You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type:

Société d'Investissement à Capital Variable [SICAV]

This product is not subject to any fixed term.

This product is not subject to any fixed term.

Objectives:

Global ESG socially responsible active investment strategy seeking to outperform the global high yield market with lower volatility by diversified investments in US and non-US dollar high yield corporate bonds of all available maturities and below-investment-grade ratings.

The Fund will be invested primarily in High Yield global corporate bonds some of which will be purchased at a discount to face value and may therefore offer a potential for capital appreciation as well as high current income. Conversely some bonds will be purchased at a premium in order to obtain a high yield and the Fund may realize a capital loss on their disposition.

A Shareholder may redeem its shares in the Fund on demand, on each day on which banks in Luxembourg and New York are open all day for business. The fund is actively managed and invests predominantly in corporate bonds rated below investment grade.

The Investment Manager will invest across the full maturity and ratings spectrum of the global corporate High Yield debt universe and shall have significant discretion to derogate from the Benchmark by investing in currencies, companies or sectors with significantly different weights than or not included in the Benchmark in order to take advantage of specific investment opportunities. The Investment Manager shall have discretion to invest in securities and/or currencies that are not constituents of the Benchmark.

This product uses forward foreign exchange contracts to hedge exposure to currencies other than the currency of the share class.

Intended Retail Investor:

This Sub-Fund is appropriate for all investors with a basic knowledge of the capital markets who, as a core or component of a portfolio of investments, may prefer a socially responsible investment fund with a medium term investment horizon of three years or longer that seeks to invest in a diversified portfolio of high yield debt securities denominated in Hard Currencies and issues by companies domiciled or listed in the United States, EU or other members of the OECD.

Depository: J.P. Morgan SE

The Company's prospectus, latest annual and semi-annual report, and further information about the Company and its Sub-Funds is available without charge at the Company's website at: www.skyharborglobalfunds.com.

The NAV prices of this share class are published on the website www.fundsquare.net and are also available at the registered office of SKY Harbor Global Funds.

The assets and liabilities of each sub-fund of SKY Harbor Global Funds are segregated which means that each sub-fund of SKY Harbor Global Funds is a separate entity with, but not limited to, its own contributions, redemptions, capital gains, losses, charges and expenses. An investor in one sub-fund is only entitled to the assets and profits of that sub-fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 Years.

The actual risk can vary significantly if you redeem early and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you. The risk category associated with this product was determined based on past observations and it is not guaranteed and can evolve in the future.

A Liquidity Event is the risk of an exceptional and broad reduction in the general ability of financial market participants to sell financial assets without an unusual and significant discount.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years Investment: 10 000 EUR			
Scenarios		1 Year	5 Years (recommended holding period)
Minimum:

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years
Total Costs	473 EUR	1707 EUR
Annual Cost Impact (*)	4.73 %	3.08 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.11% before costs and 1.03% after costs.
