## Board of Directors' Report

The board of directors of the Company (the 'Board') presents the Annual Review and Audited Financial Statements of The Jupiter Global Fund (the 'Company') for the year ended 30 September 2024.

### Structure of the Company

The Board has designated Jupiter Asset Management International S.A. ('JAMI') as Management Company of the Company to perform investment management, administration and marketing functions for the Company. JAMI is authorised as a management company managing UCITS governed by the UCITS Directive and is authorised and regulated by the Luxembourg regulator, the CSSF.

As at 30 September 2024, the Company comprised 16 active Funds with multiple share classes. Details of class launches and class and fund liquidations during the year can be found in Note 1 to the Financial Statements.

Jupiter Global Convertibles was closed on 31 May 2024.

### Corporate Governance and the ALFI Code of Conduct

The Board undertakes an annual review of ongoing compliance with the principles of the Code and considers that the Company has been in compliance with its principles in all material aspects throughout the year ended 30 September 2024.

### Securities Financing Disclosure Regulation (SFDR) (unaudited)

The Securities Financing Disclosure Regulation (SFDR) information is included in the Appendix to the Financial Statements.

### Board Composition

The Board is composed of five Board members, three of them being independent from JAMI and JAML.

#### GARTH LORIMER TURNER

##### Director and Chairman

Garth Lorimer Turner (British) is a Solicitor of the Supreme Court of England & Wales, a Solicitor of the Supreme Court of Hong Kong and a Bermuda Barrister & Attorney.

#### JACQUES ELVINGER

##### Director

Jacques Elvinger (Luxembourgish) is a partner of the Luxembourg law firm of Elvinger Hoss Prussen, *société anonyme*.

#### PAULA MOORE

##### Director

Paula Moore (British) is a Chartered Accountant and a member of the Institute of Chartered Accountants in England and Wales. She is a director of several Jupiter companies.

#### SIMON ROWSON

##### Director

Simon Rowson (British) is a Solicitor of the Supreme Court of England & Wales. He is Head of Product Structuring & Legal of JAML.

#### REVEL WOOD

##### Director

Revel Wood (Luxembourgish) is a Chartered Accountant and a member of the South African Institute of Chartered Accountants. He is an independent director on Luxembourg based fund and corporate structures, co-chairman of the ILA conducting officer forum and ALFI Fund Governance forum. He is co-founder of ONE group solutions a specialised governance provider.

## Board of Directors' Report *(continued)*

### Chairman's Review

A year ago in this statement, in January 2024, we commented that inflation was appearing to come back under control across much of the developed world, but that major central banks – such as the US Federal Reserve, European Central Bank, and Bank of England – had so far opted against cutting interest rates.

Since then, the picture has changed considerably. The Bank of England and the European Central Bank began cutting interest rates in the summer; the US Federal Reserve joined them in September, the latter opening its account with an aggressive half percentage-point (0.5%) reduction. Markets have also closely been studying all the economic data coming out of the US, for signs of whether the US economy is heading for a recession or not, while at the same time investors have been enthused about the potential of artificial intelligence, which has driven the share prices of the so-called 'Magnificent Seven' (Nvidia, Microsoft, Apple, Alphabet/Google, Amazon, Meta and Tesla), the US mega-cap technology-related companies.

The past twelve months have been particularly notable for elections that have seen just under half the people in the world go to the polls<sup>1</sup>. This has included Taiwan, India and of course the UK which saw a change of government in the summer. From a global perspective, however, the most significant election this year was surely in the US. Donald Trump will be heading back to the White House for his second term as President. It is evident that President Trump divides opinion, but if he follows through on his pre-election commitments, for example on trade tariffs, then that has potentially significant implications for countries well beyond the US's own borders.

The following pages provide detail about how each of the Jupiter Global Fund's sub-funds have performed across the period under review. In the current environment, Jupiter's investment managers must attempt to make sense of often conflicting economic data, as well as volatile geopolitics, to position their portfolios to make the most of the opportunities that investment markets offer while insulating them from the worst of the risks, all in the service of trying to deliver long-term returns for clients. Investing in challenging times such as these requires patience, conviction and discipline.

Chairman

Luxembourg, 15 January 2025

## Report of the Depositary

In our capacity as Depositary we confirm that, in our opinion, the Management Company and the Board of Directors have managed the Company during the year ended 30 September 2024 in accordance with the provisions of the principal documents of the Company and the Protection of Investors as stated in the Luxembourg Law and rules made thereunder.

### **Citibank Europe plc, Luxembourg Branch**

31 Z.A. Bourmicht

L-8070 Bertrange

Grand Duchy of Luxembourg

Luxembourg, 15 January 2025

## Independent auditor's report

To the Shareholders of  
The Jupiter Global Fund  
31 Z.A. Bourmicht  
L-8070 Bertrange  
Grand Duchy of Luxembourg

### Opinion

We have audited the financial statements of The Jupiter Global Fund and of each of its sub-funds (the "Fund"), which comprise the statement of net assets and the schedule of investments as at 30 September 2024 and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 30 September 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other matter

The financial statements of the Fund for the year ended 30 September 2023 were audited by another "réviseur d'entreprises agréé" who expressed an unmodified opinion on those financial statements on 15 January 2024.

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

### **Responsibilities of the “réviseur d'entreprises agréé” for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d'entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-funds where a decision or an intention to close exists) to cease to continue as a going concern.
- In respect of sub-funds where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats of safeguards applied.

#### Market Review

Government bond yields fell across the board during the period under review as central banks made progress in containing inflation, following aggressive interest rate increases. US Treasury and German Bund yields in particular saw a major decrease, with a clear steepening bias. UK and Australia saw a decrease as well, but up to a more modest extent. Japanese yields closed modestly higher. Credit spreads saw further tightening as investors disregarded prospects of a sharp slowdown in growth. Spreads tightened across the board but especially in the high yield space and across emerging market corporates. Looking at FX markets, the USD saw a meaningful depreciation vs. most of major currencies with a few notable exceptions (BRL, MXN and TRY), driven by increased expectations for rate cuts in the US.

While early expectations of interest rate cuts were dashed, central banks eventually cut rates as the labour market resilience showed signs of waning. The period under review began with elevated geopolitical uncertainty following the attack on Israel by Hamas, which hurt market sentiment. US growth continued to surprise to the upside and the US job market continued to showcase strong spot data.

November and December saw a massive reversal of the trends seen in the previous months with strong performance across financial markets and fixed income. The key event and driver for December was the Federal Open Market Committee (FOMC) meeting and the subsequent press conference held by Chair J. Powell. The dovish tone from the US Federal Reserve (Fed), supported by lower inflation prints fueled a strong rally across rates and risk assets.

Quarter one of 2024 saw a clear pause in the disinflationary process, with Consumer Price Index (CPI) data coming higher than expected in the US and across many major developed markets. As a consequence, the Fed assumed a more cautious tone. Market expectation for rate cuts saw thus a meaningful repricing.

Over spring and in the first summer months, however inflation data started to show once again some progress, supporting once again fixed income markets and driving government bond yields lower. Between July and August, weaker data coming from the US job market and especially the increase in the unemployment rates started to fuel expectations for a much faster pace of rate cuts from the Fed.

## Jupiter Dynamic Bond

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Market Review *(continued)*

In August, the Fed Chair Jay Powell signalled imminent interest rate cuts at his address to the Jackson Hole Symposium, although with limited guidance over size of cut and path for the following meetings.

The key event of September was the FOMC meeting. As anticipated by markets, the Fed delivered its first rate cut. The 0.50% reduction in reference rates was however more than that initially priced by market participants. The increase in the unemployment rate, as well as the slowdown in pace of hiring, combined with benign inflation reports were ultimately key factors in driving the FOMC decision. The Fed joined other major developed markets central banks, that had already started a cutting cycle in the previous months.

#### Policy Review

The period under review was positive for the strategy and more broadly for fixed income markets.

Exposure to government bonds and rates delivered strong contribution to performance. In particular, our exposure to US, Australia and up to a more marginal extent New Zealand and UK delivered positive contribution to returns. Exposure to emerging market rates also contributed positively, with most of the positive contribution coming from our exposure to Korea.

Corporate bonds also contributed positively. Developed markets high yield corporate bonds delivered positive returns, coming especially from our exposure to financials, healthcare and consumer staples. Credit risk hedging via XOVER contracts (EUR High Yield) provided instead a negative contribution. Exposure to developed markets investment grade corporate bonds and emerging markets corporate bonds also provided a positive contribution.

FX exposure provided instead a negative contribution mostly coming from our exposure to BRL and USD.

#### Investment Outlook

The last quarter of the period under review saw material changes in the macro narrative, which confirmed our macro slowdown thesis. Much better inflation prints, combined with weaker job market

data in the US had two important effects. The first was a drastic repricing in market expectations for monetary policy ahead. The second was the formal beginning of the interest rate cutting cycle in the US, with a larger than expected 0.50% cut. We would say the move from the Fed was appropriate, although a bit too late. Recent macro datapoints have clearly shifted the balance of risks for monetary policy from the price stability side of the mandate to the full employment one and, using the words from Jerome Powell himself, the FOMC does not “seek or welcome further cooling in labour market conditions”.

Moving forward we continue to expect a slowdown in the US. We would not underestimate the recent increase in the unemployment rate as a historically accurate predictor of recessions. At this stage, the only piece missing is a more material increase in layoffs. The rest of the world continues to look in a precarious position to us. The recovery in the Eurozone has pretty much faded, with recent Purchasing Managers' Index (PMI) readings showing renewed weakness and inflation quickly cooling. The UK economy has surprised to the upside in the first half of the year. More recent data have however shown some deterioration. Limited room for additional fiscal and rapid repricing in rates on outstanding mortgages represent key drags on the economy. Inflation across the globe increasingly seems less of a problem and the widely discussed lags in service inflation still leave very meaningful room for disinflation in the coming months. The key consequence of all of this is that rates remain way to high as of today and more easing is needed.

Investment implications continue to see exposure to rates and government bonds as the most compelling area of fixed income markets. Notwithstanding the recent rally, rates continue to offer good returns as rate cuts come through along with further macroeconomic slowdown. Credit continues to price a goldilocks scenario. At this stage we prefer to keep historically low exposure with high selectivity.

#### Market Review

Government bond yields fell across the board during the period under review as central banks made progress in containing inflation, following aggressive interest rate increases. US Treasury and German Bund yields in particular saw a major decrease, with a clear steepening bias. UK and Australia saw a decrease as well, but up to a more modest extent. Japanese yields closed modestly higher. Credit spreads saw further tightening as investors disregarded prospects of a sharp slowdown in growth. Spreads tightened across the board but especially in the high yield space and across emerging market corporates. Looking at FX markets, the USD saw a meaningful depreciation vs. most of major currencies with a few notable exceptions (BRL, MXN and TRY), driven by increased expectations for rate cuts in the US.

While early expectations of interest rate cuts were dashed, central banks eventually cut rates as the labour market resilience showed signs of waning. The period under review began with elevated geopolitical uncertainty following the attack on Israel by Hamas, which hurt market sentiment. US growth continued to surprise to the upside and the US job market continued to showcase strong spot data.

November and December saw a massive reversal of the trends seen in the previous months with strong performance across financial markets and fixed income. The key event and driver for December was the Federal Open Market Committee (FOMC) meeting and the subsequent press conference held by Chair J. Powell. The dovish tone from the US Federal Reserve (Fed), supported by lower inflation prints fueled a strong rally across rates and risk assets.

Quarter one of 2024 saw a clear pause in the disinflationary process, with Consumer Price Index (CPI) data coming higher than expected in the US and across many major developed markets. As a consequence, the Fed assumed a more cautious tone. Market expectation for rate cuts saw thus a meaningful repricing.

Over spring and in the first summer months, however inflation data started to show once again some progress, supporting once again fixed income markets and driving government bond yields lower. Between July and August, weaker data coming from the US job market and especially the increase in the unemployment rates started to fuel expectations for a much faster pace of rate cuts from the Fed.

## Jupiter Dynamic Bond ESG

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Market Review *(continued)*

In August, the Fed Chair Jay Powell signalled imminent rate cuts at his address to the Jackson Hole Symposium, although with limited guidance over size of cut and path for the following meetings.

The key event of September was the FOMC meeting. As anticipated by markets, the Fed delivered its first rate cut. The 0.50% reduction in reference rates was however more than that initially priced by market participants. The increase in the unemployment rate, as well as the slowdown in pace of hiring, combined with benign inflation reports were ultimately key factors in driving the FOMC decision. The Fed joined other major developed market central banks, that had already started a cutting cycle in the previous months.

#### Policy Review

The period under review was positive for the strategy and more broadly for fixed income markets.

Exposure to government bonds and rates delivered strong contribution to performance. In particular our exposure to US, Australia and up to a more marginal extent New Zealand and UK delivered positive contribution to returns. Exposure to emerging market rates also contributed positively, with most of the positive contribution coming from our exposure to Korea.

Corporate bonds also contributed positively. Developed markets high yield corporate bonds delivered positive returns, coming especially from our exposure to financials, healthcare and communication services. Credit risk hedging via XOVER contracts (EUR High Yield) provided instead a negative contribution. Exposure to developed markets investment grade corporate bonds and emerging markets corporate bonds also provided a positive contribution.

FX exposure provided instead a negative contribution mostly coming from our exposure to BRL and USD.

#### Investment Outlook

The last quarter of the period under review saw material changes in the macro narrative, which confirmed our macro slowdown thesis. Much better inflation prints, combined with weaker job market data in the US had two important effects. The first was a drastic repricing in market expectations for monetary policy ahead. The second was the formal beginning of the rate cutting cycle in the US, with a larger than expected 0.50% cut. We would say the move from the Fed was appropriate, although a bit too late. Recent macro datapoints have clearly shifted the balance of risks for monetary policy from the price stability side of the mandate to the full employment one and, using the words from Jerome Powell himself, the FOMC does not “seek or welcome further cooling in labour market conditions”.

Moving forward we continue to expect a slowdown in the US. We would not underestimate the recent increase in the unemployment rate as a historically accurate predictor of recessions. At this stage, the only piece missing is a more material increase in layoffs. The rest of the world continues to look in a precarious position to us. The recovery in the Eurozone has pretty much faded, with recent Purchasing Managers' Index (PMI) readings showing renewed weakness and inflation quickly cooling. The UK economy has surprised to the upside in the first half of the year. More recent data have however shown some deterioration. Limited room for additional fiscal and rapid repricing in rates on outstanding mortgages represent key drags on the economy. Inflation across the globe increasingly seems less of a problem and the widely discussed lags in service inflation still leave very meaningful room for disinflation in the coming months. The key consequence of all of this is that rates remain way too high as of today and more easing is needed.

## Jupiter Dynamic Bond ESG

### Review of Portfolio as at 30 September 2023 *(continued)*

#### Investment Outlook *(continued)*

Investment implications continue to see exposure to rates and government bonds as the most compelling area of fixed income markets. Notwithstanding the recent rally, rates continue to offer good returns as rate cuts come through along with further macroeconomic slowdown. Credit continues to price a goldilocks scenario. At this stage we prefer to keep historically low exposure with high selectivity.

\* Performance takes into consideration dividend distributions during the year.

#### Market Review

Equity markets performed well in the period under review. The principal driver of this performance was the ongoing normalisation of inflation and the view that a more benign environment should allow central banks to begin easing monetary policy. There were periods of volatility, however, as markets reacted to economic data that at times challenged this view. The European Central Bank lowered its benchmark rate in June by a quarter point, its first reduction in almost five years. The US Federal Reserve followed in September with a half-point cut. European economic activity has been muted, with manufacturing exports in particular impacted by weakness in China. The strong performance of the US Magnificent Seven stocks, led by Nvidia, on expectations for growth in AI and technology generally, has been a key feature of markets in recent years, but this trend began to ease toward the end of the period.

#### Policy Review

The fund generated positive returns but underperformed the benchmark during the period under review. Performance in the industrial, financial and consumer staples sectors detracted from performance relative to the benchmark, while performance in the consumer discretionary, basic materials and health care sector were positive factors.

Stocks including RELX, Schneider Electric, Wolters Kluwer and Experian were strong performers for the fund. Pernod Ricard, Edenred, Rentokil and Davide Campari were weak performers.

Longer term performance of the fund was negatively impacted by weakness in relative performance in 2022, due to higher interest rates putting pressure on valuations.

## Jupiter European Growth

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Policy Review *(continued)*

Among the new holdings added during the year is Schneider Electric, a French company that manufactures electrical power products for energy management and industrial automation and is a key supplier to data centres. Another new holding is L'Oreal, a global leader in cosmetics, which innovates across products and channels and acquires and scales new brands. The fund initiated a position in German software provider SAP, a global leader in enterprise software that is benefiting from customer migration to its cloud offerings. Another addition is Elis, a leader in commercial workwear and linen services, which was added previously in the investment desk's smaller companies' funds.

The fund participated in the initial public offer of shares in CVC Capital Partners, a private equity and investment advisory company with a long-term track record, that we believe should benefit from increasing institutional investment into private markets.

Several small holdings were exited during the period to help fund names of higher conviction. The exited holdings include Nexi, Zalando and BioMerieux, Eurofins Scientific and Pernod Ricard.

#### Investment Outlook

The consensus outlook for the European economy remains uncertain, but regardless of this we remain constructive on the long-term opportunities for quality European companies.

Inflation has fallen, and central banks have begun cutting interest rates. Markets as always are concerned about the pace of global economic growth and the risk of recession and the risk of persistent inflation and heightened geopolitical risk. We believe that these are largely global issues rather than issues facing only the European market, and nevertheless the European market is still trading at a significant valuation discount to the US.

We continue to believe that a focus on companies with strong fundamentals, competitive advantages and exposure to secular growth trends is the most

reliable path to successful long-term returns. We monitor the fundamental backdrop of our holdings, assessing for signs of competitive change or disruptive forces. But it is worth noting that quality businesses with sustainable pricing power tend to thrive and gain share in more difficult economic times when competitive pressures tend to intensify.

Positioning in the fund is driven by bottom-up stock selection, which leads to a skew towards quality companies with higher profitability and higher growth characteristics than the index. We are attracted to companies with long-term structural growth drivers and predictable cashflows and will continue to apply our process to analyse and invest in these opportunities.

#### Market Review

Equity markets performed well in the period under review. The principal driver of this performance was the ongoing normalisation of inflation and the view that a more benign environment should allow central banks to begin easing monetary policy. There were periods of volatility, however, as markets reacted to economic data that at times challenged this view. The European Central Bank lowered its benchmark rate in June by a quarter point, its first reduction in almost five years. The US Federal Reserve followed in September with a half-point cut. European economic activity has been muted, with manufacturing exports in particular impacted by weakness in China. The strong performance of the US Magnificent Seven stocks, led by Nvidia, on expectations for growth in AI and technology generally, has been a key feature of markets in recent years, though this trend began to ease toward the end of the period.

#### Policy Review

The fund generated positive returns but underperformed the benchmark during the 12 months under review. Performance in the industrial, financial and consumer staples sectors detracted from performance relative to the benchmark, while performance in the consumer discretionary, basic materials and health care sectors were positive factors.

Stocks including RELX, Schneider Electric, Wolters Kluwer and Experian were strong performers for the fund. Pernod Ricard, Edenred, Davide Campari and Sartorius Stedim Biotech were weak performers.

#### Investment Outlook

The consensus outlook for the European economy remains uncertain, but regardless of this we remain constructive on the long-term opportunities for quality European companies.

Inflation has fallen, and central banks have begun cutting interest rates. Markets as always are concerned about the pace of global economic growth and the risk of recession and the risk of persistent inflation and heightened geopolitical risk. We believe that these are largely global issues rather than issues facing only the European market, and nevertheless the European market is still trading at a significant valuation discount to the US.

We continue to believe that a focus on companies with strong fundamentals, competitive advantages and exposure to secular growth trends is the most reliable path to successful long-term returns. We monitor the fundamental backdrop of our holdings, assessing for signs of competitive change or disruptive forces. But it is worth noting that quality businesses with sustainable pricing power tend to thrive and gain share in more difficult economic times when competitive pressures tend to intensify.

Positioning in the fund is driven by bottom-up stock selection, which leads to a skew towards quality companies with higher profitability and higher growth characteristics than the index. We are attracted to companies with long-term structural growth drivers and predictable cashflows and will continue to apply our process to analyse and invest in these opportunities.

#### Market Review

The fourth quarter of 2023 was a risk-on period, with equities and bonds both up strongly. US stocks outperformed Europe, and developed markets outperformed emerging markets. Most notably, in Europe and the US, sector leadership came from fintech, banks and real estate.

In the first half of 2024, fundamentals remained resilient, especially in Europe, with most of the focus being on the sustainability of returns and capital redistribution in a lower interest rate environment. European banks were largely in favour, despite a slight downwards revision in profitability for 2024, as visible capital returns were backed by excess capital. In the US, the annual Dodd Frank Stress (DFAST) results came back moderately more onerous than expected; nevertheless, major US banks generally retain strong capital levels and continue to generate substantial levels of capital on a quarterly basis.

In September, the US Federal Reserve (Fed) cut rates for the first time since 2020; its 0.50% reduction was slightly more than what was being priced in by market participants. Other notable newsflow during the quarter included the announcement of a significant stimulus package by the Chinese government, leading to a rally in Chinese equities.

#### Performance Review

Swissquote Group Holding, a leading Swiss online banking group, was a notable highlight for the fund. In August, the company released its results for the first half of 2024, posting a 19% rise in revenues and a 30% rise in profits compared to the same period in 2023. Swissquote noted an improvement in investor sentiment, which had a positive impact on trading activity and customer acquisition.

The fund benefitted from holdings in several European banks in the period under review, including UniCredit, Bank of Cyprus and Commerzbank. In September, UniCredit became the largest investor in Commerzbank, acquiring nearly 21% of its shares. In the UK, NatWest and Barclays were also positive contributors to the fund's performance. On the negative side, TBC Bank and Bank of Georgia detracted from the fund's relative returns.

Our position in Western Alliance also benefitted the fund. Towards the end of the period, super-regional banks outperformed universal banks, due to the perceived resilience of their net interest income (NII) outlooks, with a backdrop of falling short-term interest rates and a steeper yield curve.

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Performance Review *(continued)*

Allstate contributed positively to the fund's returns too. Losses in the third quarter of 2024 appear to be well below estimates. This bodes well for quarter 3 earnings, as well as the company's capital position, which should also benefit from the sale of its benefits business. We expect to see improving auto and home margins and easing capital concerns. Barring major catastrophe losses, we expect reinsurance pricing to soften in 2025, which should be beneficial to Allstate as a purchaser of reinsurance.

Elsewhere, positive contributions came from alternative assets companies 3i and Intermediate Group; crypto investor Phoenix Digital Assets; Brazil-based digital banking platform provider Nu Holdings; and AIA Group, a Hong Kong-based insurance company.

#### Investment Outlook

While inflation is expected to continue to fall during the fourth quarter of 2024, we still think that we won't see a return to zero interest rates and quantitative easing in the medium term. More positively, we continue to believe there is a chance that we could see a 'Goldilocks' scenario – not too hot, not too cold – materialise as we move into 2025, which would be supportive for global equity markets, especially financials. These developments limit space for policy easing, and markets should incorporate higher-for-longer policy stances. The implications of these developments are uncertain, but markets may remain sceptical that inflation and rate normalisation can be achieved without weakening demand.

Over the longer term, we continue to look beyond the noise, to focus on identifying well established, innovative and dynamic companies that should benefit from the continued long-term structural trends driving change in global fintech and financial services sectors.

### Market Review

The period under review was characterised by strong performance from financial markets, with breadth returning as the S&P 500 outperformed 'Magnificent Seven' mega-cap tech companies for the first time since the fourth quarter of 2022. Concerns around stretched valuations of the latter combined with underwhelming earnings drove a rotation of investments towards small and medium-sized companies. Weaker employment data in the US shifted investor attention from inflation to economic growth, resulting in higher interest rate cut expectations by year end. In this context, the US Federal Reserve delivered its first rate cut, while the Bank of Japan delivered the only rate hike among G10 economies. In September, China announced a broad stimulus package to support an economy which is at risk of falling short of government growth targets.

Overall strong performance in most markets masked short-term volatility during the period, as the VIX volatility index reached levels last seen in March 2020. Falling interest rates and economic growth concerns drove outperformance in bond-proxy sectors such as utilities, real estate and financials. Chinese equities outperformed following the announcement of the economic package, delivering their best quarterly performance since 2009. Japanese equities underperformed due to Japanese yen appreciation. In commodities, oil declined by 17% while gold appreciated 13%, driven by macroeconomic factors described above.

This market background was broadly supportive for the fund's investment universe of environmental solutions business. Structural growth drivers supported by electrification, energy efficiency, water infrastructure development and circular economy proved resilient, establishing bifurcation of performance against broader industrial end-markets where slowing manufacturing and services activity levels were observed. Weakening consumer sentiment continued to impact the automotive industry, resulting in deceleration of capital investment plans linked to vehicle electrification. The falling interest rate environment was supportive of manufacturers of renewable energy equipment, as well as developers and operators of renewable energy projects.

### Policy Review

The prospect of power demand growth to meet the energy needs of Artificial Intelligence (AI) has bolstered an already significant step up in capital expenditure in grid and power management solutions. We have benefitted from being relatively early movers to recognise the gap between the level of investment needed to make energy markets affordable, secure and green, with what the broader investment market is anticipating, driving returns in pockets of our Clean Energy and Green Building & Industry themes that sell into this high-growth, high-return market. AI energy needs are particularly difficult to predict however, and so we have continued to trim some of our holdings that have benefitted most from the change in expectations, namely Prysmian and Monolithic Power, which is also a supplier to Nvidia.

## Jupiter Global Ecology Growth

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Policy Review *(continued)*

Significant portfolio changes during the period also include a new position in Belimo, a leading Heating, Ventilation and Air Conditioning (HVAC) control device manufacturer and is set to benefit from the growing penetration and upgrade of energy efficient building automation and control system (BACS) for commercial buildings, as well as increasing data centre cooling requirements.

We also initiated a position in the global clean energy developer EDP Renovaveis, taking advantage of an opportunity to buy the company at valuation levels implying no future growth, driven by peak negative expectations linked to renewable energy, interest rates and power prices.

We exited our positions in Johnson Controls and Thermo Fisher. Our exit in Johnson Controls was driven by concerns around business growth prospects versus other HVAC and building control peers after taking into account announcement of planned divestitures, as well as newly raised questions surrounding management. We sold out of Thermo Fisher on considerations around the potential challenges the company faces in maintaining high market share in developed and key emerging markets.

Additional portfolio changes during the period include the disposal of positions in Sensata, Daikin and Agronomics. Additions to the portfolio include Veralto, a water testing and treatment company which was spun-off from Danaher and one that we anticipate is well-positioned to grow 'organically' and through acquisition.

#### Investment Outlook

We have a long-held conviction that global development is and always has been dependent on the natural world. While we remain highly cognisant of geo-political tensions, potential macro-economic weaknesses and regulatory risks for instance that impact upon our investment landscape like any other, we would highlight that observed changes to the environment, not least

climate indicators, are more severe than anticipated and in many cases still not fully explained.

Our conviction also remains that this presents an ever-more compelling long-term growth opportunity for leading companies focussed on delivering real-world solutions to protecting the climate as well as wider forms of natural capital, including water resources and biodiversity.

It is notable that growth drivers within our environment solution themes continue to be buoyed by an appreciation of the broader benefits of environmental solutions amongst corporations and governments. Areas where this is apparent include the role environmental technologies are playing in helping to address growing energy availability and security concerns, and the benefits to human health of tackling longstanding and 'emerging' pollutants in water resources.

In our view, this will continue to provide resilience in investment returns at a time when there is a risk that policy commitment to environmental agendas, at least at the headline level, may wane or even take a backwards step, with the upcoming US election a notable case in point. However, we are encouraged by the clear signals of a widespread recognition that, irrespective of political leaning, environmental technologies and services across our six investment themes will play a pivotal role in the economy of the future.

**Jon Wallace and Noelle Guo**

### Market Review

After three months of a weak trading environment for US Treasuries, the trend in yields reversed in November 2023, falling sharply. This supported most fixed income assets, including emerging market debt (EMD).

December was another positive month, with more dovish messaging coming from the FOMC (Federal Open Market Committee) meeting in December.

After a strong end to 2023, we saw greater dispersion in the performance of fixed income assets in the first quarter of 2024, including EMD, given conflicting market drivers. Macroeconomic data, particularly coming from the US, continued to play a pivotal role.

At the start of the second quarter, US Treasury yields continued to climb higher following another higher-than-expected US Consumer Price Index (CPI) print. EM debt spreads were stable to slightly tighter, partially offsetting the negative contribution coming from Treasury moves. It was a more complex picture for local currency debt, given US dollar appreciation. As the quarter progressed, however, the key driver of returns was the decrease in US Treasury yields, driven mostly by positive news on US inflation and softer data coming from the US job market, though this trend reversed somewhat at the end of June.

The third quarter was a positive period for fixed income and hard currency emerging market debt. The key event of the month was the FOMC meeting in September. As anticipated by markets, the US Federal Reserve (Fed) cut rates for the first time since 2020; its 0.50% reduction was slightly more than what was being priced in by market participants. Other notable newsflow during the quarter included the announcement of a significant stimulus package by the Chinese government.

### Policy Review

The Jupiter Global Emerging Markets Corporate Bond fund delivered strong returns in the 12 months under review, outperforming its benchmark.

#### Positive contributions

- Active exposure to interest rates
- Security selection in Mexico
- Security selection in China
- Overweight exposure to and security selection in Colombia

## Jupiter Global Emerging Markets Corporate Bond

Review of Portfolio as at 30 September 2024 *(continued)*

### Policy Review *(continued)*

#### Negative contributions

- Underweight exposure to and security selection in Israel
- Security selection in the Philippines
- Security selection in Zambia
- Underweight exposure to Taiwan
- FX exposure to the Colombian peso

#### Market Review

After three months of a weak trading environment for US Treasuries, the trend in yields reversed in November 2023, falling sharply. This supported most fixed income assets, including emerging market debt (EMD). December was another positive month, with more dovish messaging coming from the FOMC (Federal Open Market Committee) meeting in December.

After a strong end to 2023, we saw greater dispersion in the performance of fixed income assets in the first quarter of 2024, including EMD, given conflicting market drivers. Macroeconomic data, particularly coming from the US, continued to play a pivotal role.

At the start of the second quarter, US Treasury yields continued to climb higher following another higher-than-expected US Consumer Price Index (CPI) print. EM debt spreads were stable to slightly tighter,

partially offsetting the negative contribution coming from Treasury moves. It was a more complex picture for local currency debt, given US dollar appreciation. As the quarter progressed, however, the key driver of returns was the decrease in US Treasury yields, driven mostly by positive news on US inflation and softer data coming from the US job market, though this trend reversed somewhat at the end of June.

The third quarter was a positive period for fixed income and hard currency emerging market debt. The key event of the month was the FOMC meeting in September. As anticipated by markets, the US Federal Reserve (Fed) cut rates for the first time since 2020; its 0.50% reduction was slightly more than what was being priced in by market participants. Other notable newsflow during the quarter included the announcement of a significant stimulus package by the Chinese government.

#### Performance Review

The portfolio was up sharply during the period in absolute and relative terms.

#### Market Review

Markets rallied as economic and interest rate concerns abated and growth investing returned to favor. Market responded to promising data on a falling inflation rate and, later in the period, a half-percent reduction in the Federal Funds rate. (Artificial Intelligence) AI-related stocks led performance early in the period, but markets broadened later in the year.

The combination of market optimism and a focus on AI led to strong performance in technology stocks. A large portion of the return stemmed from a handful of large cap stocks dubbed the Magnificent Seven, especially earlier in the period. Later, as markets broadened, performance among these companies showed more dispersion. For the market, semiconductor and semiconductor equipment stocks strong, led by Nvidia, the AI darling of the market. IT notwithstanding, the markets performance was widespread with the energy sector the only among GICS that failed to report double digit returns.

#### Policy Review

The fund's investment process is to find highly innovative and adaptive names in a fast-changing world. It is well positioned for a period favoring growth and technology stocks. Many of these names appear in the information technology sector, although the portfolio invests across many sectors. The opportunity set for innovation and disruption is increasing, fueled by analog-to-digital transformation of our global economy.

Therefore, as one might expect, the portfolio was overweight the information technology sector helping absolute and relative performance. Beyond IT, however, other sectors helped as well. In terms of absolute change, the Financials sector was the strongest in the portfolio. The contribution to absolute and relative return was smaller than that of the IT sector, but still positive. Consumer discretionary performed well in absolute and relative terms. We lagged in utilities and consumer staples, two strong sectors where we had little exposure.

## Jupiter Global Equity Growth Unconstrained

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Policy Review *(continued)*

The individual contributors reflected the range of sector exposures. Progressive, an insurance firm, was a top absolute and relative contributor. Taiwan Semiconductor Manufacturing Co., a semiconductor firm, and Trane Technologies, an industrial firm, also contributed well. Detractors included Workday Inc., a software firm and Moderna, a biotech concern.

The fund's focus remains unchanged. The environment is right, we believe, to focus on companies benefiting from the analog to digital transformation for the economy, either by taking advantage of technology, including AI, or offering products and services to enable other firms to innovate and disrupt their sectors.

#### Investment Outlook

We remain bullish about the long-term implications of AI. This quarter, however, the market's focus shifted somewhat to the returns on the massive investments in AI infrastructure. We are still awaiting the revenue generating 'killer apps' that stem from this generational technological shift. We have been deliberate to incorporate a wide range of outcomes in the future growth of AI.

Overall, we are positive about the outlook for our portfolio. Some headline multiples are high in some areas, but we are also cognizant about the potential for long-awaited cyclical recoveries in end markets, including industrials, healthcare, real estate, home improvement and telecom. Further clarity on the pace of rate cuts by the Fed and a conclusion to the U.S. election could help some of those cycles turn up in 2025, improving earnings and justifying the multiples for many companies.

### Market Review

Global fixed income markets including high yield credit performed well in the 12 months, marking a second consecutive year of good returns. Risk markets were supported by slowing inflation and a consensus view formed that a more benign environment should allow central banks to ease monetary policy, and then that the global economy, while slowing, would be able to avert a recession. There were periods of volatility, however, as markets reacted to data and debated the most likely path of rate cuts.

After a strong end to 2023 there was greater dispersion in the performance of fixed income assets in quarter 1 2024 due to conflicting market

drivers, with macroeconomic data, particularly from the US, playing a pivotal role. At the start of quarter 2 of 2024, US Treasury yields continued to climb following a higher-than-expected US Consumer Price Index print. As the quarter progressed, however, Treasury yields fell, driven mostly by positive news on US inflation and softer job market data, though this trend reversed again somewhat at the end of June. During the Summer, softening data from the US job market reignited fears over a potential recession and pushed credit spreads wider. As concerns over the US economy dissipated, however, spreads quickly tightened once again.

## Jupiter Global High Yield Bond

### Review of Portfolio as at 30 September 2023 *(continued)*

#### Market Review *(continued)*

In quarter 3 2024, the US Federal Reserve cut rates for the first time since 2020, with a 0.50% reduction. Other notable news in the quarter included the announcement of a significant stimulus package by the Chinese government.

Overall, the 12 months period saw a meaningful decrease of government bond yields, especially in the US and in the Eurozone with a clear steepening trend. Global high yield credit spreads saw a meaningful tightening, with lower rated segments of the market on average showing a more meaningful tightening vs. higher rated segments.

#### Policy Review

The fund slightly underperformed the benchmark during the year and was in the second quartile for performance versus peers. The fund has outperformed the benchmark over three and five years and is in the first quartile for performance over three and five years.

The fund's positioning is somewhat defensive. Our view is that credit spreads remain tight and are pricing in a bullish soft landing. We think there is risk to that view and therefore it best to avoid expensive parts of the markets. The fund is overweight Europe and underweight the US, where we see less value on offer. We selectively invest in emerging markets.

We remain underweight cyclical, consumer discretionary and real estate credits. We see these sectors as potentially mispriced given the risk of recession. The fund is overweight consumer staples, energy and health care, which should be better able to withstand slower growth.

#### Positive contributors over 12m:

- Security selection in the Communication Services sector
- Overweight and security selection in the Consumer Staples sector
- Security selection in the Consumer Discretionary sector
- Overweight exposure to Financials

#### Negative contributors over 12m:

- Security selection in the Utilities sector
- Underweight exposure to the Real Estate sector
- Overweight exposure to the Energy sector
- Security selection in the Healthcare sector

#### Investment Outlook

Despite a benign first half to the year, we remain cautious that investors are now very committed to the soft-landing thesis despite ongoing political and macro-economic risks. Investor sentiment has improved enormously in recent months as the narrative that central banks will support risk assets by cutting rates into a still robust economy has gathered pace. This soft-landing narrative may prove to be correct (the jury is still out), but with credit spreads fully reflecting a benign economic outlook, the market risk may be to the downside if weaker data causes investor sentiment to deteriorate.

Our view is that the market may be too complacent about the well-publicised lag effects of monetary policy: interest rate hikes are a powerful tool but they only percolate through the global economy slowly, causing more and more damage as governments, businesses and consumers progressively have to refinance their debt. The huge amount of monetary tightening by the central banks over the last 2 years is only now hitting consumers and businesses through the global refinancing cycle and still has potential to trigger recession. Europe and China are weak, and so the "robust" global macro narrative is increasingly dependent on the USA remaining strong (even though there is a strong argument that US "exceptionalism" is currently just reflecting ongoing stimulus from an enormous fiscal deficit). Default rates will increase, and there could be greater volatility in the high yield market – dispersion in performance among issuers and sectors – that disciplined active managers can take advantage of. Notwithstanding the recent rally, the all-in yields on offer in high yield are still relatively high when compared to recent history, and they offer the potential for attractive future returns relative to higher beta asset classes such as equities. As the macro environment evolves, credit selection will be even more important to avoid the weaker names.

## Jupiter Global High Yield Bond

### Review of Portfolio as at 30 September 2023 *(continued)*

#### Investment Outlook *(continued)*

Part of the reason for the high yield market's robust performance in recent months may be market technicals, as muted net new issuance and inflows into the asset class have driven investors to chase existing bonds. Market technicals can be highly volatile however, and investors should not just rely on bullish trends continuing, particularly if macroeconomic conditions deteriorate.

We think it makes sense for high yield investors to be more cautious today in portfolio construction: such as owning more lower-risk bonds and keeping higher cash balances to provide a risk hedge as well as dry powder that can be used to take advantage of selloffs and dispersion in the market.

There are still good opportunities on the long side: particularly where companies have specific catalysts that should lead to their credit profiles improving regardless of the broader economic environment.

On a sector standpoint, given our recessionary macro view, we think it makes sense to stay away from the more cyclical parts of the market – consumer discretionary companies, industrials or in general companies that are too highly levered. Consumer staples, traditionally defensive sectors, look more attractive. In recent quarters we found also idiosyncratic opportunities in the energy sector and in the financials space.

Emerging markets are interesting because some high yield bonds there are pricing in a pretty bleak economic environment. We still find good opportunities in the likes of South Africa, India, Czech Republic and Nigeria but individual credit selection (as always) is key.

Fundamentally, given the outlook for a more volatile market, we believe that judicious credit selection and risk awareness will be crucial to delivering solid returns in high yield for the near future. That means being active, intensively researching credit selection to drive risk-adjusted returns; being pragmatic, neither overly aggressive nor defensive; and being risk aware, to preserve capital and avoid idiosyncratic drawdowns.

Despite our caution on the global economy, history suggests that over the medium term, high yield remains positioned to deliver attractive returns. Yield to fixed income investors is everything, and the radical re-pricing of interest rates since 2021 has left yields for high yield bonds looking very high relative to average yields over the long term. This provides a strong margin of safety to compensate for volatility and potentially higher default rates.

Despite scope for market volatility and the lingering risks of recession, we remain bullish about the fund's ability to perform robustly through its high conviction credit selection philosophy.

#### Market Review

Government bond yields fell across the board during the review period as central banks made progress in containing inflation, following aggressive interest rate increases. US Treasury and German Bund yields in particular saw a major decrease, with a clear steepening bias. UK and Australia saw a decrease as well, but up to a more modest extent. Japanese yields closed modestly higher. Looking at FX markets, the USD saw a meaningful depreciation vs. most of major currencies with a few notable exceptions (BRL, MXN and TRY), driven by increased expectations for rate cuts in the US.

While early expectations of interest rate cuts were dashed, central banks eventually cut rates as the labour market resilience showed signs of waning. The period under review began with elevated geopolitical uncertainty following the attack on Israel by Hamas, which hurt market sentiment. US growth continued to surprise to the upside and the US job market continued to showcase strong spot data.

November and December saw a meaningful reversal of the trends seen in the previous months with strong performance across financial markets and fixed income. The key event and driver for December was the Federal Open Market

Committee (FOMC) meeting and the subsequent press conference held by Chair J. Powell. The dovish tone from the US Federal Reserve (Fed), supported by lower inflation prints fueled a strong rally across rates and risk assets.

Quarter 1 of 2024 saw a clear pause in the disinflationary process, with Consumer Price Index (CPI) data coming higher than expected in the US and across many major developed markets. As a result, the Fed assumed a more cautious tone. Market expectation for rate cuts saw thus a meaningful repricing.

Over spring and in the first summer months, however inflation data started to show once again some progress, supporting once again fixed income markets and driving government bond yields lower. Between July and August, weaker data coming from the US job market and especially the increase in the unemployment rates started to fuel expectations for a much faster pace of rate cuts from the Fed.

In August, the Fed Chair Jay Powell signalled imminent rate cuts at his address to the Jackson Hole Symposium, although with limited guidance over size of cut and path for the following meetings.

## Jupiter Global Sovereign Opportunities

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Market Review *(continued)*

The key event of September was the FOMC meeting. As anticipated by markets, the Fed delivered its first rate cut. The 0.50% reduction in reference rates was however more than what initially priced by market participants. The increase in the unemployment rate, as well as the slowdown in pace of hiring, combined with benign inflation reports were ultimately key factors in driving the FOMC decision. The Fed joined other major developed market central banks, that had already started a cutting cycle in the previous months.

#### Policy Review

During the 12 months period the strategy struggled, underperforming the government bond market, as represented by the comparator benchmark and the Morningstar Global Bond (USD Hedged) category.

Performance was driven by the following contributors and detractors:

#### Contributors

- Contributors
- Exposure to developed markets rates in US, Australia and New Zealand
- Exposure to emerging markets rates in Korea, South Africa, Colombia, India, Mexico, Hungary and Poland
- Exposure to hard currency spreads and especially in Ecuador, Egypt, Tunisia, Ukraine, Mexico, Mozambique and Bahamas
- US risk free rate
- FX exposure (including FX carry) to INR, BRL, EGP, GBP, COP, KZT, CLP

#### Detractors

- Exposure to rates in Turkey and UK
- Credit risk hedging via XOVER and other index CDS
- Short spread exposure to Turkey, South Africa, Italy, Bahrain and Panama among the others
- Exposure to spreads in Venezuela, Nigeria, Brazil. FX Exposure (including FX carry) to MXN, JPY, NGN, EUR and PLN among the others.

#### Investment Outlook

The last quarter of the period under review saw material changes in the macro narrative, which confirmed our macro slowdown thesis. Much better inflation prints, combined with weaker job market data in the US had two important effects. The first was a drastic repricing in market expectations for monetary policy ahead. The second was the formal beginning of the rate cutting cycle in the US, with a larger than expected 0.50% cut. We would say the move from the Fed was appropriate, although a bit too late. Recent macro datapoints have clearly shifted the balance of risks for monetary policy from the price stability side of the mandate to the full employment one and, using the words from Jerome Powell himself, the FOMC does not “seek or welcome further cooling in labour market conditions”.

Moving forward we continue to expect a slowdown in the US. We would not underestimate the recent increase in the unemployment rate as a historically accurate predictor of recessions. At this stage, the only piece missing is a more material increase in layoffs. The rest of the world continues to look in a precarious position to us. The recovery in the Eurozone has pretty much faded, with recent Purchasing Managers' Index (PMI) readings showing renewed weakness and inflation quickly cooling. The UK economy has surprised to the upside in H1. More recent data have however shown some deterioration. Limited room for additional fiscal and rapid repricing in rates on outstanding mortgages represent key drags on the economy. Inflation across the globe increasingly seems less of a problem and the widely discussed lags in service inflation still leave very meaningful room for disinflation in the coming months. The key consequence of all of this is that rates remain way to high as of today and more easing is needed.

Investment implications continue to see exposure to rates and government bonds as the most compelling area of fixed income markets. Notwithstanding the recent rally, rates continue to offer good returns as rate cuts come through along with further macroeconomic slowdown. Credit continues to price a goldilocks scenario. At this stage we prefer to keep historically low exposure with high selectivity.

### Market Review

A major feature of global equity market returns during the period under review was the dominance of the Magnificent 7 stocks, US-listed technology-focused megacaps, such as NVIDIA, Apple, Meta and Microsoft, that sell products or services that offer investors exposure to artificial intelligence. We are cautious of market concentration in these names and offer our clients diversification away from them, with a strong focus on long term relative valuation and fundamental bottom-up stock picking, resulting in defensive and high-quality names within our portfolio.

Inflation levels persisted above central bank target levels, and growth remained robust – especially in the US – and this caused continued uncertainty about the path of central bank policy. With several of the major central banks cutting interest rates as the year progressed.

As the period under review drew to a close, there was a different look to the market's leadership, as a wider array of companies beyond the US tech giants delivered returns, a market in which the fund performed strongly. The reason for this shift in sentiment involved a more dovish approach

from the Federal Reserve, which cut rates by 0.50% in September. The period concluded with the MSCI ACWI reaching its all-time high at the end of September.

Looking to political and regulatory developments, the European Carbon Border Adjustment Mechanism (CBAM) entered into its first reporting phase. Though there were some delays to implementation, the mechanism is being closely monitored by companies and countries alike and is seen as a vital step toward cutting emissions to the 1.5°C goal of the Paris Agreement. Biodiversity and use of natural capital are also topics high on the political agenda, and we look to COP 16 set to take place in Colombia in October 2024 for further developments.

### Policy Review

The strategy is focused on investing in those companies we believe are well positioned to lead a sustainable transition, through balancing the interests of planet, people and profit. It is our view that those global companies that operate sustainably in economic, environmental and social terms will also be able to deliver attractive financial returns on a long-term basis.

## Jupiter Global Sustainable Equities (LUX)

### Review of Portfolio as at 30 September 2023 *(continued)*

#### Policy Review *(continued)*

The last twelve months have been a period marked by momentum-driven sentiment and uncertainty around the persistence of inflation. In this environment, the Fund underperformed its benchmark index due to the zero weighting in a small number of US megacap technology stocks. Regionally, the US was the largest detractor, driven to some extent by the strategy's zero weighting to the NVIDIA, Amazon, Meta and Microsoft. Much of the tech rally was driven by optimism around Artificial Intelligence (AI).

In the Financials sector, Chubb, a leading global insurance company, was the top performer, boosted in part by news that Berkshire Hathaway had been building up a stake since quarter 3 last year. In the Materials sector Sherwin Williams, the global leader in the manufacturing and sale of paints and coatings, and Ecolab, a US-based water treatment and purification provider, also contributed.

Within Healthcare, our life sciences names had previously seen headwinds from pharmaceutical inventories returning to pre-pandemic levels, but the market's level of concern on this issue has now started to dissipate. We continue to see life sciences and tool companies as high quality, high conviction investment opportunities with attractive long-term horizon resilience, able to benefit from high recurring revenue and strong balance sheets in the face of a steeply tightened interest rate cycle. The companies we invest in enable enhanced patient outcomes through early diagnosis of disease, with long term organic growth underpinned by an ageing global population.

Looking back to the most recent earnings period, companies held in the strategy generally reported strong figures, with the majority of results beating expectations. We have a long-term investment horizon, as such tend to look through short-term news flow and are confident that the portfolio retains the economic resilience to support the capital growth opportunity over the long term.

#### Market Review

The Shiller PE is a simple measure of stock market valuation. The average Shiller PE since the late 1800s has been 17.5 times. At the end of the period under review, it was 36 times, a level surpassed on just two occasions. Even the speculative madness of 1929 failed to get beyond 32 times for any meaningful length of time (one should note it breached 32 times very briefly in September 1929 before crashing the economy into the Great Depression).

The two periods during which the Shiller PE exceeded today's level were at the peak of the DotCom bubble in 1999, and during the 2021 speculative mania from day traders during Covid lockdowns.

The Nasdaq fell c.36% from its 2021 peak into 2022 before the promise of AI rekindled speculative fervour. It seems reasonable to suggest that this long-inflated valuation bubble is yet to pop. There are just too many improbably high equity valuations today, which seem unlikely to translate into cashflows to shareholders. A share is just the current value of the future expected cashflows from owning that legal claim. If the price paid becomes detached from a reasonable valuation of those future cashflows, you have a problem.

As mega-cap US tech businesses have raced higher, we have continued to find opportunities in smaller companies outside the US trading at very low valuations.

#### Performance Review

Since 1 March 2024, the fund has been under new management, but the strategy remains the same: global value investing unconstrained by the benchmark and with flexibility to invest across the market cap spectrum. A distinct effort was made to ensure low turnover of our underlying positions to minimise any cost. We try to invest in businesses where the management teams eat plenty of their own cooking (with a strong preference that they are putting their hands in their own pockets), and clients should expect no less from their portfolio managers.

Over the 12 months from 1 October 2023 to 30 September 2024, the strategy generated an acceptable result in absolute terms. But our performance looks notably lacking relative to our benchmark.

## Jupiter Global Value

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Performance Review *(continued)*

Size has played a significant role in that relative performance. The MSCI ACWI Equal Weighted Index has underperformed the MSCI ACWI by around 10% over that period, highlighting the impact of size on overall index returns. Our tilt towards smaller and mid-sized companies created a strong allocation headwind to our stock-picking.

Over long periods of time, smaller companies have tended to outperform larger companies, but in recent years a handful of mega-cap US tech companies have driven the performance of the index in aggregate. These businesses are being priced to capture extreme levels of the economic profits available in our societies. The most notable of these businesses is NVIDIA, which is now 3.8% of our global benchmark. In the current environment, students of financial history will be reminded of the experience of Sun Microsystems during the 1999 tech bubble.

During the DotCom bubble, Sun Microsystem had been trading at 10 times revenues. After the tech bubble deflated, the former CEO of Sun Microsystems, Scott McNealy, famously commented:

*“At 10 times revenues, to give you a 10-year payback, I have to pay you 100% of revenues for 10 straight years in dividends.... That assumes I have zero cost of goods sold, which is very hard for a computer company. That assumes zero expenses, which is really hard with 39,000 employees. That assumes I pay no taxes, which is very hard. And that assumes you pay no taxes on your dividends, which is kind of illegal. And that assumes with zero R&D for the next 10 years, I can maintain the current revenue run rate. ... Do you realize how ridiculous those basic assumptions are? You don't need any transparency. You don't need any footnotes. What were you thinking?”*

Today NVIDIA is trading at 33 times revenues.

#### Investment Outlook

The fund is broadly diversified across business models, industries, customer groups and geographies. Our collection of businesses in aggregate yield 4% in dividends to shareholders on a 38.5% payout ratio. The fund is on a cyclically adjusted price to earnings ratio of 11.2 times and trades at a 15% discount to book value. If we look at EV/EBITDA (while ignoring companies in the financial sector, for which EV and EBITDA are both inappropriate measures) the portfolio is on an aggregate multiple of just 6.5 times.

It is worth noting that our peers in private equity started their recent golden run in 2009 by buying businesses at 6.5 times EV/EBITDA while the market was trading at 10.6 times. The gains from buying low, pushing through some shareholder-friendly cost-discipline and then selling high have been quite remarkable (aided of course by leverage at generationally low rates). Today the tables have turned somewhat as interest rates have been raised and private equity bids are on average happening at 11 times EV/EBITDA (broadly in line with market comparisons). With so much private capital now chasing the same types of opportunities, it remains to be seen whether the industry at large can avoid buying high and selling low. Add to this the substantially higher fee burden from private equity and much lower investor protections, and private markets may not be the panacea that many investors are hoping for.

The MSCI ACWI Index is yielding 1.97% (Bloomberg estimate), is on a cyclically adjusted price to earnings ratio of 37.2 times and trades at a 229% premium to book value. There is no perfect measure to encapsulate valuation differentials (every measure has its own glaring flaws), but by most standard measures our holdings are trading at a material discount to the market. The fund is relatively defensive in its positioning, and although we do not use measures from the capital asset pricing model as an input, its output is of some interest. The strategy currently has a Beta of 0.77 times.

## Jupiter Global Value

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Investment Outlook *(continued)*

We continue to find good businesses trading at attractive prices and despite the elevated levels of valuation in many mega cap businesses, we are optimistic about the portfolio's ability to generate attractive real returns for investors from here.

### Market Review

Indian equities grew from strength-to-strength and the main index hovered near a record high at the end of the review period, backed by a combination of robust economic data, steadily growing corporate earnings, and sound economic policies. With the International Monetary Fund projecting the economy to expand 7% in the year ending March 31, 2025, India is expected to retain its position as the fastest growing major economy.

Prime Minister Narendra Modi was returned to power for a third five-year term following a general election towards the end of the review period, with his Bharatiya Janata Party receiving the largest number of seats and able to form a coalition government with the help of allied parties. The new government has already unveiled a fiscally prudent budget, signalling continuity on the path of reform. Earnings growth for domestically oriented companies remains healthy, and this helped to drive outperformance for companies in sectors exposed to this trend, such as health care, real estate, and consumer-facing companies.

### Policy Review

The fund benefited from strong stock selection across the board. Our portfolio delivered higher aggregate returns than the benchmark stocks in every market sector except utilities and consumer discretionary – both sectors where the fund is meaningfully underweight vs the benchmark. Stock

outperformance was driven primarily by superior rates of aggregate earnings growth posted by the companies that it holds relative to those held in the benchmark. Notable contributors to performance were Godfrey Philips, BSE, Interglobe Aviation, and the oil marketing companies (OMCs), Hindustan Petroleum, Bharat Petroleum, and Indian Oil Corp.

Godfrey Philips, the fund's largest position, continues to report very strong sales growth and has seen its share price appreciate +230% over the past 12 months. Similarly, BSE, the operator of the country's second largest stock exchange, has reported impressive earnings growth after the successful launch of new futures products. Interglobe Aviation, the operator of India's largest airline, IndiGo, reported strong earnings growth and a significant investment in its fleet, announcing the world's largest ever narrow-body aircraft order. Finally, the OMCs performed exceptionally strongly, benefitting from a lower oil price and increased demand for their products. These businesses still trade at very low valuations compared to benchmark stocks and offer good visibility of earnings growth.

Conversely, holdings in PayTM and Tasty Bite Eatables, which both cut expectations for growth, detracted from performance. Not owning Mahindra & Mahindra, Trent, and Zomato impacted returns on a relative basis.

### Review of Portfolio as at 30 September 2023 *(continued)*

#### Investment Outlook

India has perhaps the best macro outlook of any large economy; it recently reported GDP growth of 8.2% for the financial year ending March-2024, a notably better outcome than the estimated 6% expected a year ago. Consensus forecasts for the next two years are in the 6-7% range; for the most part, the reported numbers have tended to exceed these expectations in recent years. We believe that India can sustain an elevated pace of growth for decades to come due to the long-term structural nature of the factors that are driving it: positive demographics, competitive labour costs, relatively low amounts of debt compared to other countries, and an increasingly favourable environment for doing business.

The June-quarter GDP figure came in at 6.7%, we believe that this is partly due to the effect of the elections - which caused a temporary slowdown in public capital spending - and weather conditions, with a prolonged heatwave suppressing demand in some sectors of the economy. Indian inflation fell to 3.65% in August, and expectations of rate cuts are starting to build amidst a backdrop of global central banks gradually moving towards more easing. If this materialises, it could provide some support in subsequent quarters, however, recent events in the Middle East also pose risks. The oil price briefly rebounded above \$80/ barrel in early October and could go a lot higher in the event of further escalation – a risk to be mindful of, given India's status as a net oil importer.

The Indian market has delivered good returns for investors in recent years, but valuations in some pockets of the market have become unreasonable even in the context of the visible superior earnings growth. Local investors are pouring in record sums in the Indian equity market, primarily through mutual funds via long term investment products. Foreign investors, who had turned net buyers following election results, have again started selling Indian equities. With the aggregate valuation for the MSCI India index on a forward-looking Price-to-Earnings ratio now above its 20y average, it is becoming

difficult to find 'cheap' stocks. Using our consistent and patient "growth at a reasonable price" approach, we are still able to identify new attractively valued companies that we believe have the potential to deliver better earnings growth returns for investors than the broader market over time. Our portfolio also consists of many such companies which we believe are undervalued. Our outperformance over the last couple of years has primarily been due to some of these companies being revalued upwards by the markets. We believe that a number of our investee companies still have a significant upside to their current valuations. We think a combination of similar or better earnings growth and lower valuation offers a compelling reason to invest with us in India, particularly for valuation conscious investors.

### Market Review

The first half of the period under review saw global markets at the mercy of global inflationary expectations. For the Japanese market specifically, there was a continuation of the trend in which cheap, cyclical, asset-heavy sectors found favour with investors, whilst services and defensive sectors like telecoms participated only partially in the strong market, against a backdrop of continued Yen weakness. After a strong few months to close out 2023, Japanese equities continued that momentum to close out March with the Topix Index only 4% shy of its all-time (quarter-end) high seen in December 1989.

Over the course of the second half of the period under review, there was a continued normalizing of the extreme factor preferences noted above, as growth stocks were preferred to value albeit marginally. Mega-caps – having outperformed significantly in the early part of the year – gave way to mid-caps as the market leaders.

Meanwhile, the Yen – the weakness of which had been pronounced for some time – appreciated significantly against major currencies in a move that straddled late July and early August. This was also a period that saw investors endure a period of significant global market volatility in which Japan participated fully, falling twenty percent over three trading days ending Monday 5th August.

## Jupiter Japan Select

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Market Review *(continued)*

The conventional narrative around this slump was that it was a consequence of “the unwind of the Yen carry trade” – that global equity (and other) markets had been propped up by selling short the Yen and that as the Yen strengthened, these positions were covered and the equity positions unwound. The validity of this argument is unclear but what seems indisputable is the increased prevalence and impact of trend-following strategies – CTAs – which have exacerbated panic and euphoria at different times in recent quarters.

In September, there were two macro events that stood above all others in terms of potential market impact. Firstly, the announcement of a raft of economic stimulus measures in China and then the news that Shigeru Ishiba, then serving as the Defence Minister, would succeed Fumio Kishida as the Prime Minister of Japan. The first piece of news – Chinese stimulus – was initially taken well by the market, unsurprising that the country is Japan’s largest trading partner, but the jury is out on whether the medicine will be sufficiently potent given China’s economic malady. The elevation of Ishiba to Prime Minister was taken less well at first. Japanese politicians are notoriously vague in expressing their policy preferences, at least up to the point that they become Prime Minister, so much is unknown about any change in policy direction under an Ishiba cabinet but the man is presumed to be a security hawk and a monetary dove.

#### Performance Review

Through the majority of the period under review, style and size factors had an outsized influence on the portfolio’s relative returns. This effect was especially pronounced during quarter 1 of 2024 when market cap was the dominant factor in market-level returns. The stocks of large capitalization businesses contributed positively, agnostic of sector or theme. Ours is a multi-cap strategy and therefore has higher exposure to mid/small caps than the index, so the market’s strong preference for mega-caps presented a significant headwind. In addition, there was a

broad continuation of the trend from the last couple of years, in which the market has been skewed towards sectors with a heavy value and commodity bias. Meanwhile, the more growth-orientated sector and domestic demand plays have had a much tougher time of it. As a core Japanese equity proposition, the serial underperformance of growth stocks also presented some stylistic challenges for our strategy. As noted above, however, these factors did begin to abate during the second half of the period under review.

At the stock level, Trial was the biggest contributor to outperformance, having been added to the portfolio when it IPO’d in March 2024. We appreciate the company’s positioning, both geographically – in booming Kyushu – and in the market where it operates in the growing discount segment. Analyst commentary has grown increasingly positive on this business, including with a new ‘buy’ initiation from the well-regarded Mizuho retail analyst at the end of August.

Other contributors included enterprise IT company NEC, which benefitted from a number of themes, including more lucrative Japanese government contracts, as well as Sekisui House which saw a favourable reception among analysts for its acquisition of US housebuilder MDC.

Another strong performer was HR tech company Recruit. Much of Recruit’s profits – and investment appeal – come from its leading recruitment platform Indeed, especially in the US where market conditions appear to be worsening. We consider Recruit to be an impressive business but, with near-term risks emerging we took the opportunity to sell out of the position in its entirety. Recruit’s share price momentum has, in our view, left it with little support in the event of an operational deterioration – an eventuality which we think more likely than ever given the softening US jobs market.

Detractors from relative returns included dental equipment maker Nakanishi, which fell sharply upon cutting its full year forecasts in response to weak earnings in a dental chair subsidiary.

## Jupiter Japan Select

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Performance Review *(continued)*

Elsewhere, Rohm, a maker of analogue microchips with a small but growing business in next generation silicon carbide substrates, was hit especially hard as US auto-chip peer ON Semi surprised the market with a cut to profit forecasts. Iriso Electronics, which makes connectors for the auto industry, suffered similarly. Lastly, industrial chip maker Renesas fell after cutting its forecasts despite beneficial currency – the company announced that ‘sell-through’ was weaker than expected, meaning that customers were accumulating inventory, foreshadowing a cut in orders in the rest of the year.

One notable trade during the period under review was the re-establishing of a position in Toyota Motor. The extreme outperformance of the stock – up 46% in quarter 1 of 2024, the biggest quarterly gain in more than forty years – was in our view entirely unjustified and so the subsequent retracement in the share price was to the portfolio’s relative benefit. By the end of quarter 3 2024 the stock had slumped by 34% versus its march peak, putting it upon undemanding valuations and providing a dividend yield of almost 3%. As such, we took the view that further downside was likely limited.

#### Investment Outlook

Global macroeconomic and monetary conditions could be crucial to determining the direction of the Japanese equity market in the coming period. As a well-integrated, industrially focused economy and equity market, Japan has meaningful gearing to global industrial production. The Chinese economy has been in the doldrums for a while, but signs of wider economic weakness are appearing. Key will be whether policymakers are sufficiently proactive in their stimulus to head off a slowdown.

Most pertinent will be the timing and number of interest rate cuts by the US Federal Reserve. Not only will this determine the general level of economic activity in the US and around the world – and thus demand for many global Japanese

businesses – but also stylistic preference within equity markets and the direction of the Dollar versus major currencies including the Yen. As mentioned already, stylistic preference within the Japanese market has been firmly for asset-heavy, low-growth value stocks since 2021 but a reversal in global monetary conditions could change this profoundly. Having recently moved from negative interest rates, it is unlikely that the Bank of Japan will be cutting rates any time soon and so against this monetary stability, looser policy from the Fed could be expected to strengthen the Yen. Both of these could have meaningful implications for the Japanese market.

#### Market Review

Equity markets performed well in the period under review. The principal driver of this performance was the ongoing normalisation of inflation and the view that a more benign environment should allow central banks to begin easing monetary policy. There have been periods of volatility, however, as markets reacted to economic data that at times challenged this view. The European Central Bank lowered its benchmark rate in June by a quarter point, its first reduction in almost five years. The US Federal Reserve followed in September with a half-point cut. European economic activity has been muted, with manufacturing exports in particular impacted by weakness in China. The strong performance of the US Magnificent Seven stocks, led by Nvidia, on expectations for growth in AI and technology, has been a key feature of markets in recent years, but this trend has begun to slow.

#### Policy Review

The fund's holdings are typically, high-quality growth businesses whose earnings are geared to long-term growth trends rather than near-term economic activity. The fund focuses on companies that have sustainable competitive advantages and avoids companies that operate in highly commoditised sectors and business models.

The fund's stock selection in the consumer discretionary, technology and basic materials sectors contributed generated strong relative returns in the 12 months vs the benchmark. The consumer staples,

healthcare and industrials sectors contributed to negative relative returns.

The largest stock contributors during the period included Hemnet, Comet, Nordnet and VZ. The largest detractors included LEM, Carel Industries, Remy Cointreau and Stabilus.

The fund started several new positions during the period including Engcon, a leading manufacturer of accessories that enhance efficiency and flexibility of excavators; and Beijer Ref, a distributor of heating, ventilation and refrigeration products.; Yubico, which provides authentication products to protect users from the increasing threat of cybercrime; and Aixtron, a leader in deposition technology used in the manufacture of semiconductors and LEDs (light-emitting diodes). Also, a new position was started in GTT, which designs and licences membranes for LNG carriers (ships). The fund re-initiated a position in Karnov, after selling following a takeover attempt.

The fund participated in the initial public offering (IPO) for Schott Pharma, which provides packaging products that contain and deliver injectable pharmaceuticals. The fund also bought shares in the IPO for CVC Partners, an alternative asset manager with a strong history of raising new funds.

The fund sold out of its holdings in Puma, Cherry, Eurofins Scientific, doValue, WAG Payments and Interroll.

## Jupiter Pan European Smaller Companies

### Review of Portfolio as at 30 September 2024 *(continued)*

#### Investment Outlook

With the US elections on the horizon and ongoing geopolitical tensions at a heightened level, markets are likely to remain volatile. Softening demand patterns in some industries, as individuals and corporates come to terms with higher finance costs, may result in revenue and margin pressure for many businesses, especially where recent supply constraints have normalised. In such an environment, companies with pricing power and structural demand drivers are likely to fare better.

If, as we expect, interest rates and discount rates continue to fall in the US and Europe, it is likely to be supportive of higher equity valuations, especially for higher quality growth assets. Positioning in the fund will primarily be driven by bottom-up stock selection, which leads to a skew towards quality companies with higher profitability and higher growth characteristics than the index. We are attracted to companies with long-term structural growth drivers and predictable cashflows and will continue to apply our process to analyse and invest in these opportunities

## Notes to the Financial Statements

### 1. General Information

The Jupiter Global Fund (the 'Company') is an open-ended investment company which qualifies as an undertaking for collective investment in transferable securities (UCITS) under part I of the law of 17 December 2010 (as amended) regarding undertakings for collective investment. The Company was incorporated in Luxembourg as a *société d'investissement à capital variable (SICAV)* on 22 September 2005 for an unlimited duration.

The Company may issue multiple classes of Shares in several funds (the 'Funds'). A separate pool of assets and liabilities is maintained for each Fund and is invested in accordance with the investment objective applicable to the relevant Fund. All liabilities attributable to a particular Fund are binding solely upon that Fund.

As at 30 September 2024 the Company was comprised of the following Funds with the following Share Classes in issue:

Fund	Share Class													
Jupiter Dynamic Bond	A	C	D	–	I	–	L	N	–	–	–	–	–	Y

Institutional Only	Retail Only	Either
G, I, U1, U2, U3, U4, X & Y	Z	A, C, D, E, K, L, N, S & T

Full details of Share Class features disclosed in the prospectus.

The Share Class names reflect the specifications of each Class, including their respective (i) categories (A, C, D, E, G, I, K, L, N, S, T, U1, U2, U3, U4, X, Y or Z), (ii) reference currencies, (iii) distribution policies (accumulation or distribution of income) and if the latter case, the frequency thereof, i.e. annually ('A Inc'), quarterly ('Q Inc') or monthly ('M Inc') and (iv) hedging status (Hedged Share Class (HSC) or Portfolio Hedged Share Class (PHSC)).

For example:

- Share Class L EUR A Inc Dist distributes income annually with payment (no automatic reinvestment by default).
- Share Class D USD Acc HSC is a non-distributing hedged Share Class.
- Share Class L GBP Q Inc HSC is a hedged class distributing income quarterly.

For more information please refer to the Key Features section of the prospectus under the sub-heading Share Classes and Features.

## Notes to the Financial Statements

### 2. Summary of Significant Accounting Policies

#### a) Basis of preparation

The financial statements have been prepared in conformity with Luxembourg generally accepted accounting principles applicable to investment funds.

The financial statements have been prepared on a going concern basis, with the exception of Jupiter Global Sustainable Equities (LUX) which closed on 23 October 2024, Jupiter Europe ex UK Equity which closed on 7 November 2024 and Jupiter Global Emerging Markets Corporate Bond and Jupiter Global Emerging Markets Short Duration Bond which closed on 18 November 2024. As a result the financial statements of these funds, have been prepared on a non-going concern basis with assets recorded at net realisable values and liabilities at net settlement amounts, which are deemed to equate to their fair values at 30 September 2024.

#### b) Financial Statements

Financial statements are presented for each Fund in the base currency of the Fund, the combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets of the Company are presented in Euro (EUR), based on the close of business exchange rate ruling on 30 September 2024.

The net asset values have been calculated by reference to the valuation day which might differ from their value on a dealing day. The financial statements presented in this report have been prepared on the basis of the latest calculated net asset values in the year.

The difference between opening Net Assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as a 'Foreign currency translation difference' in the Statement of Operations and Changes in Net Assets.

#### c) Foreign currency translation

Assets and liabilities denominated in currencies other than a Fund's base currency are translated into that base currency at exchange rates ruling at the date of these financial statements. Transactions occurring during the year in currencies other than the base currency are translated at rates of exchange ruling on the transaction dates. Differences arising on translation are included in the Statement of Operations and Changes in Net Assets.

#### d) Investments

Securities are initially recognised at cost, being the fair value of the consideration given.

Securities listed on an official stock exchange or dealt in on any regulated market are valued at the last available price at the company's valuation point.

Open-ended funds and Closed-ended funds are valued at their last available price. Wherever practicable, the last available Net Asset Value is deemed to include the Net Asset Value calculated on the same Valuation day for any underlying fund which itself has a valuation point at or before the Company's Valuation Point being 1pm Luxembourg time.

## Notes to the Financial Statements

### 2. Summary of Significant Accounting Policies *(continued)*

#### d) Investments *(continued)*

In the event that any of the securities held by a Fund on the relevant day are not listed on any stock exchange or dealt in on any regulated market or if, with respect to securities listed on any stock exchange or dealt in on any other regulated market, the basis of the price as determined above is not representative of the fair market value of the relevant securities, the value of such securities will be determined based on the reasonably foreseeable sales price determined prudently and in good faith, as delegated by the Board of Directors of the Company to Jupiter Asset Management International S.A.

Fund	Fund Currency	Number of Fair Valued Assets	Holding	Market Value	% of Net Assets
Jupiter Dynamic Bond	EUR	25	2,217,683,451	33,695,735	0.58
Jupiter Dynamic Bond ESG	EUR	1	7,697	53,024	0.02
Jupiter Financial Innovation	EUR	1	22,943	110,512	0.28
Jupiter India Select	USD	1	50,000	-	-

Gains or losses arising on the disposal of investments are calculated by reference to the first-in-first-out (FIFO) methodology.

All purchases and sales of securities are recognised on the trade date, i.e. the date the Fund commits to purchase or sell the security.

#### e) Contracts for difference

Contracts for difference are valued using the local daily price of the underlying listed equity then converted into the currency of the relevant Fund. The unrealised gain/(loss) on contracts for difference is included in the Statement of Net Assets as 'Unrealised gain on contracts for difference' or 'Unrealised loss on contracts for difference'. Contracts for difference are reset at month end after the Valuation Point.

Dividends on contracts for difference on underlying securities of contracts for difference are included in the Statement of Net Assets in 'Dividends receivable' for long positions and in 'Dividends payable' for short positions. Interest calculated on contracts for difference is included in the Statement of Net Assets in 'Interest receivable' for short positions and in 'Interest payable' for long positions.

#### f) Credit default swap contracts

A credit default swap contracts ('CDS') is a transaction in which two parties enter into an agreement, whereby the buyer pays the seller a periodic payment for the specified life of the agreement. The seller makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event does occur, the seller will then make a payment to the buyer, and the swap contract will terminate.

CDS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/(loss) on credit default swap contracts is included in the Statement of Net Assets as 'Unrealised gain on swap contracts' or 'Unrealised loss on swap contracts'.

The notional amount represents the highest potential liability of a contract and is not shown in the Statement of Net Assets.

## Notes to the Financial Statements

### 2. Summary of Significant Accounting Policies *(continued)*

#### g) Interest Rate Swap Contracts

An interest rate swap contract ('IRS') is a bilateral agreement in which each of the parties agree to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

The unrealised gain/(loss) on interest rate swap contracts is included in the Statement of Net Assets as 'Unrealised gain on swap contracts' or 'Unrealised loss on swap contracts'.

#### h) Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time before maturity.

The value of options which are listed on any official stock exchange or dealt in on any Regulated Market are valued at the last available price at the company's valuation point.

Over-The-Counter ('OTC') options are valued using the Black-Scholes model. Options are valued by reference to the expected future cash flow based on the market implied performance, spot level and the volatility of the underlying asset(s).

The Company may purchase and sell put and call options through regulated exchanges and OTC markets. Options purchased by the Company provide the Company with the opportunity to purchase (call options) or sell (put options) the underlying asset at an agreed-upon value either on or before the expiration of the option. The Company is exposed to credit risk on purchased options only to the extent of their carrying amount, which is their market value.

#### i) Forward currency exchange contracts

The Company may enter into forward currency exchange contracts to hedge against exposures to foreign currency fluctuations. The carrying value of these contracts is the gain or loss that would be realised if the position was closed out on the valuation date, and is included in the Statement of Net Assets as 'Unrealised gain on forward currency exchange contracts' and 'Unrealised loss on forward currency exchange contracts'. Upon the closing of the contract, the gain or loss is recorded in the 'Net realised gain/(loss) on forward currency exchange contracts'.

#### j) Financial future contracts

Regulated financial future contracts are valued at the exchange quoted settlement price. Initial margin deposits are made upon entering into the contracts and can be either in cash or securities. During the year the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by 'marking-to-market' on a daily basis to reflect the market value of the contracts at the end of each business day's trading. The unrealised gain/(loss) on financial future contracts is included in the Statement of Net Assets as 'Unrealised gain on financial future contracts' or 'Unrealised loss on financial future contracts'. Variation margin payments are made or received, depending upon whether losses or gains are incurred. When a contract is closed, the Company records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract.

## Notes to the Financial Statements

### 2. Summary of Significant Accounting Policies *(continued)*

#### k) Income recognition

Bonds may be purchased at a discount or at a premium. Such discount or premium is amortised over the life of the bond using straight line amortisation. Amortisation is recorded as part of interest income included in 'Interest income from investments, net of withholding taxes' in the Statement of Operations and Changes in Net Assets.

Interest income is recognised as the interest accrues unless collectability is in doubt.

Dividend income is recognised when the right to receive the dividend is established.

Income is presented net of withholding taxes in the Statement of Operations and Changes in Net Assets.

#### l) Expense recognition

Expenses are accounted for on an accrual basis. Expenses are charged to the Statement of Operations and Changes in Net Assets except for expenses incurred on the acquisition of an investment which are included within the cost of that investment and expenses arising on the disposal of investments, which are deducted from the disposal proceeds.

#### m) Dividend distributions payable

Dividend distributions payable by the Company are recorded on the ex-date.

#### n) Net Asset Value per Share

The Net Asset Value per Share is calculated by dividing the Net Assets of the relevant Class of Shares in a Fund included in the Statement of Net Assets by the number of Shares of the relevant Class in that Fund in issue at the year end.

#### o) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates.

### 3. Exchange rate

The exchange rate used for the financial statements as at 30 September 2024 is as follows:

Currency	Rate
EUR = 1	
USD	1.11900

## Notes to the Financial Statements

### 4. Investment Management

The Management Company appointed Jupiter Asset Management Limited ('JAML') as Investment Manager to provide certain administrative and management services.

The Investment Management Fee is calculated and accrued per Fund on the basis of the daily Net Asset Value of each Fund and is payable monthly in arrears. The fee rates per annum charged and applicable to each Class of Shares during the year ended 30 September 2024 are as follows:

Fund	A %	C %	D %	E %	G %	I %	K %	L %	N %

<sup>1</sup>This Fund liquidated on 31 May 2024.

## Notes to the Financial Statements

### 4. Investment Management (continued)

Where a Fund invests in other funds managed by the same Investment Manager, the Fund will not be subject to additional management fees. These related management fee reimbursements are included in 'Management fee rebates' in the Statement of Operations and Changes in Net Assets and amounted to EUR 732,897 for the year ended 30 September 2024 as follows:

Fund	Fund Currency	Amount
Jupiter Dynamic Bond	EUR	732,897

Where a Feeder Fund invests in a Master Fund managed by the same Investment Manager, the management fees are charged at the Feeder Fund level only.

None of the Funds are entitled to accrue a performance fee on any of the Classes of Shares.

### 5. Aggregate Operating Fee

To seek to protect the Shareholders from fluctuations in ordinary operating expenses, the Company shall pay to the Management Company a fixed level of fee (the 'Aggregate Operating Fee'), which will be determined as an annual percentage of the Net Asset Value of the Class of Shares for each Fund, and the Management Company will be responsible for paying all of the ordinary fees and expenses out of the Aggregate Operating Fee received by it, including (but not limited to) the following:

- Management Company fees and expenses;
- Depositary, fund accounting, custody, transfer agency and fiduciary fees payable to Citibank Europe plc, Luxembourg Branch. The depositary fee consists of safekeeping, administration and transaction charges;
- Set up costs incurred in connection with the launch of a new Fund;
- Costs of operating special purpose subsidiaries;
- Any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agencies or stock exchanges in the Grand Duchy of Luxembourg and in any other country together with associated support fees;
- Paying agent fees;
- Dividend/income distribution fees;
- Costs of agents employed by the Company, Correspondents and permanent representatives in places of registration;
- Financial and regulatory reporting costs;
- Governmental charges, taxes and duties;
- Costs related to the preparation and filing of tax or other reports in respect of the operations of the Company or its Shareholders;
- Costs related to the preparation and publication of data, literature and shareholder communications, including the costs of preparing, printing and distributing prospectuses, Key Investor Information Documents ('KIIDs'), Key Facts Statements ('KFSs') (for Hong Kong investors), explanatory memoranda, yearical reports or registration statements, and the costs of any reports to Shareholders;
- Directors' remuneration, their insurance coverage and reasonable travelling costs and out-of-pocket expenses in connection with board meetings;
- Legal fees; and
- Audit fees.

Save for the payment of the Aggregate Operating Fee, the Company shall have no obligation with respect to the ordinary operating expenses.

## Notes to the Financial Statements

### 5. Aggregate Operating Fee (continued)

The Aggregate Operating Fee will accrue on a daily basis. The application of the Aggregate Operating Fee against capital or income is fund specific and further details are published in the Company's prospectus which is available at [www.jupiteram.com](http://www.jupiteram.com). The Aggregate Operating Fee is accrued at each calculation of the Net Asset Value and is disclosed in the relevant KIIDs and (for Hong Kong Investors) KFSs from time to time by comprising part of the ongoing charges of a Share Class.

The Aggregate Operating Fee is calculated and accrued per Fund on the basis of the daily Net Asset Value of each Fund at each Valuation Point and is payable monthly. The fee rates per annum charged and applicable to each Class of Shares during the year ended 30 September 2024 are as follows:

Fund	A %	C %	D %	E %	G %	I %	K %	L %	N %
Jupiter Dynamic Bond	0.20	0.18	0.18	–	–	0.14	–	0.20	0.20

<sup>1</sup> This Fund liquidated on 31 May 2024.

Further details of the Aggregate Operating Fee are published in the Company's prospectus which is available at [www.jupiteram.com](http://www.jupiteram.com).

## Notes to the Financial Statements

### 6. Management Company Responsibilities

Jupiter Asset Management International S.A. ('JAMI') is appointed as the Management Company.

The list of the funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company may market the Shares directly to investors and may enter into agreements to appoint distributors to act as intermediaries or nominees for investors subscribing for Shares through their facilities. The Management Company has also entered into a distribution agreement with Jupiter Asset Management Limited.

The Management Company has delegated its investment management functions to Jupiter Asset Management Limited, the Investment Manager.

In the context of its administration functions, the Management Company has delegated its administration functions to Citibank Europe plc, Luxembourg Branch, the Administrator.

In the context of its marketing function, the Management Company may enter into agreements with Distributors pursuant to which the Distributors agree to act as intermediaries or nominees for investors subscribing for Shares through their facilities.

The Management Company will monitor on a continual basis the activities of the delegates. The agreements entered into between the Management Company and the relevant third parties provide that the Management Company can give at any time further instructions to such third parties, and that it can withdraw their mandate with immediate effect if this is in the interest of the Shareholders. The Management Company's liability towards the Company is not affected by the fact that it has delegated certain functions to third parties.

The Company pays to the Management Company the Aggregate Operating Fee and the Management Company will be responsible for paying certain Company costs out of the Aggregate Operating Fee received by it. Refer to Note 5 for further information. Full details are published in the Company's prospectus which is available at [www.jupiteram.com](http://www.jupiteram.com).

### 7. Administration, Custodian and Depositary Fees

Citibank Europe plc, Luxembourg Branch was appointed to perform central administration duties for the Company pursuant to a delegation of such duties to it by the Management Company, and was appointed by the Company Board as the Depositary.

Citibank Europe plc, Luxembourg Branch as Administrator, Custodian and Depositary was entitled to receive custodian fees, fund accounting fees, transfer agency fees and fiduciary fees.

The custodian fee consists of safekeeping, administration and transaction charges. Safekeeping and administration charges are applied to the market value of the assets of the country of the underlying investments held in custody at the end of the billing year. The transaction charges are based on the number of transactions in a particular country. The safekeeping and administration fee rate varies according to the country of the underlying investments and decreases depending on the thresholds in a particular country.

The fund accounting fee is the sum of the base NAV calculation fee plus the total of all other fees, including but not limited to financial reporting, share class valuation, tax reporting and all other fees detailed in the fee schedule agreement.

The transfer agency fee is based on the number of transactions processed, the number of holdings (shareholder accounts), the number of new investor accounts opened and include fund/class set-up and annual maintenance fees, enhanced fund distribution support, platform connectivity fee and out-of-pocket expenses.

## Notes to the Financial Statements

### 7. Administration, Custodian and Depositary Fees *(continued)*

The fiduciary fee per Fund is calculated as the greater of the minimum annual fee or an ad valorem fee based upon the Fund's month-end NAV.

These fees are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

### 8. Auditor Fees and Terms of Engagement

Ernst & Young, *société anonyme* (EY), was appointed by shareholders as the Auditor of the Company at the Annual General Meeting held on 7 February 2024 for the current accounting year. Shareholders also authorised the Board to agree with EY on its terms of appointment which were effective 3 May 2024.

The fees of the Auditor are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

### 9. Other Expenses

There are certain other fees that are payable in addition to the Aggregate Operating Fee and the Investment Management fees.

Each Share Class bears the costs relating to certain transactions such as the costs of buying and selling underlying securities, costs charged by any financial institution or organisation in relation to swap agreements or over-the-counter transactions, bank charges relating to delivery, receipt of securities or to foreign exchange transactions and fees relating to collateral management, transaction costs, interest on bank overdraft and any other extraordinary fees and expenses.

Each Share Class also bears any extraordinary expenses incurred due to external factors, some of which may not be reasonably foreseeable in the normal course of activity of the Company such as, without limitation, any litigation expenses or any tax, levy, duty or similar charge of fiscal nature imposed on the Company or its assets by virtue of a change of laws or regulations.

For so long as the Company and any of the Funds remain authorised by the Securities and Futures Commission ('SFC') in Hong Kong, the Company has undertaken that no marketing or advertising expenses will be paid by the Company. Any marketing and advertising expenses will instead be paid by the Investment Manager.

### 10. Directors' Fees, Expenses and Interests

Mr. Jacques Elvinger is a partner of the Luxembourg law firm of Elvinger Hoss Prussen, *société anonyme*, which provides legal services to the Company.

The Chairman receives fees of EUR 35,500 and each Director receives fees of EUR 30,000 (including taxes) per annum. Mr Simon Rowson is employed by the Investment Manager JAML although the fees due have been waived. In addition, all Directors are entitled to reimbursement by the Company of any expenses directly incurred in the execution of their duties as Directors.

No Director holds any shares in the Company nor has any interest in any transaction which, during the year under review, has been effected by the Company and is unusual in its nature or conditions, or is significant to the business of the Company.

Directors' remuneration, insurance coverage and reasonable expenses directly incurred in the execution of their duties as Directors are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

## Notes to the Financial Statements

### 11. Taxe d'abonnement and Other Operational Taxes

The Company is liable in Luxembourg to a tax (*taxe d'abonnement*), such tax being payable quarterly and calculated on the Net Asset Value of the Company at the end of the relevant calendar quarter. The *taxe d'abonnement* is levied at a rate of 0.01% per annum on Funds or Classes reserved to Institutional Investors (Class G, I, U1, U2, U3, U4, X and Y) and at 0.05% per annum on other Funds or Share Classes (Class A, C, D, E, K, L, N, S, T and Z). No such tax is payable in respect of the portion of the assets of each Fund invested in other Luxembourg collective investment undertakings which are subject to this tax. *Taxe d'abonnement* is included under the Aggregate Operating Fee, refer to Note 5 for further details.

Under current law and practice, the Company is not liable to Luxembourg taxes on income or capital gains, nor are dividends paid by the Company liable to any Luxembourg withholding tax.

Interest, dividends and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

Where the withholding tax in certain jurisdictions has been raised at a rate higher than the rate applicable to comparable domestic UCITS funds, the Company has launched a withholding tax reclaim with the national tax authorities of those countries, with no guarantee of success. If and when those tax reclaims are successful, the proceeds of tax reimbursement are recognised in the Statement of Operations and Changes in Net Assets as 'Dividend income, net of withholding taxes'.

Withholding tax reclaims accrued by the Company during the year ended 30 September 2024 amounted to:

Fund	Fund Currency	Amount
Jupiter Dynamic Bond	EUR	31,691
Jupiter European Growth	EUR	2,269,739
Jupiter Europe ex-UK Equity	EUR	19,688
Jupiter Financial Innovation	EUR	250,049
Jupiter Global Ecology Growth	EUR	9,248
Jupiter Global Equity Growth Unconstrained	USD	5,438
Jupiter Global Sovereign Opportunities	USD	24,282
Jupiter Global Sustainable Equities (LUX)	USD	2,515
Jupiter Global Value	USD	996,437
Jupiter Pan European Smaller Companies	EUR	186,297

### 12. Transactions with Connected Parties

All transactions with connected parties were carried out on an arm's length basis. The Investment Manager and its affiliates, the Directors, Management Company and other related agents of the Company are considered connected parties.

### 13. Use of Dealing Commission

The Investment Manager pays for research services from its own resources and its clients take on no research costs at all.

During the year ended 30 September 2024, no brokerage commission rebates were obtained by the Investment Managers or any of their connected persons and no soft commission arrangements were in place.

## Notes to the Financial Statements

### 14. Swing Pricing

The Funds adopted a partial swing pricing process. Under certain circumstances (for example, large volumes of deals) investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Fund. In order to prevent this effect, the Investment Manager, as delegated by the Board of Directors, has the discretion to allow for the Net Asset Value per Share to be adjusted by effective dealing and other costs and fiscal charges which would be payable on the acquisition or disposal of assets in the relevant Fund if the net capital activity exceeds, as a consequence of the sum of all subscriptions, redemptions or switches in such a Fund, such threshold percentage (the 'Threshold') as may be determined from time to time by the Investment Manager, as delegated by the Board of Directors, of the Fund's total Net Assets on a given Valuation Day.

If the net capital activity on a given Valuation Day leads to a net inflow of assets above the threshold in the relevant Fund, the Net Asset Value used to process all subscriptions, redemptions or switches in such a Fund is adjusted upwards by a swing factor that shall be determined from time to time by the Investment Manager, as delegated by the Board of Directors.

If the net capital activity on a given Valuation Day leads to a net outflow of assets above the threshold in the relevant Fund, the Net Asset Value used to process all subscriptions, redemptions or switches in such a Fund is adjusted downwards by a swing factor that shall be determined from time to time by the Investment Manager, as delegated by the Board of Directors.

A factor is calculated for each Fund based on the prices of the first business day of the month preceding the relevant quarter and the average transaction costs over the previous 12 months.

The swing factor calculation is based on:

- The bid-offer spread of the underlying portfolio of investments;
- The transaction costs;
- Any taxes

The price of each class in each Fund will be calculated separately but any dilution adjustment will affect the price of shares of each class of the relevant Fund identically, up to a maximum of 2%.

The dilution adjustment is recorded as the 'Net Realised Gains/(Losses) on Investments in securities' in the Statement of Operations and Change in Net Assets.

## Notes to the Financial Statements

### 15. Statement of Changes in the Portfolio

A listing of the statement of changes in the portfolio during the year is available upon request to any investor at the registered office of the Company free of charge.

### 16. Transaction Costs

For the year ended 30 September 2024 the applicable Funds incurred transaction costs related to purchase or sale of transferable securities as follows:

Fund	Fund Currency	Amount
Jupiter Financial Innovation	EUR	126,784
Jupiter European Growth	EUR	324,230
Jupiter Japan Select	USD	71,126
Jupiter Global Value	USD	734,063
Jupiter Pan European Smaller Companies	EUR	65,735
Jupiter Global Equity Growth Unconstrained	USD	41,545
Jupiter India Select	USD	1,657,412
Jupiter Europe ex-UK Equity	EUR	12,080
Jupiter Global Ecology Growth	EUR	2,408
Jupiter Global Sustainable Equities (LUX)	USD	475
Jupiter Dynamic Bond	EUR	718,936
Jupiter Global Convertibles*	EUR	2

\*This Fund liquidated on 31 May 2024

The above transaction costs include brokers' fees, depositary's transaction specific fees, stamp duty fees, or security transaction taxes, where applicable. These costs are directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

The transaction costs consisting of brokers' fees, stamp duty fees, or security transaction taxes, where applicable are included in the Statement of Net Assets as 'Investments in securities at cost' and in the Statement of Operations and Changes in Net Assets in 'Net change in unrealised appreciation/(depreciation) on investments' for the purchase of securities. For the sale of securities, they are netted from the 'Due to brokers' amount and from the 'Net realised gain/(loss) on sale of investments' in the Statement of Operations and Changes in Net Assets. Costs related to the acquisition and disposal of fixed income instruments are not separately identifiable from the transaction price.

## Notes to the Financial Statements

### 17. Cross-investments

The value of the cross-investments of the Funds has not been deducted for the calculation of the combined total net assets of the Company.

As at 30 September 2024, the total cross-investments between Funds amounts to EUR 95,370,116

The details of the cross-investments between Funds are disclosed in EUR in the following table:

Investment	Fund Currency	Market Value	% of Net Assets
Jupiter Dynamic Bond	EUR	95,370,116	1.61
Jupiter Dynamic Bond ESG - Class I EUR Acc		61,576,550	1.04
Jupiter Global Sovereign Opportunities - Class I USD Acc		33,793,566	0.57

### 18. Important Events During the Year

Ernst & Young, société anonyme (EY), was appointed by shareholders as the Auditor of the Company at the Annual General Meeting held on 7 February 2024 for the current accounting year. Shareholders also authorised the Board to agree with EY on its terms of appointment which were effective 3 May 2024.

Jupiter Flexible Income closed on 21 October 2022. As at 30 September 2024, there was cash for an amount of EUR 1,850 remaining in the Fund, which is due to the Investors.

Jupiter Global Convertibles closed on 31 May 2024. As at 30 September 2024, there was no cash remaining in the Fund.

### 19. Subsequent Events

Jupiter Global Sustainable Equities (LUX) closed on 23 October 2024.

Jupiter Europe ex UK Equity closed on 7 November 2024.

Jupiter Global Emerging Markets Corporate Bond and Jupiter Global Emerging Markets Short Duration Bond closed on 18 November 2024.

## Additional Information *(not forming part of the Notes to the Financial Statements)* *(unaudited)*

### AIFMD/UCITS V Remuneration Qualitative Disclosures

#### Jupiter Asset Management International S.A. (‘JAMI’)

##### Decision-making process to determine remuneration policies

Under the Jupiter’s Group’s framework ultimate responsibility in remuneration matters is held by the Board of Directors of Jupiter Fund Management Plc. The Board is supported in remunerated-related issues by the Remuneration Committee (“RemCo”).

The Board is responsible for establishing the Group Remuneration Policy, and with support of the RemCo regularly reviewing the Group Remuneration Policy to meet any important regulatory developments and the objectives of the Group.

The RemCo is delegated with the role of supporting the Board in setting remuneration guidelines, establishing share-based remuneration plans, and approving the aggregate variable remuneration expenditure of the Group as well as determining and proposing to the Board the individual total remuneration payable to the members of the Board (other than its chairman) for approval. The RemCo ensures that the Remuneration Policy and practices across the Group operate in line with EU regulations that apply to its regulated entities and delegates.

The RemCo regularly reports to the Board on the status of its activities, the development of the remuneration architecture within the Group as well as on the operational implementation of this Policy. The RemCo consists of at least three members of the Board all of whom are Non-Executive Directors.

Jupiter’s remuneration philosophy is aligned with the Group’s pre-incentive operating profit as well as its tolerance for risk. The Group’s approach provides for remuneration that attracts and retains employees in each local market and motivates them to contribute to the development and growth of its business. The policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

##### Link between pay and performance

As described above, Jupiter operates a Group-wide remuneration policy, which applies to all employees across the Group.

Jupiter ensures that any measurement of performance used to evaluate the quantum of variable remuneration elements or pools of variable remuneration elements:

- includes adjustments for current and future risks, taking into account the cost and quantity of the capital and the liquidity required;
- takes into account the need for consistency with the timing and likelihood of the firm receiving potential future revenues incorporated into current earnings;
- is based on the performance of the Group, the individual and the relevant function / business unit or in the case of a fund manager, the fund(s), where financial and non-financial criteria are considered when assessing individual performance; and
- is set within a multi-year framework to ensure that the assessment process is based on longer term performance and associated risks, and to ensure that payment is spread over an appropriate period.

##### Material Risk Takers

The categories of staff for inclusion as Material Risk Takers for JAMI include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

The Material Risk Takers are identified and reviewed on an annual basis by the relevant entities and the RemCo in line with the criteria set out under EU regulations, namely:

If, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as "Identified Staff". For this purpose, the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance with internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines is considered equivalent in its objectives. The Group's regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the 'equivalence standard' as described.

In line with ESMA Guidelines, proportionality is considered taking into account the following factors:

- The percentage of assets under management;
- Total assets under management; and
- The average ratio between its fixed and variable remuneration paid to staff.

It should be noted that despite use of proportionality, the Group's compensation arrangements involve high levels of deferral, payment in shares and performance adjustment provisions on commercial and risk management grounds.

Further details in relation to the Qualitative disclosures are included in the Group Remuneration Policy.

##### Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance year 2023 in relation to the funds managed by JAMI.

As at 31 December 2023, JAMI had EUR 8,746 million assets under management consisting of 20 funds.

<b>Total annual remuneration paid to all Management Company employees:</b>	<b>1,516,682</b>
Of which fixed:	1,315,036
Of which variable:	201,646
Number of Management Company employees:	10
<b>Total remuneration paid to Identified Staff of the Management Company:</b>	<b>11,868,367</b>
Of which paid to Senior Management:	1,307,428
Of which paid to other Identified Staff:	10,560,939
Number of Identified Staff:	30
<b>Total annual remuneration paid to employees in delegate(s):</b>	<b>13,780,367</b>
Of which fixed:	1,314,954
Of which variable:	12,465,413
Number of beneficiaries:	4

##### Notes

Remuneration for Material Risk Takers includes remuneration paid to employees of other group companies performing senior management functions for the Management Company.

Remuneration for Material Risk Takers includes remuneration paid to employees of other group companies who perform fund management activities on behalf of the Management Company under the terms of a delegation agreement between the Management Company and their employer. In the interests of transparency, the remuneration disclosed for these employees is the total remuneration for activities across all group companies.

In the figures above, fixed remuneration relates to salary and pension benefits and variable remuneration includes the annual bonus including any long-term incentive awards.

These disclosures are in line with Jupiter's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops Jupiter may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other Jupiter fund disclosures in that same year.

Due to the increasing complexity of the business, the information that is needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

Implementation of the remuneration policy for the Group is subject to an annual independent review. No material outcomes or irregularities were identified as a result of the most recent independent review, which took place in 2023.

### PEA Compliance Note

Jupiter Europe ex-UK Equity – French PEA restriction Jupiter Europe ex-UK Equity has been eligible to be held within a French ‘Plan d’Épargne en Actions’ (‘PEA’) since 29 August 2018. The Fund has undertaken, by virtue of the application of article 91, paragraph L of Annex II of the French ‘Code général des impôts’, to ensure that at least 75% of the assets of the Fund are permanently invested in the eligible securities mentioned in paragraphs a, b and c of section 1° of article L.221-31 of the French ‘Code monétaire et financier’.

At all times the Fund was invested in more than 75% of PEA eligible assets. As at the date of this report, the Fund had 85.42% in PEA eligible assets.

### UK Tax Reporting Fund Regime

All Funds are Reporting Funds for UK taxation purposes for the year ended 30 September 2024. Tax reporting information for the year ended 30 September 2024 in respect of these Funds is available at [www.jupiteram.com](http://www.jupiteram.com).

### Securities Financing Transaction Regulation (‘SFTR’)

Currently, none of the Funds of The Jupiter Global Fund make use of the financial instruments to which this regulation pertains. Further details are published in the Company’s prospectus which is available at [www.jupiteram.com](http://www.jupiteram.com).

### Securities Financing Disclosure Regulation (‘SFDR’)

The following Funds meet the definition for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852:

Jupiter Dynamic Bond ESG  
 Jupiter European Growth  
 Jupiter Europe (ex UK) Equity  
 Jupiter Global Emerging Markets Corporate Bond  
 Jupiter Global Emerging Markets Short Duration Bond  
 Jupiter Global Sustainable Equities (LUX)  
 Jupiter Japan Select  
 Jupiter Pan European Smaller

The following Fund meets the definition for financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852:

Jupiter Global Ecology Growth

The following Funds take into account sustainability risks under Article 6, paragraphs 1, 2 and 3, of Regulation (EU) 2019/2088. They do not promote environmental or social characteristics nor contain sustainable investments:

Jupiter Dynamic Bond  
 Jupiter Financial Innovation  
 Jupiter Global Convertibles\*  
 Jupiter Global Equity Growth Unconstrained  
 Jupiter Global High Yield Bond  
 Jupiter Global Sovereign Opportunities  
 Jupiter Global Value  
 Jupiter India Select

The Fund’s minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy, based on currently available data and estimates, is 5%.

\*This Fund liquidated on 31 May 2024

### Risk management disclosures

#### The commitment approach

The following Funds use the commitment approach in order to monitor and measure their global exposure:

Jupiter European Growth  
 Jupiter Europe ex-UK Equity  
 Jupiter Global Ecology Growth  
 Jupiter Global Emerging Markets  
 Short Duration Bond\*  
 Jupiter Global Equity Growth Unconstrained  
 Jupiter Global High Yield Bond\*  
 Jupiter Global Sustainable Equities (LUX)  
 Jupiter Global Value  
 Jupiter India Select  
 Jupiter Japan Select  
 Jupiter Pan European Smaller Companies

#### The VAR approach

The following Funds use the Value-at-Risk ('VaR') approach in order to monitor and measure their global exposure:

The VaR figures have been calculated based on the following input data:

VaR method: Historical simulation  
 Confidence interval: 99%  
 Analysis time horizon: One month (20 days)  
 Time series extension: 2 years  
 Leverage methodology: Sum of Notional (Delta adjusted)

#### Jupiter Dynamic Bond

Methodology: Absolute VaR  
 Limit: 20.00%  
 Benchmark: none  
 The utilisation of VaR from 2 October 2023 to 30 September 2024 was as follows:  
 MIN 3.23%  
 MAX 4.81%  
 Average 4.23%  
 The average leverage used, computed with the sum of the notionals approach for the period noted above, was 140.38%.

#### Jupiter Dynamic Bond ESG

Methodology: Absolute VaR  
 Limit: 20.00%  
 Benchmark: none  
 The utilisation of VaR from 2 October 2023 to 30 September 2024 was as follows:  
 MIN 3.37%  
 MAX 4.86%  
 Average 4.28%  
 The average leverage used, computed with the sum of the notionals approach for the period noted above, was 156.30%.

#### Jupiter Financial Innovation

Methodology: Relative VaR  
 Limit: 200.00%  
 Benchmark: MSCI All Countries World Financials (EUR)  
 The utilisation of VaR from 2 October 2023 to 30 September 2024 was as follows:  
 MIN 101.38%  
 MAX 168.80%  
 Average 135.55%  
 The average leverage used, computed with the sum of the notionals approach for the period noted above, was 23.74%.

#### Jupiter Global Emerging Markets Corporate Bond

Methodology: Relative VaR  
 Limit: 200.00%  
 Benchmark: JPM CEMBI Broad Diversified Total Return Index (USD)  
 The utilisation of VaR from 2 October 2023 to 30 September 2024 was as follows:  
 MIN 104.90%  
 MAX 133.91%  
 Average 117.22%  
 The average leverage used, computed with the sum of the notionals approach for the period noted above, was 5.20%.

\*The global exposure has changed from the commitment approach to the VaR approach as of 24 September 2024.

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles.

With respect to corporate issuers the environmental characteristic was promoted by the Fund through the integration of the Net Zero Investment Framework (NZIF) principles into the investment analysis process alongside a consideration of the material ESG factors relevant to each issuer.

Additionally for corporate issuers the social characteristic of the Fund was promoted by the Fund through seeking compliance with the UN Global Compact Principles. The Investment Manager's investment due diligence process included an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data. Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

For sovereign issuers, the Investment Manager used Jupiter's proprietary Sovereign ESG Framework to assess the alignment of sovereign assets to the environmental and social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

It has been assessed that 51.82% of the investments are on a Net zero pathway according to the stated methodology summarised above and are therefore aligned with the promotion of the environmental characteristic for corporate issuers.

It has been assessed that all of the corporate investments are in compliance with the UNGC principles therefore are aligned with the promotion of the social characteristic.

It has been assessed that 29.65% of the issuers were assessed to be aligned with Jupiter's proprietary Sovereign ESG Framework.

- **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has increased over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF for corporate issuers. The environmental indicator for sovereigns is determined by Jupiter's proprietary sovereign framework.

Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 46.92% of the portfolio was aligned with the environmental characteristic (compared to 51.82% this period) and 100% of eligible securities were aligned with the social characteristic (which did not change this year).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund made included contributing to one or more of the environmentally orientated sustainable Development Goals ("SDGs").

The Fund's sustainable investments contribute to these objectives by passing a minimum threshold of 20% for revenue or capex alignment with the SDGs.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed. In instances where the Investment Manager could not satisfy themselves that the investment was not doing significant harm to a social or environmental objective the investment was not counted towards the Fund's sustainable investment alignment figure.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

Largest Investments	Sector	% of Net Assets	Country
US 5YR NOTE MAR 24	Government	7.84	United States

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

69.64% of the Investments made by the Fund were sustainable investments.

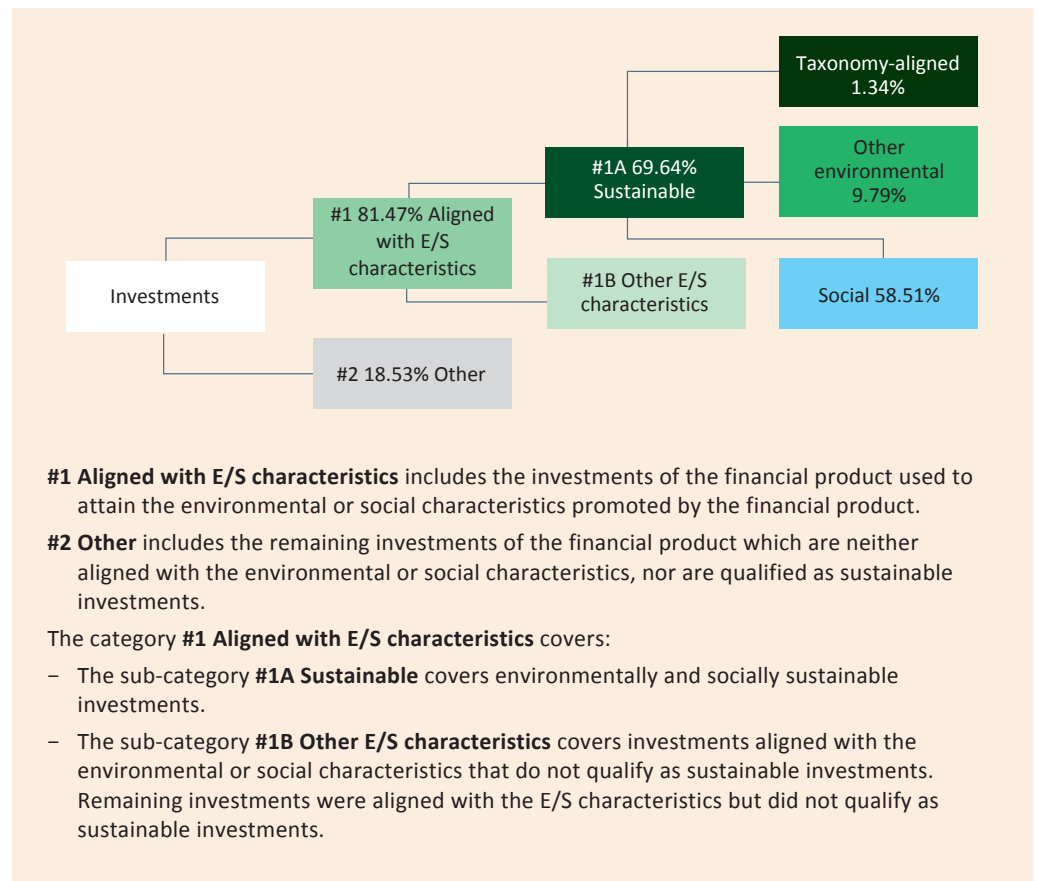

### ● What was the asset allocation?

81.47% of the Fund’s investment portfolio aligned with the environmental and social characteristics promoted by the Fund. The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

In accordance with the Fund’s investment policy, at least 90% of the Fund’s investments in debt securities met the environmental and social characteristics promoted by the Fund or demonstrated sound prospects for improvement in these areas as determined by the Investment Manager.

11.13% of the investments made by the Fund qualified as sustainable investments with an environmental objectives.

58.51% of the investments made by the Fund qualified as sustainable investments with a social objective.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.01%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment for the Fund was improved compared to the previous period. It should be noted that market participants continue to experience fundamental challenges due to the lack of data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

9.79% of the investments made by the Fund were sustainable investments with an environmental objective not aligned with the EU Taxonomy.

 **What was the share of socially sustainable investments?**

58.51% of the investments made by the Fund were socially sustainable.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any that were not aligned to the ESG characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance for corporates and considered the investments against UNGC principles. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the promotion of the target characteristics.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures. Engagements relating to social factors were also undertaken during the period as required and as determined by the engagement priorities either on a top down basis or from the double materiality templates which summaries the key considerations for the corporate issuer(s) in question.

During the reference period, the Investment Manager was reassured to see that several of the companies who had been engaged on the topic of PAI reporting including Newday had begun improving their PAI reporting.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: **The Jupiter Global Fund – Jupiter European Growth**

Legal entity identifier: **549300G82NGMSULN1N18**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 94.96% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has remained stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 93.50% of the portfolio was aligned with the environmental characteristic (compared to 94.96% this period) and 98.89% of eligible securities were aligned with the social characteristic (compared to 100% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
RELX PLC	Professional Services	6.74	Netherlands
NOVO NORDISK CLASS B	Pharmaceuticals	6.45	Denmark
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	5.54	Netherlands
WOLTERS KLUWER NV	Professional Services	4.90	Netherlands
AMADEUS IT GROUP SA	Hotels, Restaurants & Leisure	4.43	Spain
LVMH	Textiles, Apparel & Luxury Goods	4.22	France
EDENRED	Financial Services	3.86	France
SCHNEIDER ELECTRIC	Electrical Equipment	3.21	France
FINECOBANK BANCA FINECO	Banks	3.15	Italy
DASSAULT SYSTEMES	Software	3.02	France
IMCD NV	Trading Companies & Distributors	2.71	Netherlands
LAIR LIQUIDE SOCIETE ANONYME POUR	Chemicals	2.66	France
LOREAL SA	Personal Care Products	2.61	France
ATLAS COPCO CLASS A	Machinery	2.55	Sweden
PARTNERS GROUP HOLDING AG	Capital Markets	2.22	Switzerland

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

94.96% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.01%. The share of investments made in enabling activities was 0.95%.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the Fund has remained broadly in line with the EU Taxonomy alignment of the Fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

### What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: **The Jupiter Global Fund – Jupiter Europe (ex UK) Equity**

Legal entity identifier: **549300HIYYQPEBC2AP33**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 93.53% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has remained stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 93.56% of the portfolio was aligned with the environmental characteristic (compared to 93.53% this period) and 98.27% of eligible securities were aligned with the social characteristic (compared to 100% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

## What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
RELX PLC	Professional Services	7.19	Netherlands
NOVO NORDISK CLASS B	Pharmaceuticals	6.70	Denmark
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	5.58	Netherlands

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

### ● What was the asset allocation?

93.53% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.01%. The share of investments made in enabling activities was 0.82%.

### ● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the Fund has remained broadly in line with the EU Taxonomy alignment of the Fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable Investments.

### **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable Investments.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Legal entity identifier: **549300V3LYPNUUPMLR43**

## Sustainable investment objective

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

**X Yes**

It made **sustainable investments with an environmental objective: 96%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:  %**

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to generate long-term capital appreciation and income investing primarily in global equity securities that focus on making a positive impact towards environmental and sustainable objectives.

In order to achieve the Fund's sustainable investment objective, the Investment Manager targeted companies that contribute to the Fund's sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or relevant UN Sustainable Development Goals (SDG).

#### Targeting companies contributing to the Fund's Sustainable solution themes

The Investment Manager identified global environmental and sustainability challenges, which included amongst other challenges climate change mitigation and adaptation, natural capital preservation and biodiversity restoration.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager selected investments issued by companies which it considered to be addressing these challenges by having at a minimum 20% revenue attributable to any of the sustainable solution themes below.

- Clean energy;
- Green mobility;
- Green buildings and industry;
- Sustainable agriculture and land ecosystems;
- Sustainable oceans and freshwater systems; and
- Circular economy.

The Fund's sustainable solution themes are closely aligned to the six environmental objectives of the EU Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems. As such, to the extent that data is both reliable and available, the EU Taxonomy provided the principal framework for assessing the environmental sustainability of economic activities.

Furthermore, the Fund's sustainable solution themes are closely aligned to relevant UN SDGs.

### ● How did the sustainability indicators perform?

The Investment Manager uses a revenue test to determine whether a company is substantially focused on activities generating or enabling positive outcomes against one or more of the Fund's sustainable solution themes.

At a minimum, at least 20% of a company's revenue must be attributable to such activities.

During the reporting period, 100% of the Fund's investments (excluding cash and instruments held for liquidity and hedging purposes) were issued by companies considered by the Investment Manager to have at least 20% of their revenue attributable to such activities.

### ● ...and compared to previous periods?

The overall strong alignment of the Fund with its sustainable investment objective was maintained over the period due to strong performance of the underlying sustainability indicators.

The Fund maintained its 100% alignment of the investments it held (except for cash and instruments used for liquidity and hedging purposes) that were issued by companies that the Investment Manager deemed to have at least 20% of their revenue related to the Fund's sustainable solution themes during the period.

No changes noted to the prior year.

### ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed.

#### ● How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

#### ● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
WASTE CONNECTIONS INC	Commercial Services & Supplies	3.22	Canada
REPUBLIC SERVICES INC	Commercial Services & Supplies	3.21	United States
PRYSMIAN	Electrical Equipment	3.19	Italy
SCHNEIDER ELECTRIC	Electrical Equipment	3.08	France
CLEAN HARBORS INC	Commercial Services & Supplies	3.04	United States
VEOLIA ENVIRON. SA	Multi-Utilities	3.03	France
LINDE PLC	Chemicals	2.91	United Kingdom
XYLEM INC	Machinery	2.91	United States
NOVOZYMES CLASS B	Chemicals	2.89	Denmark
ACUITY BRANDS INC	Electrical Equipment	2.86	United States
VESTAS WIND SYSTEMS	Electrical Equipment	2.84	Denmark
INFINEON TECHNOLOGIES AG	Semiconductors & Semiconductor Equipment	2.80	Germany
STANTEC INC	Construction & Engineering	2.67	Canada
BORREGAARD	Chemicals	2.66	Norway
ADVANCED DRAINAGE SYSTEMS INC	Building Products	2.59	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

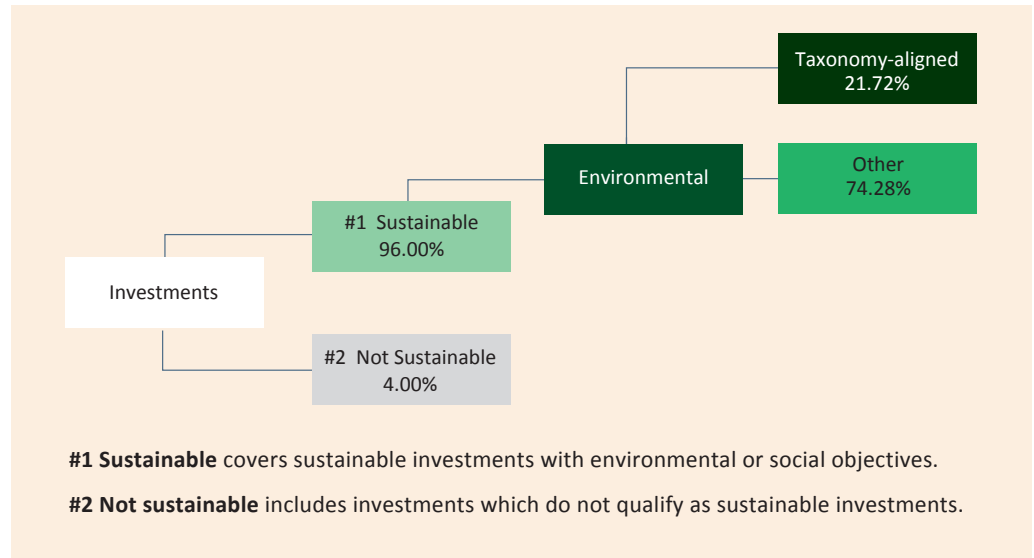

## What was the proportion of sustainability-related investments?

96.00% of the Fund's Investment portfolio were sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

96.00% of the Fund’s Investment portfolio were sustainable investments. These sustainable investments include investments that contributed to the Fund’s sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or a relevant objective as outlined in the UN SDGs and qualify as sustainable investments under SFDR article 2(17). The remaining portion of the Fund’s investment portfolio (“#2 Not sustainable”) consisted of deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflecting the share revenue of from green activities of investee companies

**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

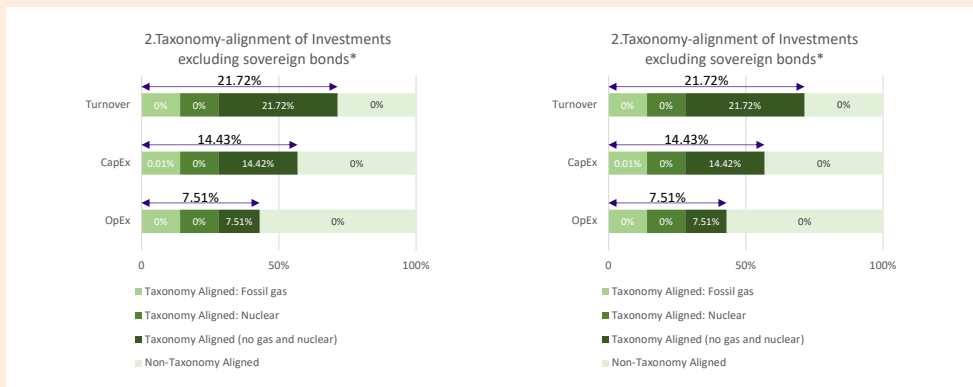

**operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As set out in the graphs below 21.72% of the Fund’s investments were aligned with the EU Taxonomy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### ● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 16.26%.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

74.28% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

Not applicable

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, the Fund also made investments for hedging and liquidity purposes to achieve its investment objective.

All investments made by the Fund were determined to have satisfied minimum environmental and social safeguards.

### What actions have been taken to attain the sustainable investment objective during the reference period?

All sustainable investments made by the Fund during the investment period were subject to a due-diligence process in order to evaluate the contribution of a proposed sustainable investment to the sustainable investment objective. The Investment Manager ensured that all investments are sustainable. To achieve this, all investments underwent a proprietary sustainability rationale analysis in the form of a green revenue attribution to the strategy's six environmental themes. In addition, do no significant harm assessments for all investments were completed. To achieve this, the assessments referenced third party data providers, controversy searches, and/ or analysis of PAIs according to internal methodology. Finally, all investments were evaluated for good governance practices.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Product name: **The Jupiter Global Fund – Jupiter Global Emerging Markets Corporate Bond**

Legal entity identifier: **5493001M5L8O36MCQF62**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 50.29% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 99.50% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The decline in the alignment of the Fund’s environmental and social characteristics reflects the portfolio repositioning as it approached closure but remained above the minimum level required.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

Despite the overall decline, outlined above, we are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 58.73% of the portfolio was aligned with the environmental characteristic (compared to 50.29% this period) and 88.30% of eligible securities were aligned with the social characteristic (compared to 99.50% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

## What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
AEGEA FINANCE SARL	Multi-Utilities	1.07	Brazil
US 2YR NOTE DEC 23	Government	1.05	United States
ALFA DESARROLLO SPA	Electric Utilities	0.97	Chile
C&W SENIOR FINANCING DESIGNATED AC RegS	Diversified Telecommunication Services	0.96	Panama
MINERVA LUXEMBOURG SA RegS	Food Products	0.96	Brazil
ACU PETROLEO LUXEMBOURG SARL	Energy	0.90	Brazil
HUNT OIL COMPANY OF PERU LLC (LIMA RegS)	Oil, Gas & Consumable Fuels	0.89	Peru
OCP SA RegS	Industrial Conglomerates	0.89	Morocco
ENERGO PRO AS	Electric Utilities	0.88	Czech Republic
NK KAZMUNAYGAZ AO	Oil, Gas & Consumable Fuels	0.87	Kazakhstan
EIG PEARL HOLDINGS SARL	Energy Pipelines	0.87	United States
HDFC BANK LTD	Banks	0.86	India

CA MAGNUM HOLDINGS	Technology	0.84	Mauritius
SK HYNIX INC RegS	Semiconductors & Semiconductor Equipment	0.82	South Korea

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

### ● What was the asset allocation?

49.19% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### ● In which economic sectors were the investments made?

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.56%.

### ● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the Fund has remained broadly in line with the EU Taxonomy alignment of the Fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable Investments.

### **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make socially sustainable Investments.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: **The Jupiter Global Fund - Jupiter Global Emerging Markets Short Duration Bond**

Legal entity identifier: **549300YMC3QIZG6G7188**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics").

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company's status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF's material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager's investment due diligence process included an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 42.87% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 99.40% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The decline in the alignment of the Fund’s environmental and social characteristics reflects the portfolio repositioning as it approached closure but remained above the minimum level required.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

Despite the overall decline, outlined above, we are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 49.87% of the portfolio was aligned with the environmental characteristic (compared to 42.87% this period) and 82.95% of eligible securities were aligned with the social characteristic (compared to 99.40% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
ELECTRICIDAD FIRME DE MEXICO HOLDI	Electric Utilities	1.26	Mexico
BOS FUNDING LTD	Banks	1.24	United Arab Emirates
NBK TIER 1 LTD	Banks	1.23	United Arab Emirates
PROSUS NV	Communications	1.22	South Africa

LAMAR FUNDING LTD RegS	Utilities	1.04	Oman
CA MAGNUM HOLDINGS	Technology	1.04	Mauritius
HDFC BANK LTD	Banks	1.04	India

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

42.78% of the Fund’s investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### ● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.13%.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The overall EU Taxonomy alignment of the Fund was lower than the EU Taxonomy alignment of the Fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

### What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: **The Jupiter Global Fund – Jupiter Global Sustainable Equities (LUX)**

Legal entity identifier: **549300XSH7WR438DFL44**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.83% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

#### Environmental Characteristic

In order to promote the Fund's environmental characteristic of the transition to a low carbon economy, the Investment Manager targeted issuers that contribute to the sustainability frameworks set out below.

#### 1) The temperature goals of the Paris Agreement

The Fund targeted issuers that were determined to be aligned on aggregate with the delivery of the Paris agreement. Further details on the Paris alignment issuer assessment can be found in the Fund's Annual Sustainability report.

#### 2) The United Nations Sustainable Development Goals (UN SDGs)

The Fund targeted issuers that were assessed to be in alignment with the delivery of the environmentally orientated SDGs.

The assessment of an issuer's alignment with the SDG amongst other things incorporated a review of the most significant contributions of the Issuer's products and service to the delivery of the UN SDGs.

The Investment Manager also placed significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### **Social Characteristic**

In order to promote the Fund's social characteristic, the Investment Manager targeted issuers that contribute to the sustainability frameworks set out below.

#### **1) The United Nations Sustainable Development Goals (UN SDGs)**

The Fund targeted issuers that were assessed to be in alignment with the delivery of the socially orientated SDGs.

The assessment of an issuer's alignment with the SDGs amongst other things incorporated a review of the most significant contributions of the Issuer's products and services to the delivery of the socially oriented UN SDGs.

The Investment Manager also placed significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

#### **2) Compliance with the UN Global Compact Principles**

The Fund targeted issuers that were assessed to be in alignment with the UN Global Compact Principles. The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of issuer's compliance with the UN Global Compact Principles using third party ESG risk data.

## ● **How did the sustainability indicators perform?**

The environmental and social characteristics promoted by the financial product are:

- (i) the transition to a low carbon economy; and
- (ii) alignment with the United Nations Sustainable Development Goals and the United Nations Global Compact Principles.

93.69% of the financial product's assets have been assessed as aligning with the environmental and social characteristics.

### **Environmental characteristics**

The Fund seeks to promote the transition to a low carbon economy by seeking to align with the sustainability frameworks set out below:

#### **1) The temperature goals of the Paris Agreement**

The Fund seeks to promote the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts of the Paris Agreement. For the purposes of SFDR, a company's alignment with a low carbon world is determined by assessing the compatibility of its historic and future scope 1 and 2 carbon emissions and emissions intensity with widely recognised Paris-aligned targets and science-based low carbon trajectories. On this basis, 79.29% of the financial product's assets were assessed as being aligned with the trajectory required to reach the temperature goals of the Paris Agreement.

The investment team assesses a company's full alignment with the delivery of the Paris Agreement using additional measures and analyses, as reported on more fully to clients in the Annual Sustainability Report. This includes an opportunity to invest in companies with an environmental benefit through products and services that can help others to decarbonise. However, given challenges in data availability on a global basis and complexity of assessment these do not form part of this sustainability indicator for the purposes of SFDR.

#### **2) The United Nations Sustainable Development Goals (UN SDGs)**

The Fund seeks to promote the delivery of the UN SDGs. A company's alignment with the UN SDGs considers the most significant contributions its products and services make aligned with specific targets under the UN SDG framework. To do this, a company's revenue streams are ascribed to the key contributions from its products and services, which are then aggregated up to a portfolio level according to the weighting of the investment.

The SDGs considered for revenue alignment with promoting environmental characteristics are:

6. Clean water and sanitation
7. Affordable and clean energy
9. Industry, innovation and infrastructure
11. Sustainable cities and communities
12. Responsible consumption and production
13. Climate action
14. Life below water
15. Life on land

On this basis, 30.05% of the portfolio's assets were assessed as being aligned with contributing to delivering SDGs related to environmental goals.

The Investment Manager also places significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

#### **Social characteristics**

The social characteristic promoted by the Fund is assessed through seeking: (i) alignment with the UN SDGs; and (ii) compliance with the UN Global Compact Principles ("UNGC").

##### **1) The United Nations Sustainable Development Goals (UN SDGs)**

The Fund seeks to promote the delivery of the UN SDGs. A company's alignment with the UN SDGs considers the most significant contributions its products and services make aligned with specific targets under the UN SDG framework. To do this, a company's revenue streams are ascribed to the key contributions from its products and services, which are then aggregated up to a portfolio level according to the weighting of the investment.

The SDGs considered for revenue alignment with promoting social characteristics are:

1. No poverty
2. Zero hunger
3. Good health and well-being
4. Quality education
5. Gender equality
8. Decent work and economic growth
10. Reduced inequalities
16. Peace, justice and strong institutions

On this basis, 33.93% of the portfolio's assets were assessed as being aligned with contributing to delivering SDGs related to social goals.

The Investment Manager also places significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

##### **2) The United Nations Global Compact (UNGC)**

The United Nations Global Compact (UNGC) is a voluntary initiative comprising ten fundamental principles of responsible business behaviour and corporate citizenship. These principles fall into four categories: human rights, labour rights, the environment and anti-corruption. The investment team will not invest in companies that, in its opinion, violate the UNGC. There were no violations of the UN Global Compact during the reference period.

The Fund does not use financial derivative instruments specifically for the purpose of attaining the environmental and/ or social characteristics it promotes.

#### **● ...and compared to previous periods?**

The decline in the alignment of the Fund's environmental and social characteristics reflects the portfolio repositioning as it approached closure but remained above the minimum level required.

In the previous reference period, 98.58% of the portfolio was aligned with the environmental and social characteristics (compared to 93.69% this period).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially makes include contributing to the delivery of one or more of the Sustainable Development Goals (“SDGs”)

The Fund’s sustainable investments contribute to these objectives by passing a minimum threshold for revenue alignment with the SDGs. This ensures that for an investment to be deemed sustainable, a minimum level of contribution must be attained by selling products and services aligned with delivering solutions to significant environmental and societal challenges. This minimum level of contribution is 20% of revenues for the purposes of the calculation of this metric for SFDR.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the “DNSH test”).

As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager’s DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed.

In instances where the Investment Manager could not satisfy themselves that the investment was not doing significant harm to a social or environmental objective the investment was not counted towards the Fund’s sustainable investment alignment figure.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager’s DNSH test and were evaluated on a qualitative and quantitative basis.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager’s investment due diligence process includes an initial evaluation and ongoing monitoring of companies’ alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

## What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

Largest Investments	Sector	% of Net Assets	Country
VISA INC CLASS A	Financial Services	5.14	United States
AGILENT TECHNOLOGIES INC	Life Sciences Tools & Services	4.98	United States
ACCENTURE PLC CLASS A	IT Services	4.77	United States
DANAHER CORP	Life Sciences Tools & Services	4.72	United States
CHUBB LTD	Insurance	4.02	United States
TEXAS INSTRUMENT INC	Semiconductors & Semiconductor Equipment	3.89	United States
SHERWIN WILLIAMS	Chemicals	3.82	United States
PARTNERS GROUP HOLDING AG	Capital Markets	3.82	Switzerland
METTLER TOLEDO INC	Life Sciences Tools & Services	3.66	United States
COCHLEAR LTD	Health Care Equipment & Supplies	3.63	Australia
CSL LTD	Biotechnology	3.52	Australia
JACK HENRY AND ASSOCIATES INC	Financial Services	3.27	United States
AUTOMATIC DATA PROCESSING INC	Professional Services	3.26	United States
UNILEVER PLC	Personal Care Products	3.24	United Kingdom
ECOLAB INC	Chemicals	3.24	United States

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

74.83% of the Investments made by the Fund were sustainable investments.

### ● What was the asset allocation?

93.69% of the Fund's investment portfolio aligned with the environmental and social characteristics promoted by the Fund. The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

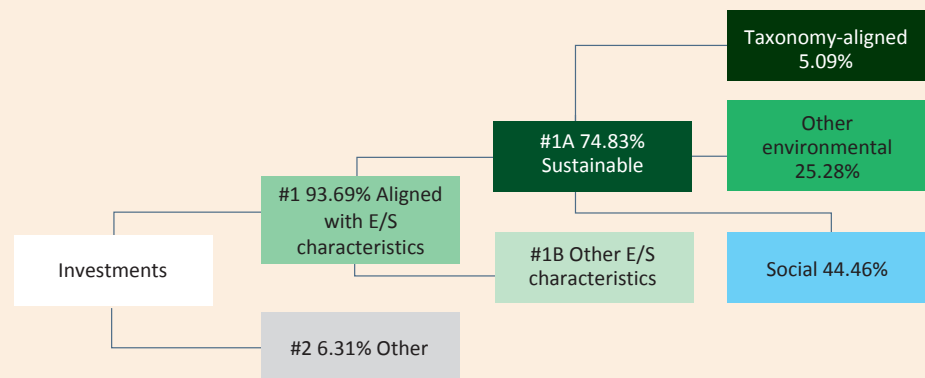

30.37% of the investments made by the Fund qualified as sustainable investments with an environmental objective.

44.46% of the investments made by the Fund qualified as sustainable investments with a social objective.

Please note in total, 77.86% of the financial product's assets made 20% or more revenues from products or services aligned with delivering the SDGs.

43.71% of the assets made 20% or more revenues from products or services aligned with delivering environment-related SDGs and 46.63% of the assets made 20% or more revenues from products or services aligned with delivering social-related SDGs.

The sum of the allocation to environment- and social- related SDGs is greater than the total alignment because several companies are deemed to make 20% or more revenues from products and services that address both environmental and social SDGs.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments. Remaining investments were aligned with the E/S characteristics but did not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### ● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 2.52%.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The reported percentage alignment to the EU taxonomy has increased over the period, mainly due to improved company reporting on relevant metrics and broader coverage by external data providers.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.28% of the investments made by the Fund were sustainable investments with an environmental objective not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

44.46% of the investments made by the Fund were socially sustainable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The primary method of meeting the environmental and social characteristics for the financial product is through aligning its investments with the delivery of three key frameworks; the temperature goals of the Paris Agreement, the SDGs and the UNGC.

As has been described earlier, the investment team will engage with a company should news flow or other information suggest there is a risk that it is involved in a controversy or in violation of an UNGC. Where the investment team sees opportunities for portfolio holdings to improve their performance on environmental and social matters they will engage to promote change. In many cases this relates to disclosure, where a company could benefit from providing additional insights into how it approaches managing specific ESG and sustainability risks and opportunities. In other cases it will relate to practices; for example, over the year the team has engaged with a portfolio company on its approach to minimum wages. In another instance it has engaged with a company on its approach to incorporating natural capital costs into its budgeting and planning. However, this is not the basis on which the investment team assesses whether the characteristics have been met or whether the characteristics are likely to be met for the purposes of determining the appropriateness of an investment within a sustainable investment framework.

## How did this financial product perform compared to the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

## ANNEX IV

### Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter Japan Select**

Legal entity identifier: **5493002R7V1ID61TTW30**

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of  % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 85.99% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics has remained stable over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 86.68% of the portfolio was aligned with the environmental characteristic (compared to 85.99% this period) and 97.67% of eligible securities were aligned with the social characteristic (compared to 100% this period).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

## What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
SUMITOMO MITSUI FINANCIAL GROUP IN	Banks	7.77	Japan
TOKIO MARINE HOLDINGS INC	Insurance	5.27	Japan
SONY GROUP CORP	Household Durables	5.10	Japan
ORIX CORP	Financial Services	4.70	Japan
SHIN ETSU CHEMICAL LTD	Chemicals	4.63	Japan
SOFTBANK CORP	Wireless Telecommunication Services	4.22	Japan
SEKISUI HOUSE LTD	Household Durables	4.07	Japan
BRIDGESTONE CORP	Automobile Components	3.91	Japan
KDDI CORP	Wireless Telecommunication Services	3.83	Japan
RECRUIT HOLDINGS LTD	Professional Services	3.70	Japan
NEC CORP	IT Services	3.49	Japan
ASAHI KASEI CORP	Chemicals	3.13	Japan
HAZAMA ANDO CORP	Construction & Engineering	2.78	Japan
ROLAND CORP	Leisure Products	2.63	Japan
MINEBEA MITSUMI INC	Machinery	2.61	Japan

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

### ● What was the asset allocation?

85.99% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 4.88%.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the Fund has remained broadly in line with the EU Taxonomy alignment of the Fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

### What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## ANNEX IV

### Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter Pan European Smaller Companies**

Legal entity identifier: **549300TP2JH99U8Z1N86**

## Environmental and/or social characteristics

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**  %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 45.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

In addition to the above, from 24th September 2024, the Fund also committed to ensure a minimum proportion of 20% of investments qualifying as sustainable investment under SFDR Article (17).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

It has been assessed that 71.70% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 100.00% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

- **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has grown over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

In the previous reference period, 64.40% of the portfolio was aligned with the environmental characteristic (compared to 71.70% this period) and 98.60% of eligible securities were aligned with the social characteristic (compared to 100.00% this period).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund made included contributing to the delivery of one or more of the Sustainable Development Goals ("SDGs").

The Fund's sustainable investments contribute to these objectives by passing a minimum threshold of 20% of revenue or capex alignment with the SDGs.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed. In instances where the Investment Manager could not satisfy themselves that the investment was not doing significant harm to a social or environmental objective the investment was not counted towards the Fund's sustainable investment alignment figure.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2023 - 30 September 2024.

Largest Investments	Sector	% of Net Assets	Country
ELIS SA	Commercial Services & Supplies	3.59	France
COMET HOLDING AG	Electronic Equipment, Instruments & Components	3.58	Switzerland
FINCOBANK BANCA FINECO	Banks	3.32	Italy
AZELIS GROUP NV	Trading Companies & Distributors	3.02	Belgium
TECAN GROUP AG	Life Sciences Tools & Services	3.02	Switzerland
WEIR GROUP PLC	Machinery	2.98	United Kingdom
VZ HOLDING AG	Capital Markets	2.98	Switzerland
HEMNET GROUP	Interactive Media & Services	2.95	Sweden
ROTORK PLC	Machinery	2.62	United Kingdom
IMCD NV	Trading Companies & Distributors	2.59	Netherlands
VAT GROUP AG	Machinery	2.43	Switzerland
TRYG	Insurance	2.30	Denmark
CAREL	Electronic Equipment, Instruments & Components	2.30	Italy
MARR	Consumer Staples Distribution & Retail	2.25	Italy
REPLY	IT Services	2.22	Italy

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

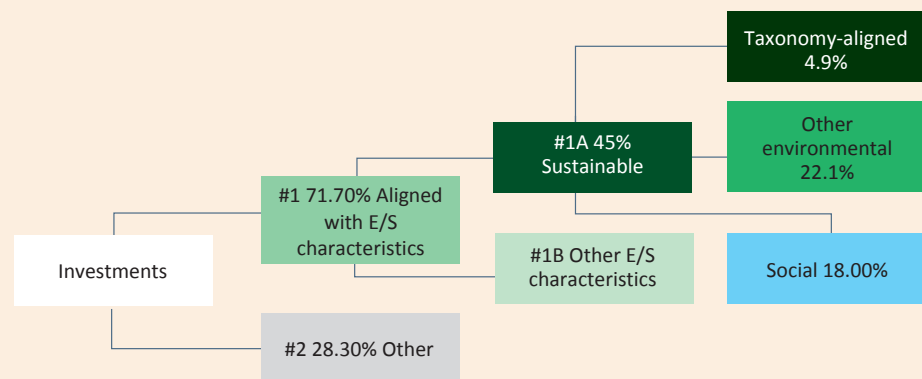

### ● What was the asset allocation?

71.70% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

27.00% of the investments made by the Fund qualified as sustainable investments with an environmental objective.

18.00% of the investments made by the Fund qualified as sustainable investments with a social objective.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

**turnover** reflects the “greenness” of investee companies today.

**capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

**operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

**Yes:**  In fossil gas  In nuclear energy

**No**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### ● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 4.68%.

### ● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment for the Fund was improved compared to the previous period. It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

27.00% of the investments made by the Fund were sustainable investments with an environmental objective not aligned with the EU Taxonomy.

### **What was the share of socially sustainable investments?**

18.00% of the investments made by the Fund were socially sustainable.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

## How did this financial product perform compared to the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

### ● How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Notice of Annual General Meeting of Shareholders of The Jupiter Global Fund

Luxembourg, January 15 2025

Dear Shareholders,

Notice is hereby given that the **Annual General Meeting** (the "Meeting") of **The Jupiter Global Fund** (the "Company") will be held on **Wednesday February 26, 2025 at 11.00 a.m. CET**.

### AGENDA

1. Approval of the audited annual accounts of the Company for the financial year ended September 30, 2024 (the "Audited Annual Accounts").
2. Discharge of the Directors of the Company for the performance of their duties carried out for the financial year ended September 30, 2024.
3. Re-appointment of Mr Garth Lorimer Turner, Me Jacques Elvinger, Mrs Paula Moore, Mr Revel Wood and Mr Simon Rowson as Directors of the Company until the next Annual General Meeting of Shareholders of the Company that will consider the approval of the audited annual accounts for the financial year ending on September 30, 2025.
4. Appointment of Ernst & Young SA ("EY") as the approved statutory auditor of the Company until the next Annual General Meeting of Shareholders of the Company that will consider the approval of the audited annual accounts for the financial year ending September 30, 2025 and authorization to the Board of Directors of the Fund to agree on the terms of EY's appointment.
5. Approval of Directors' Fees for the period October 1, 2024 to September 30, 2025, prior to any waiver applied to the fees, as described in the Company's Audited Annual Accounts.

### VOTING

Resolutions on the agenda of the Annual General Meeting will require no quorum and the resolutions will be passed by simple majority of the votes cast at the Meeting.

### VOTING ARRANGEMENTS

We would be grateful if you could sign the proxy form where indicated, return a copy by fax or email to arrive no later than 5.00 p.m. CET on Monday February 24, 2025 marked for the attention of Ms Edita Demirovic (fax +352 45 14 14 439, email: FCSLux@citi.com) and send the signed original by post marked for the attention of:

Ms Edita Demirovic,  
Citibank Europe plc, Luxembourg Branch,  
31, Z.A. Bourmicht,  
L-8070 Bertrange,  
Grand-Duchy of Luxembourg.

Terms not defined in this notice have the same meaning as in the Company's prospectus.

The proxy will remain in force if the Meeting, for whatever reason, is postponed or reconvened.

Should you have any questions regarding the above, please do not hesitate to contact Ms Edita Demirovic on + 352 45 14 14 425.

**By order of the Board of Directors**

**THE JUPITER GLOBAL FUND** Société d'Investissement à Capital Variable
