Notes to the financial statements

Notes to the financial statements at 30/09/2024

Note 1 - General Information

The sub-fund First Selection (expressed in EUR) is a sub-fund that invests directly (less than 15% of the assets) or indirectly (through investment funds such as UCIs, UCITS and ETFs) in equities and investment-grade bonds (including mortgage-backed securities via investment funds limited to 20% of the assets). The sub-fund also invests indirectly in money market instruments. Emphasis is placed on international diversification of investments across both developed and emerging market countries.

The sub-fund aims to increase the value of its assets over the investment horizon through a dynamic strategic asset allocation process (based on the manager's longer-term asset class views) as well as via tactical asset allocation deviations (based on the manager's shorter-term asset class views). Exposure to equity markets in the sub-fund can fluctuate between 60% and 100%.

The sub-fund does not invest directly in commodities. The exposure to commodities is limited to maximum 20% of the assets of the sub-fund and is obtained by investment in Exchange Traded Notes (ETN) and/or Exchange Traded Commodities (ETC). The investment manager will also aim to add value by selecting managers to actively manage each individual asset class.

Within the framework of the investment policy and also for hedging purposes, the sub-fund may use the derivative instruments described in Appendices 1 and 2 of Book I of the prospectus. Potential investors should be aware that the use of derivatives may involve greater risks.

Note 2 - Principal accounting methods

a) Net asset value

This semi-annual report is prepared on the basis of the last net asset value as at 30 September 2024.

b) Presentation of the financial statements

The financial statements of the Company are presented in accordance with the legislation in force in Luxembourg on Undertakings for Collective Investment.

The statement of operations and changes in net assets covers the financial period from 1 April 2024 to 30 September 2024.

c) Valuation of the securities portfolio

The target fund units/shares held in the sub-fund are valued at the last net asset value available on the Valuation Day, as communicated by the target fund concerned or, at the unofficial value if the latter is more recent (in such case based upon a probable net asset value estimated prudently and in good faith by the Board of Directors of the Company or based upon other sources, such as information from the manager of the said target fund).

The valuation of all securities listed on a stock exchange or any other regulated market, which functions regularly, is recognised and accessible to the public, is based on the last known closing price on the valuation day, and, if the securities concerned are traded on several markets, on the basis of the last known closing price on the major market on which they are traded. If the last known closing price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

If permitted by market practice, liquid assets, money market instruments and all other instruments may be valued at their nominal value plus accrued interest or according to the linear amortisation method. Any decision to value the assets in the portfolio using the linear amortisation method must be approved by the Board of Directors, which will record the reasons for such a decision. The Board of Directors will put in place appropriate checks and controls concerning the valuation of the instruments.

Notes to the financial statements at 30/09/2024

d) Valuation of futures contracts

Futures contracts are valued at their realisable value, which is based on the last available settlement price of such contracts on the market on which these contracts are traded.

Margin accounts to guarantee the liabilities on futures contracts are included in the “Cash at banks and time deposits” and/or “Bank overdrafts” account in the statement of net assets.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under “Net Unrealised gain on financial instruments” or “Net Unrealised loss on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

e) Valuation of options

The liquidation value of options traded on stock markets is based on the closing prices published by the stock markets on which the Company traded the contracts in question. The liquidation value of options not traded on stock markets is determined in accordance with the rules defined by the Board of Directors of the Company, in accordance with uniform criteria for each category of contract.

Options are disclosed at market value in the Statement of net assets. The unrealised appreciation/(depreciation) is disclosed in the caption “Options at market value”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

f) Valuation of forward foreign exchange contracts

The disposal value of the forward foreign exchange contracts is based on the forward foreign exchange rates at the balance sheet date for the duration of the contracts.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under “Net Unrealised gain on financial instruments” or “Net Unrealised loss on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.
