Material changes to the Fund

The following material changes to the Fund were undertaken during the year ended 31 December 2024, having received prior approval from the Board of Directors, the Commission de Surveillance du Secteur Financier ('CSSF') and where required Shareholders. Where appropriate, notices were sent to Shareholders notifying them of the respective changes:

Sub-Fund closures

- Liquidation of the Latin American Smaller Companies Fund on 20 February 2024.

Sub-Fund mergers

- the Global Dynamic Fund merged all of its assets and liabilities into the Global Equity Fund on 19 January 2024.
- the Global High Yield Fund merged all of its assets and liabilities into the Global Credit Income Fund on 2 February 2024.
- the Investment Grade Corporate Bond Fund merged all of its assets and liabilities into the Global Credit Income Fund on 2 February 2024.
- the Global Multi-Asset Sustainable Growth Fund merged all of its assets and liabilities into the Global Macro Allocation Fund on 19 July 2024.
- the Global Multi-Asset Sustainable Growth Fund (Euro) merged all of its assets and liabilities into the Global Macro Allocation Fund on 19 July 2024.

Other Material changes

- Name change of the Global Multi-Asset Income Fund to the Global Managed Income Fund effective 31 May 2024.
- Increase in the Management Company Fee to up to 0.02% as from 31 May 2024.
- Amendments to the exclusions within the investment strategy section of the SFDR precontractual disclosures within Appendix 3 of the Prospectus for the Sub-Funds promoting environmental characteristics under article 8 SFDR and the Sub-Funds with an environmental objective under article 9 SFDR effective 31 May 2024.
- Replacement of named credit rating agencies within the Prospectus with generic references to 'recognised credit rating agencies' and similar phrases effective 31 May 2024.
- Discontinuation of Ninety One Hong Kong Limited as a sub-investment manager of the Global Strategic Equity Fund effective 31 May 2024.
- Discontinuation of Ninety One Singapore Pte. Limited as a subinvestment manager of the Emerging Markets Local Currency Total Return Debt Fund and Emerging Markets Sustainable Blended Debt Fund effective 31 May 2024.
- Discontinuation of Ninety One North America, Inc. as a subinvestment manager of the Global Macro Allocation Fund effective 31 May 2024.
- Discontinuation of Ninety One SA Proprietary Limited as a subinvestment manager to the All China Bond Fund, Emerging Markets Corporate Debt Fund and Emerging Markets Investment Grade Corporate Debt Fund effective 31 May 2024.

Material changes to the Fund (continued)

- Address change of the sub-investment manager Compass Group LLC effective 31 May 2024.
- Termination of J.P. Morgan Administration Services (Ireland) Limited as the Irish Facilities Agent effective 31 May 2024.
- Addition of an Asset Allocation Risk as a new general risk warning, an amendment to the existing Leverage Risk and updates to the specific risk warnings allocation table in Appendix 2 of the Prospectus effective 31 May 2024.
- Transfer all the assets and liabilities of CACEIS Investor Services Bank S.A. (including its agreements) to CACEIS Bank, Luxembourg Branch by operation of law on 31 May 2024.
- Change of the Fund's Swiss Representative and Paying Agent from "CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch" to "CACEIS Bank, Montrouge, Zurich Branch / Switzerland" effective 31 May 2024.
- Change of the Fund's French Centralising Agent from "CACEIS Investor Services Bank France S.A." to "CACEIS Bank" effective 31 May 2024.
- Amendments to reflect the use of the 'net-of-tax' series of the JPMorgan Government Bond – Emerging Markets Global Diversified Index as a component of the blended performance comparison index for the Emerging Markets Blended Debt Fund, Emerging Markets Sustainable Blended Debt Fund and Emerging Markets Multi-Asset Fund effective 31 May 2024.
- Amendments to section 9.8 of the Prospectus to disclose that any arrangement fees that may be due to a lender in connection with temporary borrowings constitute operating and administrative expenses payable by the Fund effective 31 May 2024.
- Effective 2 December 2024 amendments to the SFDR pre-contractual disclosures within Appendix 3 of the Prospectus for:
 - all Sub-Funds meeting the requirements of article 8 or 9 the SFDR to use the new precontractual disclosure template;
 - the Emerging Markets Sustainable Blended Debt Fund, the Emerging Markets Sustainable Equity Fund, the Global Environment Fund and the Global Sustainable Equity Fund to comply with the ESMA guidelines on funds' names using ESG or sustainability-related terms;
 - the Emerging Markets Sustainable Blended Fund to streamline the sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund.
- New prospectus disclosures prescribed by Circular CSSF 24/856, including disclosure that a final beneficial investor's right to receive compensation in the case of a NAV error may be affected if such investor subscribes through an intermediary effective 2 December 2024.
- New wording to disclose that any investor requesting the currency conversion of their redemption proceeds into their local currency may have their settlement time extended depending on the booking cut-off time for their local currency effective 2 December 2024.
- Appointment of Ninety One SA Proprietary Limited as subinvestment manager of the U.S. Dollar Money Fund and Sterling Money Fund effective 2 December 2024.

Material changes to the Fund (continued)

- Amendments to reflect the creation of the Emerging Markets Hard Currency Investment Grade Debt Fund and the addition of the pre-contractual disclosures for a financial product meeting the requirements of Article 8 of the SFDR effective 2 December 2024.
- Amendments to Section 9.5 of the Prospectus to permit the GSF Board of Directors and the Global Distributor and Service Provider to agree to apply an Administration Servicing Fee that is lower than the level disclosed in the Prospectus for a Sub-Fund and any of its applicable Share Class effective 2 December 2024.
- A new Section 8.10 of the Prospectus to meet the requirements prescribed by CSSF Circular 22/811. The new section discloses that GSF does not have an appointed shareholder communication agent and communications to shareholders concerning their investment will be communicated by GSF itself, except for trade confirmations which may be sent by the Registrar and Transfer Agent on behalf of GSF effective 2 December 2024.
- Paying agent terminations:
 - i. Termination of Raiffeisen Bank International AG as the Austrian Paying and Information Agent effective 18 April 2024
 - ii. Termination of Skandinaviska Enskilda Banken AB as the Swedish Paying Agent effective 18 March 2024
 - iii. Termination of J.P. Morgan AG as the German Paying Agent effective 17 April 2024.

Past performance should not be taken as a guide to the future. Performance would have been lower had any initial charge been included. The performance data do not take into account the commissions on the issue and redemption of shares. Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 31.12.2024 based on the prices issued to the market at that date. All market indicators are total return. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

Sub-Fund performance record

(Calendar year performance over 5 years) (continued)

Equity Sub-Funds (continued)

Past performance should not be taken as a guide to the future. Performance would have been lower had any initial charge been included. Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 31.12.24 based on the prices issued to the market at that date. All market indicators are total return indices except[#] which are price indices with no income reflected. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

The Fund

The Fund

Ninety One Global Strategy Fund (the 'Fund') was initially established in Guernsey on 5 January 1984 and was re-domiciled to Luxembourg on July 2008. The Fund is authorised under Part I of the Luxembourg law of 17 December 2010 relating to collective investment undertakings (loi concernant les organismes de placement collectif) (the 'Law of 2010') as amended. The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities ('UCITS') under Article 1 paragraph 2, points a) and b) of the Directive 2009/65/EC of 13 July 2009 of the European Parliament and the Council (the 'Directive 2009/65/EC'), and may therefore be offered for sale in European Union ('EU') Member States (subject to registration in EU Member States other than Luxembourg). In addition, applications to register the Fund may be made in other countries.

The Fund has appointed Ninety One Luxembourg S.A. (previously Investec Asset Management Luxembourg S.A.) (the 'Management Company') on 30 November 2014, to serve as its designated management company in accordance with the Law of 2010. The Management Company is a public limited company (societe anonyme) incorporated on 8 July 2011 under registration number B 162485. The Management Company has been authorised by the CSSF to manage the business and affairs of the Fund pursuant to Chapter 15 of the Law of 2010. The Management Company has also been authorised by the CSSF as an alternative investment fund manager (an 'AIFM') pursuant to the Law of 2013 on alternative investment fund managers and currently acts as an AIFM to three alternative investment funds.

The Fund consisted of the following 40 Sub-Funds as at 31 December 2024:

Money Sub-Funds

Sterling Money Fund
U.S. Dollar Money Fund

1F, Dorey Court, Elizabeth Avenue
St Peter Port, Guernsey
GY1 2HT
Channel Islands

Gregory Cremen

19, rue de Bitbourg
L-1273 Luxembourg
Grand Duchy of Luxembourg

Matthew Francis

c/o Ninety One UK Limited
55 Gresham Street
London EC2V 7EL
United Kingdom

Report of the Directors

The Directors submit their Report and the Audited Accounts for the year ended 31 December 2024.

Results

The results for the period are shown in the Statement of Operations on pages 320 to 337.
The Sub-Funds performance records are shown on pages 426 to 511.

Directors

The Directors of the Fund as at 31 December, 2024 are set out on page 17. There are no service contracts proposed or in existence between any of the Directors and the Fund, but the Directors may receive remuneration as provided in the Articles of Incorporation. There are no contracts of significance during or at the end of the period in which a Director of the Fund is or was materially interested.

Directors' responsibilities

The Directors are responsible for preparing financial statements for each financial year which give a true and fair view of the state of affairs of the Fund and of the Statement of Operations of the Fund for that period and are in accordance with applicable laws. In preparing those financial statements the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed subject to any material departures disclosed and explained in the financial statements; and
- prepare financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping proper accounting records which disclose, with reasonable accuracy at any time, the financial position of the Fund and to enable them to ensure that the financial statements have been properly prepared in accordance with Luxembourg law on Undertakings for Collective Investment. They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Auditors

PricewaterhouseCoopers, Société coopérative was appointed as Auditor of the Ninety One Global Strategy Fund at the last annual general meeting held on 6 June 2024 for a term until the next annual general meeting to be held in 2025.

Signed on behalf of the Board of Directors

24 April 2025

K M McFarland
Chairperson

G D Cremen
Director

Notes forming part of the financial statements

1. Principal accounting policies

The following accounting principles have been applied consistently in dealing with items which are considered material in relation the financial statements of the Fund:

a) Basis of preparation

The financial statements are presented in US Dollars and rounded to the nearest thousand. Where the reference currency of the Sub-Fund is not US Dollars, the presentation is in the reference currency of the Sub-Fund. The financial statements have been prepared in accordance with the Luxembourg law on Undertakings for Collective Investment. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

The financial statements have been prepared on a going concern basis, except for the Latin American Smaller Companies Fund which was liquidated on 20 February 2024.

The use of the non-going concern basis of accounting for liquidated sub-funds implies that its financial statements are adjusted to include the liquidation costs, the depreciation of any remaining unamortized formation expenses attributable to this sub-fund (if any), and that the valuation of investments reflect its net realizable value at liquidation date.

The use of the non-going concern has no material impact on the financial statements of liquidated sub-funds.

As at 31 December 2024, the Latin American Smaller Companies Fund held an equivalent of 68,441 USD in cash, all of which was related to expenses due from the Sub-Fund.

b) Presentation of combined totals

The combined totals presented in the financial statements represent the aggregation of all the Sub-Funds net assets and operations in US Dollars. Cross-holdings between Sub-Funds within the Fund have not been eliminated from these totals. On 31 December 2024, the cross Sub-Fund investments was 220,223 USD which represent 0.75% of the combined net assets.

c) Foreign currency translation

Items are recorded in the Fund's records in the relevant reference currency of each Sub-Fund, which includes British Pound Sterling, Euro and US Dollars. These currencies are identified in the Prospectus.

The Fund is presented in US Dollars and the results of the Sub-Funds have been aggregated into US Dollars using the exchange rate ruling at the period-end date for the Statement of Assets and Liabilities and the average rate for the Statement of Operations and the Statement of Changes in Shareholders' Equity. The adjustment in US dollar terms arising from this aggregation is classified as a currency adjustment in the Statement of Changes in Shareholders' Equity. This adjustment has no effect on the value of the net assets allocated to individual Sub-Funds.

Transactions in foreign currencies are translated into the reference currency of the relevant Sub-Fund at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the reference currency of the relevant Sub-Fund at the closing exchange rate ruling at the Statement of Assets and Liabilities date.

Notes forming part of the financial statements (continued)

Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Operations. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the reference currency of the relevant Sub-Fund at the foreign exchange rate ruling at the dates the values were determined. Foreign currency exchange differences relating to investments are included in gains and losses on investments. All other foreign currency exchange differences relating to monetary items, including cash and cash equivalents, are presented separately in the note 5 - Net gains/(losses) on investments under caption 'Net realised gain/(loss) on foreign currencies and forward currency contracts'.

d) Valuation of financial Instruments

The value of any cash on hand or on deposit, bills and demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared and accrued as aforesaid, and not yet received, shall be equal to the entire nominal or face amount thereof, unless the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate, to reflect the true value thereof.

The value of Transferable Securities and Money Market Instruments and any other assets which are quoted or dealt in on any stock exchange is based on the latest available price. Each Transferable Security and Money Market Instrument and any other assets traded on any Other Regulated Market shall be valued in a manner as similar as possible to that provided for quoted securities.

The fair value of investments is based on their quoted market prices at the Statement of Assets and Liabilities date. Financial assets are priced at current market prices. If a quoted market price is not available on a recognized stock exchange or from a broker/dealer for a non exchange-traded financial instrument, the fair value of the instrument is estimated using valuation techniques. If none of the above methods of valuation are appropriate for any investment or if in any case a particular value is not ascertainable, or if the Directors shall, having first sought appropriate advice, consider that some other method of valuation better reflects the fair value of the relevant investment then in any such case the method of valuation of the relevant investment shall be such as the Directors shall decide having regard to the circumstances and/or the nature of the investment.

Swaps, comprising Credit Default Swaps, Interest Rate Swaps and Total Return Swaps, are contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s). Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparties.

Contracts for Difference are valued based on the closing market price of the underlying security, less any financing charges attributable to each contract. Upon entering into Contracts for Difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margin' are made or received by the Fund periodically, depending on fluctuations in the value of the underlying security. During the period the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses upon closure of the contract are equal to the difference

Notes forming part of the financial statements (continued)

between the value of the contract at the time it was opened including financial charges and the value at the time it was closed.

The fair value of the forward contracts and futures contracts is estimated as the amount the Sub-Fund would receive or pay to terminate the contract at the Statement of Assets and Liabilities date.

Shares or units of underlying open-ended Undertakings for Collective Investment (UCIs) are valued at their last determined and available Net Asset Value.

Money market instruments are valued at their market price.

The liquidation value of futures, forward and options contracts not traded on exchanges or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Board of Directors. The liquidating value of futures, forward and options contracts traded on exchanges or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and/or Regulated Markets on which the particular futures, forward or options contracts are traded by the Sub-Fund.

The Fund generates income from investments it may hold in the most junior class of securities of Collateralized Loans Obligations (CLOs) (typically preferred shares or subordinated securities) managed by other asset management companies. These junior class securities are subordinated to senior bond holders who typically receive a fixed rate of return on their investment. The CLOs are leveraged funds and any excess cash flow or “excess spread” (interest earned by the underlying securities in the fund less payments made to senior bond holders and less fund expenses and management fees) is paid to the holders of the CLOs’ subordinated securities or preferred shares. The Fund recognizes a portion of these cash payments as interest income based on an expected rate of return through expected maturity, and any excess is then recognized as a return of capital.

For any senior class CLO securities the Fund may hold, interest is earned at a fixed rate or a fixed spread relative to the LIBOR index, and is recognized as interest income on the accrual basis.

The Money Market Funds (U.S. Dollar Money Fund and Sterling Money Fund) are variable NAV Sub-Funds (VNAV). Under a VNAV all investments are valued at Mark-to-Market.

e) Fair value adjustments

Events may occur between the determination of an investment’s last available price and the determination of a Sub-Fund’s Net Asset per Share at the valuation point that may, in the opinion of the Directors, mean that the last available price does not truly reflect the true market value of the investment. In such circumstances, a fair value adjustment factor is applied to the price of such investments in accordance with applicable trigger rules.

f) Swing Pricing

The actual cost of acquiring or disposing of assets and investments in a Sub-Fund may deviate from the mid-market prices normally used in calculating the Sub-Fund’s Net Asset Value per Share, due to dealing charges, taxes and spreads between acquisition and disposal prices of assets dealt in that Sub-Fund on that Valuation Day. These costs may have an adverse effect on the Net Asset Value per Share, known as “dilution”. In order to mitigate the effect of dilution and to protect Shareholder’s interests the Board of Directors may at their discretion estimate and allocate these costs to anyone dealing in Shares on a relevant Valuation Day by adjusting the Net Asset Value per Share in a Sub-Fund to take into account the possible effects of dilution.

Notes forming part of the financial statements (continued)

The Net Asset Value per Share of a Sub-Fund may be adjusted on any Valuation Day where in the opinion of the Board of Directors it is in the interests of Shareholders. An adjustment may be applied on a 'partial' (i.e. ad hoc) or 'full' (i.e. daily) basis. A partial (i.e. ad hoc) adjustment will be applied on any Valuation Day when the aggregate total of subscriptions, conversions (for Shares of another Sub-Fund) and/or redemptions of Shares of all Classes of a Sub-Fund result in net subscriptions (inflows) or redemptions (outflows) which exceeds a pre-determined threshold, as determined and reviewed by the Management Company from time to time for that Sub-Fund. A full (i.e. daily) adjustment will be applied only in certain circumstances (e.g. where a Sub-Fund is experiencing consistent net subscriptions and/or redemptions over a period of time, or, in the period leading up to a merger or liquidation of a Sub-Fund). In this case the full (i.e. daily) adjustment will be applied regardless of the size of the net subscriptions or redemptions of the Shares of a Sub-Fund. The Net Asset Value per Share will be adjusted upwards for subscriptions and adjusted downwards for redemptions. In certain circumstances, the Board of Directors may decide, at its sole discretion, that it is not appropriate to make an adjustment to the Net Asset Value per Share of a Sub-Fund.

As at the date of this report the Board of Directors has determined that the adjustment, based on normal dealing and other costs for the particular assets in which a Sub-Fund invests or disinvests, will not exceed 2% of the unadjusted Net Asset Value per Share of the Sub-Fund in normal market conditions.

As any such adjustment will be dependent on the aggregate net transactions in Shares in a Sub-Fund, it is not possible to accurately predict whether it will occur at any future point in time and consequently how frequently it will need to be made. Additionally, as the markets and jurisdictions in which the Sub-Funds invest may have different charging structures on the purchase and sale of assets, the resulting adjustment may differ between Sub-Funds and may be different for subscriptions than for redemptions.

The Board of Directors has delegated the day to day operational decisions to adjust the Net Asset Value per Share to the Management Company. The Management Company makes, and periodically reviews, the operational decisions to adjust the Net Asset Value per Share, including the application of a partial or full adjustment, the thresholds which would trigger an adjustment on a partial basis and the extent of the adjustment in each case, in accordance with its swing pricing mechanism policy. Currently, the Board of Directors has determined that all Sub-Funds, save for the U.S. Dollar Money Fund and Sterling Money Fund, may be subject to the adjustment mechanisms.

During the period from 1 January 2024 to 31 December 2024 following Sub-Funds have swung: All China Bond Fund, All China Equity Fund, Asia Dynamic Bond Fund, Asia Pacific Equity Opportunities Fund, Asian Equity Fund, China A Shares Fund, Emerging Markets Blended Debt Fund, Emerging Markets Hard Currency Debt Fund, Emerging Markets Local Currency Total Return Debt Fund, Emerging Markets Sustainable Blended Debt Fund, Emerging Markets Sustainable Equity Fund, Global Dynamic Fund, Global Environment Fund, Global Equity Fund, Global High Yield Fund, Global Macro Allocation Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro), Global Natural Resources Fund, Global Value Equity Fund, Investment Grade Corporate Bond Fund, Latin American Equity Fund, Latin American Smaller Companies Fund and U.K. Alpha Fund. The remaining Sub-Funds did not swing because their flows did not meet the threshold set up by the Management Company.

Swing pricing as at the year end, if any, is recorded under the Swing adjustment caption of the Statement of Assets and Liabilities and of the Statement of Changes in Shareholders' Equity.

Notes forming part of the financial statements (continued)

g) Cash and cash equivalents

Cash comprises current accounts as well as term deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

h) Interest income

Interest income is recognised in the Statement of Operations as it accrues, using the interest rate of the instrument calculated at the period-end on an effective interest rate basis.

Interest income or other income may include the amortisation of any discount or premium with regards to zero coupon bonds and money market instruments valued at amortised cost, transaction costs or other differences between the initial carrying amount of an interest bearing instrument and its amount at maturity.

i) Dividend income

Dividend income is recognised in the Statement of Operations on the ex-dividend date.

In some cases, the Sub-Fund may receive dividends in the form of additional shares rather than cash. In such cases the Sub-Fund recognises the value of the cash dividend alternative as dividend income.

j) Expenses

All expenses are recognised in the Statement of Operations on an accruals basis. Where formation costs have been incurred, these are capitalised and amortised over a period not exceeding five years.

k) Income and expense allocation

The allocation of income and expenses to each Share Class is based upon the proportion of the Sub-Fund's net assets of each Share Class on the day the income is earned or the expense is incurred.

l) Taxation

The Fund is not subject to any Luxembourg income tax, nor are dividends paid by the Fund subject to any withholding tax.

However, the Fund is liable in Luxembourg to a subscription tax (taxe d'abonnement) of 0.05% per annum, such tax being payable quarterly and calculated on the total Net Asset Value of the respective Class of Share at the end of the relevant quarter.

A reduced tax rate of 0.01% per annum of the net assets will be applicable to the I, J, S and Z Share Classes which are only sold to and held by Institutional Investors and to all Classes of the U.S. Dollar Money Fund and the Sterling Money Fund. Such tax is payable quarterly and calculated on the net assets of such Class at the end of the relevant quarter.

m) Performance Fees

There are no performance fees charged on the Global Strategy Fund.

n) Distribution

The distributions are recorded on the ex-date in the financial statements.

Notes forming part of the financial statements (continued)

2. Equalisation

The Net Asset Value per Share of each Income Share includes a payment for equalisation representing undistributed income accrued since the last ex-dividend date.

Equalisation is a payment by a person who subscribes for Shares, and is calculated by dividing the relevant proportion of the net undistributed income of the Share Classes, by the number of such Shares in issue at the date on which the subscription is made. Equalisation is repaid to the Shareholders on the occurrence of the redemption of the Shares or on the payment of a dividend.

3. Currency exchange rates

The currency exchange rates against the US Dollar as at the following year-end dates were as follows:

	31 December 2024

6. Material contracts

The following material contracts have been entered into by the Fund:

- A management company services agreement between the Fund and the Management Company dated 30 November 2014 pursuant to which the Management Company is appointed as the management company for the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An investment management agreement between the Fund, the Management Company and the Investment Manager dated 30 November 2014 pursuant to which the latter acts as investment manager of the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice. According to an agreement entered into between the investment manager (in its capacity as a QFI) and Hong Kong and Shanghai Banking Corporation Limited ("HSBC") on or about 22 April 2015, as amended (the "QFI Schedule"), the latter has been appointed by the investment manager as its directly contracted agent. The QFI Schedule shall apply in full to all actions taken by HSBC under the QFI Schedule which are performed by HSBC as the investment manager's directly contracted agent.
- An agreement between the Fund and State Street Bank International GmbH, Luxembourg Branch (the legal successor of State Street Bank Luxembourg S.C.A. following this entity's merger into State Street Bank International GmbH on 4 November 2019) dated 10 May 2016 pursuant to which the latter is appointed Depositary of the assets of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice provided that no such notice shall take effect until the appointment of a successor to the Depositary. According to the QFI Schedule entered into between the investment manager (in its capacity as a QFI) and HSBC on or about 22 April 2015 as amended, the latter has been appointed by the investment manager as the sub-custodian of the assets in China of Sub-Funds permitted to invest via the QFI licence. However, the depositary agreement between the Fund and State Street Bank International GmbH, Luxembourg Branch shall apply in full to all actions taken by HSBC under the QFI Schedule acting in its capacity as sub-custodian of the assets of the above-mentioned Sub-Funds, notwithstanding the direct appointment of HSBC by the investment manager of the Fund. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An agreement between the Fund, the Management Company and State Street Bank International GmbH, Luxembourg Branch (the legal successor of State Street Bank Luxembourg S.C.A.

Notes forming part of the financial statements (continued)

6. Material contracts (continued)

following this entity's merger into State Street Bank International GmbH on 4 November 2019) dated 30 November 2014 pursuant to which the latter is appointed Administrator and Domiciliary Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.

- An agreement between the Fund, the Management Company and the Global Distributor and Service Provider dated 30 November 2014 pursuant to which the latter was appointed Global Distributor and Service Provider of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An agreement between the Fund, the Management Company and CACEIS Bank, Luxembourg Branch (following the transfer of the agreement from CACEIS Investor Services Bank S.A. on 31 May 2024) dated 23 November 2021 pursuant to which the latter was appointed Registrar and Transfer Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice.

Annual Management Fee

For the financial year ending 31 December 2024 the Global Sustainable Equity, TX, Acc, GBP paid 11,323.22 GBP management fee all of which was donated to a charity.

The annual management fees at 31 December 2024 were:

7. Transactions with connected persons

There have been no transactions with connected persons except as detailed below:

- Grant Cameron, Director of the Fund, is also a Director of the Management Company and the Global Distributor and Service Provider. Transactions with the Global Distributor and Service Provider are detailed in Note 6.
- Kim McFarland, Director of the Fund, is also a Director of the Investment Manager. Transactions with the Investment Manager are detailed in Note 6.
- Claude Niedner, a Director of the Fund, is a Partner at Arendt & Medernach, who are contracted as Legal Advisers to the Fund. During the period under review, Arendt & Medernach has provided legal services totalling 162,527 EUR to the Fund (inclusive of VAT). As at 31 December 2024, 84,693 EUR was outstanding and due to be paid.
- State Street Bank International GmbH, Luxembourg Branch, who is contracted as Depositary to the Fund is also the Fund's Administrator and Domiciliary Agent. During the period under review it provided services to the Fund for administration, fair value, tax and reporting for estimated value of 3,050,271 GBP (inclusive of VAT). During the period under review State Street Bank and Trust Company, a related party to State Street Bank International GmbH, Luxembourg Branch, provided hedging services to the Fund for 461,740 USD (inclusive of VAT) and collateral services estimated value of 334,563 GBP (inclusive of VAT). The Depositary has appointed State Street Bank and Trust Company as Fund's global custodian for which it provided services for estimated value of 9,274,694 USD (inclusive of VAT) for the period under review.

Notes forming part of the financial statements (continued)

7. Transactions with connected persons (continued)

- With the exception of the above points, there were no additional service contracts proposed or in existence between any of the Directors and the Fund.
- With the exception of the above points, there were no contracts of significance during or at the end of the period in which a Director of the Fund is or was initially interested.
- Transactions detailed in points above, have been entered into in the ordinary course of business and on normal commercial terms.

8. Dealing commissions arrangements

The Investment Manager does not use dealing commissions for the purchase of research services. Dealing commissions paid will only be for execution services. Research services are paid for by the Investment Manager.

9. Ongoing Charges

The method for calculation is Total Operating Expenses (not including negative investment income) divided by the average Net Asset Value for the period. This is calculated on a Share Class basis.

Ongoing charges were calculated in accordance with the ESMA's guidelines on the methodology for calculation of the ongoing charges figure in the Key Investor Information Document CESR/10-674, as well as with the ALFI (Association of the Luxembourg Fund Industry) guidelines.

10. Distribution (continued)

Distribution policy

Income Shares in the Fund are denoted by the word “Inc”, “Inc-2” or “Inc-3” in the Share Class name. In determining the distribution policy for any Class of Income Share (whether Inc, Inc-2 or Inc-3), the Board of Directors may determine, as permitted under Luxembourg Law, the extent to which expenses of that Class may be deducted from its income and/or capital account. In particular, the Board of Directors may determine that the distribution policy of any Class of Income Share is to distribute the whole of the income attributable to that Class to Shareholders after the deduction of the Management Fee (as defined in the Prospectus Section 9.1), the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class and potentially a portion of capital to Shareholders before deduction of the Management Fee, the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class of Income Share.

The Board of Directors may also determine if and to what extent distributions may include distributions from both net realised and net unrealised capital gains. Where Classes pay distributions that include net realised capital gains or net unrealised capital gains, or, in the case of Share Classes’ which distribute income gross of expenses, dividends may include initially subscribed capital. Shareholders should note that dividends distributed in this manner may be taxable as income, depending on the local tax legislation, and should seek their own professional tax advice in this regard.

The Board of Directors has determined that for any Inc Share Class, the distribution policy is to distribute net income. Accordingly, the expenses related to such a Share Class will be deducted from its income account. Where the income generated is insufficient to cover the expenses, the residual expenses shall be deducted from the relevant Share Class’ capital account.

The Board of Directors has determined that for any Inc-2 Share Class, the distribution policy is to distribute gross income. Accordingly, the expenses related to such a Share Class will be deducted from its capital account. This will have the effect of increasing that Share Class’ distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

The Board of Directors has determined that for an Inc-3 Share Class, the distribution policy is to distribute the long term expected level of gross income. The distribution will be calculated at the discretion of the Board of Directors on the basis of the expected gross income over a given period (such period to be at the Board of Director’s discretion) with a view to providing a consistent monthly distribution to Shareholders during such period. The distribution rate for each Inc-3 Share Class will typically be reviewed on a quarterly basis, but at least semi-annually, but may be adjusted more frequently to reflect changes in the portfolio’s expected yield. The expenses related to such a Share Class will be deducted from its capital account and may include net realised and net unrealised capital gains. This will have the effect of increasing that Share Class’ distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

The Board of Directors may determine, as permitted under Luxembourg law, the extent to which a dividend for any Class of Income Share may include distributions of income and/or capital. For the All China Bond Fund and the Global Total Return Credit Fund, the Board of Directors has determined that its distributable income may also include any implied yield accrued by certain investments the purchase of which is driven by an income-generating objective (e.g. foreign exchange forward contracts). The distribution policy for any Class of Income Share may change from time to time as determined by the Board of Directors.

The frequency of distributions varies across the different Sub-Funds and Share Classes, the detail of which can be found in the Fund’s Prospectus.

The distributions are recorded on the ex-date in the financial statements.

Notes forming part of the financial statements (continued)

11. Securities on Loan

The Fund does not engage in securities lending.

12. Contingent Liabilities

There were no contingent liabilities as at 31 December 2024.

13. Bank Overdrafts

Any bank overdraft is secured against the assets of the Sub-Fund.

14. Merger of Sub-Funds during the year

The following Sub-Funds merged during the year ended 31 December 2024. As a result of the merger, the absorbed Sub-Fund was closed.

Notes forming part of the financial statements (continued)

17. Statement of significant changes in the portfolio

The list of changes in the composition of the investment portfolio, for the year ended 31 December 2024, shall be available on request and free of charge to investors. Please contact your local Ninety One office to request a copy.

18. Subsequent events

There is nothing to disclose.

Audit report

To the Shareholders of
Ninety One Global Strategy Fund

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Ninety One Global Strategy Fund (the "Fund") and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the Portfolio details - Schedule of Investments as at 31 December 2024;
- the Statement of Operations for the year then ended;
- the Statement of Changes in Shareholders' Equity for the year then ended;
- the Statement of Assets and Liabilities as at 31 December 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Latin American Smaller Companies Fund where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other information (Unaudited)

Class action

Class action against Volkswagen AG ('the Litigation').

The Litigation relates to the installation by Volkswagen AG of 'defeat software' in vehicles sold worldwide between 2009 and September 2015 ('the Emissions Scandal'). Proceedings (which include statutory and civil law claims) have been brought in the German Courts on behalf of shareholders who acquired Ordinary or Preference Volkswagen shares on any German stock exchange between 1 January 2009 and 18 September 2015 inclusive, and who had not sold all of those shares prior to 21 September 2015, relating to losses as a result of the Emissions Scandal ('the Class Action').

As a shareholder in Volkswagen AG during the relevant period, the Ninety One Global Strategy Fund, on behalf of the Global Equity Fund, Global Strategic Equity Fund and Global Strategic Managed Fund, is participating as a Claimant in the Class Action.

Class Action against BHP Billiton Ltd

The litigation relates to BHP Billiton Ltd ("BHP"). BHP is alleged to have made a series of false representations and not made certain disclosures in relation to the Fundão Dam at the Germano iron ore mine in Brazil. On 5 November 2015, the Fundão Dam collapsed, which is alleged to have caused environmental damage and loss of life. As a result BHP's stock price drop. The class action litigation against BHP commenced in the Australian courts.

The Ninety One Global Strategy Fund on behalf of: Asia Pacific Equity Opportunities Fund, Global Equity Fund, Global Strategic Managed Fund, Global Natural Resources Fund, Global Strategic Equity Fund, and U.K. Alpha Fund, as shareholders in BHP during the relevant period, is participating in the class action.

Remuneration disclosure

The remuneration policy of the Ninety One group, as it applies to the Management Company (the 'Remuneration Policy') sets out the policies and practices that are consistent with and promote sound and effective risk management, across all categories of risks, including sustainability risks. It does not encourage risk-taking which is inconsistent with the risk profiles, rules or articles of incorporation of the Fund. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company and the Fund and its Shareholders, and includes measures to avoid conflicts of interest. It includes a description as to how remuneration and benefits are calculated (see further below) and identifies those individuals responsible for awarding remuneration and benefits.

With regard to the internal organization of the Management Company, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the funds managed by the Management Company in order to ensure that the assessment process is based on longer-term performance and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period. The Remuneration Policy includes fixed and variable components of salaries and discretionary pension benefits that are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component.

Other information (Unaudited) (continued)

The Remuneration Policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers in each case whose professional activities have a material impact on the risk profile of the Management Company ('Identified Staff'). We have included below the relevant sections from the Remuneration Policy which summarize how remuneration and benefits have been calculated for Identified Staff.

Fixed Remuneration and Benefits

- Fixed remuneration, including salaries, is reviewed annually and designed to reflect the relative skills and experience of, and contribution made, by each employee. Advisors may be engaged, as appropriate, to obtain general market information or to benchmark specific positions to help assesses the extent to which remuneration levels are competitive and appropriate in the context of attracting and retaining people. In addition, fixed remuneration as a proportion of overall remuneration levels is reviewed and taken into account in the balance between salary, other fixed remuneration and performance-related awards.
- Employee benefits include:
 - Life and permanent health insurances and medical cover, which vary according to local market norms.
 - Employer pension contributions, which are based on annual salary only and not on other fixed remuneration, bonuses or the value of other benefits. No discretionary pension benefits are paid.

Discretionary annual variable compensation

- Ninety One operates an annual discretionary cash bonus scheme and an annual discretionary deferred bonus scheme. The primary determinant of the variable compensation pool available for distribution is Ninety One's own annual profit. The percentage of profit allocated to the variable compensation pool has been agreed (at a fixed rate) and has been approved by Ninety One Human Capital and Remuneration Committee. Given our business is orientated towards meeting the long-term objectives of our clients, there are not significant fluctuations in profit levels (and therefore bonus pools) year on year.
- Bonus pools are calculated taking into account input from the Chair of the Ninety One Management Risk Committee and the Head of Compliance to ensure that bonus pools are at an appropriate level given the current and likely future risks inherent in the business. The pool is divided between the business divisions based on considerations of both financial and non-financial performance.
- All employees of Ninety One are currently eligible to be considered for a cash bonus payment under the scheme, although this does not mean that employees will automatically receive a cash bonus. Any payments made under the scheme are at the discretion of Ninety One and based on a number of factors including multi-year performance and non-financial metrics such as compliance and risk awareness.

Other information (Unaudited) (continued)

- Where Ninety One's financial performance is subdued or negative, total variable remuneration would be contracted in line with weaker financial results, taking into account both current remuneration and potential reductions in payouts of amounts previously earned. Ninety One's total variable remuneration should therefore not limit its ability to strengthen its capital base as it is paid out of profits. This structure has been a key contributor to the long-term success of Ninety One and encourages the staff to behave like owners. Ninety One believes in aligning the longterm interests of clients, shareholders and staff.
- Compliance and Risk team bonuses are determined with primary reference to functional performance and not company financial performance.
- Both qualitative and quantitative factors are integral to determining remuneration levels. Specific factors considered include the following:
 - The profit of the overall firm;
 - Multi-year investment and financial performance of specific business units;
 - Behavior consistent with the culture and values of the firm;
 - Scope of responsibility and individual contribution to the performance of the business;
 - The attitude and behavior of employees towards risk consciousness, internal controls, risk management and regulatory compliance;
 - Specific input from risk and compliance functions regarding concerns about the behavior of individual employees;
 - Market sector norms and peer group comparisons; and
 - The quality and level of leadership and collaboration, the ability to grow and develop business and client relationships, and the development of self and others;
 - Current and likely future risks inherent in the business.

The details of the up-to-date Remuneration Policy, including but not limited to, further information regarding how remuneration and benefits are calculated, the identity of persons responsible for warding the remuneration and benefits, including the composition of the remuneration committee where such a committee exists, are available at www.ninetyone.com/remuneration and a paper copy will be made available free of charge upon request from the registered office of the Management Company.

The Remuneration Policy is reviewed on an annual basis by the Management Company (in its supervisory function). There are no irregularities to report as a result of this review.

Other information (Unaudited) (continued)

The table below shows the total amount of remuneration paid by the Management Company to its staff for the financial year ending 31 March 2024, split into fixed and variable remuneration, and showing the number of beneficiaries. No performance fees or any other type of remuneration was paid directly by the Fund.

Total Remuneration	\$5,800,744
Fixed Remuneration	\$3,278,365
Variable Remuneration	\$2,522,379
Number of Beneficiaries	21

The table below shows, for the same period, the aggregate amount of remuneration paid to Identified/Code Staff in respect of activities related to the Management Company and the Fund. Identified/Code Staff are staff and other individuals identified by the Management Company whose activities have a material impact on the risk profile of the Management Company or the Fund. This table excludes Identified/Code Staff activities subject to a delegation agreement.

Aggregate Remuneration	\$3,994,330
Senior Management	\$925,695
Other individuals with material impact	\$3,068,635

Risk management (Unaudited)

Risk management

The Fund uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios of each Sub-Fund at any time. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ('CSSF') the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company ensures, on the basis of appropriate and reasonable methods, that the overall risk, associated with derivatives is limited. The Fund uses the following methods:

Commitment approach

The 'commitment approach' is based on the positions of derivative financial instruments, converted into their corresponding underlying equivalents using the delta approach. Netting and Hedging might be considered for derivative financial instruments and their underlying assets. The sum of these underlying equivalents must not exceed the net asset value of the relevant Sub-Fund.

VaR approach

The value-at-Risk (VaR) is a mathematical-statistical concept and is used as a standard measure of risk in the financial sector. The VaR represents the potential loss of a portfolio over a given period (so-called holding period), which is with a certain probability (so-called confidence level).

Absolute VaR approach

In the absolute VaR approach the VaR (99% confidence level, 20-day holding period) of the relevant Sub-Fund can not exceed 20% of its net assets.

Relative VaR approach

The relative VaR concept determines the VaR based on a reference portfolio. Under this approach the VaR cannot be more than twice the VaR of a reference portfolio. The reference portfolio normally relates to an index or composite relevant to the Sub-Fund's investment policy.

VaR add ons

The following table shows the method used to calculate global exposure as well as the applicable reference portfolio for those Sub-Funds using the relative VaR approach.

Sub-Fund	Global Exposure Calculation Method	Reference Portfolio

Global risk measurement methods

Absolute VaR

The table below shows Sub-Funds utilizing an absolute VaR approach to risk measurement in 2024. Minimum utilisation and Maximum utilisation are the minimum and maximum VaR over the period divided by the VaR limit. Average Utilization is the average of VaR divided by the VaR limit.

The VaR has been calculated daily using the Monte-Carlo calculation approach with a confidence interval of 99%, a holding period of 20 days, a (historical) given period of 200 weeks.

Sub-Fund Name	Absolute VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation
Emerging Markets Local Currency Total Return Debt Fund	22.37%	31.46%	30.07%
Global Macro Allocation Fund	29.90%	40.81%	34.71%
Global Macro Currency Fund	4.72%	32.93%	13.87%
Global Managed Income Fund	18.75%	31.80%	25.24%
Global Credit Income	16.13%	35.28%	23.68%

Relative VaR

The table below shows Sub-Funds utilizing a relative VaR approach to risk measurement in 2024. This is the VaR of the Sub-Fund relative to the VaR of the benchmark. Minimum utilisation and Maximum utilisation are the minimum and maximum ratio VaR over the period divided by the VaR limit. Average Utilization is the average of ratio VaR divided by the VaR limit.

The VaR has been calculated daily using the Monte-Carlo calculation approach with a confidence interval of 99%, a holding period of 20 days, a (historical) given period of 200 weeks.

Sub-Fund Name	Relative VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation
All China Bond Fund	44.19%	54.25%	50.82%
Asia Dynamic Bond Fund	53.00%	68.90%	58.65%
Emerging Markets Blended Debt Fund	51.63%	81.03%	60.89%
Emerging Markets Corporate Debt Fund	73.38%	85.12%	79.65%
Emerging Markets Hard Currency Debt Fund	59.57%	75.55%	66.46%
Emerging Markets Investment Grade Corporate Debt Fund	70.35%	79.86%	75.13%

Risk management (Unaudited) (continued)

Sub-Fund Name	Relative VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation
Emerging Markets Local Currency Debt Fund	49.13%	56.68%	53.40%
Emerging Markets Local Currency Dynamic Debt Fund	49.21%	57.16%	53.59%
Emerging Markets Multi-Asset Fund	47.91%	55.66%	52.05%
Emerging Markets Sustainable Blended Debt Fund	43.56%	63.68%	53.88%
Global Multi-Asset Sustainable Growth Fund	23.12%	55.87%	52.16%
Global Multi-Asset Sustainable Growth Fund (Euro)	23.55%	64.51%	54.72%
Global High Yield Fund	35.57%	41.90%	39.58%
Global Strategic Managed Fund	51.21%	68.53%	59.65%
Investment Grade Corporate Bond Fund	32.34%	64.09%	55.25%

Level of leverage

For Sub-Funds where the VaR approach is used to measure the overall risk associated with derivatives, the table below shows leverage using both the sum-of-notionals approach and the commitment approach. Shareholders should note that expected leverage levels for these Sub-Funds are a representative guide only and should not be regarded as imposing limits which may not be exceeded.

During the reported period, the average leverage based on the sum of the notionals of the derivatives used was:

Sub-Fund Name	Global Exposure Calculation	Level of Leverage (Sum of Notionals)	Commitment Approach
Emerging Markets Local Currency Total Return Debt Fund	Absolute VaR	310.11%	112.20%
Global Macro Allocation Fund	Absolute VaR	343.00%	135.14%
Global Macro Currency Fund	Absolute VaR	326.43%	65.64%
Global Managed Income Fund	Absolute VaR	243.49%	36.44%
Global Credit Income	Absolute VaR	115.73%	21.64%
All China Bond Fund	Relative VaR	124.45%	37.59%
Asia Dynamic Bond Fund	Relative VaR	2.73%	0.00%
Emerging Markets Blended Debt Fund	Relative VaR	206.86%	72.66%

Risk management (Unaudited) (continued)

Sub-Fund Name	Global Exposure Calculation	Level of Leverage (Sum of Notionals)	Commitment Approach
Emerging Markets Corporate Debt Fund	Relative VaR	1.62%	0.02%
Emerging Markets Hard Currency Debt Fund	Relative VaR	20.20%	4.02%
Emerging Markets Investment Grade Corporate Debt Fund	Relative VaR	0.78%	0.02%
Emerging Markets Local Currency Debt Fund	Relative VaR	230.45%	90.76%
Emerging Markets Local Currency Dynamic Debt Fund	Relative VaR	259.56%	95.86%
Emerging Markets Multi-Asset Fund	Relative VaR	60.97%	15.52%
Emerging Markets Sustainable Blended Debt	Relative VaR	162.71%	43.50%
Global Multi-Asset Sustainable Growth Fund	Relative VaR	194.26%	39.53%
Global Multi-Asset Sustainable Growth Fund (Euro)	Relative VaR	289.76%	43.04%
Global High Yield Fund	Relative VaR	78.72%	19.04%
Global Strategic Managed Fund	Relative VaR	115.30%	38.32%
Investment Grade Corporate Bond Fund	Relative VaR	100.43%	22.91%

IMPORTANT NOTICE: Shareholders should please note that the above expected leverage levels have been calculated using the specific methodology prescribed under CSSF Circular 11/512, CSSF Regulation 10-4 or the ESMA (formerly CESR) Guidelines 10-788 on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS. This methodology might differ from the methodology used in other jurisdictions and/or general market practice regarding how leverage is understood. Shareholders should note that under this methodology, where a Sub-Fund uses derivatives for the purposes of efficient portfolio management, this will in some cases be included in the leverage calculation. This will inevitably inflate the leverage level for that Sub-Fund. Shareholders should note that the Fund uses a different methodology for its internal monitoring of leverage levels in the Sub-Funds. Shareholders should note further that the level of leverage does not include borrowings which are made only on a temporary basis in accordance Section 10.1(B)(3) of the prospectus.

Fair value hierarchy (Unaudited)

as at 31 December 2024

The three levels of the fair value hierarchy as determined by the Board are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including but not limited to quoted prices for similar securities, interest rates, foreign exchange rates, volatility and credit risk spreads), either directly or indirectly;

Level 3 – Prices or valuations that require significant unobservable inputs (including the Competent Persons assumptions in determining fair value measurement).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The following tables show financial assets and financial liabilities recognised at fair value, analysed between the three levels described above:

	Level 1 (000) GBP	Level 2 (000) GBP	Level 3 (000) GBP	Total (000) GBP

Notice to investors in Switzerland

The Fund has appointed CACEIS Bank, Montrouge, Zurich Branch, Switzerland as Representative and Paying Agent of the Fund in Switzerland. Consequently the place of performance and place of jurisdiction for Shares tendered in or distributed from Switzerland has been established at the registered office of CACEIS Bank, Montrouge, Zurich Branch, Switzerland in Zurich. Investors in Switzerland may therefore place application and redemption orders and may receive information on the Sub-Funds at the offices of:

CACEIS Bank, Montrouge, Zurich Branch, Switzerland
Bleicherweg 7,
CH-8027 Zurich
Switzerland

In addition, Swiss investors may obtain copies of the Prospectus, Key Information Document, Articles of Incorporation, Report and Accounts and interim reports, list of purchases and sales, as well as other publications of the Fund, free of charge from the Swiss Representative and Paying Agent:

CACEIS Bank, Montrouge, Zurich Branch, Switzerland
Bleicherweg 7,
CH-8027 Zurich
Switzerland

All notices and information requiring publication in Switzerland will be published on the electronic platform www.fundinfo.com. Any pending changes to the Prospectus may be listed on our website; see www.ninetyone.com for further details.

Notice of Meeting

Ninety One Global Strategy Fund
Société d'investissement à capital variable
49, Avenue J.F. Kennedy
L-1855 Luxembourg
R.C.S.: B139420
(the 'Company')

Convening Notice

Dear Shareholder,

Notice is hereby given and you are invited to participate in the

ANNUAL GENERAL MEETING

of Shareholders of the Company which will be held at 4 p.m. (CET) at 49 Avenue J.F. Kennedy L-1855 Luxembourg, on 12 June 2025, with the following agenda:

AGENDA

1. Presentation of the Report of the Board of Directors.
2. Presentation of the Report of the Auditor.
3. Approval of the audited financial statements for the year ended 31 December 2024.
4. Allocation of the net results for the year ended 31 December 2024.
5. Discharge of Directors with respect to the performance of their duties during the year ended 31 December 2024.
6. To re-elect as Directors for a term ending at the next Annual General Meeting to be held in 2025:
 - Mr. Grant Cameron;
 - Mr. Gregory Cremen;
 - Mr. Matthew Francis;
 - Ms. Kim McFarland;
 - Mr. Claude Niedner
7. To appoint PricewaterhouseCoopers, Société coopérative as Auditor of the Company for a term ending at the next Annual General Meeting to be held in 2026.
8. To vote upon payment of total combined remuneration of the Directors up to but not exceeding USD 200,000 to be apportioned between the re-elected Directors, with no single Director receiving more than USD 35,000 for the period from this Annual General Meeting to the next Annual General Meeting to be held in 2025.
9. Any other business.

Notice of Meeting (continued)

Voting

The Annual General Meeting may validly deliberate on the items of the agenda without any quorum requirement and the resolution on each item of the agenda may validly be passed by the majority of the votes validly cast at such Annual General Meeting. Each share is entitled to one vote.

Voting arrangements

1. A shareholder entitled to participate and vote at the Annual General Meeting may do so by appointing the Chairman as proxy to attend and to vote instead of them.
2. Please be advised that only shareholders on record by 4:00p.m. (CET) on 06 June 2025 may be entitled to vote at this Annual General Meeting.
3. Should you not be able to attend this Annual General Meeting, you are kindly requested to date, sign and return the Form of Proxy to the registered office of the Company at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, by fax on (+352) 464 010 398, by email to luxembourg-domiciliarygroup@statestreet.com or by mail in the enclosed business reply envelope, no later than 4:00p.m. (CET) on 10 June 2025.
4. Copies of the Annual Report & Accounts for the Company can be found on our website www.ninetyone.com. If you would like to request a printed copy, free of charge, please contact us on +44 (0)20 3938 1800 or by email to enquiries@ninetyone.com.

By order of the Board,

Ninety One Global Strategy Fund

Chairperson, 24 April 2025

Sustainable Finance Disclosure Regulation (SFDR) disclosure (unaudited)

The Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector, known as the “Sustainable Finance Disclosure Regulation” (the “SFDR”), seeks to create a regulatory framework around sustainable investment in the EU. Amongst other requirements, it mandates disclosures on how sustainability-related financial risks are managed and, for products promoting certain environmental or social characteristics or objectives, how those characteristics or objectives are met.

The accompanying Regulation (EU) 2020/852, the “EU Taxonomy Regulation”, introduces a framework that defines what can be considered an ‘environmentally sustainable economic activity’ based on certain criteria. Certain financial products (including funds) are required to disclose against the Taxonomy criteria on how ‘aligned’ their investments are with these criteria, or otherwise indicate that they do not take the Taxonomy criteria into account.

Both the above Regulations require disclosure in the ‘periodic reports’ of the relevant financial products relating to the above requirements, which is provided below.

Article 6

Funds: All Sub-Funds of the Global Strategy Fund with the exception of the ones mentioned below

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as per the EU Taxonomy Regulation.

Article 8

Please refer to Annex IV for these funds:

American Franchise Fund
Asia Dynamic Bond Fund
Asia Pacific Franchise Fund
Emerging Markets Blended Debt Fund
Emerging Markets Corporate Debt Fund
Emerging Markets Hard Currency Debt Fund
Emerging Markets Investment Grade Corporate Debt Fund
Emerging Markets Local Currency Debt Fund
Emerging Markets Local Currency Dynamic Debt Fund
Emerging Markets Local Currency Total Return Debt Fund
Emerging Markets Sustainable Blended Debt Fund
Emerging Markets Sustainable Equity Fund
European Equity Fund
Global Franchise Fund
Global Macro Allocation Fund

Sustainable Finance Disclosure Regulation (SFDR) disclosure (unaudited)

Global Managed Income Fund
Global Quality Dividend Growth Fund
Global Quality Equity Fund
Global Sustainable Equity Fund
Global Credit Income Fund
Latin American Equity Fund
Latin American Corporate Debt Fund

Article 9

Please refer to annex V for:
Global Environment Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: American Franchise Fund

Legal entity identifier: 2138006273FO5D85L614

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:** _____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _____%

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile or all-scope carbon footprint lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2024	84.0	191.2	-56%

The Sub-Fund maintained a carbon profile that is 56% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Nestle, Microsoft & Alphabet.

The 5 largest contributors to the sub-fund's carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Nestle (2.27%)
- O'Reilly Automotive (1.87%)
- Edwards Lifesciences (2.64%)
- Booking Holdings (2.99%)
- Stryker Corp (2.47%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	47.5	237.9	-80%
		2022	59.1	274.3	-82%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2024	11,927.5	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030 versus a 2018 baseline year.
Carbon footprint	Scope 1, 2 & 3 Carbon Footprint Contribution tCO2e/m € invested	2024	49.9	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2024	354.0	ASML was the largest contributor to the Sub-Fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Microsoft Corp Common Stock Usd.00000625	Information Technology	9.3	United States
Alphabet Inc Common Stock Usd.001	Communication Services	9.0	United States
Autodesk Inc Common Stock Usd.01	Information Technology	4.5	United States
Texas Instruments Inc Common Stock Usd1.0	Information Technology	4.2	United States
Charles Schwab Corp/The Common Stock Usd.01	Financials	4.0	United States
Automatic Data Processing Inc Common Stock Usd.1	Industrials	3.6	United States
Intuit Inc Common Stock Usd.01	Information Technology	3.6	United States
Dolby Laboratories Inc Common Stock Usd.001	Information Technology	3.6	United States
Zoetis Inc Common Stock Usd.01	Health Care	3.4	United States
Monster Beverage Corp Common Stock Usd.005	Consumer Staples	3.3	United States
Adobe Inc Common Stock Usd.0001	Information Technology	3.0	United States
Diageo Plc Common Stock Gbp.2893518	Consumer Staples	3.0	United Kingdom
S&P Global Inc Common Stock Usd1.0	Financials	3.0	United States
Costar Group Inc Common Stock Usd.01	Real Estate	2.8	United States
Visa Inc Common Stock Usd.0001	Financials	2.7	United States

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	95.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	5.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

GICS Sector	GICS Industry	% Assets
Information Technology	Software	26.0
Financials	Capital Markets	11.9
Health Care	Health Care Equipment & Supplies	11.5
Communication Services	Interactive Media & Services	9.0
Information Technology	Semiconductors & Semiconductor Equipment	6.7
Consumer Staples	Beverages	6.3
Health Care	Life Sciences Tools & Services	4.3
Industrials	Professional Services	3.6

Health Care	Pharmaceuticals	3.4
Real Estate	Real Estate Management & Development	2.8
Financials	Financial Services	2.7
Consumer Discretionary	Hotels Restaurants & Leisure	2.7
Consumer Staples	Food Products	2.5
Health Care	Health Care Technology	2.3
Consumer Discretionary	Specialty Retail	2.1
Information Technology	It Services	0.8

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

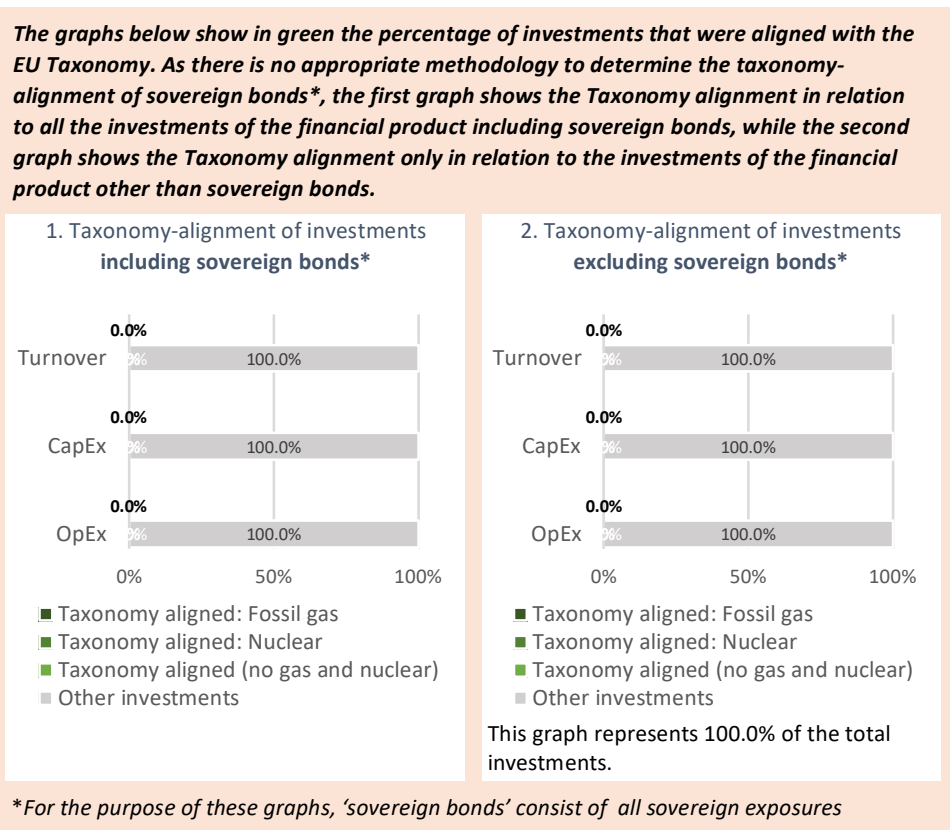

☐ in fossil gas ☐ in nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Year	EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
2023	Transitional activities	0.0
	Enabling activities	0.0
2022	Transitional activities	0.0
	Enabling activities	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
- and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment.

Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2024), the investment team engaged with 15 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Booking Holdings	Consumer Discretionary	Since we first engaged with Booking Holdings on their climate change strategy in November 2020, they have published a Climate Action Report, disclosed to the CDP, and have set SBTi-approved net zero targets. Additionally, they are currently considering incorporating climate targets into executive remuneration.
FactSet Research	Financials	Since we first engaged them on their climate change strategy in June 2022, FactSet have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions, seeing a 12% reduction from 2019, conducting their first scope 3 inventory, and setting a net zero by 2040 target. Having encouraged them to set SBTi-validated decarbonisation targets, we were happy to see that in October 2024 FactSet's 2030 scope 1, 2 and 3 targets were validated by the SBTi.
Monster Beverage	Consumer Staples	Since our initial engagement with the company in October 2022, Monster has begun reporting carbon emissions, disclosing to the CDP, and has introduced Scope 1 & 2 targets. These targets are expected to be verified by the SBTi no later than 2026. Although our initial letter was not directly acknowledged, they have now addressed all the action points we originally raised. We will continue to encourage them in making further progress on managing this material risk, for example by engaging them to set interim targets.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

How did this financial product perform compared with the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Dynamic Bond Fund

Legal entity identifier: 213800NEGZH7ZICLLZ03

Environmental and/or social characteristics

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

●○ ☒ No

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question,

related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there are no investments in excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	2024	71.0	<p>The proportion is well above the required 50% threshold, highlighting the tilt of issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country and sector.</p> <p>As ESG factors are typically structural in nature, this aligns with the Investment Manager's philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.</p>
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	2024	0.0	<p>Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.</p>

● **...and compared to previous periods?**

The Sub Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

Indicator	Metric	2022	2023
Proportion of investments in borrowers with proprietary bottom-up ESG	%	70.9	85.0

scores between 51-100			
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	0.0	0.0

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO ₂ e	2024	19,663.4	The majority of the Sub-Fund's emissions understandably come from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). The emissions are concentrated in a small proportion of issuers; the top 10 issuers by financed emissions account for <20% of the Sub-Fund's NAV but >75% of its financed emissions.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2024	529.5	The majority of the Sub-Fund's carbon footprint understandably comes from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower footprint. The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for c.18% of the Sub-Fund's NAV but c.76% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2024	1,440.4	The majority of the Sub-Fund's intensity understandably comes from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower GHG intensity. The GHG intensity is concentrated in a small proportion of issuers; the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >65% of its GHG intensity.

Due to the incompatibility of combining emissions of corporate and sovereign issuers, here only corporate bond emissions are considered and grossed up for fair comparison vs. the Sub-Fund.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Export-import Bank Of Korea 2.5 Jun 29 41	Quasi-sov	2.1	South Korea
Greenko Solar Mauritius Ltd 5.95 Jan 14 25	Utilities	2.0	India
Aia Group Ltd 5.375 Apr 05 34	Financial	2.0	Hong Kong
Star Energy Geothermal Darajat 4.85 Oct 14 38	Utilities	2.0	Indonesia
Korea Development Bank/the 4.25 Sep 08 32	Quasi-sov	2.0	South Korea
Adani Electricity Mumbai Ltd 3.949 Feb 12 30	Utilities	1.9	India
Genm Capital Labuan Ltd 3.882 Apr 19 31	Consumer	1.9	Malaysia
Kasikornbank Pcl/hong Kong 3.343 Oct 02 31	Financial	1.8	Thailand
Bank Negara Indonesia Persero 4.3 Mar 24 73	Financial	1.8	Indonesia

Sands China Ltd 5.4 Aug 08 28	Consumer	1.7	Macao
Pakistan Government Internatio 6 Apr 08 26	Sovereign	1.6	Pakistan
Medco Bell Pte Ltd 6.375 Jan 30 27	Oil & Gas	1.6	Indonesia

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with Sub-Fund's promoted environmental or social characteristics	71.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	29.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer	12.3
Financial	33.0
Industrial	4.7
Infrastructure	2.4
Metals & Mining	4.9
Oil & Gas	3.6
Pulp & Paper	1.3
Quasi-sov	6.8
Real Estate	3.1
Sovereign	7.1
Tmt	5.8

Transport	0.4
Utilities	13.4

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

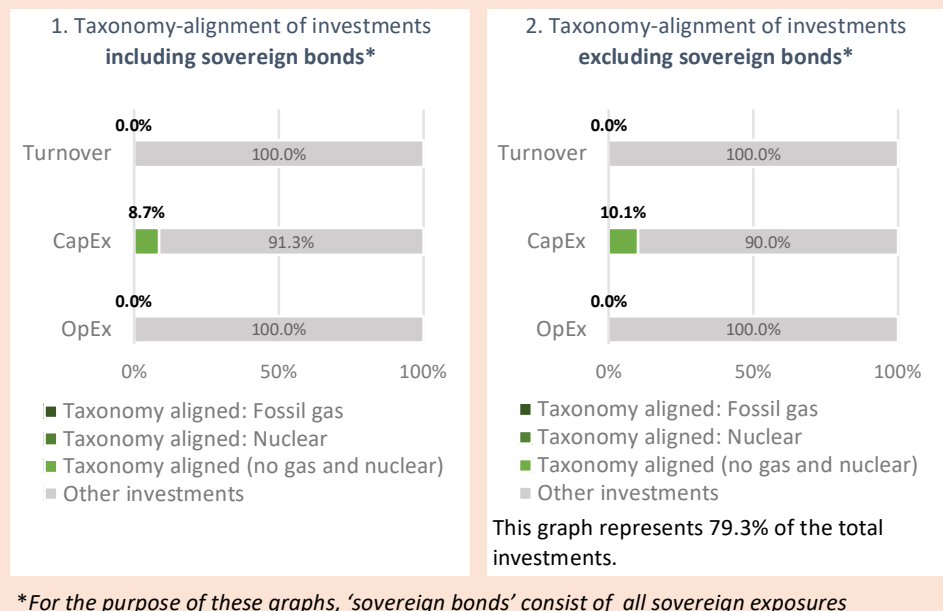

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- ☐ Yes:
- ☐ in fossil gas ☐ in nuclear energy
- ☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Sovereign exposure accounts for 20.7% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers ('sovereign exposure') are exposed to environmentally sustainable economic activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
	2022	2023
Transitional activities	0.0	0.0
Enabling activities	0.0	0.1

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.
- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. With regards to corporate bond issuers, the Investment Manager's approach to engagement includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager's engagement is to improve a company's overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly, to adopt Paris-alignment targets and good governance practices. Engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Pacific Franchise Fund

Legal entity identifier: 213800LUPSVZ4YRLGV11

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

● ● ☐ Yes

● ○ ☒ No

☐ It made **sustainable investments with an environmental objective:** %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile or all-scope carbon footprint lower than the Sub-Fund's benchmark) by making investments in companies that meet the

standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2024	77.9	489.1	-84%

The Sub-Fund maintained a carbon profile that is 84% lower than the broader market. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were Samsung Electronics, Taiwan Semiconductor Manufacturing Company, ASML.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (4.66%)
- Vietnam Dairy (2.95%)
- Meituan Dianping (5.57%)
- Kone (1.93%)
- Pernod Ricard (1.61%)

● **...and compared to previous periods?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	98.9	608.7	-84%
		2022	123.6	658.6	-81%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2024	4,131.4	Samsung Electronics was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.
Carbon footprint	Scope 1, 2 and 3 Carbon Footprint Contribution tCO2e/m € invested	2024	77.9	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2024	434.4	Taiwan Semiconductor Manufacturing Company was the largest contributor to the sub-fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Consumer Staples	Personal Care Products	3.5
Communication Services	Entertainment	3.3
Health Care	Biotechnology	3.2
Industrials	Machinery	1.9
Consumer Discretionary	Textiles Apparel & Luxury Goods	1.8

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

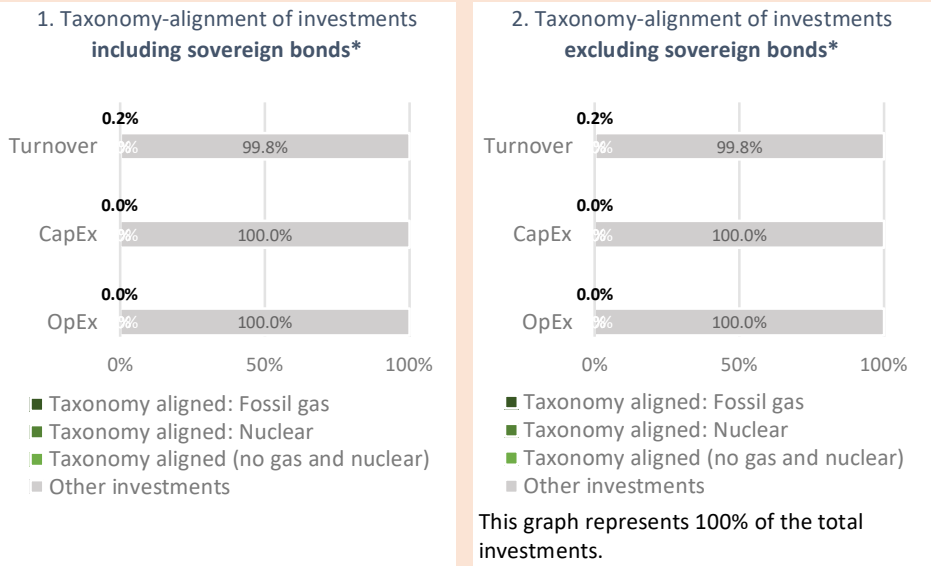

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.2

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Year	EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
2023	Transitional activities	0.0
	Enabling activities	0.2
2022	Transitional activities	0.0
	Enabling activities	0.0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics and
- cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments; and

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund’s portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2024), the investment team engaged with 7 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Hangzhou Tigermed Consulting	Health Care	Since our engagement with Tigermed on climate change strategy in September 2022, the company has made meaningful progress. They have disclosed Scope 1 & 2 emissions, established an ESG Committee overseen by the Chairman and Chief Compliance Officer, and set short- and long-term targets. By 2025, they aim to reduce per capita greenhouse gas emissions by 15% (vs. 2019) and they have introduced environmental KPIs, reviewed annually by the Board of Directors. While they do not yet have SBTi-verified targets, they remain open to aligning future decarbonisation goals with this global standard.
NetEase	Communication Services	Since we began engaging them in September 2021, NetEase has taken important steps to strengthen its climate governance and transparency. They have disclosed Scope 1, 2, and 3 emissions, they have established an ESG Committee, and they have implemented the TCFD framework, aligning with global best practices in assessing and disclosing climate-related risks. They have also disclosed to the CDP and received a B rating, and are considering whether to incorporate ESG-related KPIs within remuneration. So, whilst NetEase are currently still finalising a roadmap for setting SBTi-targets, all of these developments mark positive steps in NetEase's management of climate risks.
Samsung Electronics	Information Technology	<p>Since starting our engagement in March 2022, we have been comforted by the progress Samsung has made in managing this material risk, namely:</p> <ul style="list-style-type: none"> • Publishing an environmental strategy and committing in part to Net Zero by 2050; • Setting internal interim targets for Scope 1 & 2 emissions, including for the semiconductor division, which makes up the bulk of these,; • Setting interim Scope 3 emissions targets for certain divisions as they work on developing broader company-wide Scope 3 targets. <p>We will continue to engage them on publicly disclosing interim Scope 1 & 2 emissions targets for their semiconductor division, incorporating Scope 3 emissions in their Net Zero commitment, and developing a transition plan that is aligned with the 1.5°C global warming limit.</p>

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Blended Debt Fund

Legal entity identifier: 213800P9L93YEXUHBG67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It promoted **Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the portfolio are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In

addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3. During the reporting period, The Sub-Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score. In addition, the Investment Manager can confirm that there are no investments in excluded business areas or activities prohibited for corporate bond issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Emerging Markets Corporate Borrowers

Indicator	Metric	Year	Value	Commentary
Proportion of investments in Emerging Markets Corporate Borrowers with proprietary sector specific ESG scores between 51-100	%	2024	90	There is a substantial skew towards issuers scoring above 50. The distribution of issuers with favourable ESG scores is diversified by region, country and sector.
Proportion of investments in Emerging Markets Corporate Borrowers in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria	%	2024	0.0	Given the Sub-Fund has zero exposure to prohibited issuance, the Investment Manager has met the requirements of this sustainability indicator. This is constantly assessed through a deep understanding of the issuers owned in the Sub-Fund.

Emerging Markets Sovereign Borrowers

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	2024	70.0	The sub-fund has exposure to 70.0% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score. Thus, the characteristics promoted by this financial product have been met.
Proportion of investments in Emerging	%	2024	0.0	The Sub-Fund has 0% exposure to Sovereign borrower's with a -3 ESG

Markets Sovereign Borrowers rated -3 as per the Investment Manager's ESG trend scores				trend score. Thus, the characteristics promoted by this financial product have been met.
---------------------------------------------------------------------------------------------------------	--	--	--	---------------------------------------------------------------------------------------------------

*Benchmark in this context refers to the sovereign component of the Sub-Fund's performance comparison benchmark: JPMorgan GBI-EM Global Diversified Index (Net of Tax Return) and the JPMorgan EMBI Global Diversified Index.

● **...and compared to previous periods?**

The Sub-Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

Emerging Markets Corporate Borrowers

Indicator	Metric	2022	2023
investments in Emerging Markets Corporate Borrowers with proprietary sector specific ESG scores between 51-100	%	76.0	80.0
investments in Emerging Markets Corporate Borrowers in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria	%	0.0	0.0

Emerging Markets Sovereign Borrowers

Indicator	Metric	2022	2023
investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	N/A [#]	66.8

Proportion of investments in borrowers rated - 3 as per the Investment Manager's ESG trend scores.	%	0.5	0.0%
----------------------------------------------------------------------------------------------------	---	-----	------

#The sustainable indicator was not considered for the Sub-Fund during this time.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

Emerging Markets Corporate Borrowers

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO2e	2024	76,947.1	The level of financed emissions in the Sub-Fund is higher than the previous 12 month period as a result of the increased size of the base

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				value of the sub-fund and the higher asset allocation towards corporates. More generally, the sub-fund continues to be skewed towards issuers with lower emissions intensity and overall intensity levels have decreased over the period. .
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2024	926.6	The carbon footprint is concentrated in a small proportion of issuers;over half the carbon footprint comes from 5 corporate holdings which make up 2.51%of the portfolio NAV.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2024	1,606.8	The carbon intensity from corporate companies is concentrated in a small proportion of issuers; the top 5 emmitters contibute 44% of carbon intensity which make up 2.51% of the portfolio NAV.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Emerging Markets Sovereign Borrowers

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	Scope 1 and 2GHG intensity of investee countries	2024	186.9	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per EURm of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between

				datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	2024	0.0%	The sub-fund has no exposure to countries subject to social violations.

Sovereign/quasi portion of the portfolio represented 83.7%

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Thailand Government Bond 2.65 Jun 17 28	Sovereign	2.1	Thailand
Czech Republic Government Bond 5.75 Mar 29 29	Sovereign	1.8	Czech Republic
Brazil Notas Do Tesouro Nacion 10 Jan 03 25	Sovereign	1.5	Brazil
Malaysia Government Bond 3.906 Jul 15 26	Sovereign	1.3	Malaysia
China Government Bond 2.88 Feb 25 33	Sovereign	1.3	China
Republic Of South Africa 8 Jan 31 30	Sovereign	1.3	South Africa

Czech Republic Government Bond 3 Mar 03 33	Sovereign	1.3	Czech Republic
Malaysia Government Bond 3.582 Jul 15 32	Sovereign	1.2	Malaysia
Republic Of South Africa 8.5 Jan 31 37	Sovereign	1.2	South Africa
Egypt Government International 7.625 May 29 32	Sovereign	1.2	Egypt
Czech Republic Government Bond 4.9 Apr 14 34	Sovereign	1.2	Czech Republic
China Government Bond 2.27 May 25 34	Sovereign	1.1	China
Qatarenergy 3.3 Jul 12 51	Quasi	1.0	Qatar
Bermuda Government Internation 5 Jul 15 32	Sovereign	1.0	Bermuda
Colombian Tes 6 Apr 28 28	Sovereign	1.0	Colombia

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Portfolio Value
#1 Investments aligned with sub-fund's promoted environmental or social characteristics	63.8
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	36.2

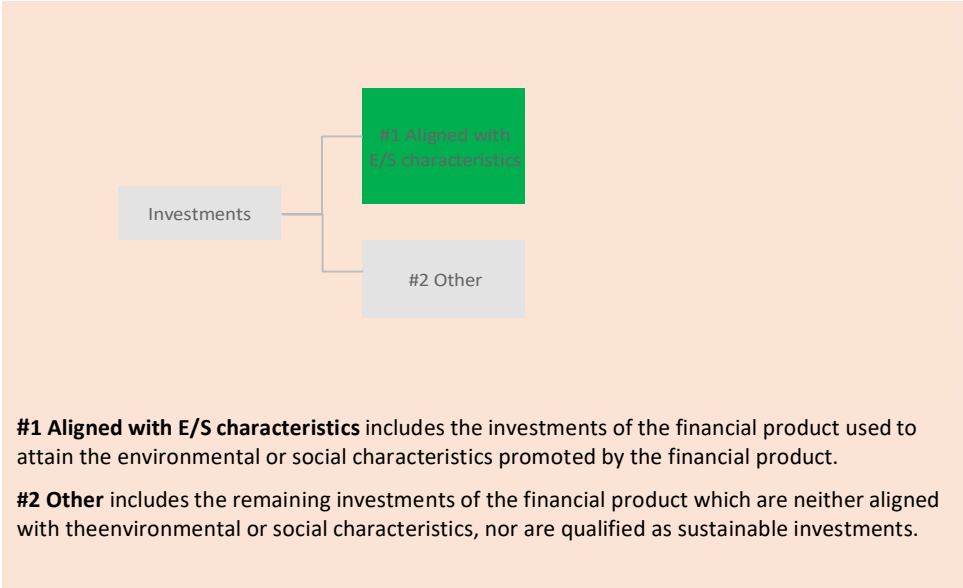

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Sector	% Assets
Corporate	13.5
Quasi	9.9
Sovereign	72.2

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

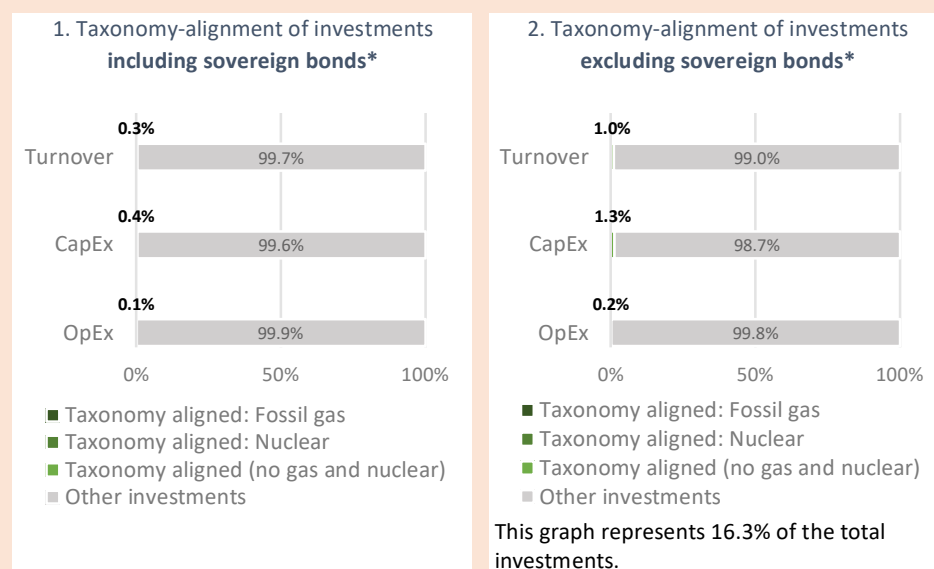

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

Sovereign exposure accounted for 83.7% of the total portfolio value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Portfolio Value
Transitional activities	0.0
Enabling activities	0.0

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
	2022	2023
Transitional activities	0.0	0.0
Enabling activities	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in any sustainable investments within the meaning of Article 2(17) SFDR.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer

companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

With regards to corporate debt, the Investment Manager's approach to engagement with issuers includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager's engagement is to improve a company's overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly, to adopt Paris-alignment targets and good governance practices.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Corporate Debt Fund

Legal entity identifier: 213800UKABOFL2FFQV69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition the

Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	2024	66.0	The proportion is well above the required 50% threshold, highlighting the tilt towards issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country, and sector. As ESG factors are typically structural in nature, this aligns with the Investment Manager's philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	2024	0.0	Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.

● **...and compared to previous periods?**

Indicator	Metric	2022	2023
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	80.2	86.4

Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	0.0	0.0
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	-----	-----

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO ₂ e	2024	2,151,214.9	The emissions are concentrated in a small proportion of issuers; the top 10 issuers by financed emissions account for <15% of the Sub-Fund's NAV but >40% of its financed emissions.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2024	1,252.1	The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for <15% of the Sub-Fund's NAV but >40% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2024	2,249.2	The Sub-Fund's emissions intensity is concentrated in a small proportion of issuers: the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >35% of its GHG intensity.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Arabian Centres Sukuk Ii Ltd 5.625 Oct 07 26	Real Estate	1.6	Saudi Arabia
Cima Finance Dac 2.95 Sep 05 29	Metals & Mining	1.6	Chile

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

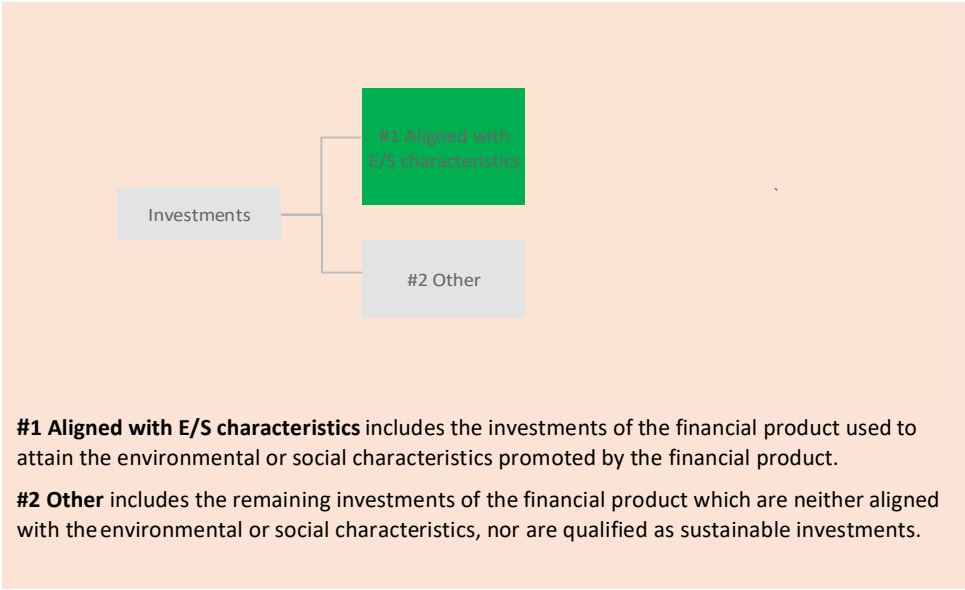

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	66.0
#2 Other, i.e., investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	34.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Utilities	15.7

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

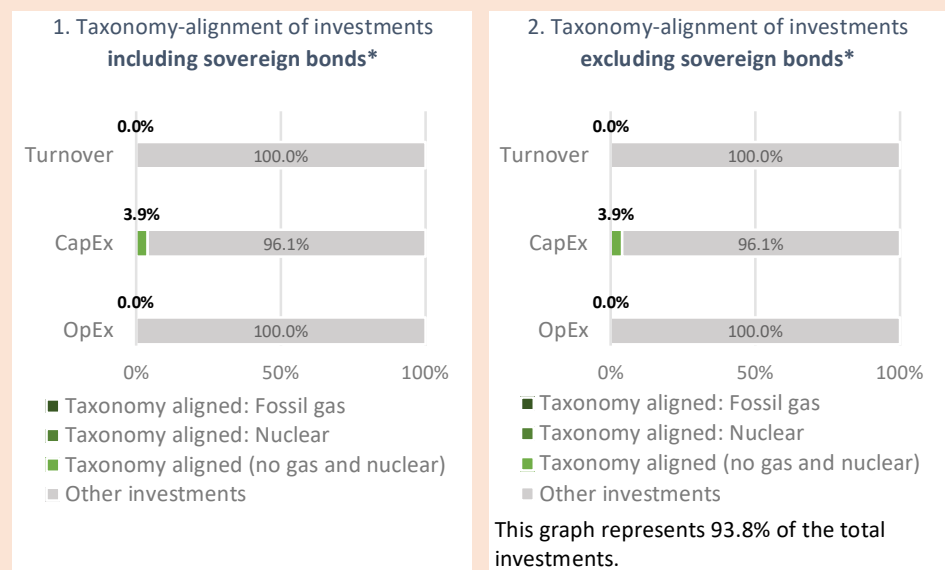

☐ in fossil gas ☐ in nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.;

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated as per the Investment Manager's sustainability framework. With regards to corporates, the Investment Manager's approach to engagement with issuers includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager's engagement is to improve a company's overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly to adopt Paris-alignment targets and good governance practices. The nature of engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Hard Currency Debt Fund

Legal entity identifier: 213800EZ65Z2M6MXXZ41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

100% of issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the

question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	Dec 2024	60.0	The Sub-Fund has exposure to 60 of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score.
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	Dec 2024	0.2	There have been no new long investments in issuers scoring -3. Following the secondary market in Venezuela opening up, we have exited the residual Sovereign bond position within the portfolio, a 0.2% defaulted quasi position remains, which we endeavour to sell when we can achieve fair value for our clients.

*Benchmark in this context refers to the Sub-Fund's performance comparison benchmark: JP Morgan EMBI Global Diversified Index.

● **...and compared to previous periods?**

Indicator	Metric	2022	2023
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	N/A#	69.7
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	0.2	0.3

The sustainable indicator was not considered for the Sub-Fund during this time.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	Dec 2024	170.3	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per million of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	Dec 2024	0.0%	The Sub-Fund has no exposure to social violations.

Sub-Fund exposure to sovereign/quasi issuers = 89.1%

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The

extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply intergated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

How did this financial product perform compared with the reference benchmark?

N/A

How did this financial product perform compared with the broad market index?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Investment Grade Corporate Debt Fund

Legal entity identifier: 2138004JBACWLKEABL54

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the

Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	2024	62.0	The proportion is well above the required 50% threshold, highlighting the tilt towards issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country, and sector. As ESG factors are typically structural in nature, this aligns with the Investment Manager's philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	2024	0.0	Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.

● **...and compared to previous periods?**

Indicator	Metric	2022	2023
Proportion of investments in Emerging Markets Corporate Borrowers with proprietary sector specific ESG scores between 51-100	%	71.9	87.0

Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	0.0	0.0

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO ₂ e	2024	261,942.8	The emissions are concentrated in a small proportion of issuers in higher emitting sectors (such as oil & gas, metals & mining, and utilities), with the top 10 issuers by financed emissions accounting for <15% of the Sub-Fund's NAV but >50% of its financed emissions.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2024	705.2	The carbon footprint is concentrated in a small proportion of issuers in higher emitting sectors (such as oil & gas, metals & mining, and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower carbon footprint. The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for <15% of the Sub-Fund's NAV but >50% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2024	1,587.6	Although the Sub-Fund has a relatively higher exposure to heavier emitting sectors (such as oil & gas, metals & mining, and utilities), it is skewed towards issuers with a lower GHG intensity within those sectors. Furthermore, the Sub-Fund's emissions intensity is concentrated in a small proportion of issuers: the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >40% of its GHG intensity.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

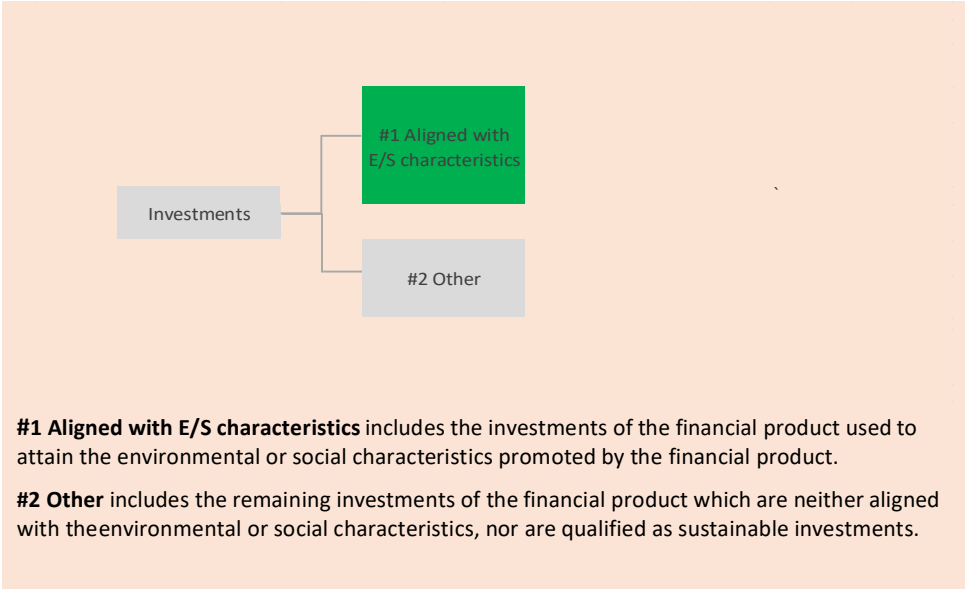

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	62.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	38.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Sector	% Assets

Industrial	8.1
Infrastructure	5.5
Metals & Mining	8.3
Oil & Gas	7.1
Pulp & Paper	2.1
Real Estate	5.2
Sovereign	0.7
Tmt	5.9
Utilities	21.5

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

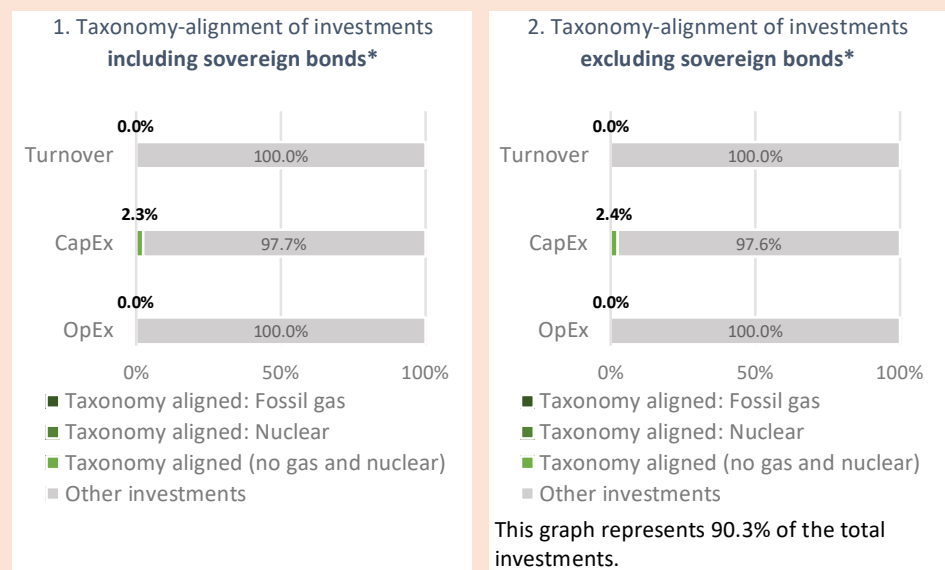

☐ in fossil gas ☐ in nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Sovereign debt exposure accounted for 9.7% of the total Sub-Fund value

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers ('sovereign exposure') are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.
- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. With regards to corporate bond issuers, the Investment Manager's approach to engagement includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager's engagement is to improve a company's overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies.

The Investment Manager encourages investee companies to sign up to the Science Based Targets initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly to adopt Paris-alignment targets and good governance practices. The nature of engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and therefore record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Local Currency Debt Fund

Legal entity identifier: 213800FLDBPITHT4E408

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:**

____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**____%

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers. Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3, as measured using the Investment Manager's proprietary sustainability framework. During the reporting period, The Sub-Fund

has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score. Thus, the characteristics promoted by this financial product have been met.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	Dec 2024	73.0	The sub-fund has exposure to 73.0% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	Dec 2024	0.0	The sub fund has 0% exposure to Sovereign borrowers with a -3 ESG trend score.

*Benchmark in this context refers to the Sub-Fund's performance comparison benchmark: JP Morgan GBI-EM Global Diversified Index (Net of Tax Return).

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub Funds ESG metrics have improved year on year, and have complied with the indicators set above.

Indicator	Metric	2022	2023	2024
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	N/A [#]	66.9	73.0
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	0.8	0.0	0.0
The extent of the positive tilt* of the Sub-Fund relative to its benchmark	%	-1.0	N/A [#]	N/A [#]

[#]The sustainable indicator was not considered for the Sub-Fund during this time.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	Dec 2024	213.0	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per million of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	Dec 2024	0.0%	The Sub-Fund has no exposure to social violations.

Sub-Fund exposure to sovereign/quasi issuers =96.9%

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Thailand Government Bond 2.65 Jun 17 28	Sovereign	3.7	Thailand

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	73.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	27.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	% Assets
Corporate	1.8
Quasi	2.4
Sovereign	91.5

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

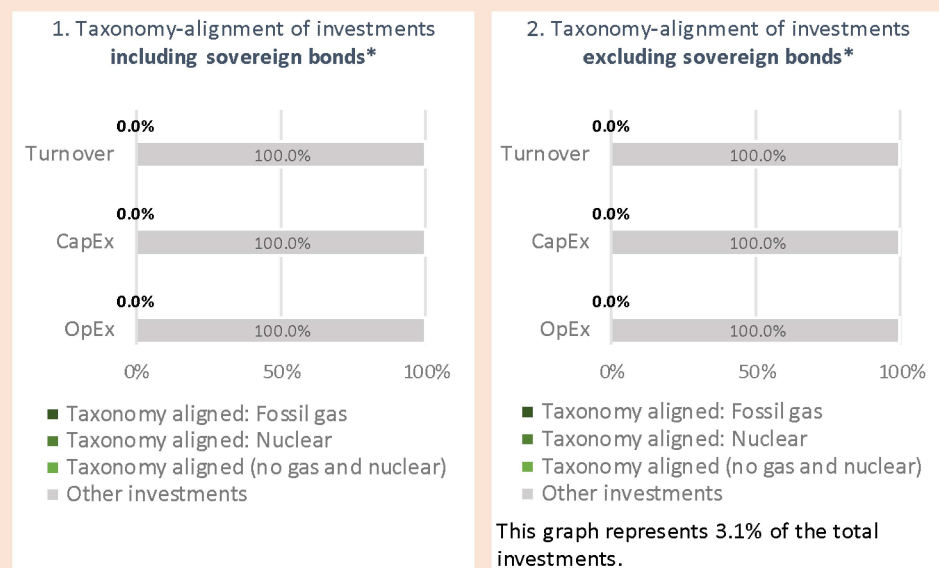

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the “greenness” of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Sovereign exposure accounted for 96.9% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers ('sovereign exposures') are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value

Enabling activities	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023
Transitional activities	0.0	0.0
Enabling activities	0.0	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Local Currency Dynamic Debt Fund

Legal entity identifier: 213800WJ8RS9FV2T2337

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In

addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3, as measured using the Investment Manager's proprietary sustainability framework. During the reporting period, The Sub Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score.. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Czech Republic Government Bond 5.5 Dec 12 28	Sovereign	1.6	Czech Republic

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	69.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	31.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Sector	% Assets
Corporate	2.3
Quasi	2.4
Sovereign	90.9

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

Sovereign exposure accounted for 97.1% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● What was the share of investments made in transitional and enabling activities?

EU Taxonomy alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
	2022	2023
Transitional activities	0.0	0.0
Enabling activities	0.0	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer

companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Local Currency Total Return Debt Fund

Legal entity identifier: 213800FOR5D4SW9ZK716

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In

addition we can confirm we have made no investment into issuers which score -3 on our ESG trend score. During the reporting period, The Sub-Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score.. Thus, the characteristics promoted by this financial product have been met.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG score that is greater than the lower of 0 or the benchmark* ESG score	%	Dec 2024	81.0	The Sub-Fund has exposure to 81.0% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	Dec 2024	0.0	The Sub-Fund has 0% exposure to Sovereign borrowers with a -3 ESG trend score.

*Benchmark in this context refers to the the Sub-Fund's performance comparison benchmark: JP Morgan GBI-EM Global Diversified Index (Net of Tax Return).

● **...and compared to previous periods?**

The Sub Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

Indicator	Metric	2022	2023
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	N/A [#]	66.9

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	0.0	0.0
The extent of the positive tilt* of the Sub-Fund relative to its benchmark	%	1.0	N/A [#]

[#]The sustainable indicator was not considered for the Sub-Fund during this time.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO ₂ e/million GDP	Dec 2024	176.74	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO ₂ emissions per million of GDP (purchasing power parity) and it incorporates all CO ₂ emissions in the country of question. This is called 'territorial emissions' and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO ₂ emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where	Dec 2024	0.0%	The Sub-Fund has no exposure to social violations.

	applicable national law

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Sustainable Blended Debt Fund

Legal entity identifier: 213800XOLR7T4UJV7379

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of 46.0% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

The Sub-Fund will limit making investments that are not 'sustainable investments' from borrowers with an ESG trend score below 0 to a maximum of 10% and not invest in investments that are not 'sustainable investments' from borrowers with an ESG trend score below -1.

Issuers in the portfolio are scored according to the proprietary sustainability framework for the Sub-Fund, as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating:"what investment strategy does this financial product follow". In addition, the Investment Manager can confirm it has made no investment in issuers with an ESG trend score below -1. Thus the characteristics promoted by this financial product have been met.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric	Year	Value	Commentary
The extent of the positive tilt* of the Sub-Fund relative to its benchmark**	%	2024	87.7	<p>The overall tilt is positive. While the measurement window of a rolling five-year period means the overall tilt could fluctuate over time, in aggregate, the Investment Manager expects the tilt to remain materially positive, given the sustainable-oriented nature of the Sub-Fund.</p> <p>Only sovereign and quasi-sovereign bond issuers are scored in the Sub-Fund. The majority of these issuers have a positive score, with a very small proportion having negative scores. The benchmark scores are more balanced between positive and negative, thus the overall positive tilt predominantly comes from the Sub-Fund's relatively low exposure to issuers with negative scores vs. the benchmark. The positive tilt represented is somewhat lower than expected and not a true reflection of the portfolios positive ESG trend due to the funds investment in sustainable bonds (Green, Social, Sustainable, Supranational) in countries with negative scores (c8.5%).</p>
Proportion of investments that are not 'sustainable investments' from borrowers with an ESG trend score below 0	%	2024	8.0	The Sub-Fund is compliant with the <10% threshold given its exposure is zero.
Proportion of investments that are not 'sustainable	%	2024	0.0	The Sub-Fund is compliant with the 0% threshold given its exposure is zero.

investments' from borrowers with an ESG trend score below -1				
--------------------------------------------------------------	--	--	--	--

*The extent of the positive tilt is measured by comparing the weighted average ESG trend score of the Sub-Fund to that of its benchmark. On average, over a market cycle, the aggregated active weights of positions in borrowers with positive scores will be more than the aggregated active weight of borrowers with negative scores.

** Benchmark in this context refers to the Sub-Fund's performance composite comparison benchmark: 50% JP Morgan GBI-EM Global Diversified Index (Net of Income Tax) + 50% JP Morgan EMBI Global Diversified Index.

● **...and compared to previous periods?**

Indicator	Metric	2022	2023
The extent of the positive tilt of the Sub-Fund relative to its benchmark	%	+38.0	+51.0
Proportion of investments that are not 'sustainable investments' from borrowers with an ESG trend score below 0	%	0.0	0.0
Proportion of investments that are not 'sustainable investments' from borrowers with an ESG trend score below -1	%	0.0	0.0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives. To do this, the Sub-Fund intends to make sustainable investments in bonds whose proceeds are used to finance solutions that address environmental and/or social challenges (e.g., green bonds, social bonds and sustainability-linked bonds). These challenges include climate change, social housing, education and healthcare.

Sustainable investments may also include investments in debt instruments issued by Development Finance Institutions, if the Investment Manager deems these to be sustainable investments.

The Sub-Fund commits to allocating at least 15% of its assets in investments with environmental objectives, social objectives, or a combination of both environmental and social objectives. In essence, that means bonds that are either green bonds, social bonds, sustainable bonds or sustainability-linked bonds, as well as bonds issued by supranationals. As at the reporting date, the Sub-Fund had a 43.6% exposure to sustainable investments, thus it has met the required objective.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the in-depth fundamental analysis on a borrower, the two mandatory principal adverse impact (PAI) indicators have been taken into account when assessing if significant harm is caused by the Sub-Fund's sustainable investments.

The Investment Manager has used quantitative data, where available, and applied a qualitative assessment – based on the Investment Manager's knowledge, experience and judgement – to the quantitative PAI data to form a conclusion which considers the context of the borrower's policies and activities.

Where material adverse impacts are identified, the Investment Manager may engage with a borrower directly in an effort to catalyse change.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights, are considered as part of the application of the Investment Manager's sustainability framework. Third-party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	2024	164.2	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per USm of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called 'territorial emissions' and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	2024	0.0%	The sub-fund has no exposure to countries subject to social violations

Portion of the portfolio in sovereign/quasi issuers = 92.5%

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Colombian Tes 7 Mar 26 31	Sovereign	3.1	Colombia
Malaysia Government Investment 4.662 Mar 31 38	Sovereign	2.1	Malaysia

Brazilian Government Internati 6.25 Mar 18 31	Sovereign	1.3	Brazil

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	87.7
#1A Sustainable investments within the meaning of Article 2(17) SFDR	46.0
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	41.7
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	12.3

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value *
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	6.2
Investments with an environmental objective but not aligned with the Taxonomy	23.4
Investments with a social objective	16.4

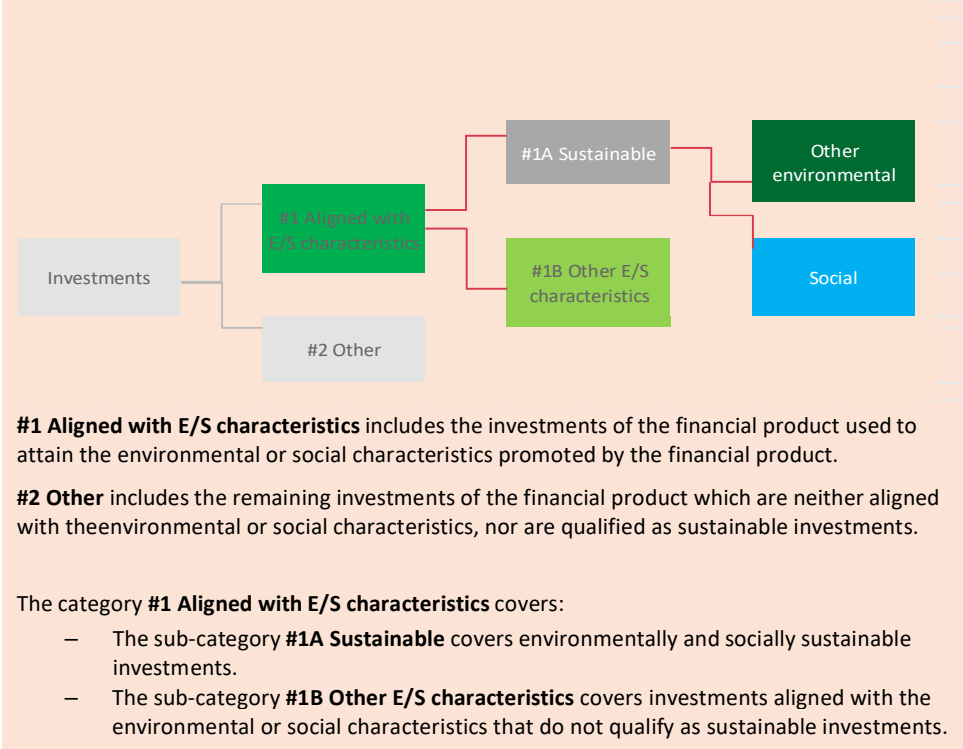

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% Assets
Corporate	4.1
Quasi	14.8
Sovereign	78.7

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

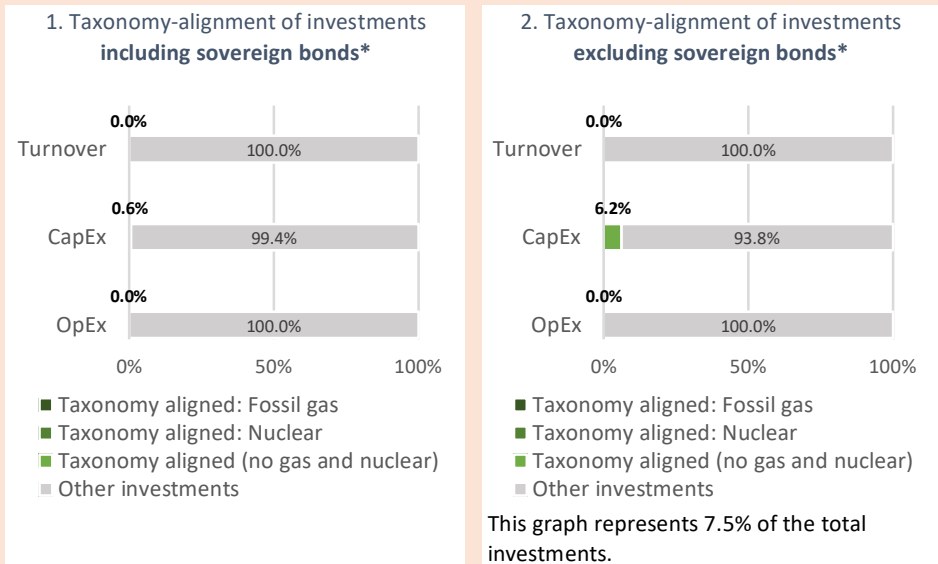

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

Sovereign exposures account for 92.5% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposure’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023
Transitional activities	0.0	0.1
Enabling activities	0.0	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	23.4

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value
Investments with a social objective	16.4

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Other' includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements are typically continual and there is rarely a clearly defined beginning and end date, thus the Investment Manager does not measure (and therefore record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

How did this financial product perform compared with the reference benchmark?

N/A

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Emerging Markets Sustainable Equity Fund

Legal entity identifier: 2138004MWBSGWC7QET33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics**: and while it did not have as its objective a sustainable investment, it had a proportion of 67.1% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding direct investments in certain business groups or activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2024	127.8	The carbon footprint and carbon intensity are both considerably lower than MSCI Emerging Markets.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2024	461.5	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	%	2024	Scope 1 & 2 = 71.4% All Scope 3 categories = 37.1%	There has been an increase in carbon data reporting over the year, driven by a combination of improvements in holdings reporting carbon emissions data and changes in holdings and asset allocation. In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies. We will continue to engage with companies to improve Scope 1 & 2, and all Scope 3 categories’ disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2024	14.3%	There has been a decrease in the percentage of holdings with SBTi approved net zero plans. This has been driven by asset allocation and holdings changes over the year. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria	% of equity	2024	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria.

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, “companies with credible net zero plans” are defined as those companies with plans approved by the Science-Based Target initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives' for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption.

● **...and compared to previous periods?**

Indicator	Metric	2022**	2023*
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	87.2	112.1
Scope 1, 2 and 3 absolute carbon emissions	in tonnes of CO2e		
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	350.7	385.3
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	%	Scope 1 & 2 = 51.4% All Scope 3 categories = 27.0%	Scope 1 & 2 = 44.1% All Scope 3 categories = 23.5%
Percentage of direct equity holdings with credible net zero plans in place***	%	8.1%	20.6%
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	0.0%	0.0%

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023.

**The above carbon disclosure is based on data from companies as at the end of financial year 2020 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2022.

While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

***For the purposes of this reporting, “companies with credible net zero plans” are defined as those companies with plans approved by the Science-Based Target initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

Over 2024, the Sub-Fund saw an increase in the carbon emissions measures. This is driven by a combination of changes in asset allocation within the Sub-Fund as well as changes in carbon emissions information for select companies. New portfolio holding WEG was added to the portfolio over 2024 and is the second largest contributor to carbon footprint and the largest contributor to carbon intensity. While WEG’s emissions are high today, the company is the largest electrical equipment manufacturer in Latin America and has an important role to play in decarbonisation through its high efficiency equipment which achieve efficiency savings and carbon avoided for customers. We continue to engage with the company about plans to reduce their emissions. Samsung Electronics remains a material contributor to the portfolio’s emissions but we note that the company now reports scope 1 & 2 carbon emissions.

Over 2024, the Sub-Fund saw a material increase in the proportion of companies disclosing Scope 1 and 2, and a smaller increase in companies disclosing All Scope 3 carbon emissions figures. This is partly driven by asset allocation changes within the Sub-Fund but also a result of improvements in reporting across portfolio holdings. In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories’ disclosure.

Over 2024, the Sub-Fund saw a reduction in the proportion of companies with credible net zero plans in place. This is a result of the sale of portfolio holdings with SBTi approved net zero plans over the year. In general the progress of emerging market companies in adopting Science Based Target initiative (SBTi) approved net zero plans is slower than developed market companies. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria.

As per the information provided below relating to ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’:

- the carbon avoided for the Sub-Fund increased over the period due to a combination of new companies being added that have positive carbon avoided as well as an increased allocation to existing holdings that have positive carbon avoided. Additionally, there were increases in the positive carbon avoided for certain holdings, in particular, Silergy.
- the percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption measures remained broadly consistent over the period

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, the Sub-Fund can make sustainable investments in companies believed by the Investment Manager to contribute to:

- positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses ‘carbon avoided’ as an indicator to assess, measure and monitor the carbon impact associated with a company.
- supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services

that meet the needs of underserved individuals and businesses delivered in a responsible manner).

- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.
- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Carbon avoided – footprint	in tonnes per CO ₂ e per US\$m invested	2024	79.5	Seven companies (out of 35) in the portfolio produced positive carbon avoided versus six companies in the previous reporting period.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2024	22.9%	Seven companies (out of 35) in the portfolio facilitate financial inclusion versus eight companies in the previous reporting period.
Percentage of direct equity holdings contributing to digital inclusion	% equity	2024	17.1%	Six companies (out of 35) in the portfolio facilitate digital inclusion, consistent with the previous reporting period.
Percentage of direct equity holdings contributing to access to education	% equity	2024	0.0%	There are currently no companies (out of 35) in the portfolio that facilitate access to education consistent with the previous reporting period.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2024	2.9%	One company (out of 35) in the portfolio facilitates healthcare impact, consistent with the previous reporting period.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2024	0.0%	There are currently no companies (out of 35) in the portfolio that facilitate climate adaptation consistent with the previous reporting period.

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

*The above carbon avoided disclosure is based on data from companies as at the end of financial year 2022. This data has been applied to Sub-Fund position weightings as at the end

of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag.

The proportion of investments across the sustainable investments categories has remained stable over the year. The carbon avoided footprint has increased materially over the period as a result of new holdings with positive carbon avoided, an increased allocation to existing holding with positive carbon avoided and an increase in carbon avoided across some holdings over the year.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment. The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweighs the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are taken into account for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2024	4,533.9	These values have been scaled up so that corporate exposure represents the fund’s total value. These carbon measures are dominated by Samsung Electronics and WEG. We continue to engage with Samsung Electronics, one of the largest technology companies in emerging markets, about plans to reduce their emissions and potential to commit to a SBTi target. We are also engaging with WEG, one of the largest electrical equipment manufacturers in Latin America, about plans to reduce their emissions and their net zero by 2050 commitments. Exposure to these companies are deemed not to result in material negative impacts.
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2024	115.0	
GHG Intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2024	495.95	
Exposure to companies active in	Share of investments in companies active in the fossil fuel sector	2024	0.0%	There are no companies active in the fossil fuel sector in the Sub-Fund.

the fossil fuel sector				
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2024	22.4%	Board gender diversity continues to be an important topic for engagement, particularly within emerging markets. We consider diversity and inclusion for portfolio companies as part of stakeholder analysis within the Capitals Framework. There has been a modest increase in the ratio of female to male board members over the period driven by increases across existing holdings including the TSMC and HDFC Bank. These results are consistent with expectations, and deemed not to result in material negative impacts.

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	99.6
#1A Sustainable investments within the meaning of Article 2(17) SFDR	67.1
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	32.9
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.4

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	1.4
Investments with an environmental objective but not aligned with the Taxonomy	22.5
Investments with a social objective	43.3

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

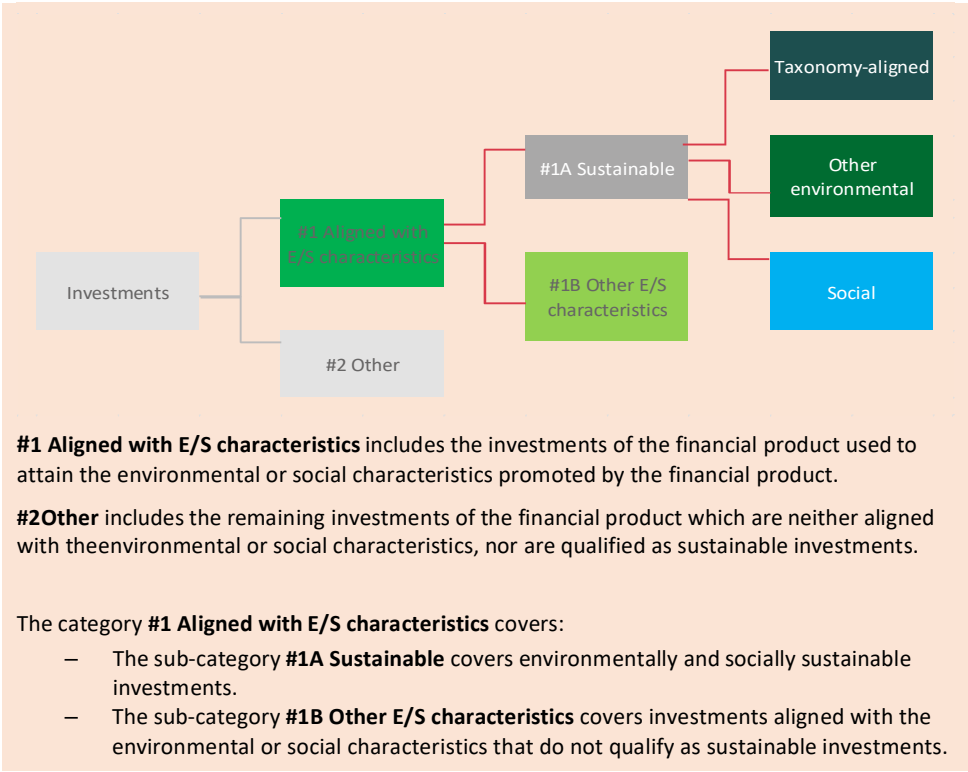

Asset allocation
describes the share of investments in specific assets.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy-aligned.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Gics_Sector	Gics_Industry	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	19.2
Financials	Banks	18.6
Financials	Insurance	12.7

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

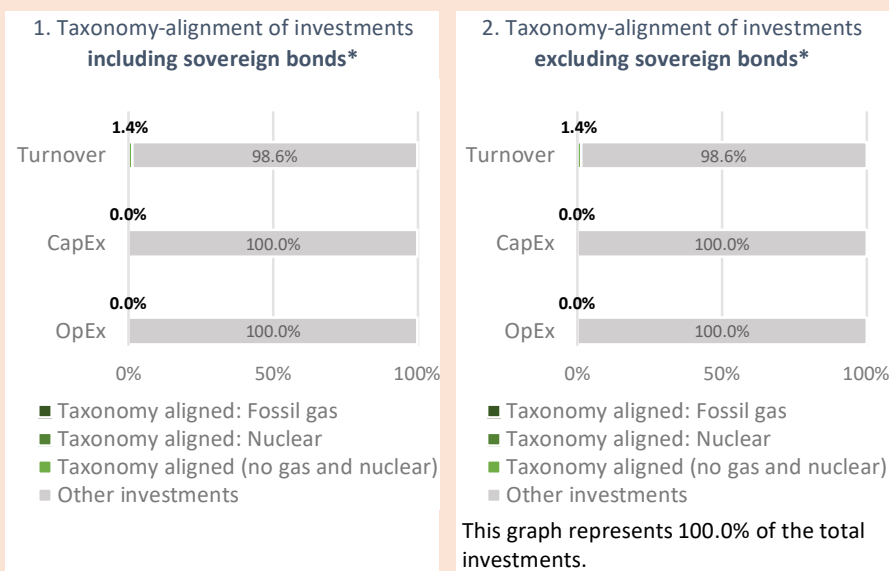

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives

- see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.7

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023
Transitional activities	0.0	0.0
Enabling activities	1.8	0.8

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	
Investments with an environmental objective but not aligned with the Taxonomy (i.e., Other Environmental), weighted by non-Taxonomy aligned revenue	22.5	

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value
Investments with a social objective	43.3

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes (1) investments previously ‘#1 aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset and overnight deposits;

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash or deposits). These investments are not expected to affect the delivery of the sustainable investment objective on a continuous basis as they do not form a material part of the Sub-Fund’s portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it

invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, board effectiveness and diversity and inclusion. For example, the Investment Manager engaged with the vast majority of portfolio holdings on climate change related topics including SBTi target setting, carbon data disclosures and climate change resilience. The Investment Manager also engaged on select topics with certain companies, for example, Leeno Industrial, Delta Electronics and Bank Rakyat on board effectiveness topics and engagements with HDFC, Nu Bank and XP around firm wide diversity and inclusion.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Equity Fund

Legal entity identifier: 213800WYXNEU5CDV6M15

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of 22% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics (i.e. maintaining a lower blended environmental intensity than its benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas.

Given the Investment Manager's focus on these characteristics, the Sub-Fund's blended environmental intensity is lower than the broader market, which is expressed as the Sub-Fund's benchmark. As such, the environmental characteristics promoted by this Sub-Fund have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

	GHG (tonnes/€m)	Waste (tonnes/€m)	Water (m3/€m)
MSCI Europe weighted-average	142.43	4.75	2882.24
Portfolio weighted-average	109.74	3.04	793.82
Relative difference	-23%	-36%	-72%
% of Sub-Fund lower than benchmark weighted-average	77.02%	85.27%	89.39%

As at year-end 2024 (31 December 2024), the Sub-Fund had a blended environmental intensity that was 43.8% lower than the broader market. The blended environmental intensity is a proprietary metric representing an equally weighted combination of greenhouse gas (GHG) emissions intensity*, landfill waste intensity, and water purchased intensity.

The relative blended environmental intensity is an average of the percentage (%) differences in each the three weighted-average environmental intensities (GHG, waste and water) calculated for the Sub-Fund and its benchmark, where the weights represent the size of each holding.

For GHG, waste and water intensities, the percentage of the Sub-Fund invested in companies with an intensity lower than the benchmark’s weighted-average was 77.02%, 85.27% and 89.39% respectively.

*The Investment Manager has used Carbon Direct + First Tier indirect intensity which comprises of Scope 1 & 2 greenhouse gas intensity, plus a company’s first-tier upstream supply chain.

See the question below on ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’ for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, access to education, healthcare impact and climate adaption.

● **...and compared to previous periods?**

	GHG (tonnes/€m)		Waste (tonnes/€m)		Water (m3/€m)	
	2022	2023	2022	2023	2022	2023
MSCI Europe weighted-average	239.8	170.13	4.6	4.09	381.9	2761.62
Portfolio weighted-average	230.0	173.7	4.5	1.99	311.5	576.79
Relative difference	-4%	2%	-3%	-51%	-18%	-79%
% of Sub-Fund lower than benchmark weighted-average	72.2%	79.58%	80.3%	85.18%	80.3%	95.99%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund intends to make sustainable investments in companies believed by the Investment Manager to contribute to:

- Positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses 'carbon avoided' as an indicator to assess, measure and monitor the carbon impact associated with a company.
- Supporting and/or improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- Access to education by providing access to high quality educational and training products and/or services for underserved groups.
- Healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- Climate adaption through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patters and/or acute event-driven climate risks.

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2024	553.4	Six companies (out of 53) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2024	2.0%	One company (out of 53) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2024	2.0%	One company (out of 53) in the portfolio that facilitate access to education.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2024	3.9%	Two companies (out of 53) in the portfolio facilitates healthcare impact.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2024	0.0%	There are currently no companies (out of 53) in the portfolio that facilitate climate adaptation.

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principle adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives. This Do No Significant Harm test is applied to the whole investment.

As detailed in the question below on 'what investment strategy does this financial product follow?' the Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment.

In addition, to mitigate potential negative impact of the Investment Manager's investment decisions on other sustainable investment objectives, the Investment Manager assesses the material negative externalities (i.e., harmful effects) of a potential investment on its stakeholders and, as a result, the Sub-Fund does not invest in certain business groups or activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are considered for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the

International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual company, the following principal adverse impact indicators are currently considered for the Sub-Fund's investments:

Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2024	222,138.3	CRH is a one of the world's largest suppliers of building materials, operating across the construction, infrastructure, and residential sectors. In 2024, it was the largest contributor to the Sub-Fund's GHG emissions and footprint. CRH has articulated a clear commitment to sustainability through its comprehensive framework, focusing on decarbonisation, waste reduction, and water management. The company has set ambitious targets, including a 30% reduction in absolute carbon emissions by 2030, validated by the Science Based Targets initiative (SBTi) in early 2023. Enel, the world's largest private operator in the renewable energy
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m EUR invested	2024	473.0	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m EUR revenue	2024	928.6	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				<p>sector, was the largest contributor to the Sub-Fund's GHG intensity. Enel has made significant strides in advancing its sustainability agenda, focusing on decarbonisation and the transition to renewable energy sources. In 2023, The company has set ambitious targets to reduce its greenhouse gas emissions, aiming for a 59% reduction by 2026 and striving for net-zero emissions by 2040.</p> <p>Exposure to these companies is deemed not to result in material negative impacts.</p>
--	--	--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios. In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	8.3

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value
Investments with a social objective	7.8

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Other' includes (1) investments previously '#1 aligned with E/S characteristics' which are under the Investment Manager's review due to an unforeseen event (e.g. a controversy), and (2) investments, as described in the Sub-Fund's investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics;
- derivatives for hedging, and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments; and

- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund's portfolio. These investments are not expected to affect the promotion of environmental or social characteristics of the Sub-Fund on a continuous basis as they do not form a material part of the Sub-Fund's portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

During the reporting period (12 months to end of December 2024), the European Equity team was involved with six company-specific engagements. These engagements covered a range of issues covering sustainability reporting, governance, remuneration, diversity and inclusion, health and safety and carbon emissions.

The Investment Manager has voted all proxies.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Franchise Fund

Legal entity identifier: 213800ENHEQTIA6IRV12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☒ ☐ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile or all-scope carbon footprint lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2024	59.0	300.0	-80%

The Sub-Fund maintained a carbon profile that is 80% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Samsung Electronics , Nestle and Microsoft.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (1.18%)
- Nestle (2.70%)
- St James Place (1.24%)
- Edwards Lifesciences (2.28%)
- Beiersdorf (3.64%)

● **...and compared to previous periods?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	63.8	379.8	-83%
		2022	80.7	442.1	-82%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2024	486,767.5	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030 versus a 2018 baseline year.
Carbon footprint	Scope 1, 2 and 3 Carbon Footprint Contribution tCO2e/m € invested	2024	59.2	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2024	358.5	ASML was the largest contributor to the Sub-Fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Visa Inc Common Stock Usd.0001	Financials	9.4	United States
Microsoft Corp Common Stock Usd.00000625	Information Technology	7.9	United States
Asml Holding Nv Common Stock Eur.09	Information Technology	7.6	Netherlands
Booking Holdings Inc Common Stock Usd.008	Consumer Discretionary	6.0	United States
Philip Morris International Inc Common Stock	Consumer Staples	4.6	United States
Intuit Inc Common Stock Usd.01	Information Technology	4.4	United States
Alphabet Inc Common Stock Usd.001	Communication Services	4.1	United States

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	94.0

Asset allocation describes the share of investments in specific assets.

#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	6.0
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

GICS Sector	GICS Industry	% Assets
Information Technology	Software	19.4
Financials	Capital Markets	12.0
Financials	Financial Services	9.4
Information Technology	Semiconductors & Semiconductor Equipment	7.6
Communication Services	Entertainment	6.1
Consumer Discretionary	Hotels Restaurants & Leisure	6.0
Health Care	Pharmaceuticals	4.8
Consumer Staples	Tobacco	4.6
Communication Services	Interactive Media & Services	4.1
Consumer Staples	Personal Care Products	4.0
Health Care	Life Sciences Tools & Services	3.9
Information Technology	It Services	3.8
Consumer Staples	Food Products	3.2
Industrials	Professional Services	2.9
Health Care	Health Care Equipment & Supplies	2.5

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Information Technology	Technology Hardware Storage & Peripherals	1.6
Consumer Staples	Beverages	1.6
Information Technology	Communications Equipment	1.2

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

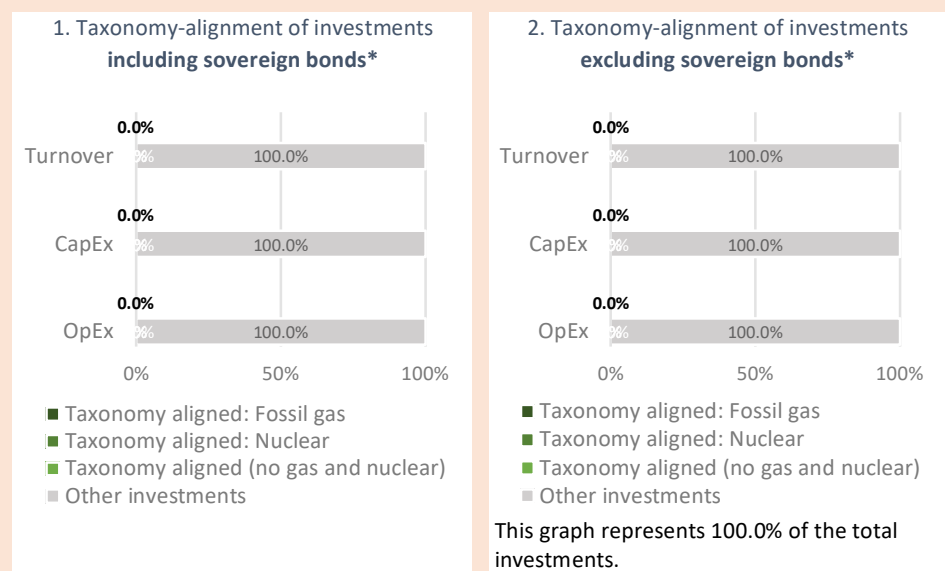

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

Year	EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
2023	Transitional activities	0.0
	Enabling activities	0.0
2022	Transitional activities	0.0
	Enabling activities	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation, accordingly the minimum share of sustainable investments with an environmental objective that was not aligned with the EU Taxonomy is 0%.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics;
- Cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments;

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund's portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager's research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company's climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2024), the investment team engaged with 14 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Booking Holdings	Consumer Discretionary	Since we first engaged with Booking Holdings on their climate change strategy in November 2020, they have published a Climate Action Report, disclosed to the CDP, and have set SBTi-approved net zero targets. Additionally, they are currently considering incorporating climate targets into executive remuneration.
FactSet Research	Financials	Since we first engaged them on their climate change strategy in June 2022, FactSet have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions, seeing a 12% reduction from

		2019, conducting their first scope 3 inventory, and setting a net zero by 2040 target. Having encouraged them to set SBTi-validated decarbonisation targets, we were happy to see that in October 2024 FactSet's 2030 scope 1, 2 and 3 targets were validated by the SBTi. .
NetEase	Communication Services	Since we began engaging them in September 2021, NetEase has taken important steps to strengthen its climate governance and transparency. They have disclosed Scope 1, 2, and 3 emissions, they have established an ESG Committee, and they have implemented the TCFD framework, aligning with global best practices in assessing and disclosing climate-related risks. They have also disclosed to the CDP and received a B rating, and are considering whether to incorporate ESG-related KPIs within remuneration. So, whilst NetEase are currently still finalising a roadmap for setting SBTi-targets, all of these developments mark positive steps in NetEase's management of climate risks. .

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Macro Allocation Fund

Legal entity identifier: 213800Q7XLCIZ4JK4842

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ___%

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by investing in companies and countries considered by the Investment Manager as having policies, operations and/or business models that aim to manage their harmful effects on society and the environment, or whose products and/or services benefit society and the environment. Additionally, the Investment Manager excludes investments in certain business groups and activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company or country has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that over 51% of the assets held in the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Direct equity investments

(Note as at 31/12/2024 there were no directly owned corporate bonds in the portfolio)

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2024	113.4	There is a reduction in both indicators compared to the prior year given a reduced amount allocated to direct equity investments. The mining company Rio Tinto is the largest individual contributor to these measures given the carbon intensive nature of its business. Its activities are important in enabling the energy transition and it has carbon emission reduction plans in place. Other material contributors include Aptiv (a global technology company that serves the auto industry) and ASML (a designer and manufacturer of semi-conductor equipment). Both companies have Science Based Target Initiative ("SBTi") approved emission reduction plans.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes per CO2e per US\$m or revenue	2024	248.2	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2024	Scope 1 & 2 = 91.7% At least some Scope 3 categories = 36.1%	Over time the Investment Manager has seen improvement in portfolio companies' reporting of carbon data and will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2024	41.7%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with companies to set credible net zero plans.
Percentage of companies invested in the business groups or activities	% of equity	2024	0.0%	There is no exposure to companies invested in the business groups or activities

prohibited under the Sub-Fund's exclusions criteria				prohibited under the Sub-Fund's exclusions criteria.
-----------------------------------------------------	--	--	--	------------------------------------------------------

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, the Investment Manager has defined “companies with credible net zero plans” as those companies with plans approved by the SBTi. This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

Country	Emissions intensity per GDP basis (In tonnes per CO2e per US\$m invested)^	Commentary
Australia	369.7	Australia has made significant strides in climate policy over the past year, continuing its transition towards renewable energy. The government remains committed to its updated Nationally determined contribution, which aims for a 43% emissions reduction by 2030 (compared to 2005 levels) and net zero by 2050. The Safeguard Mechanism, designed to cap emissions from the country's largest polluters, was reformed in 2023 to ensure compliance and alignment with broader targets. The expansion of renewable energy projects, particularly solar and wind, has accelerated, with increased government and private sector investment. However, Australia remains a major exporter of fossil fuels, particularly coal and liquefied natural gas, which presents challenges in aligning domestic and export policies with its climate goals. An overreliance of offsets and land use change within its emission pathways also presents concerns.
Denmark	109.4	Denmark continues to be a global leader in climate action, maintaining its ambitious target of reducing greenhouse gas emissions by 70% by 2030 (compared to 1990 levels). The country has made significant progress in offshore wind development, with multiple new projects set to come online by 2025. Denmark remains a frontrunner in green hydrogen initiatives, with increased investment in electrolysis capacity. The government is also pushing ahead with energy efficiency measures and heat pump deployment to reduce reliance on fossil fuels in heating.
New Zealand	276.2	New Zealand continues to implement its net-zero strategy, supported by the independent Climate Change Commission. Renewable energy remains a core strength, with further investments in wind and geothermal energy. The Emissions Trading Scheme (ETS) has been tightened to align with long-term targets, and agriculture emissions pricing is set to be introduced by 2025. However, balancing climate policy with the economic importance of agriculture remains a key challenge. Norway continues to lead in decarbonisation efforts, with strong progress in the electrification of transport and industry. Offshore wind and carbon capture and storage (CCS) projects have received additional government

		backing. Despite being a major oil and gas exporter, Norway is expanding its investment in hydrogen and offshore renewable energy. The country's sovereign wealth fund remains a powerful tool for climate-aligned investment, reinforcing Norway's commitment to sustainable finance and its ambitious goal of climate neutrality by 2030.
Norway	64.5	Norway continues to lead in decarbonisation efforts, with strong progress in the electrification of transport and industry. Offshore wind and carbon capture and storage (CCS) projects have received additional government backing. Despite being a major oil and gas exporter, Norway is expanding its investment in hydrogen and offshore renewable energy. The country's sovereign wealth fund remains a powerful tool for climate-aligned investment, reinforcing Norway's commitment to sustainable finance and its ambitious goal of climate neutrality by 2030.
Switzerland	54.1	Switzerland maintains its strong climate policy, with an updated NDC targeting a 50% emissions reduction by 2030 compared to 1990. The country continues to expand its renewable energy capacity, focusing on hydro, solar, and wind. The revised CO2 Act, set to take effect in 2025, strengthens carbon pricing measures and incentives for electric vehicles and building retrofits. While progress is steady, challenges remain in reducing emissions from the transport sector, where dependence on fossil fuels persists.
United Kingdom	136.2	The UK remains committed to its legally binding target of net zero by 2050, with an interim goal of a 68% reduction in emissions by 2030 (compared to 1990). Offshore wind capacity continues to expand, with new projects boosting the UK's position as a leader in the sector. The rollout of heat pumps and energy efficiency measures has been accelerated through additional government support. However, policy uncertainty following political shifts has raised concerns over the consistency of climate action and credibility of planned policy action. The UK's carbon market has also faced volatility, prompting discussions on further regulatory adjustments.
United States	238.7	The implementation of the Inflation Reduction Act (IRA) continues to drive a surge in clean energy investments across the country. Despite political uncertainties following the 2024 elections, federal and state-level commitments to emissions reductions remain strong. The US continues to target 50% reduction in emissions by 2030, with the IRA providing incentives for renewable energy, electric vehicles, and carbon capture technologies. State-led renewable portfolio standards (RPS) continue to support the transition, with additional states adopting clean energy mandates in 2024. However, the ongoing role of fossil fuels in the energy mix remains a key policy debate which is only likely to become more volatile under the new administration.

Source: ClimateWatch

^Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2021.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1 and 2 GHG Emissions Contribution (EVIC) tCO2e	2024	142,113.9	These values have been scaled up so that corporate exposure represents the fund's total value. The mining company Rio Tinto is the largest individual contributor to these measures given the carbon intensive nature of its business. Its activities are important in enabling the energy transition and it has carbon emission reduction plans in place. Other material contributors include Aptiv (a global technology company that serves the auto industry) and ASML (a designer and manufacturer of semi-conductor equipment). Both companies have SBTi approved emission reduction plans. Exposure to these companies is deemed not to result in material negative impacts.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	89.1
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	10.9

● ***In which economic sectors were the investments made?***

Sector	% Assets
Developed Market Sovereign	24.3
Diversified Fund	2.5
Emerging Market Hard Currency Debt	0.3
Emerging Market Local Currency Debt	0.8
Equity	52.1
Exchange Traded Funds	0.3

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

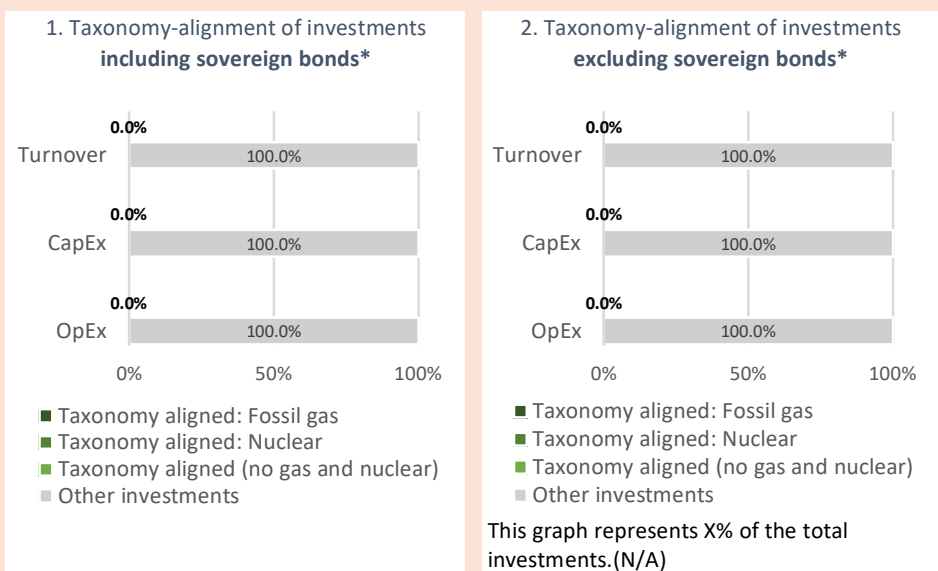

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value		
Year	2022	2023	2024
Transitional activities	0.0	0.1	0.0
Enabling activities	2.8	2.9	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes (1) investments previously ‘#1 Aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g., a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset or overnight deposits; and
- derivatives used for hedging, Efficient Portfolio Management and/or Investment Purposes.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, and diversity and inclusion. For example, it engaged with financial services companies such as Bank Rakyat on its progress in setting science-based targets. It engaged with Aptiv on a number of topics throughout the year including diversity, culture and carbon-related disclosures. It engaged with Thermo Fisher Scientific on board diversity and increased disclosures.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Managed Income Fund

Legal entity identifier: 213800ATCFTXLMWF1N08

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by investing in companies and countries considered by the Investment Manager as having policies, operations and/or business models that aim to manage their harmful effects on society and the environment, or whose products and/or

services benefit society and the environment. Additionally, the Investment Manager excludes investments in certain business groups and activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company or country has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that over 51% of the assets held in the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

● *How did the sustainability indicators perform?*

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO ₂ e per US\$m invested	2024	48.7	There is a reduction in both indicators compared to the prior year given a reduced amount allocated to direct equity investments. The mining company Rio Tinto is the largest individual contributor to these measures given the carbon intensive nature of its business. Its activities are important in enabling the energy transition and it has carbon emission reduction plans in place. The agricultural company Bunge is also a material contributor to footprint. This company plays an important role in connecting farmers with consumers worldwide in a sustainable way, and has Science Based Target Initiative (“SBTi”) approved emission reduction plans.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes per CO ₂ e per US\$m or revenue	2024	61.9	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	%	2024	Scope 1 & 2 = 92.9% At least some Scope 3 categories = 47.6%	Over time the Investment Manager has seen improvement in portfolio companies’ reporting of carbon data and will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Percentage of direct equity holdings with credible net zero plans in place**	%	2024	61.9%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with companies to set credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2024	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, the Investment Manager has defined "companies with credible net zero plans" as those companies with plans approved by SBTi. This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

The following table shows the top 10 country exposures by Sub-Fund weighting:

Country	Emissions intensity per GDP basis (tCO ₂ e/million \$ GDP) (in tonnes per CO ₂ e per US\$m invested)^	Commentary
Australia	369.7	Australia has made significant strides in climate policy over the past year, continuing its transition towards renewable energy. The government remains committed to its updated Nationally Determined Contribution, which aims for a 43% emissions reduction by 2030 (compared to 2005 levels) and net zero by 2050. The Safeguard Mechanism, designed to cap emissions from the country's largest polluters, was reformed in 2023 to ensure compliance and alignment with broader targets. The expansion of renewable energy projects, particularly solar and wind, has accelerated, with increased government and private sector investment. However, Australia remains a major exporter of fossil fuels, particularly coal and Liquefied natural gas, which presents challenges in aligning domestic and export policies with its climate goals. An overreliance of offsets

		and land use change within its emission pathways also presents concerns.
Brazil	928.4	The Lula administration continues to push forward with its climate commitments, with deforestation in the Amazon declining significantly in 2024 following strengthened enforcement measures. The government's announcement of more ambitious NDC targets at COP29 further evidences their commitment towards net zero. Work continues on the development of carbon pricing mechanisms and corporate emissions caps domestically and the Amazon Fund has received additional international contributions, bolstering conservation and reforestation efforts. However, challenges remain in balancing economic growth with environmental sustainability, particularly in the agricultural and mining sectors. Severe droughts and subsequent wildfires over the last year are physical evidence of these risks.
Canada	365.3	Canada remains committed to its 2050 net-zero goal, with its carbon pricing mechanism continuing to rise in line with the planned increase to C\$170 per ton by 2030. The government has reinforced its commitment to phasing out unabated coal power by 2030, with key transition projects underway. However, as a major oil and gas producer, balancing economic interests with climate objectives remains a challenge. In 2024, the government announced additional funding for clean technology and carbon capture projects, aiming to bridge the gap between emissions reduction targets and economic resilience in resource-dependent regions. There remains a lack of plan to phase out broader fossil fuel use from the economy.
Colombia	887.95	Colombia remains on track to achieve its goal of a 51% emissions reduction by 2030. Although these targets were strengthened previously to focus on absolute reductions, they remain heavily reliant on reducing deforestation rather than tackling high emitting industries. Deforestation continued to decline in 2024 due to enhanced monitoring and enforcement initiatives. The country's green finance market continues to expand, with additional green bonds issued to fund sustainability projects. The implementation of the national green taxonomy has helped direct capital toward climate-aligned projects. However, political and economic instability remain challenges in maintaining long-term policy consistency.
Hungary	343.7	Hungary remains committed to its 2050 net-zero target and its goal of reducing emissions by at least 40% by 2030 (relative to 1990). These goals were enshrined in the 2020 Climate Protection Law which also included measures to ensure 90% of electricity produced be carbon free by 2030. To achieve this goal the government has continued to support nuclear energy as a key pillar of its low-carbon transition, with the Paks II nuclear project remaining a priority. Solar energy capacity has seen strong growth, but the 2025 coal phase-out plans have faced delays due to energy security concerns. Hungary participates in the EU Emissions Trading Scheme which is set to expand in 2025 to cover additional sectors. Revenues from this scheme support broader energy efficiency programs in residential and industrial sectors with financial incentives.
Indonesia	1251.3	Indonesia's energy transition remains complex, with continued reliance on coal presenting a key challenge. While the government has reiterated its commitment to the Just Energy Transition Partnership (JETP) and its revised conditional emission reduction target of 43.2% by 2030, securing adequate international financing remains a hurdle. Progress has been made in renewable energy deployment, with additional floating solar PV and hydropower

		projects coming online in 2024. However, the approval of new coal plants outside the on-grid sector threatens to undermine emissions reduction efforts.
New Zealand	276.2	New Zealand continues to implement its net-zero strategy, supported by the independent Climate Change Commission. Renewable energy remains a core strength, with further investments in wind and geothermal energy. The Emissions Trading Scheme (ETS) has been tightened to align with long-term targets, and agriculture emissions pricing is set to be introduced by 2025. However, balancing climate policy with the economic importance of agriculture remains a key challenge. Norway continues to lead in decarbonisation efforts, with strong progress in the electrification of transport and industry. Offshore wind and carbon capture and storage (CCS) projects have received additional government backing. Despite being a major oil and gas exporter, Norway is expanding its investment in hydrogen and offshore renewable energy. The country's sovereign wealth fund remains a powerful tool for climate-aligned investment, reinforcing Norway's commitment to sustainable finance and its ambitious goal of climate neutrality by 2030.
South Africa	1231.5	South Africa's energy transition continues to be hindered by challenges in its electricity sector, with coal still dominating energy generation. However, progress has been made with the scaling up of renewable energy projects and private sector investment in solar and wind capacity. The government remains committed to the Just Energy Transition Investment Plan (JET-IP), but concerns persist over financing and policy implementation. The extension of coal plant lifespans for grid stability conflicts with long-term emissions targets.
United Kingdom	136.2	The UK remains committed to its legally binding target of net zero by 2050, with an interim goal of a 68% reduction in emissions by 2030 (compared to 1990). Offshore wind capacity continues to expand, with new projects boosting the UK's position as a leader in the sector. The rollout of heat pumps and energy efficiency measures has been accelerated through additional government support. However, policy uncertainty following political shifts has raised concerns over the consistency of climate action and credibility of planned policy action. The UK's carbon market has also faced volatility, prompting discussions on further regulatory adjustments.
United States	238.7	The implementation of the Inflation Reduction Act (IRA) continues to drive a surge in clean energy investments across the country. Despite political uncertainties following the 2024 elections, federal and state-level commitments to emissions reductions remain strong. The US continues to target 50% reduction in emissions by 2030, with the IRA providing incentives for renewable energy, electric vehicles, and carbon capture technologies. State-led renewable portfolio standards (RPS) continue to support the transition, with additional states adopting clean energy mandates in 2024. However, the ongoing role of fossil fuels in the energy mix remains a key policy debate which is only likely to become more volatile under the new administration.

Source: ClimateWatch

^Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2021.

● **...and compared to previous periods?**

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1 & 2 GHG Emissions Contribution (EVIC) tCO2e	2024	346,636.6	These values have been scaled up so that corporate exposure (including corporate bonds) represents the fund's total value. One chemicals company (OCI Global) and a mining company (Rio Tinto) are material contributors to these measures given the carbon intensive nature of their businesses. OCI's products aim to help decarbonise sectors including agriculture and cleaner fuels, while Rio Tinto's activities are important in enabling the energy
Carbon Footprint	Scope 1 & 2 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2024	267.5

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

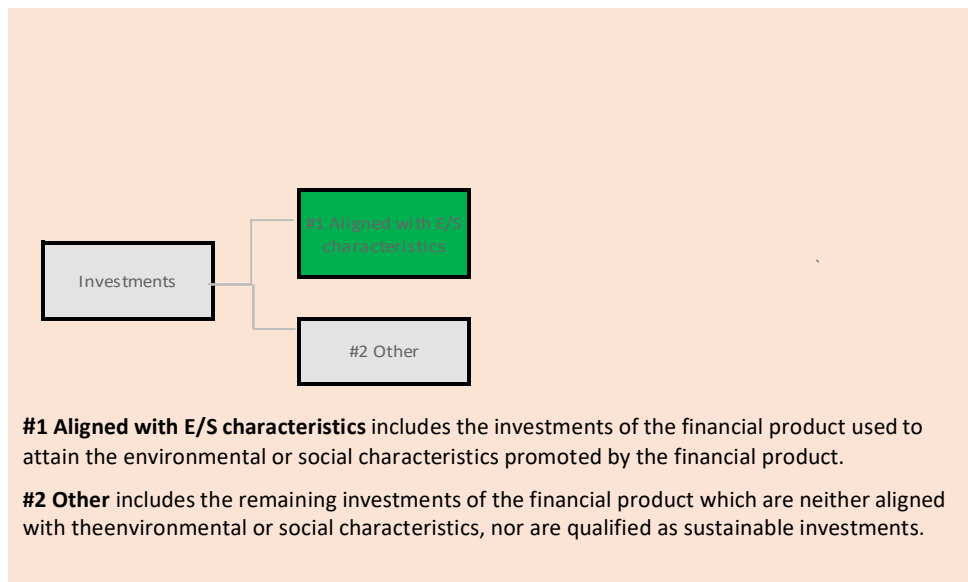

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	94.3
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	5.7

In which economic sectors were the investments made?

Sector	% Assets
Developed Market Sovereign	56.0
Emerging Market Hard Currency Debt	0.1
Emerging Market Local Currency Debt	19.6
Equity	9.5
Fixed Income Fund	0.0
High Yield Corporate	1.9
Infrastructure	1.7
Investment Grade Corporate	7.0
Property	0.3

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

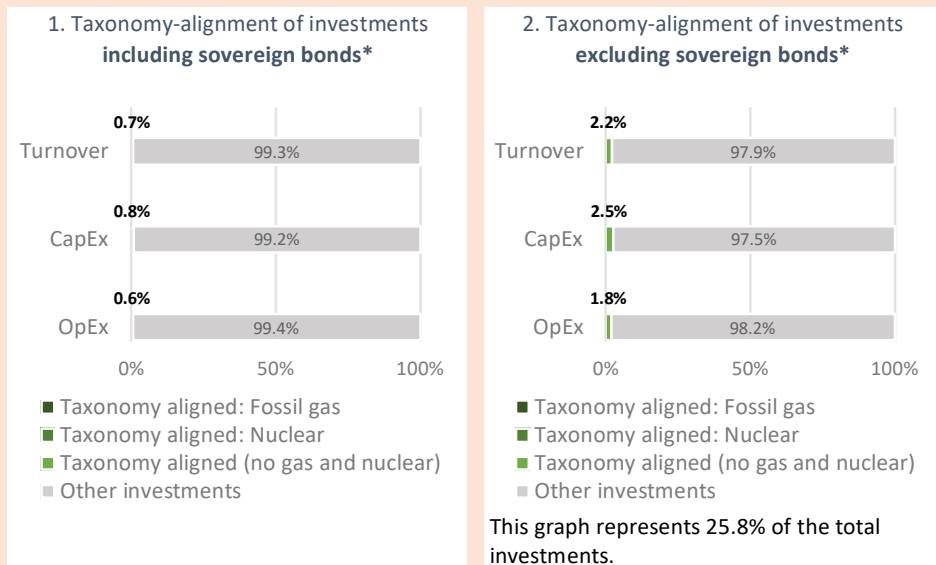

☐ in fossil gas ☐ in nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Sovereign exposure accounts for 74.2% of the total Sub-Fund value.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

The EU Taxonomy regulation does not currently provide an appropriate methodology to calculate to what extent exposures to central governments, central banks and supranational issuers ('sovereign exposures') are exposed to environmentally sustainable economic activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.1%
Enabling activities	0.4%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value		
Year	2022	2023	2024
Transitional activities	0.0	0.1	0.1
Enabling activities	0.3	0.3	0.4

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other’ includes (1) investments previously ‘#1 aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset or overnight deposits; and
- derivatives used for hedging, efficient portfolio management and/or investment purposes

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. cash or deposits).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, and diversity and inclusion. For example, it engaged with financial services companies such as Bank Rakyat on its progress in setting science-based targets. It engaged with Iberdola on a number of topics throughout the year including governance and remuneration. It engaged with Power Grid of India on board diversity and carbon-related disclosures.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Dividend Growth Fund

Legal entity identifier: 213800J8SZF5T21OWQ46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ ☐ ☒ **No**

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile or all-scope carbon footprint lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2024	65.9	299.9	-78%

The Sub-Fund maintained a carbon profile that is 78% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Samsung Electronics, Taiwan Semiconductor Manufacturing Company and Microsoft.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (1.49%)
- Siemens Healthineers (3.29%)
- Nike (2.09%)
- Reckitt Benckiser (2.26%)
- Unilever (2.34%)

● **...and compared to previous periods?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	78.2	379.8	-79%
		2022	88.1	442.1	-80%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2, & 3 GHG Emissions Contribution (EVIC) tCO2e	2024	20,000.5	Siemens Healthineers was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact. Environmental concerns for Siemens Healthineers are low and the company have introduced emissions targets, committing to reduce Scope 1 and 2 emissions by 50% and Scope 3 emissions (from select categories) by 13.5% by FY2030 versus a 2019 baseline year. The former target is SBTi-validated, whereas they are in the process of getting the latter validated.
Carbon footprint	Scope 1, 2, & 3 Carbon Footprint Contribution tCO2e/m € invested	2024	65.9	
GHG intensity	Scope 1, 2, & 3 GHG intensity of investee companies tCO2e/m € revenue	2024	323.5	ASML was the largest contributor to the Sub-Fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Microsoft Corp Common Stock Usd.00000625	Information Technology	9.3	United States
Visa Inc Common Stock Usd.0001	Financials	8.0	United States
Asml Holding Nv Common Stock Eur.09	Information Technology	5.3	Netherlands
Philip Morris International In Common Stock	Consumer Staples	4.9	United States
Accenture Plc Common Stock Usd.0000225	Information Technology	4.7	United States
Automatic Data Processing Inc Common Stock Usd.1	Industrials	4.6	United States
Broadridge Financial Solutions Common Stock Usd.01	Industrials	4.0	United States
Siemens Healthineers Ag Common Stock	Health Care	3.5	Germany
Taiwan Semiconductor Manufactu Common Stock Twd10.0	Information Technology	3.4	Taiwan
Experian Plc Common Stock Usd.1	Industrials	3.1	United Kingdom
Kone Oyj Common Stock	Industrials	2.9	Finland
Gsk Plc Common Stock Gbp.3125	Health Care	2.8	United Kingdom
Novartis Ag Common Stock Chf.49	Health Care	2.8	Switzerland
Partners Group Holding Ag Common Stock Chf.01	Financials	2.7	Switzerland
Texas Instruments Inc Common Stock Usd1.0	Information Technology	2.6	United States

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	97.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	3.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

GICS Sector	GICS Industry	% Assets
Industrials	Professional Services	11.7
Information Technology	Semiconductors & Semiconductor Equipment	11.3
Information Technology	Software	9.3
Health Care	Pharmaceuticals	8.1
Financials	Financial Services	8.0
Financials	Capital Markets	7.5
Consumer Staples	Tobacco	7.5
Information Technology	It Services	4.7
Communication Services	Entertainment	4.5

Consumer Staples	Household Products	4.3
Consumer Staples	Personal Care Products	4.0
Health Care	Health Care Equipment & Supplies	3.5
Industrials	Machinery	2.9
Consumer Discretionary	Textiles Apparel & Luxury Goods	2.2
Consumer Staples	Beverages	2.1
Industrials	Electrical Equipment	2.0
Information Technology	Technology Hardware Storage & Peripherals	2.0
Real Estate	Specialized Reits	1.8
Consumer Discretionary	Hotels Restaurants & Leisure	0.6

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

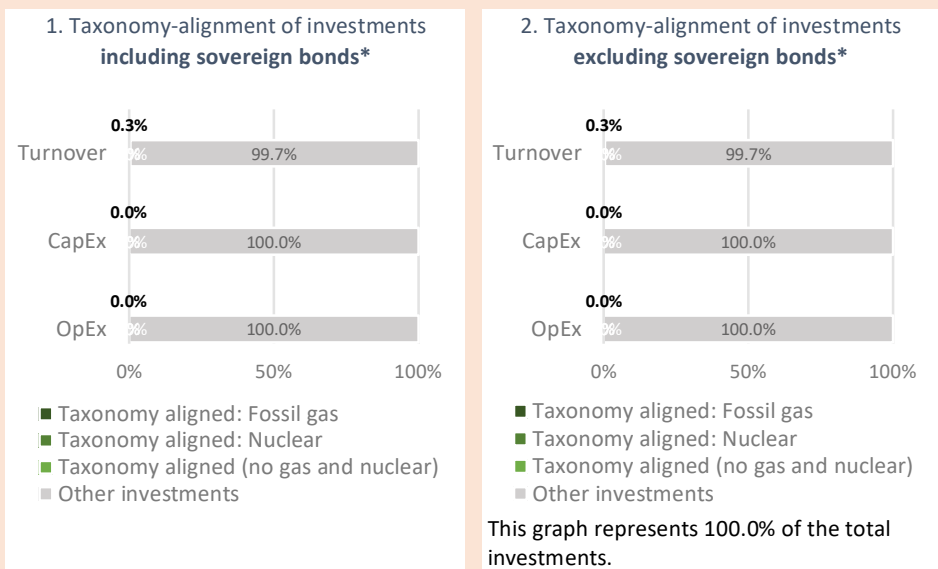

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflects the “greenness” of investee companies today.

— **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

— **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.3

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Year	EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
2023	Transitional activities	0.0
	Enabling activities	0.4
2022	Transitional activities	0.0
	Enabling activities	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
- and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts

further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2024), the investment team engaged with 7 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
NetEase	Communication Services	<p>Since we began engaging them in September 2021, NetEase has taken important steps to strengthen its climate governance and transparency. They have disclosed Scope 1, 2, and 3 emissions, they have established an ESG Committee, and they have implemented the TCFD framework, aligning with global best practices in assessing and disclosing climate-related risks. They have also disclosed to the CDP and received a B rating, and are considering whether to incorporate ESG-related KPIs within remuneration. So, whilst NetEase are currently still finalising a roadmap for setting SBTi-targets, all of these developments mark positive steps in NetEase's management of climate risks.</p>
Samsung Electronics	Information Technology	<p>Since starting our engagement in March 2022, we have been comforted by the progress Samsung has made in managing this material risk, namely:</p> <ul style="list-style-type: none"> • Publishing an environmental strategy and committing in part to Net Zero by 2050; • Setting internal interim targets for Scope 1 & 2 emissions, including for the semiconductor division, which makes up the bulk of these,; • Setting interim Scope 3 emissions targets for certain divisions as they work on developing broader company-wide Scope 3 targets. <p>We will continue to engage them on publicly disclosing interim Scope 1 & 2 emissions targets for their semiconductor division, incorporating Scope 3 emissions in their Net Zero commitment, and developing a transition plan that is aligned with the 1.5°C global warming limit.</p>
Taiwan Semiconductor Manufacturing Company (TSMC)	Information Technology	<p>Since our engagement with TSMC on climate strategy in November 2022, the company has made significant progress. They have committed to Net Zero by 2050 and set a 100% renewable energy target by 2040 as a RE100 member. To address Taiwan's limited renewable energy supply, they continue working with government and suppliers and in 2024, they raised their 2030 renewable energy target from 40% to 60% and launched a joint procurement initiative with ARK Power. They have allocated capex for transition, begun quantifying revenue from sustainable products, and linked board-level remuneration to ESG performance. Additionally, they set a 2030 goal to cut supplier carbon emissions by 30% to reduce Scope 3 emissions. Finally, they plan to assess SBTi</p>

		requirements in 2026 before determining the timing and feasibility of a potential commitment to setting SBTi-verified targets.
--	--	--------------------------------------------------------------------------------------------------------------------------------

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Equity Fund

Legal entity identifier: 2138006WDR4Z341GGA33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☒ ☐ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile or all-scope carbon footprint lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2024	61.5	299.9	-80%

The Sub-Fund maintained a carbon profile that is 80% lower than the broader market. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were Samsung Electronics, Nestle, and Taiwan Semiconductor Manufacturing Company

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets)

- Samsung Electronics (1.20%)
- Nestle (2.97%)
- Siemens Healthineers (0.05%)
- Reckitt Benckiser (0.05%)
- St James's Place (1.44%)

● **...and compared to previous periods?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	67.0	379.8	-82%
		2022	86.0	442.1	-81%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2024	81,462.2	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030 versus a 2018 baseline year.
Carbon footprint	Scope 1, 2 & 3 Carbon Footprint Contribution tCO2e/m € invested	2024	61.5	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2024	354.0	ASML was the largest contributor to the Sub-Fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Visa Inc Common Stock Usd.0001	Financials	9.4	United States
Microsoft Corp Common Stock Usd.00000625	Information Technology	7.9	United States
Asml Holding Nv Common Stock Eur.09	Information Technology	6.9	Netherlands
Booking Holdings Inc Common Stock Usd.008	Consumer Discretionary	6.7	United States

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	91.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	9.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

GICS Sector	GICS Industry	% Assets
Information Technology	Software	19.6
Financials	Capital Markets	13.4
Financials	Financial Services	9.5
Information Technology	Semiconductors & Semiconductor Equipment	6.9
Consumer Discretionary	Hotels Restaurants & Leisure	6.7
Communication Services	Entertainment	5.9

Consumer Staples	Tobacco	4.4
Health Care	Pharmaceuticals	4.2
Communication Services	Interactive Media & Services	4.0
Consumer Staples	Personal Care Products	3.8
Health Care	Life Sciences Tools & Services	3.8
Information Technology	IT Services	3.8
Consumer Staples	Food Products	3.5
Health Care	Health Care Equipment & Supplies	2.6
Information Technology	Technology Hardware Storage & Peripherals	1.7
Consumer Staples	Beverages	1.6
Information Technology	Communications Equipment	1.2
Consumer Staples	Household Products	0.1
Industrials	Professional Services	0.1

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

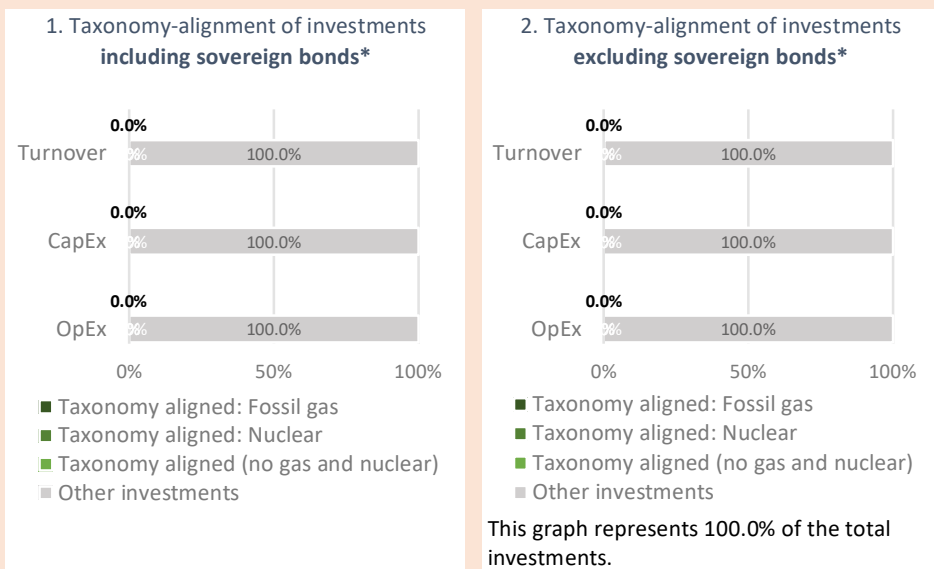

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

What was the share of investments made in transitional and enabling activities?

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Year	EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
2023	Transitional activities	0.0
	Enabling activities	0.0
2022	Transitional activities	0.0
	Enabling activities	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
- and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment.

Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2024), the investment team engaged with 14 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Booking Holdings	Consumer Discretionary	Since we first engaged with Booking Holdings on their climate change strategy in November 2020, they have published a Climate Action Report, disclosed to the CDP, and have set SBTi-approved net zero targets. Additionally, they are currently considering incorporating climate targets into executive remuneration.
FactSet Research	Financials	Since we first engaged them on their climate change strategy in June 2022, FactSet have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions, seeing a 12% reduction from 2019, conducting their first scope 3 inventory, and setting a net zero by 2040 target. Having encouraged them to set SBTi-validated decarbonisation targets, we were happy to see that in October 2024 FactSet's 2030 scope 1, 2 and 3 targets were validated by the SBTi.
NetEase	Communication Services	Since we began engaging them in September 2021, NetEase has taken important steps to strengthen its climate governance and transparency. They have disclosed Scope 1, 2, and 3 emissions, they have established an ESG Committee, and they have implemented the TCFD framework, aligning with global best practices in assessing and disclosing climate-related risks. They have also disclosed to the CDP and received a B rating, and are considering whether to incorporate ESG-related KPIs within remuneration. So, whilst NetEase are currently still finalising a roadmap for setting SBTi-targets, all of these developments mark positive steps in NetEase's management of climate risks.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Sustainable Equity Fund

Legal entity identifier: 213800C7HX6C1SFXEZ41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of 99.1% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding direct investments in certain business groups or activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

● *How did the sustainability indicators perform?*

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2024	113.0	Over time, we expect to see carbon emissions measures reduce for the Sub-Fund. The carbon footprint is lower than MSCI ACWI. There are three companies – NextEra Energy, Schneider Electric and Yadea Group - that in aggregate contribute to around half of the carbon emissions measures. These companies are at the forefront of decarbonisation with NextEra a leading renewable energy provider, Schneider Electric a leader in energy management products and solutions and Yadea Group a Chinese manufacturer of electric two-wheeled vehicles.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2024	397.06	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2024	Scope 1 & 2 = 100.0% All Scope 3 categories = 56.7%	Over time, the Investment Manager has seen improvement in portfolio companies' reporting of carbon data, however for the review period, the proportion of companies reporting all Scope 3 categories fell, largely due to asset allocation changes. We will continue to engage with companies to improve Scope 1 & 2, and all Scope 3 categories' disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2024	63.3%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's	% of equity	2024	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

exclusions criteria				
---------------------	--	--	--	--

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to portfolio position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, “companies with credible net zero plans” are defined as those companies with plans approved by the Science-Based Target initiative (“SBTi”). This is therefore a conservative assessment as the portfolio additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’ for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

Indicator	Metric	2022*	2023**
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	372.0	92.7
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	1,269.1	439.6
Proportion of companies in the portfolio which disclose carbon emissions figures	%	Scope 1 & 2 = 89.3% All Scope 3 categories = 42.9%	Scope 1 & 2 = 100.0% All Scope 3 categories = 65.0%
Percentage of direct equity holdings with credible net zero plans in place***	%	32.1%	42.3%
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria	% of equity	0.0%	0.0%

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to portfolio position weightings as at the end of financial year 2022.

**The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to portfolio position weightings as at the end of financial year 2023.

While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

***For the purposes of this reporting, “companies with credible net zero plans” are defined as those companies with plans approved by the Science-Based Target initiative (“SBTi”). This is therefore a conservative assessment as the portfolio additionally includes companies with net zero plans that are not yet SBTi approved.

Over 2024, the Sub-Fund saw a reduction in the carbon emissions intensity but a modest increase in carbon emission footprint. This is a function of both asset allocation changes with the inclusion of new portfolio holding Yadea Group and sale of portfolio Carlisle Co’s, but also a function of carbon emissions reductions across select portfolio holdings including NextEra Energy and Schneider Electric.

Over 2024, the Sub-Fund maintained the previous year’s disclosure of 100% of portfolio companies reporting Scope 1 and 2, while the proportion reporting All Scope 3 carbon emissions figures fell. This is a function of portfolio holdings changes in particular the sale of select portfolio holdings that did report all Scope 3 categories and the addition of some new holdings that do not currently report all Scope 3 measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories disclosure.

Over 2024, the Sub-Fund saw an increase in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria.

As per the information provided below relating to ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’:

- the carbon avoided for the Sub-Fund increased over the period due to a combination of new companies being added that have positive carbon avoided as well as increases in the carbon avoided from existing companies
- the percentage of direct equity holdings relating to financial inclusion, healthcare impact and access to education fell slightly over the period while the percentage relating to digital inclusion and climate adaptation increased slightly over the period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, the Sub-Fund can make sustainable investments in companies believed by the Investment Manager to contribute to:

positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses 'carbon avoided' as an indicator to assess, measure and monitor the carbon impact associated with a company

supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).

- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.
- access to education by providing access to high quality educational and training products and/or services for underserved groups.

healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.

- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.

Following the Investment Manager's assessment, the investments that meet one of the above mentioned environmental and/or social objectives and pass the Do No Significant Harm test are considered sustainable investments in their entirety (i.e. the whole company is a sustainable investment).

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2024	468.1	Eleven companies (out of 30) in the portfolio produced positive carbon avoided versus nine companies in the previous reporting period
Percentage of direct equity holdings contributing to financial inclusion	% equity	2024	20.0%	Six companies (out of 30) in the portfolio facilitate financial inclusion, consistent with the previous reporting period
Percentage of direct equity holdings contributing to digital inclusion	% equity	2024	6.7%	Two company (out of 30) in the portfolio facilitates access to digital inclusion versus one company in the previous reporting period
Percentage of direct equity holdings contributing to access to education	% equity	2024	3.3%	One company (out of 30) in the portfolio facilitates access to education, consistent with the previous reporting period
Percentage of direct equity holdings contributing to healthcare impact	% equity	2024	20.0%	Six companies (out of 30) in the portfolio facilitate healthcare impact consistent with the previous reporting period
Percentage of direct equity holdings contributing to climate adaptation	% equity	2024	13.3%	Four companies (out of 30) in the portfolio facilitate climate adaptation versus three companies in the previous reporting period

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2022. This data has been applied to portfolio position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag.

The carbon avoided for the Sub-Fund increased over the period due to a combination of new companies being added that have positive carbon avoided as well as increases in the carbon avoided from existing companies. The percentage of direct equity holdings relating to financial inclusion, healthcare impact and access to education fell slightly over the period while the percentage relating to digital inclusion and climate adaptation increased slightly over the period.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment.

The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweigh the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are considered for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions

identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2024	1,717.3	These values have been scaled up so that corporate exposure represents the fund's total value. There are three companies – Yadea Group, Schneider Electric, NextEra Energy - that in aggregate contribute to around half of these measures. These companies are at the forefront of decarbonisation with NextEra a leading renewable energy provider, Schneider Electric a leader in energy management products and solutions and Yadea Group a Chinese manufacturer of electric two-wheeled vehicles. Exposure to these companies is deemed not to result in material negative impacts.
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2024	100.1	
GHG Intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2024	429.1	

Exposure to companies active in the fossil fuel sector	%	2024	3.3%	One company (out of 30) – NextEra Energy – has exposure to the fossil fuel sector. This exposure mainly relates to legacy business. This company is at the forefront of decarbonisation through renewable energy. Exposure to this company is deemed not to result in material negative impacts.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2024	34.8%	Board gender diversity will continue to be an important topic for engagement, particularly across emerging markets portfolio holdings. We consider diversity and inclusion for portfolio companies as part of stakeholder analysis within the Capitals Framework. These results are consistent with expectations, represent a small increase versus the previous reporting period and are deemed not to result in material negative impacts.

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to portfolio position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufactu Common Stock Twd10.0	Information Technology	6.4	Taiwan

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	99.1
#1A Sustainable investments within the meaning of Article 2(17) SFDR	99.1
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	0.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.9

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	3.7
Investments with an environmental objective but not aligned with the Taxonomy	32.5
Investments with a social objective	62.8

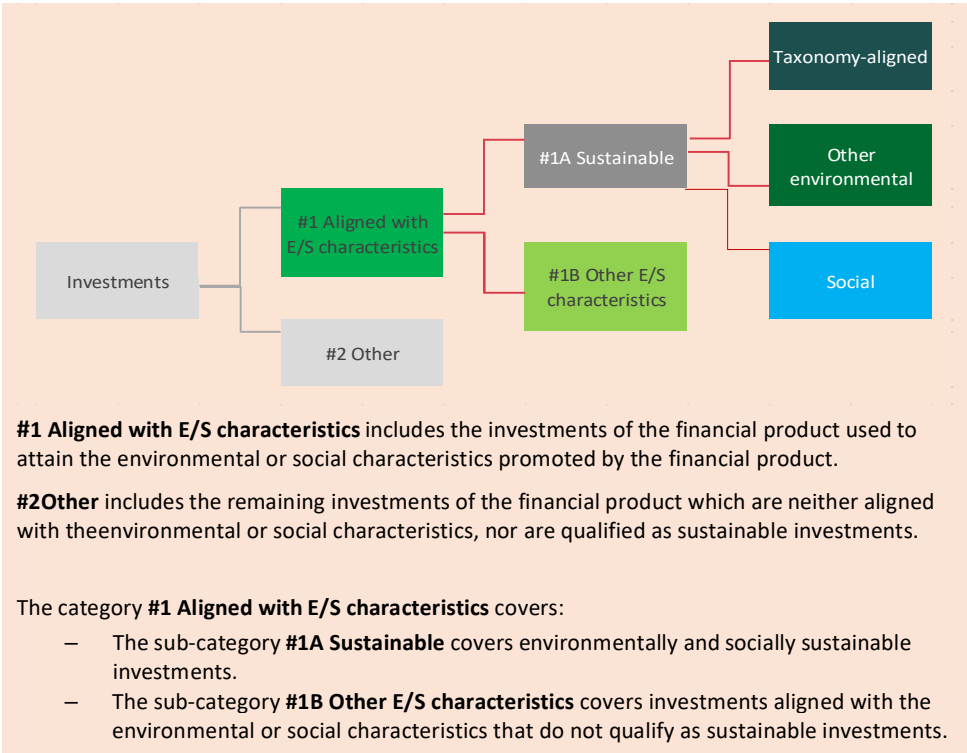

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

GICS_Sector	GICS_Industry	% Assets
Financials	Insurance	14.9
Information Technology	Semiconductors & Semiconductor Equipment	10.6
Financials	Financial Services	8.9
Health Care	Health Care Providers & Services	8.9
Industrials	Commercial Services & Supplies	7.9
Health Care	Life Sciences Tools & Services	7.3
Health Care	Health Care Equipment & Supplies	6.9
Information Technology	Software	6.4
Financials	Banks	6.0

Utilities	Electric Utilities	3.6
Industrials	Professional Services	3.6
Industrials	Electrical Equipment	3.3
Industrials	Building Products	2.8
Industrials	Construction & Engineering	2.7
Information Technology	Electronic Equipment Instruments & Components	2.1
Consumer Discretionary	Automobiles	2.0
Industrials	Machinery	0.9

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

☐ Yes:

☐ in fossil gas ☐ in nuclear energy

☒ No

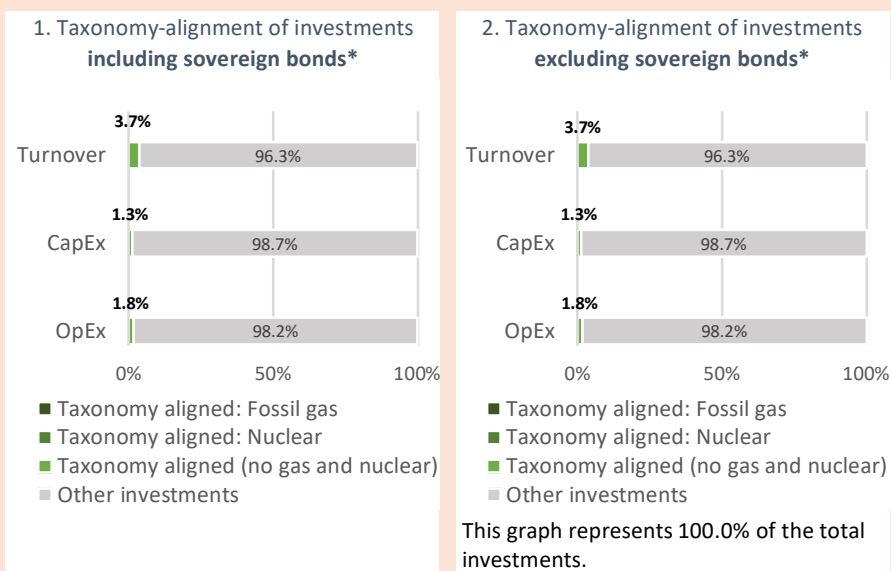

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives

- see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	1.7

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023
Transitional activities	0.0	0.0
Enabling activities	0.0	2.3

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value
Investments with an environmental objective but not aligned with the Taxonomy (i.e., Other Environmental), weighted by non-Taxonomy aligned revenue	32.5

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy. The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value
Investments with a social objective	62.8

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Other' includes (1) investments previously '#1 aligned with E/S characteristics' which are under the Investment Manager's review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset and overnight deposits;

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash or deposits). These investments are not expected to affect the delivery of the sustainable investment objective on a continuous basis as they do not form a material part of the Sub-Fund's portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further

information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, diversity & inclusion, KPI (key performance indicator) disclosures and cultural work practices. For example, it engaged with Danaher on setting science-based and net-zero greenhouse gas emissions reduction targets which the company has since committed to and it engaged with Aon on board structure and climate adaptation KPIs. Additionally, the Investment Manager engaged with companies including HDFC and Nu Bank on firm wide diversity and inclusion.

The Investment Manager has voted all proxies

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Credit Income Fund

Legal entity identifier: 21380038HF8IE6XMBV22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e., maintaining a carbon profile lower than typical global credit indices) by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability frameworks and by excluding direct investments in certain sectors or business areas that are deemed to have less favourable sustainability characteristics.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question,

related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value for fund	Value for benchmark index
Scope 1 & 2 weighted-average carbon intensity	in tonnes per CO2e per US\$m of revenue	2024	76.2	225.7

The Sub-Fund exhibits a weighted-average carbon intensity (WACI) that is 66% lower than that of global credit indices (as represented by 50% BofA Global High Yield and 50% BofA Global Corporate), thus the characteristics promoted have been met.

The methodology behind this figure is as follows. For each entity/addressable security, the carbon emissions per US\$1 million of products or services sold (revenue) is measured. To determine an overall carbon intensity at the Sub-Fund or index level, the weighted average carbon intensity of each assessable security in the Sub-Fund or index is then calculated.

The above data represents Scope 1 and 2 carbon intensity. Unsurprisingly, heavy emitters are predominantly found in sectors involved in more carbon-intensive industries. However, within such sectors, the Sub-Fund’s exposure is in aggregate skewed towards issuers which the Investment Manager believes are aligned to a net-zero ambition.

● **...and compared to previous periods?**

Indicator	Metric	2022	2023
Scope 1 & 2 weighted-average carbon intensity	in tonnes per CO2e per US\$m of revenue	140.7	87.8

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC)	2024	262.7 tCO2e/m EUR invested	Within higher emitting sectors, the Sub-Fund is also skewed more towards best-in-class issuers with credible net-zero plans. The Investment Manager often observes that the heavy emitting sectors/corporates are most advanced in their transition planning and execution.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies	2024	596.6 tCO2e/m EUR revenue	Within sectors that have a higher GHG intensity, the Sub-Fund is also skewed more towards best-in-class issuers with credible net-zero plans. The Investment Manager often observes that sectors/corporates with the highest GHG intensity are most advanced in their transition planning and execution.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

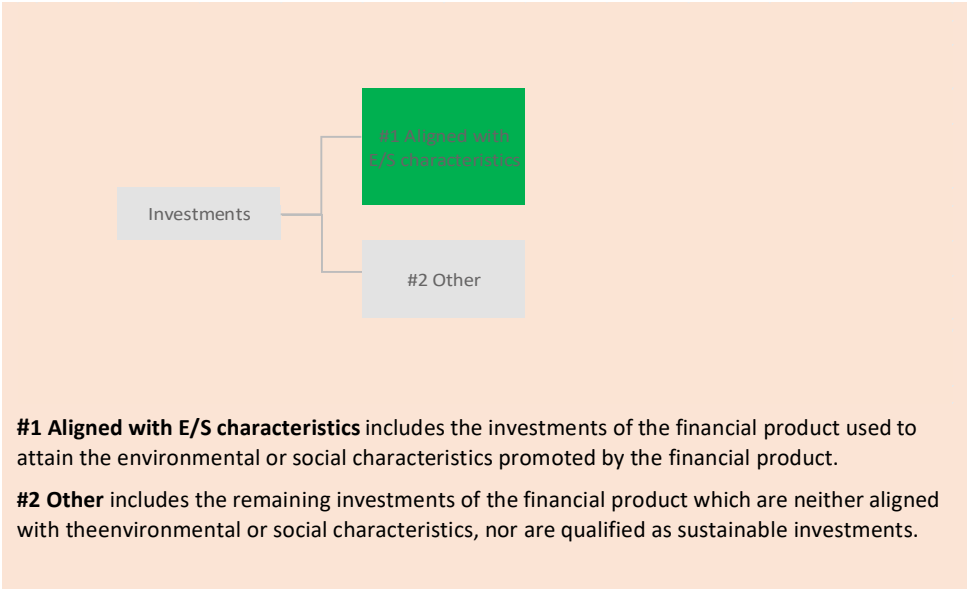

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	84.2
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	15.8

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Sector	% Assets
Short Duration High Yield	20.1
Structured Credit	19.4
European Investment Grade	16.7
US Investment Grade	12.6
Bank Capital	7.6
Corporate Hybrids	6.1
US Investment Grade FRN	4.1
European High Yield FRN	3.4
European High Yield	2.2
Emerging High Yield	1.8
US High Yield	1.2
European Investment Grade FRN	0.3

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

☐ Yes:

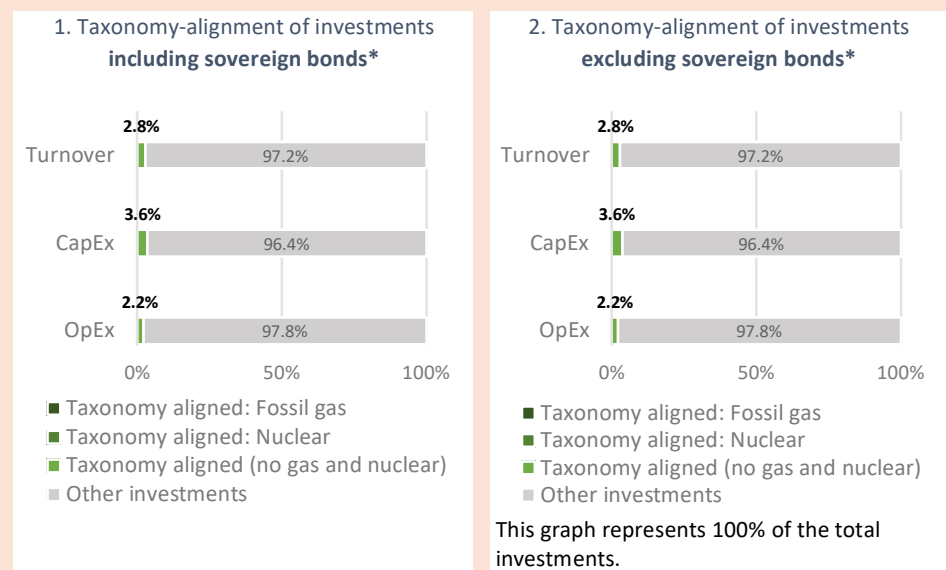

☐ in fossil gas ☐ in nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.8

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments. No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies. The Investment Manager believes engagement is an important investment tool to help preserve and grow the real value of the assets entrusted to it by its clients over the long term. Engagement activity also provides the Investment Manager with valuable ESG information, helps it to understand management intentions, and enables it to advocate for improved ESG practices and disclosure. The Investment Manager recognises that it must prioritise its engagement activity and typically considers the size and duration of holdings, credit quality, degree of transparency, and the materiality of ESG risks and opportunities. The nature of engagements with corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date – therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication within quarterly sustainability reports.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Latin American Equity Fund

Legal entity identifier: 213800L5S3HWP12AY26

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☒ ☐ **No**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental characteristics through targeting improved greenhouse gas (GHG) emission data disclosure and a commitment to credible net-zero transition plans from the companies held by the Sub-Fund that are considered high-intensity GHG emitters*, as well as investing in companies that are not considered high-intensity GHG emitters, and excluding investments in certain sectors or business areas, as described in the investment strategy section.

The Sub-Fund has complied with these standards and has therefore met the environmental and social characteristics promoted. None of the high GHG emitters within our Sub-Fund failed our disclosure and alignment standards. For details regarding these standards, please view the table in section B of this document. In addition, during the 2024 reporting period, the Sub-Investment Manager undertook 84 engagements with high GHG emitters.

The Sub-Investment Manager considers high-intensity GHG emitters as companies that emit the equivalent of 1,000 CO2 tonnes per USD mm of annual revenues or more, or companies that are in one of the following industry sectors: Construction Materials, Oil & Gas, Steel, Aviation, Power Generation. This definition is going to be revised by the Sub-Investment Manager on an annual basis.

● *How did the sustainability indicators perform?*

Indicator	Metric	Year	Value	Commentary
Proportion of companies in the Sub-Fund that are considered high-intensity GHG emitters and disclose GHG emissions data in line with an internationally recognised standard	%	2024	37.0	17 out of 46 companies in the Sub-Fund are categorized as high-intensity emitters (equivalent to 36.96% of the portfolio). 17 of the 46 companies in the portfolio are considered high-intensity GHG emitters and disclose GHG emissions data in line with an internationally recognized standard (equivalent to 36.96% of the portfolio).
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to achieving net zero before 2050	%	2024	19.6	17 of the 46 companies in the portfolio are considered high-intensity GHG emitters and disclose GHG emissions data in line with an internationally recognized standard (equivalent to 36.96% of the portfolio).
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to a net-zero implementation plan that is verified by an internationally recognised third-party	%	2024	6.5	3 out of 46 companies in the Sub-Fund are considered high-intensity GHG emitters and are committed to reducing emissions in order to achieve net zero by 2050 (equivalent to 6.52% of the portfolio).
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and adhere to their credible net zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data, on at least an annual basis	%	2024	Data not available yet	It is too soon to assess the adherence of companies to report on their credible net-zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data. We will be evaluating the companies' implementation plans on a year-on-year basis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	2022	2023
Proportion of companies held in the portfolio that are considered high intensity GHG emitters and disclose GHG emissions data in line with an internationally recognised standard	%	35.5%	38.2%
Proportion of companies held in the portfolio that are considered high intensity GHG emitters and are committed to achieve net zero before 2050	%	22.6%	23.5%
Proportion of companies held in the portfolio that are considered high intensity GHG emitters and are committed to a net zero implementation plan that is verified by an internationally recognised third-party	%	19.4%	8.8%
Proportion of companies held in the portfolio that are considered high intensity GHG emitters and adhere to their credible net zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data, on at least an annual basis	%	Data not available yet	

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following principle adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2024	28,357.8	The Sub-Fund saw a recorded value for GHG Emissions of 28,357.8. This is a decrease of 86.14% relative to the value recorded for Q4 2023 of 204,594.4.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2024	1,456.8	The Sub-Fund saw a recorded value for Carbon Footprint of 1,456.8. This is an increase of 27.52% relative to the value recorded for Q4 2023 of 1,142.4.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2024	1,655.2	The Sub-Fund saw a recorded value for GHG intensity of 1,655.2. This is a decrease of 30.81% relative to the value recorded for Q4 2023 of 2,392.4.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Where material adverse impacts are identified, the Sub-Investment Manager will engage directly with company management where it is believed that there is a significant chance of positively affecting the behaviour of a company and/or exercise proxy voting rights in an effort to catalyse change.

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in sustainable investments within the meaning of Article 2(17) SFDR.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ is made of direct investment in high GHG emitters that are not yet aligned with E/S characteristics; and investments as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund, such as:

- derivatives for hedging and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;
- shares or units in other funds and exchange traded funds in which the Sub-Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied, however, good governance practices are applied to all direct investments. Such investments will not usually represent a material proportion of the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Members of the investment team met regularly with management teams of high emitters throughout the year. During the reference period, the Firm met 84 times with the management teams of the listed high emitters, and discussed 39 ESG topics with them:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective:** ___%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making most of its investment 90% in issuers that meet the standards of Compass Group's proprietary sustainability framework, as measured by Compass' internal ESG minimum score of 60.

The Sub-Fund has complied with this standard, as 83 out of 84 companies within the Sub-Fund's portfolio provided material ESG data. Of those, all 83 had an ESG score of 60 or above (which represents 99.63% of the portfolio), and has therefore met the environmental and social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores above 60	%	2024	100.0	Out of 84 total issuers for the strategy, 83 provided material ESG data. All 83 of these issuers obtained an ESG score of over 60, implying a proportion of 99.63% of the portfolio.

● ***...and compared to previous periods?***

Sustainability indicator	Metric	Year	Value
Proportion of investments in borrowers with proprietary bottom-up ESG scores above 60	%	2023	93.2

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following principle adverse impacts have been considered as part of the Sub-Fund’s investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2024	719,764.9	The Sub-Fund saw a recorded value of GHG emissions of 719,764.9. This is an increase of 5.60% relative to the value recorded for Q4 2023 of 681,619.7.
Carbon Footprint	Scope 1, 2, and 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2024	1,241.5	The Sub-Fund saw a recorded value for Carbon Footprint of 1,241.5. This is a decrease of 10.65% relative to the value recorded for Q4 2023 of 1,389.5
GHG intensity	Scope 1, 2, and 3 GHG intensity of investee companies tCO2e/m € revenue	2024	1,697.8	The Sub-Fund saw a recorded value for GHG intensity of 1,697.8. This is a decrease of 27.62% relative to the value recorded for Q4 2023 of 2,345.7.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Where material adverse impacts are identified, the Investment Manager will engage directly with company management where it is believed that there is a significant chance of positively affecting the behaviour of a company and/or exercise proxy voting rights in an effort to catalyse change.

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Cia De Minas Buenaventura Saa 5.5 Jul 23 26	Basic Materials	1.7	Peru
Kuo Sab De Cv 5.75 Jul 07 27	Consumer, Non-cyclical	1.7	Mexico

Multibank Inc 7.75 Feb 03 28	Financial	1.2	Panama

The above top 15 investments represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

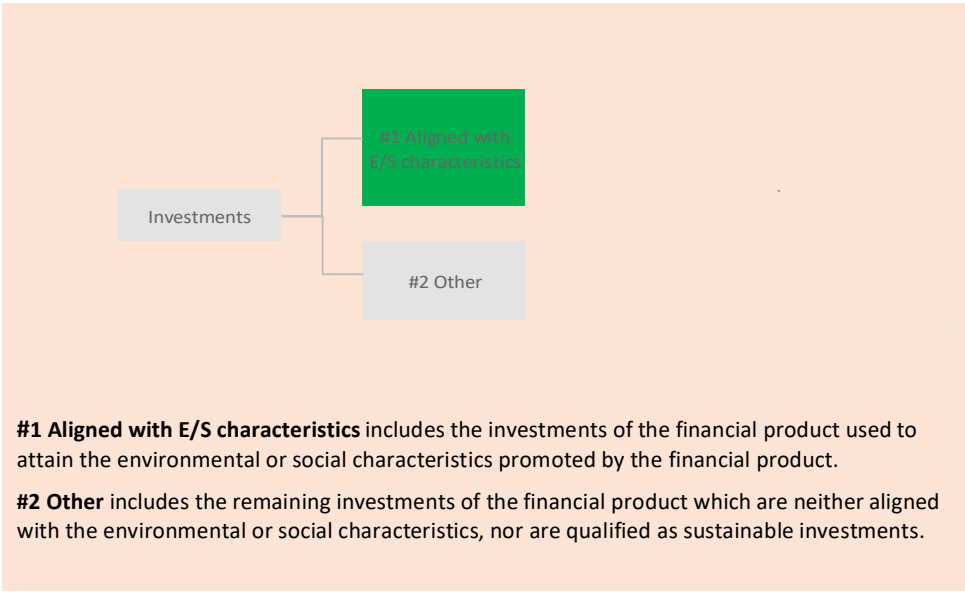

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	100.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	16.4
Communications	3.0
Consumer, Cyclical	7.0
Consumer, Non-cyclical	8.7
Diversified	0.2
Energy	16.2
Financial	21.8
Government	2.4
Industrial	8.8
Utilities	11.8

The above sector allocation represents the average of the Sub-Fund’s holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

☐ Yes:

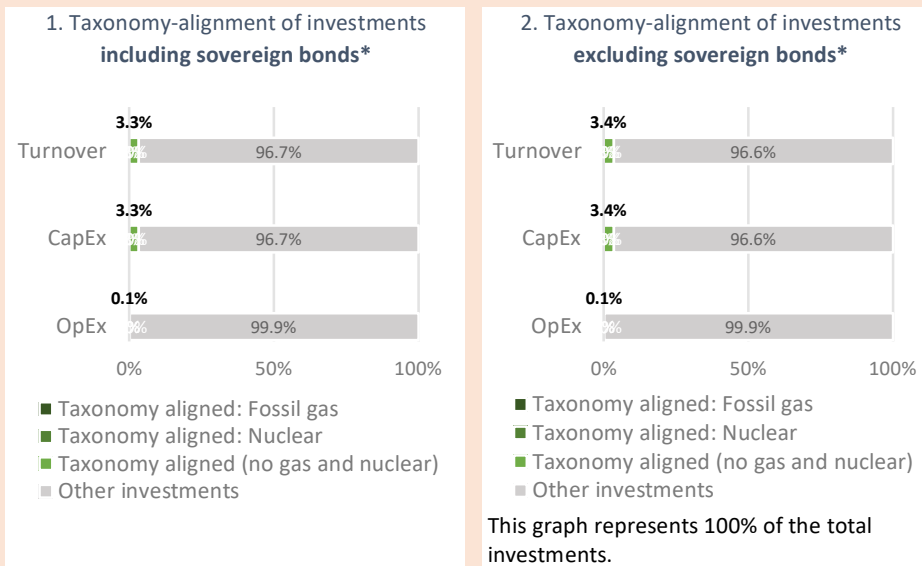

☐ in fossil gas ☐ in nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.1
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
	2023
Transitional activities	0.3
Enabling activities	0.0

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ is made of direct investment in high GHG emitters that are not yet aligned with E/S characteristics; and investments as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund, such as:

- borrowers that are considered not aligned with E/S characteristics; and
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management; and
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and
- shares or units in other funds and exchange traded funds in which the Sub-Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied, however, good governance practices are applied to all direct investments. Such investments will not usually represent a material proportion of the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment team has diligently worked on incorporating ESG considerations into the overwhelming majority of the Fund, successfully designating 93.22% of portfolio issuers with an appropriate score for the Firm's ESG rating.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Global Environment Fund

Legal entity identifier: 213800LQ2Q46VNU9L735

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☒ **Yes**

●○ ☐ **No**

☒ It made **sustainable investments with an environmental objective:** 98.8%

☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☐ It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund's environmental objective is to make sustainable investments that aim to contribute to positive environmental change through sustainable decarbonisation.

The methodology used to determine the Sub-Fund is making sustainable investments that aim to contribute to positive environmental change through sustainable decarbonisation is called 'carbon avoided'. 'Carbon avoided' refers to the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation.

As at 31/12/2024 and over the course of 2024, every company held in the Sub-Fund, excluding cash, contributed to positive environmental change through sustainable decarbonisation as evidenced by every holding having positive 'carbon avoided', and the Sub-Fund overall having positive 'carbon avoided'. Therefore, the Sub-Fund met its environmental objective and therefore its sustainable investment objective.

Further evidence of this attainment at a company-by-company level is available in the Impact Report for the Sub-Fund, available on Ninety One's website and updated on an annual basis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 and 3 absolute carbon emissions	in tonnes of CO2e	2024	16,091,953	Over time we expect to see carbon emissions measures reducing for the Sub-Fund. The capital-intensive nature of several companies in the Sub-Fund's (e.g. Utilities and Industrials) combined with the Sub-Fund's concentration in these sectors can skew the emissions data upwards. We believe this data should be assessed in conjunction with the carbon avoided data. Industrie de Nora is a top contributor to the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure and relatively small market cap size and revenues. The company is a specialist energy-efficient electrodes manufacturer with significant opportunity within the green-hydrogen value chain with targets set including halving Scope 1, 2 & 3 emissions intensity by 2030 and SBTi targets under way.
Scope 1, 2 and 3 carbon footprint	in tonnes of CO2e per US\$m invested	2024	424.2	
Scope 1, 2 and 3 – weighted average carbon intensity	in tonnes per CO2 e per US\$m or revenue	2024	1,031.6	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	(%)	2024	Scope 1 & 2 = 100.0% All Scope 3 categories = 69.2%	There has been improvement in Sub-Fund companies' reporting of carbon data over the reporting period. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Percentage of companies with credible net zero plans in place**	%	2024	61.5%	There has been growth in the adoption of SBTi approved net zero plans over the reporting period. We will continue to engage with all our companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2024	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.
Carbon avoided – footprint	in tonnes per CO2 e per US\$1m invested	2024	1,845.1	Every company in the Sub-Fund produced positive carbon avoided.

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, we have defined “companies with credible net zero plans” as those companies with plans approved by the Science-Based Target Initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

A note on ‘carbon avoided’

‘Carbon avoided’ are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2022. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag.

...and compared to previous periods?

Indicator	Metric	2022**	2023*
Scope 1, 2 and 3 absolute carbon emissions	in tonnes of CO2e	29,629,358.7	22,359,620.1
Scope 1, 2 and 3 carbon footprint	in tonnes of CO2e per US\$m invested	611.5	430.6
Scope 1, 2 and 3 – weighted average carbon intensity	in tonnes per CO2 e	2,500.6	1,504.2

	per US\$m or revenue		
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	(%)	Scope 1 & 2 = 100.0% All Scope 3 categories = 52.2%	Scope 1 & 2 = 95.8% All Scope 3 categories = 45.8%
Percentage of companies with credible net zero plans in place***	%	43.5%	41.7%
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	0.0%	0.0%
Carbon avoided – footprint	in tonnes per CO2 e per US\$m invested	1,152.3	2,359.2

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023.

**The above carbon disclosure is based on data from companies as at the end of financial year 2020 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2022.

While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

***For the purposes of this reporting, we have defined “companies with credible net zero plans” as those companies with plans approved by the Science-Based Target Initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

Over 2024, the Sub-Fund saw a reduction in the carbon emissions measures but also a reduction in its carbon avoided. This is a function of a combination of positive progress on carbon emissions reductions by individual companies held in the Sub-Fund as well as changes in the asset allocation between these companies as well as new company holdings introduced over the reporting period which have impacted the emissions and carbon avoided aggregate measures.

Over 2024, the Sub-Fund saw an improvement in the proportion of companies disclosing Scope 1 and 2, and All Scope 3 carbon emissions figures. This is a result of both improvements in company holdings reporting carbon emissions and also portfolio changes including the introduction of new portfolio companies reporting emissions. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories’ disclosure.

Over 2024, the Sub-Fund saw an improvement in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies which have credible net zero plans in place including AECOM, Shimadzu and Spectris as well as the sale of companies which did not have credible net zero plans in place including Carlisle Cos, Wuxi Lead Intelligent and Xinyi Solar. We also saw the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the 14 mandatory principal adverse impacts are taken into account when assessing if significant harm is caused by the Sub-Fund's intended sustainable investments.

The Investment Manager uses quantitative data (i.e., the metrics for the mandatory principal adverse sustainability indicators as outlined in Annex I of the Commission Delegated Regulation (EU) 2022/1288), where available, and applies a qualitative assessment where the Investment Manager applies their knowledge, experience and judgement to the quantitative PAI data to form a conclusion which considers the context of the company's business model and its activities. For material principal adverse impacts, the Investment Manager focuses assessment on progress made against the principal adverse impact and/or the policies, business models and operations the company has in place to manage adverse impacts.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Where indicators for adverse impacts on sustainability factors are not available (i.e. not reported by an investee company), the Investment Manager engages with companies in the Sub-Fund to disclose against all mandatory indicators.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2024	201,678.9	These values have been scaled up so that corporate exposure represents the fund's total value. Over time we expect to see carbon emissions measures reducing for the Sub-Fund. The capital-intensive nature of several companies in the Sub-Fund's (e.g. Utilities and Industrials) combined with the Sub-Fund's concentration in these sectors can skew the emissions data upwards. We believe this data should be assessed in conjunction with the carbon avoided data. Industrie de Nora is a top contributor to the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. The company is a specialist energy-efficient electrodes manufacturer with significant opportunity within the green-hydrogen value chain with targets set including halving Scope 1, 2 & 3 emissions intensity by 2030 and SBTi targets under way.
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m EUR invested	2024	352.7	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO ₂ e/m EUR revenue	2024	1,117.6	
Exposure to companies active in the fossil fuel sector	%	2024	11.5%	3 companies out of 24 – NextEra Energy, Iberdrola and Orsted – have exposure to the fossil fuel sector. This exposure mainly relates to legacy exposure. These companies are at the forefront of decarbonisation through renewable energy. Exposure to these companies are deemed not to result in material negative impacts..
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2024	35.0%	There was a modest improvement over the reporting period. Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. The Sub-Fund's relatively high exposure to emerging markets skews this measure

				downwards. These results are consistent with expectations, and deemed not to result in material negative impacts.
--	--	--	--	-------------------------------------------------------------------------------------------------------------------

*The above carbon disclosure is based on data from companies as at the end of financial year 2022 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2024. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Waste Management Inc Common Stock Usd.01	Industrials	6.7	United States

The above Top 15 represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

What was the proportion of sustainability-related investments?

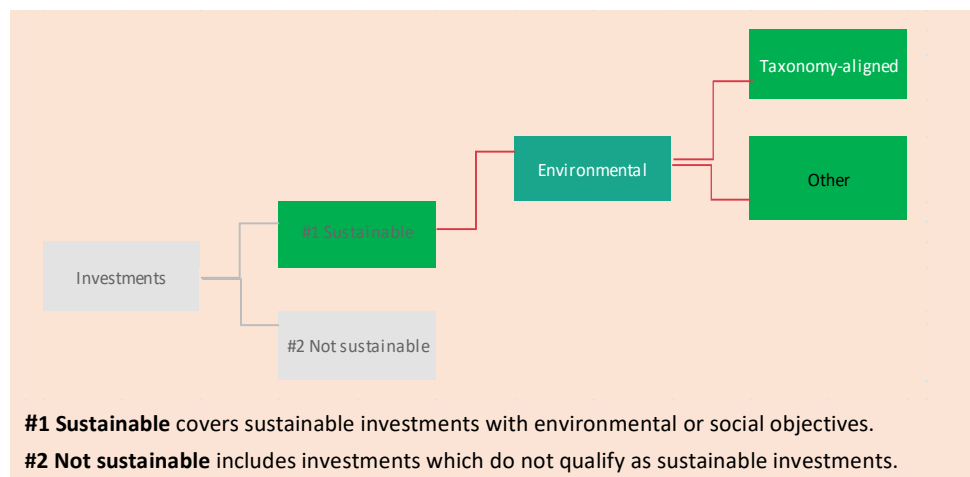

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Sustainable investments within meaning of Article 2(17) SFDR	98.8
#2 Not sustainable investments within meaning of Article 2(17) SFDR	1.2
Environmental investments within meaning of Article 2(17) SFDR	98.8
Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	1.2

Sustainable Investments (#1) Breakdown	% of Total Sub-Fund Value *
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	22.0
Investments with an environmental objective but not aligned with the Taxonomy	76.8

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

● ***In which economic sectors were the investments made?***

GICS_Sector	GICS_Industry	% Assets
Industrials	Electrical Equipment	21.4
Utilities	Electric Utilities	18.1
Information Technology	Software	10.1
Industrials	Commercial Services & Supplies	9.3
Information Technology	Electronic Equipment Instruments & Components	8.1
Materials	Chemicals	6.7
Industrials	Machinery	6.1
Information Technology	Semiconductors & Semiconductor Equipment	5.6
Utilities	Independent Power And Renewable Electricity Producers	3.8
Consumer Discretionary	Automobile Components	3.8
Industrials	Building Products	3.2
Industrials	Construction & Engineering	1.5
Consumer Discretionary	Automobiles	0.9

The above sector allocation represents the average of the Sub-Fund's holdings at each quarter-end during the reporting period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy. Further, the Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data.

As such, while every company held in the Sub-Fund as at 31/12/2024 and over the course of 2024, excluding cash, contributed to positive environmental change through sustainable decarbonisation as evidenced by every holding having positive 'carbon avoided', the alignment of sustainable investments with an environmental objective to the EU taxonomy represents a conservative figure.

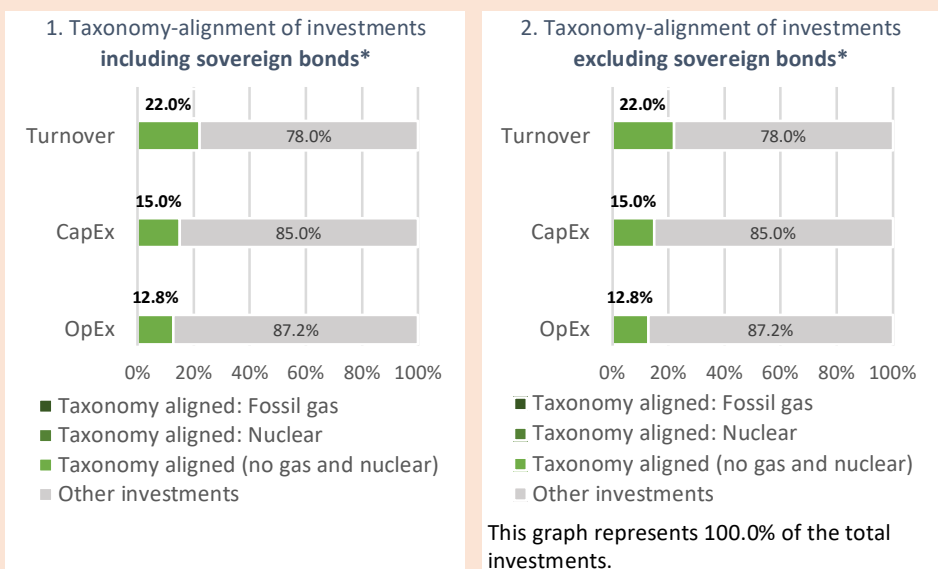

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- ☐ Yes:
- ☐ in fossil gas ☐ in nuclear energy
- ☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy Alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	12.0

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	
Year	2022	2023
Transitional activities	0.0	0.0
Enabling activities	15.2	23.4

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	76.8

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

N/A

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Not sustainable' includes investment held for liquidity purposes (e.g. Cash, deposits).

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash and deposits). These investments have not affected the delivery of the sustainable investment objective as they do not form a material part of the Sub-Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

The Investment Manager has determined that all companies have contributed to positive environmental change through sustainable decarbonisation. This is evidenced by every holding, excluding cash, being measured as having positive carbon avoided over the period in question.

Over the period, the Investment Manager has engaged with every company in the Sub-Fund on a range of issues covering sustainability reporting, governance, diversity and inclusion, health and safety and carbon emissions.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks
are indexes to measure whether the financial product attains the sustainable objective.
