¹ formerly UBS (Lux) Equity Fund – Japan (JPY)

Features of the Fund

UBS (Lux) Equity Fund (hereinafter called the "Fund") offers investors a range of different subfunds ("umbrella structure") which invest in accordance with the investment policy described in the sales prospectus. The specific details on each subfund are defined in this sales prospectus, which will be updated on the inception of each new subfund.

The Fund has been established as a legally dependent openend investment fund under Luxembourg law in the legal form of a collective investment fund in accordance with Part I of the Luxembourg law relating to undertakings for collective investment enacted on 30 March 1988 and adapted in to conform to the Luxembourg law dated 17 December 2010, as amended, relating to Undertakings for Collective Investment.

The activities of UBS Equity Fund Management Company S.A. in its function as Management Company of UBS (Lux) Equity Fund ended on 14 October 2010. On 15 October 2010, UBS Asset Management (Europe) S.A.* assumed the function of Management Company. The liquidation of the UBS Equity Fund Management Company S.A. was completed on 29 March 2011.

The Fund's Management Regulations may be changed in observance of the provisions of the law. Each time a revision is deposited it is announced in the "Mémorial". The new Management Regulations come into force upon by signing by the Management Company and the Depositary. The consolidated version is deposited at the Commercial and Company Register of the District Court in Luxembourg for inspection.

The Fund has no legal personality as an investment fund. The entire assets of each subfund are the undivided property of all investors who have equal rights in proportion to the number of units which they hold. These assets are separate from the assets of the Management Company. The securities and other assets of the Fund are managed by UBS Asset Management (Europe) S.A.* as in-house funds in the interest and for the account of the unitholders.

The management regulations give the Management Company the authority to establish different subfunds for the Fund as well as different unit classes with specific characteristics within these subfunds. The sales prospectus will be updated each time a new subfund or an additional unit class is issued.

As at 30 November 2024, the following subfunds are active:

Various unit classes can be offered for the subfunds. Information on which unit classes are available for which subfund can be obtained from the Administrative Agent or at www.ubs.com/funds.

Units are issued as registered units only.

"P"

Units in classes with "P" in their name are available to all investors. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"N"

Units in classes with "N" in their name (units with restrictions on distribution partners or countries) are issued exclusively through distributors authorised by UBS Asset Management Switzerland AG and domiciled in Spain, Italy, Portugal and Germany, or in other distribution countries insofar as this has been decided by the Board of Directors. There are no entry charges for these classes, even if they have additional characteristics. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"K-1"

Units in classes with "K-1" in their name are available to all investors. Their smallest tradable unit is 0.001. The minimum investment amount is equivalent to the initial issue price of the unit class and is applicable on the level of the clients of financial intermediaries. This minimum investment amount must be met or exceeded with every subscription order that is placed. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 5 million, BRL 20 million, CAD 5 million, CHF 5 million, CZK 100 million, DKK 35 million EUR 3 million, GBP 2.5 million, HKD 40 million, JPY 500 million, NOK 45 million, PLN 25 million, RMB 35 million, RUB 175 million, SEK 35 million, SGD 5 million, USD 5 million, NZD 5 million or ZAR 40 million.

"K-B"

Units in classes with "K-B" in their name are exclusively reserved for investors who have signed a written agreement with UBS Asset Management Switzerland AG or one of its authorised distributors on investing in one or more subfunds of this umbrella fund. The costs for asset management are charged to investors under the aforementioned agreements. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100,

^{*} As of 1 October 2024, UBS Fund Management (Luxembourg) S.A was renamed UBS Asset Management (Europe) S.A.

BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, NZD 100, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100 or ZAR 1,000.

"K-X"

Units in classes with "K-X" in their name are exclusively reserved for investors who have signed a written agreement with UBS Asset Management Switzerland AG or one of its authorised contractual partners on investing in one or more subfunds of this umbrella fund. The costs for asset management, fund administration (comprising the costs incurred by the Management Company, administrative agent and the Depositary) and distribution are charged to investors under the aforementioned agreements. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"F"

Units in classes with "F" in their name are exclusively reserved for UBS Group AG affiliates. The maximum flat fee for this class does not include distribution costs. These units may only be acquired by UBS Group AG affiliates, either for their own account or as part of discretionary asset management mandates concluded with UBS Group AG companies. In the latter case, the units will be returned to the Fund upon termination of the mandate at the prevailing net asset value and without being subject to charges. The smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"Q"

Units in classes with "Q" in their name are exclusively reserved for financial intermediaries that: (i) invest for their own account, or (ii) receive no distribution fees in accordance with regulatory requirements, or (iii) can only offer their clients retrocession-free classes where these are available in the investment fund in question, in accordance with written agreements or agreements on fund savings plans concluded with them. Investments that no longer meet the above conditions may be forcibly redeemed at the prevailing net asset value or exchanged for another class of the subfund. The Management Company is not liable for any tax consequences that may result from a forcible redemption or exchange. The smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"QL"

Units in classes with "QL" in their name are exclusively reserved for selected financial intermediaries who: (i) have received approval from the Management Company prior to first

subscription, and (ii) in accordance with regulatory requirements and the written contracts with their clients may not receive any sales commission and/or may only offer their clients classes without retrocessions, where these are available in the investment fund in question. The Management Company will require a minimum investment of CHF 200 million (or the equivalent in another currency). The Management Company may waive the minimum investment temporarily or permanently. Investments that no longer meet the above conditions may be forcibly redeemed at the prevailing net asset value or exchanged for another class of the subfund. The Management Company is not liable for any tax consequences that may result from a forcible redemption or exchange.

The smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units is AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, NZD 100, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100 or ZAR 1,000.

"I-A1"

Units in classes with "I-A1" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the amended Law of 2010. The maximum flat fee for this class does not include distribution costs. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"I-A2"

Units in classes with "I-A2" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the Law of 2010. The maximum flat fee for this class does not include distribution costs. The smallest tradable unit of these shares is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000. The minimum subscription amount for these units is CHF 10 million (or foreign currency equivalent).

Upon subscription:

- (i) a minimum subscription must be made in accordance with the list above; or
- (ii) based on a written agreement between the institutional investor and UBS Asset Management Switzerland AG (or one of its authorised contractual partners) or written approval by UBS Asset Management Switzerland AG (or one its authorised contractual partners), the investor's total assets managed by UBS or its holdings in UBS collective investment schemes must be more than CHF 30 million (or foreign currency equivalent); or
- (iii) the institutional investor must be an institution for occupational retirement provision that is part of UBS Group AG or must be one of its wholly-owned group companies.

The management company may waive the minimum subscription if the total assets under management at UBS or the holdings of UBS collective investment schemes by institutional investors exceed CHF 30 million within a specified period.

"I-A3"

Units in classes with "I-A3" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the Law of 2010. The maximum flat fee for this class does not include distribution costs. The smallest tradable unit of these shares is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000. The minimum subscription amount for these units is CHF 30 million (or foreign currency equivalent). Upon subscription

- (i) a minimum subscription must be made in accordance with the list above; or
- (ii) based on a written agreement between the institutional investor and UBS Asset Management Switzerland AG (or one of its authorised contractual partners) or written approval by UBS Asset Management Switzerland AG (or one its authorised contractual partners), the investor's total assets managed by UBS or its holdings in UBS collective investment schemes must be more than CHF 100,000,000 (or foreign currency equivalent); or
- (iii) the institutional investor must be an institution for occupational retirement provision that is part of UBS Group AG or must be one of its wholly-owned group companies.

The management company may waive the minimum subscription if the total assets under management at UBS or the holdings of UBS collective investment schemes by institutional investors exceed CHF 100 million within a specified period.

"I-A4"

Units in classes with "I-A4" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the amended Law of 2010. The maximum flat fee for this class does not include distribution costs. The smallest tradable unit of these shares is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700 EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, NZD 100, PLN 500, RUB 3,500, SEK 700, SGD 100, USD 100 or ZAR 1,000. The minimum subscription amount for these units is CHF 100 million (or foreign currency equivalent). Upon subscription:

- (i) a minimum subscription must be made in accordance with the list above; or
- (ii) based on a written agreement between the institutional investor and UBS Asset Management Switzerland AG (or one its authorised contractual partners) or on the written approval of UBS Asset Management Switzerland AG (or one its authorised contractual partners), the investor's total assets managed by UBS or its holdings in UBS collective investment schemes must be more than CHF 500 million (or foreign currency equivalent); or
- (iii) the institutional investor must be an institution for occupational retirement provision that is part of UBS Group AG or must be one of its wholly-owned group companies.

The Management Company may waive the minimum subscription amount if the total assets managed by UBS or the amount held in UBS collective investment schemes for institutional investors is more than CHF 500 million within a defined period. Investments that no longer meet the above conditions may be forcibly redeemed at the prevailing net asset value or exchanged for another class of the subfund. The Management Company is not liable for any tax consequences that may result from a forcible redemption or exchange.

"I-B

Units in classes with "I-B" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the amended Law of 2010 who have signed a written agreement with UBS Asset Management Switzerland AG or one of its authorised contractual partners on investing in one or more subfunds of this umbrella fund. A fee covering the costs for fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary) is charged directly to the subfund. The costs for asset management and distribution are charged to investors under the aforementioned agreement. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"I-X"

Units in classes with "I-X" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the amended Law of 2010 who have signed a written agreement with UBS Asset Management Switzerland AG or one of its authorised contractual partners on investing in one or more subfunds of this umbrella fund. The costs for asset management, fund administration (comprising the costs incurred by the Management Company, administrative agent and the Depositary) and distribution are charged to investors under the aforementioned agreement. Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 100, BRL 400, CAD 100, CHF 100, CZK 2,000, DKK 700, EUR 100, GBP 100, HKD 1,000, JPY 10,000, NOK 900, PLN 500, RMB 1,000, RUB 3,500, SEK 700, SGD 100, USD 100, NZD 100 or ZAR 1,000.

"U-X"

Units in classes with "U-X" in their name are exclusively reserved for institutional investors within the meaning of Article 174(2)(c) of the amended Law of 2010 who have signed a written agreement with UBS Asset Management Switzerland AG or one of its authorised contractual partners on investing in one or more subfunds of this umbrella fund. The costs for asset management, fund administration (comprising the costs incurred by the Management Company, administrative agent and the Depositary) and distribution are charged to investors under the aforementioned agreement. This unit class is exclusively geared towards financial products (i.e. funds of funds or other pooled structures under various legislative frameworks). Their smallest tradable unit is 0.001. Unless the Management Company decides otherwise, the initial issue price of these units amounts to AUD 10,000, BRL 40,000, CAD 10,000,

CHF 10,000, CZK 200,000, DKK 70,000, EUR 10,000, GBP 10,000, HKD 100,000, JPY 1 million, NOK 90,000 PLN 50,000, RMB 100,000, RUB 350,000, SEK 70,000, SGD 10,000, USD 10,000, NZD 10,000 or ZAR 100,000.

Additional characteristics:

Currencies

The unit classes may be denominated in AUD, BRL, CAD, CHF, CZK, DKK, EUR, GBP, HKD, JPY, NOK, PLN, RMB, RUB, SEK, SGD, USD, NZD or ZAR. For unit classes issued in the currency of account of the subfund, this currency will not be included in the unit class name. The currency of account features in the name of the relevant subfund.

"hedged"

For unit classes with "hedged" in their name and with reference currencies different to the subfund's currency of account ("unit classes in foreign currencies"), the risk of fluctuations in the value of the reference currency is hedged against the subfund's currency of account. This hedging shall be between 95% and 105% of the total net assets of the unit class in foreign currency. Changes in the market value of the portfolio, as well as subscriptions and redemptions of unit classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The Management Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits.

The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the subfund's currency of account.

"Portfolio hedged"

For unit classes with "portfolio hedged" in their name, the currency risk of the subfund's investments is hedged against the reference currency of the unit class as follows: Systematically, between 95% and 105% of the proportion of investments in developed nation foreign currencies relative to the unit class' total net assets is hedged, except where this is unfeasible or not cost-effective. Emerging market foreign currency investments are not hedged. Changes in the market value of the subfund's investments, as well as subscriptions and redemptions of unit classes, can cause the hedge to temporarily exceed the range specified by the Portfolio Manager. The Management Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits. The hedging described is used to hedge the currency risk resulting from investments denominated in a currency other than the unit class' reference currency, as described above.

"BRL hedged"

The Brazilian real (ISO 4217 currency code: BRL) may be subject to exchange control regulations and repatriation limits set by the Brazilian government. Prior to investing in BRL classes, investors should also bear in mind that the availability and tradability of BRL classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in Brazil. The risk of fluctuations is hedged as described above under "hedged". Potential investors

should be aware of the risks of reinvestment, which could arise if the BRL class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a unit class and/or the subfund in accordance with the section "Liquidation and merger of the Fund and its subfunds or unit classes".

"RMB hedged"

Investors should note that the renminbi (ISO 4217 currency code: CNY), the official currency of the People's Republic of China (the "**PRC**"), is traded on two markets, namely as onshore RMB (CNY) in mainland China and offshore RMB (CNH) outside mainland China.

Units in classes with "RMB hedged" in their name are units whose net asset value is calculated in offshore RMB (CNH).

Onshore RMB (CNY) is not a freely convertible currency and is subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government. Offshore RMB (CNH), on the other hand, may be traded freely against other currencies, particularly EUR, CHF and USD. This means the exchange rate between offshore RMB (CNH) and other currencies is determined on the basis of supply and demand relating to the respective currency pair.

Convertibility between offshore RMB (CNH) and onshore RMB (CNY) is a regulated currency process subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government in coordination with offshore supervisory and governmental agencies (e.g. the Hong Kong Monetary Authority).

Prior to investing in RMB classes, investors should bear in mind that the requirements relating to regulatory reporting and fund accounting of offshore RMB (CNH) are not clearly regulated. Furthermore, investors should be aware that offshore RMB (CNH) and onshore RMB (CNY) have different exchange rates against other currencies. The value of offshore RMB (CNH) can potentially differ significantly from that of onshore RMB (CNY) due to a number of factors including, without limitation, foreign exchange control policies and repatriation restrictions imposed by the PRC government at certain times, as well as other external market forces. Any devaluation of offshore RMB (CNH) could adversely affect the value of investors' investments in the RMB classes. Investors should therefore take these factors into account when calculating the conversion of their investments and the ensuing returns from offshore RMB (CNH) into their target currency.

Prior to investing in RMB classes, investors should also bear in mind that the availability and tradability of RMB classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in the PRC. Thus, no guarantee can be given that offshore RMB (CNH) or the RMB classes will be offered and/or traded in future, nor can there be any guarantee as to the conditions under which offshore RMB (CNH) and/or RMB classes may be made available or traded. In particular, since the currency of account of the relevant subfunds offering the RMB classes would be in a currency other than offshore RMB (CNH), the ability of the relevant subfund to make redemption

payments in offshore RMB (CNH) would be subject to the subfund's ability to convert its currency of account into offshore RMB (CNH), which may be restricted by the availability of offshore RMB (CNH) or other circumstances beyond the control of the Management Company.

The risk of fluctuations is hedged as described above under "hedged".

Potential investors should be aware of the risks of reinvestment, which could arise if the RMB class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a unit class and/or the subfund in accordance with the section "Liquidation and merger of the Fund and its subfunds or unit classes".

"acc"

The income of unit classes with "-acc" in their name is not distributed unless the Management Company decides otherwise.

"dist"

The income of unit classes with "-dist" in their name is distributed unless the Management Company decides otherwise.

"qdist"

Units in classes with "-qdist" in their name may make quarterly distributions, gross of fees and expenses. Distributions may also be made out of the capital (this may include, inter alia, realised and unrealised net gains in net asset value) ("capital"). Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -gdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

"mdist"

Units in classes with "-mdist" in their name may make monthly distributions, gross of fees and expenses. Distributions may also be made out of capital. Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -mdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation. The maximum entry costs for units in classes with "-mdist" in their name is 6%.

"UKdist"

The aforementioned unit classes can be issued as those with "UKdist" in their name. In these cases, the Management Company intends to distribute a sum which corresponds to 100% of the reportable income within the meaning of the **UK reporting fund** rules when the unit classes are subject to these reporting fund rules. The Management Company does not intend to make taxable values for these unit classes available in other countries, as they are intended for investors whose investment in the unit class is liable to tax in the UK.

"2%","4%","6%","8%"

Units in classes with "2%" / "4%" / "6%" / "8%" in their name may make monthly (-mdist), quarterly (-qdist) or annual (-dist) distributions at the respective aforementioned annual percentage rates, gross of fees and expenses. The distribution amount is calculated based on the net asset value of the respective unit class at the end of the month (in the case of monthly distributions), financial quarter (in the case of quarterly distributions) or financial year (in the case of annual distributions). These unit classes are suitable for investors who wish for more stable distributions, unrelated to the past or expected returns or income of the respective subfund.

Distributions may thus also be made from the capital. Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist, -qdist, -mdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist, -qdist, -mdist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

"seeding"

Units in classes with "seeding" in their name are only offered during a limited time period. Further subscriptions are prohibited after the end of this period, unless otherwise decided by the Management Company. However, units can still be redeemed in accordance with the conditions for unit redemptions. Unless otherwise decided by the Management Company, the smallest tradable unit, the initial issue price and the minimum subscription amount shall correspond to the characteristics of the unit classes listed above.

The Fund is subject to no restrictions with regard to the size of its net assets, the number of units, number of subfunds and duration.

The Fund is a single and undividable legal entity. With respect to the unitholders, each subfund is regarded as being separate from the others. The assets of a subfund can only be used to offset the liabilities which the subfund concerned has assumed.

The acquisition of Fund units implies acceptance of the management regulations by the unitholder.

There is no provision in the management regulations for a meeting of the unitholder.

The financial year of the Fund ends on the last day of November.

The annual and semi-annual reports are prepared based on the information from the sales prospectus in force at the closing date of the report.

Information on whether a subfund of the Fund is listed on the Luxembourg Stock Exchange can be obtained from the Administrative Agent or the Luxembourg Stock Exchange website (www.bourse.lu).

The issue and redemption of units of the Fund are subject to the regulations prevailing in the country concerned.

Only the information contained in the sales prospectus and in one of the documents referred to therein shall be deemed to be valid.

The annual and semi-annual reports shall be available free of charge to unitholders at the registered office of the Management Company and the Depositary.

No subscription may be accepted on the basis of the financial reports. Subscriptions are accepted only on the basis of the current sales prospectus accompanied by the latest annual report and the latest semi-annual report if available.

The figures stated in this report are historical and not necessarily indicative of future performance.

^{*} The periodic disclosure at the date of the financial year end for this subfund is presented in the Appendix 5 of this annual report.

Audit report

To the Unitholders of **UBS (Lux) Equity Fund**

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of UBS (Lux) Equity Fund (the "Fund") and of each of its sub-funds as at 30 November 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 30 November 2024;
- the combined statement of operations for the Fund and the statement of operations for each of the sub-funds for the year then ended;
- the combined statement of changes in net assets for the Fund and the statement of changes in net assets for each of the sub-funds for the year then ended;
- the statement of investments in securities and other net assets for each of the sub-funds as at 30 November 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Management Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Management Company for the financial statements

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Management Company is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Management Company either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Management Company;
- conclude on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

¹ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² First NAV: 4.1.2023

Report of the Portfolio Manager

In the financial year from, 1 December 2023 to 30 November 2024, the biotech sector had positive returns, marking a recovery from the previous year which saw softer performance due to macroeconomic headwinds. An uptick in M&A and IPO activity this year bolstered the sector, underpinned by renewed optimism of a more favorable environment for innovation and growth. The prospect of lower interest rates and a more stable economic outlook also reinstated investor confidence in companies' ability to fund innovation, and larger pharmaceutical companies actively seeking acquisition opportunities further boosted sentiment in the biotech sector.

Against this backdrop, the subfund closed the financial year with a positive performance. During the period, the major positive contributors to absolute fund performance were underweight positions in Biogen, BioMarin, and an overweight in Guardant Health. Our main individual negative contributors were our overweight in Genmab, underweight in Natera, and overweight in Moderna.

¹ The unit class (HKD) K-1-acc was in circulation until 19.9.2024. Due to this fact, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Report of the Portfolio Manager

For the year ending 30 November 2024, China markets posted strong gains. The market declined at the beginning of the year as investors were disappointed by the slow economic recovery and the lack of cohesive policy, until September 2024. Chinese equities then rallied after the government announced a package of supportive policy measures including rate cuts, potential fiscal stimulus and a call to stem the decline of the real estate market.

The fund's performance was flattish in absolute terms on a net of fees basis. Holdings in Consumer Discretionary and Financials contributed the most, while holdings in Health Care were the main detractor. On a stock level, Tencent Holdings and Meituan were the key contributors. On the other hand, NetEase, CSPC Pharmaceutical and Kweichow Moutai were the major drags on performance.

¹ For the period from 7.7.2023 to 24.1.2024 the unit class I-X-acc was in circulation. Due to this fact, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

³ The benchmark of the (CHF hedged) classes is linked to the USD benchmark.

Report of the Portfolio Manager

During the financial year, 1 year to 30 November 2024, the broader market had a positive return on a rally in tech companies involved in the Al supply chain, India continued to gain favor as its economy produced robust broadbased momentum, the Fed started cutting rates and China announced a "policy pivot" towards stronger policy support amid a moribund economy. Sector-wise, IT and Financials were the best performing.

The subfund posted a positive performance too in the reporting period, albeit slightly behind the broader market. IT and Financials were the key contributors while Health Care detracted. Market-wise, Taiwan, India and Malaysia added most to returns while China detracted most. Key stock contributors were TSMC, CIMB and Naspers while key detractors were Samsung Electronics, PDD and NetEase.

¹ The unit class I-B-acc was active until 01.12.2023 - reactivated 27.12.2023. Due to this fact, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Report of the Portfolio Manager

The financial year from 1 December 2023 to 30 November 2024 started with lingering geopolitical and economic uncertainties amid the outbreak of war in the Middle East. However, concerns soon faded thanks to mounting confidence in the downward course of inflation, which enabled the global rate cutting cycle to begin and buoyed equity markets.

The subfund posted a positive absolute performance over the financial year. Stock selection in the information technology and utilities sectors positively contributed, while financials and communication services detracted. We strongly benefited from our position in Euronext, the leading stock exchange company in Europe, which continues to execute well on its strategic plan. We like this investment as Euronext is a GDP+ grower with a strong balance sheet and is expecting to generate €3 billion cashflow over the next three years. We think Euronext's inexpensive valuation combined with management's focus on distributing cash to shareholders through dividends and buybacks makes the company an attractive investment opportunity. Deutsche Telekom, the German incumbent telecommunications operator, also positively contributed to performance, benefitting from the global rate cutting cycle. Three quarters of Deutsche Telekom's value is in the highly successful listed US subsidiary, T-Mobile, which gives us exposure to US growth at attractive valuations. On the other hand, Universal Music Group, a Dutch music entertainment business, negatively contributed to performance after subscription growth slowed. ASML, the leading supplier of lithography equipment to the semiconductor industry, was also a detractor, as the stock fell out of favor with investors over the summer following Intel's second guarter miss and capex cut, and then further disappointed investors by lowering their full-year revenue guidance from EUR 35-40 billion to EUR 30-35 billion. We met with Roger Dassen, ASML's CFO, post profit warning and came away reassured that the long-term structural growth story remains intact, although near-term headwinds and visibility are unusually low.

¹ The unit class K-B-acc was in circulation until 24.1.2023. Due to this fact, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Report of the Portfolio Manager

The financial year from 1 December 2023 to 30 November 2024 started with lingering geopolitical and economic uncertainties amid the outbreak of war in the Middle East. However, concerns soon faded thanks to mounting confidence in the downward course of inflation, which enabled the global rate cutting cycle to begin and buoyed equity markets.

The subfund posted a positive absolute performance over the financial year. Stock selection in the materials and utilities sectors positively contributed, while financials and consumer staples detracted. Notably, our holding in Nestlé, the world's largest food and beverage company, weighed on performance. Nestlé has faced a series of execution issues over the last year, which ultimately cumulated in a CEO change as the board works to address the long period of underperformance. ASML, the leading supplier of lithography equipment to the semiconductor industry, was also a detractor, as the stock fell out of favor with investors over the summer following Intel's second quarter miss and capex cut, and then further disappointed investors by lowering their full-year revenue guidance from EUR 35-40 billion to EUR 30-35 billion. We met with Roger Dassen, ASML's CFO, post profit warning and came away reassured that the long-term structural growth story remains intact, although near-term headwinds and visibility are unusually low. On the other hand, we strongly benefited from our holding in Galderma, a skincare company which launched its initial public offering earlier this year. We also benefited from our position in Anglo American, a diversified metal ore mining company, which rallied following an attempted takeover from BHP in April. While the deal did not materialize, we held the name as we think the business is attractively valued using our baseline long-term commodity price forecasts. Anglo American also recently opted to demerge its South African coal assets following considerable shareholder pressure. This transaction will allow Anglo to focus on the production of metals that will be in demand during the transition away from fossil fuels towards clean energy such as copper and platinum. We recently met with Anglo's CFO, John Heasley, for a progress update on their ongoing transformation which remains ontrack.

¹ Due to the recent launch, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² For the period from 28.2.2022 to 10.2.2023 the unit class (EUR) I-A3-acc was in circulation. Due to this fact, there is no data for the calculation of the performance available.

³ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and the start of falling interest rates. The majority of equity indices were positive over the period, due to a narrowly based market recovery driven by US mega-caps, as the 'flight to safety' and surge in artificial intelligence (Al) drove the share prices of these Mega Cap tech stocks higher. This extreme concentration has persisted, with some of the largest companies composing a higher proportion of the major market indices than at any other point in the past few decades.

The subfund had a positive performance in absolute terms during the financial year. Stock selection in Financials and Industrials contributed positively; while stock selection in Energy and Real Estate detracted the most.

Performance

	Currency	2023/2024	2022/2023	2021/2022
Class (JPY) I-B-acc	JPY	28.1%	15.0%	-
Class P-acc ¹	USD	-	6.9%	-17.0%
Class Q-acc ¹	USD	-	7.6%	-16.4%
Class U-X-acc	USD	26.3%	8.6%	-15.6%

¹ The unit classes P-acc and Q-acc were in circulation until 24.5.2024. Due to this fact, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The subfund has no benchmark.

² The unit classes P-acc and Q-acc were in circulation until 24.5.2024

The performance data were not audited.

Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and the start of falling interest rates. The majority of equity indices were positive over the period, due to a narrowly based market recovery driven by US mega-caps, as the 'flight to safety' and surge in artificial intelligence (Al) drove the share prices of these Mega Cap tech stocks higher. This extreme concentration has persisted, with some of the largest companies composing a higher proportion of the major market indices than at any other point in the past few decades.

The subfund had a positive performance in absolute terms during the financial year. Stock selection in Financials and Information Technology contributed positively; while stock selection in Materials and Energy detracted the most.

¹ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

¹ See note 1

Report of the Portfolio Manager

For the financial year ending 30 November 2024, Greater China markets posted strong gains. The market declined at the beginning of the year as investors were disappointed by the slow economic recovery and the lack of cohesive policy, until September 2024. Chinese equities then rallied after the government announced a package of supportive policy measures including rate cuts, potential fiscal stimulus and a call to stem the decline of the real estate market.

The fund delivered a positive performance in absolute terms on a net of fees basis. Holdings in IT and Financials contributed the most, while holdings in Health Care and Consumer Staples were the main detractors. On a stock level, TSMC, Tencent Holdings and Meituan were the key contributors. On the other hand, Netease, CSPC Pharmaceutical and Kweichow Moutai were the major drags on performance.

Report of the Portfolio Manager

During the financial year, from 1 December 2023 to 30 November 2024, the Japanese equity market rose in yen terms. Projected corporate earnings were consistently revised upward, reflecting the normalization of the economy. A perception that Japan was going through an inflection point from the 30 plus years of deflation to inflation penetrated widely among investors, which helped the valuations of the market to expand.

The subfund posted a positive performance during the financial year. Our preference for quality Japanese companies in areas such as entertainment, banks, and staffing agencies worked well. We continued to focus on companies with a sustainable business model and compelling valuations.

Report of the Portfolio Manager

In the financial year, from 1 December 2023 to 30 November 2024, European Mid Cap equity markets provided investors with a positive performance. Even though economic activity continued to contract, abating inflation and interest rate cuts supported investor expectations of a gradual soft landing. Industrials, Communication Services and Financials were the strongest performing sectors over the financial year, while Energy and Materials lagged the market.

The subfund performed positively during the financial year and was helped by positive stock selection within the Financials and Health Care sectors, while stock selection in Industrials, Communication Services and Consumer Discretionary detracted from performance. At the individual stock level positive relative contributors included 3i Group, Rolls Royce, and Erste Gorup, whilst detractors included Aker BP, Infrastructure Wireless Italiane, and Barry Callebaut.

¹ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

Report of the Portfolio Manager

The financial year, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and falling interest rates. The narrow market leadership which began in 2023 persisted into the year, with the 'flight to safety' and surge in Al driving the share prices of mega cap stocks higher. Against this backdrop, the subfund posted a positive (absolute) performance during the financial year, but underperformed its benchmark.

On a relative basis, stock selection and sector allocation were headwinds to performance over the financial year. Stock selection in Information Technology and Energy detracted, while stock selection in Consumer Discretionary and Industrials added value. In terms of sector allocation, our overweight in Consumer Staples and underweight in Utilities detracted, while our slight overweight in Health Care and underweight in Information Technology detracted from performance.

¹ Due to the recent launch, there is no data for the calculation of the performance available.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

² See note 1

² The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Report of the Portfolio Manager

The financial year, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and falling interest rates. The narrow market leadership which began in 2023 persisted into the year, with the 'flight to safety' and surge in Al driving the share prices of Mega Cap stocks higher. Against this backdrop, the subfund posted a positive (absolute) performance during the financial year, but underperformed its benchmark.

On a relative basis, stock selection detracted from performance, while sector allocation contributed positively. Selection was positive within Health Care and Communication Services, but was offset by negative selection within Consumer Staples and Consumer Discretionary. In terms of sector allocation, our overweight in Information Technology and underweight in Utilities added value, while our underweight in Industrials and allocation to cash detracted from performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

Report of the Portfolio Manager

In the financial year, from 1 December 2023 to 30 November 2024, the healthcare sector had positive returns, though lagged the broader market. Performance within the sector was marked with high dispersion, with stocks exposed to the obesity opportunity set leading the advance, while other stocks in the sector significantly underperformed as they struggled to maintain the pace of growth from Covid-related demand. The sector underperformed also in Q4 of 2024 as post-election concerns around President-elect Trump's key healthcare appointments rekindled investor fears.

In the financial year, the subfund's performance was positive. Key contributors to absolute performance included our overweights in Sandoz, Philips, and Intuitive Surgical. On the other hand, overweights in Moderna, DexCom, and Genmab detracted from performance.

¹ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

Report of the Portfolio Manager

During the financial year from 1 December 2023 to November 2024, the technology sector continued its strong performance which started earlier in 2023 as enthusiasm around artificial intelligence (AI) persisted. Slowing inflation also added to optimism that central banks were nearing the end of their rate hiking cycles, which provided further support to longer duration assets. Over the reporting period, Information Technology was the top performing sector in the market. From an industry group perspective, Semiconductors & Semiconductor Equipment had the highest returns, followed by Technology Hardware & Equipment; as many of these companies benefited from AI tailwinds.

The subfund had a positive absolute performance over the reporting period. Key contributors to absolute performance included our underweight in Adobe, and our positions in AMD and Broadcom. On the other hand, positions in WolfSpeed, Ubisoft Entertainment, and Intel detracted from performance.

¹ The subfund is actively managed. The index is a point of reference against which the performance of the subfund may be measured.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

The performance data were not audited.

Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024, generally saw an equity market rally as recession fears receded and inflation showed signs of cooling, reinforcing the view that markets are approaching the end of the rate hiking cycle. The majority of equity indices were positive over the period, due to ongoing optimism around AI which provided support to growth expectations. Growth stocks outperformed value in a narrowly based market recovery driven by US megacaps, as the 'flight to safety' and surge in AI drove the share prices of these Mega Cap tech stocks higher. This extreme concentration persisted into 2024, with some of the largest companies composing a higher proportion of the major market indices than at any point in the past few decades.

The subfund had a positive performance during the financial year. Stock selection in Consumer Staples and the lack of Energy exposure contributed positively; while stock selection in Information Technology and Consumer Discretionary detracted the most.

Notes to the Financial Statements

Note 1 – Summary of significant accounting policies

The financial statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg. The significant accounting policies are summarised as follows:

a) Calculation of the net asset value

The net asset value and the issue and redemption price per unit of each subfund or unit class are expressed in the reference currency of the subfund or unit class concerned and are calculated every business day by dividing the overall net assets of the subfund attributable to each unit class by the number of units in circulation in this unit class of the subfund.

In this context, "business day" refers to normal bank business days in Luxembourg (i.e. each day on which the banks are open during normal business hours) with the exception of individual non-statutory rest days in Luxembourg and days on which exchanges in the main countries in which the subfund invests are closed or 50% or more subfund investments cannot be adequately valued.

The percentage of the net asset value attributable to each unit class of a subfund changes each time units are issued or redeemed. It is determined by the ratio of the units in circulation in each unit class to the total number of subfund units in circulation, taking into account the fees charged to that unit class

b) Valuation principles

- Liquid assets (whether in the form of cash and bank deposits, bills of exchange, cheques, promissory notes, expense advances, cash dividends and declared or accrued interest still receivable) are valued at face value, unless this value is unlikely to be fully paid or received, in which case their value is determined by deducting an amount deemed appropriate to arrive at their real value.
- Securities, derivatives and other assets listed on a stock exchange are valued at the most recent market prices available. If these securities, derivatives or other assets are listed on several stock exchanges, the most recently available price on the stock exchange that represents the major market for this asset shall apply.
 - In the case of securities, derivatives and other assets not commonly traded on a stock exchange and for which a secondary market among securities traders exists with pricing in line with the market, the Management Company may value these securities, derivatives and other investments based on these prices. Securities, derivatives and other investments not listed on a stock exchange, but traded on another regulated market that operates regularly and is recognised and open to the public, are valued at the most recently available price on this market.
- Securities and other investments not listed on a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, are valued by the Management Company according to other principles chosen by it in good faith on the basis of probable market prices.

- Derivatives not listed on a stock exchange (OTC derivatives)
 are valued on the basis of independent pricing sources.
 If only one independent pricing source is available for a
 derivative, the plausibility of the valuation obtained will be
 verified using calculation models that are recognised by the
 Management Company and the Fund's auditor, based on
 the market value of that derivative's underlying.
- Units of other undertakings for collective investment in transferable securities (UCITS) and/or undertakings for collective investment (UCIs) are valued at their last known asset value
- Money market instruments not traded on a stock exchange or on another regulated market open to the public will be valued on the basis of the relevant curves. Curve-based valuations are calculated from interest rates and credit spreads. The following principles are applied in this process: The interest rate nearest the residual maturity is interpolated for each money market instrument. Thus calculated, the interest rate is converted into a market price by adding a credit spread that reflects the creditworthiness of the underlying borrower. This credit spread is adjusted if there is a significant change in the borrower's credit rating.
- Securities, money market instruments, derivatives and other assets denominated in a currency other than the relevant subfund's currency of account, and not hedged by foreign exchange transactions, are valued using the average exchange rate (between the bid and ask prices) known in Luxembourg or, if none is available, using the rate on the most representative market for that currency.
- Term and fiduciary deposits are valued at their nominal value plus accumulated interest.
- The value of swaps is calculated by an external service provider and a second independent valuation is provided by another external service provider. Such calculations are based on the net present value of all cash flows (both inflows and outflows). In some specific cases, internal calculations (based on models and market data made available by Bloomberg) and/or broker statement valuations may be used. The valuation method depends on the security in question and is chosen pursuant to the applicable UBS valuation policy.

The Management Company is authorised to apply other generally recognised and verifiable valuation criteria in good faith to arrive at an appropriate valuation of the net assets if a valuation in accordance with the foregoing provisions proves unfeasible or inaccurate.

Due to fees and charges as well as the buy-sell spreads for the underlying investments, the actual costs of buying and selling assets and investments for a subfund may differ from the last available price or, if applicable, the net asset value used to calculate the net asset value per unit. These costs have a negative impact on the value of a subfund and are termed "dilution". To reduce the effects of dilution, the Board of Directors may at its own discretion make a dilution adjustment to the net asset value per unit (swing pricing).

Units are issued and redeemed based on a single price: the net asset value per unit. To reduce the effects of dilution, the net asset value per unit is nevertheless adjusted on valuation days as described below; this takes place irrespective of whether the subfund is in a net subscription or net redemption position

on the relevant valuation day. If no trading is taking place in a subfund or class of a subfund on a particular valuation day, the unadjusted net asset value per unit is applied. The Board of Directors has discretion to decide under which circumstances such a dilution adjustment should be made. The requirement to carry out a dilution adjustment generally depends on the scale of subscriptions or redemptions of units in the relevant subfund. The Board of Directors may apply a dilution adjustment if, in its view, the existing unitholders (in the case of subscriptions) or remaining unitholders (in the case of redemptions) could otherwise be put at a disadvantage. The dilution adjustment may take place if:

- (a) a subfund records a steady fall (i.e. a net outflow due to redemptions);
- (b) a subfund records a considerable volume of net subscriptions relative to its size;
- (c) a subfund shows a net subscription or net redemption position on a particular valuation day; or
- (d) In all other cases in which the Board of Directors believes a dilution adjustment is necessary in the interests of the unitholders.

When a valuation adjustment is made, a value is added to or deducted from the net asset value per unit depending on whether the subfund is in a net subscription or net redemption position; the extent of the valuation adjustment shall, in the opinion of the Board of Directors, adequately cover the fees and charges as well as the buy-sell spreads. In particular, the net asset value of the respective subfund will be adjusted (upwards or downwards) by an amount that (i) reflects the estimated tax expenses, (ii) the trading costs that may be incurred by the subfund, and (iii) the estimated bid-ask spread for the assets in which the subfund invests. As some equity markets and countries may show different fee structures on the buyer and seller side, the adjustment for net inflows and outflows may vary. Generally speaking, adjustments shall be limited to a maximum of 2% of the relevant applicable net asset value per unit. Under exceptional circumstances (e.g. high market volatility and/or illiquidity, extraordinary market conditions, market disruptions etc.), the Board of Directors may decide to apply temporarily a dilution adjustment of more than 2% of the relevant applicable net asset value per unit in relation to each subfund and/or valuation date, provided that the Board of Directors is able to justify that this is representative of prevailing market conditions and is in the unitholders' best interest. This dilution adjustment shall be calculated according to the procedure specified by the Board of Directors. Unitholders shall be informed through the normal channels whenever temporary measures are introduced and once the temporary measures have ended. The net asset value shall be calculated separately for each class of the subfund. However, dilution adjustments affect the net asset value of each class to the same degree in percentage terms. The dilution adjustment is made at subfund level and relates to capital activity, but not to the specific circumstances of each individual investor transaction.

For all subfunds the Swing Pricing methodology is applied. If there were Swing Pricing adjustments to the net asset value at the end of the year, this can be seen from the three-year comparison of the net asset value information of the subfunds. The issue and redemption price per unit represents the adjusted net asset value.

As some of the Fund's subfunds may be invested in markets that are closed at the time their assets are valued, the Management Company may – by way of derogation to the aforementioned provisions – allow the net asset value per unit to be adjusted in order to more accurately reflect the fair value of these subfunds' assets at the time of valuation. In practice, the securities in which the subfunds are invested are generally valued on the basis of the latest available prices at the time of calculating the net asset value per unit, as described above. There may, however, be a substantial time difference between the close of the markets in which a subfund invests and the time of valuation.

As a result, developments that may influence the value of these securities and that occur between the closure of the markets and the time of valuation are not generally taken into account in the net asset value per unit of the subfund concerned. If, as a result of this, the Management Company deems that the most recently available prices of the securities in a subfund's portfolio do not reflect their fair value, it may allow the net asset value per unit to be adjusted in order to reflect the assumed fair value of the portfolio at the time of valuation. Such an adjustment is based on the investment policy determined by the Management Company and a number of practices. If the value is adjusted as described above, this will be applied consistently to all unit classes in the same subfund.

The Management Company reserves the right to apply this measure to the relevant subfunds of the Fund whenever it deems this to be appropriate.

Evaluating assets at fair value calls for greater reliability of judgement than evaluating assets for which readily available market quotations can be referred to. Fair-value calculations may also be based on quantitative models used by price reporting providers to determine the fair value. No guarantee can be given that the Fund will be in a position to accurately establish the fair value of an asset when it is about to sell the asset around the time at which the Fund determines the net asset value per unit. As a consequence, if the Fund sells or redeems units at the net asset value at a time when one or more participations are valuated at fair value, this may lead to a dilution or increase in the economic participation of the existing unitholders.

If necessary, additional valuations may be made throughout the day. Such new valuations shall apply for subsequent issues and redemptions of units.

c) Net realized gain (loss) on sales of securities

The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold.

d) Valuation of forward foreign exchange contracts

The unrealized gain (loss) of outstanding forward foreign exchange contracts is valued on the basis of the forward exchange rates prevailing at valuation date.

e) Valuation of financial futures contracts

Financial futures contracts are valued based on the latest available published price applicable on the valuation date. Realized gains and losses and the changes in unrealized gains and losses are recorded in the statement of operations. The realized gains and losses are calculated in accordance with the FIFO method, i.e. the first contracts acquired are regarded as the first to be sold.

f) Valuation on options

Outstanding options traded on a regulated market are valued on the settlement price or the last available market price of the instruments.

Options which are not listed on an official stock exchange (OTC options) are marked to market based upon daily prices obtained from Bloomberg option pricer functionality and checked against third party pricing agents.

The realized gains or losses on options and the change in unrealized appreciation or depreciation on options are disclosed in the statement of operations and in the changes in net assets respectively under the positions realized gains (losses) on options and Unrealized appreciation (depreciation) on options.

g) Conversion of foreign currencies

Bank accounts, other net assets and the valuation of the investments in securities held denominated in currencies other than the currency of account of the different subfunds are converted at the mid closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the different subfunds are converted at the mid closing spot rates at payment date. Gain or loss on foreign exchange is included in the statement of operations.

The cost of securities denominated in currencies is other than the currency of account of the different subfunds is converted at the mid closing spot rate prevailing on the day of acquisition.

h) Accounting of securities' portfolio transactions

The securities' portfolio transactions are accounted for the bank business day following the transaction dates.

i) Combined financial statements

The combined financial statements of the Fund are expressed in EUR. The various items of the combined statement of net assets, the combined statement of operations and the combined statement of changes in net assets as at 30 November 2024 of the Fund are equal to the sum of the corresponding items in the financial statements of each subfund converted into EUR at the following exchange rates.

The following exchange rates were used for the conversion of the combined financial statements as at 30 November 2024:

Exchange rates

EUR 1	=	JPY	158.572832
EUR 1	=	USD	1.056200

j) Receivable on securities sales, Payable on securities purchases

The position "Receivable on securities sales" can also include receivables from foreign currency transactions. The position "Payable on securities purchases" can also include payables from foreign currency transactions.

Receivables and payables from foreign exchange transactions are netted.

k) Income recognition

Dividends, net of withholding taxes, are recognized as income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

Note 2 – Flat fee

The Fund pays a monthly flat fee for each of the subfunds, calculated on the average net asset value of the subfund as shown in the tables below:

UBS (Lux) Equity Fund – Biotech (USD)

The aforementioned flat fee shall be used as follows:

1. In accordance with the following provisions, a maximum flat fee based on the net asset value of the Fund is paid from the Fund's assets for the management, administration, portfolio management and distribution of the Fund (if applicable), as well as for all Depositary tasks, such as the safekeeping and supervision of the Fund's assets, the processing of payment transactions and all other tasks listed in the "Depositary and Main Paying Agent" of the sales prospectus. This fee is charged to the Fund's assets pro rata temporis upon every calculation of the net asset value, and is paid on a monthly basis (maximum flat management fee). The relevant maximum flat management fee will not be charged until the corresponding unit classes have been launched. An overview of the maximum flat management fees can be found under "The subfunds and their special investment policies" of the sales prospectus. The actual maximum rate applied to the flat management fee can be found in the annual and semi-annual reports.

This fee is shown in the Statement of Operations as "Flat fee".

- 2. The maximum flat management fee does not include the following fees and additional expenses, which are also taken from the Fund assets:
 - a) all other Fund asset management expenses for the sale and purchase of assets (bid-ask spread, market-based brokerage fees, commissions, fees, etc.); As a rule, these expenses are calculated upon the purchase or sale of the respective assets. In derogation hereto, these additional expenses, which arise through the sale and purchase of assets in connection with the settlement of the issue and redemption of units, are covered by the application of the swing pricing principle pursuant to the section titled "Net asset value, issue, redemption and conversion price" of the sales prospectus;
 - b) fees of the supervisory authority for the establishment, modification, liquidation and merger of the Fund, as well as all charges payable to the supervisory authorities and any stock exchanges on which the subfunds are listed:
 - auditor's fees for the annual audit and for authorisations in connection with creations, alterations, liquidations and mergers within the Fund, as well as any other fees paid to the audit firm for services provided in relation to the administration of the Fund and as permitted by law;
 - d) fees for legal consultants, tax consultants and notaries in connection with the creation, registration in distribution countries, alteration, liquidation and merger of the Fund, as well as for the general safeguarding of the interests of the Fund and its investors, insofar as this is not expressly prohibited by law;
 - e) costs for publishing the Fund's net asset value and all costs for notices to investors, including translation costs:
 - f) costs for the Fund's legal documents (prospectuses, KID, annual and semi-annual reports, and other documents legally required in the countries of domiciliation and distribution);
 - g) costs for the Fund's registration with any foreign supervisory authorities (if applicable), including fees payable to the foreign supervisory authorities, as well as translation costs and fees for the foreign representative or paying agent;
 - h) expenses incurred through use of voting or creditors' rights by the Fund, including fees for external advisers;
 - i) costs and fees related to any intellectual property registered in the Fund's name, or to the Fund's rights of usufruct;
 - j) all expenses arising in connection with any extraordinary measures taken by the Management Company, Portfolio Manager or Depositary to protect the interests of the investors;
 - k) if the Management Company participates in class action suits in the interests of investors, it may charge expenses arising in connection with third parties (e.g. legal and Depositary costs) to the Fund's assets. Furthermore, the Management Company may bill for all administrative costs, provided these are verifiable, and disclosed and accounted for in the Fund's published total expense ratio (TER).

These commissions and fees are shown in the Statement of Operations as "Other commissions and fees".

3. The Management Company may pay trailer fees for the distribution of the Fund.

For unit class F, an additional fee will also be charged; this shall be determined via a separate contract between the investor and UBS Asset Management Switzerland AG or one of its authorised distribution partners.

For unit class "I-B", a fee is charged to cover the costs of fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary). The costs for asset management and distribution are charged outside of the Fund under a separate contract concluded directly between the investor and UBS Asset Management Switzerland AG or one of its authorised representatives.

Costs relating to the services performed for unit classes I-X, K-X and U-X for asset management, fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary) and distribution are covered by the compensation to which UBS Asset Management Switzerland AG is entitled under a separate contract with the investor.

Costs relating to the services to be performed for unit classes "K-B" for asset management purposes are covered by the compensation to which UBS Asset Management Switzerland AG or one of its authorised distribution partners is entitled under a separate contract with the investor.

All costs that can be attributed to individual subfunds will be charged to these subfunds.

Costs that can be allocated to unit classes will be charged to those unit classes. Costs pertaining to some or all subfunds/unit classes will be charged to those subfunds/unit classes in proportion to their respective net asset values.

With regard to subfunds that may invest in other UCIs or UCITS under the terms of their investment policies, fees may be incurred both at the level of the subfund as well as at the level of the relevant target fund. The management fees (excluding performance fees) of the target fund in which the assets of the subfund are invested may amount to a maximum of 3%, taking into account any trailer fees.

Should a subfund invest in units of funds that are managed directly or by delegation by the Management Company itself or by another company linked to the Management Company through common management or control or through a substantial direct or indirect holding, no issue or redemption charges may be charged to the investing subfund in connection with these target fund units.

Details on the Fund's ongoing costs (or ongoing charges) can be found in the KIDs.

Note 3 – Taxe d'abonnement

The Fund is subject to Luxembourg law. In accordance with current legislation in the Grand Duchy of Luxembourg, the Fund is not subject to any Luxembourg withholding, income, capital gains or wealth taxes. From the total net assets of each subfund, however, a tax of 0.05% p.a. ("taxe d'abonnement") payable to the Grand Duchy of Luxembourg is due at the end of every quarter (reduced taxe d'abonnement amounting to 0.01% p.a. for unit classes F, I-A1, I-A2, I-A3, I-A4, I-B, I-X and U-X). This tax is calculated on the total net assets of each subfund at the end of every quarter. In the event that the conditions to benefit from the reduced 0.01% rate are no longer satisfied, all units in classes F, I-A1, I-A2, I-A3, I-A4, I-B, I-X and U-X may be taxed at the rate of 0.05%.

Subfunds may benefit from reduced taxe d'abonnement rates ranging from 0.01% to 0.04% p.a. for the portion of net assets that are invested into environmentally sustainable economic activities as defined in Article 3 of EU Regulation 2020/852 of 18 June 2020.

Note 4 – Other income

Other income mainly consist of income resulting from Swing Pricing.

Note 5 – Related party transactions

Connected persons in the context of this note are those defined in the SFC Code on Unit Trusts and Mutual Funds. All transactions entered into during the year between the subfunds and its connected persons were carried out in the normal course of business and on normal commercial terms.

a) Transactions on securities and derivative financial instruments

The volume of securities and derivative financial instruments undertaken via a broker that is an affiliate of the Management Company (except options), the Portfolio Manager, the Depositary or the Board of Directors for the financial year from 1 December 2023 to 30 November 2024 for the following subfunds licensed for sale in Hong Kong is:

UBS (Lux) Equity Fund	Volume of transactions in equities and equity- like securities with related parties	As a % of the total of security transactions
– China Opportunity (USD)	183 730 278.06 USD	5.12%
– Emerging Markets Sustainable Leaders (USD)	45 693 277.04 USD	7.88%
– European Opportunity Sustainable (EUR)	84 806 531.90 EUR	4.49%
– Greater China (USD)	151 195 180.51 USD	5.79%
– Tech Opportunity (USD)	- USD	0.00%

UBS (Lux) Equity Fund	Commissions on transactions in equities and equity-like securities with related parties	As a % of the total of security commission
– China Opportunity (USD)	89 188.17 USD	0.00%
– Emerging Markets Sustainable Leaders (USD)	34 867.29 USD	0.01%
– European Opportunity Sustainable (EUR)	2 932.33 EUR	0.00%
– Greater China (USD)	31 227.45 USD	0.00%
– Tech Opportunity (USD)	- USD	0.00%

As disclosed in Note 10 – Transaction Costs, the transaction costs for fixed-income investments, exchange traded futures contracts and other derivative contracts are included in the purchase and sale price of the investment and are therefore not listed individually here.

UBS (Lux) Equity Fund	Volume of transactions in other securities (except equities, equity-like securities and derivative financial instruments) with related parties	As a % of the total of security transactions
– China Opportunity (USD)	- USD	0.00%
 Emerging Markets Sustainable Leaders (USD) 	- USD	0.00%
– European Opportunity Sustainable (EUR)	19 010 000.00 EUR	1.01%
– Greater China (USD)	- USD	0.00%
– Tech Opportunity (USD)	- USD	0.00%

According to normal Market practice, no commissions have been charged to the Fund on transactions on "other securities (except equities and equity-like securities)" with related parties. Such transactions were entered in the ordinary course of business and on normal commercial terms.

For the conversion of the volume of transactions with related parties into subfund currency, the exchange rates of the financial statements as of 30 November 2024 were used.

b) Transactions in Units of the Fund

Connected persons may invest in a new subfund/unitclass for the purpose of providing seed capital ("Direct Investment"), with the intent of remaining invested until the subfund/unitclass has substantial net assets. Such investments are at arm's length and comply with all late trading/market timing prevention requirements. No connected person may invest for the purpose of exercising management or control over any Fund or the Management Company.

As of 30 November 2024, the Management Company and its affiliates / persons had not contributed any seed capital to the subfunds / unit classes registered in Hong Kong.

c) Holdings of the Board of Directors of the Management Company

The members of the Board of Directors of the Management Company and their affiliated persons may subscribe and redeem units in the subfunds.

As of 30 November 2024, one Director of the Management Company hold units as follows:

Holder	Subfunds	Number of units	% per Total Net Asset Value
Director 1	UBS (Lux) Equity Fund – Greater China (USD) P-acc	60	0.40%

No other Directors had holdings in the subfunds registered in Hong Kong as of 30 November 2024.

Note 6 – Income distribution

In accordance with Article 10 of the Management Regulations, once the annual accounts are closed the Management Company will decide whether and to what extent distributions are to be paid out by each subfund. The payment of distributions must not result in the net assets of the Fund falling below the minimum amount for Fund's assets laid down by law. If distributions are made, payment will be effected within four months of the end of the financial year.

The Management Company is authorized to pay interim dividends and to suspend the payment of distributions.

An income equalisation amount will be calculated so that the distribution corresponds to the actual income entitlement.

Note 7 – Soft commission arrangements

If permitted by the laws governing the Portfolio Manager, the Portfolio Manager and its affiliates may enter into soft commission arrangements with certain brokers which they engage in security transactions on behalf of the subfunds under which certain goods and services used to support investment decision making will be received without a direct payment in return. Such commissions are defined as soft dollars by the Hong Kong Securities and Futures Commission. This is only done when the transaction execution is consistent with the best execution standards, and it has been determined in good faith that the brokerage fee is reasonable in relation to the value of the execution and/or brokerage services provided by the broker.

Goods and services received solely included research services. The relative costs or benefits of research received from brokers are not allocated among particular clients or funds because it is believed that the research received is, in the aggregate, of assistance in fulfilling the Portfolio Manager and its affiliates' overall responsibilities to their clients or funds they manage. The amounts of transactions executed with brokers having soft commission arrangements in place and the related

commissions that have been paid by the subfunds for these transactions are as follows:

UBS (Lux) Equity Fund	Amounts of transactions executed with brokers having soft commission arrangements in place (in USD)	Related commissions that have been paid by the subfunds for these transactions (in USD)
– China Opportunity (USD)	1 109 334 189.53	275 828.16
– Emerging Markets Sustainable Leaders (USD)	464 599 340.61	169 843.21
– European Opportunity Sustainable (EUR)	1 544 290 330.59	-
– Greater China (USD)	305 441 927.55	114 594.93
– Tech Opportunity (USD)	428 840 532.28	52 394.23

Except of the above item there are no other comparable agreements for the other subfunds.

Note 8 – Total Expense Ratio (TER)

This ratio was calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

¹ formerly UBS (Lux) Equity Fund – Japan (JPY)

The TER for classes of units which were active less than a 12 month period are annualised.

Transaction costs, interest costs, securities lending costs and any other costs incurred in connection with currency hedging are not included in the TER.

Note 9 – Portfolio Turnover Rate (PTR)

The portfolio turnover has been calculated as follows:

(Total purchases + total sales) – (total subscriptions + total redemptions)

Average of net assets during the period under review

The portfolio turnover statistics are the following for the period under review:

UBS (Lux) Equity Fund	Portfolio Turnover Rate (PTR)
– Biotech (USD)	75.04%
– China Opportunity (USD)	-36.71%
– Emerging Markets Sustainable Leaders (USD)	48.21%
– Euro Countries Opportunity Sustainable (EUR)	197.10%
– European Opportunity Sustainable (EUR)	265.04%
– Global Sustainable (USD)	36.40%
– Global Sustainable Improvers (USD)	83.33%
– Greater China (USD)	-35.50%
– Japan Sustainable (JPY)¹	-8.08%
– Mid Caps Europe Sustainable (EUR)	56.08%
– Mid Caps USA (USD)	177.88%
– Small Caps USA (USD)	-7.98%
– Sustainable Health Transformation (USD)	25.89%
– Tech Opportunity (USD)	177.70%
– US Sustainable (USD)	55.70%

¹ formerly UBS (Lux) Equity Fund – Japan (JPY)

Note 10 – Transaction costs

Transaction costs include brokerage fees, stamp duty, local taxes and other foreign charges if incurred during the period. Transaction fees are included in the cost of securities purchased and sold.

For the financial year ended on 30 November 2024, the Fund incurred transaction costs relating to purchase or sale of investments in securities and similar transactions as follows:

UBS (Lux) Equity Fund	Transaction costs
– Biotech (USD)	210 071.31 USD
– China Opportunity (USD)	2 586 685.00 USD
– Emerging Markets Sustainable Leaders (USD)	909 752.39 USD
– Euro Countries Opportunity Sustainable (EUR)	1 214 221.80 EUR
– European Opportunity Sustainable (EUR)	1 957 849.23 EUR
– Global Sustainable (USD)	379 368.95 USD
– Global Sustainable Improvers (USD)	346 202.50 USD
– Greater China (USD)	821 993.16 USD
– Japan Sustainable (JPY)1	6 722 656 JPY

¹ formerly UBS (Lux) Equity Fund – Japan (JPY)

UBS (Lux) Equity Fund	Transaction costs
– Mid Caps Europe Sustainable (EUR)	180 807.87 EUR
– Mid Caps USA (USD)	157 315.63 USD
– Small Caps USA (USD)	63 991.24 USD
– Sustainable Health Transformation (USD)	115 192.13 USD
– Tech Opportunity (USD)	204 362.14 USD
– US Sustainable (USD)	6 269.87 USD

Not all transaction costs are separately identifiable. For fixed income investments, forward currency contracts and other derivative contracts, transaction costs will be included in the purchase and sale price of the investment. Whilst not separately identifiable these transaction costs will be captured within the performance of each subfunds.

Note 11 – Defaulted securities

In the event a bond is in default (hence not paying a coupon/principal as specified in the offering documents) but a pricing quotes exists, a final payment is expected and the bond would therefore be kept in the portfolio.

Furthermore, there are securities that have defaulted in the past where no pricing quotes exists. These securities have been fully written off by the Fund. They are monitored by the management company that will allocate any return that might still arise (ie dividend) to the subfunds. They are not shown within the portfolio but separately in this note.

Note 12 – Name change

The following name change occurred:

Old name	New name	Date
UBS (Lux) Equity Fund	UBS (Lux) Equity Fund	
– Japan (JPY)	– Japan Sustainable (JPY)	22.4.2024

Note 13 – Subsequent events

There were no events after the year-end that require adjustment to or disclosure in the Financial Statements.

Note 14 – Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the unitholders, the Management Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Management Company and/or the Depositary can elect to make themselves and the Fund subject to the jurisdiction of the countries in which the Fund units were bought and sold.

The English version of these financial statements is the authoritative version and only this version was audited by the auditor. However, in the case of units sold to investors from the other countries in which Fund units can be bought and sold, the Management Company and the Depositary may recognize approved translations (i.e. approved by the Management Company and the Depositary) into the languages concerned as binding upon themselves and the Fund.

Note 15 – OTC-Derivatives and Securities Lending

If the Fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the Fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the Fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Depositary in favour of the Fund. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Depositary or within their subdepositary/correspondent bank network may result in the rights or recognition of the Fund in connection with the security to be delayed, restricted or even eliminated, which would force the Fund to fulfill its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

The Fund may lend portions of its securities portfolio to third parties. In general, lendings may only be effected via recognized clearing houses such as Clearstream International or Euroclear, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. Collateral is received in relation to securities lent. Collateral is composed of high quality securities in an amount typically at least equal to the market value of the securities loaned.

UBS Europe SE, Luxembourg Branch acts as securities lending agent.

OTC-Derivatives*

The OTC-derivatives of the below subfunds with no collateral have margin accounts instead.

Appendix 1 – Global Exposure (unaudited)

Risk management

Risk management in accordance with the commitment approach is applied pursuant to the applicable laws and regulatory provisions.

Leverage

The leverage for UCITS using the value-at-risk approach is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective subfund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

Data on income and expense for each type of SFT

All expenses relating to the execution of securities lending transactions and their collateralization are borne by the counterparties and the depositary.

Service providers that provide services to the Fund in the field of securities lending have the right to receive a fee in return for their services that is in line with the market standards. The amount of this fee is reviewed and adapted, where appropriate, on an annual basis. Currently, 60% of the gross revenue received from securities lending transactions negotiated at arm's lengths is credited to the relevant subfund, while 30% of the gross revenue are retained as fees by UBS Switzerland AG as the securities lending service provider, responsible for the ongoing securities lending activities and collateral management, and 10% of the gross revenue are retained as fees by UBS Europe SE, Luxembourg Branch as the securities lending agent, responsible for the transactions management, ongoing operational activities and collateral safekeeping. All fees for operating the securities lending program are paid from the securities lending agents' portion of the gross income. This covers all direct and indirect costs incurred through securities lending activities. UBS Europe SE, Luxembourg Branch and UBS Switzerland AG are part of the UBS Group.

Appendix 4 – Remuneration Policy (unaudited)

The Board of Directors of UBS Asset Management (Europe) S.A. (the "Management Company" or the "AIFM") has adopted a remuneration framework (the "Framework") whose objectives are:

on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under

- (i) the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the "UCITS Law") transposing the UCITS Directive 2009/65/EC (the "UCITS Directive") as amended by Directive 2014/91/EU (the "UCITS V Directive");
- (ii) the Alternative Investment Fund Managers Directive ("AIFMD") 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time;
- (iii) the ESMA's guidelines on sound remuneration policies under the UCITS Directive ESMA/2016/575 and ESMA's guidelines on sound remuneration policies under the AIFMD ESMA/2016/579 both published on 14 October 2016;
- (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010:
- (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II);
- (vi) the Commission Delegated Regulation 2017/565/EU of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2);
- (vii) Regulation (EU) 2019/2088 of the European parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR");
- (viii) the CSSF Circular 23/841, transposing the ESMA Guidelines on certain aspects of the MiFID II remuneration requirements (ESMA 35-43-3565) (MiFID ESMA Guidelines).

and on the other hand, to comply with the Total Reward Principles of UBS Group.

The Framework is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management, including sustainability risk where applicable, and to be consistent with the UBS Group business strategy, objectives and values.

More details about the Framework of the Management Company/the AIFM, which describes, but not limited to, how remuneration and benefits are determined, are available at https://www.ubs.com/ame-regulatorydisclosures.

The Framework is subject to an annual review by the control functions of the Management Company/the AIFM after review and update by the Human Resources department; and is approved by the Board of Directors of the Management Company/the AIFM. Last approval by the Board of Directors took place on 25 September 2024. No material change was made to the Framework.

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law and Article 20 of the AIFM Law, the Management Company/the AIFM is required to disclose at least annually certain information concerning its remuneration framework and the practices for its Identified Staff.

The Management Company/the AIFM complies with the UCITS Directive/AIFMD principles in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, the Management Company/the AIFM judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified Staff.

By application of the proportionality principle for the Identified Staff, the following requirements on pay-out processes for Identified Staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements).

Appendix 4 – Remuneration Policy (unaudited)

The deferral requirements remain however applicable when the annual variable remuneration of Identified Staff exceeds the de minimis threshold adopted by the Management Company or where an employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

Remuneration of Management Company/AIFM staff

The aggregate amounts of total remuneration, split into fixed and variable, paid by the Management Company/the AIFM to its staff and its Identified Staff during the financial year ended as at 31 December 2023 are as follows:

EUR 1 000	Fixed remuneration	Variable remuneration	Total remuneration	No of beneficiaries
All staff	12 161	2 787	14 948	104
- whereof Identified Staff	6 794	2 159	8 953	44
- thereof Senior Management*	1 937	677	2 614	10
- thereof Other Identified Staff	4 857	1 482	6 339	34

^{*} Senior Management includes the CEO, the Conducting Officers, the Head of Compliance, the Branch Managers and the Independent Director.

Remuneration of the delegates' identified staff

As market or regulatory practice develops the Portfolio Manager(s) may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made and in case of changes to the identified staff and/or in case of change in the number of subfunds over the year, this may result in disclosures in relation to the Fund not being comparable to the disclosures made in the prior year.

For the year ending 31 December 2023, the aggregate total remuneration paid by the delegated Investment Manager to its Identified Staff in relation to the Fund amounted to EUR 4 180 611, of which EUR 3 847 044 represented the variable remuneration (9 beneficiaries).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Biotech (USD) Legal entity identifier: 549300J0FQQYFYE2GS89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made **sustainable** It promoted Environmental/Social (E/S) investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51% of assets invested in companies with a sustainability profile in the top half of the benchmark.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the

investment does not significantly harm

any environmental or social objective and

that the investee

companies follow

good governance

practices.

The extent to which the environmental and/or social characteristics promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was higher than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 25.61 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 23.96 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.43
 - UBS blended score of the benchmark: 6.40
- 87.49% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 19.70 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 21.34 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

• During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.

- UBS blended score of the financial product: 6.46
- UBS blended score of the benchmark: 6.47
- 83.30% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

2021/2022: Characteristic 1:

- The Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 16.56 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 19.18 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: Characteristic 2:

- The UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.45
 - UBS blended score of the benchmark: 6.42
- 82.43% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country
Vertex Pharmaceuticals Inc	Biotechnology	9.34	United States
Alnylam Pharmaceuticals Inc	Pharmaceuticals, cosmetics & medical products	6.68	United States
Neurocrine Biosciences Inc	Biotechnology	5.36	United States
Guardant Health Inc	Pharmaceuticals, cosmetics & medical products	4.39	United States
Amgen Inc	Pharmaceuticals, cosmetics & medical products	4.25	United States
Regeneron Pharmaceuticals Inc	Biotechnology	4.23	United States
Moderna Inc	Biotechnology	3.85	United States
AbbVie Inc	Pharmaceuticals, cosmetics & medical products	3.78	United States
Denali Therapeutics Inc	Pharmaceuticals, cosmetics & medical products	3.67	United States
Roivant Sciences Ltd	Pharmaceuticals, cosmetics & medical products	3.57	United States
Argenx SE	Biotechnology	3.48	Netherlands
Biohaven Ltd	Pharmaceuticals, cosmetics & medical products	3.40	United States
BioNTech SE	Biotechnology	3.06	Germany
Arrowhead Pharmaceuticals	Pharmaceuticals, cosmetics & med. products	3.01	United States
Sandoz Group AG	Pharmaceuticals, cosmetics & medical products	2.70	Switzerland

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

Not applicable.

share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

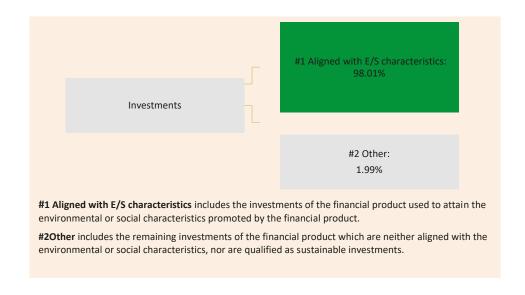

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

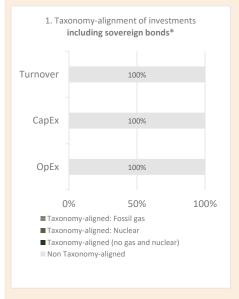

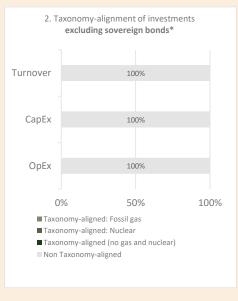

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?
 Not applicable.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

ANNEX IV

Product name: UBS (Lux) Equity Fund – China Opportunity (USD) Legal entity identifier: 54930095U1XDI65OZQ89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable It promoted Environmental/Social (E/S) investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51% of assets invested in companies with a sustainability profile in the top half of the benchmark.

The extent to which the environmental and/or social characteristics promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 147.17 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 249.03 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 5.01
 - UBS blended score of the benchmark: 4.71
- 81.72% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 82.30 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 243.42 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS blended score of the financial product: 4.99
 - UBS blended score of the benchmark: 4.63

• 94.58% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

2021/2022: Characteristic 1:

- The Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 151.78 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 230.80 tonnes CO2 per million dollars revenues.
- No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: Characteristic 2:

- The UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 4.69
 - UBS blended score of the benchmark: 4.48
- 78.17% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Emerging Markets Sustainable Leaders (USD) **Legal entity identifier:** 5493005EFKKJE4IO5D54

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion in economic activities that of 56.51% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not with a social objective: % make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- 1) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG score between 7 and 10 (indicating a strong sustainability profile).
- 2) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The extent to which the environmental and/ or social characteristic promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Chararcteristic 1:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.19
 - UBS blended score of the benchmark: 5.62
- The UBS ESG blended score is below the range of 7 to 10 (indicating a strong sustainability profile).

Characteristic 2:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 66.40 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 328.53 tonnes CO2 per million dollars revenues.
- No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

...and compared to previous periods?

2022/2023: Chararcteristic 1:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark
 - UBS blended score of the financial product: 6.08
 - UBS blended score of the benchmark: 5.43
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

2022/2023: Characteristic 2:

- From January 13, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 153.34 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 322.96 tonnes CO2 per million dollars revenues.

• No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.

- UBS blended score of the financial product: 5.53
- UBS blended score of the benchmark: 5.32

The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual

thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country
Taiwan Semiconductor Manufacturing Co Ltd	Electronics & Semiconductors	9.61	Taiwan,Province Of China

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 56.51%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in specific assets.

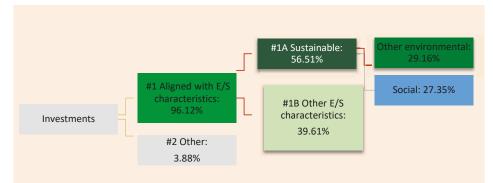

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

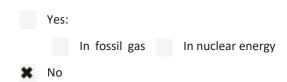

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

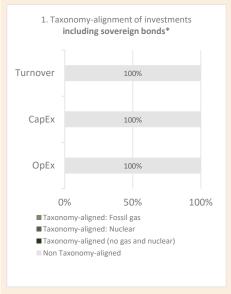

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial had 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNFX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Euro Countries Opportunity Sustainable (EUR) **Legal entity identifier:** 549300CL2G6Y5RVEBR40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of 74.06% of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not with a social objective: ___% make any sustainable investments

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

an investment in an

economic activity that contributes to

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristic was promoted by the financial product:

indicators measure how the environmental or social characteristics promoted by the financial product

Sustainability

are attained.

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG score between 7 and 10 (indicating a strong sustainability profile).

The extent to which the environmental and/ or social characteristic promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 61.65 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 91.96 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS blended score of the financial product: 7.09
 - UBS blended score of the benchmark: 7.46
- The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

... and compared to previous periods?

2022/2023: Characteristic 1:

- From January 11, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 91.78 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 120.70 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS blended score of the financial product: 7.40

- UBS blended score of the benchmark: 7.42
- The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

2021/2022: During the reference period, the UBS ESG consensus score of the financial product was higher than that of its benchmark.

- UBS blended score of the financial product: 7.55
- UBS blended score of the benchmark: 7.35

The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe: 1.4 "Exposure to companies active in the fossil fuel sector":

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"

1.15. "GHG Intensity"

1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial product had 0% Taxonomy Aligned Investments

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – European Opportunity Sustainable (EUR) **Legal entity identifier:** 549300P3QHSRVY6MML75

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It promoted Environmental/Social (E/S) It made sustainable characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of 73.45% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: ___%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristic was promoted by the financial product:

- 1) A sustainability profile that is higher than its benchmark's sustainability profile.
- 2) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

economic activity that contributes to

The extent to which the environmental and/ or social characteristics promoted by this financial product were met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 7.53
 - UBS blended score of the benchmark: 7.43
- The UBS ESG blended score is in the range of 7 to 10 (indicating a strong sustainability profile).

Characteristic 2:

- From January 11, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 55.34 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 85.00 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 7.56
 - UBS blended score of the benchmark: 7.42
- The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

2022/2023: Characteristic 2:

- From January 11, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 72.52 tonnes CO2 per million dollars revenues.

- Weighted Average Carbon Intensity (WACI) of the benchmark: 105.08 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.

- UBS blended score of the financial product: 7.45
- UBS blended score of the benchmark: 7.41

The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially made was to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclu-sion Policy) from thermal coal mining and its sale to external parties or from oil sands extrac-tion are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclu-sion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indi-cators based on availability and appropriateness. These indicators are combined into a signal based on individual

thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations" Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 73.45%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in specific assets.

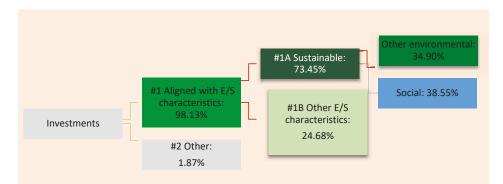

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to

other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

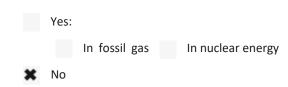

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

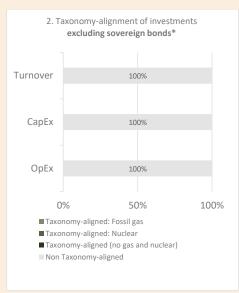

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial product had 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Global Sustainable (USD)

Legal entity identifier: 5493005DN2QQOZHJHV03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion in economic activities that of 65.07% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not with a social objective: % make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristic was promoted by the financial product:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

investment does not significantly harm

any environmental or social objective and

that the investee

companies follow

good governance practices.

The EU Taxonomy is

system laid down in

establishing a list of

economic activities.
That Regulation

does not include a list of socially

economic activities.
Sustainable
investments with an
environmental
objective might be
aligned with the
Taxonomy or not.

environmentally

a classification

Regulation (EU)

2020/852,

sustainable

sustainable

economic activity that contributes to

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG score between 7 and 10 (indicating a strong sustainability profile).

The extent to which the environmental and/ or social characteristic promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 81.90 tonnes CO2 per million dollars revenues.
 - \bullet Weighted Average Carbon Intensity (WACI) of the benchmark: 97.89 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.71
 - UBS blended score of the benchmark: 6.59
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

... and compared to previous periods?

2022/2023: Characteristic 1:

- From January 11, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 89.79 tonnes CO2 per million dollars revenues
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 120.27 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.96
 - UBS blended score of the benchmark: 6.63
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

2021/2022: During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.

- UBS blended score of the financial product: 6.69
- UBS blended score of the benchmark: 6.56

The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations" $Information\ on\ consideration\ of\ PAIs\ on\ sustainability\ factors\ is\ also\ available\ in\ the\ sub-fund's\ annual\ re-port.$

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 65.07%.

What was the asset allocation?

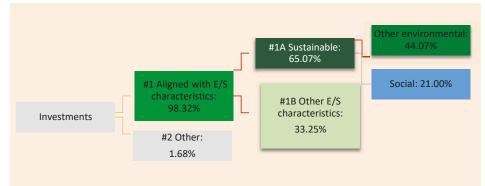

Asset allocation describes the share of investments in specific assets.

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

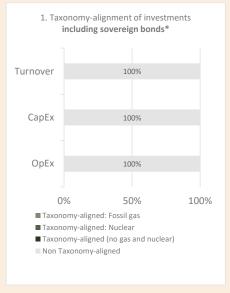

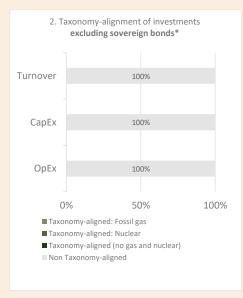

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.

 investee
 companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial product had 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
 - How did this financial product perform compared with the broad market index?

 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Global Sustainable Improvers (USD) **Legal entity identifier:** 549300NHE4JD1CEZXT57

economic activity that contributes to

• The fund aims to identify companies that improve their ESG Score and/or their score in one or more of the individual pillars in the environment (E), social (S) or governance (G) areas.

The extent to which the environmental and/ or social characteristics promoted by this financial product were met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

How did the sustainability indicators perform?

The financial product achieved a net positive balance of the ESG trend rating of the companies during the last 4 quarters of the assessment period.

...and compared to previous periods?

2022/2023: The financial product achieved a net positive balance of the ESG trend rating of the companies during the last 4 quarters of the assessment period.

2021/2022: The financial product achieved a net positive balance of the ESG trend rating of the companies during the last 4 quarters of the assessment period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially made was to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe: 1.4 "Exposure to companies active in the fossil fuel sector":

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclu-sion Policy) from thermal coal mining and its sale to external parties or from oil sands extrac-tion are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclu-sion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indi-cators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"

1.16. "Investee countries subject to social violations" Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 51.69%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in

specific assets.

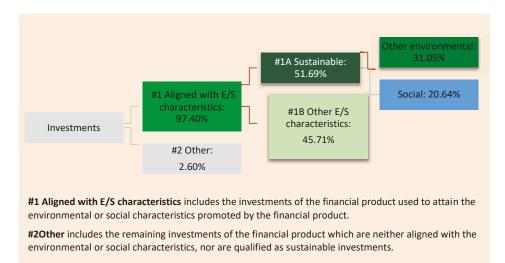

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes	:	
	In fossil gas	In nuclear energy

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

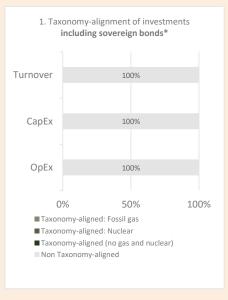

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

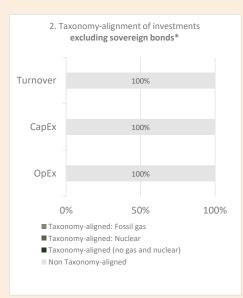

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

***** N

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are

product attains the

indexes to measure whether the financial environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Greater China (USD) **Legal entity identifier:** 549300M8UKNCZHHK6C44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion in economic activities that of % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not with a social objective: ___% make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

investment does not significantly harm

any environmental or social objective and

that the investee

companies follow

good governance

The **EU Taxonomy** is

economic activity that contributes to

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51% of assets invested in companies with a sustainability profile in the top half of the benchmark.

The extent to which the environmental and/ or social characteristics promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark
 - Weighted Average Carbon Intensity (WACI) of the financial product: 55.76 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 243.97 tonnes CO2 per million dollars revenues.
- No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS Blended score of the financial product: 5.25
 - UBS Blended score of the benchmark: 5.45
- 80.92% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 130.99 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 236.00 tonnes CO2 per million dollars revenues.
- No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS Blended score of the financial product: 5.15
 - UBS Blended score of the benchmark: 5.34
- 73.36% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

2021/2022: Characteristic 1:

- The Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 135.98 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 247.46 tonnes CO2 per million dollars revenues.
- No low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: Characteristic 2:

- The UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS Blended score of the financial product: 5.24
 - UBS Blended score of the benchmark: 5.04
- 74.81% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country
Tencent Holdings Ltd	Internet, software & IT services	9.80%	China

Midea Group Co Ltd	Electrical devices & components	2.59%	China
PDD Holdings Inc	Miscellaneous Services	2.39%	Ireland

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

Not applicable.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in specific assets.

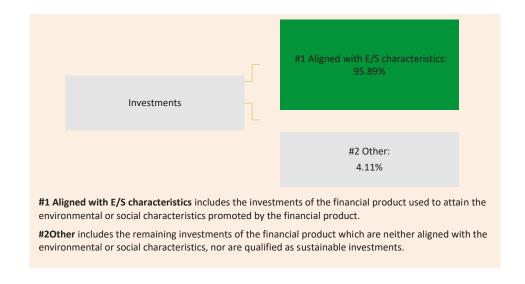

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

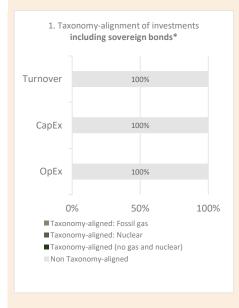

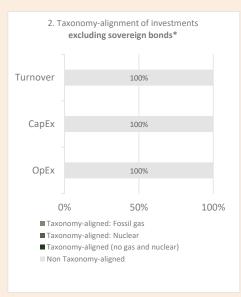

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

economic activity that contributes to

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG Score between 7 and 10 (indicating a strong sustainability profile).

The extent to which the environmental and/or social characteristics promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

indicators measure how the environmental or social characteristics promoted by the

financial product

are attained.

Sustainability

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 46.52 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 82.06 tonnes CO2 per million dollars revenues
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.04
 - UBS blended score of the benchmark: 5.99
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark
 - Weighted Average Carbon Intensity (WACI) of the financial product: 44.84 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 95.71 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023: Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.31

- UBS blended score of the benchmark: 6.06
- 82.41% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.

2021/2022: Characteristic 1:

- The Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 45.46 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 94.44 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2021/2022: Characteristic 2:

- The UBS ESG blended score of the financial product was higher than that of its benchmark.
 - UBS blended score of the financial product: 6.21
 - UBS blended score of the benchmark: 5.93
- 90.33% of assets were invested in issuers with a sustainability profile in the top half of the benchmark.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands, the portfolio manager selects investments based upon a lower absolute or relative scope 1+2 carbon intensity. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action will be excluded from the investment universe.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in

development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

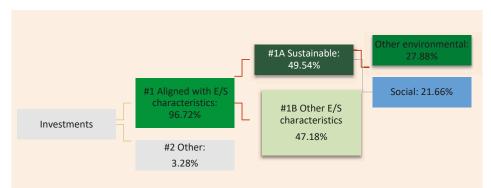

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 49.54%.

Wint was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

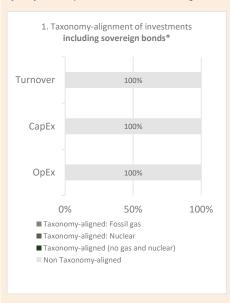

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.

economic activity that contributes to

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG score between 7 and 10 (indicating a strong sustainability profile).

The extent to which the environmental and/ or social characteristic promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- From the reference period the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 44.21 tonnes CO2 per million dollars revenues
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 89.27 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was lower than that of its benchmark.
 - UBS Blended score of the financial product: 7.17
 - UBS Blended score of the benchmark: 7.19
- The UBS ESG Blended score is in the range of 7 to 10 (indicating a strong sustainability profile).

...and compared to previous periods?

2022/2023 Characteristic 1:

- From January 11, 2023 (the date when the characteristic became effective), the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 75.29 tonnes CO2 per million dollars revenues
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 109.84 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023 Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS Blended score of the financial product: 7.50
 - UBS Blended score of the benchmark: 7.20
- The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

2021/2022: During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.

- UBS Blended score of the financial product: 7.32
- UBS Blended score of the benchmark: 7.20

The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country
3i Group PLC	Finance & holding companies	3.60%	United Kingdom
Erste Group Bank AG	Banks & credit institutions	3.41%	Austria
Publicis Groupe SA	Graphic design, publishing & media	2.99%	France
D'ieteren Group	Vehicles	2.92%	Belgium
Sage Group PLC/The	Internet, software & IT services	2.86%	United Kingdom
Halma PLC	Electronics & Semiconductors	2.73%	United Kingdom
Taylor Wimpey PLC	Building industry & materials	2.51%	United Kingdom
Informa PLC	Graphic design, publishing & media	2.44%	United Kingdom
Geberit AG	Building industry & materials	2.41%	Switzerland
LEG Immobilien SE	Real Estate	2.39%	Germany
Swiss Life Holding AG	Insurance	2.30%	Switzerland
Rolls-Royce Holdings PLC	Aerospace industry	2.30%	United Kingdom
Galp Energia SGPS SA	Petroleum	2.20%	Portugal
Barry Callebaut AG	Food & Soft Drinks	2.16%	Switzerland
Whitbread PLC	Lodging, catering & leisure	2.09%	United Kingdom

*Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 67.48%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

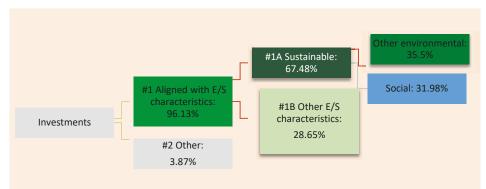

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable. The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

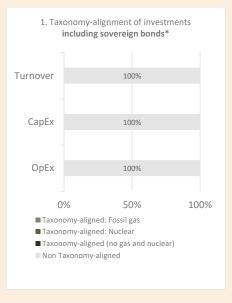

Taxonomy-aligned activities are expressed as a share of:

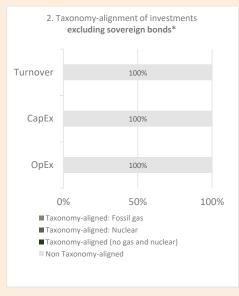

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There is no commitment to a minimum proportion of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial product had 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are
sustainable
investments with
an environmental
objective that do
not take into
account the
criteria for
environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
 - How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – Mid Caps USA (USD) Legal entity identifier: 549300P1FG7FH1IVCM07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: ___%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51% of assets invested in companies with a sustainability profile in the top half of the benchmark.

The extent to which the environmental and/ or social characteristics promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

Not applicable.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in specific assets.

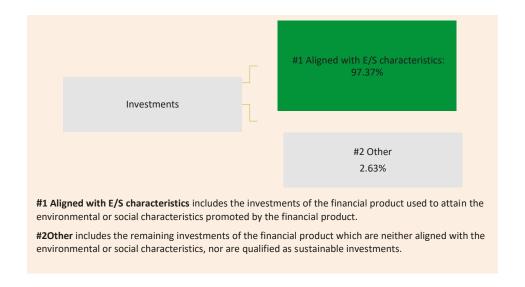

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are
activities for which
low-carbon
alternatives are not
yet available and
among others have
greenhouse gas
emission levels
corresponding to
the best
performance.

*Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

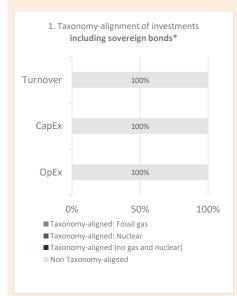

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first

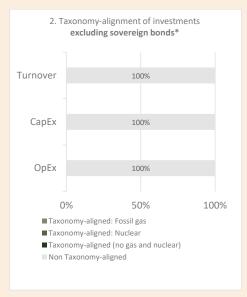

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

How does the reference benchmark differ from a broad market index?
Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

 Not applicable.
- How did this financial product perform compared with the broad market index?

 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

economic activity that contributes to

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristics were promoted by the financial product:

- Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.
- A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.
- 2) At least two thirds of assets in shares or other equity interests of companies in developed or emerging markets which mainly promote the following United Nations Sustainable Development Goals (SDGs): United Nations Sustainable Development Goal 3 (Good Health and Well-Being).

The extent to which the environmental and/ or social characteristics promoted by this financial product were met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was higher than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 15.99 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 14.22 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

• 93.13% of assets have been invested in shares or other equity interests of companies in developed or emerging markets which mainly promote the following United Nations Sustainable Development Goals (SDGs): United Nations Sustainable Development Goal 3 (Good Health and Well-Being).

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 15.45 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 15.80 tonnes CO2 per million dollars revenues

2022/2023 Characteristic 2:

• 79.21% of assets have been invested in shares or other equity interests of companies in developed or emerging markets which mainly promote the following United Nations Sustainable Development Goals (SDGs): United Nations Sustainable Development Goal 3 (Good Health and Well-Being).

2021/2022: Characteristic 1:

• During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark

- Weighted Average Carbon Intensity (WACI) of the financial product: 15.64 tonnes CO2 per million dollars revenues.
- Weighted Average Carbon Intensity (WACI) of the benchmark: 18.21 tonnes CO2 per million dollars revenues.

2021/2022: Characteristic 2:

- 96.97% of assets have been invested in shares or other equity interests of companies in developed or emerging markets which mainly promote the following United Nations Sustainable Development Goals (SDGs): United Nations Sustainable Development Goal 3 (Good Health and Well-Being).
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially made was to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applied exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands, the portfolio manager selects investments based upon a lower absolute or relative scope 1+2 carbon intensity. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

1.3 "GHG intensity of investee companies"

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark.

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indi-cators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual report.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 95.14%.

Asset allocation describes the

share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

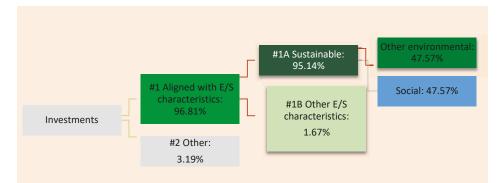

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

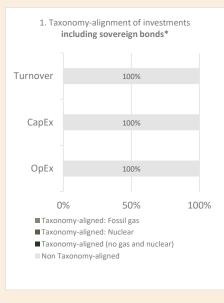

In fossil gas
In nuclear energy

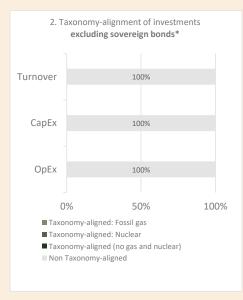

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are

indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS (Lux) Equity Fund – US Sustainable (USD) Legal entity identifier: 5493007HGHBIH15NYM56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of 62.95% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: ___%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following characteristic was promoted by the financial product:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

investment does not significantly harm

any environmental or social objective and

that the investee

companies follow

good governance

The **EU Taxonomy** is

system laid down in

establishing a list of

economic activities.
That Regulation

does not include a list of socially

economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

economic activity that contributes to

- 1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile
- 2) A sustainability profile that is higher than its benchmark's sustainability profile or a UBS Blended ESG score between 7 and 10 (indicating a strong sustainability profile).

The extent to which the environmental and/ or social characteristic promoted by this financial product is met is stated in the answer to the question "How did the sustainability indicators perform?" of this annex.

The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

The sustainability profile of the financial product is measured by its benchmark's profile and the corresponding results are calculated at least once a year from the respective monthly profiles.

How did the sustainability indicators perform?

Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 64.94 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 96.18 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS Blended score of the financial product: 6.73
 - UBS Blended score of the benchmark: 6.42
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

...and compared to previous periods?

2022/2023: Characteristic 1:

- During the reference period, the Weighted Average Carbon Intensity (WACI) was lower than that of its benchmark.
 - Weighted Average Carbon Intensity (WACI) of the financial product: 39.72 tonnes CO2 per million dollars revenues.
 - Weighted Average Carbon Intensity (WACI) of the benchmark: 126.64 tonnes CO2 per million dollars revenues.
- A low absolute carbon profile, as a low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.

2022/2023:Characteristic 2:

- During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.
 - UBS Blended score of the financial product: 6.77
 - UBS Blended score of the benchmark: 6.47
- The UBS Blended ESG score is below the range of 7 to 10 (indicating a strong sustainability profile).

2021/2022: During the reference period, the UBS Blended ESG score of the financial product was higher than that of its benchmark.

- UBS Blended score of the financial product: 7.20
- UBS Blended score of the benchmark: 6.47

The UBS Blended ESG score is in the range of 7 to 10 (indicating a strong sustainability profile).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make is to contribute to the environmental and/or social characteristic(s) promoted by the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio Manager applies exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

Investments are positively screened according to the environmental and/or social characteristics promoted by the financial product.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

- 1.4 "Exposure to companies active in the fossil fuel sector":
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.
- 1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":
- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded
- 1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

- 1.3 "GHG intensity of investee companies"
- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either ab-solute or relative to a benchmark

When assessing "do no significant harm" (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual

thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

- 1.7 "Activities negatively affecting bio-diversity-sensitive areas"
- 1.13 "Board gender diversity"
- 1.15. "GHG Intensity"
- 1.16. "Investee countries subject to social violations"

Information on consideration of PAIs on sustainability factors is also available in the sub-fund's annual re-port.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.11.2024

Largest Investments	Sector	% Net Assets*	Country
Microsoft Corp	Internet, software & IT services	7.24%	United States
NVIDIA Corp	Electronics & Semiconductors	6.15%	United States
UnitedHealth Group Inc	Healthcare & social services	4.35%	United States
Costco Wholesale Corp	Retail Trade, Department Stores	4.21%	United States
Visa Inc	Finance & holding companies	4.08%	United States
Take-Two Interactive Software Inc	Internet, software & IT services	3.69%	United States
Ameriprise Financial Inc	Mortgage & funding institutions	3.34%	United States
Marsh & McLennan Cos Inc	Insurance	3.23%	United States
Eli Lilly & Co	Biotechnology	3.03%	United States
Cadence Design Systems Inc	Internet, software & IT services	2.69%	United States
Advanced Micro Devices Inc	Electronics & Semiconductors	2.66%	United States
Sprouts Farmers Market Inc	Retail Trade, Department Stores	2.62%	United States
ServiceNow Inc	Internet, software & IT services	2.58%	United States
TJX Cos Inc/The	Retail Trade, Department Stores	2.46%	United States
AZEK Co Inc/The	Building industry & materials	2.12%	United States

*Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of sustainability-related investments of the financial product was 62.95%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 30.11.2024.

Asset allocation describes the share of investments in specific assets.

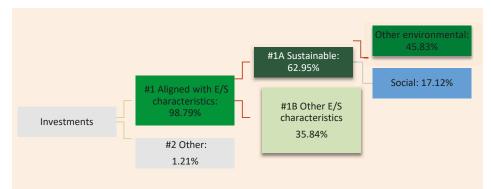

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

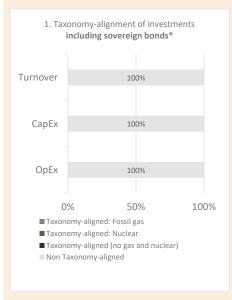

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

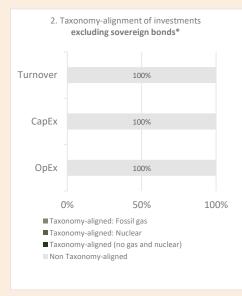

^{*}Minor differences with "Statement of Investments in Securities" might occur due to rounding and valuation differences in production systems.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational
 expenditure
 (OpEx) reflecting
 green operational
 activities of
 investee
 companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There is no commitment to a minimum proportion of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The financial product had 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the environmental and/ or social characteristics were met by following the investment strategy and applying exclusion criteria as per the sales prospectus. The investment strategies and/ or exclusion criteria are monitored to ensure adherence.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- How does the reference benchmark differ from a broad market index? Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
