV except for a return of capital on a winding-up. They are disclosed in the financial statements by way of this note only.

Except as outlined below, shares (other than Subscriber Shares) entitle the holders to attend and vote at general meetings of the ICAV and to participate equally (subject to any differences between fees, charges and expenses applicable to different Classes of Shares) in the profits and assets of the ICAV on the terms and conditions set out in the Relevant Supplement.

The ICAV endeavours to manage the investment of redeemable participating shares in investments that meet the investment objectives of the Sub-Funds while maintaining sufficient liquidity to meet shareholders' redemptions. The ICAV's management of liquidity risk arising from redeemable shares is disclosed in Note 10.

Capital Risk Management

In order to maintain the capital structure, the ICAV's policy is to perform the following:

- Monitor the level of subscriptions and redemptions in the Sub-Funds relative to the assets it expects to be able to liquidate within 7 days.
- Redeem and issue new shares in accordance with the Prospectus, which include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

There are no externally imposed capital restrictions on the ICAV.

12. SHARE CAPITAL (CONTINUED)

The movement in the number of participating redeemable shares during the year is as follows:

| The movement in the number of participating redeemable snares during the year is as follows: | | | | |

13. RELATED PARTY TRANSACTIONS

Parties are considered related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The ICAV has appointed Waystone Management Company (IE) Limited as the Manager in place of Waystone Fund Management (IE) Limited effective from 31 October 2022. The Investment Manager of each Sub-Fund is listed on pages 2 to 5. Waystone Investment Management (IE) Limited acts as global distributor of the Sub-Funds.

For the year ended 31 December 2022 the Manager earned fees of \$17,063,568 (31 December 2021: \$20,576,643). Depending on the Sub-Fund concerned, these fees may be shared by the Manager with the Investment Manager appointed in respect of the Sub-Fund. As at 31 December 2022, the Management Fees payable amounted to \$1,399,081 (31 December 2021: \$1,845,005).

The Management Fees above include Platform Fees for ABR 75/25 Volatility UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund, Ironshield High Yield Alpha Fund and Perspective American Absolute Alpha UCITS Fund.

The Manager and other members of the Waystone group also received payment during the period for the provision of number of ancillary services to the ICAV, such as the provision of company secretary services, production of key investor information documents, monitoring of the UCITS governance requirements, risk monitoring and other services and local representative agency services. The amounts received by the Manager and its other group companies for these services during the year amounted to €613,232 (31 December 2021: €338,149) for the year to 31 December 2022.

For the year ended 31 December 2022, the ICAV also paid investment management fees to the Manager in respect of certain Sub-Funds, as indicated in Note 5, of \$24,809,916 (31 December 2021: \$19,221,895), which is paid to the Investment Managers concerned. As at 31 December 2022 investment management fees payable amounted to \$2,928,553 (31 December 2021: \$1,770,941).

A number of the share classes in certain Sub-funds are subject to performance fees. The performance fee is paid by the ICAV to the Manager or Investment Manager, depending on the Sub-Fund involved. For more details on performance fees see Note 5.

There were no separate distributor fees paid during the year ended 31 December 2022 (31 December 2021: Nil).

Four of the Directors, David Tease, Mary Murphy, David Hammond and Cyril Delamare, are also directors of Waystone Fund Management (IE) Limited, the manager of the ICAV up to 31 October 2022.

David Hammond, a Director, is indirectly a shareholder of the Manager.

Cyril Delamare, a Director, is indirectly a shareholder of the Manager and is an employee of the Waystone Group, of which the Manager forms part.

Cyril Delamare was the beneficial holder of the below shares in the Sub-Funds at 31 December 2022:

- 1,739 (31 December 2021: 1,739) shares in the EUR Institutional Class of DUNN WMA Institutional UCITS Fund.

The Investment Manager for ABR 75/25 Volatility UCITS Fund held the following shares in the Sub-Fund at 31 December 2022 and 31 December 2021:

| Share class | Units | Share class | Units |
|--------------------|-------|--------------------|-------|
| USD A Class Pooled | 10 | USD N Class Pooled | 10 |

Ironshield Credit Fund held 50,000 EUR Class M Shares in Ironshield High Yield Alpha Fund as at 31 December 2022.

14. INVOLVEMENT WITH UNCONSOLIDATED STRUCTURED ENTITIES

Certain of the Sub-Funds invest in notes and other instruments issued by structured entities. Structured entities are entities in which the voting rights are not the dominant rights in deciding who controls them, as they relate to administrative tasks only; each entity's activities are restricted by its prospectus or other placing document; and the entities have narrow and well-defined objectives to provide investment opportunities to investors.

The structured entities in which the relevant Sub-Funds invest include the issuers of asset-backed securities ("ABS"), structured notes and investment funds.

14. INVOLVEMENT WITH UNCONSOLIDATED STRUCTURED ENTITIES (CONTINUED)

An asset-backed security is a security that is primarily serviced by the cash flows of a discrete pool of receivables or other financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period plus any rights or other assets designed to ensure the servicing or timely distribution of proceeds to the security holders.

Specific types of ABS include Collateralised Mortgage Obligations ("CMOs") and other mortgage-backed securities ("MBS") which represent the purchase of an interest in pools of mortgage loans. The investment characteristics of asset or mortgage-backed securities are such that principal payments are made more frequently than traditional debt securities (usually monthly). The principal may be repaid at any time because the underlying mortgage loans or other assets generally may be repaid at any time.

The table below describes the investments in structured entities held by these Sub-Funds, the results of which are not consolidated in these financial statements:

Alpha Quest UCITS Fund

| Type of issue held in a Structured Entity | Line Position in Statement of Financial Position | Number of Investments | Nominal Values of Securities in Issue \$ | Fair Value \$ | % of Total Financial Assets at Fair Value Through Profit or Loss |

16. EVENTS DURING THE YEAR

The hurdle rate used in the calculation of performance fees for Mygale Event Driven UCITS Fund changed from LIBOR to SONIA on 4 January 2022.

On 24 February 2022, Russian forces advanced into Ukraine launching a large-scale military invasion. The war in Ukraine continues to escalate with devastating implications for the region both politically and economically. In an attempt to deter the Russian advances EU and NATO member countries have imposed severe sanctions on the Russian economy. The effect of these sanctions have led to sharp increases in the price of commodities, assets of Russia's central bank have been frozen, travel restrictions imposed and certain powerful individuals have been targeted for their association with the Kremlin.

Of the Sub-Funds, only Giano UCITS Fund had an exposure to Russian securities at the time, although the exposure was not material. The situation is being closely monitored by the Board of Directors.

Updates dated 24 August 2022 were made to the Administration and Depositary Agreements to reflect a new platform fee structure for certain Sub-Funds which adopted this fee structure from launch, namely ABR 75/25 Volatility UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund and Ironshield High Yield Alpha Fund. The platform fee structure was subsequently extended to other Sub-Funds, and updated Fund Supplements for the relevant Sub-Funds reflecting the new fee structure issued on 30 December 2022. No change was made to the fee arrangements for 1OAK Multi Asset 80 UCITS Fund, Collidr Adaptive Global Equity UCITS Fund, Collidr Global Growth Strategy UCITS Fund, Giano UCITS Fund and MontLake Abrax Merger Arbitrage UCITS Fund.

The Manager and Secretary of the ICAV changed from Waystone Fund Management (IE) Limited to Waystone Management Company (IE) Limited effective from 31 October 2022.

Advent Global Partners UCITS Fund received approval from the Central Bank of Ireland to move from an Article 6 Fund to an Article 8 Fund under the Sustainable Finance Disclosure Regulation (the "SFDR") on 1 December 2022.

The address of the Registered Office, the Manager, the Secretary and the Global Distributor changed from 3rd Floor, 76 Lower Baggot Street, Dublin 2, Ireland to 35 Shelbourne Road, Dublin 4, Ireland on 1 December 2022.

The following Sub-Funds were authorised by the Central Bank and launched during the year:

16. EVENTS DURING THE YEAR (CONTINUED)

| Sub-Fund | Launch Date | Investment Manager |
|--|------------------|---------------------------------------|
| Kayne Anderson Renewable Infrastructure UCITS Fund | 9 February 2022 | Kayne Anderson Capital Advisors, L.P. |
| Ironshield High Yield Alpha Fund | 25 August 2022 | Ironshield Capital Management LLP |
| Perspective American Absolute Alpha UCITS Fund | 11 November 2022 | Tavira Financial Limited |

The Sub-Funds listed below terminated during the year and their authorisation is in the process of being revoked by the Central Bank. Separate termination financial statements were prepared for these Sub-Funds on their respective termination dates, except for Solanas ESG Sustainability UCITS Fund which has been included within this Annual Report and Audited Financial Statements as of 31 December 2022.

| Sub-Fund | Termination Date | Investment Manager |
|--|------------------|----------------------------------|
| High Ridge Credit Opportunities UCITS Fund | 29 April 2022 | Spectrum Asset Management, Inc. |
| Kingswood Defensive Alpha Absolute Return UCITS Fund | 28 June 2022 | KW Investment Management Limited |
| Avenir UCITS Fund | 19 August 2022 | Hyposwiss Private Bank Genève SA |
| Solanas ESG Sustainability UCITS Fund | 30 November 2022 | Leucadia Asset Management LLC |

There have been no other events during the year, which, in the opinion of the Directors of the ICAV, may have had a material impact on the Financial Statements for the year ended 31 December 2022.

17. SUBSEQUENT EVENTS

Effective 1 January 2023, Robocap LLP will cease to operate as an Appointed Representative of Sturgeon Ventures LLP and Investment Adviser of the Robocap UCITS Fund, and will be replaced by Robocap Asset Management Ltd, as the new Investment Manager regulated by FCA.

Collidr Global Growth Strategy UCITS Fund terminated on 31 January 2023 and Giano UCITS Fund terminated on 21 April 2023.

Westbeck Energy Transition UCITS Fund was authorized by the Central Bank on 18 April 2022.

Westbeck Capital Management LLP was approved to act as Investment Manager to Irish authorised investment funds by the Central Bank, Supplement noted on 18 April 2023.

There have been no other events subsequent to the year end, which, in the opinion of the Directors of the ICAV, may have had a material impact on the Financial Statements for the year ended 31 December 2022.

18. APPROVAL OF FINANCIAL STATEMENTS

The Financial Statements were approved by the board of the ICAV on 28 April 2023.

^{*}The counterparties for the contract for difference are:

Goldman Sachs

J.P. Morgan

Morgan Stanley

Skandinaviska Enskilda Banken

Contract for difference positions were marked to market at the year end, crystallising any unrealised losses or gains.

Accordingly these positions had a zero value at year end.

Goldman Sachs

***The counterparty for the forwards is:

The Northern Trust Company

^Pledged as collateral to:

Goldman Sachs

JP Morgan

Morgan Stanley

*Angel Oak Multi-Strategy Income UCITS Fund Net Asset Value Reconciliation As at 30 December 2022

| Net Asset Valuation per dealing valuation | \$176,576,656 |
|--|---------------|
| Mid to Bid Valuation adjustments | (\$2,796,105) |
| Net Asset Valuation for financial statement purposes | \$173,780,551 |

For financial statement purposes the financial assets at fair value through profit or loss of the Sub-Fund are measured in accordance with the IFRS measurement and presentation requirements at close of business on the last trading date rather than according to the pricing policy of the ICAV which is taken for the purposes of the dealing NAV. A reconciliation between the dealing NAV and the financial statement NAV is required for the Sub-Fund as outlined above to account for this difference. The dealing NAV of 30 December 2022, which was the last one for the financial year, and any subscriptions or redemptions determined as of 30 December 2022, remains unaffected by this reconciliation.

SOFT COMMISSIONS

A number of the Investment Managers will effect transactions through brokers with which they have arrangements whereby each broker agrees to use a proportion of the commission earned on such transactions to discharge the broker's own costs or the costs of third parties providing certain services to the relevant Investment Manager. The services which are paid for under such arrangements are those permitted under regulatory rules applicable to the relevant Investment Manager, generally those that relate to the provision of investment research to the relevant Investment Manager.

When provided to the Sub-Funds, such services are permitted to take the form of research, analysis and advisory services, including (depending on the precise nature of the services) market price services, electronic trade confirmation systems or third-party electronic dealing or quotation systems. The Investment Manager concerned must ensure that such arrangements assist in the provision of investment services to the relevant Sub-Fund and that the brokers to the arrangements have agreed to provide best execution.

Other Investment Managers, generally those subject to the requirements of the EU Markets in Financial Instruments Directive, collect research costs directly from the Sub-Funds concerned. The payments collected from each Sub-Fund are credited to a research payment account operated by the Investment Manager and used to pay for research obtained by the Investment Manager for the benefit of the Sub-Fund.

The following Sub-funds have soft commission arrangements in place as at 31 December 2022; Advent Global Partners UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, Disciplined Alpha U.S. Long Short UCITS Fund and Trinity Street Global Equity UCITS Fund.

TOTAL EXPENSE RATIO (UNAUDITED)

The total expense ratio (TER) was calculated based on the version currently applicable of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association of Switzerland (AMAS).

The TER is calculated according to the following formula: (total expenses / Annualised Figures)* 100 and has been calculated for the 12 months preceding the close of the annual reporting year, using annualised figures for those Sub-Funds and share classes launched during the year.

UCITS REMUNERATION DISCLOSURE (UNAUDITED)

The Manager has adopted a remuneration policy in accordance with the requirements of the European Securities & Markets Authority guidelines on sound remuneration policies under UCITS requirements (the "ESMA Remuneration Guidelines"). As the Manager delegates investment management functions in respect of the Sub-Funds, it will, in accordance with the requirements of the ESMA Remuneration Guidelines, ensure that:

- a) the entities to which investment management activities have been delegated are subject to regulatory requirements on remuneration that are equally as effective as those applicable under the ESMA Remuneration Guidelines; or
- b) appropriate contractual arrangements are put in place to ensure that the delegates apply in a proportionate manner the remuneration rules as detailed in the UCITS Regulations such that there is no circumvention of the remuneration rules set out in the ESMA Remuneration Guidelines.

The Manager's policy complies with the remuneration principles in a way which is proportionate and to the extent that is appropriate to the overall size of the Manager's business, taking into account the nature, scope, and complexities of the business. On this basis, the Directors of the Manager have decided to disapply the remuneration committee requirement of the Guidelines and they are satisfied that this disapplication is reconcilable with the risk profile of the Manager and the funds under its management.

The Manager's remuneration policy includes measures to avoid conflicts of interest.

Directors of the Manager review the remuneration policy annually.

The remuneration details are disclosed below:

Manager

| Description | Number of | Total remuneration | Fixed remuneration | Variable |
|------------------------------|---------------|--------------------|--------------------|-------------------|

SECURITIES FINANCING TRANSACTIONS REGULATION

The Securities Financing Transactions Regulation (SFTR) requires information to be provided as to the use of securities financing transactions ("SFTs") and Total Return Swaps.

A Securities Financing Transaction is defined in Article 3(11) of the SFTR as:

- A repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2022 the ICAV held the following types of SFTs: Total Return Swaps.

The amount of securities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) was 0% as at 31 December 2022.

GLOBAL DATA:

| | | Proportion of |
|---|------------------|----------------|
| Type of Asset | Absolute Amount* | AUM (%) |
| Total Return Swap | | |
| 10AK Multi Asset 80 UCITS Fund | £2,108 | 0.01% |
| Advent Global Partners UCITS Fund | \$22,292,205 | 5.99% |
| Cooper Creek Partners North America Long Short Equity | | |
| UCITS Fund | \$552,452,832 | 43.72% |
| Disciplined Alpha U.S. Long Short UCITS Fund | \$1,399,870 | 1.67% |
| Ironshield Credit Fund | €1,436,176 | 0.95% |
| SHARP UCITS Fund | \$2,343,952 | 0.79% |
| Virtuoso UCITS Fund | €4,435 | 0.02% |
| Perspective American Absolute Alpha UCITS Fund | \$0 | 0.00% |

^{*}The Absolute Amount is the absolute value of the total return swaps'market values.

CONCENTRATION DATA:

The largest collateral issuers across all SFTs and total return swaps are as follows:

| | | Gross volume of |
|---|--------------------------------|--------------------|
| | Counterparty | outstanding trades |
| Total Return Swap | | |
| 10AK Multi Asset 80 UCITS Fund | UBS AG London Branch | £697,502 |

Sustainable Finance Disclosure Regulation (UNAUDITED)

The majority of the Sub-Funds (the Sub-Funds indicated as Article 6 funds in the table below, do not take into account the EU criteria for environmentally sustainable economic activities. They do not have as their objective sustainable investment, nor do they promote environmental or social characteristics. As a result, the relevant Sub-Funds do not fall within the scope of the EU Sustainable Finance Disclosure Regulation (Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment) (the "SFDR").

However, in accordance with Articles 8 and 9 of the SFDR, certain of the ICAV's Sub-Funds do promote environmental and/or social characteristics. Please see attached Annex apart from Solanas UCITS Fund which terminated before year end.

Annex IV

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name: Advent Global Partners UCITS Fund

Legal entity identifier: 635400FRJGPMRLHXJI26

Environmental and/or Social Characteristics

| Did this financial product have a sustainable investment objective? | |
|---|--|
| • • 🔲 Yes | • × No |
| ☐ It made sustainable investments with an environmental objective:_% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | with a social objective |
| ☐ It made sustainable investments | It promoted E/S characteristics, but did |

%

with a social objective:

Sustainable

investment means

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental orsocial objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system, establishing

environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be

aligned with the Taxonomy or not.

a list of

To what extent were the environmental and/or social characteristics promoted by this financial product met?

not make any sustainable investments

As part of the investment process, the Investment Manager considers a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Sub-Fund.

- The percentage of investments in issuers with a combined Environmental and Social score above the minimum threshold set for this Sub-Fund within the Investment Manager's proprietary score which combines selected data criteria from trusted and third-party data, utilizing Bloomberg, covering multiple ESG risk metrics in conjunction with the portfolio managers' overall relative value decision making.
- The percentage of investments in issuers involved in activities excluded by the Sub-Fund.
- Share of investments in companies in compliance with the UN Global Compact Principles.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

| | Weighted Average | Coverage (%) |
|---|---------------------|--------------|
| | Dec-22 | Dec-22 |
| Environmental and Social Characteristics | | |
| % of investments in issuers with a combined E and S score above the minimum threshold set for this Fund | 95% | 81% |
| Investments in issuers involved in activities excluded by the Fund (%) | 0% | 0% |
| Share of investments in companies in compliance with the UN Global Compact Principles (%) | 100% | 100% |

...And compared to previous periods?

As this is the initial reporting period for the Sub-Fund, a comparison to prior reporting periods is not relevant.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

- How were the indicators for adverse impacts on sustainability factors taken into account?
 Not applicable
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details

Not annlicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental orsocial objective and that the investee companies follow good governance practices

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager monitors a number of principal adverse impacts in furtherance of its adherence to its ESG and Responsible Investment Philosophy. The Philosophy incorporates numerous environmental and social considerations into the investment decision-making process. Among the considerations at an issuer level are several individual principal adverse impacts which are part of an integrated research process for security selection. At the Sub-Fund level, the principal adverse impacts are monitored, compiled, and reviewed by the Investment Manager with the goal of exposures consistent with the ESG and Responsible Investment Philosophy. Further, the principal adverse impacts for individual issuers may be used by the Investment Manager in its engagement with issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

January 1, 2022 to December 31, 2022

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#2 Other are investments with no environmental or social characteristics such as cash, special purpose acquisition companies, and the market value of index hedges and foreign currency forward contracts.

In which economic sectors were the investments made?

The Sub-Fund held investments in the following sectors during the reference period:

- Consumer Discretionary 11.0%
- Consumer Staples 3.9%
- 3.0% Energy
- Financials 3.3%
- Health Care 18.7%
- Industrials 8.6%
- Materials 3.4%
- Real Estate 3.6%
- Technology 37.5%
- Utilities 2.0%
- Cash 5.0%

Taxonomyaligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today. capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. operational expenditure (OpEx) reflects the green operational activities of investee companies.

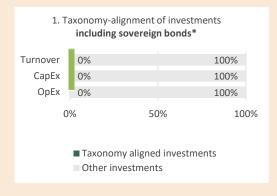

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a stated objective to make sustainable investments. The analysis and disclosure requirements introduced by the axonomy Regulation are very detailed and compliance with them requires the availability of numerous data in respect of each investment which the Sub-Fund makes. The proportion of the Sub-Fund's investments that aligned with Environmentally sustainable economic activities for the purposes of the Taxonomy Regulation will be 0%. This should not be taken as meaning that the Sub-Fund will not be investing in such investments at any given time. In other words, it cannot be excluded that some of the Sub-Fund's holdings qualify as Taxonomy-aligned investments. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities?
 0%
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?
 Not applicable as the Sub-Fund does not invest in Sustainable nvestments as defined in Article 2(17) of the SFDR.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This may include cash, cash equivalents, hedges, mutual funds, or special purpose acquisition company holdings.

The "Other" section in the Sub-Fund is held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover. There were no minimum environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager has continually included an element of environmental and social scoring/adjustment in its investment process throughout the year, and specific screening has been applied to adhere to the exclusion list.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective. provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Template periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name: Kayne Anderson Renewable Infrastructure UCITS Fund (the "Sub-Fund")

Legal entity identifier: 635400DZBUIMTBCXGA12

Environmental and/or social characteristics

| Did this financial product have a sustain the percentage figure represents the minimum community Yes | nable investment objective? [tick and fill in as relevant, itment to sustainable investments] No |

| It made sustainable investments with a social objective:% | with a social objective It promoted E/S characteristics, but did not make any sustainable investments |

To what extent were the environmental and/or social characteristics promoted

by this financial product met? The Sub-Fund intends to invest in companies leading the "energy transition," a term used to describe the energy sector's shift to a more sustainable mix of lower carbon and renewable energy sources. The primary goal of this energy transition — which is being pursued on a global basis — is to reduce carbon emissions and limit the impact of climate change. While the companies in the Sub-Fund's investible universe align with many of the 17 UN Sustainable Development Goals ("SDGs"), the most commonly promoted goals are SGD 7 — Affordable & Clean Energy and SDG 13 — Climate Action. Approximately 96% of the portfolio had made formal, public commitments to the UN Sustainable Development Goals at year-end with 96% of the portfolio committed to SDG 7 (affordable and clean energy) and 83% committed to SDG 13 (climate action). On a weighted average basis at year-end, over 75% of the portfolio has implemented 2030 reduction targets and over 91% of the portfolio has implemented 2050 reduction targets. Furthermore, approximately 75% of the portfolio has committed to achieving Net Zero by 2050.

How did the sustainability indicators perform?

Based on the most recent available data, the Investment Manager has calculated estimates for the following data points:

- 582.8 million tons of carbon avoided from existing operating assets;
- 156.0 million tons of avoided emissions from new project development over the nearterm (3-5 years); and
- 301.3 Gigawatts of installed renewable power capacity.

d i d

t

h

e

s

Н

0

w

The methodology used to calculate these estimates assumes that renewable capacity owned or being built by companies in the portfolio displaces conventional coal and gas electricity from a representative 50/50 mix of coal and natural gas generation at the same level of annual output. CO2 emissions equivalency calculations are formulated based on the U.S. Environmental Protection Agency's Greenhouse Gas Equivalencies Calculator https://www.epa.gov/energy/greenhouse-gas-equivalencies-calculator.

Assuming CO2 emissions of 1.0 ton/MWh for coal and 0.5 tons/MWh of emissions for gas, equates to an estimated blended rate of 0.75 tons for avoided emissions for every 1.0 MWh of renewable electricity generation.

p

r m ? Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.
 - How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.
 - Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors? *Not applicable.*

What was the proportion of sustainability-related investments?

#1 Aligned with E/S Characteristics: **94.5%** #2 Other: **4.7%**

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The Subcategory **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

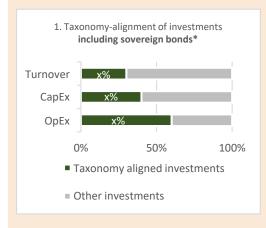

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

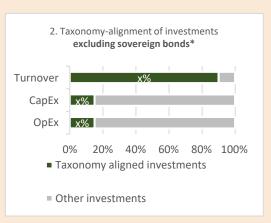

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? Not applicable. The Sub-Fund has not made any commitments with respect to alignment with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? *Not applicable.*

What was the share of socially sustainable investments? Not applicable. The Sub-Fund has not made any commitment with respect to sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards? The Sub-Fund held 4.7% of its total net assts in cash (data as of 31st of December 2022).

What actions have been taken to meet the environmental and/or social characteristics during the reference period? In addition to the metrics discussed above, the Investment Manager intends to publish (via an <u>annual sustainability report</u> for the strategy or other periodic reporting to investors) portfolio wide metrics to evidence attainment of the environmental characteristics promoted by the Sub-Fund.

The goal of the report is to highlight the Investment Manager's ESG policy which consists of a multistage approach to integrating ESG factors and sustainability risks in investment decisions. This includes a robust engagement framework whereby the Investment Manager engages investee companies on a variety of ESG topics throughout the lifecycle of an investment.

The Investment Manager's ESG integration strategy and engagement framework helps to ensure that investee companies are taking reasonable measures to align with the environmental characteristics promoted by the Sub-Fund.

How did this financial product perform compared to the reference benchmark? Not applicable, there is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- How does the reference benchmark differ from a broad market index?
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

a list of

sustainable economic activities.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

It promoted E/S characteristics, but did

not make any sustainable investments

The environmental and social characteristics promoted by the Sub-Fund consist of investing in companies that may exhibit positive statistics in the following areas:

Environmental characteristics:

- Carbon emissions (CO2 tonnes per million dollars of revenue)
- Water pollution

☐ It made sustainable investments

with a social objective:

- Harm to biodiversity
- Poor waste management practices

Social characteristics:

- Human rights
- Human trafficking
- Modern slavery / forced labour
- Breaches of employee rights / labour rights
- Child labour
- Discrimination
- Restrictions on or abuse of the rights of consumers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental orsocial objective and that the investee companies follow good governance practices

How did the sustainability indicators perform?

The table below shows data for the sustainability indicators. In the reference period no investments were made in companies which promoted the Environmental Characteristics of Emissions to Water, or Harm to Biodiversity. To date the companies invested in have not made available data relating to emissions to water, and investments in companies in or near to bio-diversity-sensitive areas.

| | Weighted Average | | | Coverage (%) | | | | |
|---|------------------|--------|--------|--------------|--------|--------|--------|--------|

| Games Workshop Group Plc | Consumer Discretionary | 5.5% | United Kingdom |
| Adyen NV | Information Technology | 5.2% | Netherlands |
| AutoZone Inc | Consumer Discretionary | 4.8% | United States |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomyaligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today. capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

The Sub-Fund held investments in the following sectors during the reference period:

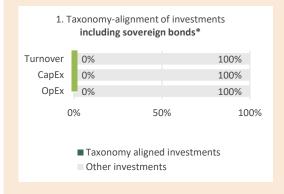

Communication Services, Consumer Discretionary, Consumer Staples, Financials, Health Care, Industrials and Information Technology.

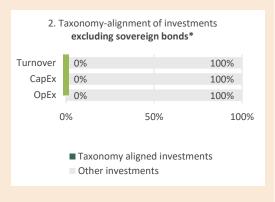

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the Taxonomy Regulation are very detailed and compliance with them requires the availability of numerous data in respect of each investment which the Sub-Fund makes. The proportion of the Sub-Fund's investments that aligned with Environmentally sustainable economic activities for the purposes of the Taxonomy Regulation will be 0%. This should not be taken as meaning that the Sub-Fund will not be investing in such investments at any given time. In other words, it cannot be excluded that some of the Sub-Fund's holdings qualify as Taxonomy-aligned investments. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

 What was the share of investments made in transitional and enabling activities?
 0%

 How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?
 Not applicable are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The "Other" section in the Sub-Fund is held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover. There were no minimum environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager aims to vote all eligible proxies each year and will vote against management recommendations on issues including those relating to environmental and/or social characteristic where it deems appropriate. The Investment Manager has continually included an element of environmental and social scoring/adjustment in its investment process throughout the year.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Perspective American Absolute Alpha UCITS Fund

Legal entity identifier: 635400LU6HO4G2QFLP29

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|--|--|
| • • Yes | • No |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

By integrating environmental and social characteristics into the investment process and applying exclusions to actively promote these characteristics, the Investment Manager has demonstrated its commitment to responsible investing while pursuing financial returns.

Regarding environmental factors, the Investment Manager considers various metrics such as carbon dioxide and other greenhouse gas emissions, toxic waste productions.

For social factors related to a company, the Investment Manager takes into account aspects such as labour and community relations, health and safety risks, government regulatory aspects, and disclosures on employee compensation.

The Investment Manager's strategy is based on the belief that responsibility is a hallmark of quality, and it invests in companies with a sustainable competitive advantage derived from environmental and social factors. The Investment Manager strives to generate a positive social and environmental impact alongside a financial return. As part of the construction of the portfolio and ongoing monitoring process of the Sub-Fund, exclusions are also applied to actively promote environmental and social characteristics. Qualitative analysis is also part of our company's overall appraisal process.

In conclusion, within our overall ESG assessment, we recognize that environmental and social factors are critical for creating sustainable business practices. However, we also believe that effective governance is essential to ensure that companies operate within legal and ethical boundaries. Strong governance practices enable companies to make informed decisions that are in the best interest of all stakeholders, including employees, shareholders, and the wider community.

How did the sustainability indicators perform?

The Sub-fund commenced operations on 11 November 2022, so the following information is given as of 31 December 2022.

Weighted Average Coverage **Environmental Characteristics** 2Q22 3Q22 3Q22 4Q22 1Q22 2Q22 4Q22 CO2 tonnes of emissions per 93.7% million dollars of revenue Tonnes of emissions to water per 0 0 million dollars of revenue Share of investments in companies 0 0 located in or near to biodiversitysensitive areas where activities negatively affect those areas Tonnes of hazardous waste 0.17 15.4% generated per million dollars of revenue Social Characteristics 27% 70.7% **Board Gender Diversity** 0.56 17.2% Total recordable incident rate 2.89% 2.74 Gender Pay Gap

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

| MARATHON PETE CORP COM | Energy | 1.09% | US |
| AMERIPRISE FINL INC COM | Financials | 1.03% | US |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The Sub-fund held investments in the following sectors during the reference period: Information Technology, Health Care, Industrials, Financials, Materials, Consumer Discretionary, Energy, Communication Services, Utilities, Real Estate, and Consumer Staples.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Sub-Fund made. The Investment Manager can not confirm that the Sub-Fund invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| | Yes: | | |
|---|------|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| × | No | | |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "Other" includes the remaining investments of the Sub-fund which are neither aligned with the environmental or social characteristics promoted by the Sub-fund, nor are qualified as sustainable investments.

The "Other" investments in the Sub-Fund are held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

No minimum social and environmental safeguards are applied to these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was managed in-line with its investment objective and policy for the reporting period. The Investment Manager has continually included an element of environmental and social screening in its investment process throughout the year. Specific screening has also been applied to adhere to the excluded investment list.

How did this financial product perform compared to the reference benchmark?

No specific index is designated as a reference benchmark to determine whether the product is aligned with environmental and social characteristics promoted.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Virtuoso UCITS Fund Legal entity identifier: 6354005R2MLNDVE1UO93

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|--|--|
| • • Yes | • O 🗶 No |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments |
| | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

By integrating environmental and social characteristics into the investment process and applying exclusions to actively promote these characteristics, the Investment Manager has demonstrated its commitment to responsible investing while pursuing financial returns.

Regarding environmental factors, the Investment Manager considers various metrics such as carbon dioxide and other greenhouse gas emissions, toxic waste productions.

For social factors related to a company, the Investment Manager takes into account aspects such as labour and community relations, health and safety risks, government regulatory aspects, and disclosures on employee compensation.

The Investment Manager's strategy is based on the belief that responsibility is a hallmark of quality, and it invests in companies with a sustainable competitive advantage derived from environmental and social factors. The Investment Manager strives to generate a positive social and environmental impact alongside a financial return. As part of the construction of the portfolio and ongoing monitoring process of the Sub-Fund, exclusions are also applied to actively promote environmental and social characteristics. Qualitative analysis is also part of our company's overall appraisal process.

In conclusion, within the Investment Manager's overall ESG assessment, the environmental and social factors are critical for creating sustainable business practices. However, we also believe that effective governance is essential to ensure that companies operate within legal and ethical boundaries. Strong governance practices enable companies to make informed decisions that are in the best interest of all stakeholders, including employees, shareholders, and the wider community.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

| | | Weighted Average | | | | Cover | age % | i |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The Sub-fund held investments in the following sectors during the reference period: Consumer Cyclical, Consumer Non-Cyclical, Industrials, Technology, Media, and Telecom.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas
In nuclear energy

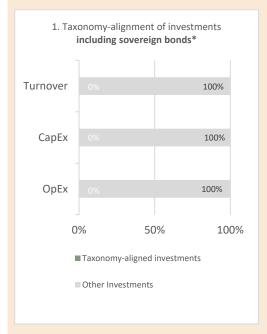

No

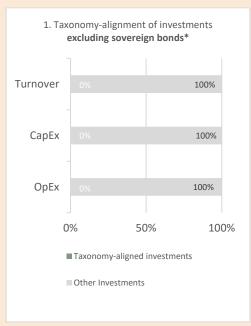

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund does not invest in Sustainable Investments as defined in Article 2(17) of the SFDR.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "Other" category within the Sub-fund comprises investments that do not conform to either environmental or social criteria nor qualify as sustainable investments. These investments have been included in the Sub-fund for various reasons that the Investment Manager deems advantageous, including but not limited to managing risk, maintaining liquidity, and securing hedging and collateral. No minimum social and environmental safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was managed in-line with the investment objective and the following actions were taken:

The investment Manager integrates its ESG screening process on the basis of the following three key steps:

- 1. Value based exclusion of specific sectors and in particular, Conventional Weapons Producers (0%), Conventional Weapons Support and Services (0%), Thermal Coal (0%), Tobacco Producers (0%), Tobacco Distribution (0%), Gambling (0%) and Adult Entertainment (0).
- Norms based exclusion of companies involved in the production of controversial weapons. The
 purpose of this exclusion is to be aware and in line with international norms and standards
 such as the Anti-Personnel Mine Ban Convention (Ottawa Treaty 1997).
- 3. Industry Materiality and Focus on Governance. The Investment Manager considers industry materiality in relation to environmental, social and governance topics that matter most to the industries concerned, firms, their shareholders and stakeholders. The Investment Manager is particularly focused on governance assessment. The Investment Manager performs dedicated screens to define its investible universe and excludes companies involved in very severe controversies and where their responses to allegations are not considered by the Investment Manager to provide sufficient explanation and/or reassurance that the controversy has been resolved.

How did this financial product perform compared to the reference benchmark?
