

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. This information is required by law to help you to understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Capital Fund

Sub-fund of KBC Bonds

Capitalisation: LU0052032520 (ISIN-code for Capitalisation shares)

managed by KBC Asset Management S.A.

OBJECTIVES AND INVESTMENT POLICY

KBC Bonds Capital Fund aims to generate a return by investing at least two-thirds of its assets across a range of corporate and/or government bonds denominated in various currencies.

No more than one-quarter of the fund's assets are invested in convertible bonds and bonds with warrant. The fund may invest in 'closed' bond markets or bond markets to which private individuals have limited access.

The fund may invest its assets in money market instruments (up to one-third), in bank deposits (up to one-third) and/or in shares and other units (up to one-tenth).

The fund invests at least 75% of its assets in bonds and debt instruments with an investment grade* credit rating*, i.e. at least BBB-/Baa3 (long term), A3/F3/P3 (short term) from Standard & Poor's or an equivalent rating from Moody's or Fitch and/or in government bonds issued in local currency that have not been rated by the aforementioned agencies, but the issuer of which has been rated as investment grade by at least one of these agencies.

The fund invests no more than 25% of its assets in bonds and debt instruments that have a credit rating below investment grade or that have not received a rating from the aforementioned agencies.

The sub-fund will not invest in distressed and defaulted securities.

The asset manager will do everything possible to achieve the fund's objectives by making timely investments and temporarily hedging the exchange rate and interest rate risks.

The fund's reference index is 50% JPM EMU IG, 15% JPM GBI Japan, 5% JPM GBI UK, 30% JPM GBI US. The compartment has the objective of outperforming the reference index. For detailed information on the index, see www.jpmorgan.com.

The sub-fund is actively managed and does not set out to track the benchmark index. The benchmark is used for measuring the fund's portfolio in terms of performance and composition. The majority of the fund's bond holdings will be components of the benchmark. The manager may use discretionary powers to invest in bonds not included in the benchmark index in order to benefit from the sub-fund's specific investment opportunities.

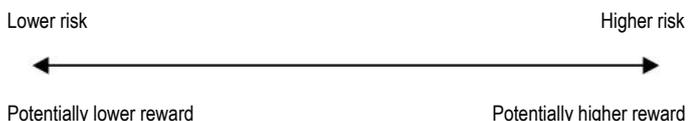

The sub-fund's investment policy restricts the extent to which the portfolio holdings may deviate from the benchmark. This deviation is measured by means of the tracking error, which indicates volatility in the performance difference between the sub-fund and its benchmark. The tracking error is set at 0.75 %. Investors should be aware that the actual tracking error may vary depending on market conditions. A fund that deviates less from the benchmark is less likely to outperform it.

The fund reinvests any income received in the manner set out in the prospectus (for more details, see section 14 of the prospectus).

Orders for fund units are executed daily (for more details see section 10 of the prospectus).

Investors may on request receive reimbursement of their UCITS units on any day (for more information, see section 10 of the prospectus).

RISK AND REWARD PROFILE

This figure is based on data from the past, which is not always a reliable indication of risk and return in the future.

The risk and reward indicator is assessed regularly and can therefore go up or down.

The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return. While the figure gives an indication of the return the fund might generate, it also indicates the risk involved. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. You might even sustain a loss.

The figure has been calculated from the viewpoint of an investor in euro.

Why does this fund have a risk and reward indicator of 3?

3 is typical for bond funds, which tend to have an indicator of 3 or 4. Bond funds are generally less sensitive to the markets than equity funds, which tend to have an indicator of 6 or even 7 in some cases. The value of bond funds is especially sensitive to changes in interest rates, since the interest on these bonds is fixed in advance and does not go up when market rates increase.

Moreover, an investment in this fund involves:

- A moderate level of inflation risk: there is no protection against an increase of the inflation.
- A high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- A moderate level of credit risk: the assets are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

CHARGES

These charges are used to cover, among other things, the management costs of the fund, including marketing and distribution expenses. They reduce the investment's ability to grow. You can find additional information on the charges in the information for this sub-fund in the prospectus.

One-off charges taken before or after you invest

Entry charge	2.50%	This is the <i>maximum</i> that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you will pay less. For more information on the actual entry and exit charges, please contact your financial adviser or distributor.
Exit charge	1.000%	
Switching from one sub-fund to another		If you would like to exchange your units in this sub-fund* for units in another sub-fund, you will be charged a fee in certain cases (for more information, see the information for this sub-fund in the prospectus).

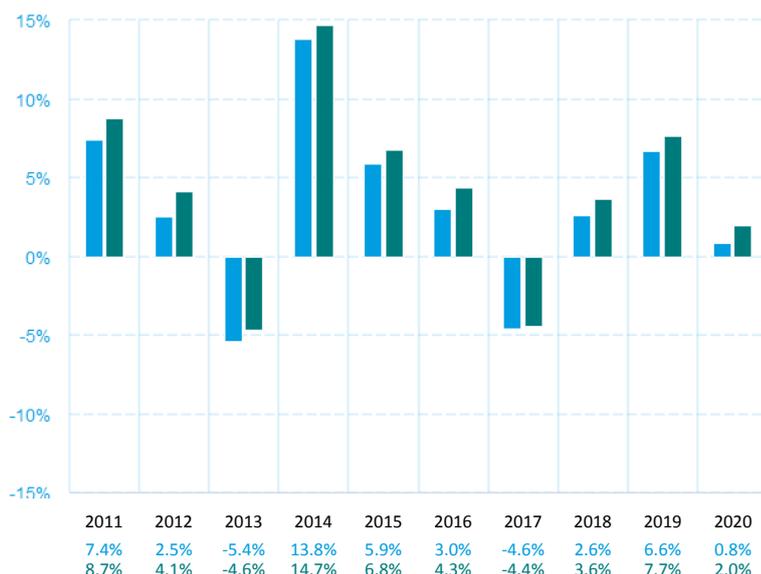

Charges taken from the fund over a year

Ongoing charge	0.88%	The figure for the ongoing charge is based on the charges for the year ending on 30 September 2020. This figure does not include transaction charges, except if the fund pays entry or exit charges when units in other funds are bought or sold, and may change from year to year.
----------------	-------	---

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

PAST PERFORMANCE

Past performance should not be seen as a good indicator of future performance.

The calculation of past performance includes all charges and fees, except taxes and entry and exit charges.

Current benchmark composition: 50% JPM EMU IG, 15% JPM GBI Japan, 5% JPM GBI UK, 30% JPM GBI US

The Fund does not intend to track the Reference Benchmark.

Start year: 1994

Currency: Euro
