Report of the Board of Directors

The Chairman's report

In 2021 the challenges and special circumstances imposed by the COVID-19 pandemic continued not only for Nordea 2, SICAV, the Company, but also on a both global and personal level for many companies and people. Supply chain issues started to emerge as a function of too few investments, high demand, the impact of COVID-19 and over-ordering in anticipation of supply delays. Competition from the likes of Amazon boosted salary demands and the net impact of all this was that inflation started to surge globally, reenforced by a sharp recovery in oil prices due to a curtailed supply by OPEC. The US Federal Reserve seemed surprised by the surge in inflation and their expected monetary policy tightening resulted in a mixed performance for US stocks while the dollar strengthened in November and December on the back of higher US interest rates. Faced with inflation, the European Central Bank, ECB, decided at year-end 2021 to finish the COVID-19 related bond purchasing program by March 2022, but remained less aggressive compared to the Federal Reserve for several reasons:

- Inflation has not surged as much in Europe as in the US.
- There is no clear indication of a wage inflation spiral in Europe even though there are signs of staff shortages in some sectors such as in the leisure industry where COVID-19 is a significant concern.
- Finally, the ECB was likely to hope that the slowdown in China and measures taken by the Federal Reserve would be enough for the supply-chain tensions to abate and there were indeed early indications of this in December 2021. During that period, the MSCI Europe stopped underperforming the US, while the Nordics outperformed partly thanks to the quality of their companies.

Looking at China, the Chinese economy was growing at a steady rate until it started to slow down faster than expected due to weaker consumption and a budding real estate crisis. The consequence was a strong under-performance of Chinese equities.

Having come from an encouraging end of year 2020 into 2021, the positive trend continued for the Company with new record heights in Assets under Management, AuM, month by month. Global economic activity started to gently decelerate in 2021 with, as mentioned, too much demand looking for too little supply and several supply chain bottle necks. With the emergence of COVID-19 variants Delta and Omicron further health measures were introduced all over the world hurting economic activity. The Company nevertheless continued to see exceptional growth with only minor downturns in September and November closing the year with EUR 14.8 billion in AuM, marking yet another record in the Company's history. This year-end result should be compared with EUR 11.97 billion end of 2020.

With respect to the current crisis affecting Ukraine, we as Board of Directors as well as the wider Nordea Asset Management are closely monitoring the escalating conflict between Russia and Ukraine and we are committed to supporting our shareholders impacted by the developing situation. We will follow up on the new sanctions requirements and ensure they are complied with in an appropriate and timely fashion in the interests of our shareholders.

The Board would like to thank all stakeholders involved in the running of Nordea 2, SICAV for their contribution in 2021. In this spirit of commitment and motivation, the Board is looking forward to continuing to service the shareholders in the best way possible also in 2022.

16 March 2022

Claude Kremer, Chairman

Corporate Governance Statement

Introduction

Nordea 2, SICAV (hereafter the "Company") has been authorised by the Commission de Surveillance du Secteur Financier (the "CSSF") as an undertaking for collective investment in transferable securities ("UCITS"). The Company complies with the principles of good governance set out in the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct Revision 2013 issued by ALFI in June 2013. The board of directors of the Company (the "Board of Directors") is committed to maintaining the highest standards of corporate governance and is accountable to shareholders for the governance of the Company's affairs. This statement summarises the corporate governance structure and processes in place for the Company for the period under review.

Board of Directors Composition

The Board of Directors currently consists of five Directors, (including one independent Director). The Board of Directors is committed to maintaining an appropriate balance of skills, experience, independence and knowledge amongst its members. The Company's Articles (the "Articles"), in accordance with Luxembourg law, provides that Directors shall be elected by the shareholders at their annual general meeting and they are subject to the approval of the CSSF. Directors serve until their term ends, they resign, or their mandate is revoked, in accordance with the Company's Articles.

Members of the Board of Directors shall start an induction program, if required by the Board of Directors, as soon as practicable after the appointment. Each respective Board of Directors shall self-evaluate its work every second year with the aim of developing its working methods and efficiency.

Board of Directors Responsibilities

The Board of Directors meets at least quarterly and also on an ad hoc basis as required. The Board of Directors is supplied with information in a timely manner.

The Board of Directors is responsible for the overall investment policy, objectives and management of the Company and, as described more fully in the Articles, has broad powers to act on behalf of the Company, including:

- appointing and supervising the management company;
- setting investment policy and approving the appointment of any investment manager or sub- investment manager;
- making all determinations regarding the launch, modification, merger or discontinuation of the Company and share classes, including such matters as timing, pricing, fees, base currency, dividend policy and payment of dividends, liquidation of the Company, and other conditions;
- determining eligibility requirements and ownership restrictions for investors or share class, and what steps may be taken in the case of any violation;
- determining the availability of any share class to any investor or distributor or in any jurisdiction;
- determining when and how the Company will exercise its rights and will distribute or publicise shareholder communications;
- ensuring that the appointments of the management company and the depositary bank are consistent with the 2010 Law and any applicable contracts of the Company;
- determining whether to list any shares on the Luxembourg stock exchange.

The Board of Directors may delegate some of these responsibilities to the management company.

Board of Directors Remuneration

The Company shall pay an aggregate remuneration to the independent Director amounting to EUR 30,000 gross per annum, excluding Luxembourg VAT, if any, subject to shareholder approval in the Annual General Meeting and is included within the note "Approval of Directors' fees". Nordea representatives do not receive any compensation for their directorship.

Audit report

To the Shareholders of
the sub-fund distributed in Switzerland of Nordea 2, SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the sub-fund distributed in Switzerland (“the sub-fund”) of Nordea 2, SICAV (the “Fund”), as listed in Note 1, as at 31 December 2021, and of the results of its operations and changes in its net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The sub-fund’s financial statements comprise:

- the statement of net assets as at 31 December 2021;
- the statement of operations and changes in net assets for the year then ended;
- the statement of investments in securities and other net assets as at 31 December 2021;
- the statement of derivative instruments as at 31 December 2021; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Emphasis of matter

We draw attention to the fact that, as described in Note 1 to these financial statements, the sub-fund distributed in Switzerland of Nordea 2, SICAV does not constitute a separate legal entity from the Fund. Our opinion is not modified in respect of this matter.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and the sub-fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close the sub-fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or the sub-fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or the sub-fund to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Restriction on Distribution and Use

This report, including the opinion, has been prepared only for the Shareholders of the sub-fund and the Board of Directors of the Fund in accordance with the terms of our engagement letter and is not suitable for any other purpose. We do not accept any responsibility to any other party to whom it may be distributed.

Goldman Sachs Bank Europe SE received USD 260,000.00 as collateral for Forward Foreign Exchange Contracts and Interest Rate Swaps.

Any differences in the percentages of net assets are the results of rounding.
The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements as of 31/12/2021

Note 1 – General

The Company is organized as a variable capital company, Société d'Investissement à Capital Variable (SICAV) multiple compartments (each compartment being herein after referred to as a "Sub-fund", and defined as "fund" in the prospectus) under the law of 10 August 1915 relating to commercial companies as amended and part I of the law of 17 December 2010 on undertakings for collective with investment (UCI) as amended (the "Law"). The Board of Directors appointed Nordea Investment Funds S.A. as its management company (the "Management Company"). The Management Company is in charge of the portfolio management, the administration and the distribution of the Company. J.P. Morgan Bank Luxembourg S.A. has been appointed as depositary of the Company (the "Depositary").

The Sub-fund distributed in Switzerland, in scope of this reporting is:

Name of Sub-fund	Base Currency	Inception Date
Nordea 2 - Emerging Market Local Debt Enhanced Fund	USD	18/09/2019

The above listed sub-fund is the only active sub-fund of Nordea 2, SICAV as at 31 December 2021, which is distributed in Switzerland. This sub-fund does not constitute a separate legal entity from the Fund. The audited annual report as at 31 December 2021, including all the sub-funds of Nordea 2, SICAV, has been issued on 16 March 2022.

Note 2 – Summary of significant accounting policies

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds, under the going concern basis of accounting.

a) Valuation of investment securities

Investment securities are valued as follows:

1. The value of any cash on hand or on deposit, bills or notes payable, accounts receivable, prepaid expenses, cash dividends and interest accrued but not yet received shall be equal to the entire nominal or face amount thereof, unless the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate in such case to reflect the true or fair value thereof.
2. Transferable Securities and Money Market Instruments which are quoted, listed or traded on an exchange or regulated market will be valued, unless otherwise provided under paragraphs (3) and (6) below, at the last available market price or quotation, prior to the time of valuation, on the exchange or regulated market where the securities or instruments are primarily quoted, listed or traded. Where securities or instruments are quoted, listed or traded on more than one exchange or regulated market, the Board of Directors will determine on which exchange or regulated market the securities or instruments are primarily quoted, listed or traded and the market prices or quotations on such exchange or regulated market will be used for the purpose of their valuation. Transferable Securities and Money Market Instruments for which market prices or quotations are not available or representative, or which are not quoted, listed or traded on an exchange or regulated market, will be valued at their probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.
3. Where permitted under applicable laws and regulations, Money Market Instruments may be valued using an amortisation method whereby instruments are valued at their acquisition cost as adjusted for amortisation of premium or accrual of discount on a constant basis until maturity, regardless of the impact of fluctuating interest rates on the market value of the instruments. The amortisation method will only be used if it is not expected to result in a material discrepancy between the market value of the instruments and their value calculated according to the amortisation method.
4. Financial Derivative Instruments which are quoted, listed or traded on an exchange or regulated market will be valued at the last available closing or settlement price or quotation, prior to the time of valuation, on the exchange or regulated market where the instruments are primarily quoted, listed or traded. Where instruments are quoted, listed or traded on more than one exchange or regulated market, the Board of Directors will determine on which exchange or regulated market the instruments are primarily quoted, listed or traded and the closing or settlement prices or quotations on such exchange or regulated market will be used for the purpose of their valuation. Financial Derivative Instruments for which closing or settlement prices or quotations are not available or representative will be valued at their probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.
5. Financial Derivative Instruments which are traded 'over-the-counter' (OTC) will be valued daily at their fair market value, on the basis of valuations provided by the counterparty which will be approved or verified on a regular basis independently from the counterparty. Alternatively, OTC Financial Derivative Instruments may be valued on the basis of independent pricing services or valuation models approved by the Board of Directors which follow international best practice and valuation principles. Any such valuation will be reconciled to the counterparty valuation on a regular basis independently from the counterparty, and significant differences will be promptly investigated and explained.
6. Notwithstanding paragraph (2) above, shares or units in target investment funds (including, UCITS and UCI) will be valued at their latest available official net asset value, as reported or provided by or on behalf of the investment fund or at their latest available unofficial or estimated net asset value, provided that the Board of Directors is satisfied of the reliability of such unofficial or estimated net asset value. Alternatively, shares or units in target investment funds which are quoted, listed or traded on an exchange or regulated market may be valued in accordance with the provisions of paragraph (2) above.
7. The value of any other asset not specifically referenced above will be the probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.

b) Net realised gain or loss on sales of investment securities

The net realised gain or loss on sales of securities is determined on the basis of the average cost of the securities sold.

Notes to the Financial Statements as of 31/12/2021 (continued)

c) Foreign exchange translation

The financial statements of each Sub-fund of the Company are expressed in the base currency of each Sub-fund. Assets and liabilities in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at year-end. Income and expenses in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at payment dates. Resulting foreign exchange gains or losses are included in the Statement of Operations and Changes in Net Assets.

The principal exchange rates used at the end of the year were:

1 EUR = 7.43630031 DKK	1 EUR = 9.98402659 NOK	1 EUR = 10.25178505 SEK
1 EUR = 130.40765775 JPY	1 EUR = 1.13265000USD	

d) Cost of investment securities

The cost of investment securities denominated in currencies other than the Sub-fund's base currency is translated into the base currency at the exchange rate prevailing at the date of purchase.

e) Dividends and interest

Dividends are recorded net of withholding taxes. They are recognized as income on the date securities are first quoted ex-dividend, to the extent that information thereon is reasonably available to the Sub-fund. Interest on bonds is accrued on a daily basis.

f) Financial futures contracts

The Company is authorised to buy and sell financial futures contracts. Upon entering into a contract the Company deposits and maintains cash as collateral with the clearing broker Merrill Lynch International Limited. The cash margin calls needed to cover the required contract margins are adjusted daily in the Company cash accounts, and results on open positions are considered as realised at that point in time but reflected as unrealised gain/(loss) in the financial statements ("Unrealised gain on futures already cashed"/ "Unrealised loss on futures already cashed"). The margin is calculated as the difference between the value of the contract at previous valuation day and the financial future value at the valuation day.

g) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the year until their maturity. The net unrealised appreciation/(depreciation) on open forward foreign exchange contracts at year-end is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on forward foreign exchange contracts".

h) Credit default swaps (CDS)

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Sub-fund's portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which is then compared against a third party pricing agent (GlobeOp) or the CCP. The initial value of the contracts is equal to the mark-to-market value at inception and an upfront payment is exchanged to ensure that the economic value of the transaction is zero at initiation of the trade for the two parties.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on credit default swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on credit default swaps" and "Changes in unrealised gain/(loss) on credit default swaps." The upfront fee paid or received when entering the contract is included in the initial value of the contract and disclosed in the Statement of Net Assets under "Credit default swaps at cost".

i) Interest rate swaps (IRS)

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis which is usually not exchanged. Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which are compared against a third party valuation (GlobeOp). The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on interest rate swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on interest rate swaps" and "Changes in unrealised gain/(loss) on interest rate swaps."

j) Definition of terms used in the Statement of Investments in Securities and Other Net Assets and in the Credit Default Swaps (CDS) tables

FRN (Floating Rating Note): Bond with a coupon indexed to a benchmark interest rate such as LIBOR or Euribor plus or minus a spread. Only the dates of changes are known from the date of issue.

MULTI (Fixed-to-float or Fixed-to-variable bonds): The interest rates and dates of the changes are known from the date of issue.

Notes to the Financial Statements as of 31/12/2021 (continued)

VAR: Bond with an interest rate varying during its lifetime other than FRN or MULTI.

PERPETUAL: This term is used for bonds with no maturity date. The principal amount is never paid to the investor and instead he receives a steady stream of interest forever.

P-NOTE (Participatory note): Instruments issued by registered foreign institutional investors (FII) to overseas investors, who wish to invest in the Indian stock markets without registering themselves with the market regulator, the Securities and Exchange Board of India - SEBI.

No ref obligation: Disclosed in the Credit Default Swaps tables, when no underlying reference bond is available in the official RED database from Markit.

k) Combined statements

The Company's Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets are the sum of the statements of each Sub-fund translated into EUR at the prevailing exchange rates as at end of the year. The difference between opening total net assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as an exchange difference in caption "Revaluation difference on opening net assets" in the Combined Statement of Operations and Changes in Net Assets.

l) Last tradable Net Asset Value of the year

The annual report shows all Sub-funds with a Net Asset Value dated 31 December 2021 while for the following Sub-fund, the last tradable Net Asset Value was dated 30 December 2021 due to closed markets in certain countries on 31 December 2021:

Nordea 2 - Emerging Market Local Debt Enhanced Fund

Note 3 – Charges taken from the Company over a year

a) Management fees

These fees, payable out of the assets of the relevant Sub-funds, are due to the Management Company. The management fees for D and Z shares are set in the separate terms that apply to investors in these shares. Management fees for X shares are not taken from the Company but are paid by investors in this type of shares. Management fees for Y shares are zero.

b) Operational expenses

These expenses consist of an administration fee (for central administration), depositary fees (charges for safekeeping, and other associated services), and the taxe d'abonnement (for further description on the taxe d'abonnement please see note 4 below). Safekeeping and related administration charges are based on the value of assets held in custody and vary from Sub-fund to Sub-fund depending on the countries the Sub-funds are invested in. Operational expenses further include:

- All expenses of the auditor and legal advice
- All expenses connected with publication and supply of information to shareholders, in particular the cost of printing, the distribution of financial reports as well as any prospectuses.
- All expenses related to the maintenance, production, printing, translation, distribution, dispatch, storage and archiving of the KIIDs.
- Any advertising costs and expenses other than those specified above that the Management Company determines to be directly related to the offer or distribution of shares.
- All expenses involved in registering and maintaining the registration of the Company with supervisory authorities and stock exchanges.

The following tables disclose the management fees and operational expenses of share classes available to (i) institutional investors and (ii) all investors excluding institutional investors.

Management fees and operational expenses of share classes available to institutional investors:

	Management Fee					Operational expenses (Max)				
	I	D	Z	X and Y	R	I	D and Z	X and Y	R	
Nordea 2 - Emerging Market Local Debt Enhanced Fund	0.20%	n/a	n/a	Nil	n/a	0.40%	On Application	0.40%	n/a	

Management fees and operational expenses of share classes available to all investors (excluding classes reserved to institutional investors):

	Management Fee				Operational expenses (Max)		
	P	Q	E	C	F		
Nordea 2 - Emerging Market Local Debt Enhanced Fund	0.70%	0.50%	0.70%	0.50%	0.20%		0.40%

c) Distribution fee

This fee is paid to the Management Company and in principle forwarded to the local distributor or intermediary. The fee is charged only on E shares and is 0.75% a year.

Notes to the Financial Statements as of 31/12/2021 (continued)

Note 4 – Taxes

The Company is subject to a taxe d'abonnement (subscription tax) at the following rates:

- Classes C, E, F, P and Q: 0.05%.
- Classes D, I, R, X, Y and Z: 0.01%.

This tax is calculated and payable quarterly, on the aggregate net asset value of the outstanding shares of the Company. The Company is not currently subject to any Luxembourg stamp tax, withholding tax, municipal business tax, net worth tax, or taxes on income, profits or capital gains. The taxe d'abonnement is paid out of the operational expenses.

To the extent that any country in which a Sub-fund invests imposes taxes on income or gains earned in that country, most of these taxes will be deducted before the Sub-fund receives its income or proceeds. Some of these taxes may be recoverable. The Sub-fund might also have to pay other taxes on its investments. See also "Tax risks" in the "Risk descriptions" of the prospectus of the Company. While the above tax information is accurate to the best of the board's knowledge, it is possible that a tax authority may modify existing taxes or impose new ones (including retroactive taxes) or that the Luxembourg tax authorities may determine, for example, that any class currently identified as being subject to the 0.01% taxe d'abonnement should be reclassified as being subject to the 0.05% rate. The latter case could happen for an institutional share class of any Sub-fund for any year during which an investor not entitled to hold institutional shares was found to have held such shares.

Note 5 – Statement of changes in investments

A list specifying for each Sub-fund the total purchases and sales in the investments which occurred during the year under review, can be obtained, free of charge and as hardcopy, from the registered office of the Company, the Depositary and the Principal Distributor or any company listed in the section "Representatives & Paying & Information Agents outside Luxembourg".

Note 6 – Total Expense Ratio (TER)

This ratio expresses the sum of all costs and commissions charged on an ongoing basis to the Sub-fund's net assets (operating expenses as shown under "Expenses" in the Statement of Operations and Changes in Net Assets but excluding the caption "Transaction related costs") taken retrospectively as a percentage of the average Sub-fund's net assets. The transaction fees incurred on the purchase and sale of investments are not included in the ratio. The TER is calculated in accordance with the Swiss Funds & Asset Management Association guidelines dated 20 April 2015 and is in principle calculated using the following formula:

$$\text{TER \%} = \frac{\text{Total operating expenses in CU}^*}{\text{Average Sub-fund's net assets in CU}^*} \times 100$$

* CU = Currency units in the Sub-fund's accounting currency

The TER is calculated for the preceding 12 months as of the closing date of the financial year.

In the case of newly launched Sub-funds, the operating expenses are annualized.

Note 7 – Changes to the Prospectus of the Company during the reporting year

The latest prospectus of the Company was issued in December 2021.

The latest versions of the Key Investor Information Documents (the "KIIDs") for each of the Company's Sub-funds' share classes may be found on nordea.lu.

The current Prospectus and KIIDs for the share classes of the Company's Sub-funds can also be obtained free of charge and as hard copy, from the registered office of the Company.

Any material changes to the Prospectus will be communicated by a notice sent to registered shareholders and made available on nordea.lu. Notice to shareholders will also be available at the registered office of the Management Company and the Company's representative outside of Luxembourg.

Note 8 – Country and Economic Sector classification of the portfolio (unaudited)

The Economic Sector classification of the portfolio is shown in accordance with the GICS Direct classifications (a joint product of MSCI and Standard & Poor's).

Note 9 – Share capital and share classes

Please refer to the sections "the SICAV" and "Share Classes" of the Company's prospectus for further information on the share capital and share classes of the Company respectively.

Notes to the Financial Statements as of 31/12/2021 (continued)

Note 10 – Swing factor

On business days when net dealing in Sub-fund shares exceeds a certain threshold, a Sub-fund's NAV may be adjusted by a swing factor. This adjustment reflects an assessment of the overall costs (estimated tax charges and trading costs that may be incurred by the fund and the estimated bid/offer spread of the assets in which the Sub-fund invests) incurred in buying or selling investments to satisfy, respectively, net subscriptions or net redemptions of shares (understanding that a Sub-fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations). The NAV price will be adjusted upwards when net dealing in Sub-fund shares is positive (net subscription), and will be adjusted downwards when net dealing in Sub-fund shares is negative (net redemption).

Swing pricing is intended to reduce the impact of these costs on shareholders who are not dealing their shares at that time, and is impacting the shareholders who are dealing their shares by adjusting their NAV price by the swing factor. To the extent that markets have different charging structures on the buy and sell side, the swing factor may not be equal for net subscriptions or net redemptions.

The Board of Directors also delegated to the Management Company the decision-making regarding the correct application and level of swinging single pricing methodology. Although all Sub-funds may be subject to swing pricing, thresholds and swing factors, as fixed by the Management Company can vary by Sub-fund. Under normal market conditions, the adjustment swing factor will not be larger than 1.75% (2.00% as from 17 December 2021) of what the NAV would otherwise be for all share classes within a Sub-fund.

The Management Company determined that a swing pricing mechanism will be applied to the calculation of the Net Asset Value of the following Sub-fund:

Nordea 2 - Emerging Market Local Debt Enhanced Fund

As at year end, no swing pricing was applied.

Note 11 – Transaction fees

The transaction fees are in principle the sum of broker expenses and bank commissions.

The transaction related costs, as disclosed in the table below and in the Statement of Operations and Changes in Net Assets, include the bank commissions and the broker fees on derivatives.

The broker costs, as disclosed in the table below, are the expenses and stock exchange taxes (where applicable) billed by the broker directly and paid to him in settlement of shares, bonds and options. They are registered as integral part of the cost price at the same time as the transaction itself.

Name of Sub-fund	Currency	Broker costs in Sub-fund base currency	Transaction related costs in Sub-fund base currency
Nordea 2 - Emerging Market Local Debt Enhanced Fund	USD	15,051.23	13,044.60

Note 12 – Dividend distribution

The Company has distributed annual dividends at ex-date 27 April 2021 and pay date at 30 April 2021, as disclosed in the Report of the Board of Directors of the previous reporting year.

Note 13 – Subsequent events

J.P. Morgan Bank Luxembourg S.A., acting as the depositary of the Company, merged into J.P. Morgan AG, which at the same time changed its legal form from a German Stock Corporation (Aktiengesellschaft) to a European Company (Societas Europaea), being J.P. Morgan SE (the "Merger"), with effect from 22 January 2022. As a result of the Merger, the Company's depositary changed its name to J.P. Morgan SE, Luxembourg Branch.

Note 14 – Performance calculation

The performance is calculated in accordance with the Swiss Funds & Asset Management Association guidelines dated May 16, 2008 and is calculated using the following general formula:

$$\text{Performance \%} = \left\{ \frac{\text{NAV}_{\text{End P}} \times f_1 \times f_2 \dots f_n}{\text{NAV}_{\text{Start P}}} - 1 \right\} \times 100$$

$\text{NAV}_{\text{End P}}$ Net asset value per unit at end of observation period

$\text{NAV}_{\text{Start P}}$ Net asset value per unit at start of observation period (i.e. the last figure for the preceding observation period)

f_1, f_2, \dots, f_n Adjustment factors for distributions, where:

$$f = \frac{\text{NAV}_{\text{ex}} + \text{gross distribution}}{\text{NAV}_{\text{ex}}}$$

NAV_{ex} Net asset value per unit ex dividend

Gross distribution Gross amount of income and capital gains distributed per unit to investors

Shareholder's Information

The following documents may be obtained free of charge and as hard copy at the registered office of the Company, the Management Company or the Representatives and Paying Agents during their respective business days:

- the Articles of the Company;
- the Prospectus of the Company;
- the Key Investor Information Documents of the Company;
- the Application Form;
- the periodical financial reports;
- the marketing documents made available from time to time.

An up-to-date version of the KIIDs will be made available on nordea.lu.

The following documents may be consulted at the registered office of the Company or the Management Company during their respective business days:

- the Management Company Agreement between the Company and the Management Company;
- the Depositary and Custodian Agreement between the Company, the Management Company and J.P. Morgan SE.

Notices for all general meetings of the Shareholders are mailed to holders of registered shares of the Company and are available on nordea.lu

Subscriptions can only be received on the basis of the current Prospectus accompanied by the latest Annual Report as well as by the latest Semi-Annual Report if published after the latest Annual Report.

Risk Transparency disclosures (unaudited)

General

The Management Company uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the Sub-funds at any time.

In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the CSSF the Management Company reports to the CSSF on a regular basis on the risk management process.

The Management Company assures, on the basis of appropriate and reasonable methods, that the overall risk, associated with derivatives, does not exceed the net asset value of the portfolio. The Management Company uses the following methods:

- **The Commitment approach:** the positions on derivative financial instruments are converted into equivalent positions in the underlying assets, after consideration of all netting and coverage effects.
- **The Value-at-Risk (VaR) approach:** The VaR is a mathematical-statistical concept and is used as a standard measure of risk in the financial sector. The VaR represents the potential loss of a portfolio over a given period (so-called holding period) for a certain probability (so-called confidence level). The VaR is measured at the whole Sub-fund level, on a holding period not exceeding one month (20 business days) and a confidence level not below 95%,
 - **Relative VaR approach:** The relative VaR concept determines the VaR based on a reference portfolio. The relative VaR cannot exceed the VaR of a reference portfolio by more than 100%, i.e. two times the reference VaR (200%). The reference portfolio is a matching portfolio in comparison to the Sub-fund's investment policy.
 - **Absolute VaR approach:** In the absolute VaR approach the VaR (min. 95% confidence level, max. 20-day holding period) of the Sub-fund cannot exceed 20% of the Sub-fund net assets (99% confidence level, 20-day holding period). The maximum limit of 20% is adjusted accordingly, when different holding periods or confidence levels are applied. Information of the applicable maximum limit is provided.

VaR add ons:

For Sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected level of leverage is explicitly not understood as an investment limit.

The Board of Directors decides on the implementation of the adequate methodology to calculate the global exposure for each of the Sub-funds within Nordea 2, SICAV. This methodology may vary from one Sub-fund to another. The Sub-fund Nordea 2 - Emerging Market Local Debt Enhanced Fund apply Commitment approach for measuring the global exposure.

Remuneration disclosures (unaudited)

A) General

The Management Company has implemented a Remuneration Policy, based on that of Nordea Group, that is consistent with, and promotes, sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the funds. The Management Company has committed to ensuring that all individuals subject to the Policy - which includes the Management Company's directors, managers and employees - will comply with the Policy.

The Remuneration Policy integrates governance, a pay structure that is balanced between fixed and variable components, and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the Management Company, the fund and the shareholders, with respect to such considerations as business strategy, objectives, values and interests, and include measures to avoid conflicts of interest. The Management Company ensures that the calculation of any variable remuneration is based on the applicable multi-year performance of the relevant fund and that the actual payment of such remuneration is spread over the same period. Employees in control functions do not receive variable remuneration.

Performance is assessed both, on the level of Nordea Group and at Management Company level. Individual staff assessments are based on a weighting of financial and non-financial targets linked to the specific job scope and role. As such, the principle of individual performance assessment is based on an assessment of objectives reached as well as an appreciation of the employee's long-term value creation. Furthermore, the performance reflects an assessment of business and interpersonal skills and is linked to the achievement of the individual. The criteria applied to establish fixed remuneration are job complexity, level of responsibility, professional experience and local market conditions.

The Policy is formulated by a remuneration committee and approved by the Board of Directors of the Management Company. The Policy follows a defined process establishing the principles, the approval, communication, implementation, review and update of the Policy which involves the Board of Directors, as well as Senior Management, Human Resources, Internal Audit and other control functions.

B) Methodology

Considering the functional setup of the Management Company in the context of its role as UCITs and AIFs management company, the below information represents a proportion of the total staff remuneration within the Management Company as attributable to all the funds under management, taking into account non-UCITs and UCITs alike, in relation to the total net assets of the Company, and including delegates of entities to which the Management Company has delegated portfolio management functions (the "Delegates"). Under the methodology the average number of staff considered amounted to 340 including Senior Management.

Remuneration reporting as at 31 December 2021:

Fund	Total Remuneration (EUR) including any Delegates		Senior Management (EUR)
	Fixed	Variable	
Nordea 2, SICAV	4,585,880.95	1,820,262.94	156,978.54

Disclosures under the Securities Financing Transaction Regulation (unaudited)

Based on the analysis conducted by the Management Company, the scope of these disclosures covers the transactions in total return swaps, contracts for difference and repurchase transactions.

There was no such position in portfolio at year end for the Company.

Disclosures under the Sustainable Finance Disclosure Regulation (unaudited)

Article 6 Sub-funds
