

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

TreeTop Convertible International, a sub-fund of TreeTop Convertible SICAV, a UCITS having the legal form of an investment company with variable capital under Luxembourg law - Class AH EUR - ISIN: LU0012006317. This share class is hereafter referred to as "the product".

Product and Document Manufacturer: TreeTop Asset Management S.A., 12, rue Eugène Ruppert, L-2453 Luxembourg, a management company under Luxembourg law - www.treetopam.com - +352 26 36 38 1; the Manufacturer is also the management company.

Supervisory authority of the Product manufacturer: Commission de surveillance du secteur financier (CSSF) in Luxembourg. The date of production of this document is 24/02/2023.

What is this product?

Type: TreeTop Convertible International is a sub-fund of TreeTop Convertible SICAV, an undertaking for collective investment in transferable securities ("UCITS") in the legal form of an investment company with variable capital with multiple sub-funds under Luxembourg law, subject to Part I of the 2010 Law.

Term: The product has no maturity date.

Objectives: The product aims to increase the value of your investment over the long term.

Under normal market conditions, the main part of the product is invested in convertible bonds and/or other fixed-income securities, bank deposits and warrants or call options on shares and, up to a maximum of 10% of the assets of the product, in units of collective investment undertakings representing these asset classes. The product may also invest in shares and other equity-linked securities and use derivatives for investment purposes or to reduce investment risk (hedging).

Based on criteria such as innovation, quality of management, valuation and leadership, the manager selects companies around the world that it believes have strong growth prospects or are undervalued. The product invests in a concentrated portfolio of shares of these companies and/or instruments convertible into shares or giving the right to acquire shares of these companies. The main part of the portfolio is managed in an endeavour to replicate the financial behaviour of a convertible bonds portfolio. To this end, the manager ensures that: (i) at least 50% of the portfolio consists of bonds and other fixed income securities; and (ii) the product's overall exposure to the equity market, through shares and other securities whose price is linked to shares, does not exceed 100% of its net assets.

The manager's objective is to hedge positions in currencies other than EUR representing more than 2.5% of the net asset value of the product.

You may place orders to buy or sell the product on a daily basis.

This product does not distribute dividends (which means that the income generated is added to the price of the product).

Intended retail investor: The product is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 5 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio.

Depositary: Banque Degroof Petercam Luxembourg S.A.

Further information: You can obtain additional information on this product (free of charge) in English, French and Dutch, including the present document, the prospectus, the latest periodic reports, and the most recent price of the shares from the management company (see details here above) or on www.treetopam.com.

This is a sub-fund of an umbrella fund. The prospectus and periodic reports are prepared for the entire umbrella fund. To protect investors, the assets and liabilities of each sub-fund are segregated by law from those of other sub-funds. Subject to conditions, you may apply to switch your investment into another product within this SICAV. See the prospectus for more details.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products.

It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the product invests and therefore the value of the product itself.

This level of risk reflects the fact that the product invests in shares and/or other instruments (such as more volatile warrants and convertible bonds), may invest in a limited number of securities and may favor particular economic sectors or regions. Moreover, the product may invest a part of its portfolio in warrants or call options on shares that are more volatile than shares and may lose their value at expiry date.

Under unusual market conditions, other risks could arise: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), default (an issuer's bonds could become worthless if it is unable to repay its debts), counterparty (the product could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the product), legal and tax risks

(the product could be affected by foreign legal and tax changes, some of which may be retroactive). Please refer to the prospectus for more details.

As this product does not include capital protection, particularly against market fluctuations, you could lose all or part of your investment, but not more than the amount of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		5 years	
Example Investment:		€10,000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	€4,420	€3,990
	Average return each year	-55.8%	-16.8%
Unfavourable	What you might get back after costs	€7,220	€6,760
	Average return each year	-27.8%	-7.5%
Moderate	What you might get back after costs	€10,430	€9,420
	Average return each year	4.3%	-1.2%
Favourable	What you might get back after costs	€15,140	€14,970
	Average return each year	51.4%	8.4%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable scenario: this type of scenario occurred for an investment between 03 2015 and 03 2020.

Moderate scenario: this type of scenario occurred for an investment between 05 2014 and 05 2019.

Favourable scenario: this type of scenario occurred for an investment between 01 2013 and 01 2018.

What happens if TreeTop Asset Management S.A. is unable to pay out?

The Product Manufacturer has no payment obligation to you and you will not suffer a loss as a result of this potential insolvency. The assets in which the product is invested are kept safe by a depositary appointed by the product and are segregated from any other investments of other clients served by the depositary. However, your investment is not protected by an indemnity or guarantee mechanism.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

— in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

— 10 000,00 EUR are invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	€321	€1,630
Annual cost impact (*)	3.2%	3.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 2,0% before costs and -1,2% after costs.

Composition of Costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0%	0 EUR
Exit costs	0%	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	This is an estimate based on actual costs over the last year, presented as 1,8% of the value of your investment per year.	183 EUR
Transaction costs	0,9% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	93 EUR
Incidental costs taken under specific conditions		
Performance fees	At each share price calculation date: 12% of the difference between the share price and the price preceding the highest share price ever achieved by the product. The amount of 0,5% represents the average annual performance fee paid over the last 5 years.	45 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Given the risks inherent in the product's investment policy, a minimum holding period of 5 years is recommended. However, you may exit the product each time a net asset value is calculated, as described in the prospectus.

How can I complain?

If you have a complaint about the product or about the conduct of the Product Manufacturer or the person advising on, or selling, the product, you can submit a complaint in writing in English, French and Dutch to TreeTop Asset Management S.A. - 12 Rue Eugène Ruppert - L-2453 Luxembourg, for the attention of the Compliance Officer (distribution@treetopam.com). You will receive an acknowledgement of receipt within 7 working days. Your complaint will be analysed and you will receive a substantiated response within one month after its receipt, provided such complaint is complete and accurate.

Other relevant information

The prospectus, this document, the financial reports, the latest net asset value of the product, the information about past performance (on 10 years) and the performance scenario calculation can be obtained free of charge by contacting TreeTop Asset Management S.A. or can be consulted on www.treetopam.com.

For questions on tax treatment, suitability of this investment and other matters, contact your advisor or distributor.
