## What is this product?

### TYPE OF PRODUCT

The product is a sub-fund of Universe, The CMI Global Network Fund, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Sub-Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

### OBJECTIVES

The Sub-fund aims to offer a combination of income and long-term total return.

The Sub-fund normally invests principally in a diversified portfolio of investment grade rated bonds denominated in Sterling and issued or guaranteed by governments and public companies.

The Sub-fund applies a fully hedged currency strategy.

The Sub-Fund is actively managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.

In choosing investments, the investment manager uses one team to research and recommend possible securities and a second team to choose investments and assemble a properly balanced portfolio.

The Sub-fund may use Derivatives for efficient portfolio management, to manage risks or to seek investment gains.

The Sub-fund may hold ancillary liquid assets.

You may redeem shares of the Sub-fund on any business day in Luxembourg.

The Sub-funds does not promote environmental or social characteristics, or has as objective sustainable investment. Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

These shares are accumulation shares. Income and capital gains are included in the NAV calculation.

### INTENDED RETAIL INVESTORS

The product is reserved for professional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

### OTHER INFORMATION

The Depositary is CACEIS Investor Services Bank S.A.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment		5 years GBP 10 000		
		If you exit after 1 year	If you exit after 5 years	
<b>Scenarios</b>				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	GBP 6 500	GBP 1 620	
	Average return each year	-35.0%	-30.5%	
Unfavourable scenario	What you might get back after costs	GBP 7 760	GBP 9 020	This type of scenario occurred for an investment in the product between March 2015 and March 2020.
	Average return each year	-22.4%	-2.1%	
Moderate scenario	What you might get back after costs	GBP 10 280	GBP 11 450	This type of scenario occurred for an investment in the product between October 2013 and October 2018.
	Average return each year	2.8%	2.7%	
Favourable scenario	What you might get back after costs	GBP 13 180	GBP 12 980	This type of scenario occurred for an investment in the product between December 2014 and December 2019.
	Average return each year	31.8%	5.4%	

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10 000 is invested

Investment of GBP 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	GBP 47	GBP 264
Annual cost impact (*)	0.5%	0.5%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.2% before costs and 2.7% after costs.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
