

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Lemanik Sicav - Asian Opportunity - Capitalisation Retail EUR Class

(ISIN: LU0054300461) Asian Opportunity (the 'Fund') is a Sub-Fund of Lemanik Sicav (the 'Company').

Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The Fund mainly invests its assets in shares, fixed or floating rate income securities and Money Market Instruments (financial instruments issued by financial institutions or governments considered to be extremely low-risk).
- The Fund's strategy is to invest at least two third of all its net assets in debt securities and shares issued by issuers or companies located in an Asiatic Country (Far East and Middle East). However, the Investments in shares must represent at least 51% of total Fund's net asset value. Furthermore, the Fund's investments in fixed or floating rate income securities and Money Market Instrument can never exceed 49% of all its net-assets.
- The Fund may invest in a wide range of securities. The Investment Manager is free to manage the exposure to relevant exchange rates and may decide to hedge (an investment position intended to offset potential losses) or not to hedge exchange risks. On an ancillary basis, the Fund may hold cash and cash equivalents.
- The Fund is actively managed in reference to the Benchmark MSCI AC Far East Local. The Investment Manager will generally invest in the securities universe to which the benchmark refers and may deviate to a significant extent.
- The subscription, redemption shall be received at the latest two business days preceding the valuation day of the fund. Such requests can be made daily.
- The Fund does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of your shares. However, the annual general meeting of shareholders may decide to distribute such income.
- The Fund may use Financial Derivative Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs'). The Fund invests in FDIs in order to reduce the possibility of financial losses or to achieve higher gains.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.
- The Investment Manager may use a hedging strategy that aims to ensure returns for investors are consistent with the Fund's investment objective.

Risk and Reward Profile

Lower risk ← → Higher risk
Potentially lower rewards Potentially higher rewards

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 6, since the share price has a high volatility, therefore the risk of loss as well as the expected reward can be high.

The following risks may not be fully captured by the risk and reward indicator:

- Credit Risk: The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.
- Currency Risk: As the Fund invests in securities denominated in a number of different currencies, movements in exchange rates may, when not hedged, cause the value of the investments to increase or decrease.
- Equity Risk: The risk that investments depreciate because of stock market dynamics.
- Interest Risk: Risk that interest rates rise and reduce the market value of an investment.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Special consideration on risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.
