What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective Active Emerging Credit Sub-Fund will invest in bonds issued by private or public issuers domiciled in or deriving a significant part of their revenues from emerging market countries (including frontier market countries), including bonds issued by treasuries and/or government agencies of such countries. It may also invest up to 10% of its net assets in China.

Investment policies The Sub-Fund may invest in bonds issued by supranational organisations (such as EBRD or World Bank or the EIB) either denominated in a major currency (such as EUR, US\$ or Yen) or in local currency.

Under the risk-diversification principle, the Active Emerging Credit Sub-Fund will also invest in various types of transferable securities such as fixed and floating rate bonds, indexed bonds (i.e. bonds the performance of which is linked to an index of transferable securities), in time deposits and money market instruments, and subordinated bonds and up to 25% of its net assets in convertible and cum warrants bonds (to the extent that such warrants are on transferable securities).

The Sub-Fund will invest up to 10% of its assets in UCITS and/or other UCIs (including money market funds). It may also invest up to 10% of its net assets in listed equities, equity-related securities and related derivatives worldwide. Such limit for derivatives is only applicable to equity and equity related securities.

In addition it may also invest up to 10% of its net assets in contingent convertibles ("CoCos"), may invest up to 10% of its net assets in structured products and up to 10% of its net assets in eligible assets with underlying commodities, such as but not limited thereto physically-backed exchange traded notes, physically backed exchange traded commodity.

Ancillary liquid assets (i.e. bank deposits at sight) will be limited to 20% of the Sub-Fund's net assets.

Up to 100% of the Active Emerging Credit Sub-Fund's net assets may be invested in short-term negotiable debt securities, money market instruments, time deposits and/or money market funds, under very specific market conditions such as the 2008 Lehman Brothers bankruptcy, understanding these investments will comply with all

applicable investment restrictions in terms of eligibility and legal and/or specific risk diversification.

The Sub-Fund may also use, for the purpose of investments, efficient portfolio management and proxy hedging, techniques and instruments.

For full investment objectives and policy details please refer to the Prospectus and the Prospectus Supplement.

Benchmark The Sub-Fund is actively managed without reference to any benchmark.

Redemption and Dealing Investors may purchase or sell shares of the Sub-Fund on any business day in Luxembourg.

Distribution Policy Any income generated by the Sub-Fund is reinvested to grow the value of the shares.

Launch date The Sub-Fund was launched on 28/02/2003 and the share class was launched on 13/02/2008.

Fund Currency The base currency of the Sub-Fund is EUR.

Conversion of units/shares Shareholders are allowed to request the conversion of all or part of their shares into shares of another class/sub-fund subject to the conditions and fees detailed in the prospectus of the Fund.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://funds.waystone.com/public>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 October 2020 and 31 October 2022.

Moderate: this type of scenario occurred for an investment between 29 January 2014 and 29 January 2016.

Favourable: this type of scenario occurred for an investment between 31 January 2016 and 31 January 2018.

What happens if Compass Asset Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 2 years (recommended holding period)
Total Costs	390 EUR	608 EUR
Annual cost impact*	3.9%	3.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.9% before costs and -0.1% after costs.

These figures include the maximum distribution fee that the person selling you the product may charge (2% entry costs). This person will inform you of the actual distribution fee.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
