DSM US Large Cap Growth Fund (the "Sub-Fund") is a sub-fund of Hereford Funds (the "Fund") Class U USD (the "Class") - ISIN: LU0371643130 The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The investment objective of the Sub-Fund is to provide capital appreciation primarily through investments in US-based growing corporations with market capitalizations generally above USD 10 billion.

The Sub-Fund is actively managed. The benchmark indices of the Sub-Fund are the S&P 500 and the Russell 1000 Growth. They are used for performance comparison purposes. The Investment Manager is not in any way constrained by the benchmark indices in its portfolio positioning. This means the Investment Manager is taking investment decisions without reference to a benchmark index. The Sub-Fund can deviate significantly from the benchmark indices.

In general, the Sub-Fund will invest in equity securities of large capitalization issuers which are domiciled, headquartered or exercise the predominant part of their economic activity in the US. Equity securities, include, but are not limited to, common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Sub-Fund may invest up to 15% of its net assets in equity securities of non-US issuers or issuers that do not exercise the predominant part of their economic activity in the US. The Sub-Fund may also invest in equity securities of issuers that have a market capitalization below USD 10 billion at the time of purchase. The Sub-Fund will typically contain 25 to 35 positions.

The Sub-Fund may invest in American Depository Receipts and American Depository Shares.

The Sub-Fund may hold liquid assets on an ancillary basis. Under normal market conditions, investment in liquid assets and debt instruments (including money market instruments) of any kind will not exceed 15% of the Sub-Fund's net assets. In exceptional market circumstances and on a temporary basis only, this limit may be increased to 100% with due regard to the principle of risk spreading.

For the avoidance of doubt, the Sub-Fund will not invest more than 10% of its net asset in UCITS and other UCIs.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

- The risk category shown is not guaranteed and may shift over time.

- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The investment objective of the Sub-Fund is to generate long-term capital growth and income by investing in US equity securities of large capitalization issuers. Hence, the risk/reward profile of the Sub-Fund should correspond to a high risk category on the risk/reward scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

• **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

• **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

• **Credit risks:** The Sub-Fund may invest in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

• **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

• **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
