What is this product?

TYPE OF PRODUCT

The product is a sub-fund of Lemanik SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The aim of the Fund is to maximise the return of the investor.

This Fund will invest at least 70% of its net assets in fixed income debt securities, Money Market Instruments or assimilated instruments issued by governments, international agencies, supra-national entities or private companies, with a focus on European issuers and marginal exposure to non-European one without any limitation in duration or rating. The reference currency of the Fund will be EUR, it is not excluded to invest in bond denominated in various currencies different from EUR, to exploit opportunities in terms of potential market inefficiency. The Fund's exposure to contingent convertible bonds is limited to 20% of its net assets.

The Fund's strategy is also to invest in Financial Derivatives Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs'). The Investment Manager is free to manage the exposure to relevant exchange rates and may decide to hedge (an investment position intended to offset potential losses) or not to hedge exchange risks. The Fund may also invest in a wide range of securities. To achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the sub-fund may, invest in money market instruments and deposits on an ancillary basis.

The Fund is actively managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.

Sale of shares in the Fund can be made on any business day.

The sub-fund may also use CDS, either to buy credit protection without holding the underlying assets or selling credit protection in order to acquire specific credit exposures.

The Fund may use FDIs in order to reduce the possibility of financial losses or to achieve higher gains.

The Investment Manager may use a hedging strategy that aims to ensure returns for investors are consistent with the Fund's investment objective.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

The Fund does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of your shares. However, the annual general meeting of shareholders may decide to distribute such income.

INTENDED RETAIL INVESTORS

The product may be suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years		
Example investment		EUR 10 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	EUR 7 760	EUR 5 950	
	Average return each year	-22.4%	-9.9%	
Unfavourable scenario	What you might get back after costs	EUR 8 230	EUR 8 820	This type of scenario occurred for an investment in the product between August 2021 and October 2023.
	Average return each year	-17.7%	-2.5%	
Moderate scenario	What you might get back after costs	EUR 9 900	EUR 10 710	This type of scenario occurred for an investment in the product between May 2014 and May 2019.
	Average return each year	-1.0%	1.4%	
Favourable scenario	What you might get back after costs	EUR 11 540	EUR 11 850	This type of scenario occurred for an investment in the product between February 2016 and February 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 472	EUR 1 302
Annual cost impact (*)	4.7%	2.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.8% before costs and 1.4% after costs.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
