SEB Short Bond Fund EUR – a sub-fund of SEB Fund 4

Class D (EUR) (LU0397075192)

Management Company: SEB Investment Management AB, part of the SEB Group.

Objectives and Investment Policy

SEB Short Bond Fund EUR aims to increase the value of your investment over time by outperforming the benchmark. This actively managed fund focuses on the European fixed income market.

We compare the fund's return to Barclay's Euro Treasury 6-12 months, a European short bond index. The majority of the fund's holdings do not reflect its benchmark's holdings. The fund's investment strategy does not aim to restrict how much the fund's holdings deviate from its benchmark. Deviation, measured as tracking error, will likely be low compared to other fixed income funds.

The main categories of financial instruments are bonds and other fixed income related instruments in euro issued by governments, corporates, financial institutions as well as covered bonds with a minimum credit rating of A- on Standard & Poor's scale or the equivalent. The fund manager performs a

credit risk assessment prior to investing. The portfolio has a maximum duration of two (2) years.

Derivatives may only be used for hedging. Derivatives are a type of financial instrument, the value of which is derived from underlying financial instruments.

The fund follows the management company's sustainability policy when making investments. Our sustainability policy is available on <https://sebgrouplu/policies>.

Generally, investors can buy or sell units of the fund on any bank business day in Luxembourg except 24 and 31 December.

The unit class is distributing.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 1 year(s).

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk and reward indicator illustrates the relationship between risk and the expected return for the fund. The higher the fund is positioned on this scale, the greater the possible reward, but also the greater risk of losing money. Category 1 does not mean that the investment is risk free.

The risk category is calculated using historical data or simulated historical performance when actual historical data is insufficient. Past performance may not be a reliable indicator of the fund's future risk and reward profile.

This fund is in category 2. This means that the risk for value changes in the fund is low. This category may change over time.

The risks in the fund are primarily due to the duration of the investment and to the credit risk which is linked to the relatively high portion of credit instruments in the portfolio. The duration of the holdings is relatively short, which indicates a low risk for price fluctuation. The fund is exposed to Europe. This may imply a somewhat higher risk compared to funds with a broader geographic diversification. The fund may not be suitable in a low yield, low volatility investment environment.

The following risks are not fully reflected in the above classification but still influence the fund's value:

Credit risk - the fund invests directly or indirectly in bonds or other fixed income related instruments. If an issuer of a bond fails to pay the interest and principal amount on time, the bond could lose up to its entire value.

Counterparty risk - if a counterparty does not fulfill its obligations to the fund (e.g. not paying an agreed amount or not delivering securities as agreed).

Interest rate risk - debt instruments may be subject to price fluctuations due to interest rates changes. When interest rates rise, bond values usually decline. When interest rates decline, bond values usually rise.

Liquidity risk - some of the assets of the fund may become difficult to sell at a certain time and for a reasonable price.

Operational risk - the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.36%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - more information can be obtained from your financial adviser or distributor. Ongoing charges are used to pay the costs of running the fund, including the costs of marketing and distribution.

The Management Company may charge an additional exit charge of up to 2% of the NAV of the units redeemed within six months of their issue.

The ongoing charges figure is based on expenses for the calendar year 2020. The figure may vary from year to year. Transaction costs and performance fees are not included in ongoing charges.

All charges reduce the potential growth of your investment. More information on charges can be found in the section regarding costs in the fund's prospectus, available at www.sebgroup.lu.

Past Performance

1 The performance during this period was achieved under circumstances that no longer apply, because the objectives and investment policy of the fund materially changed.

The fund was launched in 1998. The unit class was launched in 2008. For the calculation of past performance all charges and fees are included, except any entry and exit charges you may have paid when buying or selling units of the fund. The past performance is calculated in EUR.

The performance of the fund is not tracking the index.

The past performance of the fund is no guarantee for future performance.
